The new farm bill should liberate dairy farmers from being the dairy “industry’s” cash cow. This farm bill can be the means by which the dairy farmer citizen is once again allowed to operate his dairy farm as all other businesses are by being able to cover his cost to produce the milk.

“The Federal Milk Marketing Improvement Act” (S. 1640) will rectify the current injustice brought in by “Order Reform” by including the dairy farmers’ national average cost of production as determined by the Economic Research Service (ERS) in the Federal minimum pricing formula. It includes a program to control oversupply of milk that is transparent and controlled by the dairy farmers themselves. Unlike DSA, this provision will not cost the taxpayers any additional funds to administer, and S. 1640 monitors imports and exports.

In view of all the consolidation and mergers among dairy cooperatives, the Capper-Volstead cooperatives need to be investigated by Federal authorities to assure all of us that they are being properly administered, fulfilling the intent of the original legislation that gave dairy farmers this exceptional tool to assist them in marketing their milk, in association with other farmers, by setting a reasonable milk price that is not “unduly enhanced,” which the processors would then pay to procure the milk.

If there is no desire to correct the current pricing inequities facing farmers, then dairy farmers must be granted the legal authority to price their own raw milk by directly billing the dairy processors for the milk they purchased at the farm.

Deputy Administrator of Dairy Programs at USDA’s Economic Research Service (ERS) Dana Coale’s report to the House Agriculture committee on September 8, 2011, should cause dairy farmers everywhere to ask if, in fact, as Ms. Coale declares: “The economic vitality and quality of life in rural America, as well as the U.S. economy at large, depend on a competitive, efficient, and productive agricultural system. To increase prosperity and sustainability in our Nation’s agricultural system and rural communities, a.m.S conducts oversight activities to protect producers from unfair business practices,” then when will the appropriate “oversight” be provided by the Federal authorities to finally administer the justice dairy farmers have been awaiting for over 31 years by fully investigating and executing necessary remedy from the myriad of ‘. . . unfair business practices . . .’ rampant throughout the ‘dairy industry?’”

COMMENT OF DASHA COCHRAN

Date Submitted: Friday, May 18, 2012, 1:38 p.m.

City, State: Dallas, TX

Occupation: Social Scientist

Comment: I would like to see more subsidies go to vegetable growers (other than corn). Vegetables are the healthiest food on Earth, yet many people are not able to afford fresh vegetables. So much of taxpayers’ dollars go to wheat, soy and corn, all of which have been linked to obesity and diabetes. Please, help to stop this epidemic for the sake of our children by providing them with low cost high quality local vegetables, grown by real farmers, not giant corporations. Thank you!

COMMENT OF JOYCE COCHRAN

Date Submitted: Sunday, May 20, 2012, 2:20 a.m.

City, State: Beaver, OR

Occupation: Clinical Social Worker/Semi-Retired; Minister

Comment: We need a farm policy that supports small farmers and community-based agriculture, not big business. We need safer food standards, no GMOs, and fewer subsidies for the meat and dairy industries—give that money back to the people who grow organically and sustainably!

COMMENT OF MEG COCHRANE

Date Submitted: Friday, May 18, 2012, 10:43 p.m.

City, State: Duvall, WA

Occupation: Library Assistant

Comment: It is time to stop the large Agribusinesses dominating the food politics of this country. Your constituents want healthy organic food grown on clean and thriving land without chemical fertilizers and pesticides that deplete the soil and the nature in and around it. Please support the small farmers who endeavor to grow our food and protect our farmland.

COMMENT OF JOYCE MARIE COCKERHA

Date Submitted: Thursday, May 17, 2012, 12:17 p.m.

City, State: Troy, NY

Occupation: Musician

Comment: Do not give any money to factory farms or to any programs that would benefit Dow, Eli Lilly, Koch Industries, or Monsanto. Instead, fund the Value-Added Producer Grants Program, the Conservation Stewardship Program, the Beginning Farmer and Rancher Development Program, and the Organic Agriculture Research and Extension Initiative.

Thank you!

COMMENT OF CONNIE COCKRELL

Date Submitted: Sunday, May 20, 2012, 10:35 a.m.

City, State: Payson, AZ

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: It's just beyond belief that giant agribiz controls our food, patents our seeds, sues innocent farmers when the agribiz lets their genetically modified seeds contaminate surrounding farms. These are businesses, concerned only with making a profit and damn be all to the rest of us. We need reform NOW!

COMMENT OF R. RAY COFFMAN

Date Submitted: Friday, May 18, 2012, 6:38 p.m.

City, State: Morrison, CO

Occupation: Handyman

Comment: We need to put health ahead of big AG making more money on (junk) non-organic foods. We need some law and help to increase the production of organic foods.

Thank you very much,

RAY.

COMMENT OF BRYNA COFRIN-SHAW

Date Submitted: Wednesday, May 02, 2012, 4:49 p.m.

City, State: Amherst, MA

Occupation: Student

Comment: To whom it may concern,

As a citizen of MA and student of agriculture and environmental science, I would like to encourage my legislators to continue and expand cuts to direct payments. Direct payments are not beneficial to the dedicated farmers of this country, and instead provide too many loopholes for agribusiness interests to profit unfairly from these payments. The unnecessary subsidies provided by the farm bill are not healthy components for American agriculture, and will prevent our country from creating a national agricultural system that provides healthy, affordable, and accessible food to all persons. I urge you to continue adequately funding the McGovern-Dole International Food for Education and Child Nutrition Program, as this is a

critical means by which the many hungry people in this country can be adequately fed in these difficult economic times.

Thank you,

BRYNA COFRIN-SHAW.

COMMENT OF ELANA COHEN

Date Submitted: Friday, May 18, 2012, 9:00 p.m.

City, State: Longmeadow, MA

Occupation: Teacher

Comment: Please think of how we are treating the very commodities that nourish us and the legacy we are leaving for our children and grandchildren. Would you want to work amongst and then consume known carcinogens? I thank you for your considerations and your promise to sustain that which is truly healthy! With appreciation.

COMMENT OF HOWARD COHEN

Date Submitted: Wednesday, May 09, 2012, 2:29 p.m.

City, State: Palo Alto, CA

Occupation: Consultant

Comment: I urge you to pass a strong farm bill that protects programs like SNAP, TEFAP, and CSFP, which help provide food for millions of America's most vulnerable seniors. I urge you to pass a farm bill that requires labeling of all GMO foods, discourages GMO foods, limits agricultural subsidies (to promote small and organic farmers as opposed to lethal mega agribusinesses), and promotes conservation and alternative energies, as well as discontinues biofuel production, which both depletes food stocks and costs more energy than it produces.

COMMENT OF LOUISA COHEN

Date Submitted: Friday, May 18, 2012, 7:25 p.m.

City, State: Las Vegas, NV

Occupation: Academic Counselor

Comment: As a mother and conscientious consumer, I strive to feed my family with as much certified organic, non-GMO food as I can find. While on the one hand organic food is becoming much easier to find and more affordable, on the other hand it seems to be coming increasingly under attack, as funding for organic farmers is cut and companies like Monsanto sue organic farmers for "stealing" their patented seeds when wind blows pollen into organic fields, contaminating their organic crops and threatening their organic certification!

I urge you to support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you for your consideration.

COMMENT OF MEGHAN COIL

Date Submitted: Friday, May 18, 2012, 7:02 p.m.

City, State: Portland, OR

Occupation: Customer Service, Musician

Comment: Corporate agriculture is not sustainable. The sooner we move back to sustainable practices, the healthier we will be as individuals and as a country. Please help to stop stacking the deck in favor of irresponsible, extractive practices so that small ecological farms can compete and survive. It is in the best interest of everyone who eats. Thank you.

COMMENT OF DRAGAN COLAKOVIC

Date Submitted: Friday, May 18, 2012, 10:57 a.m.

City, State: Minneapolis, MN

Occupation: Sr. Business Analyst

Comment: Please stop wheat and corn subsidies along with mono culture farming and focus on sustainable farming. Food produced this way is simply substandard and it's slowly killing out nation.

COMMENT OF MILES COLAPRETE

Date Submitted: Friday, May 18, 2012, 12:04 p.m.

City, State: New York, NY

Occupation: Chiropractor

Comment: As a health care provider, teaching people about proper nutrition and how to take care of their bodies is what I do. Without adequate funding, having healthy, organic options will not be as accessible to the general public. **This Is Important To Our Future Health.**

COMMENT OF LESLEY COLBERG

Date Submitted: Saturday, May 19, 2012, 7:37 p.m.

City, State: Port Charlotte, FL

Occupation: Shop Clerk in Health Food Store

Comment: Please do the right thing by organic farmers of today and the future. Don't let their livelihood be swallowed by greed. Don't let the chance of having a healthy and therefore happy population be thrown away. Please remember that the USA can lead the way in this matter, thus making a huge statement to the rest of the world—do you care what other people say about this country? Do you care that people here are being poisoned by the chemicals that are put, often unnecessarily, on the produce grown here?

Please also make this bill an honest one. Don't let the term 'organic' become a mockery.

Thanks for reading this and acting in the right, honest, unselfish way that I know you can.

COMMENT OF KENDRA COLBURN

Date Submitted: Friday, May 18, 2012, 3:30 p.m.

City, State: Northampton, MA

Occupation: Shipping Clerk

Comment: As your constituent, I request that you use your power to modify the Food Bill in ways that support the health of the American people and American farmland over the long term. Specifically, I ask that you support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Especially important is closing loopholes in the new insurance subsidies so that large-scale agribusiness gets no more preferential treatment than smaller scale, more sustainable farmers.

This is an extremely important issue and is key to lowering obesity, diabetes, heart disease and many other health epidemics facing Americans in increasing numbers. Please listen to your constituents and do what is best for all Americans.

Thank You!

COMMENT OF DEBBIE COLE

Date Submitted: Friday, May 18, 2012, 5:31 p.m.

City, State: St. Louis, MO

Occupation: Occupational Therapist

Comment: I spent my childhood on a family farm and while I now live in an urban area, I remain very concerned about maintaining the viability of family farmers and maintaining the integrity of our nation's farmland.

As the House Agriculture Committee begins its work on their draft of the farm bill, I would urge you to restore the link between tax-supported subsidies for crop insurance and conservation compliance protections that protect the nation's water and land.

This action is especially important in light of the fact that this Congress is considering eliminating direct subsidies and redirecting these funds. Unless you reconnect these crop insurance payments with conservation practices, a farmers incentive to continue conservation practices will decrease significantly.

Missouri ranks high in the area of soil erosion and we currently are losing 5 tons of topsoil per acre per year. This is unacceptable. We as a nation are only as healthy as our family farms.

COMMENT OF FRANK COLEMAN

Date Submitted: Friday, May 18, 2012, 1:28 p.m.

City, State: Venice, FL

Occupation: Retired

Comment: Please help the small farmer who is trying to produce local goods (hopefully organic). Take the subsidies from the large agricultural farmers and use the monies to support a healthy pesticide free and no growth hormone environment. Thank you.

COMMENT OF LAURA COLEMAN

Date Submitted: Friday, May 18, 2012, 12:51 p.m.

City, State: Newmarket, NH

Occupation: Research Analyst

Comment: Eating organic foods lowers the pesticide levels in your body. Lower pesticide levels means increased energy and overall better feeling of well being and health. The U.S. cannot afford to have more people feeling ill and being plagued with diseases where the cause is unknown. Developing children and expectant mothers are especially at risk. Our country cannot afford to depend on other countries for our food! Encourage organic and sustainable farming right here in the U.S. Please do your best to encourage our country to be beautiful and healthy for people, plants, and animals. We will all be happier for it and this will naturally have everyone working harder because they feel better.

Thank you. Please consider this careful. It seems so obvious to me. It just makes sense.

COMMENT OF MARYALICE COLEMAN

Date Submitted: Friday, May 18, 2012, 1:26 p.m.

City, State: Brighton, CO

Occupation: Life Coach for Women

Comment: I want **Healthy** food produced by farmers—No GMOs and for animals to be free range! **Stop** the cruelty to animals and make my family's and the this country's food organic like it should be! **No** ties to Monsanto!

COMMENT OF WIN COLEMAN

Date Submitted: Monday, March 26, 2012, 10:24 p.m.

City, State: Sulphur Rock, AR

Producer/Non-producer: Producer

Type: Field Crops

Size: 1,000+ acres

Comment: Ladies and gentlemen of the House Committee of Agriculture, my name is Win Coleman and I am a 32 year old rice and soybean farmer in Cord, AR. I farm with my father and have been doing so ever since I was big enough to hold a shovel. In 2001 I graduated from the University of Arkansas with a finance banking degree, but I decided to move home and begin farming full time. In those short 11 years I have witnessed a huge change in farming and what it takes to be profitable. In the past several years I have become involved in several organizations on the state and national levels to promote rice globally. I'm the only person that sits on the Arkansas state boards of both national rice organizations, the USA Rice Federation and U.S. Rice Producers and have learned a lot about rice and our markets. I feel that we are entering the biggest challenge to face the rice industry in this new farm bill. As a member of these two rice organizations I have stayed informed on the importance of the programs such as the Emerging Market Program. This very program has kept us viable to this point so I would hate to see this program cut any. The direct payments are the only safety net that work for rice, but I understand that they are a thing of the past and would applaud that with several extra steps to be implemented. First, U.S. rice is the least subsidized rice in the world

of exports which already put us at a disadvantage in both our export and domestic markets. How can our country submit to cotton sanctions by Brazil and not sanction Brazil, India, Vietnam, and others who on a yearly basis use their subsidies and government jargon to force down prices and put us at even a bigger disadvantage.

Second the U.S. government for years has used rice and other commodities as a political football stripping commodity groups of countless years of hard work and sacrifice in opening markets only to get them banned from our portfolios, take Cuba, Iraq, and Iran for example. I understand the stance that we don't want to feed communist or terrorists but at the end of the day they bought from our competitors and are still eating. Third, I believe in feeding and helping those that need the help, but we need to make these provisions more stringent not only because they will save money, but they are misused in a system full of holes. I don't know how many times I have been in line to pay for gas only to see a man or woman in front of me pay for a carton of cigarettes and a 12 pack of beer with food stamps or other government welfare. Why not have a system that allows for those without the needs to receive a staple food from each part of the food pyramid to keep them nourished properly but cut out the free for all. If you are on government assistance it shouldn't be something that you want to stay on with amenities you receive as a hard working tax payer. In closing I have always been ridiculed as a farmer for receiving payment only to explain to people that government intervention has kept us from reaching our potential and costs me money *versus* a fair playing field. That shows how disconnected the American people have become with the farm and where our food comes from. I hope that everyone feels my views in that food security is the most important national defense and would hate to see us rely on another country for our food. We have the means and the want to be great stewards of the land, wildlife, and feed the world, let's work together to figure this out in order to do so with fairness and common sense in our times of huge deficits. Untie our hands and we will survive but don't strip our only true safety net while increasing regulations from the EPA and others that hinder us uncompetitive.

Thank you for listening,

WIN COLEMAN.

COMMENT OF DIANE COLLAR

Date Submitted: Friday, May 18, 2012, 9:55 p.m.

City, State: Eastbrook, ME

Occupation: Retired

Comment: I know agribusiness feeds the world and spends millions lobbying to influence their financial bottom line, but please have some common sense to also protect the consumer, the environment, and the small food producers. Think about those last three items instead of your need to get reelected.

COMMENT OF MONICA COLLETT

Date Submitted: Friday, May 18, 2012, 3:51 p.m.

City, State: Jackson, MI

Occupation: Marketing

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

It is disturbing to me that many in our Federal government value wealth over the health of our citizens and our land (and their own family members). Just look at the increasing amount of obesity and diet-related disease that is permeating every corner of the U.S. That isn't due to people being lazy and eating too many potato chips. It's due to the way our food is manufactured and processed (and filled with sugar). Promoting fresh, untainted foods is the best way to restore health to the citizens of our nation. The long-term benefit: fewer people will need expensive health care. Maybe we'll even reduce the incidence of cancer. When I was growing up in the 1960s, I knew of one person who had cancer. It wasn't something we worried about. Now, around one in four people I know has been affected by cancer—either personally or within the family. With all the sugar that's put into most of

our processed foods and the toxins introduced into our environment (especially herbicides and pesticides) that increase the amount of estrogen in our bodies, it's hard to escape poor health. Please heed the wake-up call!

COMMENT OF SARA COLLING

Date Submitted: Friday, May 18, 2012, 4:39 p.m.

City, State: Seattle, WA

Occupation: Public Health

Comment: As a consumer and public health practitioner, access to fresh food is extremely important to me. Cutting subsidies to unhealthy surplus crops like corn, wheat and soy and adding subsidies to healthy crops like fruits and vegetables would drastically improve our obesity epidemic and overall well being. Please consider the consumer's health when you write the Farm bill.

COMMENT OF ANN COLLINS

Date Submitted: Friday, May 18, 2012, 9:35 a.m.

City, State: St. Louis, MO

Occupation: Assistant Reference Librarian

Comment: Please do not cut funding for Food Stamps. There are too many families during this hard economic times that need this help. It is a very successful program that not only helps children and families but also the elderly who are also a vulnerable group. This also helps new farmers, established farmers, organic farmers, we certainly need more of these people to feed all.

We need to support the smaller farmers rather than the huge agricultural commercial farms this keeps employed the smaller farmers and ranchers. And also very important we must ensure the land it used for the greatest good. Thank you.

COMMENT OF KRISTI COLLINS

Date Submitted: Wednesday, May 09, 2012, 12:55 p.m.

City, State: Stockbridge, GA

Occupation: Case Management

Comment: I think there needs to stricter stand on those that are **Abusing** food stamps. There are people out there that actually **Need** this food. Then there are people that get \$1,000's in food stamps and turn around and sell the stamps. Those people need more than just a smack on the hand.

COMMENT OF LINDA COLLINS

Date Submitted: Saturday, May 19, 2012, 9:00 a.m.

City, State: Cape Coral, FL

Occupation: Retired Telecom CSR

Comment: The health of myself and my family along with the rest of the world depends on safety of agriculture, killing bees, use of Roundup and altering DNA of our food is not safe.

COMMENT OF PRESTON COLLINS

Date Submitted: Friday, May 18, 2012, 2:27 p.m.

City, State: Yelm, WA

Occupation: Retired Electrical Engineer

Comment: Please do not promote Big Ag over small farmers and home based gardens and enterprises. What is happening to whole milk producers is criminal. Respect our constitutional rights and freedoms. Do no harm.

COMMENT OF J.D. COLLNER

Date Submitted: Tuesday, May 08, 2012, 3:04 p.m.

City, State: Cocoa, FL

Occupation: Retired Church Volunteer

Comment: This is a contra-comment to what you are probably hearing from the "Feeding America" Advocacy and Public Policy group. My wife and I run the Food Pantry at FUMC Port St. John, which feeds hundreds of people each year in our depressed local economy. We do not participate in TEFAP, but purchase food at a discount from Second Harvest as well as local grocery stores. Our funds come from generous congregational gifts as well as community food drives. Our personal belief

is that taking additional “strings attached” money from the Federal Government and the already stretched tax payer is not what Christian Charity should be. Therefore, we ask that your committee develop policies which do not pander and make people going through tough time more dependent on government. Churches and communities have the rightful obligation to provide temporary aid to the hungry.

COMMENT OF JANIE COLLOMB

Date Submitted: Saturday, May 19, 2012, 10:16 p.m.

City, State: Truckee, CA

Occupation: Retired Teacher

Comment: **Monostrous** Agrifarms are not **Farms**. They are mass producers of heavily laden pesticide product called “**FOOD**.” Stop subsidies to these industries and only help fund the small farms again.

COMMENT OF RICHARD E. COLSON

Date Submitted: Friday, May 18, 2012, 4:18 p.m.

City, State: So. Portland, ME

Occupation: Electronics Tech

Comment: Corporate farm giants have put a stranglehold on the daily health and well being of every American. The effects from pesticides and germ ridden feed lots are far reaching. Obesity is now commonplace. breast cancer and prostate can now be linked to chemicals in the food chain. the change needs to start now!

COMMENT OF REV. PAT COLWELL

Date Submitted: Friday, April 27, 2012, 9:18 a.m.

City, State: Martinsburg, WV

Occupation: Minister

Comment: If the farm bill and the food assistance bill could be combined, locally owned and operated farms (especially family operations) could be utilized to help feed the people. The USDA could help to coordinate neighborhood and community gardens in addition to the farm to school program, encouraging young people to learn and grow, whilst also feeding the people and encouraging good health.

COMMENT OF ANN COMANAR

Date Submitted: Saturday, May 19, 2012, 8:52 a.m.

City, State: Brooklyn, NY

Occupation: Wardrobe Supervisor/Dresser Metropolitan Opera

Comment: With due respect I believe that clean food is a right and not a privilege. Food that is grown with clean healthy seed not GMO. Food that is produced without the use of questionable chemical fertilizers, herbicides and pesticides which not only pollute and mutate our bodies but seeping poison into our waterways as well. I ask you to invest in a taste test yourself. Eat organic staples for 1 month. That is butter, eggs, bread, milk and meats. I guarantee that you will taste the difference, you will feel the difference and will be loathe to revert to non-organic. Myself and my family are worth the price which is a bargain compared to the difference in safety, taste and nutritional value. I cannot in good consciousness feed any child anything less . . . how can you?

COMMENT OF MAUREEN COMBES

Date Submitted: Friday, May 18, 2012, 1:43 p.m.

City, State: Kapa’au, HI

Occupation: Teacher

Comment: To the honorable Congresswoman Hirono,

Please take a good, hard look at the state of agriculture in America today and ask yourself: Do we want to continue to subsidize those massive corporations that bring us cheap junk food, or do we want to support our smaller, more local farmers that bring us high quality, fresh food? Let’s put our money in the places that support a vibrant and **Healthy** country. Our current farm bill does **Not** do that. Let’s change the course!

Aloha,

MAUREEN COMBES.

COMMENT OF MARY COMFORT

Date Submitted: Saturday, May 19, 2012, 1:05 p.m.

City, State: Coeur d'Alene, ID

Occupation: IT Specialist

Comment: It is time to realize that agribusiness is not in the best interest of the American people, nor the planet. In a capitalist society purchasing should be the driving force in deciding market strategies and business focus. Unfortunately, this has been usurped by a small number of highly overpaid corporate executives who either lack the business acumen or big picture education to make a truly capitalist business environment work. In its place we have millions of dollars being spent on lawyers and lobbyists, none of whom are concerned about, or working for the general good. Evidence of how this is not working is staring us in the face with an ever increasing rate of obesity, diabetes, auto-immune health issues, sky rocketing health costs, a rising Alzheimer's rate, *etc.* The bottom line what we as a nation have been doing is not working and we need to change the way we do things, beginning with providing people with accurate information about what they are eating, and making sure that good wholesome, unadulterated real food is available to them at a reasonable price. If you are not part of the solution you are adhering to old beliefs and behaviors, and hence are part of the problem. Change is due now! As one who is suffering and has spent the past 4 years healing my body severely damaged by agribusiness practices, and poor health care I believe Organic is in our best interest as a nation and a species. The farm bill must accurately protect organic labeling, be supportive of local and regional organic farms, and punish the corporations using sleazy practices and questionable science to put their modified seeds into fields and then going after the small farmer. They are the ones who should be punished and fined. As far as I am concerned agribusiness methods, policies and behaviors have no place in my future, unless significant changes are made in the crops they are growing, the methods they are using and the manner in which they treat small local farms.

COMMENT OF MARY COMFORT

Date Submitted: Friday, May 18, 2012, 12:35 p.m.

City, State: Warren, MI

Occupation: Secretary

Comment: In a time when our nation is focusing on Health Care Reform, it is appropriate to also focus on Health **Food** Reform. Fresh, organic, non-GMO, sustainable agriculture is essential to our future. Please vote for **People** instead of greed at the expense of people. This is America the Beautiful—let's keep it that way! God bless you.

COMMENT OF JOHN COMMERFORD

Date Submitted: Thursday, May 17, 2012, 12:19 p.m.

City, State: Phoenix, AZ

Occupation: Lawyer

Comment: I support legislation like Sodsaver and CSP. With corn and soy going through the roof, there has to be some inducement to leave land wild.

Thinking more selfishly, I support low interest loans for beginning farmers, especially those who eschew herbicides and pesticides. I expect to buy rural property to farm in the next twelve months and plan to farm as sustainably as possible. This type of funding is especially important to me.

COMMENT OF SAMANTHA COMO

Date Submitted: Friday, May 18, 2012, 3:27 p.m.

City, State: Oak Lawn, IL

Occupation: Self-Employed

Comment: Stop killing all of us you murdering monsters, we will not tolerate any more of your abuse. You will be made to pay for your atrocities, count on it, so don't keep adding to your many offenses.

COMMENT OF MICHAEL COMPSTON

Date Submitted: Tuesday, May 08, 2012, 4:12 p.m.

Producer/Non-producer: Producer

Type: Field Crops, Livestock, Specialty Crops

Size: 500–999 acres

Comment: Concentrate support for conservation and nutrition. Reasonable crop insurance for catastrophic loss only and eliminate price supports. Markets will stabilize production.

COMMENT OF DAN CONINE

Date Submitted: Friday, May 18, 2012, 12:04 p.m.

City, State: Belgium, WI

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Health reform (not health CARE reform: which is just changing who builds the hospitals for the sick people) begins with food and ends with knowledge of what our food does to us, whether we can obtain healthy food or just calories, and where the money that supports towns and villages stays in those towns and villages or is sent to central processors and offshore banks.

We don't need new government organizations: we just need the ones we have to do their actual jobs instead of the jobs of the corporations.

COMMENT OF PAUL CONKLIN

Date Submitted: Friday, May 18, 2012, 12:41 p.m.

City, State: Solway, MN

Producer/Non-producer: Producer

Type: Livestock, Poultry/poultry products, Specialty Crops, Vegetables

Size: 50–150 acres

Comment: I think ag policy has been going in the wrong direction. I just read an article about the causes of our obesity epidemic, the main one being the oversupply of cheap, bad food. Why do we have this oversupply? Because the USDA is paying farmers to produce it. Why are we paying farmers to produce it, because the companies that make billions of dollars producing cheap, bad food need cheap raw materials, and because the mega farms that get most of the benefits have a lot of clout.

There have been some positive efforts to limit the amount that any farm can get in subsidies. Now apparently the subsidy payments are being scrapped and replaced with an "insurance" program that will again allow unlimited access to Federal dollars for big farms, with no ties to environmental performance.

Obviously I think this is wrong. What should we do?

- (1) Get the government out of farm subsidies altogether. The small and medium sized farms that are producing good, healthy food don't benefit much anyway; or
- (2) pay farmers to produce good, healthy food and distribute it to the people who need it!

Some current programs help with this.

- The Local Foods, Farms and Jobs Act.
- The Beginning Farmer and Rancher Opportunity Act
- The EQIP Organic Initiative
- The CSP
- Making sure that all government payments are tied to compliance with environmental and conservation laws and rules.

COMMENT OF SUSAN CONKLIN

Date Submitted: Saturday, May 19, 2012, 4:37 p.m.

City, State: Mosier, OR

Occupation: Chef

Comment: Oregon is a model for what can be a new way to look at Agriculture, well, actually, an old way revised. More than 75 new small farms have sprung up just in the Columbia Gorge in the past few years and schools, retail stores, individual farmers are benefitting from locally grown, often organic/pesticide-free, soil rich, produce, not to mention meat without hormones, antibiotics, ammonia and mad cow disease. All of us need you to do everything you can to pave the way for these farms to thrive and not be pushed out, bullied or otherwise put out of business by large corporate farms. All farms need to thrive and survive. For every decision you make, please keep these small farms in mind over the interests of the big guys who are, at times, trying to own all of the seed farmers plant, and putting obscenely

genetically modified food in our stores. This is a very serious concern to those of us who need a choice to stay healthy and eat food that has proper nutrition. Most of the food we see in grocery stores today, contains less than ½ the vitamins and minerals in it, it had in 1950. We are in your hands.

SUSAN CONKLIN.

COMMENT OF GAIL CONLEY

Date Submitted: Sunday, May 20, 2012, 6:06 a.m.

City, State: Fairfax, VA

Occupation: Retired

Comment: This nation was built on the backs of the small farmers. Don't turn your backs on them at a time like this when they need your help. We are a nation in need, our people are obese and getting sicker as a group. Those who seek to help them with healthful foods are being squelched. It is your hands to do the right thing for the future generations of organic farming. Give us all a chance, **Please!**

COMMENT OF HILARY CONNAUGHTON

Date Submitted: Saturday, May 19, 2012, 10:24 p.m.

City, State: McCloud, CA

Occupation: Nurse

Comment: I'm tired of feeling like our agriculture is just another greedy corporation and I want government that I feel wants what is best for me and mine.

COMMENT OF CASEY CONNELL

Date Submitted: Friday, May 11, 2012, 12:49 p.m.

City, State: Belen, NM

Producer/Non-producer: Producer

Type: Dry Beans & Peas, Vegetables

Size: Less than 50 acres

Comment: This country needs healthier food. We need to practice sustainable agriculture so that our future generations will have a planet they can continue to use for food. One that has not been poisoned by pesticides and herbicides which contains the vitamins and minerals we need to be healthy.

COMMENT OF JOANNA CONRARDY

Date Submitted: Wednesday, May 02, 2012, 9:34 p.m.

City, State: Albuquerque, NM

Occupation: Educational Assistant

Comment:

1. Fairness for small farmers is essential.
2. Labeling Genetically Modified food products is essential.
3. Helping the poor and nearly poor adults and children in this country is essential.

Please act responsibly when voting on the farm bill. Thank You.

COMMENT OF PEGGY CONROY

Date Submitted: Saturday, May 19, 2012, 8:12 a.m.

City, State: West Chazy, NY

Producer/Non-producer: Producer

Type: Field Crops, Livestock, Vegetables, Other

Size: 151-300 acres

Comment: We need support for small farmers who **Do Not Use Poisons On The Land Or Torture Their Animals By Restricting Them To Indoor, Cramped Housing 24/7.**

We need to **Stop "King Corn"**, and grow crops that take little from the land, rather, increases it's health and productivity, mostly grasses and legumes.

We know you are paid but big ag and soon you will be voted out of office. I saw your forestry questioning (by a GOP rep) allowing **Only** forestry people to preach last nite on C-SPAN, it was totally disgusting, just a platform for big lumber.

You people can't be gotten rid of soon enough.

COMMENT OF PAUL CONSTANTINE

Date Submitted: Saturday, May 19, 2012, 9:34 a.m.
City, State: Hayesville, NC
Occupation: Musician—Entertainer
Comment: Please consider legislation that helps the small independent growers that provide organically grown food for local consumers. Support bio-diversity in agriculture and require labeling for genetically modified food crops.

COMMENTS OF PATTI CONSTANTINO-MARTIN

Date Submitted: Friday, April 27, 2012, 7:14 p.m.
City, State: Spring Hill, FL
Occupation: Education
Comment: End the corporate whore stance. You can't be Christians and corporate whores at the same time. It just doesn't fit.
Date Submitted: Wednesday, May 09, 2012, 4:44 p.m.
Comment: Would you starve your own parents? There are plenty of elderly who never had kids and are alone and vulnerable. The **American** thing to do is protect them. Take from yourselves, take from Wall Street, and big banks. They are responsible, make them **Accountable**.

COMMENT OF GABRIELLA CONTESTABILE

Date Submitted: Friday, May 18, 2012, 11:01 a.m.
City, State: New York, NY
Occupation: Writer and Business Owner
Comment: American food policy is shameful. Stop subsidizing the unhealthy processed foods (it's a stretch to call them food) that dominate every grocery store in America. **This Is Making People Sick!** Stop lining your pockets with money from Big Food while all of you in Congress can well afford to feed your families the healthy produce so many families in America cannot afford or have access to. Stop making us sick with antibiotics, corn fed cattle, and disgusting processed garbage in every store. I was born and lived in Europe and thankfully adopted those habits for my family. But it's expensive whereas it is far more affordable in countries outside the U.S. Stop subsidizing big corn. Support local farmers and growers. Help our local produce thrive. Finally, when are you going to figure out that your job is to legislate for the public good not for your private greed.
 Get over yourselves and do what's right. I'm not holding my breath. That said, I know where Jerold Nadler, my representative stands, on the side of what's right. But he, and a few others, are unfortunately the exception.

COMMENT OF EMMA CONTRERAS

Date Submitted: Sunday, May 20, 2012, 11:36 a.m.
City, State: Boca Raton, FL
Occupation: MRO Sales
Comment: We must have a fair and healthy farm bill. As it is today we are blind and are not able to make wise decision on the food we feed our families and is making us sick.

COMMENT OF CHRISTOPHER COOK

Date Submitted: Friday, March 16, 2012, 9:47 a.m.
City, State: Hereford, AZ
Occupation: Construction, Draftsman/Engineer
Comment: Having gone through a starvation period in my youth, I urge you to include singles in your food assistance programs. I worked very hard to pay my rent and phone, but at \$2 to \$3 an hour, I could not afford much food. I went from 160 pounds to 130 pounds (bare bones) until I got emergency food stamps. After I got the food stamps I was able to find a good job. It gave me time to look instead of living day to day (1974). I got the food stamps only one time, but it got me on a path of never needing them again for my entire life (40 years since).

COMMENT OF DON COOK

Date Submitted: Saturday, May 19, 2012, 8:50 a.m.
City, State: Waco, GA
Occupation: Physical Therapist

Comment: The U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

Career politicians in Washington and across this nation are out of touch with the values of the American people. Corporate agribusiness has a stranglehold on our regulatory system and our political leaders.

Farmers and eaters across the U.S. benefit from a fair and healthy farm bill. **Do Not** cut funding to vital programs that promote conservation and support for organic and sustainable agriculture.

Instead, support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

Fully fund conservation programs, such as the Conservation Stewardship Program, and make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

Stop tax payer funded government giveaways to agribusiness and, instead, support initiatives that favor community supported agriculture. Eliminate farm subsidies that support agribusiness and shift support to local farming efforts.

Endorse and implement all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

Maintain the EQIP Organic Initiative.

Tax payers **Do Not** support a \$33 billion new entitlement program that guarantees the income of profitable farm businesses and \$90 billion in subsidies for crop and revenue insurance policies.

Do Not cut \$4 million from organic research funding or cut funding to support Beginning Farmers.

Do Not support new subsidized insurance programs that leading sustainable agriculture advocates are calling rife with opportunities for fraud and abuse.

Get rid of direct payments to commodity farmers. Kill the proposed subsidized insurance program that will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk.

COMMENT OF LTC LENNY COOK

Date Submitted: Friday, May 18, 2012, 8:55 p.m.

City, State: San Antonio, TX

Occupation: U.S. Air Force

Comment: I took the oath of office as a U.S. Military Officer, to support and defend the Constitution of the U.S.—I expect those elected officials in our U.S. Government to do the same. Not to defend the interest of lobbyists. Thank you.

COMMENT OF MARGARET COOK

Date Submitted: Saturday, May 19, 2012, 8:21 a.m.

City, State: Waco, GA

Occupation: Registered Nurse

Comment: I support sustainable community agriculture as a means to feed this nation healthy food. I object to continued government support and favoritism/money support for agribusiness. It is agribusiness/factory farming that has brought us bovine spongiform encephalopathy/mad cow disease and food recalls to numerous to mention.

I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

I endorse fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

The request the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). And I want the EQIP Organic Initiatives Maintained.

I am angered by Big Government's support of Big Ag and will no longer support politicians who value lobbyists' contributions to their campaign coffers above the health of the American people!

COMMENT OF MICHAEL COOK

Date Submitted: Friday, May 18, 2012, 10:27 p.m.

City, State: Jamaica, NY

Occupation: Artist

Comment: I think you really need to listen to the voices of your constituents who realize the significance of providing healthy, organic food for everyone, not expensive subsidies to Agribusiness which does not need them, and is sending us down the drain with their non-ecological, non-conservation, unhealthy practices. The food these factory farms produce is causing huge increases in the cost of our healthcare system, not to mention our national mortality rates. If left to their own devices, these people will entirely ruin the quality of our land, and food supply in the United States. Do something about this now by reversing this trend.

COMMENT OF JOHN COOKE

Date Submitted: Friday, May 18, 2012, 11:59 a.m.

City, State: Haverford, PA

Occupation: Retired

Comment: It's time for real farm reform. Stop subsidizing agribusinesses and start focusing on policies that promote healthy and organic farms and assure a healthy diet for all Americans.

COMMENT OF KATHERINE COOKE

Date Submitted: Friday, May 18, 2012, 12:54 p.m.

City, State: Brooklyn, NY

Occupation: Teacher

Comment: We need appropriate safeguards for our food sources. Specifically I would like to see more done about sustainable agriculture, getting rid of GMO food and GE food, and working towards organic agriculture across the country. I cannot trust food that is produced with so many chemicals.

COMMENT OF MONICA COOLEY

Date Submitted: Saturday, May 19, 2012, 6:49 a.m.

City, State: Lafayette Hill, PA

Occupation: IT Project Manager

Comment: I am a strong proponent of sustainably-farmed, local food. Our current agricultural policy does not allow this type of farm or farmer to thrive, but instead is skewed to ensure that large mass production farms offering excessive amounts of foods we do not need grown via methods that are harming our environment.

Let's make our policy even the playing field for the farmers that are growing foods we want and need in a way that benefits the people and the environment. Thank you.

COMMENT OF ANITA COOLIDGE

Date Submitted: Friday, May 18, 2012, 3:09 p.m.

City, State: Cardiff, CA

Occupation: Semi-Retired: Energy Healer and Writer

Comment: As a citizen of the U.S. and very concerned about the quality of the food we eat, as well as the well-being of those who produce it, I never want to see bills passed that allow greed to take over for quality of food and quality of life. We all need to be protected from pesticides and GMOs.

COMMENT OF BARBARA COOPER

Date Submitted: Friday, May 18, 2012, 1:21 p.m.

City, State: Barton, NY

Occupation: Retired Social Worker

Comment: I believe food production—because it is controlled by corporate \$ and agribusiness—is hurting our health, the environment, and the economy (with the exception of the few decision-making corporations). I do not feel current decision-making is based on principles of science and health which is what we need.

COMMENT OF CAROLINE COOPER

Date Submitted: Friday, May 18, 2012, 11:21 a.m.

City, State: Las Vegas, NV

Occupation: Biosync Practitioner

Comment: To whom it may concern,

I find it an absolute disgrace that our food is full of chemicals and pesticides. I also find it a disgrace that it has to be so much more expensive to eat organic, hor-

mone free, antibiotic free, and chemical free food. We should all have access to healthy whole foods. I think it is imperative that we go back to basics as nature intended. With over 60% of our population being overweight and ridden with all kind of diseases that would easily disappear if only they had access to real, healthy and affordable food. So needless to say, our generation is in desperate need of change and together we can change that. We owe it to ourselves and this planet to make that change.

In high hopes of seeing that change happen, I thank you for your time.
CAROLINE COOPER.

COMMENT OF DEANNE COOPER

Date Submitted: Friday, May 11, 2012, 6:07 p.m.

City, State: LaGrange, KY

Producer/Non-producer: Producer

Type: Vegetables, Other

Size: Less than 50 acres

Comment: As an individual majoring in biology, geology, and eventually a Ph.D. program for ecology, I have tremendous interest in sustaining the diversity of our ecosystems. We are at a critical time in our planet's history to slow down the impact of our continued actions for the greatest positive effect of long term consequences for the planet. Conservation and investment into a farm bill that sustains small farms with alternative farming practices like organic farming that return our land to producing quality food products that improves the health of the public and that sustains the environment without soil runoff and pesticides that infiltrate our water supply. I want my children to play in healthy ecosystems and have clean water that's o.k. to swim in. I want them to have a planet and a country that values it's resources and does not pillage without the thought of responsibility for restorative processes that continue to improve and lead the world. The responsibility party was given a planet to care for, not plunder until it is used up and not able to sustain life.

COMMENT OF DIANE COOPER

Date Submitted: Friday, May 18, 2012, 9:02 p.m.

City, State: Highland, NY

Occupation: Grandmother

Comment: When our water is poisoned by fracking and waste disposal, and our soil is dead from chemicals, and our total food supply is poisoned by Monsanto and the rest . . . and our bodies are destroyed by the cancers all this causes, and all the animals and the fish will have been destroyed by being eaten, or hunted to extinction . . . **Then** will they be happy? What will it take to stop all the genetic modification, feeding farmed fish and animals chemical fake food? We are delicate animals ourselves, and we are driving ourselves to extinction with all this. Just my humble opinion.

DIANE (BONNIE) COOPER.

COMMENT OF JOHN COOPER

Date Submitted: Friday, May 18, 2012, 2:47 p.m.

City, State: Naalehu, HI

Producer/Non-producer: Producer

Type: Field Crops

Size: Less than 50 acres

Comment: The whole idea of our life should not be simply to extract money from everything else your deadly products have no other function but to attempt to collect money and power to collect more money. Try doing something that actually benefits the whole world and that does not point directly to your folly of wealth accumulation as the only thing that you are.

COMMENT OF NANCY COOPER

Date Submitted: Saturday, May 19, 2012, 12:40 p.m.

City, State: Stanwood, WA

Occupation: Private Organic Gardener

Comment: This country is supposed to be by the people, for the people. In other words, the farm bill should only subsidize actual small farmers, when they are in need. It should not be a hand out to Monsanto, ADM, Cargill *etc.*

Also, rules should be to protect the people, not the corporations! (Monsanto suing because their seeds blew across the street, or requiring farmers to buy new seeds each year!) **Absolute Madness!**

COMMENT OF ORION COOPER

Date Submitted: Saturday, May 19, 2012, 12:12 a.m.

City, State: Portland, ME

Occupation: Direct Service Professional

Comment: I believe that small, local farms, sustainable agricultural practices, and organic food production are the best way to protect our health, environmental integrity, and our economy. I also believe that very large farms, monoculture food production, and government subsidies for very large farms and other very large food producers are damaging to our health, our environment, and our economy. With this in mind, I ask you to consider the following requests while working on the next farm bill:

1. Please endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
2. Please grant full funding to the Conservation Stewardship Program and other conservation programs. Please ensure that enrollment in any new insurance subsidies is tied directly to compliance with conservation programs.
3. Please implement all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
4. Please maintain the EQIP Organic Initiative.

Thank you for your consideration.

COMMENT OF JESSICA CORAM

Date Submitted: Friday, May 18, 2012, 2:31 p.m.

City, State: Cambria, NY

Occupation: MIS Manager

Comment: I would like a farm bill that promotes healthy organic food. Organic options are important to me and my family and they are often difficult to find at the grocery store.

I also believe that agricultural subsidies should be capped so that larger Agri-business firms are not using incentives as corporate welfare.

COMMENT OF SHANNON CORAM

Date Submitted: Friday, May 18, 2012, 10:04 a.m.

City, State: Tampa, FL

Occupation: Financial Analyst

Comment: Having a young son now, I'm teaching him the importance of eating healthy food. Not only having access to natural, local fruit, vegetables and meat but having affordable access is an important step in the health of our children and fighting the battle of the bulge for all citizens. We are a very unhealthy country at the moment but making healthy food available and affordable to everyone is one step in fighting the obesity problem in America which in turn will also lighten the burden this epidemic has placed on our healthcare system. We need to lower the amount of diabetes, heart and liver disease in this country. Aside from the debt that our country is always dealing with, this is by far the biggest issue I see our country facing.

COMMENT OF MARY LOU CORBETT

Date Submitted: Friday, May 11, 2012, 3:54 p.m.

City, State: Johnston, SC

Occupation: Retired Administrative Assistant

Comment: I recommend crop subsidies only to producers who eschew chemical fertilizers, pesticides, genetically modified root and seed stock, growth hormones, and non-therapeutic antibiotics. This would (1) increase agricultural employment, (2) increase product pricing, (3) level the playing field for organic producers, domestic and foreign, to compete with conventional USA factory farms, (4) allow consumers to obtain unpolluted produce at a reasonable price, reducing the incidence of chronic disease and mental decline, and (5) slow and possibly stop epidemic bee colony collapse.

COMMENT OF LINDA CORBIN

Date Submitted: Saturday, May 19, 2012, 7:26 p.m.

City, State: Laurel, MT

Occupation: Semi-Retired Union Worker/Hobby Farmer

Comment: I'm sick and tired of having companies like Monsanto dictating to the farmers and country how I'm going to eat. I don't want pesticides in my food. I don't believe they're safe and no one has tested this to prove otherwise, in fact, they have been found in the blood of some animals and children! Organic farmers are getting screwed by big ag and I'm sick of it. I hate this Congress, they do nothing for the people who put them in D.C.! They need to get off their overpaid asses and help the people instead of the games they're playing now! I am Democratic and proud of it.

COMMENT OF MARY CORCORAN

Date Submitted: Friday, May 18, 2012, 9:31 p.m.

City, State: New York, NY

Occupation: Self-Employed

Comment: Don't let Congress cut \$4 million from organic research funding and cut in half funding to support Beginning Farmers. Tell Congress to support organics.

Thank You!

COMMENT OF RUTH CORDELL

Date Submitted: Friday, May 18, 2012, 12:21 p.m.

City, State: Manchester, TN

Occupation: Trainer, Teacher, Director

Comment: More and more, acquiring clean "original" food without the tampering of chemicals, chemical residue, modification is becoming an elusive to impossible expectation.

Good health is a birthright. The further we remove ourselves from the responsibility of keeping a pure food source, vegetable or animal, we travel further from the ownership of healthy and sound bodies and minds.

I respectfully request that this issue be carefully reviewed, and reviewed often, to protect our future, our children, our animals, indeed, all living creatures. Because the science of mass production is very much a increasing reality, we must realized that it most often should not be the norm.

Thank you for your time.

COMMENT OF LONNEY CORDER-AGNEW

Date Submitted: Friday, May 18, 2012, 5:29 p.m.

City, State: Oklahoma City, OK

Occupation: Teacher

Comment:

1. No animals should be cruelly confined or deprived of light and air.
2. No hormones or universal antibiotics should be used.
3. Pizza is **Not** a vegetable.
4. Most important: **Stop** Monsanto from designing genetically modified seeds that kill "pests" They're also killing bees, which is beyond stupid.

I **Do Not** care if business "leaders" don't like this. They can suck it up.

COMMENT OF FLOYD CORDOVA

Date Submitted: Thursday, May 17, 2012, 4:12 p.m.

City, State: Albuquerque, NM

Occupation: Health and Wellness Advocate

Comment: Along with getting the funding for all the nutritional entities, we need to include that we need to set up a committee to get Industrial Hemp legal to grow in the USA.

COMMENT OF JANIE CORDRAY

Date Submitted: Friday, May 18, 2012, 2:43 p.m.

City, State: Woodland, CA

Occupation: Retired/Government Regulatory Consultant

Comment: Please work to end subsidies for grains that are used for animal feed or sweeteners. It's time we subsidize real food, particularly non-GMO organic foods that promote health, not obesity and illness.

COMMENT OF RICK CORMIER

Date Submitted: Friday, May 18, 2012, 12:40 p.m.

City, State: Yarmouth, ME

Occupation: Psychotherapist/Musician/Author

Comment: We are handing our health and the future of our children's health to the company who brought us Agent Orange so that members of Congress can line their pockets from stock purchases which they have kept exempt from insider trading laws. We have, in effect, legalized corruption in the U.S. Monsanto has waged an attack on their competitor, the organic farmer, and our legal system . . . our government . . . has become too corrupt to defend the farmer.

COMMENT OF LINDA CORNELL

Date Submitted: Friday, May 18, 2012, 12:26 p.m.

City, State: Campbell, NY

Occupation: Retired—Banking

Comment: Ever wonder why there is so much cancer these days. What is really being put in our food? You don't have to look very far to see the toxins that we are eating every day. Please do not allow these deceptive practices to continue. Tell the FDA to do their jobs and protect us from all the toxins.

COMMENT OF SANDY CORNELL

Date Submitted: Friday, May 11, 2012, 10:29 a.m.

City, State: Moab, UT

Occupation: Nanny

Comment: Please stop ruining our food and our planet at the same time. How much power and money is **Enough**. I will only eat certified organic forever . . . shame on the lot of you for bringing us to this point in our food system and Politics. Stop!

COMMENT OF GINA CORNIA

Date Submitted: Wednesday, May 16, 2012, 4:55 p.m.

City, State: Salt Lake City, UT

Occupation: Anti-Hunger Advocate

Comment: Utahns Against Hunger urges you to craft a farm bill that will protect the integrity and current structure of the Supplemental Nutrition Assistance Program. Changing it to a block grant will prevent it from responding, as it has, to downturns in the economy and will increase hunger and food insecurity to those who can least afford it. The committee should also increase funding for TEFAP, emergency food providers continue to serve record numbers of people who often are not eligible for Federal nutrition programs but are still poor. Now is the time for bold leadership and to shore up programs that improve health, reduce poverty and put food on the table.

COMMENT OF SUSAN CORRADO

Date Submitted: Wednesday, April 18, 2012, 10:18 p.m.

City, State: Verona, WI

Occupation: Facilitator of an Agricultural Program

Comment: Please support the full funding of the Farm bill that is absolutely vital for giving small family farmers half a chance against conglomerate agriculture. This is the time when we need to, develop sustainable farming and local production. The socially disadvantaged farm grants help to build capacity of a strong farming workforce who fills an important void in the family farm demise. This has severe consequences on the general population.

Thank you.

COMMENT OF NICOLE CORZINE

Date Submitted: Thursday, May 17, 2012, 3:34 p.m.

City, State: Spring, TX

Occupation: AFIS Support Technician

Comment: I do not support the ban of farmer's children or family being able to work on the farm as "chores." Kids need a strong work ethic now more than ever, and taking away an incredible experience for them will do no favors. I also do not support government subsidies to farmers to only grow certain amounts of food per season. This is a form of price control. Allow farmers to choose what they believe should be planted and stay out of their lives!

COMMENT OF JULES COSENZA

Date Submitted: Thursday, May 17, 2012, 12:54 p.m.

City, State: Schwenksville, PA

Occupation: Teacher

Comment: Point out that feeding our neighbors is a public-private partnership, we do our part with fund raisers and food drives and volunteerism but if you approve cutting anti-hunger programs it will increase hunger in America, as well as the associated health care, educational, and economic costs of food insecurity and please remember the families who are struggling in our community. I urge you to protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization.

COMMENT OF BRONA COSGRAVE

Date Submitted: Friday, May 18, 2012, 9:21 a.m.

City, State: Brooklyn, NY

Occupation: Communications

Comment: Take back the farm bill from corporate ag and food processing companies. Creating a fairer farm bill that supports small diversified farms will not only stimulate the economy, but also improve the health of the nation thereby reducing health costs further adding to the country's bottom line. We deserve to be able to buy "clean" fresh nutritional food.

COMMENT OF CHARLES COSHOW, JR.

Date Submitted: Friday, May 18, 2012, 1:00 p.m.

City, State: Houston, TX

Occupation: Data Report Developer

Comment: We can either continue to pursue policies that are endangering the future of agriculture and our health, or we can make a change and promote crops **Besides** wheat and corn, we can create an environment that promotes best practices, promote food that makes us **Better** when we eat it, and ensures that America can feed, not just itself, but the world for generations to come.

COMMENT OF PAT COSIMANO

Date Submitted: Saturday, May 19, 2012, 6:54 a.m.

City, State: Woodside, NY

Occupation: Homekeeper

Comment: I'm informed that Congress is considering cutting funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture.

I oppose any cuts to these programs and hope you oppose cuts as well.

COMMENT OF ANITA COST

Date Submitted: Saturday, May 19, 2012, 12:24 a.m.

City, State: Fountain Valley, CA

Occupation: Unemployed

Comment: We need a better system. I want to be able to trust food producers to produce sustainable and healthy food with less chemicals and pollution. I want reliable honest food labels. I want independent testing of industry research. I and my family are depending on you to make honorable choices when it comes to our food.

COMMENT OF DEMELZA COSTA

Date Submitted: Friday, May 18, 2012, 3:55 p.m.

City, State: Sweet Home, OR

Occupation: Counselor

Comment: I absolutely object to **Any** subsidy farm aid being given to corporations this is an **Ignorant** policy which only encourages their greed and fascist **Agenda**. Farm subsidies should absolutely be given to legit mate small and family farms who need this assistance. Priority should be given to authentic organically grown crops and seeds. Absolutely **None** should be given to Monsanto and bio-tech growers/marketers. The object of 'Farms' is to produce food and seeds fit for consumption **Not** sickening people and animals and destroying native plants and toxifying the ecology!

COMMENT OF CHRIS COSTANZO

Date Submitted: Friday, May 18, 2012, 1:06 p.m.

City, State: Downingtown, PA

Occupation: Financial Analyst

Comment: The United States has one of the lowest levels of food standards in the developed world whether this is generally accepted or not. The food produced in factory farms is nutritionally insufficient at best. If you disagree then please explain to me why in the U.S. we have obese yet malnourished people. The attempted domination of the food system by the benefactors of biotech companies pushing GMOs is highly shameful as the heavy use of pesticides is implicated in various health concerns and is a major pollutant that we are all forced to live within the environment. The food system in the U.S. is unacceptable and has very significant negative ramifications ranging from poor school performance by our children to overall healthcare expenses that we cannot afford. Myself and an increasing number of people are fully aware of the corrupt nature of the U.S. food system and will continue to support local, responsible, organic food growers and producers while our politicians support chemical producers and factories that churn out product that has a direct negative impact on the performance and productivity of the people all the while amplifying our already unsustainable healthcare costs.

COMMENT OF SHAWNDEYA COSTELLO

Date Submitted: Friday, May 18, 2012, 1:59 p.m.

City, State: Marcola, OR

Occupation: Retired

Comment: I have incorporated 3 chickens, 3 ducks and 2 geese into my backyard of 5 acres. I no longer need pesticides and I can eat eggs from chickens who are not living a tortured life. How would you like living in a cage? Do you want your grandchildren to inherit a poison filled Earth that creates birth defects?

COMMENT OF TISH COTTER

Date Submitted: Friday, May 18, 2012, 9:37 p.m.

City, State: New York, NY

Occupation: VP of a Small Consultancy

Comment: Support family farms, organic farming and beyond organic farming—label GM foods, protect all small farmers and our soil from GMs and from big ag. Stop supporting diabetes and obesity with subsidies as they stand, make fresh local food available.

COMMENT OF LAWRENCE COTTLE

Date Submitted: Friday, April 27, 2012, 9:04 a.m.

City, State: Dallas, TX

Occupation: Chiropractor

Comment: We must NOT allow critical food programs to just "go away"! Try going hungry (fasting) for a day or two. You will soon realize the stark feelings of deprivation, depression, and desperation.

COMMENT OF ANDREW COTTON

Date Submitted: Friday, May 18, 2012, 7:18 p.m.

City, State: Midway, FL

Occupation: Health Care

Comment: As more and more data is reported regarding the hazards both to the environment and to our bodies associated with the use of agricultural pesticides and inappropriate use of antibiotics to stimulate unnatural growth rates in meat we

need policies and political figures to support smaller more diversified farmers who are working to produce food without harmful chemicals. I don't think that extra money should be dumped into the farming sector, just spread it around fairly. That doesn't mean huge corporate agribusiness gets 90% of the subsidies just because they lobby harder with their money. It also means that growers associated with these big firms **Are Not** who I am advocating get the larger cut, they have chosen to offer up their products to a bigger source and are not operating independently. Support independently operated small organic and/or naturally grown farms fairly, and get non-biased oversight on the reevaluation of limiting regulations intended for large operations but cost prohibitive and unnecessary for the small farm. Furthermore it is sickening to hear news of the weakness and lack of accountability in the USDA and other regulatory agencies dropping the ball when it comes to enforcing basic standards for the big players who grow conventional and often genetically modified foods. And to whomever may be reading this (or not), count on the fact that if transparency and action are not show in the topics listed above you will get voted against until someone who can and will fixes our screwed up food system.

COMMENT OF NANCY COTTON

Date Submitted: Friday, May 18, 2012, 12:01 p.m.

City, State: Lebanon, TN

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: I have a private farm and want to see farmers able to farm "the right way." Every time you pass another of your horrible bills, you make it harder for small farmers to stay in business. I don't want to eat factory farm, GMO food. Small farmers are the backbone of this country.

COMMENT OF STEPHEN COUCHE

Date Submitted: Friday, May 18, 2012, 10:43 p.m.

City, State: Portland, OR

Occupation: Retired

Comment: It is critical to the health of this planet that we really stand up and support (even subsidize) the family farmer. The closer we can get the growers to their markets the fresher the produce and the better for the environment.

COMMENT OF CHRISTIAN COULON

Date Submitted: Friday, May 18, 2012, 1:57 p.m.

City, State: Davis, CA

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: Support small, local growers. Stop pesticides, end big ag subsidies. End factory farming. Require greenbelts. Create agricultural education requirement for ALL students in the USA—everyone needs to know where food comes from!

COMMENT OF NINA COUNCIL

Date Submitted: Sunday, May 20, 2012, 12:13 a.m.

City, State: Ashland, OR

Occupation: Retired Artist and Admin. Person

Comment: Big agriculture is out of hand, small farmers having real trouble. Must produce organic, safe food, no GMO's used. Our food is becoming more and more unhealthy.

COMMENT OF GEORGE COURTER

Date Submitted: Sunday, May 20, 2012, 10:32 p.m.

City, State: Galesburg, IL

Producer/Non-producer: Producer

Type: Field Crops

Size: 50–150 acres

Comment: Gentlemen:

I attended the committee hearing in Galesburg. This hearing was very well conducted and Chairman Lucas did an outstanding job of conducting it. I thought it

was also well attended. I agree with everything David Erickson spoke about. As a taxpayer, I want Congress to cut spending, and reduce taxes. The Federal budget must be balanced and debt reduced. The major portion of the Ag budget is food stamps and people must be put to work to reduce that program.

COMMENT OF DAVE COWEN

Date Submitted: Friday, May 18, 2012, 1:21 p.m.

City, State: San Diego, CA

Occupation: Mortgage Broker

Comment: Please use the newest Ag Bill as an opportunity to promote nutrition, healthy eating, and an increase in organic farming. We have tried to oppose, and the damage to our country's health and citizens has been dramatic. Please do the right thing.

COMMENT OF ANN COWLES, PH.D.

Date Submitted: Friday, May 18, 2012, 4:42 p.m.

City, State: Davis, CA

Occupation: Supportive Living Services

Comment: I believe that healthy food makes healthy people, and unhealthy food makes unhealthy people. This country could save **Billions** in health care costs by promoting policies that support the production of organic foods and naturally-fed food animals. Even though the Local Foods, Farms and Jobs Act (H.R. 3286) has provisions I don't like, I still ask that you vote for it in order for conservation programs to be funded, and for enrollment in any new insurance subsidies to be tied to compliance with adherence to conservation programs. Also, I want implemented all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). **No Farms, No Food.** Since it's only a matter of time before it is generally accepted that chemicals used in food production contribute to cancer and other illnesses, I also ask that you support the maintenance of the EQIP Organic Initiative. Thank you very much,
ANN COWLES, PH.D.

COMMENT OF JANET COWLING

Date Submitted: Thursday, May 17, 2012, 7:26 a.m.

City, State: Saline, MI

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I oppose the cuts proposed by the House. Please add these important items to the House version of the Farm Bill Community Food Projects Program—\$10 million per year to help communities build food self-reliance.

Farmers Market and Local Food Promotion Program—\$20 million per year to develop farmers market capacity and create food hubs to connect farmers with schools, hospitals, grocery stores and other markets.

Hunger-Free Community Incentive Grants—An average of \$20 million per year for a new SNAP local fruit and vegetable incentive grant program at farmers markets and other healthy food retailers.

COMMENT OF LESLIE COX

Date Submitted: Saturday, May 19, 2012, 10:43 a.m.

City, State: Medford, OR

Occupation: Secretarial

Comment: I **Fully** and **Emphatically** support the following:

- (1) The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- (2) Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- (3) The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- (4) Maintaining the EQIP Organic Initiative.

Thank you for listening. Please, think of your children's future and their children's future. Their best interest should not be placed in the hands of large corpora-

tions whose main object is making money for shareholders. Farming, small local farming, should always be a very important part of our country.

COMMENT OF LINDA COX

Date Submitted: Sunday, May 20, 2012, 3:33 p.m.

City, State: Farmington, AR

Occupation: Inventory, Wal-Mart Optical Lab

Comment: I want healthy food and go to great lengths to buy organic. I buy local when I can. Farmers are important to me and our future health. Please do not take these things away from us. And please do not put hardship on our farmers.

LINDA COX.

COMMENT OF MAURY COX

Date Submitted: Sunday, May 13, 2012, 7:00 p.m.

City, State: Shelbyville, KY

Occupation: KY Dairy Producer/Allied Industry Ex. Dir.

Comment: The Dairy Security Act of 2011 proposed by Congressman Collin Peterson, (D-MN) is based on the framework of National Milk Producers Federation, *Foundation for the Future*. This program, if enacted does not consider the deficit milk production areas of the nation including the Northeast and Southeast milk sheds.

In the Southeast, milk is brought in to fill processors' needs every month of the year at the indirect expense of local producers. The Southeast has seen the largest percentage decrease in producer numbers over the last 10 years. The Dairy Security Act will exacerbate the problem unless the present Federal Milk Market Order rules are changed. It will more quickly remove the small family dairy farms from the area and set-up large CAFOs in their place.

Dairy economist, Drs. Mark Stephenson and Andy Novakovic have analyzed the DSA and the Senate version. Here is their conclusion:

“Conclusions

These calculations show what might have been from 2007 to 2012 had the Senate Act been in place and there were no changes in producer marketings or milk prices. Arguably, this presents the impacts of this policy under a favorable scenario. Earlier modeling of the DSA shows that participation rates make a significant difference.⁷ Low levels of participation would have generated margins very much like those calculated in this paper. However, the reductions in payments would have fallen on the few producers who did choose to participate. With 100% participation, earlier modeling shows a large reduction of margin volatility and little impact on long-run average prices. Under higher levels of participation, perhaps as much as 50% of production, the previous modeling suggests even more reduction in margin volatility but a lower average milk price as non-participants take more complete advantage of growth opportunities. Whether one judges new dairy policy as “good or bad” for the industry, it is unavoidably true that they will impact producers differently. Dairy farmers, processors and policy makers should thoughtfully consider expected outcomes and recognize that different farmers will have different experiences and that there will be both intended and unintended consequences.”

It is believed those dairy farmers that are highly leveraged will be required by their lenders to participate in the margin insurance therefore also participating in the supply management program. When considering the fact that over 50 percent of the nations supply of milk is produced by less than three percent of the producers, ultimately the small producers will be the ones “balancing” the nations supply until they are driven out of business. This is where this proposed legislation is headed.

Please vote **No** on this portion of the farm bill. There are other options and proposals available. Take a look. Consider options that will not more quickly run the small family farm out of business.

Thank you,

MAURY COX,
Shelbyville, KY,
[Redacted].

⁷*Nicholson and Stephenson.*

COMMENT OF D. SID COY

Date Submitted: Friday, May 18, 2012, 3:25 p.m.

City, State: Wasilla, AK

Occupation: Construction

Comment: Mega farm corporations such as Monsanto have paid lobbyists to persuade lawmakers to vote favorably on bills that affect consumers. The lawmakers know nothing about the results or the actual harm being done by allowing the mega farm corporations to genetically modify foods, fish and plants. Ignorance is no excuse when voting for a harmful farm bill. Leave farming to farmers and not mega managers who are not interested in health, only the profit in the bottom line.

SID COY.

[Redacted].

COMMENT OF LOWELL CPORDAS

Date Submitted: Friday, May 18, 2012, 3:27 p.m.

City, State: Lacey, WA

Occupation: Vendor and Inventor of Farm Hand Tools

Comment: Hon. Committee Members,

I am most concerned about food labeling:

1. Country of origin.
2. Listing all ingredients including sub ingredients.
3. Listing if the product contains GMO's.

I would also encourage you wherever possible to make it easier for small farmers and producers to compete with the large firms.

COMMENT OF DELIGHT CRAFT

Date Submitted: Friday, May 18, 2012, 12:30 p.m.

City, State: Galax, VA

Occupation: Retired from Counseling/Human Services Profession

Comment: I am a retired woman who has championed local, sustainable agricultural methods since the 1970's. I am quite healthy and plan to continue to eat foods that are **Fresh, Local**, and produced in a sustainable and healthy manner . . . healthy for my body and the Earth. I am ashamed at the irresponsible way our country has allowed BIG agribusiness pervert the very basics of our food production and put farm families out of business, *etc.* I also believe that a number of subsidies **Need To Be** and **Must Be** eliminated, as they are either no longer necessary for particular crops, or they serve to continue the travesty of unsustainable practices by agribusiness interests that are not operating in ways that benefit our society.

COMMENT OF HELEN CRAFT

Date Submitted: Friday, May 18, 2012, 12:45 p.m.

City, State: Rockville, MD

Occupation: Registered Nurse

Comment: As a certified pediatric nurse, I see firsthand the effects of overweight and obesity in a growing number of children. As a nation, our relationship with food is in bad shape. Many kids don't know what non-processed food looks like and their bodies, both inside and out, make that clear—pediatric type II diabetes is on the rise and these kids are set up for a myriad of other health problems related to obesity. Making healthy, whole foods more accessible and affordable to people begins with supporting sustainable (also read organic) local production of food. Support of this kind of food production also promotes better environmental stewardship. To this end, I support all provisions of the Local Food, Farms, and Jobs Act (H.R. 3286), full funding of conservation programs such as the Conservation Stewardship Program, implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), and maintenance of the EQIP Organic Initiative.

COMMENT OF JANICE CRAGNOLIN

Date Submitted: Friday, May 18, 2012, 2:32 p.m.

City, State: Unadilla, NY

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I'm a vegetable gardener not a farmer like my neighbors, but I know by reducing subsidies to small farms and enhancing them for mega farms, our local economy has taken one hit after another that has put many of my neighbors out of business. Health-issues related to increased use of pesticides and antibiotics as well as inhumane livestock management are more manifest than ever.

Want to revitalize our economy and reduce health costs in this country? Remove farm subsidies from mega factory farms and chemical companies, and re-energize the **Real** small farmer economy. Triple the benefit—farm organically and put 3 additional people back into the payroll as well as reduce health and veterinary costs that escalate due to chemical laden toxins and overused antibiotics.

Factory farming is ultimately more costly than local sustainable farming and is creating both an economic crisis and an emerging health crisis.

Our farm bill should set responsible policy toward sustainable, organic localized solutions that will guarantee our physical and economic survival, not jeopardize these essentials.

COMMENT OF GERALDENE CRAIG

Date Submitted: Friday, March 16, 2012, 11:26 a.m.

City, State: Greenville, SC

Comment: Please assist organic farmers and family farms so that more nutritious foods will be more available and affordable for struggling and poor families.

Locally grown and organic food are more likely to be picked **After** they are ripened, and ripened fruits and vegetables have the most nutritional content, the more nutrition in the foods we consume, the stronger our immune system, the stronger our immune system, the least like we are sick, or to be born with many ailments and disorders that are plaguing America's children today. Family farms are the likely sources of locally grown foods, locally grown foods have to travel less to get to the market, then to the table, the less the food has to travel, the more likely it is to be harvested **After** it is ripe, foods harvested **After** ripeness possesses the most nutrition.

Please include in this bill a provision for vouchers that poor people can use to buy organic food.

The entire country and the Federal budget will benefit in the long-run from people having easier and affordable access to organic and locally grown healthier food because, the more nutritious the food people consume, the healthier people will be, the healthier people are, the less money we have to spend on healthcare, to put it simple.

Please put provisions in this bill that require Public Schools to serve nutritious meals for breakfast and lunch, because even when parents are feeding their children healthy meals at home, if the public school they attend is feeding them pre-processed, chemical and additive laden foods, it defeats the purpose of the parents feeding their children healthy meals at home. Please require that soft-drink and unhealthy fast food vendors not be allowed to sell their products in public schools.

Please make the farm bill a healthier and wiser decision this time.

COMMENT OF JAN CRAIG

Date Submitted: Friday, May 18, 2012, 12:50 p.m.

City, State: Akron, OH

Occupation: Homemaker/Caregiver

Comment: Please do not cut funding for the only real health option available! Maintain funding for organic and sustainable agriculture.

If we want true health in this country, we would outlaw Monsanto and put all our efforts into real food production. Please quit soft killing the American public. Quit killing the innocent children!

COMMENT OF JASON CRAIG

Date Submitted: Friday, May 18, 2012, 9:29 a.m.

City, State: Columbia, SC

Occupation: Educator

Comment: Please vote to move us toward a sustainable agriculture system. It is becoming more and more clear that rising health-care costs, rising fuel costs, and increasing amounts of environmental and social problems need to be addressed in the way we fund food production. Please redirect Subsidy programs toward small,

sustainable family farms. Please also, continue support for low-income health and nutrition problems.

Thanks,

JASON.

COMMENT OF JEAN CRAIG

Date Submitted: Friday, May 18, 2012, 5:52 p.m.

City, State: Fort Worth, TX

Occupation: Retired

Comment: I am a senior citizen. My Social Security benefits are very low. I depend on the SNAP program to eat. Groceries are very expensive, so I can't afford to eat the "healthy" diet recommended by nutritionists. I can't afford meat, and, fresh fruits and vegetables and milk are a rare treat for me. Please don't let the amount of my SNAP benefit be cut again.

COMMENT OF KARL CRAIG

Date Submitted: Monday, March 19, 2012, 8:55 p.m.

City, State: Lubbock, TX

Occupation: Retired

Comment: Randy, U.S. Congress now is impotent! Congress chose this situation. The constitution and common sense says we now have a congress of fools. Use all influence to stop the latest Executive Order (national defense resources). Congress has the power to over-ride a veto. Use the tactic F.D.R. used. **Go To The People:** radio, TV, internet, written, *etc.* this is how you can secure enough votes to over-ride a veto. Make Congress work again! Get govt. out of my life. Was once a farmer. Out of my life. Let the free market work. Get out of my life. Agriculture can make it on our own!

COMMENT OF KATHY CRAIG

Date Submitted: Tuesday, May 08, 2012, 5:43 p.m.

City, State: Palm Bay, FL

Occupation: Unemployed

Comment: There are a lot of people, who unfortunately are living on the street. Not by any fault of their own. No one should have to live on the streets in our country. They need food to live. By cutting back on money used to help these people live, you are basically saying that you do not care about them. How would you feel if you were in their place and lost your job and had no money to live and did not have a roof over your head. Jesus wants us to help everyone. So please do not cut the spending for this program, all of these people need your help. Thank you.

COMMENT OF MARGARET CRAIG

Date Submitted: Friday, May 18, 2012, 8:19 p.m.

City, State: Homer, AK

Occupation: Retired

Comment: The small farmer is an important part of the food chain and should be allowed to prosper as well as the giants. Organic and non-GMO crops are important to the health of the industry.

COMMENT OF KIMBERLY CRAIL

Date Submitted: Saturday, May 19, 2012, 3:11 a.m.

City, State: Floral Park, NY

Occupation: Executive

Comment: The health of our people is the priority over the profits of chemical companies like Monsanto and Dow, who dominate our planted food supplies. And the factory farms who dominate and perpetrate horrendous suffering on the animals we then eat, feeding them poison and bits of other animals. Really? Real food, slow food. Cheetos are not real food.

COMMENT OF JANET CRAIN

Date Submitted: Saturday, May 19, 2012, 6:53 p.m.

City, State: Meadow Valley, CA

Occupation: Clinical Laboratory Scientist

Comment: I did my first term paper in High School (in ~1962) on the farm bill. I have always been amazed by the “pork” contained therein. It is time to resist Big Ag. and make a bill that truly helps farmers, consumers, the land and the farm workers. I support organic agriculture. I only buy organic produce and I grow at home whenever I can. Please break the stranglehold corporate agriculture enjoys on our food system! Please incorporate standards for Organic Agriculture, reduce or remove ridiculous subsidies that mainly profit Big Ag, and support existing laws that encourage conservation of the land for current and future generations. You are responsible!

COMMENT OF DANA CRAMER

City, State: Greenwood, MO

Occupation: Stay-at-Home Mom

Comment: I want good, clean food. Labeled food. If I'm to purchase a GMO product, I want to **Know** it's been modified. I do **Not** want to eat cloned food or irradiated food. If food is labeled then I can **Choose** what is right for my family. I am an adult and I deserve to know what I am putting in my body and I deserve to choose what is right for our family.

COMMENT OF LYNN CRANDALL

Date Submitted: Friday, May 11, 2012, 10:46 a.m.

City, State: Cottonwood, AZ

Occupation: Retired

Comment: If you truly care about the people that you represent, and the country you live in, you will take a good look at the mess that is called our agriculture policy. I'm not a farmer, but I buy the “food” that is on the shelves. It's shameful that we have such poor policies that even other countries are banning our tainted imports!

Let's clean up this country's farmlands and get rid of the policies that encourage the current shameful state of our food supply.

COMMENT OF NEAL CRANDALL

Date Submitted: Sunday, May 13, 2012, 9:33 a.m.

City, State: Springfield, OH

Occupation: Drug Abuse Counselor

Comment: Protect and raise SNAP and school lunch allocations. Stop Monsanto from strong arming Organic Farmers and increase SNAP utilization programs @ farmer's markets.

COMMENT OF JOSHUA CRAVENS

Date Submitted: Friday, May 18, 2012, 6:19 p.m.

City, State: Monticello, NM

Producer/Non-producer: Producer

Type: Fruits, Greenhouse/nursery, Livestock, Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: We need a Farm bill that focuses plenty of money on Organic, Low input, Sustainable Agriculture as it is the foundation for our future as Americans. Thank you for your support in this.

COMMENT OF JANA CRAWFORD O'BRIEN

Date Submitted: Friday, May 18, 2012, 12:24 p.m.

City, State: Bradley Beach, NJ

Occupation: Certified Oncology Massage Therapist

Comment: Our current farming practices, with subsidies to giant Agribusinesses is NOT sustainable. Money and consideration need to be given to small/smaller famers who are producing good food in a chemical-free way that is safe for our bodies and the environment.

As with all the other large, subsidized businesses in this country, we are facing the prospect of a collapse of the system. This possible crisis needs to be address **Before** it's too late, not when we're in the middle of it.

COMMENT OF ROSALIND CREASY

Date Submitted: Friday, May 18, 2012, 7:08 p.m.

City, State: Los Altos, CA

Occupation: Landscape Designer, Food Writer

Comment: I am greatly concerned that the farm bill strongly favors the large producers of corn and soybeans. The small organic producers of fruits and vegetables need help, not agribusiness—especially all their subsidies. Small growers need fewer restrictions and if any subsidies are needed for agriculture, most certainly they should be given to them. The obesity problem is terrible and fruits and vegetables are a big part of the answer.

Thank you.

COMMENT OF TSANDI CREW

Date Submitted: Friday, May 18, 2012, 2:27 p.m.

City, State: Lake Bluff, IL

Occupation: Illustrator and Writer

Comment: I have a list of 71 scientific papers that prove the tragic and disastrous results of genetically engineered seeds in our country and around the world. It is criminal to subsidize this practice. It drives up the cost of health care and it is destroying other healthy crops and plants, and it is killing bees. Subsidize truly organically grown food.

COMMENT OF RHONDA CRIDER

Date Submitted: Friday, May 18, 2012, 12:00 p.m.

City, State: Calhoun, GA

Occupation: School Bus Driver

Comment: We need more help for the organic farmers. All the large companies are altering our food supply to the point it is no long fit for human consumption. You here every day on the news about the increase in diabetes and other illnesses and nobody seems to see that it is our food and water supply that could be triggering this. The organic farmers need support from the government. **Now!** Please support a bill that will allow the farmers to grow good, healthy food and also help to protect the environment and soil conservation!

COMMENT OF JUDY CRISCO

Date Submitted: Friday, May 18, 2012, 2:51 p.m.

City, State: Alamosa, CO

Occupation: Webmaster

Comment: In the face of the obesity epidemic, the diabetes epidemic and the health care crises in this country it is imperative that you make the connection to Farm Policy.

It is time to break free of the control of agribusiness and do what is right for the health (both physical and fiscal) of this country.

I demand that you make your policy decisions based on what is good for the citizens and not the corporations!

COMMENT OF STEVEN CROCK

Date Submitted: Wednesday, May 16, 2012, 9:37 p.m.

City, State: Manchester, MO

Occupation: Teacher

Comment: As stewards of the Earth, smart farming practices include conservation practices of soil and water. Please support and encourage this practice by restoring the link between taxpayer subsidies for crop insurance and conservation compliance protections. As Missouri is a top state for soil loss and borders the Mississippi River, it is essential to encourage and require responsible farming practices.

Sincerely,

STEVE CROCK.

COMMENT OF JOANNA CROCKER

Date Submitted: Friday, May 18, 2012, 1:32 p.m.

City, State: Seattle, WA

Occupation: Manager in Environmental Nonprofit

Comment: I was raised on a family farm that has always used organic practices. In order to hand our farm down to the next generation in good condition and keep it that way, we need policies that protect the environment, organics, and family farms.

COMMENT OF STAN CROFT

Date Submitted: Friday, May 18, 2012, 8:56 p.m.

City, State: Council Bluffs, IA

Occupation: Teacher

Comment: Please consider a farm bill that subsidizes food producers not producers of commodities. We have the opportunity to help build a farm economy based on the foods that we eat and are healthy with a farm bill that favors food. Corn and soybean producers can use the market to get a fair price, and right now a price that is more than fair. Please spend the money wisely.

COMMENT OF TERESE CRONIN

Date Submitted: Friday, May 18, 2012, 1:20 p.m.

City, State: San Francisco, CA

Occupation: Sales & Marketing

Comment: I think it is so important to get this bill right. We need great clean food in our stores. Enough of the sprays and other chemicals in our food. It is dangerous to the people who pick our foods and to us and our children and myself. I really do not know what it take to make Wash D.C. understand this. You should pull the Congressional Districts Rep. and see how many use organic products? Maybe it would be a surprise that so many do use organic product?

TERESE CRONIN.

COMMENTS OF JAMES CROSBY

Date Submitted: Friday, May 18, 2012, 4:56 p.m.

City, State: Eugene, OR

Occupation: Horticulture Student

Comment: I just wrote a moment ago regarding small farms and industrial hemp, but I also wanted to share that I think you should support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Date Submitted: May 18, 2012 4:55 p.m.

Comment: We need a fair farm bill. One that protects the small farmer over the big one, and that gives small farmers a chance to get ahead. Big farming operations are already "ahead", and now we need to give that opportunity to small farms. Also: Support legalized industrial hemp for farming. It has millions of uses, and can be made into fuel, fiber, food, and even plastic! It has many uses. Support small farming over big farming, and support industrial hemp agriculture!

COMMENT OF LYNN CROSS

Date Submitted: Friday, May 18, 2012, 6:05 p.m.

City, State: El Dorado Hills, CA

Occupation: Retired

Comment: I fully support Food Democracy's goals and ask you to give much more open-minded consideration to them. Cutting or eliminating food programs that benefit deserving people in order to provide subsidies to corporate farming is just shameful pandering to big money.

COMMENT OF SONDR A CROUCH

Date Submitted: Friday, May 18, 2012, 12:17 p.m.

City, State: Lambertville, NJ

Occupation: Retired

Comment: I live in a farming community. I see the day to day problems while I drive to the grocery store. I listen to the problems. How hard it is to find the money to start up Organic Farming . . . how profitable it is if you do start up. How the AgriCorps are squeezing out the farmers and like all corporations in this country trying to squeeze out the little guys. Why do the Legislators not support this bill? Well, do they buy groceries? Do they farm? Who cooks for them, either wives, or housekeepers. They do not live like we do, on the edge of everything, ready to fall off for any false move we make. They get plenty of perks in their lives . . . it is time for the 99% to get what we need. (Not what we deserve, they wouldn't vote for that . . . we only ask for what we need!) That should not take too much away from the 1%.

COMMENT OF DAN CROWLEY

Date Submitted: Friday, May 18, 2012, 2:25 p.m.

City, State: Gilbert, AZ

Occupation: Small Business Owner-Telecommunications

Comment: Too many times politicians don't bother to listen to the people. Instead they only hear the well funded lobbyist groups of corporate America. America belongs to the people **Not** the corporations.

COMMENT OF ERIN CRUMP

Date Submitted: Saturday, May 19, 2012, 9:28 p.m.

City, State: Blue Bell, PA

Occupation: Hydrogeologist

Comment: I would, like your farm bill to be good to the local farmer. Let the farmers grow and sell good, healthy food from their farms. Let them save seeds and not have to purchase them from large companies that are more about chemical spray and control than about individuality and taste. Let them practice organic growing so they don't need to dump oil-based fertilizers on the land. Hey, how about you subsidize tomatoes, carrots, greens, *etc.*, instead of corn and soy. Thanks.

COMMENT OF RUTH CRUMP

City, State: Silver Spring, MD

Occupation: Citizen

Comment: I think it is important to support small farm efforts rather than large agribusiness. Small farms will in the end provide food which requires less chemical management, less fossil fuel use, and less antibiotic use. They are also able to support more community development via interactions between producer and consumer, a healthy state for all.

COMMENT OF CONNIE CRUSHA

Date Submitted: Friday, May 18, 2012, 1:41 p.m.

City, State: El Cajon, CA

Occupation: Teacher

Comment: I've been teaching organic gardening for 30 years. I am horrified at the chemicalization and industrialization of farming in this country, and the concomitant environmental degradation. In addition I am appalled at the human costs of pesticide laden food products and tainted meats which are the result of our existing system.

We need to stop subsidizing factory farms and chemical agriculture and start spending money on organic practices to produce healthy foods for our people and the people of the world.

COMMENT OF CHRISTINE CRUTCHFIELD

Date Submitted: Friday, May 18, 2012, 2:08 p.m.

City, State: Easthampton, MA

Occupation: Professor

Comment: Obesity levels are at a new high, healthy food is out of many people's price ranges, and it's often difficult for the average consumer to know how food was processed or where it came from. This farm bill can help start a slow change. More and more people like myself are interested in sustainably-grown produce and meats from small farmers. I'm lucky to live in an area where this is easy to come by. Many

Americans aren't so lucky. Let's make it easier for the small farmer to be viable. Let's stop subsidizing corn and soy. Let's make it easier for the consumer to know how his/her food was grown. Eating should not be so complicated. Let's take the corporations out of it.

COMMENT OF JOHNNY CRUZ

Date Submitted: Friday, May 18, 2012, 3:59 p.m.

City, State: Hartford, CT

Comment: I feel that it will make my life harder than it already is because I live in Hartford where most residents are going through the SNAP for help. Imagine how this will affect everyone and their children. This will be catastrophic to everyone's well being! To whom this may concern!

COMMENT OF LILI CRYMES

Date Submitted: Thursday, May 10, 2012, 4:28 p.m.

City, State: Atlanta, GA

Occupation: Horticulture/Nonprofit

Comment: SNAP and WIC dollars are important both for the people who purchase food with them and for the grocery stores and farmers that are supported by them. While I applaud changes in the system that encourage better nutrition such as wholesome ware and the adjustments to WIC that allow greater flexibility in purchasing produce, cutting spending is not a healthy option. Further, I think it will cost the country more in future health care cost. Please don't bankrupt my future with poor choices about current spending.

COMMENT OF BRENDA CSENCISITS

Date Submitted: Friday, May 18, 2012, 2:19 p.m.

City, State: Saint Augustine, FL

Occupation: Retired

Comment: It's very important to me to be able to buy locally grown food (vegetables, eggs, meat) where farmers do things "the old fashioned way" meaning fewer (or no) pesticides, herbicides, hormones, *etc.* Please provide more support for the people who are willing to do the work to provide fresh, nutritious locally grown food.

COMMENT OF HELEN CU

Date Submitted: Wednesday, May 09, 2012, 5:10 p.m.

City, State: Brooklyn, NY

Occupation: Retired Accountant

Comment: We need a strong Farm bill to protect our farmers in producing affordable organic food for the good of the citizen of the United States especially the poor and senior citizens of this country. The government should help these farmers in fair competition from big agricultural corporations.

Thank you.

COMMENT OF PILIANA CUENOD

Date Submitted: Saturday, May 19, 2012, 4:46 a.m.

City, State: Kaunakakai, HI

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: We are growers following the permaculture principles and as such feel the need for a Bill that will honor the good, healthy, natural, nutritious ways of farming. That dogmatic, manic need to control the activities of farmers to suite the big businesses is so retarded and uncivilized. The big and strong undermining the freedom and activities of people should have been a thing passed with the dark ages.

Government should be honoring and helping all types of farming and that should be reelected in such a Bill.

COMMENT OF NANCY CUFFMAN

Date Submitted: Friday, May 18, 2012, 12:48 p.m.

City, State: El Cerrito, CA

Comment: I believe that healthy food is the start for the health of the nation. Small farm rather than corporate agriculture, organic food free from harmful chemical substances. This is what makes for healthy food. Not mass produced food and animals.

Thank you.

COMMENT OF ANNETTE CULLIPHER

Date Submitted: Friday, May 18, 2012, 2:37 p.m.

City, State: Balsam Grove, NC

Occupation: Citizen

Comment: I realize I am only one ordinary citizen. I am not a farmer, nor am I involved in the distribution of food products. I am just one person at the end of this production chain. I am not a lobbyist for the agriculture industry so I do not have the thousands/millions of dollars to line your coffers.

But I am the one who buys these products and feeds my family. I endeavor to support local sustainable farmers and I buy organic where possible. And I am very disturbed, and I am very angry that I cannot trust the products I buy because you and the others that make the decisions about our food production are in the pockets of the industry. An industry whose basic concern is not the health of the citizens who eat their products nor is there any concern for the health of this land nor is there any concern for the animals they are raising but only their bottom line. The corporate agribusiness has a stranglehold on our regulatory system and you, our political leaders.

U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of citizens, land and farmers' livelihoods and farm workers over the interests of industrial agriculture lobbyists. I would like to see:

- the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF VERNON CULLUM

Date Submitted: Saturday, May 19, 2012, 2:13 a.m.

City, State: Prescott Valley, AZ

Producer/Non-producer: Producer

Type: Poultry/poultry products

Size: Less than 50 acres

Comment: Corporations, especially agribusiness corporations have already proven themselves to be criminally irresponsible and untrustworthy in their practices from the pollution they produce to genetically modified mentality of playing God with our food stuffs—where profits trump all other concerns. Regardless of how food is produced, sustainability and the health of our soils and bodies must be priority one. Only practices which promote these priorities should be encapsulated in a farm bill. Technology has its place, but when it's use is corrupted by profits above all mentality, disaster is unavoidable, and those who suffer the most are many times those who are at the bottom of the economic food chain.

COMMENT OF MOLLY CULVER

Date Submitted: Friday, May 18, 2012, 9:20 a.m.

City, State: Brooklyn, NY

Producer/Non-producer: Producer

Type: Fruits, Greenhouse/nursery, Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: As a member of the Board of Farm School NYC, a new school for urban agriculture that strives to nurture beginning farmers through training in horticulture and food justice, I wanted to share that it is vital that programs like the Beginning Farmers and Ranchers is not cut. It should remain a fully funded piece of this upcoming farm bill, and should receive even more funding. Cutting funds to grow new farmers is the last thing we should be doing when we're facing an environmental crisis with unknown results. We currently do not grow enough vegetables and fruits in this country to provide every citizen with their recommended daily

servings. With the average age of America's farmer being over 50, we are in dire need of more young and energetic farmers who will grow the nutritious fresh food we all need to continue happy healthy and productive lives.

COMMENT OF BRIAN CUMMINGS

Date Submitted: Friday, May 18, 2012, 11:59 a.m.
City, State: Milwaukee, WI
Occupation: Computer Programmer
Comment: We deserve a farm bill that supports farmers that do not poison us with chemicals and GMOs. Please support organic farmers and small farmers.

COMMENT OF NANCY CUMMINGS

Date Submitted: Friday, May 18, 2012, 2:52 p.m.
City, State: Lakewood, CO
Occupation: Housewife
Comment: I want healthy food . . . I'm tired of "GMOs" in the food I eat, I don't believe it is healthy for any one. When I was raising my children, they ate fresh fruits and vegetables, they were happy and healthy. They got very good grades in school, and became productive citizens when they grew up. Now, as I grew my own food, they now grow theirs, and feed their children wholesome and healthy food. We demand Organic food! It does the body good!

COMMENT OF THOMAS CUMMINGS

Date Submitted: Friday, April 27, 2012, 6:24 p.m.
City, State: Merritt Island, FL
Occupation: Retired
Comment: Jesus very specifically tells us that we are going to be judged on how we treat the poor. See Mt 25:31ff. I hope you will vote in favor of full support for food programs for the poor.

