The Federal Housing Administration Fund currently consists of four separate insurance funds.

In order to present more clearly the operations of the various funds, FHA's budget transactions are separated into two major business segments. The basic single family insurance programs, including the Condominium, Section 203(k) rehabilitation, and Home Equity Conversion Mortgage programs, in the Mutual Mortgage Insurance (MMI) fund and the multifamily Cooperative Management Housing Insurance (CMHI) funds form one segment. All other multifamily and other specialized insurance programs are in the General Insurance and Special Risk Insurance funds (GI/SRI).

The Federal Credit Reform Act of 1990 creates a structure of three accounts for existing credit programs. For each of the FHA business segments (MMI/CMHI and GI/SRI) there is a liquidating account, which records the revenues and costs associated with loan insurance committed prior to October 1, 1991; a financing account which records the revenues and costs associated with commitments to insure loans made after September 30, 1991; and, a program account which records the transactions associated with the program subsidy costs, if any, and the costs of administering the program.

This liquidating account records, for this program, all cash flows to and from the Government resulting from MMI/CMHI loans insured prior to 1992 and is shown on a cash basis. All new activity in this program in 1992 and thereafter (including modifications of loans insured in any year) is recorded in the corresponding program (86-0183) and financing (86-4587 and 86-4242) accounts.

In 2002, the MMI Capital Reserve account was established to maintain reserves required by statute that were previously deposited in the liquidating account.

The program activity in the "Program Highlights" table shown below reflects only the activity in the MMI/CMHI liquidating and financing accounts. The GI/SRI program activity can be found with the GI/SRI liquidating account (86-4072) and financing account (86-4077).

This account includes budget authority and outlays for FHA's General Insurance and Special Risk Insurance Fund programs requiring positive credit subsidies, including credit subsidy reestimates and modifications. In 2009 the Department consolidated the bulk of new issuance activity for FHA single family programs under the Mutual Mortgage Insurance (MMI) Fund, pursuant to the Housing and Economic Recovery Act of 2008 (P. L. 110-289), shifting several programs—including condominium mortgage insurance and Home Equity Conversion Mortgage (HECM) insurance—that had previously been administered through this account into the MMI Fund. The Budget does not provide positive credit subsidy funding for 2011 and this account no longer receives appropriations for administrative contract costs, which were moved to the MMI Fund in 2010. The Budget assumes that HUD will administratively suspend the Section 238(c) program in 2011. The Section 238(c) program provides single family mortgage insurance similar to MMI for a small number of families in areas affected by military installations. The elimination of Section 238(c) will not negatively impact the availability of FHA insured financing in the six counties currently covered under this program.

As required by the Federal Credit Reform Act of 1990, this account records the subsidy costs associated with loan guarantees committed or direct loans obligated in 1992 and thereafter. The subsidy amounts are estimated on a present value basis.

As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from loan guarantees committed in 1992 and thereafter (including modifications of loan guarantees that resulted from commitments in any year) for FHA's General and Special Risk Insurance Fund programs. The amounts in this account are a means of financing and are not included in the budget totals. As required by the Federal Credit Reform Act of 1990, no administrative expenses can be recorded in the financing account.

The Housing for the Elderly or Handicapped Loan Fund was established pursuant to section 202 of the Housing Act of 1959, as amended. The fund provided direct loans to non-profit organizations sponsoring the construction and management of rental housing for the elderly or non-elderly persons with disabilities. No new loan commitments were made after 1991. However, projects developed under it continue to operate. After April 1, 1992,

all projects for which there were administrative reservations converted to the capital advance assistance program. Any remaining activity for the loan program includes amendments for projects reaching final endorsement.

As required by the Federal Credit Reform Act of 1990, this account records all cash flows to and from the Government resulting from this program.

The National Manufactured Housing Construction and Safety Standards Act of 1974, as amended by the Manufactured Housing Improvement Act of 2000, authorizes development and enforcement of appropriate standards for the construction, design, and performance of manufactured homes to assure their quality, durability, affordability, and safety. All manufactured homes produced, since the standards took effect on June 15, 1976, must comply with Federal construction and safety standards. States are actively encouraged to participate in the program under compliance plans approved by HUD. New program requirements mandated by the Manufactured Housing Improvement Act of 2000 include procurement of an Administering Organization, formation of a Consensus Committee to recommend revisions to and interpretations of the manufactured housing standards, development and implementation of standards for installation of manufactured housing, and development and implementation of a dispute resolution program.

Fees are charged to the manufacturers for each manufactured home transportable section produced and may be charged to any dispute resolution and installation program participant. The Budget proposes approximately \$7 million in fees and appropriations of \$7 million to fund the costs of authorized activities necessary to carry out all aspects of the manufactured housing legislation. Fees are deposited in a trust fund administered by the Department, and a portion of the fee receipts are used to defray the direct administrative expenses of the program. The requested direct appropriation will offset the effect of declining fee revenue caused by a substantial reduction in manufactured housing production rates.

## GOVERNMENT NATIONAL MORTGAGE ASSOCIATION

The Government National Mortgage Association (GNMA) was formed by Congress in 1968. It is a wholly owned government corporation within the U.S. Department of Housing and Urban Development (HUD). It was established to support Federal housing initiatives by providing liquidity to the secondary mortgage market and to attract capital from the global capital markets for the nation's mortgage markets. Its primary function is to guarantee the timely payment of principal and interest on Mortgage-Backed Securities (MBS) that are backed by loans insured or guaranteed by the Federal Housing Administration (FHA), the Department of Veterans Affairs (VA), Rural Development in the U.S. Department of Agriculture, and HUD's Office of Public and Indian Housing.

The Helping Families Save Their Homes Act of 2009 amends the National Housing Act, providing for key changes in the HOPE for Homeowners (H4H) program. These changes are effective for endorsements on or after January 1, 2010. These amendments include more underwriting flexibility and lower premia and ap-

preciation sharing assessments. As a result of these changes, GNMA will experience a higher level of securitization.

The Budget requests \$61 million for fair housing activities to support efforts to end housing discrimination. Of the amount requested, \$28.5 million is for the Fair Housing Assistance Program (FHAP) and \$32.6 million is for the Fair Housing Initiatives Program (FHIP).

This funding includes \$2 million for a pilot program to fund fair housing agencies to assist jurisdictions with their duty to affirmatively further fair housing, which requires jurisdictions to analyze impediments (AI) to fair housing choices within their geographical boundaries and develop a plan to address those impediments. Fair housing groups provide invaluable assistance to jurisdictions in preparing a comprehensive and objective AI. Fair housing groups may perform discrimination testing as part of the AI; demographic analysis on the racial and national origin composition of the community; and/or strategic planning to address those impediments.

FHAP, authorized by Title VIII of the Civil Rights Act of 1968 as amended, provides funding to State and local agencies to assure prompt and effective processing of Title VIII (Civil Rights Act of 1968) complaints. To be eligible for assistance through FHAP, an agency must demonstrate that the fair housing law it administers is substantially equivalent to the Fair Housing Act. It is estimated that there will be a total of 107 FHAP agencies in 2011. The funding requested for FHAP will support fair housing enforcement by funding State and local fair housing or-

ganizations to meet the needs of currently underserved populations. It will also address the persistently high rate of discrimination against minorities as identified by HUD's 2000 Housing Discrimination Study.

FHIP, authorized by the Housing and Community Development Act of 1987, as amended by the Housing and Community Development Act of 1992, provides funding to States and local governments, and to public and private non-profit organizations that administer programs to prevent or eliminate discriminatory housing practices. FHIP also provides funding to programs and activities designed to enforce the rights granted by Title VIII of the Civil Rights Act of 1968, or substantially equivalent State and local fair housing laws. In addition, FHIP supports funding for education and outreach programs designed to inform the public concerning rights and obligations under these laws.

Title X of the Housing and Community Development Act of 1992 (Public Law 102-550), known as the Residential Lead-Based Paint Hazard Reduction Act, authorized the Secretary to establish the Lead-Based Paint Hazard Control Grant Program. The primary purpose of the program is to reduce the exposure of young children to lead-based paint and other environmental hazards in their homes, including protecting them from permanent developmental problems and asthma, and exposure to pesticides and carbon monoxide.

The program is a major part of addressing the number one environmental disease impacting children, lead poisoning. The Budget includes \$96 million for HUD's Lead Hazard Control Program competitive grants, \$40 million for the Healthy Homes Initiative, and \$4 million for Technical Studies. The Budget includes a provision that would allow the transfer of unobligated balances and recaptured funds from undersubscribed competitive programs to other competitive programs experiencing oversubscription. HUD will be requesting authorizing language granting the Secretary authority to carry out investigations, administer oaths, and subpoena documents related to lead hazard investigations.

The Lead Hazard Control Grant Program provides grants of \$1 million to \$4 million to State and local governments and Indian tribes for control of lead-based paint hazards in low-income rental and owner-occupied housing. The grants are also designed to stimulate the development of a housing maintenance and rehabilitation workforce trained in lead-safe work practices and a certified hazard evaluation and control industry. In awarding grants, HUD promotes the use of new, low-cost approaches to hazard control that can be replicated across the nation. Newly-established programmatic efficiency measures, such as mitigation

cost estimates, will help HUD determine best practices and maximize resources.

The Healthy Homes Initiative will enable the Department to assess and control housing-related hazards that contribute to childhood diseases and injuries. The initiative will demonstrate and evaluate methods for controlling two or more housing-related diseases through a single intervention. A public education/out-reach effort designed to enable the public to prevent children's exposure to hazards will also be conducted.

The Office of Healthy Homes and Lead Hazard Control will continue its Technical Support program, which will include public education; support for State and local agencies, private property owners, HUD programs and field offices and professional organizations; technical studies to improve program policy and implementation; quality control to ensure that the evaluation and control of lead-based paint hazards is done properly in HUD-assisted housing; and development of standards, technical guidance, regulations and improved testing and hazard control methods.

The Administration, Operations and Management (AOM) account was created by the Consolidated Appropriations Act, 2008, which created nine new administrative expense accounts across the Department. As the largest single administrative account, AOM funds many central Departmental functions, including: the Office of the Chief Human Capital Officer (formerly the Office of Administration), the Office of the Chief Financial Officer, the Office of the Chief Procurement Officer, the Office of Departmental Operations and Coordination, the Office of the General Counsel, the Office of Field Policy Management, the Office of Sustainable Housing and Communities, the Office of Strategic Planning and Management, the Office of Departmental Equal Employment Opportunity, the Center for Faith-Based and Community Initiatives, and the new Office of the Chief Disaster and Emergency Management Officer. The Office of the Chief Disaster and Emergency Management Officer will provide central planning, communication, and coordination for HUD-wide disaster, emer-

gency response, and recovery activities. The AOM account also serves as the primary funding source for all non-personnel expenses, such as travel, overhead expenses (e.g., rent and utilities), contract services, and other functions. Included in the Budget is \$11 million to fund initial efforts to modernize and improve the energy efficiency of the HUD headquarters building in Washington, D.C.

The Executive Direction account was created by the Consolidated Appropriations Act, 2008, and contains a number of obligation sub-functions covering the salaries and expenses of various high-level management offices, including the immediate offices of the Secretary, Deputy Secretary, and Assistant Secretaries across the Department. The Budget proposes to restructure the Executive Direction account by removing the sub-function allocations. The administrative burden and lack of flexibility afforded by the sub-account structure outweighs the potential management benefits. The Budget also proposes the creation of the Office of

the Chief Operating Officer, which will provide leadership and comprehensive strategy for HUD's operations, including procurement, human resources and information technology.

SALARIES AND EXPENSES—Continued

Beginning with the passage of the Consolidated Appropriations Act, 2008, this account will no longer receive new appropriations. Instead, salary and expense activities are now spread across many accounts, achieving greater transparency and accountability within the Department. Resources remaining in this account reflect prior-year appropriations and otherwise unexpended amounts.

Formerly, this appropriation financed virtually all salaries, benefits, travel, contract expenses, and related administrative costs associated with administering the programs of the Department of Housing and Urban Development.

This appropriation provides agency-wide audit and investigative functions to identify and correct management and administrative deficiencies that create conditions for existing or potential in-

stances of fraud, waste, and mismanagement. The audit function provides internal audit and contract audit. Internal audits review and evaluate all facets of agency operations. The investigative function provides for the detection and investigation of improper and illegal activities involving programs, personnel, and operations. The Budget proposes \$122 million to maintain the existing staff level.

The Office of Federal Housing Enterprise Oversight (OFHEO) was authorized in the Federal Housing Enterprise Safety and Soundness Act of 1992. OFHEO was established to regulate the financial safety and soundness of two housing Government-

sponsored enterprises (GSEs), Fannie Mae and Freddie Mac. As required by the Housing and Economic Recovery Act (Pub. L. 110–289) of 2008, the Federal Housing Finance Agency (FHFA) assumed the role of housing GSE safety and soundness regulator and OFHEO was abolished on July 29, 2009.

The Working Capital Fund (WCF), authorized by the Department of Housing and Urban Development Act of 1965, finances the information technology business functions of the Department. The WCF provides funding for the operation and maintenance of IT systems in support of FHA Mortgage Insurance, housing assistance, grants programs, disaster relief, and core financial and general operations. The Budget requests a direct appropriation of \$243.5 million for IT business operations, infrastructure, and 295 personnel. An additional \$71.5 million in program transfers will augment the direct appropriations to support necessary systems that benefit specific programs. The Budget proposes to fund the development, modernization and enhancements of HUD's IT systems from the Transformation Initiative account.

The Department of Housing and Urban Development faces serious challenges arising from structural constraints, while the scope of housing and urban development problems facing the nation has never been greater. HUD needs flexibility to enable innovation, to increase the effectiveness of program and service delivery, and to adopt an evidence-based approach to improving program outcomes. Aggregating limited transfers will enable HUD to undertake an integrated, balanced, and cross-cutting effort to improve program performance.

The 2011 Budget provides \$20 million in the Transformation Initiative account for the Presidential Initiative to combat mortgage fraud. This is part of an agency-wide effort that draws upon a number of programs, resources and accounts. Examples of Transformation Initiative activities that may be implemented include: development of anti-fraud IT data tools that would be applied to all phases of the mortgage insurance process to detect misrepresentation at consumer, application, and property levels; technical assistance to support housing counseling organizations with identifying mortgage fraud and addressing fair lending issues and to help implement the SAFE Act and Real Estate Settlement Procedures Act; research and assessment of the implementation of the Neighborhood Stabilization Program to ensure it addresses the needs of minority and low-income communities, analysis of loans, and assessments of service compliance with FHA loss mitigation guidelines.

Within the broader Transformation Initiative, there are four initiatives that provide a systematic and crosscutting approach to transformation.

The Research, Evaluation and Program Metrics Initiative provides a predictable stream of funding for high quality research

and evaluation that will inform sound policymaking. The initiative will supplement Research and Technology appropriations that are mainly dedicated to funding housing data, such as the American Housing Survey. This initiative will fund program evaluation and research that is needed to ensure that program funds are spent effectively, as well as to develop appropriate metrics to track program performance between evaluations. The systemic and scientific approach enabled by the Research initiative will highlight those programs that are effective and those that require reform, so that timely modifications can occur.

The Program Demonstrations Initiative will enable HUD to design and execute a series of major research demonstrations that rigorously test new program innovations. Demonstrations can be used to explore fundamental questions about housing market dynamics and their impact on economic, social and environmental objectives. The demonstrations will improve programs, help state and local governments develop more effective strategies for housing and community and economic development, and improve the delivery and reduce the cost of public services. Transformation Initiative funds for approved demonstrations will be administered by the Office of Policy Development and Research.

The Technology Initiative will enable HUD to enhance current systems and develop modern, robust information technology solutions that better support the Department's programs and services. In recent years, insufficient funding has forced the Department to rely on outdated systems and has prevented the Department from utilizing modern tools to capture, store, analyze and disseminate information. Funds provided through the Technology Initiative will complement the funding for basic, steady-state maintenance and operations funded by the Working Capital Fund. HUD envisions three key areas of technology investment, which will provide for the development of systems and tools to: 1) collect, control, and store quality data in a timely manner and support the automation of manual processes; 2) improve HUD's ability to analyze data in support of management and policy decision-making; and 3) enable greater communication, sharing, and leveraging of information for internal and external stakeholders. These investments will support both program and support functions.

Technical Assistance set-asides are no longer requested in individual HUD program accounts ; instead, these amounts have been consolidated within the Transformation Initiative. Traditionally, HUD has delivered program-oriented technical assistance to ensure that HUD grantees are fully aware of the rules governing the disparate programs. While awareness of rules is necessary, effective responses to urban and housing challenges increasingly require coordination and awareness of diverse areas of knowledge: housing finance as well as land use, energy efficiency as well as healthy homes, community development as well as transportation planning, and accessibility as well as job creation. The Technical Assistance and Capacity Building Initiative will enable HUD to develop enhanced and focused support to deliver cross-program technical assistance for states, local governments, and other HUD grantees for more sophisticated program administration and integrated planning across programs and jurisdictions. HUD plans to provide well-packaged information, case studies that serve as models and illustrate choices, and collaboration opportunities. Integrating cross-cutting knowledge with program requirements will produce results while avoiding fraud, waste and abuse.

The Office of Strategic Planning and Management will have overall responsibility for program management oversight of all projects selected for this initiative.

The following table illustrates the *maximum* possible transfers from HUD's programs into the Transformation Initiative account. It does not represent actual transfers.

In addition to these four continuing initiatives, the 2011 Budget creates a central pool of funding for HUD salaries and expenses. The Budget requests authority for the Secretary to transfer a small amount—up to 1 percent—from each of HUD's salaries and expenses accounts. The use of these transferred funds is limited to personnel compensation and benefits. The central fund would provide targeted, temporary infusions of resources to HUD's program offices. More and more, HUD is relied on to carry out disaster recovery efforts and to quickly implement new programs. The salaries and expenses funds distributed through the Transformation Initiative will enable the Department to promptly respond to such emerging issues, as well as to unanticipated needs as they arise throughout the year.

**Land resources.**—Provides for management of rangeland and forest resources; riparian areas; soil, water, and air activities; wild horses and burros; and cultural resources.

**Wildlife and fisheries management.**—Provides for maintenance, improvement, or enhancement of fish and wildlife habitats as part of the management of public lands and ecosystems.

**Threatened and endangered species management.**—Provides for protection, conservation, consultation, recovery, and evaluation of populations and habitats of threatened, endangered and special status animal and plant species.

**Recreation management.**—Provides for management and protection of recreational resource values, designated and potential wilderness areas, and collection and expenditure of recreation user fees.

**Energy and minerals management.**—Provides for management of onshore oil and gas, coal, geothermal resources and other leasable minerals; mineral materials activities; and the administration of encumbrances on the mineral estate on Federal and Indian lands. The Budget continues to fund oil and gas management activities through a combination of direct appropriations and offsetting collections generated from assessing a fee for processing applications for permits to drill. The 2011 President's Budget proposes to increase the use of offsetting collections by assessing a new fee for conducting oil and gas inspections, which is consistent with fees charged in offshore inspections.

**Realty and ownership management.**—Provides for management and non-reimbursable processing of authorizations and compliance for realty actions and rights-of-way (including Alaska), administration of land title records and completion of cadastral surveys on public lands.

**Resource protection.**—Provides for management of the land use planning and National Environmental Policy Act processes, including monitoring activities. Also ensures the health and safety of users of the public lands through protection from criminal and other unlawful activities; the effects of hazardous material and/or waste; and physical safety hazards.

**Transportation and facilities maintenance.**—Provides for maintenance of administrative and recreation sites, roads, trails, bridges and dams, including compliance with building codes and standards and environmental protection requirements. These funds allow for the systematic management of facilities with critical health and safety concerns, and ensure the protection of natural and cultural resources and the environment.

**Land and resource information systems.**—Provides for the operation and maintenance of existing bureau-wide automated systems and for the development and bureau-wide implementation of Land and Resource Information Systems.

**Workforce and organizational support.**—Provides for the management of specified bureau business practices, such as human resources, Equal Employment Opportunity, financial resources, procurement, property, general use automated systems, and fixed costs.

**Communication sites.**—Provides for the processing of communication site use authorization requests.

**Mining law administration.**—Provides for exploration and development of minerals on public lands pursuant to the General

Mining Law of 1872, including validity examinations, patent application reviews, enforcement of environmental and bonding requirements, and recordation of mining claims. Program costs are expected to be fully offset by claim maintenance and other fees.

**Challenge Cost Share (CCS).**—This program leverages non-Federal funding, in-kind services, and materials with Federal funding to conduct on-the-ground projects that improve conditions of the public lands. These conservation, restoration, and enhancement projects benefit forestry, range, riparian, fish, wildlife, threatened and endangered species, recreation, and cultural resources.

**National Landscape Conservation System (NLCS).**—Provides for the management of National Monuments, National Conservation Areas, and other Congressional conservation designations, key units in the NLCS. The program provides for the recurring operational (base) budgets of these NLCS units.

Permanent operating funds accounts include:

*Operations and maintenance of quarters.*—Funds in this account are used to maintain and repair BLM employee-occupied quarters from which rental charges are collected. Agencies are required to collect quarters rentals from employees who occupy Government-owned housing and quarters. This housing is provided only in isolated areas or where an employee is required to live on-site at a Federally owned facility or reservation.

*Forest ecosystems health and recovery.*—Funds in this account are derived from revenue generated from the Federal share of receipts from the sale of salvage timber from the Oregon and California grant lands, public domain lands, and Coos Bay Wagon Road lands. This account was established to allow BLM to more efficiently and effectively address forest health issues. Funds can be used for other forest health purposes, including release from competing vegetation and density control treatments.

*Timber sale pipeline restoration fund.*—This fund provides for the deposit and use of fees collected by BLM for sales of non-salvage timber pursuant to the timber salvage provisions of Public Law 104-19 and Public Law 105-83. Of the total deposited into this account, 75 percent is to be used for preparation of timber sales to fill the timber pipeline on lands administered by BLM, and 25 percent is to be expended on the backlog of re-creation projects on BLM lands.

*Expenses, road maintenance deposits.*—Users of certain roads under BLM's jurisdiction make deposits for maintenance purposes. Moneys collected are appropriated for necessary road maintenance. Moneys collected on Oregon and California grant lands are available only for those lands (43 U.S.C. 1762(c), 43 U.S.C. 1735(b)).

*Federal Lands Recreation Enhancement Act, BLM.*—The Federal Lands Recreation Enhancement Act (FLREA) was enacted on December 8, 2004 as part of the Consolidated Appropriations Act for 2005. FLREA replaces the Recreation Fee Demonstration Program, and most current BLM sites will transition to the new program. All receipts collected under this authority will be deposited to this account. BLM returns 100 percent of these receipts back to the site where the fees were generated. FLREA authorizes this program through 2014.

*Acquisitions in Deschutes, Oregon from land sale receipts.*—Pursuant to Public Law 105-221, the Oregon Public Lands Transfer Act, the Secretary of the Interior is authorized to use the proceeds from sales in Deschutes County to purchase environmentally sensitive lands.

*Operations and acquisitions in Nevada from land sale receipts.*—Pursuant to Public Law 105-263, 85 percent of receipts from sales of public domain lands in southern Nevada are used to acquire environmentally sensitive land in the State, implement certain conservation initiatives on Federal land in Clark County, Nevada, make capital improvements to areas administered by the National Forest Service, Fish and Wildlife Service, and BLM in Clark County, Nevada, and develop parks, trails, and natural areas in Clark County, Nevada.

*Lincoln County Land Sales Act.*—Public Law 106-298 authorizes the Secretary to dispose of certain lands in Lincoln County, Nevada, and distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the County; and 85 percent to an interest bearing account that is available for expenditure without further appropriation.

*White Pine County Land Sales Act.*—Public Law 109-432 authorizes the Secretary to dispose of certain lands in White Pine County, Nevada, distribute the proceeds as follows: five percent to the State of Nevada; 10 percent to the County; and 85 percent

PERMANENT OPERATING FUNDS—Continued

to an account that is available for expenditure without further appropriation for the management of archaeological resources, wilderness protection, recreation activities, preparation of a management plan, reimbursement for sale costs, and other purposes.

*Leases from Naval Petroleum Reserve No. 2.*—The 2005 Energy Policy Act established this fund for environmental investigation and restoration on that site. A portion of revenue from new leases on the site is authorized to be deposited to this account.

*BLM Permit Processing Improvement Fund.*—The 2005 Energy Policy Act established this pilot program. Fifty-percent of the rents from non-geothermal onshore mineral leases are authorized to be deposited in this fund through 2015 and used to increase BLM oil and gas permit processing.

*Geothermal Lease Revenue Fund.*—The 2005 Energy Policy Act established this fund. Twenty-five percent of geothermal bonuses, rents, and royalties are authorized to be deposited to this account through 2010 and used to expedite geothermal leasing activities.

*Federal land disposal.*—The Federal Land Transaction Facilitation Act, P.L. 106–248 (114 Stat. 613), provides authority for BLM to sell public lands that were classified as suitable for disposal under resource management plans in effect at the time of enactment. This law provides that receipts from such sales may be used to acquire non-Federal lands with significant resource values that fall within the boundaries of areas now managed by DOI. This authority expires on July 25, 2010. The 2011 President's Budget includes a legislative proposal to expand and extend this authority, as described in the following section.

*Owyhee Land Acquisition Account.*—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1039), provides that the Secretary may sell public land located within the Boise District of the Bureau of Land Management that, as of July 25, 2000, has been identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land in, or adjacent to, certain the wilderness areas.

*Washington County, Utah Land Acquisition Account.*—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1091), authorizes the sale of public land located within Washington County, Utah, that, as of July 25, 2000, has been identified for disposal in appropriate resource management plans. Amounts in the account shall be available to the Secretary, without further appropriation, to purchase land or interests in land in, or adjacent to, certain the wilderness areas.

*Silver Saddle Endowment Account.*—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1114), requires Carson City to deposit twenty-five percent of the difference between what the Secretary of Interior and the City paid for the 62 acre Bernhard parcel before the Secretary conveys the land to the City. Amounts deposited in the account established by paragraph (1) shall be available to the Secretary, without further appropriation, for the oversight and enforcement of a certain conservation easement.

*Carson City Special Account.*—The 2009 Omnibus Public Land Management Act, P.L. 111–11 (123 STAT. 1113), authorizes the sale of 158 acres of public land described in the statute. Five percent of the proceeds are paid to State of Nevada for use for public education. The remainder is deposited to this account and used to acquire environmentally sensitive land or an interest in environmentally sensitive land in Carson City; to

cover the cost of surveys and appraisals; and to reimburse the Bureau of Land Management for administrative expenses.

Reauthorize the Federal Lands Transaction Facilitation Act (FLTFA). The Administration's proposal includes eliminating the Act's July 2010 sunset date and allowing lands identified as suitable for disposal in recent land use plans to be sold using the FLTFA authority. FLTFA sales revenues would continue to be used to fund the acquisition of environmentally sensitive lands and the administrative costs associated with conducting sales.

Terminate the BLM Permit Processing Improvement Fund. The 2005 Energy Policy Act (EPA) established a pilot program to improve oil and gas permit processing. To fund the pilot program, 50 percent of the rents from non-geothermal onshore mineral leases are authorized to be deposited into this account through 2015. The mandatory nature of this funding reduces the agency's administrative flexibility to reallocate funding between programs and field offices. The Administration will submit legislation to eliminate this fund starting in 2012 and to substitute new cost recovery fees that will be put in place through an administrative rulemaking. In the meantime, for fiscal year 2011, the Budget assumes the mandatory fund will continue, resulting in a reduced need for discretionary appropriations. In 2011, BLM will also continue to rely on the oil and gas permit processing fees imposed by appropriations language and credited as offsetting collections to the Management of Lands and Resources account.

Miscellaneous permanent payments include: *Payments for Oregon and California and Coos Bay Wagon Road grant lands, receipts.*—The Secure Rural Schools and Community Self-Determination Act of 2000 (P.L. 106-393), as amended by P.L. 110-343, provides annual transition payments

## MISCELLANEOUS PERMANENT PAYMENT ACCOUNTS—Continued

to the 18 O&C counties. These payments are derived from revenues from federal activities on O&C lands funds in the previous fiscal year that are not deposited to permanent operating funds, and, to the extent of any shortfall, out of any funds in the Treasury not otherwise appropriated. The Act, as amended, is structured to phase out these payments. In 2009 through 2011, Secure Rural Schools payments are a declining percentage of the payments made in 2006; the payment in 2009 is 90 percent of the amount paid in 2006, 2010 is 81 percent, and 2011 is 73 percent. In 2012, a new payment formula calculates payments using multiple factors including acres of O&C grant land within a county, the average 3 highest 50-percent adjusted share and safety net payments made to each county for the eligibility period, and an income adjustment based on the per capita personal income for each county.

