Topline

Relief Wells – On Monday at 1:40 pm CDT, the *Development Driller III* re-started drilling in the first relief well. The *DDIII* is currently drilling towards the intercept point with the Macondo wellbore, which is currently less than 30 vertical feet away. Once the intercept is reached, BP can proceed with the bottom kill operation – the last step in completely plugging the well. The new BOP and lock-down sleeve on the Macondo wellhead are installed and have been tested. These devices were approved by the Incident Commander and installed to provide a robust system to contain any pressure put into the Macondo well during intercept and a bottom kill operation.

Removal of BOP and Capping Stack – The Capping Stack and failed BOP were successfully removed from the Macondo wellhead and shipped to a NASA facility at Michoud, LA, where investigation teams will follow agreed upon disassembly protocols. The Capping Stack is onboard the vessel *Enterprise* and awaiting instructions from the Incident Commander about protocols for disassembly.

BP is complying with government directives concerning all recovery of equipment from the Macondo well. We are following Admiral Allen's instructions on bringing equipment to the surface. The U.S. Government will then preserve the equipment at a facility in New Orleans specified by the Marine Board of Investigation. Additionally, we are responding to a request from the Department of the Interior that BP and other parties provide input into the types of inspection, testing and analysis that government agencies or others might conduct on the BOP.

Claims Transition – BP transitioned the individual and business claims program to the Gulf Coast Claims Facility (GCCF) on August 23. The GCCF comprehensive website is located at: www.gulfcoastclaimsfacility.com. Today, the GCCF also made current state-by-state claims statistics available at: <http://www.gulfcoastclaimsfacility.com/reports>.

Government Claims – BP's claims team will continue to handle *government* claims and funding requests. The contact information for filing government claims with BP is:

- Online at www.bp.com/governmentclaims
- Email at governmentclaims@worleyco.com
- Mail to: Government Entity Claims and Funding Requests

- Fax 1-800-810-5650

State Summaries – Shoreline Operations

LOUISIANA

SHORELINE: Boom recovery and beach cleanups continue. Vessel decontamination continues at multiple sites. Offshore skimmers remain on standby. Nothing significant to report.
BOOM: A net of 31,775 feet of containment boom was recovered in the past 24 hours. 714,378 feet of boom remains deployed.

MISSISSIPPI

SHORELINE: Beach cleanups continued in Hancock, Harrison and Jackson counties. Vessel decontamination ongoing at multiple sites. Vessels of opportunity conducting submerged oil assessments.
BOOM: Final boom recovery has been completed in Mississippi.

ALABAMA

SHORELINE: Beach cleanups to continue in Gulf Shores and West Dauphin Island. Vessel decontamination ongoing.
BOOM: Final boom recovery has been completed in Alabama.

FLORIDA

SHORELINE: Beach cleanups to continue in Escambia, Santa Rosa, Okaloosa and Walton counties.
BOOM: Final boom recovery has been completed in Florida.