COMMENT OF CAROLYN CUNNINGHAM

Date Submitted: Saturday, April 28, 2012, 1:47 p.m.
City, State: Chagrin Falls, OH
Occupation: Retired Manager
Comment: I volunteer for a rapid rejoicing program in Cleveland. I see firsthand the need for your continuing support of feeding programs that support children and low income families. Supporting the needs of vulnerable seniors is also important to me, as well. Thank you.
 CAROLYN CUNNINGHAM.

COMMENT OF GARY CUNNINGHAM

Date Submitted: Friday, May 18, 2012, 2:32 p.m.
City, State: Strawn, TX
Occupation: Potter and Organic Gardener
Comment: The regulatory stranglehold developing in this country is on the wrong track. Corporations need more regs and farmers need less. The very nature of a corporation dictates this. Cheap food is exactly that, cheap. Corporations exist to make money, products are a means. Farmers grow food and love the land and the work. It's not just about money to a farmer.

COMMENT OF JAMES CUNNINGHAM

Date Submitted: Saturday, May 19, 2012, 11:46 a.m.
City, State: San Francisco, CA
Occupation: Actor
Comment: U.S. Gov't support of farming must be revised to provide more support of organic, smaller farms and **Stop** subsidies to industrialized, GMO, and chemical-based farms.
 We are killing our soil! We are killing our future!
 How can anyone not see the devastating results of continuing in the present direction?
Please Support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding of conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

We Trust In The House Committee to create a farm bill which benefits the success of independent growers not the interests of **Big Ag**.

COMMENT OF PAUL CUNNINGHAM

Date Submitted: Wednesday, May 09, 2012, 3:34 p.m.

City, State: Galveston, TX

Occupation: Aviation

Comment: Protect Older Americans

Older Americans' struggles with hunger are often invisible. It's too easy for most people to overlook how many seniors have serious trouble accessing the food and nutrition they need to survive and thrive. Often, they are forced to make difficult decisions between food, medicine, or paying their utilities or rent.

As a nation, we owe a great deal to the generations that helped build this country—we simply cannot allow one of our most vulnerable populations to suffer in silence any longer.

I am urging Congress to pass a strong farm bill that protects programs like SNAP, TEFAP, and CSFP, which help provide food for millions of America's most vulnerable seniors.

Congress must ensure hunger-relief programs remain protected so that seniors who worked their entire lives continue to have access to these vital programs.

COMMENT OF SARAH CUNNINGHAM

Date Submitted: Tuesday, May 15, 2012, 1:34 p.m.

City, State: Corvallis, OR

Occupation: College Educator & Community Food Activist

Comment: I understand the need for fiscal responsibility, perhaps now more than ever, but as you consider the farm bill, please do not make cuts that would place the burden of fiscal responsibility upon the shoulders of the most vulnerable in our society, namely children and low-income people.

Thank you in advance for standing up for those who are least able to stand up for themselves.

COMMENT OF JERRY CUPP

Date Submitted: Saturday, May 19, 2012, 7:48 p.m.

City, State: Colorado City, CO

Occupation: Real Estate Broker

Comment: We are against Monsanto taking over any more of our farm land. Please help the family farms. Help the Organic farmers and punish the petrol-chemical farmers that are poisoning our land. Also, please be against carbon tax. Global warming is a myth, *i.e.*, it snowed on my daughter at sea level in Kodiak, Alaska last week. Maybe global cooling, huh?

COMMENT OF DARCIE CURLEY, R.N., B.S.N.

Date Submitted: Thursday, May 17, 2012, 5:49 p.m.

City, State: Golden, CO

Occupation: Nurse

Comment: Dear Sirs:

I and my family are passionate about healthy, naturally grown food that is grown sustainably, intelligently and with an eye toward non-damaging, organic and smart Earth practices. We enthusiastically support a small local organic farm as a delivery site, believing that local small farmers have the ability to sustain, nurture and benefit their surrounding communities. Small farmers should be at the heart of any farm bill written. I'd like to see support in all ways for them, and I'm tired of having tax bill money go to huge factory farms that are not sustaining local people.

I do not believe that tax subsidies should be going to vast concerns and giant companies, but rather to small farmers who enrich the lives of their communities, and

bring fresh, local, healthily and responsibly raised and grown food that does not have to be trucked across vast distances. Supporting local food revives local economies, real people, and the planet by reducing impact and carbon footprint.

Sincerely,

DARCIE CURLEY, R.N., B.S.N.

COMMENT OF BETH CURLIN

Date Submitted: Friday, May 18, 2012, 12:03 p.m.

City, State: Berea, KY

Occupation: Administrator, Writer, Gardener, Small Farm Owner

Comment: I am a buyer at local farmer's market and Wal-Mart or Kroger. I feel extremely strongly that our Ag policy should reflect support of healthy food production. My concern is in both the production of food which affects the quality of health for both workers and consumers—anyone who breathes fresh air or drinks water. The end product of food should be good health and nourishment, food without harmful chemicals or other additives. Agencies need to regulate and curb any activities that do not contribute to that and support organic agriculture making it more prevalent and possible. More healthy, and humane growing and slaughtering polices also need to be strengthened. Profits for big corporations should not be the end.

COMMENT OF CONSTANCE CURRIER

Date Submitted: Friday, May 18, 2012, 3:05 p.m.

City, State: Ithaca, NY

Occupation: Retired

Comment: Until the food supply in this country is healthy food the Health Care cost are going to increase to levels that cannot be met. Obesity, diabetes, heart problems, cancer, etc, etc will continue to increase as long as the representatives of the people pay more attention to corporate desires than they do to the welfare of the population. I think they think that their children, parents, spouses somehow are not part of the population and in this they are **Wrong**, their families will suffer along with all the rest of us.

COMMENT OF HARVEY CURRY

Date Submitted: Friday, April 27, 2012, 3:20 p.m.

City, State: Houston, TX

Occupation: Construction Project Mgr.

Comment: The SNAP program is needed during this recession and depressed unemployment. Kids are going without meals. You need to add appropriations for community based gardens.

COMMENT OF KATHY CURRY

Date Submitted: Friday, May 18, 2012, 1:37 p.m.

City, State: Kingston, WA

Producer/Non-producer: Producer

Type: Fruits, Vegetables

Size: Less than 50 acres

Comment: Most of the produce from our farm is tended by volunteers, and goes directly to food banks. We also have a demonstration crop in train to support donation to school cafeterias, but there are many detailed and expensive requirements to get that done.

In order to continue feeding the poor and working on providing healthy foods for our children, we need the support of organically-savvy programs. With additional land coming available, we need help for new farmers to bring it into production.

We have already made use of several of the programs in the following list (as provided by Seattle Tilth), and have rather depended on the others remaining available in our future planning:

- the Organic Research and Extension Initiative (OREI)
- the Local Foods, Farms and Jobs Act (H.R. 3286).
- the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- EQIP Organic Initiative
- Conservation Stewardship Program

Please continue these programs in their entirety. They are advantageous in the support of those in most need of help.

COMMENT OF LORI CURRY

Date Submitted: Friday, May 18, 2012, 4:29 p.m.

City, State: Leesburg, VA

Occupation: Chiropractor

Comment: As an holistic healthcare practitioner, I implore Congress to pass laws that are favorable to local/organic/sustainable farmers and farming. It is **Essential** to the future health of human beings on this planet. Big interests such as "Big-Food" and Agribusiness **Must** change the way in which they profit from processed foods, and small, organic farmers need to be able to make a decent living. Please do what is **Right**, and realize that voting against the small farmer will ultimately be the downfall of our health and the ecosystem.

COMMENT OF MARGARET CUSHING

Date Submitted: Friday, May 18, 2012, 9:13 a.m.

City, State: New York, NY

Occupation: Travel Agent Slow Food Member

Comment: We must encourage our farmers to keep producing for us. Through recent initiatives we have a wonderful selection at local organic markets and supermarkets and with all the campaigns about eating healthy and again obesity, we cannot do this without these efforts.

COMMENT OF ROBERT CUSHMAN

Date Submitted: Friday, May 18, 2012, 5:07 p.m.

City, State: Truckee, CA

Occupation: Retired

Comment: Dear Sirs

Please act to pass real farm policy that protects the health of our citizens, protects the livelihood of our farmers and farm workers over the interests of industrial agriculture mega business. Also, we need strong legislation that protect and supports organic and sustainable agriculture. Don't cut stamps to the needy while we continue to give huge farm subsidies (entitlements).

COMMENT OF JUSTIN CUTTER

Date Submitted: Friday, May 18, 2012, 3:08 p.m.

City, State: Fairfield, IA

Producer/Non-producer: Producer

Type: Greenhouse/nursery

Size: Less than 50 acres

Comment: Please support organic and sustainable farming programs. Right now our country's laws are made to support industrial ag giants who don't give a hoot about the livelihood of family farmers, the health of consumers, or the ability for the land to continue producing crops. They care only for short-term profits and pay lobbyists to protect that. Please support the American public and the American soil for generations to come by protecting, supporting, and expanding small-scale sustainable farming in the USA.

COMMENT OF KARIN CUTTER

Date Submitted: Friday, May 18, 2012, 11:46 p.m.

City, State: Merrimack, NH

Occupation: Police Officer

Comment: I support the Federal farm bill. I am a supporter of Ducks Unlimited and Delta Waterfowl. I travel to North Dakota every year for a hunting trip. The farmers in Kulm have asked me to offer support on this valuable program.

COMMENT OF TERE DAANE

Date Submitted: Sunday, May 20, 2012, 7:43 p.m.

City, State: Las Vegas, NV

Occupation: Retired

Comment: It is important for the future of this country to get away from all the chemicals and GMO's used in big ag. These chemicals and chemical fertilizers leech into the water we drink, cause cancer and bad health. The GMO's contaminate good healthy food that actually is sustainably, and locally grown. Please consider a good farm bill which supports local sustainably grown non-GMO food so families can support the food of America and eat healthy. Lets **Not** support big AG and continue to pollute the sky's, the water, the climate in general and the good organic food we have. Thanks so much.

COMMENT OF SARAH DAGG

Date Submitted: Sunday, May 20, 2012, 11:18 a.m.

City, State: Crosslake, MN

Occupation: Self-Employed

Comment: The USDA must create a farm bill which supports best practices in farming today, including conservation and organic agriculture. Organics is the fastest growing segment of the food market in the last decade and insures better quality food, better soil management and support of smaller local farms. USDA must stop it's support of large agribusiness which poisons workers, air, water, and soil with pesticides and herbicides, wastes and ruins top soil, and is dependent upon large quantities of fossil fuels. Thanks for taking action to preserve the health of the nation through enactment of a farm bill which protects people and resources rather than just agribusiness.

COMMENT OF ABBIE DAIGLE

Date Submitted: Sunday, May 13, 2012, 7:11 p.m.

City, State: Oak Park, IL

Occupation: Social Worker

Comment: I work with people every day who work really hard to find employment so they do not have to rely on SNAP but without it they go hungry as there are not soup kitchens within walking distance and many have no home in which to store food. People are already going hungry. Please do not make cuts for some of the most vulnerable and struggling members of our society. Thank you.

COMMENT OF JIM DAILEY

Date Submitted: Friday, March 16, 2012, 10:04 a.m.

City, State: Woburn, MA

Occupation: Occupational Therapist, Retired

Comment: The importance of passing a farm bill that transfers subsidies now going to Big, Giant, Agriculture corporations to small, family, organic farms is paramount and essential to the restoration of healthy, sustainable soil and the foods it produces.

COMMENT OF BARBARA AND JIM DALE

Date Submitted: Friday, May 18, 2012, 5:53 p.m.

City, State: Decorah, IA

Occupation: Retired

Comment: Here in far northeast Iowa (Winneshiek County) we have many successful small farmers who produce quality food of all types. We feel so fortunate to be able to access healthful nutritious vegetables, meats, dairy products, *etc.* It is important to us that their work be valued and encouraged as much as their neighbors who raise huge fields of commodity crops. Please include in the farm bill incentives and appropriate supports that correspond to the ones provided for large-scale farmers.

COMMENT OF KATHRYN DALENBERG

Date Submitted: Friday, May 18, 2012, 5:00 p.m.

City, State: Valley Head, AL

Occupation: Retired

Comment: I am opposed to **All** subsidies and insurance of any kind for **ALL** agriculture. The reality of farming needs to be reflected in a reality cost. The national debt is partly due to too many hand-outs to too many companies who are greedy rather than needy. **Stop** the insanity.

COMMENT OF LETA DALLY

Date Submitted: Friday, April 27, 2012, 1:07 p.m.

City, State: Chicago, IL

Occupation: Retired

Comment: After being laid off in 2008 and being unable to find work despite education and experience, I was forced to take reduced early SSA payments. I barely make ends meet and although my rent and utilities are over 60% of my income I receive only \$75 in SNAP benefits. This is hardly very much and if it is decreased I will suffer. I don't have a life. My life is staying at home, going to the store and doing house work. I do not eat out, I do not go to movies, I do not do any real socializing. What more am I suppose to give up so that the rich can live well and make more money? I can't find part-time work so I would like someone such as Rep. Ryan to tell me exactly what I am suppose to do or see if he would like to change places with me for a month.

COMMENT OF CATHLEEN DALMEIDA

Date Submitted: Friday, May 18, 2012, 3:20 p.m.

City, State: Coupeville, WA

Occupation: Energy and Carbon Manager

Comment: The food and Farm bill should focus on supporting food that improves the health of our people and our planet. Supporting a local food economy across the nation is important and all the components that go into it; support for small local farms, farmers who grow food people can eat/not animals, farmers markets, bringing this food into our schools, *etc.* Biodiversity is also critical. This comes with supporting local food economies.

COMMENT OF LYNN DALTON

Date Submitted: Friday, May 18, 2012, 12:06 p.m.
City, State: Pittsburgh, PA
Occupation: Food Service Worker
Comment: Please support healthy, organic, farms! Corporate/industrial farms are destroying our land, honey bees (which are needed for all natural crops), wildlife . . . our personal and environmental health! Please Don't let corporate profits continue to destroy our country . . . resist Monsanto!

COMMENT OF JUDITH DALY

Date Submitted: Sunday, May 20, 2012, 6:09 p.m.
City, State: Waterbury, VT
Occupation: Social Worker
Comment: Please do everything you can to support small scale farming that diversifies the landscape, keeps food closer to home, and gives small farms the chance to compete with and be economically viable with the big corporate farms. It is a great economy booster in small states and rural areas.

COMMENT OF KEVIN DAMIAN

Date Submitted: Sunday, May 13, 2012, 9:18 a.m.
City, State: Mechanicsville, VA
Producer/Non-producer: Producer
Type: Specialty Crops
Size: Less than 50 acres
Comment: Rep. Eric Cantor's campaign claims to want to help small business prosper. Family farms, not corporate farms, are small businesses. They supply better quality produce to consumers and are necessary to insure clean, healthy food for our families. The farm bill must help the family farms and small farms to compete with the larger corporate farms. Federal programs funded by the farm bill can do more to help the small farms if our leaders in Washington do what is necessary. The voters are tired of party politics you are there to serve us not the other way around. Big corporations are not people they cannot vote they only dump huge amounts of money into campaigns and for lobbyists to help them make even more money. America and the middle class are in trouble. The Tea Party members/supporters are out of touch, ignorant, racists and paranoid. They do not represent the majority of America. Congress and the Senate need to work with one another to solve the problems we are facing. Help us by passing a farm bill that will keep farms operating.

COMMENT OF LAUREN DAMMAN

Date Submitted: Friday, May 18, 2012, 3:01 p.m.
City, State: Minneapolis, MN

Comment: Keep our food supply and the environment safe for present and future generations. Cancer and major disease is on the rise! You can't spend your money if you are dead.

COMMENT OF KAT DANCER SCHWARTZ

Date Submitted: Friday, May 18, 2012, 7:36 p.m.
City, State: Hot Springs, AR
Occupation: Retired
Comment: As a very healthy 66 yr. old, I am healthy because I eat healthy . . . local, organic food is one of the best ways to stay this way. Subsidies to agri-corp businesses are such a waste, because they are not only rendering unhealthy products, but they are ruining the sacred land they corrupt. Profit is their only motive for what they do. there is **No** commitment to healthy products, the animals they "grow" are sicker and sicker (just as so many citizens are), foods are refined and unhealthy (oh, but they are cheaper than "real food") there is little thought on their executives minds as to what they are contributing to the future, whereas a farmer who loves the land and assists Nature in producing "good food" has a stake in how the future will judge his work. so many healthy problems stem from the food that so many Americans now eat, high fructose corn syrup happily invades a multitude of products which never had it even 20 yrs. ago, medical \$\$\$ and issues are spiraling out of control . . . solutions abound, but it with those who keep a sacred

trust with the land and the animals we are here to steward. For those of you Bible thumpers, shame on you for forgetting the parts of “God’s wisdom” when speaking on health and **Real** wealth . . . pick and choose at your own demise. Pink slime is only one of the awful things you and yours are eating.

Get your subsidies straight . . . support those farmers and producers who support health, humane practices in raising animals, and respect and integrity for the Earth and Her treasures . . . drop subsidies for Monsanto, Cargill, Tyson, and other de-spoilers and start subsidizing those farmers whose food you probably prefer to eat, whether you say so or not.

COMMENT OF JESSICA DANIELS

Date Submitted: Wednesday, May 02, 2012, 11:17 a.m.

Occupation: Student

Comment: Please protect the Supplemental Nutritional Assistance Program. The number of people depending on SNAP has increased by 60% from 2007 to 2010. I know that you are committed to our community’s food security and hunger reduction through your support for No Kid Hungry summer lunch program, and I want to express my support and urge you to keep SNAP strong because it provides year-round vital support for our community. SNAP is 80% of the farm bill budget and as such must demand significant political value and consideration. Since the purpose of SNAP is to supplement nutrition, improving health through adequate and accessible food, the farm bill should expand Farmers Market Nutrition Programs and Community Food Programs that work toward this goal and support our local food economy, environment, and initiative. Many critics claim that SNAP is a government “handout,” but not only is it a crucial aid program, it generates \$1.73 in economic activity per \$1 spent. Imagine how this could spur and support our local farms and economy if SNAP could be used at farmers markets and toward community food projects! I would like to see a farm bill that recognizes this value and supports it in full. I think this goes hand-in-hand with increasing funding for New Farmer Programs because the average farmer age is drastically increasing while Connecticut agricultural land disappears toward development, as well as market support for small- and medium-scale farmers. How can farmers in New London county compete in a market dominated by corporate control? The farm bill has the power to limit such corporate reign and refine subsidy support, to ensure that our farmers can feed our community healthy, affordable food. Thank you.

COMMENT OF M.A. DANIELS

Date Submitted: Sunday, May 13, 2012, 9:41 p.m.

City, State: Oak Park, IL

Occupation: Retired

Comment: Please, please do not approve the bill to cut SNAP. It is crucial for the well being of too many of our citizens who are facing a very difficult time. If something really needs cutting, then I suggest it be foreign aid or even congress’ salary/benefits. We voted you in to office to look out for us, but it seems we are always the only ones to suffer. My parents taught us that we should take care of home “first”. Don’t sacrifice what your “home” needs in favor of someone else.

COMMENT OF AMY DANIELSON

Date Submitted: Friday, May 18, 2012, 9:35 p.m.

Occupation: Student

Comment: Our food production system is the core of our nation. By bolstering sustainable practices now, we can invest in a prosperous and vital future for generations to come.

COMMENT OF TERI DANIELSON

Date Submitted: Friday, May 18, 2012, 9:54 a.m.

City, State: Gonvick, MN

Occupation: Nurse

Comment: Please continue to maintain and increase nutrition programs especially in the schools where most of the time that’s the only good meal they get during the day. Also continue to maintain the family farm—necessary part of the economy and society as a whole.

COMMENT OF L. RENEE DANKERLIN

Date Submitted: Thursday, May 17, 2012, 12:50 p.m.

City, State: Cambridge, MA

Occupation: Local and Regional Development Policy Planner

Comment: Sustainable agriculture and support for small food producers could be significantly strengthened were this objective to be achieved by incorporating diversity and inclusion promoting African-American, Latino and Asian participation in economic development through supplier diversity initiatives across sectors (*e.g.*, transportation, housing). These suppliers, including small farmers, could be attracted through Federal, state and local procurement processes. The strategic approach I propose can promote job creation and job growth along with healthy eating and life-styles, all of which can foster viable and sustainable communities. It could also foster STEM education and learning from the natural world.

Sincerely,

L. RENEE DANKERLIN.

COMMENT OF DEB DANNEMAN

Date Submitted: Thursday, May 10, 2012, 2:44 a.m.

City, State: Tucson, AZ

Occupation: Retired

Comment: Having retired from my state's welfare program that administered food stamps, I can tell you that the need in Pima County is dire. Cutting the food stamp program, as this bill suggests, is an invitation to future adults without the brain power to achieve self-sufficiency. Cutting FS to the disabled, who include our former military is a disgrace to their service to our country. Please continue to support our country's farmers so they can continue to feed not just my community, but every community in these United States.

COMMENT OF JANIS DAPPERT

Date Submitted: Friday, May 18, 2012, 1:32 p.m.

City, State: Winchester, IL

Occupation: Museum Coordinator

Comment: It's time to look at the process of growing food as the means to nourish not only ourselves but also our living planet. Each year tons of pesticides and herbicides are dumped on our farm fields to create a sterile barren ground on which to grow GE crops. Those crops are the basis of our food supply, and right now they are poison! The reason for so much cancer and other disease. It is time to come alive and reject the poisonous corporate agriculture, come back to the organic way of growing food that promotes real health and vitality for all of us on the planet.

COMMENT OF LINDA DARNALL

Date Submitted: Sunday, May 20, 2012, 6:05 p.m.

City, State: Sebastopol, CA

Occupation: Seamstress

Comment: I'd like to voice my support for Hemp farming in America. Recently, House Bill 286, which was struck down, would have created a process through which farmers could apply to grow hemp and then be vetted by state officials. If applicants passed a background check, they would pay a fee to be registered to grow hemp.

Hemp is a wonderful source of vegetable protein, and would improve our land and water because it uses less chemicals to produce than cotton. Also, The USDA Bulletin #404 concluded that hemp produces four times as much pulp with at least 4 to 7 times less pollution. . . . Hemp can also produce biofuel and ethanol (better than corn).

Thank you for allowing me to comment on this forum,

LINDA DARNALL.

COMMENT OF DEBRA DARNER-REDBURN

Date Submitted: Friday, May 11, 2012, 2:22 p.m.

City, State: Osawatomie, KS

Occupation: Accounting Clerk

Comment: I take care of many individuals with disabilities. Food Stamps are so important to these individuals who only receive SSI or SSDI incomes. After paying

all of their living expenses, personal care items, doctor dental and eye care costs, monthly obligations, targeted case management, transportation costs, haircuts, some activities, food stamps are considered income for all who receives assistance. If you take away their benefits they are less likely to be able to afford needed items, that we take for granite every day. We budget their money to the penny. The cost of groceries has went through the roof. But people with disabilities went without many cost of living raise for (4 years) the letters from SS stated there was not a cost of living increase, until this year. You have got to be kidding. Our government seems to be able to give help to countries and we are not taking care of our own people. I am at an outrage! Insurance Companies continue to sky rise where people in our country are insurance poor. Doctors will see you without insurance but the care is not as good as if they can bill for services. Americans are tired of receiving less and less. Disabled individuals are hurting the most and they are unseen people. Our Senator Brownback wants to pass managed care so the insurance companies can make a lot of money what does it do to our individuals care? I cannot see the top so called 3 insurance companies coming and taking care of them let alone a simple visit. They are like a guardian without having to complete their agreement of involvement with individuals. What more is our government and state representatives going to do to us? Let all government representatives live on 694.00 a month! Rent, utilities, groceries, transportation, personal care, doctor, dental, eye and pharmacy costs. This has to stop, **Stop Taking Away From Those Who Need It! Begin By Cutting Officials Making Changes To Their Incomes. Purchase Your Own Insurance, Groceries, Utilities, Medical, Do With A Car, Do Without Clothes, Go Without For Awhile, Step Into Our Shoes! See How Far You Get.** You will need a payee to manage your finances due to not being able to live within your means! Keep Food Stamps going for all who need them! Post this Print this get the word out!

COMMENT OF SUSAN DARROW

City, State: Woodstock, NY

Occupation: Craftsman, Artist

Comment: By legislating against the small farmer in favor of giant agribusiness, you could endanger our whole food system. History has proven monoculture of any species can lead to extinction of that species. Common sense leads to the conclusion that small independent growers promote multiple strains and protect our food supply, not to mention improve our economy. The benefits of organic farming is also uncontested, keeping regulation simple to aid the small farmer will never touch the power and over reach of big agribusiness, but their greediness to control the world's food supply could be the downfall of us all.

COMMENT OF RANJNA DAS

Date Submitted: Tuesday, May 15, 2012, 12:49 p.m.

City, State: Marlton, NJ

Occupation: Professional

Comment: Before you vote to eliminate funding which helps our poor obtain food, I'd like you to go a day without food. No one wants a handout but when it comes to food, it's a matter of survival.

COMMENT OF ALEGRA DASHIELLE

City, State: Oakland, CA

Occupation: Disabled

Comment: It is time to end subsidies to big agriculture. Instead, we should put our money in to supporting small sustainable farms, especially organic, and making healthy food affordable to everyone.

COMMENT OF RILEY DAVENPORT

Date Submitted: Friday, May 18, 2012, 12:08 p.m.

City, State: San Diego, CA

Occupation: Publisher

Comment: The farm bill should support all food farmers, not just large industrial farms. More support should be available to small family farms including very small organic farms that produce high quality food for citizens all over the country. We

need it to support healthy food for our citizens and sustainable farming practices for our planet. We need to help feed the less fortunate with healthy, fresh food (fruits and vegetables).

COMMENT OF SONI DAVIDOW

Date Submitted: Friday, May 18, 2012, 2:22 p.m.

City, State: Huntington Station, NY

Occupation: Social Worker

Comment: Please support sustainable and organic farming practices. It's better for the Earth, the animals, small struggling farmers and the health of Americans. It's about time congress stopped supporting the corporate interests of agriculture and do what's right for the majority.

COMMENT OF KRISTINA DAVIDSON

Date Submitted: Friday, May 18, 2012, 9:14 a.m.

City, State: Bend, OR

Comment: his has nothing to do with my opinion. I'm a U.S. citizen and one who is concerned about clean, healthy food and how it affects both our health and the health of the entire planet.

Please . . . stop GMO's, support bio-diversity and organic farming. This is a critical issue. We are what we eat. Want to solve the health care crisis? Pay attention to who is controlling the food, in every aspect—from seed to marketing. Thank you. A healthy America is a strong America. We can again lead the world—ethically and with compassion.

COMMENT OF SHEILAH DAVIDSON

Date Submitted: Friday, May 18, 2012, 1:12 p.m.

City, State: New York, NY

Occupation: Policy Program Manager, School Food FOCUS

Comment: School Food FOCUS, a program of Public Health Solutions, is a national collaborative that leverages the knowledge and procurement power of large school districts to make school meals nationwide more healthful, regionally sourced, and sustainably produced. FOCUS aims to transform food systems to support students' academic achievement and lifelong health, while directly benefiting farmers, regional economies, and the environment. We work most directly with school food service professionals and their district partners (outside organizations), currently in 33 large districts, representing over 4 million children. In recent years, School Food FOCUS and its stakeholders and allies have played key roles in developing and supporting policies and programs at USDA and via the Healthy, Hunger-Free Kids Act (CNR), that serve our mission? [I fully understanding that changes in supply chains serving large districts can benefit all districts.

The farm bill, like the CNR, provides a key opportunity to make changes that can transform school food systems. In fact, there is a history of changes in the farm bill leading to modifications in the CNR, and vice versa. For example, FOCUS allies introduced into farm bill debates the concept of allowing geographic preferences (GP) in school food procurement which was adopted in the 2002 Farm Bill. These groups also supported Farm to School programs in the 2004 CNR. The 2008 Farm Bill further supported GP, extending voluntary application by schools for GP to all child nutrition programs and included funds for fruit and vegetable snack programs, among other programs. Mandatory funding and improved language for Farm to School programs followed in the 2010 CNR bill.

The following policy recommendations were guided by and vetted with FOCUS stakeholders through many rounds of input and revision. The recommendations have been further refined through conversations with allies such as the National Sustainable Agriculture Coalition, the Community Food Security Coalition, the National Farm to School Network and the Rural Coalition. In short, they support a farm bill that increases access to whole and minimally processed foods for schools, and support for regional food hubs that address the unique needs of school food service. FOCUS also supports advocacy efforts of allied organizations that are aligned with our mission. These include food access issues for low-income communities, such as protecting full funding for the Supplemental Nutrition Assistance Program (SNAP), SNAP-Ed, the Community Food Programs (CFP) and the 2501 Outreach and Assistance Program for Socially Disadvantaged Farmers and Ranchers, all of which improve food access for low income communities.

Specific recommendations to support our priorities include:

- Amending Section 32 of the Act of August 24, 1935 to clarify that one purpose of the funds is to support local and regional agricultural market development.
- Reauthorizing programs, including those in Food and Nutrition Service, Rural Development, Agricultural Marketing Service, and National Institute for Food and Agriculture, that support local and regional school food supply chain improvement.
- Promoting collaboration, coordination and innovation among existing USDA programs, including those that provide technical and financial resources to farm to institution initiatives.
- Keeping the definition of “local” in the hands of local policy makers. Because living, integrated food and agricultural systems intersect with social, political and economic systems in many different ways, a Federal “one size fits all” definition of local is bound to be an uncomfortable, if not outright damaging, “fit” for many areas.

Thank you for the opportunity to submit these comments.

COMMENT OF MANNY DAVILA

Occupation: Business Owner

Comment: I support the small farmer and am against big companies. I will not support big companies that cut corners all the time. Do what is right and not what is profitable.

COMMENT OF ADRIANNE DAVIS

Date Submitted: Friday, May 18, 2012, 3:29 p.m.

City, State: Santa Barbara, CA

Occupation: Activist/Volunteer

Comment: Good Day,

Closely tied to urban farm (Fairview Gardens-Goleta) for 24 yrs. & on Brd. for 12. Family still farming since 1850 in Midwest.

Agriculture and its strong, ancillary partners in the U.S. are very largely in the wrong hands.

Rather than raising food for the good health of the nation and beyond these mega-companies are raising “food”, meats, produce and seeds that have little real food value and are in fact, harmful, causing sicknesses and putrefying the Earth and waters.

If we purchase their products, we are injecting hormones, antibiotics and toxins that have no business in our bodies or our environment.

And we give them money for it. That’s their simple goal.

Ethics has nothing to do with the dynamic.

We need to clean house and build trust with capable, honest and dedicated leaders, not with lobbyists doing the bidding for the food business cartels, poisoning the FDA and all those they touch, our public schools, for instance, supermarkets and restaurants for another.

We need to bring good, healthy food, raised sustainably to our tables on the broadest base.

We must stop raising sick people for the medical/pharmaceutical businesses to profit on in this chain of harm.

We must change our priorities here in this country and stop negatively affecting other countries with our malice of forethought. High profit has no healthy future for this planet but adds to the building syndromes of premature and agonizing death.

That is not the pretty picture I want everyone to enjoy but another where delicious and clean food is the best preventative medicine there is and one of the significant joys of life.

Thank you,

A.A. DAVIS,
California.

Date Submitted: Friday, May 18, 2012, 3:38 p.m.

City, State: Wilmington, DE

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: As a consumer and as a part-time farmer, I am very concerned that farm policy be fair to small farmers. Farm policy over the past few decades has been weighted in favor of very large industrial farms. We need a system in which consumers can get locally grown food, growers can get a fair price that doesn't depend on subsidies for a few favored crops, and we can improve our living environment by decreasing the amount of fossil fuels and toxic chemicals that we use. Also, please preserve nutrition assistance programs that are so necessary for families experiencing hard times.

COMMENT OF CAROLYN DAVIS

Date Submitted: Friday, May 18, 2012, 4:59 p.m.

City, State: Chattanooga, TN

Occupation: Landscaper

Comment: Please quit subsidizing American Simulated Food Products. Our nation is over budget and overweight. Let farms deal with supply and demand like **Some** other businesses do. If the citizens weren't giving their dollars to subsidies they would have more to spend on real food.

COMMENT OF D.J. DAVIS

Date Submitted: Friday, May 18, 2012, 5:14 p.m.

City, State: Cedar Falls, IA

Occupation: Retired Grant Writer

Comment: Connecting eligibility for crop insurance subsidies to conservation compliance is fiscally responsible and ensures public subsidies for farmers insurance premium payments align with the public's interest in basic conservation of our soil and water—and our wildlife and botanical diversity (which keeps our **Pollinators** alive and well).

COMMENT OF DIANA VERNE DAVIS

Comment: Please, we need **Real Food** more available at lower prices. Processed foods are at the heart of obesity, therefore heart disease, diabetes, cancer and many other medical problems.

COMMENT OF PATRICIA DAVIS

Date Submitted: Thursday, May 10, 2012, 2:05 p.m.
City, State: Tucson, AZ
Occupation: Retired
Comment: Please do not forget the thousands of people who depend on food programs to help them survive day to day, even in our great country, people are going without daily food, we need a strong farm bill.

COMMENT OF RIAN DAVIS

Date Submitted: Sunday, May 20, 2012, 4:14 p.m.

City, State: Evanston, IL

Occupation: Teacher

Comment: Food needs to be grown sustainably and in such a way that cares for the environment, the producers and the consumers. Giant agribusiness is not the way to go—it is not safe or healthy for the animals, crops or food producers, and it has had a devastating affect on our diet. We need to stay in balance with our health, our economy, and with the Earth, and that may be complicated but it is possible. The importance is too great and the cost is too high not to take better responsibility for producing safe, affordable, and healthy food that is available to all on a smaller scale.

COMMENT OF S.K. DAVIS

Date Submitted: Friday, May 18, 2012, 9:08 p.m.

City, State: Britol, CT

Occupation: Retired

Comment: Stop subsidizing factory farming. Give preferential tax and no-interest loan treatment to family farms and criminalize GMO seeds, crops and foods.

COMMENT OF TERRY DAVIS

Date Submitted: Friday, May 18, 2012, 10:13 p.m.

City, State: Albuquerque, NM

Occupation: Public Relations

Comment: Do **Not** take money out of the Food Stamp program while giving need-less subsidies to corporate farms. Keep organic crops truly organic and do **Not** give in to biologically engineered foods. Support people and their needs over corporations and their greed.

COMMENT OF RONALD G. DAVIS, PH.D.

Date Submitted: Sunday, May 20, 2012, 4:46 p.m.

City, State: San Francisco, CA

Occupation: Writer, Ph.D. Ecological Aesthetics

Comment: Organic food is healthier and should also be called ecological food. In that the production of healthy food without synthetic chemicals. inputs pesticides and toxic chems is healthy not only for the workers, that is those underpaid farm workers but also for the environment the ecology and the rest of us.

Pesticide'd agriculture and chemically treated foods is a danger to health of those consumers you might represent.

COMMENT OF CATHERINE DAVOL

Date Submitted: Saturday, May 19, 2012, 7:16 p.m.

City, State: Roseburg, OR

Occupation: Homemaker

Comment: Please continue to support organic farmers. Our health and future depend on it. Please do not cut funding from Organic farmers. When will the research be enough that conventional pesticides are destroying our planet, please stand up to Monsanto!

COMMENT OF SARAH DAVOL

Date Submitted: Friday, May 18, 2012, 11:35 p.m.

City, State: Teaneck, NJ

Occupation: Musician

Comment: Please support small time farmers and those who farm organically and who don't grow genetically modified produce. We need to keep this country healthy. This is so very important for the future of our country's food supply.

COMMENT OF DAAIYAH DAWAN-NEWBORN

Date Submitted: Friday, May 18, 2012, 9:19 a.m.

City, State: Little Rock, AR

Occupation: Business Owner

Comment: Health is the most important asset we can have. It's important to the survival of people to keep our food safe and free from the greed of some to line their pockets with money at the expense of present and future generations.

COMMENT OF HAZEL DAWKINS

Date Submitted: Friday, May 18, 2012, 1:35 p.m.

City, State: Greenfield, MA

Occupation: Editor, Writer

Comment: It is vital that we consider in appropriate ways our small farms. Their work is vital & they need our support. Remember, no farms, no food. I value the small farms in my area—please help them.

COMMENT OF NANCY DAWLEY

Date Submitted: Saturday, May 19, 2012, 8:09 p.m.

City, State: Cincinnati, OH

Occupation: Retired

Comment: Corporate hunger for “profits” should not take precedence in the farm bill over food for Americans. Subsidies should never be increased while food stamps are decreased. These subsidies are not being used to build jobs or food quality, rather the opposite.

I also support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding of conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Small farms create jobs, protect the land, provide more nutritious food. Provisions for helping these farmers' businesses should take precedence over money for large agribusinesses.

COMMENT OF SHELTON DAWN

Date Submitted: Friday, May 11, 2012, 9:15 p.m.

City, State: Luther, OK

Occupation: Fledgling Farmer

Comment: Please listen to family farms who are real people trying to provide our neighbors with safe real food. The corporate interests have had control too long, and the health of Americans has suffered.

We demand a **Fair** farm bill that levels the playing field for small and family farmers.

Sustainability and environmental stewardship are important to small and family farms. We farm where we live, eat and make a living. Please use **Common Sense** . . . we don't have millions to give your campaign coffers, but we are watching and concerned, and want to help you. Please don't ignore us.

COMMENT OF LORENZO DAWSON

Date Submitted: Saturday, May 19, 2012, 6:33 p.m.

City, State: Roanoke, VA

Occupation: Real Estate

Comment: I strongly oppose GMO's and all Monsanto strong-arm tactics to control our food supply. I oppose subsidies to grow certain crops like soybeans and all other Monsanto GMO crops. Please set our country free from the awful course of food production we are on now.

COMMENT OF HANNAH DAY

Date Submitted: Friday, May 18, 2012, 10:37 a.m.

City, State: Petaluma, CA

Occupation: Student

Comment: Our planet, our health system, our people, can no longer support a food system that renders land-raping crops cheap to produce, and therefore cheap

to consume. The costs are hidden, but they are there, and will make themselves apparent soon enough, when our soils can no longer produce the cash crops, and when the current generation is laid to rest before its parents.

COMMENT OF KAREN DAY

Date Submitted: Wednesday, May 16, 2012, 11:51 a.m.

City, State: Floyd, VA

Occupation: Community Organizer

Comment: I want a farm bill that makes healthy food widely available for all people. Please preserve food stamp benefits and availability. In our county more and more people need food stamps. Our non-profit group makes fresh food available to all our neighbors because there is a great need. If the farm bill is really helping small farmers more fresh food will be available locally. YES beginning farmer and rancher program, **No** Conservation Program **Cuts**. Let's make the farm bill good for **All** not just industrial farmers.

COMMENT OF LIZ DAYVIE

Date Submitted: Saturday, May 19, 2012, 6:27 p.m.

City, State: Hicksville, NY

Occupation: Diagnostic Medical Sonographer

Comment: I have nothing to gain from the field of agriculture or agribusiness other than the effects it has on the human body and on the environment. The agricultural policy of this country has been terribly handled over the past century and needs to be reformed.

Not only are our politicians out of touch with the values of the American people, but corporate agribusiness has a stranglehold on our regulatory system and our political leaders.

While Congress is looking to get rid of direct payments to commodity farmers, the subsidized insurance program it proposes to replace it with will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk.

I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

I support fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

I support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

I support maintaining the EQIP Organic Initiative.

I hope you do the right thing for my fellow citizens, the environment and generations to come. Change must start somewhere. Why not now?

COMMENT OF WILLIAM DAZEY

Date Submitted: Friday, May 18, 2012, 8:20 a.m.

City, State: Houston, TX

Occupation: Busboy

Comment: I believe that organic is the only sustainable way of living. Synthetic chemicals and genetically modified organisms are detrimental to the ecosystem and the future of all beings here on Earth. If one ponders over the future it is obvious that organic is the only sustainable way to continue the human race.

COMMENT OF NATALIA DE CUBA

Date Submitted: Friday, May 18, 2012, 4:33 p.m.

City, State: Massapequa Park, NY

Occupation: Lecturer and Writer

Comment: Dear Representatives,

As a voter, a consumer and parent, I would like to see real reform on the way we produce food for human and animal consumption. I buy organic and local when available and affordable and grow food in my garden. I would like to see a system in which real, healthy food is readily available for all American citizens and which nurtures and sustains our soil and environment, as well as small business (*i.e.*, the small farmer, the small market). Currently, we are subsidizing—at great cost—too few and too large farms which use too many chemicals to grow a set of crops that is too homogeneous. Let's get this right please!

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you.

NATALIA DE CUBA.

COMMENT OF BEATRIX DE GREVE

Date Submitted: Friday, May 18, 2012, 12:40 p.m.

City, State: Milford, OH

Occupation: Retired

Comment: We need **Real** reform, not cutting off funds for conservation and organic food. There's **No** need to "please" the Agribusiness. Because they don't give a hoot what happens to the people.

COMMENT OF HALEY DE KORNE

Date Submitted: Sunday, May 20, 2012, 8:47 p.m.

City, State: Philadelphia, PA

Occupation: Education Consultant/Curriculum Developer

Comment: I am writing to express my concern that the farm bill needs to be amended to provide the greatest good to the greatest number—in other words it needs to stop subsidizing large industrial agribusinesses, and provide meaningful support to small and medium farms and operations, and new initiatives. Locally-produced food has numerous benefits for the economy, for consumers, and for the long-term well-being of our country through avoiding the environmental degradation (erosion, mineral depletion, pesticide build-up, *etc.*) and health risks (tainted products, hormone & pesticide infiltration of watersheds, *etc.*) that industrial agriculture inflicts. As a young professional in an un-related field (education), this issue is significant to me because I want to establish my home and career in a country where I can obtain quality food products and trust the food that is sold in our stores. At the moment, that is not always the case here. Please support the Local Foods, Farms and Jobs Act (H.R. 3286), as well as maintaining funding for conservation and organic initiatives. Food is an essential part of quality of life, and the U.S. is behind in this area. The U.S. needs to catch up to other OECD countries that have higher quality control and labeling standards, and that have maintained more functional local food economies through supporting small-scale farmers and preventing industrial agribusinesses from monopolizing the market.

Thank you for considering my concerns, and I hope that in the future the farm bill will help to build a more equitable and healthy America.

COMMENT OF CAROLYN DE LORENZO

Date Submitted: Friday, May 18, 2012, 7:16 p.m.

City, State: Portland, OR

Occupation: Student

Comment: It is time to adopt agricultural policy that reflects the importance of putting the health of individuals, animals and our environment above the interests of big agriculture. I am one among many who is fed up with corrupt and abusive agricultural practices. Policy should reflect the will of the people, not big business.

COMMENT OF FRANCO DE NICOLA

Date Submitted: Friday, May 18, 2012, 10:31 p.m.

City, State: Pittsford, NY

Comment: Subsidies for commercial farming and the chemical industry need to be cut with those funds going to and being granted to organic farmers to bring about a rebirth in local family farming with sustainable practices that also don't add to the costs of health insurance in this country from the billions of pounds of toxins and GMO nonsense that the commercial farming industry uses annually. It's time to stop the for profit nonsense no matter who it hurts in this country. Are you lis-

tening Congressman Reed, or are have you totally sold out to the lobbyists and Tea party. I think, Mr. Reed, you are confused about who you are supposed to be representing!

COMMENT OF ELIZABETH DE SA

Date Submitted: Saturday, May 19, 2012, 4:55 p.m.

City, State: Nevada City, CA

Occupation: Teacher

Comment:

- label food containing GMOs
- stop subsidizing agro-businesses
- subsidize organic and local farmers

COMMENT OF MARGARET DE WYS

Date Submitted: Friday, May 18, 2012, 11:49 a.m.

City, State: Rhinecliff, NY

Occupation: Teacher

Comment: I'm all for family, local, and organic farmers. I want my government to support them. Do not keep funding big Ag. The food they bring to the American people is poisonous.

Sincerely,

MARGARET DE WYS.

COMMENT OF LINDA DEACON

Date Submitted: Friday, May 18, 2012, 10:02 a.m.

City, State: Los Angeles, CA

Occupation: Statistician

Comment: We need all the support possible for sustainable, meaning organic, farming practices and for small scale family farms. We must move away from non-sustainable agribusiness practices which are destroying our precious resources.

COMMENT OF JEFF DEAN

Date Submitted: Friday, May 18, 2012, 12:01 p.m.

City, State: Homer, AK

Comment: End subsidies and support for polluting, factory based, GMO and chemical farming. There is no place in goodness for these. Shift all support to small local organic food production. Do this immediately with no remorse or bowing to political and money pressure from big business interests. Absolutely!

COMMENT OF JOANNE DEAN

Date Submitted: Friday, May 18, 2012, 9:31 a.m.

City, State: Fremont, CA

Occupation: Retired

Comment: The next farm bill needs to quit subsidizing the big producers who are making us sick with their GMOs and factory farm animals. This is so wrong on so many levels, unhealthy produce and animals, environmental problems, contamination of our water, the list could go on and on.

If any is to be done then support our small farms that are trying to produce the food that is good for us instead of trying to get rid of them with your over regulations.

COMMENT OF JEFFREY DEARBORN

Date Submitted: Saturday, May 19, 2012, 8:28 p.m.

City, State: The Dalles, OR

Producer/Non-producer: Producer

Type: Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: I believe your/our 2012 Farm Bill needs strict accountability. The waste I've seen in the past is appalling. Make sure the farm bill makes sense to an educated High School Senior. If it doesn't make financial sense to them, change it. These programs that read like a mission to the moon end up making work for government workers without any benefit to the small farmer. If you keep it simple,

it will work. If you make it complex and it takes me 2 weeks to figure out if my farm qualifies then you have failed. I'd like to see Congress succeed. Please.

COMMENT OF ELISA DEBOER

Date Submitted: Sunday, May 20, 2012, 2:29 p.m.

City, State: Ballwin, MO

Occupation: Homemaker

Comment: Any farm bill must serve the interests of consumers, family farms and sustainable agriculture over the interests of corporate agribusiness and their profits. In addition, we should not be subsidizing unhealthy foods like high fructose corn syrup, which have been shown to be devastating to our national health.

COMMENT OF MARIA DECABOOTER

Date Submitted: Tuesday, May 15, 2012, 1:00 p.m.

City, State: Tucson, AZ

Occupation: Advocacy Specialist at Girl Scouts of Southern Arizona

Comment: A \$36 million cut to SNAP is not the way to go. The Committee should focus on writing a farm bill that creates economic opportunity and improves access to healthy, affordable food for all Americans.

CFSC members had important wins in the Senate's Agriculture Reform, Food and Jobs Act and the

House Agriculture Committee should include them in their bill.

- Community Food Projects Program—\$10 million per year to help communities build food self-reliance.
- Farmers Market and Local Food Promotion Program—\$20 million per year to develop farmers market capacity and create food hubs to connect farmers with schools, hospitals, grocery stores and other markets.
- Hunger-Free Community Incentive Grants—An average of \$20 million per year for a new SNAP local fruit and vegetable incentive grant program at farmers markets and other healthy food retailers.
- Outreach and Technical Assistance for Socially Disadvantaged Farmers and Ranchers Program (Section 2501)—The Senate bill includes only \$5 million per year for this program, less than ½ the funding level in the 2008 Farm Bill.

COMMENT OF DIANA DECASTRO

Date Submitted: Saturday, May 19, 2012, 6:52 a.m.

City, State: San Jose, CA

Occupation: Homemaker

Comment: I am sick of big corporations like Monsanto influencing agricultural policies.

Please stop allowing Monsanto, Kraft, Archer Daniel Mills, and Nestlé from expanding and getting a tighter control on our food supply.

I want organic food that contains zero GMO and additives in my food.

I want accountability when I buy beef. Stop allowing beef to be a mix from different countries. If beef/meat is tainted we need to be able to trace its place of origin.

I am also appalled at what "food" is given to the Native American Indian reservations. If you would never dream of serving it for a luncheon for congress members then why are you dumping that chemical crap on them?

We the people need real 100% food.

I don't want scientific modifications.

I want real produce that has seeds that people can utilize freely.

COMMENT OF VALDA DEDIEU

Date Submitted: Friday, May 18, 2012, 12:55 p.m.

City, State: Miami Beach, FL

Occupation: Author, Poet, Inventor

Comment: A strong America is only as healthy as its people. Health is wealth. Health affects us in every way, materially, physically, spiritually, and begins with what we put in our bodies. Let's take a step forward with the Healthy Farm Bill and keep up with other developed nations, instead of becoming last in the world in health, education, and ergo, wealth.

COMMENT OF DARLA DEEDS

Date Submitted: Thursday, May 17, 2012, 10:04 p.m.

City, State: Bird City, KS

Producer/Non-producer: Producer

Type: Field Crops

Size: 1,000+ acres

Comment: Please support organic farming and its organizations. This is healthy and what the consumers are demanding. This is the future of farming, because the population is not going to buy any GMO or chemically treated produce or grains. This is taking off and it will be much easier to get behind this move.

COMMENT OF ELANORA DEEMS

Date Submitted: Tuesday, May 01, 2012, 4:07 p.m.

City, State: Winterville, NC

Occupation: Dir. of the Ministries of the Bread of Life

Comment: It is of the utmost urgency that the Food Stamp program for the elderly & needy not be cut. **NC Is Experiencing A Very Difficult Time & This Cut Back Would Cause A Hardship On These Beyond Belief!**

ELANORA (BETTY) DEEMS.

COMMENT OF KARA DEEN

Date Submitted: Friday, May 18, 2012, 2:12 p.m.

City, State: Citrus Heights, CA

Occupation: Shop Manager

Comment: Consumers like me want food that is healthy for our families, the environment, and the economy. That means I support organic and sustainable agriculture, **Not** corporate agribusiness.

It's time to stop catering to what factory "farms" and companies like Monsanto want, and listen to the people who are suffering while agribusiness gets rich.

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I urge you to implement a **Healthy** farm bill now!

COMMENT OF ANGELA DEFELICE

Date Submitted: Sunday, May 20, 2012, 11:03 p.m.

City, State: Hopewell Junction, NY

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. I am 30 years old and am the first in my generation to return to agriculture, after my grandparents' dairy closed in the 1950's. I currently manage 8 acres of mixed vegetables, serving a 200 member CSA. We have 3 hoop houses, an energy efficient greenhouse, and are looking to expand the operation. The land that I farm on is not my own. It was recently purchased (by a non-farmer) for an astronomical price that no farmer, young or old, could afford. While I am grateful for the opportunity to make a living while farming, I (and many young farmers in my position) are not able to afford land and are unable to build equity in the land that we work. Land prices are rising every year, and every year owning my own farm is more out of reach for me.

Conservation easements are needed in order to make land more affordable, and allow farmers a secure future for their business and their families. Individual Development Accounts and more accessible loans for new farmers will also be critical for me as I look to start my own farm. As a young farmer ATTRA and SARE have been an invaluable resource. They are the first two sites that I search with questions

about fertility, greenhouse production, post harvest handling . . . really anything. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill. Please, support me and other young farmers as we work towards a more sustainable agriculture.

Sincerely,

ANGELA DEFELICE.

COMMENT OF CARLY DEFILIPPO

Date Submitted: Friday, May 18, 2012, 10:00 a.m.

City, State: New York, NY

Occupation: Writing/Editing

Comment: End the subsidies that support junk food and big agriculture over local family farms. These subsidies are the funds that contribute to obesity and illness—and will lead to future, insurmountable deficits in healthcare.

COMMENT OF NADINE DEIF

Date Submitted: Friday, May 18, 2012, 8:54 p.m.

City, State: Isle of Palms, SC

Occupation: Unemployed

Comment: Should end all farm subsidies as they only benefit large corporate agri-producers. The farm bill works against small SC farmers and should end. Plus, why should tax payers subsidize large agricultural corporations, especially at the expense of small local farmers or smaller organic farmers?

SUBMITTED STATEMENT BY JOE DEL BOSQUE, PRODUCER, FIREBAUGH, CA

Congressman Costa and Congressman Cardoza, thank you for inviting me to participate on this forum.

Good morning, my name is Joe Del Bosque. I'm a farmer from Firebaugh, California. My farm is a medium-sized, but fairly representative of San Joaquin Valley agriculture. We grow cantaloupes, organic cantaloupes, almonds, asparagus, cherries, and processing tomatoes. My farm is irrigated with water from the Central Valley Project. Our products are sold across the country and around the world. We contribute to the economy of our state and country, create jobs, and help balance our trade deficit.

The biggest issue facing our Valley is arguably water reliability, or rather lack of. While most farmers such as myself attempt to ensure water for our permanent crops, our annual crops such as melons need to be protected as well. We cannot cut back on our melon program because we stand to lose market share and our labor.

Like the hundreds of other specialty crops that make up California agriculture, melons have specific environmental preferences. There is no place like the Westside for melons. Water reliability is crucial to the survival of the specialty crops that drive our agricultural economic engine.

Labor is as important to the fresh fruit and vegetable industry as land and water. Without labor we cannot harvest most of these crops. We have been fortunate to have a supply of labor, but that source is dwindling, and immigration policies are impacting our availability. Because of the seasonality of our labor demands, we need to structure programs that would benefit our farms, our workers, and our country. Funds and programs to help improve farmworker health and safety.

Food safety is an issue that has become of monumental importance for the fresh fruit and vegetable industry. Our industry has long practiced good food safety policies, but even though California has never experienced a foodborne illness outbreak, we have seen that what happens in another part of the country can devastate our industry. California melon growers and other produce growers have taken a leadership role in improving science-based food safety policies and good agricultural practices. We need government to work with us as a partner.

The Center for Produce Safety is one of those programs where farmers are being proactive.

COMMENT OF MICHAEL DEL GROSSO

Date Submitted: Sunday, May 20, 2012, 8:13 a.m.

City, State: Pittsburgh, PA

Occupation: Mechanic

Comment: While I am not a farmer I whole heartedly wish that something be done to keep local, small, and family operated farms and orchards from collapsing into the past. My government should be watching as these owners are selling, or leasing parts of their land to oil and gas companies just to maintain some of their crops. This can possibly lead to contamination of the food and land. With the human disease side effects and sicknesses that have yet to rear their heads in the early stages of the farmer "compromise" for the use of the land. Please keep the bill as it was meant to be.

COMMENT OF ISAAC DELAMATRE

Date Submitted: Friday, May 18, 2012, 10:50 a.m.

City, State: Yellow Springs, OH

Occupation: Chef

Comment: I would rather we had no farm bill and let fair be fair, but if you must, please support small growers as well as large to boost small local economies, create community food independence and encourage small scale entrepreneurship.

COMMENT OF MAUREEN DELANEY

Date Submitted: Thursday, May 10, 2012, 9:09 p.m.

City, State: Oak Park, IL

Occupation: Stay-at-Home Mom

Comment: I volunteer at our local food pantry 2x a month, and have witnessed firsthand how many people are hungry. Receiving SNAP funds at the current level of funding is insufficient for most families. They end up coming to the food pantry, too, because their SNAP dollars don't stretch too far. Please do not cut SNAP funding.

COMMENT OF VALERIE DELAR

Date Submitted: Friday, May 18, 2012, 8:20 p.m.

City, State: Tucson, AZ

Occupation: Speech-Language Therapist and EEG Neurotherapist

Comment: The children I work with increasingly have allergies and sensitivities to foods and or chemical substances. We need to strengthen our support of truly organic producers and small farms who are focusing on sustainable practices for the health of future generations.

COMMENT OF STEVE DELGADILLO

Date Submitted: Wednesday, May 09, 2012, 4:30 p.m.

City, State: Santa Ana, CA

Occupation: Community Advocate

Comment: Please continue to support the needs of older populations with this bill. By Protecting Older Americans you help maintain the safety net needed for their well being. Thank you.

STEVE DELGADILLO.

COMMENT OF DRU ANN DELGADO

Date Submitted: Thursday, May 17, 2012, 12:09 p.m.

City, State: Munhall, PA

Occupation: Administrator

Comment: We need to do all we can to protect American farmers—they are a vital part of our national system. The U.S. needs to be more self-sufficient and rely less on products from overseas.

COMMENT OF VICTOR DELGADO, JR.

Date Submitted: Thursday, May 17, 2012, 12:09 p.m.

City, State: El Paso, TX

Occupation: Retired

Comment: For the economic and health reasons, it is extremely important that we get a handle in our farm policies which impact an array of vital issues for the well being of all of the our citizens.

COMMENT OF E. DELL

Date Submitted: Thursday, May 17, 2012, 10:25 a.m.

City, State: Stevensville, MD

Occupation: Self-Employed Caregiver

Comment: Statistics indicate that our senior population will increase dramatically. While I do not wish to see another entitlement program, I see a need to consider the senior population when identifying food bank needs.

COMMENT OF KENNETH DELONG

Date Submitted: Saturday, May 19, 2012, 7:36 p.m.

City, State: Pleasanton, CA

Occupation: Software Engineer

Comment: Consumers and constituents are increasing nervous about the large, centralized and industrialized food system. More and more are opting out with their wallets and their votes.

The new farm bill must recognize this. Instead of subsidizing corn and soy, which has led to an epidemic of obesity, diabetes, and allergy, we need to shift the focus to supporting small, local, community-oriented artisanal producers. The bill must realize the unique challenges these producers face. It must also realize that they do not pose wide-scale health risks (a farm that sells to 30 people cannot poison millions, unlike our CAFO-based system).

A food system augmented by a dense network of local, small-scale, organic, artisanal producers would be good for our health, our economy, our communities, our children, and our nation. The new farm bill should support the expansion of this system.

COMMENT OF KATHLEEN DELOREY

Date Submitted: Wednesday, May 09, 2012, 11:32 p.m.

City, State: Whitmore Lake, MI

Occupation: Retired Ironworker

Comment: What a shame it is to have worked so hard all your life only to realize in your retirement yrs. such basic things as food medicine and shelter has to be decided about each month, what can I pay this month, do I eat or pay bills? We **Need A Strong Farm Bill** that will protect our needy Americans, from our babies to our seniors. It's time to help feed our own country and keep it strong for our future and for our children. What a disgrace to our country that we can feed and clothe other foreign lands and not our own people, we need our food programs like SNAP, TEFAP & CSFP saved or a new program started, we are very capable of growing enough food for our country so I really don't see why we should be having this problem at all, unless some large farms were paid not to grow corn, soybeans, wheat, *etc.* there needs to be a fair farm policy bill brought to the table that can actually

help our vulnerable seniors and other struggling Americans in this terrible economic time to have access to healthy, nutritious food and not wonder where their next meal is coming from.

Thank You.

COMMENT OF ANN DELORGE

Date Submitted: Friday, May 18, 2012, 3:48 p.m.

City, State: Augusta, GA

Occupation: Self-Employed

Comment: I believe we need to encourage many neighborhood organic gardens to provide healthy, affordable food for neighborhoods of all types. Monsanto and Bayer and whoever they are paying off in Congress are killing necessary insects and disrupting Nature's balance with their greed. This will go up the food chain to eventually destroy the only planet we happen to live on. (Contrary to my opinion, I hear that congressmen are humans, too) and are also eating poison.

COMMENT OF CAROL DELROSSO

Date Submitted: Friday, May 18, 2012, 2:26 p.m.

City, State: Mannington, WV

Occupation: Florist and Home Gardener

Comment: Dear Sirs:

I am very concerned about the health of this nation and its people. We must change the whole structure of the way we produce food. The model is extremely flawed and is choking the life out of every living thing on this planet. We must get back to organic farming practices and encourage polyculture instead of monoculture. It can be done. The perfect model is Polyface Farm in Swoope, Va. Please investigate this farm and the ingenious way he makes the animals work for him. We must encourage farmers to let the animals back on the land to graze and replenish the soils. We must encourage each individual to do his part to keep this Earth nourished and healthy. Our lives literally depend on revamping farming into the organic model instead of the industrialized model.

Thank you,

CAROL DELROSSO.

COMMENT OF JULIE DEMAGGIO

Date Submitted: Wednesday, May 16, 2012, 1:19 a.m.

City, State: Chico, CA

Occupation: Butte College Instructor

Comment:

1. I want the food I consume sustainable grown—meaning **No** GMO seeds, **No** pesticides, and soil conservation farming methods.
2. I demand healthy (organically grown, minimally processed) food available in my children's school.
3. I want small, sustainable producers protected and allowed to produce—*i.e.*, raw milk dairy farmers, and local farmer's market growers.

Thank you.

COMMENT OF DARLENE DEMETRI

Date Submitted: Friday, May 18, 2012, 12:15 p.m.

City, State: Goshen, CT

Occupation: Writer

Comment: It is my belief that Congress, the Executive Branch and Supreme Court are making themselves obsolete in terms of working for the general welfare of the **People** who pay the taxes. The horrific **Farm Bill** is no longer useful and no longer responsive to our needs. I'm sick of agribusiness getting everything and am disgusted at the Obama Administration's support of GMOs and Monsanto that is out to poison us and destroy our natural resources. Enough is enough. For once, radically overhaul the farm bill to truly serve the people and have the best interests of the planet in mind.

Therefore, I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.
- The Food Stamp Program.

What Congress does on this will either further seal its fate as being the most radical, ridiculous and **Useless** institution we have in the government or it could improve its image in the people's eyes. Considering that the Radical Republicans and fascist corporations seem to be in control of this issue and pretty much everything of late, I do not harbor much hope that there will be progressive change and solutions.

But, that will only continue to reinforce in people's minds here in the U.S. and worldwide—that the current system that we have been brainwashed into believing is the only way (plutocracy, capitalism, government control based on money, **Faux** democracy, *etc.*)—is no longer working.

Although I am pleased with what my Democratic congressman in the House is doing, there are such few good one like him in the Congress to make a real difference.

JOINT COMMENT OF CAROL DEMI AND LAURA LUPOVITZ

Date Submitted: Thursday, April 19, 2012, 10:18 a.m.

Names: Carol Demi and Laura Lupovitz

City, State: Salisbury, NC; Greensburg, PA.

Occupations: Corporate Relations Manager United Way of Allegheny County; Research

Comment: Feeding our neighbors is a public-private partnership. I am doing my part by supporting my local food bank, and I want our government to do its part.

Cutting anti-hunger programs will increase hunger in America, as well as the associated health care, educational, and economic costs of food insecurity and poor nutrition. To put it simply, hungry people cannot be productive.

Please remember the families who are struggling in our community, and protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization.

COMMENT OF LINDA DEMING

Date Submitted: Saturday, May 19, 2012, 7:58 a.m.

City, State: Jacksonville, FL

Comment: Please Do not let Organic Food growers down. I struggle to purchase foods not contaminated with GMO and pesticides and more. Being chronically ill and in a wheelchair makes money very tight. All we can do, to support farmers trying to provide "clean" food for people who suffer from illness disease and allergies, needs to be done now. Small farmers need to be supported by all the people and you.

COMMENT OF CHARLE DEMO

Date Submitted: Thursday, May 17, 2012, 4:34 p.m.

City, State: Prineville, OR

Occupation: Sustainable Building Advisor

Comment: Growing and producing Hemp to manufacture over 1,000 products including food, building material, biodegradable plastics and sustainable fuel. End subsidies for ethanol corn since it is carbon positive.

COMMENT OF GARY DEMURIA

Date Submitted: Friday, May 18, 2012, 1:49 p.m.

City, State: Oneco, CT

Producer/Non-producer: Producer

Type: Poultry/poultry products, Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: Please end this monopoly of government and big agricultural businesses such as Monsanto and other. We need to have change in the way we are feeding ourselves and most important labeling of our foods because there are many among us who feel that genetically modified foods are not good for us and we should

have a choice of deciding what goes into our bodies not wondering what choice we are making. Also we must support our local farmers better as they are the backbone to our food system. Please consider these things from a concerned citizen

Thank you

GARY DEMURIA.

COMMENT OF HAROLD DENENBERG

Date Submitted: Friday, May 18, 2012, 10:20 p.m.

City, State: Langhorne, PA

Occupation: Retired

Comment: Stop subsidizing giant farm businesses. Start supporting local, preferably organic farmers. Increase availability to most Americans healthy fruits and vegetables.

COMMENT OF WILLIAM DENGEL

Date Submitted: Saturday, May 19, 2012, 5:48 p.m.

City, State: Campbellsville, KY

Occupation: Nursing

Comment: Please support more organic farming and small farmers. I would also like to see more support for farmers markets and less big agriculture. As a future small farmer I feel that too many subsidies are given to big farms that poison our environment with pesticides and herbicides. There are more sustainable ways that don't kill the life in the soil. Thank you for considering my input.

COMMENT OF ISABEL DENHAM

Date Submitted: Friday, May 18, 2012, 7:57 p.m.

City, State: Falmouth, ME

Occupation: Retired Teacher

Comment: Subsidies to big agra-industries must stop. Subsidies should go to small farmers, organic farmers, and co-ops. The use of dangerous chemicals must be curtailed and the use of hormones in animals. We must go back to the wisdom of earlier sustainable agriculture.

COMMENT OF SARAH DENIS

Date Submitted: Friday, May 18, 2012, 12:52 p.m.

City, State: Wakefield, RI

Occupation: Homemaker

Comment: Small independent organic farmers need your support. Supporting mixed farming, and locally grown and raised produce and meat is sustainable for the environment and for the economy. Monoculture is not.

COMMENT OF SARA DENMAN

Date Submitted: Friday, May 18, 2012, 5:27 p.m.

City, State: Maple Valley, WA

Type: Field Crops
Size: 151–300 acres
Comment: Don't kill conservation funding just as the weather is turning more extreme. Iowa floods have high costs, not just in lost soil.
 Don't subsidize crop insurance so that one farmer can grow endlessly. I'd say no more acres can be insured than were insured by the same farmer in the past. That will stop consolidation on the public dime!

COMMENT OF STACIE DEPNER

Comment: Corporate agriculture has proven to be a detriment to our land, livestock, and health. Please stand behind sustainable organic family farming to produce food that has vitamins and minerals and preserves the soil's nutrients as well without chemical contamination to our land, livestock, and loved ones.

COMMENT OF GLORIA DERKSEN

Date Submitted: Friday, May 18, 2012, 2:41 p.m.
City, State: Ferryville, WI
Occupation: Newspaper Office Worker
Comment: I would like to see the farm bill adjusted so that those receiving aid are doing something sustainable. I've read enough articles and books and listened to enough programs to see who's getting the money—corn & soy to feed cows & pigs on CAFOs (also getting money) to turn the ag economy into a Monsanto and big ag single supply system. These corporations and factories kill land, destroy family farms and ruin lives. It's not cheap food if our tax dollars are going to supplant the giants. If we want real change we will support the small farmer, suffering to keep afloat and be entrepreneurial and the burgeoning organic industries. This is what people want. Let's give them what they want. They don't want to be sued by Monsanto—why are they given so much consideration in the supreme courts? It's unfathomable how everything feels upside down. I'd prefer **No** money for any **Farm** if things keep going the way they are. Let the market prevail. Am I then worried about the small farmer? No, they aren't getting anything anyway.

COMMENT OF RENEE DEROKO

Date Submitted: Friday, May 18, 2012, 12:58 p.m.
City, State: Grantville, GA
Occupation: HR Technology and Integration
Comment: Hello, I am a 42 year old FT working Mom of three small children. I am taking the time to educate myself on these proceedings and to provide feedback because this topic is paramount to what is produced in the U.S., and therefore what food is readily available for consumption by its citizens. Feeding my children natural, organic and affordable food to enable them to grow up healthy and strong is one of my highest priorities as a Mom and I need your help. That the current version of this bill subsidizes the production of food that is making our children and our planet sick is reprehensible and must be a call to action by those who have the power to change things and put the focus back on families battling hunger, regional farm and food economies, and more sustainable food production. It is the family farms that need support, not the big farms. We need to end subsidies (direct payments and countercyclical commodity programs) and ensure that CAFOs receive limited funding. I urge you to put aside pressure from the powerful lobbyist groups

solely interested in profit, and instead focus on what is right for our country, our children, and our environment. There has never been a more critical time and the power is in your hands. Please do the right thing and support changes that will ensure a good, clean, and fair Food and Farm Bill.

Sincerely,

RENEE DEROKO.

COMMENT OF KERSTIN DEROLF

Date Submitted: Thursday, April 19, 2012, 4:51 p.m.

City, State: Cynthiana, KY

Occupation: Homemaker

Comment: I would like to see regulations for the small farmer and rancher eased so that they do not drown in the same paperwork that is required for the big conglomerates. I like being able to support the local farmer and rancher and their products (I don't want Wal-Mart or grocery stores to be my only choice for food). I like that I can talk with them and find out how they produce their food (organic produce, pastured chickens, grass-fed and -finished beef, and properly-raised pork)—just because Big Ag and the big conglomerates have determined how to grow everything in massive amounts, does not mean that should be the only way to produce it and the only way I can get it.

Please keep that in mind when you write the new bills, and take consideration of the smaller farms and ranchers that may be driven out of business or never even start in business because of the bureaucracy determined to be necessary for the big corporations.

Thanks,

KERSTIN DEROLF.

COMMENT OF JAMES DESHOTELS

City, State: Robertsville, MO

Occupation: Nurse Practitioner

Comment: Current farm bill contains unacceptable cuts to SNAP (food stamps) & seriously injures the common good (*i.e.*, maximal life, liberty & ability to pursue happiness of ALL U.S. citizens & those living with us). USCCB has condemned it with good reason.

COMMENT OF DAVID DESSLER

Date Submitted: Friday, May 18, 2012, 3:08 p.m.

City, State: Richmond, VA

Occupation: Teacher

Comment: I am not a farmer but I am well of my dependence on American farmers. In the farm bill you are considering, please include measures to reduce unnecessary regulations on farmers, increase funds for farmer education, and protect America's farmland. In particular, more money needs to be spent funding SARE, Cooperative Extension services, and general education. In addition, The Local Farms, Food, and Jobs Act (H.R. 3286) should be fully funded. Please do not cut these programs! Thank you very much for considering my views.

COMMENT OF RANDY DESUTTER

Date Submitted: Monday, May 07, 2012, 9:57 a.m.

City, State: Woodhull, IL

Producer/Non-producer: Producer

Type: Field Crops

Size: 1,000+ acres

Comment: I am unable to participate in the farm program on one of my farms because the previous owner did not participate and the farm does not have a base. The next farm bill needs a provision that allows farms like this a chance to establish a base and enroll in the program. Another option is to have a program based on actual planted acres. The people owning and farming the land today should be the one's making the decisions on the farm program, not someone who passed away almost 10 years ago.

COMMENT OF PEGGY DETMERS

Date Submitted: Friday, May 18, 2012, 12:14 p.m.

City, State: Rapid City, SD

Occupation: Biologist

Comment: My family who has been diagnosed with extreme grain intolerances sees that what Big Ag is doing to our food supply as downright criminal. A doctor at the Rapid City Medical Center says they are seeing an explosion of celiac and related grain induced autoimmune syndromes and ask me why. The doctors asked me, a biologist, who got rid of very serious health problems by eliminating grains from my diet, why this was happening. It's because grains now are modified with toxins!

We need the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

And MOST importantly . . . in order that we induce more clean healthy foods back into our food supply we **Need** to maintain and build the EQIP Organic Initiative.

COMMENT OF MALISA DETTLINGER

Date Submitted: Friday, May 18, 2012, 3:01 p.m.

City, State: Longmont, CO

Occupation: Mother, Homemaker

Comment: Dear Rep. Polis,

My family and I plea you to vote yes to labeling GMO food. Please maintain the integrity of our organic food standards by not letting GMO foods, which cannot be controlled, taint organic food. Keep crops separate and at a great distance from one another. Also, we ask for fully funded conservation programs that make sure enrollment in new insurance subsidies are tied to compliance with conservation programs. Please maintain the EQIP Organic Initiative.

Thank you,

MALISA DETTLINGER.

COMMENT OF LAUREN DEUTSCH

Date Submitted: Friday, May 18, 2012, 5:25 p.m.

City, State: Los Angeles, CA

Occupation: Nonprofit Organization Staff

Comment: I support the farm bill and am urging others to do so. It is critical that human beings, not corporations, manage the sources of our food, including the way it is produced, the quality of the food material, the way the land is cared for and the accessibility to high quality nutrition. We can go nowhere else but Earth. Sustainability, not profit, is the point of life.

COMMENT OF CAROLE DEVINE

Date Submitted: Friday, May 18, 2012, 3:51 p.m.

City, State: Portsmouth, VA

Occupation: Consultant

Comment: It has now been proven that GMO seeds cannot reproduce and are causing reproduction problems in third generation rats. High fructose corn syrup has proven health dangers, as well. There is **Much** more wrong with agriculture including Monsanto's lawsuits against organic farmers whose land receives windblown seeds onto their land. It is a travesty that our government is not doing something about this.

COMMENT OF ANDREA DEZENDORF

Date Submitted: Friday, April 27, 2012, 1:52 p.m.

City, State: Lakewood, CO

Occupation: Interior Landscaping

Comment: As a supporter of local and national food banks, I urge you to pass a bill that helps the hungry. With the down turn in the economy over the last dec-

ade, more and more people rely on food programs. please make sure that funding for these programs stays in the farm bill. We can't let our kids and our seniors go hungry. Thank you.

COMMENT OF CAROLE DI TOSTI

Date Submitted: Friday, May 18, 2012, 2:02 p.m.

City, State: Kew Gardens, NY

Occupation: Teacher

Comment: In the last 4 years, I lost 120 pounds. Why? I didn't eat the processed foods in the food supply produced by agra business. I didn't shot at industrialized food stores like Stop and Shop, Walmarts, Pathmark, Safeway. I will not eat the foods marketed there because they made me **Fat And Unhealthy**. I'm lucky my fatty liver and heart and organ fat didn't give me worse problems. As it is my body flab is apparent, though I look and feel 1,000% better. I eat organic, free range, raw milk cheese, organic or locally sourced greens and produce and fruits, *etc.* I blog about this extensively and I am a Technorati journalist. And I am writing a book about weight loss and obesity. Corn oil? Ha, ha, ha, GM Wheat and flour produced from such wheat? Ha, ha, ha. I eat no flour products produced in the U.S. I am allergic and it makes me sick and makes me have arthritis and it made me incredibly **Fat**.

So, you know I am for:

- the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I don't care! **I Would Rather Starve Than Eat The Food That Industrial Farms And Industrial Food Companies Produce And Create. I Have Learned, It Is Not What You Don't Put In Your Mouth That Kills You It Is What You Do.** In a nation of obese, sickly, overweight and unhappy people, I am thin, look 20–25 years younger than my old, overweight counterparts in their 60s. And I am active. I looked just like they did 10 years ago when I weight 240 pounds. I hope you get the message.

COMMENT OF BARBARA DIAZ

Date Submitted: Wednesday, May 09, 2012, 7:05 p.m.

City, State: La Puente, CA

Occupation: Unemployed

Comment: Please provide healthy programs including organic and communal gardening for seniors and families to encourage production and consummation of fruits and vegetables, and legumes. The beef, poultry, fish and various other meat industries need to improve their standards of animal husbandry and practice humane, healthy, and sanitary practices. The farms, whether organic, small & independent, or factory and industrial need to meet higher standards and make the focus of production secondary. This will help animals, farmers, the middlemen, the consumers and our wonderful land and water systems, and do so much more positive. Please read Temple Grandin's work on farm animals. We need to rotate our crops and allow the land to heal, and part of this process is to let animals roam about and fertilize the Earth in a natural way.

COMMENT OF DAILY DIAZ

Date Submitted: Friday, May 18, 2012, 12:57 p.m.

City, State: West Palm Beach, FL

Occupation: Construction Contractor

Comment: I only buy organic food for my family. My mother had been very ill in 2008. As soon as we changed her diet to organic including all dairy, she improved and was able to drink milk for the first time in 10 years where it did not upset her stomach.

Comment: To: House Agriculture.

Those Hunger People than they don't have enough money to cover for food they need Your help, Approved their agriculture Jobs will Help them in the future with Food. They need to make a line to pick up their food. Every week.

MARGARITA, Miami, Florida.

SUBMITTED LETTER BY KENNETH DIBBELL, SOUTH NEW BERLIN, NY

March 9, 2012
 House Committee on Agriculture,
 United States Congress,
 Washington, D.C.

Dear Members of House Agriculture Committee:

Are You Listening?

Gentleman and Ladies:

It is past time for realistic legislation concerning farm gate milk price. It is time to stop bowing to the Washington lobbyist (IDFA-NMPF) neither one of which represent the people, in this case dairy producers, and the rural economy that they support.

Be aware that the current and past price discovery system has put 200,000 producers out of business since 1980 and the loss of parity. Only 50,000 producers remain in production at present and they are starving for funds to pay high feed costs, high energy costs, high taxes and high costs for anything made with steel. Seed prices are also through the roof!

It is time to pay producers cost of production as calculated by Economic Research Service. They are paid and staffed to do the work and their work is ignored!

Sincerely,

Kenneth Dibbell

KENNETH DIBBELL.

ATTACHMENT 1

March 31, 2011
 United States Congress,
 Washington, D.C.

Dear Members of the United States Congress:

What happened?!

The question is: what happened to the home of the brave land of the free with liberty and justice for all? What happened to the Government for the People?

The United States Congress has been directed not by the people but by the Lobbyist for special interest in the quest to feather their own nest with no concern for the lives they destroy along the way.

Corporate America with the blessing of the U.S. Government has moved millions of jobs out of this nation presumably to maintain or even improve their margins. The Free Trade Parade! All across this industrial nation, poor managers let the unions get too much power in the quest for a higher standard of living; never setting them down and explaining the Facts of Life to them. Then those managers (many of whom packed up and left the scene with their umbrella full of cash in the form of millions of dollars—the reward for failure).

Now let's look at the dairy industry in particular; when I came to this county 35 years ago there were 733 farms shipping milk to the commercial market. Now, there are less than 200. Why, because the Congress and the last four Administrations were not governing for the people. Government cannot run a business with any degree of success as illustrated by the FANNY MAE, FREDDY MACK and the U.S. Postal Service with its \$8 Billion shortfall in 2010.

The current and past raw milk pricing as administered has driven 400,000 dairy producers out of business since 1981. The local economy supported by those producers is a shambles and, in effect, no longer exists. Businesses closed, employees laid off.

There are fewer than 53,000 dairy producers left in the nation and most of them are at risk of failure and are leveraged to the point where many cannot borrow for spring planting in 2011. The cost of everything is rising everyday—gasoline, diesel fuel, fertilizer, seed and anything made of steel.

I suggest that if this Congress has a conscience of any consequence that they get busy and fix this problem. **Now**, not in 2012. You have ignored the dairy price crisis since it happened in 2009.

We do not need another Band Aid, we need to cover our cost as published by the ERS, a division of the USDA, calculated every month for all 23 dairy producing states.

The MILC payment program has been a hoax from day one. It did not include a course in government math to teach you how to pay \$5 of expense with 15¢. National Milk Producers (processors) Federation's Foundation for the Future (FFTF) is far from being a solution to farm gate pricing. It is another system subject to manipulation like the current system of pricing milk based on the products traded on the CME.

This system has destroyed the lives and livelihoods of 400,000 dairy producers since 1981, leaving only less than 53,000 in production.

Is this the United States of America? Certainly not the same one that I was born into in 1934, where everyone worked! There were no special education classes. Everyone conformed or else!

Ladies and Gentlemen of the Congress, dairy producers need cost of production, **now**, not in 2012. The Casey Specter Bill has been there since 2007 as the answer to this problem, with a supply management feature financed by producers, not tax payers. It is past time for the Congress to gather up some courage to address the problem.

You do not have to open the entire farm bill to fix what needs fixing in the dairy sector. Common Sense tells me that. Common sense does not appear to be abundant in the U.S. Congress or at the USDA as well.

You all need to get familiar with the "Agriculture Marketing Act" still on the law books and it is **the Law!** Dairy producers need cost of production to survive and stimulate the local economy that relies on dairy dollars. **They need it now!**

If consumers can pay \$4 per gallon for gasoline, they can certainly pay \$4 per gallons for milk, the world's most nutritious beverage.

It doesn't cost any more to process \$25 milk than it does for \$15 milk.

The current price discovery system borders on insanity as evidenced by the number of producers who have suffered economic strangulation. The tail has been wagging the dog for far too long.

In Desperation,

KENNETH DIBBELL.

ATTACHMENT 2

March 4, 2010

Members of Congress,

Ongoing Dairy Crisis:

We are entering our 15th month of absolutely outrageous farm gate milk prices and no one seems to care. Spring is coming and far too many of our farms are out of cash and out of credit and spring cropping is just around the corner.

Senate bill 1645 referred to as the Casey-Specter bill is sitting stagnant in the Senate. It provides for pricing based on cost of production with a supply Management system which should stop some of the unnecessary growth. You cannot grow your way out of this mess at these currently low prices and without supply management the smaller farms will continue to fail due to economic strangulation.

We have had 30 years of below cost payment resulting in the loss of 4/5 of the operating dairy farms of 1980. We are down to less than 50,000 left in the nation. Is this the America I was born into quite a number of years ago, I don't think so!

The milk payment program is an absolute farce and raising the payment limit to 6 million pounds cut the payment to small farms in 1/2, an absolute disgrace to common sense.

Federal Order I (11 Northeast States) revenue was down 33% from previous year and only down 616 million pounds. New York was down \$.6 billion and if spent a

modest five times in the local economy that was \$30 billion not available to stimulate the rural economy. In all of Order I that number is \$70 billion. Nationwide that number is hundreds of billions. Where is the sense? It is well past time for Washington to wake up and fix this mess as it is your fault for not being in touch with reality!

There is not a valid argument for not pricing milk on the cost of production as published by Economic Research a division of USDA. The money needs to come from the marketplace with a reasonable explanation to consumers. Sustain our dairy farm community to provide a fresh high quality product. Milk is good!

National Milk Producers Federation should have a name change to: National Milk Processors Federation. Co-ops should go back and review their mission statement and truly represent their farmer members interest.

It Is Past Time To Act!

In total disgust

KENNETH DIBBELL.

Notes:

¹ Net pay price received by dairy farmers for milk. Includes all payments received for milk sold and all costs associated with marketing the milk. Price is a weighted average for the reporting area and is reported at the average butterfat test. Mailbox price does not include Milk Income Loss Contract (MILC) payments. Mailbox price does include, for the most part, the assessment under the Cooperatives Working Together (CWT) program.

² Information is shown for those areas for which prices are reported for at least 75% of the milk marketed under Federal Milk Orders. The price shown is the weighted average of the prices reported for all Orders that received milk from the area.

³ Figures are annual averages—the weighted average of the monthly figures, except California, which is the simple average.

⁴ Includes Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.

⁵ All the counties to the east of those listed in n. 9.

⁶ Includes Kentucky, North Carolina, South Carolina, Tennessee, and Virginia.

⁷ Includes Alabama, Arkansas, Georgia, Louisiana, and Mississippi.

⁸ All counties of Vernon, Cedar, Polk, Dallas, Laclede, Texas, Dent, Crawford, Washington, St. Francois, and Perry and all those to the south of these.

⁹ The counties of Warren, Elk, Clearfield, Indiana, Westmoreland, and Fayette, and all those to the west of these.

¹⁰ Includes Kansas, Nebraska and the Missouri counties to the north of those listed in n. 8.

¹¹ All counties to the west of Fannin, Hunt, Van Zandt, Henderson, Houston, Cherokee, Nacogdoches, and Shelby.

¹² Includes Oregon and Washington.

¹³ Weighted average of the information for all selected reporting areas in Federal Milk Orders.

¹⁴ Calculated by the California Department of Food and Agriculture, and published in "California Dairy Information Bulletin".

January 30, 2010

Washington, D.C.—The National Family Farm Coalition (NFFC) today expressed its concern over the American Farm Bureau Federation's (AFBF) rejection of supply management for the dairy industry at the recent AFBF annual meeting in Seattle, Washington. In an article printed January 20, 2010 in the *Wisconsin State Farmer*, Bill Bruins a Waupun, Wisconsin, dairy farmer and President of Wisconsin Farm Bureau, said that the national discussion mirrored the policy discussion Wisconsin Farm Bureau had last month.

Mr. Bruins made a lot of assumptions for himself on behalf of the AFBF that may or may not be in sync with the majority of dairy farmers in Wisconsin or the United States. He does talk of consensus of farmers at the recent AFBF annual meeting in Seattle, Washington. The American Farm Bureau Federation has never been a leader in dairy policy because their membership does not represent a majority of dairy farmers. However a majority of AFBF dairy members are suffering financially today from the current dairy policy that Mr. Bruins endorses. The leadership appears to be boasting dairy policy based on past AFBF total agriculture policy and how it fits the mold.

Dairy farmer Gerald Carlin from Meshoppen, Pennsylvania said "According to Bill Bruins the consensus of Farm Bureau is in opposition to supply management. I wonder how many convention goers were swayed by bad information and fear-mongering over supply management stifling farmer's ability to compete in a free market. I am sure many who support supply management were intimidated by so called experts whose goal was to make support of supply management look foolish and uninformed."

The fear that southern farmers reportedly had that supply management may prohibit them from ever producing enough milk to meet the needs of the region seems quite ironic since milk production in the South has been in steep decline under the so-called free market system. Supply management with a cost of production would have allowed them to hold their own and they would not be in the shape that they are in now.

Mr. Bruin talks about several groups including the Holstein Association pushing for programs that would help the industry avoid a severe downturn in dairy prices like we experienced in 2009, which created huge losses for dairy farmers. We need to applaud him for his analogy. But he falls short on solutions, when he points out the down turn in prices due to losing 50 percent of our export market. He fails to identify that we cannot rely on the export markets to sustain a dairy industry in the United States and what we have is broken and it is imperative that we have a new pricing mechanism.

Loren Lopes, dairy farmer, Turlock, California and member of the NFFC Dairy Subcommittee said, "What we need is stability above the cost of production for a long period of time to get back on track. At the Wisconsin convention they had a discussion on the delegate floor that concluded controlling supply was not going to help them. I have to agree somewhat with them because I saw it in California. Without changing the price discovery, without addressing the make allowance, without addressing imports of Milk Protein Concentrates (MPC) and balancing imports and exports, and then finally national supply management, the prices will continue below the cost of production. The Federal Milk Marketing Improvement Act of 2009 (S. 1645) addresses all of this. We are entitled to a domestic price for the milk that goes to market every day and not be affected by exports or imports as we are now. The New Price Discovery must be based on the national average cost of production and Return on Investment, according to USDA/ERS."

Bruins made no indication that Farm Bureau is concerned about corruption in the current system costing farmers billions of dollars in lost income. Nor does Farm Bureau seem to be concerned about the fact that the dairy industry beyond the farm level has made inappropriate profits at the farmer's expense. Even so, declining demand, real or contrived, is always blamed on farmers getting paid too much for milk.

Mr. Bruin revealed the agenda of the AFBF leadership. Farm Bureau believes that deregulating the industry and opening new markets are what the industry needs. "We are in competition with the world." Bruins said. This is the same policy as International Dairy Foods Association (IDFA) and National Milk Producers Federation (NMPF). Deregulation would be the means to the end for the independent family dairy farm.

AFBF has long been a strong backer of free trade policies which have continually put downward pressure on farm gate prices as we compete with the rest of the world in the race to the bottom. AFBF supports the use of Milk Protein Concentrate

(MPC). Imported MPC would continue to “run our supply cup over,” and, if ever a subsidized domestic MPC industry is established, as AFBF has advocated, it would mean MPC users would simply have the cheapest source of MPC, whether imported or domestic, and all dairy farmers would be forced to take bottom dollars for this untested, undefined, unapproved and possibly unsafe manufactured powdered ingredient!

Mr. Bruins said there was nearly an hour of debate about dairy at the AFBF convention. He said the delegation eventually passed a resolution to make national dairy policy a priority issue.

A member of Farm Bureau that wishes to remain anonymous, asked, “How many of the delegates who determine final dairy policy are ‘actually dairy farmers?’ Whose ‘voices’ are really being spoken for by AFBF?” The member went on to say, “Bill Bruin, Wisconsin Farm Bureau’s nominee to the new National Dairy Industry Advisory Committee complained that Farm Bureau was ‘snubbed’ by the United States Department of Agriculture (USDA) and that a lack of appointees from the American Farm Bureau Federation and National Milk Producers Federation (NMPF) and the United States Dairy Export Council ‘alienated’ the mainstream dairy industry. Perhaps part of the reason Mr. Bruin and others were ‘snubbed’ or ‘alienated’ is, after years of claiming they are the ‘voices’ who speak for farmers, our rapidly disappearing dairy farmers continue to experience the worst financial dairy collapse ever!”