*Payments to States (proceeds of sales).*—States are paid five percent of the net proceeds from the sale of public land and public land products (31 U.S.C. 1305).

*Payments to States from grazing receipts, etc., public lands outside grazing districts.*—States are paid 50 percent of the grazing receipts from public lands outside of grazing districts (43 U.S.C. 315i, 315m).

*Payments to States from grazing receipts, etc., public lands within districts.*—States are paid 12.5 percent of grazing receipts from public lands inside grazing districts (43 U.S.C. 315b, 315i).

*Payments to States from grazing receipts, etc., public lands within grazing districts, miscellaneous.*—States are paid specifically determined amounts from grazing receipts derived from miscellaneous lands within grazing districts when payment is not feasible on a percentage basis (43 U.S.C. 315).

*Payments to counties, National Grasslands.*—Of the revenues received from the use of Bankhead-Jones Act lands administered by BLM, 25 percent is paid to the counties in which such lands are situated, for school and road purposes (7 U.S.C. 1012).

*Payments to Nevada from receipts on land sales.*—(A) Public Law 96–586 authorizes and directs the Secretary to sell not more than 700 acres of public lands per calendar year in and around Las Vegas, Nevada, the proceeds of which are to be used to acquire environmentally sensitive lands in the Lake Tahoe Basin of California and Nevada. Annual revenues are distributed to the State of Nevada (five percent) and the county in which the land is located (10 percent). (B) Public Law 105–263, as amended by P.L. 107–282, authorizes the disposal through sale of approximately 49,000 acres in Clark County Nevada, the proceeds of which are to be distributed as follows: a) five percent for use in the general education program of the State of Nevada; b) 10 percent for use by the Southern Nevada Water Authority for water treatment and transmission facility infrastructure in Clark County, Nevada; and c) the remaining 85 percent to be used to acquire environmentally sensitive lands in Nevada; make capital improvements to areas administered by NPS, FWS and BLM in Clark County, Nevada; develop parks, trails and natural areas and implement other conservation initiatives in Clark County, Nevada; and reimburse BLM for costs incurred arranging sales and exchanges under the Act. (C) Public Law 106–298 authorizes the sale of certain lands in Lincoln County, Nevada. The proceeds of these sales are to be distributed as follows: a) five percent to the State of Nevada for general education purposes; b) 10 percent to Lincoln County for general purposes with emphasis on supporting schools; and c) the remaining 85 percent to be used by the Secretary of the Interior to acquire environmentally sensitive lands in the State

of Nevada, for identification and management of unique archaeological resources, for development of a multi-species habitat conservation plan in the county, and for other specified administrative purposes.

*Cook Inlet Region Inc. property.*—This account received funding appropriated by section 9102 of the fiscal year 1990 Department of Defense Appropriations Act for the acquisition of Federal real properties, improvements on such lands or rights to their use or exploitation, and any personal property related to the land purchased by the Cook Inlet Region, Incorporated as authorized by the provisions of section 12(b) of Public Law 94–204 (43 U.S.C. 1611). Funds are made available to BLM for administration and subsequent payment to accounts accepting Cook Inlet Region, Incorporated offers for Federal properties.

*State 5% Share, Carson City Land Sales.*—The 2009 Omnibus Public Land Management Act, Public Law 111–11, 123 STAT. 1113 requires that five percent of proceeds from the sale of 158 acres described in the statute shall be paid to the State of Nevada for general public education purposes.

The Helium Act Amendments of 1960, Public Law 86-777 (50 U.S.C. 167), authorized activities necessary to provide sufficient helium to meet the current and foreseeable future needs of essential government activities.

The Helium Privatization Act of 1996, Public Law 104-273, provides for the eventual privatization of the program and its functions. In 2011, the Helium program will consist of:

- (a) continued storage and transmission of crude helium;
- (b) complete disposal of helium refining facilities and other excess property not needed for storage and transmission of crude helium;
- (c) oversight of the production of helium on Federal lands; and
- (d) administration of in-kind and open market crude helium gas sale program.

The estimates assume that the helium program will continue full implementation of the Helium Privatization Act.

The Minerals Management Service (MMS) manages the Nation's oil, natural gas, and other energy and mineral resources on the Outer Continental Shelf (OCS) as well as the mineral revenues from the OCS and from onshore Federal and American Indian lands. MMS's goal is to ensure that the Federal Government is realizing fair market value and that companies are in compliance with applicable laws, regulations, and lease terms. Through all of its programs, MMS works to ensure that the public receives maximum benefit from America's OCS resources and mineral revenues.

**Outer Continental Shelf Lands.**—The Offshore Energy and Minerals Management program regulates OCS activities, including OCS leases, monitoring the safety of offshore facilities, and protecting our coastal and marine environments. As the Nation's designated steward of the mineral resources on the OCS, MMS has worked diligently for over 27 years to build a successful offshore program with a legal and regulatory framework that will provide for safe and environmentally sound OCS mineral resource

development. Under the Energy Policy Act of 2005, MMS also acquired the responsibility of implementing a renewable energy program that will allow leasing on the OCS for the development of renewable energy resources such as wind, wave, and ocean current energy.

**Minerals Revenue Management.**—Through the Minerals Revenue Management program, MMS ensures that the Nation's Federal and Indian mineral revenues, whether received through in-kind or in-value royalties, are accurately reported and paid in compliance with laws, regulations, and lease terms. Revenues collected by MMS are one of the largest sources of non-tax revenue to the Federal Government. MMS disburses mineral revenues to states, the Office of the Special Trustee for American Indians, other Federal agencies, and the General Fund of the United States Treasury.

**General Administration.**—The General Administration program is responsible for providing leadership, securing resources, developing organizational capabilities, coordinating strategic planning efforts, building infrastructure and assuring the appropriate delivery of services for the entire MMS organization.

For Mineral Leasing and Associated Payments (MLAP), the Mineral Leasing Act (MLA), 30 U.S.C. 181 et seq., provides that all States be paid 50 percent of the revenues resulting from the leasing of mineral resources on Federal public domain lands within their borders. In addition, under MLA, 40 percent of revenues are deposited in the Reclamation Fund, which funds western water projects, and the remaining 10 percent is deposited in the General Fund of the United States Treasury. By law, Alaska receives no funds from the Reclamation Fund, but receives a 90-percent share of mineral leasing receipts. In addition, the State of Oklahoma is paid 37.5 percent of the Red River oil and gas royalties in lieu of State and local taxes on Kiowa, Comanche, and Apache Tribal lands, to be used for construction and maintenance of public roads and support of public schools (65 Stat. 252). Mineral leasing revenues are derived from royalties, rents, bonuses, and other revenues, including minimum royalties, late payment interest, settlement payments, gas storage fees, estimated royalty payments, and recoupments.

MINERAL LEASING AND ASSOCIATED PAYMENTS  
(Legislative proposal, subject to PAYGO)

States receive 50 percent of Federal revenues generated from mineral production occurring on Federal lands within that State's boundaries. To partially cover the costs of administering the Federal mineral leasing program, the Budget proposes to amend the Mineral Leasing Act (MLA) to allow MMS to deduct two percent from the required payments to States under the Act. Until 2000, MMS was authorized to deduct a certain amount from State mineral revenue payments based on an assessment of the Federal Government's costs to manage and oversee mineral leasing and production. This was commonly referred to as "net receipts sharing," or NRS. The NRS authority was repealed in 2000, during a time of Federal budget surpluses. Since FY 2008, Congress has annually required a two-percent deduction from each year's State payments as part of the Interior, Environment, and Related Agencies Appropriations Acts. This two percent deduction (equivalent to one percent of total mineral revenues) is a simpler form of net receipts sharing that addresses concerns raised about the administrative complexity of the original NRS process. The Administration proposes continuing net receipts sharing through the appropriations process in 2011. Separate authorizing legislation to amend the Mineral Leasing Act would

make this change in the Federal-State revenue allocation permanent starting in 2012.

The Energy Policy Act of 2005 (P.L. 109-58) amends section 31 of the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1356 et seq.) to require that for each of the fiscal years 2007 through 2010, \$250,000,000 in OCS revenues be paid annually to coastal States that have submitted approved coastal impact assistance plans. The formula for distribution is based on the amount of qualified OCS revenues generated off the coastline of each producing State. In addition, 35 percent of each State's allocable share is to be distributed to coastal political subdivisions based on population, coastline, and distance to applicable OCS leases.

The Gulf of Mexico Energy Security Act of 2006 opened some additional areas in the Gulf of Mexico for offshore oil and gas leasing, while maintaining moratoria on activities east of the Military Mission Line and within certain distances from the coastline of Florida. The Act provides that 37.5 percent of Outer Continental Shelf revenues from certain leases be distributed to four coastal States (Alabama, Louisiana, Mississippi, and Texas) based on a complex allocation formula and subject to an annual cap in later years. The receipts are available in the year following collection, and the funding provided is to be used primarily for coastal protection and restoration activities.

Title IV of the Department of the Interior and Related Agencies Appropriation Act, 1998 (P.L. 105–83) established the Environmental Improvement and Restoration Fund account. As required by law, 50 percent of the principal and 50 percent of the interest from the Alaska Escrow account are deposited into the Environmental Improvement and Restoration Fund. The law requires that the corpus of the Fund be invested. Twenty percent of the interest earned by the Fund is permanently appropriated to the Department of Commerce and the unappropriated balance of interest remains in the fund. At this time, no budget authority is requested.

As of May 23, 1908 (16 U.S.C. 499), 25 percent of the revenues collected from onshore mineral leasing and production on national forest lands have been paid to the State in which the national forest resides. A State's payment is based on national forest acreage and when a national forest is situated in several States,

an individual State payment is proportionate to its area within that particular national forest.

Flood Control payments to States are shared according to the Flood Control Act of 1936 (33 U.S.C. 701 et seq.) which provides that 75 percent of revenue collected be shared with the State in which it was collected. These funds are to be expended as the State legislature may prescribe for the benefit of the public schools and roads in the county from which the revenue was collected or for defraying any of the expenses of county government. These expenses include public obligations of levee and drainage districts for flood control and drainage improvements.

The Energy Policy Act of 2005 (P.L. 109-58) amended section 20 of the Geothermal Steam Act of 1970 (30 U.S.C. 1019 et seq.). The amendment provides that for the revenues collected from geothermal leasing, 50 percent of the revenues are to be paid to the State and 25 percent are to be paid to the county in which the leased lands or geothermal resources are located. In addition, the remaining 25 percent of Federal revenues received during the first five fiscal years following enactment of the Energy Policy Act (2006-2010), after excluding funds paid to State and county governments, are deposited into a separate Treasury account for use by DOI in the implementation of the Geothermal Steam Act

of 1970 and the Energy Policy Act of 2005. This 25 percent Federal share will revert back to the Treasury beginning in FY 2011.

The Energy Policy Act of 2005 (P.L. 109-58) provides that 25 percent of the revenues collected from geothermal leasing be paid to the county in which the leased lands or geothermal resources are located. This payment is in addition to the 50 percent of Federal revenues that have historically been paid to the State in which the leased lands or geothermal resources are located. Section 423 of the Department of the Interior, Environment, and Related Agencies Appropriations Act, 2010 (P.L. 111-88) repealed the geothermal payments to counties for FY 2010, restoring the traditional 50/50 Federal-State revenue sharing arrangement. The President's Budget proposes to make repeal of these county payments permanent beginning in FY 2011.

**Environmental protection.**—This activity funds those functions that directly contribute to ensuring that the environment is protected during surface coal mining operations. It also addresses those activities that ensure that coal operators adequately reclaim the land after mining is completed.

Under this activity, OSM provides regulatory grants to States to operate enforcement programs under the terms of the Surface Mining Control and Reclamation Act of 1977 (SMCRA). It also provides for the operation of Federal and Indian land programs and the oversight of State programs, and supports State regulatory program development and maintenance. In addition, this activity funds environmental reclamation efforts through the collection of civil penalties for post-SMCRA reclamation and funds from bond forfeitures, and provides funding for underground and coal outcrop fires.

**Technology development and transfer.**—This activity provides funding to enhance the technical skills that States and Indian tribes need to operate their regulatory programs. It provides technical outreach to States and Indian tribes to solve problems related to the environmental effects of coal mining and to fund technical studies to address specific coal mining issues. The Applicant Violator System is funded from this activity.

**Financial management.**—This activity provides the resources for the managing, accounting, and processing of collections and for the pursuit of delinquent civil penalties. This includes developing and maintaining information management systems that support these functions and enhance the agency's ability to deny new mining permits to applicants with unabated State or Federal violations.

**Executive direction and administration.**—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services, such as rent, telephones, and postage.

**Environmental restoration.**—This activity funds those functions that contribute to reclaiming lands affected by past coal mining practices. Funds are used to restore land and water resources and the environment that have been degraded by mining prior to the passage of SMCRA.

This activity provides discretionary funding for the Federal reclamation program, which includes program evaluations and operations and watershed cooperative agreements. In 2008, this activity began to provide mandatory reclamation grants for qualified States and Tribes to address remaining coal problems instead of the discretionary grants provided through 2007.

**Technology development and transfer.**—This activity provides funding to enhance the technical skills that the States and Indian tribes need to operate their reclamation programs. OSM conducts technical studies on mining and reclamation-related problems.

**Financial management.**—This activity provides funds to identify, notify, collect, and audit fees from coal operators for the Abandoned Mine Reclamation Fund. OSM seeks to maximize voluntary compliance with the SMCRA's reclamation fee provisions.

**Executive direction and administration.**—This activity provides funding for executive direction, general administrative support, and the acquisition of certain agency-wide common services such as rent, telephones, and postage.

The Budget proposes to eliminate mandatory payments from the Treasury to States and Tribes that have been certified as completing reclamation of their abandoned coal mines, so that Abandoned Mine Lands Fees are only used to clean up abandoned coal mines. This proposal is modified from the version in the 2010 Budget to set aside \$10 million per year to address high-priority coal problems that may develop after States or Tribes become certified and for any remaining Federal projects.

Public Law 109-432 authorizes mandatory Treasury payments to three United Mine Workers of America (UMWA) retiree health benefit plans (the Combined Benefit Fund, the 1992 Plan, and the 1993 Plan), to the extent that other federal funding sources do not meet the plans' expenditure needs, subject to certain limitations. Interest earned on Abandoned Mine Land trust fund balances is available for transfer to cover funding shortfalls in

the plans; unobligated balances in the fund are used to generate interest for this purpose.

ADMINISTRATIVE PROVISION

With funds available for the Technical Innovation and Professional Services program in this Act, the Secretary may transfer title for computer hardware, software and other technical equipment to State and tribal regulatory and reclamation programs. BUREAU OF RECLAMATION

Appropriations to the Bureau are made from the general fund and special funds. The source of funds are a) the General Fund, which funds other projects or programs. Among the projects funded from the General Fund is the Colorado River Basin Project and the Colorado River Storage Project; b) the Reclamation Fund, derived from repayments and other revenues from water and power users, receipts from the sale, lease, and rental of Federal lands, and certain oil and mineral revenues. Program activities that can be financed from the Reclamation Fund are those that directly benefit the 17 Western states and are for the purposes authorized under "Reclamation Law"; c) the Central Valley Project Restoration Fund, consisting of revenues from project beneficiaries; and d) other sources such as the Colorado River Dam Fund, which generates revenue from the sale of Boulder Canyon power, and the recreation, entrance, and use fee account, consisting of fees collected pursuant to the Land and Water Conservation Fund Act of 1965, as amended. Non-Federal entities also advance funds for operation and maintenance and provide funds under the Contributed Funds Act. The Water and Related Resources account supports the development, management, and restoration of water and related natural resources in the 17 Western States. The account includes funds for operating and maintaining existing facilities to obtain the greatest overall level of benefits, to protect public safety, and to conduct studies on ways to improve the use of water and related natural resources. Work will be done in partnership and cooperation with non-Federal entities and other Federal agencies to reduce conflict, facilitate solutions to complex water issues and stretch limited water supplies. The American West is the fastest growing region of the country and faces serious water challenges. Adequate and safe water supplies are fundamental to the health, economy, security, and ecology of the country. With increased demands for water from growth and energy needs, amplified recognition of environmental water requirements, and the potential for decreased supplies due to drought and climate change, a water balance cannot be achieved without water conservation and water reuse. Federal leadership is critical to widespread acceptance and implementation of effective conservation and recycling techniques. In 2011, Reclamation will help address these concerns through a Water Conservation Initiative, which includes cost-shared grants for conservation and water management improvement projects, basin-wide planning studies that will address the impacts of climate change, and funding of water reuse and recycling projects through the Title XVI Water Reclamation and Reuse Program. Reclamation will also partner with States, tribes and local entities under the WCI to develop incentives and best practices for implementing water conservation and water recycling projects.

This fund was established to carry out the provisions of the Central Valley Project Improvement Act—to provide funding from project beneficiaries for habitat restoration, improvement and acquisition, and other fish and wildlife restoration activities in the Central Valley Project (CVP) area of California. Resources are derived from donations, revenues from voluntary water transfers and tiered water pricing. The account is also financed through additional mitigation and restoration payments collected on an annual basis from project beneficiaries.

This fund receives funding (user fees and repayment receipts) from the Friant Division long term contractors and other Federal and non-Federal sources to implement the provisions described in the of Settlement (Settlement) for the National Resources Defense Council (NRDC) et al. v. Rodgers lawsuit. The Settlement's two primary goals are: 1) To restore and maintain fish populations in "good condition" in the main stem of the San Joaquin River below Friant Dam to the confluence of the Merced River, including naturally reproducing and self-sustaining populations of salmon and other fish; and 2) To reduce or avoid adverse water supply impacts to all of the Friant Division long-term contractors that may result from the Interim Flows and Restoration Flows provided for in the Settlement.

The U.S. Geological Survey (USGS) provides research and scientific information to support the mission of DOI and the science needs of its land and resource management bureaus. The U.S. Geological Survey also works in collaboration with other Federal, State, and Tribal cooperators to conduct research and provide scientific data and information concerning natural hazards and environmental issues pertaining to the water, land, geologic, and biological resources of the Nation.

The 2011 Budget continues science programs that generate relevant, objective information for land managers and for communities throughout the Nation and encourages partnerships with universities, research institutions, and major public and private laboratories.

*Geographic research, investigations, and remote sensing.*—The USGS Geography Program seeks to observe the Earth at various scales using remote sensing to understand the human and environmental dynamics of land change. The Geography Program also provides scientific information to describe and interpret America's landscape by mapping the terrain, monitoring changes over time, and analyzing how and why these changes have occurred. The knowledge gained through these activities is used to model the processes of change and to forecast future changes. The National Geospatial Program is focused on improving geospatial data access, integration, and applications through implementation of The National Map and the National Spatial Data Infrastructure (NSDI). Partnerships with other Federal, State, and local agencies; the private sector; and academia are the keystone for accomplishing this mission.

*Geologic hazards, resources, and processes.*—The national program of onshore and offshore geologic research and investigations produces: 1) information on natural hazards of geologic origin such as earthquakes, volcanic eruptions, landslides, and coastal erosion; 2) geologic information for use in the management of public lands and in national policy determinations; 3) information on the chemistry and physics of the Earth, its past climate, and the geologic processes by which it was formed and is being modified; 4) geologic, geophysical, and geochemical maps and analyses to address environmental, energy and mineral resource, and hazards concerns; 5) environmental, hazards, energy and mineral resource assessments; and 6) improved methods and instrumentation for detecting and monitoring hazards, disseminating hazards information, and conducting assessments.

*Water resources investigations.*—The USGS water resources programs produce data, analyses, assessments, and methodologies to support Federal, State, Tribal, and local government decisions. This information is used by decision-makers to minimize loss of life and property as a result of water-related natural hazards,

such as floods, droughts, and land movement; effectively manage water resources for domestic, agricultural, commercial industrial, recreational, and ecological uses; protect and enhance water resources for human health, aquatic health, and environmental quality; and, contribute to wise physical and economic development of the Nation's resources for the benefit of present and future generations. These programs work cooperatively with other Federal agencies, States, and other entities to leverage Federal resources to meet their mutual water information needs.

**Biological research.**—The national program of biological research: 1) conducts biological resources inventory and monitoring; 2) provides scientific information for the management of biological resources; and 3) predicts the consequences of environmental change and the effects of alternative management actions on plants, animals, and their habitats. The program conducts the high priority biological research needed by DOI's land management bureaus and operates the Cooperative Research Unit program, which provides research and information to resource managers, and trains natural resource professionals in partnership with university and State scientists.

**Enterprise information.**—The USGS enterprise information program supports bureau-level activities and investments in the areas of information technology, information security, information management, information policy and standards, and information science. As the primary vehicle for planning and executing the broad information goals and objectives of the USGS, the program provides bureau-level information policies, infrastructure, and services needed to support the bureau's scientific mission; creates an integrated information environment within the USGS; ensures that the bureau meets legislative and administrative information management mandates; and provides the basic foundation for easy discovery, access, acquisition, and use of USGS data and information.

**Global change.**—USGS provides critical science, monitoring, and predictive modeling of information related to our changing climate and its effects on the landscape and the Nation's resources. The knowledge and information that results from this program helps policy makers, resource managers, and citizens make informed decisions about the management of the landscapes for which they have responsibility and on which they live.

**Science support.**—Science support provides for bureau-wide management; executive direction and coordination; administrative, human resources, and business information systems management; and financial and personnel systems support provided by DOI's National Business Center.

**Facilities.**—This activity finances: 1) rental payments and operation and maintenance for properties; 2) deferred maintenance and capital improvement; and 3) construction.

**Reimbursable program.**—Reimbursements from non-Federal sources are from States, Tribes, and municipalities for: cooperative efforts and proceeds from sale to the public of copies of photographs and records; proceeds from sale of personal property; reimbursements from permittees and licensees of the Federal Energy Regulatory Commission; and reimbursements from foreign countries and international organizations for technical assistance. Reimbursements from other Federal agencies are for mission-related work performed at the request of the financing agency.

**Ecological Services.**—The Service conserves, protects, and enhances fish, wildlife, plants, and their habitat by working with private landowners, States, Tribes, non-governmental organizations, and other Federal agencies. These partnership activities help protect and recover species that are listed under the Endangered Species Act and work towards making the listing of additional species unnecessary. Financial assistance is provided to private landowners to restore or improve habitat for endangered species and other at-risk species. Technical assistance helps prevent or minimize adverse environmental effects of development projects. Contaminants are investigated, monitored, and assessed for effects on trust resources.

**National Wildlife Refuge System.**—The Service maintains the National Wildlife Refuge System consisting of 550 refuges, waterfowl production areas in 205 counties that are managed by 37 wetland management districts, and 49 coordination areas. The National Wildlife Refuge System administers this network of more than 150 million acres of land and waters to conserve and restore fish, wildlife, plants, and their habitats, within the United States for the benefit of present and future generations of Americans.

**Migratory Bird Management, Law Enforcement, and International Affairs.**—The Service directs and coordinates national migratory bird programs to protect and enhance populations and habitat of more than 900 species of birds. Grants and partnerships are key to these programs, such as the Joint Ventures that implement the North American Waterfowl Management Plan. The Service Law Enforcement program investigates wildlife crimes, regulates wildlife trade, helps Americans understand and obey wildlife protections laws, and works in partnership with international, State, and Tribal counterparts to conserve wildlife resources. The Service, through the International Affairs Program, works with private citizens, local communities, state and federal agencies, foreign governments, and non-governmental organizations in the U.S. and internationally to promote a coordinated domestic and international strategy to protect, restore, and enhance the world's diverse wildlife and their habitats, with a focus on species of international concern.

**Fisheries.**—The Fisheries Program consists of 70 National Fish Hatcheries, nine Fish Health Centers, seven Fish Technology Centers, 65 Fish and Wildlife Conservation Offices, and a Historic National Fish Hatchery. Working with partners, the Fisheries Program recovers, restores and maintains fish and other aquatic resources at self-sustaining levels; provides technical assistance to States, Tribes and others; and supports Federal mitigation programs for the benefit of the American Public.

**Climate Change Adaptive Science.**—Through a national network of Landscape Conservation Cooperatives (LCCs), the Service will enhance its core capacity in biological planning and conservation design needed to identify landscapes, habitats, and species that are most vulnerable to climate impacts. These LCCs, in cooperation with both Federal and non-Federal partners, will conduct the planning necessary to implement effective on-the-ground strategies and actions to help fish and wildlife adapt to the changing climate. The information gathered will also help to define clear conservation objectives, inform conservation management decisions, focus management actions where they will have the most effect on the landscape, and supply scientific knowledge and expertise needed most by the Service and its partners.

**General operations.**—Funding for the Service's general operations provides policy guidance, program coordination, and administrative services to all fish and wildlife programs. The funds also support the National Conservation Training Center, and projects through the National Fish and Wildlife Foundation to restore and enhance fish and wildlife populations.

The State and Tribal Wildlife Grants program provides funds to States, Commonwealths and Territories primarily through a formula-based apportionment. Additionally, there is also a competitive program that uses a merit-based process to fund the best outcome-oriented, results-based projects. Tribes receive funds through a national competitive award processes. These funds are provided to stabilize, restore, enhance, and protect species and their habitat that are of conservation concern, thereby avoiding the costly and time-consuming process that occurs when habitat is degraded or destroyed and species populations plummet.

Federal Land Acquisition funds are used to protect areas that have native fish or wildlife values and provide natural resource benefits over a broad geographical area. Funds in this account also cover acquisition management activities. Emphasis is placed on acquiring important fish and wildlife habitat necessary for the conservation of endangered and threatened species; nationally important wetlands; and additions to existing national wildlife refuges. The program includes projects that use alternative and innovative conservation tools, such as easements, and projects

that include the input and participation of the affected local communities and stakeholders.

The Landowner Incentive Program provided cost-shared, competitive grants to States, the District of Columbia, Territories, and Tribes to create, supplement or expand upon new or ongoing landowner incentive programs. These State, Tribal, and Territorial programs provided technical and financial assistance to private landowners all across the country to help them protect and manage imperiled species and their habitat, while continuing to engage in traditional land use or working conservation practices. The program was phased out in 2008.

Funds deposited into this account include direct appropriations and fines, penalties, and forfeitures collected under the authority of the Migratory Bird Treaty Act (16 U.S.C. 707) and interest on obligations held in the Federal Aid in Wildlife Restoration Fund. The North American Wetlands Conservation Fund supports wetlands conservation projects approved by the Migratory Bird Conservation Commission. A portion of receipts to the Sport Fish Restoration Account is also available for coastal wetlands conservation projects.

These projects help fulfill the habitat protection, restoration and enhancement goals of the North American Waterfowl Management Plan and the Tripartite Agreement among Mexico, Canada, and the United States. These projects may involve partnerships with public agencies and private entities, with non-Federal matching contributions, for the long-term conservation of habitat for migratory birds and other fish and wildlife, including species that are listed, or are candidates to be listed, under the Endangered Species Act (16 U.S.C. 1531).

Wetlands conservation projects include the obtaining of a real property interest in lands or waters, including water rights; the restoration, management or enhancement of habitat; and training and development for conservation management in Mexico. Funding may be provided for assistance for wetlands conservation projects in Canada or Mexico.

The Refuge Revenue Sharing Act (16 U.S.C. 715s) authorizes revenues through the sale of products from Service lands, less expenses for producing revenue and activities related to revenue sharing. The Fish and Wildlife Service makes payments to counties in which Service fee lands are located. If the net revenues are insufficient to make full payments according to the formula contained in the Act, direct appropriations are authorized to make up the difference.

The Federal Lands Recreation Enhancement Act (FLREA) was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005. Approximately 200 Fish and Wildlife Service sites collect entrance fees and other receipts. All receipts are deposited into a recreation fee account of which at least 80 percent is returned to the collecting site.

