Subject: freezing federal salaries

Mr. Delahunt i am writing to your office to express my feelings on the current proposal to freeze federal salaries. i being an air traffic controller and am completely against the idea of freezing the salaries of federal employees to help defray the rebuilding costs associated with the natural disasters the country has gone thru this year. maybe a better idea would be to find a way for each and every american to help some way instead of singling out a group of people (federal salaried workers) to help recover some of the money spent during the disasters....thank you , from a constituent [REDACTED]