National Family Farm Coalition has long advocated national food sovereignty without restraints of or from the World Trade Organization (WTO). Cost of Production for farmers, strategic food reserves, and sensible supply management, many of these objectives would be carried out in dairy by the passage of the Federal Milk Marketing Improvement Act of 2009 (S. 1645).

ATTACHMENT 6

Feb. 4. 2010

Hon. THOMAS “TOM” J. VILSACK,
Secretary,
U.S. Department of Agriculture,
Washington, D.C.

February (TBD), 2010

Dear Secretary Vilsack,

The present low milk prices are destroying dairy farmers. We urge you to use your authority to establish an emergency floor price to immediately raise farmer milk prices to cost of production.

Dairy Development Manifesto:

Dairy farming is too important to just leave to market forces. Its multifunctional character connects dairy to many non-economic concerns of society. The labor intensity of milk production provides for a strong employment impact. The intensive care needed for dairy animals favors family and smallholder farmers. Dairy farming has a high potential for poverty reduction in rural areas. Many synergies exist through the integration of cattle husbandry and crop farming for the benefit of agro-ecology. Pasture-based dairy production has a high potential for carbon sequestering. Milk is a valuable protein-rich food which is able to improve poor people’s diets enormously and allow them to live in dignity.

We note that dairy development has been damaged in most developing countries by liberalization policies and national governments’ neglect. Also, in developing countries the deregulation of milk markets has destructive effects on their dairy farmers and for the international trade of milk products.

Smallholder dairy farmers and their access to markets should be high in the agendas of national development policies. Governments should recognize, support, and protect the vital role of milk production, processing, and distribution.

International flows of distorted trade in milk contradict the logic of optimal allocation. The biggest exporters are the high cost producers of developed countries, while many developing countries, who are most in need of dairy development and where their farmers are among low cost producers, suffer under the cut throat competition of import surges. Trade with dairy products has to become fair and conducive to the U.N. Millennium Development Goals. We need to reform trade and agricultural policies to achieve food sovereignty, eradicate hunger, combat climate change, and protect the environment.

Organizations of dairy farmers and other stakeholders. from around the world are appealing to the leaders of the developed countries to use the opportunity of their

debates on farming policy reform to include the following aspects into revision of their policies concerning dairy:

- Stop any form of exporting dairy product into foreign markets that undercuts local farmer prices.
- Avoid harm to dairy farmers in developing countries. This responsibility has to go even beyond the present trade rules. It should be done by a sustainability impact assessment of dairy trade flows and trade agreements.
- Do not get in the way of developing countries that choose to defend their infant dairy economies against outside competition.
- Support national dairy development programs.

Endorsers of this manifesto include:

American Raw Milk Producers Pricing Association (USA)

Family Farm Defenders (USA)

National Family Farm Coalition (USA)

ATTACHMENT 7

May 6, 2010

BRANDON WILLIS,
Deputy Adm. Farm Programs,
U.S. Department of Agriculture,
Washington, D.C.

Brandon:

Thank you for your letter of April 30th regarding Farm Gate Milk Prices.

Agreed lots of cows have been added except for New York and Minnesota.

Everyone who still has credit is trying to fill last year's void without consideration of price and cost of production. I think we could raise the support price to \$1.65 and pay only the amount of 2009 lbs of production. At least 20% or more of our third, fourth, and fifth generation farms will die without proper payment.

USDA is aiding in the self destruction of the dairy industry as we knew it in the 20th Century.

The big farm virus model dairy complex is destroying rural America. With over production and environmental issues, the blood of this new crop of failed farms (economically strangled) by current policy will stain the hands of USDA and the Congress for a long, long time.

Section 608C states that milk price shall be determined by food cost and other economic conditions. Well taxes, insurance and energy are for sure other economic factors!

Six years ago I could buy farm diesel for 69.9¢ in August of 2004. Now it is \$3.00 or more. These farms have improved efficiency to no avail and can no longer survive in this environment. Feed, machinery, and dairy supply businesses supported by the small farm community are also victims of this self destruction going on in this industry.

ERS calculates the cost in New York at \$26.15/CWT minus \$3.00 of unpaid labor leaving a cast cost of \$23.00/CWT and a pay price of \$15.00 does not hack it.

Painfully Yours,

KEN DIBBELL.

ATTACHMENT 8

April 13, 2010

To: All Members of Congress

Immediate Emergency Action Must Be Taken To Prevent A Complete Meltdown On The Majority Of Us Dairy Farms

(1.) Either Congress or USDA Must Immediately Raise The Support Price on All Manufactured Dairy Products to a Level of at Least \$18.00 Per cwt; or

(2.) Either Congress or USDA Must Place a Floor Price of at Least \$18.00 to \$20.00 per cwt Under All Classes of Milk Used for Manufacturing Purposes. The Existing Class I Differentials Must Be Added to the Floor Price To Determine the Value of Class I Milk.

ATTACHMENT 9

April 27, 2010

Dear Leaders:

President Obama, Blanche Lincoln (Chair), Patrick Leahy (Member Senate Ag. Committee), Secretary Vilsack USDA, Collin Peterson (Chair), Tim Holden (Vice Chair) House Ag. Committee.

This Nations Dairy Farm Community is about to finish the sixteenth month of Farm Gate milk price at $\frac{2}{3}$ or less of cost as published by Economic Research Service (ERS), while a.m.S continues to administer a failed, flawed and manipulated Farm Gate milk price, based on less than 2% of dairy traded on the CME.

Now we are faced with the TPP which will put another nail in the coffin of American dairy farmers. Our consumers do not want any of their dairy products coming from the Pacific Rim. They want their farmers to be paid a living wage.

We have been tip toeing around this crisis and ignoring the impact on the farms and the rural economy supported by dairy dollars for too long! Let's remember that Dairy America forward contracted our milk powder at 80¢ per pound when the domestic price was \$2.50 per pound and world price was \$2.40. Outrageous!

It is time for you "Leaders" to step up to the plate and face reality. Raise the support price, immediately and give those farms near collapse a chance to survive until we can fix this issue once and for all.

I have reviewed the testimony of the DIAC. I see nothing there but more maneuvering on behalf of corporate and cooperative milk. Insurance is out of the question in practical terms, just more jobs to administer. If we would just price the milk on cost of production, as outlined in SEN Bill 1645 with a production control feature, problem solved!

Corporate Milk has to back off the record profit train. Anti-Trust and monopoly issues are killing American dairy farms and abusing consumers.

Looks like a clean cut case of discrimination cost *vs.* pay price.

It is not necessary to open the farm bill to fix this crisis.

Some competent and responsible decisions made by you people need to take place on the farms that fed this nation during the 20th century and doomed to fail due to Congress failing to recognize how very serious this crisis is and to do something.

Move Senate Bill 1645 Now!

Do It Now!

Sincerely,

KEN DIBBELL.

ATTACHMENT 10

August 27, 2010

Unbelievable!

It amazes me that Washington has stonewalled the Farm Gate pricing of milk for Twenty consecutive months now, on the other hand should we expect a competent and rational decision on this issue. Has common sense left Washington, D.C. completely? It would certainly seem so.

Hiding behind the fact that we would have to open up the entire farm bill to address this issue is outrageous, again demonstrating the lack of rational decision making from Government. When something is broken, you fix it; not ignore it assuming it will fix itself. Yes, the price has risen but it still has not reached the cost of producing it.

These farms operated all of 2009 at about a \$10 loss per cut. We are still well below cost at \$18/CWT. This problem could have been addressed back at the beginning with a floor price set by the Secretary.

Over production would not have been an issue if payment had been limited to 2009 production.

I challenge government through USDA to do the right thing and generate a pay-price equal to better than the cost of production published by ERS.

This would make a lot of farms taxpaying enterprises and would certainly stimulate the local economy that operates on dairy dollars.

For a lot of years I thought government of the people, by the people and for the people was responsible for protecting the people. Family Farmers are people.

The present situation reeks of treason by the sovereign against its people.

The days of cheap food are over my friends and if not it will be soon.

If we don't start collecting Social Security payments on all those imports from China that system is doomed to fail and we will have obtained Third World Status.

God Bless America.

KEN DIBBELL.

Written By Michelle Monroe
Congress to take up crucial discussions***

ST. ALBANS—As dairy farmers remain stuck in a second year of low prices, grassroots farm organizations have increased pressure on Congress for action to save struggling farms.

Locally, Dairy Farmers Working Together (DFWT) has posted draft legislation (at www.dfwt.org) that will be sponsored by Rep. Jim Costa, D-Cal., in the U.S. House.

The proposed legislation is a formalized version of the now familiar dairy price stabilization plan, previously referred to as the Holstein plan.

However, representatives from another grassroots group, the Progressive Agriculture Organization (PRO AG), will be traveling to Washington next week to speak with legislators about a different bill, the Federal Milk Marketing Order Modernization Act of 2009, commonly referred to as the Specter-Casey bill, which has been introduced in the Senate.

The Specter-Casey bill would eliminate Class III and IV milk prices, leaving just two classes: milk for drinking, Class I, and milk for manufacturing, Class II. The price for Class II would be the average cost of production for milk across the United States, as determined by the USDA. The Class I price would be determined by adding the Class I differential to the Class II price. Prices would be adjusted quarterly.

The existing Milk Orders would remain as they are, but the Class II price would become uniform across the country.

The Class I differential vary by region. Generally the areas with lower costs of production such as California and the Upper Midwest have lower Class I differentials and lower Class I utilization. Conversely, areas that have higher costs of production such as the Northeast and the Southeast also tend to have higher differentials and higher Class I utilization.

Thus, farmers in areas with lower costs of production would receive a lower blend price for their milk than farmers in higher cost areas. In the Northeast, for example, roughly 45 percent of the milk produced has traditionally been Class I, so 55 percent of the price received by farmers would be based on the lower price and 45 percent on the higher price.

In the Upper Midwest, less than 20 percent of the milk has traditionally been used for drinking. Their price would be based almost entirely on the lower Class II price.

"Farmers want to be paid what it costs them to produce their milk, no more and no less," said Floyd Hall, a retired dairy farmer from Lefargeville, N.Y., who supports the bill.

"We're losing so many farmers," Arden Tewksbury, a leader of PRO AG from Pennsylvania told the *Messenger*. "Not only do we lose farmers, we lose infrastructure and rural America"

The bill contains a supply management component. When there is an excess supply of milk, the U.S. Secretary of Agriculture is empowered to reduce payments to farmers on up to five percent of their production to ½ of the Class II price. If the oversupply continues, the Secretary could reduce payments to farmers on any production over their previous year. There is an appeals process for farmers whose previous production was unusually low the previous year because of disease or natural disaster.

The money saved on the reduced price would be given to the USDA to purchase milk products through the Commodity Credit Corporation. Those products are then distributed to needy families and children through school lunch programs and food banks.

No price reductions could be made if imports of dairy products from other countries into the United States exceeded exports.

The bill also eliminates the make allowance, a payment farmers make to cheese, yogurt and other manufacturers to support those businesses. Supporters of the make allowance argue that because of the seasonal nature of the milk supply—it is greater at some times of the year than others—farmers should help to maintain adequate manufacturing capacity to deal with the excess during those times when the market is flush with milk.

Staff for Sen. Bernie Sanders, I-Vt., told the *Messenger* he strongly supports the bill. Sen. Patrick Leahy, D-Vt., has not taken a position on the bill, and a version has not yet been introduced in the House.

Asked why DFWT has not supported the Specter-Casey bill, DFWT president Amanda St. Pierre replied via e-mail, "We are very supportive of the individual ele-

ments in the Specter Bill and early on in the process we vetted that plan to our folks and others around D.C. and the industry. Unfortunately, we kept hearing the same thing—that it would not get out of the starting gate because it was trying to tackle too much at the same time.”

St. Pierre said she felt portions of the bill could be accomplished in stages.

Hall challenged the idea that the dairy industry will be able to get changes to the pricing system, supply management and other improvements to the industry one piece at a time. Instead, he said, any bill the industry puts forth needs to address all of the needed changes, because once a bill is passed legislators will take the attitude that they’ve already addressed the problem.

In the past year, PRO AG has met with nearly 2,000 farmers in New York, Pennsylvania and Iowa, according to Tewksbury. The farmers they’ve spoken with almost always support the bill.

“We’re not going to get it passed if we don’t throw our weight behind it,” Tewksbury said.

“The co-ops don’t like it at all,” Tewksbury said.

“You’re fighting IDFA (International Dairy Foods Association) and National Milk and all these people who don’t milk cows,” said Hall, who joined the chorus against the National Milk proposals for replacing price supports and the Milk Income Loss Contract with insurance.

Dairy Farmers of America (DFA) spokesperson Kristi Bell told the *Messenger* via e-mail that DFA does not believe the bill “will fully address our problems.”

“Any future policy must incorporate a growth management plan that is reactive to market conditions,” Bell wrote, suggesting the bill might lead to an increase in imports. “Further, the Specter-Casey Bill guarantees that the Federal milk price will never fall below the cost of production, but fails to acknowledge that production costs vary greatly across the United States,” Bell wrote.

The cost of production as determined by the USDA varies, but not very much. USDA’s January 2010 cost of production figures for 23 dairy states show 13 states having a cost of production between \$19 and \$25. Another four have costs between \$25 and \$27. Only one has a cost of production below \$19.

The full text of the bill appears on the PRO AG website (<http://proagorg.webs.com>).

COMMENT OF BABETTE DICKERSON

Occupation: Graduate Student

Comment: Our food is important to our existence, literally. Our citizens are dying of cancer because of the processed, laboratory-produced, artificial, non-food they eat. Stop selling this carcinogenic non-food. Make more local, organic, sustainable, bio-dynamic, fresh food. That’s the only way to feed our nation. Large factory farms kill our citizens.

COMMENT OF SARA DICKERSON

Date Submitted: Friday, May 18, 2012, 9:14 a.m.

City, State: Sarasota, FL

Occupation: Website Administrator

Comment: We must change our subsidies to agriculture to encourage and support sustainable organic farms instead of large corporate agriculture. The health of our population and the future of our country depend on it. Our national focus needs to move to healthy food for our children. There is nothing more important to any nation than the health and education of its children.

COMMENT OF NANCY DICKINSON

Date Submitted: Friday, May 18, 2012, 3:08 p.m.

City, State: University City, MO

Occupation: Retired

Comment: It is time for reform. The large farm corporations do not need hand-outs from the government. Small farmers and organic farmers are the ones who need support. We need better supervision of the pesticides used and the impact on the water supply. The best agricultural practices need to be used, not the cheapest and probably most harmful to the land and water. We did not get recalls of our produce in the past as we are having been getting in recent years. The same crop

year after year wears out the land so crops need to be rotated. The people who harvest crops need to be paid decent wages.

COMMENT OF MARIA DICKMANN

Date Submitted: Friday, May 18, 2012, 2:47 p.m.

City, State: Davenport, IA

Occupation: Nanny

Comment: We need to stop the overproduction of corn, it is unhealthy for humans to eat so much processed corn. It's causing health care costs to skyrocket so any savings for the consumer to buy cheap processed corn foods is really a cost in the long run.

COMMENT OF SUSAN DIDRICHSEN

Date Submitted: Friday, May 18, 2012, 10:14 a.m.

City, State: New York, NY

Occupation: Professional Musician

Comment: Please understand that more and more Americans are aware of the unbelievably corrupt power of Monsanto and its power over our choices in not only the country but the world. We want organic produce, we want fairness, we want real farmers with access to their own seeds. Do the right thing!

COMMENT OF CATHY M. DIEHL

Date Submitted: Friday, May 11, 2012, 11:29 a.m.

City, State: Winter Park, FL

Occupation: Retired/Disabled

Comment: I help out at a food pantry every week and find more very young mother with children and older seniors in such need that it breaks my heart. I'm also one of them. I am raising two of my grandchildren that the state placed into my home. I'm on disability and only \$100 in food stamps. How can any family eat what they should when more than ¾ is to pay living expenses? How are the children to grow up and study when there isn't enough food on the table? How is a senior to live when they don't eat so they can pay the electric bill? PLEASE don't vote to cut any more than what has already TAKEN from the people that need it the most.

CATHY M. DIEHL, Disabled Grandmother Raising Grandchildren this is who I am. And there are so many more doing the same thing I am. **Please Let Us Eat!**

COMMENT OF MARK DIGIACOMO

Date Submitted: Friday, May 18, 2012, 12:08 p.m.

City, State: Lebanon, PA

Occupation: Golf Professional

Comment: I think the road we are on in terms of agricultural practices in this country is the wrong road. I think our reliance on chemicals and genetically modified seeds to produce food is an unsustainable practice. I also feel we are damaging our health as a nation by consuming food grown on poor soils that is lacking in nutrients but full of chemical residues from pesticides. I think organic farming should be supported because as more people learn about the food they are eating the more demand there will be for organic options. The current system is unsustainable for so many reasons. We shouldn't leave our food supply in the hands of a few major agribusinesses, but promote smaller, more sustainable, farming practices that protect the quality of the food we eat as well as the environment in which we live.

COMMENT OF JERRY DILLARD

Date Submitted: Friday, May 18, 2012, 2:38 p.m.

City, State: Bend, OR

Occupation: Consultant; Environmental Technologies Assoc. LLC

Comment: We are eating ourselves out of existence . . .

We are Polluting our ground water, air, Oceans & filling our atmosphere with reactive nitrogen, that last 126 years & is 310 worse on the environment than Carbon dioxide . . . Nitrous oxide is creating our

Ocean Dead Zones, now over 475 different locations around the world . . . all this result from the over use of NPK fertilizers . . .

Since 1985 Agribusiness has promoted and doubled the use of pesticides, herbicides and yes NPK fertilizers . . .

All In the name of “we need more food,” false, we can make more money is the truth of the motivation, otherwise Nutrition & reduction of environmental impacts would be the focus . . . thus once again the opposite direction of our founding integrity . . .

We need to grow food with Nutrition that the process does not damage the mineral resource in our soil by destroying the microorganisms, increasing the Agriculture demand for water, which in the USA is now 80% of our available water . . . This is caused by the negative impact of NPK fertilizers on our soil, due to this over use, salinity in soil leads to compaction and the demand for more water . . . NPK is like a drug . . . every year you have to use more . . . to get the same high yield for the farmer . . . as a result our Nutrition & Environment is suffering . . . plus the food grown for livestock is without adequate nutrition.

By replacing the mineral loss in our soil, Nature has provided a way we can easily overcome every negative of Agriculture . . .

But because minerals cannot be patented there is no financial support for something so simple and so right . . . visit www.us-rem.com if you would like to increase your awareness & see the result of others using Excelerite Minerals, 100% from Nature . . .

This continued non action on the part of the government is destroying the health of soil that leads to the health of individuals . . .

Big Pharma does not care, more disease just means a bigger demand drugs, Big Oil does not care since they use more Oil, since our food source is made to be dependent on Oil, coal & Natural gas . . . all of which can be converted into NPK fertilizers . . . Look what is being allowed to continue, in the name of “we need jobs” . . .

Declining Nutrition in our Food, as a result of this lack of Fiduciary Responsibility on the part of our Government . . . Not only has this lowered individual energy, due to the lack of minerals in our body’s, most know this is a contrived manipulation for the continued dumbing down of America & control by the Big 5 . . . We now have more people obese & overweight than the entire population of the country I was born into in 1945?

Freedom means more than religion & speech . . .

It also means Free Seed for farmers, the right to safe air to breathe, nutritional water & food. The continued removal of minerals from our drinking Water & Food will be the decline of the most Powerful, Intelligent & Democratic society in the world . . .

We are now doing most everything the opposite of what this country was founded on . . .

We has become Me, the Big 5 . . . citizens are expendable.

I urge you . . .

Support the “We once again” and let go of this Special Interest Corp. “Me society,” we have become that is now running our Government . . . Result is, Countries thru out the world find our society lacking in our previous values of “Compassion and Empathy,” for ourselves & others around the world . . . today Everything is judged, the highest good for all concerned is no longer a value.

The least you can do . . . show Compassion for the people in the USA asking for Nutrition in our Drinking water & food once again without ongoing pollution to our environment . . .

Please Support Nutrition once again and the reduction of the pollution to our environments caused by Agribusiness & NPK fertilizers.

Thank you if you have read this far . . .

JERRY.

COMMENT OF CHRISTOPHER DILLEY

Date Submitted: Friday, May 18, 2012, 1:18 p.m.

City, State: Kalamazoo, MI

Occupation: Retail Grocery Manager

Comment: I am writing in support of much stronger sustainability and small scale, local farming supports than are currently proposed in the draft farm bill.

I manage a growing and thriving natural foods store in Kalamazoo, Michigan, and we are very much dependent on strong legislative support for local farmers (especially young and beginning farmers), local food production, environmental conservation, and organics. Due to that, I am writing to advocate for the following in the upcoming farm bill:

- (1) The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- (2) Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- (3) The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- (4) Maintaining the EQIP Organic Initiative.

Thank you very much for your consideration!
Yours,

CHRIS DILLEY, *General Manager*,
People's Food Co-op of Kalamazoo.

COMMENT OF ELIZABETH DILLON

Date Submitted: Friday, May 18, 2012, 8:07 p.m.

City, State: Seattle, WA

Occupation: Gardener/Beginning Farmer

Comment: As a beginning farmer myself, I'm very concerned about the proposed cut in funding Beginning Farmer programs will receive should this bill pass. Having not grown up in a farming family, I've had to invest time and money learning how to farm and I've taken advantage of State and Federal programs aimed at encouraging new young farmers into agriculture. Without these programs, I would not be in the position I am today to enter the agricultural industry and help our aging farmer population transition, keeping agricultural lands productive. And not only that, it's very difficult to find lenders willing to provide loans to beginning farmers so that they may purchase land to actually start farming. Therefore, I strongly encourage the members of the House Committee on Agriculture to rethink their positions and leave the Beginning Farmer programs budget alone. Surely we could take more cuts from subsidies/direct payments/crop insurance—especially since big agricultural farms turning huge profits should be able to stand on their own feet without getting taxpayer money in their back pockets. Small farmers are the ones who need the most help and are mostly ignored by helpful policies and increased budgetary spending. It's time the small (*i.e.*, less than \$250,000 earnings/year), family-owned and young farmer-started farms reap some of the rewards. Thank you for your time.

COMMENT OF SHERRY DILLON

Date Submitted: Friday, May 18, 2012, 11:54 a.m.

City, State: Mardela Springs, MD

Occupation: Animal Rescue

Comment: As a vegan I'm very concerned about where my food comes from. We need protection for organic and family farmers. With factory farming things have gone out of control on the quality and safety of our food supply.

COMMENT OF ALEXANDRA DILWORTH

Date Submitted: Saturday, May 19, 2012, 11:25 a.m.

Producer/Non-producer: Producer

Type: Forestry, Poultry/poultry products

Size: 50–150 acres

Comment: **Insure The Survival Of Small Family Farms, Ranches And Woodlands. Safeguard Survival Through By Not Allowing Monsanto And Other Giant Corporations To Control Crop Seed Ownership & Production!**
Please support:

- the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully fund conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- Insist on implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF JUDITH DiNARDO

Date Submitted: Saturday, May 12, 2012, 5:19 p.m.

City, State: Stow, OH

Occupation: Tax Return Preparer

Comment: May is Older Americans Month, so it's a good time to raise your awareness and fight senior hunger. I want SNAP, TEFAP, and CSFP protected. Please protect and strengthen programs that put food on the table for Ohio's hungry seniors and other Americans!

Feeding America's *Hunger in America 2010* study unearthed some startling facts about senior hunger that you should know:

- In 2010, 7.9 percent of households with seniors (2.3 million households) were at risk; 30 percent of client households with seniors indicated that they have had to choose between food and medical care and 35 percent have had to choose between food and paying for heat/utilities;
- In 2009, nearly 9 million people over the age of 50 and nearly 4 million people over the age of 60 lived in at-risk households.

We must ensure hunger-relief programs remain protected so that seniors who worked their entire lives continue to have access to these vital programs. Protect SNAP, TEFAP, and CSFP.

COMMENT OF SUSAN DiPUMA

Date Submitted: Friday, May 18, 2012, 12:18 p.m.

City, State: Duluth, GA

Comment: Cutting food stamp programs to increase the bottom lines of giant commodity farmers and insurance companies is not reform! The American people need and deserve true reform that leads to sustainable agriculture and our land, water, and small family farms. Please stand up for the people, and not giant corporations.

COMMENT OF BORIS DIRNBACH

Date Submitted: Saturday, May 19, 2012, 9:09 a.m.

City, State: Philadelphia, PA

Occupation: Teacher

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I don't support a program steals food from the mouths of the hungry to create a "\$33 billion new entitlement program that guarantees the income of profitable farm businesses. That's on top of \$90 billion in subsidies for crop and revenue insurance policies."

JOINT COMMENT OF ANN AND WALT DISNEY

Date Submitted: Saturday, May 19, 2012, 6:42 p.m.

City, State: Virginia Beach, VA

Occupation: Government Worker

Comment: Please do everything you can to see that farmers can produce crops they can sell locally without being terrorized or put out of business. Also see that they get government support just as the big corporate farmers are getting. This is America . . . where everyone has a chance. As you know, Monsanto and people like Bill Gates with a huge amount of wealth are causing many small farmers to sell their farms. These people who are like you and I are being destroyed by the influence and agitation of huge corporations with destructive power. Do not stop supporting the small farmer. Do everything you can to support them. And do what you can to stop the illegal, abusive human tactics, chemical abuses to our air, water, farms, animals, produce, and fish. Pay day is someday . . . if you as legislators do not fight for what is right, you who are representing the citizens of this great country might see it all go down the drain as big business wants and is paying big bucks

for. However, each person, in the end is responsible for their own doings and each person will either suffer grave consequences for the evil they perpetrated or rejoice in doing what he could to be honest, fair, and loving in each of his speech and actions. Each person will either go to be with God, who created each one of us, or go to be with the adversary Satan . . . And we shall see him coming in the clouds . . . Revelations

Make sure you stop all genetically altered seeds and foods because eating altered produce and foods are dangerous and disease causing for the senators and representatives too. Please allow things to be produced naturally without pasteurization and homogenization and stop the feeding of animals and farm raised fish to be fed corn, antibiotics, hormones. They are to eat the food they were designed to eat. Therefore, enact:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF ROSEANN DIVICINO

Date Submitted: Saturday, May 19, 2012, 8:29 a.m.

City, State: Port Richey, FL

Occupation: Caterer

Comment: I fully support organic and sustainable agriculture. The labeling of all GMO products needs to also be addressed. Stop siding with the Agri-Giants such as Monsanto *etc.* Their policies are destroying the water, land, organics and even the bees. Stop whoring for cash and protect the people.

COMMENT OF MEGHAN DIXON

Date Submitted: Friday, May 18, 2012, 5:14 p.m.

City, State: Green Ridge, MO

Producer/Non-producer: Producer

Type: Field Crops

Size: 151–300 acres

Comment: “Food is medicine.” “You are what you eat.” Americans are beginning to realize the truth in these sayings. Genetically modified foods and produce sprayed with chemicals are not part of a “healthy” diet nor is it what’s good for our planet or our children. It seems to be making our population and our soil sick. If you can’t find a ladybug nor an earthworm in the ground where the food is being raised you may reconsider whether or not this food is healthy. If it takes loads of antibiotics to keep the chicken or hog alive until it makes it to the processing plant you may reconsider whether or not that hog or chicken was really healthy.

If you really care about what is best for Americans, please stand up for America and not the Big Money of AgriBusiness. Please make room in the farm bill for continuing to improve the opportunities for Americans to farm organically for the health of our planet and our people. Our lives depend on it.

Regards,

MEGHAN DIXON.

COMMENT OF TAMI DJERNES

Date Submitted: Friday, May 18, 2012, 3:47 p.m.

City, State: Nampa, ID

Occupation: Registered Nurse/Food Coach

Comment: I would like to stop the subsidies that help animal food industries—especially those involved in factory farming. We need to stop giving money to industries that damage the environment, worsen our health, and cause animals to suffer. I am in favor of helping small farmers that grow plant foods for people—and especially those that are organic and non-GMO. Food stamp programs should only pay for healthy foods such as whole grains, legumes, vegetables, fruits, nuts, and seeds. When food stamps are used to buy processed foods that are high in saturated fats, cholesterol, and sugars, this only worsens obesity and leads to more diabetes and cardiovascular disease. We need to stop subsidizing the foods that contribute to

America's health crisis and start promoting sustainable agriculture and a greater emphasis on unprocessed plant-based foods.

COMMENT OF MELBA DLUGONSKI

Date Submitted: Sunday, May 20, 2012, 3:14 p.m.

City, State: Portland, OR

Occupation: Botanist

Comment: Don't let BigAg make the rules. Transparency. Right to know what's in food. Level the playing field for small, local producers. Don't privatize inspection services, or any function that leads to corruption. Reduce use of toxics in agriculture. Run every decision by the obligation to be good for the Earth and its inhabitants, not by the current profit-first yardstick. People have a right to informed choice.

COMMENT OF MICHAEL DOBBS

Date Submitted: Saturday, May 19, 2012, 10:20 a.m.

City, State: Austin, TX

Occupation: Government

Comment: Farmers feed both our country and the entire world. The best examples of farmers are those that grow for their local communities since the community can actually see their efforts. I recommend the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

We need to prevent the degradation of our soils and plant life and prevent any kind of 1930s Dust Bowl-like environmental event. Please fully fund all conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

We need to help develop the future of farming and ranching industries via the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

Everyone deserves to have access to products grown in a manner that is sustaining to the environment and their communities. Please maintain the EQIP Organic Initiative.

Thank you for your time and please consider these important programs when developing any bills. Think about both the present and the future of this country.

COMMENT OF JOAN DOBKIN

Comment: I want small farmers to have a fair shake. I want to see organic farming supported. I want companies like Monsanto that pollute and destroy our absolutely essential bee colonies to fess up pay fines and stop using these harmful, deadly poisons.

COMMENT OF ANGEL DOBROW

Date Submitted: Friday, May 18, 2012, 12:01 p.m.

City, State: Northfield, MN

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: As a local food activist, and farm hand on a 20 organic farm that produces a wide variety of food, sold through numerous venues I feel strongly that our safe food future must include all willing and able to grow real food, non-commodity farming. I was pleasantly surprised to hear yesterday that the Dept of Ag is revising their previously held ideas about nutrition and will start considering portion size *versus* calories when calculating food value. The report I heard said this will lead to conclusions that non-fast food IS cheaper as well as better for you. In addition I support the following actions on the national level:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Let's agree, you do your job of representing the people of your district, and I will continue to do my job of growing and selling real food.
Thanks so much.

COMMENT OF TINA DOBSEVAGE

Comment: Please do what is right for the American citizens by promoting small farms, organic methods, and complete disclosure in labeling what we buy. Please ban GMOs from our food supply.

COMMENT OF AMY DOERING

Date Submitted: Friday, May 18, 2012, 2:29 p.m.

City, State: Venice, CA

Occupation: Media Producer

Comment: They health and purity of our food, water and air are of the most fundamental human rights. Please allow consumers the voice and process to securing healthy food and agricultural choices. The big companies should no longer dominate and control this process.

Thanks,

AMY DOERING.

COMMENT OF MARY DOINO

Date Submitted: Friday, April 27, 2012, 11:51 p.m.

City, State: Santa Fe, NM

Occupation: Disabled Unemployed

Comment: Hello,

I live in public housing, along with a bunch of poor disabled and elderly people. Recently a food truck has shown up once a week. The elderly residents line up hours before the truck comes for food! They wait all morning and into the afternoon. There have been fights, there have been people taking food for their families it is crazy. These people rarely can afford fresh produce, most of them eat out of cans. Most are very unhealthy.

Previously another do-gooder organization would bring a bag each containing expired eggs, not always though, a few old potatoes and sometimes a bag of commodities beans. The beans usually contained insects. These insects have infested many of the apartments here.

Apparently you people in Congress having never missed a meal in your lives have no clue what goes on in America!

Apparently potatoes rice and white bread are good for the poor, ½ of the food given out at these pantries is rotten! I actually received a box of 3 week old donuts! You probably think the poor should be grateful for such a handout! If one were to eat most of this garbage, they would get Diabetes, which is rampant here!

Some of the senior get meals on wheels, another mess, No Nutritional value, occasionally mixed canned items, no protein, unless you count what is in one slice of cheap cold cut. The often serve rice and potatoes in the same meal, along with a slice of white bread. This is what they are giving seniors, I guess they are trying to kill them quicker. These meals add to the lack of nutrition of the poor! They add to the diabetes and other obesity related issues. The poor are eating the cheap garbage which will ensure that they will have more medical problems. It is disgusting. It is so sad to see elderly disabled people, who as I write this are waiting for the food truck! These people have to lose any shred of dignity, stand in line and fight over the food that may or may not be delivered!

I have a spinal cord injury so I can't really wait in line, for an indefinite amount of time. I also do not like taking their handouts when some of these people need it so desperately they are willing to fight!

I saw on the Internet that they are trying to pass another big farm bill that includes Billions to subsidize huge Companies, that are already profiting at our expense. Instead of subsidizing Healthy food, **Big Agribusiness** will get billions to force more garbage on the American People! Thanks to them we have an epidemic of obesity, Diabetes and other health issues! It is difficult to find descent food anymore unless you have transportation and the ability to pay! These diseases are costing this nation billions in Health Care alone, yet they continue to subsidize **Big Agribusiness!**

Date Submitted: Friday, May 18, 2012, 3:30 p.m.

City, State: Shoreline, WA

Occupation: LMT, Sole Proprietor

Comment: Organic, clean (non-chemically treated), local (whenever possible) and Non-GMO foods are what are healthiest for our population. I urge you, as a constituent, to represent these preferences of mine.

COMMENT OF JULIA DOLAN

Date Submitted: Friday, May 18, 2012, 2:46 p.m.

City, State: Minneapolis, MN

Occupation: Work Order Coordinator

Comment: The biggest need of the world right now is to be leaning ever more and more **To/Towards** organic farming and smaller, family owned farms—not **Away** from it. Please do not pass bills ending advocacy/funding and research for the best thing that could happen to the human race (*i.e.*, organic farming).

COMMENT OF REBECCA DOLL

Date Submitted: Saturday, May 19, 2012, 10:48 a.m.

City, State: Wimberley, TX

Occupation: Writer

Comment: I request that you support farm policy that sustains life biodiversity and next seven generations of Earthlings. Clearly, the biggest agricultural producers are only concerned with profit and not responsible land management. Please put your constituents before your own personal interest by refusing to support the farm bills presented by agribusiness and all the perks that go with doing their bidding.

COMMENT OF BETTY J. DOMBEK

Date Submitted: Thursday, May 10, 2012, 7:39 a.m.

City, State: Belmont, NY

Occupation: Retired

Comment: I truly believe these programs are vitally important to help feed families who are elderly, disabled, mothers w/children, people who cannot make it farming and living on farm. I feel the farmers work very hard to grow crops and their livestock. With the economy today and no jobs, unemployment, utilities raising costs; all these programs need to be in effect for our peoples of America.

God Bless.

COMMENT OF SARAH DOMENICK

Date Submitted: Wednesday, May 02, 2012, 2:49 p.m.

City, State: Philadelphia, PA

Occupation: Student

Comment: I would like to see this new farm bill shift more subsidies to organic, local, and small scale agriculture. The path we're on now, supporting only large scale commodity crops farms is unsustainable. We need to shift the focus to a more regional focus, allowing smaller farmers to grow produce that people can actually eat. The problem of hunger is not a problem of not having enough land or high enough productivity. It is a problem of poverty and inefficient use of land. To build a truly sustainable food system, this farm bill needs to make small scale, sustainable, organic agriculture economically feasible. Furthermore, I find it somewhat useless that a Federal bill controls agriculture for the entire country, one that has vastly different climates, topography, soil, *etc.* Perhaps more control should be relegated to states and counties in order to be more place-appropriate.

COMMENT OF BLAKE DONLEY

Date Submitted: Friday, May 18, 2012, 9:05 p.m.

City, State: Golden Valley, MN

Occupation: Systems Analyst

Comment: **Do Not** cut \$4 million from organic research funding and cut in half funding to support Beginning Farmers. Support organic food. No one wants to continue to eat the poison that gigantic industrial farms are pouring onto supermarket shelves. The food system in the U.S. is a disgrace and the rest of the world knows it. It is absolutely pathetic what special interest has done to our food supply. The food is making U.S. citizens sick, big Pharma is creating drugs to "treat" all of these new chronic diseases, and the tax payer is picking up the tab while the U.S. Govt. plunges us further into debt to deal with the health care crises. Well done congressmen and women, well done.

COMMENT OF MICHAEL DONNELLY

Date Submitted: Sunday, May 20, 2012, 8:27 a.m.

City, State: Lincoln, AL

Occupation: Maintenance Electrician

Comment: I think it is essential that consumers are given the option to choose to support their local farms. I feel that mandating Country of Origin Labeling is something we need to continue. Local sources of healthy food is an essential part of keeping communities strong.

COMMENT OF ROBERT DONNELLY

Date Submitted: Friday, May 18, 2012, 2:14 p.m.

City, State: Silver City, NM

Occupation: Wool Milling Consultant

Comment: Committee members;

I write you today as a consumer of agricultural products and a former worker in the field of milling agriculturally produced fibers (mainly wool). I am wanting to make sure that you as representatives of me (the people).

I ask you to act to see that U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

I Endorse (and ask that you do the same):

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative

In general, there's no need to kowtow to your international agribusiness corporations, even though you believe you have to to get re-elected. Corporations are **Not** people.

We are the people, and I vote.

COMMENT OF JEAN DONOHUE

Date Submitted: Thursday, May 03, 2012, 2:03 p.m.

City, State: Portland, OR

Occupation: Social Media Producer

Comment: We need to support small-scale sustainable farming, local food infrastructures, farmland preservation, soil and water conservation.

Subsidies should go to farms that are food for local and regional consumption. Price supports are needed for vegetables and fruit grown for local markets.

COMMENT OF ELAINE DONOVAN

Date Submitted: Friday, May 18, 2012, 4:32 p.m.

City, State: Hemlock, NY

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I run a small vegetable farm which adheres to organic and sustainable practices. I am not alone as there are many small family farms in my area. Please do not cut funding for programs vital to our citizens health such as nutrition, conservation and support for organic and sustainable farming.

It is morally reprehensible to allow Agribusiness to buy their way into writing the rules. We need a fair and healthy farm bill.

COMMENT OF S. "MARGUERITE" E . DONOVAN, C.S.J.

Date Submitted: Friday, April 27, 2012, 11:05 a.m.

City, State: Cohoes, NY

Occupation: Retired Teacher

Comment: The country was built on the back of small farmers. The U.S. Gov't. does not need to subsidize mega-agricultural enterprises, but **Does** need to support the small, family-run farms.

COMMENT OF SHELLEY DOONAN

Date Submitted: Friday, May 18, 2012, 3:40 p.m.

City, State: Covina, CA

Occupation: Culinary Instructor Cal Poly Pomona

Comment: It is my belief that everyone should have the ability to eat clean wholesome farm fresh foods. We should support family farmers and varied crops. So that we are as sustainable as possible, and able to provide for generations to come.

COMMENT OF TERRI DORAIS

Date Submitted: Friday, May 18, 2012, 12:40 p.m.

City, State: Kingston, AR

Occupation: Buyer

Comment: It is very important to me that my family eats non-GMO & organic food, preferably by local farmers and that we quit polluting our land and water. I am really tired of industrial agro-businesses polluting our food & environment with toxic chemicals in the name of money. Farming with chemicals is not sustainable agriculture. I am hopeful that you will listen to the voice of the people and create a farm bill geared towards the health of people and the planet. Please support all provisions of the Local, Farms & Jobs Act (H.R. 3286), offer full funding to conservation programs like the Conservation Stewardship Program. Maintain the EQIP Organic Initiative and implement all the provisions of the Beginning Farmer & Rancher Opportunity Act (H.R. 3236). We need to move away from industrial farming and offer more opportunities to small organic farmers.

COMMENT OF TOM DORAIS

Date Submitted: Friday, May 18, 2012, 1:05 p.m.

City, State: Kingston, AR

Occupation: Account Manager

Comment: It is crucial to emphasize the nutritional values of sustainable organic production and shift from the high fructose corn syrup dominated food stream which is a main contributor to the obesity epidemic.

COMMENT OF NAOMA DORETY

Date Submitted: Saturday, May 19, 2012, 10:45 a.m.

City, State: Hopewell, NJ

Occupation: Retired

Comment: I raised three sons under 16 when my husband died and I was able to house and feed them since I had a steady job. It is incredible that a country with so much wealth and farms that we have people starving daily. I am retired, living on \$25K. I support the food banks in my state, sponsor a child in South America one in Arkansas, USA, along with world hunger and USA food programs. What is wrong with our Congress that they don't support programs that allow our children and elder citizens to be cared for. I am ashamed that belly full Americans that try to save the world can't save America.

Stressed,

N. DORETY.

COMMENTS OF ELLEN DORFMAN

Date Submitted: Friday, May 11, 2012, 1:59 p.m.

City, State: Olympia, WA

Occupation: Single Mom

Comment: Stop supporting huge agribusiness that grows one crop and uses tons of toxic pesticides and herbicides and kills everything from bees to you name it. Support small, sustainable and **Organic** farmers, **Not** GMO and Monsanto! Support local sustainable **Healthy** fresh foods, grown with less water and not toxic residues that **Are** killing everything from honey bees to the planet and people!

Date Submitted: Friday, May 18, 2012, 3:33 p.m.

Comment: We wanted to make sure that you knew about a new proposed rule that the USDA's Animal and Plant Health Inspection Service (APHIS) announced this week and about an opportunity for you to weigh in. USDA is proposing to revise its definition of *retail pet store* to close a loophole that has threatened the health and humane treatment of pets sold sight unseen over the Internet and via phone- and mail-based businesses.

COMMENT OF DON DOTTER

Date Submitted: Friday, May 18, 2012, 2:05 p.m.

City, State: Moss Beach, CA

Occupation: Founder Farm Organics

Comment: Balance as in the scales of justice should be the realized model for our food system. Good nutritional food comes from healthy seeds. People benefit when they realize that food is actually medicinal in its foundation. Organic fruits and vegetables would be and should be the foundation of our food system. Keep the GE's and the GMO's away from our citizens and seek the balance we need for a healthier citizenry and a healthier economy. Yes this is a national security issue, I believe.

COMMENT OF J. KELLY DOUGHERTY

Date Submitted: Friday, May 18, 2012, 2:12 p.m.

City, State: Kansas City, KS

Occupation: Facilities

Comment: You want a healthy county, out large agriculture business threaten that on a daily basis. You are against coverage for the poor and middle class, well if our farm and food standards were strong, we wouldn't have some of them medical issue that we have today. We as consumers have a right to be protected from corporations whose only concern is the bottom dollar and not the health of the people they sell too. Please, if you are for your constituents, it is important that to do what is right for the consumer and the small farmers, the ones who work very hard and help to make this country not with **Big Business!**

COMMENT OF JOYCE DOUGHTY

Date Submitted: Sunday, May 20, 2012, 2:05 p.m.

City, State: Greeneville, TN

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Don't cut any founds to those who need food, many farmers donate food to local food pantry to help feed the homeless and the hungry. Seminole County is in need of this local farmers to supply fresh produces to the families in need.

COMMENT OF KEVIN W. DOWNER

Date Submitted: Friday, May 18, 2012, 1:30 p.m.

City, State: Farmington, PA

Occupation: College Professor

Comment: Please explain to me when common sense and the needs and wants of everyday Americans are going to start taking precedence over money, lobbyist and corporate greed. Stand up, make a statement, say no to this crap and vote for this farm bill. Do what is right for a change and not what most benefits you and the rich and powerful. Remember why you were voted into office for which is to represent the interests of the American people and the people and farmers of western PA. Thank you for your time and hopefully grave concern regarding the food supply of this nation.

Sincerely,

KEVIN W. DOWNER.

COMMENT OF JOHN DOWNEY

Date Submitted: Friday, May 18, 2012, 7:41 a.m.

City, State: Margaretville, NY

Producer/Non-producer: Producer

Type: Field Crops

Size: Less than 50 acres

Comment: We need a strong farm bill that supports and encourages farming to continue and to grow in the USA. My wife and I are new to farming and are struggling to make it a viable business. Attempts to grow using USDA grants is not happening as the funding is usually provided to larger established farms. That system is not helping the new farmer the way it should.

COMMENT OF MARGARET DOYLE

Date Submitted: Friday, May 18, 2012, 1:00 p.m.

City, State: Norwood, MA

Occupation: Healthcare

Comment: The subsidized insurance program Congress proposes to replace direct payments to commodity farms will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk. We need real subsidies to vegetable and fruit farmers who grow organic and/or use less harmful pesticides on the land. Presently only .37% of total farm subsidies go to vegetable farmers while 73.8% go to meat and dairy farms. If government is serious about eliminating obesity in the country, it must redirect allocations to help produce a healthier food supply for all of us. Commodity farmers are not the answer for a healthy America.

COMMENT OF GILLIAN DRAKE

Date Submitted: Friday, May 18, 2012, 7:03 p.m.

City, State: North Eastham, MA

Occupation: Publisher

Comment: We need a farm bill that supports smaller producers and those who grow REAL FOOD, not wheat, corn and soy, and animals raised in CAFOs—which are largely responsible for the obesity and ill-health of America’s people. If we cut refined foods out of our diets, we will all be healthy people, and will save billions of dollars on health care. By voting for a **Sane** farm bill that supports quality food, organic food, locally-produced food, you will be doing what you have been elected to do: protect and nurture the citizens of this great country, not the corporations that profit from processed foods made with the cheapest ingredients, thanks to subsidies, drenched in pesticides and then refined so that there is no nutrition left in them.

A **Sane** farm bill will help lower health care costs in America and ensure that our next generation grows up to be healthy, strong and can carry America forward. Otherwise, it will be the end of America. It’s that simple. Thank you for doing the right thing for America.

COMMENT OF CHRISTIANE DRAPKIN

Date Submitted: Friday, May 18, 2012, 1:27 p.m.

City, State: Rockville, MD

Occupation: Musician

Comment: I’ve supported local small growers and organic farm for the past 30 years. We need true support for small, independent farmers to grow healthy food. We want to feed our families right.

COMMENT OF ANNA DRECHSLER

Date Submitted: Thursday, May 17, 2012, 12:23 p.m.

City, State: Des Plaines, IL

Occupation: Retired Teacher and Urban Organic Gardener

Comment: 2012 Farm Bill has to reflect what America needs today. It must contain support structure for family owned farms, which will produce healthy, wholesome food (vegetables, fruit, meat and dairy) extremely important to stop epidemic of obesity in U.S., will produce sustainably to preserve healthy soil, water and quality of air. Prosperous family farms will grow jobs and well being in their communities and provide better future for next generation of farmers and rural workers.

COMMENT OF ANNE DREHFAL

Date Submitted: Friday, May 18, 2012, 2:38 p.m.

City, State: Whitewater, WI

Producer/Non-producer: Producer

Type: Fruits, Vegetables

Size: Less than 50 acres

Comment: I am a beginning organic produce farmer starting up a Community-Supported Agriculture (CSA) farm in Whitewater, WI, called Regenerative Roots. We will sell our produce directly to our farm members through a produce subscription process and at a local Farmers’ Market. Even though we are new to this community, we have sold out mid-April of our CSA shares for the season; there is a need for fresh organic produce in this community and our members find it important to be connected to where their food is coming from for food safety, community-building, economic, and environmental reasons. We are committed to a highly diverse ecology for producing food which encompasses perennials, livestock, and fungi alongside annual vegetable production. We envision the farm as an educational

space for ourselves and the community. We would like to keep the farm at a manageable size, where we can observe and participate in all of its aspects. We believe all of these values will help produce high quality food to nourish the land, ourselves and our neighbors in an ecologically regenerative and economically sustainable way.

At Regenerative Roots our primary mission is to be a responsible steward of the soil, because healthy soil is what brings forth healthy life. Our topsoil is this nation's #1 export (in tonnage) and if we don't strive to change our farming practices to focus on soil health and retention, this country will have major food security issues in the future. In 1997, 1.9 billion tons of soil eroded from U.S. land, reports the National Resources Inventory of the USDA (<http://css.snre.umich.edu/css—doc/CSS00-04.pdf>).*

This equals a truckload of topsoil, escaping via the Mississippi River every 3–10 seconds, depending on the time of year. I think this is fact that is rarely discussed amongst farm bill conversations. We should change that with the 2012 Farm Bill.

Long-term planning for our country's fertile soil needs to be a priority over profit, although with sustainable agriculture they can be realized together. For this reason, I am incredibly supportive of the conservation measures and resources that the USDA has made accessible to farmers through the Environmental Quality Incentives Program, Conservation Stewardship Program, and Cooperative Conservation Partnerships Initiative. These programs work together to assist farmers protect and rebuild soil, provide clean water and wildlife habitat, and supply other environmental benefits, while maintaining vibrant and productive farms and ranches.

As a Young Farmer, entering the world of agriculture as most of our nation's farmers are retiring, I urge members of Congress to support both the Beginning Farmer and Rancher Opportunity Act and the Local Farms, Food, and Jobs Act.

The Beginning Farmer and Rancher Opportunity Act will invest in the next generation of American producers by:

- Enabling access to land, credit, and crop insurance for new producers
- Assisting new producers to launch and strengthen new farm and value-added businesses
- Helping new producers become good land stewards
- Providing training, mentoring, and research that beginning farmers and ranchers need to be successful
- Conducting outreach on agricultural job opportunities for military veterans

In my experience, the biggest hurdle to starting our own farm was access to land—a search that took over 2 years. This first season we are renting land, but as we invest in sustainable perennial crops it is important to us to have a solid long-term lease or access to FSA loans. In southern Wisconsin, we are blessed to have many organic farming mentors and organizations that strive to share knowledge and resources about sustainable methods. This Act could help to provide a similar support system for Beginning Farmers across the nation.

The Local Farms, Food, and Jobs Act will drive economic growth by:

- Creating economic opportunities for farmers and ranchers through local and regional markets
- Improving processing and distribution infrastructure for local and regional agriculture
- Expanding access to healthy food for consumers, including underserved communities
- Providing research, training, and information that farm entrepreneurs need to be successful

Our country needs strong resilient communities to survive the uncertainties of the future. Strong local food systems, healthy Main Streets, community gathering places, and dynamic neighborhoods are all components of resiliency. Local and regional agriculture is a major economic driver in the farm economy. There are now more than 7,000 farmers markets throughout the United States—a 150 percent increase since 2000, direct to consumer sales have accounted for more than \$1.2 billion in annual revenues. Now, on the heels of that expansion, we are witnessing the rapid growth of local and regional food markets that have scaled up beyond direct marketing. Together these markets represent important new job growth and economic development.

I urge you to join your colleagues and support both the Beginning Farmer and Rancher Opportunity Act and the Local Farms, Food, and Jobs Act, as well as the Environmental Quality Incentives Program, Conservation Stewardship Program, and Cooperative Conservation Partnerships Initiative in the writing of the 2012

*The document referred to is retained in Committee file.

Farm Bill. These programs are incredibly important to the survival of young and sustainable farmers across Wisconsin and the agricultural heritage of our incredible state. They also account for such a small portion of the farm bill budget overall, but will help to guarantee healthy food, water, and soil for years to come.

Thank you for providing an opportunity to share my views on the upcoming farm bill,

ANNE DREHFAL.

COMMENT OF CAROL DREIBELBIS

Date Submitted: Friday, May 11, 2012, 11:20 a.m.

City, State: Arlington, VA

Occupation: Nonprofit

Comment: We need a farm bill that makes healthy food widely available to all Americans—including schoolchildren—to combat the growing obesity epidemic! We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.

We also need a farm bill that protects our natural resources—protect the Conservation Stewardship Program from unfair funding cuts, and improve it by ranking applications solely on their conservation benefits. Farmers count on CSP and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife—all while farming profitably.

COMMENT OF MERLIN DRESHER

Date Submitted: Friday, May 18, 2012, 11:55 a.m.

City, State: Canton, KS

Producer/Non-producer: Producer

Type: Fruits, Greenhouse/nursery, Specialty Crops, Vegetables, Other

Size: Less than 50 acres

Comment: Consumers are demanding more locally grown organic fruits and vegetables. It is not easy for young farmers to get started without some assistance. The farm bill needs to provide for this, including helping families have access to healthy whole foods. Processed foods have victimized our society to a couple generations of obesity and diabetes, through ill advised USDA catering to large food processing corporations.

COMMENT OF RANDI DRESNER

Date Submitted: Tuesday, March 20, 2012, 11:24 a.m.

City, State: Hauppauge, NY

Occupation: President & CEO, Island Harvest

Comment: Public Comments to the House Agriculture Committee

Farm Bill 2012

Island Harvest

Please consider the following comments on behalf of the over 283,000 Long Islanders who rely on the Island Harvest network for food assistance.

As the Committee continues to engage in debate on the 2012 Farm Bill, I urge Members to enhance support for Federal nutrition programs like the Supplemental Nutrition Assistance Program (SNAP), The Emergency Food Assistance Program (TEFAP), and the Commodity Supplemental Food Program (CSFP). On Long Island alone, 85.1% of pantries, 59.7% of kitchens, and 71.0% of shelters receive food from TEFAP, approximately 11,000 Long Island seniors receive food packages through CSFP each month, and over 100,000 Long Islanders help feed their families with SNAP benefits.

SNAP alone has extraordinary strengths:

- SNAP's accuracy rate of over 96% is at an all-time high and is considerably higher than many other Federal benefit programs. SNAP error rates declined by ⅓ from FY 1999 to FY 2010.
- SNAP's responsiveness to unemployment proved it to be one of the most effective safety net programs during the recent recession, providing families with a stable source of food. As the number of unemployed people increased by 94% from 2007 to 2011, SNAP responded with a 70% increase in participation over the same period.
- SNAP benefits are spent quickly—97 percent of benefits are redeemed by the end of the month of issuance—thereby bolstering local economies. Moody's Ana-

lytics and USDA estimate that the economic growth impact of SNAP ranges from \$1.73 to \$1.79 per \$1 of SNAP benefits.

- SNAP is targeted to go to the neediest and most vulnerable people in our country. The average household has an income of only 57% of the Federal poverty guideline and 84% of all benefits go to households with a child, senior, or disabled person.
- SNAP lifted 3.9 million Americans above the poverty line in 2010, including 1.7 million children and 280,000 seniors.
- SNAP relieves pressure on overwhelmed food banks, pantries, religious congregations and other emergency food providers across the country who could not begin to meet the need for food assistance if SNAP eligibility or benefits were reduced.

For the growing number of Long Islanders at risk of hunger, food banks are truly the first line of defense and many times the only resource standing between them being able to put food on the table or going to bed with an empty stomach. However, the charitable food assistance network cannot meet the needs of these families alone. It is only through our public-private partnership with effective programs like SNAP and other programs in the nutrition safety net that we can truly end hunger on Long Island.

COMMENTS OF GAIL DRESSEL

Date Submitted: Friday, May 18, 2012 12:58 p.m.

City, State: Pine Grove, PA

Occupation: Advocate

Comment: We need more and better farming not factory farms who are destroying the environment our health and all the pain and suffer by them practicing and getting away with animal abuse because someone thinks farm animals feel no pain and aren't worthy of help . We need better humane methods to raise farm animals in and you need to step it up. Other countries are so far ahead of us and give the animals room and better care because they know they are animals at their mercy why don't we do it.

Date Submitted: Friday, May 18, 2012, 12:14 a.m.

Comment: We need more farmers and get rid of factory farms its destroying our health and hurting animals and environment time for a change. No

Comment: I would like to encourage you to support a 2012 Farm Bill that expands opportunities for family farmers to produce good food for our communities. A bill that makes healthy food widely available to all Americans! We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers & ranchers. Thank you for your careful consideration of this matter.

COMMENT OF KELLY DRISCOLL

Date Submitted: Friday, May 18, 2012, 11:55 a.m.

City, State: Norman, OK

Occupation: Marketing/Planning

Comment: I am currently attending a beginning farmers program run by the Kerr Center for Sustainable Agriculture. My husband and I hope to start a small scale farm in the next 3 to 5 years. I ask you to consider the needs of the small, sustainable producer and end commodity subsidies. Please create real agricultural risk coverage for the small-scale producers of diverse vegetable crops, and continue to support beginning farmer training and grant programs.

COMMENT OF THETA DRIVON

Date Submitted: Saturday, May 19, 2012, 2:31 p.m.

City, State: Asheville, NC

Occupation: Teacher

Comment: I believe our country needs true Food Security through support for organic (pesticide-, herbicide-, hormone-, and GMO-free) agriculture, small farms, nu-

trition education based on science and tradition not corporate interest, and conservation of wild places.

COMMENT OF BEN DROZ

Date Submitted: Friday, May 18, 2012, 7:10 p.m.

City, State: Pittsburgh, PA

Occupation: Photographer

Comment: Agriculture subsidies are far too high in our economy. The farm bill should subsidize struggling farms, sustainable agriculture, things that science says we should work towards and things that are already too expensive. It is offensive that taxpayer dollars subsidize a corn surplus which changes our food supply. Doctors and scientist agree, this is wrong. Change the subsidy structure to help family farms, not mega farms.

COMMENT OF JULIE DU BOIS

Date Submitted: Friday, May 18, 2012, 5:28 p.m.

City, State: West Hills, CA

Occupation: Mortgage Workout

Comment: I am disgusted that Congress has voted to slash \$33 billion from the food stamp program while leaving farm subsidies unscathed.

I do not believe in agribusiness. They are poisoning our natural resources and they are harming animals. I believe the assistance should go to **Family Farms** and organic research funding to support Beginning Farmers.

The Senate Ag Committee has voted to get rid of wasteful subsidy payments. It has proposed to replace it with a new subsidized insurance program that leading sustainable agriculture advocates are calling rife with opportunities for fraud and abuse.

Please support the family farms, not agribusiness. We need healthy, meaningful assistance to those whose lives are entrenched in their family farms. They are our American Heroes—along with our teachers, firefighters and nurses!

COMMENT OF FEDERICO DUAY

Date Submitted: Friday, May 18, 2012, 5:00 p.m.

City, State: Rye, NY

Occupation: Teacher

Comment: Please end subsidies to large corporations, they already have enough money to do their job. Instead please support lox cal farmers, who employ American people. Thank you!

COMMENT OF THOMAS DUBS

Date Submitted: Wednesday, May 16, 2012, 10:19 a.m.

City, State: Finleyville, PA

Occupation: Associate Director

Comment: Feeding our neighbors is a public-private partnership many private organizations are doing their part but they cannot fight this battle against hunger without our government's help. Cutting anti-hunger programs will increase hunger in America, as well as the associated health care, educational, and economic costs of food insecurity and poor nutrition. Please remember the families who are struggling in our community and protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization.

COMMENT OF ROSEMARY DUDLEY

Date Submitted: Sunday, May 20, 2012, 5:15 p.m.

City, State: Oakland, CA

Occupation: Jeweler

Comment: My family has owned a small farm in Missouri for four generations. We would like the farm bill to focus on programs that aid small farmers, organic and sustainable farm practices, nutrition, and the Conservation Resource Program, in particular.

COMMENT OF CONNOR DUFFY

Date Submitted: Sunday, March 25, 2012, 8:14 p.m.

City, State: Norwood, PA

Occupation: Student, Box Office Clerk

Comment: You must eliminate subsidies that unfairly aid agribusiness farmers over small, family, and subsistence farmers. More importantly, stop subsidizing crops that are financially unsustainable. There are many cash crops that can be grown cheaper elsewhere in the world. Millions of dollars of subsidies wastes taxpayer dollars while disadvantaging those in developing countries.

We are a country built on the back of powerful agriculture—a financially unsustainable cotton industry which relied upon slave labor. The subsidies, as well as looser wage restrictions for farm workers, has replaced that system. But it must stop.

Use the money for subsidies to buy seeds and tools for more financially sustainable crops. The billions of dollars of subsidies could instead go to re-training farmers into more sustainable practices.

COMMENT OF MERCI DUFFY

Date Submitted: Friday, May 18, 2012, 3:39 p.m.

City, State: Milwaukee, WI

Occupation: Self-Employed

Comment: A farm bill that stresses organic, local and sustainable farming over corporate interests benefits not only the health of our bodies, but the health of our country and economy. I urge you to help us reach our forward thinking goals!

COMMENT OF MICHELLE DUGAN

Date Submitted: Friday, May 11, 2012, 10:50 p.m.

City, State: Upper Darby, PA

Occupation: Retired

Comment: Industrial agriculture is destroying our health and our children's future. The farm bill must preserve the Earth to sustain life. Development aid to the poor must be preserved as well.

COMMENT OF ALICE DUGAR

Date Submitted: Sunday, May 20, 2012, 12:04 p.m.

City, State: Independence, OH

Occupation: Educator

Comment: I rely on healthy, pesticide-free, GMO-free, organically-grown food that is sustainably produced with great respect for the land, water and air that creates that food and with the assistance and dedication of farmers who take pride in their farms and work beyond the solitary goal of profit. Create a farm bill that has this goal at the core of its content.

COMMENT OF ERIC DUGGAN

Date Submitted: Saturday, May 19, 2012, 3:02 a.m.

City, State: West Sacramento, CA

Occupation: Govt.

Comment: Rep. Thompson, your constituents are watching closely especially to see if the subsidies for millionaire farmers are continued. Also, the cat is out of the bag, so give up the cozy relationship with Monsanto. It really is quite disgusting.

COMMENT OF PHYLLIS DUJON

Date Submitted: Friday, May 18, 2012, 12:21 p.m.

City, State: Newnan, GA

Occupation: Retired Nurse

Comment: It is time to stop giving huge subsidies to the corporate farms. They are putting our food at risk with the addition of antibiotics in animal feed and the huge amount of pesticides that are used plus the addition of growth hormones that are added. Our nation is not a healthy nation and it has nothing to do with fast food. We need to be able to eat pure wholesome food.

COMMENT OF KIMBERLY DUKE

Date Submitted: Saturday, May 19, 2012, 6:43 a.m.

City, State: Millburn, NJ

Occupation: Statistician

Comment: Good quality food for everyone in the USA is possible. I believe the food we eat has more impact on our health than any other lifestyle choice.

We're depending on you to make the right choice for all of us. Thanks.

COMMENT OF MICHELE DUNAJ

Date Submitted: Friday, May 18, 2012, 11:35 p.m.

City, State: Old Lyme, CT

Occupation: Freelance Editor

Comment: Americans are suffering because of factory farms and agribusinesses who put the almighty dollar before our health. We need to support organic farming practices and small farmers—**Not** big business.

COMMENT OF VICKI DUNAWAY

Date Submitted: Friday, May 18, 2012, 9:56 p.m.

City, State: Lincoln City, OR

Occupation: Postal Worker/Former Farmer

Comment: My husband and I have retired from small-scale farming, but we certainly did not feel we got much support from the government while we were farming, other than some help from Extension personnel (once they finally figured out organics were not a fad). How about some real change? Instead of supporting a farm bill that gives Big Ag lots of cash to produce stuff that is already produced in massive surplus, why not support folks who are growing things that are healthier and more labor-intensive? Make it easier for small farmers to bring healthy foods into inner cities and other food deserts! Link food stamps and unprocessed foods, with voluntary food preparation classes for those receiving food stamps. Label GMO products so people can have enough information to make decisions about them.

Finally, stop harassing raw milk producers. What is the point of that? There are far fewer people made ill every year by raw milk than by dog bites, but I don't see anyone calling for abolition of pet dogs.

COMMENT OF KATHY DUNDEE

Date Submitted: Friday, May 18, 2012, 9:24 a.m.

City, State: Austin, TX

Occupation: Assistant Division Director, Education Association

Comment: Food, pretty much an essential for living. Healthy living is directly influenced by the kinds of food one eats, so the healthier, better the food, the better health for the person. Over-use of chemicals, pesticides, *etc.* directly links to increases in cancer, *etc.* It's a no-brainer that we, as a nation, should be doing everything we can to maintain a healthy, chemical-free food supply.

COMMENT OF ALLISON DUNGAN

Date Submitted: Friday, May 18, 2012, 9:29 a.m.

City, State: Madison, WI

Occupation: Researcher

Comment: The agricultural track that we are on is not one that is reasonable in the long run. Instead of encouraging our farms to be natural treasures and a source of food that nourishes our nation (including our soils, water, and air) the farm bill supports policies that are currently seeing massive amounts of conservation land tilled under in place of more rows of corn. Please make changes to the subsidy structure, and for goodness sake let's get some more support for organic agriculture. I would also suggest that less focus be put on crop insurance—that policy is encouraging people to farm on marginal lands that should not be tilled. If we don't make a change this farm bill will be supporting a form of stealing—we are stealing the resources of fertile soil, and clean water from our future farmers.

COMMENT OF PATRICIA DUNHAM

Date Submitted: Sunday, May 20, 2012, 2:42 p.m.

City, State: Eugene, OR

Occupation: Retired Librarian

Comment: Corporations are **Not** people, or farmers! The farm bill should support organic & family farmers—operations that produce safe, low carbon food; **Not** factory meat operations and corn and soy monocultures that destroy our soil, waste our

precious, increasingly scarce water, and poison us with fertilizer, insecticides, pesticides, *etc.*! **Not** untested GMO organisms—USDA is **Fools** for taking manufacturer testing results!

COMMENT OF GINGER DUNLAP

Date Submitted: Saturday, May 19, 2012, 9:43 a.m.

City, State: Bakers Mills, NY

Occupation: Retired Teacher

Comment: My representative is not likely to listen to, or be swayed by, any plea of this sort. Whenever I've addressed him to similar problems, his answers have always skirted around it with a smooth political statement.

COMMENT OF TIMOTHY DUNLEAVY

Date Submitted: Friday, May 18, 2012, 9:31 p.m.

City, State: State College, PA

Occupation: Retail Management and Home Gardener

Comment: I am distressed that Federal Programs effecting my community may be cut. I have witnessed an explosion in small scale food production that has brought jobs and revenue into my county. I know many small farmers who would benefit from H.R. 3286 and H.R. 3236 as well as the Conservation Stewardship and EQIP Organic Initiatives.

It is disappointing to realize that billions will be cut from actual food production to bump up the subsidies for Industrial Agriculture to nearly \$123 billion. Americans eat too much industrial food and have the health problems to prove it.

The small amounts being asked to promote smaller scale sustainable and organic growers are an investment in the future of Agriculture, and key to getting new blood onto the farms. The old system is dying with the elderly farmers who make up the bulk of today's producers. It is imperative we continue the programs that support the new generation of food producers that we so desperately need.

COMMENT OF HOLLIS DUNLOP

Date Submitted: Friday, May 18, 2012, 9:12 a.m.

City, State: Marion, MA

Occupation: College Student

Comment: More than a handful of Congress members need to have input about this bill. It is one of the most important yet least citizen involved decisions made in the U.S. every 5 years. Please make changes that support local farms and communities and reduce the amount of subsidies to agribusiness giants.

COMMENT OF CHERYL DUNN

Date Submitted: Friday, May 18, 2012, 5:53 p.m.

City, State: Austin, TX

Occupation: Finance & Accounting

Comment: As a supporter of my local food bank, I am writing to share my concern about hunger in Texas. With unemployment still high and many Americans still struggling to make ends meet, anti-hunger programs are helping many of our neighbors just put food on the table.

Nearly 50 million Americans are living in food insecurity. While food banks, churches, and pantries are doing great work in our community, charity alone cannot meet the need for food assistance.

Congress should do its part by continuing to support anti-hunger programs like the Supplemental Nutrition Assistance Program (SNAP), The Emergency Food Assistance Program (TEFAP), and the Commodity Supplemental Food Program (CSFP), all of which are authorized in the farm bill.

Cutting anti-hunger programs will increase hunger in America. Given the associated health care and educational costs of hunger and poor nutrition, cuts to anti-hunger programs are short-sighted.

I ask you to please remember the families who are struggling in our country, and urge you to protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization.

Hunger is unacceptable.

Thank you for your action!

COMMENT OF WESLEY DUNN

Date Submitted: Friday, May 18, 2012, 11:11 a.m.

City, State: Gloucester, MA

Occupation: Student

Comment: As a soon-to-be student of ecological agriculture at the University of Vermont and a worker on a biodynamic farm in New York in the summer, I implore you to take steps in this latest edition of the farm bill to lead our country from industrial-based agriculture to the more financially, environmentally and socially sustainable option of local food production. When I work in the summer and when I study in school, I intend to be doing this personally. I urge you to do the same at your level. When I leave school, I want to be a farmer. Not a monocrop producer enslaved to a contract; a farmer, overseeing a diverse crop, feeding and supporting my local community, respected and admired for the skill and expertise I will have built, that the work will require. I know I'm not the only 18 year old in this country with such a dream. Please, help make our futures, and that of our country brighter.

COMMENT OF SHAWN DUNNAGAN

Date Submitted: Saturday, May 19, 2012, 2:45 p.m.

City, State: Boise, ID

Occupation: Registered Dietitian and Professor

Comment: Please take the time to better understand the connection between the health of American citizens, our environment and our food system. We need to reconsider the negative effects of the large agribusinesses on food and health and help smaller, organic farmers rebuild local, sustainable economies. Everyone wins in this restructuring!

SHAWN DUNNAGAN.

COMMENT OF JENNIFER DUSTER

Date Submitted: Thursday, May 17, 2012, 5:53 p.m.

City, State: Solon, IA

Producer/Non-producer: Producer

Type: Fruits, Greenhouse/nursery, Poultry/poultry products, Specialty Crops, Vegetables, Other

Size: Less than 50 acres

Comment: This country (and especially Iowa) needs a farm bill that addresses the shift in the food culture. More and more people want to know where their food is coming from and who grows it, but the large corporate farms are resistant to this change and obstruct it any way they can. Iowa used to be a state made up of proud family farmers, now there is homestead after homestead standing empty or being torn down to make way for more "mega farms" that pollute our countryside and ruin the communities. Help form a food bill that will apply to and help small farmers succeed and grow. We don't need corn and soybean subsidies . . . we need grants for new farmers to get started building their farms and helping to market their produce to customers. The food pyramid has changed and will continue to change. We need legislation that reflects what the people want . . . not what corporate interests want.

COMMENT OF MARY DUVAL

Date Submitted: Friday, May 18, 2012, 5:14 p.m.

City, State: Clatskanie, OR

Occupation: Retired

Comment: I want organic foods. I want no GMO food. I want no pesticides in my food. I want 2,4-D off the market, as well as roundup and all other crap that kills and pollutes our environment permanently.

I want industrial forests not to use pesticides and herbicides when there are people living within breathing distance of those forests. I want open burning of forest clear cuts banned permanently. I want practices that provide clean air, unpolluted waters/air/soil. I want the wholesale destruction of our planet to stop. I want you to take the responsibility given to you by the people of this country to take care of the shared blessings of air, water, soil, plants and animals.

I want you to stop supporting Monsanto, Dow and other chemical companies, not allowing employees or former employees of these companies to decide policy. I want policy decided on the basis of the best science but not science created by these chemical companies, or those funded by these chemical companies.

Further I support the goals of Food Democracy Now! as follows:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF CLARA DUX

Comment: Beginning Farmer and Rancher Opportunity Act and our Local Farms, Food, and Jobs Act

I support a farm bill that will create jobs and spur economic growth through food and farms. I want the farm bill to invest in the future of American agriculture and enhance our natural resources and improve agricultural productivity. The farm bill especially needs to drive innovation for tomorrow's farmers and food entrepreneurs. An investment in our young people and encourage a farm to school connecting children with food and the world around them.

COMMENT OF SANDY DVORSKY

Date Submitted: Friday, May 18, 2012, 12:01 p.m.

City, State: St. Paul, MN

Occupation: Housewife

Comment: I grew up in a small farming community in northwest Iowa in the 1950s & 1960s when there were almost zero overweight kids. Since the 1970s, I've lived in the urban Twin Cities and am the mother of two 20-something daughters. The rates of obesity in their generation is **Catastrophic!** There are multiple causes to this . . . but cheap, processed food is one of the biggest! And the "cheap" part links back to what we subsidize in the farm bills. **Stop This.** Be wise . . . for the health of everyone (not the health of the corporate pocketbooks which is killing us physically **And** financially in health care costs).

I support, completely, all provisions of the Local Foods, Farms & Jobs Act (H.R. 3286). America desperately needs FULL funding of conservation programs, such as the Conservation Stewardship Program, plus making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. I support the implementation of all provisions of H.R. 3236 (the Beginning Farmer & Rancher Opportunity Act). And I especially support maintenance of the EQIP Organic Initiative.

You, on the Agriculture Committee, have a direct responsibility for wise decisions here and these provisions that I support are supportive of my kids **And Your Kids'** future. Please rank them higher than corporate lobbyists. Thank you.

COMMENT OF RYAN DYBDAHL

Date Submitted: Saturday, May 19, 2012, 7:52 p.m.

City, State: Ann Arbor, MI

Occupation: Social Work

Comment: Small farms are critical in fostering locally grown and locally consumed fresh foods. They also have become a growing area of job creation. They build our communities and ensure we get the best foods, picked at their prime. Please protect and promote small farms and especially organic farms in the upcoming farm bill.

COMMENT OF DONNA DYER

Date Submitted: Friday, May 18, 2012, 2:38 p.m.

City, State: Huntington Beach, CA

Occupation: Mom

Comment: I urge you to please consider the safety of our children and our families as you craft the Farm bill and not assume that big agriculture can meet our needs.

Some of the decisions we're making now around technology, around GMOs, around organic farming have long-range implications. DNA integrity in particular concerns me since there is so little we know and changes in DNA may be irreversible. At minimum, I want disclosure if I am subjecting my family to that.

I support organic farmers and want to be aware of the food I am eating. I hope regulations will support small organic farmers, as the research shows that is the direction we need to move. If I could grow my own food, I would, but that is not practical as a single mom.

Thank you.

JOINT COMMENT OF DOUG DYER AND SUSANNE HESSE

Date Submitted: Friday, May 11, 2012, 5:46 p.m.

Comment: Large industrial farms do not need subsidies. We need to move away from the petro-chemical pesticide herbicide mentality. Please support local small organic farms that keep us healthy.

COMMENT OF PAMELA DYKSTRA

Date Submitted: Saturday, May 19, 2012, 8:17 a.m.

City, State: Grand Rapids, MI

Occupation: School Employee

Comment: Leave our food alone! Give our small farmers a chance to produce a healthy product. Quit pushing them out and giving subsidies to big ag who produce unhealthy GMO's laden with pesticides.

COMMENT OF PADMA DYVINE

Date Submitted: Saturday, May 19, 2012, 9:45 a.m.

City, State: Hurleyville, NY

Occupation: Registered Nurse

Comment: Earlier this year more than 30,000 people signed a letter calling for an Organic Farm Bill that was an idealized version of what a growing number of Americans are beginning to realize: that U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

Unfortunately, we as a nation are not there yet. Not only are our politicians out of touch with the values of the American people, but corporate agribusiness has a stranglehold on our regulatory system and our political leaders.

But with your help, we can change that.

Farmers and eaters across the U.S. benefit from a fair and healthy farm bill. We need your help today.

As usual, there are a lot of bad ideas that Congress is considering, including cutting funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture.

We can't let that happen!

It's time for real reform.

I support:

- full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Reports from Washington, D.C. about the farm bill negotiations have not been pretty. According to an editorial in the *San Francisco Chronicle* by Environmental Working Group's Ken Cook and Kari Hamerschlag, Republicans in the House Agricultural Committee have already "voted to slash \$33 billion from the food stamp program while leaving farm subsidies unscathed."

The editorial goes on to report on the latest agribusiness boondoggle that gladly steals food from the mouths of the hungry to create a "\$33 billion new entitlement program that guarantees the income of profitable farm businesses. That's on top of \$90 billion in subsidies for crop and revenue insurance policies."

If this weren't bad enough, the Senate Agricultural Committee has already voted to cut \$4 million from organic research funding and cut funding to support Beginning Farmers in half. We cannot let this stand!

At the same time, the Senate Ag Committee has voted to get rid of wasteful subsidy payments. It has proposed to replace it with a new subsidized insurance program that leading sustainable agriculture advocates are calling rife with opportunities for fraud and abuse.

While Congress is looking to get rid of direct payments to commodity farmers, the subsidized insurance program it proposes to replace it with will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk.

According to the National Sustainable Agriculture Coalition's Ferd Hoefner, "By failing to place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs, the Committee has failed to do the full reform that is needed."

We can't allow this to happen!

Thank you for taking my concerns into consideration.

Sincerely,

PADMA DYVINE, R.N., C.H.P.N.

City, State: Longmont, CO
Occupation: Retired
Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I am completely against the actions of the committee to cut the food stamp program while leaving intact agricultural subsidies for wealthy and profitable agribusinesses. This is morally wrong and a shame on the Congress.

A “\$33 billion new entitlement program that guarantees the income of profitable farm businesses, and that’s on top of \$90 billion in subsidies for crop and revenue insurance policies.” How can the Congress be so callous as to take food from the mouths of the poor and lard on these billions of dollars to well off farming enterprises. The answer is that the poor have no lobbyists or the ability to contribute to your reelection campaigns while agribusiness has plenty of lobbyists and money to represent their interests. Its a disgrace and you should be ashamed of your actions.

JOHN EARNST.

COMMENT OF FAYE EASLEY

Size: Less than 50 acres

Comment: I would have liked to see the meeting address some small scale farming—farms where the owners are the farmers that spend time in close proximity to their soil, their animals and their customers and community to create a healthy community. The farm bill remains the workhorse for big business. I'd like to see it help create health and community viability. Streamline agency regulation, ban damaging practices—petro-chemical inputs, improper management of waste, erosion, all GMO products, or at least make them internalize the costs of pollution. Educate folks that you do not need factories to feed our population, you need good health land that is well tended and in good shape.

Respectfully,

TYLER EATON,
Blue Pepper Farm.

COMMENTS OF CHRISTIAN T. EATON, M.D.

Date Submitted: Friday, May 18, 2012, 2:00 p.m.

City, State: Seattle, WA

Occupation: Doctor

Comment: Dear Ag Committee,

I am a doctor, and I see firsthand the effects that nutrition has on our health. We, as a country, are going to go bankrupt paying for the effects of our diet: obesity, diabetes, heart disease, stroke, high blood pressure, and many, many more conditions are directly affected by what we eat.

And what we eat is profoundly influenced by Federal agricultural policy.

The priority for the farm bill should be the **Health** of the nation, followed by the wellbeing of small farmers. Big Ag Business should **Not** have any influence over the farm bill and I urge you all to **Ignore** all the high paid lobbyists who are trying to influence you. The only concern for Big Ag is to make money, **Your** only concern should be the Health of the Nation.

Please, scrap subsidies to corn and soy and to **All** big ag companies in general. Subsidize small, local, organic farms that are committed to sustainability and production of healthy food. And please focus on the nutrition of our children, through education and healthy school lunches . . . and more education.

We have an obesity epidemic that is killing millions and costing the country billions, and it starts in childhood. We must educate and provide healthy choices to our children if there is any hope for their future.

This is an imperative if we are going to escape economic and health disaster in the coming years.

Sincerely,

CHRISTIAN T EATON, M.D.

Date Submitted: Friday, May 18, 2012, 2:05 p.m.

Comment: All congressmen who fail to push for a **Health** focused farm bill will be targeted for removal from office.

Sincerely,

CHRISTIAN T EATON, M.D.

COMMENT OF KENNETH EBEL

Date Submitted: Sunday, May 20, 2012, 10:01 a.m.

City, State: Irvine, CA

Occupation: Professor of Biology

Comment: I do not understand all the issues involved, but I do support organic foods and non-genetically modified foods. I would like to see labeled on food packages whether the food is genetically modified.

I would also like to see the small farm interest help in any way possible. I would also like to see the public informed on this topic of farm subsidies and genetically modified foods so that there can be informed decision making by the common voter not just our Representatives.

COMMENTS OF MARTHA EBERLE

Date Submitted: Friday, May 18, 2012, 3:06 p.m.

City, State: Dripping Springs, TX

Occupation: Retired

Comment: I support local farmers and our local food banks that rely on them to help. Do not give the majority to Big Ag. Help local farmers.

Date Submitted: May 18, 2012, 6:47 p.m.

Comment: One very important thing that must be preserved in the farm bill, is SNAP. This is an urgent program that benefits those who cannot afford good food. We must continue to care for our neighbors, as Americans have always done—it's one thing that sets America apart, that we care and put that caring into action.

COMMENT OF MATTHEW EBRIGHT

Date Submitted: Friday, May 18, 2012, 2:27 p.m.

City, State: Cupertino, CA

Occupation: Consultant

Comment: Please divert agricultural subsidies to programs creating the highest good for the American population. Let's reward farmers for the highest quality goods, not the highest amount of production. Let's support local organic food created with environmentally sustainable techniques focusing on conservative water use to support our water. resources.

COMMENT OF ALISE ECHELE

Occupation: Registered Dietitian

Comment: Greetings,

Please vote to fund nutrition programs. Maintaining sources of nutrition funding is essential in order to combat food insecurity and keep our nation healthy.

Regards,

ALISE.

COMMENT OF REBECCA ECHEVARRIA

Date Submitted: Sunday, May 20, 2012, 10:58 p.m.

City, State: Pleasantville, NY

Occupation: Student

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I am a student in the CUNY Baccalaureate Program for Unique and Interdisciplinary Studies in New York City studying Environmental Sustainability and Social Justice. I began my academic career in sustainable fashion yet after traveling and working on several farms and sustainable communities I realized the importance of organic food systems and sustainable agriculture methods. I have worked on a rooftop farm in Queens where I was able to weed crop beds while looking out over the New York City skyline. Sustainable agriculture is so important for our society to adopt and encourage. Without these food systems, without local farmers, our communities suffer. As an aspiring young farmer, I would like to share my support for programs that help the next generation of growers build strong farm businesses. Since 125,000 farmers will retire in the next 5 years, it is imperative that farm bill develop programs to help aspiring young farmers, such as myself. I have used Federal programs such as ATTRA to find apprenticeships in sustainable agriculture. ATTRA, and resources alike, are imperative to farm educators, farm workers, and aspiring farmers to connect and share resources. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

REBECCA ECHEVARRIA,

[Redacted],

Pleasantville, NY.

COMMENT OF CYNTHIA ECKROTH

Date Submitted: Friday, May 18, 2012, 12:51 p.m.

City, State: Los Lunas, NM

Occupation: Retired Social Worker

Comment: Dear Members of the House Committee on Agriculture:

I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286) and the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236); maintaining the EQIP Organic Initiative.

I also support the full funding of conservation programs, such as the Conservation Stewardship Program, and that all enrollments in any new insurance subsidies are directly tied to compliance with conservation programs.

For too long my government and yours has supplied tax funds to the huge farms that use pesticides to grow our food. Congress and other government officials say that you want to create jobs and put our economy in a situation that is good for the majority of the citizens of the U.S. We can do this by giving subsidies to small farmers who grow food that does not need to be transported across the country using our resources that could be used for other opportunities. People and communities do support local farmers and ranchers who grow healthy food which is supported in fact by how much the organic and farmers' markets have grown in the U.S.

Please explain to me how each of you can vote to slash \$33 billion from the food stamp program while not touching the farm subsidies? And how can you vote to cut \$4 million from the organic research funding and cut funding to support Beginning Farmers in 1/2? What is your reasoning for taking money that supports people who are struggling to give to people who are getting empowered from my and others' taxes who don't care about the public's welfare or health.

I am a farmer's daughter who grows a garden. Please support our small farmers and our organic food industry. Please do not vote just to support those individuals and corporations who donate large amounts to you individually and to your political party. Please vote as if you were concerned for each and every tax payer and voter in your districts.

COMMENT OF MARIANNE EDRAIN

Date Submitted: Friday, May 18, 2012, 4:37 p.m.

City, State: Langley, WA

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: Farm bills until now have more and more benefited enormous agribusiness companies which are the antithesis of family farming. The corporations abuse the land and the people who work for sub-minimal wages on these oversized, toxic chemical dependent operations. And congress has rewarded this antisocial behavior by crafting farm bills year after year to subsidize them.

What congress has not done is to support genuine family farms. These are small operations, generally with a number of crops, many of them using organic and sustainable methods of production. Somehow these farms do not qualify for our tax-supported subsidies.

There is something very wrong with this picture. Giant agribiz corporations are a part of the problem. Small family farms are very much a part of the solution. Please shift the farm bill to remove unnecessary support from already wealthy agribiz corporations and move that support to favor small, sustainable family farms.

A part of that support is ag research at the land grant colleges. At present much of that publicly supported research is focused on how to increase profits for agribiz. That focus needs to shift to support for organic methods of agriculture, to sustainable land use practices, and to educational support for young people wanting to get into farming.

It's our taxes you're allocating. Please do so in a way that benefits all of us.

COMMENT OF ANNA CLAIRE EDDINGTON

Date Submitted: Tuesday, May 15, 2012, 3:15 p.m.

City, State: Little Rock, AR

Occupation: Writer

Comment: America needs a farm bill that drives innovation for tomorrow's farmers and food entrepreneurs—with our growing population, we cannot keep creating unhealthy lifestyles and should instead fund sustainable agriculture—agriculture that is created by food entrepreneurs. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.

COMMENT OF AMY EDELSTEIN

Date Submitted: Friday, May 18, 2012, 3:36 p.m.

City, State: Portland, OR

Occupation: Cook/HR Specialist

Comment: I am disappointed to hear about some of the proposed cuts to beneficial farm bill programs. It seems that every time this bill is up for debate, the nutrition, conservation, and sustainability programs are threatened, while the industrial farming subsidies remain untouched. To me, this indicates a greater concern for the Big Agriculture corporations and lobbyists than for the health and well-being of the people.

I support the following, and I hope that the next farm bill will continue to fund them:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF LYN ERIC EDGEL

Date Submitted: Saturday, May 19, 2012, 12:23 a.m.

City, State: Republic, WA

Producer/Non-producer: Producer

Type: Forestry, Fruits, Vegetables

Size: Less than 50 acres

Comment: Honorable Members of the House Committee on Agriculture,

The family farm is disappearing because USDA policies and procedures are skewed toward agribusiness. Especially vulnerable are organic farms. Please consider the health and well-being of our people and those who provide wholesome food to us.

Also, people have a right to know what they are putting in their bodies. Please pass legislation requiring the labeling of food as GMO or non-GMO.

Respectfully,

LYN ERIC EDGEL.

COMMENT OF KARIN EDGETT

Date Submitted: Friday, May 18, 2012, 2:27 p.m.

City, State: Washington, D.C.

Occupation: Small Business Development

Comment: The house bill is killing off the last of our small farms. Small farms are sustainable food supplies, sustainable economic contributors. By making it impossible to maintain small farms (high fees and over regulation), you are forcing Americans into a slow decline of factory food that makes us sick, rising healthcare needs, and economic failure. Stop the bill or starve the people!

COMMENT OF EVELYN EDIGER

Date Submitted: Friday, May 18, 2012, 3:40 p.m.

City, State: Omaha, NE

Occupation: Counselor

Comment: Healthy food is critical for good health, physically and mentally. Chemicals, pesticides, genetically modified seeds/foods all create many physical problems. Growing healthy food takes extra care and money. I encourage you to give help to these health conscious farmers who use methods that don't contaminate our food.

COMMENT OF MICHELLE EDMONSON

Date Submitted: Saturday, May 19, 2012, 6:31 a.m.

City, State: Alexandria, VA

Occupation: Events Coordinator

Comment: I feel very strongly that organic products are essential. They keep my family healthy and I don't have to worry about poisoning my children. Taking away funds for research would be detrimental to our already unhealthy society.

COMMENT OF STEVE EDMUNDS

Size: Less than 50 acres

Comment: Agribusiness is destroying small family farming, and threatening the safety of this planet. Farm policy should encourage small local farming operations that protect the environment.

COMMENT OF ANN EDWARDS

Date Submitted: Friday, May 18, 2012, 9:17 a.m.

City, State: Muncie, IN

Occupation: IT Consultant

Comment: I would prefer to be a farmer but can't because the barriers to entry are too high. There are many like me that also can't break into farming because the cost and other barriers are too high. I also live in an area where good, clean food is very hard to find. I have an auto-immune disorder that is food-based so good, clean food is critical for my well-being yet scarce and limited where I live. Isn't it absurd that in this country, where freedom of choice is an oft touted right for all citizens, that we cannot grow what we want the way we want by whoever wants to grow?

Please help change this by supporting small farming operations, access to healthier foods, and sustainable farming practices.