The recreation fee program demonstrates the feasibility of user generated cost recovery for the operation and maintenance of recreation areas, visitor services improvements, and habitat enhancement projects on federal lands. Recreation fees are often used at Fish and Wildlife sites to fund student interns and for various youth programs focusing on hunting, fishing, wildlife observation, wildlife photography, environmental education, and environmental interpretation. Fees are used primarily at the site to improve visitor access, enhance public safety and security, address maintenance needs, enhance resource protection, and cover the costs of collection. FLREA authorizes this program through 2014.

The Federal Aid in Wildlife Restoration Act, now known as the Pittman-Robertson Wildlife Restoration Act, created a program to fund the selection, restoration, rehabilitation and improvement of wildlife habitat, hunter education and safety, and wildlife management research. Under the program, States, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Northern Mariana Islands are allocated funds from an excise tax on sporting arms and ammunition, handguns, and a tax on certain archery equipment. States are reimbursed up to 75 percent of the cost of approved wildlife and hunter education projects.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106-408) amends the Pittman-Robertson Wildlife Restoration Act and authorizes a Multistate Conservation Grant Program and a firearm and bow hunter education and safety enhancement program that provides grants to the States.

The Federal Aid in Sport Fish Restoration Act, now known as the Dingell-Johnson Sport Fish Restoration Act (as modified by the Wallop-Breaux and other amendments), created a fishery resources, conservation, and restoration program funded by excise taxes on fishing equipment, and certain other sport fish related products.

Since 1992, the Sport Fish Restoration Account has supported coastal wetlands grants pursuant to the Coastal Wetlands Planning, Protection and Restoration Act (P.L. 101-646). Additional revenue from small engine fuel taxes was provided under the Surface Transportation Extension Act of 1997 and again by the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users, enacted for 2006 through 2009. Reauthorization is pending.

The Coastal Wetlands Planning, Protection and Restoration Act is funded through the Dingell-Johnson Sport Fish Restoration Act, which requires an amount equal to 18.5 percent of net deposits into the Sport Fish Restoration and Boating Safety Trust Fund, or amounts collected in small engine fuels excise taxes as provided by 26 U.S.C. 9504(b), whichever is greater, to be distributed as follows: 70 percent shall be available to the Corps of Engineers for priority project and conservation planning activities in Louisiana; 15 percent shall be available to the Fish and Wildlife Service for coastal wetlands conservation grants; and 15 percent to the Fish and Wildlife Service for wetlands conservation projects under Section 8 of the North American Wetlands Conservation Act (P.L. 101-233).

The Clean Vessel Act authorizes the Secretary of the Interior to make grants to States, in specified amounts as determined through a competitive award process, to carry out projects for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities. The Dingell-Johnson Sport Fish Restoration Act, as amended, provides for the transfer of funds from the Sport Fish Restoration and Boating Trust Fund to the Sport Fish Restoration Account for use by the Secretary of the Interior to carry out the purposes of this Act and for use by the Secretary of Homeland Security for State recreational boating safety programs (46 USC 13106(a)(1)). The Sportfishing and Boating Safety Act of 1998 authorizes the Secretary of the Interior to develop national and State outreach plans to promote safe fishing and boating opportunities and the

SPORT FISH RESTORATION—Continued

conservation of aquatic resources, as well as to make grants to States for developing and maintaining sewage disposal facilities and other boating facilities for recreational vessels.

Assistance is provided to States, Puerto Rico, Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the District of Columbia for up to 75 percent of the cost of approved projects including: research into fisheries problems, surveys and inventories of fish populations, acquisition and improvement of fish habitat and provision of access for public use.

The Wildlife and Sport Fish Restoration Programs Improvement Act of 2000 (P.L. 106–408) amends the Dingell-Johnson Sport Fish Restoration Act and authorizes a Multistate Conservation Grant Program and provides funding for several fisheries commissions and the Sport Fishing and Boating Partnership Council.

The National Park System administers 392 areas and 79 million acres of Federal land in 49 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, Samoa, and the Northern Marianas. These areas have been established to protect and preserve the cultural and natural heritage of the United

States and its territories. Park visits total over 286 million annually. This annual appropriation funds the operation of individual units of the National Park System as well as planning and administrative support for the entire system. It also funds the operations of the United States Park Police. Funds within this appropriation are used to support the cooperative effort for restoration of the Everglades and are available for two years. Within this appropriation, repair and rehabilitation funds are also available for two years, to provide the flexibility needed to carry out this project program, in which typical projects include, but are not limited to, facility, campground, and trail rehabilitation; roadway overlay and/or reconditioning; bridge repair; wastewater and water line replacement; and the rewiring of buildings. The repair and rehabilitation program includes funding to implement an automated facility management software system and to conduct comprehensive facility condition assessments.

The Land Acquisition and State Assistance appropriation uses funding derived from the Land and Water Conservation Fund to support NPS land acquisition activities and provide grants to States for the purchase of land for recreation activities. The Federal Land Acquisition Program provides funds to acquire certain lands, or interests in lands, within authorized park boundaries for inclusion in the National Park System to preserve nationally important natural and historic resources. Funds are also used for matching grants for the purchase of Civil War Battlefield lands. The State Assistance Program provides grants for a wide array of State recreation projects as well as for acquiring lands, or interests in lands, for outdoor recreation purposes. Funds are also included for the National Park Service to manage and coordinate the Federal Land Acquisition and State Assistance Programs.

*Outer Continental Shelf Oil Lease Revenues.* The Gulf of Mexico Energy Security Act of 2006 (P.L. 109-432) allows a portion of the revenue collected from oil and gas leasing activities in qualified areas just becoming available for leasing in the Outer Continental Shelf (OCS) to be deposited to the Land and Water Conservation Fund (LWCF) and distributed to states in accordance with the Land and Water Conservation Act of 1965. The National Park Service portion of the revenue is 12.5 percent of total qualified OCS revenues. These new OCS receipts became available for expenditure as mandatory funding beginning in 2009. The Omnibus Appropriations Act, 2009 (P.L. 111-8) permits the use of up to three percent of the amounts authorized to be disbursed for costs of administration.

**Recreation Fee Program.**—The National Park Service and other land management agencies operate a fee program that allows parks and other units to collect admission and user fees in accordance with the Federal Lands Recreation Enhancement Act (FLREA). FLREA was passed on December 8, 2004, as part of the Omnibus Appropriations bill for 2005, and authorizes this program through 2014. By law, up to 80 percent may be retained by the collecting park and the remainder retained for discretionary, Servicewide use by the National Park Service Director. Also by law, up to 15 percent of proceeds may be used for administration, overhead, and indirect costs related to the program, and net proceeds are to be used for high-priority visitor service or resource management projects throughout the National Park

System. Educational and vocational opportunities are available to youth through the Public Lands Corps (PLC) program, which is partially funded using recreation fees. Proceeds from the sale of the America the Beautiful passes, which allows access to all public lands that charge fees for a year, are to be distributed between the Federal land management agencies which offer them for sale, including the National Park Service, the Bureau of Land Management, the U.S. Fish and Wildlife Service, the Bureau of Reclamation and the U.S. Forest Service, as determined by the Secretaries of the Department of the Interior and the Department of Agriculture in accordance with Public Law 108-447.

**Deed-restricted parks fee program.**—Park units where admission fees may not be collected by reason of deed restrictions retain any other recreation fees collected and use them for certain park operation purposes in accordance with Public Law 105-327. This law applies to Great Smoky Mountains National Park, Lincoln Home National Historic Site, and Abraham Lincoln Birthplace National Historic Site.

**Transportation systems fund.**—Fees charged for public use of transportation services at parks are retained and used by each collecting park for costs associated with the transportation systems in accordance with section 501 of Public Law 105-391.

**Educational expenses, children of employees, Yellowstone National Park.**—Revenues received from the collection of short-term recreation fees to the park are used to provide education facilities to pupils who are dependents of persons engaged in the administration, operation, and maintenance of Yellowstone National Park (16 U.S.C. 40a).

**Payment for tax losses on land acquired for Grand Teton National Park.**—Revenues received from fees collected from visitors are used to compensate the State of Wyoming for tax losses on Grand Teton National Park lands (16 U.S.C. 406d-3).

*Park concessions franchise fees.*—Franchise fees for concessioner activities in the National Park System are deposited in this account and used for certain park operations activities in accordance with section 407 of Public Law 105-391. By law, 20 percent of franchise fees collected are used to support activities throughout the National Park System and 80 percent are retained and used by each collecting park unit for visitor services and for purposes of funding high-priority and urgently necessary resource management programs and operations.

*Concessions improvement accounts.*—National Park Service agreements with private concessioners providing visitor services within national parks can require concessioners to deposit a portion of gross receipts or a fixed sum of money in a separate bank account. A concessioner may expend funds from such an account with the approval of the park superintendent for improvements to facilities that directly support concession visitor services, but would not otherwise be funded through the appropriations process. Concessioners do not accrue possessory interests from improvements funded through these accounts.

*Park buildings lease and maintenance fund.*—Rental payments for leases to use buildings and associated property in the National Park System are deposited in this account and used for infrastructure needs at park units in accordance with section 802 of Public Law 105-391.

*Operation and maintenance of quarters.*—Revenues from the rental of Government-owned quarters to park employees are deposited in this account and used to operate and maintain the quarters.

*Delaware Water Gap, Route 209 operations.*—Fees collected for use of Route 209 within the Delaware Water Gap National Recreation Area by commercial vehicles are used for management, operation, and maintenance of the route within the park as authorized by Public Law 98-63 (97 Stat. 329), section 117 of Public Law 98-151 (97 Stat. 977) as amended by Public Law 99-88 (99 Stat. 343), and section 702 of Division I of Public Law 104-333 (110 Stat. 4185). The appropriation was reauthorized in fiscal year 1997 by Public Law 104-333 and in fiscal year 2006 by Public Law 109-156.

*Glacier Bay National Park resource protection.*—Of the revenues received from fees paid by tour boat operators or other permittees for entering Glacier Bay National Park, 60 percent are used for certain activities to protect resources of the Park from harm by permittees in accordance with section 703 of Division I of Public Law 104-333 (110 Stat. 4185).

*Filming and photography special use fees.*—The National Park Service is authorized to retain fee receipts that are collected from issuing permits to use park lands and facilities for commercial

filming, still photography, and similar activities. Activities authorized for funding include acquisition of emergency response equipment to prevent harm to aquatic park resources from permittees and studies to quantify the impact of permittees' activities on wildlife and other natural resources of the park.

*Contributions to U.S. Park Police annuity benefits.*—Necessary costs of benefit payments to annuitants under the pension program for United States Park Police officers hired prior to January 1, 1984, established under Public Law 85-157, are paid from the General Fund of the Treasury to the extent the payments exceed deductions from salaries of active duty employees in the program. Permanent funding for such payments was provided in the Department of the Interior and Related Agencies Appropriations Act, 2002. Before 2002, such payments were funded from appropriations made annually to the National Park Service.

Pending Congressional action and final approval by the Court, the *Cobell v. Salazar* settlement agreement establishes this fund to provide Indian land owners with an additional incentive to sell their fractionated interests, given the fact that the market value associated with highly fractionated interests will be quite low in many cases. Not more than \$60 million may be transferred from the Trust Land Consolidation Fund to this fund for higher education scholarships for American Indians and Alaska Natives to be administered as described in the settlement agreement.

Pending Congressional action and final approval by the Court, the *Cobell v. Salazar* settlement agreement establishes a new trust land consolidation fund for the buy-back and consolidation of fractionated land interests. The fund will be used for purchases of fractionated interests in parcels of land from individual Indian landowners. The fund covers administrative costs to undertake the process of acquiring fractionated interests and associated trust reform activities. The acquisition of fractionated interests is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), and the American Indian Probate Reform Act of 2004 (P.L. 108-374). The proposed settlement provides additional authority for the acquisition of interests held by persons who cannot be located after engaging in extensive efforts to notify them and locate them for a five-year period.

This appropriation funds a program to consolidate fractional interests in Indian lands and assist land owners with estate planning. Funds will be used to purchase small interests in parcels of lands from willing individual Indian landowners and convey those interests to the tribe on whose reservation the land is located. Consolidation of these interests is expected to reduce the Government's costs for managing Indian lands and promote economic opportunity on these lands. This program is authorized under the Indian Land Consolidation Act Amendments of 2000 (P.L. 106-462), the American Indian Probate Reform Act of 2004 (P.L. 108-374), and other authorities.

*Donations and contributed funds.*—The Secretary of the Interior may accept donations of funds or other property, and he may use the donated property in accordance with the terms of the donation in furtherance of any program authorized by other provision of law for the benefit of Indians (25 U.S.C. 451).

ADMINISTRATIVE PROVISIONS

The Bureau of Indian Affairs may carry out the operation of Indian programs by direct expenditure, contracts, cooperative agreements, compacts and grants, either directly or in cooperation with States and other organizations.

Notwithstanding 25 U.S.C. 15, the Bureau of Indian Affairs may contract for services in support of the management, operation, and maintenance of the Power Division of the San Carlos Irrigation Project.

Appropriations for the Bureau of Indian Affairs (except the Revolving Fund for Loans Liquidating Account, Indian Loan Guaranty and Insurance Fund Liquidating Account, Indian Guaranteed Loan Financing Account, Indian Direct Loan Financing Account, and the Indian Guaranteed Loan Program account) shall be available for expenses of exhibits.

Notwithstanding any other provision of law, no funds available to the Bureau of Indian Affairs for central office oversight and Executive Direction and Administrative Services (except executive direction and administrative services funding for Tribal Priority Allocations, regional offices, and facilities operations and maintenance) shall be available for contracts, grants, compacts, or cooperative agreements with the Bureau of Indian Affairs under the provisions of the Indian Self-Determination Act or the Tribal Self-Governance Act of 1994 (Public Law 103-413).

In the event any *federally recognized* tribe returns appropriations made available by this Act to the Bureau of Indian Affairs, this action shall not diminish the Federal Government's trust responsibility to that tribe, or the government-to-government relationship between the United States and that tribe, or that tribe's ability to access future appropriations.

Notwithstanding any other provision of law, no funds available to the Bureau, other than the amounts provided herein for assistance to public schools under 25 U.S.C. 452 et seq., shall be available to support the operation of any elementary or secondary school in the State of Alaska.

Appropriations made available in this or any other Act for schools funded by the Bureau shall be available only to the schools in the Bureau school system as of September 1, 1996. No funds available to the Bureau shall be used to support expanded grades for any school or dormitory beyond the grade structure in place or approved by the Secretary of the Interior at each school in the Bureau school system as of October 1, 1995. Funds made available under this Act may not be used to establish a charter school at a Bureau-funded school (as that term is defined in section 1146 of the Education Amendments of 1978 (25 U.S.C. 2026)), except that a charter school that is in existence on the date of the enactment of this Act and that has operated at a Bureau-funded school before September 1, 1999, may continue to operate during that period, but only if the charter school pays to the Bureau a pro rata share of funds to reimburse the Bureau for the use of the real and personal property (including buses and vans), the funds of the charter school are kept separate and apart from Bureau funds, and the Bureau does not assume any obligation for charter school programs of the State in which the school is located if the charter school loses such funding. Employees of Bureau-funded schools sharing a campus with a charter school and performing functions related to the charter schools operation and employees of a charter school shall not be treated as Federal employees for purposes of chapter 171 of title 28, United States Code.

Notwithstanding any other provision of law, including section 113 of title I of appendix C of Public Law 106-113, if in fiscal year 2003 or 2004 a grantee received indirect and administrative costs pursuant to a distribution formula based on section 5(f) of Public Law 101-301, the Secretary shall continue to distribute indirect and administrative cost funds to such grantee using the section 5(f) distribution formula. The peoples of the Republic of the Marshall Islands, the Federated States of Micronesia and the Republic of Palau approved Compacts of Free Association negotiated by the United States and their governments. The Compact of Free Association Act of 1985 (Public Law 99-239) constituted the necessary authorizing legislation to make annual payments to the Republic of the Marshall Islands and the Federated States of Micronesia. Payments began in 1987 and continued through 2003 when the original economic assistance package expired. The Compact of Free Association Amendments Act of 2003, Public Law 108-188, continues financial assistance to the Federated States of Micronesia and the Republic of the Marshall Islands through 2023.

The mission of the Office of Inspector General is to promote excellence, accountability and integrity in the programs, operations and management of the Department of the Interior. The Office's focus in assisting the Secretary and the Congress is to target resources toward developing solutions for the Department's most serious management and program challenges, and toward high-risk areas vulnerable to fraud, waste, abuse and mismanagement. The Office is responsible for independently and objectively identifying risks and vulnerabilities that directly impact, or could impact, the Department's ability to accomplish its mis-

sion. The Office is required to keep the Secretary and the Congress fully and currently informed about problems and deficiencies relating to the administration of departmental programs and operations. Effective implementation of this mandate addresses the public's demand for greater accountability and integrity in the administration of government programs and operations and the demand for programs that work better, cost less, and get the results about which Americans care most.

Tribal trust funds are deposited into a consolidated account in the U.S. Treasury pursuant to: (1) general or specific acts of Congress; and (2) Federal management of Tribal real properties, the titles to which are held in trust for the Tribes by the United States. These funds are available to the respective Tribal groups for various purposes, under various acts of Congress, and may be subject to the provisions of Tribal constitutions, bylaws, charters, and resolutions of the various Tribes, bands, or groups.

Commencing with 2000, most Tribal trust funds, including special funds, managed by the Office of the Special Trustee for American Indians were reclassified as non-budgetary. Ownership of these funds did not change, nor did the Federal Government's management responsibilities; changes were made for presentation purposes only. Some Tribal trust funds will remain budgetary, in either this Tribal Special Fund or the Tribal Trust Fund presented later in this section. Most of the assets of these funds are in investments held outside Treasury.

The following accounts are included in the Tribal Special Fund: Tribal Economic Recovery Fund; Three Affiliated Fort Berthold Trust Fund; Standing Rock Trust Fund; Papago Cooperative Fund; Ute Tribe Trust Fund; Pyramid Lake Indian Reservation Trust Fund; San Luis Rey Water Authority Trust Fund; Cochiti Wetfields Solution; and Southern Arizona Water Rights Settlement Act. More detailed information on specific account data is provided in the budget justification for the Office of the Special Trustee for American Indians.

The Central Hazardous Materials Fund is used to fund remedial investigations/feasibility studies and cleanups of hazardous waste

sites for which the Department of the Interior is liable. Authority is provided for amounts recovered from responsible parties to be credited to this account. Thus, the account may be composed of both annual appropriations of no-year funds and of offsetting collections. The Comprehensive Environmental Response, Compensation and Liability Act, as amended (42 U.S.C. Section 9601 *et seq.*) requires responsible parties, including Federal landowners, to investigate and clean up releases of hazardous substances.

Under the Natural Resource Damage Assessment and Restoration Fund (Restoration Fund), natural resource damage assessments will be performed in order to provide the basis for claims against responsible parties for the restoration of injured natural resources. Funds are appropriated to conduct damage assessments, provide restoration support, and for program management. In addition, funds will be received for the restoration of damaged resources and other activities and for natural resource damage assessments from responsible parties through negotiated settlements or other legal actions by the Department of the Interior. Responsible parties may also provide in-kind services to restore injured natural resources.

Restoration activities include: 1) the replacement and enhancement of affected resources; 2) acquisition of equivalent resources and services; and, 3) long-term environmental monitoring and research programs directed to the prevention, containment, and amelioration of hazardous substances and oil spill sites.

The Restoration Fund operates as a department-wide program, incorporating the interdisciplinary expertise of its various bureaus and offices. Natural resource damage assessments and the restoration of injured natural resources are authorized by the Comprehensive Environmental Response, Compensation, and Liability Act, as amended (42 U.S.C. 9601 *et seq.*), Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 *et seq.*), the Oil Pollution Act of 1990 (33 U.S.C. 2701 *et seq.*), and the Act of July 27, 1990 (16 U.S.C. 1911 *et seq.*). Since 1992, amounts received by the United States from responsible parties for restoration or reimbursement in settlement of natural resource damages may be deposited in the Fund and shall accrue interest.

EXXON VALDEZ RESTORATION PROGRAM

The Budget reflects the receipts, transfers, and mandatory spending by the Department of Interior associated with the civil and criminal settlements resulting from the 1989 Exxon Valdez oil spill in the Prince William Sound and surrounding areas. Funding from the settlements, including interest, is provided to Federal and Alaska State natural resource trustee agencies to restore the natural resources and services damaged by the spill. The Exxon Valdez Oil Spill Trustee Council consists of 3 State and 3 Federal trustees who oversee restoration of the injured ecosystem through the use of civil settlement funds. The criminal settlement funds are managed separately by the Federal and Alaska State governments, but are coordinated with the Council.

The original civil settlement with the Exxon Corporation included a re-opener provision valid from September 2002 to September 2006, which provided an opportunity for the Trustee governments to claim up to an additional \$100 million for natural resource injury that could not have been known or anticipated at the time of settlement. In late 2006, the Trustee governments issued a demand letter for \$92 million to the ExxonMobil Corporation, as well a comprehensive restoration project plan for the clean up of lingering oil. Negotiations with ExxonMobil await completion of additional scientific studies.

The civil settlement and interest earned to date total roughly \$1 billion, of which \$166 million remains, outside the Treasury. The balance is managed on behalf of the Trustee Council by the State of Alaska, (Exxon Valdez Investment Fund), with funds earmarked for future habitat acquisition and protection and for marine research and ecological monitoring in the spill zone.

**Fire Operations.**—This activity funds the Preparedness and the Fire Suppression Operations subactivities. The Preparedness subactivity funds the non-emergency and predictable aspects of the Department's wildland fire program, including the initial attack suppression action on wildfires. Preparedness includes readiness, operational planning, oversight, procurement, training, supervision, and deployment of wildland fire suppression personnel and equipment prior to wildland fire occurrence. It also includes activities related to program monitoring and evaluation, and integration of fire into land-use planning. The Fire suppression

operations subactivity funds the emergency and unpredictable aspects of the Department's wildland fire management program. Suppression operations include the total spectrum of management actions taken on wildland fires in a safe, cost-effective manner, considering public benefits and values to be protected, and consistent with resource objectives and land management plans. Emergency actions taken during and immediately following a wildfire to stabilize the soil and structures to prevent erosion, floods, landslides, and further resource damage are included in this activity. Emergency stabilization actions may be performed within one year of containment of a fire. Funding for the ten-year average of inflation-adjusted suppression obligations is split between the FLAME Wildfire Suppression Reserve Fund and this appropriation. The Budget completes the development of a system that allocates fire preparedness resources (e.g., firefighters and equipment) effectively across geographic areas. The Administration intends to implement important reforms within the DOI and Forest Service wildland fire management programs in order to strengthen oversight and accountability of suppression spending and use risk management principles to guide decision-making at the strategic, program, and operational levels.

**Other operations.**—This activity funds programs designed to reduce the risk of damage resulting from catastrophic wildland fires. Hazardous fuels reduction, fire facilities construction and maintenance, post-fire rehabilitation of burned areas, and applied research are funded in other operations. The hazardous fuels reduction activity includes the planning, all operational aspects, and monitoring of treatments to reduce fuel loads and promote ecosystem health in forests and rangelands. Methods for fuels reduction include prescribed fire, mechanical, and chemical treatments or a combination of methods. In FY 2011, all hazardous fuels project funding will be allocated using the Hazardous Fuel Prioritization Allocation System, which ranks and prioritizes allocations based on factors such as fire risk, efficiency of treatments, and effectiveness of treatment. The fire facilities program funds construction and maintenance of facilities to house firefighters and equipment used in wildland firefighting and hazardous fuels reduction. Facilities funded in this activity include crew quarters, warehouses, fire caches, dispatch centers, fire stations, engine storage, and aviation bases. The burned area rehabilitation program begins the restoration process for lands and resources damaged by wildland fires that would not return to fire-adapted conditions without intervention. Soil stabilization and the introduction of native and other desirable plant species are employed for up to three years following containment of a fire to return severely-burned areas to appropriate fire regimes and resource conditions. The joint fire science activity funds the Department's share of the Joint Fire Science program, an inter-agency partnership to sponsor applied research to assist field managers in fire suppression, fuels treatment, and post-fire rehabilitation.

The Budget reflects the President's commitment to wildfire management and community protection by establishing a new Presidential Wildland Fire Suppression Contingency Reserve that will provide up to \$75 million for the Department of the Interior's emergency fire suppression operations. These funds will be available after the fully funded inflation-adjusted ten year average of suppression costs is exhausted. Amounts in the Presidential Wildland Fire Contingency Reserve, coupled with reforms to the Department of the Interior's wildland firefighting program, minimize the need for the Department of the Interior to transfer funds from non-fire programs to pay for firefighting when its appropriated suppression funds are exhausted. It will also lead to improved wildfire operations and promote safe, cost-effective, and accountable results from investments made in managing fire on landscapes.

The Working Capital Fund finances services and activities that can be performed more effectively and efficiently in a centralized manner, including business services provided by the National Business Center (NBC). Activities financed through the fund include information technology and security, Departmental news and information, and safety and health initiatives. NBC hosts the Department's administrative systems, including: the Federal Personnel and Payroll System (FPPS); the Federal Financial System (FFS); the Interior Department Electronic Acquisitions System (IDEAS); and the Financial and Business Management System (FBMS). NBC also provides accounting, acquisition, aircraft, central reproduction, communications, supplies and health services. NBC has expanded payroll services to other agencies as one of the Government-wide payroll providers selected by OPM. Through the National Indian Program Training Center, a component of DOI University, the Working Capital Fund provides training courses and other services related to Indian culture, law and programs to Federal government employees. The appropriated portion of the Working Capital Fund includes funding for FBMS and Departmental Information Technology Enhancements.

The National Drug Intelligence Center's (NDIC) mission is to provide strategic intelligence and assistance to the drug control, public health, and law enforcement and intelligence communities of the United States in order to reduce the adverse impact of drug trafficking, drug abuse, and other drug-related criminal activity. In addition, NDIC provides timely support to law enforcement authorities and the intelligence community by conducting document and computer exploitation of materials collected in federal, state, and local law enforcement activity associated with investigations and operations.

NDIC is organized into two operating divisions: the Intelligence Division and the Intelligence Support Division. The Intelligence Division is comprised of three sections: Information Collection Section (ICS), Intelligence Analysis Section (IAS) and the Intelligence Operations Section (IOS). These sections provide timely strategic domestic drug intelligence assessments focusing on the production, consumption, and trafficking of illicit drugs, document and media exploitation support and developing, coordinating, and collecting data to satisfy Standing Intelligence Requirements

(SIR) and project-specific Priority Intelligence Requirements (PIR).

NDIC prepares strategic analytical studies on the trafficking of illegal drugs and on related illegal activities. NDIC also produces strategic money laundering reports that help implement anti-money laundering initiatives. NDIC reports address the methods wholesale-level traffickers use to launder drug proceeds. NDIC supports the National Money Laundering Threat Assessment and the National Money Laundering Strategy—interagency projects that enhance the nation's ability to counter international money laundering.

NDIC produces intelligence reports that provide timely, predictive analysis of the threat posed by illicit drugs in the United States. These products address needs at the national, state, local, and tribal levels. NDIC also produces Strategic Threat Assessments which are analytical studies of major drug threats impacting the United States and include the following:

—Geographic Assessments provide a strategic overview of the illicit drug threats in the United States or specific jurisdictions in relationship to regions within the Organized Crime Drug Enforcement Task Forces, High Intensity Drug Trafficking Areas, states, cities and borders.

—Organizational Assessments are intelligence products that examine key organizational trafficking threats operating in the United States and their methods of operation.

—Current Intelligence Reports are quick turnaround reports on issues of immediate importance.

NDIC provides real-time support to the law enforcement and intelligence communities by conducting document and media exploitation of materials associated with investigations. NDIC has developed a methodology that allows analysts to quickly organize and assimilate important information in documents and electronic media seized during drug raids. By using this methodology and the Real-time Analytical Intelligence Database (RAID) and HashKeeper software, which were developed in-house, NDIC analysts can organize and assimilate significant amounts of evidence to reveal associations, assets, and methods of drug traffickers to assist criminal investigations and prosecutions. The information is also used to help NDIC analysts better understand the trafficking of drugs in the United States.

Funding for the Justice Information Sharing Technology (JIST) account will provide for corporate investments in information technology. This centralized fund, under the control of the DOJ Chief Information Officer, will ensure that investments in information sharing technology are well-planned and aligned with the Department's overall information technology (IT) strategy and enterprise architecture, and that all DOJ components are able to operate in a technologically unified environment, particularly

with respect to preventing terrorist attacks on the United States. The current major initiatives/projects are described below.

