7 (2) is more cost effective.

8 (c) COMPLETION OF EXISTING ORDERS.—Subsection

2 eration for conversion to contractor performance of those
3 commercial services and functions at military installations
4 that have been converted to contractor performance at a
5 rate of 50 percent or more, as determined under sub-
6 section (c).

7 “(2) A separate standard form shall be developed for
8 each service and function covered by paragraph (1) and
9 the forms shall be used throughout the Department of De-

21 ments and requests for proposals shall not apply with re-
22 spect to the conversion to contractor performance at a
23 military installation of a service or function for which a
24 standard form is required under subsection (a).

1 “(c) DETERMINATION OF CONTRACTOR PERFORM-
2 ANCE PERCENTAGE.—In determining the percentage at
3 which a particular commercial service or function at mili-
4 tary installations has been converted to contractor per-
5 formance, the Secretary of Defense shall take into consid-
6 eration all military installations and use the final estimate
7 of the percentage of contractor performance of services
8 and functions contained in the most recent commercial
9 and industrial activity inventory database established
10 under Office of Management and Budget Circular A-76.

11 “(d) EFFECT ON OTHER LAWS.—Nothing in this sec-

15 performed by civilian employees of the Department of De-
16 fense.

17 “(e) MILITARY INSTALLATION DEFINED.—In this
18 section, the term ‘military installation’ means a base,
19 camp, post, station, yard, center, homeport facility for any

25 able for examination; and

1 “(4) contain a timetable for completing conver-

21 contract or extension, but not to exceed five years, cost
22 information data regarding performance of the service or
23 function by private contractor employees. The Secretary

9 military department may convey a utility system, or part
10 of a utility system, under the jurisdiction of the Secretary
11 to a municipal, private, regional, district, or cooperative
12 utility company or other entity. The conveyance may con-
13 sist of all right, title, and interest of the United States
14 in the utility system or such lesser estate as the Secretary
15 considers appropriate to serve the interests of the United
16 States.

17 “(b) UTILITY SYSTEM DEFINED.—In this section,
18 the term ‘utility system’ includes the following:

19 “(1) Electrical generation and supply systems.

20 “(2) Water supply and treatment systems.

21 “(3) Wastewater collection and treatment sys-
22 tems.

23 “(4) Steam or hot or chilled water generation
24 and supply systems.

25 “(5) Natural gas supply systems.

1 “(6) Sanitary landfills or lands to be used for
2 sanitary landfills.

6 conveyance under subsection (a) in the form of a cash pay-
7 ment or a reduction in utility rate charges for a period
8 of time sufficient to amortize the monetary value of the
9 utility system, including any real property interests, con-
10 veyed.

11 “(2) Cash payments received shall be credited to an
12 appropriation account designated as appropriate by the
13 Secretary of Defense. Amounts so credited shall be avail-
14 able for the same time period as the appropriation credited
15 and shall be used only for the purposes authorized for that
16 appropriation.

17 “(d) CONGRESSIONAL NOTIFICATION.—A conveyance
18 may not be made under subsection (a) until—

19 “(1) the Secretary of the military department
20 concerned submits to the appropriate committees of
21 Congress (as defined in section 2801(c)(4) of this
22 title) a report containing an economic analysis
23 (based upon accepted life-cycle costing procedures)
24 which demonstrates that the full cost to the United
25 States of the proposed conveyance is cost-effective

1 when compared with alternative means of furnishing
2 the same utility systems; and

3 “(2) a period of 21 days has elapsed after the
4 date on which the report is received by the commit-
5 tees.

6 “(e) **ADDITIONAL TERMS AND CONDITIONS.**—The

16 **TITLE III—ENVIRONMENTAL**
17 **REFORMS**
18 **Subtitle A—Superfund Reforms**
19 **Generally**

20 **SEC. 301. REVISION OF METHODS OF REMEDIATION.**

21 Section 121(b) of the Comprehensive Environmental
22 Response, Compensation, and Liability Act of 1980 (42
23 U.S.C. 9621(b)) is amended by striking out paragraphs
24 (1) and (2) and inserting in lieu thereof the following:

1 “(1) METHODS OF REMEDIATION.—(A) Rem-
2 edies selected at individual facilities shall be protec-
3 tive of human health and the environment and pro-
4 vide a cost-effective treatment to achieve a level of
5 remediation that permits the reasonably anticipated
6 future land uses at the facility. A remedial action
7 may achieve protection of human health and the en-
8 vironment through—

9 “(i) treatment that reduces the toxicity,
10 mobility, or volume of hazardous substances,
11 pollutants, or contaminants;

12 “(ii) containment or other engineering con-
13 trols to limit exposure;

14 “(iii) a combination of treatment and con-
15 tainment; or

16 “(iv) other methods of protection.

17 “(B) The method or methods of remediation
18 appropriate for a given facility shall be determined
19 through the evaluation of remedial alternatives and
20 the selection process under paragraph (2). When de-
21 termining the appropriate remedial method, treat-
22 ment is to be preferred for hot spots as defined
23 under paragraph (2)(C).

