**JOINT EXPLANATORY STATEMENT**  
] DIVISION A - DEPARTMENT OF DEFENSE [

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 3222), making appropriations for the Department of Defense for the fiscal year ending September 30, 2008, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

The conference agreement on the Department of Defense Appropriations Act, 2008, incorporates some of the provisions of both the House and Senate versions of the bill. The language and allocations set forth in House Report 110-279 and Senate Report 110-155 should be complied with unless specifically addressed to the contrary in the accompanying bill and statement of the managers.

The Senate amendment deleted the entire House bill after the enacting clause and inserted new language. The conference agreement includes revised language.

---

## DEFINITION OF PROGRAM, PROJECT, AND ACTIVITY

The conferees agree that for the purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99-177) as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100-119) and by the Budget Enforcement Act of 1990 (Public Law 101-508), the term program, project, and activity for appropriations contained in this Act shall be defined as the most specific level of budget items identified in the Department of Defense Appropriations Act, 2008, the accompanying House and Senate Committee reports, the conference report and accompanying joint explanatory statement of the managers of the committee of conference, the related classified annexes and reports, and the P-1 and R-1 budget justification documents as subsequently modified by Congressional action. The following exception to the above definition shall apply: for the Military Personnel and the Operation and Maintenance accounts, for which the term 'program, project, and activity' is defined as the appropriations accounts contained in the Department of Defense Appropriations Act.

At the time the President submits his budget for fiscal year 2009, the conferees direct the Department of Defense to transmit to the congressional defense committees budget justification documents to be known as the 'M-1'

and 'O-1' which shall identify, at the budget activity, activity group, and subactivity group level, the amounts requested by the President to be appropriated to the Department of Defense for military personnel and operation and maintenance in any budget request, or amended budget request, for fiscal year 2009.

#### FISCAL MANAGEMENT

The conferees are concerned that there has been an erosion of fiscal discipline within the Department of Defense and recommend that the Secretary of Defense re-establish a thorough and deliberative process for assessing and prioritizing resource requirements. With regard to budget execution, the conferees direct the Department to cease the reallocation of funds through a re-baselining procedure, and further direct the Department to comply fully with all reprogramming procedures. The conferees have retained and modified a general provision, as proposed by the House, which requires the Department to submit DD 1414 documents within 60 days after the enactment of this Act. In addition, the provision prohibits the Department from executing any reprogramming or transfer of funds for any purpose other than originally appropriated until the aforementioned report is submitted to the Committees on Appropriations of the Senate and the House of Representatives.

Beginning in fiscal year 2008, the conferees direct incremental changes to reprogramming guidelines in the operation and maintenance appropriation. The conferees believe that a revision is necessary given the unique nature of activities funded within these appropriations, continuing concerns about force readiness, and recent budget execution within these accounts. If there is no improvement in the execution of operation and maintenance funding as budgeted, further change to reprogramming thresholds and guidelines will be considered next year. The specific revisions to current reprogramming procedures are addressed later in this report in Title II, Operation and Maintenance.

#### CONTRACTED SERVICES AND ACQUISITION MANAGEMENT

The Department lacks accountability and management of its contracted services. Over the past several years, DoD has increasingly relied on private sector contractors, but it has not provided sufficient management oversight of its contractors. To improve contract management oversight, the conferees direct the Department to provide more robust staffing of contractor management and oversight personnel, for which the following additional funding has been provided:

Defense Contract Audit Agency .....	+\$10,000,000
Defense Contract Management Agency.....	+14,000,000
Defense Inspector General.....	+24,000,000

In addition, the conferees believe that the Department must improve its management of contract services by instituting clear accountability mechanisms; instituting unambiguous and short chains of command to the most-senior decision makers; and improving the tracking and reporting of contract service costs and management of contract service performance. The conferees encourage the Department of Defense to increase its use of GSA Acquisition Services for its contracting in appropriate instances. In order to track improvement in this area, the conferees direct the Director of Defense Procurement and Acquisition Policy for the Under Secretary of Acquisition, Technology and Logistics to submit biannual reports to the congressional defense committees regarding: the Department's efforts to increase its use of GSA for contracting and procurement activities; and, how the Department and GSA can further collaborate to decrease defense contracting costs and reliance on contract personnel for activities that are inherently governmental in nature. The conference agreement does not provide for the transfer of any GSA employees to the Department of Defense.

## MINIMUM STANDARDS FOR CONTRACTED SECURITY SERVICE PERSONNEL

The conferees direct the Secretary of Defense to develop, no later than <sup>enactment</sup> 90 days after the passage of this Act, uniform minimum personnel standards for all contract personnel operating under contracts, subcontracts or task orders performing private security functions. The standards, at a minimum, must include determinations about contractors using personnel with criminal histories; must determine the eligibility of all private contract personnel to possess and carry firearms; and determine what assessments of medical and mental fitness of contracted security personnel must be undertaken. The Secretary of Defense shall develop a mechanism for contract accountability that specifies consequences for noncompliance with the personnel standards, including fines, denial of contractual obligations or contract rescission.

Finally, the Secretary is directed to establish a clear set of rules of engagement for all contracted security personnel operating in the Iraq and Afghanistan theaters of operations. The Secretary shall submit the prescribed standards to the congressional defense committees once the 90-day period referenced above is completed.

## RESERVE COMPONENT BUDGET STRUCTURE

The conferees recognize the advantages of a consolidated budget activity (BA) in providing additional spending flexibility to the reserve components, particularly in light of the evolving mobilization and training needs resulting from operations in Iraq and Afghanistan. However, while notionally supportive of the concept, the conferees note with concern that many reserve components continue to realign significant amounts of funding within the single BA structure and, for this reason, have refrained from making the consolidated structure permanent. Accordingly, the conferees direct each of the reserve components to continue providing quarterly reports to the congressional defense committees showing transfers between line items within the military personnel appropriations. The reports will provide separate explanations for all transfers in and out of each appropriation line item that equal, exceed, or cumulate to \$5,000,000. Reports will provide a beginning and ending total by line item and will be due 30 days following the end of each quarter. Reserve component fiscal year 2009 budget requests for military personnel may be submitted using the consolidated budget activity structure.

---

Further, the lack of transparency over total compensation costs for the reserve components remains a concern. The conferees reiterate their desire

---

for the Department of Defense to develop an effective and substantive reporting mechanism to disseminate this information to the appropriate congressional committees.

#### PAID INACTIVE DUTY TRAINING (IDT) TRAVEL

The conferees support the selective use of paid Inactive Duty Training (IDT) travel to help mitigate critical skills shortages and to assist those members of the Selected Reserve who have been adversely impacted by the 2005 Base Realignment and Closure recommendations. Accordingly, the conferees encourage the Department of Defense to include in its fiscal year 2009 budget request funding for paid IDT travel as deemed necessary to meet personnel requirements.

