Mr. Jack B. Moore
Director, President and Chief Executive Officer
Cameron
1333 West Loop South
Suite 1700
Houston, TX 77027

Dear Mr. Moore:

To assist the Committee on Natural Resources in carrying out its oversight responsibilities, we request that you promptly provide to the Committee all documents in Cameron's possession relating to:

1. The ability of the blowout preventers to work at the depths and pressures encountered by the *Deepwater Horizon*;
2. The success rates of shear rams activated by primary intervention methods at water depths of 5,000 feet or greater;
3. The success rates of shear rams, annular preventers, pipe rams, and shear rams activated by secondary intervention methods (such as acoustic preventers or ROVs) at these water depths;
4. The effectiveness of kill and choke lines for well control at these depths; and
5. Failures of Cameron blowout preventers in deepwater situations.

Please produce the requested information in a timely fashion and prior to the May 26, 2010 Committee on Natural Resources hearing on "*Outer Continental Shelf Oil and Gas Strategy and Implications of the Deepwater Horizon Rig Explosion.*" In addition, we ask that you advise the Committee by Tuesday May 18, 2010, whether you will comply with this request on a voluntary basis.

Mr. Jack B. Moore

May 11, 2010

If you have questions regarding this request, please contact Deborah Lanzone, Staff Director, Subcommittee on Energy and Mineral Resources, at 202-225-9297.

With warm regards, I am

Sincerely,

NICK J. RAHALL, II

Chairman

Committee on Natural Resources