24 “(2) APPROPRIATE REMEDIAL ACTION.—

1 “(A) IN GENERAL.—The President shall
2 identify and select an appropriate remedy that
3 minimizes exposures by comparing alternative
4 remedies and balancing the following factors
5 with respect to each such remedy:

6 “(i) The effectiveness of the remedy,
7 including its implementability.

8 “(ii) The long-term reliability of the
9 remedy, that is, its capability to achieve
10 long-term protection of human health and
11 the environment considering the preference
12 for treatment of hot spots.

13 “(iii) The short-term risk posed by
14 the implementation of the remedy to the
15 affected community, to those engaged in
16 the cleanup effort, and to the environment.

17 “(iv) The acceptability of the remedy
18 to the affected community.

19 “(v) The reasonableness of the cost of
20 the remedy.

21 “(vi) The results of any risk assess-
22 ments conducted with respect to the rem-
23 edy.

24 “(vii) The costs, both direct and indi-
25 rect, of the remedy.

1 “(B) DEFERRAL OF REMEDIAL ACTION.—
2 The President may defer the selection of a re-
3 medial action if the President determines
4 that—

5 “(i) the hazardous substance, pollut-
6 ant, or contaminant can be contained in a
7 manner sufficient to protect human health
8 and the environment; and

9 “(ii) an innovative technology is ex-
10 pected to be available in the near future
11 that will provide a more cost-effective rem-
12 edy.

13 “(C) HOT SPOTS.—The following shall
14 apply to the remediation of hot spots:

15 “(i) For purposes of this section, the
16 term ‘hot spot’ means a discrete area with-
17 in a facility that contains hazardous sub-
18 stances, pollutants or contaminants (I)
19 that are present in high concentrations,
20 are highly mobile, and cannot be reliably
21 contained; or (II) that would present a sig-
22 nificant risk to human health or the envi-
23 ronment. The President shall develop
24 guidelines for the identification of hot
25 spots. Such guidelines shall recommend ap-

1 appropriate field investigations that will not
2 require extraordinarily complex or costly
3 measures.

4 “(ii) In determining an appropriate
5 remedy for hot spots, the President shall
6 consider the factors under subparagraph
7 (A). With respect to the factor in clause
8 (v) of subparagraph (A), the President
9 shall use a higher threshold for evaluating
10 the reasonableness of costs for hot spot
11 treatment relative to the remediation of
12 non-hot spot materials.

13 “(iii) The President shall select a
14 remedy requiring treatment of materials
15 constituting hot spots to the maximum ex-
16 tent practicable, consistent with the protec-
17 tion of human health and the environment.
18 In such instances, the President shall se-
19 lect an interim containment remedy for
20 such hot spot subject to adequate monitor-
21 ing and public reporting to ensure its con-
22 tinued integrity and shall review the in-
23 terim containment remedy in accordance
24 with subsection (c). When the appropriate
25 treatment technology becomes available, as

1 determined by the President, that remedy
2 shall be considered in accordance with this
3 section.

4 “(iv) Notwithstanding the presence of
5 a hot spot, the President may select a final
6 containment remedy for hot spots at land-
7 fills and mining sites or similar facilities
8 under the following circumstances:

9 “(I) The hot spot is small rel-
10 ative to the overall volume of waste or
11 contamination being addressed, the
12 hot spot is not readily identifiable and
13 accessible, and without the presence
14 of the hot spot containment would
15 have been selected as the appropriate
16 remedy under subparagraph (A) for
17 the larger body of waste or area of
18 contamination in which the hot spot
19 is located.

20 “(II) The volume and areal ex-
21 tent of the hot spot is extraordinary
22 compared to other facilities, and it is
23 highly unlikely due to the size and
24 other characteristics of the hot spot
25 that any treatment technology will be

1 developed that could be implemented
2 at reasonable cost.

3 Where final containment for a hot spot is selected,
4 the President shall publish an explanation of the
5 basis for that decision.

6 “(3) GENERIC REMEDIES.—In order to stream-
7 line the remedy selection process and to facilitate
8 rapid voluntary action, the President shall establish,
9 taking into account the reasonably anticipated fu-
10 ture land uses at the facility and the factors enu-
11 merated in paragraph (1)(A)(i), cost-effective ge-
12 neric remedies for categories of facilities, and expe-
13 dited procedures that include community involve-
14 ment for selecting generic remedies at an individual
15 facility. To be eligible for selection at a facility, a ge-
16 neric remedy shall be protective of human health
17 and the environment at that facility. In appropriate
18 cases, the President may select a generic remedy
19 without considering alternatives to the generic rem-
20 edy.

21 “(4) INSTITUTIONAL CONTROLS.—Whenever
22 the President selects a remedial action which relies
23 on restrictions on the use of land, water, or other re-
24 sources to achieve protection of human health and
25 the environment, the President shall specify the na-

1 ture of the restrictions required to achieve such pro-
2 tections, including restrictions on the permissible
3 uses of land, prohibitions on specified activities upon
4 the property, restrictions on the drilling of wells or
5 the use of ground water, or restrictions on the use
6 of surface water, and may ensure that such restric-
7 tions are incorporated into a hazardous substance
8 easement. In reviewing remedial action alternatives