#### TROOPS-TO-NURSES TEACHERS (TNT) PROGRAM

The conferees remain concerned over recruitment and retention levels for nurses in the military and believe that the national nursing shortage exacerbates the situation. Given our current wartime environment, additional efforts must be taken to attract and retain qualified personnel.

---

The Military Medical Commands cannot afford to leave nursing billets vacant due to difficulties in recruiting and retention. In July 2007, the

---

Department submitted the Report to Congress on the Impact of the Nursing Shortage on the Military Healthcare Delivery System. This report details incentives and recommendations to improve recruitment and retention of experienced nurses, including the Troops-to-Nurse Teachers (TNT) Program. The conferees direct the military services to utilize available resources for these programs in an attempt to reverse this trend in Military Treatment Facilities and provide a report to the congressional defense committees by February 29, 2008, on these efforts.

## REVIEW OF AIR FORCE END STRENGTH

The conferees direct the Secretary of the Air Force to conduct a thorough review of its total force end strength requirements and provide a report to the congressional defense committees in conjunction with the President's fiscal year 2009 budget request. The report should explain the capabilities that the current force structure provides, the nature of any shortfalls for new and emerging missions, and an explanation on how the Air Force could balance the budgetary demands necessary to implement any corrective policy action within its own budget.

The conferees agree to impose new reprogramming guidelines within the operation and maintenance appropriation to ensure better accountability, (S) as recommended by the House. The conferees believe that such revisions are necessary given the unique nature of activities funded within these appropriations, continuing concerns about force readiness, and recent budget execution within these accounts. Specifically, the conferees direct:

(1) with respect to service operation and maintenance accounts, that the Department shall submit prior approval reprogramming requests to the congressional defense committees for proposed transfers of funds in excess of \$15,000,000, to or from the levels specified for budget activities.

In addition, the Department shall follow prior approval reprogramming procedures for transfers in excess of \$15,000,000 out of the following budget subactivities:

*Operation and Maintenance, Army*

Land Forces Depot Maintenance

*Operation and Maintenance, Navy*

Navy Depot Maintenance

Aircraft

Navy Ship Depot Maintenance

*Operation and Maintenance, Marine Corps*

Marine Corps Depot Maintenance

*Operation and Maintenance, Air Force*

Air Operations Depot Maintenance

Mobility Operations Depot Maintenance

Basic Skills/Training Depot Maintenance

Logistics Operations Depot Maintenance

Further, the Department shall provide written notifications of cumulative transfers in excess of \$15,000,000 out of the following budget subactivities:

*Operation and Maintenance, Army*

Maneuver units

---

Modular support brigades

Land forces operations support

Force readiness operations support

Base operations support

*Operation and Maintenance, Air Force*

Primary combat forces

Combat enhancement forces

Combat communications

(2) with respect to Operation and Maintenance, Defense-Wide (O&M,DW), that proposed transfers of funds to or from the levels specified for defense agencies in excess of \$15,000,000 shall be subject to prior approval reprogramming procedures. In addition, the Department shall provide written notification of cumulative transfers in excess of \$15,000,000 or 20 percent, whichever is less, out of the following line items identified in the Operation and Maintenance, Defense-Wide project level table contained in the conference report:

*Defense Legal Service Agency*

*Office of the Secretary of Defense*

Acquisition, Technology, and Logistics programs

Personnel and Readiness

Comptroller and Chief Financial Officer

Under Secretary of Defense (Intelligence)

Under Secretary of Defense (Policy)

Director, Program Analysis and Evaluation

of ) \_\_\_\_\_  
Assistant Secretary for Defense (Networks and Information  
Integration)  
• ) \_\_\_\_\_

A congressional interest item contained in Operation and Maintenance, Defense-Wide is defined only as a specific increase provided by the conferees.

The conferees expect that these new guidelines will provide more effective oversight by the congressional defense committees and lead to better financial management within the Department.

## JUSTIFICATION OF FUNDING FOR NAMED OPERATIONS

The conferees retained a general provision as proposed by the Senate requiring the President's budget request include separate budget justification documents for the costs of the Armed Forces participating in contingency operations. The conferees find that justification material provided in previous years has varied greatly and has not provided Congress with the level of detail required by this provision. The conferees direct the Department of Defense to abide by the requirements of the general provision and include this level of detail in one concise justification book for all operations, other than Operations Enduring Freedom and Iraqi Freedom. The conferees further direct that the justification book continue to provide data on operations identified for fiscal year 2008, but also identify existing or on-going named operations outside the Continental United States or in support of any global operation (including those led by other partner nations) where the cost of such named operation exceeds \$100,000,000 or is staffed by more than 1,000 U.S. military personnel.

## IMPACT OF REBASING

The conferees provide \$615,700,000 to support the Army's efforts to address the impact of rebasing activities, particularly as large numbers of service members are re-stationed from overseas bases to bases in the United States. The Army is to allocate \$615,700,000 on a prioritized project-by-project basis, as best determined by mission requirements from the projects identified in House Report 110-279. The Army is required to report the funding allocation to the House and Senate Committees on Appropriations prior to obligating funds.

### WARRIOR TRANSITION UNIT SUPPORT FOR THE 4/25TH AIRBORNE COMBAT BRIGADE TEAM

The conferees agree to provide \$3,000,000 for additional case workers, occupational therapists, and other health care specialists, as well as additional representatives from the Traumatic Service members Group Life Insurance (TSGLI) Program and other programs to assist with compensation and other redeployment administrative requirements. The funding is intended to address concerns raised by returning and injured service members of the 4/25th Brigade Combat Team (Airborne) and their families.

## TRANSFER OF FUNDS FROM PROCUREMENT, MARINE CORPS

The Senate recommendation included a transfer of \$147,388,000 into Operation and Maintenance, Marine Corps from Procurement, Marine Corps for trailers included in its Grow the Force initiative. However, the Marine Corps has since determined that half of the trailer requirement should be funded in Procurement, Marine Corps and half in Operation and Maintenance, Marine Corps. Further, of the amount remaining in Operation and Maintenance, Marine Corps, \$11,800,000 is executable in fiscal year 2008. Therefore, the conference agreement includes \$79,900,000, of which \$11,800,000 fully funds the requirement for trailers in the Base Operations subactivity group and transfers the remaining \$68,100,000 to the Facilities Sustainment, Restoration and Modernization subactivity group to help address unfunded needs.

## EXCESS ON-ORDER INVENTORY

The House recommended that the Air Force reduce excess on-order inventory by instituting measures to ensure Air Force inventory management specialists are following excess on-order termination procedures. The conferees commend the Air Force for taking immediate action to comply with this direction.