**Joint Automated Booking System.**—The Joint Automated Booking System (JABS) is a Department of Justice information sharing project that provides data to the FBI's Integrated Automated Fingerprint Identification System (IAFIS) through an automated process for the collection and transmission of fingerprint, photographic, and biographical data. The mission of JABS is to: (1) improve the booking process through automation; (2) enable agencies to share and exchange arrest information; and (3) maintain a federal offender tracking system.

**Justice Consolidated Office Network (JCON) Office Automation.**—JCON provides a reliable and robust common office automation platform for several Departmental components. The cornerstone of the project is the JCON Standard Architecture, which defines the IT computing framework, including networked workstations, servers, and printers; a common set of core applications (e-mail, word processing, etc.); and a basic set of system administration tools.

**Litigation Case Management System.**—This project will develop a common framework for the processes and systems that support litigation case management. The implementation of a common solution for litigation case management systems will provide for more accurate reporting on case loads and activity across the United States, operational efficiencies, and greater information sharing.

**JCON S/TS Program.**—The JCON Secret/Top Secret (S/TS) Program provides a seamless, Department-wide IT infrastructure for electronically sharing, processing, and storing classified information. JCON S/TS is a reliable, secure system which allows attorneys, intelligence analysts, law enforcement staff, and managers to exchange classified electronic data within and between components on a real-time basis.

**Law Enforcement Information Sharing Program.**—The Law Enforcement Information Sharing Program (LEISP) is a Department-wide strategy to facilitate the sharing of information about terrorism, criminal activity, and threats to public safety. LEISP will implement the information technology tools needed to facilitate timely, appropriate, and secure sharing of information across the law enforcement community.

**Unified Financial Management System.**—The Unified Financial Management System will allow the Department of Justice to streamline and standardize business processes and procedures across all components, providing secure, accurate, timely, and useful financial and procurement data to program managers, and to produce component and Department level financial statements.

**Cyber Security Program.**—The Cyber Security Program provides the Department of Justice with an effective security structure to counter current and emerging cyber threats and to ensure that our agents, attorneys, and intelligence analysts can continue using the Department's IT systems and networks to support their missions without significant interruption of service resulting from cyber attacks.

For FY 2011, the budget proposes \$90,632,000 in program enhancements to fund the following Department IT programs: Joint Automated Booking System, Justice Consolidated Office Network Office Automation, the Litigation Case Management System, the JCON Secret/Top Secret Program, and the Unified Financial Management System.

Resources are requested to support the Department of Justice's law enforcement wireless communications program, including efforts to make more efficient use of radio spectrum as required by 47 U.S.C. 903(d)(1). Wireless communications efforts will address communications shortcomings in key strategic locations, such as along the northern and southern land borders, and in cities or regions that are potential targets for terrorism. Requested resources will be allocated to operations and maintenance requirements; investment in new, more efficient infrastructure and subscriber equipment; promotion of communications interoperability by federal law enforcement and homeland security personnel; support of existing legacy land mobile radio systems; and management and operating requirements of the Wireless Program Management Office.

This program includes the Office of the Pardon Attorney (OPA) and the Executive Office for Immigration Review (EOIR). The Pardon Attorney receives, reviews, and prepares recommendations to the President for all petitions for executive clemency, i.e., commutation of sentences and pardons, submitted by persons convicted of Federal crimes. The Executive Office for Immigration Review contains 57 Immigration Courts and the Board of Immigration Appeals. EOIR was established January 1, 1983, to improve the immigration hearing and appeal process. For FY 2011, EOIR proposes \$11.0 million in program increases to coordinate with Department of Homeland Security initiatives.

The Office of the Federal Detention Trustee (OFDT) is mandated to oversee detention programs and improve and coordinate detention activities for the Departments of Justice and Homeland Security. The Federal Detention Trustee (the Trustee) reports to the Deputy Attorney General on detention activities, policy, and detainee population forecasting. The Trustee's primary responsibility is to ensure operational effectiveness and the efficient expenditure of appropriated funds ensuring the safe, secure, and humane confinement of persons in the custody of the United States Marshals Service (USMS). The Trustee's role encompasses the care of Federal detainees in private, state, and local facilities, and includes housing, subsistence, transportation, medical care, and medical guard service. The Trustee also manages the Justice Prisoner and Alien Transportation System (JPATS) and strives to ensure equality among participating agencies while allowing unimpeded prisoner transportation operations.

For 2011, OFDT proposes \$94.8 million in program enhancements for housing, medical, transportation, and program oversight costs associated with the anticipated increase in the detainee population. Further, the Trustee will continue to work with state and local governments and private service providers to maintain adequate detention capacity to house detained individuals charged with Federal offenses awaiting trial or sentencing. The Federal Government utilizes various methods to house detainees. Detention bed space for Federal detainees is acquired to maximize efficiency and effectiveness for the Government through: (1) Federally-owned and managed detention facilities, where the Government has paid for construction and operation of the facility (generally funded in the Federal Bureau of Prisons' (BOP) Salaries and Expenses account); (2) Intergovernmental Agreements (IGAs) with state and local jurisdictions, whose excess prison and jail bed capacity is utilized and paid via a daily rate; and (3) Private performance-based contract facilities, where a daily rate is paid. Based on anticipated growth in the Federal detention population, over three-quarters of the USMS's Federally detained population will likely be housed in state, local, and private facilities.

The Trustee has proven successful in achieving efficiencies and cost reductions and avoidance in detention through process and

infrastructure improvements. Through coordinated efforts, OFDT has successfully: developed and implemented eDesignate to provide a more efficient workflow between the U.S. Probation Offices, the USMS, and the BOP; facilitated the establishment of Regional Transfer Centers and Ground Transfer Centers to accelerate the movement of prisoners to a designated BOP facility; and increased the use of detention alternatives by providing funding to the Federal Judiciary to support alternatives to pre-trial detention, such as electronic monitoring, halfway house placement, and drug testing and treatment. OFDT continues to work with its partners to identify issues and develop solutions to drive further efficiencies.

The Office of the Inspector General (OIG) was statutorily established in the Department of Justice on April 14, 1989. The OIG investigates alleged violations of criminal and civil laws, regulations, and ethical standards arising from the conduct of the Department's employees. The OIG provides leadership and assists management in promoting integrity, economy, efficiency, and effectiveness within the Department and in its financial, contractual, and grant relationships with others. Also by statute, the OIG reports to the Attorney General, Congress, and the public on a semiannual basis regarding its significant activities.

The Audit function is responsible for independent audits and reviews of Department organizations, programs, functions, computer security and information technology systems, and financial statement audits. The Audit function also conducts or reviews external audits of expenditures made under Department contracts, grants, and other agreements.

The Investigations function investigates allegations of civil rights violations, bribery, fraud, abuse and violations of other laws, rules and procedures that govern Department employees, contractors, and grantees. This function also develops these cases for criminal prosecution, civil action, or administrative action. In some instances the OIG refers allegations to components within the Department and requests notification of their findings and of any disciplinary action taken.

The Evaluation and Inspections function conducts analyses and makes recommendations to decisionmakers for improvements in Department programs, policies, and procedures. In addition, this function also conducts shorter and more time-sensitive reviews and evaluations to provide managers with early warnings about possible program deficiencies.

The Oversight and Review function investigates allegations of significant interest to the American public and Congress and of vital importance to the Department.

The Executive Direction and Control function provides program direction for the OIG. Responsibilities include policy development, legal counsel, congressional affairs, planning, budget, finance,

personnel, procurement, automated data processing, and general support services.

For FY 2011, the Budget proposes \$1.0 million in program enhancements for the OIG. The request will support the OIG's oversight of the Department's national security programs and the efforts by the Council of the Inspectors General on Integrity and Efficiency.

The United States Parole Commission makes decisions to grant or deny parole to Federal and D.C. prisoners serving sentences of one year and a day or more, sets conditions of parole, supervises parolees and mandatory releasees, recommittees parolees in the event of violations of the conditions of supervision, and determines the termination of supervision in accordance with the Parole Commission and Reorganization Act of 1976.

In addition, the Commission seeks to improve the rehabilitation process by monitoring an effective parole supervision program through U.S. and District of Columbia probation officers and through research studies that evaluate the effectiveness of parole programs. The U.S. Parole Commission has responsibility for parole and parole revocation hearings, and supervision of District of Columbia parolees, and supervised releases under the National Capital Revitalization and Self-Government Improvement Act (P.L. 105-33).

For 2011, the Commission proposes an increase of \$514,222 to implement the District of Columbia Recidivism Reduction And Reentry Enhancement (DC, RRARE) program. This initiative will support the reduction of prison overcrowding through lower recidivism rates and promotes the expansion of alternatives to incarceration for low-risk, non-violent offenders.

There are 94 United States Attorneys' Offices located throughout the United States, Puerto Rico, the Virgin Islands, Guam, and the Northern Mariana Islands. The 93 U.S. Attorneys (Guam and the Northern Mariana Islands are under the direction of a single U.S. Attorney) prosecute criminal offenses against the United States, represent the Government in civil actions in which the United States is concerned, and initiate proceedings for the collection of fines, penalties, and forfeitures owed to the United States. For FY 2011, the U.S. Attorneys propose \$23.5 million in program enhancements. These enhancements will combat financial and mortgage fraud crimes, preserve justice through civil enforcement, and support E-Discovery and International Organized Crime initiatives.

The Federal Government is represented in each of the 94 judicial districts and the District of Columbia Superior Court by a United States Marshal. The primary missions of the United States Marshals Service (USMS) are protection of the Federal judiciary, protection of witnesses, execution of warrants and court orders, and custody and transportation of unsentenced prisoners. The USMS is the principal support force in the Federal judicial system and an integral part of the Federal law enforcement community.

For 2011, the USMS proposes \$10.2 million in program increases to enhance the capabilities of the Special Operations Group and the Technical Operations Group.

*Reimbursable program.*—Federal funds are derived from the Administrative Office of the U.S. Courts for the court security program, the Office of the Federal Detention Trustee for the housing and transportation of USMS prisoners in non-Federal facilities, the Assets Forfeiture Fund for seized assets management, the Organized Crime Drug Enforcement Task Force Program for multi-agency drug investigations, and the Office of National Drug Control Policy and the Centers for Disease Control for security services. Non-Federal funds are derived from state and local governments for witness protection and the transportation of prisoners pursuant to state writs, as well as fees collected from service of civil process and sales associated with judicial orders.

This appropriation is used to pay fees and expenses of witnesses who appear on behalf of the Government in litigation in which the United States is a party. The United States Attorneys, the United States Marshals, and the Department's six litigating divisions are served by this appropriation.

*Fees and expenses of witnesses.*—Pays the fees and expenses associated with the presentation of testimony on behalf of the United States for fact witnesses, who testify as to events or facts

about which they have personal knowledge, and for expert witnesses, who provide technical or scientific testimony. This program also pays the fees of physicians and psychiatrists who examine accused persons upon order of the court to determine their mental competency.

*Protection of witnesses.*—Pays subsistence and other costs to ensure the safety of Government witnesses whose testimony on behalf of the United States places them or their families in jeopardy.

*Victim compensation fund.*—Pays restitution to any victim of a crime committed by a protected witness who causes or threatens death or serious bodily injury.

*Private counsel.*—Pays private counsel retained to represent Government employees who are sued, charged, or subpoenaed for actions taken while performing their official duties (private counsel expenditures may be authorized for congressional testimony as well as for litigation in instances where Government counsel is precluded from representing the employee or private counsel is otherwise appropriate).

*Foreign Counsel.*—Allows the Civil Division, which is authorized to oversee litigation in foreign courts, to pay legal expenses of foreign counsel, retained and supervised by the Department of Justice, who represent the United States in cases filed in foreign courts.

*Alternative Dispute Resolution.*—Pays the costs of providing Alternative Dispute Resolution (ADR) services in instances wherein the Department has taken the initiative to use such services and wherein the courts have directed the parties to attempt a settlement using mediation or some other ADR process.

For FY 2011, the proposed increase in this appropriation provides for expert witness needs and for the protection of witnesses previously funded through existing balances.

*United States trustee system fund.*—The United States trustees supervise the administration of bankruptcy cases and private trustees in the Federal Bankruptcy Courts and litigate against fraud and abuse in the system by debtors, creditors, attorneys, bankruptcy petition preparers, and others. The Bankruptcy Judges, U.S. Trustees and Family Farmer Bankruptcy Act of 1986 (Public Law 99-554) expanded the pilot trustee program to a twenty-one region, nationwide program encompassing 88 judicial districts. (Bankruptcy cases filed in Alabama and North Carolina are administered by the Administrative Office of the U.S. Courts.) The Bankruptcy Abuse Prevention and Consumer Protection Act of 2005 (Public Law 109-8) expanded United States trustees' existing responsibilities to include means testing, credit counseling/debtor education, and debtor audits. User fees that are assessed offset the annual appropriation.

The Comprehensive Crime Control Act of 1984 established the Assets Forfeiture Fund, into which forfeited cash and the proceeds of sales of forfeited property are deposited. Authorities of the fund have been amended by various public laws enacted since 1984. Under current law, authority to use the fund for certain investigative expenses shall be specified in annual appropriation acts. Expenses necessary to seize, detain, inventory, safeguard, maintain, advertise or sell property under seizure are funded through a permanent, indefinite appropriation. In addition, beginning in 1993, other general expenses of managing and operating the assets forfeiture program are paid from the permanent, indefinite portion of the fund. Once all expenses are covered, the balance is maintained to meet ongoing expenses of the program. Excess unobligated balances may also be allocated by the Attorney General in accordance with 28 U.S.C. 524(c)(8)(E).

The National Security Division (NSD) strengthens the Department's core national security functions by providing strategic national security policy coordination and development. NSD consolidates counterterrorism and counterespionage prosecutors with attorneys who oversee the Department's foreign intelligence/counterintelligence operations. For FY 2011, the National Security Division proposes \$7.8 million in program enhancements. These enhancements will support intelligence oversight and litigation, counterterrorism investigations, foreign investment review, and infrastructure needs.

The Organized Crime Drug Enforcement Task Force (OCDETF) Program consists of a nationwide structure of nine regional task forces that combine the resources and expertise of its seven member federal law enforcement agencies, in cooperation with state and local investigators and with prosecutors from the U.S. Attorneys' Offices and the Criminal and Tax Divisions, to target and destroy major narcotic-trafficking and money-laundering organizations. The task forces perform the following activities:

**Investigation.**—This activity includes resources for direct investigative, intelligence and support activities of the task forces, focusing on the disruption and dismantlement of drug trafficking and money laundering organizations by various organized crime enterprises. Organizations participating under the Investigations function are the Drug Enforcement Administration, Federal Bureau of Investigation, Internal Revenue Service, Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Coast Guard, U.S. Marshals Service, and U.S. Immigration and Customs Enforcement.

**Prosecution.**—This activity includes resources for the prosecution of cases generated through the investigative efforts of task force agents. Litigation efforts are intended to dismantle drug trafficking and money laundering organizations in their entirety, most notably the leaders of these organizations. This includes activities designed to secure the seizure and forfeiture of the assets of these enterprises. Participating agencies are the U.S. Attorneys, and the Department of Justice's Criminal Division and Tax Division.

The following represents the distribution of obligations from this account among participating agencies:

Number of new OCDETF Investigations initiated .....	1,048	877	914

At the request of the Attorney General, the OCDETF member agencies, with input from the Intelligence Community, developed the Consolidated Priority Organization Target (CPOT) List, which identifies those significant international drug trafficking and money laundering organizations most responsible for the illegal drug supply to the United States. In FY 2009, the CPOT list included 59 international targets. As of January 2010, OCDETF had identified 729 OCDETF investigations that are targeting components of CPOT-listed organizations. The CPOT strategy seeks to incapacitate the foreign-based organization heads, their domestic transportation and smuggling systems, their regional and local distribution networks, and their financial operations, thereby interrupting the flow of drugs into the United States and diminishing the capacity of the CPOT organizations to reconstitute themselves. The strategy aims to ensure that OCDETF funding is being used as effectively and efficiently as possible. In addition to CPOTs, OCDETF also prioritizes cases linked to Regional Priority Organization Targets (RPOTs), whose drug activities have a significant impact on the particular drug threats facing one or more of the nine OCDETF regions. OCDETF's commitment to pursuing priority targets is evident from the steady increase in the percentage of cases linked to these targets. During 2009, 16 percent of OCDETF's active investigations were linked to a CPOT, while 19 percent were linked to RPOTs.

In 2009, OCDETF initiated 1,048 new cases, 171 more than OCDETF's FY 2009 estimate of 877. OCDETF district and regional coordination groups are working to ensure that only those investigations that meet the standards established for OCDETF cases are approved and the quality of these new investigations clearly reflects OCDETF's commitment to pursue the most significant drug trafficking and money laundering organizations.

The FY 2011 request includes an enhancement of \$37.3 million to bolster OCDETF's efforts to disrupt and dismantle the major Mexican drug cartels operating along the Southwest Border of the United States. These illegal organizations are responsible for smuggling drugs, guns, illicit drug proceeds, and the associated violence into nearly every state of our country.

The mission of the FBI is to protect the United States from terrorist and foreign intelligence activities; to uphold the law through the investigation of violations of federal criminal law; to provide leadership and assistance to federal, state, local, and international law enforcement agencies; and to perform these responsibilities in a manner that is responsive to the needs of the public and is faithful to the Constitution of the United States.

Protecting America in the current challenging national security and criminal environment requires that the FBI refocus its priorities; realign its workforce to address these priorities; and improve management policies and operating procedures to enhance flexibility, agility, effectiveness, and accountability. The FBI's strategic priorities are, in order:

- Protect the United States from terrorist attack,
- Protect the United States against foreign intelligence operations and espionage,
- Protect the United States against cyber-based attacks and high technology crimes,
- Combat public corruption at all levels of government,
- Protect civil rights,
- Combat transnational and national criminal organizations and enterprises,
- Combat major white-collar crime,
- Combat significant violent crime,
- Support federal, state, county, municipal, and international partners,

—Upgrade technology to successfully perform the FBI's mission.

FBI investigations and operations are conducted through a network of 56 major field offices, 387 smaller field offices (resident agencies), and three information technology centers located throughout the United States; the FBI Academy and engineering complex at Quantico, Virginia; a fingerprint identification and criminal justice information services center in Clarksburg, West Virginia; over 60 foreign liaison posts; and FBI Headquarters in Washington, D.C.

A number of FBI activities are carried out on a reimbursable basis. For example, the FBI is reimbursed for its participation in Interagency Crime and Drug Enforcement programs and by other federal agencies for certain investigative services, such as pre-employment background inquiries and fingerprint and name checks. The FBI is also authorized to conduct fingerprint and name checks for certain non-federal agencies.

For FY 2011 the FBI proposes \$233 million in program enhancements. These enhancements support national security, intelligence, information technology, information sharing, and infrastructure needs. Highlights of these initiatives include: (1) enhanced national security and intelligence capabilities; (2) enhanced surveillance capabilities; (3) additional financial crime investigations; and (4) enhanced computer intrusions investigative capabilities. Further, offsets totaling \$17.3 million are proposed for the Cyber Education and Development Unit, travel expenses, and the acquisition of new cars.

The Drug Enforcement Administration's (DEA) mission is to enforce the controlled substances laws and regulations of the United States. DEA's major focus is the disruption and dismantlement of Priority Target Organizations (PTOs)—domestic and international drug trafficking and money laundering organizations having a significant impact upon drug availability in America. DEA emphasizes PTOs with links to organizations on the Attorney General's Consolidated Priority Organization Target (CPOT) list, which represents the "Most Wanted" drug supply and money laundering organizations believed to be primarily responsible for the United States' illicit drug supply. DEA places

a high priority on targeting the financial infrastructure of major drug trafficking organizations and members of the financial community who facilitate the laundering of their proceeds. From FY 2005 to FY 2009, DEA denied to drug traffickers more than \$12.9 billion in revenue. In addition to keeping drugs and drug-related violence out of the United States, DEA plays a vital role in the areas of national security, border security, and immigration.

The resources requested in FY 2011 will allow DEA to build upon its recent accomplishments. According to DEA's analysis of cocaine seizures, DEA's efforts have had a significant impact on the domestic drug market. From January 2007 to June 2009, the price per pure gram of cocaine has increased 77 percent while purity decreased 27 percent. Factors contributing to these favorable results include DEA's Drug Flow Attack Strategy; DEA-led operations such as Operation All Inclusive; Mexico's increased pressure on traffickers; extraditions from Mexico and Colombia; DEA coalitions with host nation counterparts; and the denial of drug trafficking revenue.

DEA's activities are divided into three main decision units:

**Domestic Enforcement.**—Through effective enforcement efforts and associated support functions, DEA disrupts and dismantles the leadership, command, control, and infrastructure of major drug syndicates, criminal organizations, and violent drug trafficking groups that threaten the United States. This activity contains most of DEA's resources, including domestic enforcement groups, state and local task forces, other federal and local task forces, intelligence groups, and all the support functions essential to accomplishing their mission. Strategic objectives have been established as follows:

- Identify and target the national/regional organizations most responsible for the domestic distribution and manufacture of illicit drugs;

- Systematically disrupt or dismantle targeted organizations by arresting/convicting their leaders and facilitators, seizing and forfeiting their assets, targeting their money laundering operations, and destroying their command and control networks; and,

- Work with international offices to dismantle domestic organizations directly affiliated with international cartels.

**International Enforcement.**—DEA works with its foreign counterparts to attack the vulnerabilities in the leadership, production, transportation, communications, finance, and distribution sectors of major international drug trafficking organizations. Strategic objectives include:

- Identify, prioritize, and target the most significant international drug and chemical trafficking organizations;

- Disrupt and dismantle the networks, financial infrastructures, operations, and the resource bases of targeted international drug and chemical trafficking organizations; and,

- Prevent drug trafficking organizations from funding terrorist organizations and activities.

**State and Local Assistance.**—DEA responds to clandestine laboratory training requirements, hazardous waste cleanup, and cannabis eradication/suppression needs of the U.S. law enforcement community. DEA supports state and local law enforcement with methamphetamine-related assistance and training, which allows state and local agencies to better address the methamphetamine threat in their communities and reduce the impact that methamphetamine has on the quality of life for America's citizens. By teaching and assisting others in the techniques of clandestine laboratory drug enforcement, hazardous waste cleanup, and cannabis eradication/suppression, DEA is

able to expand drug enforcement across the United States in a very cost-effective manner. The strategic objectives are to:

- Provide clandestine methamphetamine laboratory training to state and local law enforcement officers;
- Assist state and local law enforcement with efforts to clean up hazardous waste from clandestine methamphetamine laboratories; and,
- Assist local efforts to control the production of cannabis.

DEA also receives funding through reimbursable agreements. The primary reimbursements to DEA are for the Organized Crime Drug Enforcement Task Forces Program and the Department of Justice's Assets Forfeiture Fund.

For FY 2011, DEA proposes a total of \$18 million in program enhancements under Salaries and Expenses. Of this amount, an increase of \$12 million is requested to expand and reinforce DEA operations on the Southwest Border and its ability to disrupt and dismantle violent Mexican drug cartels. This funding will allow DEA to increase the user capacity of the El Paso Intelligence Center (EPIC) System Portal and continue the Mexico Sensitive Investigative Unit (SIU) investments funded in the FY 2009 supplemental. EPIC and SIUs are a key component in the efforts of DEA and Mexico to disrupt and dismantle Mexican drug cartels.

Further, an increase of \$5 million is requested for Intelligence Sharing. Funding will be used to provide the necessary storage and processing capability for intelligence programs run by DEA's Office of Special Intelligence and Special Operations Division. Additionally, the Intelligence Sharing initiative supports an Office of the Director of National Intelligence (ODNI) initiative to improve infrastructure that supports information sharing within the Intelligence Community.

DEA's general long-term goal supports the Department of Justice's efforts to reduce illegal drug availability. DEA accomplishes its general long-term goal by disrupting or dismantling identified PTOs. The measures below reflect DEA's focus on PTOs and those PTOs linked to organizations on the Attorney General's CPOT list.

In FY 2011, DEA is requesting \$42 million to expand and renovate the existing El Paso Intelligence Center (EPIC) facility. This funding provides temporary modular buildings, architectural and engineering design, 33,000 square feet of new construction, paving and site improvements, telecommunications, contingency and overhead, supervision, and infrastructure support. This renovation and expansion is necessary to provide for the increasing demand for EPICs services from federal, state, and local agencies.

Public Law 102-395 established the Diversion Control Fee Account in 1993. Fees charged by the Drug Enforcement Administration under the Diversion Control Program are set at a level that ensures the recovery of the full costs of operating this program. By carrying out the mandates of the Controlled Substances Act (CSA), DEA ensures that adequate supplies of controlled drugs are available to meet legitimate medical, scientific, indus-

trial, and export needs, while preventing, detecting, and eliminating diversion of these substances to illicit traffic. The CSA requires physicians, pharmacists, and chemical companies to register with the DEA in order to distribute or manufacture controlled substances or listed chemicals. Investigations conducted by DEA's Diversion Control Program fall into two distinct categories: the diversion of legitimately manufactured pharmaceutical controlled substances and the diversion of controlled chemicals (List I and II) used in the illicit manufacture of controlled substances. Strategic objectives include:

—Identify and targeting those responsible for the diversion of pharmaceutical controlled substances through traditional investigation and cyber crime initiatives to systematically disrupt and dismantle those entities involved in diversion schemes;

—Support the registrant population with improved technology, including e-commerce and customer support, while maintaining cooperation, support and assistance from the regulated industry;

—Educate the public on the dangers of prescription drug abuse and taking proactive enforcement measures to combat emerging drug trends; and,

—Ensure an adequate and uninterrupted supply of pharmaceutical controlled substances and listed chemicals to meet legitimate medical, commercial, and scientific needs.

For FY 2011, DEA is requesting an increase of \$37 million for regulatory staffing at DEA headquarters and in domestic field offices, to expand Tactical Diversion Squads, to enhance intelligence activities, to assist pharmaceutical and chemical Internet investigations, and support the Office of National Drug Control Policy's Demand Reduction Interagency Working Group (IWG) prescription drug monitoring initiative.

ATF is the U.S. law enforcement agency dedicated to protecting our Nation from the illicit use of firearms and explosives in violent crime and acts of terrorism. ATF protects our communities from violent criminals and criminal organizations by investigating and preventing the illegal use and trafficking of firearms, the illegal use and improper storage of explosives, acts of arson and bombings, and the illegal diversion of alcohol and tobacco products. ATF regulates the firearms and explosives industries from manufacture and/or importation through retail sale to ensure that Federal Firearms Licensees (FFLs) and Federal Explosives Licensees (FELs) and permittees conduct business in compliance with all applicable laws and regulations.

For FY 2011, ATF proposes program enhancements of \$11.8 million to support the annualization of the American Recovery and Reinvestment Act Southwest Border Gunrunner initiative, and \$1.2 million to support law enforcement coordination activities during national emergencies.

Federal Prison Industries, Inc. (FPI), was created by Congress in 1934 and is a wholly-owned Government corporation. Its mission is to employ and train federal inmates through a diversified work program providing products and services to other federal agencies. These operations are conducted in such a manner as to maximize meaningful inmate employment opportunities and minimize the effects of competition on private industry and labor. Employment provides inmates with work, occupational knowledge and skills, plus money for personal expenses and family assistance.

FPI strives to provide additional industrial employment opportunities at existing and planned institutions.

**Budget program.**—Federal Prison Industries, Inc. operations are entirely self-sustaining and no appropriations are required for its operations. The amounts used by the Corporation for administrative expenses are subject to a congressional limitation. Information regarding this limitation is provided separately following this account.

**Financing program.**—Revenues are derived entirely from the sale of products and services to other federal agencies. Operating expenses are applied against these revenues resulting in operating income or loss. Earnings surplus to the needs of the manufacturing operations, capital improvements, and cash reserves are used to pay accident compensation.

**Operating results.**—To date, Federal Prison Industries, Inc. has returned to the Treasury a total of \$82 million of retained income in excess of the Corporation's needs. No contributions from budget authority have been made to offset deficits for non-revenue producing outlays since the inception of the fund.

