1. I am proud to forward Camp Lejeune's entry for the Environmental Quality Awards competition.
2. Camp Lejeune continues to lead the way in the Department of Defense as well as the State of North Carolina in both enhancement of environmental quality and compliance with Federal and State environmental regulations. These past two years we have had to come to terms with several complex and unwieldy regulatory acts and are now well on our way to full compliance. The preponderance of our efforts have been concerned with toxic and hazardous waste management.
3. While concentrating our energies on regulatory compliance, we have continued our basic philosophy to improve and enhance our environmental quality, even in the midst of military training, through programs of timber and wildlife management. Through the innovation and perseverance of our environmental staff, the world's most complete amphibious training base is also one of the world's most aesthetically pleasing places to live and work.
