

Calendar No. 478

111TH CONGRESS
2d Session

SENATE

{ REPORT
111-228

ENERGY AND WATER DEVELOPMENT APPROPRIATIONS BILL, 2011

JULY 22, 2010.—Ordered to be printed

Mr. DORGAN, from the Committee on Appropriations,
submitted the following

REPORT

[To accompany S. 3635]

The Committee on Appropriations reports the bill (S. 3635) making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2011, and for other purposes, favorably thereon and recommends that the bill do pass.

Amount in new budget (obligational) authority, fiscal year 2011

Total of bill as reported to the Senate	\$35,073,700,000
Amount of 2010 appropriations	33,978,000,000
Amount of 2011 budget estimate	35,878,274,000
Bill as recommended to Senate compared to—	
2010 appropriations	+ 1,095,700,000
2011 budget estimate	- 804,574,000

Comparative Statement of Budget Authority	212

PURPOSE

The purpose of this bill is to provide appropriations for the fiscal year 2011 beginning October 1, 2010, and ending September 30, 2011, for energy and water development, and for other related purposes. It supplies funds for water resources development programs and related activities of the Department of the Army, Civil Functions—U.S. Army Corps of Engineers’ Civil Works Program in title I; for the Department of the Interior’s Bureau of Reclamation in title II; for the Department of Energy’s energy research activities, including environmental restoration and waste management, and atomic energy defense activities of the National Nuclear Security Administration in title III; and for related independent agencies and commissions, including the Appalachian Regional Commission, Delta Regional Authority, Denali Commission, and the Nuclear Regulatory Commission in title IV.

SUMMARY OF ESTIMATES AND RECOMMENDATIONS

The fiscal year 2011 budget estimates for the bill total \$35,878,274,000 in new budget (obligational) authority. The recommendation of the Committee totals \$35,073,700,000. This is \$804,574,000 below the budget estimates and \$1,095,700,000 above the enacted appropriation for the current fiscal year.

SUBCOMMITTEE HEARINGS

The Appropriations Subcommittee on Energy and Water held three sessions in connection with the fiscal year 2011 appropriation bill. Witnesses included officials and representatives of the Federal agencies under the subcommittee’s jurisdiction.

The recommendations for fiscal year 2011 therefore, have been developed after careful consideration of available data.

VOTES IN THE COMMITTEE

By a vote of 17 to 12 the Committee on July 22, 2010, recommended that the bill, as amended, be reported to the Senate.

TITLE I
DEPARTMENT OF DEFENSE—CIVIL
DEPARTMENT OF THE ARMY
CORPS OF ENGINEERS—CIVIL

INTRODUCTION

The U.S. Army Corps of Engineers is made up of approximately 35,000 civilian and 650 military members that perform both military and Civil Works functions. The military and civilian engineers, scientists and other specialists work hand in hand as leaders in engineering and environmental matters. The diverse workforce of biologists, engineers, geologists, hydrologists, natural resource managers, and other professionals meets the demands of changing times and requirements as a vital part of America's Army.

The Corps' mission is to provide quality, responsive engineering services to the Nation including:

- Planning, designing, building, and operating water resources and other Civil Works projects. (Navigation, Flood Control, Environmental Protection, Disaster Response, et cetera);
- Designing and managing the construction of military facilities for the Army and Air Force. (Military Construction); and
- Providing design and construction management support for other Defense and Federal agencies. (Interagency and International Services).

The Energy and Water bill only funds the Civil Works missions of the Corps of Engineers. Approximately 23,000 civilians and about 290 military officers are responsible for this nationwide mission.

It is important to realize that while the Corps Civil Works programs impact all 50 States and virtually every citizen of our Nation, they are a relatively minor part of the Federal budget. It is instructive to understand the Federal budget and the resources that go into the various programs in order to determine the proper value that perhaps should be placed on these programs.

For fiscal year 2010, the overall Federal budget amounted to \$3,540,000,000,000. Discretionary spending made up \$1,250,000,000,000 or just over 35 percent of the overall budget. The remaining nearly 65 percent of the budget consists of mandatory spending not subject to annual appropriations.

Of the \$1,250,000,000,000 in discretionary spending, \$530,000,000,000 is referred to as non-defense discretionary spending. This amounts to 15 percent of the Federal budget and is what the administration has proposed to freeze for 3 years to reduce the annual budget deficit.

The \$530,000,000,000 in non-defense discretionary spending in fiscal year 2010 was where 97.5 percent of the funds for the Corps of Engineers was appropriated. In fiscal year 2010, the Corps non-defense budget amounted to just more than \$5,300,000,000. That means that the Corps' budget makes up about 1 percent of the non-defense discretionary spending or about 0.15 percent of the overall budget.

A logical question to ask would be what does the Nation receive for an investment of that magnitude? Through its Civil Works program the Corps carries out a wide array of projects that provide:

- Coastal storm damage reduction;
- Disaster preparedness and response;
- Environmental protection and restoration;
- Flood damage reduction;
- Hydropower;
- Navigable waters;
- Recreational opportunities;
- Regulatory oversight; and
- Water supply.

In fiscal year 2010, 1,167 projects were under construction. These included 434 projects specifically authorized by Congress and 733 projects, comprising 9 authorities, of the Continuing Authorities Program.

Of the specifically authorized projects, 191 were flood risk management; 5 were for hydropower; 147 were for navigation; 39 were for environmental restoration; and 52 were for environmental infrastructure.

Forty-one States are served by Corps of Engineers ports and waterways including all States east of the Mississippi River. The Corps operates and maintains 12,000 miles of commercial inland channels. Sixteen percent of U.S. domestic freight was carried by water in 2007 (by ton-miles, excluding air and pipeline). In 2007, 2,734 U.S. companies were operating on U.S. waterways. The Corps operates and maintains 926 harbors on the coasts, inland waterways, and the Great Lakes. Nearly 2.5 billion tons of cargo were handled by U.S. ports and waterways in 2008 (998.7 million tons inbound from foreign sources, 522.1 million tons outbound and 956.3 million tons shipped domestically. The value of the foreign commerce handled at U.S. ports in 2008 was \$1,624,000,000,000. More than 43 percent of the tonnage consisted of shipments of crude oil and petroleum products. The Corps also operates 238 lock chambers on the inland waterway system. The average age of these facilities is 58 years.

To maintain these navigation channels, the Corps dredges approximately 263 million cubic yards of material at a cost of \$1,344,000,000. More than 82 percent of this dredging is done by 51 private firms (33 of which are small businesses). To augment the private commercial dredge fleet, the Corps owns 11 dredges—4 hopper dredges and 7 others.

The Corps manages structures for flood risk management at 674 sites including 563 at Corps of Engineers-owned and -operated dam projects. The Corps also oversees a network of about 11,750 miles of levees either built or controlled by the Corps. The average an-

nual damages prevented by these flood risk management projects for the 10 year period from 1999–2008 was \$22,300,000,000.

The Corps has 75 hydropower projects in operation with 350 generating units. The installed generating capacity of these units is 21,747 megawatts. Seventy billion nine hundred million kilowatt-hours of electricity are generated annually providing \$800,000,000 in revenue to the Treasury. The Corps owns and operates 24 percent of the U.S. hydropower capacity and provides 3 percent of the total U.S. electric capacity. There are another 90 non-Federal power plants located at Corps facilities providing an additional 2,300 megawatts of capacity.

The Corps owns more than 76 million acres and manages an additional 4 million acres at various Corps projects. The total surface area, at full pool level, of all Corps lakes totals 26,300,000 acres, or an area slightly larger than the State of Kentucky.

The total capacity of Corps lakes is 329.2 million acre-feet of storage. Of that amount, the Corps has a total of 9.76 million acre-feet of authorized municipal and industrial water supply storage in 136 projects. These projects are located in 25 States as well as Puerto Rico. Forty-eight Corps project also have authorized irrigation storage. The total investment in municipal and industrial water supply storage is \$1,500,000,000.

The Corps is the top provider for recreation within the Federal Government. Ten percent of the U.S. population visits a Corps project at least once a year—that is more than 370 million visits per year. The Corps has 4,641 recreation sites at 422 Corps projects (mostly lakes). Seventy percent of the U.S. population live within 50 miles of a Corps lake. Twelve million acres of land and water controlled by the Corps is used for recreation. The Corps hosts 20 percent of the visits to Federal recreation areas on 2 percent of Federal lands. Corps projects provide 56,964 miles of shoreline (which is longer than the coastline of the continental United States). The Corps maintains 94,964 campsites, 6,487 miles of trails, and 3,522 boat launch ramps. The Corps has one-third of all U.S. freshwater fishing and 20,000 fishing tournaments are held annually at Corps projects. Visitors spend \$18,000,000,000 annually at Corps projects. Visitation at Corps projects supports more than 350,000 full- or part-time jobs. There are more than 500 concessionaires on Corps projects with gross fixed assets of \$1,000,000,000.

In fiscal year 2009, the Corps acted on 71,260 permit requests through the Corps regulatory program. There were 4,240 individual permits and letters of permission; 18,680 regional general permits; and 26,540 nationwide permits. Two hundred and sixty permits were denied and the applications were withdrawn for 9,750 requests. The Corps also made some 80,000 jurisdictional wetland determinations in fiscal year 2009.

The Corps continues to provide support to local, State, and Federal agencies before, during, and after major disasters. Major disasters responded to in 2009: North Dakota/Minnesota Floods; Continued support to Hurricane Katrina, Gustaf, and Ike recovery operations.

The Corps also supports more than 70 other (non-defense) Government agencies. In fiscal year 2009, the expenditures for this ef-

fort topped \$2,000,000,000 and were paid for by the agencies requesting the assistance. The biggest customers for the Corps' services are: Department of Homeland Security—Customs and Border Protection; Department of Homeland Security—FEMA; Department of State; Environmental Protection Agency [EPA]; and U.S. Agency for International Development.

OVERVIEW AND ANALYSIS OF THE FISCAL YEAR 2011 BUDGET REQUEST

The fiscal year 2011 budget request for the Corps of Engineers is composed of \$4,939,000,000 in new budget authority. This is a decrease of \$186,000,000 from the fiscal year 2010 request. The budget request is \$506,000,000 less than the fiscal year 2010 enacted amount.

The Committee is disappointed that the administration has proposed to invest less in our Nation's water infrastructure in fiscal year 2011 than they did in fiscal year 2010. The Committee is very concerned about the continued large gap between the administration's budget proposal and the annual appropriations provided by this Committee. The Committee would like to find a constructive way to work with the administration to narrow this gap.

The Committee is concerned that the administration is not placing the proper economic value on the Corps' Civil Works program when budgetary resources are parceled out. At a time when this existing infrastructure, the foundation of our economic security and quality of life, is depreciating much faster than it is being recapitalized, when our increasing population is placing much greater stress on the Nation's vital water resources, when shifts in population centers mean new and different problems, and when a growing environmental awareness requires new solutions to persistent problems, this underfunding is unacceptable and threatens our continued well-being. Infrastructure budgets have to be increased. If not, the Nation will continue to face unscheduled outages, damaged and incomplete infrastructure, and other emergency situations that must be dealt with through ever-increasing emergency appropriations. The situations in New Orleans and south Louisiana in the aftermath of Hurricane Katrina should have been a wake-up call to the Nation as to how we should be making investment decisions. A few billion dollars more of investment in advance of Hurricane Katrina would have reduced the outlay of the tens of billions of dollars that the Nation has had to invest since the hurricane.

The Corps Civil Works program means jobs for our citizens in the form of design and construction of the projects, materials and supplies for construction and maintenance not to mention the ancillary services that are provided for all aspects of the Civil Works programs. Just as important to the Nation as the jobs created and retained by these investments are the taxes paid to local, State, and Federal coffers as a result of these investments.

Over the last decade, the infrastructure provided by the Civil Works program has provided more than \$500,000,000,000 in benefits to the Nation as well as revenues to the Treasury through prevention of flood damages, transportation savings, recreation benefits, hydropower revenues, water supply benefits, and environmental benefits. This is a very conservative estimate based on readily quantifiable data. These benefits were achieved on an in-

vestment of less than \$70,000,000,000 (including the funds provided in the aftermath of Hurricane Katrina and the American Recovery and Reinvestment Act). Yet this return on investment seems not to be considered when parcelling out budgetary resources.

The Committee urges the administration to assess the value of the Corps' programs to the national economy and derive a level of investment from that impact that is commensurate with the outputs of this critical infrastructure.

Unfortunately, this budget proposal, like many previous budget proposals, is woefully inadequate in funding national infrastructure needs. It ignores studies and projects that are ongoing and funded in the fiscal year 2010 Energy and Water Appropriations Act, that was agreed to by the Congress and signed into law by the President, in favor of a select group of studies and projects that comport to budgetary criteria devised by the administration. While this is the prerogative of the administration, it should be noted that the criteria utilized is not based in law. It is simply the administration's choice and as such has changed from year to year and from administration to administration.

The Committee differs with the administration concerning benefit-to-cost ratios being utilized to establish priority for funding. The Flood Control Act of 1936 established that project benefits should exceed projects costs. This has been the Corps' longstanding water resource policy and legislative attempts to change this requirement have been unsuccessful. However, the administration has arbitrarily decided that benefits simply exceeding the costs is not a sufficient measure of a project's worth. For fiscal year 2011, the administration has chosen 2.5 to be the threshold for projects to be included in the budget. Yet the administration has even chosen to ignore this requirement.

Of the 95 projects recommended by the administration in the construction account for fiscal year 2011, only 40 had a benefit-to-cost ratio above the arbitrary 2.5 threshold chosen for fiscal year 2011. An additional nine projects with benefit-to-cost ratios of less than 2.5 were included based on "substantial life saving benefits". These 49 projects account for only \$570,000,000 or 34 percent of the requested \$1,690,000,000 for construction. That means that the other 46 projects funded at more than \$1,100,000,000 were chosen by other criteria established by the administration. Some of these criteria, such as dam safety/seepage stability correction and environmental compliance are criteria where the administration and the Congress are in agreement. However, other criteria utilized by the administration are more subjective.

The criteria for determining which studies to budget for appears to be even murkier than the criteria for determining which construction projects to fund. What is obvious is the result. Fewer studies are funded every year than are enacted in the previous appropriation act. These studies provide the information needed to make vital investments in our water resources infrastructure. However, they are de-emphasized in the budget request.

The Regulatory Program is proposed at \$193,000,000 for fiscal year 2011. This is an increase of \$3,000,000 to this program that provides the funding for the Corps nationwide regulatory roles pri-

marily under section 404 of the Clean Water Act and section 10 of the River and Harbor Act of 1899.

The Committee is disappointed that funding for the Formerly Utilized Sites Remedial Action Program [FUSRAP] was cut by \$4,000,000 from the fiscal year 2010 enacted amount of \$134,000,000. This is a \$10,000,000 cut to the program over the last 2 years. This program was transferred to the Corps from the Department of Energy, because the Committee was concerned with management and cost issues of the program within the Energy Department. This is a program that is being well-managed by the Corps and should have stable, adequate budget resources to continue these radiological clean-up activities.

The Flood Control and Coastal Emergencies account is proposed at \$25,000,000 for fiscal year 2011. These funds are proposed for readiness and preparedness activities for the Corps of Engineers.

The Office of the Assistant Secretary of the Army (Civil Works) is proposed as a separate account for \$6,000,000. The Committee continues to believe that the Assistant Secretary's office should be funded in the Defense appropriations bill. However, until such time as that can be reintegrated into that bill, the Committee agrees that the office should be funded as a separate account. The Assistant Secretary's duties encompass much more than the Civil Works functions of the Corps of Engineers and the budget needs of the office should be addressed separately.

The General Expenses [GE] account is proposed at \$185,000,000 for fiscal year 2011. This is the same as the fiscal year 2010 enacted amount. With inflation, this is a cut to the management and oversight functions of the headquarters of the Corps. The Committee notes that the Corps operates one of the most efficient headquarters staffs in the National Capital region. Only about 3.5 percent of their staffing is at headquarters as opposed to 10 percent or more for comparable agencies in the National Capital region.

PLANNING PROGRAM

The Committee is very concerned about the Corps planning program. The Committee believes that the Corps should have a robust planning program to not only address new water resource needs but also to evaluate changes throughout the project development process. Over the last 10 years, the Committee has provided more than \$1,500,000,000 to the Corps for planning studies versus just over \$1,000,000,000 as proposed by the administration for the same period.

As this Committee has noted in the past, planning in the Corps is a specialized skill set and once that ability is lost, it is difficult to re-establish. Most of the criticisms of the Corps' project development process in recent years have centered on problems in the planning process. The Committee has attempted to maintain consistent planning funding in order to retain these skills. Even within the meager planning budgets provided by the administration, some improvements to the planning program such as the Planning Associates Program and Planning Centers of Expertise have been initiated. However, the Planning Centers of Expertise have not been funded to the extent necessary to develop them into an effective planning tool. The Committee has provided additional funding

for these centers in fiscal year 2011 and strongly urges the administration to provide the necessary resources in future budget submissions.

However, somewhere the planning process is breaking down. Despite relatively stable planning budgets, the number of reports by the Chief of Engineers has declined precipitously. In the run-up to the Water Resources Development Act of 2007, 26 Chief of Engineers' reports were completed in 2005 and 2006. However since 2007, only six Chief of Engineers' reports have been completed. Complex planning studies seem to take unbelievable amounts of time.

A General Reevaluation Report [GRR] of an approximately \$1,250,000,000 flood risk management/environmental restoration project in the West has been ongoing since 1998 and has received nearly \$30,000,000 in Federal funds to date. According to the latest schedule, a Chief of Engineers' report is not expected until late 2012. At the other extreme, in the Upper Great Plains, a roughly \$1,250,000,000 flood risk management feasibility study was initiated in 2009 and a draft Chief's report is currently scheduled for December 2010 at a Federal cost of about \$7,000,000. At this rate, the preconstruction engineering and design on the second study may be completed before the GRR on the first.

These are just two of the extremes in the planning program across the Corps Civil Works program. Another problem area is deep draft navigation. These studies also seem to extend for unusually long periods of time and suffer from dramatically increased study costs. Two east coast DOEP draft studies have been underway for more than 10 years with no end in sight to the study process. Across the planning spectrum, studies with shorter schedules are far outweighed by those with unusually long schedules. While inconsistent funding is a reason for some drawn out schedules, it is not the only reason. Some planning efforts seem to go on forever, regardless of the amount of funding provided.

The Committee understands that the planning process is the most difficult phase of the project development process and that a myriad of factors can lengthen or derail a planning study. However, a planning study that lasts longer than 10 years seems excessive. One would think that studies of this length would be limited to the largest, most complex projects that the Corps expects to undertake. Proper planning is critical to the success of every Corps project; however, planning for planning's sake leads to frustration with the planning process.

The Corps is directed to report to this Committee by September 30, 2010, on ways to improve the planning program to reduce these extended planning schedules. This report should address funding needs, process changes, management changes and other elements required to improve the timeliness of the planning process.

THE AMERICAN RECOVERY AND REINVESTMENT ACT OF 2009

The American Recovery and Reinvestment Act of 2009 [ARRA], enacted on February 17, 2009, was an attempt to combat the severe economic downturn by putting our citizens back to work rebuilding our Nation's water resource infrastructure. The Corps was provided \$4,600,000,000 to stimulate job growth by addressing

needed water resource infrastructure needs. The Corps project list was not approved by the administration until May 2009. However, even with this delayed start, the Corps has obligated more than 85 percent of the ARRA funding. More than 44 percent of the funding has gone to small businesses. The Corps is on track to obligate all of this funding before it expires on September 30, 2010.

BUDGET JUSTIFICATIONS

The Committee notes that the budget justifications arrived nearly concurrently with the administration's budget rollout. This is a considerable improvement over the past 2 years. The Committee appreciates the traditional layout of the justifications and notes that information was provided for all accounts.

INLAND WATERWAY TRUST FUND

The Committee was first made aware of the precipitous decline of revenues in the Inland Waterway Trust Fund [IWTF] when the fiscal year 2008 budget was submitted to Congress. At that time, the Committee was told a legislative proposal would be forthcoming. It was developed as a part of the fiscal year 2009 budget request. As such, there was no stakeholder involvement in the proposal. When it was finally presented to Congress—some 12 months later—it was universally panned by the navigation industry. The fiscal year 2009 budget request was predicated on this proposal being enacted. Congress demurred and indicated that a more equitable proposal was needed.

The fiscal year 2011 budget repeats the proposal to phase out the existing fuel tax that funds the IWTF and phase in a lockage fee. Fortunately, the budget was not predicated on this proposal being enacted. The administration proposal only expends existing revenues available in the IWTF and deposits assumed revenues from the lockage fee into the IWTF to be used in subsequent years. This is a much more prudent way to budget with these limited funds.

The Committee is aware of a Government-industry working group that is working to find acceptable ways to enhance revenues in the IWTF while providing an overhaul in the way that IWTF projects are prioritized and budgeted. Much of this group's work will require legislation to effect the changes needed to enhance the funding for these projects. The Committee looks forward to the final product from this working group and the appropriate authorizing committees of the House of Representatives and the Senate acting on this proposal.

Until new revenues are introduced into the IWTF, the Committee will only provide funds for inland waterway projects that can be accommodated within the approximately \$90,000,000 annually that the current fuel tax generates. The Committee has again included legislative text to prohibit the Corps from entering into any new continuing contracts for any inland waterway project until the revenue stream for the IWTF is enhanced.

It should be noted that the Committee has waited through four budget cycles for a viable proposal to more robustly fund the investments that need to be made in the inland waterway system. The Committee continues to support the current cost-shared approach for these projects with half of the funds derived from gen-

eral revenues and half from the IWTF. However, the Committee is only willing to wait so long for the appropriate committees to fulfill their responsibilities and provide the necessary legislation to resolve this issue. Ultimately, this Committee may be forced to act in order to address the serious needs of the inland waterway system.

CONTINUING CONTRACTS AND REPROGRAMMING

The Committee expects the Chief of Engineers to execute the Civil Works program generally in accordance with congressional direction. This includes moving individual projects forward in accordance with the funds annually appropriated. However, the Committee realizes that many factors outside the Corps' control may dictate the progress of any given project or study.

The Committee is retaining the reprogramming legislation provided in the fiscal year 2010 Energy and Water Development Act.

5-YEAR COMPREHENSIVE BUDGET PLANNING

While the Committee appreciates the Corps' attempts to provide a meaningful 5-year budget plan, it recognizes the inherent difficulties between the legislative and executive branches in preparing a useful plan. The executive branch is unwilling to project a 5-year horizon for projects for which they do not budget, leaving a sizeable percentage of the Corps annual appropriations with a year-to-year event horizon for planning purposes. The fact that a sizeable portion of the annual appropriations are dedicated to congressional priorities is not a new phenomenon. Many major public works projects over the last two centuries have been funded on an annual basis without a clear budget strategy. The Committee would welcome the ideas and the opportunity to work with the executive branch to determine a mutually agreeable way to develop an integrated 5-year comprehensive budget that displays true funding needs for congressional as well as administration priorities. Anything less will only give a partial view of the investments needed in water resources infrastructure.

DISCLOSURE PROVISIONS

The budget for the Corps of Engineers consists of individual line items of projects. As presented by the President, the budget contains 975 specific line-item requests for directed spending by the administration. Additional funding is requested by the administration for nationwide line items. All of these line items were specific requests by the administration or the Congress to be funded in fiscal year 2011. They did not request these funds programmatically, they requested them for a specific project in a specific location for a specific purpose.

All of the projects funded in this report have gone through the same rigorous public review and approval process as those proposed for funding by the President. The difference in these projects, of course, is that the congressionally directed projects are not subject to the artificial budgetary prioritization criteria that the administration utilizes to decide what not to fund.

In the interest of providing full disclosure of funding provided in the energy and water bill, all disclosures are made in the report accompanying the bill.

Two tables are provided at the back of this report for disclosure. The first table provides the congressionally directed spending items requested by Members of Congress requiring disclosure under the provisions of Rule 44 of the Standing Rules of the Senate. If the Member requested the budget request or if only the budget request was provided, Member names are not listed next to these items because under the provisions of Rule 44 this would not be considered congressionally directed spending. The second table lists the Presidential directed spending items. While this table is not required under the disclosure provisions of Rule 44, the Committee believes that it is prudent to provide this additional disclosure information.

The purposes for the funding provided in the various accounts is described in the paragraphs associated with each account. The location of the programs, projects, or studies are denoted in the account tables.

GENERAL INVESTIGATIONS

Appropriations, 2010	\$160,000,000
Budget estimate, 2011	104,000,000
Committee recommendation	166,000,000

This appropriation funds studies to determine the need, engineering feasibility, economic justification, and the environmental and social suitability of solutions to water and related land resource problems; and for preconstruction engineering and design work, data collection, and interagency coordination and research activities.

The planning program is the entry point for Federal involvement in solutions to the Nation's water resource problems and needs. Unfortunately, the General Investigations [GI] account amount proposed in the budget is generally the same as what has been proposed in previous budgets. Nationwide studies and programs consume almost half of the administration's GI request. This budget asserts that the Nation should concentrate scarce resources on completing studies but not carrying forward ongoing studies.

The Committee has provided for a robust and balanced planning program for fiscal year 2011. However, no new starts are included in this recommendation. To provide additional transparency in the budget process, the Committee is pleased that the administration has maintained the structure of this account from how it was displayed in the fiscal year 2010 Energy and Water Act.

The first column represents the reconnaissance phase of the planning process. These studies determine if there is a Federal interest in a water resource problem or need and if there is a cost sharing sponsor willing to move forward with the study. The next column represents the feasibility phase of the study. These detailed cost-shared studies determine the selected alternative to be recommended to the Congress for construction. The third column represents the preconstruction engineering and design phase. These detailed cost-shared designs are prepared while the project recommended to Congress is awaiting authorization for construction.

The Committee believes that by segregating the table in this manner, more attention will be focused on the various study phases, and a more balanced planning program will be developed by the administration. As the last two columns are generally cost shared, they demonstrate the commitment by cost-sharing sponsors to be a part of the Federal planning process. By the same token, it also shows the level of commitment of the Federal Government to these cost-sharing sponsors.

