From: Commanding Officer, Marine Corps Engineer School
To: Commanding General (Code E03), Marine Corps Development and Education
Command, Quantico, Virginia 22134-5000
Via: Commanding General, Marine Corps Base (AC/S, Training and Operations),
Camp Lejeune, North Carolina 28542-5001

Subj: PROPOSED UTILITIES OFFICER (UO) COURSE PROGRAM OF INSTRUCTION (POI);
SUBMISSION OF

Ref: (a) MCO 1550.42A
(b) MCDECO P1553.1A

Encl: (1) Copies of UO POI (2)

1. As directed by reference (a) and developed in accordance with reference (b), the enclosure is submitted for review and approval.
2. The revisions constitute a major revision due to an increase in course length of fifteen days and changes in the curriculum breakdown, class capacity, instructor staffing, and task list.
3. Course length increased by fifteen days due to additional time required to adequately teach the reverse osmosis water purification unit, water site reconnaissance and routine control tests, planning interior and exterior electrical distribution systems, and water distribution system planning. Students trained over the past several classes have generally been Warrant Officers with little time in the utilities field and require more instruction and application. Revisions were made based on internal and external evaluation of the course.

R. A. TIEBOUT
