and Disease Registry  
Division of Health Assessment  
and Consultation  
Chief, Program Evaluation, Records,  
Mail Stop E-56  
1600 Clifton Road, N.E.  
Atlanta, Georgia 30333

Dear Ms. Jackson:

A Public Health Assessment for Marine Corps Base, Camp Lejeune was performed by the Agency for Toxic Substances and Disease Registry. It identified groundwater contamination as a potential health hazard. In response to this assessment, an annual program to monitor the active supply wells was enacted.

Enclosed is a copy of the first annual test results of the program prepared by Bionomics Laboratory Inc. These results indicate four wells with constituents above the North Carolina Administrative Code, Title 15A, Chapter 2, Subchapter 2L standards. Well 603 has been taken off line. The other three wells will be resampled to validate the results before additional actions are taken.

Point of contact is Mr. Neal Paul, Director, Installation Restoration Division, Environmental Management Department, at telephone (910) 451-5068.

Sincerely,

N. NEAL PAUL

Acting Assistant Chief of Staff  
Environmental Management  
By direction of  
the Commanding General