The budget request and the recommended Committee allowance are shown on the following table:

Homer Harbor Modification, Alaska.—The Committee recommends \$300,000 to continue feasibility studies of a new harbor basin. The current harbor basin at the Port and Harbor of Homer is utilized beyond its capacity, with boats rafting three and four abreast at many locations in the harbor. Additionally, Homer is experiencing more demand every year for servicing larger fishing vessels, as a delivery port for these vessels to sell their catch, acquire ice, effect repairs, and for outfitting and provisioning as well as lay up between seasons.

Valdez Harbor Expansion, Alaska.—The Committee recommendation includes \$500,000 to continue preconstruction engineering and design studies. Rafting during the commercial fishing season has been reported up to eight boats deep on a regular basis. The problem is highly seasonal, requiring a large need for transient space primarily during the summer months.

May Branch, Arkansas.—Flooding causes an estimated \$1,800,000 in average annual damages. The proposed project would remove 127 structures from the 100-year floodplain, decrease expected annual flood damage by more than 96 percent, reduce highway and railroad traffic interruptions, and decrease the threat of loss of life attendant to flash flooding in urban settings. The Committee recommends \$250,000 is provided to continue preconstruction engineering and design.

Middle Creek, California.—The Committee recommends \$400,000 for preconstruction engineering and design studies. Clear Lake is the largest natural lake entirely within the borders of California. The project would restore the natural functions of the Middle Creek/Clear Lake ecosystem and contribute to the goals of the North American Waterfowl Management Plan.

Chatfield Lake Reallocation Study, Colorado.—The Committee recommendation includes \$267,000 to complete the feasibility studies on reallocation a portion of the flood control storage in the lake to water supply.

Connecticut River Ecosystem Restoration, Connecticut, Massachusetts, New Hampshire, and Vermont.—The Committee recommends \$350,000 for feasibility studies to identify and evaluate measures to reduce stream bank erosion, restore anadromous fisheries migratory corridors and spawning habitat, restore degraded wetlands and riverine habitat and improve the overall fish and wildlife habitat of the Connecticut River. The study will also identify opportunities to modify the management of the dams and water systems to address ecological concerns while maintaining their intended purposes.

Mile Point, Florida.—The Committee recommendation includes \$475,000 to complete feasibility studies and initiate preconstruction engineering and design studies to determine the source of erosion along the Mile Point shoreline and identify solutions to which velocities in the area restrict deep draft navigation to Jacksonville Harbor.

Walton County, Florida.—The Committee recommendation includes \$250,000 to initiate preconstruction engineering and design activities. This project is a test bed for the Institute of Water Resources Hurricane and Storm Damage Reduction model.

Interbasin Control of Great Lakes—Mississippi River Aquatic Nuisance Species, Illinois, Indiana, Ohio, Wisconsin.—The Committee has included \$750,000 for these studies. Within the funds provided, the Committee expects the Corps to include interim studies providing the costs and benefits of hydrologic separation of the Great Lakes watershed from the Mississippi River watershed. Alternatives that would provide cost-effective means to prohibit interbasin transfer of species should be investigated while allowing current projects to continue to provide the benefits of flood control, transportation savings, and recreation uses of the current system.

Prairie Dupont Levee, Illinois.—The Committee recommends \$190,000 for the feasibility study to assess the potential for reconstruction of deteriorated features such as gates and culverts. The recommendation also includes \$660,000 for the deficiency correction preconstruction engineering and design studies to investigate solutions such as rehabilitation/replacement of existing relief wells and the construction of additional relief wells.

Upper Mississippi River—Illinois Waterway Navigation System, Illinois, Iowa, Minnesota, Missouri, and Wisconsin.—The Committee recommendation includes \$4,000,000 for continuation of preconstruction engineering and design studies. The Committee recognizes the need to modernize this more than 60-year-old navigation system and has provided continued funding for both structural design and environmental restoration work.

Louisiana Coastal Area Ecosystem Restoration, Louisiana.—The Committee recommends \$16,595,000 for these important studies. The Committee notes that the Science activities are included within the overall line item rather than being budgeted separately.

Chesapeake Bay, Susquehanna Reservoir Sediment Management, Maryland, Pennsylvania and Virginia.—It has been estimated that 280 million tons of sediment originating from the Susquehanna River watershed are trapped behind the four hydroelectric dams located on the Lower Susquehanna River between Havre de Grace, Maryland, and Harrisburg, Pennsylvania. Three of the four dams Holtwood, Safe Harbor, and York Haven have reached steady state. It is estimated that the Conowingo Dam will cease to have trapping capacity in 15 to 20 years. Once this last reservoir reaches steady state, the sediment input to the bay may increase dramatically. The Committee recommendation includes \$250,000 to initiate feasibility studies to examine the impact of the Lower Susquehanna River Dams on sediment transport into the Bay.

Boston Harbor (45-foot channel), Massachusetts.—The Committee recommendation includes \$1,800,000 to continue studies for this harbor deepening project. The Committee notes that the feasibility phase of this study was initiated in June 2002. Study costs have increased from \$3,500,000 to the current \$6,500,000 while project construction still seems to be years away. This is another example of the extended planning studies that the Corps must resolve.

Great Lakes Remedial Action Plans and Sediment Remediation, Michigan, Illinois, Indiana, Minnesota, New York, Ohio, Pennsylvania, and Wisconsin.—The Committee recommendation includes \$500,000 for these remedial action plans to include studies on the Black, Cuyahoga and Maumee Rivers, Ohio.

Peckman River and Tributaries, New Jersey.—The Committee recommends \$620,000 to complete the feasibility studies of this flood risk management and environmental restoration of the watershed.

Western Lake Erie Basin, Ohio, Indiana, and Michigan.—The feasibility studies will provide a framework for sustainable development in the watershed by examining ecosystem restoration including habitat and wetland restoration, prevention of future environmental losses, elimination of bacterial loadings and pollutants of concern, improvements to navigation channels, and analysis of flood control operations to ensure that they are meeting evolving conditions. Within the funds recommended, work should continue on the Blanchard River Multipurpose Feasibility Study.

Upper Ohio Navigation Study, Pennsylvania.—The Committee recommends \$1,200,000 to continue feasibility studies to evaluate alternatives to maintain safe, reliable, efficient, and environmentally sustainable navigation on the Upper Ohio River.

Sabine-Neches Waterway, Texas.—The Committee recommendation includes \$400,000 to initiate preconstruction engineering and design efforts for navigation modifications up to the Port of Beaumont to improve the efficiency and safety of navigation on the waterway.

Skagit River, Washington.—The Committee recommendation includes \$1,137,000 to continue feasibility studies for flood risk management in the cities of Mount Vernon, Burlington, and La Conner in Skagit County, Washington.

Coastal Field Data Collection.—The Committee has recommended \$3,400,000 for this nationwide program. In addition to budgeted funds of \$1,400,000, \$1,000,000 has been included for Surge and Wave Island Modeling Studies, Hawaii and \$1,000,000 for the Pacific Island Land Ocean Typhoon Experiment Program. The Wave Data Study should also be continued within this overall funding amount. The Committee notes that the Coastal Data Information Program has been moved to a new line item in the Operation and Maintenance account under the remaining items.

Flood Plain Management Services Program.—The Committee recommendation includes \$11,000,000. The Committee has provided a listing in the table of projects that should be given priority if cost sharing funds are available from the local sponsors. However, the Corps should view these amounts as guides and reprogram funds as appropriate to move these studies forward as rapidly as possible.

Planning Assistance to States.—The Committee recommendation includes \$9,000,000 for this nationwide cost-shared program. The Committee recognizes that there are hundreds of these studies ongoing at any given time. The Committee has provided a listing in the table of projects that should be given priority if cost-sharing funds are available from the local sponsors. However, the Corps should view these amounts as guides and reprogram funds as appropriate to move these studies forward as rapidly as possible.

Planning Support Program.—The Committee recommendation includes \$900,000 over the budget request. As the Committee has noted in the introduction, the Corps has a number of Planning Centers of Expertise, however, these Centers do not have the resources necessary to make them truly effective. The additional

funds provided should be utilized to ensure the effectiveness of these Centers and the Corps is urged to budget necessary resources in future budgets to ensure that these Centers of Expertise remain viable assets for the Corps' planning program.

Tribal Partnership Program.—Within the funds provided studies with tribes in New Mexico and with the Lower Brule Sioux Tribe in South Dakota should be undertaken.

Water Resources Priorities Study.—No funds are provided for this study as proposed by the administration.

Research and Development.—The Committee has recommended \$24,892,000 for the Corps nationwide research and development programs. The Committee believes that this is an important area of the Corps' program that should be supported and has recommended \$5,000,000 above the budget request. The Committee believes that some of this additional funding should be applied to global climate change research initiated in fiscal year 2010 particularly concentrating on the effects of sea level rise. The Committee has also recommended \$1,000,000 to continue submerged aquatic vegetation research in the Chesapeake Bay and \$2,000,000 to continue the Urban Flood Demonstration Program in cooperation with the Desert Research Institute.

National Shoreline Study.—The Committee recommends an additional \$375,000 for the national Planning Center of Expertise for Coastal Storm Damage Reduction for continuing to develop a process for managing shore protection projects as part of a systems approach to coastal protection for the purpose of achieving improved project performance, increased cost effectiveness, and enhanced benefits.

CONSTRUCTION, GENERAL

Appropriations, 2010	\$2,031,000,000
Budget estimate, 2011	1,690,000,000
Committee recommendation	1,780,000,000

This appropriation includes funds for construction, major rehabilitation and related activities for water resources development projects having navigation, flood and storm damage reduction, water supply, hydroelectric, environmental restoration, and other attendant benefits to the Nation. The construction and major rehabilitation for designated projects for inland and costal waterways will derive one-half of the funding from the Inland Waterway Trust Fund. Funds to be derived from the Harbor Maintenance Trust Fund will be applied to cover the Federal share of the Dredged Material Disposal Facilities Program.

The administration request for the Construction, General account is \$1,690,000,000, a decrease of \$341,000,000 from the fiscal year 2010 enacted amount. By the Committee's estimate, less than 60 percent of the needed funding is available in this account. The administration request adequately funds only eight projects; the rest are funded at much less than optimum levels. Construction levels will slip due to constrained funding and benefits to the national economy will be deferred. The Committee is concerned that this lack of investment will inevitably lead to another Katrina-style disaster somewhere in the Nation, whether it is a catastrophic failure on the inland waterway system or overwhelmed incomplete or dam-

aged flood control or shore protection infrastructure. The aftermath of Hurricane Katrina should have taught us, if nothing else, that more robust investment before the fact would have led to considerably smaller payouts after the disaster. Yet, based on the budget requests in the intervening 5 years, it is obvious that no lesson has been learned.

The Committee recommendation includes \$1,780,000,000 in new budget authority for this account. The Committee is aware that execution problems in the Continuing Authorities Program have resulted in considerable unobligated balances in this program that are to be carried into fiscal year 2011 and 2012. The Committee has utilized \$120,000,000 of these unobligated balances from this program toward the remainder of the account for fiscal year 2011. Therefore the Construction, General program for fiscal year 2011 is based on a total available amount of \$1,900,000,000. This is \$210,000,000 above the budget request but is still \$131,000,000 below the enacted level. The Committee recognizes that this is considerably less than the needs in the program, but is the best that can be accomplished in this constrained fiscal environment. The Committee will continue to seek additional resources as the bill progresses toward enactment.

The Committee deleted the new construction starts requested by the administration as sufficient funding does not exist in the current budget nor is there reasonable assurance that sufficient funds will be available in the future to accommodate these new items as well as ongoing work.

The appropriation provides funds for the Continuing Authorities Program (projects which do not require specific authorizing legislation), which includes projects for flood control (section 205), emergency streambank and shoreline protection (section 14), beach erosion control (section 103), mitigation of shore damages (section 111), navigation projects (section 107), snagging and clearing (section 208), aquatic ecosystem restoration (section 206), beneficial uses of dredged material (section 204), and project modifications for improvement of the environment (section 1135).

The budget request and the approved Committee allowance are shown on the following table:

TOTAL	1,690,000	1,780,000

Tuscaloosa, Alabama.—The Committee recommends \$8,240,000 to complete the relocation project at Tuscaloosa, Alabama.

Ozark-Jeta Taylor, Arkansas.—This is another case where Administration investments in our infrastructure seem to be penny-wise and pound-foolish. The budget request provided no funds for this on-going continuing contract. Termination costs for this continuing contract are estimated to be \$20,000,000. Energy losses over the past 3 fiscal years exceed \$25,000,000 due to forced outages of the hydropower units. The Committee has recommended \$12,900,000 to complete the rehabilitation work on turbine unit 3. The Committee urges the administration to budget for this contract in future budget submissions.

Red River Below Denison Dam, Arkansas, Louisiana, Oklahoma, and Texas.—The Committee recommends \$2,500,000 to continue levee rehabilitation work in Arkansas and Louisiana to protect the 1.7 million-acre flood plain from crop damage; loss of livestock; damage to levees, railroads, highways, industries, and other river and urban developments.

Red River Emergency Bank Protection, Arkansas, and Louisiana.—The Committee recommends \$2,000,000 for protection of critical infrastructure and land along the Red River below Index,

Arkansas.—The project plan provides for revetment, dikes, or cutoffs that can be accomplished in advance of developing the design for the entire project.

Hamilton Airfield Wetlands Restoration, California.—The Committee recommendation includes \$11,750,000 for this tidal wetland restoration project. This reduction from the budget request is based on updated information from the Corps.

Mid Valley Area Levee Reconstruction, California.—The Committee recommendation includes \$1,500,000 to complete the design of areas two and four of the reconstruction of this flood control

project. The project includes levee reconstruction through installing landside berms with toe drains, ditch relocation, embankment modification, slurry cut-off walls, and developing land for fish and wildlife mitigation.

Oakland Harbor, California.—Within the Committee's recommendation, \$2,087,000 is recommended as a repayment to the Port of Oakland to settle the port's payments in excess of the local cost share on the 42-foot construction project DACW07-95-003.

Tahoe Basin Restoration, California.—The Committee recommends \$4,000,000 for planning, design, and construction assistance for environmental restoration, resource protection and development projects in Lake Tahoe Basin. These projects are part of the \$2,500,000,000 local, State, Federal and private watershed restoration effort referred to as the Lake Tahoe Environmental Improvement Program [EIP]. Of the funds provided, \$2,700,000 are recommended for construction of the Incline and Third Creek restoration project.

Delaware Coast, Cape Henlopen to Fenwick Island, Bethany Beach to South Bethany Beach, Delaware.—The Committee has recommended \$4,700,000 for the second nourishment cycle on this shore protection project.

Delaware Coast Protection, Delaware.—The Committee recommendation includes \$390,000 to reimburse the State for the Federal share of the annual operation and maintenance of the sand bypass facilities.

Everglades and South Florida Ecosystem Restoration, Florida.—The Committee has chosen to display the various, separately authorized components of the project in the table in addition to a single line item as was proposed in the budget. The Committee believes that it is prudent to maintain visibility of the various project elements in the budget process. It is the Committee's understanding that the Corps cannot utilize all of the funding requested for the Site one project in fiscal year 2011 due to the need to complete a post authorization change report on the remaining features of this project due to cost growth. Therefore, the Committee has reduced The Central and Southern Florida element by \$25,000,000 to account for this change. This lowers the overall committee recommendation for the Everglades to \$155,000,000.

Tampa Harbor, Florida.—\$200,000 is provided above the budget request to complete the General Reevaluation Report of the Federal project.

Chicago Sanitary and Ship Canal, Illinois.—The Committee recommends \$11,100,000 for the aquatic nuisance species Barriers I and II and for interim measures for potential barrier bypasses.

Olmsted Locks and Dam, Ohio River, Illinois and Kentucky.—The Committee recommends \$136,000,000 to continue construction of this project. None of the funds provided for the Olmsted Locks and Dam Project or any other construction funds are to be used to reimburse the Claims and Judgment Fund.

Missouri Fish and Wildlife Recovery, Iowa, Kansas, Missouri, Montana, Nebraska, North Dakota, and South Dakota.—The Committee recommends \$74,000,000 for this project. Within the recommended funds, \$12,000,000 is to be used for modifications to the Intake Dam to provide additional habitat for the pallid sturgeon.

Wolf Creek Dam, Lake Cumberland, Kentucky.—The Committee recommends \$134,000,000 for continuation of seepage control measures at Wolf Creek Dam. It is the Committee's understanding that this is the Corps' full funding capability for this project in fiscal year 2011.

Larose to Golden Meadow, Louisiana.—The Committee has recommended \$5,500,000 to continue efforts to provide 100-year flood protection for this project. Surveys show the levee grade is deficient by 12–18 inches.

Chesapeake Bay Environmental Program, Maryland, Pennsylvania, and Virginia.—The Committee has recommended \$1,000,000 for continuation of this project that is integral to the clean-up of the Chesapeake Bay.

Chesapeake Bay Oyster Recovery, Maryland and Virginia.—The Committee recommends \$5,000,000 to continue oyster recovery efforts in the Chesapeake Bay.

Muddy River, Massachusetts.—The Committee recommends \$2,500,000 for the Muddy River, Boston and Brookline, Massachusetts project, \$500,000 of which is to be used along with fiscal year 2010 carryover funds to award a fully funded contract to construct the flood risk management features of Phase I of the project, and \$2,000,000 of which is to be used to complete design of Phase II, including the environmental restoration elements of the project.

Oakland County, Michigan.—The Committee recommends \$500,000 for the George W. Kuhn drain project.

Meramec River Basin, Valley City, Missouri.—The Committee recommendation includes \$2,000,000 for additional flood risk management features to address problems that became apparent during the 2008 flood.

Fort Peck Dam and Lake, Montana.—The Committee recommendation includes \$1,000,000 for continuation of the disposition of Fort Peck cabins.

Rural Nevada, Nevada.—The Committee recommendation includes \$20,000,000 for this project. Within the funds provided, the Corps should give consideration to the Spanish Springs Valley Sewering Project, Phase II; the Indian Springs Wastewater Collection and Treatment System Project; the Moapa Valley Wastewater Collection System Project; Searchlight Water System Improvements Project; Minden Arsenic Compliance Project; Tonopah Water Treatment Project; River Oaks Water and Wastewater Collection System; Murray Creek Storm Drain; Incline Village Wastewater Effluent Pipeline; and also to projects at: Boulder City; Lyon County; Douglas County; Gerlach; Esmeralda County; Fallon; Goldfield; Churchill County; West Wendover; Yerington; Virgin Valley Water District; Lovelock; Truckee Meadows Water Authority; Eldorado Valley; Ely; and Carson City. Other communities that meet the program criteria should be considered as funding allows.

Barnegat Inlet to Little Egg Harbor Inlet, New Jersey.—The Committee recommends \$7,600,000 for construction on this shore protection project.

Acequias Irrigation System, New Mexico.—The Committee recommends \$2,770,000 to continue restoration of these historic irrigation distribution systems.

Wilmington Harbor, North Carolina.—\$300,000 is recommended above the budget request to initiate a general reevaluation study to investigate modification of the anchorage basin.

North Dakota [EI], North Dakota.—The Committee has recommended \$14,300,000 for this program. \$1,600,000 is recommended for the Mandan Raw Water Intake; \$75,000 for the Southeast Water Users District SEWUD; \$1,700,000 for the Grafton Water Treatment Plant Improvements; \$1,375,000 for the North Prairie Rural Water District; \$1,575,000 for the Park River Water Distribution System Improvements; \$900,000 for the Walsh Rural Water District Ground Storage Expansion; \$1,500,000 for the Grand Forks Water Treatment Plant—Pilot Testing and Design; \$275,000 for the Fargo Water Treatment Plant Facility Study Plan; \$1,825,000 for the McKenzie County Regional Water Service; \$750,000 for the Williams Rural Water Phase I; \$1,500,000 for the Greater Ramsey Water District—expansion; \$100,000 for the Williston Waste Water Treatment System Improvements; \$425,000 for the LaMoure Sanitary Sewer Lining Project; and \$700,000 for the Traill Rural Water District Phase III project.

Ohio [EI], Ohio.—The Committee recommendation includes \$2,600,000. \$1,100,000 is recommended for the Euclid project; \$500,000 for the Portsmouth CSO project and \$1,000,000 for the Toledo Waterways Initiative Phase II.

Presque Isle, Pennsylvania.—The Committee recommends \$1,000,000 to continue this project to mitigate flood and coastal storm damage.

Red River Basin Chloride Control, Texas, Oklahoma, Arkansas, and Louisiana.—The Committee recommends \$2,800,000 to continue construction of the project. Within the funds recommended, \$800,000 should be used for the Elm Fork, Area VI element.

Rural Utah, [EI], Utah.—The Committee recommendation includes \$25,000,000 to continue construction of eligible projects.

Within the funds provided, the Corps should give consideration to Duchesne County Water Conservancy District; Uintah County Whiterocks Projects; Emery Town water delivery project; Cedarview Water Conservancy District; Bear River Water Conservancy District; Eureka Town water and sewer project; Monticello City water system project; Long Canal Project, Garfield County; Cottonwood Irrigation Project, Emery County; and Coalville Town water treatment project. Other communities that meet the program criteria should be considered as funding allows.

Lake Champlain Watershed Initiative, Vermont.—The Committee recommendation includes \$500,000 for continuation of this project.

Columbia River Fish Mitigation, Washington, Oregon, and Idaho.—The Committee recommendation includes \$124,385,000 for this project. The reduction made to this project should not be viewed as any diminution of support for this project, rather an attempt to balance out the Corps of Engineers nationwide program among the various missions of the Corps.

Levisa and Tug Forks of the Big Sandy River and Cumberland River, West Virginia, Kentucky, and Virginia.—The Committee recommends \$22,250,000 for the continuation of the project. Within the funds recommended, the Committee includes \$19,500,000 for the Buchanan County, Dickenson County, and Grundy, Virginia

elements. Further, the recommendation includes \$2,750,000 for Kermit, Lower Mingo County, McDowell County, Upper Mingo, and Wayne County, West Virginia.

Aquatic Plant Control Program.—The Committee recommendation includes \$5,000,000 for this program. Funds above the budget request are included for cost-shared programs: \$150,000 for Black Rock Lake, Odensburg, New York and \$500,000 for Lake Champlain, Vermont.

Estuary Restoration Program.—The Committee recommendation includes \$2,500,000 for this nationwide program. Within the funds provided, \$1,000,000 is for the Colorado Lagoon, California, project.

Shore Line Erosion Control Development and Demonstration Program.—The Committee has recommended \$2,500,000 for construction of a shoreline erosion abatement device at Oil Piers in Ventura County, California, as well as monitoring programs and other appropriate activities under this authority.

CONTINUING AUTHORITIES PROGRAM

The Committee will no longer list individual projects in the CAP program in the table. The priority system that has been established will guide the execution of the projects.

For each Continuing Authorities Program [CAP] section, available funds shall be allocated utilizing this sequence of steps until the funds are exhausted:

- capability-level funds for ongoing projects that have executed cost-sharing agreements for the applicable phase;
- capability-level funds for projects that are ready for execution of new cost-sharing agreements for the applicable phase and for which Corps Headquarters authorizes execution of the agreements;
- funds, as permitted by Corps policies, for other projects previously funded for the applicable phase but not ready for execution of new cost-sharing agreements; and
- funds as permitted by Corps policies, for projects not previously funded for the applicable phase.

Funds shall be allocated by headquarters to the appropriate Field Operating Agency [FOA] for projects requested by that FOA. If the FOA finds that the study/project for which funds were requested cannot go forward, the funds are to be returned to Corps headquarters to be reallocated based on the nationwide priority listing. In no case should the FOA retain these funds for use on a different project than the one for which the funds were requested without the explicit approval of the Corps' Headquarters.

Within the step at which available funds are exhausted for each CAP section, funds shall be allocated to the projects in that section that rank high according to the following factors: high overall performance based on outputs; high percent fiscally complete; and high unobligated carry-in. Section 14 funds shall be allocated to the projects that address the most significant risks and adverse consequences, irrespective of phase or previous funding history.

The Corps shall continue the ongoing process for suspending and terminating inactive projects. Suspended projects shall not be reactivated or funded unless the sponsor reaffirms in writing its sup-

port for the project and establishes its willingness and capability to execute its project responsibilities.

In order to provide a mix of studies, design and construction within each CAP section, the Corps is directed to divide the funding generally 80/20 between the Design and Implementation and the Feasibility phases within each authority. The Chief of Engineers shall provide a report to the Committees on Appropriations within 30 days of enactment of this Act detailing how funds will be distributed to the individual items in the various CAP sections for the fiscal year. The Chief shall also provide an annual report at the end of each fiscal year detailing the progress made on the backlog of projects. The report should include the completions and terminations as well as progress of ongoing work.

The Corps may initiate new continuing authorities projects in all sections as funding allows. New projects may be initiated after an assessment is made that such projects can be funded over time based on historical averages of the appropriation for that section and after prior approval by the Committees on Appropriations.

FLOOD CONTROL, MISSISSIPPI RIVER AND TRIBUTARIES, ARKANSAS, ILLINOIS, KENTUCKY, LOUISIANA, MISSISSIPPI, MISSOURI, AND TENNESSEE

Appropriations, 2010	\$340,000,000
Budget estimate, 2011	240,000,000
Committee recommendation	335,000,000

This appropriation funds planning, construction, and operation and maintenance activities associated with water resource projects located in the lower Mississippi River Valley from Cape Girardeau, Missouri to the Gulf of Mexico.

The budget request and the approved Committee allowance are shown on the following table:

SAVINGS AND SLIPPAGE	- 11,162
TOTAL	240,000	335,000

GENERAL INVESTIGATIONS

Morganza to the Gulf, Louisiana.—The Committee has recommended \$2,600,000 to continue development of the Post Authorization Change report and Revised Programmatic Environmental Impact Statement [RPEIS]. Fiscal year 2011 efforts will focus on selecting a recommended plan, completing feasibility-level designs

and costs for the recommended plan, and developing a RPEIS that reflects the recommended plan.

Collection and Study of Basic Data, Arkansas, Illinois, Kentucky, Louisiana, Mississippi, Missouri, and Tennessee.—The Committee recommendation includes \$900,000 above the budget request for LIDAR mapping in the Yazoo Basin, Mississippi.

CONSTRUCTION

Grand Prairie, Arkansas.—The Committee has recommended \$16,000,000 for continued construction of the project. This project will provide for agricultural water supply, ground water protection, and fish and wildlife restoration and enhancement.