The FY 2011 Budget requests \$224.3 million in FY 2011 for the Office of Justice Programs' (OJP) Justice Assistance appropriation. This appropriation includes programs that provide grants, contracts, and cooperative agreements for research, development and evaluation; development and dissemination of quality statistical and scientific information; victim services for children; and nationwide support for law enforcement agencies.

Through leadership, funding, and technical support, OJP plays a significant role in the research and evaluation of new technologies to assist law enforcement, corrections personnel, and courts in protecting the public, and guides the development of new techniques and technologies in the areas of crime prevention, forensic science, and violence and victimization research. The research and statistical data compiled by OJP staff are used at all levels of government to guide decision making and planning efforts related to law enforcement, courts, corrections, and other criminal justice issues. Grants, technical assistance, and national leadership provided by OJP have supported efforts to provide and improve assistance to the Nation's federal, state, local, and tribal law enforcement and criminal justice agencies.

**Research, Evaluation, and Demonstration Program.**—The National Institute of Justice (NIJ) serves as the research and development agency of the Department of Justice, as authorized by 42 U.S.C. 3721–3723. The mission of NIJ is to advance scientific research, development, and evaluation to enhance the administration of justice and public safety by providing objective, independent, evidence-based knowledge, and tools to meet the challenges of crime and justice, particularly at the state and local levels. NIJ research, development, and evaluation (RD&E) efforts support practitioners and policy makers at all levels of government.

NIJ focuses its resources in program areas where federal assistance will generate the greatest benefit. During strategic and budgetary planning, NIJ emphasizes RD&E activities in the following major program areas: (1) State and Local Law Enforcement; (2) Forensic Science; (3) Crime Prevention; (4) Violence and Victimization; and (5) Corrections and Courts.

RD&E efforts funded by NIJ concentrate on practical and effective approaches to improving crime and delinquency prevention, crime control, and the administration of justice. NIJ research funding supports the development of new standards and tools for criminal justice practitioners; testing of innovative concepts, equipment, and program models in the field; development of new knowledge through research on crime, justice systems, violence and victimization issues; and evaluation of existing programs and responses to crime. Information generated by NIJ research activities is actively disseminated to numerous targeted audiences across the United States, including policymakers, program partners, and Federal, state, local, and tribal justice agencies.

In FY 2011, NIJ will continue its important work in forensic sciences (including DNA) in support of effective crime investigation and prosecution. NIJ also plans to make research investments aligned with administration priorities, including: preventing youth violence through research, development, testing, and evaluation; combating illicit drugs and crime; improving the justice system, including problem-solving courts; crime prevention; maintaining effective support programs for ex-offenders through community corrections and prisoner reentry; addressing electronic crime; addressing crime and security at America's borders; preventing delinquency and building effective justice processes for youthful offenders; and improving law enforcement, including effective information-sharing technologies and strategies. The FY 2011 Budget proposes \$70,800,000 for this program.

## JUSTICE ASSISTANCE—Continued

*Stopping Crime Block by Block.*—The Stopping Crime Block by Block program will advance justice by developing knowledge about what works in criminal justice programs and policies, and what makes communities safer from crime through a multi-pronged research program that includes multi-site demonstration field experiments and basic social science research. The FY 2011 Budget proposes to set aside \$10,000,000 from the funding provided for Research, Evaluation, and Demonstration Programs to support this program.

*Arrestee Drug Abuse Monitoring (ADAM).*—The ADAM Program will design and implement a multi-site survey to collect data on drug use by arrestees to inform policy decisions about evolving trends in the types of drugs used by offenders and their relationship to the crimes being committed. The FY 2011 Budget proposes to set aside \$10,000,000 from the funding provided for Research, Evaluation, and Demonstration Programs to support this program.

*Evaluation Clearinghouse/What Works Repository.*—This program will be used to establish a website designed to inform the criminal and juvenile justice communities regarding the latest developments in evidence-based and promising programs. This site will provide more reliable information to support research, budgetary, and program development decisions at the federal, state and local levels, and promote the development of evidence-based strategies and practices. The FY 2011 Budget proposes to set aside \$1,000,000 from the funding provided for Research, Evaluation, and Demonstration Programs to support this program.

*Program Evaluation Initiative.*—This program will support a joint inmate reentry evaluation with the Bureau of Prisons and the Department of Labor, as well as an evaluation capacity building initiative. The FY 2011 Budget proposes to set aside \$1,800,000 from the funding provided for Research, Evaluation, and Demonstration Programs to support this program.

*Criminal Justice Statistics Program.*—The Bureau of Justice Statistics (BJS) serves as the primary statistical arm of the Department of Justice, as authorized by 42 U.S.C. 3721–3735, and assists state, local, and tribal governments in collecting and analyzing justice statistics. It disseminates quality information and statistics to inform policy makers, researchers, criminal justice practitioners, and the general public. The Criminal Justice Statistics Program collects, analyzes and publishes data on a wide range of criminal justice topics, including: (1) victimization; (2) law enforcement; (3) prosecution; (4) courts and sentencing; (5) corrections; (6) tribal justice; (7) justice expenditures and employment; (8) international justice systems; and (9) drugs, alcohol, and crime.

In addition to research activities, BJS administers the State Justice Statistics Program for the Statistical Analysis Centers (SACs). SACs have been established in all states and most territories to centralize and integrate criminal justice statistical functions. Through financial and technical assistance to the state SACs, BJS promotes efforts to coordinate statistical activities within the states and conducts the research as needed to estimate the impact of legislative and policy changes. The SACs also serve in a liaison role, assisting BJS with data gathering from respondent agencies within their states.

Further, the Criminal Justice Statistics Program will expand upon its base of research in FY 2011 with research in a number of areas including: (1) victimization via the redesign the National Criminal Victimization Survey (NCVS), which is the sole continuous source of national information for the many topics related to crime and victimization rates for the Administration and Con-

gress, state and local law enforcement, and the research community; (2) law enforcement; (3) adjudication and sentencing; (4) corrections; (5) recidivism and reentry; and (6) studying American Indians in the criminal justice system. The FY 2011 Budget proposes \$62,500,000 for the Criminal Justice Statistics program, of which \$26,000,000 is for NCVS and \$15,000,000 is requested for NCVS redesign work.

*Indigent Defense.*—The Indigent Defense program will support a BJS study examining how the indigent defense system has responded to the standards as set forth in the landmark Supreme Court case, *Gideon v. Wainwright*, and provide national-level estimates of indigent defense services. The FY 2011 Budget proposes to set aside \$1,300,000 from the funding provided for the Criminal Justice Statistics Program to support this program.

*Redesign and Development of Data Collection Programs for Indian Country.*—This program will conduct on-going statistical data collections on Indian country including: (1) tribal justice agencies-law enforcement, prosecution and adjudication, and correctional agencies; (2) state justice agencies having jurisdiction in Indian Country; and (3) federal justice agencies. The project will also coordinate the improvement of data collection systems to include Indian Country and American Indians at all levels of government. The FY 2011 Budget proposes to set aside \$1,200,000 from the funding provided for the Criminal Justice Statistics Program to support this program.

*Other State and Local Law Enforcement Assistance Efforts.*—The Justice Assistance account also provides funding for other OJP state and local law enforcement assistance efforts to improve information sharing for crime victims and among state and local law enforcement agencies, improve outcomes related to missing and exploited children, prevent and combat hate crime, and provide one-stop support for state, local, and tribal law enforcement:

*Victim Notification System.*—The Statewide Automated Victim Information Notification Program, administered by the Bureau of Justice Assistance, provides funds to implement statewide automatic victim notification programs, which provide victims of domestic violence and other violent crimes access to information about the custody status of offenders. *Regional Information Sharing System (RISS).*—This program, authorized by 42 USC 3796h(d) and administered by the Bureau of Justice Assistance (BJA), provides funding for a national criminal intelligence system operated by and for state and local law enforcement agencies. Six regional intelligence centers operate in mutually exclusive geographic regions that include all 50 states, the District of Columbia, and U.S. territories, with some member agencies in Canada, Australia, and England. These regional centers facilitate information sharing to support member agency investigative and prosecution efforts by providing state-of-the-art investigative support and training, analytical services, specialized equipment, and secure information-sharing technology. The FY 2011 Budget proposes \$9,000,000 for this program.

The FY 2011 Budget requests \$289.8 million for the Office of Justice Programs' (OJP) Juvenile Justice Programs appropriation. This appropriation account includes programs that support state, local and tribal community efforts to develop and implement effective and coordinated prevention and intervention juvenile programs. Such programs are designed to: reduce juvenile delinquency and crime, and improve the juvenile justice system so that it protects public safety, holds offenders accountable, and provides treatment and rehabilitative services tailored to the needs of juveniles and their families.

The Nation's youth face an ever changing set of problems and barriers to successful lives. As a result, OJP is constantly challenged to develop enlightened policies and programs to address the needs and risks of those youth who enter the juvenile justice system. OJP remains committed to leading the nation in efforts

addressing these challenges, which include: preparing juvenile offenders to return to their communities following release from secure correctional facilities; dealing with the small percentage of serious, violent, and chronic juvenile offenders; helping states address the disproportionate confinement of minority youth; and helping children who have been victimized by crime and child abuse.

**Part B: Formula Grants.**—This program supports state, local, and tribal efforts to develop and implement comprehensive state juvenile justice plans. Funds also may be used for research, evaluation, statistics, other informational activities, and training and technical assistance. Funding also is available for training and technical assistance to help small, non-profit organizations, including faith-based organizations, with the federal grants process. The FY 2011 Budget proposes \$72,000,000 for this program.

**Youth Mentoring.**—The Youth Mentoring program support faith- and community-based, nonprofit, and for-profit agencies in the enhancement and expansion of existing mentoring strategies and programs, as well as assistance to develop, implement, and pilot test mentoring strategies and programs designed for youth in the juvenile justice, reentry, and foster care systems. In addition, OJP supports training and technical assistance to the sites to assist with adapting existing mentoring approaches to meet the needs of the target populations and to identify and maintain partnerships. The FY 2011 Budget proposes \$45,000,000 for this program.

**Title V Local Delinquency Prevention Incentive Grants Program.**—The Title V program provides resources through state advisory groups to units of local government for a broad range of delinquency prevention programs and activities to benefit youth who are at risk of having contact with the juvenile justice system. The FY 2011 Budget proposes \$62,000,000 for this program.

**Victims of Crime Act (VOCA).**—The Improving Investigation and Prosecution of Child Abuse Program supports training and technical assistance to professionals involved in investigating, prosecuting, and treating child abuse. This program also supports the development of Children's Advocacy Centers and/or multi-disciplinary teams designed to prevent the inadvertent revictimization of an abused child by the justice and social service systems in their efforts to protect the child. The FY 2011 Budget proposes \$20,000,000 for this program.

**Community-Based Violence Prevention Initiatives.**—Based on the violence reduction work of several cities and public health research of recent years, OJP will provide funding for community-based strategies that focus on street-level outreach, conflict mediation, and the changing of community norms to reduce violence, particularly shootings. The FY 2011 Budget proposes \$25,000,000 for this program.

**Juvenile Accountability Block Grant (JABG) Program.**—This program funds block grants to states to support a variety of accountability-based programs that support the basic premise that both the juvenile and the juvenile justice system should be held accountable. The FY 2011 Budget proposes \$40,000,000 for this program.

**National Juvenile Delinquency Court Improvement Program.**—The National Juvenile Delinquency Court Improvement Program will provide grants, training, technical assistance, and national leadership to assist states, territories and Indian tribes in implementing the Key Principles of a Juvenile Delinquency Court of Excellence in their juvenile justice systems. The FY 2011 Budget proposes \$13,000,000 for this new program.

**Disproportionate Minority Contact Evaluation and Pilot Program.**—This program will support empirical impact and outcome evaluations of delinquency prevention programs and systems improvement activities, and provide intensive technical assistance to help state, local, and tribal governments to address the disproportionate number of juvenile members of minority groups who are exposed to the juvenile justice system. The FY 2011 Budget proposes \$806,000 for this program.

**Gang and Youth Violence Prevention and Intervention Initiative.**—The Gang and Youth Violence Prevention and Intervention Initiative will fund communities, localities, and state programs that support a multi-strategic, coordinated approach to gang prevention, intervention, suppression, and reentry in targeted communities. This initiative also aims to enhance and support evidence-based multimodal direct service programs that target both youth at-risk of gang membership, as well as, gang involved youth. The FY 2011 Budget proposes \$12,000,000 for this program.

The Budget is requesting \$77.3 million for the Office of Justice Programs' Public Safety Officers Benefits (PSOB) appropriation. This appropriation account supports one mandatory and two discretionary programs that provide benefits to public safety officers who are severely injured in the line of duty and to the families and survivors of public safety officers killed or mortally injured in the line of duty. These programs represent the continuation of a forty-year partnership among the Department of Justice; national public safety organizations; and state, local, and tribal public safety agencies. Created in 1976, the PSOB program oversees three types of benefits:

**Death Benefits.** The Death Benefits program provides a one-time financial benefit to survivors of public safety officers whose deaths resulted from injuries sustained in the line of duty.

**Disability Benefits.** The Disability Benefits program offers a one-time financial benefit to public safety officers permanently disabled by catastrophic injuries sustained in the line of duty. The FY 2011 Budget proposes \$12,200,000 for this discretionary program.

**Education Benefits.** This program provides financial support for higher education expenses to the eligible spouses and children of public safety officers killed or permanently disabled in the line of duty. The FY 2011 Budget proposes \$4,100,000 for this discretionary program.

Programs supported by the Crime Victims Fund focus on providing compensation to victims of crime and survivors; sup-

porting appropriate victims' services programs and victimization prevention strategies; and building capacity to improve response to crime victims' needs and increase offender accountability. The Fund was established to address the need for victim services programs, and to assist state, local, and tribal governments in providing appropriate services to their communities.

The Fund is financed by collections of fines, penalty assessments, and bond forfeitures from defendants convicted of Federal crimes. The FY 2011 Budget proposes to provide \$800 million from collections and balances for crime victim compensation, services, and related needs.

The Crime Victims Fund provides support for victim-witness services programs administered by the Executive Office for United States Attorneys (EOUSA) and the Federal Bureau of Investigation (FBI). The FY 2011 Budget proposes to provide EOUSA with \$32.6 million from the Fund to support 309 victim-witness services positions (including 139 new positions) and 240 FTE. In addition, EOUSA will receive \$5.4 million for its victim notification system. The FY 2011 Budget also proposes to provide FBI with \$21.4 million from the Fund to support 155 victim-witness services positions (including 33 new positions) and 155 FTE.

The FY 2011 Budget also proposes to use \$100 million from the Fund for discretionary grants to aid victims of domestic violence and violence against women, including grants to support domestic violence shelters, transitional housing assistance, and other services.

Enacted in 1998, the Workforce Investment Act (WIA) is the primary authorization for this appropriation account. WIA expired on September 30, 2003. The Act is intended to provide workers with the information, advice, job search assistance, and training they need to get and keep good jobs; and to provide employers with skilled workers. Funds appropriated for this account generally are available on a July- to- June program year basis, and substantial advance appropriation amounts are provided. This account includes:

**Adult employment and training activities.**—Grants to provide financial assistance to States and territories to design and operate training and employment assistance programs for adults, including low-income individuals and public assistance recipients. The 2011 Budget directs 5 percent of these funds to a Workforce Innovation Fund for competitive grants to support and test "learn and earn" strategies like apprenticeships and on-the-job training; promote regional and sectoral collaborations; and support other evidence-based innovations. DOL will work closely with the Department of Education and other federal agencies to administer the grants, and use them as a mechanism for encouraging States and localities to work across programs to improve service delivery and participant outcomes.

**Dislocated worker employment and training activities.**—Grants to provide reemployment services and retraining assistance to individuals dislocated from their employment. Five percent of dislocated worker formula funds are contributed to the Workforce Innovation Fund described above.

**Youth activities.**—Grants to support a wide range of activities and services to prepare low-income youth for academic and employment success, including summer jobs. The program links academic and occupational learning with youth development activities. The 2011 Budget directs 15 percent of total Youth funding to a Youth Innovation Fund to pilot innovative models for delivering summer and year-round work experiences and comprehensive services to disconnected youth.

**Green Jobs.**—These funds will support research, labor exchange, and job training projects that help prepare workers for careers related to renewable energy and energy efficiency.

**Reintegration of Ex-Offenders.**—Supports activities authorized under the Second Chance Act to help individuals exiting prison make a successful transition to community life and long-term employment through mentoring, job training, and other services. The Department of Labor will coordinate closely with the Department of Justice in carrying out this program.

**Native Americans.**—Grants to Indian tribes and other Native American groups to provide training, work experience, and other employment-related services to Native Americans.

**Migrant and Seasonal Farmworkers.**—Grants to public agencies and nonprofit groups to provide training and other employability development services to economically disadvantaged youth and families whose principal livelihood is gained in migratory and other forms of seasonal farmwork.

**National programs.**—Provides program support for WIA activities and nationally administered programs for segments of the population that have special disadvantages in the labor market. National activities conducted under the Pilots, Demonstrations, and Research authority will include projects to demonstrate and evaluate transitional job models, which combine short-term subsidized or supported employment with intensive case management services to help populations with barriers to employment succeed in the labor market.

**Workforce Data Quality Initiative.**—Competitive grants to support the development of longitudinal data systems that integrate education and workforce data to provide timely and accessible information to consumers, policymakers, and others.

The Office of Job Corps supports the administration and management of the Job Corps program. Established in 1964 as part of the Economic Opportunity Act and authorized by the Workforce Investment Act of 1998 (P.L. 105-220, Title 1, Subtitle C, section 141), Job Corps is an intensive educational and career technical training program for disadvantaged youth who need and can benefit from these training services in order to become more employable, responsive, and productive citizens.

The program serves more than 60,000 participants and operates in a primarily residential setting at 122 centers in 48 states, the District of Columbia and the Commonwealth of Puerto Rico. A new center in Florida is scheduled to open in 2010, and four new centers are currently under design or construction in Wisconsin, Iowa, New Hampshire and Wyoming. Large and small corpora-

tions and nonprofit organizations manage and operate 94 of the Job Corps centers through contractual agreements with the Department of Labor, while the other 28 centers are operated through an interagency agreement with the U.S. Department of Agriculture. Job Corps participants must be economically disadvantaged youth, ages 16–24, and who meet one or more of the following criteria: basic skills deficient; a school dropout; homeless, a runaway, or a foster child; a parent; or in need of additional education, vocational training, or intensive counseling and related assistance in order to participate successfully in regular school-work or to secure and hold employment.

The Consolidated Appropriations Act, 2010 (P.L. 111–117) accepted the Administration's proposal to transfer the Job Corps program and its administrative funding from the Office of the Secretary back to the Employment and Training Administration (ETA) to better coordinate the program with other employment and training programs ETA oversees. Funding for the Job Corps program is now shown in a separate appropriation account under ETA, having formerly been shown in a separate account under Departmental Management.

The 2011 Budget supports an initiative to reform and improve Job Corps, by setting high standards for centers and taking quick and decisive action to address problems in the program's performance.

Community Service Employment for Older Americans (CSEOA), authorized by Title V of the Older Americans Act as amended in 2006 (P.L. 109–365), is a federally-sponsored community service employment and training program that targets unemployed low-income older individuals who want to enter or re-enter the workforce. Participants must be 55 years of age or older with incomes no more than 125 percent of the Federal poverty level. The program, known as the Senior Community Service Employment Program (SCSEP), offers participants work-based community service training at non-profit or governmental agencies so that they can gain on-the-job experience and prepare to enter or re-enter the workforce. The dual goals of the program are to foster individual economic self-sufficiency and to provide useful opportunities in community service activities.

This account funds the Trade Adjustment Assistance (TAA) for Workers program, which provides weekly cash benefits, training, job search and relocation allowances, and employment and case management services to certain workers displaced by international trade. The account also funds the Alternative Trade Adjust-

ment Assistance (ATAA) and the Reemployment Trade Adjustment Assistance (RTAA) programs that provide wage insurance payments for certain older workers who become reemployed at lower wages than the wages paid in their pre-layoff employment.

The TAA for Workers program was reauthorized through December 31, 2011, and substantively amended through December 31, 2010, under the Trade and Globalization Adjustment Assistance Act of 2009, which was enacted as part of the American Recovery and Reinvestment Act of 2009 (Public Law 111-5). Under the amendments, workers covered by petitions for the TAA program filed before May 18, 2009, continued to receive the benefits and services, including ATAA, in accordance with the TAA provisions that were in effect prior to these amendments (see Section 1891(b) of the Trade and Globalization Adjustment Assistance Act of 2009). Petitions filed on or after May 18, 2009, are considered under expanded group eligibility provisions (e.g., workers in the service sector will be eligible) and the covered workers may be eligible for enhanced services and benefits, including additional weeks of cash benefits while in training and for the RTAA program.

The Administration will propose legislation for later transmittal to reauthorize and extend the Trade Adjustment Assistance (TAA) for Workers program. The American Recovery and Reinvestment Act of 2009 (Public Law 111-5) amended TAA to expand eligibility to service workers, increase the funds available for training, and make other program changes, but it sunsets this expanded cov-

**Unemployment compensation.**—State administration amounts provide administrative grants to State agencies that pay unemployment compensation to eligible workers and collect State unemployment taxes from employers. These agencies also pay unemployment benefits to former Federal personnel and ex-service-members as well as trade readjustment allowances to eligible individuals. State administration amounts also provide administrative grants to State agencies to improve the integrity and financial stability of the unemployment compensation program through a comprehensive performance management system, UI Performs. The purpose is to effect continuous improvement in State performance and related activities designed to assess and reduce errors and prevent fraud, waste, and abuse in the payment of unemployment compensation benefits and the collection of unemployment taxes. National activities relating to the Federal-State unemployment insurance programs are conducted through contracts or agreements with the State agencies or with non-State entities. A workload contingency reserve is included in State administration to meet increases in the costs of administration resulting from increases in the number of claims filed and claims paid. The appropriation automatically provides additional funds whenever unemployment claims workload increases above levels specified in the appropriations language.

The request for additional funding for in-person reemployment and eligibility assessments of claimants of unemployment compensation builds upon the success of a number of States in reducing improper payments and speeding reemployment using these assessments. Because most unemployment claims are now filed by telephone or Internet, in-person assessments conducted in the One-Stop Career Centers can help determine continued eligibility for benefits and adequacy of work search, verify the identity of beneficiaries where there is suspicion of possible identify theft, and provide referral to reemployment assistance to those who need additional help. The \$55 million requested for reemployment and eligibility assessments is estimated to provide benefit savings of \$210 million. It is important that this integrity initiative and other new enforcement investments be fully funded. To ensure full funding of reemployment and eligibility assessments, the Administration proposes to protect the dollars requested for these activities in the appropriations process through allocation adjustments, a mechanism that has been used by past Administrations and Congresses. Allocation adjustments are increases in the

ceiling or allocation for annual appropriations, but these increases would be granted only if the base level for reemployment and eligibility assessments was funded at \$10 million and if the use of the funds was clearly restricted to the specified purpose. See additional discussion in the Budget Reform Proposals chapter in the Analytical Perspectives volume.

**Employment service.**—The public employment service is a nationwide system providing no-fee employment services to job-seekers and employers. State employment service activities are financed by grants provided by formula to States. Funding allotments are provided annually on a Program Year basis beginning July 1 and ending June 30 of the following year.

Employment service activities serving national needs are conducted through specific reimbursable agreements between the States and the Federal Government under the Wagner-Peyser Act, as amended, and other legislation. States also receive funding under this activity for administration of the Work Opportunity Tax Credit, as well for amortization payments for those States that had independent retirement plans prior to 1980 in their State employment service agencies.

Years are program years running from July 1 of the year indicated through June 30 of the following year. 2008 results shown prior to the significant influx of Recovery Act resources to have a more accurate accounting of services based upon typical budget levels (minus Recovery Act funding).

**Foreign Labor Certification.**—This activity provides for the administration of the foreign labor certification programs within the Employment and Training Administration. Under these programs, U.S. employers that can demonstrate a shortage of qualified, available U.S. workers and that there would be no adverse impact on similarly situated U.S. workers may seek the Secretary of Labor's certification as a first step in the multi-agency process required to hire a foreign worker to fill critical permanent or temporary vacancies. Major programs include the permanent, H-2A temporary agricultural, H-2B temporary non-agricultural and temporary highly skilled worker visas. The account is divided into Federal and State activities.

**Federal Administration.**—Formerly funded in the Employment and Training Administration's Program Administration account, Federal Administration provides leadership, policy, and operational direction to Federal activities supporting the effective and efficient administration of foreign labor certification programs.

**State grants.**—Provides grants to State labor agencies in 54 States and U.S. territories funding employment-related activities required for the administration of Federal foreign labor certification programs. Includes State Workforce Agency posting and circulation of job orders and other assistance to employers in the recruitment of U.S. workers, processing of employer requests for prevailing wage determinations for the permanent and temporary programs, state processing of H-2A agricultural and H-2B non-agricultural temporary labor certification applications, State safety inspection of housing provided by employers to workers,

and State development of prevailing wage and prevailing practice surveys used to set wages and standards in a defined geographic area.

*One-stop career centers.*—These funds are used to support the joint Federal-State efforts to improve the comprehensive One-Stop system created under WIA. This system provides workers and employers with quick and easy access to a wide array of enhanced career development and labor market information services. A portion of these funds supports a joint initiative between the Employment and Training Administration and the Office of Disability Employment Policy to improve the accessibility and accountability of the public workforce development system for individuals with disabilities.

This account provides for general fund financing of extended unemployment benefit programs under certain statutes. Under the Emergency Unemployment Compensation law enacted in Public Law (P.L.) 102-164, as amended, there continues to be general fund financing for administrative costs related to any extended benefits paid under the optional, total unemployment rate trigger created in that law. This account is also used to make general fund reimbursements for some or all of the benefits and administrative costs incurred under the new Emergency Unemployment Compensation program (first enacted in P.L. 110-252, expanded in P.L. 110-449, extended in P.L. 111-5, expanded in P.L. 111-92, and extended in P.L. 111-118). These funds are transferred to a receipt account in the Unemployment Trust Fund (UTF) so that resources may be transferred to the Employment Security Administration Account in the UTF for administrative costs or to the Extended Unemployment Compensation Account in the UTF for benefit costs.

This account makes available funding for repayable advances (loans) to two accounts in the Unemployment Trust Fund (UTF): the Extended Unemployment Compensation Account (EUCA) which pays the Federal share of extended unemployment benefits, and the Federal Unemployment Account (FUA) which makes loans to States to fund unemployment benefits. In addition, the account provides repayable advances to the Black Lung Disability Trust Fund (BLDTF) whenever its balances prove insufficient to make payments from that account. These repayable advances are shown as borrowing authority within the UTF or the BLDTF, and they do not appear as budget authority or outlays in the Advances to the Unemployment Trust Fund and Other Funds account.

This account also makes available funding as needed for nonrepayable advances to the Federal Employees Compensation Account (FECA) to pay the costs of unemployment compensation for former Federal employees and ex-servicemembers, and to the Federal Unemployment and Benefits and Allowances (FUBA) account to pay the costs of benefits and services under the Trade Adjustment Assistance for Workers (TAA) program. These advances are shown as budget authority and outlays in the Advances account above.

Advances were needed for the FUA and FECA accounts in fiscal year 2009, and significant increases in advances to FUA and FECA, as well as EUCA and the BLDT, are anticipated in fiscal years 2010 and 2011. Detail on the nonrepayable advances to FECA is provided above; detail on the repayable advances is shown separately in the UTF and BLDTF accounts.

To address the potential need for significant, and somewhat unpredictable, advances to various accounts, Congress amended the previous appropriations language for the Advances account to appropriate such sums as needed for advances to all of the potential recipient accounts. This language is proposed to continue for fiscal year 2011.

The 2011 Budget proposes legislation to establish fees for new applications under the permanent and H-2B temporary foreign labor certification programs. The Budget also proposes legislation to allow the Department to retain fees for new applications under the H-2A temporary labor certification program and modify the fee to cover program costs. The fees would offset the State and Federal costs of administering these programs and once fully implemented would greatly reduce or eliminate the need for appropriations for this purpose. A portion of the fees collected for H-2B applications would be used to fund an apprenticeship initiative. Upon enactment of the fees, requests for funding in the Foreign Labor Certification administration account would be reviewed and adjusted.

