How Does Missouri Compare To Other States?

Workers across the country have been hard hit by the Great Recession. This chart allows you to compare Missouri to other states using two metrics.

The current unemployment rate (measured along the horizontal axis) serves as a gauge of current labor market conditions faced by residents, while the proportion of jobs lost within Missouri over the course of the recession (shown along the vertical axis) measures the toll the recession has taken on the job supply in Missouri.

States falling in the upper right quadrant have lost a disproportionate share of jobs, relative to the total United States, and have unemployment rates higher than the national unemployment rate. States falling in the lower left quadrant have unemployment rates lower than the national average and smaller job losses over the recession.