## OVERSTATEMENT OF FACILITIES SUSTAINMENT, RESTORATION AND MODERNIZATION REQUIREMENTS

The conferees recommend that the Deputy Under Secretary of Defense for Installations and Environment review the Air Force's computation of Facilities Sustainment, Restoration and Modernization (FSRM) requirements and ensure that the Air Force's FSRM request for fiscal year 2009 *properly* reflects plant replacement value and inflation.

The conference agreement provides that not less than \$582,643,000 for the Combatant Commander's Exercise Engagement and Training Transformation program. In addition, the conferees agree to include not less than \$3,600,000 for centers within the Procurement Technical Assistance Cooperative Agreement Program.

In order to ensure sufficient funds are available for the Department to enhance its efforts to improve fiscal management and oversight, the conferees agree to provide not less than \$41,203,000 for the Office of the Undersecretary of Defense, Comptroller and Chief Financial Officer.

The conference agreement deletes a provision proposed by the House relating to rates and charges of the Defense Security Service.

#### OPERATION JUMP START

The conferees recognize National Guard contributions to improve border security as part of Operation Jump Start. The Guard undertook this mission as an interim operation until additional Department of Homeland Security personnel and resources could be deployed to secure the borders. The conferees understand that the National Guard mission will continue until July 2008 at force levels of about 3,000 guardsmen and have provided \$247,000,000 to fund this requirement for the first six months of the fiscal year.

OFFICE OF THE SECRETARY OF DEFENSE

PERSONNEL AND READINESS

COMBATANT COMMANDER'S EXERCISE, ENGAGEMENT AND TRAINING  
TRANSFORMATION (CE2T2)

The conferees adopt the House's proposed consolidation of various joint training programs, including the joint exercise program of the Joint Chiefs of Staff, the services' incremental costs associated with the joint exercise program and the services' joint national training capability. The conference agreement reflects the following adjustments to the budget request:

Budget request .....	\$233,641,000
Recommended transfers:	
Joint exercise program, TJS .....	+245,075,000
Services joint national training capability (O&M) .....	+42,100,000
Services joint exercise program incremental costs .....	+81,827,000
Recommended adjustments:	
Anticipated efficiencies and program savings .....	-20,000,000
TOTAL, CE2T2 .....	582,643,000

The conference agreement does not consolidate the research, development, test and evaluation and procurement activities of the joint national training capability that are funded within the services' budgets. The conferees expect, however, that such funds shall be expended in support of the consolidated Combatant Commander's Exercise, Engagement and

Training Transformation Program and the Joint National Training Capability.

The conferees reiterate that the Department shall not increase administrative overhead costs or civilian or military positions associated with the operation and management of the joint training portfolio. The Department shall provide to the House and Senate Committees on Appropriations, within 60 days of enactment of this Act, an analysis of funds and personnel to be transferred to effect the consolidation.

FAMILY ADVOCACY PROGRAMS

The conferees agree to provide a total of \$399,993,500 for family advocacy programs (FAP) in fiscal year 2008. The conferees believe that the additional funding provided will enhance the activities of FAP and provide for children and families managing the difficult challenges of military service. The conferees are cognizant of and concerned about the growing need for family members to have access to professional counseling to help alleviate the mental stresses associated with deployments. The conferees believe that programs such as FAP directly affect military retention and are essential to the health and welfare of our troops, their families, and the communities in which they live.

Due to the importance of family advocacy programs, the conferees provide additional funding to increase access to family support programs. With multiple deployments, it is important to continually reach out to multifaceted organizations that provide support services. Therefore, not later than 90 days after enactment of this Act, the Secretary of Defense shall submit to the congressional defense committees a report on mechanisms for expanding public-private partnerships with military and family organizations for the purpose of increasing access to family support, especially for the minor dependent children of deployed service members. Prior to submission of the report, the Secretary shall consult with military family advocacy organizations, and include the comments of such organizations within the required report to the congressional defense committees.

This report shall identify the following:

(A) the adjustment needs of minor children of deployed service personnel, including children whose parents or guardians have experienced multiple deployments;

(B) alternative support and recreational activities which have been shown to be effective in improving coping skills in young children of deployed service members;

(C) support networks beyond educational settings that have been effective in addressing the needs of children of deployed service members, to include summer and after-school recreational, sports and cultural activities;

(D) programs which can be accessed without charge to military families;

(E) gaps in services for minor dependent children of deployed personnel; and,

(F) opportunities for expanding public and private partnerships in support of such programs.

Additionally, not later than 90 days after submission of the report described above, the Secretary shall submit a plan to the congressional defense committees to address the needs and gaps in services identified in the report. Such a plan shall also address the comments and recommendations of military family advocacy organizations.

#### NUCLEAR WEAPONS HANDLING PROCEDURES

The conferees direct that not later than 90 days after enactment of this Act, the Secretary of Defense and the Secretary of Energy shall jointly submit a classified report to the congressional defense committees and to the

The Cooperative Threat Reduction (CTR) program has significantly expanded efforts to prevent biological weapons proliferation in Russia and the Former Soviet Union. Pursuant to section 1304 of the National Defense Authorization Act for Fiscal Year 2007, a National Academy of Sciences study was commissioned to review existing biological weapons proliferation prevention efforts and identify additional areas for cooperation. In order to ensure that resources are being allocated in the most effective manner to prevent the proliferation of biological weapons, the conferees direct the

Department to closely review the recommendations of the National Academy of Sciences study and to submit a report to the congressional defense committees not later than February 1, 2008, outlining CTR's biological weapons proliferation prevention efforts. The report shall include a funding plan itemizing CTR's programmed biological threat reduction efforts through the Future Years Defense Program (FYDP) and a discussion of how these efforts correspond with the recommendations of the National Academy of Sciences study.

The conferees direct that \$5,000,000 of the funds appropriated under chemical weapons destruction be made available as initial funding for a chemical weapons incinerator in Libya, pending authorization for such activity. The conferees encourage the committees of jurisdiction to respond to this urgent need in the coming year.

## TITLE III – PROCUREMENT

## SPECIAL INTEREST ITEMS

Items for which additional funds have been provided as shown in the project level tables or in paragraphs using the phrase 'only for' or 'only to' in this report are congressional interest items for the purpose of the Base for Reprogramming (DD 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, specifically addressed in the conference report. These items remain special interest items whether or not they are repeated in a subsequent conference report.

## REPROGRAMMING GUIDANCE FOR ACQUISITION ACCOUNTS

The conferees direct the Department of Defense to continue to follow the reprogramming guidance specified in the report accompanying the House version of the fiscal year 2006 Department of Defense Appropriations bill (H.R. 109-119). Specifically, the dollar threshold for reprogramming funds will remain at \$20,000,000 for procurement, and \$10,000,000 for research, development, test and evaluation. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20% of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative. Therefore, if the combined value of transfers into or out of a

procurement (P-1) or research, development, test and evaluation (R-1) line exceeds the identified threshold, the Department of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this report.