COMMENT OF KAREN EDWARDS

Date Submitted: Friday, May 18, 2012, 7:21 p.m.

City, State: Charlotte, NC

Occupation: Self-Employed

Comment: The farm bill has been in need of serious reform for some time. Organic farming & the access of **Healthy** food for **All** people needs to become a priority. I believe in helping small farmers & those who need it most, not just those who know how to work the system. I have an auto immune disease, & find it hard to ignore the mounting evidence that genetically modified foods & pesticides have been boldly linked to the cause & worsening of my condition. I am NOT on government assistance only because I have been blessed with a supportive family. I work when & as much as I am able, but it is rarely enough to afford to eat organic. If sustainable & organic farming can be further subsidized, it will become more affordable not only for the American consumers, but also for the farmers to invest in the infrastructure of sustainable, organic agriculture. For our health as a society, something must be done!

COMMENT OF MARK V. EDWARDS

Date Submitted: Friday, May 18, 2012, 12:09 p.m.

City, State: Brunswick, GA

Occupation: Retired RN and PA

Comment: I have been able to turn my Diabetes around by searching out and consuming Free-range chickens and their eggs, Grass-fed Beef, and Bison, along with organic vegetables and fruits. Not to leave out, No More Sugar or Artificial Sweeteners. This country's health issues are a direct result of poor management of our resources and practices, and if not resolved will lead to all our demise by way of increased health issues overall. Please act responsibly and for the good of the public not the corporation. Thank you.

COMMENT OF BARBARA EFRAIMSON

Comment: Please don't gut the beginning farmer and organic programs. Environmentally sound farming must be in our future. Farm subsidies take us back to a model that has failed to give us sustainable, local producers.

CAROL EICHELBERGER.

COMMENT OF DAVID EISBACH

Date Submitted: Friday, May 18, 2012, 11:27 p.m.

City, State: San Jose, CA

Occupation: Realtor

Comment: The influence of big agribusiness is ruinous to the health interest of the Citizenry. We should be encouraging the growing of non-genetically altered crops. Crops organically grown and not imported from outside the U.S. We should give support to those growing vegetables, pesticide free and ripen naturally. School districts should be receiving locally grown produce and we should support that. We need to change this system.

COMMENT OF MIRA EL

Date Submitted: Saturday, May 19, 2012, 1:02 a.m.

City, State: Mt. Shasta, CA

Occupation: Educator

Comment: We need to support small farmers and organic producers of all kinds. We need to make it easy for small dairy farmers to legally produce and sell their milk and milk products. Same goes for small meat producers. Small and local are the way to go, way more efficient than huge operations, and easier on the environment. get with the program!

COMMENT OF VIRGINIA ELANDT

Date Submitted: Thursday, May 17, 2012, 1:16 p.m.

City, State: Roseburg, OR

Occupation: Community Organizer

Comment: Small farms and value-added food enterprise creates jobs and feeds rural communities. I urge you to support the food & farm bill and provide technical assistance and resources to food producers in our nation. The average age of today's farmer is 62, we need to support a new generation of farmers and ranchers!

Thank you,

VIRGINIA.

COMMENT OF SARA ELDRIDGE

Date Submitted: Thursday, May 17, 2012, 12:10 p.m.

City, State: Seattle, WA

Producer/Non-producer: Producer

Type: Field Crops

Size: 151-300 acres

Comment: Please make sure we have rights to seeds. Please ensure water rights for all people. Please forward green energy development. Please support soil conservation projects. Please support education for farmers. Please support organic farming development. Please do not promote genetically altered seeds and crops. Please help promote local, family farm development and co-op programs. Crop insurance with global warming is critical to farm family survival. Speed up studies of global weather patterns and plans for water rights and protection. Thank you.

SARA ELDRIDGE.

COMMENT OF MARLENE ELFERING

Date Submitted: Friday, May 18, 2012, 4:10 p.m.

City, State: Antioch, IL

Occupation: Accounting

Comment: I am in full support of family farmers and organic foods. I do believe that we are hurting our own bodies by polluting them with GMO's. Do you want your kids and grandkids to live a healthy lifestyle or do you want them to have unknown pollutants becoming toxic in their bodies. I understand that companies like Monsanto want to make money and enjoy a level of greed but this greed is at the expense of our health and our lives. Once again, I am in full support of family farmers and organic foods. Let's promote a healthy lifestyle in this county.

COMMENT OF ANDREA ELLIOTT

Date Submitted: Friday, May 18, 2012, 1:01 p.m.

City, State: Copake, NY

Occupation: Acupuncturist

Comment: I want to eat organic and biodynamic food—that is not contaminated with GMO crops and Monsanto's chemicals. This is very important to me, and I want this choice. Please consider this. I believe it is a right.

COMMENT OF ANGELE ELLIS

Date Submitted: Friday, May 18, 2012, 5:31 p.m.

City, State: Pittsburgh, PA

Occupation: Writer/Editor

Comment: As a super voter citizen and a consumer who prefers organic fruits and vegetables, I support America's farmers and farmworkers, and ask you to produce a fair farm bill with provisions for conservation and sustainable agriculture.

COMMENT OF CATHY ELLIS

Date Submitted: Friday, May 18, 2012, 2:20 p.m.

City, State: West Chazy, NY

Occupation: Recreation Therapist

Comment: Stop supporting big ag and help the farmers who really need it—local, organic and sustainable farming. Get tougher on regulating growth hormones and genetically modified food and insist that food is labeled so that consumers know what they are getting. Our government supports big agriculture, which doesn't need the money, drives out smaller farmers and cares little for the environment or the health of the people buying their food. This is completely wrong.

COMMENT OF KATHRYN ELLIS

Date Submitted: Friday, May 18, 2012, 10:55 a.m.

City, State: Otis Orchards, WA

Occupation: Disabled Grocery Clerk

Comment: Stop subsidies for big agribusiness that creates food with mountains of waste, tons of pesticides, destroying our land & water. Support family farms, regional, organic & sustainable practices. Cap crop insurance subsidies. We need more farmers & ranchers less giant corporations creating problems.

COMMENT OF MOLLY ELLIS

Date Submitted: Friday, May 18, 2012, 11:06 a.m.

City, State: Lake Oswego, OR

Producer/Non-producer: Producer

Type: Fruits

Size: Less than 50 acres

Comment: Please eliminate the subsidies to corn and soy in favor of supporting small local sustainable agriculture, those small farms on the edge that are the food security for our cities. Please label and discourage GMO modified crops.

COMMENT OF ZANDRA ELLIS

Date Submitted: Friday, May 18, 2012, 1:29 p.m.

City, State: Desoto, TX

Occupation: Licensed Chemical Dependency Counselor—Intern

Comment: Eating healthy, well grown organic food is very important to me and my family. The power of the farm and being able to have a sustainable farm created a legacy in my family for generations to not only be educated, but gave us a connection to the land to truly care how our food is grown. Please pass tighter laws to

help return the power of farming back into the farmers hands and please pass laws that will allow individual farms be able to compete with large industrial farms.

COMMENT OF JAMES ELMORE

Date Submitted: Friday, May 18, 2012, 2:30 p.m.

City, State: Riverside, CA

Occupation: Website Developer

Comment: What I love is going to the farmers' market or Trader Joe's and buying good, wholesome food. I care about organic, I eat vegetarian, I get excited making a raw meal. I love gardening, volunteer at community gardens, love seed catalogues, grow tomatoes in the backyard. Thank you for all your best efforts to ensure that the American citizen has access to real, healthy, affordable food regardless of where they are in the nation, that they know what they are eating. Thank you for farm diversity. I know it must be challenging with the monopoly mindset of big business to stick to your desire to be of service, but you know what happens at the end of monopoly—one guy wins, everyone else loses and the game is then over. Sustainability is all about keeping everyone in the game. Thank you.

Every blessing,

JAMES ELMORE.

COMMENT OF OBIORA EMBRY

Date Submitted: Saturday, May 12, 2012, 5:16 p.m.

City, State: Lexington, KY

Comment: I would like to see in the 2012 Farm Bill more support and financial funding (grants, subsidies, *etc.*) for small family farmers that grow diverse crops that feed people in their bioregion.

It should also be used to help keep family farms from being used for commercial development and should allow for interested small producers to acquire the farm to keep growing food on it.

COMMENT OF KAREN EMERSON

Date Submitted: Friday, May 18, 2012, 9:08 p.m.

City, State: Brandon, VT

Occupation: Homemaker, Gardener, Beekeeper

Comment: My husband and I have been gardeners since we were engaged 40 years ago. We have supported organic and biodynamic agriculture and been successful with those methods. The family farmers and small organic growers aren't destroying the environment, and they are building community with their customers. This model is not fueled by big business. The government should move away from funding big special interest agricultural companies that pollute and poison the Earth. We need to cherish our Earth rather than destroy it and the creatures that live on it.

COMMENT OF HEATHER EMERY

Date Submitted: Friday, May 18, 2012, 2:05 p.m.

City, State: Bellingham, WA

Occupation: Teacher, Educational Program Director

Comment: I write to you in full support the full endorsement of the Local Foods, Farms and Jobs Act (H.R. 3286). I urge you to act on behalf of your constituency of food producers and food consumers by endorsing this urgently needed piece of legislation.

It is imperative that Congress take immediate action to address the crisis of a shortage of opportunities for new farmers who face unreasonable hurdles in their quest to become part of the solution rather than sit idly by and watch the food system implode. You can do so by implementing all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236)

I also support the full funding of conservation programs such as the Conservation Stewardship Program, and ask that Congress makes sure enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

And last, but no means least, I support maintaining the EQIP Organic Initiative.

Please heed this request and the hundreds of thousands like it by standing up against the corporate interests of AgriBusiness and standing up FOR the community of individuals, families, neighbors, **People** who demand real reform. The people you represent demand a fair and healthy farm bill.

Thank you for your time.
Sincerely,
Heather Emery.

COMMENT OF JASON EMERY

Date Submitted: Sunday, May 20, 2012, 2:37 p.m.

Comment: Farm lands are used by private, and/or business. The public eye or hand will rarely (if not never) benefit from land that of our state leases. Will the taxes that are paid ever seize the day where the vast lands that are leased be equal to the benefits of it being leased!

COMMENT OF WENDY EMLINGER

Date Submitted: Saturday, May 19, 2012, 1:58 a.m.
City, State: El Paso, TX
Occupation: Librarian
Comment: Please support organic farms that provide good healthful food. I'm extremely sensitive to chemical contaminants and really need a safe source of non-petroleum fertilized, pesticide-free foods. Perhaps in time we can encourage more farms to go organic and supply healthy food at reasonable prices for everyone. Currently I pay more for organic because I have to, but the selection is painfully limited.

Also, I hate to see what's being served for breakfast and lunch in our schools. No wonder the kids are plumping up. Don't you know that human growth hormone injected into cows so they'll make more milk, eventually makes it into the kids? Why do you think girls as young as 9 are starting their periods prematurely? Evil hormone fairies? Organic cattle and milk cows can't be given hormones so none is passed on to kids.

Please, protect our food chain, we're all dependent on it, even you.

COMMENT OF DAVID EMRICH

Date Submitted: Friday, May 18, 2012, 3:07 p.m.
City, State: Talent, OR
Occupation: Graphic Designer
Comment: Would you eat the chemicals used in the production of non-organic food if they were extracted and put on a plate in front of you with a nice bottle of wine? I doubt you would, so why are we even wasting time arguing about this? Money's one thing, common sense is another; sometimes they go together but not in this case.

COMMENT OF SUSAN ENFIELD

Date Submitted: Friday, May 18, 2012, 2:21 p.m.
City, State: Boulder, CO
Occupation: Editor
Comment: Check out this info graphic. *Plant the Plate* http://www.ucsusa.org/food_and_agriculture/solutions/big_picture_solutions/plant-the-plate.html*
The irony makes one gag. We are selling the health of our people to the highest bidders, and we end up paying again for all the health consequences of obesity and illness.

It's inexcusable, given government's supposed role as a caretaker/protector of its citizens, at the very least our national finances, which are going down the tubes largely due to ballooning health care costs.

Where is our quality of life? In the TV? In a fast food drive through or at Wal-Mart?

Re-learning the joys of fresh foods—and the health one's family experiences when they eat that way—is a simple. Low cost, high benefit quality of life measure. Americans deserve that much—not to be force-fed unhealthy foods that are killing us.

COMMENT OF ERICA ENG

Date Submitted: Sunday, May 13, 2012, 1:44 a.m.
City, State: Reno, NV

* The information referred to is retained in Committee file.

Occupation: Budget Analyst

Comment: I want to submit my opinion that you do **Not** cut funding for the SNAP program as part of the final farm bill. Also, I do not agree overall with the House's budget reconciliation efforts. The Budget Control Act was passed for a reason, and I support continuing those cuts, not the House coming up with a different plan. I think that is **Exactly** the kind of unnecessary government duplication and lack of bipartisan consensus that have many Americans frustrated with Congress. And I will remember your decision on this issue prior to your re-election Mr. Amodei.

Below is why the message I support from the Food Bank—it is also important to note that ½ of all NV gets from SNAP goes to children:

I am a supporter of the Food Bank of Northern Nevada. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

COMMENT OF ANNA ENGDAHL

Date Submitted: Friday, May 11, 2012, 4:54 p.m.

City, State: Hankins, NY

Occupation: Retired

Comment: Farms shouldn't be factories. We need to give more support to Family Farms not factory farms. Local sustainable farming is what I would like to see. Humane treatment of farm animals produces healthier meat, no antibiotics in feed that causes resistant strains of bacteria.

COMMENT OF LISA ENGELS

Date Submitted: Saturday, May 19, 2012, 6:11 a.m.

City, State: Temecula, CA

Occupation: Homemaker

Comment: Please quit subsidizing GMO farming & CAFO's. Our family only eats organic produce & proteins. Yes, we eat less due to the expense but we are healthier than the average American. Stop wasting our tax dollars on bad farming methods. We support organic farming.

COMMENT OF GAIL ENGLAND

Date Submitted: Friday, May 18, 2012, 3:54 p.m.

City, State: Phoenix, AZ

Occupation: Medical Secretary, Homemaker, Care Giver

Comment: In order for our farmers and eaters to survive and thrive, we must have an "organic farm bill". Please consider this when voting Representative Gosar. Please take into consideration we the people who voted you in, live here and must maintain our food crops so we can be healthy and thrive.

Please,
Sincerely,

GAIL ENGLAND AND FAMILY.

COMMENT OF KATHLEEN ENGLAND

Date Submitted: Wednesday, May 09, 2012, 3:59 p.m.

City, State: Elkhorn, NE

Occupation: Retired RN/Teacher

Comment: We are such a generous nation—supporting countries and people abroad like no other nation in history but while this is remarkable, we cannot forget those at home who are less fortunate—our children and our seniors. Millions of households, often multigenerational, are having to make difficult choices every day about how they spend their meager incomes—do they eat or do they buy medications? There are many places for low income families to live, not always places we would take our families, many places to shop for hand-me down or used clothes, but very few places where they can get help with such necessities as food and medications. Community foodbanks may provide some help, but often restrict the amount and choices of commodities as they try to serve all who are in need. Are these folks

any less deserving of our help than the peoples of the world? You and I cannot judge why there is need in our state or nation, but we can do our best to help by continuing our programs at home to be certain that our children, our veterans on the street, and our seniors remain on the top of the list of those we help with basic necessities like food, medicines, clothing and basic supplies for living. We have the ability to do it, we must find the will to do it well and in such a manner that they can keep their pride and dignity.

COMMENT OF THOMAS ENGLAND, C.E.C., C.F.S.E.

Date Submitted: Friday, May 18, 2012, 3:24 p.m.

City, State: Zionsville, IN

Occupation: Chef Instructor/Local Foods Activist

Comment: Mr. Burton,

I have worked with farmers, chefs and consumers over the past 7 years in Indiana to develop a common language on Indiana produced foods. I have been shocked to hear so many row crop farmers talk about how they do not have a choice in what they grow. They would love to grow more non-traditional crops, but, the government has made that impossible with the subsidies. I would love to speak with you further about my experiences. Below is information about the farm bill that I stand behind:

As the committee considers the 2012 Food and Farm Bill, I urge you to:

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;
- Provide an even “plowing” field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don’t: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

COMMENT OF RICHARD ENGLE

Date Submitted: Friday, May 18, 2012, 4:48 p.m.

City, State: Berkeley, CA

Occupation: Business Owner

Comment: We have had decades of taxpayer subsidy for crops and foods that often poison us and our children or destroy the health of our natural world. We need to shift our power and money (both tiny compared to Big Ag in the current political system) toward a crop and food system that centers on people’s health and well being. This can be done with your firm stand against vested interests, and with loving concern for the people of this district, CA, and the U.S.

Thank you,

RICHARD ENGLE

COMMENT OF CARROLL ENGLISH

City, State: Cabery, IL

Occupation: Retired Teacher

Comment: To the House Committee on Agriculture:

I urge you to press for funding of these two Acts? **Local Farms, Food, And Jobs Act And Beginning Farmer And Rancer Opportunity Act.** To not re-fund and amplify funding for these two acts is to condemn our country to increased disaster! What future could there be in farming if these aren’t re-energized!

These acts are so needed to further protect our air, water, and soil, while at the same time, keeping local farmers operational. Agribiz has demonstrated how dangerous those operations are to public health. (The big infections start in agribiz operations—not in local food production!) Please find some will within yourselves to do **Something** valuable for the nation at large! Thanks you!

Why do you demand to know our total address, *etc.*? The days have come when it is intimidating to reveal all of our personal information before the government! CE.

COMMENT OF DORIS ENGSTROM

Date Submitted: Wednesday, May 09, 2012, 9:33 a.m.

City, State: Orlando, FL

Occupation: Retired

Comment: Our church is trying to meet the needs of the hungry in our area but the numbers continue to escalate. We count on the TEFAP foods to help fill the bags we pack. Without them, there would be a goodly number of elderly and children who would not have food.

May I respectfully suggest that you hold the line in your Committee. You are directly dealing with peoples' basic needs. I would further suggest that instead of continuing to look for cuts from those who desperately need our help, that you seriously ask those who have so much to share. Do we need to balance the budget and bring down the deficit, yes, but search your souls and consider what is really right. I really must ask . . . why, since the tax cuts are in place, do we have a jobs issue? Aren't the tax cuts hyped as going to correct all that? Since we have the tax cuts in place, why haven't they created jobs and why would the next round work any better.

Please do not short change TEFAP.

DORIS ENGSTROM.

COMMENT OF SUZANNE ENSER

Date Submitted: Saturday, May 19, 2012, 8:42 p.m.

City, State: Braintree, VT

Occupation: Conservation Biologist/Mother

Comment: Farm bill actions should support local farmers, honest conservation in action and real healthy food production.

Govt. dollars should not support big ag/big money; nor should it support Monsanto.

The farm bill should be about providing real food to real people.

COMMENT OF DIANE ENSIGN

Date Submitted: Friday, May 18, 2012, 9:48 p.m.

City, State: Tucson, AZ

Occupation: Disabled Pro Photographer

Comment: It is essential that we protect our small farmers & our organic farmers. We need their diversity. I am outraged at the huge factory farms getting the subsidies when they torture the animals in horrid cages & totally unnatural conditions. It's so shameful. And such crowded conditions produce filth, stress, and disease all for profit only. Smaller farmers are much better caretakers of our health, their livestock & plants, & the Earth used for their product. They need help & we citizens (who have any cares about our own health & that of the livestock need them).

DIANE ENSIGN.

COMMENT OF NARCISSA ENZMANN

Date Submitted: Friday, May 18, 2012, 3:13 p.m.

City, State: Whittier, CA

Occupation: Registered Dietitian

Comment: We need to reform the farm subsidy program, allow farmers to grow real food such as fruits and vegetable with the infrastructure to produce those foods. We need to put the health of our country ahead of corporate profits and say no more to Genetically Modified Organisms (GMO's) with have built-in chelating agents (that do not allow for vitamin and mineral absorption) and pesticides(Scott's Round-Up).

COMMENT OF SVETLANA EPSHTEYN

Date Submitted: Sunday, May 20, 2012, 1:19 a.m.

City, State: Palmdale, CA

Occupation: Music Teacher

Comment: The consumers would like to have food that has all ingredients listed, that is organic and that supports soil conservation and not soil destruction. We want to have more small family farms, which we could trust and not some huge agricultural company which only has interest in their profits. Please, consider the best from other countries and not make this nation weaker because it consumes chemically poisonous food.

COMMENT OF NADIA ERAN

Date Submitted: Friday, May 18, 2012, 9:41 a.m.

City, State: Richmond, VA

Occupation: Clinical Research Associate

Comment: Please stop supporting factory farming and obesity in this country by subsidizing corn and soy. It makes junk food cheaper than real food and promotes factory farming by creating a cheap food product to feed animals. Please support small farms, reward organic local farm to family plans, and take a stand against the lobbyist and investment interests of the dairy and meat and factory farming groups because even though it generates cheap money, it is diluting the quality of life in this country. Healthcare is going up, health is declining, and Americans are looking worse than ever; $\frac{2}{3}$ of adults are obese and $\frac{1}{3}$ of children are obese—these are dangerous statistics and you have an obligation and a responsibility to do what's right, and not fold to money and politically generated interests. Thank you.

COMMENT OF JULIAN ERCEG

Date Submitted: Friday, May 18, 2012, 3:57 p.m.

City, State: Spring, TX

Occupation: Train Dispatcher

Comment: It is time to change agricultural policy in this country. Rather than the select few profiting at the overall expense of most, we can redesign our agricultural industry to raise the standard of living for most people and improve the health and environment of the country. The health epidemics in this country of obesity and diabetes and the decline of real rural America is enough evidence that we need a new and better way under which all will benefit.

COMMENT OF DAVE ERGO

Date Submitted: Friday, May 18, 2012, 8:19 p.m.

City, State: Cotati, CA

Occupation: Financial Manager

Comment: For too long the farm bill has been unduly influenced by Big Ag, and we end up subsidizing food that in the long run is unhealthy for our population. Please reform the policies of our farm bill so that it serves the interests of the population, not the interests of corporations.

COMMENT OF CHRISTINE ERICKSON

Date Submitted: Friday, May 18, 2012, 12:20 p.m.

City, State: Ann Arbor, MI

Occupation: Retired

Comment: I would like a new farm bill to concentrate on helping the small family farm, instead of the "factory farm". Factory farming practices are ruining the small farmer, ruining the environment and producing a low-quality end product.
Save The Small Farms Please!

COMMENT OF SARA ERICKSON

Date Submitted: Sunday, May 20, 2012, 8:45 p.m.

City, State: Corona Del Mar, CA

Occupation: Researcher

Comment: Dear Committee,

I would like you to please consider the following items: Please support family farmers and limit subsidies to commodities. Please keep the nutrition of our children

as a top priority as this is where we will see the greatest return on our investment. No child in America should be hungry. Children need “real”, nutritious food including fruits and vegetables for their development.

Please limit funds to CAFOs and institutions that are damaging our health through environmental pollution.

Thank you,
SARA ERICKSON.

COMMENT OF JOAN ERLANGER

Date Submitted: Saturday, May 19, 2012, 10:51 a.m.

City, State: Lincoln City, OR

Occupation: Retired Physical Therapist

Comment: Please consider maintaining support for organic certification and education. Funding for megafarms should be balanced by funding for small family farms particularly those engaged in sustainable agricultural practices.

COMMENT OF TERRI ERNISSEE

Date Submitted: Friday, May 18, 2012, 4:27 p.m.

City, State: Elkton, FL

Occupation: Graphic Designer

Comment: I am speaking for many local Floridians as well as Americans asking you to please work to turn our food supply around to local grown, sustainably harvested as available in all stores to all classes of people. The quality of food in America has changed over the last 15 years to have no nutritional value and is basically fake. Most of everything available actually makes us sick. In addition, so many people are unemployed because of the failing economy. I see a win-win resolve if there was incentive for locals everywhere to return to local farming. This would provide us all with healthier food and solve many employment problems. I am asking you to fight to change this so that local grown can become common-place and so we can all get back to basics again.

COMMENT OF IVY ERO

Date Submitted: Friday, May 18, 2012, 11:18 a.m.

City, State: White Oak, PA

Occupation: Education Director

Comment: I ask that you pass the farm bill and do so with an increase in funds. Providing food for our families in need cannot be done effectively without the help of the Federal, state and local government.

Remember our children who go without the quantity of food they need on a daily basis to grow healthy and strong.

COMMENT OF ARTHUR ESCHENLAUER

Date Submitted: Sunday, April 29, 2012, 8:07 p.m.

City, State: Circle Pines, MN

Occupation: Software Developer

Comment: Congress should continually strive to streamline and strengthen the SNAP and TEFAP programs so that all eligible households can receive help without undue administrative red tape. 2010 census data show that 150 million of our people are poor or in poverty^{1*} because of unemployment, underemployment, or minimal compensation. From personal experience (past experience, thankfully), I know what it is like to be willing and able to work, with great skills, but to be looking for work month after month; the issue for the poor is not laziness or lack of accountability, it is lack of opportunity, lack of income, and sometimes bad luck.

It is a popular misconception that higher taxes discourage growth and, hence, investment and job creation. However, what discourages investment is the impression that it won't give good returns. People expect good returns and will invest when

*The information referred to is retained in Committee file.

¹Yen, Hope, *Census shows 1 in 2 people are poor or low-income*, <http://finance.yahoo.com/news/census-shows-1-2-people-103940568.html>

“Squeezed by rising living costs, a record number of Americans—nearly 1 in 2—have fallen into poverty or are scraping by on earnings that classify them as low income. . . . Many formerly middle-class Americans are dropping below the low-income threshold—roughly \$45,000 for a family of four—because of pay cuts, a forced reduction of work hours or a spouse losing a job.”

growth is high; since World War II, periods of growth in fact were higher when taxes were high.^{2-3*} When people are healthy and can buy what they need to survive, their spending drives growth, which in turn gives investors the impression that they can profit, driving them to invest. Thus, wisely spent taxes actually encourage (albeit indirectly) investment and job creation.

It is unconscionable that we would let adults or children suffer inadequate nutrition as a result of budget cuts; please recall that malnutrition has life-lasting physiological effects on a developing child's brain and body. The root cause of our debt problem is not that we have spent too much on so-called "entitlement programs"; rather, our recent trillion-dollar wars in Afghanistan and Iraq were paid for by borrowing instead of taxes.^{4*} It is very unfair to ask those who literally do not have enough to eat to make sacrifices to reduce or service this debt that we chose to incur by choosing not to raise taxes to pay for armed conflict.

If budget cuts must be made, they should not be made on the backs of the poor. Indeed, it is more likely that improving the lot of the poor will bring us out of economic stagnation sooner. But a better reason for helping the poor is that our nation and its government is bound to put Micah 6:8 into practice, "And, what does the Lord require of you? To act justly, and to love mercy and to walk humbly with your God."

Occupation: Gaming Dealer

Comment: We desperately need a farm policy that focuses on the health of the American people. Have the courage to stand against the agri-industry leeches like Monsanto and support an organic farm bill.

SUBMITTED STATEMENT BY ESSEX COUNTY SOIL AND WATER CONSERVATION DISTRICT

New Farm Needs Essex County, New York

1. Funding for Conservation Technical Assistance—There is a critical need for funding for staffing especially engineering to address a back log of engineering on farm bill funded projects from the 2008 Farm Bill. Additional resources are needed to get the projects on the ground in a timely manner.
2. Funding for High Tunnels, Irrigation management and grazing system management to assist new farmers in protecting the Lake Champlain Basin and meet the demands of the local foods market in northern New York.
3. Funding for forestry practices to keep forestry as a resource management tool and still protect our Lake Champlain watershed. We need to fund additional forestry practices to better manage the vast forestry resource in the Adirondack region and provide economic benefit to the region.
4. Additional resources for Green Energy to assist in making our energy resources local and protect the Adirondacks from further damage through acid rain by reducing the use of fossil fuels.

²Linden, Michael, *The Myth of the Lower Marginal Tax Rates*, <http://www.americanprogress.org/issues/2011/06/marginal-tax-charticle.html>

"The central tenet of modern conservative economics is that a lower top marginal tax rate will result in more growth, and these numbers do show conclusively that history has not been kind to that theory."

³Reich, Robert, *Why we would benefit from higher taxes on the rich*, <http://www.kansascity.com/2012/04/17/3560804/robert-reich-why-wed-benefit-from.html>

"Taxes were far higher on top incomes in the 3 decades after World War II than they've been since. The top marginal rate was over 70 percent. Even after deductions and credits, rich Americans paid an effective tax rate of over 50 percent. And the distribution of income was far more equal than it has been since. Yet the American economy grew faster in those years than it's grown since Ronald Reagan slashed tax rates on top earners in 1981. This wasn't a post-war aberration. Bill Clinton raised taxes on the wealthy in the 1990s, and the economy produced faster job growth and higher wages than it did after George W. Bush cut taxes on the rich in his first term."

Editor's note: the above referenced link is no longer available.

⁴Bartlett, Bruce, *The Cost of War*, <http://www.forbes.com/2009/11/25/shared-sacrifice-war-taxes-opinions-columnists-bruce-bartlett.html>

"George W. Bush initiated two major wars in Iraq and Afghanistan, but adamantly refused to pay for either of them by cutting non-military spending or raising taxes. . . . In 1950 and 1951 Congress increased taxes by close to 4% of GDP to pay for the Korean War, even though the high World War II tax rates were still largely in effect. In 1968, a 10% surtax was imposed to pay for the Vietnam War, which raised revenue by about 1% of GDP."

Date Submitted: Friday, May 18, 2012, 11:28 p.m.

City, State: San Diego, CA

Occupation: Writer

Comment: Support organics and more humane farming. Please focus on creating a healthier, cleaner and more sustainable environment using LESS chemicals and MORE respect for nature. We have all suffered enough from dangerous pesticides and fertilizers. They may be profitable, but the health costs in the long run are sky high! Mistreating animals in the name of profits is also very costly in terms of health and other negative repercussions. Thank you for changing the focus to benefit humans instead of only making profits for the wealthy corporations.

COMMENT OF ANGELA ESTRELLO

Date Submitted: Friday, May 18, 2012, 12:42 p.m.

City, State: Converse, TX

Occupation: Oil and Gas Data Analyst

Comment: Concerns for the next farm bill:

A couple things I can specifically say I want to see are:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I would like the next farm bill to truly protect family and small farms and not cater to large business/agriculture. Help the local farmers keep their businesses and be able to prosper. Truly look out for their well being and assist them.

I would like to know that organic and/or sustainable farming and **Non-GMO** farming is going to be a priority in being protected and made more cost effective for both farmers and consumers. Whole foods are the key to good health and genetically modified foods are not helping our country's health at all.

I would like to know that funding is not going to be cut for nutritional programs, conservation programs, organic farming and small/family farms.

I would also like to know that Monsanto (or any other corporate/agricultural giant holds no sway on any decisions made regarding the new farm bill. The good of the **People** needs to be the full focal point and not how many pockets are going to be lined from legislation driven by self gain from share holders or any other financial beneficiary.

I want to know that small farms and family farms will not be allowed to be bullied by **Any** government entity or corporate giant.

I want to know that family owned and small farms will be protected from hasty search and seizure actions and will be afforded their true rights . . . no more going in and confiscating live stock and/or crops without warning or warrant.

I want **Raw** food protected. It is my decision how I want to prepare my food. I do not want protectants applied nor do I want anything "blanched" . . . allow me, the consumer, to be responsible for the proper preparation of my food. Stop taking away my options for **Real, Raw** food (including all meats, fruits, veggies, nuts, seeds, dairy, eggs, *etc.*). Stop encouraging the production of "super foods" with genetic modification . . . and allow me to decide if I want GMO, standard or organic products by requiring them to ALL be labeled appropriately (especially GMOs . . . this needs to be **Clearly** displayed on **All** GMO foods).

Please, do what is right for the **People** not corporate pockets. Protect the little people from the giants who truly do not have their best interest in mind. Put yourself in the position of a farmer and truly think of what would help you the most . . . what would help your family most . . . what would ensure the future of your farm . . . and what would be most beneficial to any who would consume your product. I do not want Frankenfood and I do not want any farm to have to sell out in order to stay in business. Stop taking Monsanto's side . . . this company is slowly killing our health and our way of life.

Comment: Please stop the continuing support of huge industrial agribusiness, instead approve continued support of organic research, small farms and community gardens.

COMMENT OF STEPHANIE ETTINGER DE CUBA

Date Submitted: Friday, May 18, 2012, 4:03 p.m.

City, State: Boston, MA

Occupation: Researcher: Health and Nutrition, Children's HealthWatch

Comment: Dear Members of the House Committee on Agriculture,

In response to the opportunity to submit feedback on the farm bill via the House Committee on Agriculture's website, we, as pediatricians and public health researchers with Children's HealthWatch, are writing to express our deep concern about the cuts to SNAP passed in the recent House budget bill, their impact on the farm bill and ultimately the implications for the health of children and families across the nation. Children cannot eat retroactively—if we do not nourish them in the right biological timeframe, opportunities for the full potential of brain and body development are lost. SNAP is an essential public health program and must be strengthened and protected so that it can ensure that families in need have enough to eat.

The SNAP Vaccine: Boosting Children's Health

In February of this year Children's HealthWatch published a report called *The SNAP Vaccine: Boosting Children's Health** in which we demonstrated the positive impact that the receipt of SNAP has on children's health and development.

The report can be found at: http://www.childrenshealthwatch.org/upload/resource/snapvaccine_report_feb12.jpg.pdf.

Specifically we found that, compared to children whose families were likely eligible for but did not receive SNAP, children whose families received SNAP were significantly less likely to be at risk of developmental delays and less likely to be underweight (a sign of under-nutrition). Children whose families receive SNAP were also more likely to live in food secure households and to be child food secure. In other words, their families were more likely to be able to afford enough food for the whole household.

Food insecurity's harmful effects on young children's health have been well documented—compared to similar children in food-secure households, food insecure children are: 90% more likely of having their health reported as "fair/poor", 31% more likely to have been hospitalized since birth, 140% more likely to experience iron deficiency anemia and 66% more likely to be at developmental risk. Given this, Children's HealthWatch research results demonstrate SNAP's protective effect and important role as a health program.

While Children's HealthWatch focuses our research on young children, food insecurity's effect is felt by children of all ages. Food security has negative influence on school-age children's physical and mental health and academic achievement. As doctors, we know that treating vulnerable children with a preventative food "vaccine", protects families and is a common-sense, cost-effective intervention. The economic cost of ill health is large, for example, pediatric hospitalizations cost an average of \$6,000 per visit. Kids with developmental delays are more likely to need special education; special education costs twice what taxpayers pay for regular public education. Using a conservative estimate of costs from FY 2001, special education can cost an additional \$72,000 per child over the course of twelve years of schooling.

SNAP Is a Good Vaccine—Dose Is Too Low

SNAP is a good vaccine for protecting children's health, but the dose is too low to buy the nutrient-rich foods that help children and families stay healthy. In 2009 the American Recovery and Reinvestment Act (ARRA) increased SNAP benefits by a minimum of 13.6 percent, the equivalent of \$80 per month for a family of four. Children's HealthWatch research showed that after the ARRA increase, children in families receiving SNAP were more likely to be classified as 'well' than those children whose families were likely eligible for but not receiving SNAP.

The importance of the benefit level is supported by other research. For instance, a recent study by Jilcott and colleagues demonstrated that women whose families received more than \$150 in SNAP benefits per household member had lower BMIs

*The information referred to is retained in Committee file.

than those who received less than \$150 per household member. This indicates that individuals with higher benefit levels are more able to purchase healthy food throughout the month—thus buffering women from food insecurity’s negative health effects.

Moreover, as one of the four national food plans set forth by the USDA, the Thrifty Food Plan serves as the basis for the maximum SNAP allotment, although it never was intended to be used as a plan for long-term consumption. In 2008, Children’s HealthWatch examined the affordability and accessibility of items on the Thrifty Food Plan in four low-income Boston and Philadelphia neighborhoods. While SNAP is intended to be a supplemental nutrition program, for those families receiving the maximum benefit, SNAP is acknowledged to be the primary source of money for food. Therefore we used the maximum benefit as the basis for our cost assessment.

On average, the maximum SNAP benefit for a family of four fell short by \$196 per month, or \$2,352 per year—an amount no family receiving the maximum benefit (by definition, these are the families with the fewest resources) could ever hope to afford. The ARRA benefit increase took a significant positive step, narrowing this gap by \$67 per month in Philadelphia; however, a substantial gap of \$129 per month remains.

Current Proposals Put the Health, Development and Future Potential of Children in Jeopardy

We wrote to you in February 2012 to inform you of our research findings and warn of the severe harm that will come to SNAP participants, especially families with young children, if cuts and changes go into effect. That letter can be accessed at: http://www.childrenshealthwatch.org/upload/resource/houseagcommltr_heateat_feb12.pdf.*

As health researchers and professionals, we feel it is crucial that the basic needs of America’s next generation of leaders are met so they can develop to their full potential and contribute to the workforce of tomorrow. We must act now to ensure that we invest in our most precious natural resource: our children.

1. SNAP’s structure, which causes it automatically to expand with rising need and shrink as the economy improves and families’ earnings increase, must remain in place.
2. Connections with other programs that streamline processes and reach those most in need, such as Heat and Eat, are essential and must be preserved
3. SNAP benefits must match the cost of healthy food.
 - a. The ARRA benefit level improvements must be maintained.
 - b. It is time to replace the Thrifty Food Plan with the Low-Cost Food Plan as the basis for the maximum SNAP benefit because the Low-Cost Food Plan is a more accurate reflection of food pricing in struggling urban and rural communities

Thank you very much for your time and consideration.
Sincerely,

JUSTIN PASQUARIELLO,
Executive Director, Children’s HealthWatch.

Please contact Stephanie Ettinger de Cuba, Research and Policy Director, for further information. [Redacted]

Children’s HealthWatch is a pediatric research center that monitors the health and well-being of young children living in low-income households. Since 1998, more than 45,000 caregivers of young children have been interviewed in primary care clinics and emergency departments throughout the country as part of our research. Our research sites are in Baltimore, Boston, Little Rock, Minneapolis, and Philadelphia.

COMMENT OF ALVIN EVANS

Date Submitted: Tuesday, May 15, 2012, 12:03 p.m.

City, State: Mantua, NJ

Occupation: Retired

Comment: Farm subsidies need to be offered only to small farms, not large corporate farms which don’t need it and only add to the deficit. SNAP must not be cut. The poor and disadvantaged need more help not less.

*The information referred to is retained in Committee file.

COMMENT OF DIANNE EVANS

Date Submitted: Friday, May 18, 2012, 7:56 p.m.

Occupation: Business Owner
Comment: I am worried about the future of food for my children and my grandchildren. No GMOs! No Chemicals including hormones and antibiotics should be allowed in our food! Organic—what our grandparents called food!

COMMENT OF JESSICA EVANS

Date Submitted: Sunday, May 20, 2012, 7:16 p.m.
City, State: Santa Cruz, CA
Occupation: Homemaker
Comment: I am a married mother of two young boys. Our family lives in Santa Cruz, CA, where we are blessed to be surrounded by agriculture. We see firsthand how the use of pesticides damages the health of farmworkers, and we also see firsthand that organic agriculture does work and can be cost effective.

I am writing to tell you that I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

It is time for a farm bill that will really help America, not just the pocketbooks of corporate agriculture companies. Thank you for your consideration.

Respectfully,

JESSICA EVANS.

COMMENT OF JOY EVANS

Date Submitted: Friday, May 18, 2012, 12:33 p.m.
City, State: Birmingham, AL
Occupation: Registered Nurse
Comment: Keep it clean and get rid of these pesticides and antibiotics that are **Killing Us** and our **Children**. I am a nurse at a Children's Hospital and a health freak. Children's brain tumors are at a astronomical high. Almost always you can trace these poor kids to some chemical exposure with most living near farms, cotton fields and our absolutely disgusting poisoned food supply . . . The parents are the ones also who made me aware of this, they are convinced that these chemicals caused the tumors and I am too. You know it too. It is called **Greed** from the FDA on down to our government. How any of the guilty can sleep at night is beyond me. Knowing you are harming people all in the name of Capital Greed and money!

COMMENT OF MORGAN EVANS

Date Submitted: Friday, May 18, 2012, 1:31 p.m.
City, State: Newville, PA
Occupation: Webmaster
Comment: We need to help our family farms, particularly those engaged in organic production practices. Too often the large government subsidies end up in the hands of the large factory farms, whose primary motivation is profit rather than quality healthful food products. Please do what's right for my neighbors and other small farmers across the country. Thank you.

COMMENT OF JOSEPHINE EVATT

Date Submitted: Thursday, March 22, 2012, 6:48 p.m.
City, State: Mount Vernon, MO
Occupation: Retired Nurse
Comment: How can the Congress blame the poor for losing jobs and needing to get food during the recession by cutting food safety programs like SNAP and TEFAP. These are in place for a reason and when they had to be used during the recession by many people who are not normally in need the Congress decides to cut money to the programs? How does that make sense. Our food pantry numbers dou-

bled during the recession and are just now starting to drop a little. Our small church and community cannot pick up the slack without help. Please don't leave families without the protection and support these programs provide to families.

The children and elderly that suffer. Keep these programs strong.

COMMENT OF MARILYN EVENSON

Date Submitted: Friday, May 18, 2012, 1:55 p.m.

City, State: Tacoma, WA

Occupation: Retired Nurse

Comment: The farm industry needs to be reformed. Independent farmers need help. The huge agribusiness with its factory farms should not receive big subsidies. It is animal cruelty at its worst & produces unsafe food for people. Non-animal farms should be encouraged. Fruits & vegetables & whole grains are the best nutrition for people, not animal products. Vast factory farms pollute our already stressed Earth.

Please help the small farms & not big agribusiness.

Thank you.

COMMENT OF BETH EVERETT

Date Submitted: Friday, May 18, 2012, 12:24 p.m.

City, State: Scottsbluff, NE

Producer/Non-producer: Producer

Type: Field Crops, Greenhouse/nursery, Livestock, Specialty Crops

Size: 301–500 acres

Comment: From a Nebraska farm, 492 acres. That is small. We are certified organic. We are very careful with our produce. Please do not make small farms use the regs as the large ones.

COMMENT OF ED EVERETT

Date Submitted: Friday, May 18, 2012, 9:33 a.m.

City, State: Somerville, MA

Occupation: Assistant Manager

Comment: Instead of subsidizing things like corn, can we offer subsidies for healthy foods (leafy greens, *etc.*)? Also, shouldn't the government be more concerned about factory farming, and the conditions of these types of establishments? I'd like to know where the food (that is most likely) ending up in restaurants and on my plate comes from.

Thank you.

COMMENT OF KEITH FABING

Date Submitted: Wednesday, May 09, 2012, 2:40 p.m.

City, State: Seattle, WA

Occupation: Senior Citizen

Comment: Older American's struggles with hunger are often invisible. It's too easy for members of Congress to direct expenditure of their Political Capital away from addressing how many seniors have serious trouble accessing the food and nutrition they need to survive and thrive. Often, they are forced to make difficult decisions between food, paying for the obscene cost of high profit margin medicines and their supplemental health insurance premiums/deductibles/copays, or paying their utilities or rent. Don't ever forget—**Seniors Vote!** And they **Pay Attention** if their congressional representatives safeguard this most basic of safety nets or choose to toss seniors under the bus hoping that they die early and reduce entitlement costs.

We Are Watching Very Closely!

As a nation, we owe a great deal to the generations that helped build this country—we simply cannot allow one of our most vulnerable populations to suffer in silence any longer.

Cuts to SNAP (food stamps) would further limit access to the food and nutrition programs that millions of older Americans rely on. Meanwhile, the Commodity Supplemental Food Program (CSFP), which provides monthly boxes of food to low-income seniors, faces its own funding threats. These issues matter. What will seniors do if they no longer have access to these vital programs? **Please Support These Vital Safety Net Programs Before Casting Yet Another Vote On Yet Another Wasteful And Corrupt White Elephant Military Program That Largely**

Serves To Line The Pockets Of The Usual Cast Of Old Boy Military Contractors And Their K Street Lobbyists.

COMMENT OF LAUREL FACEY

Date Submitted: Saturday, May 19, 2012, 7:49 a.m.

City, State: Millers Falls, MA

Producer/Non-producer: Producer

Type: Specialty Crops

Size: 50–150 acres

Comment: The issue that is of primary importance is food for good health. It is not to make farmers or corporations rich. We must have clean water and healthy soil, which will depend on getting away from toxics of all kinds. Bees in particular need a healthy environment, and this should always be the focus. We share this planet with other living organisms and we are all interdependent. Poisoning one species invariably leading to the demise of others. We must learn to legislate for sustainability.

COMMENT OF BRAD FAHSEL

Date Submitted: Friday, May 11, 2012, 11:37 a.m.

City, State: Schenectady, NY

Occupation: Librarian

Comment: America needs a farm bill that makes healthy food widely available to all Americans—including schoolchildren! We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers. And support small family farms that care about the quality of food that ends up on our tables!

COMMENTS OF KATHY FAIRCHILD

Date Submitted: Friday, May 11, 2012 10:35 a.m.

City, State: Westby, WI

Occupation: Conservationist/Clerical Worker

Comment: We must turn the tide with Ag policy. The fact that Federal subsidies of commodity crops have our children obese and ill while consuming very little “real” food should be enough to teach the government something. The fat cats at ADM and other corporations must be cut off so that resource conservation and healthy agriculture can be implemented & expanded.

Date Submitted: Friday, May 18, 2012, 11:59 a.m.

Comment: The farm bill has got to take a turn for the better or we are all going to suffer. Please act responsibly and step away from the Big Ag driven *status quo*. We need a new future. Thank you.

JOINT COMMENT OF ERIN FAIRWEATHER AND TIMMY SPERLING

Date Submitted: Sunday, May 20, 2012, 9:15 p.m.

Names: Erin Fairweather and Timmy Sperling

City, State: Colorado Springs, CO.

Occupations: Massage Therapist, Coffee Roaster.

Comment: Our land is our life. We want our tax dollars to be invested in healthy eating & a cleaner environment. Let's be a self-sustaining country & give the jobs back to the farmers! Let's build our country back up **From Within** beginning with our own sacred agricultural land, by using Organic and Non-GMO farming systems, & by putting good farmers into a place of high value. Let's feed ourselves & even export our goods again! There's no reason everyone in the USA should not be eating and have food on their plates.

“We the people” are for eradicating all GMO's completely from our food system. GMO's in our crops/foods are an absolute crime against humanity and nature. It must be implemented ASAP that all GMO foods be labeled as so; it is our right. Let's stop filling our grocery stores with hybrids and irradiated vegetation. Let's focus on growing heirloom varieties, instilling organic farming practices & replenishing our soil. Please clean up our land of that is wrought with pesticide & GMO contamination. It is beyond obvious that soil and river contaminations have led to rising rates in cancer & disease. It is an element which our country was founded on to cherish the land of this incredible North America. Please don't make decisions without regarding your very own seeds' future—that of your children and grandchildren tenfold.

Please do not dare limit funding to any farmer who is growing **Your** very food. Please we urge you to represent your people with vigor & viability in this matter. Also there is no excuse for there to be any delay in changing our system immediately. Push this so that it doesn't get stuck in any inexcusable bureaucratic delay.

"We the people" are for an Organic Farm Bill:*

COMMENT OF ROBERT FARACE

Date Submitted: Friday, May 18, 2012, 12:26 p.m.

City, State: Clinton, CT

Occupation: Editor

Comment: No doubt you're hearing comments regarding the importance of organic and healthy foods, and I agree with those needs and the needs to protect our food supply from corporate profit-driven manipulation.

However, I would also like you to consider that healthy, wholesome food is truly a part of our healthcare as well. If we stop eating so many chemicals and genetically modified foods, maybe we won't have to take so many pharmaceuticals and burden the healthcare system in order to remedy the results.

Thanks you.

COMMENT OF CANDACE FARLEY

Date Submitted: Friday, May 18, 2012, 10:43 a.m.

City, State: Napa, CA

Occupation: Retired

Comment: We need small farms to keep families and communities better fed with less environmental impact. Please support **Healthy** farming practices and ensure that mass producers do not destroy the land OR provide un safe foods by using pesticides that hurt our environment and those who consume them. This affects all of us—including you and your family.

COMMENT OF EUGENE S. FARLEY

Date Submitted: Wednesday, April 18, 2012, 5:06 p.m.

City, State: Verona, WI

Producer/Non-producer: Producer

Type: Vegetables, Other

Size: Less than 50 acres

Comment: Thanks to the USDA support for the training of **Disadvantaged And Minority Farmers** the Farley Center (www.farleycenter.org) in partnership with Community Groundworks has developed and implemented a very successful Farm Incubator for disadvantaged and minority farmers. This program provides these individuals onsite education, training and hands on practical experience for success in farming. The program prepares new farmers in sustainable agricultural practices needed for the production of locally grown fresh vegetables for the local market.

We urge you to continue to fund the very successful programs for encouraging, preparing and developing new farmers from population groups that usually do not have access to such training and the development of the business skills needed to facilitate their continued success.

Thanks for considering continued support of a very successful bill.

My best to you,

EUGENE S. FARLEY,
Exec. Dir.,
 The Farley Center,
 [Redacted],
 Verona WI,
 [Redacted].

COMMENT OF FRAN FARMER

Date Submitted: Friday, May 18, 2012, 4:07 p.m.

City, State: Ira, TX

Occupation: Banker

Comment: I cannot tell you how important it is for our government to encourage farmers across the country to produce foods that are organic and to control the chemicals that are being used on the foods we consume. The health of this country depends on the actions you take. Please be responsible as you consider the decisions you make.

COMMENT OF STU FARNSWORTH

Date Submitted: Friday, May 18, 2012, 7:40 p.m.

City, State: Eagan, MN

Occupation: Retired

Comment: **Stop** the \$\$\$ giveaways to Corporate farms and agribusiness! They are poisoning Our World. When we only had family farms there were never outbreaks of *E. coli* and other dangerous farm produced diseases. We were able to eat raw eggs and drink milk right from the cow. We didn't have overuse of antibiotics or growth hormones. **Now** is the time to **Stop** the **Greed** and get back to the grass and nature.

COMMENT OF ALONNA FARRAR

Date Submitted: Saturday, May 19, 2012, 4:55 a.m.

City, State: Vista, CA

Occupation: Graphic Specialist

Comment: My husband produces organic mushrooms, not button. We have a large garden—organic. We buy what we can't grow from organic suppliers. Anything else is poison and will get worse if you let Monsanto, Dow, Bayer and any of the other chemical poison producers have their way. The American public and animals everywhere are slowly and not so slowly being poisoned. GMO crops are failing. We must support organic agriculture.

COMMENT OF JAMES FARRELLY

Date Submitted: Friday, May 18, 2012, 11:48 a.m.

City, State: Hanover, PA

Occupation: Teacher

Comment: If we can't count on agribusiness which is both successful and healthy for farmers and the nation they feed, we are cooked. Safe, green, sustainable applies not only to our energy policy **But Also** our food production from seed to feed to table. Got it?

COMMENT OF CARL FARRINGTON

Date Submitted: Friday, May 18, 2012, 5:46 p.m.

City, State: Dublin, CA

Occupation: Retired

Comment: The welfare of all Americans and of peoples in other lands will be highly dependent on a farm bill that supports good nutrition particularly of school children and the indigent, supports soil conservation, aids agriculture in Third World countries, and drastically reduces subsidies for ethanol, corn, cotton and dairy products.

COMMENT OF PATTI FARRIS

Date Submitted: Thursday, April 19, 2012, 10:46 p.m.

City, State: Portland, OR

Occupation: Homemaker

Comment: I am very concerned about plans to reduce the amount of land protected by the Conservation Reserve Program. We don't need more GMO's, we don't need more Monsanto dominated, pesticide laden, unsustainable agriculture. We need more habitat, more small family farms, more pollinators and other wildlife.

COMMENT OF JULIE G. FARRIS, S.N.S.

Date Submitted: Wednesday, May 16, 2012, 11:53 a.m.

City, State: Rockwall, TX

Occupation: School Nutrition Director

Comment: The farm bill must support the production of healthy foods, and their transport to local hubs. Identify and fund ways for fresh foods to get to more people. A healthy nation requires healthy food.

The Bill needs to provide funding to support the people of our nation most in need of nutritional support—children and elderly—through continuation of the SNAP and TANF programs, as well as school meal programs and Meals on Wheels type of programs.

And if at all possible, provide guidance for USDA to modify the current meal pattern to provide for clarity and efficiency.

Thank you for this consideration.

JULIE G. FARRIS, S.N.S.

COMMENT OF PATRICIA FARROW-BOWEN

Date Submitted: Wednesday, May 09, 2012, 7:57 p.m.

City, State: Stanwood, WA

Occupation: Retired on SSA Disability

Comment: We all remember the debacle of the finally passed last farm bill. Let's hope to be on the top of the mountain this time around. Hunger in America has not been so great in my lifetime and Sr. Citizens such as myself and children are so in need. Please do all you can to see that the programs that we as well as those who are trying to keep food on our tables are well funded.

COMMENT OF HARRIET FASENFEST

Date Submitted: Sunday, May 20, 2012, 11:08 p.m.

City, State: Portland, OR

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Dear Chairman Lucas, The very plain fact is . . . access to land (good, affordable, unencumbered land) has always challenged the small farmer. Those challenges are written in our agricultural history and I doubt anyone involved in crafting the new farm bill is unaware of them. Today we have an opportunity to rewrite a bit of that history. We can turn back the systems that have favored big commodity farmers and “middlemen” given to exports, and who, along with lobbyist efforts, have long directed policy in this country. My hope is that those interested in helping the small farmer today will not only offer low interest loans for land (or a modern homesteading act), but assist in all aspects of production, distribution and market access. Being “small” in an agricultural system designed for “big” is more than an ideological position. It has very challenging economies of scale Continuing to favor the status quo might win the support and approval of the status quo but **It Will Not** allow for a small farming renaissance in this country. You know that, I know that, and anyone who is involved in agriculture knows that. So please act as if you really want them to succeed. I'm quite sure it is not a matter of not knowing what needs to be done but having the grit to do it. So please **Grit Up!**

Sincerely,

HARRIET FASENFEST—Householder.

COMMENT OF JIM FASSANELLA

Date Submitted: Saturday, May 19, 2012, 8:29 a.m.

City, State: Middletown, MD

Occupation: Liquor Store Mang. Montgomery County Gov.

Comment: Our government cannot let the big buss. of ag. run ruff shod over our rights to have a safe and healthy source of food ava. to all citizens. I am an avid gardener and I am appalled at the way that the large ag. company's have monopoly. What and variety of plants and seeds that are available to purchase. and the way they act like these products belong only to them when in reality the belong to our planet and we just happen to be living on it. We need to remember that when we are busy cow towing to these large ag. buss.

COMMENT OF BARBARA FATH

Date Submitted: Sunday, May 20, 2012, 3:39 p.m.

City, State: Pleasant Plain, OH

Producer/Non-producer: Producer
Type: Specialty Crops
Size: Less than 50 acres
Comment: The U.S. Congress should support local, sustainable and organic agriculture. American consumers have a strong preference for this type of product and deserve your support. Thank you.

COMMENT OF JENNIFER FAUROTE

Date Submitted: Friday, May 18, 2012, 3:18 p.m.
City, State: High Point, NC
Occupation: Stay-at-Home-Mom & Green MBA Student
Comment: It's time to end subsidies for Big Ag, and start investing the money into new projects, technologies, and producers that will result in healthy and sustainable food and food production. Monsanto, Perdue, Con Agra, et al., are only concerned with making money: as our elected representatives it is your job to take care of us, the people. Helping to ensure that sustainable agriculture practices (organic, aquaculture, multi-crop, *etc.*) become the norm instead of the exception will go a long way towards guaranteeing that our future generations have healthy, nutritious food and clean water.

COMMENT OF TERESA FAUVELL

Date Submitted: Friday, May 18, 2012, 7:22 p.m.
City, State: Little Neck, NY
Occupation: Teacher
Comment: When will this country stop supporting Big Ag and the production of unhealthy food? Can't you see we are killing our planet? Can't you further see we are killing our children? I teach in NYC; children are overfed and undernourished. Can't you see what's happening to our country as a result of bad agricultural policies? Why don't we subsidize organic leafy greens and cruciferous vegetables instead of genetically modified corn and soy? **Wake Up!**

COMMENT OF TRACY FAVRE

Date Submitted: Sunday, May 20, 2012, 11:48 p.m.
City, State: Granbury, TX
Occupation: COO
Comment: Dear Chairman Lucas,

I am Chief Operating Officer for a nonprofit whose mission is "to educate people to manage land for a sustainable future". An important part of that future is the **Beginning Farmers** that are desperately needed to replace the current generation of aging farmers! We are currently engaged in a multi-state program to train beginning women farmers as part of a USDA BFRDP grant. Without the financial support of that program, over 300 beginning women farmers in 7 states would not have received this vital training in Whole Farm Planning, which has a proven track record of helping ensure the success for new farmers. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country. Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements

with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill. Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony.

Sincerely,

TRACY FAVRE,
COO,
Holistic Management International.

COMMENT OF BOB FAY

Date Submitted: Wednesday, May 09, 2012, 2:38 p.m.

City, State: St. Petersburg, FL

Occupation: Educator

Comment:

- In 2010, 7.9 percent of households with seniors (2.3 million households) were at risk of starvation;
- 30 percent of Feeding America's client households with seniors indicated that they have had to choose between food and medical care and 35 percent have had to choose between food and paying for heat/utilities;
- In 2009, nearly 9 million people over the age of 50 and nearly 4 million people over the age of 60 lived in at-risk households.

We must ensure hunger-relief programs remain protected so that seniors who worked their entire lives continue to have access to these vital programs.

COMMENT OF MICHAEL FAZZI

Date Submitted: Wednesday, May 16, 2012, 9:55 a.m.

City, State: Portland, OR

Occupation: Sales Representative

Comment: Please continue to support the SNAP and TEFAP program funding. These programs offer food to the needy. In these tough times we are only one paycheck from homelessness and funding for SNAP and TEFAP may be the only way we can have enough food to feed our families. Your support is that important.

COMMENT OF PENNY FEE

Date Submitted: Saturday, May 19, 2012, 8:51 p.m.

City, State: Sioux City, IA

Occupation: Retired Teacher

Comment: It is high time that we passed a farm bill that is not supportive of big ag! There needs to be real encouragement for young, families to go into sustainable, healthy, humane production of livestock and crops. Perhaps there is an opportunity to offer some start-up incentives for returning military personnel who would like a chance to farm in a healthy family environment, with learning assistance on ag basics. Not working in confinement or big ag corporations, but a positive "back to the land" kind of environment that would help returning vets with stress and health issues. There is so much good land available for those who are willing to learn to work with animals and environment and to make a difference in America's food quality.

COMMENT OF THEODOR FEIBEL

Date Submitted: Saturday, May 19, 2012, 1:38 a.m.

City, State: New York, NY

Occupation: Artist/Commercial Photographer

Comment: Industrial Agricultural Lobbyists do not have as a primary concern the optimal mental and physical efficiency of the society's human capital. Our 'human capital' is all. Without it we have not the wit to defend ourselves nor to compete in the economic arena. Being carbon based life-forms we depend on our nutrition and freedom of toxicity in the environment for our health (mental and physical) as well as optimal function. Concerns regarding agricultural processes that in evolu-

tionary time scales are very new indeed when compared to the age of our biological structure and DNA; is therefore not some 'new age fad' but a very real National Security concern.

COMMENT OF JOHN FEINBERG

Date Submitted: Friday, May 18, 2012, 11:55 a.m.

City, State: Boulder, CO

Occupation: Designer/Planner/Architectural Conservator

Comment: If one knows what is causing the premature death of millions of your countrymen, have the power to stop the cause, and do nothing about it, Are you not guilty of homicide?

Stop the plague of type II diabetes, do our utmost for everyone to have the knowledge and opportunity to eat right by crafting a best practices based farm bill. Thank you.

COMMENT OF JOHN FEISSEL

Date Submitted: Friday, May 18, 2012, 4:04 p.m.

City, State: Philadelphia, PA

Occupation: Stable Hand

Comment: With too many reasons to submit, I will simply say it is vital that we support small family farms, and organic and sustainable methods. These are the best way to ensure the health of our citizens, communities, and economy.

COMMENT OF SHELA FELDT

Date Submitted: Sunday, May 20, 2012, 5:52 p.m.

City, State: Olathe, CO

Occupation: Retired Self Sustaining Life Stylist

Comment: We the people need your help in this matter. Do **Not** allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars!

COMMENT OF ANDREW FELGER

Date Submitted: Friday, May 18, 2012, 12:31 p.m.

City, State: Penobscot, ME

Occupation: Produce Manager

Comment: My job is to sell organic produce. My customers want organic LOCAL produce. Currently state and Federal rules favor only large scale producers. This is not good for my customers, my growers or our local food system and economy. Our opinion is that these laws are neither fair nor necessary. Local food systems can be sustainable and safe. Let us work.

COMMENT OF LINDY FELIX

Date Submitted: Saturday, May 19, 2012, 3:32 p.m.

City, State: Vesuvius, VA

Occupation: Holistic Health/Organic Gardner

Comment: I am hoping for politicians to rise in support of health. Real Health, not Monsanto's propagandized bull . . . Please be the ones to act with wisdom and fairness and responsibility to your constituents.

COMMENT OF BRIAN FELT

Date Submitted: Friday, May 18, 2012, 1:48 p.m.

City, State: Chicago, IL

Occupation: Sales/Home Design

Comment: Please fund organic farming and research as much as possible! NOT in support of GMOs and Monsanto (aka health and agriculture destruction).

COMMENT OF LINDA FELTER

Date Submitted: Wednesday, May 09, 2012, 7:21 p.m.

City, State: Tucson, AZ

Occupation: Accountant

Comment: We must balance the budget and quit spending money we do not have! If cutting the SNAP program is the only way, then do **It** to cut **\$36 Billion**

from our deficit. Open Federal lands and let these **Legal** citizens start farming Federal lands and grow food! Supply them seeds and water. I'm tired of **Giving** the farm away . . . people need to have some responsibility for themselves. And get **Rid** of the **Free** cell phones and the child credit to illegals!

COMMENT OF SUSAN FELTON

Date Submitted: Friday, May 18, 2012, 8:18 p.m.

City, State: El Dorado, CA

Occupation: Registered Nurse

Comment: I am concerned about government and big agribusiness forcing out small family farms, I am opposed to genetically modified food and seeds. We should be using our dollars to provide natural, safe, local food to all. I don't mean free food, but affordable natural foods including humanely raised meat.

COMMENT OF SUZANNE FENN

Date Submitted: Saturday, May 19, 2012, 6:21 a.m.

City, State: West Tisbury, MA

Occupation: Retired

Comment: We are in our seventies, we have striven to lead healthy lives. Fortunately we live in a community where others young and old work towards the same goal for themselves and their children, our local farmers and growers work hard against great odds. Agribusiness is stacked. Against them. We want fresh local food. Government must open their eyes to the movement in this country. People who see the health of our people getting worse and worse. Senator Keating. I'm sure you have been to Europe . . . have you eaten in France . . . Have you noticed the flavor in the vegetables and meat? Did you see many enormous people? Please take time to read about the local/slow food movement in this country and all over the world. If we want to spend less on health care we need to support good food not factory food that is making us sick and fat. Help the small farmer that needs help not the conglomerates that don't. We Don't need corn syrup! And we shouldn't be using land to produce stuff to run our automobiles! Sometimes I think we have gone mad!

COMMENT OF CHRIS FERGUSON

Date Submitted: Thursday, May 10, 2012, 9:45 a.m.

City, State: Atlanta, GA

Occupation: Work at Nonprofit Organization

Comment: I do not support any cuts to the SNAP program. SNAP has grown in response to the ongoing tough economy, which is what it is designed to do. As the economy improves and more people are employed, SNAP participants will naturally decrease. In the meantime, SNAP benefits are helping to sustain households. 75% of SNAP households include a child, elderly person, or disabled person. While there are numerous news stories about SNAP fraud and abuse, the actual rate of abuse and fraud is extremely low—just ask the Department of Agriculture.

Thanks,

CHRIS.

COMMENT OF JIM FERGUSON

Date Submitted: Friday, May 18, 2012, 7:27 p.m.

City, State: Cedar Park, TX

Occupation: Retired

Comment: As a supporter of my local food bank, I am writing to share my concern about hunger in Texas. With unemployment still high and many Americans still struggling to make ends meet, anti-hunger programs are helping many of our neighbors just put food on the table.

Nearly 50 million Americans are living in food insecurity. While food banks, churches, and pantries are doing great work in our community, charity alone cannot meet the need for food assistance.

Congress should do its part by continuing to support anti-hunger programs like the Supplemental Nutrition Assistance Program (SNAP), The Emergency Food Assistance Program (TEFAP), and the Commodity Supplemental Food Program (CSFP), all of which are authorized in the farm bill.

Cutting anti-hunger programs will increase hunger in America. Given the associated health care and educational costs of hunger and poor nutrition, cuts to anti-hunger programs are short-sighted.

I ask you to please remember the families who are struggling in our country, and urge you to protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 farm bill reauthorization.

Hunger is unacceptable.

Thank you for your action!

COMMENT OF GERARD FERRARI

Date Submitted: Friday, May 18, 2012, 5:03 p.m.

City, State: La Crescent, MN

Comment:

1. More subsidization for organic farmers.
2. Less subsidize for conventional farming.
3. More regulation of genetically modified farming.
4. End patents on genetically engineered organisms.
5. More regulations and conventional farm water runoff, and pollution.
6. Regulate Monsanto.

COMMENT OF DAVID FERRELL

Date Submitted: Friday, May 18, 2012, 4:13 p.m.

City, State: Media, PA

Producer/Non-producer: Producer

Type: Dry Beans & Peas, Fruits, Poultry/poultry products, Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: I have failed and gone into bankruptcy due to un-ethical FSA lending policies. Young farmers like me, particularly practicing peri-urban agriculture, or farming on a commercial scale within near vicinity of a urban population center, can have a challenging time getting long term leases. My land owner, be it a government body—Middletown township, would not give me a long term lease on the farm until I could prove what I could do with it. I couldn't do that without financing. All I needed was \$5,000 to float the bills and equipment rental for field prep before produce was coming in, second season on this particular farm. FSA wouldn't lend because I didn't have long term lease, and because I had no equity other than my truck and small cultivating tractor. I couldn't get long term lease unless I proved my production capabilities.

This chicken and egg scenario will keep crippling Americas new young farmers who have no real land or equipment equity. We as a nation cannot afford to lose this already narrow sector of people who have the skills, knowledge, ability, and desire to feed our communities.

In my opinion agriculture is the backbone to a prosperous society. The Federal government should be throwing buckets of money (loans that is) at any lad or lass under 25, regardless of the circumstances, who have a serious commitment to agriculture and the well being of Americas food supply. You fuckers (please pardon, but no other word will suffice here) in Washington cannot afford to screw this up for us.

We need fair FSA lending policies! If a proposal under \$50,000 and the farmer is under 25 it should be streamlined approved. Cut down on wasteful loans to the top tier corporate entities, whose dollars will leave our shores and windup invested in foreign resources.

Consider this message a re-incarnated mandate from TJ and all our other yeoman founding fathers. Put America on the right track . . . the only real way to do this is by putting young people back to work, back on the land. We need the financing to do this as private banks no longer can serve this niche.

Thank You For Listening.

DAVID FERRELL.

COMMENT OF DONNA FERRIER-JOHNSON

Date Submitted: Saturday, May 19, 2012, 10:53 a.m.

City, State: Garland, TX

Occupation: Teacher

Comment: Farm subsidies should be discontinued for the very large corporate producers who have a monopoly in agribusiness. These corporations do not need my tax dollars, but need to have their monopolies disrupted. "Factory farms" treat ani-

mals horribly and perpetrate genetically-engineered foods for government funds! I object to this egregious use of my hard-earned taxes!

COMMENT OF KATHY FERRO

Date Submitted: Friday, May 18, 2012, 3:08 p.m.

City, State: Bricktown, NJ

Occupation: Housewife/Mother

Comment: Dear Sir,

I do not believe in GMO's and I do not want to eat them. If you will not stop the production of GMO's then I must request it to be labeled on all foods so I the consumer have a right to choose to buy it for my family and eat it or not! I feel this is my right for control what I eat and what I feed my family!

Thank you,

KATHY FERRO.

COMMENT OF SUZANNE FERROGGIARO

Date Submitted: Saturday, May 19, 2012, 11:01 a.m.

City, State: Grass Valley, CA

Comment: I am writing on behalf of our 12 family voters and 4 children. We all urge you to insure that U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

We all support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF RITA FERRY

Date Submitted: Friday, April 27, 2012, 12:52 p.m.

City, State: Annapolis, MD

Occupation: Retired Appraiser

Comment: I volunteer at our community food bank where we gather non perishables from the community for over 100 families each month.

Please do not cut programs which aid poor families as we depend upon subsidies to help these families make it and keep their children in school and in good health.

COMMENT OF ROBIN FEUSNER

Date Submitted: Friday, May 18, 2012, 12:28 p.m.

City, State: Jones, OK

Occupation: Ex-Farm Wife

Comment: We need get away from all the very toxic chemicals our futures depend on it.

Many of our present ills are because of alk the chemicals in our food and WATER. I know the dirty little secrets the chemical co don't tell the country.

I know how the fertilizers are polluting our water resources.

I know about the steroids in the meat and milk.

I know about the toxic chemicals used to force crops to produce more.

We need to go back to back yard and small hobby farms for the smaller markets. Give people the choice the organics are very expensive to produce and that is passed on but with gov't help those expenses could be managed better.

COMMENT OF ALICIA FIEDLER

Date Submitted: Friday, May 18, 2012, 1:54 p.m.

City, State: Austin, TX

Occupation: Stay-at-Home Mother

Comment: As a mother, and a person who believes strongly that the health of our foods effects the health of our environment and the overall health of our nation, I would like to see a strong and clear-headed farm bill that aids the production of organic food, and ends subsidies for large agribusinesses. To that end, please fully endorse all provisions of the Local Foods, Farms, and Jobs Act. The EQIP Organic Initiative should be maintained and all provisions of the Beginning Farmer and Rancher Opportunity Act should be implemented. There shouldn't be any reduction in funding of food stamp programs until all subsidies to massive agribusiness operations have been ended. Then you can take food from the mouths of hungry Americans if you must. There should be no insurance subsidies that are not tied to compliance with conservation and sustainability programs like the Conservation Stewardship Program. Our readiness as a nation to face future social and environmental disasters will be based on our food security. We need to treat this land and soil with great care if we intend to keep producing our own food. Otherwise we will find ourselves reliant on food hand outs from foreign nations, and our country will no longer be free. We will be in the pocket of whomever has the food. Please keep the farm bill strong, and free of back room dealings.

COMMENT OF CATHERINE FIELD

Date Submitted: Friday, May 18, 2012, 1:00 p.m.

City, State: Portland, ME

Producer/Non-producer: Producer

Type: Fruits

Size: Less than 50 acres

Comment: We raise organic low bush blueberries for commercial sale; we carry out and support sustainable farming practices which safeguard the future of food quality and the health of our communities. We support family farms, local small farms, farmland prices affordable to young people who want to be farmers, protection of farmland—where else will we grow food for this nation?—and the healthy quality of land and water for all.

COMMENT OF ROBERT FIES, M.D.

Date Submitted: Friday, May 18, 2012, 1:34 p.m.

City, State: Arroyo Hondo, NM

Producer/Non-producer: Producer

Type: Poultry/poultry products, Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: Agricultural policy has been controlled by and for large agribusiness. As a very small early producer, I ask you to consider that our food future lies in returning to small farms who can operate within the balance and immense productivity of nature itself. The days of massive chemical monoculture with pollution of soil and water are numbered. Likewise, powerful chemical herbicides and pesticides are producing megaweeds and superpests just as GMO crops of all varieties, most poorly or never tested for harmful effects to the environment and to human health, are spreading their germplasm to necessary healthy organic crops. Please stop protecting big ag whose productivity is diminishing and whose harm is rampantly growing. And please stop regulating and restricting small farmers. We shall rise again, but only if you get off our backs!

COMMENT OF NANCY FIFER

Date Submitted: Saturday, May 19, 2012, 8:58 a.m.

City, State: Lewes, DE

Occupation: Unemployed

Comment: One of my bumper stickers reads **No Farms No Food** and at the rate things are going, that could happen sooner than we think! I only know that if the current rate of farms disappearing continues we will be in trouble. If common sense instead of greed is in play, then we have a chance! Think of the future!

COMMENT OF PENELOPE FINK

Date Submitted: Friday, May 11, 2012, 12:28 p.m.

City, State: Truckee, CA

Occupation: Retired Information Technology Manager

Comment: The new farm bill needs to address the future of sustainable farming to provide healthy foods by supporting research into sustainable, environmentally

sound agriculture, supporting small farms, and supporting new and would-be farmers.

COMMENT OF RICHARD FINK

Date Submitted: Friday, May 18, 2012, 9:21 a.m.

City, State: Brookfield, VT

Occupation: Restaurateur

Comment: Please do something to limit lawsuits initiated by large agribusiness regarding patent infringement on small family farms. The rights of corporations end where a family farms nose begins.

COMMENT OF MARY MIHO FINLEY

Date Submitted: Friday, May 18, 2012, 5:19 p.m.

City, State: Volcano, HI

Occupation: Nonprofit Administrator

Comment: We are so vulnerable here in the middle of the Pacific Ocean. Imports make up some 90% of what we eat. Please support farms programs to support new, small farmers and family farms. These are the types of farms we need to encourage. These are the folks/types of producers that will make us safer, make Hawaii more sustainable.

COMMENTS OF BARBARA FINLEY-SHEA

Date Submitted: Friday, May 11, 2012, 1:21 p.m.

City, State: Lyle, MN

Occupation: Lutheran Pastor

Comment: The farm bill needs to include adequate funding for food assistance programs, food stamps and generous funding for sustainable agriculture and conservation programs.

Subsidies for factory farms, corporate backed agriculture operations and subsidies to millionaires need to be stopped completely.

The U.S. Farm Program needs to support sustainable agriculture, conservation and food programs that help needy citizens, especially our children.

Corporations Should Not Be Allowed At The Table When The Farm Bill Is Being Discussed And Decided! Get Corporate Interests Out Of The Farm Bill!

Date Submitted: Sunday, May 13, 2012, 1:16 p.m.

Comment: With the debacle of pink slime fresh in our minds, we want and expect a farm bill that:

- (1) will call for truthful, straightforward labeling of what's in our food!
- (2) will provide generous support for conservation programs!
- (3) will provide generous support for sustainable agriculture programs!
- (4) will **Stop** providing support and tax breaks for industrial factory farm operations!
- (5) eliminate commodity payments to millionaires and non-farmer investors!
- (6) Get Corporate interests out of the room when decisions on the farm bill are being made. Monsanto, Pfizer, Cargill, and other large corporations **Do Not Belong At The Table When The Bill Is Being Written!**

COMMENT OF TOM FINNERAN

Date Submitted: Friday, May 18, 2012, 11:02 p.m.

City, State: Boulder, CO

Occupation: Lapidary

Comment: I am extremely concerned about the proliferation of GMO's, and the use of glyphosphates both of which are becoming more and more attributable to health and environmental destruction.

Although scientific studies confirming this are often suppressed or ignored the information is getting out, indeed is already available for anyone interested to find.

COMMENT OF VANESSA FINNEY

Date Submitted: Sunday, May 20, 2012, 8:35 p.m.

City, State: Fawnskin, CA

Occupation: Writer

Comment: Millions of us want the U.S. to ban GM crops or at least require the labeling of foods containing their ingredients. Other countries have done so. The American public is waking up to the shameful practices of those who produce and market genetically modified foods. We have also noted the conflicts of interest in Washington—for example, see this chart noting the individuals with ties to Monsanto AND influence in the government. <http://redgreenandblue.org/2012/02/02/monsanto-employees-in-the-halls-of-government-part-2/>.*

COMMENT OF MARYA FISCHER

Comment: Please consider your motives when voting on the health of all the citizens. Wouldn't you want the Best for your children and grandchildren. Why Poison your body and our bodies all in the name of corporate profit, greed! Fill your heart and mind with contentment. **Know** that you are making profound wise choices when you vote on these Very Important Food Issues. I thank you.

Love, Peace, Harmony.

COMMENT OF ELIZABETH FISCHER

Date Submitted: Friday, May 18, 2012, 3:57 p.m.

City, State: Ruleville, MS

Occupation: Teacher

Comment: It is so hard to get affordable, **Fresh** produce in Ruleville. The grocery store there seems to only get the veggies and fruit that fall off the back of the truck. Please make provisions in the farm bill that reallocate subsidies from commodity crops to crops that are actually consumed by humans!

Thank you!

COMMENT OF HEATHER FISCHER

Date Submitted: Saturday, May 19, 2012, 8:47 p.m.

City, State: Mechanicville, NY

Occupation: Stay-at-Home Mom

Comment: Please support local jobs for Saratoga county and beyond with the farms bill. Farmers need our help. Consumers need safe, organic, local, sustainable food.

COMMENT OF BARBARA FISHER

Date Submitted: Friday, May 18, 2012, 10:45 a.m.

City, State: Athens, OH

Occupation: Documentary Filmmaker, Chef, Food Writer

Comment: In the 2012 Food and Farm Bill, I would like to see continued support for supplemental food programs like SNAP, which enables the impoverished elderly, families with children, and the disabled access not only to food in grocery stores, but fresh food from farmer's markets. This is important not only because everyone needs food, but fresh produce will help boost the health of the recipients, which lowers health care costs, **And** it helps local economies and local farmers pay their bills.

Please fund programs that help beginning farmers and small farmers get started. We need a more sustainable food system that has room for both big corporate agriculture and small family farms. Both types of agriculture fill a needed niche in our food system, so, please do not prefer corporations in agriculture over smaller farmers and beginning farmers.

To this end, please end subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies.

Please continue to support environmental and conservation efforts in agriculture:

Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

Thank you.

*The information referred to is retained in Committee file.

BARBARA FISHER.

COMMENT OF DAVID FISHER

Date Submitted: Friday, May 18, 2012, 12:19 p.m.

City, State: Fairfield, IA

Occupation: Botany Professor

Comment: Please stop letting agri-corporations impose their profits-first agenda on the new farm bill. Instead, maintain and increase funding for healthy food, sustainable and organic agriculture, conservation, and a reasonable and safe life for farmers. Healthy food does not include the aspects of our present food system that have resulted in an obesity epidemic, which Big Ag would like only too much to see continued.

COMMENT OF KAREN FISHER

Date Submitted: Sunday, May 20, 2012, 10:45 p.m.

City, State: Oskaloosa, IA

Occupation: Teacher

Comment: I believe that the first step toward sustainable agriculture is stop the farmer subsidies of corn and soybeans. Moving away from industrialized farming practices and using those subsidies for farmers that are producing local organic and using sustainable farming practices. I live within a few miles of 3 factory farms. My family and I cannot enjoy a beautiful summer evening without the stench of these factory farmers. The hogs in these confinements live miserable lives. It takes only common sense to know that this is a unnatural state for an animal and the consequences of eating these pigs has begun to take it's toll on humans. On our physical health, our mental health, and our spiritual health. This is the real price of a cheap pork chop.

COMMENT OF MELODY FISHER

Date Submitted: Friday, May 18, 2012, 8:09 p.m.

City, State: Prescott, AZ

Occupation: Licensed Midwife

Comment: People have to be able to have the freedom to buy good and natural food from their neighbors and friends without restrictions and fines! This is one of the backbones of how our country began and families met their own needs as well as bartering and getting from others what they themselves could not grow.

Big Corporations have the freedom for too long in processing and adding chemicals and artificial ingredients to our food.

We want to take back our God given right to eat natural, whole foods.

COMMENT OF STEPHANIE FISHER

Date Submitted: Sunday, May 20, 2012, 11:40 p.m.

City, State: New York, NY

Producer/Non-producer: Producer

Type: Vegetables

Size: 50-150 acres

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I am a young farmer currently engaged in apprenticeships with my partner, Noah Meyer. We're learning from farmers across the country so that we can someday return to New York State and begin our own farm and dairy. One of the biggest challenges for us is securing funding for our future farm, which we intend to use as a community building force. We support local farms as a way to keep the local economy strong and our food system diverse. I'd like to share my support for programs that help the next generation of growers build strong farm businesses. As it's estimated that 125,000 farmers will retire in the next 5 years, it's absolutely critical that farm bill programs help citizens get started in this challenging field. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.

- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country. Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

STEPHANIE FISHER.

COMMENT OF MADELEINE FISHER KERN

Date Submitted: Friday, March 16, 2012, 3:04 p.m.

City, State: Los Angeles, CA

Occupation: Writer

Comment: That our country can't find a way to pass a comprehensive farm bill shows just how dysfunctional it is. Maybe the Congress ought to start doing its job.

COMMENT OF COLIN FISKE

Date Submitted: Sunday, May 20, 2012, 10:27 p.m.

City, State: McKinleyville, CA

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: Support for monocultured, chemical-intensive commodity crops (and the livestock and processed foods into which they are transformed) must end. The Federal government must instead use its farm bill to support a mix of crops representative of a healthy diet (much heavier on the fruits and vegetables, lighter on the grains and meats, with a focus on varieties that are intended to be eaten as whole foods). The farm bill must also shift its historical priorities dramatically and begin to provide financial, educational, and other structural support to small farmers who practice sustainable polycultures and who are do not rely on economically unstable, finite, and biologically and environmentally damaging fossil-fuel based inputs.

COMMENT OF MICHAEL FITCH, JR.

Date Submitted: Friday, May 18, 2012, 3:57 p.m.

City, State: Hartford, CT

Comment: SNAP benefits are so important in my community because they help people with a lot of kids get enough food for the house. There are people in my community with 5 to 8 kids in one house and if you cut them low the parents will not have enough money in the house to feed their kids.

COMMENT OF MACLEOD FITZGERALD

Date Submitted: Friday, May 18, 2012, 5:28 p.m.

City, State: Pfafftown, NC

Occupation: Retired Acupuncturist

Comment: I do not like agribusiness altering the natural wholesomeness of organic produce and meats. I buy 90% of my food from local producers and do not trust the general grocery stores to meet my needs. All GMO and irradiated food must be label as such!

Stop farm subsistence to all growers and allow people to bear the costs of consumption.

No patents for food items!
Raw certified milk should be allowed in the market!
Thank you,

MACLEOD FITZGERALD.

COMMENT OF ERIN FITZNER

Date Submitted: Friday, May 18, 2012, 12:00 p.m.

City, State: Downingtown, PA

Occupation: Software Analyst

Comment: I have lived in the U.S. my entire life with the exception for 2½ years when I lived in Europe (as an adult). I find it extremely hard to believe that here in the U.S. the basic right of knowing what is in the food we eat is not fulfilled. How can we, as a country, expect to control the obesity problem in this country when an individual has no idea of what they are feeding their bodies as well as those of their families. I work in the healthcare industry and have read numerous articles on the rise of childhood obesity (not just a 30lb or less weight issue), diabetes, the fact that 25% of kidney transplant donors are ineligible due to issues with their weight. Obesity is crippling our health as well as many aspects of our economy and yet our Congress and House, the folks that are supposed to represent the American people, not American corporations, still have to be convinced to let the

American people know what their food contains. Provide the American people detailed information as to what their food contains, and allow them to make an informed choice as to what they feed their families.

COMMENT OF GWENDOLYN FLAGG

Date Submitted: Friday, May 18, 2012, 2:22 p.m.

Size: Less than 50 acres

Comment: Are you kidding me? With the people starving in this country and the rest of the world, we need to be growing food on every lawn, back yard, vacant lot, piece of farm land we can find. What is wrong with humans today? Don't you understand that what happens to me happens to you. Haven't you figured this out yet. Keep this up and we will all suffer!

COMMENT OF MARIANNE FLANAGAN

Date Submitted: Friday, May 18, 2012, 7:09 p.m.

City, State: Des Plaines, IL

Occupation: Teacher

Comment: I believe a fair farm bill would take a closer look at sugar subsidies—they are being abused. I do not believe SNAP should be taken out. As a Head Start teacher I see the benefits of this program every day. For some of my kids this is their only nutritious food for the day. It is also teaching them healthy eating habits—they want their parents to buy fruits, vegetables, and healthy cereals. To end this with the amount of poverty in this country is unconscionable. This committee needs to pay attention to the faces of hunger in our country—take a road trip to a food bank, or low income school.

COMMENT OF DAVID FLATE

Date Submitted: Friday, May 18, 2012, 6:42 p.m.

City, State: Los Angeles, CA

Occupation: Real Estate Agent

Comment: I am not in agreement with the farm bill cutting education about nutrition and cutting funds and support for organic farming. Big agriculture can no longer run our food supply and GMO's should be banned.

COMMENTS OF JUDY FLEMING

Date Submitted: Friday, May 18, 2012, 11:04 p.m.

City, State: Imboden, AR

Occupation: Registered Nurse

Comment: Mr. Crawford,

I hope your familiar with this issue, we are not a country who wants sick food to eat.

Frankenfoods as they are called after Frankenstein because it's playing god with life. Mixing seeds with Cancer, diseases, and human Di nucleic acid/DNA is not natural. Literally these foods are a nightmare for our bodies metabolism and health. These seeds from Monsanto are nothing more than a corporation instrument for money and genocide. What does corporate and food have in Common? NOTHING that's my point. It's not for the people of this land of America. Let the Maritime take care of their seas and leave the land alone. These Admiralty Statutory corporations are purely evil for life. They destroy the food, land and sea. Don't let them harm us anymore.

This is a different concern;

I have a big problem with the chemtrails in our skies these plane trails that don't dissipate after being sprayed out of the cans on the jets and military planes are poisoning us with barium, aluminum, and nitrous oxide/laughing gas. That is destroying our land, water, and health maybe you can influence someone to stop this fraud and deception. It's a lot to work, with taking on these corporations, but I hope you're the man for the job. Don't let them conquer and destroy us. Please! believe what I am telling you, I'm not a hysterical nut

With Much concern and seriousness,

JUDY FLEMING

COMMENT OF S.F. FLEMING

Date Submitted: Friday, May 18, 2012, 2:25 p.m.

City, State: Salt Lake City, UT

Occupation: Business Sector

Comment: I want to have sustainable agriculture, no GMO foods, and organic produce available in all towns in the USA. Farm policy must include resources for young organic farmers to get loans to stay on small and middle sized farms. Our country is in danger of spoiling our soils with the big agriculture way of planting and harvesting.

COMMENT OF CHRISTINE FLETCHER

Date Submitted: Friday, May 18, 2012, 3:40 p.m.

City, State: Santa Barbara, CA

Occupation: Housewife

Comment: It is astounding to think that intelligent people, if they are guided by any sense of integrity, could be voting the way they have been doing on this Committee. My conclusion, therefore, is that the disservice done by these Committee members to their own country and its people, is purely self serving. They have apparently been bought by the profit mongers, who also act only in the interest of themselves. Shame on both sets—gambling the future health of generations out of greed. For money and power. Resisting common sense laws and requirements is an indicator of serious misuse of the trust which was accorded to you. The Agriculture Department and it's disgraceful Secretary, along with this Committee, are a blot on President Obama's promises to this country. I wish he could pay more attention to the abomination you are causing to our nation's and the world's food supplies. Your disloyalty to everything but your own misplaced profit garnering is Staggering.

COMMENT OF ERIN FLETCHER

Date Submitted: Saturday, May 19, 2012, 5:34 p.m.

City, State: Cedar City, UT

Occupation: Mother

Comment: I spend **At Least 70%** of my expendable income on Organic Food and Healthcare products for my family.

*The information referred to is retained in Committee file.

Organic and Sustainable agriculture is Essential to our lives. My freedoms to access real, clean, and sustainable food and healthcare Must be Respected, and Must be Protected!

I live in a Rural community, and county, and State, and I know all around me that farmers are struggling. Farmers are suffering. The land is degraded and water is not abundant. Conventional & Industrial Methods are Poisoning my children's futures. They are poisoning Organic Farms, farmers, livelihoods with contamination, and Monopoly.

Give Organic Food and products **Equal** consideration, consumers Equal rights and access, and protect our Rights to Liberty. Nothing less will do.

COMMENT OF IAN FLETCHER

Date Submitted: Friday, May 18, 2012, 12:04 p.m.

City, State: Elmhurst, IL

Occupation: Public Health Professional

Comment: It is imperative for the future of our nation that we change an archaic program, designed in the Great Depression, to benefit real food like fruits and vegetables, rather than subsidize non-food like corn-feed, high-fructose corn syrup, and the like. The only way we are going to get a grip on the health challenges facing our nation, especially obesity and diabetes, is by creating a food system that supports healthier eating, not larger consumption.

