

Congressman Phil Roe, M. D.
US House of Representatives
407 Cannon House Office Building
Washington, DC 20515

Dear Congressman Roe,

On behalf of our conservative membership base for those 50+, we want to thank you for your dedication and commitment to repealing the Patient Protection and Affordable Care Act by introducing HR 3121, the American Health Care Reform Act of 2013. I spent 35 years building a small business and know first-hand the devastating consequences Obamacare has caused to most Americans. I have witnessed the pain that it has caused our most prized generation and wanted to do something to offer relief. As a result, I founded Generation America to give conservative seniors a voice in the political debate in Washington DC,

Our members who reside in all 50 states fully support your mission and the objectives of the Republican Study Committee to repeal Obamacare. Sadly, AARP claimed to represent seniors in the Healthcare debate, but those 50+ didn't have a voice when the unworkable regulations and mandates were passed, which in turn have driven up healthcare costs for everyone. We now have the opportunity to support innovative measures like increasing competition by purchasing health insurance across state lines. Simple economics tells us that by increasing competition in the marketplace, prices will typically come down. Also, we support measures that level the playing field giving families and senior citizens the standard tax deduction for health care costs, as well as reforming medical malpractice laws in a common sense way. In addition to these conservative solutions, HR 3121 offers safeguards for individuals with pre-existing conditions preventing them from being discriminated against

We are confident the American Health Care Reform Act will put seniors, patients and doctors back in control of crucial health care decisions. Our members across America support the Republican Study Committee's and your efforts to deliver affordable quality health care through reform measures. In the short time since the inception of Obamacare, we have already witnessed the increased costs on American families, seniors and businesses. We are grateful to see some practical free market ideas instead of unworkable mandates that the President's law requires.

With great admiration,

Michael Young