#### REPROGRAMMING REPORTING REQUIREMENTS

The conferees direct the Under Secretary of the Department of Defense, Comptroller, to continue to provide the congressional defense committees quarterly, spreadsheet-based DD1416 reports for service and defense-wide accounts in titles III and IV of this Act as required in the statement of the managers accompanying the conference report on the Department of Defense Appropriations Act, 2006.

#### FUNDING INCREASES

The conferees direct that the funding increases outlined in these tables shall be provided only for the specific purposes indicated in the table.

## TACTICAL UNMANNED AIRCRAFT SYSTEMS

The conferees agree to retain for an additional year a general provision restricting the transfer of tactical Unmanned Aircraft Systems (UAS) authority from the Army, including the Extended Range Multi-Purpose (ERMP) Unmanned Aerial Vehicle. The conferees note that the Deputy Secretary of Defense has directed that a task force be convened to coordinate critical UAS issues and to develop a way ahead in future years that will enhance operations and streamline acquisition of UAS. The conferees do not believe this general provision should be interpreted as prohibiting the task force from proceeding.

## MILITARY TIRES

The conferees concur with the Senate language regarding Military Tires.

## ARMED RECONNAISSANCE HELICOPTER

The conference agreement includes \$175,759,000 for procurement of 12 Armed Reconnaissance Helicopters, which is \$292,500,000 below the budget request. At the request of the Department of the Army, the agreement transfers \$31,000,000 to sustainment efforts for the Kiowa Warrior fleet, and transfers \$100,000,000 in procurement funds to Research, Development, Test and Evaluation, Army. The agreement includes a reduction of \$133,000,000 from procurement quantities and \$8,900,000 from initial spares. The conferees continue to be concerned about unrealistic estimates for production and integration of the aircraft following the restructure of the program earlier this year. In order to further reduce risk to the program, which continues to be driven by schedule rather than maturity, the conferees agree to reduce funding for long-lead items for fiscal year 2008 procurements by \$19,600,000.

## STRYKER VEHICLES

The conferees commend the Army on the performance and reliability of the Stryker vehicles and the overall success of the program. The Army requested \$1,038,984,000 for Strykers in the fiscal year 2008 budget; the conference agreement provides \$924,984,000. The conferees are aware that the revised test plan for the Stryker Mobile Gun System is on track to support a full rate production decision in the second quarter of fiscal year 2008. Therefore, the conference agreement provides \$342,246,000 to procure the Mobile Gun System variant.

The House recommended that the Army form an eighth Stryker Brigade and provided \$1,102,000,000 for that purpose. The conferees concur that the Army has requirements for additional Strykers for unit sets, ready to fight fleets, maintenance replacements and to replace aging M113 troop carrier vehicles, and recommend addressing such requirements in fiscal year 2008 Global War on Terror emergency supplemental appropriations. The conferees direct the Secretary of the Army to provide a report to the congressional defense committees, not later than March 31, 2008, on the future force structure of the Army, including the Grow-the-Army combat and support units, and on the utility of converting at least one of the planned new Infantry Brigade Combat Teams under the Grow-the-

Army initiative into a Stryker Brigade Combat Team. The report should also address future Stryker vehicle requirements, including the plan to replace M113 carrier vehicles.

## SHIPBUILDING

The conferees agree that one of the common elements of the poor cost and schedule performance being realized in several of the Navy's shipbuilding programs is the fact that lead ship construction is initiated prior to the completion of the ship design. This practice has led to costly changes during the construction process as the design is modified or completed. In an effort to instill some discipline in the process, the conferees direct that the Secretary of the Navy certify to the congressional defense committees that the required research and development and detailed design are mature enough to allow for the initiation of construction with minimal risk of follow-on changes caused by the premature start of construction. This requirement applies to the lead ship of a new class, the first ship of a class constructed at a new shipyard, and the first ship constructed following a major design change.

Additionally, in light of the recent cost growth on shipbuilding programs, the conferees direct the Government Accountability Office to conduct a review of shipbuilding-specific best practices. This review should examine key decision points in Navy and commercial shipbuilding programs, compare benchmarks used by Navy and commercial shipbuilders to assess the readiness of programs to pass these decision points and move to

the next phase, and other management and shipyard practices employed by commercial shipbuilders that could improve cost performance on Navy programs. The conferees expect this review to be completed prior to March 31, 2008.

### LITTORAL COMBAT SHIP

The conferees are extremely concerned with the state of the Littoral Combat Ship (LCS) program. This program is a classic example of the way things can go wrong when construction is started prior to the design being complete. Since the program's inception, the Congress appropriated funding for the construction of six ships. Due to cost growth and technical problems, only two ships will be constructed with the funding that has been appropriated. Moreover, the Navy recently terminated the contracts for two more ships planned for construction. The conferees are disturbed with the way the Navy is managing the LCS program. These ships will eventually comprise a significant percentage of the 313-ship Navy. With the upheaval the program has experienced over the last several months, the conferees agree that changes need to be made to the current LCS acquisition strategy in order to develop a ship that meets future naval requirements and can be affordably procured. The conferees direct that this new acquisition strategy

include a down-select of LCS designs no later than the end of fiscal year 2009. The conferees direct the Navy to then proceed with a full and open competition for future ships. The conferees expect the Navy to continue with its plan of providing "contract design packages" to industry when conducting this competition. The conferees further direct the Navy to include lead and follow shipyards and open this competition to shipyards not currently involved in the LCS program. The conferees also direct the Navy to use fixed priced incentive contracting for future ships.

Therefore, the conferees agree to provide \$339,482,000 for the procurement of a single LCS in fiscal year 2008. This is a reduction of \$571,000,000 to the budget request. This funding is to be combined with the materials purchased in prior years as well as the remaining funding for the ships whose contracts have been terminated by the Navy. This allows the Navy to obtain some benefit from the terminated ships. Materials and funding from prior years, when combined with the fiscal year 2008 funding allows sufficient funding to purchase a ship at the proposed cost cap value of approximately \$460,000,000.

## HH-60 MODIFICATIONS

The conferees provide an additional \$99,000,000 for modifications to Air Force HH-60 Pave Hawks which perform the combat search and rescue mission for the Air Force. These low density, high demand platforms first entered service 25 years ago and have been continuously deployed in support of operations throughout the world. The much-needed replacement for the HH-60 is the new Combat Search and Rescue – X (CSAR-X) aircraft. However, the CSAR-X program is facing delays. The conferees agree that the HH-60 must be upgraded to safely and effectively perform the mission until CSAR-X is operational, and accordingly provide funding for modifications. The conferees direct that the Air Force provide a status report to the congressional defense committees on the execution of these funds and the modification of aircraft within six months of enactment of this Act and every six months thereafter until the modifications are completed.