The financial transactions of the Federal-State and railroad unemployment insurance systems are made through the Unemployment Trust Fund. All State and Federal unemployment tax receipts are deposited into the Trust Fund and invested in Government securities until needed for benefit payments or administrative expenses. The portion of the Trust Fund funded with Federal unemployment taxes provides repayable advances (loans) to the States when the balances in their individual State accounts are insufficient to pay benefits. The Trust Fund may receive repayable advances from the general fund when it has insufficient balances to make advances to States or to pay the Federal share of extended unemployment benefits.

State payroll taxes pay for all regular State unemployment benefits. During periods of high State unemployment, there is a stand-by program of extended benefits (EB), financed one-half by State unemployment taxes and one-half by the Federal unem-

ployment payroll tax, which are also paid out of the Trust Fund. The American Recovery and Reinvestment Act (Public Law 111-5) has temporarily made EB 100 percent federally financed. In addition, the Federal unemployment tax pays the costs of Federal and State administration of the unemployment insurance system, veterans' employment services, surveys of wages and employment, and about 97 percent of the costs of the Employment Service.

The Federal Employees Compensation Account (FECA) in the Trust Fund provides funds to States for unemployment compensation benefits paid to eligible former Federal civilian personnel, Postal Service employees, and ex-servicemembers. In turn, the various Federal agencies reimburse FECA for benefits paid to their former employees. FECA is not funded out of Federal unemployment taxes. Any additional resources necessary to assure that the FECA account can make the required payments to States will be provided from the Advances to the Unemployment Trust Fund and Other Funds account.

Both the benefit payments and administrative expenses of the separate unemployment insurance program for railroad employees are paid from the Unemployment Trust Fund, and receipts from a tax on railroad payrolls are deposited into the Trust Fund to meet expenses.

This wholly-owned government corporation administers mandatory insurance programs to prevent loss of pension benefits under covered private, defined-benefit pension plans if single-employer plans terminate or if multiemployer plans are unable to pay benefits.

*Single employer benefit payment.*—The single-employer program protects about 33.6 million participants. Under this program, a company may voluntarily seek to terminate its plan, or Pension Benefit Guaranty Corporation (PBGC) may seek termination under certain circumstances. The PBGC must seek termination when a plan cannot pay current benefits. A plan that cannot pay all benefits may be ended by a "distress" termination, but only if the employer meets tests proving severe financial distress, for example, the likelihood that continuing the plan would force the company to shut down. If the terminated plan cannot pay at least the PBGC-guaranteed benefits, the PBGC uses its funds to ensure guaranteed benefits are paid.

In a "standard" termination, plan assets must be sufficient to pay all benefits before the plan is allowed to end. That payment is in the form of an annuity purchased from an insurance company or a lump sum payment. After the payment is made, the PBGC guarantee ends.

*Multi-employer financial assistance.*—The multiemployer insurance program protects about 10.4 million participants. Multiemployer pension plans are maintained under collectively bargained agreements involving unrelated employers, generally in the same industry. If a PBGC-insured multiemployer plan is unable to pay guaranteed benefits when due, the PBGC will provide the plan with financial assistance to continue paying guaranteed benefits, ordinarily in the form of a loan to the plan.

*Pension insurance activities.*—Includes premium collections, premium investments, pre-trusteeship work, and pension insurance program protection activities.

*Pension plan termination.*—Includes all activities related to trusteeship; plan asset management, investment and accounting; and benefit administration services.

*Operational support.*—Includes the administrative, information technology infrastructure, and other shared program support for both PBGC's insurance and plan termination activities.

In FY 2010, the Department of Labor abolished the Employment Standards Administration (ESA) to streamline administration of the programs. As the Department is reinvigorating its enforcement of worker protection laws, this reorganization supports the Administration's Worker Protection efforts by eliminating redundant management efforts by elevating program issues directly to the Secretarial level. It also reflects the importance of these programs and increased enforcement supporting the Secretary's Worker Protection goals. In the 2011 Budget, funding previously requested for the component agencies and offices under the heading "Employment Standards Administration Salaries and Expenses" is requested separately for the Office of Workers' Compensation Programs, Wage and Hour Division, Office of Federal Contract Compliance Programs, and Office of Labor-Management Standards. The appropriation for the Employment Standards Administration is proposed to be replaced by four individual appropriations for the Agencies remaining after reorganization of these programs.

*Federal Employees' Compensation Act benefits.*—The Federal Employees' Compensation Act program provides monetary and medical benefits to Federal workers who sustain work-related injury or disease. Not all benefits are paid by the program, since the first 45 days of disability are usually covered by keeping injured workers in pay status with their employing agencies (the continuation-of-pay period). In 2011, 130,000 injured Federal workers or their survivors are projected to file claims; 48,500 are projected to receive long-term wage replacement benefits for job-related injuries, diseases, or deaths. Most of the costs of this account are charged back to the beneficiaries' employing agencies.

The remainder is provided from the special fund which is financed by private employers, and is assessed at the beginning of each calendar year for their proportionate share of these payments.

The 2011 Budget incorporates longstanding General Accounting Office, Congressional Budget Office, and Labor Inspector General recommendations, amending FECA to convert prospectively retirement-age beneficiaries to a retirement annuity-level benefit, establish an up-front waiting period for benefits, streamline claims processing, permit the Department of Labor to recapture compensation costs from responsible third parties, authorize DOL to cross-match FECA records with Social Security records to reduce improper payments, and make other changes to improve and update FECA. These changes would save more than \$300 million over a 10-year period, and more than \$400 million on a Government-wide basis.

*Energy Employees' Compensation Act benefits.*—The Department of Labor is delegated responsibility to adjudicate and administer claims for benefits under the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA). In July 2001, the program began accepting claims from employees or survivors of employees of the Department of Energy (DOE) and of private companies under contract with DOE who suffer from a radiation-related cancer, beryllium-related disease, or chronic silicosis as a result of their work in producing or testing nuclear weapons. The Act authorizes a lump-sum payment of \$150,000 and reimbursement of medical expenses.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered under section 5 of the Radiation Exposure Compensation Act. Benefit payments under Part E began in 2005.

*Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA) administration.*—Under Executive Order 13179 the Secretary of Labor is assigned primary responsibility for administering the EEOICPA program, while other responsi-

ilities have been delegated to the Departments of Health and Human Services (HHS), Energy (DOE), and Justice (DOJ). The Office of Workers' Compensation Programs (OWCP) in the Department of Labor (DOL) is responsible for claims adjudication, and award and payment of compensation and medical benefits. DOL's Office of the Solicitor provides legal support and represents the Department in claimant appeals of OWCP decisions. HHS is responsible for developing individual dose reconstructions to estimate occupational radiation exposure, and developing regulations to guide DOL's determination of whether an individual's cancer was caused by radiation exposure at a DOE or atomic weapons facility. DOE is responsible for providing exposure histories at employment facilities covered under the Act, and other employment information. DOJ assists claimants who have been awarded compensation under the Radiation Exposure Compensation Act to file for additional compensation, including medical benefits, under EEOICPA.

The Ronald Reagan National Defense Authorization Act of 2005 (P.L. 108–767) amended EEOICPA, giving DOL responsibility for a new program (Part E) to pay workers' compensation benefits to DOE contractors and their families for illness and death arising from toxic exposures in DOE's nuclear weapons complex. This law also provides compensation for uranium workers covered by the Radiation Exposure Compensation Act. Administrative expenses for Part E are covered through indefinite, mandatory appropriations provided in P.L. 108–767.

Title IV of the Federal Mine Safety and Health Act authorizes monthly benefits to coal miners disabled due to coal workers' pneumoconiosis (black lung), and to their widows and certain other dependents. Part B of the Act assigned the processing and paying of claims filed between December 30, 1969 (when the program originated) and June 30, 1973 to the Social Security Administration (SSA). P.L. 107-275 transferred Part B claims processing and payment operations from SSA to the Department of Labor's Office of Workers' Compensation Programs. This change was implemented on October 1, 2003.

This fund was established to provide for the accumulation of funds to meet the Panama Canal Commission's obligations to defray costs of workers' compensation which will accrue pursuant to the Federal Employees' Compensation Act (FECA). On December 31, 1999, the Commission was dissolved as set forth in the Panama Canal Treaty of 1977; however, the liability of the Commission for payments beyond that date did not end with its termination. The establishment of this fund, into which funds were deposited on a regular basis by the Commission, was in conjunction with the transfer of the administration of the Federal Employees' Compensation Act (FECA) program from the Commission to the Department of Labor, effective January 1, 1989.

The trust fund consists of all monies collected from the coal mine industry under the provisions of the Black Lung Benefits Revenue Act of 1981, as amended by the Consolidated Omnibus Budget Reconciliation Act of 1985, in the form of an excise tax on mined coal. These moneys are expended to pay compensation, medical, and survivor benefits to eligible miners and their survivors, where mine employment terminated prior to 1970 or where no mine operator can be assigned liability. In addition, the fund pays all administrative costs incurred in the operation of Part C of the Black Lung program. The fund is administered jointly by the Secretaries of Labor, Treasury, and Health and Human Services. The Emergency Economic Stabilization Act of 2008, enacted on October 3, 2008, authorized restructuring of the Black Lung Disability Trust Fund (BLDTF) debt by (1) extending the current coal excise tax rates of \$1.10 per ton on underground-mined coal and \$0.55 per ton on surface-mined coal until December 31, 2018; (2) providing a one-time appropriation for the BLDTF to repay the market value of parts of the outstanding repayable advances and accrued interest; and (3) refinancing the remainder of the outstanding debt through the issuance of zero-coupon bonds, to be retired using the BLDTF's annual operating surplus until all of its remaining obligations have been paid.

The trust funds consist of amounts received from employers for the death of an employee where no person is entitled to compensation for such death, for fines and penalty payments, and—pursuant to an annual assessment of the industry—for the general expenses of the fund under the Longshore and Harbor Workers' Compensation Act (LHWCA), as amended.

These trust funds are available for payments of additional compensation for second injuries. When a second injury is combined with a previous disability and results in increased permanent partial disability, permanent total disability, or death, the employer's liability for benefits is limited to a specified period of compensation payments, after which the fund provides continuing compensation benefits. In addition, the fund pays one-half of the increased benefits provided under the LHWCA for persons on the rolls prior to 1972. Maintenance payments are made to disabled employees undergoing vocational rehabilitation to enable them to return to remunerative occupations, and the costs of necessary rehabilitation services not otherwise available to disabled workers are defrayed. Payments are made in cases where other circumstances preclude payment by an employer and to provide medical, surgical, and other treatment in disability cases where there has been a default by the insolvency of an uninsured employer.

The Wage and Hour Division enforces the minimum wage, overtime, child labor, and other employment standards under the Fair Labor Standards Act (FLSA), the Migrant and Seasonal Agricultural Worker Protection Act (MSPA), the Family and Medical Leave Act, certain provisions of the Immigration and Nationality Act (INA), the wage garnishment provisions in Title III of the Consumer Credit Protection Act, and the Employee Polygraph Protection Act. The Division also determines prevailing wages and enforces employment standards under various Government contract wage standards. In 2010, approximately 300,000 persons are expected to be aided under the FLSA through securing agreements with firms to pay back wages owed to their workers. In government contract compliance actions, about 35,000

persons will be aided through securing agreements to pay wages owed to workers. Under MSPA, approximately 1,400 investigations will be completed. In the course of all on-site investigations, investigators will routinely check for employer compliance with child labor standards, and over 1,300 targeted child labor investigations will be conducted. In all "directed" (non-complaint) investigations, investigators will also routinely check for compliance with the employment eligibility verification recordkeeping requirements of the INA. In FY 2010, the Wage and Hour Division, in cooperation with the Department of Treasury and the Employment Training Administration's Office of Unemployment Insurance, will develop a joint proposal to target and prevent the misclassification of employees as independent contractors. The 2011 Budget includes an additional \$12 million and 90 FTE for the Wage and Hour Division to address employee misclassification.

The Office of Federal Contract Compliance Programs (OFCCP) enforces equal employment opportunity and nondiscrimination requirements of Federal contractors and subcontractors. In particular, OFCCP enforces: Executive Order 11246, which prohibits employment discrimination on the basis of race, sex, religion, color, and national origin; Section 503 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990 (through a memorandum of understanding with the Equal Employment Opportunity Commission), which prohibit employment discrimination against individuals with disabilities; and the Vietnam Era Veterans Readjustment Assistance Act of 1974, as amended, which prohibits employment discrimination against certain protected veterans. OFCCP programs cover close to 100,000 work-sites with a total workforce of 12 million persons. OFCCP monitors contractors' compliance through compliance evaluations and reporting requirements. In 2011, approximately 2,500,000 individuals will be covered through 5,000 compliance evaluations, 180 compliance investigations, and 2,400 other compliance actions. OFCCP also ensures that Federal contractors and subcontractors are provided linkages to recruitment sources for hiring and advancement of minorities, women, protected veterans and individuals with disabilities, and will conduct 600 compliance assistance events in 2011.

**Safety and Health Standards.**—This activity provides for the development, promulgation, review and evaluation of occupational safety and health standards and guidance. Before any standard is proposed or promulgated, a determination is made that: (1) a significant risk of serious injury or health impairment exists; (2) the standard will reduce this risk; (3) the standard is economically and technologically feasible; and (4) the standard is economically and technologically feasible when compared with alternative regulatory proposals providing equal levels of protection.

**Federal Enforcement.**—This activity provides for the enforcement of workplace standards promulgated under the Occupational Safety and Health (OSH) Act of 1970, through the physical inspection of worksites, and by fostering the voluntary cooperation of employers and employees. Programs are targeted to the investigation of claims of imminent danger and employee complaints, investigation of fatal and catastrophic accidents, programmed inspections of firms with injury-illness rates that are above the national average, and special emphasis inspections for serious safety and health hazards. OSHA's enforcement strategy ranges from a selective targeting of inspections and related compliance activities to specific high hazard industries and worksites.

**State Programs.**—This activity assists states in assuming responsibility for administering occupational safety and health programs under State plans approved by the Secretary. Under section 23 of the OSH Act, grants matching up to fifty percent of total program costs are made to States that meet the Act's criteria for establishing and implementing State programs that are at least as effective as the associated Federal program. State programs, like their Federal counterparts, provide a mix of enforcement, outreach, training and compliance assistance activities.

**Technical Support.**—This activity provides specialized technical expertise and advice in support of a wide range of program areas, including construction, standards setting, variance determinations, compliance assistance, and enforcement. Areas of expertise include laboratory accreditation, industrial hygiene, occupational health nursing, occupational medicine, chemical analysis, equipment calibration, safety engineering, environmental impact statements, technical and scientific databases, computer-based outreach products, and emergency preparedness.

**Federal Compliance Assistance.**—This activity supports a range of training, outreach and cooperative programs that provide compliance assistance in improving workplace safety and health, with particular emphasis on small business, immigrant and other high risk and hard-to-reach workers. OSHA works with employers and employees through a variety of cooperative and collaborative programs and partnerships that recognize and promote effective safety and health management and focus on the development of extended cooperative relationships. Federal agencies are assisted in implementing and improving their job safety and health programs. Occupational safety and health training is provided at the OSHA Training Institute and affiliated Education Centers throughout the country. Compliance and

technical assistance materials are prepared and disseminated to the public through various means, including the Internet.

**State Compliance Assistance: Consultation Grants.**—This activity supports 90 percent Federally funded cooperative agreements with designated State agencies to provide free on-site consultation to small employers upon request. State agencies tailor workplans to specific needs in each State while maximizing their impact on injury and illness rates in smaller establishments. These projects offer a variety of services, including safety and health program assessment and assistance, hazard identification and control, and training of employers and their employees.

**Compliance Assistance Training Grants.**—This activity supports safety and health grants to organizations that provide training, education, technical assistance and develop educational materials for employers and employees. Grants address safety and health education needs related to specific topics and industries identified by the agency.

**Safety and Health Statistics.**—This activity supports information technology infrastructure, management of information, and the statistical basis for OSHA's programs and field operations. These are provided through an integrated data network, and statistical analysis and review. OSHA administers and maintains the recordkeeping system that serves as the foundation for the BLS survey on occupational injuries and illnesses and provides guidance on recordkeeping requirements to both the public and private sectors.

**Executive direction and administration.**—This activity supports executive direction, planning and evaluation, management support, legislative liaison, interagency affairs, federal agency liaison, administrative services, and budgeting and financial control.

**Enforcement.**—The enforcement strategy in 2011 will be an integrated approach toward the prevention of mining accidents, injuries, and occupational illnesses. This includes inspection of mines and other activities as mandated by the Federal Mine Safety and Health Act of 1977 (Mine Act), as amended by the Mine Improvement and New Emergency Response Act of 2006 (MINER Act), special emphasis initiatives that focus on persistent safety and health hazards, promulgation of federal mine safety and health standards, investigation of serious accidents, and on-site education and training. The desired outcome of these enforcement efforts is to reduce accidents, fatalities, and occupational illness in the mining industry.

**Assessments.**—This activity assesses and collects civil monetary penalties for violations of safety and health standards.

**Educational policy and development.**—This activity develops and coordinates MSHA's mine safety and health education and training policies, and provides classroom instruction at the National Mine Health and Safety Academy for MSHA personnel, other governmental personnel, and the mining industry. States provide mine health and safety training materials, and provide technical assistance through the State Grants program.

**Technical support.**—This activity applies engineering and scientific expertise through field and laboratory forensic investigations to resolve technical problems associated with implementing the Mine Act and the MINER Act. Technical support administers a fee program to approve equipment, materials, and explosives for use in mines and performs field and laboratory audits of equipment previously approved by MSHA. It also collects and analyzes data relative to the cause, frequency, and circumstances of mine accidents.

**Program evaluation and information resources (PEIR).**—This activity provides program evaluation and information technology resource management services for the agency.

**Program administration.**—This activity performs general administrative functions and is responsible for meeting the requirements of the Government Performance and Results Act (GPRA), developing MSHA's performance plan, and Annual Performance Report.

**Jobs for Veterans State grants.**—The Jobs for Veterans Act (JVA) of 2002 provides the foundation for this budget activity. The JVA requires the Veterans Employment and Training Service (VETS) to act on behalf of the Secretary in the promulgation of policies and regulations that ensure maximum employment and training opportunities for veterans and priority of service for veterans within the State workforce delivery system for employment and training programs funded in whole or in part by the U.S. Department of Labor. Under the JVA, resources are allocated to States to support Disabled Veterans Outreach Program (DVOP) specialists and Local Veterans' Employment Representatives (LVERs).

Disabled Veterans Outreach Program specialists (38 U.S.C. 4103A) provide intensive services to meet the employment needs of eligible veterans. DVOPs place maximum emphasis on helping economically or educationally disadvantaged veterans. Priority of service (38 U.S.C. 4215) is given to special disabled veterans, other disabled veterans, and other eligible veterans.

Local Veterans' Employment Representatives (38 U.S.C. 4104) conduct outreach to employers as well as assist veterans in gaining employment by conducting job search workshops and establishing job search support groups. LVERs also facilitate employment, training, and placement services provided to veterans under the applicable State employment service delivery system, including One-Stop Career Centers. In addition, each LVER provides reports to the manager of the State employment service delivery system and to the State Director for Veterans Employment and Training (38 U.S.C. 4103) regarding the State's compliance with Federal law and regulations with respect to special services and priorities for eligible veterans.

**Transition Assistance Program.**—The Transition Assistance Program (TAP) is now shown as a separate budget activity, having formerly been included as part of the State grants budget activity. This program provides employment workshops for departing service members in the continental U.S. and at major overseas installations. VETS coordinates with the Departments of Defense, Veterans Affairs, and Homeland Security to provide transition services to military service members separating from active duty. TAP is implemented worldwide and provides labor-market and employment-related information and other services to separating service members and their spouses. The goal of TAP is to expedite and facilitate the transition from military to civilian employment.

**Federal management.**—VETS' Federal management budget activity carries out programs and develops policies to provide veterans the maximum employment and training opportunities (38 U.S.C. 4102-4103A) and to investigate complaints received under the Uniformed Services Employment and Reemployment Rights Act (USERRA) (38 USC 4322). Veterans' Preference activities, which are intended to assist veterans obtain Federal

VETERANS EMPLOYMENT AND TRAINING—Continued

employment (39 U.S.C. 4214), are also supported under this activity.

Resources under this activity are also used to evaluate the job training and employment assistance services provided to veterans under the Jobs for Veterans State Grants (38 USC 4102A), the Homeless Veterans Reintegration Program (Section 738 of the Stewart B. McKinney Homeless Assistance Act (MHAA) of July 1987, and amended by Section 5 of the Homeless Veterans Comprehensive Assistance Act (HVCAA of 2001), and the Veterans Workforce Investment Program (Section 168, Workforce Investment Act, P.L. 105–220). This budget activity supports field activities and personnel who provide technical assistance to grantees to ensure they meet negotiated and mandated performance goals and other grant provisions.

This budget activity also supports the oversight and development of policies for the Transition Assistance Program (10 USC 1144 and 38 USC 4113). The activity funds outreach and education efforts, such as job fairs, that raise the awareness of employers about the benefits of hiring veterans. The activities of the Advisory Committee for Veterans Employment, Training, and Employer Outreach (38 USC 4110) also are supported. The REALifeLines initiative facilitates timely and comprehensive employment services to our Nation's severely wounded and injured veterans.

*National Veterans' Employment and Training Services Institute.*—The National Veterans' Training Institute (NVTI) supplies competency-based training to Federal and State providers of services to veterans (38 U.S.C. 4109). NVTI also provides training for Veterans Employment and Training Service personnel. NVTI is administered through a contract and supported by dedicated funds. NVTI ensures that these service providers receive a comprehensive foundation so they can effectively assist job-seeking veterans.

*Homeless Veterans' Reintegration Program.*—The Homeless Veterans' Reintegration Program (HVRP) (38 U.S.C. 2021) provides grants to States or other public entities, as well as to non-profits, including faith-based organizations. Grant awards enable grantees to operate employment programs to reach out to homeless veterans and help them become employed. VETS partners with the Departments of Veterans Affairs and Housing and Urban Development to promote multi-agency-funded programs that integrate the different services needed by homeless veterans. HVRP grants are provided for both urban and rural areas.

*Veterans' Workforce Investment Program.*—The Veterans' Workforce Investment Program (VWIP) (Section 168 of P.L. 105–220) provides competitive grants geared toward training and retraining to create employment opportunities for veterans in high-skill occupations, and to meet employer demands.

**Telecommunications.**—Provides for departmental telecommunications payments to the General Services Administration.

**Investment in Reinvention Fund.**—Finances agency reinvention proposals and other investment or capital acquisition projects in order to achieve savings and streamline work processes. The authority for the Investment in Reinvention Fund created a revolving fund with \$3,900,000 as the capital for the fund. The FY 2011 request proposes to eliminate the authority for IRF in the Working Capital Fund and cancel the existing capital as these funds are not used and unlikely to be used under current authorization.

**Non-DOL Reimbursements.**—Provides for services rendered to any entity or person for use of Departmental facilities and services, including associated utilities and security services, including support for regional consolidated administrative support unit activities. The program described below is financed by this appropriation, by fees for services, and by reimbursements from other agencies that are provided with administrative services overseas by the Department of State. In 2011, two-year funding is requested for this account, except for funds requested for Worldwide Security Protection (WSP). As in previous years, WSP funding is to remain available until expended. The 2011 request for this account also includes full funding request for State Department operations in Iraq and Afghanistan that are supported by the Diplomatic and Consular Programs (D&CP) account. In all of these programs, responsibilities range from policy setting to planning and design, implementation, operations and maintenance.

The funds requested for this account are subdivided into the following categories:

**Human Resources.**—This activity supports all American salaries at overseas and domestic United States diplomatic missions, including Department of State employees carrying out security protection activities. The professional development and training activity is a continuous process by which the Department ensures that its professionals have the skills, experience and judgment to fulfill its functions at all levels. Training programs are designed to provide employees with the specific functional area and language skills needed for the conduct of foreign relations in the Department and abroad. This activity also supports the management, recruitment, and performance

evaluation of Foreign and Civil Service employees (particularly the recruitment of qualified minorities, including Hispanics and African Americans) and Foreign Service National staff.

**Overseas Programs.**—This activity provides funding for the operational programs of all the regional bureaus of the Department of State, which are responsible for managing United States foreign policy through bilateral and multilateral relationships. Funds made available for 2011 will support 267 United States embassies, consulates, and other diplomatic posts worldwide. Resources for this activity are used to provide for: the political and economic reporting and analysis of interests to the United States; the representation of U.S. diplomatic and national interests to countries abroad; and the bilateral and multilateral negotiation of U.S. foreign policy objectives, including the hosting of and participation in various international conferences, meetings and other multilateral activities in the United States and abroad. These resources also fund the conduct of U.S. diplomatic policy through political and multilateral affairs, economic and social affairs, international budgetary and management affairs, and participation in and hosting of various international conferences. Resources in this appropriation support the conduct of international informational, educational, cultural and exchange programs of the United States and advising the President and National Security Council on these matters. The resources in this activity are used to define, explain and advocate U.S. policies abroad and to seek to increase knowledge and understanding among foreign audiences of U.S. society and its values. Department posts also administer exchange-of-persons programs and conduct informational and cultural activities. This activity also encompasses medical programs for the Department of State, the Foreign Service and other U.S. Government departments and agencies overseas. Services are provided in Washington, D.C. as well as at missions worldwide, covering more than 90,000 employees, dependents and local hires. Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave and separation of the Department's personnel and dependents is also included in this activity.

**Diplomatic Policy and Support.**—This activity supports the operational programs of the functional bureaus of the Department of State, which includes providing overall policy direction, coordination, and program management among United States missions abroad in pursuit of regional and global foreign policy objectives, including the hosting of various international conferences and meetings in the United States and abroad. Resources also fund the management of U.S. participation in arms control, nonproliferation, and disarmament negotiations and other verification and compliance activities, in addition to funds otherwise available for such purposes. This also encompasses overseas and American citizen services; the issuance of passports to U.S. citizens both here and abroad; and implementation of a coordinated strategy to improve consular systems and processes in support of U.S. border security, including sharing data with the Department of Homeland Security, the Department of Justice, the Intelligence Community, the Treasury Department, and the law enforcement community. Visa services involve: the issuance, denial, and adjudication of immigrant and non-immigrant visas; refugee processing; and visa fraud detection and investigation. American citizen services include the issuance of passports, and emergency and other assistance to American citizens abroad. Passport services include the issuance of passports in the United States and U.S. missions abroad and passport fraud detection and investigation. The information management activity in D&CP identifies resources that are

used for the effective and efficient creation, collection, processing, transmission, dissemination, use, storage, and disposition of information required for the formulation and execution of foreign policy and for the conduct of daily business. Its requirements are driven by the informational needs of the President, the Secretary of State, the Department and its 267 missions, and approximately fifty Government agencies. Components of the information management activity include: telecommunications; classified information handling; unclassified data and word processing; pouch, mail, and publishing services; administration of an electronic and archival records management program; document classification and declassification; information security; information technology capital planning; and provision of information management services, as appropriate, to all branches of the Government and to the public. The Department manages large computer and communications centers to provide administrative, consular, economic, and political information. The computer systems support worldwide consular applications, financial management systems, management of building programs, and intelligence research systems. Administration and staff activities are also included in this area. These activities include normal domestic and overseas administrative services directly related to Department programs, such as:

—The direction and control of administration and management operations, representing and negotiating U.S. Government administrative matters with foreign officials, and reviewing and setting resource levels and priorities for various programs and bureaus financed by this appropriation.

—The budgeting, financial planning, and fiscal operations for bureaus and offices financed by this appropriation and most federal agencies resident abroad.

—The contracting and procurement of services and supplies, maintenance and repair of equipment and property (including the operation and routine maintenance of property directly leased or owned by the Department), vehicle operation, and shipping and customs services.

—Centralized funding for travel and transportation of effects associated with the assignment, transfer, home leave, and separation of the Department's personnel and dependents.

—Rental payments to the General Services Administration for domestic space occupied by the Department.

**Security Programs.**—This activity provides for the operation of security programs, including for Worldwide Security Protection (WSP) and the Bureau of Diplomatic Security, to protect diplomatic personnel, overseas diplomatic missions, residences, domestic facilities and information. The salaries paid to Department employees who carry out the security protection function worldwide are included in the Human Resources program activity. This activity identifies resources that are used in meeting security and counterterrorism responsibilities, both foreign and domestic. Covered in this activity are: security operations; engineering services, which related to the technical defense of U.S. Government personnel and establishments against electronic and physical attack; homeland security related activities; protection of dignitaries; and physical security operations.

