Response Personnel	-	28,430

Topline

BP's Managing Director Bob Dudley Speaks to Southern Governors Association – On Sunday, incoming CEO Bob Dudley spoke to the Southern Governors Association Annual Meeting in Birmingham, Alabama. He reiterated BP's long-term commitment to make things right in the Gulf Coast Region. The full text of his speech can be found at: http://www.bp.com/liveassets/bp_internet/globalbp/STAGING/global_assets/downloads/P/BP_is_in_the_Gulf_to_Stay_Bob_Dudley_29_Aug_2010.pdf.

Removal of BOP and Capping Stack – Operations at the site continue to be suspended due to weather.

The Unified Command has approved plans to proceed with removal of the Capping Stack and BOP as soon as the weather abates. Removal of the Capping Stack will commence first – possibly as soon as Thursday - and then the BOP will be removed along with any broken drill pipe. Once all the equipment has been cleared away from the Macondo wellhead, the *Development Driller II* will place a new BOP onto the well and we will proceed with the relief well.

BP is complying with government directives concerning all recovery of equipment from the Macondo well. We are following Admiral Allen's instruction to bring equipment it to the surface. The U.S. Government will then preserve it at a facility in New Orleans specified by the Marine Board of Investigation. Additionally, we are responding to a request from the Department of the Interior that BP and other parties provide input into the types of inspection, testing and analysis that government agencies or others might conduct on the BOP.

Relief Wells – The *Development Driller III* remains on standby and the first relief well is approximately 50 feet from the intercept point with the Macondo wellbore. Once the new BOP is on the Macondo wellhead, the *DDIII* will proceed with drilling and ranging operations in the first relief well. The new BOP on the Macondo wellhead will provide a more robust system to contain any pressure put into the Macondo well during intercept and a bottom kill operation.

Claims Transition – BP has transitioned its individual and business claims program to the Gulf Coast Claims Facility (GCCF). Their comprehensive website is located at: www.gulfcoastclaimsfacility.com.

- **Government Claims** – BP's claims team will continue to handle *government* claims and funding requests. *James Witt and Associates* has been retained to assist in outreach to state and local governments. *Witt* representatives will provide advice to government entities about needed documentation, will answer questions, and provide feedback from claimants to BP regarding the claims process.

The contact information for filing government claims with BP is:

- Online at www.bp.com/governmentclaims
- Email at governmentclaims@worleyco.com

- Mail to: Government Entity Claims and Funding Requests
1905 W. Thomas Street
Suite D-358
Hammond, LA 70401
- Phone 1-877-710-4064
- Fax 1-800-810-5650

New Water Quality Monitoring Capability – BP has deployed new technology to enable nearly constant water monitoring in the Gulf of Mexico. The technology consists of two satellite-controlled, unmanned vehicles known as Wave Gliders, and developed by Liquid Robotics in Silicon Valley, California. They get their propulsion power from wave action and use solar power for their electronics. They will be deployed for a months-long, ongoing research program in the Gulf of Mexico. The unique technology provides persistent sensors, for the long term, to monitor key environmental variables, including:

- water quality – detection of any emulsified, dissolved and dispersed oil in water; phytoplankton (chlorophyll); colored, dissolved oxygen matter (CDOM) and other scientifically useful variables
- marine mammal vocalizations
- weather and water temperature data.

State Summaries – Shoreline Operations

LOUISIANA

SHORELINE: Boom recovery and beach cleanups continue. Vessel decontamination ongoing at multiple sites.

BOOM: 1,732,878 feet of boom remains deployed. A net of 20,425 feet recovered yesterday.

MISSISSIPPI

SHORELINE: Beach cleanups continued. Vessel decontamination ongoing at multiple sites.

BOOM: 22,650 feet of boom remains deployed. 5,300 feet recovered yesterday.

ALABAMA

SHORELINE: Beach cleanups to continue. Vessel decontamination ongoing.

BOOM: Final boom recovery has been completed in Alabama.

FLORIDA

SHORELINE: Beach cleanups to continue.

BOOM: Final boom recovery has been completed in Florida.
