Mr. Paul Wilms, Director
Division of Environmental Management
NC Department of Natural Resources
and Community Development
Post Office Box 27687
Raleigh, North Carolina 27611

Dear Sir:

In accordance with requirements of the National Pollutant Discharge Elimination System (NPDES) Permit Number NC0003239, two copies of Discharge Monitoring Reports (DMRs) for the month of January 1987 are submitted.

The Hadnot Point Wastewater Treatment Plant did not meet their Biochemical Oxygen Demand (BOD) percent removal requirement for the month. The actual BOD percent removal was 83% instead of the required minimum of 85%. The 83% BOD removal is attributed to a malfunctioning bearing in one of the trickling filters which has subsequently been repaired.

The Tarawa Terrace Wastewater Treatment Plant did not meet BOD average effluent or percent removal requirement for the month. The actual BOD average effluent was 35 mg/L instead of the required maximum of 30 mg/L. The actual percent removal for BOD was 80% instead of the required minimum of 85%. A bearing in the trickling filter system malfunctioned during the first part of December 1986 which decreased plant efficiency and hindered filter growth. A new bearing was installed 20 January 1987 and filter growth is beginning to return to normal.

The Camp Johnson and the Rifle Range Wastewater Treatment Plants did not meet their BOD percent removal requirement for the month. Camp Johnson's BOD percent removal was only 82%. The Rifle Range's BOD percent removal was only 84%. The BOD loading was low in both plants causing reduced plant efficiency.

There is no river data for the month of January 1987 because the laboratory's boat was out of service due to repairs.

Mr. John McFadyen
Water Supply Branch
Division of Health Services
North Carolina Department of
Human Resources
Post Office Box 2091
Raleigh, North Carolina 27602

Dear Mr. McFadyen:

Enclosed are the completed Department of Health Forms (DHS 1942 2/74) for all water treatment plants aboard Marine Corps Base, Camp Lejeune for the period 1-31 January 1987. Also enclosed are the weekly Chemical Analysis Forms (MCBCL 11330/3 Rev 3-82) for the same period, as requested in the 25 October 1982 letter from Mr. Charles Rundgren of your office.

The analysis is run by the Environmental Chemistry and Microbiology Laboratory, located in the Natural Resources and Environmental Affairs Division, Assistant Chief of Staff, Facilities. Ms. Betz, Supervisory Chemist, Environmental Chemistry and Microbiology Laboratory, telephone (919) 451-5977, is the point of contact in this matter.

Sincerely,

JULIAN I. WOOTEN
Director
