#### 1 SEC. 2. FINDINGS.

- 2 Congress makes the following findings:
- 3 (1) Maritime vessels are the primary mode of
- 4 transportation for international trade and they carry
- 5 over 80 percent of international trade by volume.
- 6 (2) In 2004, maritime vessels carried approxi-
- 7 mately 9,700,000 shipping containers into United

- 1 States seaports at an average of 27,000 containers per 2 day.
  - (3) The security of the international container supply chain and the maritime transportation system is critical for the prosperity and liberty of all countries.
  - (4) In its final report, the National Commission on Terrorist Attacks Upon the United States noted, "While commercial aviation remains a possible target, terrorists may turn their attention to other modes of transportation. Opportunities to do harm are as great, or greater in maritime or surface transportation.".
  - (5) In May 2002, the Brookings Institution estimated that costs associated with United States port closures from a detonated terrorist weapon could add up to \$1 trillion from the resulting economic slump and changes in our Nation's inability to trade. Anticipated port closures on the west coast of the United States could cost the United States economy \$1 billion per day for the first five days after a terrorist attack.
  - (6) Significant steps have been taken since the terrorist attacks against the United States that occurred on September 11, 2001:

1	(A) Congress passed the Maritime Trans-
2	portation Security Act of 2002 on November 14,
3	2002.
4	(B) The Coast Guard issued a comprehen-
5	sive set of port security regulations on October
6	22, 2003.
7	(C) The International Maritime Organiza-
8	tion adopted the International Ship and Port
9	Facility (ISPS) Code in December 2002.
10	(D) The White House issued Homeland Se-
11	curity Presidential Directive-13 in September
12	2005 which lays out requirements for a com-
13	prehensive maritime security policy.
14	(7) Through both public and private projects, the
15	private sector in the United States and overseas has
16	worked with the Department of Homeland Security to
17	improve the security of the movement of cargo through
18	the international supply chain.
19	(8) Despite these steps, security gaps in the mar-
20	itime transportation system remain, resulting in
21	high-risk container systems not being checked overseas
22	or domestically and ports that are vulnerable to ter-
23	rorist attacks similar to the attack on the U.S.S. Cole.
24	(9) Significant enhancements can be achieved by
25	applying a multi-layered approach to supply chain

- security, in a coordinated fashion. Current supply
  chain programs within the Federal Government have
  been independently operated, often falling short of
  gains which could have been made if such programs
  were operated in a coordinated manner with clear
  system standards and a framework that creates incentives for security investments.
  - the risk of a terrorist attack, security measures in the supply chain can add certainty and stability to the global economy, raise investor confidence, and facilitate trade. Some counterterrorism costs are integral to the price that must be paid to protect society. However, counterterrorism measures also present an opportunity to increase the efficiency of the global trade system through international harmonization of such measures. These efficiency gains are maximized when all countries adopt such counterterrorism measures.
    - (11) Increasing transparency in the supply chain will assist in mitigating the impact of a terrorist attack by allowing for a targeted shutdown of the international supply chain and expedited restoration of commercial traffic.

## SEC. 402. NUCLEAR AND RADIOLOGICAL DETECTION SYS-

- 7 **TEMS**.
- 8 (a) Deployment.—Not later than September 30,
- 9 2007, the Secretary of Homeland Security shall deploy nu-
- 10 clear and radiological detection systems at 22 United States
- 11 seaports. To the extent feasible, the Secretary shall deploy
- 12 the next-generation radiation portal monitors tested in the
- 13 pilot program under subsection (d) at such United States
- 14 seaports.
- 15 (b) Strategy.—Not later than 90 days after the date
- 16 of the enactment of this Act, the Secretary, acting through
- 17 the Director of the Domestic Nuclear Detection Office of the

1	Department, shall submit to the appropriate congressional				
2	committees a strategy for the deployment of nuclear and				
3	radiological detection systems at all remaining United				
4	States seaports.				
5	(c) Contents.—The strategy submitted under sub-				
6	section (b) shall include—				
7	(1) a risk-based prioritization of United States				
8	seaports at which nuclear and radiological detection				
9	systems will deployed;				
10	(2) a proposed timeline of when nuclear and ra-				
11	diological detection systems will be deployed at each				
12	of the seaports identified under paragraph (1);				
13	(3) the type of systems to be used at each of the				
14	seaports identified under paragraph (1);				
15	(4) standard operating procedures for examining				
16	containers with such systems;				
17	(5) the Department policy for using nuclear and				
18	$radiological\ detection\ systems;$				
19	(6) a classified annex that details plans for cov-				
20	ert testing; and				
21	(7) a classified annex that outlines the risk-based				
22	prioritization of seaports used under paragraph (1).				
23	(d) Safety Plan.—Not later than 180 days after the				
24	date of the enactment of this Act, the Secretary shall submit				
25	to the appropriate congressional committees a plan that—				

1	(1) details the health and safety impacts of nu-
2	clear and radiological detection systems; and
3	(2) describes the policy of U.S. Customs and
4	Border Protection for using nuclear and radiological
5	detection systems.
6	(e) Pilot Program.—
7	(1) In general.—Not later than January 1,
8	2007, the Secretary, acting through the Director of the
9	Domestic Nuclear Detection Office of the Department,
10	shall initiate a pilot program to deploy and test the
11	operational performance of next-generation radiation
12	portal monitors at one or more United States seaports
13	with a high-volume of containerized cargo.
14	(2) Report.—Not later than March 31, 2007,
15	the Secretary shall submit to the appropriate congres-
16	sional committees a report that contains—
17	(A) a description of the next-generation ra-
18	diation portal monitors deployed at United
19	States seaports under the pilot program;
20	(B) a description of the operational charac-
21	teristics of the pilot program at selected United
22	States seaports; and
23	(C) an evaluation of the operational per-
24	formance of the next-generation radiation portal
25	monitors, including nuisance alarm rates, and a

1	description of the standards used in such evalua-
2	tion.
3	(f) Deployment of Next-Generation Radiation

- 4 Portal Monitors.—
- 5 (1) In General.—If the Secretary, acting 6 through the Director of the Domestic Nuclear Detec-7 tion Office of the Department, determines that the 8 operational performance of the next-generation radi-9 ation portal monitors under the pilot program car-10 ried out under subsection (e) has met the standards 11 described subsection (e)(2)(C), the Secretary shall de-12 ploy next-generation radiation portal monitors, in 13 fixed or other configurations, at all United States sea-14 ports with a high-volume of containerized cargo to 15 improve cargo screening capabilities at such seaports 16 not later than September 30, 2007.
  - (2) Congressional notification.—If any deployment of next-generation radiation portal monitors is deemed by the Secretary to be operationally infeasible or would result in ineffective, inefficient, or otherwise wasteful use of resources, the Secretary shall notify the appropriate congressional committees and recommend alternative actions.
- 24 (g) Enhancing Overseas Detection Capabili-25 ties.—The Secretary, acting through the Director of the
