

Be Red Cross Ready

Flood Safety Checklist

Floods are among the most frequent and costly natural disasters. Conditions that cause floods include heavy or steady rain for several hours or days that saturate the ground. Flash floods occur suddenly due to rapidly rising water along a stream or low-lying area.

Know the Difference

Flood/Flash Flood Watch
Flooding or flash flooding is possible in your area.

Flood/Flash Flood Warning
Flooding or flash flooding is already occurring or will occur soon in your area.

What should I do?

- Listen to area radio and television stations and NOAA weather radio for possible flood warnings and reports of flooding in progress from the National Weather Service.
- Be prepared to evacuate at a moment's notice.
- When a flood or flash flood warning is issued for your area head for higher ground and stay there.
- Stay away from floodwaters. If you come upon a flowing stream where water is above your ankles, stop, turn around and go another way. Six inches of swiftly moving water can sweep you off your feet.
- If you come upon a flooded road while driving, turn around and go another way. If you are caught on a flooded road and waters are rising rapidly around you, get out of the car quickly and move to higher ground. Most cars can be swept away by less than two feet of moving water.
- Keep children out of the water; they are curious and often lack judgment about running water or contaminated water.
- Be especially cautious at night when it is harder to recognize flood danger.

What supplies do I need?

- Water—at least a 3-day supply; one gallon per person per day
- Food—a 3-day supply of nonperishable, easy-to-prepare food
- Manual can opener
- Flashlight
- Battery-powered or hand-crank radio
- Extra batteries (flashlight, radio)
- First aid kit
- Cell phone with chargers
- Medications (7-day supply) and medical items
- Sanitation and personal hygiene items
- Baby supplies
- Pet supplies
- Copies of important personal documents
- Family contact information
- Tools/supplies for securing your home
- Extra cash
- Clothing and sturdy shoes
- Rain gear
- Towels and blanket or sleeping bag
- Map
- Entertainment items

What do I do after a flood?

- Return home only when officials have declared the area safe.
- Before entering your home, check outside for loose power lines, damaged gas lines, foundation cracks or other damage.
- Parts of your home may be collapsed or damaged – approach entrances carefully. See if porch roofs and overhangs have all their supports.
- Watch out for wild animals, especially poisonous snakes that may have come into your home with the floodwater.
- If you smell natural or propane gas or hear a hissing noise, leave immediately and call the fire department.
- If power lines are down outside your home, do not step in puddles or standing water.
- Keep children and pets away from hazardous sites and floodwater.
- Materials such as cleaning products, paint, batteries, contaminated fuel and damaged fuel containers are hazardous. Check with local authorities for assistance with disposal to avoid risk.
- During cleanup, wear protective clothing, including rubber gloves and rubber boots.
- Make sure your food and water are safe. Discard items that have come in contact with floodwater, including canned goods, water bottles, plastic utensils and baby bottle nipples. When in doubt, throw it out!
- Do not use water that could be contaminated to wash dishes, brush teeth, prepare food, wash hands, make ice or make baby formula.
- Contact your local or state public health department for specific recommendations for boiling or treating water in your area after a disaster as water may be contaminated.

Let Your Family Know You're Safe

If your community does flood, register on the American Red Cross Safe and Well Web site available through redcross.org to let your family and friends know about your welfare. If you don't have internet access, call **1-800-RED CROSS** to register yourself and your family.