COMMENT OF NATHAN FLICKINGER

Date Submitted: Saturday, May 19, 2012, 10:39 a.m.

City, State: Eggleston, VA

Producer/Non-producer: Producer

Type: Specialty Crops

Size: 500-999 acres

Comment: Beginning Farmers being cut in half!

New farmers are our future! There are so many aging farmers, what will happen when they pass on? Who will take over their fields and will they know what they're doing? I am for the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

Organic research cut by \$4 million? Organic agriculture, though not the best, is a great form of agriculture. Far superior in its sustainability than your conventional ag. Look at the majority of the soil of this nation! Depleted, lifeless, over worked. Chemical fertilizer is a joke. To say that artificial fertilizer will nourish the food that is supposed to nourish our nation? We need to maintain the EQIP Organic Initiative. Big ag needs to be swiftly removed from the decision making process. Consumers need to be informed of what is going on with their food.

I fully endorse of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

We need conservation programs, such as the Conservation Stewardship Program, and make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

Please let us make wise choices that are not swayed by money. That is so short sighted. We are smarter than that.

Thank you.

COMMENT OF DANIELLE FLITTER

City, State: Portland, OR

Occupation: Unemployed/Volunteer

Comment: Quality, local, fresh produce is the cornerstone to a healthy life. With levels of obesity amazingly high in children **And** adults changing our food environment to a healthy standard is essential for the future health of our nation. Supporting local farmers to produce their best crops will not only stimulate the local and national economy but bring a healthy standard back to the American life.

COMMENT OF JANYSE FLOREK

Date Submitted: Friday, May 18, 2012, 2:03 p.m.

City, State: Sedona, AZ

Occupation: Self-Employed, Artist

Comment: Locally grown food from small organic farms must be revived and protected in order for Americans to regain their health through everyday living. This is a cornerstone for healthy bodies, minds, spirits and **Economies**. They are all linked. Large, chemically based agriculture is killing us, physically and economically. Please, research this thoroughly. Go no further than to examine your own health and your family's health critically and honestly to gain ground level perspective. That will take you on a journey of further investigation that will change your lives.

Thank you,

J.F.

COMMENT OF MARGARET FLORES

Date Submitted: Friday, May 18, 2012, 6:30 p.m.

City, State: Dinuba, CA

Producer/Non-producer: Producer

Type: Fruits

Size: 50-150 acres

Comment: Hello,

I strongly urge you to provide more funding for small family farms like my own and others that are at the forefront of organic food production. Without prioritizing this we cannot strive to provide affordable and healthy produce to communities in need.

Sincerely,

MARGARET FLORES,
Dinuba, CA.

COMMENTS OF SHARON FLORES

Date Submitted: Friday, May 18, 2012, 12:50 p.m.

City, State: Ventura, CA

Occupation: Gourmet Internet Food Company

Comment: Our nation's farm bill needs to be updated to encourage small farmers, especially organic farmers, and to discourage big agriculture which has made food inferior and laden with health issues. Big agriculture has been given financial perks that bring inferior food products to market while organic farmers must pay high licensing fees to bring good healthy food to market. You have the chance to turn the tide from America being represented by obese and ill citizens to a nation of healthy Americans eating **Real** food.

Date Submitted: Saturday, May 19, 2012, 1:14 p.m.

Comment: The current farm bill encourages bad and dangerous farming practices and does not encourage small farmers and organic farmers. For the future health of our nation the farm bill needs to change from large factory farms getting subsidies to smaller, sustainable farms receiving government assistance.

COMMENT OF YOMEI FLORES

Date Submitted: Friday, April 20, 2012, 12:25 p.m.

City, State: San Antonio, TX

Occupation: SAFB/Senior Program Coordinator

Comment: We need the farm bill to protect programs like CSFP, SNAP, and TEFAP. I see the faces of relieve when these households get the assistance from these programs every day. Many seniors are low income and many families cannot find jobs.

COMMENT OF RUTH FLOURNOY

Date Submitted: Monday, April 23, 2012, 7:04 p.m.

City, State: Houston, TX

Producer/Non-producer: Producer

Type: Other

Size: 1,000+ acres

Comment: I support the conservation programs in the proposed Farm bill and ask that conservation easements be reinstated and made permanent. I support the cost-share programs such as CRP, EQIP, WHIP, and CSP.

COMMENT OF RUTHIE FLYNN

Date Submitted: Friday, March 16, 2012, 2:56 p.m.

City, State: Sonora, CA

Occupation: Retired Registered Nurse

Comment: I understand the farm bill includes provision for food pantries across the U.S. who provide food for needy families. I hope the upcoming farm bill will continue this provision in food pantries as they seek to provide food for families in need across our nation.

COMMENT OF SARAH FLYNN

Date Submitted: Tuesday, May 15, 2012, 7:26 p.m.

City, State: Portland, OR

Occupation: Nonprofit

Comment: I was deeply upset by the cuts to the SNAP program in the Senate agriculture committee's version of the farm bill. These cuts would have a devastating impact on the health and economic security of families that are already on the brink. If parents can't afford to feed their children a nutritious diet, it puts the future of our country in jeopardy. The impact of food insecurity is much broader than some people realize. When children don't get enough food, it can have a life-long impact. They might not do well in school, they might develop much more expensive health problems, and the memory of hunger can have a long lasting impact. I know people who didn't have enough to eat at some point during their lives, and that experience haunts each of them in different ways. One man I know overeats now because of a strong emotional attachment to food that developed when he went hungry earlier in his life. He has become obese and developed expensive medical conditions that might have been prevented at a much lower cost if he had access to adequate nutrition earlier in his life. He suffers because of his poor health, but he suffers much more profoundly because of his belief in his own personal responsibility for all of his actions. He blames no one else, only himself, and that self-blame only makes it harder for him to turn his life around. As individuals, we need to live with the consequences of our actions. But we also need to understand that as citizens of the United States we have to take collective responsibility for our society's actions, past and present. We need to protect the public programs that comprise our nation's safety net, because the safety net is one of the most important ways our society accepts responsibility for our collective failures and sins. Please support all of the food assistance programs within the farm bill, especially SNAP and TEFAP, not only because helping people is the good thing to do, but also because it's the responsible thing for our government to do.

COMMENT OF JOSEPH FOEGEN

Date Submitted: Saturday, May 19, 2012, 7:03 a.m.

City, State: Hamburg, NY

Occupation: Grocery Retail

Comment: Dear Mr. Higgins,

Americans have been voting with their wallets as is evident by the upsurge in organic food sales. Furthermore, recent polls have found that consumers want to know if the foods they are buying contain GMOs. Cutting any spending that would hinder the growth of organic, sustainable agriculture would go against consumer trends and desires. My questions to you are simple:

- (1) Do you eat?
- (2) Do you care about what you eat, including its impact on your health?
- (3) Do you feel everyone has the right to both pursue the growing of healthy, sustainable food, as well as consuming healthy, sustainable food?

If you answered yes to any or all of these questions it's time for you to support the farm bill as it was introduced.

COMMENT OF DAN FOGARTY

Date Submitted: Saturday, April 28, 2012, 5:08 p.m.

City, State: Santa Rosa, CA

Occupation: Retired

Comment: A strong farm bill is always mandatory, but particularly in these times. Please support such a bill by continuing the TEFAP, SNAP and CSFP programs. They are essential to maintain adequate access to food for hungry Americans.

Thank you for your time.

COMMENT OF JEAN FOGEL

Date Submitted: Friday, May 18, 2012, 9:23 p.m.

City, State: Portland, OR

Occupation: Teacher

Comment: The people that consider food a personal choice deserve to be represented. We want our food protected, labeled and free of pesticides. Organics meet these standards and deserve to be supported in their efforts. It has been proven that big Agra co-opts the marketing strategy of organics, but does not produce in the same manner. **Protect Our Local Farmers And Families That Demand Clean Food.**

COMMENT OF KEN FOGEL

Date Submitted: Friday, May 11, 2012, 4:39 p.m.

City, State: Stone Mtn., GA

Occupation: Massage Therapist

Comment: The large scale industrial farming in existence today is focused on quantity and how much money can be made, but the average citizen is made to pay the price in the long run in terms of health.

The food is loaded with chemicals, pesticides, antibiotics, growth hormones, GMO's, and we wonder why diabetes is now an epidemic.

Mad cow disease, as was recently in the news does not happen if cows are grazing on grass as nature intended. Feeding cows animals by-products should be illegal.

Local and organic farming needs to be supported for the health of the people and for supporting local economies and conservation of energy resources.

COMMENT OF KYLE FOLEY

Date Submitted: Monday, May 14, 2012, 5:45 p.m.

City, State: Wakefield, MA

Occupation: Graduate Student

Comment: Please do not allow cuts to conservation programs—and please fully fund them. Crop insurance should be re-linked to conservation compliance—we need to stop the degradation of our farmland and waterways before it's too late. Also, please support the lending and granting programs for beginning farmer and rancher development—a generation of farmers is going to retire in the next 10 years, and we're going to be in a lot of trouble if we don't support young & beginning producers. Mandatory funding is required. Additionally, please support funding for research (on organics, specialty crops, conservation practices, *etc.*)—public money is needed for these issues that are so important to our future food security, health, and our environment. Thank you!

COMMENT OF THERESE FOLSOM

Date Submitted: Friday, May 18, 2012, 8:35 p.m.

City, State: Columbia, MO

Occupation: Massage Therapist

Comment: Please pass a farm bill that protects us from corporate agriculture and helps provide Americans with the safe food they deserve. It doesn't have to be big to work.

COMMENT OF TED FONK

Date Submitted: Saturday, May 19, 2012, 8:49 a.m.

City, State: Union Grove, WI

Producer/Non-producer: Producer

Type: Bioenergy, Field Crops, Livestock, Poultry/poultry products, Vegetables

Size: 151–300 acres

Comment: It is time to start doing what is right/best for the planet and everyone living on it and not what is financially beneficial to a few. Corporate interests are leading us down a dangerous path. You need to look no further than the sharp decrease in bee population to see this. Think with your hearts and your heads and turn a blind eye to hazardous corporate interests.

COMMENT OF CANDIS FONOONI

Date Submitted: Friday, May 18, 2012, 5:28 p.m.
City, State: Atlanta, GA
Occupation: Student/Nanny
Comment: Please **Do Not** cut funding for nutrition and the overseeing of healthy, organic, **Real** food. GMO's **Must** be labeled, as the consumer has a right to know what they are putting into their bodies and their family's bodies. You Are What You Eat. Let's regulate this farm bill so that **Every** American can have a healthy plant based diet. Pesticides have no room in our diets!

COMMENT OF THEESA FONTI

Date Submitted: Wednesday, May 16, 2012, 10:08 a.m.
City, State: Hartford, CT
Occupation: Social Service Program
Comment: The existing SNAP and food programs to help the needy are vital to many individuals who live in poverty. Please keep the present funding in place.

COMMENT OF TORIE FOOTE

Date Submitted: Friday, May 18, 2012, 1:32 p.m.
City, State: Spokane, WA
Occupation: Starting Organic Farm
Comment: As someone struggling to start a local organic farm, sitting between large heavily subsidized, overly pesticide land, I think it is important to the future of food production to grow locally and "cleanly". Don't kill our efforts! We should be supported **At Least** as much as those that are doing more harm than good.

COMMENT OF REESE FORBES

Date Submitted: Wednesday, May 16, 2012, 7:23 p.m.
City, State: Saint Louis, MO
Occupation: Retired
Comment: We need more research into organic farming methods and need to insure that no GMO farming is subsidized. Farm need to get back to local and small—provide money to make that happen.

COMMENT OF LEEANN FORD

Date Submitted: Thursday, May 17, 2012, 12:19 p.m.
City, State: Eugene, OR
Occupation: Accountant
Comment: The farm bill needs to support the needs of family farmers and rural communities, not just big agribusiness. We need to support food and economic security by protecting the quality of farmland and developing the next generation of farmers.

COMMENT OF STEVE FORD

Date Submitted: Friday, May 18, 2012, 2:08 a.m.
City, State: Casper, WY
Producer/Non-producer: Producer
Type: Vegetables
Size: Less than 50 acres
Comment: I would like to see more funding for Organic research as well as helping conventional farmers transition to organic, also critical is funding to support new young farmers and help younger farmers be involved with apprentice programs with older ready to retire framers, especially in the organic sector.
 Stop subsidizing the huge farms, put some of that money to use helping sustainable AG programs and local food production.

COMMENT OF NANCY FOREHAND

Date Submitted: Friday, May 18, 2012, 3:25 p.m.
City, State: Green Cove Springs, FL
Occupation: Programmer
Comment: It is time to put you vote where your mouth is—protect our small farms and develop new organic operations. Every year the bad news from pesticide

overuse increases. We are killing ourselves and our children along with the bugs. As a taxpayer and consumer, I do not want to fund these destructive practices.

COMMENT OF CHRISTINA FORINO

Date Submitted: Friday, April 27, 2012, 2:30 p.m.

City, State: Oxnard, CA

Occupation: Program Coordinator for Seniors and Children

Comment: Dear Members of the House Committee on Agriculture,

Cutting programs that put food on the table for hungry Americans is unacceptable. Most are the working poor who need help getting food on their tables.

COMMENT OF KAI MIKKEL FORLIE

Date Submitted: Friday, May 18, 2012, 6:23 p.m.

City, State: Burlington, VT

Occupation: Landlord

Comment: I am writing to urge your committee to prioritize organic, biodynamic, and permaculture farming methods over the unsustainable, destructive and expensive conventional form of agriculture currently emphasized. We need to adapt now to our looming low-energy future! Peak energy and climate change are the effects of our unsustainable way of life. We need to align our agricultural system with our need for continued life on Earth! Stop subsidizing ethanol production. Stop subsidizing conventional farming practices. Stop the use of synthetic fertilizers, synthetic insecticides, synthetic herbicides, *etc.* Stop GMO crops. Support small and medium sized farms. Support CSA's. Support farmers markets. Support nutrition programs. Support education programs. Support young farmers programs (for organic farming).

Thank you.

COMMENT OF AIMEE FORMO

Date Submitted: Friday, May 18, 2012, 12:47 p.m.

City, State: Indianapolis, IN

Occupation: Public Servant (State Government)

Comment: Legislation absolutely must support and grow sustainable and organic agricultural practices. As a working mother, I am faced with an ever-increasing number of unhealthy food choices for my family and difficulty sourcing responsibly-grown, healthy produce and meats. I will not purchase GMO, non-organic produce or proteins from an intensive farming operation, as the nutritional profile and potential side effects are too risky. As a consumer and parent, it is very important to me that healthy agricultural products that haven't been tampered with by big business and chemical corporations be available even in food deserts in urban areas of my city, and not just to middle class people like me. That will necessitate a very strong farm bill that supports responsible agriculture.

COMMENT OF MICHAEL FORSTER

Date Submitted: Friday, May 18, 2012, 2:11 p.m.

City, State: Portland, OR

Occupation: Computer Scientist

Comment: It is vital that farm subsidies be realigned with what our health needs are. We need to eliminate artificial support for fuel, corn, soy and instead support fresh fruits and vegetables, natural non-grain fed livestock and fowl. The increasingly toxic waste support for sprays and livestock and subsidies supporting highly processed foods is killing us.

COMMENT OF HELEN FOSDICK

Date Submitted: Friday, May 18, 2012, 12:34 p.m.

City, State: Houston, TX

Occupation: Retired

Comment: Do not allow any GMOs into our agriculture. Nor harmful chemicals or polluted waters. Support local farmers and all those who use sustainable methods of growing our food. Do not let Corporations rule. You represent **We The People**, not the Corporations. The well-being of lands and people should be your first concern. Thank you.

COMMENT OF PAULINE FOSS

Date Submitted: Friday, May 18, 2012, 1:25 p.m.

City, State: Colorado Springs, CO

Occupation: Professor

Comment: When you are considering which way to vote please consider that people and the planet will benefit from the increase and support of organic farmers and small family farms. Big agribusiness complexes have wreaked havoc on the environment, practice inhumane methods in their treatment of livestock, and put small family farms out of business.

Thank you,

PAULINE FOSS.

COMMENT OF LEE FOSSETT

Date Submitted: Saturday, May 19, 2012, 9:26 p.m.

City, State: Berea, KY

Occupation: Full-Time Student

Comment: Please support farmers; they need a voice. Who knows, maybe someday our lives will be in their hands again (like the old days). Especially if we change our dependence on oil and have to buy local again. Please be an advocate for the farmer whenever possible. They need us. They do more than anyone with less than anyone. Thanks.

COMMENT OF ELAINE FOSTER

Date Submitted: Friday, May 18, 2012, 10:13 p.m.

City, State: Huntersville, NC

Occupation: Retired

Comment: I am outraged that the government which is put in power by the people have been taken over by big industrial agricultural business interest. How dare the Federal/state govt. attack the small farmers who try to provide the food the public wants (Whole Milk, grass fed meat and products) What happened to our freedom of choosing healthy whole foods from a small farm, The U.S. Govt. would rather force feed us chemical laced Doritos and Twinkies . . . that have no nutritional value? I am saddened by the state of our govt. agencies (FDA, USDA/Dept of Agriculture to name a few) attack on the small family farm and Organic farms of this country. It seems that big industry has been running Gov't. agencies in their favor. I want the freedom to choose my own food without the Govt. interfering!

COMMENT OF KAREN FOSTER

Date Submitted: Friday, May 18, 2012, 12:07 p.m.

City, State: Virginia Beach, VA

Occupation: Retail

Comment: Our food is getting worse because big agriculture is making it that way. You do not label **GMO's, Pink Slime Ect.** . . . we can only afford cheap unhealthy food that large corporations are churning out for their profit. We need to stop the profit of our politicians for letting them do this to us. We need change, but big ag won't allow this to happen!

COMMENT OF MICHAEL FOSTER

Date Submitted: Friday, May 18, 2012, 1:50 p.m.

City, State: Seattle, WA

Occupation: Counselor

Comment: The big picture shows a system that is eating itself not nourishing the land, not nourishing the people. Please give your thought to the most sustainable agricultural policies.

COMMENT OF LESLIE FOUMBERG

Date Submitted: Friday, May 18, 2012, 2:57 p.m.

City, State: Calabasas, CA

Occupation: Computer Parts Reseller

Comment: As a tax-paying citizen of the United States, I demand that consumers have the ability to know when foods contain GMOs and that they be labeled as such. We also have the right to ingest raw and unprocessed foods whether FDA ap-

proved or not as the FDA approves all kinds of things I wouldn't knowingly consume like antibiotics in milk and meats. Allow for raw and natural farming.

COMMENT OF SESAME FOWLER

Date Submitted: Friday, April 27, 2012, 9:22 p.m.

City, State: Gardner, CO

Occupation: Retired

Comment: These programs—TEFAP and SNAP and others are of utmost importance—especially **Now!** Our economy is in shambles and good quality food is not available to seniors, children and low income families. More than ever we need your help to keep these programs available. Please help—please feed the hungry.

Thank you so much.

COMMENT OF AGNES FOX

Date Submitted: Saturday, May 19, 2012, 1:17 p.m.

City, State: Knoxville, TN

Occupation: Speech-Language Pathologist

Comment: As a consumer, I have educated myself on the effects the food I eat has on my body. As a caring citizen, I have researched the effects that supporting local *versus* large-scale commodity farmers has on my neighbors and our country as a whole. Therefore, I support local agriculture that produces non-GMO products.

I respectfully request that the House Agriculture Committee support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF MASHA FOY, M.A., R.D., C.D.E.

Date Submitted: Sunday, May 20, 2012, 7:24 a.m.

City, State: Scott Township, PA

Occupation: Nutritionist

Comment: Monsanto a disgrace to our country. To paten seeds is wrong. It is unhealthy to have GMO in food and FDA pays this no attention. The small farmer has been hurt so Americans can have cheep unhealthy food.

Please do your home work on this, our children are at stake and our future.

MASHA FOY, M.A., R.D., C.D.E.

COMMENT OF KRISTEN FRAME

Date Submitted: Friday, May 18, 2012, 12:27 p.m.

City, State: Fairfield, CT

Occupation: Manager—Financial Services

Comment: I am concerned with the methods being used in our food production. We have adopted an attitude that “there are no proven concerns yet, so we'll use until we know otherwise”, whereas many other countries are refusing to adopt these methods/pesticides/byproducts until they are deemed SAFE. The cancer and allergy rates in the U.S. are alarming, and it's hard to think that our food supply has no involvement. We need to be more prudent in how we are producing food. Health care and other costs in the end are the price we will pay—which should be of concern to Congress. Thanks!

COMMENT OF LELIA ANN FRANCIS

Date Submitted: Friday, May 18, 2012, 11:57 a.m.

City, State: Horseshoe Bay, TX

Occupation: Retired

Comment: I have a great concern about what citizens of this great country are being forced to buy and eat. Please carefully consider the health issues involved in the growth and production of our produce and cattle and dairy goods.

COMMENT OF FAITH FRANCK

Date Submitted: Thursday, May 17, 2012, 1:08 p.m.

City, State: Las Vegas, NV

Occupation: Retired

Comment: I am convinced that the pesticide, fungicide and herbicide laden food grown industrially in what has become nutrition poor soil in this country is the culprit in our health & obesity problems. These foods do not provide adequate or good nutrition unlike sustainable and organically grown foods and edible animals. I grew up in an era when sustainable agriculture was the norm which may be why my generation lives longer—our children will not have that option due to the poor food they have eaten in their lifetimes.

COMMENT OF AMY FRANCO

Date Submitted: Friday, May 18, 2012, 11:54 a.m.

City, State: Chicago, IL

Occupation: Project Coordinator and Grad Student

Comment: Please continue to support beginning farmers and ranchers, local food and organic initiatives, and the Conservation Stewardship Program. Such programs are vital to economic growth and the health of our land in the long-term.

COMMENT OF LEROY FRANKEL

Date Submitted: Friday, May 18, 2012, 4:31 p.m.

City, State: Longmont, CO

Occupation: Retired Home Grower

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Stop the latest agribusiness boondoggle that gladly steals food from the mouths of the hungry to create a “\$33 billion new entitlement program that guarantees the income of profitable farm businesses.” That’s on top of \$90 billion in subsidies for crop and revenue insurance policies.

By failing to place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs, the Committee has failed to do the full reform that is needed.

It’s time for real reform.

Thank you.

COMMENT OF JEAN FRANKENSTEIN

Date Submitted: Friday, May 18, 2012, 1:26 p.m.

City, State: Telluride, CO

Occupation: Associate

Comment: I do not want to feed my children food that is genetically modified to the point where bees and butterflies won’t even go near it. I want to eat good, wholesome foods that are **Safe, Healthy** and good for both my children and the environment. It’s disgraceful that you’ve let large corporations take over and create a disaster and mockery of our food. Greed should not replace common sense and decency. I fear it’s too late . . .

COMMENT OF BARBARA FRANKLIN

Date Submitted: Saturday, May 19, 2012, 12:06 a.m.

City, State: Honokaa, HI

Occupation: Bankruptcy Attorney

Comment: I have talked to a number of farmers to advise them in this current economy; it is critical that you support the farm bill. We must have sustainable agricultural on this island and we must have vibrant farms to do that.

COMMENT OF CHERYL FRANKLIN

Date Submitted: Wednesday, March 21, 2012, 7:13 a.m.

City, State: Calera, AL

Comment: Please create a strong farm bill, which protects programs such as SNAP, so that struggling seniors, children, and families can have their increasingly urgent nutritional needs met.

COMMENT OF ALLAN FRANKS

Date Submitted: Wednesday, May 09, 2012, 2:50 p.m.

City, State: Vallejo, CA

Occupation: Ordained Minister

Comment: As a Pastor in Vallejo, CA I see the effects of the recent recession still affecting the people of our city. Our church has a food box ministry and we see a continual stream of people who need food to survive. Please vote to support SNAP, TEFAP and CSFP. Your vote will help us to be able to keep giving much needed food to hungry people in our city.

COMMENT OF JEANNE FRANKS

Date Submitted: Friday, May 18, 2012, 12:45 p.m.

City, State: Oceanside, NY

Occupation: Physician

Comment: I am increasingly alarmed at the "progress" and infiltration of our food supply by GMO crops. The consequences of this are devastating. We MUST return to more organic and natural methods and protect farmers and their traditional crops from this menace.

COMMENT OF JAMES FRASER

Date Submitted: Friday, May 18, 2012, 5:41 p.m.

City, State: Rome, GA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: As someone who works on a small organic farm in Georgia I don't want any special treatment. I would just like to know that the huge agribusiness companies are not given subsidies and tax breaks that make it unfair for us to compete in the free market. Thanks for your help looking out for small farmers.

COMMENT OF CHRISTA FRAZEE

Date Submitted: Friday, May 18, 2012, 1:54 p.m.

City, State: Ventura, CA

Occupation: Homemaker/Mother

Comment: Please support organic foods and research . . . it is necessary for our children's health and longevity . . . It saddens me that our country is being poisoned by pesticides and GMO's . . . nature is being destroyed . . .

COMMENT OF PATTY AND BOB FRAZER

Date Submitted: Friday, May 18, 2012, 5:57 p.m.

City, State: Orinda, CA

Occupation: Retired Marketing

Comment: By caving to agribusiness, you prohibit the real conversation about obesity that needs to take place. The role of processed food in the obesity! And the terrible nutritional quality of all processed food. When will you as elected officials make decisions for the welfare of the people and not for business?

COMMENT OF CAROL FRAZIER

Date Submitted: Friday, May 18, 2012, 4:35 p.m.

City, State: Nashville, TN

Occupation: Small Business Owner

Comment: Farmers and eaters across the U.S. need a fair and healthy farm bill! We should not be cutting funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture.

The proposed subsidized insurance program will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk. The Senate Agricultural Committee has already voted to cut \$4 million from organic research funding and cut funding to support Beginning Farmers in half. This is absolutely ridiculous! We know that the health and survival of a nation depends on it's people being able to grow and sustain healthy crops and soil, the main way to do this is thru organic and sustainable farming methods. Also we have more and more young people who are choosing to become farmers, a giant shift in priorities, and we need to support this move! The public is talking with their pocket books in seeking out local farmers and organic produce and meat. Congress is not listening and is instead following the lead of huge farming corporations and Monsanto, with their increasingly troubling GMO seed—I hope you have been educating yourself about this catastrophe-in-the-making. Please support:

- (1) The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- (2) Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- (3) The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- (4) Maintaining the EQIP Organic Initiative.

Thank you!

COMMENT OF KIMBERLY FRAZIER

Date Submitted: Saturday, May 19, 2012, 12:14 p.m.

City, State: East Bethel, MN

Occupation:

Comment: Dear Congress-people, Please **Learn** about what you are voting on and why people like us have to remind you why we need to do this. Cancer is a problem that won't go away if you don't have food that is grown without Chemicals. Chemicals kill more than the bugs or the nuisance plants that invade our fields and gardens. It kills important nutrients and vitamins in soils that go into our foods that helps our bodies grow and fight off sicknesses and disease. You know someone with cancer and you want to help them the best thing you can do for them is to Vote for Organic Farming and learn about the Gerson Therapy Cancer Cures so When possibly you face Cancer you will have a Cure! I hope you will take this seriously like you do your paychecks.

COMMENT OF RUTH FRAZIER

Date Submitted: Friday, May 18, 2012, 1:14 p.m.

City, State: Charlotte, NC

Occupation: Homemaker

Comment: Please hear! Growing up on an organic farm before organic became a household word, it is a challenge to find food that babies, as well as adults can eat without developing allergies, *etc.* The U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

Unfortunately, we as a nation are not there yet. Not only are our politicians out of touch with the values of the American people, but corporate agribusiness has a stranglehold on our regulatory system and our political leaders. How will we survive as a nation and a people if we die before our time because of food conditions in our land? Please take heed. Thank you!

Occupation: Energy Consultant

Comment: I urge you to include:

- Packer Ban: Allowing meatpackers to own the animals they slaughter reduces competition for livestock raised by independent farmers and ranchers. A ban on the ownership of livestock by meatpackers would afford family farmers the opportunity to remain independent and retain control over their operations.

- **Protect Organic Agriculture:** I urge you to protect the organic cost-share program, amend the AFRI program to require 5 percent of funding to go to the development of locally adapted, publicly available seeds and breeds, and to keep language from the last farm bill that would assure organic producers that they are not required to pay unfair surcharges to access crop insurance.
- **Protect Country of Origin Labeling:** Consumers started to get this basic information about their food just a few years ago. We need more information about where our food comes from, not less, and this farm bill should not weaken the current requirement for mandatory country of origin labeling for meat, poultry, fruits and vegetables, seafood and nuts.
- **Change language identifying Fruits and Vegetables as “Specialty Crops”** and call them what they are. Then focus more program resources to Fruits and Vegetables that will encourage more local production.

COMMENT OF RUTH ANN FREDENTHAL

City, State: New York, NY

Occupation: Artist

Comment: Healthy food is essential for all humans and the environment. It is also more economically sound both for farmers and consumers. If people ate healthy food, our medical burdens would be substantially less as we all know you are what you eat and an unhealthy diet full of pesticides and GMO foods makes people ill. And drives them to the doctor. The government should support organic food and sustainable practices by local small farmers. Giant farms are polluters who ruin the environment and make people ill costing the country billions of unnecessary dollars. They do not need subsidies but small farmers do. Nature knows better than the U.S. government.

COMMENT OF LUIS FREEDMAN

Date Submitted: Friday, May 18, 2012, 12:07 p.m.

City, State: Rockville, MD

Occupation: Physiologist

Comment: The destruction of America’s food supply is the number one concern I have for the future of this country. We are now seeing the health of the American people deteriorate, in general, as a direct result of the poor quality of food we must eat. The concept of turning over this most important part of our lives and our health, to corporate greed and chemical intensive farming, and use of inadequately tested GMO foods is unconscionable. The health of the American people and protection of the environment should be the factors that guide our food production decisions, NOT corporate greed/profit and politics. Additionally, we **Must** have full disclosure of GMO food **And** chemicals used on our food. It is our right to know what we are eating, and it is wrong for government to keep this knowledge from us.

COMMENT OF SUSAN FREEL

Date Submitted: Friday, May 18, 2012, 3:15 p.m.

City, State: New York, NY

Occupation: Filmmaker

Comment: I buy organic products, locally grown and nationally provided, almost exclusively—milk, fruit, vegetables, fish, poultry, bread, *etc.* I live in a highly concentrated urban area with farmer’s markets in our parks from one end to the other. These organic farmers are my neighbors. They produce their food just outside my city. They need their livelihood protected. Do it! Protect these small farms in the counties just outside NYC. I eat their food and we all know organic is better for our health and our environment. In your plans for future farm policy, please put an emphasis on encouraging smaller, organic farm production. Thank you.

COMMENT OF GERI FREEMAN

Date Submitted: Friday, May 18, 2012, 9:35 p.m.

City, State: Dudley, MA

Occupation: Student

Comment: I don’t like the GMO of corn or anything else. What happened to regular farming. The use of good organic soil, and planting crops in the USA. Put Americans back to work, instead of trying to come up with new ways to mess with

nature. By growing organic, the food actually has good nutrition, instead of it being added or have no taste at all.

Whatever is being done to **Our Food, We The American People Have A Right To Know What And Which Products Have Been Tampered With Or Grown GMO.**

COMMENT OF JACQUELINE FREEMAN

Date Submitted: Thursday, May 17, 2012, 12:56 p.m.

Type: Dairy, Livestock, Poultry/poultry products, Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: Subsidies no longer work as a reasonable method of funding corporations. Please reapportion funds to sustainable farmers who use less or no chemicals (thus preserving the health of our environment) and who produce multiple diverse products rather than monocultures.

COMMENT OF JOSEPH FREEMAN

Date Submitted: Friday, May 18, 2012, 1:25 p.m.

City, State: Paradise Valley, AZ

Occupation: Homemaker

Comment: I believe we need to take American farm policy out of the hands of agribusiness, and reorient it to small farmers, specifically organic producers and producers serving local markets. In addition, we need to do more to protect the welfare of the animals we raise for food. Overly-large-scale operations are inherently predisposed to the abuse of their livestock. I buy only cruelty-free products, and local when and where I can. There are more consumers like me every day, and we would like to see our concerns addressed in the farm bill. Thank you.

COMMENT OF MARY FREEMAN

Date Submitted: Friday, May 18, 2012, 12:24 p.m.

City, State: San Luis Obispo, CA

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: Having watched the continued subsidization of large corporate farms to the disadvantage of small, organic producers, I urge you to vote to change the way we spend our agricultural funds and encourage a promising trend toward sustainable farming.

COMMENT OF SANDY FREEMAN

Date Submitted: Friday, May 18, 2012, 11:04 p.m.

City, State: Virginia Beach, VA

Occupation: Counselor

Comment: Americans need more organic and sustainable farms, particularly robust local farms. Supporting a healthy farm bill that addresses this need is a vote for better health and a higher quality of life.

Cast your vote for organic and sustainable farmers and U.S. citizens!

COMMENT OF THOMAS FREEMAN

Date Submitted: Friday, May 18, 2012, 12:47 p.m.

City, State: San Luis Obispo, CA

Producer/Non-producer: Producer

Type: Fruits

Size: Less than 50 acres

Comment: It is time to act for the sustainable future and the health of our country and give equitable support for small family farms. We need more support for nourishing producers of locally grown healthy foods. The future of our nation depends on you.

COMMENT OF JAN FREESE

Date Submitted: Friday, May 11, 2012, 1:03 a.m.

City, State: Tucson, AZ

Occupation: Retired/Housewife

Comment: Please! Pass this bill! We have far too many people who are hungry in our community and the food bank is struggling to feed all those who need help. There is no excuse for people in this country to go hungry. Cut some aid for foreign countries, if necessary, but not for our own people!

COMMENT OF DAVID FREID

Date Submitted: Friday, May 18, 2012, 12:04 p.m.

City, State: Brooklyn, NY

Occupation: Editor

Comment: Please put the health of the nation and the pursuit and use of the best agricultural practices—like conservation programs and organic research funding—first, before corporate profits.

Also, please don't slash the food stamp program and keep entitlement programs for big business.

Allowing giant commodity farmers and insurance companies walk away with billions is socialism for the rich. It shouldn't be allowed!

COMMENT OF LYNN FREITAG

Date Submitted: Friday, May 18, 2012, 2:18 p.m.

City, State: Rolling Meadows, IL

Occupation: Official Court Reporter

Comment: There is probably nothing that has a greater impact on our health than the nutrition we do or do not get from our food. It is vitally important for the health of our nation that we do everything we can to ensure organic farms thrive. GMO crops are poisoning our soil for generations to come. Please, this is no time for cutbacks to organic growers.

COMMENT OF AMANDA FREITAS

Date Submitted: Sunday, May 20, 2012, 11:52 p.m.

City, State: West Hartford, CT

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I'd like to share my support for programs that help the next generation of growers build strong farm businesses. As it's estimated that 125,000 farmers will retire in the next 5 years, it's absolutely critical that farm bill programs help citizens get started in this challenging field. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country. Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill. **Most** importantly, I urge you to do all you can to curb the amount of money going to biotechnology research. The very small percentage of funding allocated specifically to more ecologically sound farming methods is a travesty, particularly as concern grows about the disturbing studies that are gradually illuminating all the ill-effects of GMO foods. We are gambling with American's lives, and all on the American taxpayers' dollars. Big Ag does not need any more help—they've done and received quite enough. The future of farming is with the little guy, which is who the farm bill should be helping anyway—those who would contribute to the economy, to our national security, and to our quality of life, but who need a bit of a hand to do so. Thank you for your consideration.

Sincerely, Amanda Freitas

AMANDA FREITAS,

COMMENT OF J. FRENCH

Date Submitted: Friday, May 18, 2012, 2:23 p.m.
City, State: Oakland, CA
Occupation: Filmmaker
Comment: Pesticides are killing the race and the animals and the planet (have you thought about what is causing all of this infertility in humans? hmmmmmm). Support organics if you like human beings.

COMMENT OF JIM & LISA FRENCH

Date Submitted: Tuesday, April 24, 2012, 6:30 p.m.
City, State: Partridge, KS
Producer/Non-producer: Producer
Type: Field Crops, Livestock
Size: 500–999 acres
Comment: April 20, 2012

Dear members of the U.S. House Agriculture Committee:

I am writing today to offer comments on the reauthorization of the farm bill. Crafting effective and fiscally responsible agriculture policy is essential for the future.

My wife and I were both reared on the farms we now manage. We are fifth generation Reno County, KS farmers and ranchers. Both of us also work in jobs that complement our agricultural interests. Lisa coordinates the Cheney Lake Watershed Project; and I am the Agriculture Advocacy Lead for the global development organization, Oxfam America.

Both of us believe that for U.S. agriculture to remain profitable, productive, and resilient, we must have farm programs that support risk management and conservation while not distorting the market or putting current trade agreements at risk.

First, I take advantage of federally subsidized crop insurance. It made a tremendous difference last year as we experienced severe drought and suffered complete loss of our fall crops. However, we oppose moving toward shallow loss revenue programs. Shallow loss programs will definitely distort planting decisions and provide incentives for farmers to take on greater risk than is advisable.

Second, moving to increase target prices and loan rates is a move in the wrong direction. We already know that our current marketing loan and countercyclical program are within the Amber Box. We must not go back in time and fashion farm programs that distort the market. The best option would be to eliminate the marketing loan and countercyclical payment altogether.

Conservation investments are all green box investments. They allow our agriculture to protect the resources necessary to produce for a global table that will be at 9 billion by mid-century. While efficiencies may be gained in the way current programs are configured and administered, we should not lose sight of our long range vision of resource protection and enhancement. In addition, conservation compliance must remain a part of all Title I programs, and should be added crop insurance in Title XII.

Finally, our international food aid programs are flawed and wasteful. Nearly ½ of taxpayer money going to food aid are spent on shipping, procurement, and administrative costs. We need to shift more of our food aid into allowing for purchase of food closer to areas of food emergencies. U.S. farmers no longer face huge surpluses

and chronic low prices. In fact, in the face of erratic weather, increasing population, and global instability, we can no longer afford to discourage production and disrupt world markets. I would encourage the committee to increase the local and regional purchase, and to decrease the damaging practice of monetization.

Thank you so much for your dedication and hard work.

Sincerely,

JIM & LISA FRENCH,
[Redacted].

COMMENT OF RODNEY FRENCH

City, State: Otsego, MI

Occupation: Self-Employed Fire Protection

Comment: Please take time to stop and listen even within your heart. Money is not the control of us. We, I count on my politician people to do what's right. Listen to us if you can't hear what's needed.

COMMENT OF LYNNE FRETZ

Date Submitted: Wednesday, May 09, 2012, 4:34 p.m.

City, State: Rochester, NY

Occupation: Educator

Comment: Please protect funding for critical Federal nutrition programs, including the Supplemental Nutrition Assistance Program (SNAP) as you work to re-authorize the farm bill.

Everyone in the U.S. should have enough food to eat. This is more important than the military budget. Thank you.

COMMENT OF SUSAN FRIAR

Date Submitted: Friday, May 18, 2012, 5:25 p.m.

City, State: Hillsboro, OR

Occupation: Environmental Educator

Comment: I ask you to support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286), fully funding of conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). Maintaining the EQIP Organic Initiative. I have worked with farmers, USDA-NRCS, USFW Service, Audubon partnering with high school science classes in habitat restoration project that incorporate farms supporting some of the above programs. They are making a positive difference and helping our urban youth understand the impact of using a minimal of pesticides and what can happen when farms partner with supporters to make a healthier environment.

COMMENT OF PAMELA FRIDGEN

Date Submitted: Friday, May 18, 2012, 1:03 p.m.

City, State: Scarborough, ME

Occupation: Educational Technician

Comment: The importance of local farms and sustainable practices is of the utmost importance. I would like to see a farm bill that reflects that. Help the small farms that really need it not the big Ag. operations that don't and utilize unsustainable practices.

COMMENT OF FIONA FRIEDLAND

Date Submitted: Friday, May 18, 2012, 1:59 p.m.

City, State: San Francisco, CA

Occupation: Part-Time Reception, Bookkeeper

Comment: I want to know what I am putting in my mouth. It is time for the U.S. Government to get behind it's people and stop supporting big ag business. I want organics and non-GMO and I don't want to have to read every label before I buy something. In the past couple of years I have started to have digestive issues. I have to think about everything that goes into my body. It would be helpful if the government supported it's citizen's instead of big business. There is a growing

health epidemic in the country. Think about it! Make the connection. You are what you eat!

COMMENT OF KRYSTAL FRIEDLY

Date Submitted: Friday, May 18, 2012, 5:06 p.m.

City, State: Soldotna, AK

Occupation: Homemaker/Mom

Comment: I as a mom and a U.S citizen, believe that we have the right to eat good nutritious food. There is no reason that the people of our country should be fed food that has been altered. Food should be as its meant to be. We have so many rights and this should be at the top of that list.

COMMENT OF REBECCA FRIEDMAN

Date Submitted: Friday, May 18, 2012, 3:05 p.m.

City, State: Asheville, NC

Occupation: Caterer

Comment: This is so overdue. Please don't spend another penny of my money on toxic food commodities produced by Big Ag. Level the playing field for our small organic farmers! Thank you.

COMMENT OF DOUG FRIEND

Date Submitted: Friday, May 11, 2012, 4:21 p.m.

City, State: Boston, MA

Occupation: Self-Employed

Comment: Small family farms are much more vested in their farms and communities then agra business. They are better stewards of the land and help to maintain productive open space. The food that is raised is done so with less intensive use of antibiotics and pesticides.

COMMENT OF CHRISTINE FRISCO

Date Submitted: Friday, May 18, 2012, 11:12 p.m.

City, State: Palo Alto, CA

Occupation: Registered Nurse

Comment: U.S. politicians are out of touch with the values of the American people, and corporate agribusiness has a stranglehold on our regulatory system and our political leaders. It's time for real reform! We need an Organic Farm Bill. I support:

1. The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
2. Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
3. The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
4. Maintaining the EQIP Organic Initiative.

U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land, and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

I urge you to not cut funding to vital programs such as nutrition, conservation, and support for organic and sustainable agriculture.

I urge you to create real reform and a healthy, organic future for Americans!

COMMENT OF CHARLES FRITSCH

Date Submitted: Friday, May 18, 2012, 8:23 p.m.

City, State: Newark, OH

Producer/Non-producer: Producer

Type: Fruits

Size: 50-150 acres

Comment: I have a small commercial organic apple orchard that is failing to produce a crop for 2 years and counting. Pollinators and their habitat are being destroyed by my surrounding corn and soybeans industrial farms. Those farms have pollinator habitat NFS and NRCS programs available to THEM but not to me because I don't raise "row crops". Worse, they are irresponsible in not taking advan-

tage of the programs. Give these programs to us small farmers even though we are not a part of corporate America.

COMMENT OF ANN FRODEL

Date Submitted: Saturday, May 19, 2012, 1:27 a.m.

City, State: Poulsbo, WA

Occupation: Retired

Comment: After a lifetime of eating the standard American diet I have colon cancer. True, what I chose to eat was my own business, but since being diagnosed in 2000 I have come to realize that the more encouragement we can give the people who are growing wholesome, organic food (or would like to grow it), the better off we as a nation will be health wise and in multitudinous other ways as well. What better "educational" stimulus for eating healthy food than the recommendations of our political leaders who are on record as supporting wholesome food products, uncontaminated by the chemicals our bodies do not know how to process. Please think about this as you peruse all the "farm" bills on your agendas. We'll all do better if we have access to healthy, pollution-free food.

Thanks for listening.

COMMENT OF CATHERINE J. FROMPOVICH

Date Submitted: Sunday, May 20, 2012, 4:48 p.m.

City, State: Ambler, PA

Occupation: Consumer Health Researcher & Journalist

Comment: Organic farming must have the same financial support from Congress and the USA as Big Ag and its minions have in the way of farm subsidies. Genetically Modified crops must be sequestered from ruining natural heirloom crops and seeds that have come down throughout the evolutionary process. Food crops cannot be patented and owned. Will air be next? Food is an essential for life and living.

Congress must re-evaluate the FDA's role in declaring GMO crops as the same as others, which is **Not** the case. Heirloom crops cannot produce their own pesticides as GMO bt crops can or resist glyphosate as Roundup Ready crops can.

Because of the GMO fiasco, USA grown food crops are not welcome nor exported to many countries, especially the European Union. Let's get smart about USA agriculture and re-evaluate what's really needed to keep USA independent farmers growing healthy food to keep taxpayers healthy and well: organically grown food. Thank you!

COMMENT OF MARIAN FRY

Date Submitted: Monday, May 14, 2012, 2:09 p.m.

City, State: Chestertown, MD

Producer/Non-producer: Producer

Type: Dairy, Field Crops, Livestock, Vegetables

Size: 1,000+ acres

Comment: The most basic form of homeland security is the ability of a nation to feed its people from its domestic agriculture. It is vitally important to keep agriculture viable in every state in the U.S. To this end, I support programs aiding young and beginning farmers, conservation programs aimed at clean water and productive farms, funding for organic research at the University level as an alternative to research funded by chemical companies, and farm to school programs to get local food into local schools.

Thank you,

MARIAN FRY,

MD Sunrise Farm, LLC,

Fair Hill Farms, Inc.,

A Maryland farm family for five generations.

COMMENT OF MAHALA FRYE

Date Submitted: Friday, May 18, 2012, 1:55 p.m.

City, State: Poulsbo, WA

Occupation: Self-Employed Woodworker

Comment: I am 62 years old have really started paying attention to what I eat and how it makes me feel. When I eat organic, non-GMO foods, raw milk products and other live foods, my body is much healthier and I function much better. I have to search these food out and read the fine print and pay a lot more, am I worth

it? **Yes!** I urge you to do what you can to support the small farmers, organic food producers and cut subsidies to the large agribusinesses that are creating disease and ill-health in this country. By recreating healthy agriculture and healthy food products you will be saving a great deal on the sick care front. Please be working FOR me, my children and my grandchildren.

Thank you,

MAHALA FRYE.

COMMENT OF CHRISTINA FUGITT

Date Submitted: Friday, May 18, 2012, 10:34 a.m.

City, State: Springfield, MO

Occupation: Export Sales

Comment: End the subsidies for corn, sugar and wheat, indeed to any and all big industrial agriculture producers.

Do help with subsidies or insurance or loans or all of these the small farmers and producers.

Do fund government programs to feed the people in this country who need it. It is obvious that the government programs are not funded well enough because otherwise we would not need countless charities to do it.

COMMENT OF ANDREA FUHRMAN

Date Submitted: Friday, May 18, 2012, 4:58 p.m.

City, State: Abilene, KS

Occupation: Artist

Comment: Please do the right thing. Feed the hungry. Grow organic and label GMO foods. Label dairy products so consumers know whether their milk *etc.* is free of growth hormones. Don't grow corn to make ethanol; instead find ways of using solar, wind and water power that does not pollute the Earth and does not contribute to global climate change!

COMMENT OF CHARLES E. FULLEN

Date Submitted: Friday, May 18, 2012, 3:44 p.m.

City, State: Jonesboro, AR

Occupation: Management Consultant

Comment: As a fifth generation resident of the Arkansas Delta, I am very concerned about the lack of program support for rural economic development in the 2012 Farm Bill. Many of our rural Delta communities have lost population; suffer from high unemployment and poverty. Many factories have left our communities sending thousands of jobs outside the country. It is critical to rebuild our local economies by helping existing businesses and beginning farmers and businessmen with programs providing technical assistance and affordable loan funds. Renewable energy and sustainable food production can help local communities become more sustainable while providing job opportunities.

Many of the vital programs that help rural economic development have been greatly reduced or eliminated altogether. We need funding for these programs place back into the 2012 Farm Bill. A slight reduction in some of the subsidy programs already proposed can provide enough funding to continue these programs.

Thanks,

CHARLES E. FULLEN.

COMMENT OF CHRIS FULLER

Date Submitted: Wednesday, May 16, 2012, 1:33 p.m.

City, State: Monterey, VA

Occupation: Meat Processing

Comment: The farm bill must include language that continues the recent efforts to create a more humane life for all farm animals and livestock. From birth to slaughter livestock should be treated with more respect than they are currently given in many large scale environments. Please consider making stricter regulations on the welfare and humane treatment of livestock.

COMMENT OF KATHIE FULLER

Date Submitted: Friday, May 18, 2012, 9:48 a.m.

City, State: Morrisonville, NY

Occupation: Teacher

Comment: First and foremost, the use of any antibiotics in feeds to animals should be outlawed. Second, subsidies for not growing should be outlawed. Protections should be put in place to maintain small, local farms with an emphasis on organics. The industrialization of the American food supply is tragic and wrong. Thank you for your time and consideration of these issues.

COMMENT OF VICTORIA FULLER

Date Submitted: Friday, May 18, 2012, 12:14 p.m.

City, State: Del Valle, TX

Occupation: Film Professional

Comment: I am a 32 year old Diabetic. I live in the country and eat all organic foods. I hope to grow my own food one day, because I don't trust the government to protect us. The foods we serve ourselves and children are unsafe if they aren't organic. If we don't protect and find the growth of a healthier population it will be catastrophic. We must fight for the right to eat unpoisoned foods. I urge you to do your part in recognizing the importance of a healthier world without chemicals. It's killing us.

COMMENT OF SUSAN FULSOME

Date Submitted: Friday, May 18, 2012, 3:12 p.m.

City, State: Salt Lake City, UT

Occupation: Healthcare Consultant

Comment: My son has owned and operated an organic farm for over 10 years. It has been a very eye-opening experience to see what is possible when a farmer is a good steward of his land. It has also been disheartening to see how rigged the U.S. system is, in favor of conventional agriculture. This is not so much a matter of fairness, although it is that. It is a matter of investing in the wrong paradigm—conventional agriculture depletes the soil, making it harder every year to produce the same amount of food. It also encourages the use of toxic pesticides (dead bee colonies, anyone?) and overuse of petroleum-based fertilizers that create dead zones in our oceans. Organic and sustainable agriculture bypasses ALL of those issues, while producing food that is vastly higher in nutrients and is safer for the consumers.

Please rethink farm policies with an eye to the overall health of the nation and our resources, **Not** just continuing to pork-barrel and rig corn prices. It is past time for a change that looks at long-term health and long-term consequences, rather than just the expedient.

COMMENT OF WILL FULTON

Date Submitted: Friday, May 18, 2012, 1:55 p.m.

City, State: Corvallis, OR

Occupation: Soil Scientist

Comment: The current agricultural policies of this country are absurdly inappropriate, if their intended purpose is to meet the nutritional needs of the citizenry. If their intended purpose is to stimulate the flow of cash from corporations to government officials, then they could not be more appropriate.

COMMENT OF SHERMAN FUNG

Date Submitted: Wednesday, May 09, 2012, 8:00 p.m.

City, State: Pasadena, CA

Occupation: Retired

Comment: The Farm bill should work for the good of as many sectors of America as possible. Already American producers enjoy the assistance the government offers them. There are others who need assistance to survive who enjoy no such assistance. The private sector helps as much as it can for the needy, but such assistance is not sufficient. Federal provisions should be structured in a way for everybody to address hunger.

COMMENT OF NAN FUNKHOUSER

Date Submitted: Saturday, May 19, 2012, 10:56 a.m.

City, State: Baldwin, KS

Occupation: Self-Employed

Comment: Organic food is imperative to our health. GMO food is poisoning the planet and must be stopped **Now**. Please support any and all organic efforts on the part of citizens.

COMMENT OF ERIC FURROW

Date Submitted: Saturday, May 19, 2012, 8:20 a.m.

City, State: Lisbon, ME

Occupation: Oil Heat Technician

Comment: Agriculture deserves all the funding it needs to find us clean, organic, farming practices. We do not need mass produced cheap slime . . . We need fresh vegetables not genetically engineered tomatoes the size of my house. We need animals raised on grass among other natural seasonal local wildlife, not corn and grains just because it makes them really fat very quickly.

COMMENT OF SALLY GABRIEL

Date Submitted: Sunday, May 20, 2012, 12:41 a.m.

City, State: Sarasota, FL

Occupation: Nutritionist & Health Coach

Comment: I would like the farm bill to support small farmers who grow vegetables and fruits. People should be eating more fresh fruits and vegetables, grown locally, and yet we do nothing to help small local farmers. Big agribusinesses don't need government help; they're rich enough, not to mention they are not producing healthy food in most cases. Please support the small, local farmers.

COMMENT OF BARBARA GABRIELSEN

Date Submitted: Thursday, April 19, 2012, 10:14 p.m.

City, State: North Salem, NY

Occupation: Speech Language Pathologist

Comment: I am concerned about the country's nutrition. I don't believe that the current farming system is focused on healthy food as much as they are focused on profit. Profit concerns are understandable, however I feel it is out of control. I work with many children on the autistic spectrum, have had several family members die from cancers, and believe that there is a correspondence between improved health and functioning and organic, and responsible food sources, and farming. I'm concerned about the neglect of the land we use to produce food from, so much poison has been put into our soil, and it is chaining into our populations health. The future of farming needs to be more responsible and refocus its goals of what successful farming is. It's time for responsibility! I am neither a producer or non producer, I have a small organic garden I use to supplement my families nutrition.

COMMENT OF PATRICIA GADSBY

Date Submitted: Friday, May 11, 2012, 10:41 a.m.

City, State: New York, NY

Occupation: Farmers' Market Organizer

Comment: America needs a farm bill

- that creates jobs, including jobs for returning veterans, and spurs innovation and economic growth
- that makes healthy local food available to all, especially the young
- that protects our "natural capital" (natural resources)
- that invests in the next generation of farmers and capitalizes on the eagerness of young people to farm by making entry into farming affordable to them.

The world is changing . . . America needs to adapt by thinking big in many small ways, instead of thinking small by disproportionately supporting big agri/food businesses that have created many problems, including a large obesity/health problem that will cost the country dearly.

COMMENT OF WILLIAM GAFFNEY

Date Submitted: Friday, May 18, 2012, 6:05 p.m.

City, State: Oakland, CA

Occupation: Farm Equipment Sales

Comment: We sell water conditioning equipment to help farmers end their reliance on petro chemicals and to help them grow organic food that doesn't poison the Earth, water, air, people, plants, and animals. Please help by passing this bill.

COMMENT OF YANA GAFOURI

Date Submitted: Friday, May 18, 2012, 10:43 p.m.

City, State: Corte Madera, CA

Occupation: Housewife

Comment: I am on disability due to end stage renal disease. I want to support local organic farms, because if America does not want to eat healthy clean foods, there will be more and more people like me on dialysis or other debilitation diseases. But I guess this is the goal of the big pharmaceutical companies, so that they can "treat" us with more chemicals, and stuff their pockets with cash.

COMMENT OF SANDRA GAGNON

Date Submitted: Friday, May 18, 2012, 10:10 p.m.

City, State: Manchester, NH

Occupation: Homemaker

Comment: Our farm bill must, most importantly, protect food security for all Americans.

Second, we need to subsidize the cost of healthy foods such as fresh fruits and vegetables, not ingredients that go into making junk food.

Also, farm bill subsidies should not go to wealthy "farmers" (who may never even see their farm) or big agribusiness, but to small family farms and to those who use sustainable, organic farming methods.

COMMENTS OF THERESA GAIGNARD

Date Submitted: Friday, April 27, 2012, 11:54 a.m.

City, State: West Roxbury, MA

Occupation: Administrative Assistant

Comment: I know little about the farm bill or its history or how it helps hungry people. I only know that we have a lot of hungry people that we need to help.

Date Submitted: Wednesday, May 09, 2012, 2:57 p.m.

Comment: I do not understand the farm bill and all its complexities. I do know that a strong nation has an obligation to protect its vulnerable. We cannot let our children and elderly starve. The Republicans have no heart and are certainly not Christian.

COMMENT OF BRENDA GAINES

Date Submitted: Friday, May 11, 2012, 4:44 p.m.

Producer/Non-producer: Producer

Type: Forestry, Fruits, Nuts, Poultry/poultry products, Vegetables

Size: Less than 50 acres

Comment: Pesticides are killing pollinators, contaminating water, destroying soil micro-organisms, poisoning people and our food. Support organic agriculture. Don't give our tax money to high fructose corn syrup makers, or animal abusing factory farms. Label GMOs.

COMMENT OF KATRINA GAINES

Date Submitted: Friday, May 18, 2012, 3:50 p.m.

City, State: Cove, OR

Occupation: Library Tech 3

Comment: I think that a farm bill that supports organic and sustainable farming is critical. I do not want to eat genetically modified foods. Without labeling to know if a product has GMOs, I stick with organic, because I know it hasn't been chemically engineered or modified, its real food. I think more money needs to be spent supporting organic farming and keep our food healthy. Support labeling, so people can make informed decisions in purchasing products. All the chemicals used in corporate farming are poisoning our bodies and the Earth. Support those that are trying to care for the land.

COMMENT OF LOUISE GALARNEAU

Date Submitted: Sunday, May 20, 2012, 9:01 p.m.

City, State: Leicester, NC

Comment: As a consumer, I am concerned with the many additives, GMO's, and pesticide residues in our food. As a citizen, I am concerned with the long and short term effects that continued and increasing pesticide and herbicide use will have on

our land and both fresh and ocean water. As a realist, I am concerned for the small and beginning farmers, depending on the huge agribusinesses for an entire country's food supply is not safe. As a voter, I will be watching what happens with this bill. Do the right thing for your constituents and your country. Please support organic farming. My Grandchild is depending on you.

COMMENT OF ROBIN GALAS

Date Submitted: Friday, May 18, 2012, 11:23 a.m.

City, State: Hayward, CA

Occupation: Garden & Nutrition Educator

Comment: The current farm bill and versions the heavily subsidize corn and soy are costing us billions in health care costs! These commodities are turned into high fructose corn syrup, animal feed, and unhealthy foods (that contribute to our epidemic of obesity, diabetes, heart disease, *etc.* We have spent (and continue to spend) so much time as a nation squabbling over health care while doing very little to change the essence of the farm bill which impacts our nation's health. If you are going to offer subsidies, do it for broccoli and kale and apples!

COMMENT OF REBECCA GALE-GONZALEZ

Date Submitted: Friday, May 18, 2012, 11:30 a.m.

City, State: Flint, MI

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I am independent grower with edible flint Co-op and am trying to produce a health product that doesn't pollute the environment or destroy DNA and contribute to disease and destruction of the environment. We need help to make this an affordable practice we must stop contributing to the likes of Monsanto and big agribusiness that is using unhealthy practices and reverse the trend we are on.

COMMENT OF RON GALEN

Date Submitted: Friday, May 18, 2012, 2:52 p.m.

City, State: Richmond, CA

Occupation: College Instructor

Comment: I eat, therefore I live. If I eat badly, I live badly. I would rather eat well. Not luxuriously, just healthy. Please insure our food supply is healthy. Big Agra makes more profit if we eat badly. Unrestrained capitalism and doing the right thing are at odds. Please do the right thing.

COMMENT OF KEVIN GALLAGHER

Date Submitted: Friday, May 18, 2012, 12:00 p.m.

City, State: Garden City, NY

Occupation: Videographer

Comment: Please keep our food clear of pesticides and genetic modification. All foods should be clearly marked if they are modified, processed, sprayed, irradiated or genetically modified. Let the consumer decide. The market place will be regulated by our informed choice. Do not let the growers hide what they are doing. Your job is to protect we the people. Not the corporation!

COMMENT OF PEGGY GALLAHER

Date Submitted: Friday, May 18, 2012, 6:57 p.m.

City, State: Medford, OR

Occupation: Transportation

Comment: Please protect the rights of family & small American farmers and those of us who depend on healthy, non-GMO, and healthy organic foods. As a parent, I beg that we have choices and full disclosure of how our foods are grown. As an American, I plead to you to truly represent the desires of those you represent.

COMMENT OF ROB GALLINGER

Date Submitted: Wednesday, May 09, 2012, 2:40 p.m.

City, State: Los Angeles, CA

Occupation: Hair Stylist

Comment: Protect Older Americans—House Agriculture Committee Please preserve programs and services that would be cut under the farm bill. Help us protect SNAP, TEFAP, and CSFP today! We must ensure hunger-relief programs remain protected so that seniors who worked their entire lives continue to have access to these vital programs.

COMMENT OF JASON GALLIVAN

Date Submitted: Friday, May 18, 2012, 11:59 a.m.

City, State: Portland, OR

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Local, small sustainable farming is the only way we will be able to feed the world in the future. Agribusiness stands against this for two reasons, the first being profits at the cost of human suffering, and the second scarcity. Profits come from a direct correlation between scarcity and demand, artificial scarcity is causing starvation across the globe and even in the USA. We need to support small local farmers that are following sustainable practices, not using chemicals that destroy the environment and sell their produce within their state or surrounding areas. Genetically modified crops and seeds also have a detriment on the environment, animals and humans. They are not sustainable and chemical companies are after profits, again at the expense of human suffering. If the government is not going to step in and do something good for its people, then they should at least make the people able to do something for themselves. Farming should be allowed in all areas, even urban (roof tops/balconies) without penalties. Genetically modified foods need to be labeled as such and foods that are sprayed with chemicals should also be disclosed on the food packaging. Sprays are absorbed by the food and so become part of what you eat.

COMMENT OF PAULA GALLO

Date Submitted: Friday, May 18, 2012, 12:24 p.m.

City, State: Fairfield, CT

Occupation: Music Teacher/Vocalist

Comment: Stop Monsanto and other companies from poisoning our food. Want a cure for cancer? An ounce of prevention is worth a pound of cure.

I'm sure the people in our government eat organic and feed their children organic food. If this country is by the people and for the people. Get the corporations out of our food!

If people want raw milk, they should have it. It's not illegal or political.

Stop poisoning the animals and creating mutant genetically modified food. It is poisonous.

When will it end? It's disgusting.

Make it stop NOW.

COMMENT OF SUSAN GANCHER

Date Submitted: Friday, May 18, 2012, 12:39 p.m.

City, State: Vero Beach, FL

Occupation: Jeweler

Comment: I listen to many of your Town Hall Meetings by phone.

Once again I find my representative wanting to take from the majority of people to give to business. It doesn't matter what kind of money business gives to you to run for office again if you are not supporting the people's needs you need to rethink your choice of work. You are taking entirely too many liberties with food health and safety, which indicates to me you are ignorant of the most recent research on these things. I've heard that an extraordinary amount of your time is spent on securing money for your next run for re-election. That deprives you of the time needed to learn from more than those giving you money. Please heed my words, I know you want to be a good representative of all your constituents.

COMMENT OF CROITIENE GANMORYN

Date Submitted: Friday, May 18, 2012, 4:14 p.m.

City, State: Ocala, FL

Occupation: Retired

Comment: Dear Congressman Stearns,

When the Senate considers the next farm bill, I urge you to defend progress made in the 2008 Farm Bill and to protect critical programs that we need to help farmers transition to organic production. Specifically, I urge you to:

- **Include a Packer Ban:** Allowing meat packers to own the animals they slaughter reduces competition for livestock raised by independent farmers and ranchers. A ban on the ownership of livestock by meat packers would afford family farmers the opportunity to remain independent and retain control over their operations. I urge you to include S. 2141 in the farm bill.
- **Protect Organic Agriculture:** The 2008 Farm Bill made progress on giving organic agriculture a fair share of support. In this farm bill, I urge you to protect the organic cost-share program, amend the AFRI program to require 5 percent of funding to go to the development of locally adapted, publicly available seeds and breeds, and to keep language from the last farm bill that would assure organic producers that they are not required to pay unfair surcharges to access crop insurance.
- **Protect Country of Origin Labeling:** Consumers started to get this basic information about their food just a few years ago. We need more information about where our food comes from, not less, and this farm bill should not weaken the current requirement for mandatory country of origin labeling for meat, poultry, fruits and vegetables, seafood and nuts.

Sincerest Regards,

CROTTIENE GANMORYN.

COMMENT OF DAN GANNON

Date Submitted: Sunday, May 20, 2012, 11:11 p.m.

City, State: Sacramento, CA

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: Dear Chairman Lucas,

My name is Daniel Gannon, in my second year as owner of my own farm business. My entire income is earned on ½ acre in organic production. The only real consideration I need is to be rid of farm subsidies in order that citizens may begin to appreciate the true cost of our food. Please stop giving money to farmers for participating in a failing system. Let the rest of us offer a future of hope for our food system and ag sector. The following letter is a form letter that makes great recommendations for trying to carve out a slice for new farmers in a way that will be effective for improving the odds of success in the current system. But first I ask you to consider again, eliminate farm subsidies. It is a system that keeps our nation insecure. Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I am a young farmer and I'd like to share my support for programs that help the next generation of growers build strong farm businesses. As it's estimated that 125,000 farmers will retire in the next 5 years, it's absolutely critical that farm bill programs help citizens get started in this challenging field. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- **Mandatory funding for Individual Development Accounts at \$5 million per year.** This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- **Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year.** This program funds essential education for new farmers around the country.
- **Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.**
- **Revise FSA rules to make loan programs more accessible to more young and beginning farmers.**
- **Reaffirm the existing cost share differential for BFRs within EQIP.** Please consider including allowances for farmers on leased land to take advantage of NRCS matching funds to make improvements in resource management. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.

- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

DAN GANNON,
[Redacted],
Sacramento, CA.

COMMENT OF PEGGY GANNON

COMMENT OF JOHN GARDINER

Date Submitted: Friday, May 18, 2012, 10:35 p.m.

City, State: Cave Junction, OR

Producer/Non-producer: Producer

Type: Livestock

Size: Less than 50 acres

Comment: Small farmers selling their local produce organically produced, are the past and future Homeland Food Security. We richly deserve some help to grow food and fiber that will maintain the health of the Nation, once it is weaned off the subsidized, unfairly-traded, industrial ag model that has created the obesity epidemic and all that goes with it.

COMMENT OF ANGELA GARDNER

Date Submitted: Tuesday, March 27, 2012, 9:54 p.m.

City, State: Little Rock, AR

Producer/Non-producer: Producer

Type: Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: Local and regional food systems help create jobs and spur economic growth in rural and urban communities. Will you support the Local Farms, Food, and Jobs Act to invest in this growing sector?

- The future of family farming and ranching in America depends upon ensuring that would-be new farmers have access to land, capital, and markets. Will you support the Beginning Farmer and Rancher Opportunity Act to help them?
- Farmers depend on quality, cutting-edge research, such as traditional plant breeding, to stay successful—how will the farm bill invest in this crucial work?
- Working lands conservation programs help farmers maintain productivity while protecting our air, water, and soil. Will you protect these programs from unfair funding cuts?
- Local and regional agriculture is a major driver in the farm economy. Producers are responding to skyrocketing demand for local and regional food by increasing production, creating new markets, and launching new businesses. Locally marketed foods accounted for an estimated \$4.8 billion in gross sales in 2008, the number of farmers markets nationwide jumped 17 percent in 2011, and all 50 states now have farm-to-school programs.

Despite these opportunities, significant infrastructure, marketing, and information barriers are limiting growth in local and regional agriculture.

Bill Basics

The Local Farms, Food, and Jobs Act will drive economic growth by:

- Creating economic opportunities for farmers and ranchers through local and regional markets.
- Improving processing and distribution infrastructure for local and regional agriculture.
- Expanding access to healthy food for consumers, including underserved communities.
- Providing research, training, and information that farm entrepreneurs need to be successful.

Why It Matters

- Small, mid-sized, and large farm businesses currently sell through local markets and will benefit from investments in local and regional agriculture.
- Empirical research shows that expanding local agriculture in a community can increase employment and income in that community.
- Every two jobs created at a farmers market supports an additional job in another sector of the local economy.
- The bill's investment in local and regional agriculture amounts to less than 1/6 of 1 percent of USDA's budget, yet will address the needs of a large and growing sector of American agriculture.

For More Information: All Members are encouraged to co-sponsor the Local Farms, Food, and Jobs Act. Contact Claire Benjamin in Rep. Pingree's office at (202) 225-6116 or Claire.Benjamin@mail.house.gov, or Kristin Vennekotter in Sen. Brown's office at (202) 224-2315 or Kristin_Vennekotter@brown.senate.gov.

COMMENT OF ARNIE GARDNER

Date Submitted: Wednesday, May 16, 2012, 11:28 a.m.

City, State: Portland, OR

Occupation: Finance Director

Comment: I am writing to support re-authorization and enhancement of the farm bill. These are tough times for millions of Americans, especially those unfortunate ones who must rely on SNAP benefits or emergency food to feed their families. I am Board Chair of the Oregon Food Bank and we see daily the growing hunger problem that is getting worse not better. This last year drops in Federal food commodities has resulted in a drop off of food to hungry people and also required tapping into dwindling Oregon Food Bank reserves to provide necessary help. Please fund TEFAP back to historical levels. Millions of Americans rely on food stamps (SNAP) to help them get by. It provides an efficient and effect way to provide food to hungry people, and also helps stimulate the economy as these are redeemed with local retailers. SNAP is the single biggest fighter of hunger we have in this country. Since the hunger problem is getting worse not better, it makes no sense to reduce these critical benefits to those Americans struggling to get through each day. I realize that pressure on Federal budgets exist, but cutting back on benefits to people living in poverty is not the answer.

Sincerely,

ARNIE GARDNER,
Oregon Food Bank Board Chair.

COMMENT OF ELIAS GARDNER

Date Submitted: Friday, May 18, 2012, 1:57 p.m.

City, State: Middlesex, VT

Occupation: Educator

Comment: I believe that we need to focus on smaller scale, local, sustainable, diverse growing. These things are hard and cost more but will lead to a much more stable and healthy food system. Our current food system is controlled by giant corporations that don't care about our health only our bottom lines. We have succeeded in creating cheap food which is great in the short term but in the long run our cheap food is also not nutritious or healthy and will end up costing much more in our healthcare system.

COMMENT OF GAIL GARDNER

Date Submitted: Friday, May 18, 2012, 11:49 a.m.

City, State: Cambridge, MA

Occupation: Educator

Comment: I'm tired of worrying about our food supply. Agribusiness has no interest in our health, only in its own profits. I eat as much organic food as possible, but why should I have to worry? Stop the subsidizing of big agriculture and support the farmers who are growing food that is actually good for us.

COMMENT OF WILLIAM GARLETTE

Date Submitted: Friday, May 18, 2012, 9:47 a.m.

City, State: Newport News, VA

Occupation: Organic Master Gardener/Master Naturalist

Comment: There is no more critical issue than the health of our Nation's citizens. The first line of action must be safe, nutritious, clean food. We must have a government that guarantees this and a farm bill that insures it.

COMMENT OF ELLEN GARMS

Date Submitted: Saturday, May 12, 2012, 6:13 p.m.

City, State: Tucson, AZ

Occupation: Retired

Comment: We need a sustainable farm bill that encourages organ foods and healthy crops. There is no place in our food chain for toxins, animal abuse in factory farms or abusive seed producers like Monsanto. Please help make our food safe and healthy for this and future generations.

Thank you.

ELLEN GARMS.

COMMENT OF PRACHI GARODIA, M.D.

Date Submitted: Saturday, May 19, 2012, 12:03 a.m.

City, State: Hood River OR

Occupation: M.D.

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Please do not cut any funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture.

We need to have GMO labeled in food/products so we know what we are eating! Stop putting the land, soil and environment at greater risk by exposure to more chemicals/pesticide/GMO lobbied by big corps.

COMMENT OF GRACE GARRISON

Date Submitted: Friday, May 18, 2012, 10:19 a.m.

City, State: Newbury, MA

Occupation: Marketing and Events

Comment: I support the Slow Foods movement and the efforts to effect change throughout our environmentally damaging food systems that threaten public health and community well-fare on a consistent basis. I know there is a better way and I want to be part of the solution. Please vote for farm bill changes that are Good, Clean and Fair.

COMMENT OF ESTHER GARVETT

Date Submitted: Friday, May 18, 2012, 9:20 p.m.

City, State: Miami, FL

Occupation: Teacher

Comment: I am concerned about humane, safe, and fair farming procedures. We use too many unsafe chemicals in farming. Some of these chemicals are used on crops and others are used in our animals. Animals are not treated humanely. This angers and disturbs me. It should disturb you as well. Our far workers are not treated fairly. Our large farms are not concerned with anything but profits. I would like to see a change in all of these areas. Please make sure that you vote to support these simple and humane concepts. Thank you.

COMMENT OF ARMANDO GARZA

Date Submitted: Friday, May 18, 2012, 10:37 p.m.

City, State: Austin, TX

Occupation: CSR for Speedy Stop Convenient Stores

Comment: Food just does not taste like it should, especially the fruit! I buy organic when I can. I really believe that small farmers take pride in the food they harvest.

COMMENT OF JENNIFER GASPERINI

Date Submitted: Friday, May 18, 2012, 2:09 p.m.

City, State: Woodbury, MN

Occupation: Customer Service

Comment: There is nothing more important than whole food! It is the basis of our health, our brains and in turn the health of our state. We must stop allowing corporations to poison our food for their financial gain. Organics are critical to the entire food chain. Please do the right thing for the people of Minnesota.

- I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF PAUL GAST

Date Submitted: Friday, May 18, 2012, 10:26 a.m.

City, State: Seattle, WA

Occupation: Physician

Comment: What could be more important to our health than the food that we eat; water we drink and air that we breathe. This is not about elitist 'foodies' and gourmet. It is about eating real food that has been grown in a way that is healthy for the grower; the land and the rest of us! Please think of people; not businesses when you make your decisions!

COMMENT OF CHERYL GATZ

Date Submitted: Friday, May 18, 2012, 5:36 p.m.

City, State: Atwater, CA

Producer/Non-producer: Producer

Type: Livestock

Size: Less than 50 acres

Comment: We need to produce good quality food that is not full of growth enhancing drugs, pink slime and all the other crap that is allowed without consequences or policing.

COMMENT OF CHRISTINE GAUS

Date Submitted: Thursday, April 19, 2012, 10:45 a.m.

City, State: Pittsburgh, PA

Occupation: Community Services

Comment: There is no function of government that is more important than the preservation of the health and welfare of our people. Through the anti-hunger programs such as SNAP, TEFAP, and CSFP, our government contributes in a highly tangible way to the health of low income families, children, and seniors. This governmental support unlocks millions of dollars in private funds, thousands of hours of volunteer help, and massive amounts of in-kind assistance dedicated to the alleviation of hunger and the promotion of good nutrition. These programs are critical to the well-being of our citizenry and merit the support of all Members of the House Committee on Agriculture. Through these programs, Americans are united in a fundamental public-private partnership to build stronger families and a stronger nation.

COMMENT OF ROBERTO GAUTIER

Date Submitted: Friday, May 18, 2012, 10:14 a.m.

City, State: Brooklyn, NY

Occupation: Teacher/Farm Tour Organizer

Comment: My 88 year old mother receives Meals on Wheels.

As a life-long cook, my mother and I talked about the dedication of the volunteers who deliver several times a week. That aspect is inspirational, but the actual food is so disappointing to all of us. We've grown up with the knowledge that food is also medicine. As a senior, my mother knows that the government is not going to provide organic food to those on the way out. She wishes that that were the case and wonders why Americans must be presented a diet of processed, highly-sprayed "food." We spoke of the collapse of the bee hives that has been linked to a pesticide and shook our heads. We should be shaking our fists! We've all known for so long that food inspections are mostly out of government hands and in the hands of agribusiness.

The Food Bill should be thought of as a national health bill. America is extremely unhealthy, but it doesn't have to be. A good farm bill should be crafted that assures a healthy food and fair conditions for the producers, especially the dwindling group of small farmers, who are aging rapidly.

Large-scale agriculture is not only impersonal and reliant on cheap labor, but it holds no candle to what would be possible with a more scaled-down, environmentally-sustainable model.

Real food is a right and, sadly, something that should not be left to entities that concentrate solely on the bottom line.

Pass a Food Bill that will assure edible, healthy, affordable food for even seniors who are the way out of this world.

COMMENT OF JAY GAWLIKOSKI

Date Submitted: Friday, May 11, 2012, 6:47 p.m.

City, State: Madison, WI

Occupation: Local Government

Comment: Representative Baldwin,

I would like to share my thoughts on food and agriculture as you consider the upcoming farm bill.

First I only purchase organic, chemical-free, local food from farmers and producers that I can visit in person when at all possible. Everything else that I purchase is from our local food cooperative. I will not spend 1¢ cent on anything produced by a major food conglomerate and check out every product and its origin in detail. If there is any doubt, I refuse to participate.

Much of what is for sale in regular grocery stores is not food and is really not fit for human consumption. We have a health and obesity crisis in the USA precisely because of what is being passed off as food to the public. And it would appear that decisions are usually made in the interest of a corporation rather than what is common sense.

I do not want my tax dollars supporting any form of research or subsidies into any genetically modified plants or animals. On the contrary, I do expect that any such products would be boldly labeled as containing GMO if even the slightest bit of contamination exists.

I would like to know that our meat supply is free of “pink slime” and that any corporations who try to sell such material be prosecuted for criminal fraud. I would also like to see the agencies responsible for ensuring such filth does not enter our food supply do their job. Obviously they have not. It is not good enough for me to see that the BPI Corporation is filing for bankruptcy. They should be prosecuted in criminal court and the agencies that approved such a product should be prosecuted as assisting that fraud. How else could this have happened. Maybe government agencies are too busy trying to scare the public with stories about mad cow disease, swine flu, bird flu and bombs in people’s underwear. Well we don’t believe it anymore. Government has lied and lost all credibility. FDA-approved = Who cares & So what.

I would like the government to get out of our food supply altogether. A few months ago I wrote you about my expectation that raw milk should be freely available and that no government agency has any legitimate authority to come between a willing farmer and a willing client who wish to produce and eat what they choose.

You responded with a letter about your concern for food safety. Well just where is that food safety that you speak of? When we have GMO products polluting the entire food supply, poisonous fluoride being added to the water, high fructose corn syrup contained in almost every product and pink slime in the hamburger, is that really food safety? I would argue no it is not. It is instead a farce. Government continues to harass, regulate and control our lives under the guise of safety and security. The people are waking up to this charade. Obviously votes are being cast in the opposite direction and the corporations’ money are influencing that vote.

It is high time that change happens. Let’s see it start with this farm bill.

Thank you,

JAY GAWLIKOSKI,
Madison, WI.

COMMENT OF SUZANNE GEACI

Comment: I am writing to voice my support for the Supplemental Nutrition Assistance Program (SNAP) and The Emergency Food Assistance Program (TEFAP) to help prevent hunger in the U.S. These programs need full funding and support.

COMMENT OF PETER GEBHARDT

Date Submitted: Sunday, May 20, 2012, 1:01 p.m.

City, State: New London, WI

Occupation: Operations Supervisor

Comment: I have been working for the last 7 months at a large meat packing operation. The need for a Bill that gives the small producer a chance is desperately needed. I will not eat commercially produced meat products now after I have seen what goes into them and how they are made. People need to given a chance to eat

food coming from an organic or Natural farm without Cargill, Tyson, Swift, etc having a hand in it.

COMMENT OF KATRIN GEIST

Date Submitted: Friday, May 18, 2012, 8:14 p.m.

City, State: Missoula, MT

Occupation: Biologist

Comment: I fully support an organic farm bill to mutually benefit producers, consumers, the environment, and future generations. Conventional practices are not only toxic and unsustainable, but also cost millions in alleviating negative environmental effects later. Millions nobody wants to pay, let alone the industry causing that harm. And consumers are affected too. Pesticides and food additives bio-accumulate in the body, leading to a decline in health and increased medical bills over time—only people may not link that to polluted soils, waterways, air, and the toxic foods they eat. I ask you to serve current and future generations by adopting an organic farm bill. Now.

P.S.: I'm a mini-producer and grow veggies for my own use. The difference to supermarket foods is unbelievable. Organic is definitely the way.

COMMENT OF LAVERNE GEMAR

Date Submitted: Sunday, May 20, 2012, 12:00 a.m.

Comment: Please continue to support nutrition programs & family farms, end subsidies and limit funds to concentrated feed lots. Thank you!

COMMENT OF MARYA GENDRON

Date Submitted: Thursday, May 17, 2012, 1:06 p.m.

City, State: San Lorenzo, NM

Occupation: Community Organizer

Comment: As a rural homesteader and advocate for a sane future for all, especially the generations to come, I see sustainable agriculture as the most crucial issue facing our country. This is a moral issue. It is essential that this year's farm bill recognize the importance of healthy food for all, jobs for small family-owned farmers, and the promotion of farming practices that are gentle on the land. There is sufficient research proving that small-scale organic farming makes more sense economically, ecologically, and also in terms of crop yields. Please make sure that the farm bill is **Sane**—meaning that it serves the interests of future generations, quality of life, and the Earth, rather than the interests of monoculture and agribusiness. You are in the position of power to make them on our behalf. Please have mercy on us and do the right thing as a conscientious and moral leader.

COMMENT OF KAREN GENEST

Date Submitted: Saturday, May 19, 2012, 5:46 a.m.

City, State: Vancouver, WA

Occupation: Teacher

Comment: I am extremely concerned about the sources of our food in America. We need a farm bill that supports the healthy choices, healthy produce rather than the moneyed organizations that can buy their way into anything. Our organic farms and smaller family farms, are in need of the subsidies, not the huge farm conglomerates that constantly put our environment, including our land and waterways at risk.

Please endorse all of the provisions of the Local Foods, Farms and Jobs Act (H.R. 3286) as well as the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). We also need to maintain the EQIP Organic Initiative.

If we don't work to improve the source of our foods, we are condemning our children to a life of health issues, issues that could be avoided if we had healthy, non-toxic, non-GMO food to eat.

COMMENT OF MERIDETH GENIN

Date Submitted: Friday, May 18, 2012, 5:28 p.m.

City, State: New York, NY

Occupation: Editor and Holistic Health Educator

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I most emphatically do not support the genetic modification of our food supply, which is proceeding with alarming speed. This not only contaminates the organic farms from which I purchase, it also creates new proteins in food which both humans and animals cannot digest, and which are causing a horrifying rise in allergies and gut disorders. Even more alarming is that intensive farming with GM seeds and the chemicals (including glyphosate) used with them is sterilizing our soil by killing soil-borne organisms.

COMMENT OF GREG GENSHEIMER

Size: Less than 50 acres

Comment: I am an urban farmer. I practice permaculture and sustainability and grow organically. I don't know all of the details of this bill, but please don't let it restrict me from providing my friends and neighbors clean, healthy, organic, nutrient dense food.

COMMENT OF DARIEN GEORGE

Date Submitted: Friday, May 18, 2012, 9:21 a.m.

City, State: Fort Worth, TX

Occupation: Consultant

Comment: Its time to start supporting the right producers. Start supporting the sustainable producers, not the big farm subsidies that the U.S. has consistently given money to. Support farms that are friendly to the environment, not CAFO's. It's time to take politics and money out of the equation and do what is right for the future, not what is easiest or *status quo*.

COMMENT OF MICHAEL GEORGER

Date Submitted: Sunday, April 22, 2012, 6:34 p.m.

City, State: Oran, MO

Producer/Non-producer: Producer

Type: Field Crops, Specialty Crops

Size: 301–500 acres

Comment: Dear Honorable Members of Congress,

I write to you with my concerns about what is being largely considered as being the major component and 'safety net' for production agriculture, and that is Crop Insurance. Personally, I am a big believer in insuring one's property and health in the event of a disaster, but I see the current crop insurance program as a failure that rewards inefficiency and poor production, management, and marketing practices. I see many large producers using crop insurance as a safeguard against frequent poor production practices and management, rather than using it for its intended purpose to provide financial security when Mother Nature throws a weather event at us that we cannot control. I do not purchase crop insurance due to my personal 'situation' where it would be nearly impossible to ever collect on it. Most of the soils I farm in Southeast Missouri are naturally fertile, have an adequate to plentiful supply of water during the growing season, and have had improvements made to remove excess water by use of tiles, land 'grading', and surface drainage. What fields that are not subject to adequate subsurface water, benefit from irrigation practices. Through personal expenditures of time, and money, I have tried to ensure that my production (and subsequent income) has remained relatively stable.

What bothers me the most about only using crop insurance as the safety net for production agriculture is the abuse that I have seen of it at taxpayer's expense. Last year (my area was part of the extensive and record flooding caused by excessive rains; and then a hot, summer drought), I saw producers not planting parts of their corn crop because they knew it was easier, and a guaranteed profit, to collect on Preventive Planting Insurance since the required planting date had passed. My family, as well as many other producers in the area without PPI, were continuing to plant our corn crops because we thought we could manage to make a respectable yield. Yes, our yields were off due to the growing conditions, but we took the risks, increased the management, and still made a profit. Those that purchased this type of insurance took no risks, produced nothing, yet made a profit with the help of taxpayers subsidizing the insurance programs. I have also seen some producers employ poor production practices with the knowing that if they aren't able to produce a sustaining income for their business and family through the production of a crop and then sound marketing of it, they will be able to make up the shortfalls through Crop Insurance or Revenue Insurance. I have seen poor planting practices, and heard of low levels of input (namely nitrogen and some weed control) applications by producers with the full knowledge that their yields will be low and they will collect on the insurance.

How does this affect me you may ask? Besides being a taxpayer, this type of subsidized (insurance) behavior is allowing the largest farmers to get larger and have control over more ground, inflating rental rates on ground, and increasing the purchase price of land far past what it's production value is. I'm a young farmer (34 years old), with a younger brother who has recently joined our family business of about 1,500 acres. We would like to expand our family farm and increase the acreage, but only want to do so if it is profitable in an ethical (both environmentally and socially) manner. My father farms with us as well, and has checked into crop insurance before, but we have never had growing conditions that we would have been able to collect on for the expense of our insurance premium. Many of the largest farms (5,000 or more acres) in the area are purchasing insurance to insure profitability; due to them bidding up rental rates on ground, and buying ground at rates much higher than what the production on those purchased acres can cover. Those large farms have profit margins so thin, they cannot risk any production or revenue losses due to them from over-extending themselves with management, labor, equipment, or weather/market collapse related losses. I know of smaller farmers that also collect in their crop insurance policies, but it is generally due to weather related losses (what the insurance was originally set up to cover). Being smaller acreage farmers, they are able to devote more time to the management of their family business, and generally have better production yields and marketing than those larger farms with similar growing conditions. Nationwide, what crop insurance seems to have done is make agricultural land valued more on the "dollars per acre it can generate," rather than the "profitability (based on production and marketing of produced crops) per acre," with the biggest beneficiaries being those who can control the most acres, while collecting the most often, while spending the least amount per acre with little regard to what it actually produces in yield or the price it is sold at. While I agree producers need a safe-guard against a weather event that may wipe them out financially, there needs to be some type of oversight to make sure the producer is not increasing that risk by over-paying for rent or the purchase of ground. Land is usually the single largest expense per acre of production, and farm-

ers paying high rates for this fixed cost input are only increasing the risk of collecting on insurance to be profitable.

By subsidizing crop insurance, the government is distorting the fair market value and rental rates of productive farmland across the U.S., with those areas of greatest weather-related losses, and those with large-acreage farmers who regularly collect on their insurance coverage being the greatest distorted.

What I would like to see in the farm bill for production agriculture is a modified direct-payment type of program. As I am sure you are well aware, the direct-payment is one of the few areas of past safety-net programs that is WTO compliant. If payments were made at the same amount per acre across the U.S. into some type of individual revenue-loss account (similar to a Health Savings Account) with no regard to what crop is grown on that acre, or the past production history of that acre; and then only withdrawn during periods of severe losses it would decrease the distortion of land and rental values caused by subsidized crop insurance. In order to withdraw money from the account, producers would need to give up part of their following year's payment (say 10–20% for each year and increasing for consecutive years it is withdrawn) to insure that it is only used when most needed, and not abused. There should not be a limit on the amount that is collected by an individual (remember a producer collects it per acre regardless of the crop grown. A soybean, wheat, corn, cotton, *etc.* acre all receive the same amount of payment, and double-cropped acres do not receive double payments), and there should not be a limit allowed in the account. As a producer grows his/her business, they usually have greater risks and this increase in the account would help cover the increased risks in subsequent years. The government would only have to make an actual payment when a producer withdraws money from the account, helping reduce budgetary costs of the program. It would be a producer controlled safety-net that could be used when greatest needed, yet have controls to ensure that it does not have a 'snow-ball' financial effect for future government budgets. The free-market system would determine what is produced based on price and profit, farmers would be free to produce whatever crop they choose, all crop growing regions of the country would be treated equally, farmers would have a safety-net type of account to withdraw from when losses occur, it would be WTO compliant, the true production value of the land would eventually return to determine the value of said land, and it would reward those producers most who withdraw from it the least.