## F-22A MULTIYEAR PROCUREMENT EXTENSION

The conferees believe the Air Force should consider extending the current F-22A multiyear procurement contract. The conferees note that \$526,000,000 is available within the F-22A fiscal year 2009 budget for line

shutdown and that these funds could be redirected towards advance procurement items to support procurement of an additional 20 aircraft.

As such, the conferees encourage the Air Force to consider procuring long lead specialty metal items from within available funds to preserve the option of continued production of the F-22A. Should the multiyear procurement extension or a follow-on multiyear procurement not be ultimately approved, these key specialty metals shall be made available for the F-35 program.

## JOINT AIR-TO-SURFACE STANDOFF MISSILE (JASSM)

The fiscal year 2008 budget request includes \$201,125,000 for the procurement of JASSMs. The conferees agree to reduce the request by \$40,000,000 for missiles funded ahead of need. The funding provided will allow production to continue without a production break until a fiscal year 2009 contract award.

## ADVANCED EXTREMELY HIGH FREQUENCY SATELLITE - 4

The conference agreement provides \$125,000,000 for advance procurement of the fourth Advanced Extremely High Frequency (AEHF) satellite. The conferees are concerned that the Air Force is examining ways to circumvent Congressional direction to fully fund the fourth AEHF satellite in fiscal year 2009. The conferees, therefore, agree with and re-state the Senate language that directs the Air Force to fully fund AEHF-4 in the fiscal year 2009 budget and encourages the Air Force to include an option for a fifth AEHF satellite in the follow-on contract in order to obtain the best pricing should it determine another AEHF satellite is required.

## SPECIAL OPERATIONS COMMAND

The conference agreement provides \$215,214,000 for CV-22 Special Operations Forces modifications as recommended by the Senate. This amount, which provides funding for four of the proposed five CV-22s for the Special Operations Command, is recommended based on current production schedules for these aircraft. The conferees are concerned that slips in integration efforts are beginning to impact CV-22 deliveries. The conferees will continue to review production schedules and will provide additional funding in subsequent appropriations bills as warranted to ensure that the Special Operations Command has the equipment needed to perform its mission.

## M291/M295 SKIN/EQUIPMENT DECONTAMINATION KITS

The conference agreement provides \$5,600,000 above the President's request for the M291/M295 Skin/Equipment Decontamination Kits. The conferees understand that the Department of Defense decided not to procure the active ingredient used in the M291/M295 Skin/Equipment Decontamination Kits with funding provided in fiscal year 2007. This decision may jeopardize the U.S. industrial base for chemical skin decontamination technology. The funds provided in fiscal year 2008 shall

be used both for the purchase of raw materials and the packaging of the kits. Additionally, the Secretary of Defense is directed to provide the congressional defense committees within 90 days of enactment of this Act, a report outlining the current and future plans for personal decontamination technologies for use on skin and individual equipment.

## SPECIAL INTEREST ITEMS

Items for which additional funds have been provided as shown in the project level tables or in paragraphs using the phrase 'only for' or 'only to' in this report are congressional interest items for the purpose of the Base for Reprogramming (DD 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, specifically addressed in the conference report. These items remain special interest items whether or not they are repeated in a subsequent conference report.

## REPROGRAMMING GUIDANCE FOR ACQUISITION ACCOUNTS

The conferees direct the Department of Defense to continue to follow the reprogramming guidance specified in the report accompanying the House version of the fiscal year 2006 Department of Defense Appropriations bill (H.R. 109-119). Specifically, the dollar threshold for reprogramming funds will remain at \$20,000,000 for procurement, and \$10,000,000 for research, development, test and evaluation. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20% of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative. Therefore, if the combined value of transfers into or out of a

procurement (P-1) or research, development, test and evaluation (R-1) line exceeds the identified threshold, the Department of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this report.

#### CRUISE MISSILE DEFENSE

The conferees concur with requirements stated by the House with regard to cruise missile defense. The conferees direct that the required report on this matter be provided in classified and unclassified format.

#### PROMPT GLOBAL STRIKE

The conferees agree to provide no funding for testing, fabrication or deployment of a Conventional Trident Modification (CTM) program. As an alternative, the conferees have provided \$100,000,000 in a new Prompt Global Strike program element within the Research, Development, Test, and Evaluation, Defense-Wide appropriation only for development of promising conventional prompt global strike technologies. This alternative consolidates funding for conventional prompt global strike efforts under the

cognizance of the Under Secretary of Defense (Acquisition, Technology, and Logistics) by shifting funding from the Navy CTM program and the Air Force Common Aero Vehicle program. Funding for the FALCON program remains within the Defense Advanced Research Projects Agency. Funds in the new conventional prompt global strike program element shall be applied to propulsion and guidance systems, mission planning, re-entry vehicle design, modeling and simulation efforts, command and control, and launch system infrastructure. Additionally, funding may be applied towards efforts such as strategic policy compliance, intermediate range missile concepts, advanced non-nuclear warheads, and other mission enabling capabilities.

The conferees direct that the Department submit a report to the congressional defense committees within 90 days of enactment of this Act that discusses the technology thrusts and investment objectives for the conventional prompt global strike effort. The report shall provide details on the test programs and platforms; specific activities to be undertaken in fiscal year 2008; and the mid- and long-term science and technology strategic plans. In addition, the report shall clearly address the prospective allocation of funds, both near and long-term, among the technology thrust areas and platforms.

## FUNDING INCREASES

The conferees direct that the funding increases outlined in these tables shall be provided only for the specific purposes indicated in the table.

## NATIONAL EYE EVALUATION AND RESEARCH NETWORK

The conferees recognize the need to provide for our military readily accessible evaluation and testing for serious retinal injuries and diseases, as well as the need for a central repository for clinical trial data. Therefore, the conferees have provided \$2,400,000 for the National Eye Evaluation and Research Network.

## FUTURE COMBAT SYSTEMS (FCS)

The conferees recommend \$3,357,398,000 in research and development funding for Army Future Combat Systems instead of \$3,092,322,000 as proposed by the House and \$3,565,018,000 as proposed by the Senate. Additionally, the FCS program for fiscal year 2008 includes for the first time procurement funds for facilitization and long lead items, which the conferees approved as requested, as detailed elsewhere in this report. Program funding for fiscal year 2008 supports the first of three planned technology spin outs which will deliver the benefits of FCS technology to other Army elements. Milestone 1 spin outs are planned to include Network Capability Integration kits for Abrams Tanks, Bradley fighting Vehicles and HMMWVs. The conferees concur with the early integration of FCS technology across the total force, while continuing on a

F )

path towards fielding full FCS capability. The conferees designate FCS funding as a congressional special interest item for the purpose of prior approval reprogrammings as discussed elsewhere in this report.