Mississippi River Levees, Arkansas, Illinois, Kentucky, Louisiana, Mississippi, Missouri, and Tennessee.—Additional funds above the budget request could be used to continue the preparation of additional NEPA documentation in association with the MRL features of the St. Johns New Madrid, Missouri project; fully fund relief wells at Tunica, Mississippi, Parcel 2; Rena Lara, Mississippi; Magna Vista-Brunswick, Mississippi, Item 463-L; Item 465-L; Reid Bedford-King, Item 422-R; continue ongoing construction contracts; Duncan Point Seepage; and Avondale Ramps.

Yazoo Basin, Big Sunflower Basin, Mississippi.—The Committee recognizes the need to control bank erosion and reduce sedimentation and headcutting in watersheds of the Yazoo Basin for purposes of improving water quality, fisheries, and reducing maintenance. The Committee recommends \$2,200,000 for continued construction of the Yazoo Basin, Big Sunflower River Project. Not more than \$2,200,000 should be used for the continued construction of these water quality and sedimentation reduction measures. The Committee expects the water quality funds to be used for the monitoring and establishment of water quality reference indicators and the development of total maximum daily loads target loads on Yazoo Basin projects.

Yazoo Basin, Delta Headwaters Project, Mississippi.—The Committee has recommended \$23,200,000 for continuation of a joint effort by the Corps of Engineers and the Natural Resources Conservation Service in the Yazoo Basin of Mississippi. Funds are provided for the Corps to undertake construction work in the following watersheds: Abiaca Creek, Batupan Bogue, Black Creek, Coldwater River, Cane-Mussacana Creek, Hurricane-Wolfe Creek, Hickahala-Senatobia Creek, Hotophia Creek, Long Creek, Pelucia Creek, Otoucalofa Creek, Toby-Tubby Creek, Yalobusha River, and Skuna River. The Committee expects the Corps to design and construct future work, acquire real estate, and monitor results for all watersheds in fiscal year 2011 and for future work as required for completion of the total program. The Committee expects the administration to request funds for this vital project.

MAINTENANCE

Mississippi River Levees, Arkansas, Illinois, Kentucky, Louisiana, Mississippi, Missouri, and Tennessee.—Funds above the budget request could be used to resurface the mainline levee below West Memphis, Arkansas; periodic inspections at locations in Arkansas, Kentucky, Mississippi, Missouri, and Tennessee; installation of

levee mile posts at various locations; critical slide repairs; placement of crushed stone surfacing on levees; mitigation; bank stabilization; levee surfacing material and operation and maintenance of the motor vessel *Mississippi*.

Mississippi Lakes.—The Committee has recommended additional funding to address the maintenance backlog at Arkabutla, Sardis, Enid, and Grenada Lakes in Mississippi.

OPERATION AND MAINTENANCE, GENERAL

Appropriations, 2010	\$2,400,000,000
Budget estimate, 2011	2,361,000,000
Committee recommendation	2,495,000,000

This appropriation funds operation, maintenance, and related activities at the water resources projects that the Corps operates and maintains. Work to be accomplished consists of dredging, repair, and operation of structures and other facilities, as authorized in the various river and harbor, flood control, and water resources development acts. Related activities include aquatic plant control, monitoring of completed projects where appropriate, removal of sunken vessels, and the collection of domestic waterborne commerce statistics.

Maintenance of our aging water infrastructure inventory gets more expensive every year, however, it is consistently underfunded. If this trend continues, the Corps will not be able to maintain expected levels of service at all of its projects. The Committee has maintained its tradition of supporting what the budget request terms as “low use harbors and waterways”. The Committee recognizes the importance of these facilities and will continue to provide funding for them. The Committee is concerned about the administration’s O&M request. In fiscal year 2010, the administration proposed a budget of \$2,504,000,000 for operation and maintenance. For fiscal year 2011, the request is \$143,000,000 less. The Committee understands that the O&M budget fluctuates from year to year due to periodic maintenance dredging requirements, however, the general trend should be for this budget to increase. Nearly 75 percent of the O&M budget consists of labor and dredging costs in most years. Labor costs rarely decrease for the Corps as it takes roughly the same amount of manpower to operate Corps projects on a yearly basis. That means that when the budget request is reduced as it is for fiscal year 2011, the only areas available to reduce are dredging and real maintenance items.

This is the wrong trend for this program. The Corps is to be commended for managing to keep as much of their infrastructure operable as they have with the O&M budgets that have been put forward and enacted. The American Recovery and Reinvestment Act of 2009 was a tremendous boost to clear out some of the worst of the backlogged maintenance items and dredging, however, more needs to be done. The Committee recommendation of \$2,495,000,000, \$134,000,000 above the budget request, is a step in the right direction. The Committee urges the administration to commit to a more realistic budget for O&M in fiscal year 2012 and beyond to avoid problems such as occurred on the Ohio River in fiscal year 2010.

In late 2009 and early 2010, transportation was disrupted on the Ohio River twice due to unexpected lock closures. First a miter gate fell off its mounts and into the river at the Markland Lock, closing the main lock chamber for about 6 months. Shippers' costs increased dramatically as tows had to be broken down to move through the much smaller auxiliary lock. Fortunately, there was a smaller redundant lock at the site. If not the river would have been closed above Markland for 6 months. That would mean no shipping by water of any commodities in or out of the Ohio River Valley from Cincinnati, Ohio, to Pittsburgh, Pennsylvania.

To add insult to injury, in January 2010, the mount for the miter gate at the Greenup Lock failed. That lock was out of service for a number of weeks as well. With more than half of the Corps locks more than 50 years old, unscheduled lock closures may be the norm, if more funding is not invested in the infrastructure. With more than 600 million tons of cargo moved on the inland waterway system, these closures would have significant impacts on the national economy. Maintenance of this infrastructure is too important to our national economy to allow it to fail due to short term budget goals.

The budget request and the Committee recommendation are shown on the following table:

TOTAL	2,361,000	2,495,000

Tennessee-Tombigbee Waterway, Alabama and Mississippi.—The Committee recommendation includes additional funds above the budget request for additional dredging, environmental stewardship activities and backlog maintenance.

Bethel Harbor, Alaska.—\$1,000,000 is recommended to for plans and specifications and dredging of this small harbor that serves as a regional transportation center for 50 villages.

Arkansas Lakes, Arkansas.—The Committee recommendation includes funds above the budget request for each of these projects: DeGray Lake, Lake Greeson, and Lake Ouachita, to provide adequate levels of service and for backlog maintenance items.

Ouachita and Black Rivers, Arkansas and Louisiana.—The Committee recommends \$3,000,000 for maintenance dredging of this inland navigation project.

Marina Del Rey, California.—The Committee recommends an additional \$3,000,000 for dredging this project, the largest man-made harbor in the United States with nearly 6,000 boat slips and home to a U.S. Coast Guard cutter. The harbor also serves as the key rescue support for the Los Angeles International Airport.

San Francisco Harbor, California.—The Committee is concerned that significant coastal erosion is occurring in the vicinity of the San Francisco Main Ship Channel, jeopardizing municipal wastewater infrastructure. The Committee expects that the Corps should complete its planning studies and the environmental requirements for a potential project to prevent further deterioration in fiscal year 2011 and directs the Corps to take all steps necessary to proceed to construction no later than fiscal year 2012.

Norwalk Harbor, Connecticut.—The Committee recommends \$1,500,000 for the phase III maintenance dredging of the harbor.

Harbor of Refuge, Lewes, Delaware.—The Committee recommends \$200,000 to update existing preliminary design and condition survey.

Wilmington Harbor, Delaware.—The Committee recommendation includes \$7,020,000 for this project. Additional funds recommended above the budget request are for maintenance of disposal areas and additional dredging.

Intracoastal Waterway, Caloosahatchee to Anclote, Florida.—The Committee recommends \$2,000,000 for maintenance dredging.

Atlantic Intracoastal Waterway, Georgia.—\$1,500,000 is recommended for dredging critical areas of this waterway as well as for work related to new upland disposal sites.

Wilson Lake, Kansas.—The Committee recommendation includes \$300,000 above the budget request for the reallocation study.

Indiana Harbor Confined Disposal Facility, Indiana.—Funds for this project have been included in the CG account.

Calcasieu River and Pass, Louisiana.—The Committee has included additional funds for dredging needs on this project.

J. Bennett Johnston Waterway, Louisiana.—The Committee has included \$4,255,000 above the budget request for backlog maintenance and dredging needs.

Lower Thoroughfare, Maryland.—The Committee recommendation includes \$1,440,000 for dredging needs on this channel that service watermen and the Maryland seafood industry.

Michigan Great Lakes Harbor Maintenance and Dredging, Michigan.—The Committee notes that there are some 80 federally maintained harbors and waterways in Michigan. However, the Committee also notes that fewer than 20 are budgeted. With the limited funding available to the Committee, the Committee has recommended \$8,000,000 under this line item to provide for some of the dredging and maintenance needs of the State rather than trying to fund small amounts for each project. The Committee has listed all of the harbors and waterways in the table that are eligible for this funding. However, recognizing that conditions on these waterways is constantly changing, the Committee is directing the Corps to propose a maintenance program for fiscal year 2011 that would most effectively utilize both the budgeted funds along with the funds provided in this line item for these harbor and waterway projects.

Mouth of the Yazoo River, Mississippi.—The Committee includes additional funds for the maintenance dredging of the entrance to the Vicksburg Harbor.

Rosedale Harbor, Mississippi.—The Committee recommendation includes \$1,200,000 for maintenance dredging of the harbor. The port serves many small communities and the farmers in the area.

Caruthersville Harbor, Missouri.—The Committee recommendation includes \$900,000 to dredge the harbor and turning basin.

Portsmouth Harbor, New Hampshire.—The Committee recommendation includes \$650,000 for the project. This includes \$500,000 for dredging the Simplex Shoals and \$150,000 for environmental documentation and plans and specifications for dredging Sagamore Creek and the other harbor back channels.

Abscon Inlet, New Jersey.—The Committee recommends \$200,000 for dredging of the inlet.

Cape May Inlet to Lower Township, New Jersey.—The Committee has included funding for this project in the construction account.

New York Great Lakes Harbor Maintenance and Dredging, New York.—The Committee notes that there are more than 20 federally maintained harbors and waterways along the Great Lakes in New York. However, the Committee also notes that only five are budgeted. With the limited funding available to the Committee, the Committee has recommended \$1,700,000 under this line item to provide for some of the dredging and maintenance needs of the State rather than trying to fund small amounts for each project. The Committee has listed all of the harbors and waterways in the table that are eligible for this funding. However, recognizing that

conditions on these waterways is constantly changing, the Committee is directing the Corps to propose a maintenance program for fiscal year 2011 that would most effectively utilize both the budgeted funds along with the funds provided in this line item for these harbor and waterway projects.

Coastal Inlets, North Carolina.—The Committee has included additional funds for the coastal inlets on the North Carolina coast that were not funded in the administration's budget request. With the limited funding available to the Committee, the Committee has attempted to provide for some of the dredging needs of the State.

Wilmington Harbor, North Carolina.—The Committee recommendation includes \$600,000 over the budget request for a sand management study for Bald Hill Island.

Garrison Dam and Lake Sakakawea, North Dakota.—The Committee recommends \$100,000 for mosquito control in the Williston area due to the shallow-water mosquito breeding areas created by the impoundment of Lake Sakakawea.

Ohio Great Lakes Harbors.—The Committee has included additional funds for Cleveland, Huron and Toledo Harbors that were underfunded in the administration's budget request. With the limited funding available to the Committee, the Committee has attempted to provide for some of the dredging need of the State. The Committee notes that Cleveland Harbor has got to determine interim and long-term disposal alternatives to avoid closure of the harbor after 2014.

Columbia River at the Mouth, Oregon and Washington.—The Committee recommends \$5,500,000 above the budget request for South Jetty beach material placement.

Providence Harbor, Rhode Island.—The Committee has recommended \$3,800,000 to dredge this project.

Houston Ship Channel, Texas.—The Committee has combined the line items for the Houston Ship Channel, the Bayport Channel, Greens Bayou and the Barbers Point Channel under this single line item for fiscal year 2011 to allow for more efficient utilization of funds on these interconnected navigation channels. The Corps is urged to budget these channels as a single line item in future budget submissions. However, for transparency, the justification sheet should still show the individual amounts for each of the channels. The Committee has also recommended additional funds above the budget request for additional maintenance dredging and other related activities.

Texas Water Allocation Assessment, Texas.—\$1,000,000 is recommended to continue these studies to determine if existing water can be better allocated to support more balanced water use in light of future needs.

Appomattox River, Virginia.—The Committee recommends \$500,000 to complete environmental testing and analysis and obtain environmental permits.

Chinook, Head of Sand Island, and Baker Bay, Washington.—The Committee notes the proximity of Corps navigation facilities on the Columbia River between Chinook and the Head of Sand Island, Washington, and at Baker Bay, Washington, and encourage the Corps of Engineers to seek ways to achieve cost savings and efficiency, such as by utilizing appropriate contracting methods

while having these two projects be considered together when seeking bids and awarding contracts. \$1,700,000 is recommended for dredging at these harbors.

Lake Washington Ship Canal, Washington.—The Committee recommendation includes \$5,100,000 over the budget request for additional maintenance needs at the project.

Mud Mountain Dam, Washington.—Within the funds recommended, the Corps is directed to continue to satisfy Federal fish passage obligations for the term of the cooperative agreement with Puget Sound Energy.

Green Bay Harbor, Wisconsin.—The Committee recommendation includes \$5,000,000 above the budget request for backlog maintenance and dredging needs.

Asset Management/Facilities and Equipment Maintenance.—The Committee recognizes the critical importance of protecting the large Federal investment in the Nation's aging inventory of water infrastructure and the key objectives of the Corps' asset management program in this regard. Improving system reliability and efficiency, extending useful life, minimizing risk, and identifying critical maintenance needs (on a risk basis) will achieve cost savings to better meet service needs across the Nation. The Committee has therefore provided \$500,000 to initiate an automated risk based asset management system including, but not limited to, condition assessments, geospatial mapping, data base integration/interoperability and photogrammetric visualization of the inventory. The Corps shall also evaluate technologies for real time dam monitoring for emergency events and the subsurface piping and seepage problems associated with aging dams and levees. The Corps is urged to budget for this automated system in future budget submissions.

Coastal Data Information Program.—The Committee believes that this is a better account for this work to be funded than the GI account where it has been previously funded. The Committee recognizes the importance of accurate directional wave measurements to the success of coastal Corps projects and notes that nationwide, coastal Corps districts have called for sustained and enhanced wave information as a top data priority. The additional funding recommended above the budget request along with the budget request is directed toward the maintenance of wave observations and the expansion of the national wave monitoring network. The Corps is requested to report back to the Committee on its plan to address critical data gaps in this system.

National Coastal Mapping.—A total of \$9,500,000 is recommended for this program. Additional funds recommended above the budget request are for LIDAR bathymetry for use in regional sediment management and for Coastal Zone Mapping and Imaging LIDAR/LASER to be conducted with the University of Southern Mississippi.

Regional Sediment Management Demonstration Program.—The Committee has recommended \$5,000,000 for this program, \$3,000,000 above the budget request. Within the funds recommended, the Corps is directed to undertake studies for the State of Hawaii; the State of North Carolina; South Coastal Rhode Island; Delaware Estuary, New Jersey; and for Chesapeake Bay, New Point Comfort, Mathews County, Virginia.

REGULATORY PROGRAM

Appropriations, 2010	\$190,000,000
Budget estimate, 2011	193,000,000
Committee recommendation	193,000,000

An appropriation of \$193,000,000 is recommended for the regulatory program of the Corps of Engineers.

This appropriation provides for salaries and costs incurred administering regulation of activities affecting U.S. waters, including wetlands, in accordance with the Rivers and Harbors Act of 1899 33 U.S.C. section 401, the Clean Water Act of 1977 Public Law 95–217, and the Marine Protection, Research and Sanctuaries Act of 1972 Public Law 92–532.

The appropriation helps maintain program performance, protects important aquatic resources, and supports partnerships with States and local communities through watershed planning efforts.

FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM

Appropriations, 2010	\$134,000,000
Budget estimate, 2011	130,000,000
Committee recommendation	130,000,000

The Committee recommends an appropriation of \$130,000,000 to continue activities related to the FUSRAP in fiscal year 2005.

The responsibility for the cleanup of contaminated sites under the Formerly Utilized Sites Remedial Action Program was transferred to the Army Corps of Engineers in the fiscal year 1998 Energy and Water Development Appropriations Act, Public Law 105–62.

FUSRAP is not specifically defined by statute. The program was established in 1974 under the broad authority of the Atomic Energy Act and, until fiscal year 1998, funds for the cleanup of contaminated defense sites had been appropriated to the Department of Energy through existing appropriation accounts. In appropriating FUSRAP funds to the Corps of Engineers, the Committee intended to transfer only the responsibility for administration and execution of cleanup activities at eligible sites where remediation had not been completed. It did not intend to transfer ownership of and accountability for real property interests that remain with the Department of Energy.

The Corps of Engineers has extensive experience in the cleanup of hazardous, toxic, and radioactive wastes through its work for the Department of Defense and other Federal agencies. The Committee always intended for the Corps' expertise be used in the same manner for the cleanup of contaminated sites under FUSRAP. The Committee expects the Corps to continue programming and budgeting for FUSRAP as part of the Corps of Engineers—Civil program. The Committee directs the Corps to prioritize sites that are nearing completion during fiscal year 2008.

The Corps is directed to prioritize sites that are nearing completion. The Committee directs the Corps of Engineers during fiscal year 2011 to complete the Remedial Investigation/Feasibility Study of the former Sylvania nuclear fuel site at Hicksville, New York and to proceed expeditiously to a Record of Decision and, if appropriate, initiate any necessary remediation in accordance with

CERCLA. The Secretary of the Army shall submit a report to the Committees on Appropriations of the House of Representatives and the Senate detailing the progress not later than 120 days after enactment of this act.

FLOOD CONTROL AND COASTAL EMERGENCIES

Appropriations, 2010	\$30,000,000
Budget estimate, 2011	30,000,000
Committee recommendation	

The Committee has recommended \$30,000,000 for the Flood Control and Coastal Emergencies account. This account provides funds for preparedness activities for natural and other disasters, response, and emergency flood fighting and rescue operations, hurricane response, and emergency shore protection work. It also provides for emergency supplies of clean water where the source has been contaminated or where adequate supplies of water are needed for consumption.

GENERAL EXPENSES

Appropriations, 2010	\$185,000,000
Budget estimate, 2011	185,000,000
Committee recommendation	185,000,000

This appropriation finances the expenses of the Office, Chief of Engineers, the Division Offices, and certain research and statistical functions of the Corps of Engineers. The Committee recommendation is \$185,000,000.

Executive Direction and Management.—The Office of the Chief of Engineers and 8 division offices supervise work in 38 district offices.

Humphreys Engineer Center Support Activity.—This support center provides administrative services (such as personnel, logistics, information management, and finance and accounting) for the Office of the Chief of Engineers and other separate field operating activities.

Institute for Water Resources.—This institute performs studies and analyses, and develops planning techniques for the management and development of the Nation's water resources.

United States Army Corps of Engineers Finance Center.—This center provides centralized support for all Corps finance and accounting.

Office of Congressional Affairs.—The Committee believes that an Office of Congressional Affairs for the Civil Works Program would hamper the efficient and effective coordination of issues with the Committee staff and Members of Congress. The Committee believes that the technical knowledge and managerial expertise needed for the Corps headquarters to effectively address Civil Works authorization, appropriation, and headquarters policy matters resides in the Civil Works organization. Therefore, the Committee strongly recommends that the Office of Congressional Affairs not be a part of the process by which information on Civil Works projects, programs, and activities is provided to Congress.

The Corps is reminded that General Expense funds are appropriated solely for the executive management and oversight of the

Civil Works Program under the direction of the Director of Civil Works.

OFFICE OF THE ASSISTANT SECRETARY OF THE ARMY (CIVIL WORKS)

Appropriations, 2010	\$5,000,000
Budget estimate, 2011	6,000,000
Committee recommendation	6,000,000

The Committee has recommended \$6,000,000 for the Office of the Assistant Secretary of the Army (Civil Works) [OASA(CW)]. As has been previously stated, the Committee believes that this office should be funded through the Defense appropriations bill and directs the administration to budget for this office under the Department of Defense, Operation and Maintenance—Army account in future budget submissions. It is the Committee's opinion that the traditional role of the ASA(CW) is to provide the Chief of Engineers advice about policy matters and generally be the political spokesperson for the administration's policies; however, the Chief of Engineers is responsible for carrying out the program. This is underscored by the administration's budget documents that state that the OASA(CW) provides policy direction and oversight for the civil works program and the Headquarters of the Corps provides executive direction and management of the civil works program.

The Assistant Secretary of the Army for Civil Works advises the Secretary of the Army on a variety of matters, including the Civil Works program of the Corps of Engineers. The Assistant Secretary is a member of the Army Secretariat with responsibilities, such as participating in continuity of Government exercises that extend well beyond Civil Works. The Assistant Secretary also oversees the administration, operation and maintenance, and capital development of Arlington National Cemetery and the Soldiers' and Airmen's Home National Cemetery. Congressional oversight of the Army Cemetery program lies not with the Energy and Water Appropriations Subcommittee, but rather with the Appropriations Subcommittee on Military Construction and Veterans Affairs and with the Committee on Veterans Affairs.

The Army's accounting system does not track OMA funding of overhead or Army-wide support offices on the basis of which office receives support, nor would it be efficient or effective to do so for a 20-person office. Instead, expenses such as legal support, personnel services, finance and accounting services, the executive motor pool, travel on military aircraft, and other support services are centrally funded and managed on a department-wide basis. Transferring the funding for the expenses of the Assistant Secretary for Civil Works to a separate account has greatly complicated the Army's accounting for such indirect and overhead expenses with no commensurate benefit to justify the change. The Committee does not agree that these costs should be funded in this bill and therefore has only provided funding for salaries and expenses as in previous years.

GENERAL PROVISIONS—CORPS OF ENGINEERS—CIVIL

Section 101. The bill includes language concerning reprogramming guidelines.

Section 102. The bill includes language prohibiting implementation of competitive sourcing or HPO.

Section 103. The bill includes language concerning continuing contracts and the Inland Waterway Trust Fund.

Section 104. The bill includes language concerning report notifications.

Section 105. The bill includes a provision providing the Corps of Engineers authorization for emergency measures to exclude Asian carp from the Great Lakes. It should be noted that when considering this language for inclusion in this bill that the Committee did not consider hydrologic separation of the Great Lakes Basin from the Mississippi River Basin to be an emergency measure. The Committee believes that the issue of hydrologic separation should be fully studied by the Corps of Engineers and vetted by the appropriate congressional authorizing committees and specifically enacted into law rather than have implementation be attempted through this limited provision.

Section 106. The bill includes language deauthorizing a portion of a project.

Section 107. The bill includes language modifying the scope of a project.

Section 108. The bill includes language concerning a project cost limit change.

Section 109. The bill includes language concerning the utilization of the Revolving Fund for the acquisition of a building.

Section 110. The bill includes language concerning the utilization of the Revolving Fund for the construction of three buildings.

Section 111. The bill includes language concerning a project cost limit change.

Section 112. The bill includes language modifying the boundaries of a project.

Section 113. The bill includes language deauthorizing a portion of a project.

Section 114. The bill includes language concerning operation and maintenance of a project.

Section 115. The bill includes language concerning leasing of property.

Section 116. The bill includes language concerning acquisition of property.

Section 117. The bill includes language modifying the cost sharing for certain projects.

Section 118. The bill includes language concerning a property transfer.

TITLE II
DEPARTMENT OF THE INTERIOR
CENTRAL UTAH PROJECT COMPLETION ACCOUNT

Appropriations, 2010	\$42,004,000
Budget estimate, 2011	43,004,000
Committee recommendation	43,004,000

The Committee recommendation for fiscal year 2011 to carry out the provisions of the Central Utah Project Completion Act totals \$43,004,000. An appropriation of \$38,810,000 has been provided for Central Utah project construction; \$2,500,000 for fish, wildlife, and recreation, mitigation and conservation. The Committee recommendation provides \$1,694,000 for program administration and oversight.

Legislative language is included which allows up to \$1,500,000 of the funds provided to be used for administrative costs.

The Central Utah Project Completion Act (titles II–VI of Public Law 102–575) provides for the completion of the central Utah project by the Central Utah Water Conservancy District. The Act also authorizes the appropriation of funds for fish, wildlife, recreation, mitigation, and conservation; establishes an account in the Treasury for the deposit of these funds and of other contributions for mitigation and conservation activities; and establishes a Utah Reclamation Mitigation and Conservation Commission to administer funds in that account. The act further assigns responsibilities for carrying out the act to the Secretary of the Interior and prohibits delegation of those responsibilities to the Bureau of Reclamation.

AMERICAN RECOVERY AND REINVESTMENT ACT

The American Recovery and Reinvestment Act of 2009 [ARRA] enacted on February 17, 2009, was an attempt to combat the severe economic downturn by putting our citizens back to work rebuilding our Nation's water resource infrastructure. Through the Bureau of Reclamation's Water and Related Resources Account, \$50,000,000 was provided to stimulate job growth by addressing water resource infrastructure needs in the Central Utah Project area. All of this ARRA funding has been obligated.

BUREAU OF RECLAMATION

INTRODUCTION

The Bureau of Reclamation was established in 1902 with the primary mission of harnessing the western rivers that led to homesteading and the economic development in the west. Today, Reclamation has evolved into a contemporary water management

agency. In addition to the traditional missions of bringing water and power to the west, Reclamation has developed and continues to develop, programs, initiatives, and activities that will help the Western States, Native American tribes, and others meet new water needs and balance the multitude of competing uses of water in the West.

While Reclamation only has projects in the 17 Western States, their programs impact the entire Nation. Reclamation is the largest wholesaler of water in the country operating 348 reservoirs with a total storage capacity of 245 million acre-feet. Reclamation projects deliver 10 trillion gallons of water to more than 31 million people each year, and provide 1 out of 5 Western farmers (140,000) with irrigation water for 10 million acres of farmland that produce 60 percent of the Nation's vegetables and 25 percent of its fruits and nuts. Reclamation manages, with partners, 289 recreation sites that have 90 million visits annually.