I would also recommend that the government significantly reduce or eliminate subsidies to the crop insurance program to eliminate distortions in land values and allow young farmers with fewer assets a greater chance of obtaining farmland (either through purchase or rental) to engage in production agriculture. Members of Congress, please allow crop insurance to work as it should like other insurance types. A grower is allowed to purchase it, but they have to pay at full expected cost of what it may cost the insurance provider. I am sure you would see a drop in insurance coverage, but it would cause an increase in producer management, a slowing in growth of extremely large (and often times inefficient) farms, and allow young and efficient producers to have the opportunity to get started or grow their business.

On another note, please keep the grain marketing loan program the same as in the past. It is a program that costs the government nothing, but allows producers who need it to receive a loan on the bushels of produced grain (collateral) to help cash-flow their business to make payments on purchases, while waiting for market prices to hopefully improve.

Thank you for taking the time to read and consider my comments.

Sincerely,

MICHAEL GEORGER: Corn, Soybean, Wheat, and Grain Sorghum producer.

COMMENT OF DR. ROBERT M. GERACI

Date Submitted: Friday, May 18, 2012, 12:44 p.m.

City, State: Nyack, NY

Occupation: College Professor

Comment: The farm bill needs to help local producers provide their communities with nutritious (not simply caloric) food—it must support real farmers (not international corporations) as they grow a healthy variety of vegetables and fruit.

The farm bill has traditionally focused upon large scale production of specific crops (corn, soybean, *etc.*) under the work of agribusiness. Unfortunately, this comes at the expense of producing nutritious food for the public. It is outrageous that something like a cheeseburger (with all of its ingredients, shipping costs, distribution costs, and in-restaurant preparation costs) could be cheaper than a head of broccoli. It is time to end that.

The farm bill needs to stop catering to huge agribusiness corporations and instead focus upon local farmers producing a healthy variety of food at an affordable price.

Comment: The health of our food, water and farm soil is our country's greatest treasure, and needs to be protected from threats from a number of factors—including pollutants, erosion and non-organic practices.

COMMENT OF LAURIE GERSHGORN

Date Submitted: Friday, May 18, 2012, 12:21 p.m.

City, State: Cortland Manor, NY

Occupation: Chef, Food Educator, Nutrition Consultant

Comment: Time is of the essence to support traditional, hard working independent farmers, not associated with agricultural corporations, for the sake of a healthy and sustainable economy, people and environment. As someone that purchases 90% or more products from within the U.S., and has been supporting local and small organic farms for many, many years, we need legislation that continues to support a farm bill that changes convention and moves forward. Obesity can only be fought through education, real food winning over factory food. Supporting farmers who grow clean food without being indebted to agri-corporations is the key to a progressive reform. Listen to the people, not the lobbyists, please.

COMMENT OF E'LOONNA GESCH

Date Submitted: Friday, May 18, 2012, 10:39 p.m.

Comment: Organic for your children, grandchildren, and great grandchildren's healthy future . . . and mine too. Save our planet from the for-profit corporations.

COMMENT OF PATSY GHICKS

Date Submitted: Sunday, May 13, 2012, 3:12 p.m.

City, State: Hilliard, OH

Occupation: Retired

Comment: Please as you look at the food and farm industry bill, be aware of how many people are depending on food subsidy and no the churches cannot feed the masses. Churches do what they can in giving food to those who aren't working/are falling through the cracks, so to speak, earning too much for food stamps but not enough to keep food on the table and a roof over the family's heads.

And not all folk believe in "church"; what are the non-believers to do when circumstances put them into this position of not being able to feed themselves or the family. And this is a free country of choice of religion, is it not?

Pay attention to the masses and don't take away the life line. Keep healthy well balanced lunches in our schools, too.

COMMENT OF LESLIE GHIRLA

City, State: Nevada City, CA

Occupation: Hairdresser

Comment: Make labeling and disclosure of all GMO foods and foods manufactured with GMO products. Make it legal to BUY and produce raw milk.

Let people feed themselves and grow their own food so that food I ate in the 1960's as a child becomes the norm again—that is vegetables grown without all the chemicals and GMO.

COMMENT OF VICTOR GIAMMATTEI

Date Submitted: Friday, May 18, 2012, 9:52 p.m.

City, State: Santa Fe, NM

Occupation: Writer

Comment: I worked on the Idaho Oneplan 1999–2001 to help farmers become better stewards of the land. Anyone who looks closely at our food production system, knows that conventional agriculture has to move towards sustainability and best practices which will require less reliance on pesticides and excess use of chemical nutrients and minimum or no till practices. Our best models today for sustainability and production of healthy nutritious foods is the certified organic model in conjunction with bio-intensive farming as in the John Jeavons model. There is more than adequate data now to show that the latter methods can produce amounts equal to and even more than conventional farming per acre and do so using less energy inputs. In the final analysis the later, organic and bio-intensive farming is where our legislators, should place their emphasis and support by way of whatever subsidies are needed to support these models and help integrate these into conventional farming. Ideally, some day, conventional farming should be mostly organic bio-intensive farming.

COMMENT OF BARBARA GIBBON

Date Submitted: Saturday, May 19, 2012, 10:49 a.m.

City, State: Columbus, OH

Occupation: Library Assistant

Comment: Please stop all factory farming! The health of our nation and the emotional and physical health of the animals we farm are both extremely important. Factory farming is making both people and animals sicker, and more dependent on medicines. Organic, natural farming of animals, animal products, vegetables, and fruit are the healthiest options, and should be supported by the government! Please stop promoting and funding factory farms, and stop injecting fruits and vegetables with chemicals so they grow faster. These chemicals are absorbed into our bodies and cause harm. Thank you.

COMMENT OF JO GIBBONS

Date Submitted: Saturday, May 19, 2012, 1:18 a.m.

City, State: Pleasanton, CA

Occupation: Business Owner

Comment: We need to have an Organic farm bill. Big agricultural business is not serving all of America's food needs. Organic farming is a very important component in our food supply. The lobbyists for the industrial agriculture business does not seem to be concerned with the health and welfare of America. They are more focused on profit rather than quality.

COMMENT OF ROZANNE GIBBS

Date Submitted: Wednesday, May 09, 2012, 8:21 p.m.

City, State: Tucson, AZ

Occupation: Retired

Comment: It is a crime that Americans are going hungry in this country. We have money for all these horrible dictator countries but not for our own people. We can pay for war but not food? I am very tired of my tax dollar going to support these countries. They need to take care of their own and we need to take care of our own. When all Americans can have access to food and health care then we can try to save the world!

COMMENT OF GLEN GIBELLINA

Date Submitted: Friday, May 18, 2012, 2:33 p.m.

City, State: Sarasota, FL

Occupation: Consumer

Comment: We need an Organic Farm Bill. We need to build a world for our children that makes access to healthy food a reality, protects the environment and puts

farmers first, then we have to put our ideas for change forward to those who serve us in Washington. It's time for wise solutions America can no longer afford to continue to blindly stumble down the toxic and costly path that industrial agriculture has paved. I advocates for family farms and sustainable agriculture today, tomorrow and for our children's future.

And God said, "Let the Earth sprout vegetation, plants yielding seed, and fruit trees bearing fruit in which is their seed, each according to its kind, on the Earth."—Genesis 1:11 ESV
And it was so. FYI, that would be "organic".

COMMENT OF MARSHALL GIBSON

Date Submitted: Sunday, May 20, 2012, 7:38 p.m.

City, State: Indianapolis, IN

Occupation: Retired

Comment: When I was in 4th grade, we saw movies of farmers contour plowing to save soil from washing away. This is a healthier way to control runoff than chemicals that wash down rivers and kill plankton which apparently produces ½ the oxygen we breathe. I would like to have my great and great-great grandchildren breathe clean air with plenty of oxygen. Consider agriculture science rather than agriculture profits in your deliberations so you and I can assure (we hope) oxygen for our progeny.

COMMENT OF MICHAEL GIBSON

Date Submitted: Friday, May 18, 2012, 1:26 p.m.

Comment: I think it is one of the deepest signs of our skewed priorities that the very food we eat has been hijacked, adulterated and diminished for corporate gain at the expense of the entire nation in countless ways. Please get this right!

COMMENT OF THEO GIESY

Date Submitted: Sunday, May 20, 2012, 3:37 p.m.

City, State: Norfolk, VA

Occupation: Homemaker

Comment: Because we require safe health giving food, we need small and organic farmers to provide it. The products produced by agribusiness are not health giving food, they are contributing to the rise in obesity, diabetes, cancers and heart disease. Agribusiness also contributes to climate change, contamination of water and air. For these reasons I urge you to endorse all provisions of H.R. 3286, fully fund conservation programs, support all provisions of H.R. 3236, maintain EQIP Organic Initiative.

COMMENT OF DAWN GIFFORD

Date Submitted: Saturday, May 19, 2012, 2:17 a.m.

City, State: San Diego, CA

Occupation: Nutritionist

Comment: The only way we can improve the health of our nation and reduce staggering medical costs is to put our money where our **Values** are. If we value our health—and what is life without health—we should subsidize only those things that encourage health.

GMO corn and soy made into livestock feed, corn syrup and processed food ingredients does **Not** encourage health. Miles and miles of heavily sprayed monocultures and CAFOs does **Not** encourage health of people or our precious soil, air and water.

If we put our money where our **Values** are, we would subsidize farmers to produce nutritious whole foods in ways that have minimal impact on the environment, like fruits, vegetables, free-ranging meat and eggs, and hybrid non-GMO staple crops that don't require constant spraying—like we used to have 20 years ago.

We would place local food security and healthy rural communities above grossly inefficient crop biofuels and commodity exports that put farmers here and in other countries into debt peonage or out of business.

We would dump “get big or get out” ag policies that harm small and mid-size farmers and drive prices so low that farmers have to destroy their land over-cropping and cropping on marginal/sensitive lands to make a living.

We would help farmers keep their land in agricultural use after they retire with creative sub-parceling to the next generation of farmers. We would incentivize and help farmers find less expensive, less environmentally detrimental ways to produce crops.

We would put research dollars into agroecology and finding ways to farm with minimal use of fossil fuels and water, since our current rate of use will become increasingly unsustainable.

We would place soil and water conservation and protection of bees above all else, because without all of them, we have no farming and no food.

This is what the farm bill should focus on.

COMMENT OF RICHARD GIFFORD

Date Submitted: Friday, May 18, 2012, 1:37 p.m.

City, State: Conway, AR

Producer/Non-producer: Producer

Type: Forestry, Livestock

Size: 500–999 acres

Comment: Diversity leads to security and health in almost all settings—from financial investments to social systems. In the American agricultural system a diversity of profitable producers benefits everyone. Please assure that smaller, value-scaled producers have an opportunity to succeed without anti-competitive funding disadvantages imposed by comodified agribusiness.

(1) I believe that the Local Foods, Farms and Jobs Act (H.R. 3286) economically benefits Americans and value-scaled producers like myself and should be passed.

(2) The Conservation Stewardship Program is valuable to Americans by assuring that productive lands remain productive for future generations without dependence upon synthetic inputs. Please continue it, assuring that potential new insurance subsidies are tied to compliance with conservation programs.

(3) The Beginning Farmer and Rancher Opportunity Act (H.R. 3236) assures healthy diversity on the production side of American agriculture. I hope that all of its provisions will be implemented.

(4) Participation in the EQIP program has made our farm more efficient, profitable, and an economic asset to the region. Please continue to fund it fully for the benefit of American producers.

Comment: Please end subsidies to large farms and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies.

Thank you.

COMMENT OF L.F.J. GILL

Date Submitted: Friday, May 18, 2012, 4:42 p.m.

City, State: Southborough, MA

Occupation: Retired

Comment: It is time—critically so—so start supporting small, clean, organic, humane farming. The huge factory farms and “agribusiness” have wreaked plenty of havoc, on our food supply and our environment. Maybe they meant well at the beginning, but it has gotten way out of hand—soil depletion, toxins in our foods, and now tampering with the genetic code of plants—and even taking out *patents* on seeds! The FDA has been taking its cues from agribusiness and chemical companies—even hired an ex-Monsanto lawyer to write the rules for Monsanto and their ilk! Does this need to be thought about?

Please, stop subsidizing factory farming, filthy and inhumane feedlots, contaminated soil, damaged food supply, sabotage of the seeds of life, the drastic reduction of genetic diversity in the seeds supply, and the killing off of wildlife by the makers of Agent Orange and DDT—who now have a free hand in deciding the fate of our food supply. It would be unbelievable if it were science fiction. That it is the reality is beyond terrifying. If **you** will not do something about it, **Now**, who can? Thank you.

L.F.J. GILL.

COMMENT OF J. DAVID GILLANDERS

Date Submitted: Friday, May 18, 2012, 3:26 p.m.

City, State: State University, AR

Occupation: Retired Engineering Professor

Comment: To improve the health of our country the government must stop subsidizing unhealthy foods and start subsidizing healthy foods.

The current farm subsidies make unhealthy fast foods the only foods many poor people can afford to eat. Start subsidizing healthy fruits and vegetables.

The subsidies on feed grains that are used to produce unhealthy high fat meats that clog our arteries are creating major health problems and therefore increasing health care costs.

Start subsidizing healthy food and health care costs will go down.

COMMENT OF BOB GILLESPIE

Date Submitted: Thursday, May 17, 2012, 2:51 p.m.

City, State: Wenatchee, WA

Occupation: Teacher Sustainable/Organic Agriculture and Natural Resources

Comment: Protect the farm bill that provides opportunities for beginning farmers, incentives for farmers to produce and market food locally, and programs that encourage farmers to develop habitat for wildlife and pollinators.

COMMENT OF ERIN GILLETT

Comment: Stop selling your citizens short in order to produce in the stock market! Enough! Do not let **Greed** dictate the future of our children's health and our food system. Enough!
 Do not let Greed validate the demise of our planet and it's water supply.
 Say it with me, "**Enough!**"

COMMENT OF CHRISTINA GILMAN

Date Submitted: Friday, May 18, 2012, 2:32 p.m.
City, State: Seattle, WA
Occupation: Freelance Web Developer, Mom, Eater
Comment: We need a fair and healthy farm bill, one that protects the soil and water so critical to farming **And** provides healthy food for our citizens. These should be the priority **Above** that of ensuring large profit margins for agribusiness.

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I care deeply about the quality of food I eat and feed to my family. I also care deeply that we as a nation steward our resources wisely so there is food for the future, for everyone not just those who got rich at the expense of our natural resources.

SUBMITTED STATEMENT BY STEVE GILMAN, POLICY COORDINATOR, NORTHEAST
 ORGANIC FARMING ASSOCIATION

Chairman Lucas, Ranking Member Peterson, Members of the Committee:

Thank you for this opportunity to submit this testimony on behalf of the member organizations of the Northeast Organic Farming Association, Interstate Council (NOFA-IC).

I'm here today representing the seven state chapters of the Northeast Organic Farming Association—NOFA-NY, NOFA-VT, NOFA-NH, NOFA-RI, NOFA/MASS, CT-NOFA and NOFA-NJ. Begun in 1971, NOFA is one of the oldest organic farming organizations in the United States. NOFA members include a wide range of farmers, gardeners, landscape professionals, homesteaders and consumers working together to promote healthy food, organic farming practices, food system fairness and a cleaner environment through education and policy initiatives.

Welcome to upstate New York and the rural splendor of the Adirondacks! While there's been public grumbling about hosting a farm bill field hearing on short notice in a far off place that's hard to get to in a region not known for its farmland—we're glad you're here.

Local Farms As An Important Economic Engine

The fact is—this mountainous, thin-soiled area with a very short growing season is home to numerous appropriately scaled family farms, produce growers, greenhouses, dairies, livestock operations and orchards—supplying local restaurants, groceries, Farmers Markets, roadside stands, Community Supported Agriculture projects as well as Supplemental Nutrition Assistance Program (SNAP) recipients that generates a significant year round contribution to jobs and the region's economy. It's clear that the economic benefits of producing food for local markets has tangible effects on job creation. Economic Research Service data shows that for every \$1 million in sales of local foods, 13 jobs are created compared to 7.5 jobs in production agriculture. Multiply this economic driver across our entire Northeast region, home to some 40% of this nation's consumers, and it's easy to see that local agriculture plays a substantial role in the overall economy.

This is not just a regional issue, however. We urge the Agriculture Committee to strongly support a number of farm bill initiatives that are instrumental in promoting the growth and viability of local family farms all across the country. In this

time of intense negotiations over budget cuts its hard to find more bang for the buck than USDA's exemplary low cost **Know Your Farmer, Know Your Food** initiative, for example. This provides a real service for farmers and citizens trying to negotiate the Federal labyrinth by delivering public access to conservation, farm credit, rural economic development and marketing programs that were authorized by Congress. This USDA initiative is increasing the farming opportunities for growers looking to capture these expanding new markets and helping community agriculture scale up their local and regional food systems, create jobs and strengthen their rural economies.

The low cost **Farmers Market Promotion Program** also produces many benefits for community agriculture. However, specialty crop and organic producers who attempt to scale up from direct producer-to-consumer markets are encountering huge barriers in selling products to local institutional and retail outlets. There is an urgent need for crop insurance products and food safety farmer training programs to serve this dynamic sector of agriculture. Therefore, we also advocate strong support for the comprehensive provisions outlined in the **Local Farm, Food and Jobs Act** and the **Beginning Farmer and Rancher Opportunity Act**, which are aimed at inclusion in the 2012 Farm Bill and have the support of hundreds of farm, food, and rural organizations nationwide.

Importance of Conservation Programs

As is true all across America, maintaining environmental quality is the absolute lifeblood of the Adirondack region. In addition to providing a healthy quality of life for all citizens, outdoor recreation enthusiasts have a special relationship with the out-of-doors. Teeming with wildlife and awesome vistas, this area's economy is built on travelers from around the world who come to hike, rock climb, ski, swim, fish, hunt, boat, bird watch, *etc.* Conservation of resources is paramount. Agriculture, with all its ecological impacts, must do its part—that's why the **farm bill conservation programs should be augmented instead of suffering ruinous cuts**. It is only fair that public agricultural subsidy and crop insurance dollars should be accompanied with mandated participation in conservation programs.

Competition Title

We urge support of a strong, comprehensive and improved competition title in the next farm bill by placing a moratorium on mergers of large food and agricultural companies and reviewing prior mergers for antitrust issues; banning meatpackers from owning livestock, which can be used to manipulate the market; requiring fully transparent contracts for farmers; supporting the **GIPSA rule** and investigating and enforcing antitrust laws across the food system and protecting Mandatory **Country-of-Origin Labeling (COOL)**.

Support for the Organic Sector

We are disappointed that no organic farmers have been invited to testify at this hearing, even though organic is such an important and growing part of the New York State agricultural economy and also because organic has been so vulnerable to cutbacks in this farm bill cycle. The 2012 Farm Bill represents an opportunity for the Agriculture Committee to honor consumer food preferences and fully support organic agriculture initiatives. For over a decade now consumer demand has continued to fuel the exponential growth of the organic sector, which even in this time of recession remains the fastest-growing segment in the food economy, by far.

Currently, however, domestic demand for organic food and beverages exceeds domestic production—and this represents a tremendous opportunity for U.S. farmers and businesses. Organic agriculture is open to all farmers and represents a practical opportunity for growers of all scales who wish to transition to organic farming methods and access these growing markets. In order to meet projected market demand with domestic production by 2015, we will need 42,000 organic farmers. With just a modest investment in USDA research, marketing, and farmer assistance programs to support the U.S. organic sector, we can close the gap and expand this critical job base here at home.

To foster that growth, we urge a continued and expanded Federal investment in the following USDA programs:

National Organic Program (NOP)

In order for organic to remain a feasible option for farmers and consumers alike there is Federal responsibility through USDA to insure that organic standards remain viable and keep pace with the growth in the sector through adequate funding of the National Organic Program (NOP). Charged with the promulgation and enforcement of organic standards, the NOP is also responsible for accrediting certifiers, developing equivalency agreements, handling complaints—and ensuring the integrity of the organic seal. These are essential functions for the survival and transparent growth of the organic sector. In order for the NOP to be able to grow

along with the organic sector it requires a technology upgrade to better provide domestic and international oversight as well as transparency and streamlining of systems, data, and information.

NOP should receive a one-time infusion of \$5 million in mandatory funds for the technology upgrade, and then should be authorized to receive appropriations increasing at a rate of 20 percent annually beginning with \$10 million in FY 2013.

National Organic Certification Cost-Share Program (NOCCSP)

This program is essential in helping small and medium-size businesses become certified as organic, a critical step if we are to meet growing consumer demand for organic products and maintain a scale diversity in organic operations. Unlike bail outs and direct payment subsidies organic farmers are simply asking to be put in a position to compete and succeed in new markets.

The annual process of organic certification is a necessary step for ensuring that all organic operations meet stringent organic standards, in order to ensure the integrity of the USDA organic seal and meet consumer expectations. But certification costs can be prohibitive for small, mid-sized, and beginning farmer businesses. This cost-share program enables certified organic farmers and handlers to offset the costs of certification by providing a small reimbursement of currently no more than \$750 per year, capped at 75% of total certification costs.

NOCCSP should be funded at \$30 million in total mandatory funding over the 5 year life of the next farm bill.

Public Plant and Animal Breeding

One of the basic building blocks of any successful agricultural system, conventional or organic, is *farmer access to seeds* that are well adapted to local soils and climates. Farmers nationwide have fewer choices of seeds to meet changing environmental stresses and consumer demands. Often, the seeds that are available are not bred to address local soil and climate conditions, placing entire regions at a competitive disadvantage. The Federal Government has largely stopped funding *classical breeding* efforts at state land-grant institutions to develop public cultivars, and has largely shifted agricultural germplasm research toward only patented varieties that prevent farmers from saving seeds. The problem is particularly acute for organic farmers whose farming systems demand seeds that are well adapted to their local conditions. The 2008 Farm Bill addressed this growing crisis by requiring USDA to make classical plant and animal breeding a priority with the Agriculture and Food Research Initiative (AFRI), but USDA has not complied with that Congressional mandate.

The next farm bill should require a set aside of ten percent of annual AFRI funding to be used for classical breeding efforts to ensure meaningful public seed variety choices for farmers.

Organic Agriculture Research and Extension Initiative (OREI)

This program is USDA's flagship competitive research and extension grants program dedicated to organic agriculture. Unique in its scope and function, OREI funds research and extension projects to help meet the production, marketing, and policy needs of the growing organic industry. The program is very competitive and each year funds only a small percentage of eligible proposals and comes nowhere near meeting the growing sector's research and extension needs.

OREI should be funded at \$30 million in mandatory funds annually, and retain its authorization for appropriation.

Organic Production and Market Data Initiatives (ODI)

This is a small but significant multi-agency initiative that ensures that USDA collects organic statistics, conducts organic price reporting, and releases organic economic reports. The Economic Research Service, the National Agricultural Statistics Service, and the Agricultural Marketing Service all collaborate on this data collection initiative. Access to segregated organic data is critical to help organic farmers and handlers make wise business decisions, and to policymakers needing to assess trends in agriculture.

ODI should receive \$5 million in mandatory funding over the life of the next farm bill, and retain its authorization for appropriations.

Environmental Quality Incentives Program (EQIP) and the Conservation Stewardship Program (CSP)

The 2008 Farm Bill included important provisions for organic farmers in recognition of the historical lack of participation and conservation benefits of these systems. However, both programs are in need of reform to address the unique needs of organic farming systems.

Issues such as the unfamiliarity of NRCS staff with organic systems, overlapping planning requirements with the National Organic Program, and lack of adequate planning assistance should be addressed in the next farm bill.

Address the Lack of Risk Management Tools for Organic Producers

Despite mandates in the 2008 Farm Bill, USDA currently does not provide appropriate risk management tools for organic producers. The agency charges an unjustified surcharge to organic farmers who participate in Federal Crop Insurance Program, and for most organic crops, does not pay organic farmers at the organic price when they experience a loss. In addition, the agency does not provide appropriate tools for diversified farmers. The 2008 Farm Bill required USDA to remove the unjustified organic crop insurance surcharge and to provide organic price elections. While USDA has started the process for some organic crops, it has fallen far short of the 2008 Farm Bill mandates in that regard.

The next farm bill must fully remove these unnecessary and unjustified disincentives to organic farmer use of USDA risk management tools.

Thank you.

Sincerely,

STEVE GILMAN,
NOFA-IC Policy Coordinator.

COMMENT OF JAMIE GILMORE

Date Submitted: Saturday, May 19, 2012, 6:07 p.m.

City, State: Naalehu, HI

Occupation: Self-Employed

Comment:

- Support for small farmers & farms.
- Different regulations for small farms & large scale farms.
- Support for farmers markets & direct selling by the farmer to the consumer.
- Support for organics.
- Upholding the organic standards . . . keeping “organic” free of genetically modified ingredients preservatives & chemicals.

COMMENT OF DAVID GILROY

Date Submitted: Friday, May 18, 2012, 7:13 p.m.

Occupation: Psychotherapist

Comment: As a person who enjoys the right to healthy eating, I want to invite you to think in much the same way we once did with student loans. We can call it The National Defense Organic Farms Bill.

COMMENT OF ERINN GILSON

Date Submitted: Friday, May 18, 2012, 1:30 p.m.

City, State: Jacksonville, FL

Occupation: Professor

Comment: I urge members of the Committee on Agriculture to refuse to continue to allow the farm bill to include the excessive subsidies for commodity agriculture. It has become increasingly clear to U.S. citizens that the *status quo* for agriculture in the United States must change. The farm bill should support food that is healthy and safe for families and the environment (the air, water, and soil) in which those families live. Subsidizing the production of corn and soy, which are transformed into nutritionally empty processed foods, is a failure of policy. It only serves to perpetuate a food system that makes unhealthy, processed food cheap and plentiful, and so harms the health of American people. Changes to the farm bill should foster the growth of local producers and jobs in local food business, and continue to support the organic production that is healthier for people and, in overall terms, more efficient.

Instead, I urge the committee members to:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Comment: Please stop the insanity! Everyone knows that you're paid off by the big ag corporations like Monsanto. How can you live with yourself knowing that you are poisoning people, all in the name of money? One day, justice will be served and you will be accountable for the terrible decisions you have made.

Remember, you can't eat money and you can't buy your way out of a lie.

COMMENT OF ANNE GINN; ON BEHALF OF SUSAN ELLIS GOODELL, PRESIDENT & CEO, FORGOTTEN HARVEST, INC.

Date Submitted: Saturday, May 19, 2012, 8:31 a.m.

City, State: Oak Park, MI

Occupation: Food Rescue Organization/Emergency Food Provider

Comment:

U.S. House of Representatives
Committee on Agriculture

SUSAN ELLIS GOODELL,
President & CEO.

Statement submitted by Forgotten Harvest, Inc.

Statement submitted on May 19, 2012

Forgotten Harvest is honored to submit comments to the U.S. House of Representatives Committee on Agriculture.

As the nation's largest food rescue organization, Forgotten Harvest rescued over 23 million pounds of surplus nutritious food last year and is on track to rescue over 42 million pounds this year—equivalent to about 42 million meals. This food is distributed free-of-charge to people facing hunger in metro Detroit.

Principle: Eating healthy food is a basic human right. The nutritious food raised, processed, and sold in our nation and exported to other nations provides a critical engine for our nation's and Michigan's economy. The agricultural sector is one of the most important contributors to the nation's jobs, recovery from the recent deep recession, and future growth. The nutritious food from America's agricultural sector feeds people. Without nutritious food, there is no life. For our nation's vulnerable population, however, accessing this healthy food often is a significant challenge.

Forgotten Harvest urges the Committee to retain the fundamental principle that eating healthy food is a basic human right, not a privilege. A nutritious diet for the nation's population is critical for America's future. Eating a healthy diet enables children's bodies and brains to grow normally so that our nation's children may live productive, contributing, economically viable adult lives. Educators observe that hungry children are inattentive, fail to socialize effectively, and often drop-out of school, which results in life-long limits on earning capacity. Adults, particularly seniors, need a nutritious diet for healthy living. A poor diet contributes to the risk of debilitating and costly diseases, including heart and kidney disease, diabetes, and related complications. While the correlation between income and obesity is complex, a nutritious diet enables people to maintain a healthy weight, which is important in averting disease and costly long-term health problems. Reducing poor-diet-related disease risks may help reduce the nation's escalating health care costs. Our nation depends upon healthy people able to serve in the military service, lead businesses, provide health care, and educate future generations. Eating nutritious food, regardless of personal or household income, is critical in assuring our nation can depend on a capable, healthy population.

As the nation knows well, the recent recession continues to affect millions of people in the nation, including Michigan, who now rely upon the emergency food system for help meeting their basic human needs. Forgotten Harvest is a leading source of nutritious food for people facing hunger in metro Detroit, one of the na-

tion's and Michigan's most seriously affected communities over the past decade and in the recent economic recession. Forgotten Harvest's food rescue/distribution business model brings together partners across the economic sectors—for-profit agricultural/food businesses, nonprofit food distribution agencies, and government organizations—to help people facing dire barriers to acquire and eat healthy food. Forgotten Harvest rescues surplus, fresh and prepared food from over 455 generous food businesses: farmers, dairies, processors, wholesalers and distributors, retailers, and high quality entertainment venues. We distribute this surplus, rescued, healthy fresh and prepared food free-of-charge to over 250 partner emergency food distribution agencies: pantries, soup kitchens, shelters, and faith-based and community partners via our farmers' market-style mobile pantry. This surplus healthy food—vegetables, fruit, meat, dairy, baked goods, juice, and prepared food—is distributed free-of-charge to no- and low-income people facing hunger in metro-Detroit.

The equitable principle that eating nutritious food is a basic human right guided the provisions in prior farm bills. Forgotten Harvest is deeply distressed with the cuts to nutrition programs and other safety net programs that the House passed in recent budget action—and that have been proposed over the past year. A major portion of these cuts will hurt households with children and seniors. From first-hand experience, Forgotten Harvest knows that the hundreds of thousands of vulnerable people it serves are least able to expand their current financial resources when government safety net programs are cut.

As the Committee addresses the 2012 Farm Bill provisions coincident with the nation's need to "live within its means," Forgotten Harvest urges the Committee to continue to reinforce this fundamental basic human right as a factor in the significant economic role of the agricultural and nutrition sectors. Forgotten Harvest believes that the farm bill must continue to structure the Supplemental Nutrition Assistance Program (SNAP) to assure that communities of eligible people are able to receive expedient SNAP allocations regardless of their residential locations and the timing of dire need: in every state and in every rural, suburban, and urban community. As currently structured, SNAP is available rapidly to meet the need of eligible people. Forgotten Harvest urges the Committee to retain the current structure and not change SNAP to a block grant program, which would greatly limit the program's flexibility to respond rapidly and would add additional bureaucratic burdens without benefit for people facing need. In considering modifications to SNAP, Forgotten Harvest urges the 2012 Farm Bill to expand innovative and effective SNAP outreach programs, such as the SNAP outreach demonstration program implemented by the Northern Illinois Food, as a model to help provide rapid emergency food support to people facing dire need.

SNAP recipients' spending reinforces and enhances the economic value of the agricultural sector, because SNAP funds supports jobs for farmers and ranchers, food processors, distributors, and retailers. As the U.S. Department of Agriculture (USDA) reports, the economic multiplier of the SNAP program is \$1.79: when recipients spend their SNAP allocations to acquire food, the community and food sector benefit by an even greater amount. Forgotten Harvest urges the 2012 Farm Bill to assure that no additional cuts are made to the SNAP allocation amounts for eligible people. Such cuts harm the people intended to benefit from SNAP and also will have a negative economic impact on the agriculture and broader food economic sectors.

Forgotten Harvest also urges the Committee to strengthen The Emergency Food Assistance Program (TEFAP) to help keep up with increased demand. TEFAP supplies about 25 percent of the food in the nation's national network of "food banks." TEFAP should have triggers to enable it to respond rapidly to need and also have provisions to enable the Secretary of Agriculture to use discretionary funds to enhance the quantities of food in the TEFAP system when economic need requires this food.

While Forgotten Harvest acknowledges the difficult and painful questions that the nation must ask in addressing current budget challenges, our nation must not place additional and undue burdens on its most vulnerable people. Provisions that help feed vulnerable people must recognize that the same people may be least able to help fund these feeding support programs or to endure additional hardship caused by program or budgetary revisions. Forgotten Harvest is honored to meet many of the clients receiving its food and, through a SNAP pilot outreach program, to meet people applying for SNAP allocations: long-term jobless people striving to secure employment, seniors struggling to live on minimal incomes, low-income parents and grandparents raising children, people with emotional challenges that place barriers on higher-income employment. As the Committee considers these emergency support programs, including SNAP and other nutrition and emergency food support programs,

Forgotten Harvest urges careful evaluation of all possible unintended consequences that could harm the people these support programs are designed to help, on the agriculture sector, and on the gradually improving nation's economy.

Principle: Surplus food must feed people, not landfills.

The USDA reports that 96 billion pounds of food are wasted annually while 49 million people in our nation, including 17 million children, face hunger each year. The USDA has a significant role in helping feed people facing hunger. The EPA has reported that wasted food comprises the second largest volume in the nation's municipal landfills. The EPA has established a high priority on reducing wasted food for environmental reasons and urges diverting food to feed hungry people as a priority action. Forgotten Harvest urges USDA and EPA collaboration to address this mutually recognized human crisis.

Forgotten Harvest urges the Committee to include provisions in the 2012 Farm Bill to urge USDA to help reduce the waste of surplus healthy food by using innovative and cost-effective methods to redirect surplus food, currently wasted, to feed the nation's hungry people. Food recovery and diversion to feed people can be accomplished in a very cost effective model. For example, Forgotten Harvest rescues and distributes the equivalent of one nutritious meal for less than 20¢. Forgotten Harvest offers to provide the Committee with examples of locations in our nation and other countries that may provide insights into innovative, cost-effective programs with effective outcomes to address this principle.

The U.S. has the power to end hunger in America and to be a model to other nations by denying healthy, safe, surplus food to landfills and instead providing that good food to our most vulnerable citizens. Even with the nation's extensive and effective government and nonprofit human service programs, millions of children and adults still face hunger. The House Committee on Agriculture can lead in addressing this hunger gap by emphasizing a principle in the 2012 Farm Bill that directs surplus healthy food to our nation's hungry people and not to waste sites.

COMMENT OF CAROLINE GINSBERG

Date Submitted: Friday, May 18, 2012, 1:20 p.m.

City, State: San Luis Obispo, CA

Occupation: Coordinator at the Food Bank Coalition

Comment: Allow small school districts and school districts with low percentages of free and reduced price meals served (annual Entitlement Value less than \$50,000) to volunteer to receive Cash-in-Lieu of the USDA Commodity Foods. Districts requesting this voluntary option, if it were made available by the farm bill, could purchase fresh, nutritious, locally grown, raised and/or caught foods for their students school meals and therefore invest in local food systems and at the same reduce USDA Food Program administration costs at the State level and perhaps, the Federal level.

COMMENT OF DEBORAH GIORDANO

Date Submitted: Friday, May 18, 2012, 5:21 p.m.

City, State: Castro Valley, CA

Occupation: Clergy

Comment: Don't weaken poultry inspection standards!

Current rules provide for three inspectors to examine 140 birds per minute. Under the new rules, inspections would speed up to 200 per minute—with only one inspector on the line. Even the professionals say that is way too fast.

With far less time to inspect each chicken, unsanitary, defective poultry meat has a higher chance of making it into our supermarkets. And while USDA says it would save less than \$30 million per year on poultry inspection costs, it could cost the agency (and us) far more to deal with potential increases in foodborne illness.

Speeding up the poultry line isn't just hazardous to our health—it's also hazardous to those who work in poultry factories. Poultry workers already have an alarming rate of workplace injury from conditions which include a workplace full sharp objects like knives and scissors, and from the repetitive nature of poultry factory tasks. Speeding up the chicken line will only make conditions even more hazardous.

But while food and worker safety will undoubtedly suffer, the new rules are expected to result in a \$¼ billion windfall to poultry companies.

The safety of our food, especially poultry which has such a high incidence of contamination, should be the highest priority of USDA. If their answer is less quality control inspection, more dangerous workplace conditions, and allowing an industry

with a horrible safety record to police itself, it's probably time to go back to the drawing board.

COMMENT OF JUSTIN GIORGI

Date Submitted: Thursday, May 03, 2012, 2:48 p.m.

City, State: Klamath Falls, OR

Occupation: Optician

Comment: Our food system is in crisis largely due to government policy subsidizing large producers of low quality products. The foods produced by our system are tasteless and nutritionally-deficient. We have failed our small family farmers. We have failed to support them and we have failed to support the production of wholesome food.

Since the current policies have been implemented we have seen a huge increase in health issues across the board. Any physician, anyone who studies health and wellness will tell you that the first factor in any one's health is their diet. A nutritionally balanced diet consisting largely of fruits and vegetables strengthens every system in the body allowing the body to naturally resist disease and fight infections. Our current salt, sugar, fat diet isn't just a personal choice. That is what the food system produces.

Wholesome food simply isn't an option. We produce too little nutritious food and too much junk. Even the fruits and vegetables we produce are void of nutrients due to the way they are grown. This is a direct result of government policy. We must take quick and decisive action to correct this.

Instead of encouraging large scale production of nutritionally void foods lets encourage small scale production of quality goods. We can do that by supporting the family farmer. If we must subsidize our food system we must do so wisely. We must subsidize the wholesome foods not the garbage. We must allow and encourage farmers to produce and sell the best product possible instead of the most that is possible.

The end result will be a food system that produces quality food, a population that consumes less and is healthier overall. We cannot continue to reduce the cost of our food at the expense of our health. The truth is if we don't spend our time and money on food we will spend much more on health care.

I must mention that I will be taking a great interest in the committee's hearings and decisions regarding the next farm bill. Anyone who stands up and challenges the current system, encourages change and at least makes an attempt to improve the system will earn my vote.

COMMENT OF KAREN GIOVANNINI

Date Submitted: Thursday, May 17, 2012, 12:28 p.m.

City, State: Windsor, CA

Occupation: Ombudsman

Comment: I am writing in support of the suggestions by the National Sustainable Agriculture Coalition. Specifically, healthy food for school children (not processed food-like substances), Value-Added Producer Grants, Organic Ag Research & Extension, Conservation Stewardship Program and the Beginning Farmer & Rancher Development Program. We are conducting our first year of the Beginning Farmer & Rancher program and the response was overwhelming—100 applicants for 25 openings. Clearly, the interest in small agriculture is alive and well. Thank you.

COMMENT OF JENNIFER GIRVIN

Date Submitted: Friday, May 18, 2012, 10:36 a.m.

City, State: Boston, MA

Occupation: Executive Recruitment

Comment: Please for the health and welfare of this country and our children's children, we must reform the farm subsidy system! Greed has played havoc on every vital sector of our economy and it will ruin the USA. We need to support small farms and eliminate factory farming now.

COMMENT OF DIEDRE GISH

Date Submitted: Friday, May 18, 2012, 3:43 p.m.

City, State: Sharon, VT

Occupation: Finance Manager

Comment: The farm bill should support small, diversified, healthy agriculture. The farm bill should not subsidize commodity crops and should not encourage

CAFOs. The farm bill should have more incentives for organic agriculture that provides sustainable soils without the use of chemical fertilizers and pesticides.

COMMENT OF STEVE GIVEN

Date Submitted: Friday, May 18, 2012, 12:55 p.m.

City, State: Bainbridge Island, WA

Occupation: Musician

Comment: Congress should be very careful in weighing the arguments put forth by Big Business lobbyists when the average person who will be more affected rarely gets a voice.

COMMENT OF NANCY GIVENS

Date Submitted: Friday, May 18, 2012, 12:03 p.m.

City, State: Bowling Green, KY

Occupation: University Sustainability Program Coordinator

Comment: In 1985, American taxpayers and farmers entered into a compact to provide a safety net for the country's food producers in return for protection of critical natural resources. Known as "conservation compliance" this policy requires farmers to follow conservation plans that limit soil erosion on highly erodible land as well as preventing destruction of wetlands and native grasslands. Farmers who willfully violate their conservation plans risk losing taxpayer funded benefits.

Today, this important connection is at risk. Taxpayer-funded subsidies for crop insurance are not currently linked to conservation compliance as they once were. Congress is currently considering eliminating Direct Payments, the major subsidy program that is linked to conservation compliance, and moving some of those funds to support increased subsidies for crop insurance, which currently lacks compliance requirements. Unless Congress connects crop insurance subsidies to conservation compliance, a significant part of farmers' incentive to follow conservation plans will disappear this year.

In order to ensure that the agricultural safety net works in harmony with conservation programs and responsible land uses, conservation compliance provisions must be strengthened and enforced. Long-term protection of our nation's agricultural land is of vital importance to our country. Thank you for consideration.

COMMENT OF ROGER G. GIVENS

Date Submitted: Friday, May 18, 2012, 5:39 p.m.

City, State: Morgantown, KY

Occupation: Retired

Comment: In this time of large equipment farming where the necessity to till large acres in order to profit good conservation programs are of the highest importance. Please don't underfund these programs. Our waterways depend on them.

COMMENT OF DAVID GIVERS

Date Submitted: Friday, May 18, 2012, 3:55 p.m.

City, State: Moorhead, MN

Occupation: Retired

Comment: I am opposed to farm subsidies that make the big farms bigger and the rich richer. I am opposed to the cuts in food stamps when we are in the midst of an economic depression.

America needs a farm bill that supports jobs and organic ag.

COMMENT OF KATHERINE GLASCOCK

Date Submitted: Friday, May 18, 2012, 2:49 p.m.

City, State: Studio City, CA

Occupation: Garden Designer

Comment: Please, on behalf of our children and their children: give us healthy sustainable food so our Earth is protected from the giant footsteps of the chemical corporations. They have done so much harm; we must turn everything around with determination.

COMMENT OF AVIVA GLASER

Date Submitted: Sunday, May 20, 2012, 5:03 p.m.

City, State: Washington, D.C.

Occupation: Legislative Representative for Agriculture Policy, National Wildlife Federation

Comment: The National Wildlife Federation (NWF) would like to thank Chairman Lucas, Ranking Member Peterson and the members of the House Agriculture Committee for considering our input on the 2012 Farm Bill. NWF is America's largest wildlife conservation organization, representing more than 4 million members and supporters throughout the United States and 48 affiliated state and territorial conservation organizations. NWF strongly supports farm bill conservation and energy programs. Farm bill conservation programs are particularly important for wildlife and wildlife habitat. Thousands of farmers are restoring imperiled wildlife habitat and wetlands throughout the country with the assistance of farm bill programs. The hard work of these local stewards is critical to protecting our natural resources and valued ecosystems across the country, but their success is at risk unless these programs are maintained under the next farm bill.

The following represent some of our top priorities for the 2012 Farm Bill:

Adopt a "Sodsaver" provision to protect native habitat:

The current agriculture safety net provides substantial price support and risk protection to crop producers which make crop production economically viable even where yields are consistently poor. The reduction in economic risk for crop production, combined with advances in herbicides and genetically modified crops provides incentives to break new ground—even where that ground is not likely to be productive.

Currently, crop insurance and disaster payments incentivize farmers to bring disaster-prone farmland into cultivation, creating taxpayer liability for the high risks associated with producing crops on marginal land. In South Dakota, for instance, from 1997 to 2006 the 16 counties with the highest number of native grassland conversions to cropland had annual crop insurance net benefits to producers that were more than double those in all other counties (GAO 2007).

In order to halt the continued "break out" of native habitats that are too dry, marginal or flood-prone to produce good crops, but can still be broken without economic risk to producers due to an extensive safety net of subsidies and disaster payments, the National Wildlife Federation strongly supports the adoption of a "Sodsaver" provision in the 2012 Farm Bill. Such a provision would make non-cropland that is converted to cropland ineligible for any farm bill benefit, including but not limited to price and income support payments, crop insurance, disaster payments, and conservation program enrollment. Landowners may choose to break native prairie or other non-cropland if they so desire, but they must do so with the full understanding that the profitability of crops grown on this acreage will depend on free-market economics, not agricultural subsidies, crop insurance, and disaster payments.

A Sodsaver provision would provide significant budget savings. Estimates determined in previous farm bill reauthorizations placed Sodsaver's 10 year savings in a range from \$1.4 billion (2002 CBO) to a low of \$119 million (2008 CBO score for just crop insurance subsidies).

The National Wildlife Federation supports the Sodsaver provision that was included in the farm bill that passed out of the Senate Agriculture Committee last month, but urges the House Agriculture Committee to include a stronger provision in the bill they write. A stronger Sodsaver provision would include a prohibition on receiving the entire premium subsidy for crop insurance should a landowner choose to convert land without a cropping history.

Maintain funding for a strong conservation title:

As we move into the 2012 Farm Bill in one of the toughest budget climates in recent years, farm bill conservation programs are increasingly seen as a target for budget cuts. Farm bill conservation programs have demonstrated benefits for soil, water, and wildlife. Moreover, they have been shown to contribute to rural economies through increased revenues from hunting, fishing, and other recreational activities.

Farmer and rancher demand for conservation assistance dollars remains high, outstripping the supply of available program dollars even before any funding cuts are considered. As of April 2010, there was a backlog of over 1,000,000 unfunded applications for the Wetlands Reserve Program and Grasslands Reserve Program. In 2009, for every application that received funding under the Environmental Quality Incentives Program, there were 3.4 applications that did not. Clearly these are programs that are popular with farmers that also provide benefits to taxpayers through cleaner water, improved water management and flood prevention, and the protection of vital wildlife habitat and special places that define many areas of the

United States. According to a USDA study, EQIP projects that address erosion provide over \$54 per acre in value by reducing nutrient replacement costs for farmers and avoiding costs for public works to develop alternative ways to clean up polluted waters (USDA 2010a). Other conservation programs such as WRP, GRP, WHIP, and CSP provide similar returns to taxpayers that exceed costs (USDA 2009; USDA 2010b).

The conservation title must continue to balance the pressing needs of wildlife, along with soil and water and other conservation needs. In the 2008 Farm Bill, the Conservation Reserve Program took a cut of 7 million acres—a cut that is likely beginning to have serious negative repercussions for wildlife on the agricultural landscape. The National Wildlife Federation understands that in this challenging fiscal climate, cuts to all parts of the farm bill are inevitable. The Senate Agriculture Committee's bill cuts \$6 billion from conservation programs over the next decade, cuts that will have serious impacts on the landscape. Any further cuts to conservation programs and spending on wildlife will be lead to an unsustainable situation for wildlife on the agricultural landscape could lead to the listing of several species of wildlife under the Endangered Species Act.

Provide funding for wetland and grassland easements with flexibility for grassland easements:

Both the Wetland Reserve Program (WRP) and Grassland Reserve Program (GRP) are critically important programs for wildlife with baselines that expire in September, 2012. The Wetland Reserve Program (WRP) is a critically-important program that plays a significant role in taking flood-prone land out of production and putting it back to its most beneficial use, filtering runoff, storing flood water, and providing for wildlife habitat. Funding must be found to continue to support the restoration and protection of wetlands on agricultural land and such funding should continue to be focused on ecological restoration of wetland systems and their long-term protection.

The Grassland Reserve Program (GRP) is critical to protecting our last remaining native grasslands as well as keeping ranching economically viable. There is an enormous demand for GRP—as of April 2010, there were over 800,000 acres waiting to be enrolled in the program—yet the program has never been sufficiently funded to even begin to keep up with demand.

The National Wildlife Federation supports the general framework of a combined easement program. However, we are concerned that the inclusion of a 50% matching requirement for GRP would be highly detrimental to the program. More than 95% of America's native grasslands have been converted to other uses since settlement. The lands that remain in grass are increasingly important to the continued viability of the ranching community throughout the west. Grassland nesting birds have been repeatedly listed by the U.S. Geological Survey as the fastest declining group of bird species in North America and several species could soon be federally listed under the Endangered Species Act if their habitat continues to decline. Keeping what is left of intact grasslands in grazing use should be a high priority of the farm bill conservation title to support both the ranching industry and biodiversity.

Yet many areas where such lands remain do not have a well developed land trust community and/or there is little money to fund the purchase of grassland easements. In order to ensure continued opportunities to enroll rapidly disappearing native grasslands that are important active grazing lands, and where few opportunities exist to leverage matching funds for such conservation, we recommend the creation of a 1 million acre priority grasslands option within the agricultural land easements program under which the cost share would be waived for high priority, large, intact native grasslands. Additionally, we recommend flexibility within the program for the Secretary to adjust cost share requirement on a case by case basis if the Secretary determines that environmentally sensitive land of special significance would be protected.

Provide adequate funding for wildlife practices in the Conservation Title:

The Wildlife Habitat Incentive Program (WHIP) is a voluntary program that pays up to 75 percent of the cost to private land owners for enhancing wildlife habitat on their land. The program is not limited to agricultural lands, but is open to any private landowner who would like to create wildlife-friendly habitat enhancements to a portion of their land, such as restoring native prairie grasses, performing forest management practices, or improving aquatic areas. The program is highly popular among landowners, and in 2010, there were over 1 million acres enrolled in the program, with a backlog of over 500,000 acres waiting to be enrolled.

The farm bill that passed through the Senate Agriculture committee combined WHIP into the Environmental Quality Incentives Program, with a provision saying that at least 5% of EQIP funds had to go towards WHIP. However, at least 5% of

EQIP funds are currently going to wildlife practices. The bill authorizes EQIP for FY13 at \$1.5 billion; 5% of that would be \$75 million, which would be around a 12% cut. However, because EQIP already includes wildlife practices—and currently at least 5% of EQIP is already going towards wildlife practices, we run the very real risk of losing the additionality of WHIP. Already, WHIP has over 500,000 acres in backlog that are not funded (as of 2010): the farm bill as written could effectively eliminate the WHIP program as we know it. A better solution to meet the needs to wildlife, should EQIP and WHIP be consolidated, is to provide for at least 8% of EQIP funds to go towards WHIP.

Maintain the integrity of the Conservation Reserve Program:

Since its creation in 1985, each year Conservation Reserve Program (CRP) has been responsible for reducing hundreds of millions of tons of erosion, and nutrient pollution into our nation's waterways. CRP is also an important reservoir for wildlife, and has had significant benefits for populations of ducks, grassland birds, and other species. We understand that high commodity prices, expiring acres, and the current fiscal environment are leading to pressure to re-examine the Conservation Reserve Program (CRP) acreage cap. We strongly urge the Senate Agriculture Committee to maintain an adequate CRP program to address soil, water and wildlife concerns across the landscape.

Additionally, while we support further compatible uses of CRP, such as expanded grazing, we call on members of the committee to oppose increased economic uses of the CRP that are incompatible with the program's focus on soil, water and wildlife conservation, as well as the penalty free early release of land enrolled in the Conservation Reserve Program (CRP). We request that timing and frequency of haying and grazing continue to be set according to the needs of grassland species in each region, under consultation with the U.S. Fish and Wildlife Service and state wildlife agencies. We support eliminating the requirement that materials generated by mid contract management activities be destroyed. Where such materials can be sold, as hay, biomass, *etc.*, it is more likely that needed management activities will be undertaken by contract holders.

CRP also promotes underlying economic benefits. Every year, hunters and anglers inject billions of dollars into rural economies throughout the country. The Congressional Research Service estimates that the Conservation Reserve Program averages around \$1.4 billion per year in monetized benefits, not including the value of benefits such as improved water quality and reduced loss of topsoil. The program plays a key role in providing habitat for wildlife and is critical for protection of the water quality. Each year, CRP prevents an estimated 600 million tons of nitrogen and 100 million tons of phosphorus from being released into the air and water. Additionally, by enrolling lands in CRP, the nation benefits from the sequestration of carbon dioxide. In 2010 alone, CRP lands sequestered 51 million tons of carbon dioxide.

Current high commodity prices have led some to call for a reduction in CRP acres or penalty-free releases for farmers with lands currently enrolled in CRP. Many justify this position by concluding those lands could be used to grow more commodities which would then help bring down the high cost of food. Unfortunately, that assumption fails to consider many details and completely ignores the cost of allowing CRP lands back into production. A 2008 USDA analysis concluded that allowing early release of CRP lands would impact corn prices by no more than \$0.27 per bushel and would result in little to no price impact for consumers. Unfortunately, releasing CRP acres would put so much more at risk. CRP acres protect highly-erodible lands from practices that would result in substantial soil erosion and nutrient pollution. Additionally, CRP protects critical habitat for grassland birds such as the Lesser Prairie Chicken and Sharp Tail Grouse. CRP has played a vital role in keeping the Henslow's Sparrow off of the endangered species list. Also included in CRP are over 2 million acres of buffers that filter nutrients out of field run off before it enters waterways. All of these ecosystem services would be lost with an early release of CRP acres while the farmers would see little gain by farming these often marginal and highly-erodible lands.

Re-link conservation compliance to crop insurance:

Sodbuster and Swampbuster provisions, originally enacted as part of the 1985 Food Security Act, require agricultural producers to refrain from draining wetlands on their property and from farming highly erodible lands without a conservation plan if the producers wish to maintain eligibility for certain farm program benefits. These provisions have been widely credited with turning the tide for wetlands loss on agricultural lands and for preventing significant amounts of soil erosion. Yet this compliance was decoupled from the crop insurance program during the 1996 Farm Bill in an effort to make crop insurance more attractive. Now crop insurance is fast becoming the most important Federal benefit many farmers receive. Sixty percent

of the cost of crop insurance is covered by taxpayer funding. It is critical, therefore that producers be required to refrain from damaging activities if they want to receive this benefit. Compliance must be re-linked to crop insurance and disaster payments, and apply to all Federal agriculture program benefits. It will be very hard to justify the continued taxpayer investment in crop insurance if participants in the program are allowed to drain thousands of acres of wetlands and increase erosion running into waterways by farming highly erodible land without any conservation planning. In addition, Congress should consider expanding compliance to require tillage setbacks from streams, wetlands, lakes and rivers. Several states already have such provisions in state law. This will help prevent erosion and improve water quality and are common-sense practices all producers should follow.

Address nutrient pollution into the Great Lakes and other waters:

America's waters, including the Great Lakes and Chesapeake Bay, are facing a crisis. Algae blooms brought on by excess nutrients running into our rivers and lakes are suffocating fish and other aquatic organisms. Dead zones caused by these algae blooms are disrupting entire ecosystems as well as fishing and recreational industries that have defined the Great Lakes for hundreds of years. This has been a growing problem over the last 30 years. If we are to protect America's great waters, we must address the largest threat to its health and our wellbeing.

Fortunately, there are a number of solutions to nutrient pollution, each of which present not only solutions to protecting our water, but also provide ways for farmers to increase their profit margins. The National Wildlife Federation supports the innovative Regional Conservation Partnership Program that was included in the farm bill that passed out of the Senate Agriculture Committee. This program provides resources to leverage existing regional partnerships to most cost-effectively protect and restore great waters of the U.S. This program will help direct Federal resources toward well-developed conservation and restoration plans while leveraging state and private resources to maximize total impact in on the ground conservation efforts.

Support an Effective Biomass Crop Assistance Program:

The Biomass Crop Assistance Program (BCAP) assists producers with the cost of establishing crops to be used in a biomass facility, plus annual payments to help compensate for lost income while the crops are established. The program also provides cost-share payments for collection, harvesting, storage, and transportation of biomass. The annual payments portion of the program has only begun to be implemented over the past 2 years, but producers have already successfully begun establishing next generation feedstocks under this portion of BCAP. This annual payments portion of the program is critical to support development of the next generation of biofuels and bioenergy, and the National Wildlife Federation urges the House Agriculture Committee to support next generation bioenergy by continuing funding to this portion of the program. NWF supported the Conrad-Lugar amendment to the Senate Agriculture Committee's bill. The amendment, which passed with almost full support from the committee, provides almost \$200 million for BCAP over the next 5 years. NWF also supports limiting the collection, harvest, storage, and transportation portion of BCAP to no more than 10% of the program. With limited funds going towards BCAP, the annual payments portion of the program should be prioritized.

Currently, BCAP includes a prohibition on using project area funds to plant "any plant that is invasive or noxious or has the potential to become invasive or noxious, as determined by the Secretary, in consultation with other appropriate Federal or State departments and agencies." Unfortunately, several early efforts to reauthorize the program left out the proscription on use of "potentially invasive species in the program. As research on next generation bioenergy crops is rapidly progressing, there are many non-native and GMO crops that are being proposed for use as bioenergy crops, many of which have not been used in this country before, and the invasive potential of these crops must be evaluated. It takes a long time to list something as invasive, and since many of these plants have not been used here before, they are unlikely to have been listed as invasive. There are plenty of species that have not been officially listed as invasive or noxious that are still of significant concern. Without the 'potentially invasive' clause, they will not have to go through the same review that they go through now, and we may be inadvertently funding a highly invasive plant that could spread from establishment sites and become a nuisance on nearby farms, rangelands, or natural areas. The Conrad-Lugar amendment to the Senate Agriculture Committee's 2012 Farm Bill further clarifies the term 'potential to become invasive or noxious' by prohibiting: "any plant that is invasive or noxious or species or varieties of plants that credible risk assessment tools or other credible sources determine are potentially invasive, as determined by the Secretary in consultation with other appropriate Federal or State departments

and agencies.” NWF urges the House Agriculture committee to continue to prohibit BCAP dollars from funding the planting of potentially invasive species, either through the clarified language or the language that is currently in law.

Conclusion

Thank you again for the opportunity to submit these comments. The 2012 Farm Bill presents both great challenges and great opportunities. We look forward to working with Chairman Lucas, Ranking Member Peterson and the rest of the members of the House Agriculture Committee to ensure strong conservation and energy provisions that will protect our air, soil, water and wildlife habitat.

Comment: Statement on the 2012 Farm Bill

March 2012

Arkansas Soybean Association and American Soybean Association

*The information referred to is retained in Committee file.

Reasons for a Farm Program Safety Net

Soybean farmers believe an income safety net is essential for production agriculture. Critics of farm programs argue that agriculture is no different from other businesses, so why should the government support it? They also point to the historically high commodity prices we have enjoyed in recent years and say it's time to eliminate or phase out these programs.

To the first point, U.S. agriculture has always been and remains based on the family farm as the economic unit of production. As individual businesses, we compete not only with farmers in South America and other countries around the world, but with our neighbors and producers across the country.

Programs to ensure food production in the U.S. is stable and produced in large enough quantities to meet demand are important to our nation. We do not want to become dependent on imports for our food. We should support agricultural production in the U.S. to continue meeting our food needs and to increase our production of renewable fuels, such as ethanol and biodiesel. With one out of every 12 U.S. jobs tied to agriculture, a positive trade impact by farm products, renewable fuel production, plus the security of a large portion of our country's food supply grown domestically, it quickly becomes apparent that farming is an essential asset for our nation's economy and security. Numerous factors such as government policies that restrict trade, surplus global production, and unfavorable weather all negatively affect our farmers' ability to operate profitably. Government support for risk management and crop insurance programs is a necessary investment to protect our country's valuable asset.

Regarding current price levels, farmers all remember 1995 and 1996, when prices were relatively high and Congress decided to phase out the target price program to reduce costs. Three years later, prices for most commodities fell sharply due to global oversupply and reduced demand. By 2001, prices were down an average of 45 percent for major commodities, and Congress had to step in to provide emergency assistance.

Without that assistance, many U.S. soybean farmers would have gone out of business. The reality in farming is that markets are cyclical. We need a safety net, not to pay us year-in and year-out, but to keep us in business when, through no fault of our own, we can't make ends meet.

Farmers want to make their living from the market, not from the government. We support policies that allow and encourage us to respond to market signals, and which provide assistance only when the economics of farming are so negative that we have no other recourse. We believe we perform a vital service in providing our country and a growing world with an abundant supply of high quality food, feed, fiber and fuel at reasonable prices.

Background on Past and Current Farm Programs

To underscore this statement, we would like to provide some background on how farm programs and policy have become increasingly market-oriented in recent years. In 1981, the prevailing thinking was that, as the world's largest exporter of major commodities, the U.S. could support prices by idling productive farmland and diverting surpluses into farmer-owned reserves. In order to be eligible for payments under the old Target Price program, we were restricted to growing crops on acreage bases determined for each farm. Moreover, we had to grow those crops in order to receive these payments.

This policy resulted in planting distortions and overproduction of crops already in surplus, further depressing prices and shifting increasing quantities into reserve. It prevented farmers from responding to market signals that called for greater production of crops which did not have acreage bases, including soybeans. And it made the U.S. the supplier of last resort, as competitors in Europe and South America increased production and exports, knowing that our crops would be held off the market until prices rose above world price levels.

This policy remained in place until 1996, when Congress enacted the landmark "Freedom to Farm" legislation. Under "Freedom to Farm," the government safety net was decoupled from planting decisions, and producers were allowed to plant any program crop on their farm. The result has been a return to competitiveness and greater profitability for U.S. agriculture. In response to increased global demand, soybean plantings rose from 60 million acres in 1995 to 75 million acres in 2010. Most producers have wholeheartedly supported the planting flexibility provided under the last three farm bills. For soybeans, which have relatively modest supports under the Marketing Loan and Counter-Cyclical Payment Programs, maintaining planting flexibility is of paramount importance.

Position on Commodity Programs

Soybean farmers recognize that deficit reduction is a national priority, and that agriculture should do its fair share in helping to bring down Federal spending. We supported the deficit reduction efforts of leaders in both the Senate and House Agriculture Committees last fall, when they committed to cut \$23 billion from the cost of the next farm bill. We believe this level of cuts will still allow the Committees to write new farm legislation that continues to provide an adequate safety net to producers.

We also recognize that cuts in the commodities title will come from elimination of the Direct Payment program, and that existing programs will need to be restructured. While Direct Payments to soybean producers are not as significant, proportionate to crop value, as payments to producers of other crops, this program has been the cornerstone of planting flexibility for the past 15 years. However, since payments are made regardless of price levels, and prices have been historically high for several years, Direct Payments have become untenable in the current budget environment.

As ASA looked at program alternatives to help farmers manage risk, we concluded that the best complement to income protection under the existing crop insurance program would be a revenue-based program that partially offset losses that exceed a specified revenue threshold. This approach would make significant changes to but is similar to the current ACRE program, which has had limited participation due to its complexity, reductions in Direct Payments and Marketing Loan rates, and a state-level revenue-loss trigger. ASA supports a single farm-level trigger under which producers would be required to document losses on a commodity-specific basis, so payments would be made only when actual losses occur. This requirement would address criticism that payments under current programs are made regardless of commodity prices and yields. We also support a revenue loss requirement under this program of not less than 10 percent, and a coverage band not to exceed 15 percent.

While payments under this program would be tied to actual production in the current year, we do not believe it will distort planting decisions and production. Requiring farmers to document actual losses in order to receive revenue payments would be a significant deterrent to "planting for the program" rather than following market signals. Additionally, using moving Olympic average prices as part of the revenue threshold calculation would make the program responsive to market price movements over time. Finally, revenue payments would only be made on a specified percentage of actual revenue losses that exceed a threshold loss, thereby further limiting the possibility of planting distortions.

We acknowledge that a revenue-based program may not be appropriate for producers of certain commodities, or in areas where yield variability is relatively low. We support providing flexibility or alternative programs for these producers, provided they do not have the potential to affect planting decisions and reduce planting flexibility. The argument may be made that, with prices expected to remain at historically high levels, the chance that fixed support prices tied to actual production could distort producer cropping decisions is relatively small. However, as pointed out earlier, we need go back no further than 1999 to 2001 to see how wrong such projections can be.

Opposition to Restructuring Crop Insurance

ASA also strongly supports the existing crop insurance program as the foundation for risk management under the farm safety net. Soybean producers actively participate in crop insurance, and repeatedly express opposition to any restructuring of the program or reductions in its baseline for deficit reduction. We applaud the decision by the leaders of both the Senate and House Committees last fall to leave crop insurance untouched in developing a farm bill proposal that met your deficit reduction target.

ASA opposes making crop insurance premium subsidies subject to payment limitations, or subjecting crop insurance participation to conservation compliance requirements. These provisions are appropriately applied to eligibility for farm program benefits. Tying either to crop insurance would discourage participation in the most important risk management program for soybean producers.

We would like to reemphasize the importance of maintaining planting flexibility and avoiding the possibility of planting distortions under any alternative programs the Committee may consider in restructuring the farm safety net. Analysis and modeling by noted agricultural economists show the potential for planting distortions under some alternative farm program policy options, as well as the potential for the United States to exceed its WTO commitments as a result of these farm policy options under a low price scenario where prices fall 15 percent per year for 3

years from current levels. The avoidance of farm program-induced planting distortions and allowing producers to respond to markets while managing risk has been the most valuable policy provided under the current farm program and must be maintained.

Attached to this statement is an annex that provides personal experiences from several members of the American Soybean Association Board of Directors on past and current farm programs.

Position on Conservation Programs

ASA supports the framework of the Conservation Title put together for the Joint Select Committee on Deficit Reduction. That framework, as we understand it, consolidates the existing 23 conservation programs into 13. ASA members support efforts to focus scarce conservation funding on working lands conservation rather than on land retirement under the Conservation Reserve Program (CRP). CRP enrollment should be reserved for the most environmentally sensitive land. We also believe the complexity and labor-intensiveness of conservation programs is a serious issue that has limited farmer participation in these programs. We hope that simplifying and consolidating important conservation tools into fewer, more flexible programs will increase the participation of soybean farmers in USDA conservation programs.

Position on Agricultural Research

ASA supports robust funding for USDA research programs, which are critical to achieving the agricultural production levels necessary to feed 9 billion people and to remain competitive in a global economy. ASA strongly supports reauthorization of the Agricultural Food and Research Initiative (AFRI) with appropriations authorized at \$700 million annually. AFRI is the Nation's premier competitive, peer-reviewed research program for fundamental and applied sciences in agriculture. We recognize that AFRI funding has fallen well short of levels authorized in the 2008 Farm Bill and will continue to advocate full funding in the appropriations process.

ASA also supports reauthorization of provisions that support research at land-grant universities.

Position on Energy Programs

There are several Energy Title programs in which soybean producers have a strong interest, including the Biobased Market Program (Section 9002), the Biodiesel Fuel Education Program (Section 9006), and the Bioenergy Program for Advanced Biofuels (Section 9005). ASA recognizes that the Energy Title programs do not have baseline funding beyond 2012, which creates a significant challenge to extending these programs and building on the benefits they have provided. However, the Biobased Market Program and the Biodiesel Fuel Education Program remain as high priorities for ASA and we believe that the relatively low cost and the benefits provided through these programs warrant their continuation with an increased level of mandatory funding.

Section 9002, Biobased Market Program: The Biobased Market Program continues and expands the Federal biobased procurement program and voluntary labeling program. This is an effective and important program for promoting the emerging biobased industry, which has significant potential to enhance agricultural markets, displace foreign petroleum and fossil fuels, and contribute new "green" jobs to the economy. Under the Biobased Market Program, USDA administers the BioPreferred Program, which is a preferred procurement program for all Federal agencies.

The Biobased Market Program received mandatory funding totaling \$9 million for FY 2008–2012. With the expansion of the BioPreferred and biobased labeling program, ASA supports providing increased mandatory funding for USDA to administer the programs and further promote biobased markets.

Section 9006, Biodiesel Fuel Education Program: The Biodiesel Education Program plays a vital role in helping expand marketplace acceptance and use of biodiesel as a low-carbon, renewable diesel replacement fuel. It supports technical outreach efforts to engine manufacturers, truckers, and fuel marketers that will eventually allow the use of higher biodiesel blends in conventional diesel applications. The education program serves to expand and increase market penetration, thus promoting growth for the entire industry. This translates into higher production, more jobs, and more economic value, especially in rural communities.

Specifically, the biodiesel education program had a large part to play in building automakers trust in, and support for, biodiesel blends. Since 2003, the industry has achieved great success in garnering support from engine manufacturers for biodiesel through the biodiesel education program. Currently, 34 major U.S. automakers and engine manufacturers accept the use of B5 and up to B20.

Biodiesel is providing energy, economic, and environmental benefits and ASA urges the continuation of this program with a relatively small investment of \$2 million annually in mandatory funding in the 2012 Farm Bill.

Position on International Trade Programs

ASA strongly supports maintaining full funding of both the FMD program and MAP at the current levels of \$34.5 million and \$200 million, respectively.

Through the World Initiative for Soy in Human Health (WISHH) and the World Soy Foundation, soybean farmers are committed to improving nutrition in populations suffering from malnutrition and poverty. We strongly support all U.S. food aid programs, and uses of food in development and emergency assistance to developing nations. While ASA recognizes that a plan to reduce deficit spending and debt may include across-the board cuts in the national budget, we oppose disproportionate reductions in development food aid programs.

Annex

Under the target price farm bill of the 1980's and early 1990's, we were forced economically to plant crops that require more tillage, such as cotton and peanuts, and had little to no ability to rotate. Under subsequent farm bills that are decoupled from bases, we are now able to implement rotations that reduce erosion and make more efficient use of our resources because we can develop better farming practices according to market signals.

WADE COWAN,
Brownfield, Texas.

In the late 1980's and until Freedom to farm legislation, we were required to plant all our corn base area in order to maintain our corn base and not lose government support. Our corn base was about 2/3 of our total area, and on some farms 100%—so we were 'required' to plant more corn than our best crop rotation plan for soybeans/corn would allow. The requirement to maintain base area caused us to plant more corn than the market indicated we would. It was a great relief when the Freedom to Farm legislation passed and we could plant the right crop at the right time.

RAY GAESSER,
Corning, Iowa.

In the 1980's and early 1990's, I planted cotton on all my allotment acres. Most of that time, cotton prices were fairly low, so we planted cotton hoping to break even on expenses and collect government payments for any profit we might have.

Into the late 1990's, I was still planting 75% cotton and 25% soybeans. Cotton yields were declining due to nematode infestations. It turned out that corn was the perfect rotation crop for this problem in cotton because the reniform nematodes could not grow on the corn roots. With decoupled payments, I was no longer tied to cotton production. I increased soybean and corn acres from 2001 to 2006, since they were more profitable. Beginning in 2007 and through 2010, I planted cotton again because market prices dictated that I needed to plant some. Through the 2000's, I chose the crops that were most profitable for me to plant based on market expectations, not due to government program payments as in the 1980's and 1990's.

DANNY MURPHY,
Canton, Mississippi.

I remember in the 1970's and 1980's, when strict adherence to base limitations was important, staff from the old ASCS (pre-FSA) would have to come out and measure what was allowed. Because of my desire to maximize the allowed program crops to be planted, split fields often were needed. For example, I might be allowed to plant some odd number, such as 52 feet, in the last corn field. And at times planting was delayed until this measurement occurred. Soybeans took the balance.

Later a tolerance factor was introduced, I think 5% was implemented, and most times we could make whole fields fit the allocation. What an improvement!

As we all know, the years of transition to planting flexibility have allowed farmers to focus on fields and crops as the priority, not arcane government bases which were established decades earlier.

ROB JOSLIN,
Sidney, Ohio.

When I started farming in the late 70's, I felt I had to plant corn to be protected against market fluctuations. The only real safety net at the time was the deficiency payment program, which was not available to oilseeds. Also at the

time, the conventional wisdom in the farm policy arena was that ‘corn was king.’ The meaning was clear that the national policy was screaming out the message to farmers that we needed more corn and coarse grains. I responded by planting all I was allowed and participating to the fullest extent of my eligibility.

The Freedom to Farm legislation in the mid-1990’s allowed me to keep that valuable corn base as a hedge against the loss of deficiency payment protection while at the same time chase market signals instead of farm policy. My crop rotation has benefited as well and I’ve been able to adjust plantings without fear of losing valuable crop acreage base history.

An Ohio farmer, forwarded by Rob Joslin.

COMMENT OF LAURA GLEASON

Date Submitted: Friday, May 18, 2012, 1:52 p.m.

City, State: Charlotte, NC

Occupation: Information Technology

Comment: Please support small farmers! They are small business owners, they produce great food, an essential part of life, and they do this for their local communities. Local farmers are key to better agriculture, better nutrition, and reduced impact on the environment. Thank you for your consideration.

COMMENT OF DONNA GLEESON

Date Submitted: Tuesday, May 15, 2012, 3:30 p.m.

City, State: Lebanon, NH

Occupation: Registered Dietitian

Comment: I recently read a quote by FDR which resonated with me:

“The nation that destroys its soil destroys itself.”

Industrial agriculture with its emphasis on genetic modification, pesticide use, and monoculture not to mention significant animal abuse is not only destroying our soil, but our health and our future.

COMMENT OF KAREN GLEESON

Date Submitted: Friday, May 18, 2012, 3:18 p.m.

City, State: Northport, ME

Occupation: Retired Social Worker

Comment: I am a home gardener and a vegetarian, who encourages local agriculture in my food buying. I want the food production in the U.S. to be subsidizing organic and zero-chemical agriculture. To use broad use chemicals as fungicides, insecticides and fertilizers is to (1) harm our planet and (2) create an untenable and unsustainable system that only increases the need for ever-more-harmful and expensive systems. Additionally, I do not want my tax dollars spent to encourage GMO crops. Over many millennia farmers have been innovating new crops and domestic animals. Now, however, we have crops whose only aim is to increase the profits for the chemical companies such as Monsanto and Dow. This cannot and should not be subsidized with our tax dollars, and in fact should be actively banned by our government.

I know from my own experience of my food coop and the Maine Farmland Trust, of which I am a member, that it is possible to sustain agriculture on ecologically sound lines, in a state where the winters are long and the growing season is short. We have been doing it for centuries. This is what the Dept. of Agriculture should be assisting to continue.

Thank you.

COMMENT OF ALLISON GLENNON

Date Submitted: Friday, May 18, 2012, 2:21 p.m.

City, State: Malibu, CA

Occupation: Writer/Filmmaker

Comment: Non-toxic food (food without pesticides or herbicides) is critical to a healthy life. We cannot keep eating poison and ignoring the long term degradation it has on our bodies.

COMMENT OF JESSICA GLINES

Date Submitted: Friday, May 18, 2012, 4:37 p.m.

City, State: Salt Lake City, UT

Occupation: Sales

Comment: I believe that we deserve the right to know what is in our food supply and have the opportunity to provide the food we feel is best for our families. I urge you to label GMO's and allow us to decide what we eat.

COMMENT OF CATHERINE GLOMSKI

Date Submitted: Friday, May 18, 2012, 11:26 a.m.

City, State: Hubbard Lake, MI

Producer/Non-producer: Producer

Type: Dairy

Size: Less than 50 acres

Comment: Dear Representative Dan Benishek:

Agriculture has been the steady segment of Michigan's economy and has been the rock in our nation's economy. It's funny, that the one business that has the most growth potential is one that also has the most consolidation and cuts. We need to invest food production and in new farmers.

We need you to speak up for Michigan, Debbie Stabenow isn't.

Thank you,

CATHERINE GLOMSKI,
Agricultural Entrepreneur.

COMMENT OF JACKIE GLOS

Date Submitted: Tuesday, April 24, 2012, 1:58 p.m.

City, State: Cambridge, MD

Occupation: Retail Sales

Comment: Farming is the most industry for without food we are once again at the mercy of foreign contaminates—God gave us this good Earth that our forefathers ventured to in Faith—that we might have plenty. With our technology we have been able to create food for impoverished countries that they might have food abundantly as well. Farming is our main source of Life well Lived. The life lessons of hard work and prayer are always found on our farms—Life cycles of animals and plants remind us of our realities and extend to other industries. God Bless the American Farmer.

COMMENT OF APRIL GLOVER

Date Submitted: Sunday, May 20, 2012, 1:24 a.m.

City, State: Los Angeles, CA

Occupation: Designer

Comment: We deserve to know what is in the foods we are putting into our bodies as well as have access to local grown meats and produce. It is appalling to me how large corporations are allowed to continue to treat animal in humanly, pump them full of antibiotics (which create super bugs), and pour pesticides all over our produce. The American people are becoming unhealthier and obese by the day. Its time for change!

APRIL GLOVER.

COMMENT OF MICHAEL GNAT

Date Submitted: Friday, May 18, 2012, 4:25 p.m.

City, State: Brooklyn, NY

Occupation: Actor—Editor

Comment: The farm bill should support local farmers, not huge agribusinesses, and promote the growth and distribution of healthful & natural food products.

COMMENT OF MARY GOCHER

Date Submitted: Friday, May 18, 2012, 4:26 p.m.

City, State: New York, NY

Occupation: Actor

Comment: I am extremely concerned about cutbacks that would reduce the food stamp program or any measure that would adversely impact the poor, the disabled, children and the elderly. Please make sure that there is no reduction in benefits to this vulnerable segment of our society.

Thank you.

COMMENT OF GALEN GOCKEL

Date Submitted: Saturday, May 12, 2012, 1:01 p.m.

Occupation: Retired Educator
Comment: Please fully fund Emergency Food Programs and the SNAP program. These are humanitarian programs, but also important to the general economy.

COMMENT OF MARCIA GODICH

Date Submitted: Friday, March 16, 2012, 6:41 p.m.
City, State: Trafford, PA
Occupation: Retired University Professor
Comment: I believe that a distinction needs to be made: statistical and anecdotal evidence shows that the aim of small farmers is to support their families through their farms—which means they have to care about the long term health of their farm and the quality of their products; agribusinesses, on the other hand, have the bottom line of immediate profit to their stockholders as their goal, often running counter to the long term or health or safety of either the farms or those who buy their produce. Since the role of the Federal government is to protect its citizens, not merely minority interests (who have more than enough reserves, if their profit reports are anything to go by!) Since large corporations operate (in their own terms!) on the premise of capitalist enterprise, they should expect to survive or fail by their own efforts. Government should limit its support to small farmers, to offer disaster relief and incentives toward the use of sustainable, humane methods, maintenance of genetic diversity rather than genetic modification, minimization of the use of antibiotics, hormones, or other chemicals.

COMMENT OF JUDY GOEBEL

Date Submitted: Saturday, May 19, 2012, 4:18 p.m.
City, State: Richfield, MN
Occupation: Retired
Comment: We need sustainable agriculture that supports families, not big corporations. To achieve that, we need to get rid of subsidies for agrobusiness. We need to stop letting gmo plants become part of our food stream.

COMMENT OF MICHAEL GOEBEL

Date Submitted: Friday, May 18, 2012, 12:26 p.m.
City, State: San Marcos, TX
Occupation: Doctor
Comment: Monsanto needs to be shut down, and the board jailed for biological crimes. The pollution of the biosphere by their GMO-crop pollen is a global crime against humanity and many other species. **Of Course** organic foods should be natural, organic, and so labeled!

COMMENT OF JOHN GOECKERMANN

Date Submitted: Friday, May 18, 2012, 1:28 p.m.
City, State: Grants Pass, OR
Producer/Non-producer: Producer
Type: Forestry
Size: Less than 50 acres
Comment: Just be sure to protect water supplies for migratory birds—do not steal water for potatoes from the Klamath bird refuge . . . There are no endangered potatoes, but the Pacific Flyway is crucial to birds, and helps farmers by allowing birds to stay alive to eat the bugs that threaten crops.

COMMENT OF MARTIN GOEDKEN

Date Submitted: Friday, May 11, 2012, 6:59 p.m.
City, State: Conception Jct., MO
Producer/Non-producer: Producer
Type: Specialty Crops
Size: 50–150 acres
Comment: Please work toward a farm bill that invests in the next generation of farmers and ranchers—guarantee \$25 million per year in mandatory funding for the Beginning Farmer and Rancher Development Program. We need a national strategy

and commitment to support beginning farmer and ranchers entering agriculture. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new agriculture start-ups.

Also, please limit payments to the very large land owners. Thanks.

COMMENT OF ELIZABETH GOERTZ

Date Submitted: Saturday, May 19, 2012, 10:01 a.m.

City, State: Lewisburg, WV

Occupation: Food Sales/Gourmet

Comment: Please support organic farming practices. Our current large scale commercial farms are unsustainable and produce food that is low nutrition. This is a contributing factor in the poor health of Americans.

COMMENT OF LINDA GOETZ

Date Submitted: Friday, May 18, 2012, 2:30 p.m.

City, State: Santa Monica, CA

Occupation: Executive Assistant

Comment: I have developed many food allergies since the USA has allowed companies to create genetically modified foods. Dairy, corn, cruciferous vegetables—I have developed allergies since 1999. Please, keep our food **Real, Organic** and delicious. Apples and tomatoes taste like sand now unless they're organic. Bee populations are dying due to pesticide use. What will our grandchildren be eating?

COMMENT OF LAURIE GOGUEN

Date Submitted: Sunday, May 20, 2012, 4:27 a.m.

City, State: San Francisco, CA

Occupation: Chef

Comment: The farm bill must be overhauled. It must put the health of the land and the health of our people first. Organic, sustainable agriculture needs to get proper funding, and subsidies/insurance safety nets for commodity crops must be abolished. Crops like soy, corn and wheat are responsible for epidemics like obesity and malnutrition. Fruits and vegetables are what keep people healthy, and the farmers who grow these crops in an environmentally responsible manner should get the full financial support of our government. You want to keep down health care costs? Stop subsidizing corn, wheat and soy!

COMMENT OF GARY GOLDBERG

Date Submitted: Saturday, May 19, 2012, 6:33 a.m.

City, State: Richmond, VA

Occupation: Physician

Comment: Good nutrition is one of the basic components of good health and a fundamental human requirement in supporting the quality of life of a human being. This bill should be fair and should assure the greatest benefit for the most people in America. Please pay close attention and make this a bill that works to improve the quality of life of all Americans!

COMMENT OF HALINA GOLDBERG

Date Submitted: Friday, May 18, 2012, 9:17 a.m.

City, State: Bloomington, IN

Occupation: Academic

Comment: This set of laws was created under very specific circumstances and has served its purpose. We must reevaluate what works and what needs to be changed in order to make healthy food more available and affordable for people of all incomes and to allow farmers more choices in what they want/need to produce.

COMMENT OF SARAH GOLDBERG

Date Submitted: Monday, May 14, 2012, 4:18 p.m.

City, State: Pittsburgh PA

Occupation: Dispute Resolution Specialist

Comment: Please preserve the food assistance programs, SNAP, TEFAP, CSFP, and FFVP. These programs are to help our neighbors (and ourselves) in times of misfortune. When volunteering at the Squirrel Hill Food Pantry, I have seen people

wait in line for food made available through these programs. The elderly, the disabled, the job seekers, and the injured come to the pantry because their current circumstances mean that they and their families do not have enough to eat. While I am optimistic about our future, I know that anyone can find themselves in this situation. We have these programs to keep our community healthy so that individuals may recover from whatever misfortune has fell upon them and return to being productive members of our society. The United States did not welcome the tired, the poor, the homeless, or the tempest-tossed just to let them fall to tides of fate. These programs are not just expenditures, they are lifelines for our citizens. They should be a top priority for every state and accommodated in the budget.

COMMENT OF BIRDEE GOLDEN

Date Submitted: Friday, May 18, 2012, 1:39 p.m.

City, State: San Diego, CA

Occupation: AA in Surgical Pathology

Comment: Every day we see that there is a rise in cancer and disease, much, I believe, due to the foods we eat—some that can't even be called food. It's time for a change. We need to get back to eating real, unprocessed, whole foods again. When my mother grew up on her parent's farm, no pesticides or GMO seeds were used and they had a high yield as long as they got rain. Food was called organic then—it was just food. What we are getting now is disgusting.

COMMENT OF GABE GOLDEN

Date Submitted: Saturday, May 19, 2012, 1:49 a.m.

City, State: San Diego, CA

Occupation: Film Producer

Comment: How can you in good conscience allow subsidies to corporate farmers who grow nothing but a few crops while cutting \$33 billion from food stamps. Why not diversify our food supply by stopping big agriculture businesses from using genetically modified crops, and demand healthy soil and diversity in agriculture. They want a subsidy? Make them earn one by producing actual food. Should the U.S. really only grow corn that is turned into sugar that makes people obese and adds billions to our health care crisis. This cycle of insanity must stop.

COMMENT OF HELEN GOLDENBERG

Date Submitted: Saturday, May 19, 2012, 2:55 p.m.

City, State: Tamarac, FL

Occupation: Retired

Comment: Let's make farm policy to support small local family farm operations and operators. Let's support conservation of important lands for future generations. Let's try to support organic operations wherever possible so we don't have to ingest lots of pesticides and other chemicals. Thank you.

COMMENT OF LAURA GOLDENBERG

Date Submitted: Friday, May 18, 2012, 9:38 p.m.

City, State: Sebastopol, CA

Occupation: Marriage, Family Therapist

Comment: I belong to a community sustainable agricultural group and get weekly vegetables grown organically and sustainably in our local neighborhood. We save on gas through trucking food far distances, and we have varieties of food that you cannot get from GMO seeds. Please preserve small family farms, the heart of our country, and please protect us and future generations by not polluting seeds and crops with strains of GMO that we cannot fully know the repercussions of. Please represent the people and not large corporations. We need you and depend on you to represent us and not lobbyists for large moneyed interests.

COMMENT OF PAUL GOLDMAN

Date Submitted: Friday, May 18, 2012, 7:36 p.m.

City, State: Las Vegas, NV

Occupation: Owner, Small Business

Comment: Please help your fellow Americans have access to a healthful food supply. We work hard, pay our taxes, help our families/friends/neighbors and just want food that doesn't contribute to the increased rates of asthma, diabetes and obesity in our children! Thanks.

COMMENT OF RAY GOLDSBERRY

Date Submitted: Friday, May 18, 2012, 3:12 p.m.

City, State: Lowry City, MO

Occupation: Retired Farmer and Construction Worker

Comment: My feeling is that too much money is going to support the large producers that do not even live or work on a farm at the expense of the small farmer. The same formula used to support the small business should be used for farming. The small family farms of 300 acres or less should be the ones to get the help from the farm bill. Also the people raising GMO crops should be completely eliminated from receiving any subsidies at all. These crops are responsible for destroying the bee population as well as having detrimental effects on the health of people because of the pesticides. If the bees are destroyed there will be no food period. Please think about the importance of your decisions to the future of the U.S.A. instead of the large companies that have almost taken over the farming industry. Thanks for your consideration.

Sincerely

RAY GOLDSBERRY.

COMMENT OF BRUCE GOLDSMITH

Date Submitted: Friday, May 18, 2012, 12:54 p.m.

City, State: Temple, GA

Occupation: Software Manufacturer

Comment: We need safe, organic, non GMO, well labeled food. organic fields must be kept safe from contamination caused by deregulation of dangerous food experiments. Please support local and family farms!

COMMENT OF CATHY GOLDSMITH

Date Submitted: Friday, May 18, 2012, 10:47 p.m.

City, State: Berkeley, CA

Occupation: Baker, Cooperative Retail Food Vender, Café Owner

Comment: There is no single issue more important than how we feed our children. Mono cultures and pesticides will destroy our health and the health of future generations. Do the right thing and pass a farm bill that rewards good environmental practices, provides healthy lunches to our school children, and supports family farms.

COMMENT OF JOAN GOLDSTEIN

Date Submitted: Saturday, May 19, 2012, 5:00 p.m.

City, State: New York, NY

Occupation: Meditation Teacher/Writer

Comment: No GMOs, organic gardening, and support of health supporting farming and food rather than the food that is mass produced with no respect for the American people whose health is being badly affected by food additives and the effects they're having on the American public, especially on their children. The "mysterious" outbreaks of ADD, Asbergers, autism and other brain challenging diseases. Along with asthma, lactose intolerance is coming from foods that have been altered by tremendous greed, *i.e.*, growth hormone for cows to produce more milk which not only affects the cows by transferring the hormones into the milk we drink, but also affects the udders by causing infections them with constant milking. The result of the infections is requires antibiotics to kill the infections to the udders caused irritations from over milking . . . and the beat goes on . . .

COMMENT OF SUSAN GOLIGHTLY

Date Submitted: Friday, May 18, 2012, 2:28 p.m.

City, State: Silver City, NM

Occupation: Retired

Comment: People have a right to know where their food comes from and how it was produced. And, most of all, they should be able to know what has been added to the food. Being able to grow or buy healthy whole foods should be a God given right.

COMMENT OF CARISSA GOMEZ

Date Submitted: Tuesday, May 15, 2012, 12:06 p.m.

City, State: Chicago, IL

Occupation: Communications and Development Manager, Feeding Illinois

Comment: Dear House Agriculture Committee Members,

Feeding Illinois appreciates the opportunity to provide comments on the farm bill. As the state association, Feeding Illinois' eight food banks distributed 120 million pounds of food through a network of 2,000 pantries, soup kitchens and shelters to an estimated 1.4 million people in Illinois in 2011. Currently, 11.1 percent of households in Illinois are food insecure, including 745,310 children in Illinois—23.3 percent of all children in the state. Our food banks served 61 percent more people at our pantries in the last fiscal year than the previous 3 years, and we could not provide current levels of food assistance without significant support from TEFAP, nor could we meet increased demand if current funding levels and structure of SNAP and other Federal nutrition programs were eroded.