This appropriation provides for the conduct or supervision of all audits, investigations, and inspections of the Department's programs and operations as mandated by the Inspector General Act of 1978, as amended, and the Foreign Service Act of 1980, as amended. The objectives of the Office of the Inspector General are to: improve the economy, efficiency, and effectiveness of the Department's operations; detect and prevent fraud, waste, abuse, and mismanagement; and evaluate independently the formulation, applicability, and implementation of security standards at all U.S. diplomatic and consular posts. The Office also assesses the implementation of U.S. foreign policy, primarily through its inspection of all overseas posts and domestic offices on a cyclical basis. The State Department's Inspector General also serves as Inspector General of the Broadcasting Board of Governors, as mandated by law.

This appropriation also funds the Office of the Special Inspector General for Afghanistan Reconstruction (SIGAR) and the Office of the Special Inspector General for Iraq Reconstruction (SIGIR). SIGAR and SIGIR provide oversight of programs and operations funded with amounts appropriated or otherwise made available for the reconstruction of Afghanistan or Iraq, respectively. SIGAR and SIGIR oversight is accomplished via independent audits, field inspections, and criminal investigations into potential fraud, waste, and abuse in coordination with, and receiving the cooperation of, the Inspectors General of the Department of State, Department of Defense, and the United States Agency for International Development. SIGAR and SIGIR report directly to, and are under the general supervision of, the Secretaries of State and Defense. In addition, they provide mandated quarterly reports directly to the U.S. Congress.

The total amount requested for the Office of Inspector General includes \$35 million for SIGAR and \$22 million for SIGIR. Detailed budget information for SIGAR and SIGIR are available on their websites, [www.sigar.mil](http://www.sigar.mil) and [www.sigir.mil](http://www.sigir.mil).

Under the direction of the Secretary of State, the overall mission of the Bureau of Overseas Buildings Operations (OBO) is to provide U.S. Diplomatic and Consular Missions abroad with safe, secure, and functional facilities that support the foreign policy objectives of the United States. Specific program functions include: providing guidance to posts, the regional bureaus and other foreign affairs agencies on the renovation, construction and operations of facilities; providing expert space and facilities planning; managing and overseeing the design, construction, and renovation of mission facilities; incorporating security features into overseas and domestic facilities; and ensuring the security of facilities during construction or renovation. In addition, OBO is responsible for establishing standards and policies for overseas housing, developing, in conjunction with posts, effective maintenance programs for post facilities, and monitoring and reporting the inventory of maintenance and backlog requirements. OBO also ensures the safety of the building occupants through the development of fire/life safety and accessibility compliance programs.

In 2011, the Department will collect charges for the seventh year of the Capital Security Cost Sharing Program. The Capital Security Cost Sharing Program has two main goals: accelerating the construction of approximately 150 new safe, secure and functional embassy and consulate compounds over fourteen years (2005-2018), at a cost of approximately \$17.5 billion, and providing an incentive for all United States Government agencies to right-size their presence overseas.

The objective of the Asset Management Program is to obtain the best use of diplomatic and consular properties overseas through sale of surplus or underutilized properties and reinvestment of the proceeds in properties that provide a greater return to the U.S. Government and/or improve the safety of mission personnel. In lieu of appropriated resources, OBO uses asset sales proceeds for long-term capital investment to minimize the growth of U.S. Government leasehold requirements (through property acquisition) or to address a high-priority need for new construction or fit-out of leased space.

This appropriation also provides for capital expenditures necessary to preserve, maintain, repair, and plan for buildings owned or leased by the Department of State overseas or in the United States, including the renovation of the Main State building where required.

The current appropriation finances any unfunded liability created by new or liberalized benefits, new groups of beneficiaries, and salary increases. In addition, the appropriation also finances the annual balance of the Foreign Service normal cost not met by employee and employer contributions.

The 2011 permanent appropriation provides a payment to the fund for disbursements attributable to liability from military service, the Foreign Service Pension System, and unfunded interest of the Foreign Service Retirement and Disability System.

This is a retirement fund for Locally Employed Staff (LES) employed by the Department of State and other Foreign Affairs agencies. The purpose of the fund is to accumulate and distribute U.S. Government contributions for end-of-service benefits for LES at overseas U.S. missions where it has been determined that participation in the local social security system is not in the public interest. The State Department determines which countries are eligible to participate in the fund. Upon separation, payments will be made from the fund as a lump sum paid directly to the employee.

This fund, authorized by sections 13 and 23 of the State Department Basic Authorities Act of 1956 (22 U.S.C. 2684), finances on a reimbursable basis certain administrative services, such as printing and reproduction, editorial material, motor pool operations and dispatch agencies operations, inter-agency cooperative administrative support services, and expenses of carrying out the Foreign Missions Act, including any acquisitions of property under section 204(f) of the State Department Basic Authorities Act of 1956 (22 U.S.C. 4304(f)).

Using the Working Capital Fund, the International Cooperative Administrative Support Services (ICASS) program was fully implemented in 1998. ICASS restructures overseas administrative support activities to allow more decision-making and managerial participation by all participating agencies, more equitable cost distribution, and incentives for efficient provision of services. Under ICASS, each agency represented at an overseas post chooses the services it wishes to receive and pays a proportional share of the cost of those services. Working through inter-agency councils at each overseas post, all agencies have a say in determining post administrative budgets and defining service standards, as well as reviewing costs and vendor performance.

The Global Health and Child Survival account funds health-related foreign assistance for the Department of State and the U.S. Agency for International Development (USAID), representing the majority of funds provided for the President's Global Health Initiative (GHI). The GHI seeks to improve health outcomes by adopting a women- and girl-centered approach to health and gender equity; increasing impact through strategic integration and coordination; strengthening and leveraging multilateral institutions; encouraging country ownership and investing country-led plans; building sustainability through health systems strengthening; improving metrics, monitoring and evaluation; and promoting research, development and innovation.

*Global Health and Child Survival—State.* Within the GHI, the President's Emergency Plan for AIDS Relief (PEPFAR) supports the fight against global HIV/AIDS and TB. The 2011 Budget requests \$5.5 billion in the Global Health and Child Survival State Department (GHCS-S) account which forms the bulk of PEPFAR funding (\$6.6 billion in total). PEPFAR is led by the Office of Global AIDS Coordinator in the State Department, which partners with agencies such as the U.S. Agency for International Development (USAID) and the Department of Health and Human Services for program implementation. Programs work through expanded partnerships to build capacity for effective, innovative, and sustainable services; create a supportive and enabling policy environment for combating HIV/AIDS; and implementing strong monitoring and evaluation systems to identify best practices, determine progress toward goals, and ensure compliance with PEPFAR policies and strategies. PEPFAR programs support scaling up HIV/AIDS services within the context of strengthened health systems, particularly in terms of human resources in nations with severe health worker shortages, in order to effectively implement HIV/AIDS prevention, treatment, and care programs. As part of the GHI, PEPFAR is linking its efforts to important programs in other areas of global health, including the President's Malaria Initiative, family planning, and maternal and child health, as well as other areas of development, including the Millennium Challenge Corporation, the Peace Corps, and other activities in the areas of education, women's justice and empowerment, and economic development.

*Global Health and Child Survival—USAID.* The 2011 Budget requests \$3.0 billion in the GHCS-USAID account. USAID uses these funds to promote transformational development in the developing world by working in partnership with foreign governments, local private sector and non-governmental organizations, and public-private partnerships. Funding includes activities that promote family planning/reproductive health, child survival and maternal health, including polio, nutrition activities in coordination with the Food Security Initiative to address such issues as micronutrients and iodine deficiency, as well as activities directed at vulnerable children, and reducing HIV transmission and the

GLOBAL HEALTH AND CHILD SURVIVAL—Continued  
impact of the HIV/AIDS pandemic in developing countries. Funding is also requested to address the threat of other infectious diseases of major public health importance such as tuberculosis, malaria, influenza and other pandemic diseases, and neglected tropical diseases, to reduce antimicrobial resistance, and for surveillance.

The Millennium Challenge Account is administered by an independent U.S. Government corporation, the Millennium Challenge Corporation (MCC), that has the specific strategic goal of reducing poverty through growth in some of the poorest countries in the world. The MCC was established on January 23, 2004, and in the past six years MCC has signed 20 compacts totaling over 7 billion. These investments help foster stability through economic growth and poverty reduction with these U.S. strategic partners. MCC encourages policy reforms by working with only those countries that have already created the conditions for growth by ruling justly, investing in their people, and encouraging economic freedom, with a particular emphasis on fighting corruption. Countries develop their poverty reduction proposals in broad consultation with their own society as well as with MCC. MCC compacts specifically define the implementation responsibilities of partner countries, including financial accountability and transparent and fair procurement practices, and require measurable results to ensure that MCC assistance is used responsibly and effectively.

The President's 2011 Budget request for MCC is linked to a forthcoming legislative proposal that will include the following changes to MCC's current authorities:

— Concurrent compact authority, which will allow MCC to sign separate innovative compacts with a country based on the specific timing requirements of, and appropriate partners for, each individual project rather than as part of a multi-project package driven by a single timeline.

— Longer compact authority, which will give MCC partner countries up to seven years in select circumstances, and subject to Board approval, to complete complex projects.

— Reforms aimed at ensuring that changes in countries' income categories do not prevent MCC from working with the highest-performing poor countries.

These changes are based on lessons learned since MCC's creation in 2004 and will provide needed flexibility to maximize the impact of MCC programs through more innovative approaches to the provision of assistance.

This account supports U.S. foreign policy objectives by providing economic assistance to allies and countries in transition to democracy, supporting Middle East peace negotiations, and financing economic stabilization programs, frequently in a multi-donor context. Key objectives include:

1) Supporting strategically significant friends and allies through assistance designed to increase the role of the private sector in the economy, reduce government controls over markets, enhance job creation, and improve economic growth.

2) Developing and strengthening institutions necessary for sustainable democracy. Typical areas of assistance include technical assistance to administer and monitor elections, capacity-building for non-governmental organizations, judicial training, and women's participation in politics. Assistance is also provided to support the transformation of the public sector to encourage democratic development, including training to improve public administration; promote decentralization; and strengthen local governments, parliaments, independent media and non-governmental organizations.

3) Strengthening the capacity of partner governments to manage the human dimension of transitions out of instability and to help sustain the neediest sectors of the population during the transition period.

This account also includes funding for alternative development programs in Colombia and Afghanistan.

The Pakistan Counterinsurgency Capability Fund (PCCF) is part of a multi-pronged United States strategy designed to combat terrorist threats and assist the Government of Pakistan in redu-

cing the root causes of extremism. PCCF is intended to support the immediate need for counter-insurgency capabilities on the part of Pakistani security forces and will be applied directly to enhance their ground and air operations capabilities including border security by meeting their needs for training, equipment, and facilities in the Frontier region. PCCF is designed to be a shorter-term program of assistance which will draw down when the need for intensive support for engagement against the terrorist movement in Pakistan declines.

The Foreign Military Financing Direct Loan Program (FMFDLP) Account is a program account established pursuant to the Federal Credit Reform Act (FCRA) of 1990, as amended, to provide the funds necessary for the subsidy element of loans. As required by the Federal Credit Reform Act of 1990, this non-budgetary account records all cash flows to and from the Government resulting from direct loans for foreign military financing obligated in 1992 and after. The foreign military financing credit program provides loans that finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. The amounts in this account are a means of financing and are not included in budget totals. Expenditures from this account finance the subsidy element of direct loan disbursements and are transferred into the Foreign Military Financing Direct Loan Financing (FMFDLF) Account to make required loan disbursements for approved FMS or commercial sales. The FMFDLF is a financing account used to make disbursements of Foreign Military Loan funds for approved procurements and for subsequent collections for loans after September 30, 1991. The account uses permanent borrowing authority from the U.S. Treasury combined with transfers of appropriated funds from the Foreign Military Financing Direct Loan Program (FMFDLP) Account to make required disbursements to loan recipient country borrowers for approved procurements. Receipts of debt service collections from borrowers are used to repay borrowings from U.S. Treasury.

The Foreign Military Loan Liquidating Account (FMLLA) is a liquidating account that records all cash flows to and from the Government resulting from direct loans obligated and loan guarantees for foreign military financing committed prior to 1992. This account is shown on a cash basis and reflects the transactions resulting from loans provided to finance sales of defense articles, defense services, and design and construction services to foreign countries and international organizations. No new loan disbursements are made from this account. Certain collections made into this account are made available for default claim payments. The Federal Credit Reform Act (FCRA) provides permanent indefinite authority to cover obligations for default payments if the liquidating account funds are otherwise insufficient. All new foreign military financing credit activity in 1992 and after (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year) is recorded in corresponding program and financing accounts.

As required by the Federal Credit Reform Act of 1990, the Military Debt Reduction Financing (MDRF) Account is a non-budgetary financing account that records all cash flows to and from the Government resulting from restructuring foreign military loans. The amounts in this account are a means of financing and are not included in budget totals. It is an account established

for the debt relief of certain countries as established by Public Law 103-87, Foreign Operations, Export Financing, and Related Programs Appropriations Act, 1994, Section 11, Special Debt Relief for the Poorest, Most Heavily Indebted Countries. The MDRF buys a portfolio of loans from the FMLLA, thus transferring the loans from the FMLLA Account to the MDRF Account.

The greenhouse gas emissions of developing economies are rising more rapidly than the emissions of developed countries, and will soon surpass them. If major, rapidly-developing countries do not take action to cut emissions growth, domestic U.S. climate actions will have a limited effect on cutting overall greenhouse gas concentrations in the atmosphere. The Clean Technology Fund (CTF) is an ongoing multibillion dollar effort to reduce the growth of emissions in developing countries by catalyzing large-scale private sector investments through financing the additional

costs of commercially available cleaner technologies over dirtier, conventional alternatives. By funding the extra cost of the cleaner technology, the CTF incentivizes cleaner projects that leverage development bank financing, and attract new investor capital into low carbon sectors.

The CTF, one of two Climate Investment Funds for which the World Bank serves as trustee, leverages the capital bases and country program expertise of the Multilateral Development Banks. To receive funding, eligible countries need to first develop credible national investment plans that identify key high-emissions sectors wherein targeted projects could stimulate low carbon growth and the scalable uptake of clean technologies. During 2009, the CTF's governing committee endorsed nine such plans with a combined CTF funding envelope of \$3.6 billion and total planned investments of over \$34 billion. The committee also approved funding for the first four projects.

The United States' international climate policy must continue to effectively balance the necessities of economic development on the one hand, and climate change mitigation and adaptation on the other. The Strategic Climate Fund (SCF) is an important vehicle for achieving that balance as its programs promote low-carbon and climate-friendly economic growth in developing countries. The SCF is a suite of three programs to pilot innovative approaches and scaled-up activities aimed at specific climate change-related challenges in developing countries. The Pilot Program for Climate Resilience (PPRC) will help very poor countries better prepare for and respond to the unavoidable effects of climate change through innovative development plans, strategies, and projects. The Forest Investment Program (FIP) will reduce deforestation in developing countries through im-

proved governance and forest management, and by addressing the drivers of deforestation. The Program for Scaling-Up Renewable Energy in Low Income Countries (SREP) will demonstrate the economic, social and environmental viability of low carbon development pathways in very poor countries. The SCF is one of two Climate Investment Funds for which the World Bank serves as trustee. It will leverage the capital bases and country program expertise of the Multilateral Development Banks. During 2009, the PPCR and FIP started operations and will begin funding projects in early 2010. The SREP will launch in February 2010.

Persistent hunger remains an economic, development, and political challenge in many developing countries—as seen during the 2008 food price crisis. Without greater investment by developing countries and donors to address food insecurity, a significant reduction in the number of undernourished people currently estimated by the United Nations' Food and Agriculture Organization at 1 billion is unlikely, with serious implications for poverty reduction efforts and political stability in these countries.

A new multi-donor trust fund is being designed in conjunction with the Administration's Global Hunger and Food Security Initiative to support the efforts of developing countries that have demonstrated their commitment to a strategic approach for increasing agricultural growth and productivity to achieve lasting improvements in the food security of their populations. Currently, stakeholders intend that the fund will be administered by the World Bank and will make medium-to long-term investments through a variety of international financial institutions for activities that advance a comprehensive approach to food security. Adopting a comprehensive approach, the fund will offer support in five key areas: raising agricultural productivity; linking farmers to markets; reducing risk and vulnerability; improving non-farm rural livelihoods; and technical assistance, institution building, and capacity development. Investment areas will vary by country depending on country priorities and the activities of other development partners. The fund will offer financing through a public sector and a private sector window; the latter will provide

## GLOBAL FOOD SECURITY FUND—Continued

loans, credit guarantees, and equity to support private sector activities to improve agricultural development and food security. For both windows, priority will be given to proposals that leverage resources from other domestic and international partners, both public and private.

The fund is being developed on the basis of a request by the Administration and other G20 leaders to the World Bank in Pittsburgh in September 2009. The fund will leverage the resources and expertise of the World Bank, the International Fund for Agricultural Development (IFAD) and other multilateral institutions and complement and reinforce the efforts of our bilateral food security programs. Efforts to create the fund are being led by the United States, Canada, and Spain with input from potential recipient countries and civil society. As part of this initiative, the Administration will seek authorizing legislation.

The International Bank for Reconstruction and Development (IBRD or World Bank) provides financing and technical assistance to support infrastructure investment and policy reform. The IBRD operations are designed to promote sustainable economic growth, reduce poverty, and raise living standards, including through targeted investments in infrastructure, basic human needs, private-sector development, and core policy reforms. During 2009,

the IBRD made new commitments of \$32.9 billion and gross disbursements of approximately \$18.6 billion, almost tripling its commitments to meet increased demand for financing during the financial crisis. Since its establishment in 1945, the IBRD has made loans totaling \$480 billion. No request is being made for IBRD capital for 2011.

The IBRD acts as a trustee for the Global Environment Facility (GEF) Trust Fund. The GEF provides partial funding for developing country projects designed to provide global environmental benefits by reducing greenhouse gas emissions, protecting international waters, promoting biodiversity conservation, reducing persistent organic pollutants and ozone depleting substances, and preventing and controlling desertification and deforestation. With its highly specific focus on global environmental issues, where both costs and benefits are shared across international borders, the GEF occupies an important niche in the system of international development institutions. Its basic mission is to support capacity building and innovative and cost-effective investments whose design and environmental benefits can be duplicated (and financed) elsewhere. Since its inception in 1991, the GEF has allocated over \$6 billion in grants, leveraging over \$20 billion in co-financing, to support more than 1,700 projects in over 160 countries.

In 2010, donor governments will reach agreement on the fifth replenishment of the GEF. A total number for the fifth replenishment is expected by March 2010. The U.S. commitment will be \$680 million, to be paid in four equal installments of \$170 million from 2011 through 2014. During the replenishment negotiations, the United States has achieved important policy reforms to improve the GEF's overall effectiveness, particularly with regard to country-owned business plans for GEF funding and resource allocation. The 2011 Budget includes \$170 million for the first installment of GEF-5 and \$5 million for a portion of U.S. arrears to the GEF, for a total request of \$175 million.

The International Development Association (IDA) is a member of the World Bank Group and provides concessional development financing and grants to the world's poorest nations. These countries are primarily in Sub-Saharan Africa and South Asia, but also in Latin America, Eastern Europe, and the former Soviet Union. IDA's primary goal is to help recipient countries achieve sustained economic growth and poverty reduction, and particularly to meet the exceptional development challenges faced by Africa within its broad commitment to support all the world's poor countries. IDA is the single largest source of multilateral lending extended on concessional terms to developing countries. Projects have to meet the same economic, financial, and environmental standards as other World Bank projects. IDA resources for new lending are provided primarily by new donor contributions through 3-year replenishments, and are augmented by earnings, payments of existing loans, and transfers of income from the non-concessional windows of the World Bank.

During 2009, IDA made new commitments of \$14 billion. Since its establishment, IDA has made commitments totaling \$206 billion. The largest regional share of 2009 IDA resources, 56 percent, went to Africa.

Under the fifteenth replenishment (IDA-15), IDA will provide total resources for prospective new commitments of \$41.6 billion over the 2009–2011 period. Through the IDA-15 replenishment negotiations, U.S. leadership secured a number of commitments for reform. These include an expanded results measurement system which will increase the effectiveness of IDA's development projects and programs, improvements to the operational framework and financing arrangements for World Bank engagement in fragile/post-conflict states, specific measures to enhance debt management capacity building, continued use of grant financing for countries experiencing an elevated risk of debt distress, and progress toward greater transparency.

IDA-15 will provide between 20–30 percent of its total resources to the world's poorest and debt vulnerable countries as grants. Grant eligibility will be determined on the basis of debt sustainability with 40 countries (out of 64 IDA-only eligible countries) receiving grants in 2010. Consistent with its IDA-15 commitment, IDA has also enhanced efforts to improve country debt management capacity, introduced disincentives to prevent grant and debt relief recipients from borrowing non-concessionally, and conducted extensive outreach among the multilateral development banks, donors, and external creditors to enhance the use of the joint World Bank-IMF Debt Sustainability Framework.

Full and timely payment of U.S. IDA-15 contributions make it possible for the United States to meet its current international debt relief commitments under the Multilateral Debt Relief Initiative (MDRI) without the need for separate and additional MDRI appropriations.

IDA has also been working to improve the effectiveness of its operations and ensure development results on the ground. IDA's result-oriented approach includes: 1) country outcomes tracked by fourteen country outcome indicators, including indicators such as primary school completion rates, and 2) output indicators measuring IDA's contribution to country outcomes for specific outputs such as the number of teachers trained and facilities

built. Over the duration of IDA-15, IDA will work to improve the quality of data for outcome and output indicators through efforts to build country statistical capacity and development of a standardized list of select indicators across four to five sectors in order to produce a more accurate indicative aggregation of sector-specific outputs. In addition, IDA will develop a better measure of private sector development as well as an indicator to measure the quality of public financial management in IDA countries. The 2011 Budget includes \$1.235 billion for the third of three scheduled installments under IDA-15 and \$50 million to pay a portion of outstanding U.S. arrears, for a total request for IDA of \$1.285 billion. The U.S. pledge for IDA-15 is \$3.705 billion over three years and is based on the reform commitments described above.

The Multilateral Investment Guarantee Agency (MIGA) is a member of the World Bank Group. MIGA is designed to encourage the flow of foreign private investment to and among developing countries by issuing guarantees against noncommercial risks and carrying out investment promotion activities. During World Bank fiscal year 2009, MIGA issued 30 guaranteed contracts, with a maximum aggregate contingent liability of \$1.4 billion. Since MIGA's inception, estimated foreign direct investment facilitated totals more than \$82 billion. Negotiations on MIGA's first General Capital Increase (GCI) were completed in 1998. The United States committed to contribute a total of \$30 million in paid-in capital and nearly \$140 million in callable capital over three years. The agreement included commitments from MIGA on a range of policy issues of substantial importance to the United States, including environment, information disclosure, labor, and creation of an inspection function for greater accountability and transparency. In 2000, the Administration sought and received congressional authorization for the United States' full participation in the MIGA GCI. The U.S. currently has outstanding arrears of \$6.9 million. No request is being made for MIGA for 2011.

The Inter-American Development Bank (IDB) promotes sustainable economic growth and productivity, poverty reduction, private sector development, and good governance in Latin America and the Caribbean through loans and technical assistance. During 2009, the IDB approved \$15.9 billion in loans. Since its inception, the IDB has approved a total of \$182 billion. The IDB provides financing through: 1) the Ordinary Capital window that lends at market-based rates, and 2) the Fund for Special Operations (FSO), which provides financing on concessional terms to the region's poorest nations. No request is being made for the IDB or the FSO in 2011.

The Inter-American Investment Corporation (IIC), established in 1984, is a member of the Inter-American Development Bank Group, whose purpose is to promote development of private small and medium sized enterprises (SMEs) in Latin America and the Caribbean. It is a legally autonomous entity whose resources and management are separate from those of the Inter-American Development Bank itself. Through direct loans and equity investments in SMEs as well as through lending to private financial intermediaries, the IIC helps SMEs in the region to access the medium/long-term capital necessary to start-up, expand, or modernize their operations. During 2009, the IIC approved 37 projects totaling \$296 million. Since its inception, the IIC has approved 599 projects for a total amount of \$3.6 billion. The 2011 Budget includes \$21 million to clear 50 percent of U.S. arrears to the IIC. Without this payment, the United States will lose shares at the institution.

The Asian Development Bank (AsDB) promotes broad-based sustainable economic growth and development, poverty alleviation, and cooperation in the Asia/Pacific region. The AsDB has two main financing windows: 1) the Ordinary Capital Resources window (OCR), and 2) the Asian Development Fund (AsDF) which lends at concessional rates to the region's poorest nations.

AsDF resources are derived in part from donor contributions through periodic "replenishments" and OCR resources are derived from capital subscriptions from a General Capital Increase. In the most recent AsDF replenishment, AsDF-10, the United States successfully negotiated a comprehensive package of policy reforms and pledged \$461 million over four years, the same contribution as that pledged during the last replenishment. Negotiations concluded in May 2008. In the recently-completed Fifth General Capital Increase (GCI-V), the United States successfully negotiated additional policy reforms and pledged a paid-in capital contribution of \$533 million over five years.

Together, these two agreements put in place a number of significant reform measures of high priority to the United States. The AsDF established a grants window, following the example of the International Development Association and the African Development Fund. During the AsDF-10 period, grants are expected to reach \$2.75 billion, or 25 percent of total AsDF-10 operations. The AsDF continues to strengthen the use of the performance-based allocation system in determining resource levels to borrowing countries. Other key achievements include commitments to strengthening the AsDB's safeguards practices, professionalizing human resources, and ensuring adequate resources for U.S. foreign policy priorities in the region. Internal governance has become more transparent through improved information disclosure and public communication policies. The AsDB launched a new

Governance and Anti-Corruption Action Plan to improve anti-corruption efforts at the institutional and country levels, and significantly increased the resources available for anticorruption activities, including upgrading the Office of Integrity and Auditor General. The AsDB continues to be strongly engaged in Afghanistan and Pakistan and has substantially increased its assistance for private sector development. Finally, the AsDB is taking dramatic action to institutionalize the use of development results in its operations.

In 2009, the AsDB lent roughly \$11.3 billion from its OCR and extended an estimated \$3.3 billion in AsDF loan and grant resources. Since its founding in 1966, the AsDB has committed approximately \$156 billion in loans. In addition, the AsDB has made cumulative private sector loans, guarantees, and equity investments of over \$11 billion. In 2009, the AsDB extended \$1.1 billion in private sector assistance in the form of loans, equity investments, guarantees, and syndications.

The 2011 Budget for the AsDF is \$115.25 million for the second of four scheduled contributions under AsDF-10. The 2011 Budget for the AsDB's OCR is \$106.6 million for the first of five scheduled paid-in capital contributions to the AsDB's GCI V. The Administration will seek authorizing legislation for these contributions.

The African Development Bank group is composed of 1) the African Development Bank (AFDB), which lends at prevailing rates, and 2) the African Development Fund (AFDF), which

provides grants and concessional loans to the poorest African countries. In 2009, the AFDB approved 78 new projects, programs, and equity investments amounting to about \$9 billion. Since its first operations in 1967, AFDB has financed 2,318 projects, programs, and equity investments amounting to about \$47 billion.

The AFDF approved \$3.4 billion for 62 new projects and programs in 2009. Since its first operations in 1974, cumulative AFDF financing totals an estimated \$32.5 billion for 1,184 development projects and programs.

The 2011 Budget includes \$155.9 million for the third of three installments of the U.S. contribution to the eleventh replenishment of the African Development Fund (AFDF-11), which covers the period from 2009 to 2011. No funds are being requested for the AFDB in 2011.

