

SENATE PAYGO RULE

- **New mandatory spending and tax cuts must be offset or get 60 votes**

Strong Paygo Rule Helped Turn Deficits to Surplus in 1990's

Note: FY 2000 GOP budget resolution weakened Senate paygo rule to allow on-budget surpluses to offset tax cuts and spending increases. GOP blocked renewal of statutory paygo at end of FY 2002. FY 2004 GOP budget resolution further weakened Senate paygo rule by exempting all tax cuts and spending increases in any budget resolution. Democratic Majority restored strong Senate and House paygo rules in 2007.

PAYGO is Working

- **Senate paygo “scorecard” still has positive balance of \$450 million**
- **Every bill coming out of conference this year has been paid for (or more than paid for)**
- **Paygo also has significant deterrent effect – preventing many costly bills from ever being offered**

Senator Gregg on Restoring PAYGO

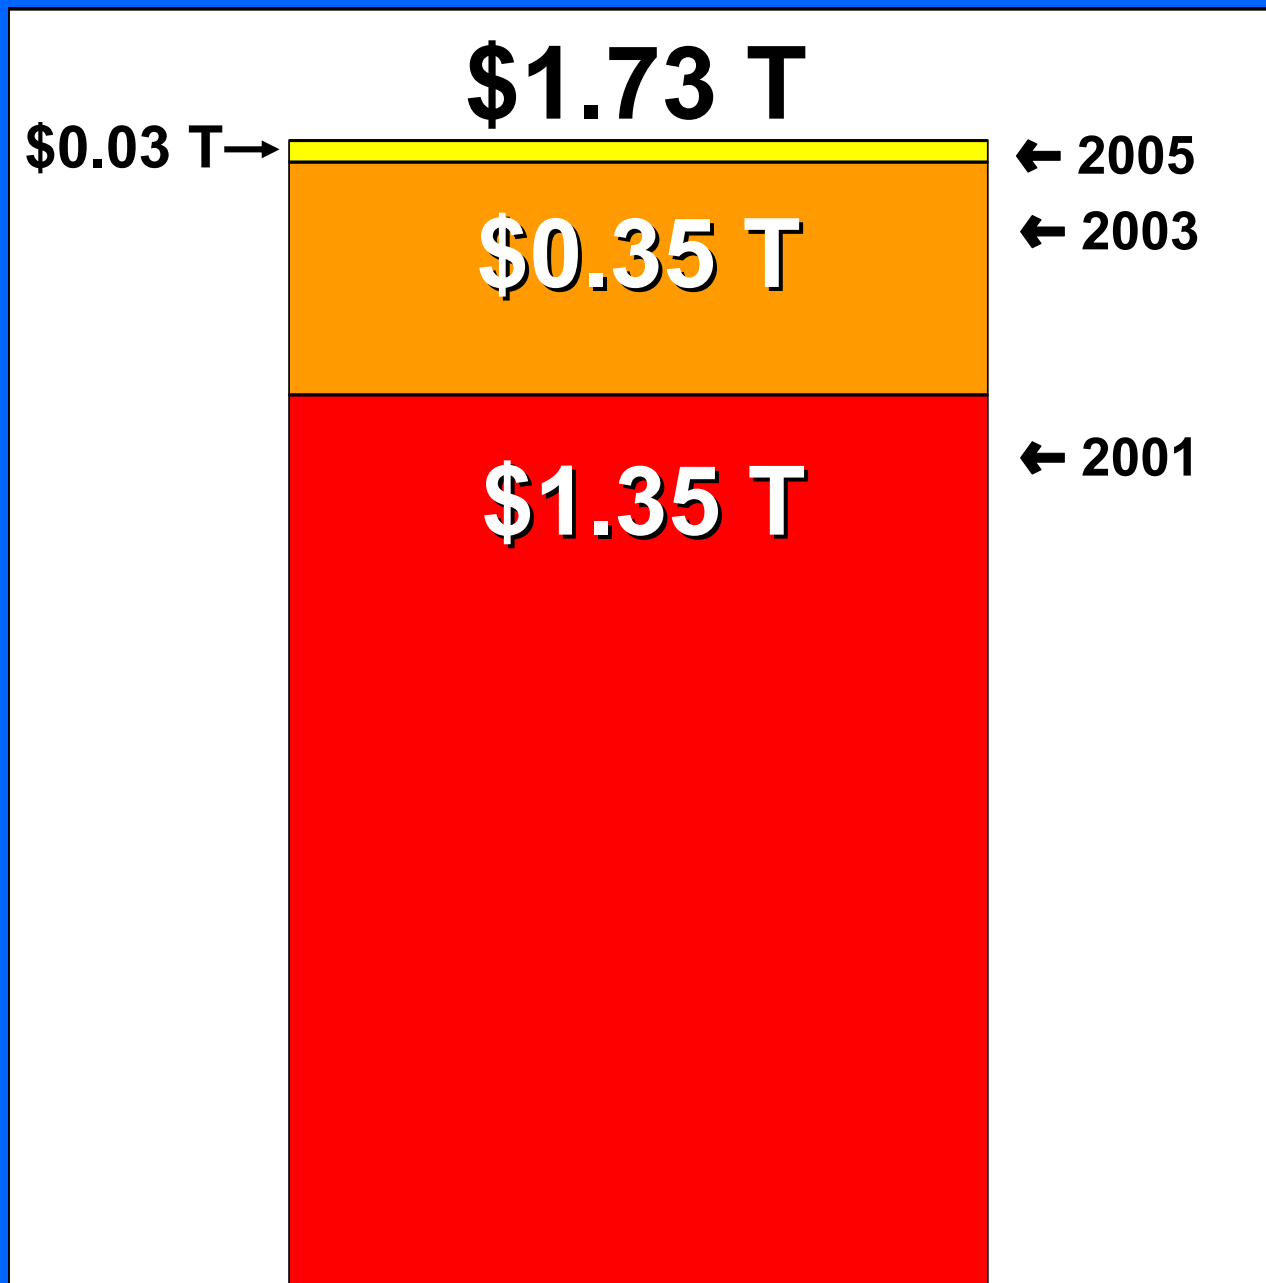

“The second budget discipline, which is pay-go, essentially says if you are going to add a new entitlement program or you are going to cut taxes during a period, especially of deficits, you must offset that event so that it becomes a budget-neutral event that also lapses.

“... If we do not do this, if we do not put back in place caps and pay-go mechanisms, we will have no budget discipline in this Congress, and, as a result, we will dramatically aggravate the deficit which, of course, impacts a lot of important issues, but especially impacts Social Security.”
