

Congresswoman Sanchez is pleased to announce the launch of [HealthCare.gov](#) , a comprehensive website that will help put Orange County families in charge of their health care. The website contains clear, jargon-free information, including a tool that will help individuals and small businesses navigate the process of shopping for health insurance.

The core of the new website is a powerful [insurance options finder](#) . After consumers input a few pieces of background information – such as state, age range, and current insurance status – the tool will generate a list of both private and public health insurance options. The tool will outline the details of insurance plans offered in that state and include contact information for each insurance provider so consumers can contact the company about the plans that best fit their individual needs. Beginning in October, the tool will also include pricing information, further simplifying health insurance shopping.

If you have any questions about this new resource, please contact Rep. Sanchez's Garden Grove office at (714) 621-0102 or send an e-mail to Loretta@mail.house.gov .