#### GLOBAL COMBAT SUPPORT SYSTEM-ARMY (GCSS-A)

The conferees recommend \$94,689,000 for GCSS-A, as proposed by the House, instead of \$59,689,000 as proposed by the Senate. The conferees note that this is an increase of \$46,703,000, almost 100 percent, over the amount provided in fiscal year 2007. The conferees direct the Army to provide to the congressional defense committees a revised fiscal year 2008 spend plan based on fiscal year 2008 appropriations no later than thirty days after enactment of this Act.

#### ORGANIC PRECISION INDIRECT FIRE CAPABILITY

Recent Operational Needs Statements from theater identified a requirement for an organic precision indirect fire capability for infantry brigades in the near term. The conferees understand that the Army has conducted an analysis of several potential systems, to include the 120mm Precision Guided Mortar Munition (PGMM), that could address this capability gap. The conferees further understand that based on cost,

performance, technological readiness, compatibility with existing systems and near-term fielding availability, the Army considers PGMM the best solution. If additional funds are needed during fiscal year 2008 to ensure that sufficient funds are available to complete development of the PGMM, the Committees on Appropriations would entertain a reprogramming request.

## BONE MARROW REGISTRY

The conferees reiterate the direction proposed by the House regarding funding provided for the C.W. Bill Young Bone Marrow Donor Recruitment and Research program.

## ADVANCED PRECISION KILL WEAPON SYSTEM

The conferees agree to provide \$6,000,000 above the President's request for continued development of the Advanced Precision Kill Weapons System (APKWS) in Research, Development, Test and Evaluation, Navy. If additional funds are needed during fiscal year 2008 to ensure that sufficient funds are available to maintain progress in developing the program, the Committees on Appropriations would entertain a reprogramming request.

## COMBAT SEARCH AND RESCUE (CSAR-X)

The budget request includes \$290,059,000 for development of a new platform to perform the combat search and rescue mission. Due to bid protests upheld by the Government Accountability Office, contract award for system development and demonstration has been delayed well into the summer of 2008. Due to this delay, a significant amount of the request cannot be executed during fiscal year 2008. Accordingly, the conferees reduce the request by \$185,059,000. The conferees transfer \$99,000,000 of this reduction to Aircraft Procurement, Air Force, for much needed modifications to the HH-60 fleet which, due to delays in the CSAR-X program, will perform the combat search and rescue mission for many years longer than planned. An explanation of the HH-60 modifications provided for is included in the Aircraft Procurement, Air Force section of the Joint Explanatory Statement of Managers.

## SPACE SITUATIONAL AWARENESS

The conferees are committed to improving the nation's ability to survey space and characterize events and objects that could jeopardize our ability to operate in space. Enhancing these capabilities is critical, particularly following the Chinese anti-satellite weapon demonstration last

January. The conferees agree to add over \$100,000,000 above the President's budget request to accelerate our space situational awareness capabilities in programs such as the following: Self Aware Space Situational Awareness, Space Fence, Operationally Responsive Space, Space Control Test Capabilities, Rapid Identification, Detection and Reporting System (RAIDRS) Block 20, Maui Space Surveillance System, Space Situational Awareness research, Panoramic Survey Telescope and Rapid Response System, and the High Accuracy Network Discrimination System.

#### OPERATIONALLY RESPONSIVE SPACE

The conference agreement provides Operationally Responsive Space funds for efforts associated with responsive launch. The conferees encourage the Operationally Responsive Space program to continue to work with DARPA on the FALCON small launch vehicle program.

#### BALLISTIC MISSILE RANGE SAFETY TECHNOLOGY

The conferees direct that \$3,000,000 of the funds made available for Spacelift Range Systems is restricted from obligation or expenditure until 30 days after notification to the congressional defense committees of the results

from the Ballistic Missile Range Safety Technology certification process.

This is in lieu of the \$10,000,000 restriction proposed by the House.

#### GLOBAL BROADCAST RECEIVE SUITE

The conferees are encouraged with the progress the Air Force Global Broadcast System (GBS) Joint Program Office (JPO) has made on the development of the Suitcase Portable Receive Suite (SPRS). These efforts have led to the fielding of promising prototypes currently undergoing tests. The conferees urge the Air Force to continue to accelerate the development, procurement and fielding of this vital system and to reduce the size and weight of the system, leading to a smaller, lighter rucksack-portable capability as soon as possible.

#### MEDSTARS INTEGRATION WITH THE GLOBAL COMBAT SUPPORT SYSTEM

As the exposure to non-conventional weapons increases, service members need a front line medical system to enable the rapid relay, monitoring, and assessment of the health of the combat force. Therefore, the conferees provide \$1,600,000 to develop and deploy a system to provide our forces with instant access to health care information and trauma reports.

## FOCUS CENTER RESEARCH PROGRAM

The conference agreement provides \$18,000,000 for the FOCUS Center Research Program, which is \$8,000,000 above the request. The Focus Center Research Program is a jointly funded program between the Department of Defense and the semiconductor industry to support university research to advance semiconductor technology. The conferees strongly encourage the Department of Defense to fully fund the \$20,000,000 requirement for the program within the Defense Advanced Research Projects Agency's Defense Research Sciences Program Element (0601011E) in future budget submissions.

## MULTIPLE KILL VEHICLE

The conferees agree to reduce the budget request for the Multiple Engagement Payload (MEP) for the Standard Missile-3 by \$62,900,000, the entire budget request for that program. The conferees are concerned that the Missile Defense Agency (MDA) does not have the resources to adequately fund both MEP and the Multiple Kill Vehicle (MKV) for the Ground-Based Interceptor (GBI) and the Kinetic Energy Interceptor (KEI). Thus, the conferees agree to increase the MKV for the GBI and KEI by \$25,000,000 in order to restore reductions that the MDA has annually taken out of this

program. The conferees further agree with the Senate language that directs that no funding in the Aegis Ballistic Missile Defense program element can be used for the MKV program. Additionally, the conferees direct that the Multiple Kill Vehicle, PE 0603894 is designated as a congressional special interest item subject to prior approval reprogramming procedures.

#### CHEMICAL AND BIOLOGICAL DEFENSE PROGRAM

The conference agreement provides an increase of \$20,000,000 for the Chemical and Biological Defense Initiative. The Secretary of Defense is directed to allocate these funds among the programs that yield the greatest gain in our chem-bio defensive posture. The conferees further direct that such funds may not be obligated until 15 days after a report, including a description of projects to be funded, is provided to the congressional defense committees.