Reclamation is also the second largest producer of hydroelectric power in the Western United States. Fifty-eight powerplants annually provide more than 41 billion kilowatt hours generating nearly \$1,000,000,000 in power revenues and produce enough electricity to serve 3.5 million homes. Reclamation's power revenues to the Treasury alone justify the investments proposed in the budget request. When water supply, recreation, environmental, and other ancillary benefits are considered, the return on this investment is greatly increased.

As with the Corps of Engineers budget, the Committee does not believe that the administration properly values the economic input of the Bureau of Reclamation's programs to the national economy. Reclamation's budget amounted to a meager 0.21 percent of the \$530,000,000,000 in nondefense discretionary spending in fiscal year 2010. Or more broadly, Reclamation's budget amounted to 0.03 percent of the entire \$3,540,000,000,000 fiscal year 2010 Federal budget.

The Committee urges the administration to assess the value of Reclamation's programs to the national economy and derive a level of investment from that impact that is commensurate with the outputs of this critical infrastructure.

OVERVIEW AND ANALYSIS OF THE FISCAL YEAR 2011 BUDGET REQUEST

The fiscal year 2011 budget request for the Bureau of Reclamation is composed of \$1,064,697,000 in new budget authority. The budget request is \$23,019,000 less than the fiscal year 2010 enacted amount but is an increase of \$44,014,000 from the fiscal year 2010 request.

The Committee is pleased that the administration has chosen to invest marginally more in Western water infrastructure in fiscal year 2011, but the needs far outweigh the amount proposed. Many Reclamation projects are 100 years old. A majority are more than 50 years old. This aging infrastructure desperately needs to be recapitalized if the Nation intends to continue to reap the benefits that this infrastructure provides. Besides the jobs created by the construction and maintenance of the existing infrastructure, this infrastructure has greatly contributed to the population boom in the Western States over the last 50 years. This population boom

and the jobs and taxes to Federal, State, and local coffers that accompanied it would not have been possible without the infrastructure provided by the Bureau of Reclamation.

Unfortunately this budget proposal is woefully inadequate in funding the infrastructure needs. The Committee is particularly disappointed to see that rural water projects are greatly under-funded in this budget. In many cases the budget proposals for these projects are less than the inflation rate for the project. In other words, at this level of investment, these projects will never be completed because project costs are increasing faster than the amount recommended by the administration.

The largest account in Reclamation's budget is the Water and Related Resources account. The administration budget proposal includes \$913,582,000 for this account. This is a decrease of \$37,576,000 from the fiscal year 2010 enacted amount, but it is an increase of \$20,457,000 more than the administration's fiscal year 2010 budget request.

The Central Valley Project Restoration Fund is proposed at \$49,915,000 for fiscal year 2011. This is an increase of \$14,557,000 over the fiscal year 2010 enacted amount. This account is primarily funded from revenues collected from water and power customers. Levels of funding in this account are based on a 3-year rolling average of revenues collected.

The California Bay-Delta Restoration account is proposed at \$40,000,000 for fiscal year 2011. This is the same as the fiscal year 2010 enacted amount. The Committee notes that this is a \$9,000,000 increase over the administration's fiscal year 2010 budget request.

The Policy and Administration account is requested at \$61,200,000, the same as the fiscal year 2010 enacted amount. This is also the same as the fiscal year 2010 budget request.

AMERICAN RECOVERY AND REINVESTMENT ACT

The American Recovery and Reinvestment Act of 2009 [ARRA] enacted on February 17, 2009, was an attempt to combat the severe economic downturn by putting our citizens back to work rebuilding our Nation's water resource infrastructure. The Bureau of Reclamation was provided \$950,000,000 to stimulate job growth by addressing water resource infrastructure needs. Reclamation has obligated more than 85 percent of their ARRA funding. Reclamation is on track to obligate all of this funding before it expires on September 30, 2010.

WATER AND RELATED RESOURCES

Appropriations, 2010	\$951,158,000
Budget estimate, 2011	913,582,000
Committee recommendation	938,600,000

An appropriation of \$938,600,000 is recommended by the Committee for general investigations of the Bureau of Reclamation. The water and related resources account supports the development, management, and restoration of water and related natural resources in the 17 Western States. The account includes funds for operating and maintaining existing facilities to obtain the greatest overall level of benefits, to protect public safety, and to conduct

studies on ways to improve the use of water and related natural resources. Work will be done in partnership and cooperation with non-Federal entities and other Federal agencies.

The Committee has divided underfinancing between the Resources Management subaccount and the Facilities Operation and Maintenance subaccount. The Committee directs that the underfinancing amount in each subaccount initially be applied uniformly across all projects within the subaccounts. Upon applying the underfinanced amounts, normal reprogramming procedures should be undertaken to account for schedule slippages, accelerations, or other unforeseen conditions.

DISCLOSURE PROVISIONS

The budget for the Bureau of Reclamation consists of individual line items of projects. As presented by the President, the budget contains 211 specific line-item requests for directed spending by the administration. An additional 43 line-item requests for funding by the administration is for nationwide line items. All of these line items were specific requests by the administration of the Congress to be funded in fiscal year 2011. They did not request these funds programmatically, they requested them for a specific project in a specific location for a specific purpose.

All of the projects funded in this report have gone through the same rigorous public review and approval process as those proposed for funding by the President. The difference in these projects, of course, is that the congressionally directed projects are not subject to the artificial budgetary prioritization criteria that the administration utilizes to decide what not to fund.

In the interest of providing full disclosure of funding provided in the energy and water bill, all disclosures are made in the report accompanying the bill.

Two tables are provided at the back of this report for disclosure. The first table provides the congressionally directed spending items requested by Members of Congress requiring disclosure under the provisions of Rule 44 of the Standing Rules of the Senate. If the Member requested the budget request or if only the budget request was provided, Member names are not listed next to these items because under the provisions of Rule 44 this would not be considered congressionally directed spending. The second table lists the Presidential directed spending items. While this table is not required under the disclosure provisions of Rule 44, the Committee believes that it is prudent to provide this additional disclosure information.

The purposes for the funding provided in the various accounts is described in the paragraphs associated with each account. The location of the programs, projects, or studies are denoted in the account tables

Subtotal	178,024	193,507	157,524 (16,800)	194,507 (8,493)
TOTAL	489,909	423,673	522,420	416,180

All American Canal, California.—The Committee has recommended \$1,000,000 to initiate the Imperial Dam Electrification Rehabilitation project. The Committee understands that a repayment contract will have to be negotiated with the Imperial Irrigation District under the provisions of Public Law 111-11, Title IX, Subtitle G—Aging Infrastructure before any funding can be provided for the project.

Central Valley Project—American River Division.—\$920,000 has been recommended above the budget request for the El Dorado Irrigation District Temperature Control Device.

Central Valley Project—Miscellaneous Project Programs.—The Committee recommendation includes \$2,000,000 for anadromous fish screens.

Central Valley Project—Friant Division.—The Committee recommendation includes \$8,000,000 for the San Joaquin River Restoration. These funds should be utilized in conjunction with and in advance of those funds available from the San Joaquin River Restoration Fund. The Committee encourages the timely completion of all environmental review, feasibility, and design documents to allow for construction to begin in fiscal year 2011 on the Friant-Kern and Madera Canals Capacity Correction projects, and further encourages the expeditious completion of studies to inform the hatchery and genetics management plan and other actions necessary for reintroduction of salmon in 2012.

Hawaii Water Resources Study, Hawaii.—The Committee recommends \$300,000 to update the Hawaii Water Resources Study. This study is especially critical in view of the significant changes to plantation agriculture and the related water systems that have prevailed for more than 100 years in the State of Hawaii.

Milk River Project.—\$1,000,000 has been recommended for the St. Mary Diversion Rehabilitation Project. These funds should be utilized using applicable Reclamation Law and as directed in this act.

Pick-Sloan Missouri Basin, Garrison Diversion Unit, North Dakota.—Within the Committee recommendation, \$32,000,000 is recommended for rural water projects. Of this amount, \$16,000,000 shall be expended for the following projects: \$2,000,000 for the Northwest Area Water Supply; \$7,000,000 for the South Central Regional Water District; and \$7,000,000 for the Southwest Pipeline. Additionally the Committee recommends \$3,120,000 for the Standing Rock Sioux Tribe Irrigation Project.

Oregon Investigations Program, Oregon.—\$300,000 above the budget request is recommended for developing appraisal-level designs and cost estimates for Umatilla on-reservation distribution systems.

Water for Irrigation Streams and Economy Feasibility Study.—The Committee recommendation includes \$400,000 for the Water for Irrigation Streams and Economy Feasibility study.

Tualatin Valley Water Supply Feasibility Study, Oregon.—The Committee understands that Reclamation has sufficient funds available for the feasibility study and recognizes that the completion of the Bureau of Reclamation's Scoggins Dam Corrective Action Alternative Study is integral to determining how the State, local and Federal partners will proceed to address dam safety and

long-term water needs of the region. Therefore, the Committee urges Reclamation to maintain its schedule for completion of the Scoggins Dam CAAS in Federal fiscal year 2011 in order to address these needs in a timely and efficient manner.

Northern Utah Investigations Program, Utah.—The Committee has recommended an additional \$500,000 for the Rural Water Technology Alliance.

Yakima River Basin Water Enhancement Project, Washington.—The Committee recommends an additional \$4,000,000 above the budget request for the Diversion Reduction Agreement with the Sunnyside Irrigation District to address water shortages in the basin.

Colorado River Basin Salinity Control Project—Title I.—The Committee recommends \$1,000,000 above the budget request for plant replacements that would contribute to the successful pilot run of the Yuma Desalting Plant.

Drought Emergency Assistance.—The Committee has provided the budget request for this program. Within the funds provided, the Committee urges the Bureau of Reclamation to recognize the unique conditions in Hawaii and provide full and fair consideration of the request for drought assistance from the State of Hawaii and fund if meritorious.

Research and Development, Science and Technology Program.—The Committee recommends \$1,000,000 above the budget request for Quagga and Zebra Mussel research activities. The Committee is concerned about the impacts to western waters of these two invasive species. Reclamation efforts to date have necessarily focused on addressing the problems caused by the mussels at Reclamation facilities. The Committee believes that Reclamation should establish a research program geared toward eradicating or controlling these invasive species.

Water Conservation Field Services Program.—Within the amounts provided, Reclamation is urged to continue urban water conservation projects identified through the Metropolitan Water District of Southern California Innovative Conservation Program; industrial water efficiency surveys to assess opportunities to conserve water in industrial water use; and for weather based irrigation controller activities to pilot ways to speed distribution and acceptance of these landscape water efficiency devices.

WaterSMART Program.—Within the amounts provided for the challenge grants, funds are included for the Desert Research Institute to create a systems framework to identify solutions for addressing water supply, flood control, natural resources and climate change challenges. The Committee also recommends that the Education Center at the Conservation Garden Park, Utah and the Gravel Pit Aquifer Storage and Recovery Project, Utah should be considered for challenge grants. Within the amounts provided for title XVI, Water Reclamation, and Reuse under this item, the Committee has recommended \$2,500,000 for the WaterReuse Foundation. These funds are available to support the Foundation's research priorities.

CENTRAL VALLEY PROJECT RESTORATION FUND

Appropriations, 2010	\$35,358,000
Budget estimate, 2011	49,915,000
Committee recommendation	49,915,000

The Committee recommends an appropriation of \$49,915,000 for the Central Valley Project Restoration Fund.

The Central Valley Project Restoration Fund was authorized in the Central Valley Project Improvement Act, title 34 of Public Law 102-575. This fund was established to provide funding from project beneficiaries for habitat restoration, improvement and acquisition, and other fish and wildlife restoration activities in the Central Valley project area of California. Revenues are derived from payments by project beneficiaries and from donations. Payments from project beneficiaries include several required by the act (Friant Division surcharges, higher charges on water transferred to non-CVP users, and tiered water prices) and, to the extent required in appropriations acts, additional annual mitigation and restoration payments.

CALIFORNIA BAY-DELTA RESTORATION

(INCLUDING TRANSFER OF FUNDS)

Appropriations, 2010	\$40,000,000
Budget estimate, 2011	40,000,000
Committee recommendation	40,000,000

The Committee recommendation includes an appropriation of \$40,000,000 for the CALFED Bay-Delta Program.

This account funds activities that are consistent with the CALFED Bay-Delta Program, a collaborative effort involving 18 State and Federal agencies and representatives of California's urban, agricultural, and environmental communities. The goals of the program are to improve fish and wildlife habitat, water supply reliability, and water quality in the San Francisco Bay-San Joaquin River Delta, the principle hub of California's water distribution system.

POLICY AND ADMINISTRATION

Appropriations, 2010	\$61,200,000
Budget estimate, 2011	61,200,000
Committee recommendation	61,200,000

The Committee recommendation for general administrative expenses is \$61,200,000.

The policy and administrative expenses program provides for the executive direction and management of all reclamation activities, as performed by the Commissioner's offices in Washington, DC, Denver, Colorado, and five regional offices. The Denver office and regional offices charge individual projects or activities for direct beneficial services and related administrative and technical costs. These charges are covered under other appropriations.

GENERAL PROVISIONS—DEPARTMENT OF THE INTERIOR

Section 201. The bill includes language regarding Bureau of Reclamation Reprogramming.

Section 202. The bill includes language regarding the San Luis Unit and the Kesterson Reservoir in California.

Section 203. The bill includes language that states requirements for purchase or lease of water from the Middle Rio Grande or Carlsbad Projects in New Mexico.

Section 204. The bill includes language regarding Drought Emergency Assistance.

Section 205. The bill includes language concerning a project cost ceiling increase.

Section 206. The bill includes language regarding the Desert Terminal Lakes Program.

Section 207. The bill includes language extending a water service contract.

Section 208. The bill includes language concerning certain recreational use permits.

TITLE III
DEPARTMENT OF ENERGY
TRANSPARENCY

The Committee recognizes the Department's efforts to achieve greater transparency in financial and programmatic performance. This has particularly been demonstrated in the execution of the American Recovery and Reinvestment Act. In other more focused efforts, the Committee has seen that greater transparency has exposed significant financial risks and liabilities facing the Department, such as those liabilities arising from contractor managed defined benefit pension liabilities and other contractor benefits. The Committee expects the Department to apply the same degree of transparency to its base programs and mission support activities by the end of fiscal year 2011.

CYBER SECURITY

Pervasive and sustained cyber attacks against the United States are on the rise and continue to pose a threat to Federal operations. DOE is particularly vulnerable because web-based systems and data support critical mission activities related to energy security, nuclear security, scientific discovery and innovation, and environmental programs. The Committee supports DOE's efforts to implement cyber security measures to protect classified systems and networks. Moreover, the Committee is encouraged that a November 2009 Office of Independent Oversight report found that DOE's classified systems are adequately protected against cyber security threats, including the threat of compromise from external sources and the threat from malicious insiders. However, the Office also found remaining weaknesses that, if addressed, could further strengthen DOE's cyber security. The major weaknesses include (1) a lack of clear policies and guidance to ensure the appropriate level of protection for information that is shared between networks that operate at different classification categories, (2) operational and system-specific risks are not being fully evaluated and documented, and (3) site-specific cyber security plans are not sufficiently detailed to address the full range of threats. The Committee directs DOE to submit a report by April 1, 2011, on how the Department resolved the program weaknesses identified in the November 2009 Office of Independent Oversight report.

REPROGRAMMING GUIDELINES

The Department of Energy is directed to operate in a manner fully consistent with the following reprogramming guidelines. A reprogramming request must be submitted to the Committees on Appropriations for consideration before any implementation of a reor-

ganization proposal which includes moving previous appropriations between appropriation accounts. The Department is directed to inform the Committees promptly and fully when a change in program execution and funding is required during the fiscal year. To assist the Department in this effort, the following guidance is provided for programs and activities funded in the Energy and Water Development and Related Agencies Appropriations Act. The Department is directed to follow this guidance for all programs and activities unless specific reprogramming guidance is provided for a program or activity.

Definition.—A reprogramming includes the reallocation of funds from one activity to another within an appropriation, or any significant departure from a program, project, activity, or organization described in the agency's budget justification as presented to and approved by Congress. For construction projects, a reprogramming constitutes the reallocation of funds from one construction project identified in the justifications to another project or a significant change in the scope of an approved project.

Any reallocation of new or prior year budget authority or prior year deobligations must be submitted to the Committees in writing and may not be implemented prior to approval by the Committees on Appropriations.

ENERGY PROGRAMS

ENERGY EFFICIENCY AND RENEWABLE ENERGY

Appropriations, 2010	\$2,242,500,000
Budget estimate, 2011	2,355,473,000
Committee recommendation	2,287,800,000

The Committee recommendation is \$2,287,800,000 for Energy Efficiency and Renewable Energy.

Hydrogen Technology.—The Committee recommends \$174,000,000 for hydrogen technology. Within the available funds, \$20,000,000 is for Technology Validation, at least half of which is focused on vehicle and hydrogen infrastructure applications; \$47,000,000 is for hydrogen fuels R&D, with a particular focus on the synergies between hydrogen and renewable energy and deriving hydrogen from renewable resources; \$20,000,000 is for Market Transformation in early markets, particularly for stationary sources (not safety codes and standards); and \$1,000,000 is for education.

Biomass and Biorefinery Systems R&D.—The Committee recommends \$220,000,000 for biomass and biorefinery systems R&D. Within the available funds a total of \$30,000,000 is for algae biofuels. The Committee recognizes that improvements and innovations to feedstock production will contribute to meeting overall cost goals. Significant potential exists for discoveries in this area, particularly with algae strains that possess unique metabolic and enzymatic adaptations to tolerate high salinity. The Committee directs the Department to make \$5,000,000 available for research and development activities for halophilic algae applications in partnership with a university-led consortia having expertise in this area and ready access to a wide variety of high-salinity algae strains.

Also within available funds, \$15,000,000 is for the cellulosic reverse auction. The Committee is aware the Department is considering a reverse auction in fiscal year 2010 using \$4,500,000 made available in fiscal year 2008. The Committee urges the Department to consider delaying such action and combining the 2008 funding with fiscal year 2011 funds to make the reverse auction more compelling. Further, within available funds, \$4,000,000 is provided for coordination with the Fuels Technology subprogram under Vehicles Technologies to continue testing the effects of intermediate fuel blends (15–20 percent ethanol mixed with 80–85 percent gasoline) on Tier 1 vehicles and small engines. The testing will provide data on how these blends may affect materials, durability, performance and emissions of legacy engines. Work should be done in coordination with the Vehicles Technology Program.

The Committee continues to be concerned about the Nation's capability to meet the 2022 requirement of 21 billion gallons of advanced biofuels required under the Renewable Fuel Standard [RFS]. The Committee is not aware of a coordinated strategy among Federal agencies to achieve this requirement. The lack of a Federal strategy creates opportunities for duplication of efforts and the waste of taxpayer dollars. To address this, the Committee directs the Department to coordinate with the appropriate Federal agencies, with input from industry partners, to develop a strategy to meet the advanced biofuel requirements of the RFS. The strategy should seek to avoid duplication among the Federal agencies while drawing on their research strengths and capabilities. The Committee directs the Department to complete this strategy by September 30, 2011. The Committee recommends \$5,000,000 for a demonstration of a catalytic process to convert liquid ethanol into gaseous ethylene. The Committee notes that thermochemical conversion of biomass to fuels involves the production of synthetic natural gas [SNG], a valuable and important energy feedstock in its own right. The Committee encourages the Department to study the economic and ecological sustainability of integrating SNG production with existing forest, crop or other biomass source operations. The Department should place particular emphasis on instances where production of SNG can result in near-term job creation and prevention of job loss. The Department shall report back to the Committee no later than 8 months from enactment.

Solar Energy.—The Committee recommends \$272,000,000 for solar energy. From within the available funds, the Committee directs the Department to provide \$50,000,000 for concentrating solar power demonstration projects as proposed in the budget request. The Committee is aware of recent developments in the field of concentrated photovoltaics where ultra-high-efficiency concentrator solar cells are being designed at less than the cost of current technology now used in concentrating photovoltaic applications. This technology has the advantages of lower land use and increased power. The Committee encourages DOE to continue its efforts to invest in promising high efficiency, low cost concentrated photovoltaic solar technology that will accelerate the achievement of grid parity. The Committee also encourages the Department of Energy to designate and fund, in fiscal year 2011, a center for solar energy innovation to be located in close proximity to high-quality

solar resources and the site chosen by the Department of Energy for its Solar Demonstration Zone Project. The center should support the research, development, and deployment of the essential components of the solar energy supply chain to promote the integration of solar technologies and products into utility, building and commercial systems, and to improve their reliability, affordability and rapid deployment across the Southwest region and the United States.

Wind Energy.—The recommendation is \$123,000,000 for wind energy. The Department is encouraged to undertake at least two offshore wind demonstration projects off the Atlantic Coast, with at least one project in transitional depths and one in deepwater. To the greatest extent possible, the Department shall coordinate with the Department of Interior (Bureau of Offshore Energy, Management, Regulation, and Enforcement) and the Atlantic Offshore Wind Energy Consortium in order to select projects that are likely to foster the deployment of commercial offshore wind generation in the short term.

Geothermal Technology.—The recommendation for geothermal technology is \$55,000,000, the same as the administration's request. The Committee directs the Department to make not less than \$5,000,000 available to continue development and deployment of low-temperature geothermal systems.

Together, the funding provided through the American Recovery and Reinvestment Act [ARRA] and the fiscal year 2010 and fiscal year 2011 appropriations bills reflect the Committee's intent to fund the full range of activities authorized by Congress in 2007 in subtitle B of Public Law 110–140. The Committee expects that in future years the Department will request funding for a broad based program, and not just Enhanced Geothermal System activities. The Committee also requests that the Department provide the Committee with a copy of its report required by section 621 of Public Law 110–140 evaluating the Department's progress implementing the geothermal provisions of Public Law 110–140 and evaluating additional advanced concepts and technologies to maximize the geothermal resource potential of the United States.

Water Power Energy R&D.—The Committee recommends \$60,000,000 for water power. Of the funds made available, \$15,000,000 is directed for conventional hydropower activities and \$45,000,000 is for marine and hydrokinetic activities. Within available funds, the Committee directs the Department to provide not less than \$6,000,000 for the construction of necessary testing infrastructure for marine and hydrokinetic systems. Further, the Committee includes \$1,000,000 for research and development activities of tidal barrage technology.

Vehicle Technologies.—The Committee recommends \$325,000,000 for vehicle technologies. The Committee recognizes the Department's efforts to increase the number of hybrids and plug-in electric vehicles in its fleet and is also cognizant that significant research, development, and deployment [RD&D] challenges exist to the adoption of this technology on a large scale. To address these challenges, the Department should investigate technologies that will advance electrification of all classes of passenger vehicles. The Committee also directs the Department to make \$3,000,000 avail-

able to continue efforts on both stationary and in-motion inductive power transfer technology to a national laboratory-university consortia. The Committee includes \$5,000,000 for natural gas vehicle research and development.

The Committee recognizes that batteries that reach the end of their useful lives in electric vehicles will have remaining capacity for other uses and directs the program to use \$2,000,000 in conjunction with the Office of Electricity to commence work on the secondary use program authorized in section 915 of the Energy Policy Act of 2005.

The Committee further directs \$5,000,000 for the Department to establish a program to collect and synthesize data on the use of plug-in electric drive vehicles and provide technical assistance to communities that want to prepare for plug-in electric drive vehicle deployment.

Building Technologies.—The Committee recommends \$222,000,000 for building technologies. The Committee includes \$5,000,000 for the solar decathlon, which the Department had proposed to fund under the RE-ENERGYSE program. The Committee includes \$1,500,000 for research and development activities for advanced sensing and control technologies for task-intuitive lighting systems, and directs the Department to identify a university-led partnership with experience in this field. The Committee includes \$16,000,000 for the Energy Efficient Building Systems Design Hub.

The Committee is concerned about the memorandum of understanding [MOU] the Department signed with the Environmental Protection Agency [EPA] in September 2009 that reassigns new duties and responsibilities for implementing the ENERGY STAR program within the two agencies. The Committee does not understand why the Department used its limited resources to pursue this MOU without congressional input, particularly when an energy bill with significant statutory changes to the ENERGY STAR program has been favorably reported from the authorizing committee and was pending before the Senate. The Committee encourages the Department to consult with Congress in the future before it attempts to implement such sweeping changes to its programs.

The Committee is also concerned about deficiencies in the ENERGY STAR program as noted in the October 2009 Audit Report from the Department's Office of Inspector General, and the March 5, 2010 GAO report. The Committee also questions the Department's claim that Americans saved \$17,000,000,000 last year using these products, since that data was reported by the same entities who had abused the program in the past. The Committee recognizes that the Department and EPA have issued new guidelines to address these deficiencies, but that insufficient time has passed to determine their effectiveness. The Committee believes the Department should require independent verification from accredited or third party laboratories for all products. The Committee directs the Government Accountability Office [GAO] to assess (1) whether the Department has taken sufficient steps to implement the recommendations of the Office of Inspector General, and (2) whether the new guidelines and other changes to the program adequately address the issues raised both by the Office of Inspector General and GAO.

The Committee notes that the Energy Policy Conservation Act of 1975 authorized the Department to issue efficiency standards for a list of products, and to date televisions are the only item for which DOE has failed to issue a standard. The Committee encourages the Secretary to complete a rulemaking process to establish effective efficiency standards for televisions, as expeditiously as possible.

Industrial Technologies.—The Committee recommends \$100,000,000 for industrial technologies. Within available funds, the Committee recommends \$14,000,000 for the Industries of the Future (Specific), and \$1,500,000 for the Department to contract with the National Academy of Sciences to conduct an analysis of cooperative mechanisms, beyond research and development support, to advance the development of a robust, domestic clean energy technology sector. Such mechanisms may include, but are not limited to, grants, loan guarantees, demonstration projects, tax incentives, procurement, and other forms of public-private partnerships.

Federal Energy Management Program.—The Committee recommends \$42,000,000 for the Federal Energy Management Program [FEMP]. Of the funds made available, the Committee recommends that Federal Fleets receive \$5,000,000 to conduct an assessment of the most appropriate places to deploy electric vehicles in the Federal fleet and to begin a pilot program to deploy electric vehicles based on the assessment.

