BASE MAINTENANCE DEPARTMENT.
Marine Corps Base
Camp Lejeune, North Carolina 28542

MAIN/FHM/bb
6240
28 May 1981

From: Base Maintenance Officer
To: Defense Property Disposal Officer

Subj: Defense Property Disposal Office (DPDO) Inspection General Discrepancy

Ref: (a) DPDO ltr DPDO-ZWM of 15 Apr 1981

1. Reference (a) requested comments concerning subject discrepancy.
2. The Natural Resources Branch, Base Maintenance Department will assist your office in providing analysis of substances noted on inspection.
3. This Branch has no records of any material being abandoned on Lot 203.
4. Lot 203 will be added to a list of past landfills, dumps, etc previously reported to higher authorities for environmental study. This is necessary if it is known or suspected that there may be hazardous materials or wastes buried in Lot 203.
5. Recovery of scattered scrap metal on the lot is feasible, however utilization of Base Maintenance personnel is not considered economical. Should you have a specific request for use of Base Maintenance heavy equipment, normal requesting procedures would be appropriate. Heavy equipment must not be utilized in any area suspected or known to contain hazardous material.

DPDO-ZWM

15 April 1981

SUBJECT: Abandoned Property

TO: Base Maintenance Officer, MCB, CLNC

1. Reference: IG Observation No. X07.

2. Request your assistance to determine if other material have been abandoned in Lot 203 wooded area that would have a environmental impact on this area and to determine the feasibility of retrieving numerous partially buried piles of scrap.

Submit your finding to this office for future IG Inspection reference.

M. J. KING
