CHAMBER OF COMMERCE
OF THE
UNITED STATES OF AMERICA

R. BRUCE JOSTEN
EXECUTIVE VICE PRESIDENT
GOVERNMENT AFFAIRS

1615 H STREET, N.W.
WASHINGTON, D.C. 20062-2000
202/463-5310

May 10, 2010

TO THE MEMBERS OF THE U.S. HOUSE OF REPRESENTATIVES:

The U.S. Chamber of Commerce, the world's largest business federation representing the interests of more than three million businesses and organizations of every size, sector, and region, urges you to support H.R. 5116, the "America COMPETES Reauthorization Act of 2010" without reduction of its authorization levels.

The Chamber believes that H.R. 5116 would strengthen U.S. competitiveness by improving America's scientific and economic leadership, and making stronger investments in science, innovation, research, and education.

A lack of qualified math and science teachers in America's public schools is a major impediment to improved U.S. educational achievement in math and science. H.R. 5116 would provide additional support for scholarship and training programs to recruit new K-12 math and science teachers, and to enhance the skills of existing teachers.

The continuation of Advanced Research Projects Agency-Energy represents a necessary step towards bypassing some of the traditional "stovepiping" that frequently hinders the efficiency and expediency of research and development at the Department of Energy and its National Laboratories. It is vital to encourage some degree of these high risk—high reward projects that could change the entire landscape of how energy resources are produced and used.

The Chamber urges you to strengthen America's competitiveness by supporting H.R. 5116. **The Chamber may consider votes on, or in relation to, this issue in our annual *How They Voted* scorecard.**

Sincerely,

R. Bruce Josten

Jay Timmons
Executive Vice President

May 11, 2010

Dear Representatives:

The National Association of Manufacturers (NAM), the nation's largest industrial trade association representing small and large manufacturers in every industrial sector and in all 50 states, urges you to support H.R. 5116, the America COMPETES Reauthorization Act of 2010.

The NAM strongly supports reauthorization of the COMPETES Act, as its programs are working to strengthen innovation in the U.S. manufacturing sector and to build a stronger workforce. Key programs in H.R. 5116 of significant interest to manufacturers include: federal funding for basic R&D; the Advanced Research Projects Administration for Energy (ARPA-E); the Hollings Manufacturing Extension Partnership (MEP), which helps thousands of small and medium manufacturers increase their productivity and technological capabilities; and science, technology, engineering and math (STEM) education grants that will help increase the number and quality of students receiving degrees in areas of importance to manufacturers.

Our economic future relies more than ever on our ability to innovate, and reauthorizing the COMPETES Act will help manufacturers prosper in a globally integrated and highly competitive marketplace. We urge your support for H.R. 5116.

The NAM's Key Vote Advisory Committee has indicated that all votes related to H.R. 5116, including procedural motions, may be considered for designation as Key Manufacturing Votes in the 111th Congress.

Thank you for your consideration.

Sincerely,

A handwritten signature in black ink that reads 'Jay Timmons'.

Washington, D.C., 20515

The Honorable John Boehner
Minority Leader
U.S. House of Representatives
H-204, U.S. Capitol Building
Washington, D.C., 20515

Dear Speaker Pelosi and Leader Boehner:

On behalf of the Information Technology Industry Council (ITI), a premier group of the nation's leading high-tech companies, I am writing to share our strong support of the America COMPETES Reauthorization Act of 2010 (H.R. 5116).

Based on recommendations by the National Academy of Science's report, *Rising Above the Gathering Storm*, the America COMPETES Act was enacted to improve America's global competitiveness. Through strategic investments in education, science, and research, this legislation has played a critical role in fostering high-tech job growth as well advancing a host of new technologies ranging from energy efficiency to communications and health information technology. In addition, it has proven effective in high-tech workforce development.

With the American COMPETES Act set to expire in FY 2010, ITI urges Congress to pass H.R. 5166 and reauthorize this legislation before the Memorial Day recess. ITI has also designated H.R. 5116 as a key vote due to the significance of this legislation to the information technology industry. All key votes will be published in the 111th Congress High Tech Voting Guide, an annual report card for Members of Congress on key high tech issues.

With passage of H.R. 5116, and reauthorization of the America COMPETES Act, Congress can take another important step towards America's economic recovery and ensuring the U.S. remains a global leader in technology and innovation.

Sincerely,

Dean C. Garfield
President & CEO
Information Technology Industry Council

ACE American Council on Education

APLU Association of Public and Land-grant Universities

April 22, 2010

The Honorable Bart Gordon
Chairman
House Science and Technology Committee
2321 Rayburn House Office Building
Washington, DC 20515

The Honorable Ralph Hall
Ranking Member
House Science and Technology Committee
394 Ford House Office Building
Washington, DC 20515

Dear Chairman Gordon and Ranking Member Hall:

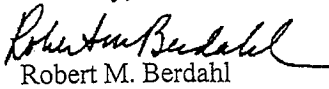

On behalf of our associations, which together represent virtually all major academic research institutions and the broader higher education community, we write to encourage favorable consideration and swift passage of legislation to reauthorize the America COMPETES Act. More specifically, we encourage bipartisan support for a five-year reauthorization bill that builds upon the doubling path set forward by the original 2007 COMPETES Act to ensure sustained, long-term funding for the National Science Foundation, the Department of Energy Office of Science, and the National Institute of Standards and Technology.

In 2007, the United States Congress demonstrated its unwavering and bipartisan support for America's research and scientific enterprise through the passage and enactment of the America COMPETES Act. The Act was a timely and important response to the National Academies report, "Rising Above the Gathering Storm." The COMPETES Act has served as a valuable blueprint for the nation by enhancing federal support for basic scientific research, STEM education, and research collaborations between academia and industry.

Likewise, the reauthorization legislation now under consideration by the Committee demonstrates your continued commitment to our nation's research enterprise. Investments in the physical sciences and engineering, STEM education, and technology development will yield innovative ideas and collaborations, economic dividends, and solutions to other major challenges facing our nation. There is no doubt that reauthorizing the America COMPETES Act is imperative to our nation's continued leadership in cutting-edge basic research.

We strongly encourage the committee to move forward with the passage of COMPETES Act reauthorization legislation and for this bill to quickly move forward for consideration by the full U.S. House of Representatives. We welcome the opportunity to work with you and your staff to move this important measure forward.

Sincerely,

Robert M. Berdahl
President
Association of American Universities