The FEMP is intended to assist Federal agencies—which together spend roughly \$10,000,000,000 annually on energy procurements—in achieving energy savings. The Committee is troubled with recent findings of the DOE Inspector General [OIG] in its audit report on the FEMP. The OIG found that FEMP “had not always maintained up-to-date energy efficiency specifications; could not demonstrate that it had adequately pursued the development of new energy efficiency specifications; and had not effectively managed relevant contractor efforts essential to the program.” The Committee directs the Department to deliver by March 15, 2011 an action plan to address the problems identified by the OIG.

RE-ENERGYSE.—The Committee recommends no funds for RE-ENERGYSE.

Facilities and Infrastructure.—The Committee recommends \$57,500,000 for facilities and infrastructure consistent with the budget request.

Program Direction.—The Committee recommends \$170,000,000 for program direction.

Program Support.—The Committee recommends \$59,700,000 for program support. Within the international subprogram, \$2,000,000 is to continue the United States-Israel energy cooperative agreement.

Weatherization Assistance Program.—The Committee provides \$200,000,000. Of that amount, \$7,500,000 is for training and technical assistance and \$30,000,000 is for innovations in weatherization as requested in the budget. The Committee notes that this program received \$5,000,000,000 in the Recovery Act in addition to current year appropriations, and that prior appropriated balances are more than sufficient to carry the existing program into fiscal year 2012 without further appropriation.

Intergovernmental Activities.—The Committee provides \$50,000,000 for State Energy Programs and \$10,000,000 for Tribal Energy Activities.

Congressionally Directed Spending Items.—The Committee includes \$147,600,000 for the following list of projects that provide for research, development, and demonstration of energy efficiency or renewable energy technologies or programs. The Committee reminds recipients that statutory cost sharing requirements may apply to these projects.

CONGRESSIONALLY DIRECTED ENERGY EFFICIENCY AND RENEWABLE ENERGY PROJECTS

Project title	Amount	Requestor
21st Century Renewable Fuels, Energy, and Materials Initiative	\$400,000	Senators Levin, Stabenow
Adams State College Solar Project	\$400,000	Senator Mark Udall
Advanced Closed-Cycle Turbine Generator	\$1,000,000	Senator Murray
Advanced Energy Studies	\$2,750,000	Senator Dorgan
Advanced Solid State Lithium Ion Battery Domestic Manufacturing Initiative ...	\$300,000	Senators Levin, Stabenow
Algae Biofuels Research	\$2,000,000	Senators Murray, Cantwell
Alternative and Unconventional Energy Research and Development	\$10,000,000	Senators Bennett, Hatch
Alternative Energy Medical Complex	\$500,000	Senator Reid
Bio-Energy Research Center	\$800,000	Senator Tester
Biofuel from Nevada's Municipal Wastes	\$500,000	Senator Reid
Biofuels, Biopower, and Biomaterials Initiative	\$1,250,000	Senators Chambliss, Isackson
Biomass Boiler and Steam Absorption Chiller Plant	\$650,000	Senator Johnson
Biomass Boiler at Ferrum College	\$300,000	Senators Webb, Warner
Bucknell University Marcellus Shale Research Initiative	\$200,000	Senators Specter, Casey
Center for Biomass Utilization	\$1,500,000	Senators Dorgan, Conrad
Center for Ocean Renewable Energy	\$500,000	Senator Shaheen
Center for Ozark Community Biomass Energy Development	\$1,500,000	Senator Bond
Chittenden County Natural Gas Refueling Project	\$1,000,000	Senator Leahy
CHRISTUS Center for Healthy Living and Energy Efficient LEED Technology	\$300,000	Senators Landrieu, Vitter
City of Grand Rapids City Building Solar and Wind Renewable Energy Demonstration Project.	\$400,000	Senators Levin, Stabenow
City of Lansing Bioenergy Generation Demonstration Project	\$400,000	Senators Levin, Stabenow
City of San Jose Smart LEED Streetlights, CA	\$600,000	Senator Feinstein
City of Yreka Biomass Facility, CA	\$500,000	Senator Feinstein
Clean Energy Infrastructure Educational Initiative	\$200,000	Senator Sherrod Brown
Co-Gen Electrostatic Precipitator	\$700,000	Senator Gillibrand
Collaboration on Renewable Energy Job Creation Strategies	\$300,000	Senator Reid
Delaware Energy Efficiency	\$55,000	Senators Carper, Kaufman
Development of High Yield Tropical Feedstocks and Biomass Conversion Technology for Renewable Energy Production.	\$6,000,000	Senators Inouye, Akaka
Energy Conservation, Solar Energy Education and Research	\$300,000	Senator Landrieu
Energy Recovery at the Water Reclamation Facility	\$750,000	Senators Tester, Baucus
Ethanol From Agriculture for Arkansas and America	\$1,000,000	Senators Pryor, Lincoln
Farm Solar Share	\$645,000	Senators Carper, Kaufman
Farm-Based Renewable Energy	\$400,000	Senator Murray
Fuel Cell Durability Research	\$400,000	Senator Dodd

ELECTRICITY DELIVERY AND ENERGY RELIABILITY

Appropriations, 2010	\$171,982,000
Budget estimate, 2011	185,930,000
Committee recommendation	190,180,000

The Committee provides \$190,180,000 for Electricity Delivery and Energy Reliability. The Committee recommends continued development and use of the Electricity Infrastructure Operations Centers for researching, developing and deploying technologies to better manage and control the electrical grid.

Congressionally Directed Spending Items.—The Committee includes \$4,250,000 for the following list of projects that provide for research, development, and demonstration of electricity delivery and energy reliability technologies or programs. The Committee reminds recipients that statutory cost-sharing requirements may apply to these projects.

CONGRESSIONALLY DIRECTED ELECTRICITY DELIVERY AND ENERGY RELIABILITY PROJECTS

Project title	Amount	Requestor
Dubuque Smarter Energy Project	\$500,000	Senator Harkin
Energy Development and Reliability	\$300,000	Senator Dorgan
Navajo Nation Electrification Program	\$900,000	Senators Bingaman, Tom Udall
Smart Grid Simulation Technology	\$800,000	Senator Dorgan
Technology Development	\$750,000	Senator Dorgan
UNR—Energy Storage for Intermittent Renewable Energy Sources	\$1,000,000	Senator Reid

NUCLEAR ENERGY

Appropriations, 2010	\$786,637,000
Budget estimate, 2011	824,052,000
Committee recommendation	783,170,000

RESEARCH AND DEVELOPMENT

The Committee recommendation for nuclear energy research, development, and facilities totals \$783,170,000.

Nuclear Energy Enabling Technologies.—The Committee recommends \$62,000,000 for Nuclear Energy Enabling Technologies. The Committee recommends no funding for the new Transformative Nuclear Concepts R&D program for which the Committee finds no compelling argument. This line appears to be redundant to work scope already undertaken in Advanced Reactor Concepts and potentially in the Small Modular Reactors and Modified Open Cycle lines. Further, the Committee recommends \$16,000,000 for the Energy Innovation Hub for Modeling & Simulation.

Integrated University Program.—The Committee provides \$5,000,000 to restore funding to current year levels and sustain the ongoing collaboration between the Office of Nuclear Energy, NNSA's Office of Nuclear Nonproliferation, and the Nuclear Regulatory Commission to support the training of engineers and scientists in nuclear engineering, as well as nonproliferation, nuclear forensics, and nuclear safeguards missions. This funding is to be used consistent with the authorization provided in section 313 of Public Law 111–8. This funding is not intended to supplant university research funding provided within the nuclear energy research and development activities. Studies by the American Physical Society, American Association for the Advancement of Science and the American Nuclear Society recommended Federal investment in university research and training in nuclear engineering and forensics.

RE-ENERGYSE.—The Committee recommends no funding for this line. Alternately, the Committee continues to support the ongoing Integrated University Program.

Reactor Concepts R&D.—The Committee recommends \$188,500,000 for Reactor Concepts Research and Development.

The Committee recommends \$85,000,000 for the Next Generation Nuclear Plant program. This program has already spent over \$500,000,000 with none of the funds requiring a match by industry. Furthermore, of the two entities selected by the Department to proceed with conceptual design, one has failed to reach agreement with the Department on the issue of cost-sharing and the other is proceeding with minimal cost-share. The issue of cost-sharing is

plaguing this program and will do so into the future without a realistic approach by industry. Additionally, the one conceptual design team progressing today is not expected to finish its design until late this year or early the following year. The design will then be reviewed by advisory entities and the Department and is subject to a formal determination by the Secretary as to whether to proceed further. Hence, any funding provided in fiscal year 2011 may be for a program that is no longer supported by a demonstration element.

The Committee fully supports the other budget request lines under Reactors Concepts R&D and provides \$50,000,000 for the small modular reactor [SMR] program. The Committee understands the arguments that SMRs, if successful, may have unique attributes in meeting base-load power supply needs of the future. However, the Committee notes that light-water SMRs are unlikely to lessen the nuclear waste issues facing the country. Regarding the Light Water Reactor Sustainability program, the Committee expects a high cost share from industry.

Fuel Cycle Research and Development.—The Committee recommends \$191,000,000 for Fuel Cycle Research and Development. The Committee recommends \$40,000,000 for the Advanced Fuels program, including \$7,000,000 for the Department to issue a competitive solicitation requesting industry teams (fuel suppliers, utilities and advanced ceramic developers) for cost shared proposals to develop and test advanced LWR fuel with ceramic cladding, with the capability of very high burn up and with the objective of achieving readiness for Lead Test Rod operation in commercial reactors within 5 years. This should be awarded on a 50-50 cost-share basis. The Committee recommends \$30,000,000 for the Modified Open Cycle program. The Committee notes the Department's request is putting significant funding into three different approaches to the fuel cycle—once through, closed, and modified open. It is not clear to the Committee how long the Department envisions exploring these three pathways and this raises questions about out-year costs. Significant waste reductions in a closed fuel cycle will be costly. It is less clear what potential exists with a modified open cycle. The Committee urges the Department to develop research plans that include decision dates in order to avoid costly and long-term research and development in these areas.

International Nuclear Energy Cooperation.—The Committee recommends the budget request level of \$3,000,000 for International Nuclear Energy Cooperation.

RADIOLOGICAL FACILITIES MANAGEMENT

Space and Defense Infrastructure.—The Committee recommends \$57,000,000 for Space and Defense Infrastructure. Of the funds provided, \$15,160,000 is for Oak Ridge National Laboratory. The Committee urges the Department to request sufficient funds for nuclear infrastructure in future budgets in order that nuclear materials and engineering facilities are maintained compliant with DOE orders and directives.

Research Reactor Infrastructure.—The Committee recommends the budget request for this activity at \$4,818,000.

Pu-238 Production Restart Project.—The Committee provides no funding for Pu-238 production capabilities. The Committee under-

stands that the United States no longer has the capability to produce plutonium-238, which is a critical source of power for NASA space missions, and that a shortage of this radioisotope may affect future NASA missions. However, Pu-238 is not needed for any DOE or NNSA missions, including national security applications. As NASA will be the only user of Pu-238, the Committee believes NASA should pay for the entire service through a similar work for others arrangement that DOE has with the Department of Homeland Security and other government agencies.

IDAHO FACILITIES MANAGEMENT

The Committee recommends \$173,000,000 for Idaho Facilities Management.

PROGRAM DIRECTION

The Committee recommends \$91,452,000 for Program Direction, consistent with the budget request.

Congressionally Directed Spending Items.—The Committee includes \$7,400,000 for the following list of projects. The Committee reminds recipients that statutory cost sharing requirements may apply to these projects.

CONGRESSIONALLY DIRECTED NUCLEAR ENERGY PROJECTS

Project title	Amount	Requestor
Nuclear Engineering Research Center	\$500,000	Senators Bennett, Hatch
Nuclear Fabrication Consortium	\$2,000,000	Senator Voinovich, Sherrod Brown
Nuclear Power Operator Simulator	\$400,000	Senator Kerry
Ohio State Nuclear Reactor Laboratory Facility Research and Education Expansion.	\$2,000,000	Senator Voinovich
Oversight of Yucca Mountain Shut Down and Reclamation	\$2,500,000	Senator Reid

FOSSIL ENERGY RESEARCH AND DEVELOPMENT

Appropriations, 2010	\$672,383,000
Budget estimate, 2011	586,583,000
Committee recommendation	725,950,000

The Committee recommendation for Fossil Energy Research and Development is \$725,950,000. The Committee urges the Department to develop a plan and request funding in the next budget request for a Clean Coal Power Initiative Round IV to build on previous efforts. The Committee also supports the Department's efforts to develop a new budget structure that reflects the future direction of the coal research programs in Advanced Power Systems, Carbon Capture, Geologic Storage, and Cross-Cutting Research.

Fuels and Power Systems.—The Committee recommends \$452,000,000 for fuels and power systems which is \$48,150,000 above the request. From within existing funds, the Committee recommends \$10,000,000, in addition to sums allocated for university research, to initiate the NETL-Regional University Alliance for Energy Innovation and encourages the Department's future support for this initiative. The recommendation includes \$68,000,000 for innovations for existing plants. Within available funds, the Committee also supports \$5,000,000 to continue the mercury research

program. The Committee recommends \$64,000,000 for the Advanced Integrated Gasification Combined Cycle activities and \$32,000,000 for the Advanced Turbines program. The Committee recommends \$170,000,000 for Carbon Sequestration activities, including support for integrated emission reduction initiatives. Of these funds, \$20,000,000 is provided for the creation of a center focused on innovative concepts for the beneficial use of carbon dioxide for non-geologic activities. The Committee has also provided an additional \$4,000,000 for the Focus Area for Carbon Sequestration Science. The Committee recommends \$20,000,000 for Fuels, including for coal/biomass activities. The Committee supports additional research and development projects that would produce substantially higher quality fuels which would include greater carbon lifecycle requirements than conventional fuels and technologies. Such fuels would be derived from coal/biomass feed stocks and seek to meet fuel specifications for military and civilian use without additional petroleum components. The Committee recommends \$50,000,000 for Fuel Cell research. The Committee recommends \$48,000,000 for Advanced Research, including \$20,000,000 for computational energy sciences and system dynamics.

Natural Gas Technologies.—The Committee recommendation includes \$22,000,000. Of this amount, \$15,000,000 is provided for methane hydrates activities. The Committee has restored the hydrates technology program to this account and does not support funding a gas hydrates research program within the Office of Science. The Committee recommends \$3,000,000 to continue research being conducted that targets small, independent producers in the areas of exploration production, and safety, including completion and well control technology, and to continue to develop solutions to minimize the environmental impacts of natural gas development, including advancement of water resources treatment technologies. The Committee further recommends support for one or more demonstration-scale projects to treat water resources associated with domestic natural gas development. The Committee understands that, with the projected increases in demand for natural gas, the amount of produced water affected will pose an even greater challenge unless cost-effective methods are developed to treat the water, including treatment for beneficial reuse. The Committee encourages the Office of Fossil Energy to consult with other offices, including the Office of Environmental Management, and conduct the project, or projects, jointly with industry to integrate existing, validated, low-cost technology. The Committee recommends continued support for unconventional natural gas production from basins that contain tight gas sands, shale gas, and coal bed methane resources.

Unconventional Fossil Energy Technologies.—The Committee recommends \$26,000,000 to continue the implementation of the comprehensive research, development, and demonstration [RD&D] strategy the Committee directed the Department to develop in Public Law 111–85. The Committee recommends that the Department concentrate its RD&D activities on developing the significant unconventional energy resource within the United States, including the Western Energy Corridor. The Department should look to demonstrate technology applications for these resources on state and

Federal lands, as appropriate, including oil shale and tar sands. The Committee urges the Department to partner with research universities, national laboratories, and industry. Within available funds, the Committee recommends \$1,200,000 to continue the Risk Based Data Management System. Within available funds, the Committee also recommends continuation of the stripper well program and ongoing research being conducted that targets small, independent producers in the areas of enhanced oil recovery, exploration and production, safety, and environmental solutions.

Program Direction.—The Committee recommends \$170,300,000 for Program Direction, of which \$138,700,000 is for the National Energy Technology Laboratory.

Other Programs.—The Committee recommends \$20,000,000 for Plant and Capital Equipment. The Committee recommends \$10,000,000 for Fossil Energy Environmental Restoration. The Committee recommends \$700,000 for the special recruitment programs. The Committee recommends \$5,000,000 to restore funding for Cooperative research and development. The Committee urges the Department to continue NETL's efforts within the Project Management Center [PMC]. The Committee continues to encourage the Office of Energy Efficiency and Renewable Energy to carry on this collaboration and funding of the PMC with the NETL.

Congressionally Directed Projects.—The Committee recommends \$19,950,000 for the following congressionally directed projects.

CONGRESSIONALLY DIRECTED FOSSIL ENERGY PROJECTS

Project title	Amount	Requestor
Clean Energy Technology	\$2,000,000	Senator Dorgan
CO ₂ Sequestration Projects	\$700,000	Senators Mark Udall, Bennett
Fossil Fuel Research and Development	\$3,000,000	Senators Dorgan, Conrad
Gulf of Mexico Hydrates Research Consortium	\$1,000,000	Senators Cochran, Wicker
Hydrogen Fuel Dispensing Station	\$750,000	Senator Rockefeller
Long Term Environmental and Economic Impacts of the Development of a Coal Liquefaction Sector in China.	\$750,000	Senator Rockefeller
National Center for Hydrogen Technology	\$3,000,000	Senators Dorgan, Conrad
Sunbury Generation/Calera Carbon Capture Project	\$750,000	Senator Specter
University of Kentucky Coal-Derived Low Energy Materials for Sustainable Construction Project.	\$1,000,000	Senator McConnell
Utah Center for Ultra-Clean Coal Utilization and Heavy Oil Research	\$7,000,000	Senators Bennett, Hatch

NAVAL PETROLEUM AND OIL SHALE RESERVES

Appropriations, 2010	\$23,627,000
Budget estimate, 2011	23,614,000
Committee recommendation	23,614,000

The Committee recommends \$23,614,000 for fiscal year 2011, the same as the budget request for the operation of the naval petroleum and oil shale reserves.

STRATEGIC PETROLEUM RESERVE

Appropriations, 2010	\$243,823,000
Budget estimate, 2011	138,861,000
Committee recommendation	209,861,000

The Committee recommends \$209,861,000 for the Strategic Petroleum Reserve. The Committee does not support the budget proposal to cancel \$71,000,000 of prior appropriated funds for the proposed expansion site in Richton, Mississippi. The Committee notes that although the Department was directed by statute in Public Law 111-8 to submit a report to Congress regarding the effects of expanding the Reserve on the domestic petroleum market within 45 days of enactment of the conference report, the Department has failed to submit this report. The Committee included these reporting requirements to inform decision making for both the Department and Congress, and is troubled that the Department has chosen to ignore this requirement for more than a year. The Committee expects the Department to be more responsive to congressional direction in future budget requests.

NORTHEAST HOME HEATING OIL RESERVE

Appropriations, 2010	\$11,300,000
Budget estimate, 2011	11,300,000
Committee recommendation	11,300,000

The Committee recommends \$11,300,000, the same as the budget request.

ENERGY INFORMATION ADMINISTRATION

Appropriations, 2010	\$110,595,000
Budget estimate, 2011	128,833,000
Committee recommendation	119,000,000

The Committee recommends \$119,000,000 for the Energy Information Administration. The Committee strongly encourages the Energy Information Administration to continue its work on the Energy and Financial Markets Initiative.

NON-DEFENSE ENVIRONMENTAL CLEANUP

Appropriations, 2010	\$244,673,000
Budget estimate, 2011	225,163,000
Committee recommendation	244,163,000

The Committee's recommendation for Non-Defense Environmental Cleanup is \$244,163,000.

Reprogramming Control Levels.—In fiscal year 2011, the Environmental Management program may transfer funding between operating expense funded projects within the controls listed below using guidance contained in the Department's budget execution manual (DOE M 135.1-1A, chapter IV). All capital construction line item projects remain separate controls from the operating projects. The Committees on Appropriations in the House and Senate must be formally notified in advance of all reprogrammings, except internal reprogrammings, and the Department is to take no financial action in anticipation of congressional response. The Committee recommends the following reprogramming control points for fiscal year 2011:

- Fast Flux Test Reactor Facility Decontamination and Decommissioning;
- Gaseous Diffusion Plants;
- Small Sites; and

—West Valley Demonstration Project.

Internal Reprogramming Authority.—Headquarters Environmental Management may transfer up to \$2,000,000, one time, between accounts listed above to reduce health and safety risks, gain cost savings, or complete projects, as long as a program or project is not increased or decreased by more than \$2,000,000 in total during the fiscal year.

The reprogramming authority—either formal or internal—may not be used to initiate new programs or to change funding levels for programs specifically denied, limited, or increased by Congress in the act or report. The Committee on Appropriations in the House and Senate must be notified within 30 days after the use of the internal reprogramming authority.

Fast Flux Test Reactor Facility Decontamination and Decommissioning.—The Committee recommends \$3,659,000, the same as the request.

Gaseous Diffusion Plants.—The Committee recommends \$99,464,000, the same as the request.

Small Sites.—The Committee recommends \$82,966,000. A total of \$50,000,000 is provided to Moab.

West Valley Demonstration Project.—The Committee recommends \$58,074,000.

URANIUM ENRICHMENT DECONTAMINATION AND DECOMMISSIONING FUND

Appropriations, 2010	\$573,850,000
Budget estimate, 2011	530,498,000
Committee recommendation	550,000,000

The Committee's recommendation is \$550,000,000 to sustain clean-up activities at uranium enrichment facilities. Of the funds provided, \$85,000,000 is recommended for the Paducah Gaseous Diffusion Plant, \$200,000,000 is recommended for the East Tennessee Technology Park, and \$265,000,000 is recommended for the Portsmouth Gaseous Diffusion Plant. With these funds and any additional funds generated through the barter of uranium in the Department's inventory, the Department is encouraged to maintain its current accelerated cleanup schedule at the Portsmouth site. Accelerated cleanup of the site is consistent with the Department's mission for responsible resolution to the environmental legacy of nuclear weapons production, and is anticipated to reduce life cycle costs and more quickly resolve associated risks. The funding for Portsmouth is substantially less than the budget request due to the administration's reliance on a legislative proposal to reinstate a \$200,000,000 fee on uranium fuel to pay for the Portsmouth increase. This is the second year the Committee has rejected this proposal. The Committee is aware of the fact that more than \$5,000,000,000 in available funding remains in the UED&D fund. The administration is urged to propose real increased budget authority for these activities rather than legislative proposals that have not been proposed to the authorizing committees of jurisdiction.

SCIENCE

Appropriations, 2010	\$4,903,710,000
Budget estimate, 2011	5,121,437,000
Committee recommendation	5,012,000,000

The Committee recommends \$5,012,000,000 for the Office of Science. The Committee understands that changing the Nation's decades-long dependence on imported oil and unfettered emission of carbon dioxide requires fundamental changes in the ways we produce, store, and use energy. To meet these strategic challenges, the United States will have to develop new technologies that require scientific breakthroughs that come only with fundamental understanding of new materials and chemical processes. The Committee believes the funding increase in fiscal year 2011 will support initiatives to advance scientific understanding for new energy technologies.

HIGH ENERGY PHYSICS

The Committee recommends \$820,085,000 for High Energy Physics. The Committee is encouraged that the Large Hadron Collider [LHC] started operations again in March 2010 and it reached energy levels of 3.5 trillion electron volts, which is three times higher than any other machine in the world has been able to achieve. However, the Committee is concerned about the LHC's planned shutdown at the end of 2011 to address design problems and the impact the shutdown may have on the U.S. High Energy Physics Program. For example, a decision to operate the Tevatron at the Fermi National Accelerator beyond fiscal year 2011 might reduce funding available for other high-priority projects. The Committee urges the Office of Science to keep the Committee informed about the status of operations at LHC and how the planned shutdown will impact the U.S. program. The Committee also recognizes the recommendation made in the 2008 report of the Particle Physics Project Prioritization Panel to develop a world-leading program of neutrino science to understand the role neutrinos play in the evolution of the universe. The United States has unique capabilities and infrastructure at Fermilab to advance this area of science. The Committee supports design work for two new potential construction projects—the Long Baseline Neutrino Experiment and the Muon to Electron Conversion Experiment. However, the Committee directs the Office of Science to submit a report not later than 180 days after enactment of this act that lays out (1) the expected benefits of intensity frontier science, (2) a strategy for maintaining the U.S. lead, and (3) the funding needs over the next 10 years, including construction activities, of implementing the proposed strategy. The Committee also is concerned about the status of the Deep Underground Science and Engineering Laboratory [DUSEL] funded by the National Science Foundation [NSF]. The neutrino program relies on the construction of DUSEL and any delays in the DUSEL program would impact advances in this area of science. The Committee urges the Office of Science to coordinate its neutrino program research efforts with NSF to avoid unnecessary delays. The Committee is very encouraged by DOE and NASA's collaborative effort and success on the Joint Dark Energy Mission Interim

Science Working Group and expects the Department to continue to fully support this process and to work closely with NASA in the planning and execution of this mission.

NUCLEAR PHYSICS

The Committee recommends \$554,000,000 for Nuclear Physics. A recent National Academy of Sciences report, Advancing Nuclear Medicine through Innovation, recommended increasing the Federal commitment to nuclear medicine research. Nuclear medicine could substantially accelerate, simplify, and reduce the cost of delivering and improving healthcare. However, the Committee is concerned that the Department is not using funds to directly support nuclear medicine research with human application. To this end, within the funds provided, \$15,400,000 is for nuclear medicine research with human application. All of the added funds must be awarded competitively in one or more solicitations that include all sources—universities, the private sector, and Government laboratories—on an equal basis. Funding for nuclear medicine application research was previously within the Biological and Environmental Research program.

BIOLOGICAL AND ENVIRONMENTAL RESEARCH

The Committee recommends \$614,500,000 for Biological and Environmental Research. Of these funds, \$11,000,000 is provided for artificial retina research. An artificial retina has the potential to restore vision to millions of people suffering from eye diseases. In November 2009, the Lawrence Livermore National Laboratory team developing artificial retinas received a Research and Development 100 Award, known as the “Oscars of Invention.” The Committee encourages the Department to continue this research and meet its goal of producing a prosthesis with more than 1,000 electrodes, which would allow facial recognition, as quickly as possible. The funding request of \$15,400,000 for nuclear medicine research efforts has been moved to Nuclear Physics to better address mission requirements.

