BP Gulf of Mexico Incident
Daily Update – August 24, 2010
Produced by BP's Washington, DC Office
Sources: BP and National Incident Command

Topline

Removal of BOP and Capping Stack – The ambient pressure test conducted over the weekend was successful in determining that the BOP and Capping Stack could be removed from the Macondo wellhead without risk of hydrocarbon leakage. The vessel *Enterprise* is currently in process of removing the broken drill pipe that is in the failed blowout preventer. The Capping Stack, which was placed on top of the blowout preventer in July to seal the well, will be removed first. After the broken drill pipe and capping stack have been removed, the *Q4000*, another vessel onsite, will remove the failed Macondo blowout preventer.

Once all the equipment has been cleared away from the Macondo wellhead, the *Development Driller II*, which will place a new BOP onto the well. This BOP had been in place on the second relief well during drilling operations there. That second relief well is currently cemented in and has a storm packer in place.

BP is complying with government directives concerning all recovery of equipment from the Macondo well. We are following Admiral Allen's instruction to bring equipment it to the surface. The U.S. Government will then preserve it at a facility in New Orleans specified by the Marine Board of Investigation. Additionally, we are preparing responses to a recent request from the Department of the Interior that BP and other parties provide input into the types of inspection, testing and analysis that government agencies or others might conduct on the BOP.

Relief Wells – The *Development Driller III* remains on standby and the first relief well is approximately 50 feet from the intercept point with the Macondo wellbore. Once the new BOP is on the Macondo wellhead, the *DDIII* will proceed with drilling and ranging operations in the first relief well. The new BOP on the Macondo wellhead will provide a more robust system to contain any pressure put into the Macondo well during intercept and a bottom kill operation.

Claims Transition to Gulf Coast Claims Facility Underway – On Monday, BP transitioned its individual and business claims program to the Gulf Coast Claims Facility (GCCF). BP's claims team will continue to handle government claims and funding requests. The contact information for government claims with BP is:

- Online at www.bp.com/governmentclaim;
- Email at governmentclaims@worleyco.com;
- Mail to: Government Entity Claims and Funding Requests
1905 W. Thomas Street
Suite D-358
Hammond, LA 70401;
- Phone 1-877-710-4064; or
- Fax 1-800-810-5650.

The GCCF will administer all new claims, and all claims that were pending as of August 23. For detailed information on procedures, contact information and office locations, please visit the GCCF website at: <http://www.gulfcoastclaimsfacility.com/>.

State Summaries – Shoreline Operations

LOUISIANA

SHORELINE: Nothing new to report.

BOOM: Recovered 37,500 ft of hard boom yesterday and deployed 5,800 feet. 1,883,088 feet of boom remains deployed.

MISSISSIPPI

SHORELINE: No new oiling reported. Crews continued beach cleaning.

BOOM: Recovered 20,700 ft of boom yesterday. 67,750 feet of boom remains deployed.

ALABAMA

SHORELINE: No new oiling reported. Crews continued beach cleaning.

BOOM: 72,500 ft of boom recovered yesterday. 23,475 feet of boom remains deployed.

FLORIDA

SHORELINE: No new oiling reported. Crews continued beach cleaning.

BOOM: Final boom recovery has been completed throughout Florida.