We urge the House Committee on Agriculture to protect and strengthen SNAP in the farm bill, and keep in mind the following priorities:

- Oppose proposals to cap or reduce funding for SNAP, restrict eligibility, reduce benefits, or otherwise reduce access or participation in SNAP.
- Protect the adequacy of the SNAP benefit by restoring the cut to the ARRA SNAP benefit increase.
- Adjust the benefit amounts in a timely manner so it reflects current food prices at the time of purchase.
- Increase the minimum benefit so that elderly households receive at the least an amount equivalent to the floor set in the 1970s.
- Fully allow SNAP benefits to be adjusted when high housing costs consume more of a family's income.
- Improve earnings disregards and other benefit computation rules.
- Extend the program to needy people now excluded from benefits by arbitrary eligibility rules.
- Allow all states to operate Supplemental Security Income (SSI) CAP model that seamlessly enrolls SSI recipients into SNAP, and encourage other data matching initiatives.
- Provide adequate resources to states and community partners for administration of SNAP and outreach and nutrition education by restoring a greater Federal share in administrative expenses and enhanced Federal matches for state investments in operational improvement.
- Encourage better nutrition by maintaining nutrition education provisions and ensuring that retailer standards balance adequate access to stores with a range of healthy foods and moderate prices, as well as equipping all farmers' markets with EBT capability.

We also urge you to strengthen TEFAP and CSFP in the farm bill. Please include an increase in mandatory funding for TEFAP foods by providing a trigger that increases the funding level available for commodity purchases in times of high unemployment, and make TEFAP Storage and Distribution funds mandatory. In addition, we ask that the Secretary of Agriculture is given the authority to make bonus commodities available in times when unemployment rates are high. We also encourage the Committee to transition CSFP to a seniors-only program, while grandfathering in current participants, and expand eligibility for the program from 130% to 185% of the Federal Poverty Line.

Once again, thank you for this opportunity to provide comments on the importance of Federal nutrition programs like SNAP, TEFAP and CSFP in the farm bill.

Sincerely,

CARISSA GOMEZ,
Communications and Development Manager,
 Feeding Illinois,
 [Redacted],
 Chicago, Illinois.

COMMENT OF HILDA GOMEZ

Date Submitted: Friday, May 18, 2012, 5:13 p.m.

City, State: Tucson, AZ

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: We are Bee Keepers and our business is greatly pachers by the use of GMO's and pesticides. Please ban these two evils in the USA. We can look out after ourselves without the use of GMO's and pesticides.

COMMENT OF CAREN GONTARD

Date Submitted: Friday, May 18, 2012, 10:14 a.m.

City, State: Paonia, CO

Producer/Non-producer: Producer

Type: Livestock

Size: Less than 50 acres

Comment: As a biodynamic farmer in the arid West, I have grave concerns about the heavy weight given to Big Ag in our national farm policies. Small producers and particularly non-GMO and organic producers are critical to the health and security of our nation both from a food production view and energy and water security. We **Must** stop subsidizing big ag and we need strict labeling of **All** GMO products. People have a right to know and a right to choose.

COMMENT OF ANTHONY GONZALES

Date Submitted: Wednesday, May 09, 2012, 9:52 p.m.

City, State: Dayton, NV

Occupation: Construction

Comment: I'm very shocked that we would allow farm bill that would reduce SNAP benefits by \$36 billion. I believe that we can help the ones that are in need and that making a difference in their effects everyone. I don't think we would even do this to a third world country that asked for help. I know that we would give them the food they need. But I see when it comes to our fiends and neighbors and people I care about we can just tell them Sorry we have to cut the program because? I would not have a good enough answer to give them. I would have to walk away in shame that I could not help a fellow American.

COMMENT OF CHRISTINE GONZALES

Date Submitted: Tuesday, May 15, 2012, 11:39 a.m.

City, State: Longmont, CO

Occupation: Teacher

Comment: Feeding the poor should be our number one priority. Making healthy, organic and inorganic fruits, vegetables, and dairy affordable for modest-income folks should be our second priority.

COMMENT OF CRYSTAL GONZALES

Date Submitted: Sunday, May 06, 2012, 4:33 p.m.

City, State: Bernalillo, NM

Occupation: Not Employed

Comment: So many people have lost their homes and still more are going homeless. So many things have been taken away from the needy. Don't cut their food supply short too. This is outrageous. The rich get richer and the poor starve while giving the rich more money.

COMMENT OF FRANK GONZALES, JR.

Date Submitted: Friday, May 18, 2012, 9:59 a.m.

City, State: Plymouth, MI

Occupation: Retired Engineer

Comment: Let's concentrate on what makes for good nutritious food for our citizens and what's good for our environment rather than what makes the producer the most money!

COMMENT OF AIDA GONZÁLEZ

Date Submitted: Thursday, May 17, 2012, 2:06 p.m.

City, State: Putzcuaro Michoacán, Mexico

Occupation: Art Teacher

Comment: I live in Putzcuaro, Michoacán State, in Mexico, and all the people in here would love to keep our soil free of pesticides and poisons that Monsanto try to sell in our country. There is a brave community in here called Cheran and their

people are consciously protecting our original corn so all this new corporations won't ruin it with the transgenic seeds they try to introduce in our country.

We would also love to see the end of arms business, selling to both, our government and the mafia in here. The result is 70,000 people killed in 6 years.

Blessing for you and all the people working for the change.

COMMENT OF CYNTHIA GONZALEZ

Date Submitted: Friday, May 18, 2012, 12:34 p.m.

City, State: Louisville, KY

Occupation: Education Administration

Comment: As a mother of two and proud KY native who buys organic and local as much as I am able, I need to see some serious commitment on the part of our governing entities to protect the food supply—from the small, family farms to the mass production system. There are dangerous trends in this country that appear to be driven by greed rather than protecting the public interest. That is a huge disconnect for me.

Please consider your own children as you evaluate these decisions . . . and your mother, your grandmother, those you love. We should all have access to food that nourishes.

COMMENT OF KATIE GONZALEZ

Date Submitted: Friday, May 18, 2012, 1:00 p.m.

City, State: Meridian, ID

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Fresh Local Food is very important to our health and the health of our communities. I value knowing what I am eating, where it came from and even who grew it! Please support local farmers, local economies and the preservation of our food systems!

COMMENT OF NICOLE GONZALEZ

Date Submitted: Friday, May 18, 2012, 12:45 p.m.

City, State: Evanston, IL

Occupation: Retail Buyer

Comment: Please protect our food ways, farms, and health from the bottom lines and toxic decisions of big corporations. The way we eat today determines who we are as a nation, tomorrow. Thank you.

COMMENT OF WILLIAM G. GONZALEZ

Date Submitted: Thursday, May 17, 2012, 4:10 p.m.

City, State: Suffern, NY

Occupation: Student

Comment: Thursday, May 17, 2012.

United States House Representative Members:

By this means I would like to ask the Honorable House of Representative Members to consider providing educational incentives to new farmers and beginner farmers, so they can achieve a higher education in agriculture, at Colleges and Universities in the United States. Also, to provide rural farming educational grants/scholarships for their children so the coming generation will secure the future in agriculture. Finally, I want to ask the Congress the implementation of farming financial moratoriums as insurance for those farmers that can be severely affected by climate changes (drought, tornadoes, floods, fires, *etc.*) Thank you, for attending this message.

COMMENT OF AIMEE GOOD

Date Submitted: Friday, May 18, 2012, 6:47 p.m.

City, State: Brooklyn, NY

Producer/Non-producer: Producer

Type: Field Crops

Size: 1,000+ acres

Comment: Dear House Agricultural Committee:

I grew up in Aroostook County, Northern Maine, the daughter of a 4th generation potato farmer, Thomas Good, who is still farming 700 acres of potatoes today on our 1,300 acre farm.

I now live in New York City, **And** have begun to farm an acre of organic garlic on my childhood farm in Aroostook County with plans to expand production on my 40 acre parcel.

I split my time between Maine and New York City and see the crucial importance of programs like the EQIP Transition to Organic program which I participated in to get my organic certification through the Maine Organic Farmers and Gardeners Association in 2011.

This farm bill must support the development of local, regional food systems with the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286); support of new farmers and ranchers by the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), and I strongly urge the Committee to vote to Maintain the EQIP Organic Initiative; as well as fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

Thank you,

AIMEE GOOD,
Good Dirt Garlic

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I am a private producer for my family's survival. You must oppose all efforts to prohibit, complicate, poison, patent and capitalize that basic right. God gives food and sustenance! Men who interfere with that are Godless demons! Producing healthy food organically is a complicated task not an ignorant happenstance. Don't make it any harder, or illegal.

COMMENT OF ANNE GOODMAN

Date Submitted: Wednesday, March 21, 2012, 12:43 p.m.

City, State: Cleveland, OH

Occupation: President and CEO, Cleveland Foodbank

Comment: My name is Anne Goodman and I am the President and CEO of the Cleveland Foodbank. I am honored to be here representing food banks and agencies involved in the day to day fight against hunger, and I am grateful for the opportunity.

There are 200 food banks covering every county in the United States who are members of Feeding America. Together, we serve more than 61,000 pantries, shelters, soup kitchens, and other organizations that provide food directly to people in need.

That need is currently greater than ever. Demand continues to increase even as we've begun to see a decline in unemployment. We are seeing new faces. Many have run out of unemployment benefits, exhausted savings, or had to take jobs paying far less than they were making before the recession. They have turned to pantries, the SNAP program—or both—for help.

But while our ability to meet need has been tested, the effectiveness with which food banks and Federal nutrition programs have responded provides me with great hope. It's critical that we continue to support these programs to ensure their ability to meet immediate need. But it's important to note, these investments also reap long-term benefits, preventing the higher health, education, and workforce productivity costs associated with hunger and poor nutrition.

One of the greatest success stories of the recent recession is how effectively SNAP responded to protect families from hunger. SNAP expands in hard times, helping families buy groceries, and freeing up resources for other needs like rent, utilities, and transportation. SNAP is serving millions of people who can't find a job, can only find part-time work, or can't work because of a disability. Don't get me wrong, it's

still a struggle. On average SNAP only allows \$1.50 per person per meal. So in most cases, SNAP does not provide enough money to last recipients through the month.

There are also many people struggling to put food on the table who don't qualify for SNAP. In both cases, they turn to emergency food pantries to fill the gaps. Any cuts to SNAP benefits or eligibility would only increase the overwhelming need we're already seeing.

To illustrate this point, let me tell you about Cassandra, who has three children and is making \$11 an hour working full time, and is not eligible for SNAP. She takes home \$1,468 a month after taxes. She pays rent, utilities, puts gas in the car to get to work, and one of her children has asthma, requiring frequent doctor visits and daily medication. In Cleveland, her heating bills can go as high as \$200 a month during the winter. There is no room for error for Cassandra. No room for a muffler that needs repairing or a few days off from work to care for a sick child. She makes choices. One month she pays the electric bill, the next it's the gas bill. Food is a genuine luxury.

Because the Foodbank helped Cassandra supplement her meager food budget, she was able to pay both the electric and gas bills. Our food bank and the pantries we serve rely on The Emergency Food Assistance Program, or TEFAP, which supplied 27% of the food we distributed last year. TEFAP provides some of the most nutritious food we distribute, such as milk, green beans, and chickens. Unfortunately, unlike SNAP, TEFAP does not automatically grow when need grows. In fact, TEFAP actually declined markedly when we needed it most—falling 30 percent in 2011—because strong agriculture markets led to fewer bonus purchases. No other sources are increasing to fill that gap, and more Federal TEFAP support is urgently needed.

In addition to emergency food, we continue to develop programs to better meet our clients' needs. One of those areas is nutrition. In 2011, 28% of the food we distributed was produce. We are working on a project to allow local farmers to blast freeze their product and sell it year-round. A portion would be donated so our food bank could distribute frozen fruits and vegetables throughout the year.

Providing healthy food is important, but sometimes people don't know how to prepare it. I've handed out produce countless times where a client didn't know what to do with something like leeks or a turnip and passed it over. But, when we provide recipes and samples, people are informed and make different choices. We educate clients about how to grow, cook, and shop for healthy food on a limited budget. We use community gardens, tastings, and demonstrations to show the impact of nutrition on health and how good healthy food can taste.

Another area where we're evolving to meet our client's needs is the growing senior population. We deliver food boxes to several senior programs through the Commodity Supplemental Food Program. I talked to a woman at one site about how hard it is to take 2 busses to get to the nearest grocery store. Even then, she was only able to carry two bags home. When we could distribute the CSFP food package to her once a month it was a God send.

I've spent time with her, and I wish you could too. I urge each of you to visit your local food bank. Decisions that are small numbers in the Federal budget have such an impact on real people.

Feeding the hungry is not a partisan issue—it is a collective responsibility, indeed a moral responsibility. We have the power to make sure people like Cassandra don't have to choose between food and heat for her family, and that an elderly woman isn't home alone without groceries.

With our nation focused on deficit reduction, I am here to plead with you not to cut these programs. I urge you instead to make small, targeted investments to enable food banks like mine to better meet the need. With that, I offer these recommendations.

Protect SNAP from cuts and harmful policy changes. This program is working as intended to provide benefits that are timely, targeted, and temporary. I can tell you for certain that charity could not make up the difference if SNAP benefits or eligibility were cut.

Increase the funding for mandatory TEFAP, and set aside a portion of the specialty crop purchase requirement to go specifically to food banks. The farm bill should also clarify USDA's authority to make TEFAP bonus purchases when the need for food assistance is high, not only when agriculture markets are weak.

Finally, make CSFP a seniors-only program like we did in Ohio and which it already is in practice. Nearly 97% of participants are seniors.

Let me close by telling you about a special woman who has been visiting a food pantry for several months. She sent us a check for \$5 over the holidays. Even with scarce resources, she made the sacrifice because she wanted to do her part.

I am confident that even in a time of limited resources, we too can make decisions that reflect our shared value of helping our neighbors in need.

Thank you again for your time.

COMMENT OF ARIFA GOODMAN

Date Submitted: Friday, May 18, 2012, 2:36 p.m.

City, State: San Cristobal, NM

Occupation: Psychological Counseling, Retired

Comment: Dear members of the House Committee on Agriculture:

I ask you to support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Big Agribusiness has a stranglehold on how food is produced in America today, to the detriment of our soil, water and air and destructive to our health. The current policies of the government, designed by and beholden to the Agribusiness industry (bio-engineering/pesticide companies), are harmful to small family farmers, essentially wiping out a way of life that has been the foundation of rural America. It is clear that returning to organic agricultural practices will provide high yields without the high levels of toxicity we are now releasing into our environment and into our bodies. With a return to sound organic agricultural practice, health costs will decrease as environmentally caused cancers decrease, and our soils and rivers will be renewed and replenished, supporting vibrant and healthy eco-systems. It's time to put the interests of the people and the land above the interests of the biochemical agriculture industry.

Thank you.

COMMENT OF ELLEN GOODMAN

Date Submitted: Friday, March 16, 2012, 8:34 a.m.

City, State: East Providence, RI

Occupation: Retired College Professor

Comment: First, I support my local food bank, and I know they are struggling right now to meet the needs of my community. I ask that you pass a strong farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the millions of Americans struggling with hunger, and I urge you make them a priority in the next farm bill.

Also, I urge you to invest in small, sustainable agriculture that employs organic farming methods. We need to diversify the dominant areas supported by the government. We need NO monoculture, much less dairy and cattle, less soy, less corn. Our current big agricultural farming methods are depleting the soil and reducing the nutritional value of our foods.

Finally, farm animals need humane treatment. The horrific lives of factory farm animals cannot help but deplete food value. I urge you to support bans on battery cages and confinement crates. I urge you to curb the influence of the dairy and cattle lobbies. Please work to strengthen organic, humane, and small, sustainable farming methods.

Thank you for your consideration.

Sincerely,

ELLEN GOODMAN.

COMMENTS OF MARGARET GOODMAN

Date Submitted: Saturday, April 07, 2012, 5:20 a.m.

City, State: Glen Mills, PA

Occupation: Retired Computer Programmer

Comment: Please help and encourage farmers to grow sustainably without GMO crops. Factory food is not nutritious!

Date Submitted: Friday, May 11, 2012 12:51 p.m.

Comment: I want SNAP, TEFAP, and CSFP protected. Help us build a movement to protect and strengthen programs that put food on the table for hungry Americans! Our country's security is in jeopardy if its populace is hungry.

COMMENT OF HEATHER GOODWATER

Date Submitted: Friday, May 18, 2012, 5:22 p.m.

City, State: Minneapolis, MN

Occupation: Student

Comment: As you consider this farm bill, please support local and organic consumers as they are vital and integral to the community, environment and our health.

COMMENT OF KAREN GOODWIN

Date Submitted: Friday, May 18, 2012, 5:45 p.m.

City, State: Chico, CA

Occupation: Nutrition Educator

Comment: I favor a farm bill that promotes fruit and vegetable consumption and production in a sustainable, environmentally supportive way. We need to encourage young people to become farmers. This bill should support variety in farming, not mono cropping. Local production and direct access to consumers must be emphasized. More jobs can be created if the production and distribution is focused on smaller producers.

COMMENT OF ALEXANDRA GORDON

Date Submitted: Thursday, May 03, 2012, 11:26 a.m.

City, State: Miami, FL

Producer/Non-producer: Producer

Type: Fruits, Greenhouse/nursery

Size: Less than 50 acres

Comment: We need a strong Farm Bill—one that protects and strengthens programs like TEFAP, SNAP, and CSF. We also think it's time to stop subsidies to large corporate farms and start helping small farmers. Please rethink subsidized food aid overseas that wastes \$ on shipping and hurts local markets.

Thank you.

COMMENT OF GLORIA GORKO

Date Submitted: Friday, May 18, 2012, 4:40 p.m.

City, State: Eastpointe, MI

Occupation: Unemployed Admin. Assistant

Comment: Big agricultural businesses have ruined our farming in the last 15+ years to say the least. Bayer and Monsanto should be held accountable for poisonous food, bad soil, water, and air. And the USDA should be ashamed that in America our food is so poor in nutrition. We're in the 21st Century only by the calendar, our lack of moral/civil responsibility to the land and people is unprecedented in history.

COMMENT OF JANET GORNICK

Date Submitted: Thursday, April 05, 2012, 9:34 p.m.

City, State: Cottage Grove, MN

Occupation: Legal Administrative Assistant

Comment: Please do not cut nutrition programs for the poor and needy women and children of Minnesota. Having the proper nutrition saves dollars in health care costs because of poor nutrition.

COMMENT OF JOE GORSKI

Date Submitted: Sunday, May 20, 2012, 11:48 p.m.

City, State: Ann Arbor, MI

Producer/Non-producer: Producer

Type: Bioenergy, Dry Beans & Peas, Field Crops, Other

Size: 1,000+ acres

Comment: Organics Work.

They are good for your family and mine.

They keep people healthier and more disease resistant.

JOE GORSKI.

COMMENT OF HARLYENE GOSS

Date Submitted: Friday, May 18, 2012, 12:02 p.m.
City, State: Methuen, MA
Occupation: Medical Technologist
Comment: We need the soils to be more nutritional so our food has more benefit. Also, eliminate growth hormones and antibiotics from our livestock. These and GMOs are compromising the public's health.

COMMENT OF GRACE GOSSON

Date Submitted: Sunday, May 20, 2012, 12:49 a.m.
City, State: New York, NY
Occupation: Student
Comment: Every citizen deserves access to fresh and nutrient rich produce. Less than 3% of America's farm land is used to grow fruits and vegetables—this must be changed.

COMMENT OF DEBRIN GOUBERT

Date Submitted: Friday, May 18, 2012, 12:24 p.m.
City, State: Sewickley, PA
Occupation: Physician
Comment: Primary health support is financially smarter than addressing tertiary healthcare needs. This is the best sort of investment for the health of the population.

COMMENT OF DEBORAH GOUGE

Date Submitted: Friday, May 18, 2012, 12:17 p.m.
City, State: Pittsburgh, PA
Occupation: Writer/Editor
Comment: Please take this opportunity to shift the priorities of the farm bill away from financial support of large agricultural corporations (and the sugar, corn, and high-fructose corn syrup they produce) toward support for small farmers and organic production. Specifically, I ask you to do the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Voters are becoming aware that Congress too often places the interests of corporations above those of the public. In the past, the farm bill has been an egregious example of that. Please design a farm bill that puts the public good above corporate profits.

COMMENT OF CHRISTINE GOUVEIA

Date Submitted: Friday, May 18, 2012, 4:20 p.m.
City, State: Livermore, CA
Occupation: Collection Administrator
Comment: The land belongs to all of us and you are allowing big business to destroy it with their chemicals and GMO's. We need to go back to healthy farming. These practices being forced into our food are causing illness to kids and adults all in the name of mass production and more profit for corporate farming. Family farming should never have been mowed down. Stop ruining our land. Your family's are being poisoned too. Is the worth the money you're being paid to be bought off. You should be ashamed.

COMMENT OF JOHN GOZDZIALSKI

Date Submitted: Saturday, May 19, 2012, 6:02 p.m.
City, State: St. Louis, MO

Occupation: Teacher

Comment: Dear House Agriculture Committee:

Because of the important role farmers play in our food system, taxpayers have supported a safety net for farmers for nearly 30 years, always in return for a guarantee that subsidized farmers will follow basic conservation practices in their fields to protect soil and water. This revolved around the basic realization that while Americans needed food, it was critical to employ conservation practices in order to preserve the economic viability and productivity of our farmlands and resources for the future.

As the House Agriculture Committee prepares your draft of the farm bill, I urge you to restore the link between taxpayer-supported subsidies for crop insurance and conservation compliance protections that will protect the nation's water and land.

This action is especially important as Congress considers eliminating direct payments, the major subsidy program that is linked to conservation compliance, and moving some of those funds to support increased subsidies for crop insurance, which lacks compliance requirements. Unless you help to reconnect crop insurance subsidies to conservation compliance, a significant part of farmers' incentive to follow conservation plans will vanish this year.

Farmers need crop insurance as part of their safety net and the public needs basic conservation practices on farms to make sure that quality farmland and water can support future generations as well as the current needs of our country. We cannot accept sacrificing long-term economic and environmental sustainability for short-sighted and short-term economic profits.

Connecting eligibility for crop insurance subsidies to conservation compliance is fiscally responsible and ensures public subsidies for farmers' insurance premium payments align with the public's interest in basic conservation of our soil and water. Missouri consistently ranks in the top five for soil loss, losing more than 5 tons per acre per year, so we have a lot to gain.

It's high time leaders in our government and in the food and agricultural industries placed the current and future health of its people as the top priority in their industries as opposed to quick and exorbitant profits.

Sincerely,

JOHN GOZDZIALSKI.

COMMENT OF ALEXANDRA GRABBE

Date Submitted: Friday, May 18, 2012, 9:04 a.m.

City, State: Wellfleet, MA

Occupation: Innkeeper

Comment: I serve my guests only organic food. I am concerned that small farmers will be edged out. I am against GMOs and find it hard to find food that does not harm future generations. Get pesticides out of our food! Help the small farmer, not Big Ag. Thanks for your attention to this important matter.

COMMENT OF TOM GRABOW

Date Submitted: Saturday, May 19, 2012, 5:12 p.m.

City, State: Evansville, IN

Comment: It is way past time to end the depression-era subsidies. Crop insurance should be provided by a private insurance market; the Federal government should get out of the business altogether. Markets can work much better if government allows a fair playing field and promotes sustainable practices. This should be done with much lower expenditures which would help reduce the deficit.

COMMENT OF HARRY GRACE

Date Submitted: Friday, May 18, 2012, 12:47 p.m.

City, State: Buffalo, NY

Occupation: Clergy

Comment: I am a strong advocate of supporting small farms and especially the increasing number of organic growers. As a consequence, I am opposed to GMO produce and seafood entering into the nation's food supply—especially when not identified on labels.

There are many things about the farm bill that need to be addressed, not the least of which is the undue influence of large agricultural producers and agribusiness corporations.

Please understand the I am in support of:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF RICHARD GRAF

Date Submitted: Friday, May 18, 2012, 3:53 p.m.

City, State: Whitefish, MT

Occupation: Home Inspector

Comment: Its time to clean up the agricultural/food supply in this country. If that cannot be done there should at least be sufficient labeling so that we can determine what we choose to eat.

COMMENT OF GAIL G. GRAFF

Date Submitted: Saturday, May 19, 2012, 8:32 p.m.

City, State: Thousand Oaks, CA

Occupation: Retired

Comment: Stop subsidizing farmers for corn to make high fructose corn syrup. Obviously, it's not a healthy addition to anyone's diet. Stop allowing our food to be poisoned with pesticides. You should be protecting people's health instead of making them sick and killing them! Canned goods also need to be changed due to PBA leaching into the food. And maybe you could act like adults and actually do the job of representing the people!

COMMENT OF BONNIE JONES GRAHAM

Date Submitted: Sunday, May 20, 2012, 12:48 p.m.

City, State: Billings, MT

Occupation: Teacher

Comment: I am a 4th generation Montanan! I am pleading with you to support legislation, including the next farm bill that supports small family farmers who want to continue to make a viable living with traditional farming practices that support sustainable production of "real food", especially in our rural communities. I encourage you to vote against subsidies that benefit corporate farms. Big agribusiness should be able to survive on their own just like any other big business does without tax payer support. I also urge you to limit and regulate more strongly, CAFO producers and promote a more humane, environmentally sound process that does not endanger humans or communities in which CAFOs exist. I am also a Montana teacher and I see "day in and day out" the horrific effects of our food inequalities: obese and unhealthy children whose diet consists of highly processed and cheap food with no nutritional value because fresh produce and "real" food is too expensive for their families. When, in the United States of America, has nutritional food become a luxury item only for the wealthy? How can we accept in this country, that children's academic achievement, brain function, and physical movement is being fueled by chemicals, additives, and "product" instead of high quality, real food that supports Montana's historical and agricultural heritage . . . as well as our tradition of high quality educational outcomes? We feed animals in our zoos better quality food than what many Montana children are provided! We can't expect a child to perform at peak levels with "modified" fuel any more than we would expect our vehicles to perform with gas that has no "energy" value to the engine. Please, we are so, so much better than this!

Sincerely,

BONNIE JONES GRAHAM.

COMMENT OF DIANA GRAHAM

Date Submitted: Thursday, May 10, 2012, 10:34 p.m.

City, State: Chicago, IL

Occupation: Retired

Comment: Every month I serve hundreds of hungry people at our food pantry. Cutting SNAP will mean hundreds of people will go hungry each month. Please don't cut SNAP, even families who receive food stamps sometimes need to come to

our food pantry. Cutting SNAP will mean even less food for people already in poverty. Please don't cut SNAP.

COMMENT OF JON GRAHAM

Date Submitted: Friday, May 18, 2012, 5:08 p.m.

City, State: Rochester, VT

Occupation: Editor

Comment: This farm bill is weighed far too heavily with support for industrial agriculture—support it no longer needs—with very little support for more sustainable and healthier options.

JOINT COMMENT OF LAURA AND CARL GRAHAM

Date Submitted: Sunday, May 20, 2012, 9:53 a.m.

City, State: Jacksonville, FL

Occupation: Physician Trainer, Full-Time Mother, and Wife; Welder, Father, and Husband.

Comment: Please help us to remove the fine that organic producers have to pay to do the right thing and put a **Heavy Fine** on the factory farm and commercial food production industry for all of their pollution, poison and land damage. We need to get the subsidies redirected from those damaging our lives and put them toward those doing the right thing. Thank you.

COMMENT OF NANCY GRAHAM

Date Submitted: Friday, May 18, 2012, 10:09 a.m.

City, State: Eugene, OR

Occupation: Registered Dietitian

Comment: We need every means available to promote and ensure health and well-being. Our health is intimately tied to our food production. The fight against obesity and all of its consequences (heart disease, diabetes, *etc.*) requires that we provide nutritious foods.

COMMENT OF PATRICIA GRAMES

Date Submitted: Friday, May 18, 2012, 3:31 p.m.

City, State: Tucson, AZ

Occupation: Retired

Comment: We need to have better, cleaner food available in this country for people like me who don't want pesticide and chemical laden food. Please include help for organic farmers in the farm bill. Also, please rein in some of the big corporate farms from some of their worst practices, like overuse of pesticides, allowing excess fertilizers to pollute water, and so. And feeding bad food to chickens, cows and pigs.

COMMENT OF LISA GRANDSTAFF

Date Submitted: Saturday, May 19, 2012, 8:49 p.m.

City, State: Pittsburgh, PA

Occupation: Electronics Technician, Factory Equipment Facility

Comment: I am writing today to ask you to end the give-aways to **Huge** corporate farming entities and to restore whatever we can to small and medium-sized operations, as well as family-held and private farms and animal husbandry operations.

While I understand that corporate agriculture is here to stay, there is **NO Need** for these entities to receive tax payer money, especially at this precarious time in our economic climate.

I would like to see the full endorsement of the provisions of the Local Foods, Farms and Jobs Act (H.R. 3286) upheld and not stripped away.

I feel that we need to maintain funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

I feel it is important to move forward with the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

And I whole-heartedly support maintaining the EQIP Organic Initiative.

Thank you,

LISA J. GRANDSTAFF.

COMMENT OF ANDERS GRANNING

Date Submitted: Friday, May 18, 2012, 1:32 p.m.

City, State: Milford, MI

Occupation: Truck Repair Manager

Comment: Please stop funding unsustainable forms of agriculture and allow this bill to emphasize and strengthen small and local farms for the betterment of our family's health and society. Our citizens and children are suffering from hunger and malnutrition. Please consider all of the economic factors such as mobility for food producers, programs to feed our nation's hungry, and education and implementation of balanced diets from healthy and sustainable sourced foods.

COMMENT OF ANN GRANT

Date Submitted: Friday, May 18, 2012, 1:25 p.m.

City, State: Sunnyvale, CA

Occupation: Realtor

Comment: Am always surprised when I visit my daughter in Great Britain by how much more care they take of their food sources. What we eat is so important to the health of our nation in all respects, please pass organic standards that will allow us to shop wisely.

COMMENT OF MARSHA GRANT

Date Submitted: Saturday, May 19, 2012, 9:56 a.m.

City, State: Hotchkiss, CO

Occupation: Retired

Comment: The farm bill only supports corporate agriculture. We need to all support clean and fair food in this country produced by smaller family farms. They all struggle in the valley where we live. Have the courage to support small, sustainable agriculture in the new farm bill. The public is waking up to this issue and is watching.

COMMENT OF GRACE GRATSCH

Date Submitted: Wednesday, May 16, 2012, 10:58 a.m.

City, State: Cincinnati, OH

Occupation: Retired Teacher

Comment: We need a farm bill that will provide initiative and support to the next generation of farmers. We need a bill that will make farming possible for families to work on the land and not be monopolized by huge corporations. Small farms on the heart of America.

COMMENT OF TAMMY GRAVES

Date Submitted: Friday, May 18, 2012, 9:49 a.m.

City, State: Richfield Springs, NY

Occupation: Graphic Designer

Comment: Give incentives to food stamps to buy fresh instead of processed foods. We need to have a farm bill foster food production where the infrastructure exists and the people live, *i.e.*, Northeast—keep the dairy farms so we can have a local source of milk instead of it coming in from Idaho or Wisconsin. Thank you.

COMMENT OF TERRELL GRAVES

Date Submitted: Friday, May 18, 2012, 9:16 a.m.

City, State: Alexandria, VA

Occupation: Information Technology Manager

Comment: It's **Way** past time to get out of bed with agribusiness and start to put good, natural, local food into the hands of **Every** American. We can make a good dent in local economies across every state in the union by helping to push food production back to the local level. It will also, curiously, help without epidemic health and obesity issues so the issues go beyond the purview of Agriculture.

COMMENT OF HERBERT "HERB" R. GRAVES, JR.

Date Submitted: Friday, April 13, 2012, 9:35 a.m.

City, State: Chapman, KS

Occupation: Executive Director, State Association of Kansas Watersheds

Comment: April 13, 2012

Hon. FRANK D. LUCAS,
Chairman
 House Committee on Agriculture,
 Washington, D.C.

Dear Representative Lucas,

The State Association of Kansas Watersheds (SAKW) supports funding of the P.L. 83-566 (PL-566) watershed program as an inclusion in the Conservation Title of the 2012 Farm Bill.

Kansas like all states understands the difficult task of putting our country's financial future in order. Having said that, one of the dangers of all out war on existing programs, is the fact that sometimes we lose track of what programs truly benefits our country.

The PL-566 program has seen a steady decline in funding since the late nineties. First it was the need to finance flood damage expenses then it was the need to curtail the practice of Federal earmarks to now some twenty years later a total denial of what really has worked for over fifty years. How many Federal programs can show a return on investment of 15-25% for each and every year since the early 1950's that the PL-566 program can.

Today we have decided that this country can no longer afford to finance flood reduction programs and will just rely on paying more and more for flood damages as they occur. A case in point is the Missouri River disaster this past year. Just let the floods come and we will deal with them the best we can. The forefathers that thought prevention was much wiser to deal with must be turning over in their graves at the way we look at flood control today. The facts and figures of what the PL-566 watershed program has meant to Kansas and this country are substantial, defensible, and undeniable.

We hear from USDA and NRCS that we must get out of the business of federally supported planning, operations and rehabilitation of flood reduction and send it back to the local folks. For the past fifty some years the local folks have done their part. In Kansas alone, millions of local dollars are being spent on maintenance of existing dams, design of new projects, securing of land rights, securing needed environmental mitigation, and now the Federal government wants to pull the plug and leave a job unfinished.

Kansas has gotten a late start with rehabilitation of PL-566 dams, but our first is now complete, the second is under contract, and the third has funding secured. Four new dams are ready for NRCS rehabilitation planning, but FY 2013 funding for any phase of the program is uncertain at best.

SAKW and the watershed districts of Kansas thanks you for your service and dedication to all phases of the PL-566 watershed program. Good luck in your efforts to secure a farm bill preserves and protects production agriculture into the near future.

HERBERT "HERB" R. GRAVES, JR.,
SAKW Executive Director.

COMMENT OF JEFF GRAY

Date Submitted: Friday, May 18, 2012, 12:38 p.m.

City, State: Grayson, GA

Occupation: Graphic Design

Comment: As a long-time Republican, I'm asking that you endorse the Local Foods, Farms, and Jobs Act, H.R. 3286, as well as the EQIP Organic Initiative. Please don't put more money into wasteful big ag farm subsidies. The future of food is with small farms husbanding land and animals with care. It's not in factories maximizing profits via scorched Earth environment policies and heavy government subsidies.

COMMENT OF MARY GRAY

Date Submitted: Sunday, May 20, 2012, 12:48 p.m.

City, State: Boone, NC

Occupation: Writer

Comment: We need a farm bill that will help us move to a sustainable agricultural system with ample support for small family farms and organic growers. With global climate change already happening, we need to sequester as much carbon as possible in our soils with no-till systems and programs to conserve and increase depth of topsoil.

COMMENT OF NATALIE GRAY

Date Submitted: Friday, May 18, 2012, 1:47 p.m.

City, State: Ojai, CA

Occupation: Voiceover Actor—Home Vegetable Grower

Comment: Dear House Agricultural Committee,

Food issues are of utmost importance to me, and I vote for representatives who think accordingly.

I am writing to let you know that I want things to change for us here in the U.S. with regard to how farmers are subsidized and big agribusiness is given full reign over MY food. This is your food, too! Don't you realize that?! For God's sake, get real. You eat the stuff that they are putting out too! Even if you have tons of money and can afford to eat "organic", if sustainable farming and the small farmer are not supported, you can kiss any difference you feel you might be able to experience good-bye; not to mention the changes to our environment, *etc.*

In that regard, I support:

- Maintaining the EQIP Organic Initiative.
- The FULL endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

Thank you for your time and attention.

Most sincerely,

NATALIE GRAY.

 COMMENT OF PAMELA GRAY

Date Submitted: Tuesday, March 20, 2012, 1:10 p.m.

City, State: Lubbock, TX

Occupation: Mammographer

Comment: I do not believe corporate farm operations should receive government subsidies. I believe this is a deplorable waste of government funds. These excessive subsidies could be eliminated to bring down the government deficit.

 COMMENT OF PILAR GRAY

Date Submitted: Friday, May 18, 2012, 1:32 p.m.

City, State: Fort Bragg, CA

Occupation: School Nutrition Services Director

Comment: Funding to school meals needs more than the meager \$0.06 per meal we are to receive from the Healthy Hunger-Free Kids Act if we are to serve fresh, healthy food to this nation's children.

I would love to see a financial incentive program for schools to purchase more regional, unprocessed agriculture products to support small, local farmers, boost local economies, and provide school children with not only the freshest foods possible but with also an increased awareness of where and how food is grown and the seasonality of produce.

Thank you for your consideration.

 COMMENT OF SUE GRAY

Date Submitted: Saturday, March 24, 2012, 7:36 p.m.

City, State: Geneseo, IL

Occupation: Ag Consultant, Farm Owner

Comment: The producers attending the Galesburg, IL, hearing presented great commentary from the farmer's perspective. There is one role of the farm bill that was barely mentioned, but that is absolutely crucial [to farmers, and] to the long term sustainability of agriculture, and for our dominant position in feeding the U.S. and the world—and that is as a foundation for ag research. The 2008 Farm Bill provided mandatory funding for four NIFA programs with \$129M in FY 2012, but there is no budgetary "baseline" in 2013 or beyond.

The farm community near Galesburg places a high value on research. Just a few years ago, in a remarkable display of conviction, a group of concerned citizens comprising the Northwest Agricultural Education Foundation raised money to buy 80

acres of land which was leased to the University of Illinois for \$1 dollar per year, in order to secure the Monmouth location as one of the University's experimental farms. Their actions and commitment speak volumes for their recognition of the value of agricultural research—a value that I urge you to also recognize and support in developing the upcoming farm bill, by restoring the crucial investment in ag research programs. Thank you.

Respectfully,

SUE GRAY.

COMMENTS OF SYLVIA RUTH GRAY

Date Submitted: Friday, April 27, 2012 10:36 a.m.

City, State: Salt Lake City, UT

Occupation: Unemployed

Comment: I want a farm bill which protects and strengthens programs like TEFAP and SNAP in the farm bill—which funds programs like TEFAP and SNAP that help vulnerable children, seniors, and low-income families. I also want small family farms to be encouraged. Ditto for organic farming and increased regulation for factory farms!

Date Submitted: Friday, May 18, 2012, 4:49 p.m.

Comment: I support small farm, organic, non-GMO agriculture on behalf of the soil and beneficial soil bacteria.

COMMENT OF YURIKO GRAY

Date Submitted: Saturday, May 19, 2012, 9:09 a.m.

City, State: New York, NY

Occupation: Educator

Comment: We eat only organic foods at home and only visit the doctor for required check-ups. Our health is an indicator of how organic foods help strengthen and maintain healthy immune systems thus lowering spending on medical needs. (But I still pay over \$500 per month for health insurance as a government worker.) Please support organic foods for better health.

COMMENT OF MARY GRAZIANO

Date Submitted: Saturday, May 19, 2012, 9:07 a.m.

City, State: Galesville, WI

Occupation: Self-Employed Piano Teacher

Comment: Our nation's food policy is a sham, geared towards large corporate farms and production of monoculture, commodity crops that consumers cannot directly consume. We need to move toward an agriculture policy that promotes and supports the production of healthy food as locally as possible by sustainable practices.

COMMENT OF MARIAN GREBANIER

Date Submitted: Friday, May 18, 2012, 7:08 p.m.

City, State: Portland, OR

Occupation: Retired

Comment: I urge this committee to support H.R. 3286 and H.R. 3236 which would give funds to where they are needed . . . farmers, smaller farms, local agriculture and the training of new farmers. New farmers are greatly needed at the current farmers are getting old and not being replaced at the rate our country needs to have the good healthful food it needs for good nourishment.

I am completely opposed to the furthering of subsidizing, in the many billions, agribusiness using bad farming techniques, chemicals, GMOs and largely raising commodity crops. The new insurance program being offered is yet another boondoggle with no requirements for these businesses remediating soil erosion or doing wetland conservation.

We need Congress to look out for the well-being of its land and people, not the agribusinesses that have been walking off with most of the support and money.

Please do the right thing.

COMMENT OF GIULIO GRECCHI

Date Submitted: Tuesday, May 01, 2012, 4:46 p.m.

City, State: Tucson, AZ

Occupation: Retired—Volunteer Assisting the Poor

Comment: We ask that you support a farm bill that provides for poor and hungry people both at home and abroad, offers effective help for those who grow our food, ensures fairness to family farmers and ranchers, and promotes stewardship of the land. We also urge that this farm bill target limited resources, such as subsidies and direct payments, to those farmers and ranchers who truly need assistance to be competitive and successful.

COMMENT OF LORIS A. GRECO

Date Submitted: Friday, May 18, 2012, 1:01 p.m.

City, State: Franklin, WI

Occupation: Retired Teacher

Comment: We need safe, healthful, sustainable, and whenever possible, locally grown food. Can you help to set out the infrastructure that will make this possible. All institutions need reforming from time to time, don't they?

LORRIE GRECO.

COMMENT OF CAROL GREEN

Date Submitted: Friday, May 18, 2012, 6:10 p.m.

City, State: Napa, CA

Occupation: Grandmother

Comment: Our grandchildren need us to be vigilant in providing healthy meals. We need you to be vigilant in protecting those interests. When families can't stay healthy eating GMO products disguised as foods and mostly not labeled as such, and mom's are too busy working AND caring for family and home, we all suffer the consequence with higher health care costs while our air, land and water are polluted with the poisons used.

If you believe pandering to the almighty dollar will save your family, you would be misguided as these issues will cross into your family life as well.

Please consider the health of our once great nation and do the job we are paying and praying for.

Thank you for all you do to protect the health of our children.

COMMENT OF DAVID GREEN

Date Submitted: Friday, May 18, 2012, 2:26 p.m.

City, State: Berkeley, CA

Occupation: Food Service Industry

Comment: Small scale and family farms are only way to ensure healthy farmland for future generations, and that alone should be reason enough to pass a bill that ensures the future of sustainable agriculture. However, I imagine a plea that incorporates business interests would garner more political response, and thus, I feel that with the current depressed economy, family farms should be subsidized and farmers put back to work instead of money and political protection allocated to giant agriculture conglomerates whose practices have, for decades, put the local farmer and America's health far behind their ever-soaring profits. Politics, lately more than ever, seems to deal in the fast fix and the immediately gratifying, but on the current trend, there will come a day when big business owns all the seeds, when American farmland has become so poisoned and poorly cared for that we can't turn back. The health of the country calls for preemptive measures. I want my representative to think about what would be good for everyone and what would benefit the country even after their run in office is over.

COMMENT OF MARY GREEN

Date Submitted: Wednesday, March 21, 2012, 10:43 a.m.

City, State: Arlington Heights, IL

Occupation: Nonprofit Corporate Trainer

Comment: I am a local activist for healthy food and environment. I am also a mother and concerned citizen. Please do the right thing and support in the strongest way the needs and rights of farmers and consumers.

Local and regional food systems help create jobs and spur economic growth in rural and urban communities. Please support investment in this growing sector by including the Local Farms, Food, and Jobs Act in the next farm bill.

The future of family farming and ranching in America depends upon ensuring that would-be new farmers have access to land, capital, and markets. Please support

beginning farmers and ranchers by including Beginning Farmer and Rancher Opportunity Act in the next farm bill.

Farmers depend on quality, cutting-edge research to stay successful—please make sure the next farm bill invests in this crucial work.

Working lands conservation programs help farmers maintain productivity while protecting our air, water, and soil, protect these programs from unfair funding cuts!

COMMENT OF DORIAN GREENBAUM

Date Submitted: Friday, May 18, 2012, 10:00 a.m.

City, State: Duxbury, MA

Occupation: Researcher

Comment: I urge you to support a farm bill that supports and encourages organic and non-pesticide/herbicide farming, using sustainable methods. Agribusiness does not need subsidies—level the playing field and give subsidies to the organic and non-chemical farmers who are growing food in a healthy and sustainable way. I no longer buy non-organic produce at supermarkets, and I strongly support local farmers and farmers' markets. Monsanto doesn't need any more money from you—my local CSA could sure use a minute portion of the billions you have shelled out to the companies that are ruining our food supply and poisoning our environment. Support heirloom vegetables, not GMOs!

COMMENT OF JOYCE GREENBERG

Date Submitted: Friday, May 18, 2012, 9:30 p.m.

City, State: Highmount, NY

Occupation: Realtor

Comment: Support for family farms is vital to homeland security. Agribusiness has plenty of money, enough to grease a lot of Washington palms. Family farms produce quality products that I choose over the chemically contaminated, genetically engineered produce of agribusiness.

COMMENT OF HARRY GREENE

Date Submitted: Friday, May 18, 2012, 12:17 p.m.

City, State: Littleton, MA

Producer/Non-producer: Producer

Type: Fruits, Livestock, Vegetables

Size: 50–150 acres

Comment: We're fed by the food industry that knows nothing about health, and treated by the health industry who knows nothing about food. I'd like to put my bid in to change that.

With the obesity epidemic destroying our nation, promoting and even subsidizing real-food industries is leagues more important than subsidizing big oil.

Which is more important, the quality of life of all Americans, or the depth of the pockets of those at the top of the pyramid? It all starts with what you put into your body. Do we want to spend millions on the real-food industry, or billions on cancer and diabetes treatments that could have been prevented?

On top of health, investing in sustainable agriculture keeps the producer-market-consumer system alive. Industrial agriculture is headed on a crash course for plains of dust instead of fields of soil.

COMMENT OF JANE GREENE

Date Submitted: Thursday, April 12, 2012, 10:44 a.m.

City, State: Truth or Consequences, NM

Occupation: Teacher

Comment: Last year, while the number of people in poverty was increasing, the food coming to New Mexico's food bank decreased by over 1/3. As you work on the farm bill, please do not forget that the economy has devastated many American families and this is the most basic form of help.

COMMENT OF VAUGHAN GREENE

Date Submitted: Friday, May 18, 2012, 11:24 a.m.

City, State: Panama City Beach, FL

Occupation: Teacher

Comment: I want access to more small farmer's markets. We need more small family farms to fill these markets. I like the diversity of plants and food that I can

get from a local/small farm. Big-agriculture is only offering a few types of food that is bred for transport and not taste. Quit giving so much money to the big corporations.

COMMENT OF ANNE GREENIA

Date Submitted: Friday, May 18, 2012, 8:17 p.m.

City, State: Tulalip, WA

Occupation: Retired

Comment: The health and welfare of the children, current and those to come, must be protected by those of us that are responsible for the protection of society as a whole.

Even twenty years down the road is too late to start those protections, I feel.

Please save our environment from pillage by the folks whose only interest is making the most money they can at the rest of our expense.

Please support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you for your consideration in this matter.

ANNE GREENIA.

COMMENT OF ALAN GREENLAND

Date Submitted: Friday, May 18, 2012, 2:49 p.m.

City, State: Surprise, AZ

Comment: Please stop subsidizing foods like GM corn that are making people sick and start subsidizing food that is good for people, the environment, and the farmers. Thank you.

COMMENT OF BARRY GREENSTEIN

Date Submitted: Friday, May 18, 2012, 1:24 p.m.

City, State: Ft. Lauderdale, FL

Occupation: Executive Chef

Comment: It is vital that we have independent small family farms growing sustainable foods to not only keep our environment healthy, but to additionally supply the most diverse selection of grains, fruit and vegetables, beans, seeds and nuts available. Many varieties of grains and seeds have been reduced or eliminated due to genetic modification. The survival of our food system is dependent upon a fair farm bill, where organic, sustainable and small family farms are given an equal chance in the current food system. We cannot survive if the current large seed and agribusiness companies are allowed to monopolize, reduce and destroy our food diversity. I ask as a taxpaying citizen of this country to make sure mine and future generations are allowed a choice to have the widest variety of healthy foods at their disposal.

Monsanto Corp. has been granted a patent on life through our Supreme Court justice system, and have the ability, by law, to completely monopolize the food seed banks in the world market. Heading in this direction will certainly benefit Monsanto, but will be a disaster for all of humanity. I urge you to pass a sensible farm bill so our farmers can survive, and even thrive in our current food system.

COMMENT OF CINDY GREENSTEIN

Date Submitted: Thursday, May 03, 2012, 11:56 a.m.

City, State: Baton Rouge, LA

Occupation: Executive Director of the Louisiana Food Bank Association

Comment: I am writing to encourage the House to not make cuts in the SNAP program. The Food Banks of Louisiana are doing their best to keep up with the needs of the hungry in Louisiana and if there are cuts to the SNAP program, it is doubtful they will be able to provide for all in need. Food insecurity increased to

16.7% of all Louisianans in 2010. The food banks have seen an increase in those seeking out food that have never had to get food from them before. The food banks in Louisiana are funded 99% by private and corporate donations, grants, and the commodities program for which they provide distribution. If this program is cut, the burden will shift to the food banks but without an increase in their resources. I know this country needs to make cuts, but please don't take from a program that makes this a civilized country. Hunger is detrimental to the individual and the community. Thank you.

COMMENT OF ALEX GREETHAM

Date Submitted: Friday, May 18, 2012, 12:00 p.m.

City, State: New York, NY

Occupation: Student

Comment: I want to be able to ensure that my food was grown in ethically sound conditions. When I buy free-range chicken and eggs, I actually want it to mean free range, being raised with plenty of room and fresh air, not just a few minutes outside of a cramped wire cage. I want my milk to not contain bovine growth hormone (rBGH) as I do not want pus in my milk, or the milk that children have with their cereal every day. And I want my burgers to be actual meat, none of this pink slime. I would like to see a transparent food industry, not one that tries to hide its actions. What has it got to hide? Also, I no longer want to see this conflict of interest as seen when the president hired Monsanto lawyer Tom Vilsack as the Secretary of Agriculture.

COMMENT OF SARA GREGG

Date Submitted: Sunday, May 20, 2012, 3:17 p.m.

City, State: Lawrence, KS

Occupation: Professor

Comment: The time is long past when agriculture reflected the values of the people who rely on its produce, but Americans and their elected officials today can still correct for the misuse of our nation's agroecosystems. Please make our food safe for human consumption again, and allow our farms to provide healthy habitat for both their human and their animal residents.

COMMENT OF CHRIS GREGOIRE

Date Submitted: Friday, May 18, 2012, 7:59 p.m.

City, State: King George, VA

Occupation: Holistic Wellness Practitioner

Comment: I completely support the farm bill. I am fed up with the Department of Ag robbing us of the chance to live healthy, vital lives. The special interest groups (MONSANTO) have run this country too long, and have all but destroyed the quality of life that once existed.

For once . . . do what is right for this nation.

COMMENT OF CAROL GREGOR

Date Submitted: Friday, May 18, 2012, 5:41 p.m.

City, State: Brooksville, ME

Producer/Non-producer: Producer

Type: Livestock

Size: Less than 50 acres

Comment: Organic farming is the best future for agriculture. The quality of our food has been lost to huge profit driven corporations. Let small farmers produce quality as we always have.

COMMENT OF ANDREW GREGORY

Date Submitted: Sunday, May 20, 2012, 2:27 p.m.

City, State: Truckee, CA

Occupation: Culinary Artist

Comment: Please pass legislation that limits the power of commercial farming and empowers the growth of small-scale and sustainable agricultural practices. I would like to be able to feed my family with foods that are free of chemicals, hormones, and antibiotics and grown locally by local farmers and ranchers. Thank you!

COMMENT OF CLAIRE GREGORY

Date Submitted: Friday, May 18, 2012, 4:36 p.m.

City, State: Bloomington, IN

Comment: Citizen farmers who face many problems as they try to meet the need of community farms should receive financial support from Congress just as Congress has supported the multinational corporate "farmers".

COMMENT OF ELLEN GREGORY

Date Submitted: Saturday, May 19, 2012, 8:13 a.m.

City, State: Old Bridge, NJ

Occupation: Marriage and Family Therapist

Comment: Please consider an organic farm bill . . . I've had three people in my life in the last 2 weeks die of cancer. Our food supply has become our biggest toxin and I'm scared for the health of my children.

In my area, there is a limited supply of organic food available and most of the time it is more expensive.

We, the 'in the know' people, know what greedy business and government has done to our food. And . . . by not advocating for labeled GMO food and siding with the producers who are killing us . . . there is no better way for your people to lose faith in a government that **Is Not** out for the protection of its citizens.

There is not a more pressing issue then the food we put into our body and to deny your 'people' the right to know what is in our food, and to restrict access to organic food is the biggest betrayal.

I do not know how our country will recover if the U.S. government does not hear the voice of the food movement. All we are asking is to stop making us sick!

COMMENT OF JENNIFER GREGORY

Date Submitted: Saturday, May 19, 2012, 11:29 a.m.

City, State: Truckee, CA

Occupation: Accounting

Comment: Please help the American people by passing some legislature that ensures the food we buy and eat is not going to harm them. Here in the greatest country in the world I am scared to feed my children what is sold as "food". Please support the small. Local, organic farms, and limit the power of the large commercial farms. For my kids' sake, please.

COMMENT OF T. GREGORY

Date Submitted: Friday, May 18, 2012, 4:49 p.m.

City, State: Sedalia, CO

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I grow organic vegetables not for profit but to give to my local food bank. I know what the quality of my food is and like to think I save lives with my food. I think it's **Extremely** important that our country's farm bill support **All** organic and sustainably grown food. I am adamantly opposed to **Any** GM/GE crops because of the poisons required to even grow it and it's impact to our planet in **Every** way. I support:

- (1) The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- (2) Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new subsidies are tied directly to compliance with conservation programs.
- (3) The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- (4) Maintaining the EQIP Organic Initiative.

I also think Congress should be looking at ways to allow communities to use vacant land for community gardens. This will have a **Huge Positive** impact on those communities by bringing people together, providing education for children to see how food is actually grown, and improving the health of our citizens! (obesity). It's time for YOU to think outside the box and find ways to support our country's health by providing incentives to do just that. I hope you do.

COMMENT OF DORIS GREY

Date Submitted: Saturday, May 19, 2012, 11:11 a.m.

City, State: Philadelphia, PA

Occupation: Concerned Citizen

Comment: Look at the statistics: one in four people in the U.S. will get cancer—look at the “allowed amounts” of herbicides and pesticides allowed in our food—now we are faced with genetically engineered crops! Yes, to eat means to ingest poisons, which of course, have no relation to how unhealthy we are as a nation. Please wake up and protect our food supply!

COMMENT OF DEBORAH GREYMOON

Date Submitted: Friday, May 18, 2012, 1:46 p.m.

City, State: Cascade, CO

Occupation: Nurse

Comment: Our farm policy needs to be restructured to care more for the people responsible for producing food rather than the large corporations that profit by their labor. Please do the right thing and vote for decent farm policy reform.

COMMENT OF AUDREY GRIER

Date Submitted: Sunday, May 20, 2012, 12:31 p.m.

City, State: East Rutherford, NJ

Occupation: Teacher

Comment: It is time to consider the source of our food, which is in turn the source of our energy and health.

Please develop, support and fund only legislation which enables family farms; organic farms; seed saving and diverse natural variations; responsible stewardship of the soil and water sources; and which discourages genetically modified seeds and organisms; corporate pressure to control seed distribution and farming methods which rob the soil of its richness.

This is truly a matter of great scope and importance. What we eat affects our intellectual functioning, our physical health or sickness and the economics of our neighbors.

Thank you for your attention and please take time to legislate in favor of health.

COMMENT OF BRWYN GRIFFIN

Date Submitted: Sunday, May 13, 2012, 3:58 p.m.

City, State: Port Townsend, WA

Occupation: Organic Grocery Education Manager

Comment: First of all, thank you for your service to our district. It's with the greatest urgency that I write. Our farm bill, for years, has supported big corporate agriculture, I'm assuming, in an attempt to make our food production system more efficient. BUT, we now realize that big ag is not the answer. We need to support localized, sustainable agriculture, give subsidies to small farmers, make the permitting procedures easier for cottage food industry, and think less globally and more locally. I'm asking Norm Dicks to consider all the Port Townsend Food Co-op owners, over 7,000, when considering how important healthy, nutritious foods are to his constituents. We want less packaged foods containing GMO ingredients and more locally grown, organic foods. Please help make this happen by voting to change our farm bill in support of more sustainable policies.

SUBMITTED STATEMENT BY HON. ROBERT T. GRIFFIN, INDEPENDENCE COUNTY JUDGE,
ARKANSAS

House of Representatives Committee on Agriculture:

Chairman Lucas and Members of the Committee, thank you for the opportunity to be heard for the record. I am Robert T. Griffin, Independence County Judge in Arkansas. I am a farmer born and raised and owned a Federal grain warehouse for thirty-three years in Independence County before being elected to this position in 2011. I have observed, first-hand, the decline of the number of people able to continue in farming as the years have passed. While my farmer base shrank, the number of acres I handled increased. I witnessed the lack of interest as the children of farmers declined to continue in the footsteps of the older generation. I also myself declined to row crop farm due to the uncertainties of price, pests, and weather. The risk *versus* the return was too great although I continued participating by ownership of cropland and building a cattle herd on other acreage.

Knowing the Federal budget is approaching being beyond control and the dangers of continuing without constraints could collapse our economy, I do ask you to consider the security of production of our own food in this nation before making cuts to the farm bill. We cannot become dependent on foreign powers controlling our food as they do our oil and to some extent, our manufacturing. Consider the costs analysis done by the research at the University of Arkansas and the small margin of net income within the production of crops. The numbers I have seen for this year show only a few crops yielding a net return if you consider most farmers rent land and take the rent from the return shown from that research. A high farm income is based on gross sales but the input expenses have risen out of control to limit the net margin to the farmer.

High grain prices and low margins are creating even greater risk for our producers of food. Our nation's farmers have been resilient over the years yet they are advancing in age with no young to follow in many cases. You can increase this decline by making the risk more and endangering our internal production of foodstuffs across this nation by taking a cookie cutter, one-size-fits-all approach. Each region is different and we need diversity in the program. Rather than cut, we should retain the direct payments to buffer the risk. If anything, we need a price trigger to increase the direct payments as the cycle of prices decline and inputs remain high.

The main point to consider is the total farm bill yields very little to the producers by assistance through direct payments. The total bill costs the budget \$145 billion while the farm and commodity part is only \$18.85 billion all of which is not directed to producers of crops. This is the only true safety net available to farmers to lower risk and ultimately keep them in business for the nation's food security. It is one of the smallest parts of the farm bill.

ATTACHMENT 1

5-3-2012

Re: GSA waste to the system

I was told recently by a Federal agency employee about running out of copy paper and getting it locally at a much cheaper price. It seems they are required to buy from and through General Services Administration but GSA didn't have the paper so they just went locally and purchased some. This intrigued me and I did a little pricing.

Without trying to find the very cheapest prices, I simply obtained a 2012 GSA catalog and did an Internet search for office supplies. Here are my comparisons for common items and I found none that were higher than those quoted by GSA.

| | | | | |
|------------|------|------------------|--------|--|
| GSA | 5000 | copy paper | 41.33 | |
| Quill | 5000 | " " | 34.99 | |
| Sam's | 5000 | " " | 29.88 | save 38.32% increase plus save shipping |
| GSA | 12 | G2 gel pens | 18.85 | |
| Office Max | 12 | " " | 14.99 | |
| Sam's | 12 | " " | 12.63 | save 49.25% increase plus save shipping |
| GSA | 1 | electric stapler | 562.23 | |
| Office Max | 1 | " " | 389.99 | |
| Sam's | 1 | " " | 344.00 | save 63.44% increase plus save shipping |
| GSA | 1 | 2 drawer file | 490.69 | |
| Office Max | 1 | " " | 169.99 | |
| Sam's | 1 | " " | 164.98 | save 197.43% increase plus save shipping |
| GSA | 1 | 5 drawer file | 685.91 | |
| Office Max | 1 | " " | 409.99 | |
| Sam's | 1 | " " | 399.98 | save 71.49% increase plus save shipping |
| GSA | 1 | HP 29 X Toner | 174.93 | |
| Office Max | 1 | generic toner | 149.99 | save 16.68% increase plus save shipping |

As we look for savings for the nation, let us first look at our gross waste in requiring and promoting use of GSA to cost our agencies valuable money that could go to save programs under the chopping block. At the least, we should start here to find a way to eliminate this waste. I did not try to find the worse of differences; this was a random look in general at common items and a comparison from the lowest price in percentage with the difference as an increase of cost.

ROBERT T. GRIFFIN.

COMMENT OF KASANDRA GRIFFIN

Date Submitted: Friday, May 11, 2012, 12:01 p.m.

City, State: Portland, OR

Occupation: Public Health Advocate

Comment: I would like to see a farm bill structured to improve the health and well-being of all Americans, which in turn would reduce the health care burden we are facing. I want to see a gradual decrease of commodity subsidies, especially corn, and a rapid increase in subsidies to fruits and vegetables, so that we can decrease their cost to consumers. I also want to see an increase in resource conservation programs, organic agriculture support, and direct marketing assistance. I believe this type of a farm bill can improve rural economies, improve American's health, and protect our farmland and natural resources.

COMMENT OF STEPHANIE GRIFFIN

Date Submitted: Thursday, May 10, 2012, 11:58 a.m.

City, State: Tucson, AZ

Occupation: Environmental Health Sciences Researcher

Comment: The farm bill has the power to transform agriculture and communities, halt the obesity epidemic, and prevent environmental destruction from chemically-intensive factory farming practices. End subsidies for commodity agricultural products (they don't need the help any more than the oil companies do) and increase subsidies for small producers, especially organic farmers. Incentives matter. If farmers have a reason to produce healthful products and sell them locally, they will. America is watching!

COMMENT OF LINDA GRIFFITH

Date Submitted: Friday, April 20, 2012, 1:30 a.m.

City, State: Altadena, CA

Occupation: Educator (College Professor)

Comment: The farm bill is long overdue for reform. I would like my tax dollars to go to helping small organic farmers learn best practices for using resources sustainably to produce healthy food. We should have stopped years ago adding such vast sums to the coffers of bloated huge agribusinesses that waste so much petroleum making fertilizers, endanger our health with pesticides and GMO seeds, and maintain their financial support from the government by the fundamentally corrupt intercession of lobbyists. We're falling like the Roman empire of yore, pulled down by the greed of a few. Turn this around: direct monies where they will help give jobs to many and produce healthy food. Please!

COMMENT OF FRANCES GRIFFITHS

Date Submitted: Friday, May 18, 2012, 12:56 p.m.

City, State: Raleigh, NC

Occupation: Physician

Comment: I am a retired physician, very concerned that our current system, fully influenced as it is by agribusiness, does not adequately take account of best practice as regards public health.

COMMENT OF RICHARD GRIGGS

Date Submitted: Friday, May 18, 2012, 2:41 a.m.

City, State: Kannapolis, NC

Occupation: USPS Manual Clerk

Comment: The 2012 farm bill is the most important legislation to come before Congress. Sustainable, environmentally safe farming practices are absolutely vital to a healthy America, free of GMO and pesticide tainted food. If this were done right, we wouldn't need an Affordable Care Act.

COMMENT OF LYNNE GRIMALDI

Date Submitted: Sunday, May 20, 2012, 2:10 p.m.

City, State: Cape Neddick, ME

Occupation: Retired 1st Grade Teacher

Comment: I endorse all of the input that Chellie Pingree has given to the farm bill. These include consideration and protection of small local farmers and organic farmers who work toward providing our communities with nutritious foods and provide the opportunity for citizens to improve their health, at reasonable prices, and defray the cost of health care, particularly children!

COMMENT OF R. GRIMM

Date Submitted: Friday, May 18, 2012, 11:19 p.m.

City, State: Berkeley, CA

Occupation: Unemployed

Comment: I am writing today as a constituent to ask that you help support the most strongest and sustainable farm bill possible.
Specifically:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Reports from Washington D.C. about the farm bill negotiations have been quite outrageous. According to an editorial in the *San Francisco Chronicle* by Environmental Working Group's Ken Cook and Kari Hamerschlag, Republicans in the House Agricultural Committee have already "voted to slash \$33 billion from the food stamp program while leaving farm subsidies unscathed."

The editorial goes on to report on the latest agribusiness "Trojan horse" that gladly steals food from the mouths of the hungry to create a "\$33 billion new entitlement program that guarantees the income of profitable farm businesses. That's on top of \$90 billion in subsidies for crop and revenue insurance policies."

If this weren't egregious enough, the Senate Agricultural Committee has already voted to cut \$4 million from organic research funding and cut funding to support Beginning Farmers in half. This is outrageous and completely unacceptable!

At the same time, the Senate Ag Committee has voted to get rid of wasteful subsidy payments. It has proposed to replace it with a new subsidized insurance program that leading sustainable agriculture advocates are calling rife with potential for fraud and abuse.

While Congress is looking to get rid of direct payments to commodity farmers, the subsidized insurance program it proposes to replace it with will allow giant commodity farmers and insurance companies to walk away with a multitude of taxpayer dollars while putting the land, soil and environment at greater risk.

We can't allow this to happen. Please join me in supporting real reform and a healthy, organic future.

Thanks as always for being my Progressive voice in our Nation's Capital.

COMMENT OF JACOB GROELL

Date Submitted: Saturday, May 19, 2012, 12:10 p.m.

City, State: Janesville, WI

Occupation: Cheese Factory Worker

Comment: Please support organic local foods and the opportunities for more local people to start profitable small farms. Industrial agriculture has a negative effect on us as individuals and as local communities. Thank you for your consideration.

COMMENT OF JEN GROEN

Date Submitted: Friday, May 18, 2012, 11:45 a.m.

City, State: Chicago, IL

Occupation: Unemployed

Comment: Farm policies should not promote excess production of crops, as this turns food into commodities and takes income from the farmers. Farm policies should encourage fair business trade, proper land management and healthy, diverse agricultures.

COMMENT OF STAN GROFF

Date Submitted: Monday, April 02, 2012, 7:14 p.m.

City, State: Medford, MN

Occupation: Retired

Comment: Dear Representative Walz:

I am a citizen of Steele County and as such I strongly urge you to support existing funding levels for the Supplemental Nutrition Assistance Program (SNAP) within the farm bill.

One in nine Minnesota citizens struggles to put food on the table. In Steele County, at least ten percent of the population or close to 4,000 people are food insecure. SNAP is critical to maintaining good nutrition and health among our population.

Economic studies in Minnesota show that people who lack access to adequate nutrition are more often chronically ill; children don't fully develop physically and cognitively and are more prone to fail courses, repeat grades and drop out of school before graduation. The cost of hunger's impact—largely as uninsured medical care—is conservatively estimated at \$1.6 billion annually. Cutting SNAP or limiting access to it will increase charity care caseloads for the counties, which will be borne by local property taxes.

Last but not least, every dollar of SNAP purchases goes into the local economy and generates \$1.73 in economic activity. This is not a net expense; it is a net gain of 73% that supports jobs on Main Street. In a time of high unemployment, we cannot afford to add to the unemployed by reducing community economic assets of which SNAP is one.

As a constituent and as a public servant, I strongly oppose cuts to critical anti-hunger programs SNAP, TEFAP as well as the Commodity Supplemental Food Program (CSFP) for seniors and Women, Infants and Children (WIC)

For the sake of our neighbors who can't earn enough to get the food they need, it is important to maintain funding for programs that provide basic food assistance programs.

Sincerely,

STAN GROFF,
[Redacted],
Medford, MN.

COMMENT OF JUDY GROSCH

Date Submitted: Sunday, May 20, 2012, 4:06 a.m.

City, State: Nokomis, FL

Occupation: Retired/Grandmother

Comment: Mr. Buchanan,

Please help keep our food clean by composing a farm bill that excludes MON-SANTO GMOs and supports small local farmers.

COMMENT OF CHERYL GROSS

Date Submitted: Friday, May 18, 2012, 3:05 p.m.

City, State: Sarasota, FL

Occupation: Environmental Scientist

Comment: The continued poisoning of our environment through the use of pesticides and the development and planting of crops genetically modified to produce or be resistant to pesticides is leading to a complete disruption of the environment that supports agriculture. To truly meet the requirements of the world's growing population it is vital to support a return to smaller farms and organic farming techniques that protect and enrich the environment and provide nontoxic, nutrient-rich foods. Monocrop culture, particularly with genetically modified crops, leads to depleted, poisoned soil, contaminated water and nutrient deficient food crops. The farm bill should reflect the growing knowledge that corporate farms and Monsanto GMO's are not in the public interest and should not have taxpayer support through agricultural subsidies. It is time to devote taxpayer dollars and agricultural support programs to smaller, organic farms and farmers that understand, respect and work with our environment to produce healthful crops for America.

COMMENT OF DENA GROSS

Date Submitted: Friday, May 18, 2012, 1:44 p.m.

City, State: Irvine, CA

Occupation: Researcher

Comment: Please do **Not** cut funding for organic research or supporting beginning farmers. If anything we need to increase our efforts to stop allowing big Ag to poison the American food supply. Cutting funding would be shameful.

COMMENT OF STACY GROSSMAN

Date Submitted: Friday, May 18, 2012, 1:41 p.m.

City, State: Bexley, OH

Occupation: Student, Stay-at-Home Mom

Comment: There is too much control of the food industry by a concentrated few. Indigenous food, indigenous people, and cultures are being dismantled and destroyed.

Food has now become toxic and for-profit. It's time to get back to the basics: support local farmers and produce.

COMMENT OF EARL GROVE

Date Submitted: Thursday, May 10, 2012, 10:00 a.m.

City, State: East Canton, OH

Occupation: Electrician

Comment: To me, the trend toward smaller farms and locally grown produce is an excellent way to achieve both healthier food and reduce carbon emissions. Therefore, we need a bill that is friendly to America's small farmers allowing them to compete fairly with the mega farms. Locally grown produce tends to be more affordable and fresher when purchased from farmers markets rather than from larger chain stores and super-sized markets.

COMMENT OF JENNIFER GROVE

Date Submitted: Friday, May 18, 2012, 9:07 a.m.

City, State: Omaha, NE

Occupation: Cytogenetic Technologist

Comment: I want organic fruits and vegetables at a reasonable cost. I would like to see fresh produce being a more economical choice for me and my family *versus* processed foods made from corn and soy!

COMMENT OF NANCY GROVE

Date Submitted: Friday, May 18, 2012, 12:41 p.m.

City, State: Atherton, CA

Occupation: Physician

Comment: Don't make taxpayers pay twice, first to subsidize producers of high-calorie, low-value crops (*e.g.*, corn which is converted to high fructose corn syrup) and then to treat the effects of obesity, Type 2 diabetes and heart disease. Conventional agribusiness does not need our subsidy dollars; small farmers growing a variety of produce locally do.

COMMENT OF LINDA GROVES

Date Submitted: Wednesday, May 09, 2012, 9:44 p.m.

City, State: Harleysville, PA

Occupation: Small Business Owner

Comment: Thank you for your attention to help people in this country get the kinds of foods they need for their best health. Good food is expensive, but it is the best medicine, when paired with some exercise. The best foods are raised by farmers who love the land, love to feed and nurture animals used for food, without chemicals, without GMO, just **Old School** food.

LINDA GROVES.

COMMENT OF JANET GRUBAUGH

Date Submitted: Tuesday, May 08, 2012 12:23 p.m.

City, State: Mansfield, OH

Occupation: Florist, Farmer & Director of a Food Pantry

Comment: As a volunteer at a hunger program, I am writing to share my concern about hunger in Ohio. With unemployment still high and many Americans still struggling to make ends meet, anti-hunger programs are helping many of our neighbors just put food on the table.

Nearly 50 million Americans are living in food insecurity. While food banks, churches, and pantries are doing great work in our community, charity alone cannot meet the need for food assistance. My program, Lucas Area Food Pantry in Lucas Ohio just outside of Mansfield Ohio serves about 1,000–1,100 families each month, so many more than we were serving when the recession began.

A pantry client called and asked if distribution was Saturday and I told her it was the following Saturday, the following was the short conversation I had with her . . . “Are you okay?” I have 4 cans of soup and some soda crackers, I can wait.” This was a family of 4 and they were going to wait a week for food! **No, No**, it's **Not** okay!

Congress should do its part by continuing to support anti-hunger programs like the Supplemental Nutrition Assistance Program (SNAP), The Emergency Food Assistance Program (TEFAP), and the Commodity Supplemental Food Program (CSFP), all of which are authorized in the farm bill.

Cutting anti-hunger programs will increase hunger in America. Given the associated health care and educational costs of hunger and poor nutrition, cuts to anti-hunger programs are short-sighted.

I ask you to please remember the families who are struggling in our country, and urge you to protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization.

COMMENT OF CATHERINE GRUENSTEIN

Date Submitted: Friday, May 11, 2012, 11:45 a.m.

City, State: Oakland, CA

Occupation: Nonprofit Sector

Comment: Please support a 2012 Farm Bill that does not compromise the SNAP program—new environmental protections and benefits for sustainable agriculture should not come at the expense of my fellow citizens who need food assistance.

COMMENT OF SARAH GUARE

Date Submitted: Friday, May 18, 2012, 10:34 a.m.

City, State: North Adams, MA

Occupation: Editor of Farming Books

Comment: Please support small farmers, the majority of whom are practicing sustainable methods for the care of the Earth and everyone and everything on this planet. We need more people willing to think and work with a holistic viewpoint if we are to truly nourish ourselves.

COMMENT OF JOANNA GUBMAN

Date Submitted: Friday, May 18, 2012, 7:12 p.m.

City, State: San Francisco, CA

Occupation: Fellow, in Solar Electricity

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

In general, I support promotion of organic farming practices, dismantling incentives for monocultures, dismantling incentives for specific foods such as corn and soy, protecting and incentivizing use of heirloom and non-engineered crops that help to preserve biodiversity, ensuring that farmers pay for water-intensive, energy-intensive, and environmentally damaging farming practices, supporting small farms, and better educating consumers about where their food comes from and how it was produced. I also support providing assistance to lower-income individuals to enable them to afford healthy food. The government should also set an example in its own food sourcing, for Federal employees and for school lunches.

COMMENT OF MICHELLE GUBMAN

Date Submitted: Saturday, May 19, 2012, 8:31 p.m.

City, State: San Francisco, CA

Occupation: Product Marketing Manager

Comment: I support promotion of organic farming practices, dismantling incentives for monocultures, dismantling incentives for specific foods such as corn and soy, protecting and incentivizing use of heirloom and non-engineered crops that help to preserve biodiversity, ensuring that farmers pay for water-intensive, energy-intensive, and environmentally damaging farming practices, supporting small farms, and better educating consumers about where their food comes from and how it was produced. COMMENT OF JEAN GUENTHER

Date Submitted: Saturday, May 19, 2012, 3:07 p.m.

City, State: Burlington, VT

Occupation: Psychotherapist

Comment: Citizens—not chemical corporations—should be able to eat organic, non-GMO foods, so stop allowing these chemical & GMO intrusions on everyone's soil, air, and right for healthy, safe food. WE need to take this lesson from Europe!

COMMENT OF MICHAEL GUERRA

Date Submitted: Sunday, April 08, 2012, 8:20 a.m.
City, State: San Antonio, TX
Occupation: Organizational Development
Comment: Please protect critical food programs like SNAP. This safety net for people in poverty, and the emphasis on healthy lifestyles, is key to a good economy.

COMMENT OF RICARDO GUERRERO

Date Submitted: Friday, May 18, 2012, 3:12 p.m.
City, State: Covina, CA
Occupation: Pharmacy Service Rep.
Comment: With more and more research showing positive's in consuming organic products, it is vital no funding be pulled from research involving organic products. It is our right to pursue happiness as citizens of the United States of America, **Health** being a major factor in that pursuit. Please support the field of Organic Research and Farming, if only for the sake of fellow humanity.

COMMENT OF GEORGE GUGICH

Date Submitted: Saturday, May 19, 2012, 8:09 p.m.
City, State: Baton Rouge, MI
Occupation: Restaurant Owner
Comment: All Plant based foods should be clearly labeled as Organic, Conventionally Produced or GMO.

COMMENT OF LILACE GUIGNARD

Date Submitted: Saturday, May 19, 2012, 10:01 a.m.
City, State: Mansfield, PA
Occupation: Teacher, Volunteer Farm Market Manager
Comment: As a manager of a rural farmers market, I see firsthand how the current subsidies benefit agribusiness and make it harder on small producers. Small producers who farm organic or at least more sustainably, are key to our nation's food security. People want local, fresher food that's affordable. It's more nutritious, it keeps money in the local economy, and keeps farmland from being subdivided and lost forever. GMO products and giants like Monsanto do not need government help. The people do—the biological, not corporate, ones!

COMMENT OF CLAUDE GUILLEMARD

Date Submitted: Saturday, May 19, 2012, 12:31 p.m.
City, State: Baltimore, MD
Occupation: Teacher
Comment: It is absolutely crucial to my family that a farm bill protect local food, organic practices, and family farming. More and more research shows the link between industrial, uncontrolled, agricultural practices and health ailments.

COMMENT OF SANIYE GUNGOR

Date Submitted: Friday, May 18, 2012, 9:59 a.m.
City, State: Hurleyville, NY
Producer/Non-producer: Producer

Size: Less than 50 acres
Comment: Our nation's health and well being depends on clean sustainable agriculture friendly to Earth, animals and humans, to share and thrive together supporting one another!

COMMENT OF KARLENE GUNTER

Date Submitted: Friday, May 18, 2012, 5:43 p.m.
City, State: Rochester, NY
Occupation: Professor (Retired)

Comment: We need to conserve farmland and family farmers. Corporate farmers or farmers with huge incomes should not receive any government money. Farmers should not poison their neighbors with insecticides or herbicides. Factory chicken, hog and beef farms should not be permitted to poison their neighbors with toxic air and wastes. Farmers should be rewarded for best practices in farming that protect farmland from degradation and don't use excessive water.

COMMENT OF ALICE GÜNTERT

Date Submitted: Saturday, May 19, 2012, 4:20 p.m.

City, State: Rego Park, NY

Occupation: Free-Lance Biologist

Comment: American Agriculture has acquired a fearful reputation on the International Parquet. U.S. Ag Exports pressure local economies around the world to buy unwanted products. These products probably undermine more American Diplomatic Efforts than fought wars. These products cause people around the world to disdain the U.S. and the important democratic values that our founding fathers cherished. Have we forgotten about the Boston Tea Party?

Only a return to sustainable Agricultural Production can turn this situation around.

COMMENT OF JUDI GUSTAFSON

Date Submitted: Wednesday, May 16, 2012, 11:23 p.m.

City, State: Forest City, NC

Producer/Non-producer: Producer

Type: Fruits, Poultry/poultry products, Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: I am a small farmer who tries to maintain sustainability. I find it difficult especially when rules are applied to my farm that were written for corporations. Please consider small farmers in the farm bill. We are truly the backbone of America.

COMMENT OF RAE ANN GUSTAFSON

Date Submitted: Friday, May 18, 2012, 4:24 p.m.

City, State: Mill Valley, CA

Occupation: Registered Nurse

Comment: It is beyond time to remember that it is the people of this country that are more important than the pocketbooks of a very few corporate billionaires. We need healthy food that is free of anything unnatural, that is the way it was before humans started messing with it with chemicals, genetic engineering, *etc.* We don't know how these things will affect us in the distant future. And most of us don't want to be the guinea pigs! Please let us go back to nature.

COMMENT OF JOSEPH GUSTON

Date Submitted: Sunday, May 20, 2012, 1:37 p.m.

City, State: Poughkeepsie, NY

Occupation: Retired

Comment: There must be a fair farm bill, not one that caters to large agribusiness at the expense of everything and everyone else. Don't use subsidies as a blunt weapon. Thank you.

COMMENT OF SHARYN GUTHIE

Date Submitted: Friday, May 18, 2012, 7:20 p.m.

City, State: Hickory, NC

Occupation: Nutritionist

Comment: For the health of our nation, the well-being of our environment, and the restoration of responsible, sustainable farming methods, I urge you to consider the reformation of the farm bill. Thank you!

COMMENT OF NANCY GUTIERREZ

Date Submitted: Friday, May 18, 2012, 3:36 p.m.

City, State: Palm Desert, CA

Occupation: Substitute Teacher

Comment: The farm bill's focus should be on supporting organic and non-genetically modified produce. The farm bill must address long-term solutions. Easily, about 80% of Americans (those that understand that horrible science of genetic engineering) do not want GMOs.

The farm bill should include the recommendations of the scientific community, not from the corporations whose bottom line does not include the health and well-being of its citizens. The farm bill needs to change to reflect the long-term needs of its citizens, not the corporations in agriculture and food producers who only care about profit.

COMMENT OF GEORGINA GUZZON

Date Submitted: Friday, May 18, 2012, 1:38 p.m.

City, State: Santa Barbara, CA

Occupation: Administrative Assistant

Comment: Please make every effort to steer our country toward an agricultural future that will promote health, not just for consumers, but for the people who produce our food.

We have the right, as consumers, to choose what we eat and to know how it was produced. If the laws of this country create an environment that is inhospitable to organic, sustainable food grown by smaller, more localized farms and ranches, the government will essentially be limiting our choices.

Please, please help to create an environment in our country in which healthful, responsibly grown and raised food is not an upper-middle class luxury.

COMMENTS OF ABRA GWARTNEY

Date Submitted: Friday, May 18, 2012 4:57 p.m.

City, State: Portland, OR

Occupation: Retired

Comment: Big Ag., aka the industrial food producers, use the current farm bill to grab 85–90% of the subsidy and work 24/7 to put small organic farmers out of business and then buying up their farm lands at bargain basement prices to expand Big Ag's grip on that precious farm bill. This expands the use of GMO plants that go to market in the U.S.A. This is terrible news for the American consumer! The farm bill is overdue for or a complete over haul to prevent a bully from tilting the playing field in favor of the bully!

Date Submitted: Friday, May 18, 2012, 5:10 p.m.

Comment: Make sure that the playing field is **Level** for **All** players in agriculture. Currently, Cargill et al. takes advantage of their influence in the farm bill! Reduce industrial farms' influence over the small mom & pop organic farms to keep them in business. With GMO rapidly becoming the norm in our super markets, organic produce and small farm animals becomes extremely important for the consumer to access.

COMMENT OF JENNIFER H.

Date Submitted: Friday, May 18, 2012, 2:41 p.m.

City, State: Edina, MN

Occupation: Real Estate Broker

Comment: Without reading the entire proposed bill, I find it difficult to elaborate on all particular items that may be included. However, in general, I would like to comment that presently I am very concerned about the current policies that are in place, and concerned about policies that are in discussion, particularly with regard to genetically modified seed and such farming. Genetically modified seed and farming policies should NOT have precedence over organic farming. In fact, all policies should strengthen and aim for all organic farming and aim to reduce and eliminate all GMOs. The future impact of these GMO strategies are unknown, first and foremost, and dangerous. Additionally, organic and natural farmers should in no way be penalized by GMO companies or policies supporting such GMO procedures. GMO farming should be restricted from most areas and not allowed near organic farms. We should be focused on conserving our land and rotating crops accordingly to maintain the benefits and nutrients of the soil. Prairie grass lands and other natural habitats should also be protected. We should restrict the use of pesticides and chemicals that are negatively impacting our natural resources, such as the negative affects it is having on the bee and the grand contribution the bee makes to our agricultural industry. Not to mention, protecting the wetlands, rivers and streams from pesticide and chemical run off, and preserving our natural water supply and re-

sources is imminent. We need to get back to basics. We need to use common sense. We need to stop the expansion of GMOs, protect our natural resources, and get back to a healthy and more natural way. The farm bill needs to protect these natural resources and support the expansion of organic farming.

COMMENT OF BILL HAAS

Date Submitted: Thursday, May 17, 2012, 1:29 p.m.

City, State: St. Louis, MO

Occupation: Teacher, Candidate for MO Lt. Gov.

Comment: Require Conservation Compliance for Taxpayer Subsidized Crop Insurance Programs in the 2012 Farm Bill to restore the link between soil and water conservation and taxpayer benefits to farmers. This would ensure that all new crop and revenue insurance or other risk management programs that make up a safety-net for farmers do not incentivize environmental destruction and it helps protect America's investment in our farmland and farmers.

Set reasonable limits on taxpayer-funded crop insurance subsidies to help keep costs from continuing their upward spiral.

Help grow jobs by retaining programs like the Value Added Producer Grants Program. Guarantee \$30 million of mandatory funding per year. VAPG provides seed money to help farmers innovate in agriculture and create jobs while securing a sustainable path to market-based farm profitability.

Help grow local farm economies and support healthy food in schools by providing flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.

Retain effective conservation programs in the farm bill that deliver clean water and wildlife benefits.

Grow farmers through mandatory funding for the Beginning Farmer and Rancher Development Program. The National Sustainable Agriculture Campaign recommends \$30 million in mandatory funding. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new agriculture start-ups.

Secure our food future and fund the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.

Dear House Agricultural Committee:

Because of the important role farmers play in our food system, taxpayers have supported a safety net for farmers for nearly 30 years, always in return for a guarantee that subsidized farmers will follow basic conservation practices in their fields to protect soil and water. This revolved around the basic realization that while Americans needed food, it was critical to employ conservation practices in order to preserve the economic viability and productivity of our farmlands and resources for the future.

As the House Agriculture Committee prepares your draft of the farm bill, I urge you to restore the link between taxpayer-supported subsidies for crop insurance and conservation compliance protections that will protect the nation's water and land.

This action is especially important as Congress considers eliminating direct payments, the major subsidy program that is linked to conservation compliance, and moving some of those funds to support increased subsidies for crop insurance, which lacks compliance requirements. Unless you help to reconnect crop insurance subsidies to conservation compliance, a significant part of farmers' incentive to follow conservation plans will vanish this year.

Farmers need crop insurance as part of their safety net and the public needs basic conservation practices on farms to make sure that quality farmland and water can support future generations as well as the current needs of our country. We cannot accept sacrificing long-term economic and environmental sustainability for short-sighted and short-term economic profits.

Connecting eligibility for crop insurance subsidies to conservation compliance is fiscally responsible and ensures public subsidies for farmers' insurance premium payments align with the public's interest in basic conservation of our soil and water. Missouri consistently ranks in the top five for soil loss, losing more than 5 tons per acre per year, so we have a lot to gain.

Sincerely,

BILL HAAS.

COMMENT OF MARTHA HABER

Date Submitted: Friday, May 18, 2012, 1:47 p.m.

City, State: Long Beach, CA

Occupation: Retired

Comment:

1. Do not take money from the food stamp program. Take it from the farm subsidies instead.
2. Stop supporting the large agribusiness concerns, and begin supporting small family farms, especially those that are using organic farming methods to produce food for our nation.
3. It is wrong for Congress to pass laws and programs that give more money and power to huge companies at the expense of the small farmer. Listen to the will of the people, and stop climbing into bed with agribusiness. Make a commitment to the health of our nation, instead of to the coffers of the multimillionaire mega-farm corporations.

COMMENT OF SUZANNE HACHEY

Date Submitted: Friday, May 18, 2012, 12:25 p.m.

City, State: Stetson, ME

Occupation: Beginning Farmer

Comment: We need support of local produced **Real** food without preference to large factory farms who only care about profits! Local farms care about healthy food for their neighbors and families. Monsanto and General Foods are not what our future should include.

COMMENT OF CHRISTINE HACHFELD

Date Submitted: Friday, May 18, 2012, 12:20 p.m.

City, State: West Concord, MN

Occupation: Research Tech

Comment: I would like to see subsidized programs for vegetable and organic farmers. We need to stop putting such emphasis on corn and soybean production. Corn production trickles down to contribute to obesity by producing corn syrup for junk foods juice and soda pop. We need to wean America off sugar and promote eating healthy to help lower health care cost. Farmers will not produce healthy foods if there is no profit margin like with corn and soybean. One-third of Americans are at an Ideal weight statics show, due to poor diets and sedentary lifestyles we are reaching a huge epidemic and to change this it needs to start somewhere. It is cheaper for people to feed their kids fast food than local produce and healthy foods. This is truly sad.

COMMENT OF CHERIE HACKER

Date Submitted: Saturday, May 19, 2012, 6:24 p.m.

City, State: Sacramento, CA

Occupation: Teacher

Comment: I have a single organic garden in an urban, community garden plot. I'd like all of my community, grandchildren, and nation to be able to eat save non-GMO foods. We have a right to have the labeled knowledge of what we are buying with all food products and to abolish products and seeds that will adversely affect future generations on this planet.