BASIC ENERGY SCIENCES

The Committee recommends \$1,739,115,000 for Basic Energy Sciences. Of these funds, \$151,600,000 is provided for construction activities as requested in the budget. The remaining \$1,587,515,000 is for research. Within available funds, up to \$100,000,000 shall be used to support the 46 Energy Frontier Research Centers. The Committee does not support the creation of new Energy Frontier Research Centers at this time. The Department must first demonstrate the benefits and results of this new research and development approach designed to address fundamental scientific energy challenges before the program is expanded further. A significant increase in funding for the core research program in materials and chemical sciences should be sufficient to advance scientific and engineering knowledge in areas of study where the Department feels there are gaps in addressing energy challenges.

Within the research funds provided, \$16,000,000 shall be available for the Fuels from Sunlight energy innovation hub and

\$22,000,000 for a new Batteries and Energy Storage energy innovation hub.

The Committee recommends no funding for a research program in gas hydrates. A gas hydrates research program should continue in the Office of Fossil Energy, not the Office of Science. A recently issued, congressionally mandated report by the National Research Council [NRC] concluded that the Office of Fossil Energy's methane hydrate program had been "consistent and effective" in leading a broad-based science and technology development program to investigate naturally occurring gas hydrates. In addition, the NRC found the methane hydrate program had made advances in identification, drilling, and production of methane from hydrate for use as a possible energy source. The Office of Science is not the appropriate office to continue this work. The Committee also provides no funding for modeling of engine design at this time. Within the research funds provided, \$35,000,000 is for the Experimental Program to Stimulate Competitive Research [EPSCoR]. The EPSCoR program is currently funding energy research that will help reduce our dependence on foreign oil.

ADVANCED SCIENTIFIC COMPUTING RESEARCH

The Committee recommends \$418,000,000 for Advanced Scientific Computing Research.

FUSION ENERGY SCIENCES

The Committee recommends \$384,000,000 for Fusion Energy Sciences. The Committee is concerned by cost increases and schedule delays related to the ITER project. In the last year, the projected start date for ITER has slipped another 10 months to November 2019, or 3 years later than first projected. These schedule changes put U.S. cost estimates at risk as costs escalate for the total project. The Committee encourages the Office of Science to keep the Committee informed about significant decisions and developments related to the ITER project.

The Committee is encouraged that the Office of Science tasked the National Academy of Sciences with reviewing options to advance inertial fusion energy. The Committee understands that an independent National Academy of Sciences committee will (1) assess the prospects of generating power using inertial confinement fusion, (2) identify scientific and engineering challenges, the costs for manufacturing targets, and research and development objectives to develop an inertial fusion energy demonstration plant, and (3) advise DOE on a roadmap for developing a demonstration plant.

The Committee believes that this is a practical way of identifying the steps that are needed to develop an inertial fusion energy program and plans to work with DOE to assess the budget needs for this alternative approach to fusion energy. Within available funds, the Committee provides \$4,000,000 to advance inertial fusion energy, which may include experiments using solid state or krypton fluoride lasers, ion beams, or pulsed power, and to help laboratories and universities participate in the National Academy of Sciences review.

The Committee is encouraged by DOE's progress in advancing fusion energy sciences. However, the Committee is concerned by the

Fusion Advisory Committee finding that the United States risks losing leadership and competitiveness in material science. To successfully harness fusion energy, scientists and engineers must design and build reactor components that can withstand extreme radiation environments and temperature. Since these extreme environments and material needs are common to both magnetic and inertial fusion energy, the Committee encourages DOE to reassess its materials science program and establish a program that would explore science, engineering, and materials issues for both magnetic and inertial fusion energy and build U.S. expertise.

SCIENCE LABORATORIES INFRASTRUCTURE

The Committee recommends \$126,000,000 to support infrastructure activities.

SAFEGUARDS AND SECURITY

The Committee recommends \$86,500,000 for Safeguards and Security activities.

SCIENCE PROGRAM DIRECTION

The Committee recommends \$208,000,000 for the Office of Science Program Direction. Of these funds, \$8,963,000 shall be used for the Office of Scientific and Technical Information. No funds shall be used to hire new site office personnel, except for field staff at the Integrated Support Centers in Chicago and Oak Ridge.

SCIENCE WORKFORCE DEVELOPMENT

The Committee recommends \$21,000,000 for Workforce Development for Teachers and Scientists program. Of these funds, up to \$5,000,000 shall be available for the graduate fellowship program. The Committee encourages the Office of Science to monitor the impact of this program and demonstrate whether students continue to pursue careers in scientific and technical fields. The Committee also provides \$5,800,000 for educator programs that provides professional development for middle school, high school, community college, and undergraduate educators. Furthermore, \$2,500,000 shall be available for program administration and evaluation to ensure the efficiency and effectiveness of science workforce development activities.

Congressionally Directed Spending Items.—The Committee includes \$40,800,000 for the following list of projects that provide for research, development, and demonstration of science technologies or programs. The Committee reminds recipients that statutory cost sharing requirements may apply to these projects.

CONGRESSIONALLY DIRECTED SCIENCE PROJECTS

Project title	Amount	Requestor
Advanced Computer Simulation Initiative	\$1,000,000	Senator Reid
Alaska Climate Center	\$500,000	Senators Murkowski, Begich
Antibodies Research	\$4,000,000	Senators Dorgan, Conrad
Center for Diagnostic Nanosystems	\$2,000,000	Senator Rockefeller
Center for Nanoscale Energy	\$7,000,000	Senators Dorgan, Conrad

CONGRESSIONALLY DIRECTED SCIENCE PROJECTS—Continued

Project title	Amount	Requestor
Characteristics and Cleanup of the U.S. Nuclear Legacy	\$3,500,000	Senators Cochran, Wicker
Climate Model Evaluation Program	\$2,000,000	Senators Shelby, Sessions
Computing Capability	\$2,000,000	Senators Dorgan, Conrad
Development of Nontechnology-enhanced Solar Cells with Low Cost and High Conversion Efficiency.	\$500,000	Senator Reid
Energy Research	\$250,000	Senator Cochran
Environmental Radioactivity Monitoring Laboratory: Monitoring/Assessment of the Radioactive Pollutants in the South-West Mississippi.	\$750,000	Senators Cochran, Wicker
Functional Nanoparticles for Improved Ultra Capacitor Devices	\$1,000,000	Senators Cochran, Wicker
Idaho National Laboratory Center for Advanced Energy Studies	\$1,000,000	Senators Crapo, Risch
KU Cancer Research Equipment	\$4,000,000	Senators Brownback, Roberts
Lincoln Memorial University/ORNL Partnership on Geothermal Energy	\$2,000,000	Senator Alexander
Material Science Smart Coatings	\$500,000	Senator Ben Nelson
Metal-enhanced Fluorescence Research and Development	\$750,000	Senators Mikulski, Cardin
Missouri University Research Reactor Reflector Shield	\$1,000,000	Senator Bond
Nanotechnology Initiative	\$600,000	Senators Dodd, Lieberman
Nevada Water Resources Data, Modeling, and Visualization (DMV) Center	\$750,000	Senator Reid
Oregon Sustainability Center	\$300,000	Senators Wyden, Merkley
RNAi Research	\$300,000	Senator Kerry
Solid State Preparation and Characterization Lab	\$500,000	Senator Reid
Southern Illinois University Research	\$750,000	Senator Durbin
Technology Transfer & Commercialization of Technologies at DOE	\$500,000	Senators Bingaman, Tom Udall
TU Algae to Green Fuels Energy Project	\$750,000	Senator Inhofe
University of California, San Diego Seismic Research	\$1,500,000	Senator Feinstein
University of South Dakota Project on Renewable Energy and the Economy	\$350,000	Senator Johnson
URI Regional Earth System Center	\$750,000	Senators Reed, Whitehouse

ADVANCED RESEARCH PROJECTS AGENCY—ENERGY [ARPA–E]

Appropriations, 2010		
Budget estimate, 2011	\$299,966,000	
Committee recommendation	200,000,000	

The Committee recommends \$200,000,000 for the Advanced Research Projects Agency—Energy [ARPA–E]. ARPA–E is responsible for funding high-risk research and development projects to meet long-term energy challenges. The primary goal is to invest in energy projects that can overcome technological barriers and eventually reduce energy imports, improve energy efficiency, and reduce energy-related emissions, including greenhouse gases. ARPA–E will also help the United States maintain a technological lead in developing and deploying advanced energy technologies. The Committee supports ARPA–E’s efforts to fund creative “out-of-the-box” transformational energy research that industry by itself cannot or will not support due to its high risk, but where success would provide significant benefits for the United States. The Committee encourages ARPA–E to work closely with the Office of Science, including scientists and engineers working at Energy Frontier Research Centers and Hubs, to identify promising projects that are potential game changers for energy systems.

INNOVATIVE TECHNOLOGY LOAN GUARANTEE PROGRAM

(INCLUDING RESCISSION OF FUNDS)

ADMINISTRATIVE EXPENSES

GROSS APPROPRIATION

Appropriations, 2010	\$43,000,000
Budget estimate, 2011	558,000,000
Committee recommendation	438,000,000

OFFSETTING RECEIPTS

Appropriations, 2010	-\$43,000,000
Budget estimate, 2011	-58,000,000
Committee recommendation	-58,000,000

NET APPROPRIATION

Appropriations, 2010	\$500,000,000
Budget estimate, 2011	380,000,000

The Committee recommends new loan authority of \$10,000,000,000 for nuclear power facilities, and \$7,000,000,000 for coal and petroleum coke-based power generation and industrial gasification projects that incorporate carbon capture and sequestration [CCS], pipelines and transportation of CO₂. Eligible CCS projects may include stand-alone pipeline projects that transport carbon dioxide to storage sites for the purpose of storage and any such project shall be considered by the Secretary to have satisfied the requirements of section 1703(a) of Public Law 109–58. The Secretary may also direct a portion of such authority for projects focused on the beneficial use of carbon dioxide.

The Committee also recommends \$380,000,000 for subsidy costs of renewable energy projects. The Committee derives \$140,000,000 of this amount from the rescission of \$14,000,000,000 in unsubsidized loan authority for renewable projects provided in fiscal year 2009. This leaves over \$3,800,000,000 in renewable unsubsidized loan authority remaining. The Committee notes that since fiscal year 2008, when renewable unsubsidized loan authority was first granted, only two conditional commitments collectively valued at \$317,000,000 have been made. There are only two additional projects in the near term pipeline valued collectively at \$300,000,000. Hence, in over 2 years the program is prepared to use only \$617,000,000 of the \$18,500,000,000 in renewable unsubsidized loan authority. Nearly all original applicants for the 1703 unsubsidized renewable program have moved their applications to the subsidized 1705 program appropriated through the American Recovery and Reinvestment Act of 2009. These factors demonstrate that renewable projects will advance much more quickly through a 1703 credit subsidy program than through an unsubsidized program. The failure to convert the majority of the \$18,500,000,000 in renewable loan authority to credit subsidy will result in that authority being untapped for over a decade.

The Committee remains concerned with the Department's implementation of the Loan Guarantee Program. While some program improvements have been made in the last year, DOE's program im-

plementation has been ad hoc. A recent Government Accountability Office [GAO] review of the Loan Guarantee Program found that the Department treats applicants inconsistently, and lacks mechanisms to identify and address applicants' concerns. The program lacks transparency and has been slow to come to closure on applications. Since the program's inception, only one loan guarantee has been closed, along with conditional commitments for just eight projects. With more than \$80,000,000,000 in available loan guarantee authority, less than \$14,000,000,000 has been committed. The Committee expects the Department to address the problems raised by GAO expeditiously, and report within 90 days of its progress.

The Committee is also concerned that the Loan Guarantee Program does not support a diverse set of clean fuel technology and more importantly, the Committee is concerned about the impact that operation is having on the commercialization of those technologies. The Department of Energy is directed to encourage the production of advanced biofuels by comparing the risk profiles against similar risk profiles.

The Committee is concerned that the Loan Guarantee Program, expanded by the American Recovery and Reinvestment Act to help finance renewable energy projects that commence construction by September 30, 2011, will be unable to finance certain solar projects on private land due to environmental permitting timelines established by the Department. While the Committee is aware that the Department of the Interior has "fast tracked" the permitting of a subset of proposed solar energy projects on Federal land, the Committee is concerned that DOE has not established goals to complete environmental impact statements for projects on private land seeking loan guarantees by the September 2011 deadline. The Department has advised solar developers that if NEPA requires an EIS on a solar development proposal, DOE will likely not complete the EIS by the September 2011 deadline. The Committee instructs the Department to identify a set of proposed solar development projects on private lands with the goal of completing all necessary environmental reviews by September 2011. The Committee also strongly recommends that the Department initiate the environmental review process earlier in the loan guarantee selection process, in order to assure that environmental impacts of renewable energy projects are considered during loan guarantee selection.

ADVANCED TECHNOLOGY VEHICLES MANUFACTURING LOAN PROGRAM

Appropriations, 2010	\$20,000,000
Budget estimate, 2011	9,998,000
Committee recommendation	9,998,000

The Committee recommends the \$9,998,000 as requested.

DEPARTMENTAL ADMINISTRATION

(GROSS)

Appropriations, 2010	\$288,684,000
Budget estimate, 2011	288,872,000
Committee recommendation	288,872,000

(MISCELLANEOUS REVENUES)

Appropriations, 2010	-\$119,740,000
Budget estimate, 2011	-119,740,000
Committee recommendation	-119,740,000

NET APPROPRIATION

Appropriations, 2010	\$168,944,000
Budget estimate, 2011	169,132,000
Committee recommendation	169,132,000

The Committee recommends \$288,872,000 for Departmental Administration, which provides a net appropriation of \$169,132,000 in fiscal year 2011.

OFFICE OF THE INSPECTOR GENERAL

Appropriations, 2010	\$51,927,000
Budget estimate, 2011	42,850,000
Committee recommendation	42,850,000

The Committee recommends \$42,850,000, the same as the request. In fiscal year 2011, the budget request moves funding for financial statement audits from the Office of the Inspector General to the Working Capital Fund. This accounts for the reduction in the Office of Inspector General funding from fiscal year 2010 to fiscal year 2011.

ATOMIC ENERGY DEFENSE ACTIVITIES

NATIONAL NUCLEAR SECURITY ADMINISTRATION

WEAPONS ACTIVITIES

Appropriations, 2010	\$6,384,431,000
Budget estimate, 2011	7,008,835,000
Committee recommendation	7,018,835,000

The Committee recommends \$7,018,835,000 for National Nuclear Security Administration [NNSA] Weapons Activities, an increase of \$10,000,000 above the budget request. This level of funding will allow NNSA to modernize aging infrastructure and maintain the scientific, technological, and engineering capabilities needed to assess the safety, security, and reliability of nuclear weapons.

DIRECTED STOCKPILE WORK

The Committee recommends \$1,874,279,000 for directed stockpile work, a decrease of \$24,100,000 below the request. Within these funds, at least \$197,700,000 shall be for directed stockpile work activities at Pantex. This increase in funding will help restore activities at Pantex related to weapons dismantlement and disposition and stockpile services support for scheduled weapons assembly, disassembly, and dismantlement.

Life Extension Program.—The Committee recommends \$249,463,000 for the Life Extension Program, the same as the budget request.

Stockpile Systems.—The Committee recommends \$649,366,000, the same as the request. Of these funds, at least \$165,000,000 shall be used for surveillance activities. Over the last several years, the

laboratory directors of Los Alamos, Lawrence Livermore, and Sandia National Laboratories, who are responsible for assessing the safety, security, and reliability of the nuclear weapons stockpile every year, have expressed concern that funding shortfalls in the surveillance program may begin to jeopardize the annual assessment process. Furthermore, in September 2009, the JASON study group found NNSA's surveillance program was becoming inadequate and the continued success of stockpile stewardship required a revised surveillance program. A robust surveillance program is required to maintain confidence in the performance of nuclear weapons in the absence of underground nuclear testing. Thus, the Committee is encouraged by NNSA's decision to increase funding for surveillance activities and make changes to the surveillance program to better address aging issues. When NNSA completes its Phase 6.2/6.2A study for the B61 life extension program, the Committee directs NNSA to submit to the Committee both a classified and unclassified report 90 days after the completion of the study with (1) a description of the safety and security features NNSA would add to a refurbished B61 and (2) a cost and benefit analysis of installing the proposed features in the warhead. The cost and benefit analysis should include (1) the costs of science, technology, and engineering to install new safety and security features, (2) the costs of assessing the impact the new features may have on the performance of the nuclear explosive package at the national laboratories, (3) the extent to which the proposed safety and security features address specific safety and security concerns, and (4) why current safety and security features would not be sufficient.

When NNSA completes its Phase 6.2/6.2A study, the Committee also directs NNSA to submit to the Committee a revised B61 LEP Alternative Analysis study on whether the benefits of a combined nuclear and nonnuclear refurbishment option for the B61 outweighs the costs or whether it would be more cost effective to delay the nuclear scope. The Committee understands that the preliminary analysis shows that NNSA would save approximately \$2,000,000,000 by combining the nuclear and nonnuclear scope. A combined nuclear and nonnuclear scope would also reduce NNSA and Air Force security risks and costs by a factor of 2 because they would not have to handle the weapon and transport it overseas twice. In addition, a combined nuclear and nonnuclear scope would allow NNSA to consolidate the different variants of the B61 bomb into one variant that has the least special nuclear material, add modern safety features, and extend the life of the weapon for both strategic and tactical missions for 30 years. However, the costs portrayed in this study are a rough order of magnitude and detailed program costs will not be available until NNSA completes the B61 study. The Committee will need the most accurate information possible on these cost savings before it can make an informed decision about moving forward with the life extension program.

Weapons Dismantlement.—The Committee recommends \$64,425,000, an increase of \$6,400,000 above the budget request. Within these funds, \$27,500,000 shall be used to help restore activities at Pantex for weapons dismantlement activities. The Committee encourages NNSA to keep the Committee informed about

changes to dismantlement rates as a result of the new START treaty.

Stockpile Services.—The Committee recommends \$911,025,000, a decrease of \$30,500,000 below the budget request. Within these funds, at least \$74,000,000 shall be used to support surveillance activities. Also, within these funds, no more than \$160,000,000 shall be used for plutonium sustainment. The Committee understands that NNSA will complete building W88 war reserve pits in fiscal year 2011 and continue to exercise its pit manufacturing capability. Furthermore, within these funds, \$84,100,000 shall be used for scheduled weapons assembly, disassembly, and dismantlement work at Pantex.

CAMPAIGNS

The campaigns support scientific research, experimental activities and advanced computation, which make up the core of the science-based stockpile stewardship program. This program has enabled the U.S. Government to ensure the safety, reliability, and security of our nuclear weapons stockpile without underground nuclear testing for the past 16 years. The Committee recommends \$1,693,630,000 for NNSA Campaigns, which is \$22,900,000 below the request.

Science Campaign.—The Committee recommends \$354,300,000, a decrease of \$10,924,000 below the budget request. Within these funds, \$56,050,000 shall be used for advanced certification to advance scientific understanding of safety and security systems for nuclear weapons and to improve the annual weapons certification process. The Committee continues to strongly support the weapons physics activities at Sandia's Z facility that are critical to sustaining a safe, secure, and effective nuclear stockpile. The Committee provides \$53,296,000 to Sandia's Z facility. An additional \$10,000,000 in funding will help the Z facility conduct plutonium experiments in environments of extreme conditions found in nuclear weapons explosions.

Engineering Campaign.—The Committee recommends \$149,900,000, an increase of \$7,980,000 above the budget request. Within these funds, the Committee provides \$21,510,000 for weapons systems engineering assessment technology activities. Nuclear weapons may have to operate in a nuclear environment and electronic and other nonnuclear weapons components, which are critical to the proper functioning of a nuclear weapon, must survive thermal, blast and shock effects as well as exposure to neutron and gamma radiation. The Committee is providing funding to support testing and experimental capabilities that create or simulate radiation environments similar to those found in a nuclear explosion. The funding will also maintain the highly technical set of specialized skills needed to develop the tests and simulations, interpret the results, and design radiation hardened components for life extension programs, such as the upcoming W78.

Inertial Confinement Fusion Ignition and High-yield Campaign.—The Committee recommends \$481,548,000 as requested. Within these funds, at least \$62,477,000 and \$48,000,000 shall be used for inertial confinement fusion activities at the University of

Rochester's Omega facility and Sandia National Laboratory's Z facility, respectively.

The Committee is concerned that NNSA has been slow to solicit help and ideas from outside experts with knowledge in inertial confinement fusion to make the first ignition experiments a success. The Committee questions Lawrence Livermore National Laboratory's decision, as the laboratory with lead responsibility for managing ignition experiments, to wait 4 years—and only months before the first ignition experiment is expected to take place—to implement the JASON study group's 2005 recommendation to form a standing external review committee of experts that could provide expert advice on the scientific and technical challenges. Even with the creation of this external review committee, a Government Accountability Office [GAO] study found that the committee currently in place falls short of meeting the intent of the JASON study group recommendation. For example, GAO found that the committee may not be able to give fully objective, candid advice because the committee will take direction from, and report to, Livermore's Director, rather than to NNSA. The Committee strongly supports the creation of an independent advisory board that can evaluate experiments planned at the National Ignition Facility, identify potential weaknesses with the experimental plan, and recommend, if necessary, alternative approaches to address scientific and technical challenges. The Committee also strongly supports the advisory committee's role in setting a strategic direction for inertial confinement fusion and high-energy density physics research and determining how best to use current facilities to advance this scientific field.

Advanced Simulation and Computing.—The Committee recommends \$615,748,000 for the Advanced Simulation and Computing [ASC] Campaign as requested. The Committee supports NNSA's efforts to establish a dual validation approach in the annual assessment process. Independent peer review by Los Alamos and Lawrence Livermore National Laboratories, with assistance from Sandia National Laboratory, will increase confidence in the annual assessment of the current stockpile and weapons that are refurbished under life extension programs.

Readiness Campaign.—The Committee recommends \$92,134,000 for the Readiness Campaign, \$19,958,000 less than the budget request. Within these funds, no more than \$30,199,000 shall be used for tritium production efforts. The Committee is concerned about the technical challenges NNSA is facing with tritium production at the Watts Bar reactor and the slow progress in increasing production capacity.

READINESS IN TECHNICAL BASE AND FACILITIES

The Committee recommends \$1,919,970,000, an increase of \$71,000,000 above the request. While the committee supports the increase in funding for science, technology, and engineering to better assess the safety, security, and reliability of the nation's nuclear stockpile, the committee is concerned that the budget request does not contain sufficient funds for two major production plants—Y-12 in Oak Ridge, Tennessee, and Pantex in Amarillo, Texas. These production plants are responsible for, among other things,

dismantlement of retired nuclear weapons, surveillance to detect aging issues, and disassembly and assembly of life-extended W76 warheads. The increase in funding will fill significant gaps at these facilities that would avoid layoffs and disruption to dismantlement and life extension schedules.

The Committee has also restored funding for the Los Alamos Neutron Science Center [LANSCE] Refurbishment project. This facility is the cornerstone of scientific research at Los Alamos serving between 500–600 users per year. LANSCE is currently being used to support stockpile stewardship experiments, produce medical isotopes to treat cancer and calibrate medical imaging equipment, and conduct Office of Science research to study matter and materials that may be used in new energy technologies. Specifically, NNSA's stockpile stewardship plans through 2020 show LANSCE being used by the three nuclear weapons laboratories to address issues of immediate concern to the stockpile and only LANSCE will be able to provide needed data in a timely and cost-effective manner. Congressional funding over the last 2 years has helped Los Alamos purchase spare parts for a critical component that is reaching the end of its life and will allow LANSCE to return to full operation. Fiscal year 2011 funds will allow Los Alamos to purchase parts for one of its main power sources that are expected to fail within the next 3 years and develop and purchase new computers, instruments, controls, and diagnostics systems that have components that are no longer commercially available because they were manufactured in the 1960s.

The Committee is concerned about NNSA's use of funds for the Kansas City Responsive Infrastructure Manufacturing and Sourcing [KCRIMS] project. The purpose of the project is to build a new, smaller, and more modern facility at the Kansas City Plant to manufacture nonnuclear components for nuclear warheads and bombs. The costs of this project range from \$500,000,000 to \$673,000,000 with an estimated life-cycle cost of \$4,700,000,000. Rather than financing this construction project using a budget line item in the President's annual request for appropriations, NNSA has decided to acquire the facility using the General Services Administration [GSA] leasing authority, which allows GSA to lease space from a private developer on behalf of NNSA. NNSA chose the GSA leasing option as the best financing approach because it would lead to the lowest overall total cost over a 20-year period, eliminate the need for large up-front capital outlays, and it would meet NNSA's commitment to Congress to operate the facility by 2012. However, ground breaking for the new building has been delayed until at least August 2011 and the Committee is concerned that some level of funding may be being used to supplement construction costs. The Committee directs NNSA to identify funds for the KCRIMS project as a separate line item under the Readiness in Technical Base and Facilities [RTBF] account with an explanation of how the funds will be used to support the project.

The Committee recommends \$1,479,954,000, an increase of \$30,000,000 above the request, for the RTBF Operations and Maintenance account. This funding supports the operations and maintenance of the NNSA laboratories and production facilities, equipment purchases, and personnel. Of these funds:

Operations of Facilities.—The Committee recommends \$1,277,991,000, an increase of \$20,000,000 above the budget request. Within these funds, at least \$230,927,000 and \$131,254,000 shall be used for operations of facilities support for Y-12 and Pantex, respectively. This funding increase will help Y-12 and Pantex sustain facilities and other critical infrastructure needed for life extension programs, dismantlement work, and other national security needs.

Program Readiness.—The Committee recommends the requested amount of \$69,309,000.

Material Recycle and Recovery.—The Committee recommends \$80,429,000, an increase of \$10,000,000. Within these funds, \$50,905,000 shall be for material recycle and recovery activities at Y-12. This increase in funding will help restore activities at Y-12 related to the recovery and reuse of enriched uranium and lithium from dismantled nuclear weapons for stockpile stewardship, naval reactors, and nuclear nonproliferation missions.

Containers.—The Committee recommends the requested amount of \$27,992,000.

Storage.—The Committee recommends the requested amount of \$24,233,000.

Construction.—The Committee recommends \$440,016,000.

