*This figure does not include the cost estimate for **H.R. 3232** (To reauthorize certain school lunch and child nutrition programs for fiscal year 2004), which the House passed during the week of October 27-31, 2003. Although the RSC has its own estimate of the authorizations in the bill, we are waiting on a soon-to-be-available, official estimate from CBO, at which point The Money Monitor will be updated accordingly.

#This figure has been adjusted to correct the \$10 million cost erroneously included last week for a bill (H.R. 2359—Basic Pilot Extension Act) that did not pass.

An authorization (otherwise known as “discretionary spending”) explicitly allows funding for a certain program and / or directs a federal agency to take a certain action. Authorizations express the House’s *intent* to spend, however, actual funding is provided through the annual appropriations process. **Authorizations with no net cost, bills that would result in no significant net change in mandatory spending or federal revenue, and private-sector costs from federal mandates are not reported here.**

Mandatory spending directly establishes an appropriation. No subsequent action is required for the money to be spent.

The figures for revenue changes are from “static” estimates by the Joint Committee on Taxation or the Congressional Budget Office. That is, they do not take into account the stimulative effects that tax cuts and other revenue reductions have on the national economy.

All numbers in “The Money Monitor” are positive unless otherwise indicated.

The costs of conference reports are not recorded here. “The Money Monitor” only accounts for the costs of bills as they **first** pass the House (with the exception of bills that contain major cost-related changes upon subsequent House passage—yet BEFORE Senate passage). In short, “The Money Monitor” tracks the House’s *original* monetary intent.
