

Republican Budget Would Harm Kansas's Economy

The Republican budget is anything but balanced. It would grant millionaires an extra \$245,000 tax cut, while raising taxes on middle class families by \$3,000 on average. It would cause two million job losses next year alone, and gut investments that the middle class relies on to get ahead. Senate Democrats have a budget that takes a balanced approach. It cuts what we need to cut, without hurting our economy and our middle class.

20,056 jobs in Kansas could be lost. The Republican budget would pull hundreds of billions of dollars out of the economy by slashing job-creating investments in things like infrastructure and scientific research, killing demand, depressing economic activity, and hurting job creation. The drag caused by these extreme cuts could cost 20,056 jobs in Kansas in 2014. [DPCC Calculations Based on EPI, [3/12/13](#)]

The Republican budget's tax plan would hit Kansas with a \$700 million middle-class tax hike. The Republican budget would dramatically lower the top income tax rate from 39.6% to 25% - giving millionaires an average \$245,000 tax break. The independent Tax Policy Center found that it is mathematically impossible to provide such large tax breaks to the wealthy without increasing the burden on the middle class. By raising taxes on filers making less than \$200,000 to pay for millionaire tax breaks, the Republican budget would raise middle-class taxes in Kansas by \$700 million. 390 Kansas educators could lose their jobs. Title I grants under the Elementary and Secondary Education Act provide financial assistance to schools with high numbers of children from low-income families to help them meet educational performance standards. The Republican budget could slash \$20.7 million in Kansas Title I funding, supporting 390 fewer jobs and 25,620 fewer students. [NEA, [3/15/13](#)]

\$8.96 million less for job-creating research in Kansas. Under the Republican budget, Kansas would lose roughly \$8.96 million in funding from the National Science Foundation (NSF), resulting in fewer awards to support job-creating research. The NSF is the funding source for approximately 20% of all federally supported basic research conducted by America's colleges and universities, and supports the basic research that leads to scientific advancement in fields like nanotechnology, mathematics, and computer science. [NSF, accessed [2/12/13](#); DPCC calculations based on NSF, accessed [2/12/13](#)]

Parents of Kansas children will lose access to child care services, making it more difficult to work. The Child Care and Development Block Grant is the primary federal program devoted to child care services for nearly 1.7 million children. These critical services support children's health development and learning, while allowing parents to work, seek employment, or receive job training or education. The Republican budget slashes \$3,919,007 from CCDBG funding for Kansas, limiting access to services and providing support for 1,440 fewer Kansas children. [DPCC Calculations Based on Senate Appropriations Subcommittee on Labor, Health, and Human Services, and Education, and Related Agencies, [7/25/12](#)]