Project 11-D-801, TA-55 Reinvestment Project, Los Alamos, New Mexico.—The Committee provides \$20,000,000 as requested to begin the second phase of this effort to mitigate safety risks to workers identified by the Defense Nuclear Facilities Safety Board.

Project 09-D-007, LANSCE Refurbishment Project, Los Alamos, New Mexico.—The Committee recommends \$30,000,000 to refurbish the LANSCE facility. These funds shall be made available for capital equipment acquisition, installation, and associated design funds.

Project 09-D-404, Test Capabilities Revitalization Phase II, Sandia National Laboratories, Albuquerque, New Mexico.—The committee recommends \$11,000,000 to build mechanical shock facilities and rocket sled tracks that will be needed for the B61 life extension program.

Project 08-D-802, High Explosive Pressing Facility, Pantex Plant, Amarillo, Texas.—The Committee recommends \$30,000,000 as requested.

Project 07-D-140, Project Engineering and Design [PED], Various Locations.—The Committee recommends \$5,000,000 as requested to continue design work on the Transuranic Waste Facility Project at Los Alamos National Laboratory.

Project 06-D-140, PED, Various Locations.—The Committee recommends \$4,000,000 as requested. The project account supports ongoing design efforts for the Radioactive Liquid Waste Treatment Facility.

Project 06-D-141, PED, Uranium Processing Facility, Y-12, Oak Ridge, Tennessee.—The Committee recommends \$115,016,000, as requested.

Project 04-D-125 Chemistry and Metallurgy Facility Replacement Project, Los Alamos National Laboratory, Los Alamos, New Mexico.—The Committee recommends \$225,000,000 as requested.

SECURE TRANSPORTATION ASSET

The Committee recommendation for the Secure Transportation Asset program is \$248,045,000, the same as the budget request.

NUCLEAR COUNTERTERRORISM INCIDENT RESPONSE

The Committee recommends full funding of the nuclear counterterrorism incident response program. The Committee provides \$233,134,000 as requested. The Committee supports NNSA's efforts in developing equipment, procedures, and human expertise to identify and render safe improvised nuclear devices.

FACILITIES AND INFRASTRUCTURE RECAPITALIZATION

The Committee provides \$94,000,000 for Facilities and Infrastructure Recapitalization activities, consistent with the budget request. This program was developed to reduce the backlog in deferred maintenance of aging infrastructure facilities throughout the complex.

SITE STEWARDSHIP

The Committee recommends \$100,478,000, a decrease of \$5,000,000 below the budget request. The Committee supports NNSA's efforts to consolidate and dispose of NNSA special nuclear material that is no longer required for the nuclear weapons mission. Within available funds, up to \$4,000,000 may be used for energy-saving projects. The Committee directs NNSA to submit with the fiscal year 2012 budget request the list of projects under the energy modernization and investment program. The list of projects should include the total cost of each project, the expected cost savings and other benefits of each project and when those cost savings will be realized, and the extent to which they contribute to NNSA's energy conservation goals.

Operations and Maintenance.—The Committee recommends \$85,478,000.

Construction.—The Committee recommends the requested level of \$15,000,000.

Project 11-D-601 Sanitary Effluent Reclamation Facility, Los Alamos National Laboratory, Los Alamos, New Mexico.—The Committee recommends full funding of \$15,000,000 for this project.

SAFEGUARDS AND SECURITY

The Committee recommendation for the Safeguards and Security Program is \$835,299,000.

Defense Nuclear Security Operations and Maintenance.—The Committee recommends the requested level of \$667,954,000. The Committee support NNSA's efforts to reduce costs related to securing national laboratories and production sites while still maintaining effective physical security measures at each site. The Committee encourages NNSA to continue eliminating unnecessary costs while still protecting facilities' assets and resources against theft, sabotage, and other criminal acts.

Construction.—The Committee recommends \$43,000,000, a decrease of \$9,000,000.

Project 08-D-701 Nuclear Materials Safeguards and Security Upgrades Project Phase II, Los Alamos, New Mexico.—The Committee recommends \$43,000,000 for this project, a decrease of \$9,000,000 from the budget request. NNSA will not be able to complete design activities and begin construction work until design plans for the Chemistry and Metallurgy Research Replacement—Nuclear Facility [CMR–NF] project is more developed. The size of CMR–NF will determine the amount of security fencing needed.

Cybersecurity.—The Committee recommends the full request of \$124,345,000.

SCIENCE, TECHNOLOGY, AND ENGINEERING CAPABILITY

The Committee recommends \$20,000,000 as requested for Science, Technology, and Engineering Capability activities. The Committee supports NNSA's efforts to leverage its science, engineering, and technological expertise to work with the Defense Threat Reduction Agency to improve the nation's counterterrorism capabilities. The Committee encourages NNSA to continue working with DTRA to improve nuclear forensics capabilities and develop the tools needed to probe materials and objects and identify hidden or concealed nuclear threats.

DEFENSE NUCLEAR NONPROLIFERATION

Appropriations, 2010	\$2,136,709,000
Budget estimate, 2011	2,687,167,000
Committee recommendation	2,612,167,000

The Committee recommends \$2,612,167,000 for Defense Nuclear Nonproliferation. The Committee supports NNSA's goal of securing all vulnerable nuclear material within 4 years. Securing nuclear materials at the sites and facilities where they are located is the best defense against nuclear terrorism. Since April 2009, when President Obama announced the 4-year goal, NNSA, with the assistance of other Government agencies, has made significant progress. For example, in the last year, four countries have eliminated all weapons-usable nuclear material on their soil—bringing the total to 17 countries in the last 10 years. Despite this progress, NNSA lacks a clear set of metrics to assess and report on the progress of the 4-year nuclear security effort. The Committee directs NNSA to provide a report to the Committee by April 1, 2011, with (1) the measures and indicators it will use to assess the progress in meeting the 4-year goal, (2) the progress it has made toward meeting the goals 2 years into the effort, and (3) additional measures it must take and funding requirements for the last 2 years. Such measures should include the fraction of the total number of sites in the world with nuclear weapons or weapons-usable materials where all of those stocks have been eliminated and the fraction that have demonstrated that their security systems are performing effectively and could protect against a broad range of outsider and insider threats.

NONPROLIFERATION AND VERIFICATION RESEARCH AND DEVELOPMENT

The Committee recommends \$362,068,000, an increase of \$10,500,000 above the budget request, to support expanded invest-

ment in developing advanced nuclear detection technologies. Within the available funds, the Committee provides \$10,000,000 for NNSA laboratories to use their expertise and advanced computational, modeling, and simulation capabilities to meet the United States' space situational awareness requirements. The Committee expects NNSA to include this initiative in the regular budget request. Also, within available funds, at least \$500,000 should be used for the Global Seismographic Network [GSN] Equipment Renewal project. The GSN, among other things, has 46 sites—the single largest contribution—that monitor compliance with the Comprehensive Nuclear Test Ban Treaty and could detect foreign nuclear tests. However, GSN equipment, such as sensors, is more than 15 years old, obsolete, and increasingly difficult to effectively maintain.

NONPROLIFERATION AND INTERNATIONAL SECURITY

The Committee recommends \$155,930,000 as requested.

INTERNATIONAL NUCLEAR MATERIALS PROTECTION AND COOPERATION

The Committee recommends \$590,118,000 as requested. The Committee is encouraged by NNSA's efforts in completing security upgrades at 210 out of 229 buildings that store weapons usable nuclear material and warheads in Russia. NNSA is also on track to complete security upgrades at the remaining 19 buildings by the end of fiscal year 2012. In addition to completing security upgrades, NNSA is working on gradually decreasing U.S. funding and relying more heavily on Russian resources for upgrades and maintenance. The August 2009 Joint Transition Plan between the United States and Russia laid out the necessary steps at each site to maintain robust material, protection, control, and accounting [MPC&A] systems in place. However, the Committee remains concerned about sustaining security upgrades after the program expires at the end of fiscal year 2012. The Committee wants assurances that the U.S. investment of \$2,700,000,000 since fiscal year 1996 will not be squandered. The Committee directs NNSA to submit a report to the Committee not later than 90 days of enactment on (1) whether Russia has taken steps to implement the Joint Transition Plan, (2) the remaining challenges in sustaining security upgrades and how NNSA plans to address those challenges, and (3) U.S. resources, whether direct or indirect, needed after fiscal year 2012 to support U.S.-funded MPC&A activities.

FISSILE MATERIALS DISPOSITION

The Committee recommends \$935,213,000, a reduction of \$95,500,000, to support the plutonium disposition program and construction projects.

U.S. Surplus Fissile Materials Disposition.—The Committee provides for the full request of \$304,925,000, including \$278,940,000 as requested for the U.S. plutonium disposition and \$25,985,000 as requested for the U.S. uranium disposition program.

Construction.—The Committee recommends \$582,788,000 to support construction, a reduction of \$30,000,000. The Committee supports construction of three critical facilities at Savannah River in

South Carolina—the MO_X Fuel Fabrication Facility [MFFF], the Waste Solidification Building, and the Pit Disassembly and Conversion Facility [PDCF]—that will dispose of at least 34 metric tons of plutonium by fabricating it into mixed oxide fuel for domestic nuclear reactors. However, a March 2010 GAO report found that NNSA (1) may not be able to supply MFFF with sufficient quantities of plutonium oxide feedstock to meet its planned production schedule of MO_X fuel and (2) there may not be demand from domestic utilities that own nuclear reactors to buy MO_X fuel. NNSA plans to complete construction of MFFF at least 6 years before PDCF is completed even though PDCF will provide the majority of the plutonium feedstock to MFFF. In addition, NNSA only has a limited quantity of feedstock on hand to supply the MFFF prior to the start of pit disassembly operations at PDCF. However, NNSA has not established a clear strategy on how it will supply feedstock to MFFF to meet its goals. Furthermore, while NNSA has one potential customer for most of its MO_X fuel, it has not done sufficient outreach to find MO_X fuel customers. Without this outreach, NNSA will not be able to sell MO_X fuel and return more than \$1,000,000,000 to the U.S. Treasury. The Committee directs the NNSA to submit a plan not later than 90 days of enactment to mitigate the likely shortfall in plutonium oxide feedstock for the MFFF prior to the start of pit disassembly operations. This plan should include, at a minimum, the following five items: (1) the actions needed to ensure that the Advanced Recovery and Integrated Extraction System project at Los Alamos will meet its existing production goals, and the cost and schedule associated with any needed expansion of the project; (2) an assessment of how much additional plutonium material, including fuel-grade plutonium, is available within the DOE complex for use as feedstock for the MFFF; (3) an assessment of the effect on the design and safety of the MFFF from the use of fuel-grade plutonium as feedstock; (4) an assessment of potential changes to the MO_X fuel production schedule and the effect of these changes on the cost and schedule for operating the MFFF; and (5) an assessment of the cost and schedule associated with obtaining a limited but sufficient pit disassembly process to produce feedstock for the MFFF. The Committee also directs NNSA to submit a report not later than 90 days after enactment of this act on what actions it has taken to inform utilities about the MO_X fuel program and related incentives and how it plans to increase the number of customers for MO_X fuel.

Project 99-D-143, Mixed Oxide Fuel Fabrication Facility, Savannah River, South Carolina.—The Committee recommends \$475,788,000 as requested.

Project 99-D-141-02, Waste Solidification Building, Savannah River, South Carolina.—The Committee recommends full funding of \$57,000,000 for this project.

Project 99-D-141-01, Pit Disassembly and Conversion Facility, Savannah River, South Carolina.—The Committee recommends \$50,000,000, a reduction of \$30,000,000, for construction of this facility. The Committee supports NNSA's efforts to design and develop gloveboxes and other critical equipment and technologies to handle plutonium and establish a pit disassembly and conversion capability. However, no funding should be used for construction ac-

tivities until (1) NNSA completes its assessment of the impact on cost and schedule of combining NNSA's Pit Disassembly and Conversion Facility project with the Office of Environmental Management's Plutonium Preparation Project at Savannah River, (2) determines whether the projects should be combined and the pit disassembly and conversion capability will be located at the K-area Facility rather than a new, stand-alone facility, and (3) completes its conceptual design report with a new cost and schedule range consistent with DOE guidance.

Russian Surplus Materials Disposition.—The Committee recommends \$47,500,000, a reduction of \$65,500,000. No funding shall be used to support research and development of the Gas Turbine-Modular Helium Reactor in Russia. The Committee understands that on April 13, 2010, the United States and Russia signed the Plutonium Management and Disposition Agreement. The agreement represents an important step in advancing nuclear disarmament. Under the agreement, the United States and Russia will each dispose of 34 metric tons of weapon-grade plutonium—enough material for approximately 17,000 nuclear weapons—by using it as fuel in civil power reactors to produce electricity. The Committee also understands that the United States committed \$400,000,000, subject to future appropriations, to help Russia dispose of the excess plutonium and that NNSA requested the first \$100,000,000 in the fiscal year 2011 budget. The Committee cannot provide the full \$100,000,000 requested because of tight budget constraints, spending on other nonproliferation priorities, and the fact that NNSA does not plan to spend any of the \$100,000,000 requested in fiscal year 2011. According to NNSA planning documents, NNSA will spend the \$100,000,000 over 3 years beginning in fiscal year 2012. In addition, NNSA has \$17,000,000 in uncotted funds appropriated in fiscal year 2010 at its disposal to implement the agreement in fiscal year 2011. However, as a confidence-building measure and in support of the agreement, the Committee will provide \$47,500,000.

The Committee directs NNSA to submit to the Committee a report on how the United States will spend the \$400,000,000 and the milestones that Russia must meet before the United States releases any of these funds.

GLOBAL THREAT REDUCTION INITIATIVE

The Committee recommends \$568,838,000, an increase of \$10,000,000. The Global Threat Reduction Initiative's Domestic Material Protection program works to install security upgrades at buildings containing high-priority nuclear and radiological materials located at civilian sites in the United States. The Committee is concerned by the decrease in funding and level of effort for these activities. As a result, of the total funds requested for the Global Threat Reduction Initiative, at least \$35,147,000 should be used for the Domestic Material Protection program to secure vulnerable nuclear materials in the United States. If by the end of the second quarter of fiscal year 2011 NNSA has not entered into an agreement with South Africa to remove South African highly enriched uranium, the Committee directs NNSA to use \$27,000,000 of the \$108,000,000 appropriated for gap nuclear material remove activities for domestic material protection activities.

NAVAL REACTORS

Appropriations, 2010	\$945,133,000
Budget estimate, 2011	1,070,486,000
Committee recommendation	1,040,486,000

The Committee provides \$1,040,486,000 for Naval Reactors. In fiscal year 2010, NNSA began work on three significant projects: design of a reactor plant for new Ohio-class ballistic missile submarines, refueling of a land-based reactor prototype, and construction of a new spent fuel facility. Based on current projections, funding for these three projects will grow from \$200,000,000 in fiscal year 2011 to more than \$600,000,000 in fiscal year 2015. The Committee is concerned that the cost for these projects and management requirements will peak at the same time. The Committee urges the program to keep Congress informed on the progress of each project.

OFFICE OF THE ADMINISTRATOR

Appropriations, 2010	\$420,754,000
Budget estimate, 2011	448,267,000
Committee recommendation	438,267,000

The Committee recommends \$438,267,000 for the Office of the Administrator, a decrease of \$10,000,000 below the budget request.

ENVIRONMENTAL AND OTHER DEFENSE ACTIVITIES

DEFENSE ENVIRONMENTAL CLEANUP

Appropriations, 2010	\$5,642,331,000
Budget estimate, 2011	5,588,039,000
Committee recommendation	5,262,838,000

The Committee recommendation for Defense Environmental Cleanup is \$5,262,838,000. Within the total provided, the Department is directed to fund the Hazardous Waste Worker Training Program at \$10,000,000. The Committee is supportive of the Office of Environmental Management's efforts to improve the management of its portfolio of projects by creating operational activities and capital cleanup projects funded under the existing PBS structure. The capital cleanup projects are aimed at environmental remediation efforts like soil and groundwater cleanup, including monitoring well installation and construction of treatment systems, as well as decontamination and decommissioning of excess facilities. The Environmental Management program plans to apply the rigor of the Department's Project Management Order, DOE 413.3A, to these relatively small cleanup projects. The Committee directs Environmental Management to include a summary of these capital cleanup projects, including scope, cost and schedule, as supplementary information to accompany the submission of the fiscal year 2012 request. Environmental Management should budget for these capital cleanup projects as operating expense funded projects within the PBSs, apply the principles of DOE 413 for all these projects, and apply all pertinent, generally accepted government accounting principles and DOE Orders for capitalization of these projects upon completion.

Reprogramming Control Levels.—In fiscal year 2011, the Environmental Management program may transfer funding between operating expense funded projects within the controls listed below using guidance contained in the Department's budget execution manual (DOE M 135.1–1A, chapter IV). All capital construction line item projects remain separate controls from the operating projects. The Committees on Appropriations in the House and Senate must be formally notified in advance of all reprogrammings, except internal reprogrammings, and the Department is to take no financial action in anticipation of Congressional response. The Committee recommends the following reprogramming control points for fiscal year 2011:

- Closure sites;
- Hanford Site;
- Idaho National Laboratory;
- NNSA Sites;
- Oak Ridge Reservation;
- Office of River Protection;
- Savannah River Site;
- Waste Isolation Pilot Plant;
- Program Direction;
- Program Support;
- Technology Development and Deployment;
- Safeguards and Security;
- All Capital Construction Line Items, regardless of site.

Internal Reprogramming Authority.—The new reprogramming control points above obviates, in most cases, the need for internal reprogramming authority. However, at the few sites to which the internal reprogramming statute still applies, Environmental Management site managers may transfer up to \$5,000,000, one time, between accounts listed above to reduce health and safety risks, gain cost savings, or complete projects, as long as a program or project is not increased or decreased by more than \$5,000,000 in total during the fiscal year.

The reprogramming authority—either formal or internal—may not be used to initiate new programs or to change funding levels for programs specifically denied, limited, or increased by Congress in the act or report. The Committee on Appropriations in the House and Senate must be notified within 30 days after the use of the internal reprogramming authority.

Closure Sites.—The Committee recommends \$6,375,000, the same as the request, for closure sites.

Hanford Site.—The Committee recommends \$1,018,929,000 for Richland Operations. The Department is directed to carry out maintenance and public safety efforts at the B Reactor. Funding for the Hazardous Materials Management and Emergency Response [HAMMER] facilities are provided for within available funds.

Idaho National Laboratory.—The Committee recommends \$407,100,000 for Idaho National Laboratory.

NNSA Sites.—The Committee recommends \$279,373,000 for NNSA sites.

Oak Ridge Reservation.—The Committee recommends \$232,700,000 for Oak Ridge Reservation, including \$152,278,000 for ORNL and Y12 D&D activities under the Integrated Facilities

Disposition Program. The amount provided for cleanup activities at ORNL shall include the 2000 Area slabs and soils remediation and the Isotope Area decommissioning and demolition.

Office of River Protection.—The Committee recommends \$1,158,178,000 for the Office of River Protection.

Savannah River Site.—The Committee recommends \$1,217,799,000 for the Savannah River site. The Committee provides \$910,533,000 for Radioactive Liquid Tank Waste at the Savannah River Site, an increase of \$104,300,000 over the request, funded by offsets from Nuclear Materials and Spent Nuclear Fuel Activities at Savannah River. These funds should be combined with other fiscal year 2010 and 2011 savings to accelerate tank retrievals at the site through the deployment of innovative technologies, such as small column ion exchange, advanced solvent extractants and steam reforming. Successful demonstration of these technologies has the potential to save tens of millions of dollars in life cycle costs at Savannah River and will expand the range of treatment options for similar wastes at other sites.

Waste Isolation Pilot Plant.—The Committee recommends \$230,245,000 for the Waste Isolation Pilot Plant.

Program Direction.—The Committee recommends \$355,000,000 for program direction. The Committee notes that in fiscal year 2010 the administration requested \$355,000,000 for program direction and then oddly reduced the fiscal year 2011 request to \$323,825,000. The Environmental Management program has suffered due to management issues with construction projects and completing projects on time and within budget. While not the only answer to this problem, sufficient workforce is certainly required to address management issues. The Committee was pleased with the fiscal year 2010 request level even if it could not match it. The dramatic reduction of the fiscal year 2011 request is disconcerting and inexplicable. The Committee recognizes the need to improve project management in the Environmental Management organization, and supports efforts to make such improvements. The Committee supports the efforts of the Assistant Secretary to create a more effective Environmental Management project management team with the assistance of the Army Corps of Engineers.

Program Support.—The Committee recommends \$34,000,000 for program support.

Safeguards and Security.—The Committee recommends \$249,754,000 for safeguards and security.

Technology Development and Deployment.—The Committee recommends \$39,685,000 for technology development and deployment. Additional funds above the budget request are provided to continue successful efforts with industry to transfer and demonstrate international technologies and approaches to the cleanup program. The Committee also encourages the Department to work with industry on initiatives which better support the transition of ideas and technology into practice.

Federal Contribution to Uranium Enrichment Decontamination and Decommissioning Fund.—The Committee recommends \$33,700,000, the remaining balance for the Federal contribution for the UED&D Fund.

OTHER DEFENSE ACTIVITIES

Appropriations, 2010	\$847,468,000
Budget estimate, 2011	878,209,000
Committee recommendation	866,317,000

The Committee recommendation is \$866,317,000, a decrease of \$11,892,000 below the budget request. The Committee does not provide the funding requested under the general provisions to increase the Department's acquisition workforce capacity and capabilities.

Health, Safety and Security.—The Committee recommends \$462,211,000.

Office of Legacy Management.—The Committee recommends \$188,626,000.

Nuclear Energy.—The Committee recommends \$88,200,000 for Idaho infrastructure for sitewide safeguards and security.

Defense-related Administrative Support.—The Committee provides \$118,836,000.

Office of Hearings and Appeals.—The Committee provides \$6,444,000.

Congressionally Directed Spending Items.—The Committee includes \$2,000,000 for the following list of projects of Other Defense Activities. The Committee reminds recipients that statutory cost-sharing requirements may apply to these projects.

CONGRESSIONALLY DIRECTED OTHER DEFENSE ACTIVITIES PROJECTS

Project title	Amount	Requestor
Burlington Atomic Energy Commission Plant and Ames Laboratory Former Workers Medical Surveillance Programs.	\$1,000,000	Senators Harkin, Grassley
Medical Monitoring at Paducah, KY, Portsmouth, OH, and Oak Ridge, TN	\$1,000,000	Senator McConnell

POWER MARKETING ADMINISTRATIONS

BONNEVILLE POWER ADMINISTRATION

The Bonneville Power Administration is the Department of Energy's marketing agency for electric power in the Pacific Northwest. Bonneville provides electricity to a 300,000 square mile service area in the Columbia River drainage basin. Bonneville markets the power from Federal hydropower projects in the Northwest, as well as power from non-Federal generating facilities in the region. Bonneville also exchanges and markets surplus power with Canada and California. The Committee recommends no new borrowing authority for BPA during fiscal year 2011.

OPERATION AND MAINTENANCE, SOUTHEASTERN POWER ADMINISTRATION

Appropriations, 2010	\$7,638,000
Budget estimate, 2011
Committee recommendation

For the Southeastern Power Administration, the Committee recommends no funding, the same as the budget request.

**OPERATION AND MAINTENANCE, SOUTHWESTERN POWER
ADMINISTRATION**

Appropriations, 2010	\$44,944,000
Budget estimate, 2011	12,699,000
Committee recommendation	12,699,000

For the Southwestern Power Administration, the Committee recommends \$12,699,000, the same as the budget request.

**CONSTRUCTION, REHABILITATION, OPERATION AND MAINTENANCE,
WESTERN AREA POWER ADMINISTRATION**

Appropriations, 2010	\$256,711,000
Budget estimate, 2011	105,558,000
Committee recommendation	105,558,000

For the Western Area Power Administration, the Committee recommends \$105,558,000, the same as the budget request.

FALCON AND AMISTAD OPERATING AND MAINTENANCE FUND

Appropriations, 2010	\$2,568,000
Budget estimate, 2011	220,000
Committee recommendation	220,000

For the Falcon and Amistad Operating and Maintenance Fund, the Committee recommends \$220,000 the same as the request.

FEDERAL ENERGY REGULATORY COMMISSION

SALARIES AND EXPENSES

Appropriations, 2010	\$298,000,000
Budget estimate, 2011	315,600,000
Committee recommendation	315,600,000

GENERAL PROVISIONS—DEPARTMENT OF ENERGY

The following list of general provisions is recommended by the Committee. The recommendation includes several provisions which have been included in previous Energy and Water Appropriations Acts and new provisions as follows:

Section 301. Language is included on reprogramming authority.

Section 302. Language is included that prohibits the use of funds in this act to initiate a request for proposal or expression of interest or other similar arrangements for new programs which have not yet been presented to Congress in the annual budget submission and which have not yet been approved and funded by Congress.

Section 303. Language is included to address issues under section 3161 of Public Law 102–484.

Section 304. Language is included which permits the transfer and merger of unexpended balances of prior appropriations with appropriation accounts established in this bill.

Section 305. Language is included specifically authorizing intelligence activities pending enactment of the fiscal year 2011 Intelligence Authorization Act.

Section 306. The Committee has included a provision related to pensions.

Section 307. Language is included related to the minor construction threshold.

Section 308. The Committee has included a provision related to notification of funding awards.

Section 309. Language is included related to the barter of uranium.

Section 310. Language is included related to notification of loan guarantee awards.

TITLE IV
INDEPENDENT AGENCIES
APPALACHIAN REGIONAL COMMISSION

Appropriations, 2010	\$76,000,000
Budget estimate, 2011	76,000,000
Committee recommendation	76,000,000

Established in 1965, the Appalachian Regional Commission is an economic development agency composed of 13 Appalachian States and a Federal co-chair appointed by the President. For fiscal year 2011, the Committee recommends \$76,000,000 for the ARC.

The Committee recognizes the Commission's efforts to cooperate with appropriate Federal, regional, State, and local entities to help diversify and strengthen the Appalachian regional economy. The Committee encourages the Commission to explore environmental remediation projects related to brownfield sites and abandoned mine lands. The Committee encourages the Commission to examine the Appalachian Regional Reforestation Initiative, and other initiatives that will foster economic development related to forest products, ecosystem services, and tourism, by restoring healthy forests on a landscape scale. The Committee encourages the Commission to coordinate with the Appalachian Coal Country Watershed Team within the Office of Surface Mining Reclamation and Enforcement, Department of the Interior, and the State and Private Forestry programs of the U.S. Forest Service.

