

111TH CONGRESS
1ST SESSION

H. R. 1875

To establish an Emergency Commission To End the Trade Deficit.

IN THE HOUSE OF REPRESENTATIVES

APRIL 2, 2009

Mr. DEFAZIO (for himself, Ms. SLAUGHTER, Ms. KAPTUR, and Mr. MASSA)
introduced the following bill; which was referred to the Committee on
Ways and Means

A BILL

To establish an Emergency Commission To End the Trade
Deficit.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “End the Trade Deficit
5 Act”.

6 **SEC. 2. FINDINGS.**

7 The Congress makes the following findings:

8 (1) In 1998, the United States trade balance
9 was \$166,140,000,000, leading the Congress to au-
10 thorize the Trade Deficit Review Commission. The

1 Commission was tasked to study “the nature,
2 causes, and consequences of the United States mer-
3 chandise trade and current account deficits”.

4 (2) In 2007, the trade deficit ballooned to
5 \$700,258,000,000. And in 2006, the United States
6 amassed the largest negative trade balance in its his-
7 tory, amounting to \$753,283,000,000.

8 (3) The United States has had 32 years of con-
9 secutive annual trade deficits, totaling
10 \$6,432,445,000,000. And in the last ten years, the
11 annual trade balance has increased by a magnitude
12 of seven.

13 (4) The positive net international asset position
14 that the United States built up over 100 years was
15 eliminated in the 1980s. The United States today
16 has become the world’s largest debtor nation, with a
17 net debt of more than \$2,441,800,000,000.

18 (5) In recent times, the trade deficit has re-
19 tarder growth in the Nation’s gross domestic prod-
20 uct, increased the costs of servicing higher net for-
21 eign debt, and made the United States more depend-
22 ent on international financial considerations.

23 (6) The United States merchandise trade deficit
24 is characterized by large bilateral trade imbalances
25 with a handful of countries. In 2007, 15 countries

1 accounted for 75 percent of the United States trade
2 deficit in goods. The People's Republic of China,
3 Canada, Mexico, and Japan account for one-half of
4 the trade deficit alone.

5 (7) The United States manufacturing sector
6 employed 13,919,000 people in 2007. But decline in
7 manufacturing has meant the United States has lost
8 3,718,000 manufacturing jobs since 1998.

9 (8) Elimination of the United States trade def-
10 icit by the year 2019 would support millions of addi-
11 tional manufacturing jobs in the United States.

12 (9) While the United States has one of the
13 most open borders and economies in the world, the
14 United States faces significant tariff and nontariff
15 trade barriers with its trading partners. Current
16 overall trade balances do not reflect the actual com-
17 petitiveness or productivity of the United States
18 economy. Instead, they demonstrate the underlying
19 structural nature of the trade deficits.

20 (10) The United States is once again at a crit-
21 ical juncture in trade policy development. The struc-
22 tural nature of the United States trade deficit and
23 its persistent growth must be reversed. The causes
24 and consequences of the trade deficit must be docu-
25 mented and a plan must be developed to eliminate

1 the merchandise trade deficit within the next 10
2 years.

3 **SEC. 3. ESTABLISHMENT OF COMMISSION.**
