Response Personnel	–	25,368

## Topline

### BP Incident Reports –

- BP has announced that it will publish the Deepwater Horizon accident investigation report prepared by BP's internal investigation team on the causes of the Gulf of Mexico tragedy. The report will be available on BP's website at approximately 7:00am EDT on Wednesday, September 8.
- On Friday, BP delivered a report to the U.S. Bureau of Ocean Energy Management, Regulation and Enforcement titled, "Deepwater Horizon Containment and Response: Capabilities and Lessons Learned." One of the ways BP is seeking to make things right in the aftermath of the tragic Deepwater Horizon incident is to share – with the industry, governments and other stakeholders – the lessons that have been learned and the capabilities developed during the response effort. To read a full copy of the report, visit BP's website at:  
<http://www.bp.com/sectiongenericarticle.do?categoryId=9034880&contentId=7064840>.

**BP Commits \$10 million to Public Health Research** – Today, BP announced it will provide \$10 million to the National Institutes of Health (NIH) under its Gulf of Mexico Research Initiative to support the study of potential public health issues relating to the spill. The funds will support the research priorities identified at the Institute of Medicine workshop commissioned by Secretary of Health and Human Services Kathleen Sibelius. For more information, visit BP's website at: <http://www.bp.com/genericarticle.do?categoryId=2012968&contentId=7064912>.

**Removal of BOP and Capping Stack** – The Capping Stack and failed BOP have been successfully removed from the Macondo wellhead and the new BOP was successfully latched onto the Macondo wellhead at approximately 8:30pm CDT on Friday, September 3. The failed BOP was brought to the surface at approximately 10:20pm CDT on Saturday, September 4. The *Development Driller II* is currently running the riser from the surface down to the new BOP.

BP is complying with government directives concerning all recovery of equipment from the Macondo well. We are following Admiral Allen's instructions on bringing equipment to the surface. The U.S. Government will then preserve the equipment at a facility in New Orleans specified by the Marine Board of Investigation. Additionally, we are responding to a request from the Department of the Interior that BP and other parties provide input into the types of inspection, testing and analysis that government agencies or others might conduct on the BOP.

**Relief Wells** – The *Development Driller III* remains on standby and the first relief well is approximately 50 feet from the intercept point with the Macondo wellbore. Once the new BOP has been connected and prepared for operation, the *DDIII* will proceed with drilling and ranging in the first relief well. The new BOP on the Macondo wellhead will provide a more robust system to contain any pressure put into the Macondo well during intercept and a bottom kill operation.

**Claims Transition** – BP has transitioned its individual and business claims program to the Gulf

Coast Claims Facility (GCCF). Their comprehensive website is located at:  
[www.gulfcoastclaimsfacility.com](http://www.gulfcoastclaimsfacility.com).

**Government Claims** – BP’s claims team will continue to handle *government* claims and funding requests. *James Witt and Associates* has been retained to assist in outreach to state and local governments. *Witt* representatives will provide advice to government entities about needed documentation, will answer questions, and provide feedback from claimants to BP regarding the claims process.

The contact information for filing government claims with BP is:

- Online at [www.bp.com/governmentclaims](http://www.bp.com/governmentclaims)
- Email at [governmentclaims@worleyco.com](mailto:governmentclaims@worleyco.com)
- Mail to: Government Entity Claims and Funding Requests  
1905 W. Thomas Street  
Suite D-358  
Hammond, LA 70401
- Phone 1-877-710-4064
- Fax 1-800-810-5650

<b>State Summaries – Shoreline Operations</b>
---

## LOUISIANA

---

**SHORELINE:** Boom recovery and beach cleanups continue. Vessel decontamination ongoing at multiple sites.

**BOOM:** 1,407,278 feet of boom remains deployed. A net of 225,315 feet were recovered since September 3.

## MISSISSIPPI

---

**SHORELINE:** Beach cleanups continued. Vessel decontamination ongoing at multiple sites.

**BOOM:** Final boom recovery has been completed in Mississippi.

## ALABAMA

---

**SHORELINE:** Beach cleanups to continue. Vessel decontamination ongoing.

**BOOM:** Final boom recovery has been completed in Alabama.

## FLORIDA

---

**SHORELINE:** Beach cleanups to continue.

**BOOM:** Final boom recovery has been completed in Florida.