In December 2007, the United States and other donor countries reached agreement on AFDF-11, which included a number of key U.S. policy objectives: 1) management for results agenda that emphasizes measures to strengthen the focus on delivering positive development results on the ground and the institutional management policies and procedures required to deliver them—a two-tiered results measurement framework is in place to measure, monitor, and report on outcomes and outputs at the country, regional and institutional levels; 2) maintaining the centrality of performance in the allocation of the Fund's resources while improving the implementation of the Performance Based Allocation (PBA) system; 3) enhanced engagement in fragile states through a new fragile states facility that will better address the needs or emerging opportunities in post-conflict and transition countries, such as Liberia; 4) scaling up the Funds' regional operations, focusing on infrastructure projects that promote regional integration; and 5) greater support for governance issues at the regional, country, and sector levels, as well as in fragile states, in order to fight corruption, increase transparency, and improve accountability. The AFDF will continue to extend grants to recipient countries based on their debt vulnerability.

The European Bank for Reconstruction and Development (EBRD) supports market-oriented economic reform and democratic pluralism through predominately private sector lending and investments in the nations of Central and Eastern Europe and the former Soviet Union. The United States and other shareholders signed the articles of agreement of the EBRD on May 29, 1990, and the Bank officially began operating on April 15, 1991. In April 1996, shareholders approved a doubling of the EBRD's capital base from EUR 10 billion to EUR 20 billion (approximately \$24 billion) which went into effect in April 1997. As of end-2009, approximately 77 percent of the Bank's portfolio was in the

The North American Development Bank (NADBank) provides financing for environmental infrastructure projects in the U.S.-Mexico border region. A portion of its capital also finances NAFTA-related community adjustments and investment projects in both countries. Under NADBank's charter, the United States and Mexico contributed equally to NADBank's capital, a total contribution of \$450 million in paid-in capital and \$2.55 billion in callable capital. There is no paid-in request for 2011.

NADBank finances environmental infrastructure projects that have been certified by the U.S.-Mexico Border Environmental Commission (BECC), an institution designed to assist States and local communities on both the U.S. and Mexican side in coordinating border projects.

As of December 2009, NADBank had approved \$532.3 million in loans for 56 projects and \$88.8 million in grants for 38 projects. The Bank has also administered \$556.23 million in EPA funded grants to 82 projects in Mexico and the United States. The total investment value of all the projects to which it provides or administers funding is approximately \$3 billion.

The Multilateral Investment Fund (MIF), administered by the Inter-American Development Bank, provides grants and loans to support private-sector development and finance and labor sector reforms in Latin America and the Caribbean. Special consideration is given to reforms that encourage private foreign direct investment and promote privatization. Grants and loans are used for technical assistance to identify and resolve investment constraints, for investment in human capital, and for business infrastructure and development.

During 2009, the MIF approved 163 projects totaling \$122 million. Since its inception in 1992, the MIF has approved 1,467 projects, of which the MIF contribution totaled more than \$1.67 billion.

The United States made a commitment to the MIF in 1992 amounting to \$500 million. Negotiations were completed in early 2005 for the first replenishment of the MIF with a United States commitment of \$150 million to be paid in six equal annual installments. The United States achieved its key objectives in these negotiations: a strengthened commitment to measurable results, increasing efficiency, maintaining a focus on grants, allocating resources to maximize innovation, reforming Inter-American Development Bank procurement, and instituting a sunset clause. Grant funding will be about 75 percent of all funding approvals.

The 2011 Budget includes \$25 million for the fifth installment of the first replenishment.

The International Fund for Agricultural Development (IFAD) was established in 1977 as a multilateral financial institution focused on promoting rural agricultural development in poorer countries. IFAD's specific mandate is to assist rural small-scale producers and subsistence farmers to increase their productivity and incomes, improve food security, and help integrate them into larger markets.

The 2011 Budget includes \$30 million for the second of three scheduled contributions under IFAD's eighth replenishment (IFAD-8). In December 2008, negotiations were concluded on IFAD-8 and the U.S. pledged a total of \$90 million over the three-year replenishment period 2010–2012. The U.S. exercised leadership to achieve key objectives, including a commitment for IFAD to develop a graduation policy along the lines of other multilateral development banks; human resources reform to improve the institution's staff profile and increase the proportion of operational staff; continued application of a strong performance-based allocation system; a five-tiered results framework; clear measures to enhance the independence of the internal audit function including consultation on hiring and removal of the internal auditor; and a commitment for IFAD to develop comprehensive environment, natural resources and climate change policies.

This account provides technical assistance to other countries in support of U.S. foreign policy objectives and in support of the responsibilities of the U.S. Treasury Department to formulate, conduct and coordinate the international financial policies of the United States. Technical assistance provided through this account facilitates key short- and medium-term reforms in the policy and management areas of budget, revenue, government debt, financial institutions and financial enforcement.

The proposed appropriation will fund full-time technical assistance advisors, including program-related administrative costs and intermittent experts in support of the resident advisors. The appropriation will support approximately 80 technical assistance programs worldwide: in Asia, the Middle-East, Africa, Latin America, and the Caribbean. It will enable continued technical assistance in the areas of anti-terrorism and anti-money laundering, provide resources for technical assistance to countries affected by the international financial crisis, and promote regional integration and economic development. It will also support Treasury's work to strengthen financial infrastructure and combat terrorist financing in national security priority countries, such as Iraq, where long-term stability will depend on strong financial governance. The Treasury Department will continue to coordinate activities with international financial institutions and with USAID, the Department of State, and other relevant U.S. Government agencies when determining where its technical assistance program can have the greatest positive impact.

The Global Fund to Fight AIDS, Tuberculosis and Malaria (Global Fund) account exists to obligate and disburse U.S. contributions to the Global Fund which come from appropriations within the Departments of Health and Human Services and State. The United States was a driving force in the creation of the Global Fund, a public-private partnership developed to finance country-led effort to fight the three diseases, and the U.S. government made the founding contribution of \$200 million to the Global Fund in May 2001. The Global Fund became a non-profit foundation under Swiss law in January 2002, and held its first grant competition in April of that year.

The purpose of the Global Fund is to attract, manage, and disburse resources through a public-private partnership that make a sustainable and significant contribution to the reduction of infections, illness and death, thereby mitigating the impact of HIV/AIDS, tuberculosis and malaria in countries in need. The Global Fund pursues an integrated and balanced approach to prevention, treatment, care and support. The innovative Global

Fund model finances programs developed by the recipient countries themselves in line with national strategic health plans and priorities. The requirement that all areas of society with a stake in public health be involved in the proposal development process, including civil society and private sector, ensures strong and comprehensive programs. The Global Fund works through efficient, effective disbursement mechanisms, based on grant performance, minimizing transaction costs and operating in a transparent and accountable manner based on clearly defined responsibilities.

As of November 30, 2009, there have been more than \$21.1 billion in pledges and almost \$15.3 billion in contributions to the Global Fund from developed and developing country governments, foundations, corporations, innovative financing mechanisms, and individuals. The U.S. government is the largest donor, with more than \$5.4 billion in pledges and more than \$4.3 billion in contributions. The 2011 request includes \$1 billion for the Global Fund, including \$700 million from the Global Health and Child Survival account and \$300 million from the National Institutes of Health/National Institute of Allergy and Infectious Diseases.

In addition to its assessed payments, the United States contributes to voluntary funds of many international organizations and programs involved in a wide range of sustainable development, humanitarian, scientific, environmental and security activities. The 2011 request includes funding that reflects the Administration's continued support for the United Nations Population Fund (UNFPA), international climate change activities, and the United Nations Development Fund for Women (UNIFEM).

**Debt Reduction.**—The 2011 Budget includes \$70 million for debt restructuring programs, of which \$50 million is for bilateral Heavily Indebted Poor Country (HIPC) and poorest country debt reduction and HIPC Trust Fund programs, and \$20 million is for the Tropical Forest Conservation Act program.

**Multilateral Debt Reduction Programs for the Poorest.**—For the poorest countries, debt reduction provides an incentive to implement macro-economic and structural reforms necessary to improve economic performance and creditworthiness. Debt relief, economic reform and poverty reduction contribute to economic growth and social development, which can mean expanded opportunities for trade and investment for the United States. For the poorest and most heavily indebted countries, the United States

## DEBT RESTRUCTURING—Continued

will continue support for the Paris Club of official creditors and provide additional relief complementary to the enhanced HIPC Initiative. The Administration requests a total of \$50 million in funding for the cost of debt restructuring programs, including bilateral HIPC and poorest country debt reduction and the HIPC Trust Fund for relief on debt owed to participating multilateral institutions. The United States has pledged a total of \$150 million to meet the additional financing needs of the HIPC Trust Fund consistent with commitments at the 2002 G-8 Summit in Kananaskis, Canada, to fund a share of HIPC financing shortfalls. The United States contributed \$74.6 million towards this pledge in fiscal year 2006. The Administration intends to submit a legislative proposal to extend authorization of the bilateral Heavily Indebted Poor Country (HIPC) and poorest country debt reduction and HIPC Trust Fund programs.

**Tropical Forest Debt Relief.**—The Tropical Forest Conservation Act (TFCA) received strong bipartisan support and was signed into law in 1998. Modeled after the Enterprise for the Americas Initiative (EAI), P.L. 105–214, as amended, it allows the Administration to reduce outstanding concessional U.S. Agency for International Development and P.L. 480 debt stocks to support conservation of tropical forests in eligible developing countries. Fifteen TFCA debt reduction agreements have been concluded with thirteen countries: Bangladesh, Belize, El Salvador, Peru (two agreements), the Philippines, Colombia, Jamaica, Panama (two agreements), Paraguay, Guatemala, Botswana, Costa Rica, and Indonesia. In total, these agreements will generate over time more than \$218 million to support forest conservation.

**Development Assistance Programs.**—The U.S. Agency for International Development (USAID) uses these funds to promote transformational development in developing countries working in partnership with foreign governments, local private sector and non-governmental organizations, and public-private partnerships. These programs enable our foreign partners to implement the often difficult political, economic and other systemic changes that must occur to achieve sustainable development. These programs help a country become more self reliant by sustaining economic and social progress.

—**Promoting economic growth:** Funding supports trade and investment programs to increase the capacity of developing countries to participate effectively in the global trading system, comply with trade agreements, improve business climates, and raise productivity. Development Assistance programs also support economic reforms, help create new job opportunities,

expand access to market information, improve the knowledge and skills of entrepreneurs and workers, and support robust agricultural and natural resource management programs.

—*Ruling justly and democratically*: Funding supports countries to strengthen their rule of law and respect for human rights, encourage open and competitive political processes, promote the development of a politically active civil society, and encourage more transparent and accountable government institutions.

—*Investing in people*: Funding helps to develop human capital through programs such as improved and expanded access to basic education, especially for girls and women, and higher education and training to expand the skilled human capital base that is needed for development.

The Transition Initiatives (TI) account addresses opportunities and challenges facing conflict-prone countries and those making the transition from the initial crisis stage of a complex emergency to the path of sustainable development. \$48 million will support fast, flexible, short-term assistance to advance peace and democracy in high foreign policy priority countries through the U.S. Agency for International Development (USAID) Office of Transition Initiatives in close collaboration with the Department of State, the National Security Council, the Department of Defense, USAID regional bureaus, and USAID country missions. These efforts include reintegration of ex-combatants, community self-help programs that reduce tensions and promote grass-roots democratic media, and conflict resolution measures.

The Fund, authorized by section 635(m) of the Foreign Assistance Act of 1961, finances on a reimbursable basis the costs associated with providing administrative support to other agencies under the International Cooperative Administrative Support Services (ICASS) program overseas. Under ICASS, each agency pays a proportional share of the cost of those services they have agreed to receive. Working through inter-agency councils at post, all agencies have a say in determining which services the USAID mission will provide, defining service standards, reviewing costs, and determining funding levels. The Fund is also used for deposit of rebates from the use of Federal credit cards, the deposits then being made available for start-up costs at new ICASS service provider missions and for technical support to missions currently providing services.

As required by the Federal Credit Reform Act of 1990, this account records, for the Development Credit Authority, the subsidy costs associated with direct loans obligated and loan guarantees committed in 1992 and beyond (including modifications of direct loans or loan guarantees that resulted from obligations or commitments in any year), as well as administrative expenses of this program and legacy USAID credit programs. The subsidy amounts are estimated on a net present value basis; the administrative expenses are estimated on a cash basis.

In 2011, the U.S. Agency for International Development (USAID) will use the Development Credit Authority (DCA) transfer authority to support DCA projects in every region of the globe and every economic sector targeted by USAID. DCA augments grant assistance by mobilizing private capital in developing countries for sustainable development projects. Credit assistance under DCA is principally intended for use where a development activity is financially viable, where borrowers are creditworthy, and where there is true risk sharing with private lenders.

In 2011, the request for \$35 million in DCA transfer authority will support the flow of credit to microfinance institutions, small and medium enterprises, agribusinesses, energy-efficiency projects, housing projects, water and sanitation facilities, health care providers, and municipalities in USAID-assisted countries.

Appropriated funds provide for the costs of the U.S. Trade and Development Agency (USTDA), which include program costs of grants for feasibility studies and technical assistance, other project planning activities designed to implement development and foreign policy objectives, and the cost of managing USTDA programs. In carrying out its mission, USTDA funds activities in developing and middle-income countries that foster economic development and encourage the use of U.S. private sector technology, goods and services during project implementation. USTDA projects focus on sectors in which U.S. industry could benefit through the export of goods and services, such as energy and the environment, transportation, and information and communications technologies.

of the Peace Corps into new countries in order to have approximately 9,400 Americans enrolled in the Peace Corps by the end of 2012 and 11,000 by the end of 2016. The Volunteers help fill the trained manpower needs of developing countries and encourage self-sustaining development of skilled manpower. The Peace Corps also promotes mutual understanding between the peoples of the developing world and the United States and focuses the attention of the American people on the benefits of community service. Peace Corps Volunteers work primarily in the areas of agriculture, business development, education, environment, health and HIV/AIDS, and youth.

This account transfers funds to the operating expense account for the Peace Corps to finance upward adjustments of recorded obligations because of foreign currency fluctuations. Transfers are made as needed to meet disbursement requirements in excess of funds otherwise available for obligation adjustment. Net gains resulting from favorable exchange rates are returned to this appropriation and available for subsequent transfer when needed. The account is replenished through the utilization of a special transfer authority that allows the Peace Corps to withdraw unobligated balances from the operating expenses account from prior years as long as the authorized limit of \$5 million is not exceeded at the time of the transfer.

The Inter-American Foundation (IAF) funds grassroots development initiatives designed by the organized poor in Latin America and the Caribbean. The IAF has carried out its mandate by responding with grant support to the most creative ideas for self-help received from grassroots groups and non-governmental organizations. The IAF uses objective indicators to gauge the results of its grants in improving the quality of life in poor communities and disseminates the experiences to a broad audience that includes private and public sector donors, development professionals, academics, and other interested parties. In 2011, the IAF will strive to leverage additional resources for its grant program from local governments, private sector, beneficiary populations, and other donors as well as through an IAF-initiated network of Latin American businesses and corporate foundations committed to funding grassroots development.

**Development Grants.**—Grants are awarded directly to non-governmental organizations in Latin America and the Caribbean to carry out grassroots development projects. In 2011, the IAF plans to award approximately 80 new grants and to supplement with additional funds approximately 20 grants awarded in previous years.

**Leveraging of Resources.**—IAF grantees are required to contribute to their projects, encouraged to partner with local governments, and urged to mobilize funds to sustain their impact after the grant period. RedEAmerica, a network of the hemisphere's corporate foundations that have adopted the IAF's bottom-up approach, invests its funds in self-help programs. RedEAmerica members that are parties to the IAF cooperative agreements match IAF funding two-to-one; the entire network raises contributions from a variety of sources. Additionally, U.S.-based migrant associations are joining the IAF to support grassroots development in their home communities.

**Evaluations and Other Activities.**—Each year the progress of all IAF grantees is routinely assessed and a sample of completed projects undergoes comprehensive evaluation. The IAF also pro-

duces and distributes regularly scheduled publications on its projects, on trends in development, and on other topics of interest to the development profession.

**Program Management and Operation.**—The IAF also manages resources that cover salaries and benefits, travel, reimbursable service agreements with other U.S. government agencies, rent, service contracts, and other support costs.

The African Development Foundation (ADF), a public corporation, is an independent agency of the U.S. Government, established to support African-designed and African-driven initiatives to address grassroots economic and social problems, alleviate poverty, and promote sustainable development. ADF provides grants of up to \$250,000 directly to community groups, agricultural cooperatives, and small enterprises. These grants help organizations create tangible benefits such as increasing or sustaining the number of jobs in a community, improving income levels, and addressing social development needs. ADF also funds African NGOs in each country to provide technical assistance to improve project outcomes.

In 2011, ADF will provide grants to recipients in 20 African countries, directly to small farmer and agricultural cooperatives, other grassroots groups, and small, African-owned enterprises. These investments will be focused at the marginalized end of the economic and social spectrum to promote two strategic goals:

1) Advance community-based, sustainable development and empowerment of the poor in Africa. ADF will promote smallholder agricultural development and micro and small enterprise to generate income and employment. ADF will increase participation of producer groups and African-owned small enterprises to promote economic development, including trade and investment.

2) Expand local capacity to promote and support grassroots development. ADF will build local community development Partner Organizations that provide technical assistance and support to grassroots groups. ADF will develop and replicate new models for community reinvestment. ADF will continue to leverage additional funding through strategic partnerships with national and local governments, other donor agencies, and the local private sector. ADF will encourage African governments and other donors to increase utilization of grassroots development "practices".

The United States participates in the International Monetary Fund (IMF) through a quota subscription. The United States quota to the International Monetary Fund (IMF) is denominated in Special Drawing Rights (SDRs) and is presently SDR 37,149,300,000 (about \$58.7 billion as of mid-December 2009). Quotas are the metric used by the Fund to assign voting weights to determine contributions to the IMF's general resources and to determine access to IMF financing. This account reflects IMF quota resources appropriated prior to 2009.

With respect to this account, use by the IMF of the quota commitment does not result in net budget outlays because the United States receives an increase in its international monetary reserves corresponding to any transfer of dollars under the U.S. quota subscription. The United States can use these interest-bearing reserves to meet a balance-of-payments financing need.

For the 2009 appropriation for the U.S. quota to the IMF, see the account entitled "United States Quota IMF Direct Loan Program".

In April 2008, IMF members reached agreement on a quota reform package as a first step to modernize the IMF's governance structure to keep pace with the rapid growth and greater economic weight of dynamic emerging economies. The Supplemental Appropriations Act of 2009 (Public Law 111-32), enacted June 24, 2009, provides authorization and appropriations for an increase in the U.S. quota to the IMF by the dollar equivalent of SDR 4,973,100,000 (about \$7.9 billion as of December 2009). This increase in the U.S. quota is not yet effective, and will not come into effect until other IMF member countries undertake certain actions with respect to the IMF.

While the U.S. quota to the IMF is not a credit program, the Supplemental Appropriations Act of 2009 (Public Law 111-32) specified that the 2009 appropriation to increase in the U.S. quota in the IMF is to be scored on a credit reform basis, per the Federal Credit Reform Act of 1990, with an additional adjustment to the discount rate for market risk. The application of FCRA by operation of law to the 2009 quota appropriation is a significant change in the budgetary treatment of the U.S. quota to the IMF and does

not apply to appropriations for the U.S. quota to the IMF prior to 2009.

As authorized by Public Law 111–32, and required by the Federal Credit Reform Act of 1990, as amended, this account records, for this program, the subsidy costs associated with the increase in the U.S. quota to the IMF, as reflected in the 2009 Supplemental Appropriations Act. The subsidy amounts are estimated on a present value basis using a market risk-adjusted discount rate, as required by the 2009 Act.

See Chapter 13 of the Analytical Perspectives for more information. For additional information and the status of funds for the U.S. quota to the IMF prior to 2009, see the account entitled "United States Quota, International Monetary Fund".

The General Arrangements to Borrow (GAB) were established in 1962 by 10 industrial countries, including the United States, as a means of supplementing the IMF's resources when needed to forestall or cope with an impairment of the international monetary system. GAB members agreed in early 1983 to increase their financial commitments to the GAB from approximately SDR 6.3 billion to SDR 17 billion (about \$17.9 billion at that time), with the U.S. share rising from SDR 1.9 billion to approximately SDR 4.25 billion (about \$6.7 billion as of mid-December 2009).

In January 1997, the Executive Board of the IMF approved the creation of the New Arrangements to Borrow (NAB) to further supplement resources available to the IMF to forestall or cope with an impairment of the international monetary system or to deal with an exceptional situation that poses a threat to the stability of the system. The NAB became effective on November 17, 1998, and was activated in December 1998 to finance an IMF arrangement for Brazil. The IMF repaid the NAB in March 1999. In 2009, twenty-six countries and institutions participated in the NAB through a set of credit arrangements with the IMF totaling SDR 34 billion (about \$48 billion on the date of establishment), of which the U.S. share is approximately SDR 6.6 billion (about \$10 billion as of mid-December 2009). Although the GAB continues to exist, the sum of loans advanced under NAB and GAB cannot exceed SDR 34 billion. The sum of U.S. loans advanced under both arrangements cannot exceed the U.S. share of the NAB. Neither the NAB nor the GAB has been activated since 1999.

This account reflects GAB and NAB resources appropriated prior to 2009. With respect to this account, financing extended by the United States under GAB and NAB does not result in any net budget outlays because such financing results in an equivalent

At the G-20 Leaders' Summit in London in April 2009, the President secured agreement to increase the NAB by up to \$500 billion to restore global confidence and ensure the IMF has adequate resources to play its central role in resolving and preventing the spread of international economic and financial crises. As part of this agreement, the United States committed to increase its participation in the NAB by up to \$100 billion, which required congressional action. The Supplemental Appropriations Act of 2009 (Public Law 111-32) enacted on June 24, 2009, provides authorization and appropriations for an increase in the United States participation in the NAB by up to 75 billion SDRs. This SDR amount is subject, as a practical matter, to the public com-

mitment to an increase by up to \$100 billion. This increase in the United States participation in the NAB is not yet effective, and will not come into effect until all IMF member countries participating in the NAB undertake certain actions with respect to the IMF.

While U.S. participation in the NAB is not a credit program, Public Law 111-32 specified that the 2009 appropriation for the increase in the U.S. participation in the NAB is to be scored on a credit reform basis, per the Federal Credit Reform Act of 1990, with an additional adjustment to the discount rate for market risk. The application of FCRA by operation of law to the 2009 NAB appropriation is a significant change in the budgetary treatment of appropriations for the NAB and does not apply to appropriations for the U.S. participation in the NAB prior to 2009.

As authorized by the Supplemental Appropriations Act of 2009 (Public Law 111-32), and required by the Federal Credit Reform Act of 1990, as amended, this account records, for this program, the subsidy costs associated with increased participation by the U.S. in the NAB, as reflected in the 2009 Supplemental Appropriations Act. The subsidy amounts are estimated on a present value basis using a market risk-adjusted discount rate, as required by the 2009 Act.

See Chapter 13 of the Analytical Perspectives for more information. For additional information on the NAB and the status of funds for the U.S. participation in the NAB prior to 2009, see the account entitled "Loans to International Monetary Fund".

In December 2004, a devastating tsunami and earthquake affected a number of countries in southeast Asia. The United States

**Tsunami Recovery and Reconstruction Fund—Continued**  
 responded with a quick infusion of emergency assistance, followed by funding for rehabilitation and reconstruction. Assistance provided in the supplemental was designed for rebuilding communities and infrastructure, helping individuals return to their original livelihood, training individuals, particularly women, to develop new skills, and supporting host government-led reconstruction and early warning/disaster preparedness efforts. Funds were also used to reimburse other accounts obligated for relief and rehabilitation efforts in the immediate aftermath of the tsunami. The largest amounts of funding went to assistance for Indonesia and Sri Lanka, with smaller programs in India, Thailand, and the Maldives. Funds were also provided to support regional programs, such as development of an early warning and disaster preparedness system for the Indian Ocean, and to support prevention and preparations against avian influenza.

[PROHIBITION ON TAXATION OF UNITED STATES ASSISTANCE]

[SEC. 7013. (a) PROHIBITION ON TAXATION.—None of the funds appropriated under titles III through VI of this Act may be made available to provide assistance for a foreign country under a new bilateral agreement governing the terms and conditions under which such assistance is to be provided unless such agreement includes a provision stating that assistance provided by the United States shall be exempt from taxation, or reimbursed, by the foreign government, and the Secretary of State shall expeditiously seek to negotiate amendments to existing bilateral agreements, as necessary, to conform with this requirement.

(b) REIMBURSEMENT OF FOREIGN TAXES.—An amount equivalent to 200 percent of the total taxes assessed during fiscal year 2010 on funds appropriated by this Act by a foreign government or entity against commodities financed under United States assistance programs for which funds are appropriated by this Act, either directly or through grantees, contractors and subcontractors shall be withheld from obligation from funds appropriated for assistance for fiscal year 2011 and allocated for the central government of such country and for the West Bank and Gaza program to the extent that the Secretary of State certifies and reports in writing to the Committees on Appropriations that such taxes have not been reimbursed to the Government of the United States.

(B) the foreign policy interests of the United States outweigh the purpose of this section to ensure that United States assistance is not subject to taxation.

(2) The Secretary of State shall consult with the Committees on Appropriations at least 15 days prior to exercising the authority of this subsection with regard to any country or entity.

(f) IMPLEMENTATION.—The Secretary of State shall issue rules, regulations, or policy guidance, as appropriate, to implement the prohibition against the taxation of assistance contained in this section.

#### RESERVATIONS OF FUNDS

SEC. [7014]7011. (a) Funds appropriated under titles II through VI of this Act which are specifically designated may be reprogrammed for other programs within the same account notwithstanding the designation if compliance with the designation is made impossible by operation of any provision of this or any other Act or other compelling foreign policy reason: *Provided*, That any such reprogramming shall be subject to the regular notification procedures of the Committees on Appropriations: *Provided further*, That assistance that is reprogrammed pursuant to this subsection shall be made available under the same terms and conditions as originally provided.

(b) In addition to the authority contained in subsection (a), the original period of availability of funds appropriated by this Act [and administered by the United States Agency for International Development (USAID)] that are specifically designated for particular programs or activities by this or any other Act shall be extended for an additional fiscal year if [the USAID Administrator determines and reports promptly to the Committees on Appropriations that] the termination of assistance to a country or a significant change in circumstances makes it unlikely that such designated funds can be obligated during the original period of availability: *Provided*, That such designated funds that continue to be available for an additional fiscal year shall be obligated only for the purpose of such designation.

(c) Ceilings and specifically designated funding levels contained in this Act shall not be applicable to funds or authorities appropriated or otherwise made available by any subsequent Act unless such Act specifically so directs: *Provided*, That specifically designated funding levels or minimum funding requirements contained in any other Act shall not be applicable to funds appropriated by this Act.

#### REPROGRAMMING NOTIFICATION REQUIREMENTS

SEC. [7015]7012. (a) None of the funds made available in title I of this Act, or in prior appropriations Acts to the agencies and departments funded by this Act that remain available for obligation or expenditure in fiscal year [2010] 2011, or provided from any accounts in the Treasury of the United States derived by the collection of fees or of currency reflows or other offsetting collections, or made available by transfer, to the agencies and departments funded by this Act, shall be available for obligation or expenditure through a reprogramming of funds that: (1) creates new programs; (2) eliminates a program, project, or activity; (3) increases funds or personnel by any means for any project or activity for which funds have been denied or restricted; (4) relocates an office or employees; (5) closes or opens a mission or post; (6) reorganizes [or renames] offices; (7) reorganizes programs or activities; or (8) contracts out or privatizes any functions or activities presently performed by Federal employees; unless the Committees on Appropriations are notified 15 days in advance of such reprogramming of funds.

(b) For the purposes of providing the executive branch with the necessary administrative flexibility, none of the funds provided under title I of this Act, or provided under previous appropriations Acts to the agency or department funded under title I of this Act that remain available for obligation or expenditure in fiscal year [2010] 2011, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agency or department funded by title I of this Act, shall be available for obligation or expenditure for activities, programs, or projects through a reprogramming of funds in excess of \$1,000,000 or 10 percent, whichever is less, that: (1) augments existing programs, projects, or activities; (2) reduces by 10 percent funding for any existing program, project, or activity, or numbers of personnel by 10 percent as [approved by] *previously justified to the Congress*; or (3) results from any general savings, including savings from a reduction in personnel, which would result in a change in existing

programs, activities, or projects as [approved by] *previously justified to the Congress*; unless the Committees on Appropriations are notified 15 days in advance of such reprogramming of funds.
