[To accompany H. Res. 269]

[Including cost estimate of the Congressional Budget Office]

The Committee on Transportation and Infrastructure, to whom was referred the resolution (H. Res. 269) supporting the goals of Motorcycle Safety Awareness Month, having considered the same, report favorably thereon without amendment and recommend that the resolution be agreed to.

PURPOSE OF THE LEGISLATION

House Resolution 269 supports the goals of Motorcycle Safety Awareness Month.

BACKGROUND AND NEED FOR LEGISLATION

The National Highway Traffic Safety Administration (NHTSA) promotes Motorcycle Safety Awareness Month to encourage riders to always wear helmets and other protective gear, never drink and ride, be properly licensed, receive training, and to remind all riders and motorists to always share the road.

Motorcycles represent a valuable component of the nation's transportation network. In 2006, there were approximately 6.7 million registered motorcycles in the United States. Motorcycles continue to grow in popularity each year, with motorcycle registrations increasing by over 60 percent from 1998 to 2005. The rising popularity of motorcycles can be attributed to the benefits of motorcycle usage, including greater fuel-efficiency. In addition, motorcycle usage leads to decreased roadway congestion, and inflicts very little wear and tear on our nation's roadways. The United States is the

world leader in advancing motorcycle safety, promoting education, licensing, use of protective gear, and motorcycle awareness.

With the warmer spring weather arriving, the number of motorcycles on the roads will increase significantly. This will require increased alertness and awareness on the part of passenger vehicle drivers. Public awareness of motorcycle safety benefits everyone that uses the nation's roadways, not just motorcyclists, because it can lead to a decrease in car-motorcycle crashes. NHTSA's statistics have found that per vehicle mile traveled, motorcyclists are roughly 37 times more likely than passenger car occupants to die in a traffic crash.

In 2007, motorcycle rider fatalities increased for the tenth straight year. According to NHTSA, between 1997 and 2007, there were 38,566 motorcyclist fatalities and 756,000 motorcyclist injuries on U.S. roadways. In 2007 alone, there were 5,154 motorcycle fatalities and 103,000 injuries, up from 2,116 fatalities and 53,000 injuries in 1997.

Throughout Motorcycle Safety Awareness Month, riders will be educated on the importance of following the rules of the roadway, being alert to other drivers, and always wearing protective gear, such as a helmet. NHTSA estimates that helmets saved 1,784 motorcyclists' lives in 2007, and that 800 more lives could have been saved if motorcyclists involved in fatal non-helmeted crashes had worn helmets.

#### SUMMARY OF THE LEGISLATION

H. Res. 269 expresses support for the goals of Motorcycle Safety Awareness Month, recognizes the important contribution motorcycles bring to the variety of transportation options, encourages all road users to be more aware of motorcycles and motorcyclists' safety, and encourages all riders to receive appropriate training and practice safe riding skills at all times.