#### DEFENSE ADVANCED RESEARCH PROJECTS AGENCY

The conferees provide \$2,979,808,000 for DARPA, a reduction of \$105,809,000 from the request. The conferees direct the Director of DARPA to submit to the congressional defense committees no later than 60 days after enactment of this Act a report that details by program element and program the application of undistributed reductions made in this Act.

302

## INDUSTRIAL BASE INNOVATION FUND

The conferees provide \$24,000,000 for the Industrial Base Innovation Fund to ensure that investments are made to address shortfalls in manufacturing processes and technologies in support of the Department's long-term and short-term needs. The conferees direct that funds may not be obligated from the Industrial Base Innovation Fund until 15 days after a report detailing the projects to be funded is provided to the congressional defense committees.

## NEW STARTS

The conferees direct that no more than 15 percent of funding provided under this heading for new start programs under the cognizance of the Director, Defense Research and Engineering, may be obligated until five days after the congressional defense committees receive a report that details those programs' descriptions and objectives as well as performance metrics, transition schedules and sunset provisions.

## DEFENSE HEALTH PROGRAM REPROGRAMMING PROCEDURES

The conferees remain concerned regarding the transfer of funds from Direct (or In-house) Care to pay for contractor-provided medical care. To limit such transfers and continue oversight within the Defense Health Program operation and maintenance account, the conferees agree to include bill language which limits the funds available for Private Sector Care under the TRICARE program subject to prior approval reprogramming procedures. In addition, the conferees also designate the funding for the Direct Care System as a special interest item, as defined elsewhere in this report. Any transfer of funds from the Direct (or In-house) Care budget activity into the Private Sector Care budget activity or any other budget activity will require the Department of Defense to follow prior approval reprogramming procedures. The language approved by the conferees should not be interpreted by the Department as limiting the amount of funds that may be transferred to the direct care system from other budget activities within the Defense Health Program.

In addition, the conferees direct the Department of Defense to provide budget execution data for all of the Defense Health Program accounts. Such budget execution data shall be provided quarterly to the congressional defense committees through the DD-COMP(M) 1002 accounting form.

## BUDGET CORRECTION LANGUAGE

The conferees agree to reduce the Private Sector Care (bag 2) by \$43,014,000 to reflect incorrect budget justification materials submitted to the Congress for Army and Marine Corps Ground Force Augmentation. The conferees were made aware of a discrepancy between the fiscal year 2008 budget request submitted by the Office of Management and Budget and the Department of Defense for the Defense Health Program and have adjusted bag 2 to accurately account and fully fund the requirement. The conferees expect the Department of Defense and the Office of Management and Budget to be more fiscally responsible in its budgeting for the Defense Health Program and to better coordinate the required justification material submitted to Congress.

## BUDGET ANALYSIS OF THE DEFENSE HEALTH PROGRAM

To improve the analysis of future budget requests for the Defense Health Program, the conferees direct the Comptroller General to review the Department of Defense's fiscal year 2009 budget request for the Private Sector Care budget activity group of the Defense Health Program. The conferees further direct the Comptroller General to review the Department's justification for its budget request and underlying estimates, changes from its prior year request and factors driving any changes, and the extent that the

Department, in developing the request, has considered historical information on its ability to execute funds appropriated, such as prior year unobligated balances or transfers to other budget activity groups or accounts.

#### MANAGEMENT IMPROVEMENTS IN THE DEFENSE HEALTH PROGRAM

The conferees are concerned about the direction taken by the Department of Defense to improve the cost-effectiveness of the Defense Health Program and believe the Department has not thoroughly examined other areas that could result in efficiencies. Therefore, the conferees direct the Secretary of Defense to assess management improvements that should be taken to improve efficiency and effectiveness of the Defense Health Program, and further direct the Assistant Secretary of Defense for Health Affairs and the Undersecretary of Defense for Personnel and Readiness, to develop recommendations in the areas of, but not limited to, the following: processes needed to verify the eligibility of health care recipients; actions necessary to develop fully compliant financial management systems; procedures to better integrate the direct care and purchased care systems; and, actions which can be taken to create incentives for beneficiaries to use the least costly pharmacy programs. The conferees also direct the Secretary to develop a plan to implement these recommendations, identify associated

costs, and submit the plan to the congressional defense committees not later than six months after enactment of this Act.

#### CARRYOVER

The conferees direct the Assistant Secretary of Defense for Health Affairs to submit a detailed spend plan for fiscal year 2007 designated carryover funds to the congressional defense committees 30 days after enactment of this Act.

#### WARRIOR TRANSITION

This year has proven that the military's system for ensuring that its programs to support wounded warriors is extremely overburdened and in need of significant improvement. The conferees direct the Department of Defense and Veterans Affairs to report to the congressional defense committees and the House and Senate Military Construction and Veterans Affairs Appropriations Committees by January 15, 2008, on how it plans to update the Physical Disability Evaluation System. The conferees further direct the Undersecretary of Defense for Personnel and Readiness to report quarterly to the congressional defense committees on the status of

implementing improvements to the Military Health System and the Physical Disability Evaluation System.

#### PEER REVIEWED MEDICAL RESEARCH PROGRAM

The conferees agree to provide \$50,000,000 for the Peer Reviewed Medical Research Program, and recommend the following projects as candidates for study: amyotrophic lateral sclerosis; alcoholism research; blood cancer; drug abuse; epilepsy research; eye and vision research; integrated tissue hypoxia research; Interstitial Cystitis; inflammatory bowel diseases; leishmaniasis; Lupus; kidney cancer; mesothelioma; multiple sclerosis; nutrition and health promotion; Padgett's disease; polycystic kidney disease; pulmonary hypertension; scleroderma; social work research; and tinnitus. The conferees reiterate that funds provided under the Peer Reviewed Medical Research Program shall be used only for the purposes listed above.

The conferees direct the Department to provide a report by March 3, 2008, on the status of this Peer Reviewed Medical Research Program.

## DEFENSE ENROLLMENT ELIGIBILITY REPORTING SYSTEM (DEERS)

The conferees direct the Department of Defense to report to the congressional defense committees by April 15, 2008, on the number of dual military member families currently in the military system and on how the Department intends to correct the inability of the system to register dependents under both parents. The report should include the cost estimates for correcting any flaws and deficiencies within the system.

## REVIEW OF TRICARE CO-PAYS

The conferees direct the Assistant Secretary of Defense for Health Affairs to provide a report to the congressional defense committees by April 15, 2008, which reviews TRICARE co-pays and analyzes whether or not elimination of certain co-pays would result in a cost savings.

