BP Incident Reports –

- On Wednesday, BP published its [Deepwater Horizon accident investigation report](http://www.bp.com/sectiongenericarticle.do?categoryId=9034902&contentId=7064891). The report is based on a four-month investigation led by Mark Bly, BP's Head of Safety and Operations and conducted independently by a team of over 50 technical and other specialists drawn from inside BP and externally. The report reviews the sequence of failures involving a number of different parties that led to the explosion and fire on the Deepwater Horizon and the resulting oil spill in the Gulf of Mexico. To view a summary, the complete report, and all supporting material, visit BP's website at: <http://www.bp.com/sectiongenericarticle.do?categoryId=9034902&contentId=7064891>.
- On Friday, BP delivered a report to the U.S. Bureau of Ocean Energy Management, Regulation and Enforcement titled, "Deepwater Horizon Containment and Response: Capabilities and Lessons Learned." One of the ways BP is seeking to make things right in the aftermath of the tragic Deepwater Horizon incident is to share – with the industry, governments and other stakeholders – the lessons that have been learned and the capabilities developed during the response effort. To read a full copy of the report, visit BP's website at: <http://www.bp.com/sectiongenericarticle.do?categoryId=9034880&contentId=7064840>.

Removal of BOP and Capping Stack – The Capping Stack and failed BOP have been successfully removed from the Macondo wellhead and the new BOP was successfully latched onto the Macondo wellhead at approximately 8:30pm CDT on Friday, September 3. The failed BOP was brought to the surface at approximately 10:20pm CDT on Saturday, September 4. The *Development Driller II* has completed running the riser from the surface down to the new BOP. Seawater in the riser has been displaced with mud and testing on the BOP is complete.

BP is complying with government directives concerning all recovery of equipment from the Macondo well. We are following Admiral Allen's instructions on bringing equipment to the surface. The U.S. Government will then preserve the equipment at a facility in New Orleans specified by the Marine Board of Investigation. Additionally, we are responding to a request from the Department of the Interior that BP and other parties provide input into the types of inspection, testing and analysis that government agencies or others might conduct on the BOP.

Relief Wells – The *Development Driller III* remains on standby and the first relief well is approximately 50 feet from the intercept point with the Macondo wellbore. Once the Macondo well and new BOP are fully prepared, the *DDIII* will proceed with drilling and ranging in the first relief well. The new BOP on the Macondo wellhead will provide a more robust system to contain any pressure put into the Macondo well during intercept and a bottom kill operation.

BP Commits \$10 million to Public Health Research – On Tuesday, BP announced it will provide \$10 million to the National Institutes of Health (NIH) under its Gulf of Mexico Research Initiative to support the study of potential public health issues relating to the spill. The funds will support the research priorities identified at the Institute of Medicine workshop commissioned by

Secretary of Health and Human Services Kathleen Sibelius. For more information, visit BP's website at: <http://www.bp.com/genericarticle.do?categoryId=2012968&contentId=7064912>.

Claims Transition – BP has transitioned its individual and business claims program to the Gulf Coast Claims Facility (GCCF). Their comprehensive website is located at: www.gulfcoastclaimsfacility.com.

Government Claims – BP's claims team will continue to handle *government* claims and funding requests. *James Witt and Associates* has been retained to assist in outreach to state and local governments. *Witt* representatives will provide advice to government entities about needed documentation, will answer questions, and provide feedback from claimants to BP regarding the claims process.

The contact information for filing government claims with BP is:

- Online at www.bp.com/governmentclaims
- Email at governmentclaims@worleyco.com
- Mail to: Government Entity Claims and Funding Requests
1905 W. Thomas Street
Suite D-358

- Fax 1-800-810-5650

State Summaries – Shoreline Operations

LOUISIANA

SHORELINE: Boom recovery and beach cleanups continue. Vessel decontamination continues at multiple sites. Offshore skimmers remain on standby. Nothing significant to report.
BOOM: 1,063,948 feet of boom remains deployed. A net of 80,340 feet were recovered in the past 24 hours.

MISSISSIPPI

SHORELINE: Beach cleanups continued in Hancock, Harrison and Jackson counties. Vessel decontamination ongoing at multiple sites. Vessels of opportunity conducting submerged oil assessments.
BOOM: Final boom recovery has been completed in Mississippi.

ALABAMA

SHORELINE: Beach cleanups to continue in Gulf Shores and West Dauphin Island. Vessel decontamination ongoing.
BOOM: Final boom recovery has been completed in Alabama.

FLORIDA

SHORELINE: Beach cleanups to continue in Escambia, Santa Rosa, Okaloosa and Walton counties.
BOOM: Final boom recovery has been completed in Florida.

Information Resources	
Claims <ul style="list-style-type: none"> • Government claims can be filed at: www.bp.com/governmentclaim • Individual and business claims should visit the Gulf Coast Claims Facility website at: http://www.gulfcoastclaimsfacility.com/ 	(877) 710 4064
Environment / Community Hotline – to report oil on the beach or shoreline or other environment or community impacts and access the Rapid Response Team	(866) 448-5816
Wildlife – to report and access care for impacted, i.e. oiled wildlife	(866) 557-1401
Volunteers – to request volunteer information	(866) 448-5816
BP Environmental Monitoring Program – several sampling and monitoring programs have been implemented. The data is posted on BP’s website at: http://www.bp.com/sectiongenericarticle.do?categoryId=9033821&contentId=7062498#	
Interactive Mapping Websites – Interactive Mapping Tool meant to provide a one-stop shop for detailed near-real-time information about the response to the Deepwater Horizon BP oil spill. <ul style="list-style-type: none"> • The BP mapping tool is located at: http://www.gulfofmexicoresponsemap.com. • The U.S. Government mapping tool that is located at: www.GeoPlatform.gov/gulfresponse.
