

INDEPENDENT INVENTORS SUPPORT "THE AMERICA INVENTS ACT"

As independent inventors, we navigate the intricacies of our challenging and costly patent system every day. It's time that Congress establish a simpler, more objective and transparent patent system that will result in greater certainty and increased speed from patent application to grant. We support the "America Invents Act," H.R. 1249 and urge quick adoption by the US House of Representatives.

"The America Invents Act" will especially benefit independent inventors by making us more competitive in today's global marketplace. America's economic future rests on our ability to innovate new technologies that change and improve the way people work, live and play. HR1249 will help inventors across the country by strengthening the current system for entrepreneurs and small businesses by:

- Transitioning to a First-Inventor-to-File system, providing independent inventors with greater certainty;
- Shortening times for patent prosecution thereby creating a more predictable system;
- Strengthening patent quality and reliability by incorporating "best practices" into patent application examination and review, making it easier for us to attract start-up capital;
- Lowering fees for micro-entities; and
- Increasing needed resources for the USPTO.

We urge you to support HR1249, the America Invents Act. It will make the entire patent process for independent inventors quicker, less expensive, and fairer, and will yield greater certainty and predictability. We cannot afford to lose this opportunity.
