**BP Gulf of Mexico Incident**  
**Daily Update – August 19, 2010**  
*Produced by BP's Washington, DC Office*  
*Sources: BP and National Incident Command*

**Topline**

**BP Completed Flushing of MC252 Subsea Equipment and Began Ambient Pressure**

**Testing** - BP completed flushing of drilling mud and hydrocarbons from the MC252 well sealing cap and the original Deepwater Horizon Lower Marine Riser Package (LMRP) and Blow Out Preventer (BOP) and replaced these fluids with seawater. Early this morning, BP began the ambient pressure test procedure that will study the well's BOP stack and sealing cap under ambient conditions. This test is expected to conclude Saturday morning. Once this test is complete, next steps will be to determine if the drillpipe in Macondo BOP can be removed.

Furthermore, BP is complying with government directives concerning the BOP from the Macondo well. We are following Admiral Allen's instruction to bring it to the surface following completion of tests to determine that removing it from the well will be safe. The U.S. Government will then preserve it at a facility in New Orleans specified by the Marine Board of Investigation. Additionally, we are preparing responses to a recent request from the Department of the Interior that BP and other parties provide input into the types of inspection, testing and analysis that government agencies or others might conduct on the BOP.

**Claims Transition to Gulf Coast Claims Facility Underway** - As agreed, Kenneth Feinberg and the Gulf Coast Claims Facility (GCCF) will take over the claims program. Effective August 23, the BP Claims Process for individuals and businesses will transition to GCCF, an independent organization that will review, evaluate and make determinations about claims related to this incident. Going forward, BP will continue to process state and local government claims.

To clarify next steps and ensure an orderly and efficient transfer of files and data, BP has announced the following:

- BP will accept new claims into its system through Wednesday, August 18. From August 19-22, individuals and businesses will be asked to file a claim when the GCCF is operational on August 23.
- BP's Immediate Action Claims Team will continue to operate through Sunday, August 22, for existing claimants. This team can be contacted at (800) 573-8249 and will work with those who have real emergencies with regard to an existing claim.
- BP will continue to process and pay government claims. Government Entities have several options for filing claims or funding requests:

Online: [www.bp.com.governmentclaims](http://www.bp.com.governmentclaims)  
By email: [governmentclaims@worleyco.com](mailto:governmentclaims@worleyco.com)  
By mail: Government Entity Claims and Funding Requests  
1905 W. Thomas Street  
Suite D-358  
Hammond, LA 70401

By phone: 1-877-710-4064  
By fax: 1-800-810-5650

- BP will continue to take phone calls regarding fraud at (877) 359-6281.

The GCCF will be announcing new contact and claims information this week and will do extensive advertising starting on the 23rd. BP also will ensure that those contacting its existing claims phone lines or accessing its web site claims address ([www.bp.com/claims](http://www.bp.com/claims)) are referred to the GCCF. In addition, our community and claims offices will have transition information in several languages to distribute in the local communities. Government entities in the Gulf States are also receiving updated information about the Government Entity Claims Process. Our field team will continue to work to increase information about the government claims process

## State Summaries – Shoreline Operations

### LOUISIANA

---

**OFFSHORE:** Currently only sheening found, not suspected to be MC 252 oil.

**SHORELINE:** Currently Oiled: Heavy to Moderate: 111.5 miles; Light to Trace: 248.1 miles; Total: 359.6 miles.

**INSHORE:** Currently only light oiling found.

**WILDLIFE:** 249 wildlife specialists utilized 4 flights and 71 boats to search for and recover impacted wildlife.

**AIR OPERATIONS:** 25 flights

**BOOM:** Deployed 0 ft of hard boom, recovered 9,900 ft of hard boom; a net recovery of 9,900 ft of hard boom in the last 24 hrs. Retrieved boom is stranded, damaged, or a hazard to navigation.

### MISSISSIPPI

---

**SHORELINE:** No new oiling reported. Crews continued cleaning on Pascagoula Beach, Point Aux Chene, Cat, Horn, and Petit Bois Islands. Night operations conducted in Hancock County.

**NEARSHORE:** Vessels of Opportunity and Inland Water Strike Teams continued assisting with boom recovery.

**BOOM:** Total deployed this period is 0 ft. Recovered 400 ft in last 24 hrs. Net recovery in last 24hrs is 400 ft. Crews continued boom recovery throughout area of responsibility.

### ALABAMA

---

**SHORELINE:** No new oil impacts reported. Crews continued beach cleaning in Gulf Shores, Ft. Morgan, and Orange Beach. Ten beach cleaning machines continued night operations in Baldwin County.

**NEARSHORE:** Vessels of Opportunity Inland Water Strike Teams continued boom removal in Baldwin and Mobile Counties.

**BOOM:** Total deployed for this period is 0 ft. 41,600 ft recovered in last 24 hrs. Net recovery in last 24hrs is 41,600 ft. Crews continued phased boom removal in Baldwin and Mobile County.

### FLORIDA

---

**SHORELINE:** No new oiling reported in the state of Florida. Re - oiling in the form of tarballs continued in Escambia, Santa Rosa, Okaloosa and Walton Counties. Crews continued manual and mechanical operations throughout area of operation. Night operations conducted in Escambia, Santa Rosa, and Okaloosa Counties where weather permits.

**NEARSHORE:** Vessels of Opportunity and Inland Water Strike Teams conducted operations in Escambia and Santa Rosa Counties.

**BOOM:** Total deployed this period is 0 ft. 8,900 ft recovered in last 24 hrs. Net recovery in last 24 hrs is 8,900 ft. Crews conducted boom recovery in Escambia and Santa Rosa Counties. Final boom recovery was completed throughout Florida within this operational period. CCIR submitted for this significant accomplishment.

## TEXAS

**SHORELINE:** No Shoreline Assessment and Cleanup currently scheduled.

**INSHORE:** Total recovered to date 118 cubic yards of oily solids.

**NEARSHORE:** Nothing significant to report.

**OFFSHORE:** Nothing significant to report.

**WILDLIFE:** Total wildlife to date: 1 injured sea turtle, 1 diseased bird (live), 2 injured birds (live), 1 bird/3 turtles found deceased - no visible oil on any wildlife.

**BOOM:** None utilized at this time.