## TRI-SERVICE NURSING RESEARCH PROGRAM

The conferees agree to provide \$6,400,000 for the Tri-Service Nursing Research Program and direct the Assistant Secretary of Defense for Health Affairs, the Service Surgeons General and the Nursing Corps Chiefs to provide a report to the congressional defense committees by April 25, 2008, that details the number and topic areas of research proposals submitted

and funded. The report should also provide a detailed accounting of the entire program, to include administrative costs, overhead and travel.

#### ELECTRONIC MEDICAL RECORD INTEROPERABILITY

The conferees direct the Departments of Defense and Veterans Affairs to issue a joint report to the congressional defense committees by March 3, 2008, detailing the actions being taken by each department to achieve an interoperable electronic medical record (EMR). The report should include, but not be limited to, a detailed spending plan for the use of funding provided in the Joint Incentive Fund as well as identify all other on-going and planned projects and programs. The report should clearly identify the Departments' goals for interoperability and how these projects and programs will address those goals.

#### WOUNDED WARRIOR ASSISTANCE

The conferees agree to provide \$70,000,000 to fund initiatives addressed in H.R. 1598 as passed by both the House and Senate that address the urgent medical needs of wounded service members.

## REPLACEMENT OF JAPANESE ENCEPHALITIS VACCINE

The conferees direct the Undersecretary of Defense for Personnel and Readiness to report to the congressional defense committees by April 15, 2008, on the current policies for maintaining the Japanese encephalitis vaccine stockpile, the status of replacing the current Japanese encephalitis virus vaccine, and the costs associated with such a replacement.

## FOOD ALLERGY RESEARCH

The conferees are aware of the increased diagnosis of food allergies and anaphylaxis occurring in the United States. The conferees direct the Assistant Secretary of Defense for Health Affairs and the Service Surgeons General to report to the congressional defense committees by April 15, 2008, on the rising incidences of food allergies and anaphylaxis among service members and their families, any current research to address this epidemic, and the need to establish a national program on food allergy and anaphylaxis that will work in coordination with other federal agencies.

## ANTIBIOTIC RESISTANT BACTERIA

The conferees are concerned about the increasing number of wounded service members returning from theater with life-threatening infections

caused by bacteria that may have originated in Iraq and that are increasingly resistant to currently used antibiotics. The conferees therefore direct the Service Surgeons General to report to the congressional defense committees by February 15, 2008 on the antibiotic regimen being used to treat service members with these infection, what new antibiotics are available but currently not being used by the military, what research is being conducted in this area, and what is needed to ensure that the service members receive the necessary treatment to reduce these life-threatening infections.

The conferees note that numerous changes to this account were requested by the Department of Defense. However, not one of these adjustments were submitted to the Congress through the appropriate procedures. The conferees believe that this program does not have the level of attention it requires within the Department of Defense and the Office of Management and Budget. As such, the conferees direct that any future changes to this account after the President's budget transmittal to Congress be submitted through an official budget amendment by the President to the Congress.

#### CHEMICAL STOCKPILE EMERGENCY PREPAREDNESS PROGRAM

The conferees agree to provide \$88,245,000 to assist State and local governments under the Chemical Stockpile Emergency Preparedness Program and have made these funds available until September 30, 2009. The conferees understand that the majority of these funds are used to continue ongoing programs and support emergency response capabilities near chemical weapon demilitarization facilities. The conferees agree to continue this flexibility because State and local governments operate on different fiscal calendars than the federal government. Since the majority of these funds are for on-going efforts, the conferees direct the Department of

anner ) Defense to work with these State and local governments to develop a  
responsible and efficient manor to execute future funds within one fiscal  
year.

## DIVISION B—FURTHER CONTINUING APPROPRIATIONS, 2008

Division B of the conference agreement makes further continuing appropriations for fiscal year 2008. No comparable provisions were included in the House or Senate versions of H.R. 3222.

In particular, division B amends the first fiscal year 2008 continuing resolution (Public Law 110-92) to extend its general expiration date to December 14, 2007 and to add additional provisions as follows. (In the following discussion, the section numbers cited refer to sections of Public Law 110-92 as they would be added by the conference agreement.)

New section 151 of the continuing resolution (as added by the conference agreement) extends authority through the general termination date of the continuing resolution for the National Dairy Promotion and Research Board (which is funded through producer assessments) to expend funds for foreign market development.

Section 152 provides an operating rate under the continuing resolution of \$1,025,398,000 for the Census Bureau's Periodic Censuses and Programs account, in order to accommodate contracts and activities needed to be undertaken now to stay on schedule for 2010 decennial census and the economic censuses.

Section 153 provides an emergency designation for funds available under the first continuing resolution for the Department of Defense and that are not subsumed into the regular fiscal year 2008 Defense Appropriations Act.

Section 154 appropriates funds for the traditional payment to the heirs of the late Representative Jo Ann Davis.

Section 155 provides operating rates under the continuing resolution equal to the President's fiscal year 2008 budget request for accounts within the Department of Veterans Affairs.

Section 156 extends, through the general termination date of the continuing resolution, a provision of law limiting liability of air carriers for claims arising out of acts of terrorism. This provision was last extended by

the fiscal year 2007 full-year continuing resolution and expired on September 30. It has been proposed to be extended in the House-passed and Senate Committee-reported FAA authorization bills.

Section 157 makes a \$500,000,000 emergency appropriation to the Forest Service and the Bureau of Land Management for emergency wildland fire suppression, wildfire risk reduction, reconstruction, and recovery activities in response to the catastrophic wildfire season of 2007. The conferees have included funds to repay other program funds borrowed during fiscal year 2007 to fund emergency wildfire suppression activities, provide additional suppression resources to offset the cost of fighting the devastating Southern California wildfires, and fund critical hazardous fuels and rehabilitation activities. The conferees direct the agencies and their partners to allocate hazardous fuels and mitigation funding to areas that face the greatest risk from wildfires as a result of population densities and excessive fuel loads. Funding has also been provided for urgently needed fire risk reduction projects on State and private lands using all authorities available to the Forest Service. Rehabilitation funds shall be allocated to areas that face the greatest emergency stabilization and watershed protection needs based on values at risk.

Section 158 makes a \$2,900,000,000 emergency appropriation to the Federal Emergency Management Administration's disaster relief fund, to provide the additional amounts estimated by the Department of Homeland Security to be needed for continued disaster response and relief efforts.

Section 159 makes a \$3,000,000,000 emergency appropriation to the Department of Housing and Urban Development's Community Development Fund solely to alleviate a shortfall in the "Road Home" program to assist people whose homes were damaged by Hurricanes Katrina and Rita. These amounts would be used exclusively to fund eligible claims for the homeowners' program in Louisiana that were submitted by the program deadline but not covered by current program funding.
