	REC	ERT	FIC	ATIC	ON :	

I. Introduction - This position is located in the Heavy Ecuipment Section, General Services Branch, Maintenance and Repair Division, Base Maintenance Department, Comp Lejeune, North Carolina. The primary purpose of the position is to provide tire repair service, maintenance to a wide variety of heavy mobile engineer earth-moving equipment, motor graders, loaders, mobile cranes up to 40 tons. scrapers and various types of groundskeeping equipment.

II. Major Duties

A. Performs complete tire service to all mobile engineer and groundskeeping coulpment such as mobile cranes up to 40 tons, screpers, motor graders, loaders, distributors, and wheel tractors. Tires are removed and replaced on equipment by use of hand and power tools, such as jack wrenchs, lug wrench, hammer, socket wrench, power wrench, and both hand and power operated hydraulic jacks. Repairs are made on tires by insertion of shoes in places where a weakness in wells is observed; repairs tubes by vulcanizing, and replaces valve stems and cores. Repairs are made in the shop, or in the field.

B. Incumbent assists in cleaning up work areas in the shop and the surrounding creas. Incumbent also cleans equipment using the steam cleaning process in the absence of the employee regularly assigned to this work.

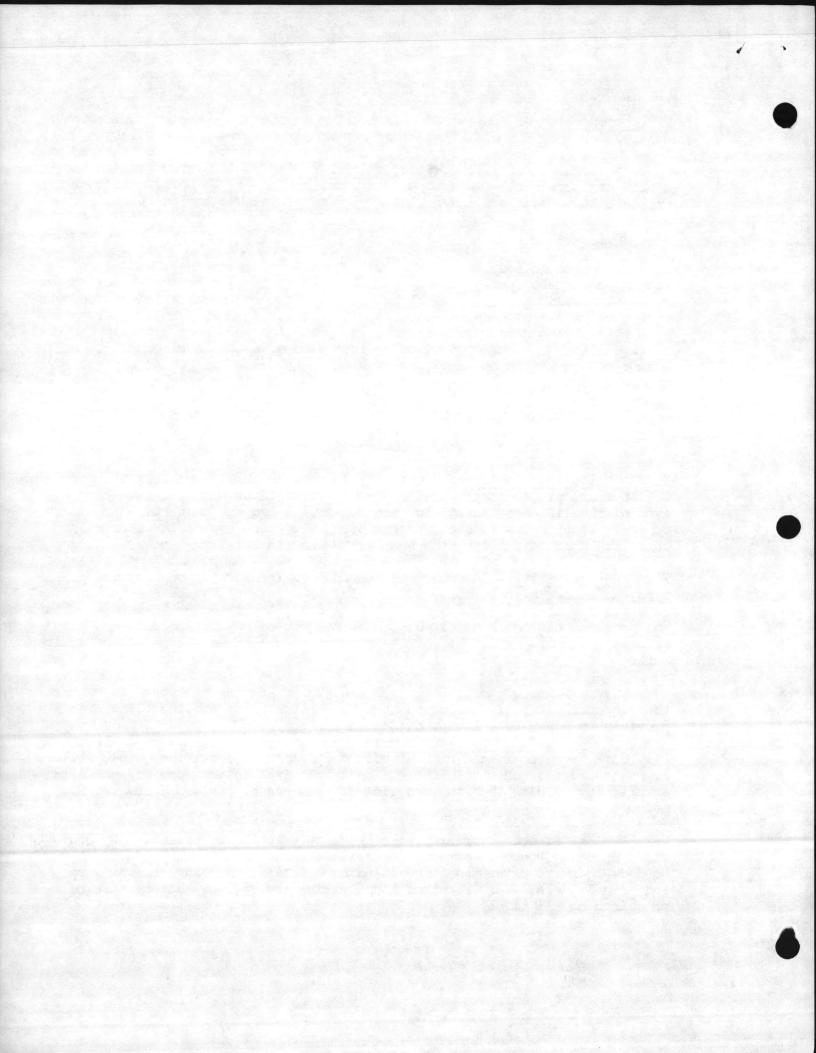

III. Skills and Knowledge - Must be able to read charts and follow instructions to determine proper amount of air pressure to inflate tires, and to know the type of material best suited in tire repair. Incumbent must keep himself upgraded to changing models of engineering equipment by reading charts and manuals. Must be familar with the best method in repairing and replacing tires.

IV. <u>Responsibility</u> - Incumbent is responsible for keeping on hand the proper type and amount of material, and supplies to repair all tires and tubes. Supervisor must be informed before supplies get low in order that requisitions and procurement can be made. Must keep records of materials used, and know what supplies are available for the many different makes and models of equipment.

Tire repairs of mobile engineer and groundskeeping equipment is primarily the responsibility of the incumbent after instructions and locations are provided by Heavy Duty Equipment Mechanic Foreman.

Work is accomplished without more than normal supervision, with little or no in-progress checks. Supervision is received in the form of schedules or priority work so that an even flow of work can be performed and repairs made.

V. <u>Physical Effort</u> - Normally, the heaviest weights to be handled by hand range up to 100 pounds for short carrying distances, with help provided as needed. Work requires stooping, standing, sitting, kneeling, climbing up and down ladders. Work requires good hearing and vision. Safety must be practiced at all times.

VI. <u>Morking Conditions</u> - Works outdoors approximately 50% of the time and indoors 50% of the time. Incumbent is exposed to wind, send, uster, dust, coal, mud, sun, dirt, smoke, noise vibrations from equipment, unpleasant odors, poor illuminations, slippery surfaces, insects, snakes, and ticks. Safety protection equipment is furnished as required.
