Subject: "Intelligent Design"

Dear Congressman Delahunt,

I am not sure if you have become involved in the current debate over "Intelligent Design", but I would like to express my opinion to you so that you will know where I stand. I am fully in favor of teaching "Intelligent Design" in our nation's schools, as long as ALL theories are presented equally. In other words, I think that this is fine, as long as we present theories from Christianity, Judaism, Islam, Bhuddism, Taoism, Animism, Wiccan, Native American beliefs, and any other group that I may have neglected to list. I think that a course of this nature would expose our children to the widest variety of theories and would allow them to decide what, if any, religious theories they wanted to follow. I am sure that our RIGHT-WING FUNDAMENTALIST CHRISTIAN "BROTHERS" wouln be fully in favor of these teachings, as I am sure that they want to arrive at the truth and don't have a bigoted bone in their rabid right-wing bodies!!!

Please make every effort you can to ensure that the students in this wonderful country of ours don't have to dilute their scientific education with heavy doses of religious dogma at the expense of their actuall learning of something that will help bring us back to innovative leadership in the world of today.

Thank you for your time and interest.

Sincerely,

████████████

Brewster, MA 02631
