SOURCES: U.S. Census Bureau, U.S. Department of Treasury, U.S. Bureau of Labor Statistics, U.S. House, and U.S. Senate. Compiled by TCAII  
 NOTE: All amounts are adjusted for inflation and in 2010 Dollars. Federal Debt is the total public debt outstanding and intragovernmental holdings.

# Comparative Debt Burdens

Total government debt in the U.S is higher than some of the most financially troubled countries in Europe

SOURCE: Data from the International Monetary Fund, *IMF Fiscal Monitor Series: Navigating the Fiscal Challenges Ahead*, May 14, 2010. Compiled by PGPF.

NOTE: Both 2010 and 2015 figures are estimates. Total Government debt (also referred to as general government gross debt) measures all liabilities that require payment or payments of interest and/or principal by the debtor to the creditor at a date in the future. This includes central, state and local government debt.

# Our Fiscal Future

Without reforms, by 2022, future revenues will only cover Social Security, Medicare, Medicaid, and interest on the debt. By 2046, revenues won't even cover interest costs.

# Statutory Debt Ceiling

SOURCE: OMB, The Budget, Historical Tables, Table 7.3 - Statutory Limits on Federal Debt; Bureau of Labor Statistics, Inflation Calculator; NBER, US Business Cycle Expansions and Contractions.

# The Debt Ceiling Debate

---

We must raise the debt ceiling. The Real Questions are:

- How much it should be raised?, and
- What conditions should be attached to any increase in the debt ceiling limit?

# The Debt Ceiling Debate - Continued

---

Given the deteriorating financial condition of the federal government and rising concern regarding spending, deficits and debt, the following conditions are illustrative of the types of conditions that should be considered:

- Short-term Spending:
  - Agreeing to cut discretionary spending, excluding war costs, to fiscal 2008 levels adjusted for population growth over 2-3 years.
  
- Structural Deficits:
  - Enacting tough but realistic statutory budget controls that could include:
    - meaningful PAYGO rules on the spending and tax side;
    - tough but realistic discretionary spending caps, and;
    - specific debt/GDP targets that begin in 2013-2014 with automatic enforcement mechanisms (e.g., spending cuts and temporary tax surcharges or preference reduction).
  - Authorize and fund a major citizen education and engagement effort that will occur during late 2011 and 2012 to prepare the way for tough choices beginning in 2013.

# A Three Pronged Test for Policy Creation

---

- The policy should make economic sense, be socially equitable and culturally acceptable
- The math behind the policy must work
- The policy must be politically feasible