The Committee recognizes the importance of trade and investment opportunities to the Appalachian Region and is encouraged by the findings in a report that Appalachian firms could find significant trade and investment opportunities, particularly in the energy, high technology, and transportation sectors in the Republic of Turkey and the surrounding region. In this regard, the Committee supports the Appalachian-Turkish Trade Project [ATTP], a project to promote opportunities to expand trade, encourage business interests, stimulate foreign studies, and to build a lasting and mutually meaningful relationship between Appalachian States and the Republic of Turkey, as well as the neighboring regions, such as Greece. The Committee commends the ARC for its leadership role in helping to implement the mission of the ATTP. The Committee expects the ARC to continue to be a prominent ATTP sponsor.

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

SALARIES AND EXPENSES

Appropriations, 2010	\$26,086,000
Budget estimate, 2011	28,640,000
Committee recommendation	26,086,000

For fiscal year 2011, the Committee recommends \$26,086,000, for the Defense Nuclear Facilities Safety Board.

DELTA REGIONAL AUTHORITY

Appropriations, 2010	\$13,000,000
Budget estimate, 2011	13,000,000
Committee recommendation	13,000,000

For the Delta Regional Authority, the Committee recommends \$13,000,000. The Delta Regional Authority was established to assist the eight State Mississippi Delta Region in obtaining basic infrastructure, transportation, skills training, and opportunities for economic development.

DENALI COMMISSION

Appropriations, 2010	\$11,965,000
Budget estimate, 2011	11,965,000
Committee recommendation	11,965,000

The Denali Commission is a Federal-State partnership responsible for promoting infrastructure development, job training, and other economic development services in rural areas throughout Alaska. For fiscal year 2011, the Committee recommends \$11,965,000.

NORTHERN BORDER REGIONAL COMMISSION

Appropriations, 2010	\$1,500,000
Budget estimate, 2011	1,500,000
Committee recommendation	1,500,000

The Committee recommends no funding for the Northern Border Regional Commission.

SOUTHEAST CRESCENT REGIONAL COMMISSION

Appropriations, 2010	\$250,000
Budget estimate, 2011	250,000
Committee recommendation	250,000

The Committee recommends no funding for the Southeast Crescent Regional Commission.

NUCLEAR REGULATORY COMMISSION

SALARIES AND EXPENSES

Appropriations, 2010	\$1,056,000,000
Budget estimate, 2011	1,043,483,000
Committee recommendation	1,053,483,000

REVENUES

Appropriations, 2010	-\$902,402,000
Budget estimate, 2011	-906,220,000
Committee recommendation	-915,220,000

NET APPROPRIATION

Appropriations, 2010	\$153,598,000
Budget estimate, 2011	137,263,000
Committee recommendation	138,263,000

The Committee recommendation for the Nuclear Regulatory Commission for fiscal year 2011 is \$1,053,483,000, an increase of \$10,000,000 above the budget request. This amount is offset by estimated revenues of \$915,220,000 resulting in a net appropriation of \$138,263,000. The additional \$10,000,000 of funding supplements the \$5,000,000 included in the budget request for Nuclear Regulatory Commission participation in an Integrated University Program as directed by section 313 of Public Law 111–8. The total of \$15,000,000 for this program is subject to fee recovery consistent with that authorized by the Omnibus Budget Reconciliation Act of 1990, as amended. The Committee recommends \$10,000,000 of this amount to be used to support university education programs relevant to the NRC mission. In addition, not less than \$5,000,000 of this amount will be used for grants to support research projects that do not align with programmatic missions but are critical to maintaining the discipline of nuclear science and engineering.

Fee Recovery.—The Committee recommendation assumes that the NRC will recover 90 percent of its budget authority from user fees and annual charges, as authorized in the Omnibus Budget Reconciliation Act of 1990, as amended, less the appropriation derived from the Nuclear Waste Fund, the amount necessary to implement section 3116 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108–375), and the amount necessary for generic homeland security activities of the Commission. Of the \$1,053,483,000 gross appropriation for fiscal year 2012, \$10,000,000 is drawn from the Nuclear Waste Fund, \$524,000 is drawn from the General Fund of the Treasury to execute NRC's responsibilities to provide oversight of certain Department of Energy activities under section 3116 of Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108–375), and \$26,048,000 is drawn from the General Fund of the Treasury to execute NRC's homeland security responsibilities. Ninety percent of the balance of \$1,016,911,000 (i.e., \$915,220,000) is funded by fees collected from NRC licensees, and the remaining 10 percent (i.e., \$101,691,000) is funded from the General Fund of the Treasury.

OFFICE OF INSPECTOR GENERAL

GROSS APPROPRIATION

Appropriations, 2010	\$10,860,000
Budget estimate, 2011	10,102,000
Committee recommendation	10,860,000

REVENUES

Appropriations, 2010	\$9,774,000
Budget estimate, 2011	9,092,000
Committee recommendation	9,774,000

NET APPROPRIATION

Appropriations, 2010	\$1,086,000
Budget estimate, 2011	1,010,000
Committee recommendation	1,086,000

The Committee recommends a net appropriation of \$1,086,000, an increase of \$76,000 over the budget request. The Committee di-

rects that the current no year funding authority of the Office of Inspector General be retained.

NUCLEAR WASTE TECHNICAL REVIEW BOARD

Appropriations, 2010	\$3,891,000
Budget estimate, 2011	2,490,000
Committee recommendation	3,891,000

The Nuclear Waste Technical Review Board was established to evaluate the scientific and technical validity of the Department of Energy's nuclear waste disposal program. The Board reports its findings no fewer than two times a year to Congress and to the Secretary of Energy. For fiscal year 2011, the Committee recommends \$3,891,000.

OFFICE OF THE FEDERAL COORDINATOR FOR ALASKA NATURAL GAS TRANSPORTATION PROJECTS

Appropriation, 2009	\$4,466,000
Budget estimate, 2011	4,285,000
Committee recommendation	4,285,000

The Office of the Federal Coordinator for Alaska Natural Gas Transportation Projects was established as an independent agency in the executive branch on December 13, 2006, pursuant to the Alaska Natural Gas Pipeline Act of 2004. The Committee recommends \$4,285,000, the same as the budget request.

TITLE V
GENERAL PROVISIONS

The following list of general provisions are recommended by the Committee.

Section 501. The provision prohibits the use of any funds provided in this bill from being used to influence congressional action.

Section 502. The provision addresses transfer authority under this act.

COMPLIANCE WITH PARAGRAPH 7, RULE XVI, OF THE STANDING RULES OF THE SENATE

Paragraph 7 of rule XVI requires that Committee reports on general appropriations bills identify each Committee amendment to the House bill “which proposes an item of appropriation which is not made to carry out the provisions of an existing law, a treaty stipulation, or an act or resolution previously passed by the Senate during that session.”

The Committee recommends funding for the following programs or activities which currently lack authorization for fiscal year 2011:

The U.S. Army Corps of Engineers: General Investigations; Construction, General; Mississippi River and Tributaries; Operations and Maintenance; Formerly Utilized Sites Remedial Action Program;

Department of the Interior, Bureau of Reclamation;
Water and Related Resources;

Department of Energy: Energy Conservation and Supply Activities:

Office of Fossil Energy: Fossil Energy R&D, Clean Coal, Naval Petroleum and Oil Shale Research;

Health, Safety and Security;
Non-Defense Environmental Management;

Office of Science;

Department of Administration;

National Nuclear Security Administration: Weapons Activities; Defense Nuclear Nonproliferation; Naval Reactors; Office of the Administrator;

Defense Environmental Management, Defense Site Acceleration Completion;

Other Defense Activities;
Defense Nuclear Waste Fund;
Office of Security and Performance Assurance;

Federal Energy Regulatory Commission;

Power Marketing Administrations: Southeastern, Southwestern, Western Area; and

Energy Information Administration.

COMPLIANCE WITH PARAGRAPH 7(c), RULE XXVI, OF THE STANDING RULES OF THE SENATE

Pursuant to paragraph 7(c) of rule XXVI, on July 22, 2010, the Committee ordered reported en bloc an original bill (S. 3636) making appropriations for the Departments of Commerce and Justice, and Science, and related agencies for the fiscal year ending September 30, 2011, and for other purposes; an original bill (S. 3635) making appropriations for energy and water development and related agencies for the fiscal year ending September 30, 2011, and for other purposes; and an original bill making appropriations

for the Departments of Transportation, and Housing and Urban Development, and related agencies for the fiscal year ending September 30, 2011, and for other purposes; with each subject to amendment and subject to the Committee spending guidance, and authorized the chairman of the committee or the chairman of the subcommittee to offer the text of the Senate-reported bill as a committee amendment in the nature of a substitute to the House companion measure, by a recorded vote of 17–12, a quorum being present. The vote was as follows:

Yea	Nay
Chairman Inouye	Mr. Cochran
Mr. Leahy	Mr. Bond
Mr. Harkin	Mr. McConnell
Ms. Mikulski	Mr. Shelby
Mr. Kohl	Mr. Gregg
Mrs. Murray	Mr. Bennett
Mr. Dorgan	Mrs. Hutchison
Mrs. Feinstein	Mr. Brownback
Mr. Durbin	Mr. Alexander
Mr. Johnson	Ms. Collins
Ms. Landrieu	Mr. Voinovich
Mr. Reed	Ms. Murkowski
Mr. Lautenberg	
Mr. Nelson	
Mr. Pryor	
Mr. Tester	
Mr. Specter	

COMPLIANCE WITH PARAGRAPH 12, RULE XXVI, OF THE STANDING RULES OF THE SENATE

Paragraph 12 of rule XXVI requires that Committee reports on a bill or joint resolution repealing or amending any statute or part of any statute include “(a) the text of the statute or part thereof which is proposed to be repealed; and (b) a comparative print of that part of the bill or joint resolution making the amendment and of the statute or part thereof proposed to be amended, showing by stricken-through type and italics, parallel columns, or other appropriate typographical devices the omissions and insertions which would be made by the bill or joint resolution if enacted in the form recommended by the Committee.”

In compliance with this rule, changes in existing law proposed to be made by the bill are shown as follows: existing law to be omitted is enclosed in black brackets; new matter is printed in italic; and existing law in which no change is proposed is shown in roman.

**WATER RESOURCES DEVELOPMENT ACT, 1996, PUBLIC
LAW 104-303**

**TITLE III—PROJECT-RELATED
PROVISIONS**

SEC. 333. PASSAIC RIVER, NEW JERSEY.

Section 1148 of the Water Resources Development Act of 1986 (100 Stat. 4254) is amended to read as follows:

“SEC. 1148. PASSAIC RIVER BASIN.

“(a) ACQUISITION OF LANDS.—The Secretary may acquire from willing sellers lands on which residential structures are located and that are subject to frequent and recurring flood damage, as identified in the supplemental floodway report of the Corps of Engineers, Passaic River Buyout Study, September 1995, at an estimated total cost of \$194,000,000.

“[(b) RETENTION OF LANDS FOR FLOOD PROTECTION.—Lands acquired by the Secretary under this section shall be retained by the Secretary for future use in conjunction with flood protection and flood management in the Passaic River Basin.]

(b) Lands individually acquired by the Secretary under this section for flood protection and flood management in the Passaic River Basin are to held by the Secretary and the non-Federal sponsor as tenants in common with, thereafter, any interest held by the Secretary in such lands to be transferred by Quitclaim Deed to the Non-Federal sponsor for consideration as is necessary to render the project cost sharing percentages to be in compliance with section 903(c) of the Water Resources Development Act of 1986 (33 U.S.C. 2213) and such other law as may be applicable.

“(c) COST SHARING.—The non-Federal share of the cost of carrying out this section shall be 25 percent plus any amount that might result from application of subsection (d).

“(d) APPLICABILITY OF BENEFIT-COST RATIO WAIVER AUTHORITY.—In evaluating and implementing the project under this section, the Secretary shall allow the non-Federal interest to participate in the financing of the project in accordance with section 903(c), to the extent that the Secretary’s evaluation indicates that applying such section is necessary to implement the project.”

(e) FUNDS FOR LAND ACQUISITION.—Funds for acquiring such lands as are necessary in carrying out the requirements of this section and requirements as further recommended by the Secretary shall include funds as provided in subsection (c) and (d) of this section herein and also funds as previously appropriated with any and all such funds to be held by the Secretary for use in acquiring the requisite lands in proportion to the project cost sharing percentages.

DEPARTMENT OF DEFENSE—CIVIL

DEPARTMENT OF THE ARMY

CORPS OF ENGINEERS—CIVIL

GENERAL PROVISIONS

CORPS OF ENGINEERS—CIVIL

SEC. 117. Section 595 of the Water Resources Development Act of 1999 (113 Stat. 383; 117 Stat. 142) is amended—

(1) by striking the section heading and inserting the following:

“SEC. 595. IDAHO, MONTANA, RURAL NEVADA, NEW MEXICO, AND RURAL UTAH.”;

(2) in subsection (a)—

(A) by redesignating paragraphs (1) through (3) as subparagraphs (A) through (C), respectively;

(B) by striking (a) and all that follows through “means—” and inserting the following:

(a) DEFINITIONS.—In this section:

“(1) RURAL NEVADA.—The term ‘rural Nevada’ means”; and (C) by adding at the end the following:

“(2) RURAL UTAH.—The term ‘rural Utah’ means—

“(A) the counties of Box Elder, Cache, Rich, Tooele, Morgan, Summit, Daggett, Wasatch, Duchesne, Uintah, Juab, Sanpete, Carbon, Millard, Sevier, Emery, Grand, Beaver, Piute, Wayne, Iron, Garfield, San Juan, and Kane, Utah[; and];

“(B) the portions of Washington County, Utah, that are located outside the city of St. George, Utah[.]; and”;

(C) the portions of Utah County and Weber Counties that are located outside of a political subdivision, the population of which is greater than 10,000 residents.

PUBLIC LAW 110-114**

**TITLE III—PROJECT-RELATED
PROVISIONS**

SEC. 3001. BLACK WARRIOR-TOMBIGBEE RIVERS, ALABAMA.

Section 111 of title I of division C of the Consolidated Appropriations Act, 2005 (118 Stat. 2944) is amended to read as follows:

“SEC. 111. BLACK WARRIOR-TOMBIGBEE RIVERS, ALABAMA.

“(a) * * *
“(1) * * *

* * * * *

(3) may grant to the City of Tuscaloosa a long term lease or license agreement for any portion of the Parcel not required for construction of the new administrative facility under subsection (a) (2)(c) until such time as the City of Tuscaloosa is prepared to take fee simple title per the provisions of subsection(b)(2).

“(c) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section \$32,000,000.”

* * * * *

SEC. 3113. WESTERN SARPY AND CLEAR CREEK, NEBRASKA.

The project for ecosystem restoration and flood damage reduction, Western Sarpy and Clear Creek, Nebraska, authorized by section 101(b)(21) of the Water Resources Development Act of 2000 (114 Stat. 2578), is modified to authorize the Secretary to construct the project at a total cost of ~~[\$21,664,000, with an estimated Federal cost of \$14,082,000 and an estimated non-Federal cost of \$7,582,000.]~~ \$38,800,000, with an estimated Federal cost of \$25,220,000 and an estimated non-Federal cost of \$13,580,000.

* * * * *

**SEC. 3182. LAND
CONVEYANCES.**

(a)* * *

* * * * *

(j) DENISON, TEXAS.—

(1) IN GENERAL.—Not later than 90 days after the date of enactment of this Act, the Secretary shall offer to convey at fair market value to the city of Denison, Texas, all right, title, and interest of the United States in and to the approximately 900 acres of land located in Grayson County, Texas, which is currently subject to an application for lease for public park and recreational purposes made by the city of Denison, dated August 17, 2005.

(2) SURVEY TO OBTAIN LEGAL DESCRIPTION.—The exact acreage and description of the real property referred to in paragraph (1) shall be determined by a survey paid for by the city of Denison, Texas, that is satisfactory to the Secretary.

(3) CONVEYANCE.—Not later than 90 days after the date of acceptance by the city of Denison, Texas, of an offer under paragraph (1), the Secretary shall convey the land surveyed under paragraph (2) by quitclaim deed to the city of Denison, Texas.

(k) ST. CHARLES COUNTY, MISSOURI.—

(1) DEFINITIONS.—In this subsection, the following definitions apply:

(A) FEDERAL LAND.—The term ‘Federal land’ means the 1 parcel of Corps of Engineers land totaling approximately 84 acres, located U.S. Survey No. 1838, Township 48 North, Range 6 East.

(B) NON-FEDERAL LAND.—The term ‘non-Federal land’ means the approximately 70 acres of land, subject to any existing easements situated in Jersey County, Illinois, adjacent to existing Corps fee title land.

(2) LAND EXCHANGE.—Subject to paragraph (3), on conveyance by Ameren U.E. to the United States of all right, title, and interest in and to the non-Federal land, the Secretary shall convey to Ameren U.E., all right, title, and interest of the United States in and to the Federal land.

(3) CONDITIONS.—

(A) DEEDS.—

(i) NON-FEDERAL LAND.—The conveyance of the non-Federal land to the Secretary shall be by a warranty deed acceptable to the Secretary.

(ii) FEDERAL LAND.—The conveyance of the Federal land to Ameren U.E., shall be—

(I) by quitclaim deed; and

(II) subject to any reservations, terms, and conditions that the Secretary determines to be necessary to allow the United States to operate and maintain the Mississippi River 9-Foot Navigation Project.

(iii) LEGAL DESCRIPTIONS.—The Secretary shall provide a legal description of the Federal land, and Ameren U.E., shall provide a legal description of the non-Federal land, for inclusion in the deeds referred to in clauses (i) and (ii).

(B) REMOVAL OF IMPROVEMENTS.—

(i) IN GENERAL.—The Secretary may require the removal of, or Ameren U.E., may voluntarily remove, any improvements to the non-Federal land before the completion of the exchange or as a condition of the exchange.

“(ii) NO LIABILITY.—If Ameren U.E., removes any improvements to the non-Federal land under clause (i)—

(I) Ameren U.E., shall have no claim against the United States relating to the removal; and

(II) the United States shall not incur or be liable for any cost associated with the removal or relocation of the improvements.

(C) ADMINISTRATIVE COSTS.—The Secretary shall require Ameren U.E. to pay reasonable administrative costs associated with the exchange.

(D) CASH EQUALIZATION PAYMENT.—If the appraised fair market value, as determined by the Secretary, of the Federal land exceeds the appraised fair market value, as determined by the Secretary, of the non-Federal land, Ameren U.E. shall make a cash equalization payment to the United States.

(E) DEADLINE.—The land exchange under subparagraph (B) shall be completed not later than 2 years after the date of enactment of this Act.

[(k)] (l) GENERALLY APPLICABLE PROVISIONS.—

(1) SURVEY TO OBTAIN LEGAL DESCRIPTION.—The exact acreage and the legal description of any real property to be conveyed under this section shall be determined by a survey that is satisfactory to the Secretary.

(2) APPLICABILITY OF PROPERTY SCREENING PROVISIONS.—Section 2696 of title 10, United States Code, shall not apply to any conveyance under this section.

(3) ADDITIONAL TERMS AND CONDITIONS.—The Secretary may require that any conveyance under this section be subject to such additional terms and conditions as the Secretary considers appropriate and necessary to protect the interests of the United States.

(4) COSTS OF CONVEYANCE.—An entity to which a conveyance is made under this section shall be responsible for all reasonable and necessary costs, including real estate transaction and environmental documentation costs, associated with the conveyance.

(5) LIABILITY.—An entity to which a conveyance is made under this section shall hold the United States harmless from any liability with respect to activities carried out, on or after the date of the conveyance, on the real property conveyed. The United States shall remain responsible for any liability with respect to activities carried out, before such date, on the real property conveyed.

* * * * *

TITLE V—MISCELLANEOUS

SEC. 5067. IDAHO, MONTANA, RURAL NEVADA, NEW MEXICO, RURAL UTAH, AND WYOMING.

(a) * * *

* * * * *

“(h) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated to carry out this section for the period beginning with fiscal year 2001 **[\$150,000,000 for rural Nevada]** \$200,000,000 for rural Nevada, \$75,000,000 for Montana,

\$25,000,000 for New Mexico, \$55,000,000 for Idaho, \$100,000,000 for rural Utah, and \$30,000,000 for Wyoming. Such sums shall remain available until expended.”.

CONSOLIDATED APPROPRIATIONS ACT, 2008, PUBLIC LAW 110-161

TITLE II

DEPARTMENT OF THE INTERIOR

GENERAL PROVISIONS, DEPARTMENT OF THE INTERIOR

SEC. 208. (a) Notwithstanding any other provision of law, of amounts made available under section 2507 of the Farm Security and Rural Investment Act of 2002 (43 U.S.C. 2211 note; Public Law 107-171), the Secretary of the Interior—

(1) acting through the Commissioner of Reclamation, shall use—

(A) subject to subsection (b), \$3,000,000 for activities necessary to convey to the State of Nevada the land known as the “Carson Lake and Pasture”, as authorized by section 206(e) of the Truckee-Carson-Pyramid Lake Water Rights Settlement Act (Public Law 101-618; 104 Stat. 3311);

* * * * *

(C) in consultation with the Corps of Engineers, as applicable, \$5,000,000 to study and prepare plans for the development and construction of a pipeline to convey water from Dixie Valley to Churchill County, Nevada; and

[(D) \$10,000,000 for—

[(i) design and construction of the Derby Dam fish screen to allow passage of fish, including the cui-ui and Lahontan cutthroat trout; and

[(ii) any improvements to Derby Dam necessary to make the fish screen operable;

[(E) \$6,000,000 for the acquisition of not more than 4 small hydroelectric power plants from the Sierra Pacific Power Company to improve water allocation and fish passage in the Truckee River; and]

[(F)] [(D) \$6,000,000 for Lower Truckee River restoration projects identified by the cities of Reno and Sparks, Nevada, and Washoe County, Nevada;

* * * * *

(3) shall allocate \$1,000,000 to the Summit Lake Paiute Tribe to plan and complete [restoration efforts at the Summit Lake in Northern Washoe County] restoration and environmental protection efforts at the Summit Lake in Humboldt County, Nevada, for the benefit of the Tribe because of their status as Indians;

**ENERGY AND WATER DEVELOPMENT AND RELATED
AGENCIES APPROPRIATIONS, 2010, PUBLIC LAW 111-85**

TITLE II

DEPARTMENT OF THE INTERIOR

GENERAL PROVISIONS—DEPARTMENT OF THE INTERIOR

SEC. 208. (a) Of the amounts made available under section 2507 of the Farm Security and Rural Investment Act of 2002 (43 U.S.C. 2211 note; Public Law 107-171), the Secretary of the Interior, acting through the Commissioner of Reclamation, shall—

(1) provide, subject to subsection (b), **[\$66,200,000]** **\$81,200,000** to establish the Walker Basin Restoration Program for the primary purpose of restoring and maintaining Walker Lake, a natural desert terminal lake in the State of Nevada, consistent with protection of the ecological health of the Walker River and the riparian and watershed resources of the West, East, and Main Walker Rivers, *and including associated activities that enhance recovery of the federally threatened Lahontan cutthroat trout*; and

* * * * *

(b)(1) The amount made available under subsection (a)(1) shall be—

- (A) * * *
- (B) * * *
- (i) * * *

(I) to administer and manage a 3-year or longer water leasing demonstration program in the Walker Lake inflows; and

* * * * *

(vi) \$200,000 to support alternative crops and alternative agricultural cooperatives programs in Lyon and Mineral Counties, Nevada, that promote water conservation in the Walker River Basin.

(vii) *\$15,000,000 to be used as described in subparagraph (A), as determined by the National Fish and Wildlife Foundation.*

BUDGETARY IMPACT OF BILL

PREPARED IN CONSULTATION WITH THE CONGRESSIONAL BUDGET OFFICE PURSUANT TO SEC.
308(a), PUBLIC LAW 93–344, AS AMENDED

[In millions of dollars]

	Budget authority		Outlays	
	Committee guidance ¹	Amount of bill	Committee guidance ¹	Amount of bill
Comparison of amounts in the bill with Committee spending guidance to its subcommittees for 2011: Subcommittee on Energy and Water Development:				
Mandatory				
Discretionary	34,968	34,968	NA	² 45,782
Projections of outlays associated with the recommendation:				
2011				³ 20,301
2012				9,675
2013				3,238
2014				630
2015 and future years				874
Financial assistance to State and local governments for 2011	NA	93	NA	19

¹ There is no section 302(a) allocation to the Committee on Appropriations for fiscal year 2011.

² Includes outlays from prior-year budget authority.

³ Excludes outlays from prior-year budget authority.

NA: Not applicable.

DISCLOSURE OF CONGRESSIONALLY DIRECTED SPENDING ITEMS

The Constitution vests in the Congress the power of the purse. The Committee believes strongly that Congress should make the decisions on how to allocate the people's money.

As defined in Rule XLIV of the Standing Rules of the Senate, the term "congressional directed spending item" means a provision or report language included primarily at the request of a Senator, providing, authorizing, or recommending a specific amount of discretionary budget authority, credit authority, or other spending authority for a contract, loan, loan guarantee, grant, loan authority, or other expenditure with or to an entity, or targeted to a specific State, locality or congressional district, other than through a statutory or administrative, formula-driven, or competitive award process.

For each item, a Member is required to provide a certification that neither the Member nor the Senator's immediate family has a pecuniary interest in such congressionally directed spending item. Such certifications are available to the public on the Web site of the Senate Committee on Appropriations (www.appropriations.senate.gov/senators.cfm).

Following is a list of congressionally directed spending items included in the Senate recommendation discussed in this report, along with the name of each Senator who submitted a request to the Committee of jurisdiction for each item so identified. Neither the Committee recommendation nor this report contains any limited tax benefits or limited tariff benefits as defined in rule XLIV.

CONGRESSIONALLY DIRECTED SPENDING ITEMS

Agency	Account	Project title	Funding	Member
Corps of Engineers	General Investigations	ABILENE, TX (BRAZOS RIVER BASIN—ELM GREEK)	\$200,000	Conyn