COMMENT OF LAURA HACKNEY

Date Submitted: Monday, May 07, 2012, 5:59 p.m.

Date Submitted: Friday, March 16, 2012, 5:52 p.m.

City, State: Dayton, OH

Occupation: Retired

Comment: I strongly support passage of the farm bill. Our country simply cannot turn its back on the people who would benefit from this legislation. The America of which I am proud helps its poor and needy in times like this. Vote for this bill to keep our country living up to its ideals.

COMMENT OF MARK HADLOCK

Date Submitted: Wednesday, April 11, 2012, 10:40 a.m.

City, State: Rio Rancho, NM

Occupation: COO

Comment: Please increase support of Federal nutrition programs. Last year New Mexico saw a reduction of 37% in TEFAP food distribution which means that over 1.2 million meals were not available to people who need donated food to survive. You **Must** take care of the most basic needs of the people you have been elected to represent before considering any non-essential social improvements.

COMMENT OF HARRY HAFF

Date Submitted: Friday, May 18, 2012, 2:02 p.m.

City, State: Prescott, AZ

Occupation: Teacher

Comment: Commodity farmers should not get tax subsidies. Period. Agribusiness is about corporate profits and not about what is good for the country. Therefore, they should stand or fall without corporate welfare of any kind.

According to the National Sustainable Agriculture Coalition's Ferd Hoefner, "By failing to place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs, the Committee has failed to do the full reform that is needed." The very same practices that caused such agricultural havoc during the depression—poor soil management, excessive use of pesticides and fungicides, over reliance on monoculture farming and chemical fertilizers—will be perpetuated unless meaningfully addressed and real progress is made in farming practices and government welfare for agribusiness.

Thank you.

City, State: San Francisco, CA

Occupation: Food Educator

Comment: Please do the simple thing and make eating support the long-term goals of our health and our planet. The last 100 years was successful for making sure that our food supply is plentiful, but now it is time to make our food supply healthier for all as well as abundant. Thank you for your consideration.

COMMENT OF CASSANDRA P. HAGE

Date Submitted: Thursday, May 17, 2012, 9:25 a.m.

City, State: St. Louis, MO

Occupation: Environmental Educator

Comment: Dear House Agriculture Committee:

I work for a small nonprofit organization that educates people about environmental issues and encourages them to support the local green economy. I took several sustainable agriculture courses in college, worked on a small organic farm for two summers and currently produce ample food, including vegetables, fruit and honey, on my 1/8 acre plot in St. Louis City. Whatever I can't produce myself, I try to source from local farmers and producers. In sum, sustainable food production and environmental conservation are important to me and my social and professional networks.

Because of the important role farmers play in our food system, taxpayers have supported a safety net for farmers for nearly 30 years, always in return for a guarantee that subsidized farmers will follow basic conservation practices in their fields to protect soil and water. This revolved around the basic realization that while Americans needed food, it was critical to employ conservation practices in order to preserve the economic viability and productivity of our farmlands and resources for the future.

As the House Agriculture Committee prepares a draft of the farm bill, I urge you to restore the link between taxpayer-supported subsidies for crop insurance and conservation compliance protections that will protect the nation's water and land.

This action is especially important as Congress considers eliminating direct payments, the major subsidy program that is linked to conservation compliance, and moving some of those funds to support increased subsidies for crop insurance, which lacks compliance requirements. Unless you help to reconnect crop insurance subsidies to conservation compliance, a significant part of farmers' incentive to follow conservation plans will vanish this year.

Farmers need crop insurance as part of their safety net and the public needs basic conservation practices on farms to make sure that quality farmland and water can support future generations as well as the current needs of our country. We cannot accept sacrificing long-term economic and environmental sustainability for short-sighted and short-term economic profits.

Connecting eligibility for crop insurance subsidies to conservation compliance is fiscally responsible and ensures public subsidies for farmers' insurance premium payments align with the public's interest in basic conservation of our soil and water. Missouri consistently ranks in the top five for soil loss, losing more than 5 tons per acre per year, so we have a lot to gain.

Thank you for seriously considering my comments and making sustainable, economically and environmentally viable incentives a strong component of the farm bill.

Sincerely,

CASSANDRA P. HAGE.

COMMENT OF ALEXANDRA HAGER

Date Submitted: Friday, May 18, 2012, 4:55 p.m.

City, State: Berryville, VA

Occupation: Alpaca & Horse Farm Owner/Homemaker

Comment: Please reject the spending cut that singles out conservation, research, extension, and other programs important to sustainable and organic agriculture. It terminates programs that serve beginning and minority farmers without making any cuts to commodity or crop insurance programs. If cuts are to be made then everything must be on the table. Cuts must be fair, equitable and based on the merits of each program.

COMMENT OF ALICE HAINING

Date Submitted: Friday, May 18, 2012, 12:07 p.m.

City, State: East Setauket, NY

Occupation: Self-Employed Actor, Yoga Teacher, and Mother

Comment: It is well beyond time for the traditional farm subsidies to end. I ask Congress to support small family farmers, sustainable and organic agricultural farming practices, to end GMOs being sold without labeling, and to back independent scientific research into best practices to create secure, regional, sustainable farming, harvesting, slaughtering, and distribution networks. Food safety and availability is more crucial to our national security than almost anything else. We can live without bombs, guns, and nuclear waste, but we can't live without safe food, water, and air.

COMMENT OF KAREN HAKUN

Date Submitted: Saturday, May 19, 2012, 12:01 p.m.

City, State: North Wales, PA

Occupation: Psychotherapist

Comment: We need to preserve our land, soil, seeds, and farmers. We need to prevent big agribusinesses from destroying what is left of the healthy food-producing industry.

COMMENT OF JEANETTE HALE

Date Submitted: Monday, April 02, 2012, 9:55 a.m.

City, State: Russellville, AR

Occupation: Conservation District Employee

Comment: My concern for the conservation/agriculture community reaches far beyond my interests as an employee tasked with administering the farm bill programs. It is essential that we enable those that feed us and give us clean water. What is more basic than food, water and clean air? Our future depends on the successfulness and productivity of farmers in America and the need to make stewardship of our natural resources a way of life. Stewardship education in urban America is an area that desperately needs to be addressed, as well as the continued support of beneficial programs for farmers.

COMMENT OF JENNIFER HALES

Date Submitted: Friday, May 18, 2012, 9:56 a.m.

City, State: San Leandro, CA

Occupation: Health Care Worker

Comment: I support families battling hunger, helps communities operate farmers' markets, and am concerned about the part of bill that unfortunately, subsidizes the production of food that is making us and our planet sick.

COMMENT OF JIL HALES

Date Submitted: Friday, May 18, 2012, 1:40 p.m.

City, State: Healdsburg, CA

Occupation: Restaurant Owner

Comment: I support changes to the existing farm bill as succinctly laid out by Slow Food. Our entire way of life here in Sonoma County will depend upon how you vote this farm bill. The ramifications of the bill—making it fair and making it work for smaller producers—will resonate across the country and if implemented help 'grow' sustainable food production that is our heritage and should be part of our future.

COMMENT OF JAMES HALFAKER

COMMENT OF MARIANNE HALL

Date Submitted: Friday, May 18, 2012, 11:49 p.m.
City, State: Eugene, OR
Occupation: Home Gardener and Farmers' Market Shopper
Comment: Time for absolutely No Subsidies for Agriculture. Farm bill for farmers to have Equality of benefits and market accessibility. Organic, non-toxic, and healthful is what the people want, so make it possible for consumers to make the choice in direct markets. Choice by buying in the marketplace; Not by the Lobbyists. No more GMO or shoddy inspected meats, *etc.*, going to market and Label, label, label. No more hidden ingredients. Make all accountable for what is in their food products.

COMMENT OF MICHELE HALL

Date Submitted: Sunday, April 29, 2012, 11:54 a.m.
City, State: Bolingbrook, IL
Occupation: Customer Service Rep.
Comment: I work a full time job and still am unable to afford food, medical, and other minimum life necessities. I'm forced to decide each month whether to pay a doctor bill, a utility bill, or late fees on rent in order to feed my son and myself.

And yet, we don't qualify for food stamp benefits because I earn \$5 more than state qualifiers for benefits. My concern is that if my small family is on the edge then certainly there are so many more like us and even more folks who are less fortunate and unable to provide meals for their families as well. I, personally, know working families in shelters and living in their cars who simply cannot afford to eat, much less eat nutritious meals! Please, don't let Americans go hungry! In America there should not be a family in any community going to "bed" hungry every day God sends! I urge you to support initiatives that will make a way for American families to worry less about their next meal! I wonder if the shoe where on the other foot, would policymakers allow their own families to suffer? I love this country but I cringe each time I look at my son and wonder is today the day we don't eat? Will my neighbors go hungry? I'm ashamed that this is something that Americans must face daily. Don't be ashamed, help your countrymen and do something about it! God Bless America and her less fortunate people!

COMMENT OF PAMELA HALL

Date Submitted: Friday, May 18, 2012, 9:58 p.m.

City, State: New York, NY

Occupation: Retired

Comment: Please do everything that you can to insure that consumers have ready access to all the ingredients and types of alien and composed food as they unsuspectingly purchase it. Do not allow huge businesses to dictate to our farmers and keep them from using the seed that they always have used. Mass production is important but these other issues are important too. I want to know what it is that I am eating. I want to be sure that I am not going to get sick from it or that inhumane means have been used to produce it or that animals up to their knees in excrement are allowed to be called food. Thank you.

COMMENT OF SARAH HALL

Date Submitted: Wednesday, May 09, 2012, 10:20 p.m.

City, State: Burbank, CA

Occupation: Writer

Comment: Small organic farmers and ranchers need to be supported, rather than punished with regulations that require them to spend money they cannot afford to spend. Organic farming is an essential part of a healthy America.

COMMENT OF SHANNON HALLETT

Comment: There should be no reason for hunger in a country which throws tons & tons of leftovers in the garbage.

Date Submitted: May 18, 2012 12:23 p.m.

Comment: Shame on us if we have no control over, what the meat industry is doing now & forever. We are the consumers, we have the right to see inside their dark doors.

COMMENT OF WILLIAM HAMILTON

Date Submitted: Sunday, May 20, 2012, 8:11 a.m.

City, State: Cecilia, KY

Occupation: Self-Employed Truck Driver

Comment: More often than not Corporate Agriculture is rewarded for practices that are detrimental to the to the small farmer and at odds with the principles of the country at large. More consideration needs to be given to the small producers, these are the ones who will keep the people fed and clothed in all times, good and bad not any large corporation.

COMMENT OF DEBORAH HAMLIN

Date Submitted: Thursday, May 17, 2012, 9:31 p.m.

City, State: Falls Church, VA

Occupation: Executive Director, Irrigation Association

Comment:

2012 Farm Bill Development

The pending work in developing the next iteration of the farm bill will be pivotal to the future of U.S. agriculture well beyond the 5 year lifespan of the legislation. We at the Irrigation Association understand and appreciate the daunting task you have ahead of you of not only developing sound policies to keep America at the forefront of agricultural production, but also doing so in the midst of a financial climate this nation has not seen for generations. However, we believe that this Congress, with your leadership and partnership with the U.S. Senate and the Administration, can develop a strong farm bill that is effective, efficient and fiscally responsible. On behalf of the Irrigation Association, we urge you to consider the recommendations set forth in these comments to help you achieve this goal.

First, the Irrigation Association is a trade association representing approximately 1,800 member companies in the irrigation industry. Our members include irrigation product manufacturers, dealers, distributors, consultants, contractors and end users in the agricultural and landscape industries. The mission of the Irrigation Association is to promote efficient irrigation technologies, products and services, and our expertise lies in ensuring every drop of water applied to a crop is done so in an efficient manner, thus leading to more agricultural output per unit of input. Our members not only manufacture and sell efficient irrigation products and technologies to agricultural producers, we also work with the producer on the design, use, implementation and maintenance of their irrigation systems and technologies to ensure maximum efficiency of the water used.

According to the Soil and Water Resources Conservation Act of 2011 Appraisal conducted by the USDA, farms with irrigated crops produced 40 percent of the value of agricultural products sold in 2007, and farms with at least some irrigation were larger than the average farm and had annual sales more than four times higher than their dryland counterparts. As you know, irrigated agriculture is crucial to overall U.S. agricultural production and essential as our nation's population continues to increase. In fact, according to the USAID, water availability threatens to reduce global food supply by more than 10 percent within the next 25 years. If we are to meet the demand of our nation's future generations with a safe and reliable food supply, while remaining productive and competitive on a global scale, the next farm bill must recognize the importance of not only using water efficiently, but also the importance of producing more with the resources that are available now.

The Conservation Title

Like Congress, agricultural production needs to achieve more with the resources provided. The irrigation industry understands the need for the balance between environmental performance and agricultural productivity. For this reason, the Irrigation Association strongly believes in the importance of the conservation programs administered by the NRCS, specifically the EQIP program. Over the years, EQIP has been a key component to not only assist agricultural producers with incentivizing environmentally sound on-farm practices; it has also made U.S. agriculture more productive and competitive globally. As Congress considers changes to the existing EQIP program, the Irrigation Association urges the following:

- Title II programs, including EQIP, should receive sufficient funding, so that on-farm environmental performance goals of the program are achieved;
- Conservation Title programs should be streamlined in a way that does not lessen funding opportunities for agricultural producers, but rather increases opportunities, due to overhead reduction, elimination of redundancies, *etc.*;
- Program delivery should be improved with the continuation of the NRCS's "Conservation Delivery Streamlining Initiative," along with the increased use and support of third-party Technical Service Providers (TSPs) to assist agricultural producers with their conservation plans, ensuring sound decisions for environmental and production performance;
- The EQIP program should expand the priority qualification of irrigation efficiency-related projects;
- The majority of project funding decisions and prioritization should be made at the state level; providing the local, regional and state land managers the ability to match public investments in environmental performance in that state with the type of agricultural production (livestock, specialty, commodity, *etc.*) and watershed enhancement goals.

Technical Service Providers

As we stated earlier, the Irrigation Association continues to be a strong supporter of NRCS and the EQIP program. Through a signed memorandum of understanding with the NRCS, the Irrigation Association's Certified Irrigation Designer (CID) for

agriculture and the Certified Agricultural Irrigation Specialist (CAIS) are recognized by the NRCS. This recognition affords those professionals who hold an agricultural CID and/or CAIS certification the opportunity to become an NRCS Technical Service Provider. As you look into opportunities to promote jobs and third-party expertise in this farm bill, the Technical Service Provider program promotes private job opportunities through consulting agricultural producers on their conservation plans. This program is very positive for the irrigation industry and for on-farm production as producers look to increase yields through applying irrigation water more efficiently. If you'd like more information about IA's certifications and opportunities to promote these professionals through conservation programs, please visit <http://www.irrigation.org/certification/>.

Funding of EQIP Projects

The Irrigation Association recognizes that the improvement of environmental performance of on-farm operations is the goal of the EQIP program. However, we urge Congress to consider expanding the priority funding opportunities associated with irrigation improvements beyond achieving a "net savings of water." As we mentioned earlier, the Irrigation Association supports funding decisions and priorities being made at the local level, recognizing the differing needs in agricultural production in California *versus* Colorado *versus* Florida, for example. We believe that the priority funding of irrigation-related EQIP on-farm projects should expand to also include

- improving irrigation distribution uniformity; and
- reduce impairment of water quality through irrigation efficiencies.

Congress must act to ensure that programmatic policies contained within EQIP and other conservation programs recognize the balance between environmental and agricultural performance. We believe that the addition of these two funding opportunities associated with irrigation efficiencies are a step in the right direction.

Recommendations to Improve AWEP

The Irrigation Association joins groups such as the Family Farm Alliance in calling for improvements to the NRCS's Agricultural Water Enhancement Program (AWEP). As FFA's President Patrick O'Toole stated in his April 26, 2012, testimony before the Subcommittee on Conservation, Energy, and Forestry, "the original AWEP proposal was solid from a conceptual standpoint, but by the time the concept made it through the legislative and administrative process, the program that is now in place is not being implemented in a manner consistent with the original vision. In Arizona, for example, state NRCS local working groups came up with a list of priorities and resource concerns at the request of NRCS headquarters in Washington, D.C. While irrigation efficiency was one of the highest priorities listed, local working groups noted that AWEP simply was not being applied in a way that could maximize its potential benefits. Rather than providing funds directly to irrigation districts, the districts instead have been put in situation where they essentially pass the phone number of the local NRCS office on to the individual landowner, and NRCS takes over from there. In essence, this AWEP has simply become an expansion of the existing EQIP program, which was definitely not the intent when this concept was crafted 4 years ago."

The IA joins the FFA in calling for a more streamlined approach to AWEP that places emphasis on helping farmers and ranchers improve water conservation, management, reuse and efficiency while keeping their operations viable, rather than eliminating irrigated agricultural lands altogether at a time when worldwide demand for food is growing every day.

We must create opportunities within the new farm bill to further improve upon AWEP's initial concept, such as:

- Allowing AWEP to provide direct payments to irrigation districts to work directly with their landowner member farmers on NRCS-approved coordinated water conservation and management projects. Administrative expenses for such partners should be allowed, but capped;
- Irrigation districts and/or landowners should be allowed to implement water conservation or water quality projects outside of the normal projects funded under the EQIP program, given that they can show improvements to either water quantity or quality;
- Irrigation districts or similar entities should be allowed to be the basis for "pooling" arrangements, where the benefits of a project which affects multiple landowners is funded by "pooling" their individual AWEP interests into a larger, coordinated project;

- Direction must be provided to improve how NRCS program administrators deliver timely and accurate information, provide reliable and transparent processes, and set firm deadlines;
- Administrative costs associated with any work performed by the NRCS should be capped at a reasonable level;
- The role of the Bureau of Reclamation in coordinating with NRCS in the implementation of this program in Western states must be well defined, and should complement the collaborative philosophy (between the Departments of Agriculture and Interior) embedded in the “Bridging the Headgates” initiative endorsed by both the Bush and Clinton Administrations;
- The program should provide assurances that the intent is not to reallocate water away from agriculture, but to help stretch limited water supplies for future regional beneficial use. We do not believe AWEP funds should be used to retire farmland or convert irrigated ground to dryland crops. It must also recognize the traditional deference of Federal agencies to state water laws and allocation systems;
- The money obligated for these programs in the farm bill needs to be “no year” money, so that it doesn’t have to all be obligated in the first year, with nothing left in later years. This has proven to be real hindrance for projects that take more than 1 year to build. Water managers have also noticed that the NRCS funding levels fluctuate, and so they are never sure what level of funding their farmers will receive. During the application process to secure funding, NRCS should agree how much a district is going to receive and ensure this money will be there. To minimize administrative complications, sharing some of the control over funds with the partnering irrigation districts would simplify the responsibilities of the NRCS. Districts could be held accountable through audits and reports delivered to the NRCS.

Regulation Uncertainty

As you are well aware, U.S. agricultural producers and suppliers are currently facing regulation uncertainty. Whether those regulations deal with water availability, water quality or other on-farm practices, we at the Irrigation Association believe that mutual environmental and agricultural productivity goals can be achieved through voluntary programs, such as EQIP, much more efficiently than productivity-hindering regulations. For this reason, the Irrigation Association has joined the Western Agriculture and Conservation Coalition, as a steering committee member and supports all of the recommendations from that coalition. We are excited to partner with Trout Unlimited, Family Farm Alliance, The Nature Conservancy, Public Lands Council, Environmental Defense Fund, California Farm Bureau, Arizona Public Lands Council and the Wyoming Stock Growers Association, as we promote common environmental goals, while recognizing the need for a globally competitive U.S. agricultural sector.

Pass a Farm Bill This Year

Finally, we appreciate all you are doing to advance a farm bill reauthorization this year. This farm bill is among the most important pieces of legislation the U.S. Congress will consider in 2012 and we urge you to continue your work to pass a bill before the current authorization expires. Failure to pass a bill, or “settling” for a temporary extension, will create tremendous uncertainty throughout the U.S. agricultural community and will sharply decrease the positive opportunities that a farm bill passed this year has to offer this year.

Thank you for your time and consideration. We look forward to working with you as your 2012 Farm Bill development continues. If you have any questions regarding these recommendations or for further information regarding our partnership with NRCS and our working with agricultural producers to promote efficient irrigation, please contact John Farner, IA’s Government Affairs Director, at [Redacted] or [Redacted].

COMMENT OF THOMAS HAMLIN

Date Submitted: Friday, May 18, 2012, 3:08 p.m.

City, State: Portland, OR

Occupation: Web Developer and Designer

Comment: A good friend of mine is a farmer in Ashland, OR, where he is struggling to make a living as a CSA and farmer’s market producer. He raises a diverse crop of organics, builds resilient natural systems based on permaculture, and educates his local high school students about farming.

Why should he receive less government assistance than industrial-scale commodity farmers who rely on unsustainable mono-crops, pesticides, herbicides, and nonrenewable energy to produce food that is less nutritious?

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF LOUISE HAMM

Date Submitted: Friday, May 18, 2012, 3:00 p.m.

City, State: Paso Robles, CA

Producer/Non-producer: Producer

Type: Livestock

Size: Less than 50 acres

Comment: As many small farmers such as myself are trying to move away from chemical farming, cutting the organic research is a mistake. We need our organic farms and farmers. It is the way of the future for our country, our environment, and our planet.

COMMENT OF TAMI HAMMAN

Date Submitted: Friday, May 18, 2012, 1:32 p.m.

City, State: Chino Hills, CA

Occupation: Office Manager

Comment: I am a cancer survivor and I know the importance of what we put in our bodies and how it relates to our health. I know we have a healthcare problem. Prevention is the key! I can't afford many luxuries in life please don't take away good healthy food too! I will not buy food with fillers, GMOs, pesticides, *etc.* I hope you do the right thing. Thank you for listening.

A concerned American.

COMMENT OF SALLY HAMMERMAN

Date Submitted: Friday, May 18, 2012, 5:36 p.m.

City, State: West Chester, PA

Producer/Non-producer: Producer

Type: Field Crops

Size: Less than 50 acres

Comment: We are a small, organic, spray-free community building farm whose members share in our produce and our work. We are concerned farmers. Our land and those of us who live on it and from it all work reciprocally to maintain our health and happiness. Governmental representatives should also see their work as farmers who maintain a healthy landscape that feeds them and their supporters. Otherwise the soil from which we farmers gain our livelihood will deteriorate and no longer sustain.

COMMENT OF ROSS HAMMERSLEY

Date Submitted: Friday, May 18, 2012, 12:03 p.m.

City, State: Traverse City, MI

Occupation: Land Use, Agriculture & Environmental Law Attorney

Comment: Over the past 40 years a new breed of farmer has developed highly sophisticated ways of farming with nature that promote soil health, higher nutrient value of food and increased farm income.

In order to meet the serious challenges of the 21st century, U.S. agricultural policy in the farm bill must shift from its focus of creating cheap commodities and artificially propping up income for farmers, toward implementing best agricultural practices for sustainable and organic production methods.

I support:

- (1) the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286);

- (2) Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs;
- (3) The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236); and
- (4) Maintaining the EQIP Organic Initiative.

COMMENT OF HOLLY HAMPTON

Date Submitted: Friday, May 18, 2012, 3:14 p.m.

City, State: San Francisco, CA

Comment: Please support funding for organic food and farming research. This is the only sensible way to ensure that our nation's food supply is not completely overtaken by Big Agriculture's GMO practices. All citizens of this country deserve to have their food truly safe and free from any monopoly that endangers our health through the use of dangerous pesticides and gene manipulation. Don't mess with Mother Nature—respect her!

Thank you for reading this.

JOINT COMMENT OF STEVE & MARY HAMPTON

Date Submitted: Friday, May 11, 2012, 9:06 p.m.

City, State: Seminole, FL

Occupation: Retired Educator & Retired Wall Street Trader

Comment: We are writing on May 11, 2012, to express our interest in the creation of a wonderful Food and Farm Bill. We believe this Bill would create jobs and spur economic growth. We believe this Bill would make healthy food widely available to **All** Americans, including school children. We believe this Bill would help protect our natural resources. We need to protect the **Conservation Stewardship Program** from unfair funding cuts. Our farmers need conservation programs to conserve soil for future generations. We also need habitat to be created/preserved for wildlife.

We believe the Food and Farm Bill represents an investment in the next generation of farmers and ranchers. We believe that \$25 million per year needs to be set up in mandatory funding for the **Beginning Farmer & Rancher Development Program**. We, obviously, need a national strategy and commitment to support beginning farmers and ranchers who are entering agricultural careers.

Finally, the Food and Farm Bill will serve to drive innovation for tomorrow's farmers and food entrepreneurs. The **Organic Agricultural Research & Extension Initiative** needs to be funded at \$30 million/year in mandatory funding. Investing in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.

We look forward to hearing that the U.S. Congress will take these recommended actions to create the 2012 Farm & Food Bill.

With best regards,

STEVE & MARY HAMPTON.

COMMENT OF JUDITH HANCE

Date Submitted: Friday, May 18, 2012, 1:41 p.m.

City, State: Seattle, WA

Occupation: Retired

Comment: Food, its production and safety in growing and in eating, is one of the most important things in our lives. Government is the only agency that can insure the current and future safety of our food supply. In addition, we must encourage young people to be involved in the agricultural community.

To cut back funding in this area is dangerous.

If you have children, grandchildren, or know any children, or even care at all about the health of all our citizens, please be aware of the risks to our current and future welfare as a nation by cutting back on funding in this vital area.

COMMENTS OF JUDITH HAND

Date Submitted: Friday, April 27, 2012, 12:21 p.m.

City, State: Daytona Beach, FL

Occupation: Retired, Disabled

Comment: I worked all of my life, many years in social service, until my disability prevented continuance. I live in an area that is well below the poverty level

and am personally grateful that my church has included a food pantry in their ministries. I think this is the 'poorest' I've ever been. This area needs help and supporting our agricultural resources and food delivery is essential. I've never seen so many homeless as I have since living both on the mainland and even beachside of Daytona Beach, FL. Please support our producers, pave the way for advocates and help those in the glut of low (and no-, many through no fault of their own) in our area. Thank you!

Date Submitted: Saturday, May 12, 2012, 1:36 p.m. Daytona Beach FL

Comment: At 54 years of age, and no longer working due to unexpected disability, I have more time than some to consider issues such as you examine and work with daily. Years ago, I attended town meetings in North Dakota and was struck by the hardships on family farms because of the preferences granted large farms. While still working in and for the State of Florida, I encountered a client whose work entailed gathering ferns in western Volusia County and saw the conditions that he and others faced. While on a committee that joined Flagler and Volusia counties, I learned of the outbreak of (untreated and unaddressed) ill health including AIDS on the farms along Rte. 100 from Bunnell to St. John's county. I've lived in Florida almost 25 years and have seen and lived near more poor people than in my 29 years prior. I've learned about and have gratefully benefitted from a couple of food banks in this area. We have a big problem here and one that is not being addressed. We need to focus on our poor, on those who have no access to nutrition and the important agricultural products that we grow right here in our State. We must stop relying on making money from other States when ours needs our agricultural products so desperately. When I was doing care giving for seniors, granted many had nutritive diets because they had the funds (or they wouldn't have been able to afford the care giving). Since then, I've met many, many seniors without such wealth who are literally living hand-to-mouth. We cannot continue to act as though these folks are few and far between, because they are NOT. It is not something we want to face, but we must. As a Democrat, I don't know how Republicans address these problems. But it is our reality in Congressional District 24. I've never seen so many homeless. It is usually no fault of theirs—we must change that point of view! There are many who don't have families to assist them, who have lost jobs due to the economy not supporting them (and employers hiding behind the "Right To Work State" ethic don't help), who have mental illness that isn't addressed and medicated . . . how do we help our citizens if we continue to yell "small government!" and just swipe them aside as unfortunates?! They are our neighbors, our friends, our former coworkers. How can we sit on our committees without taking seriously the desperate needs of those around us? Thank you!

COMMENT OF NEAL HANDLY

Date Submitted: Saturday, May 19, 2012, 2:54 p.m.

City, State: Furnace, PA

Comment: I am concerned that the support for industrial level farming is far too great. Subsidies for pricing of regular commodity products need to be phased out. At the same time, the government does have a role in making sure that choice is possible. Organic farms need to find markets as well, but should not be inhibited by laws that are designed for the large commodity farming industry.

Labeling is important—consumers should know what they are buying so that they can approach the market with knowledge.

Thank you.

COMMENTS OF HELEN HANNA

Date Submitted: Friday, May 11, 2012 10:40 a.m.

City, State: Sacramento, CA

Occupation: Retired Educator

Comment: We need a farm bill that encourages small family farms and that protects our natural resources. Please protect the Conservation Stewardship Program from unfair funding cuts, and improve it by ranking applications solely on their conservation benefits. Farmers count on this and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife.

Date Submitted: Friday, May 18, 2012, 2:50 p.m.

Comment: It is time for a farm bill that recognizes the needs of small family farmers who grow organic produce and take care of the soil in harmony with nature, instead of subsidizing and rewarding huge monocultures dependent upon the chemicals that are polluting our water and soil and even killing the bees on which our

survival eventually depends. Our government should be smarter about this, starting now.

COMMENT OF AVERY HANNEKEN

Date Submitted: Saturday, May 19, 2012, 7:20 a.m.

City, State: Holland, MI

Occupation: Professional Painter

Comment: Please continue to support local farmers and local communities raise healthy food for people who want to make that choice. Besides aiding the farmers, keeping the monetary aspect in town, providing healthy food choices for families, it is just the right thing to do. Can't we please just make the right choice, the obvious choice for ourselves. Raising organic/healthy food and choosing what goes in our bodies is a freedom that should always be able to be explored. Please for my family and many more, help us out and support simple/healthy living. It just seems instinctively right.

COMMENT OF TRACY HANNEMANN

Date Submitted: Friday, May 18, 2012, 1:10 p.m.

City, State: Milwaukee, WI

Occupation: Singer

Comment: I come from a long line of farmers, at least four generations. I also work for produce once a week on a farm in the Milwaukee area. Two of my brothers are currently farming. Although they are not organic farms, they would like to go in that direction, but the transition is so hard to do and expensive. They don't like having to use Monsanto based seed or fertilizer either. I want to see support of those farmers as well that decide to not only provide organic produce for others, but in turn help the environment by making a strong and difficult choice to farm organically. Many people care about this and want to go this route, but it seems the powers that be would rather not have that happen. Start support for natural, chemical free farming, farmers and people instead of large corporations whose main interest is in profit at the cost of people's health and this Earth.

COMMENT OF MARGARET HANNIGAN

Date Submitted: Friday, May 18, 2012, 12:18 p.m.

City, State: Milford, MA

Occupation: Retired

Comment: I am concerned that many large agricultural companies are ruining this country's soil and adversely affecting the health of U.S. citizens with their unchecked use of toxic chemicals, unneeded use of antibiotics and failure to utilize sound conservation methods. If this farm bill is to serve all Americans, it should include monies for conservation and sustainable agricultural methods.

COMMENT OF JOYCE HANNUM

Date Submitted: Friday, May 18, 2012, 5:01 p.m.

City, State: Union, WA

Occupation: Whole Foods Cook

Comment: PLEASE, no more entitlements for corporate agribusiness! Please limit crop insurance subsidies. I **Support** small organic sustainable farms. Our **Soil Is More Than Just Dirt!** It is a living microcosm upon which our entire life depends. We **Must** protect it.

COMMENT OF ROBERT HANSARD

Date Submitted: Sunday, May 06, 2012, 7:35 p.m.

City, State: Palm Bay, FL

Occupation: C.N.A.

Comment: I think we should try getting them on more sustainable plant based diets, they'll be healthier for it. We shouldn't be feeding anyone the factory farmed diseased tortured animals anymore, it's unsustainable and it's contaminating all the land and waterways, and is the reason we have so many starving people. There are about 7 billion human beings on the planet, and around 65 billion land animals are being raised each year worldwide for human consumption. that's almost 100 times more enslaved animals than humans covering 1/3 of the Earth's land surface: 1 lb of beef cost over 5.200 gallons of water.

COMMENT OF AMY HANSEN

Date Submitted: Friday, May 18, 2012, 12:28 p.m.

City, State: Far Hills, NJ

Occupation: Policy Analyst, New Jersey Conservation Foundation

Comment: Dear Congressman Frelinghuysen and Members of the House Committee on Agriculture:

New Jersey Conservation Foundation is a 50 year old statewide conservation organization. We have used funding from the Farm and Ranch Lands Protection Program (FRPP) to help protect thousands of acres of New Jersey farmland. Thank you for considering our comments on the 2012 Farm Bill.

We urge you to support the Senate funding levels for Agricultural Land Easements, which include the FRPP easements. These easements advance the proven model of leveraging Federal funds through local partners to secure perpetual conservation easements that help keep farm and ranch lands in production, while conserving important natural resources.

In addition to fully funding conservation easement programs, we urge you to retain the existing FRPP fund-match formula to encourage bargain sales and allow waivers of the match requirements for strategic projects.

It is also important to restore language in the easement program clarifying that the Federal government is not acquiring a real property interest and has only a "contingent right of enforcement," should the cooperating entity fail to enforce its easement.

We also respectfully ask you to make this farm bill one that creates jobs and spurs economic growth by supporting programs like the Value-Added Producer Grants Program at a guaranteed level of \$30 million of mandatory funding per year. VAPG provides seed money to help farmers innovate in agriculture and create jobs while securing a sustainable path to market-based farm profitability.

America needs a farm bill that makes healthy food widely available to all Americans—including schoolchildren! We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.

It is so important that the 2012 Farm Bill strongly protects our natural resources. Please fully fund the Conservation Stewardship Program and improve it by ranking applications solely on their conservation benefits. Farmers count on CSP and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife—all while farming profitably.

Our country needs a farm bill that invests in the next generation of farmers and ranchers—we urge you to guarantee \$25 million per year in mandatory funding for the Beginning Farmer and Rancher Development Program. We need a national strategy and commitment to support beginning farmer and ranchers entering agriculture. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new sustainable agriculture start-ups.

Please make the 2012 Farm Bill help drive innovation for tomorrow's farmers and food entrepreneurs by funding the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.

Thank you very much for providing an opportunity to comment on this very important issue.

Sincerely,

AMY HANSEN,
Policy Analyst
 New Jersey Conservation Foundation,
 [Redacted],
 Far Hills NJ.

COMMENT OF JAN HANSEN

Date Submitted: Saturday, May 19, 2012, 11:44 a.m.

City, State: Somerset, CA

Occupation: Retired

Comment: Switch the focus from big corporate agribusiness to small, local farmers. Use more funds for sustainable, organic farming that protects our valuable water systems from run-off.

COMMENT OF JEREMY A. HANSEN

Date Submitted: Friday, May 18, 2012, 4:01 p.m.

City, State: Montpelier, VT

Occupation: Professor

Comment: While I am not a producer of food for sale, I do grow some of my own organic vegetables and fruit and raise chickens for organic eggs.

It is unfortunate that it has been the position of the U.S. Government to subsidize large agribusinesses and stand idly by while small producers are driven away by the virtual monopolies the large producers are given.

It is doubly unfortunate that more resources have not been provided for research in sustainable and organic agriculture. By supporting the creation of a decentralized food production system where every American citizen is given the opportunity to participate, we can lead the U.S. into a future where food production continues to be a robust and useful portion of our economy.

As a final note, I wholeheartedly endorse the improvement of food labeling, particularly in terms of GMO ingredients and detected pesticide levels.

Thank you for your consideration!

PROF. JEREMY A. HANSEN.

 JOINT COMMENT OF JERRY AND JOYCE HANSEN

Date Submitted: Friday, May 18, 2012, 1:38 p.m.

City, State: Ferryville, WI

Producer/Non-producer: Producer

Type: Dairy, Field Crops, Livestock

Size: 50–150 acres

Comment: By failing to place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs, the Committee has failed to do the full reform that is needed.

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Republicans in the House Agricultural Committee have already “voted to slash \$33 billion from the food stamp program while leaving farm subsidies unscathed. This is unconscionable in our present economy. Please consider all our citizens when you vote, not the entitled few agribusinesses.”

 COMMENT OF MATTHEW HANSEN

Date Submitted: Friday, May 18, 2012, 1:31 p.m.

City, State: Kentfield, CA

Occupation: Auto Mechanic

Comment: We must break the stranglehold of agribusiness giants like Monsanto that could not care less about what havoc their practices wreak on the planet or the food chain, nor what destruction they bring to the small family and sustenance farmers. I don't want to consume the garbage they produce or have it affect what I choose to put on my family's table.

Thank you.

 COMMENT OF MITCH HANSEN

Date Submitted: Friday, May 18, 2012, 11:59 a.m.

City, State: Nashville, TN

Occupation: Lighting Director

Comment: As a consumer of agriculture, I'm very concerned about the processes and method by which my food is produced. We need strict labeling on our food supply, so consumers can make informed choices as to what they put into their bodies. This is not a political agenda; it falls much closer to an economic demand. This is what the market is asking for, we should drive that economic opportunity by giving it to them.

COMMENT OF YVONNE HANSEN

Date Submitted: Friday, May 11, 2012, 10:34 a.m.

City, State: Austin, TX

Occupation: Retired

Comment: Remove any and all barriers to growing food locally and organically, and to educating youth in all phases of food, including strategies to ensure food security.

Fund research that examines differences in level of health (absence of temporary or chronic diseases) between individuals who eat industrial, mass produced foods and organic or pesticide and GMO free food. Then publish results. Determine what essential components found in whole foods and not found in processed, industrial foods that lead to a sense of satisfaction and 'I'm full' that says stop eating more food. What component is removed that triggers the sense of fullness and satisfaction?

COMMENT OF ANNE HANSON

Date Submitted: Friday, May 18, 2012, 2:30 p.m.

City, State: Florida, NY

Occupation: Retired

Comment: I have a little garden. I shop at health food stores and farmer's markets. We create our meals from scratch. I seek organic produce and meat in the supermarket. We keep chickens that lay eggs. In other words, I try to avoid all the additives in the so-called normal food supply.

Surely you care about the health of the nation more than the bottom line of the big farms whose practices pollute air and water and endanger citizens. All the substances eaten and breathed and drunk add up.

COMMENT OF LAURIE HANSON

Date Submitted: Saturday, May 19, 2012, 1:36 p.m.

City, State: Chicago, IL

Occupation: Flight Attendant

Comment: Farm policy should be simple and straight forward. No GMOs and no pesticides! Have you done your research? The results are already in. Hormonal disruption and DNA mutation related cancers in both men and women exposed to GMO's and pesticides. Even in "limited" usage, the "drifting" of seed and pesticides into organic fields and water ways will yield the same results. There are sound reasons why the EU countries ban the use of these. We must stand firm. Our health and the health of our Earth, and the health of our future generations are at stake. There are no short term economic benefits worth such dyer long-term consequences. Please stand firm and only support a farm bill that will sustain the future health of the farm, the farmer, the Earth, and it's populace without any GMOs and pesticides. Thank you.

COMMENT OF MELISSA HANSON

Date Submitted: Sunday, May 20, 2012, 11:15 p.m.

City, State: Atascadero, CA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I am a young farmer and I'd like to share my support for programs that help the next generation of growers build strong farm businesses. As it's estimated that 125,000 farmers will retire in the next 5 years, it's absolutely critical that farm bill programs help citizens get started in this challenging field. I want my children and their children to be able to eat fresh, wholesome, local food, and we need an army of farmers to make that possible. Our greatest challenge as beginning farmers is access to land and capital. It is nearly impossible today for a young farmer to access the land and tools they need to start a successful farm. Through funding the BFRDA and the other programs mentioned below, beginning farmers may actually have a fighting chance of having a financially sustainable business which provides them with a dignified livelihood as well as food and jobs for their community. The systems currently in place tend to favor large, industrial agriculture that is poi-

soning our land and communities. If we want our society to thrive, we need to realign our focus onto small, sustainable farms, and support the farmers who are working on them. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

MELISSA HANSON.

COMMENT OF MICHELLE HANSON

Date Submitted: Friday, May 18, 2012, 12:01 p.m.

City, State: Chatham, IL

Occupation: Student

Comment: I buy a lot of fresh vegetables from farmers. I have relatives that grow their own and sell the rest. This is much healthier than much of what we buy in the store. Please save our organic sources.

COMMENT OF PAUL R. HANSON

Date Submitted: Monday, May 14, 2012, 12:57 p.m.

City, State: Mayville, ND

Occupation: Locked Out Worker, presently a Senior Research Analyst at UND

Comment: Honorable House Members,

I am writing in regards to upcoming Sugar Act legislation.

It would be easy to assume a bias on this position considering I am a locked out worker from American Crystal's processing plant in Hillsboro North Dakota and as a beginning farmer was unable to compete with those that had privileged access to markets. However, there are compelling reasons to question the continuation of protectionist sugar legislation.

The domestic sugar industry is mature. Early legislation was enacted in part due to the extreme hard physical work necessary to produce and refine the crop. Now, modern and efficient machinery have made dramatic improvements. Except for the rare circumstances when wet fields make for harvest nightmares, the physical demands have been eliminated.

Since the earliest sugar legislation was enacted in the 1930's, the industry has experienced nearly uninterrupted protection. That means the industry has had ample time to prepare for self sustenance. It is difficult to identify other farm commodities that receive price protection with the dimensions of sugar; corn, soybeans, wheat and oil seeds have been competing in the world market for decades.

Sugar beet (and cane) processing schemes have been around for more than a century. The decades of protection have eliminated the need for more sophisticated

technologies. There hasn't been a sense of urgency. As a chemist in a laboratory, my job was to calculate daily factory through puts and efficiencies. A sugar beet factory works well for only about 75% of the time. Very little has been done in terms of processing improvements. Meanwhile, the public is forced to endure obnoxious odors, the effects of large amount of green house gas and mercury emissions, and wasteful use of precious energy.

It would seem that for the sake of survival, industries would find the need to become more efficient. Has the protectionist sugar legislation pre-empted the need for the domestic industry to modernize and become responsible citizens in the environment?

We must seriously consider the possibility of opening our doors to third world and developing countries. A chance to raise the standard of living for those in beleaguered countries is appealing. There is an adequate supply of sugar in Central America, the Caribbean nations and our friends in the European Union to supply our domestic needs.

Please consider these thoughts in your deliberations.

PAUL R. HANSON

COMMENT OF ALLYN HARAD

Date Submitted: Wednesday, April 11, 2012, 8:12 p.m.

City, State: Albuquerque, NM

Occupation: School Counselor

Comment: We help feed more than 70 families per week who otherwise would go hungry over the weekends. The children especially are hungry and do not have control over their parents budget. It is essential that we have enough food to help our children grow and develop in good health.

COMMENT OF SABRINA HARDENBERGH

Date Submitted: Sunday, May 20, 2012, 2:40 p.m.

City, State: Carbondale, IL

Occupation: Research (Health, Nutrition, Food Security)

Comment: A number of people where I live, including myself, are interested to see more support for organic, bio-ecological, regional and agroecology orientation in agriculture and food security processes. Please orient to this small-scale sector, and stop putting such major emphasis on "Big-Agriculture" and the corporate sector in our education, market, local to international development, and farm extension systems. The UN recently has noted the importance of agroecology, the likes of which fit what I witnessed during international conservation-development health/nutrition research in Madagascar 2 decades ago, as well as what people are concerned about here at home in southern Illinois. But our local institutions do not mirror this path, since they are more driven by corporate sponsorship and goals. Are we a land for the people, or the corporations (that make wild claims for personhood and their goals at the expense of public and ecological health, and even broader fiscal health)?

*<http://www.un.org/apps/news/story.asp?NewsID=37704&Cr=farming>.**

COMMENT OF SUSAN HARDER

Date Submitted: Friday, May 18, 2012, 1:28 p.m.

City, State: Utica, OH

Occupation: Finance Manager

Comment: I am a Mother of 5 ages 27-8, Grandmother of 4 ages 7-1 with 2 on the way.

I am continually dismayed at how the American family is being bombarded with food that is not safe or nutritious. My husband and I have recently moved to a 23 acre property so that we can start generating our own food for us and our loved ones. Thank God that we are able to do this, but what about the families that can't do this? Where the husband and wife both work and don't have the time or knowledge to grow and preserve food? There is a sense of betrayal that is being felt by the food producers who would like to provide food that is healthy and the people who look at a 99 cent bottle of ketchup that has GMO corn syrup in it and then

*The information referred to is retained in Committee file.

look at the \$4.00 bottle of organic ketchup and has to choose the cheaper one because they can't afford the extra money. I have been that person and sometimes still am. I understand driving an older car, living in a smaller house or not having cable service to make money stretch, but we should not have to give up the health of our children or ourselves just to be able to afford to feed everyone. Our laws should make it easier for the organic and small farms to survive and more difficult for big ag to push laws and small farms out of business. If our politicians keep neglecting the desires of the people, either they won't be in office long term or they will lose the ability to choose healthy foods themselves. Haven't we given up enough freedoms? Please help the families and the small organic farms of Ohio.

COMMENT OF FRAN HARDY

Date Submitted: Sunday, May 20, 2012, 11:55 a.m.

City, State: Lamy, NM

Occupation: Environmental Artist

Comment: Please write a bill that supports small family farms, organic producers and protects the public from GMO planting and the heavy use of pesticides they encourage. Don't create a bill that penalizes the small local family farm with undue burdens that are of no import to large scale agribusiness.

COMMENT OF INGRID HARDY

Date Submitted: Saturday, May 19, 2012, 1:37 a.m.

City, State: Sedona, AZ

Occupation: Self-Employed

Comment: Dear Ones,

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

To me and many Americans, there is nothing more important than eating healthy, labeled, non-gmo, organic, food that is produced by farmers that are paid fair wages and that have uncontaminated fields from Monsanto.

If you want to eat what you think is "fine" for consumption, go ahead, yet I urge you, to make sure that every American can choose what they eat.

May I remind you that you are not above, but work for "The People". You are there to make sure to implement what the people want. This has shifted now to making sure that the corporations get what they want. I know they have strangely elevated themselves to being "people", yet they are nothing but a corporation that only answer to their shareholders. You are here to serve the interest of "The People".

Thank you for your time,

INGRID.

COMMENT OF DAN HARE

Date Submitted: Friday, May 18, 2012, 5:15 p.m.

City, State: Longmont, CO

Occupation: Field Biologist

Comment: I would like to see a farm bill that supports sustainable agriculture like poly-culture or seasonal multi-cropping and permaculture. I would also like to see real support for Holistic Management practices on our prairies and rangelands founded by Savory Institute and Holistic Management International.

COMMENT OF JIM HARKNESS

Date Submitted: Friday, May 18, 2012, 2:41 p.m.

City, State: Minneapolis, MN

Occupation: President, Institute for Agriculture and Trade Policy

Comment: The Institute for Agriculture and Trade Policy, a 25 year non profit organization based in Minnesota, asks that the House Agriculture Committee to include the following proposals in the farm bill:

- Re-couple conservation compliance with crop insurance. Unless Congress reconnects crop insurance subsidies to conservation compliance, a significant part of farmers' incentive to follow conservation plans will disappear this year if direct payments are removed.
- Full funding for the SNAP program that protects against hunger and improves nutrition by providing critical resources to vulnerable people. Cuts to SNAP will only make it harder for millions of families to afford a nutritious diet.
- Adopt the National Farmers Union proposal for a Market Driven Inventory System in the Commodity Title, that would both save money for taxpayers and help ensure a safety net for farmers.
- Better, more affordable crop insurance for organic farmers that helps reduce the increased financial risk of growing organic crops, which reduce the use of harmful chemicals that endanger human health and the environment.
- A House version of Senator Leahy's public health reporting amendment which would require USDA to report on the public health impacts of Federal agricultural policies.
- Full funding for the 2501 Outreach and Technical Assistance for Socially Disadvantaged Farmers and Ranchers Program. This program is a small effort to correct the policy barriers and institutional biases that farmers of color have faced for decades.
- Support the Packer Ban that prohibits a meatpacker to own, feed or control livestock intended for slaughter, and helps to ensure transparency and competition in the marketplace.
- Ensure and fully fund existing programs allow and encourage schools to choose fresh, healthy, local food for schoolchildren.
- Direct the USDA to create Whole Farm Diversified Risk Management Insurance products for diversified farming operations.
- Support the expansion of local and regional procurement of all international food aid. We strongly encourage you to maintain and expand authorities currently provided on a pilot basis under Sec. 3206 of the 2008 Farm Bill and to establish that initiative as a permanent program. Authorized funding should be set at no less than \$40 million annually.
- Follow the leadership of the Conrad-Lugar bill that creates mandatory funding programs for core programs, like the Biomass Crop Assistance Program, in the Energy Title of the farm bill.

We look forward to working with you and your staff as this process continues. Thank you for considering these proposals.

JIM HARKNESS,
President,
 Institute for Agriculture and Trade Policy.

COMMENT OF LYNN HARMET

Comment: It's time to end subsidies for corn, soy, and dairy. Please take the lead in making healthy plants affordable to all Americans. This will help us solve our huge public health problems as well as support smaller farmers. Thanks.

COMMENT OF KATHERINE HARPER

Date Submitted: Friday, May 18, 2012, 1:36 p.m.

City, State: Playa del Rey, CA

Occupation: Teacher

Comment: Why would you want to allow big business to poison your nation? Do you want your own children, grandchildren and generations to eat toxic foods? Do you personally want to eat toxic GMO's and unsafe food for the rest of your own life. Think about the dire, long-range ramifications of supporting unsafe agri-business **Please!** Support a safe food bill and battle against GMOs. Thank you.

COMMENT OF TERRY HARR

Date Submitted: Friday, May 18, 2012, 1:13 p.m.

City, State: St. Louis, MO

Occupation: Construction

Comment: You are **Not** God, you have **No** right to tamper with our food, don't add nothing to our food, we don't want imported food, we don't want our food sprayed with chemicals that give us cancer, we need workers in the fields to grow our food, we want all organic food, quit killing us.

COMMENT OF CATHY HARRIS

Date Submitted: Friday, May 18, 2012, 1:43 p.m.

City, State: Vancouver, WA

Occupation: Retired-Education

Comment: There are too many "auto-immune" diseases in our lives these days including my granddaughter's rheumatoid arthritis (age 2) along with increase in autism that can't be explained. It just makes sense that the food we fill our bodies with and the air we breathe has to be affecting all people. We must be protected from chemicals and pollution to be a healthy, intelligent nation.

COMMENT OF JACK H. HARRIS

Date Submitted: Thursday, May 17, 2012, 10:46 a.m.

City, State: St. Louis, MO

Occupation: Retired

Comment: TO: House Agriculture Committee

As the House Agricultural Committee prepares your draft of the farm bill, I urge you to restore the link between taxpayer-supported subsidies for crop insurance and conservation compliance protections that will protect the nation's water and land.

This action is especially important as Congress considers eliminating direct payments, the major subsidy program that is linked to conservation compliance, and moving some of those funds to support increased subsidies for crop insurance, which lacks compliance requirements. Unless you help to reconnect crop insurance subsidies to conservation compliance, a significant part of farmers' incentive to follow conservation plans will vanish this year.

Farmers need crop insurance as part of their safety net and the public needs basic conservation practices on farms to make sure that quality farmland and water can support future generations as well as the current needs of our country. We cannot accept sacrificing long-term economic and environmental sustainability for short-sighted and short-term economic profits.

Connecting eligibility for crop insurance subsidies to conservation compliance is fiscally responsible and ensures public subsidies for farmers' insurance premium payments align with the public's interest in basic conservation of our soil and water. Missouri consistently ranks in the top five for soil loss, losing more than 5 tons per acre per year, so we have a lot to gain.

Sincerely,

JACK H. HARRIS.

COMMENT OF JOHN HARRIS

Date Submitted: Friday, May 18, 2012, 12:11 p.m.

City, State: Lansing, MI

Occupation: Executive, Printing Company

Comment: Rather than cut 1¢ from food stamps, cut all subsidies to any farmer or farming corporation who exceeds \$250,000 in profit in the year or preceding year. End all farm insurance payments for any farming entity that exceeded \$500,000 in profits in any of the preceding 2 years. End all subsidies or insurance payments entirely for any reason for genetically modified (GM) crops which have never been tested to be safe for consumption over the long term (three generations) and which poison the soil with herbicides. If you must have subsidies for farmers make them widely available for organic farming which makes more nutritious food for Americans and enriches soils rather than depleting and poisoning the soil as GM crops do.

COMMENT OF KAREN HARRIS

Date Submitted: Saturday, May 19, 2012, 12:07 p.m.

City, State: Fayetteville, AR

Occupation: Counselor/Educator

Comment: Food, farming, agriculture and being good stewards of the Earth we have been given are in my opinion the **Most** important topics facing our country. All other "issues" ripple outward from what we do with the basics.

I have worked in "at risk" school districts and seen generational poverty. There are so many people who would rejoice in the opportunity to work hard and eat healthy and live abundantly if they had the chance. Generational poverty kills those opportunities. There is poverty of even knowing what healthy food is or how we are connected to the Earth from which it comes. This is a large and complicated problem I realize, but change comes in very simple and small steps in the right direction. Those who want to work the Earth and put in the blood, sweat and tears that goes into it should be able to reap the rewards fully from their labor. The rest of us will reap the rewards as well. Please do everything you can to plant the seeds of change that will not only benefit this generation but all those who might follow.

COMMENT OF MELISSA HARRIS

Date Submitted: Friday, May 18, 2012, 12:37 p.m.

City, State: Nashville, TN

Occupation: Consulting Company

Comment: Please support a fair and healthy farm bill.

Earlier this year more than 30,000 Food Democracy Now! members signed a letter calling for an Organic Farm Bill. The letter was an idealized version of what a growing number of Americans are beginning to realize: that U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farmworkers over the interests of industrial agriculture lobbyists.

Unfortunately, we as a nation are not there yet. Not only are our politicians out of touch with the values of the American people, but corporate agribusiness has a stranglehold on our regulatory system and our political leaders.

Farmers and eaters across the U.S. benefit from a fair and healthy farm bill.

Please do not cut funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture.

- It's time for real reform. I support:
- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF MYRA HARRIS

Date Submitted: Monday, March 26, 2012, 10:53 p.m.

City, State: Northwood, IA

Producer/Non-producer: Producer

Type: Field Crops, Livestock

Size: 1,000+ acres

Comment: Common Sense Of all things in our world to have a safety net for is food. You can't survive without it. This is the most important part of the whole ag bill. We are not in control everyone tells us what our costs are and what we can get for our product. Weather, any little glitch in foreign policy, stock markets, you name it. Think can you survive without food, you can get along without everything else. Cut direct payments but protect the Federal crop insurance.

COMMENT OF PEGGY HARRIS

Date Submitted: Friday, May 18, 2012, 10:26 p.m.

City, State: Fork Union, VA

Occupation: Insurance Agent

Comment: PLEASE encourage and support our family farms against the overpowering influence of the huge agribusiness. We want safe, wholesome food, not chemicals which are harmful to our bodies.

COMMENT OF REBECCA HARRIS

Date Submitted: Friday, May 18, 2012, 5:04 p.m.

City, State: Candler, NC

Occupation: IT Consultant

Comment: I am one generation removed from a family farm. My father still owns a piece of the old family farm. I care about family farmers, soil conservation, and environmentally sound farming practices. I am a consumer of farm products, being a member of a CSA and truly enjoying farm fresh organic produce every week.

I urge you to support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF SHARON HARRIS

Comment: Please work on creating transparency in food production. It would allow the consumer to make healthier choices. I have a high sensitivity to toxins and allergens that greatly affect my health. Many chemicals deemed safe for consumption or exposure might need more testing.

COMMENT OF RICHARD HARRISON

Date Submitted: Friday, April 27, 2012, 6:31 p.m.

City, State: Marblehead, MA

Producer/Non-producer: Producer

Type: Field Crops, Fruits, Vegetables

Size: 50-150 acres

Comment: We are a mixed vegetable certified organic farm located in Montville, Maine, although our permanent residence is in Massachusetts. We supply Good Shepherd Food Bank, Maine's source for soup kitchens and pantries. We sell to Good Shepherd at a flat rate approximately 50% of wholesale so we are supporting the hungry in Maine. We have also donated vegetables to local pantries. We hope that you will continue to support programs for food for the poor. We can vouch for the fact that the need in Maine is dire.

COMMENT OF PATRICIA HARRISS

Date Submitted: Friday, May 18, 2012, 1:47 p.m.

City, State: Angier, NC

Occupation: Retired

Comment: People who want to be healthy, and have done any research at all, find that they can't safely consume any products produced by factory farms, which is everything in the grocery store. Everything has been tainted by pesticides, herbicides, hormones and Genetic Engineering. We have to spend a lot of time finding local eggs, meat and organic vegetables. We'd buy raw milk if it wasn't against the law. My children were raised on it and they are healthier than most people. My husband and I are healthier than most people our age (68, 75) and are not dependent on any drugs. If everybody could be healthy like us, there would be no problem pro-

viding free health care to those few that needed it. Stop subsidizing corn and soy so that all this junk food that's produced with it would dry up. You are contributing to the obesity epidemic by subsidizing it. And if you don't stop the Genetic Engineering there is going to be a famine in this land. Super weeds and super bugs are going to take over. The worst decision ever made was to allow patents on seeds. Rescind that law and take the power away from Monsanto. They don't care about our health. Do some research for yourself and don't depend on them to tell you the truth! Please protect us from that giant corporation!

COMMENT OF MAGGIE HARRS

Date Submitted: Saturday, May 19, 2012, 10:28 a.m.

City, State: Sleepy Hollow, NY

Occupation: Chef

Comment: 42% of Americans are now considered obese. When will this end? The food system in this country is a major part of the problem and the solution can start with the food bill. We can no longer operate the same way any longer! It's your **Job** as Members of the House Committee to do the **Right** thing!

COMMENT OF CAROLE HART

Date Submitted: Friday, May 18, 2012, 2:49 p.m.

City, State: New York, NY

Occupation: Filmmaker

Comment: With all the revelations over the past few years of heinous violations of safe health practices by big agriculture, it's critical that we monitor them and sanction them for their activities or lack of them.

COMMENT OF DANNIE HART

Date Submitted: Friday, March 16, 2012, 8:49 a.m.

City, State: Tallahassee, FL

Occupation: Mom

Comment: I am concerned about the effect of the farm bill on the health and variety of our food supply. Continuing to subsidize corn and soy skews our food supply in unhealthy directions. Perhaps a requirement that no more than a certain percentage of any subsidized farm's crops could be planted in either of these commodities would improve our health. Too much high fructose corn syrup too cheaply is bad for America.

COMMENT OF JESSICA HART

Date Submitted: Friday, May 18, 2012, 3:43 p.m.

City, State: Evanston, IL

Occupation: Clinic, Program, and Administrative Assistant

Comment: As a consumer, I spend large amounts of money on food. I rarely shop at the "regular" chain grocery stores because they do not carry food I deem safe, non-toxic, environmentally friendly, sustainable, fair-trade, *etc.*, *etc.* I buy largely organic & local whenever possible & spend a pretty penny doing so. I'm very concerned for those who can not afford this luxury, which is in the best interest of my personal health as well the health of our country.

I fully support all measures for organic & local foods & best environmental farm practices. I will not buy GMO laden foods & do not support subsidies to Big Ag for products that aren't healthy, safe, or farmed in an environmentally sustainable way. We need to throw out our current policies & rethink all food policy in this country. It is broken & needs immediate attention & support to remake. The time should absolutely be now to fix this system.

Consumers needs should be put before the corporate, greedy interests of Big Ag. We need change. We demand change. Policy should reflect smart, sustainable, healthy change not the same old broken system.

I fully support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

- Maintaining the EQIP Organic Initiative.

Thank you,
A very concerned citizen who has not trusted gov't on anything pertaining to food her entire adult life. Very sad.

COMMENT OF SPRING HARTKE

Date Submitted: Saturday, May 12, 2012, 11:44 a.m.

City, State: Tacoma, WA

Occupation: Teacher

Comment: I believe that it is imperative that we have a farm bill that protects our environment. I believe that we, too often, look only at the present and ignore the fact that our practices need to protect resources for future generations. In addition, I believe that the farm bill should be used to support small farmers, particularly organic farmers. I do not believe that the farm bill should be used to support corporations.

COMMENT OF KARA HARTLEY

Date Submitted: Sunday, May 20, 2012, 1:15 a.m.

City, State: Parker, CO

Occupation: Customer Service Lead

Comment: Stop GMO crops and poor animal conditions and pumping them with chemicals. Go back to nature where animals had purposes, worked with one another and ate what they were supposed to eat. The movie *Fresh* and *Food Inc.* should be watched by everyone!

COMMENT OF WILL HARTZELL

Date Submitted: Friday, May 18, 2012, 2:08 p.m.

City, State: Bozeman, MT

Occupation: Acupuncturist

Comment: We have to all remember that we are talking about producing healthy food for the PEOPLE, and that that should be our focus, not corporate profits. Awaken your humanity. Remember that people, children and grandchildren deserve the chance to grow up healthy.

COMMENT OF LUCY HARVEST

Date Submitted: Friday, May 18, 2012, 7:58 p.m.

City, State: San Antonio, TX

Occupation: Organic Gardener

Comment: NO GM food. Already too much cancer and increase in children's food allergies! Don't blame on fast food industry . . . blame on Monsanto & Chinese pesticides on our food.

COMMENT OF MICHAEL HASARA

Date Submitted: Friday, May 18, 2012, 3:10 p.m.

City, State: Columbus, OH

Occupation: Designer

Comment: It's tragic, and criminal, the way the FDA and other government agencies are treating the small farmers.

It's obvious that much of the government is corrupt and that big business with their piles of cash are running the government.

This is **Not** the representation that our officials have been elected for by the people. If this situation is not corrected, the people will rise up. We will make change occur through our votes and through our choices at the supermarket, and any elected officials that continue to support the greedy big business agendas that hurt our country, our food quality, and our small farmers will be quickly ousted.

MICHAEL HASARA.

COMMENT OF ZACHARY HASH

Date Submitted: Friday, May 18, 2012, 11:08 a.m.

City, State: Rocky Face, GA

Occupation: Commercial Insurance

Comment: Please consider the grave impact of a bad choice regarding our nation's food production. A human cannot express it's true potential without the proper fuel. I know you wouldn't let you children eat sub-par food . . .

COMMENT OF DENISE HASKAMP-GEHARDT

Date Submitted: Friday, May 18, 2012, 12:15 p.m.

City, State: Glasgow, MO

Occupation: Adjunct Instructor

Comment: I live in a farming community and often hear farmers railing about government bailouts, handouts to the poor, *etc.*, all the while receiving government money themselves. Such a disconnect. I do firmly believe we need to focus on sustainability and more local controls *versus* big ag. My husband and I consistently shop for organic and locally grown, fresh food. Thanks for reading.

DENISE HASKAMP-GEHARDT.

COMMENT OF MARK HASKINS

Date Submitted: Saturday, May 19, 2012, 9:00 a.m.

City, State: Encinitas, CA

Occupation: Primary Care Physician

Comment: Agricultural subsidies should go to foods that Doctors recommend, like fruits and vegetables, not corn and soy. High-fructose corn syrup is not a food, has only caloric value, and drives the obesity and diabetes epidemics in America. We are paying to poison ourselves while the small farmers who produce real food go unassisted! Stop the madness of subsidizing illness!

COMMENT OF JOYCE HATFIELD

Date Submitted: Friday, May 18, 2012, 12:12 p.m.

City, State: Meadowlands, MN

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Do not force out the family farm. Children have always learned good work habits by working with their parents on the family farm. This experience is far more valuable to children than other activities that children are apt to become involved with. Children need to know where and how their food is grown and produced with hands-on experience. Support the children and allow children to work.

COMMENT OF LAURA HATFIELD

Date Submitted: Friday, May 18, 2012, 2:32 p.m.

City, State: Woodland Park, CO

Occupation: Retired

Comment: As a consumer it is of vital importance to my health and the health of this nation to have a strong organic and sustainable production of food to our table. Please support legislation that considers the small farmer as I believe our health depends on them.

COMMENT OF ROSS HATHAWAY

Date Submitted: Friday, May 18, 2012, 9:19 p.m.

City, State: Ithaca, NY

Occupation: Student Studying Plant Science

Comment: Instead of subsidizing corn, Europe gives money to farmers for doing sustainable practices. If America's industrial farms were given money for planting cover crops, this would have an amazing impact on our environment. It would sequester a huge amount of carbon. It would reduce leaching of fertilizer and pesticides, and it would help the farmers' future crops. This is one easy step that would make a world of difference.

COMMENT OF SHARON HATOK

Date Submitted: Friday, May 18, 2012, 5:15 p.m.

City, State: Santa Ana, CA

Occupation: Housewife

Comment: Allowing Monsanto & others to poison our foods is a crime & you wonder why there is so much illness in this nation. Please do not allow others to harm

our food sources with GMO's that our body cannot digest because it is not natural food.

Please stand up for the health of this nation by voting for bills that will help us all.

COMMENT OF ROBERT HAUGEN

Date Submitted: Monday, March 19, 2012, 5:35 p.m.

City, State: La Farge, WI

Occupation: Food Network Software Programmer

Comment: I work with groups of farmers who operate cooperative local food networks such as the Fifth Season Cooperative in Viroqua, WI.

These networks help small farmers sell their food for a fair price, and help local institutions, businesses and consumers to get good local food. They also provide an increasing number of non-farm jobs, as the networks are starting to develop food processing operations.

We think the Local Farms, Food, and Jobs Act will help support more local food networks and thus more local farms and local jobs in rural communities.

Please include the Local Farms, Food, and Jobs Act in the farm bill.

Thank you very much.

COMMENT OF SONJA HAUTER

Date Submitted: Friday, May 18, 2012, 3:31 p.m.

City, State: St. Paul, MN

Occupation: Computer Programmer

Comment: It is **Critical** to both the health of the citizens of the united states **And** to our national security that you, our representative, help to pass a farm bill that supports small farmers. Please help us consumers to be able to purchase the healthy food we want from small local farms!

COMMENT OF KEVIN HAVENER

Date Submitted: Saturday, May 19, 2012, 2:53 p.m.

City, State: Chicago, IL

Occupation: Educator

Comment: Support small and independent farms, **Not** corporate mega-farms! Also Monsanto's GMO crop experiment (on 300 million unsuspecting Americans) needs to stop **Now!** Untested and unregulated GMO crops are basically environmental and human health pollutants, and should be treated as such. Thank you.

COMMENT OF ADRIAN HAVENS

Date Submitted: Friday, May 18, 2012, 12:30 p.m.

City, State: Norcross, GA

Occupation: Writer

Comment: As a consumer, I am becoming more and more alarmed by the reports about the practices of big agriculture and the potential threats GMOs pose to America's food supply and Americans' health in general. Please drive toward more transparency with regard to the policies and safety of GMOs and chemical pesticides. Future generations depend on it.

Thank you for your consideration on this matter.

COMMENT OF COURTNEY HAWKES

Date Submitted: Friday, May 18, 2012, 9:56 a.m.

City, State: Cambridge, MA

Occupation: Management Associate/Backyard Farmer

Comment: Please support small family farmers and get rid of subsidies for factory farms that are producing more corn than we need. Move those subsidies to help small farms produce nutritious foods that don't need further processing to feed people.

COMMENT OF EILEEN HAWKEY

Date Submitted: Friday, May 18, 2012, 3:05 p.m.

City, State: West Dundee, IL

Occupation: Mom

Comment: Dear Members of the House Committee on Agriculture;

My name is Eileen Hawkey and I'm an adoptive parent to a young man who is now 16 years old. His name is Anthony. He came to us when he was 4½ years old—already having suffered abuse. He was diagnosed with RAD, PTSD, ADD, and Autism. Our life together was very rough. He also suffered from a processing problem.

At the beginning of this year we switched to an organic diet for the family. The results are amazing! No pill, talk therapy, educational prevention has done what good organic food has done for Anthony. At 16 he is beginning to have friends and I can honestly say that he will become a good citizen. (I had my doubts)

If you want to bring Americans back to good health **Please** address our food source and the additives allowed in it. Our kids don't want to be handicapped by the food they eat.

Thank you in advance,

EILEEN.

COMMENT OF BLANCHE HAWKINS

Date Submitted: Friday, May 18, 2012, 5:24 p.m.

City, State: St. Paul, MN

Occupation: Retired

Comment: Keep the Conservation measures intact, and get rid of the boondoggles of price protections for sugarbeet farmers, corn ethanol supports and other measures that make **No** sense except to put money in the pockets of agricultural state legislators.

Above all, don't cut programs like food stamps, WIC and other aids for the impoverished.

COMMENT OF MARK HAY

Date Submitted: Tuesday, April 24, 2012, 12:32 p.m.

City, State: Springfield, MO

Occupation: Donation Coordinator

Comment: We need a strong farm bill to help put food on the table for vulnerable children, elderly and low income families. I ask that you pass a bill that strengthens TEFAP, SNAP and CSFP. Cutting these programs is not the way to balance the budget. They are a lifeline to people struggling in your district. Please make them a priority in the next farm bill.

COMMENT OF MITSUKO HAYAKAWA

Date Submitted: Sunday, May 20, 2012, 2:15 a.m.

City, State: Pearl City, HI

Occupation: Artist/Homemaker/Mother

Comment: No GMOs and GMO subsidizing. Stringent restrictions on chemical application. I do not want chemicals or GM pollutants in the soil, water, and air. None of it is helpful to our environment and delicate eco-system. Thank you.

COMMENT OF GERARD HAYDEN

Date Submitted: Sunday, May 20, 2012, 1:18 p.m.

City, State: Southold, NY

Occupation: Chef and Owner of North Fork Table and Inn

Comment: I am a small business owner of a restaurant in Southold Long Island, N.Y. It is a critically acclaimed restaurant because of the sourcing of our food products from small organic farms. If Congress and the President start stripping away funding from programs that assist in promoting healthier more sustainable ways of producing our food to try and make up deficit spending. We will be a Nation that has clearly lost our way and no longer listens to the people of this great country who are moving in a direction to eat healthier and make less of a carbon foot print. We need government to get behind small farms and sustainable farming practices with the type of funding that is put behind Corporate agribusiness. Please for the future of all the children in this country use your heads.

JOINT COMMENT OF JEANNETTE & JAMES HAYDEN

Date Submitted: Thursday, May 10, 2012, 11:43 p.m.

City, State: Tucson, AZ

Occupation: Retired

Comment: Don't throw another \$140 billion into subsidies, including a brand-new \$33 billion "shallow loss" entitlement program that guarantees business income for a few thousand agribusiness operations growing industrial commodity crops.

How about a program that encourages healthy eating, especially among kids? How about supporting small farmers, organic growers?

COMMENT OF SARA HAYDEN

Date Submitted: Wednesday, May 09, 2012, 7:17 p.m.

City, State: Half Moon Bay, CA

Occupation: Disabled

Comment: Please protect our small and family farms. I would ask that you reconsider all of the subsidy programs you give to large corporate producers whose annual revenue clearly indicate they do not need subsidies.

COMMENT OF AISHA HAYES

Date Submitted: Saturday, May 19, 2012, 4:47 p.m.

City, State: Edgewater Park, NJ

Occupation: Mother

Comment: I am requesting that the SNAP program not be cut. It is a sad thing to see our own children suffer from hunger as we are eating 3 & 4 course meals. Hunger puts our children in a place where they can't learn & function @ a normal level. When my own children are telling me their stomachs are hurting or they have a headache because of hunger that hurts. To know these that really need assistance are not eating when there are politicians who can serve for one term & have their health ins. taken care of for the rest of their lives is ridiculous. Please don't cut funding for this program!

COMMENT OF KIM HAYES

Occupation: Independent Contractor

Comment: Please keep the taxpayer crop insurance linked to the conservation compliance. That's the least you can do since you have all the big commercial growers on government welfare that is totally unnecessary. Get in a plane and fly the Gulf of Mexico, notice that big dark spot spewing forth from the Mississippi River. That's South Iowa! It got there from all the erosion the welfare farmers in bed with Big Ag put it there with their reckless farming practices. We're mining our topsoil away to grow commodities instead of food.

So, the least you can do is force these government welfare farmers to think about the water & soil by linking their crop insurance to conservation compliances.

COMMENT OF LINDA HAYES

Date Submitted: Friday, May 18, 2012, 11:00 a.m.

Occupation: Educator

Comment: Our food is killing more Americans than all our wars combined! Imagine if our good conscience was in charge rather than corporations and greed. Monsanto and Cargill are the real terrorists!

COMMENT OF MICHELLE HAYES

Date Submitted: Friday, May 18, 2012, 2:11 p.m.

City, State: Livonia, MI

Occupation: Homemaker

Comment: Thank you for considering my comments. I fully support organic, diverse, and sustainable farming. I will go out of my way to purchase organic foods, especially from local sources. I support cooperation and reverence for all life. The current model of big, industrial farming is not working for the health and well being of all living things. We need a paradigm shift. We need to support and nurture small scale, local organic farmers/farms. Supporting the local farmers, across all states, creates job stability and a better quality of life for the farmers. Farming is one of the most important professions in the world. It's so simple really—healthy soil, healthy organic diverse seeds, clean water, good farming practices = healthy people. We need to increase funding to support healthy farming initiatives. Please

look at the truth/facts carefully and work towards keeping our country vibrant and healthy. Thank you.

COMMENT OF TIM HAYES

City, State: El Cajon, CA

Occupation: Builder

Comment: Big Ag has tilted the scale long enough to the tune of devastated soil and obese citizens. We need an honest organic bill that promotes small, local food production.

COMMENTS OF MICHAEL W. HAYNES, M.P.A.

Date Submitted: Friday, April 13, 2012, 2:16 p.m.

MICHAEL W. HAYNES, M.P.A.,

City, State: Hauppauge, NY.

Occupation: Coordinator, Gov't Affairs & Public Policy for LI Cares, Inc.—The Harry Chapin Food Bank.

Comment: On behalf of Long Island Cares, Inc.—The Harry Chapin Bank we thankfully request that Congress protect and strengthen SNAP, TEFAP and other Federal nutrition programs.

Regarding SNAP, please oppose proposals to cap or reduce SNAP funding, restrict eligibility or reduce benefits and support proposals to increase benefit adequacy to ensure that households have the resources to purchase a nutritionally sound diet. Regarding TEFAP, please make mandatory funding for TEFAP food more responsive to changes in need by providing a trigger that ties funding to unemployment levels. Also, please enhance the Secretary of Agriculture's authority to purchase bonus commodities in times of high need for emergency food relief in addition to times of low commodity prices so the program is responsive both to excess supply and excess demand. Furthermore, please reauthorize funding for TEFAP Storage and Distribution Funds at \$100 million per year and TEFAP Infrastructure Grants at \$15 million per year.

As Long Island's regional food bank, we annually serve over 320,000 food insecure persons through our network of community partners (kitchens, pantries, emergency shelters, and senior centers). We also directly serve 20,000 food insecure persons through our direct service programs such as our mobile pantry, mobile outreach units, veterans project, and 2 triage pantries. Despite indicators of economic recovery, times are still extremely tough on Long Island and our agencies still report increases of demand in the 15–25 percent range. TEFAP purchases accounted for greater than 1/3 of the 6.2 million pounds of food we distributed in 2011. SNAP and TEFAP are vital to the people we serve, and we urge that you fight to at least sustain if not bolster these programs that are keeping Long Islanders and Americans fed.

Date Submitted: Tuesday, May 15, 2012, 1:13 p.m.

Comment: Dear Chairman Lucas, Ranking Member Peterson, and members of the Committee:

Thank you for the opportunity to provide input on the upcoming farm bill reauthorization. Given the increasing need for food assistance in our state and the declining supply of Federal commodity support, I strongly urge you protect and strengthen nutrition programs in the 2012 Farm Bill.

At Long Island Cares, we see every day how important Federal nutrition programs are in our community and how effectively they are working to ensure that struggling Long Islanders can provide enough food for their families. Long Island Cares distributed 6.2 million pounds of food to food insecure Long Islanders in 2011.

Nationally, the Feeding America network of more than 200 food banks has seen a 46 percent increase in food bank clients from 2006 to 2010, and we are struggling to keep up with increased demand. Without strong farm bill nutrition programs like The Emergency Food Assistance Program (TEFAP), the Supplemental Nutrition Assistance Program (SNAP), and the Commodity Supplemental Food Program (CFSP), food banks across the country would be struggling even more to meet the increased need.

We recognize the challenge you face drafting a farm bill in a time of deficit reduction, but we are also sensitive to the tremendous, ongoing need in our state. As such, we have two key priorities for the farm bill.

First, we urge you to strengthen TEFAP to help us keep up with increased demand. TEFAP supplies about 25 percent of the food moving through Feeding America's national network of food banks. But because of strong commodity prices,

TEFAP food declined 30 percent last year, and our food bank is struggling to make up the difference. We urge you to make TEFAP more responsive during times of high need by tying increases in mandatory funding to a trigger based on unemployment levels. We also propose to enhance the Secretary of Agriculture's authority to make TEFAP bonus purchases at times when the need for emergency food assistance is high—for example high unemployment—in addition to times of weak agriculture markets so that the program can respond to both excess supply and excess demand.

Second, we also strongly urge you to protect SNAP from harmful funding cuts or policy proposals that would restrict eligibility or reduce benefits. SNAP has responded effectively to growing need in the recession with benefits that are timely, targeted, and temporary. The average SNAP household has an income of only 57 percent of the Federal poverty guideline, and 84 percent of benefits go to households with a child, senior, or disabled person. The program is working to support vulnerable Long Island families, and our food bank or local agency partners would not be able to meet the increased need for food assistance if SNAP were cut.

These programs have a real impact on your constituents, many of whom must rely on the food bank and Federal nutrition programs to meet their basic food needs. I would encourage you to visit the food banks serving your district before the Committee marks up a farm bill so you can meet our clients and see firsthand how Federal nutrition programs are working to protect vulnerable Americans from hunger.

Long Island Cares believes that feeding our neighbors is a shared responsibility, and food banks like ours rely on a variety of food streams to support our communities, including generous support from partners in retail, manufacturing, and agriculture. However, the Federal government is an equally critical partner through programs like TEFAP, SNAP, and CSFP, and with tremendous, ongoing need in our state, ongoing Federal support is more important than ever.

As the House Agriculture Committee moves forward with farm bill reauthorization, our food bank urges you to protect the nutrition safety net and offers the specific recommendations below.

Sincerely,

MICHAEL W. HAYNES, M.P.A.

COMMENT OF MARYANN HAYTMANEK

Date Submitted: Wednesday, May 09, 2012, 5:19 p.m.

City, State: Allentown, PA

Occupation: Community College Administrator

Comment: Please recognize the importance of the SNAP program as a means for our local community to feed their families and inject much-needed income into our community. In Pennsylvania, the state government has pursued nothing less than a witch hunt to punish people who rely on government assistance in any form, including the very-well-run SNAP program. The families who receive this assistance rely on this bit of help to maintain their energies to go to work to be alert in school and to maintain their families.

COMMENT OF JAMES HAYWARD

Date Submitted: Wednesday, May 02, 2012, 2:46 p.m.

City, State: Acton, MA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Because farming, as in sustainable farming—the preservation of a system to sustain life of our future generations with food and fiber, is so centralized and localized to regional areas, national legislation for farming seems irresponsible. The legislation should return power to districts and states by allowing them to source the majority of their food from around their area. Yes, it is viable to buy avocados at the supermarket that were grown in California. But with a more regionalized food system the avocados will be less enticing because of its higher price. The avocado in this sense is not literal; It representative of our transnational food systems and how it's simply not a viable option for the future.

Anyways, this relates to the Farm Bill 2012 because this bill does not dive into how many of our nation's farms need to be restructured to promote soil fertility and long term stewardship, not solely based on price per pound and uniform structure for large scale shipping. Let the farmers dictate how they can feed our nation. They are smarter than the stigma we put on them. Letting smaller scale co-ops of regionalized farmers will let our farmers figure out the best way to feed everyone in the

region. A beautiful dependency between farmer and consumer will arise, based on farmers dependence for consumer's money to sustain and reinvest in the farm, and the consumer relying on the farm to feed their families healthy food.

COMMENT OF MERLE HAYWARD

Date Submitted: Friday, May 18, 2012, 8:44 p.m.

City, State: Hilo, HI

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Subsidize transition to organic ag, protect organic growers from GMO and chemical contamination, set use limits on RoundUp and other toxic ag chemicals, protect bees from toxic chemicals and require bee refuges.

COMMENT OF CRAIGEN HEALY

Date Submitted: Sunday, May 20, 2012, 7:48 p.m.

City, State: New Vineyard, ME

Occupation: Retired Teacher

Comment: Please support the whole Ag. Reform Bill do that we can have more confidence in the integrity of the food we buy. I have been raising as much of my own vegetables as I can for years in my organic garden, but **All** Americans need healthier food, and small farmers need equal recognition with industrial farms.

COMMENT OF ELIZABETH HEALY

Date Submitted: Wednesday, May 09, 2012, 11:02 p.m.

City, State: Tucson, AZ

Occupation: Personal Assistant

Comment: We need a Farm Food Bill that supports the work the nation's Food Banks are doing. Make sure the bill includes lots of money for food assistance programs like SNAP. Here in Southern AZ we have an increased demand for food assistance. This nation has too many hungry people and this bill should be helping them, not hurting them more. Have you ever gone to bed hungry? Do you know how many children in AZ will do that tonight? We need your help! Thank you.

COMMENT OF ROBYN HEALY

Date Submitted: Friday, May 18, 2012, 12:15 p.m.

City, State: Philadelphia, PA

Occupation: Disabled

Comment: We need to take back farming from big Ag and help out the little farmers around our great nation. Family owned farms provide a great resource for our nation. They provide healthy foods for our families and some even provide the experience of "pick-your-own" produce. Please protect our local growers.

COMMENT OF PETA HEARSEY-MCCOMAS

Date Submitted: Thursday, April 05, 2012, 10:35 a.m.

Comment: If humanity is going to survive through all the toxins that have been spewed across the planet, we need real organic food to live so that we can clean up the planet for future generations of people and animals and plants.

COMMENT OF SUSAN HEATHCOTE

Date Submitted: Tuesday, May 15, 2012, 5:37 p.m.

City, State: Des Moines, IA

Occupation: Water Program Director for Iowa Environmental Council

Comment: I urge the House Agriculture Committee to restore the link between conservation compliance and eligibility for taxpayer-supported subsidies for crop and revenue insurance. This link between compliance and crop insurance is especially important as Congress considers elimination of direct payments, the major subsidy program that is currently linked to compliance. I am not a farmer, but I pay taxes to help support a safety net for farmers. All that I ask in return is that subsidized farmers will follow basic conservation practices on their fields to prevent soil erosion and preserve wetlands that will help protect water quality downstream from the farm. This conservation compliance compact between farmers and the public has worked for 30 years, but if crop insurance and compliance are not linked, a significant part of a farmer's incentive to follow conservation plans will disappear this year. Please don't let that happen.

COMMENT OF KRISTI HEATON

Date Submitted: Friday, May 18, 2012, 1:20 p.m.

City, State: East Windsor, CT

Occupation: Homemaker

Comment: I want the corporations to stop dictating the way I feed my family. Please support and promote organic farms and food labeling. I do not want to feed my family GMO foods. Care more about us than you do Monsanto and do the right thing.

COMMENT OF SYLVIA HEBEL

Date Submitted: Friday, May 18, 2012, 9:51 p.m.

City, State: Rice Lake, WI

Occupation: College Student, Homemaker

Comment: There are three things people need to live, clean air, clean water, and a place to grow their food. The factory turkey and heifer farms I have seen have got me eating less beef and no turkey. Commercial farmers care about their animals insofar as they are good for sale. The lack of pasture, and the crowded sheds say it all.

Date Submitted: Friday, May 18, 2012 9:53 p.m.

Comment: I will continue to vote with my money. I have little and will spend less for factory farmed food. I grow a garden and buy locally if possible.

COMMENT OF LYN HEBENSTREIT

Date Submitted: Friday, May 18, 2012, 1:33 p.m.

City, State: Ojai, CA

Occupation: Retired

Comment: Is it not obvious that people and the Earth should take priority over the profits of giant agribusiness corporation profits when it comes to legislating how our food is produced? Small scale organic agriculture has been shown to be the most productive, healthy and sustainable way to produce food by the most comprehensive agricultural study ever completed under the auspices of the UN. I suggest you use that as a guide.

COMMENT OF SUSAN HECKEL

Date Submitted: Friday, May 18, 2012 1:24 p.m.

Comment: America needs the type of farm bill President Jefferson would have supported. We need to support environmentally responsible farmers. I support the principles of Slow Food.

COMMENT OF DWAYNE HEDSTROM

Date Submitted: Saturday, May 19, 2012, 7:54 p.m.
City, State: Portland, OR
Occupation: Unemployed
Comment: No more welfare for the big ag corps. Small family farms that sell where they produce need and can be the backbone of food secure and economically secure communities.

COMMENT OF WYNNIE HEE

Date Submitted: Friday, May 18, 2012, 7:03 p.m.
City, State: Mililani, HI
Occupation: Retired Teacher
Comment: Please subsidize organic farmers or at least make it cheaper for them to be certified. Please do not subsidize GMO corn and GMO soy. There so much corn that we don't know what to do with it—except feed it to cattle that are healthier on a grass diet or make biofuel. Subsidize good food for people, not expensive fuel. Thank you for listening.

COMMENT OF JEFF HEEHS

Date Submitted: Friday, May 18, 2012, 1:24 p.m.
City, State: Brooklyn, NY
Occupation: Corporate Sales Account Manager
Comment: I urge Congress to support a Food and Farm bill that:

- prevents the near-monopoly concentration of food production and distribution in a small number of private companies.
- focuses on increasing the production and distribution of healthy foods—including fruits, vegetables, and whole grains—for consumption in our communities, homes, schools, and institutions.
- Ends food insecurity and hunger by protecting our nation's nutrition programs and ensuring equitable access to healthful, sustainably produced food.
- mandates labeling of food according to country of origin and food that includes ingredients from genetically modified organisms.
- supports agricultural practices to preserve our vital agricultural soil and water resources, reduce farm and other food-system energy consumption, and practice sustainable agricultural production methods that minimize air and water pollution.
- supports innovative methods to strengthen our regional food systems as a means to regain economic vitality.
- provides entrepreneurial opportunities and fosters business growth and job creation in rural and urban production, processing, and distribution.
- supports beginning and disadvantaged urban and rural farmers, as well as established farmers facing the challenges of feeding America.

In this Food and Farm Bill I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.
- Full, mandatory funding to community food project grants.

COMMENT OF JAMIE HEERINGA

Date Submitted: Friday, May 18, 2012, 11:35 a.m.
City, State: Grand Rapids, MI
Occupation: Costume Designer and Educator
Comment: I am shocked and frustrated that my government has allowed and promoted the corruption and poisoning of our food system by big agribusiness through the use of toxic pesticides and fungicides and GMOs. This is capitalism run amuck. It's time for you to get at the truth by questioning the lies told by those whose goal is only profit, and to read the independent research. Our children, future

generations, and our environment (which is connected to our health) are all being poisoned for greed. It is immoral. Why does most of our financial help go to the least nutritious and most damaging industrial crops rather than to those we know to be the best for our health . . . fruits and vegetables? We know the answer . . . money and power of the big companies. Our health care costs will continue to sky rocket out of control until we stop poisoning our bodies and the environment and figure out how to get these toxins out. Common sense tells us that organic is the best. Poison is poison, and that's what we get with our current system. Research shows it can be done . . . we just have to place our health and the health of the planet above profit. Who is willing to do that? Are you? Or will you be one of those that have been elected by the people, but serves big business? Our innocent children, now and in future generations, need your help and protection. Please have the courage to stand up and do the right thing for us.

COMMENT OF KELSEY HEERINGA

Date Submitted: Saturday, May 19, 2012, 1:31 a.m.

City, State: Rockford, MI

Occupation: Writer

Comment: The farm bill no longer makes sense in the world we live in. It is not supporting healthy farming practices for the land or the people. To move forward this country **Has** to have support for organic practices, new farmers that want to farm organically to local markets, and conservation programs. If you take a step back and think about the direction the country **MUST** move it, before we destroy it and our health. The farm bill is the most important piece of legislation in the government, in my voting opinion, and would like my representative to represent me and my family.

COMMENT OF REED HEFFELFINGER

Date Submitted: Friday, May 18, 2012, 12:59 p.m.

City, State: Minneapolis, MN

Occupation: Health Care, Western Herbalist, Minister, Counselor, Artist, Single Mother, Grandmother

Comment: I grew up in a Minnesota Milling Family—'Peavey Company'.

I spent 4 years as a founder of a certified organic food company that was meat based. I care how animals are treated in this country. I have observed over and over again that they do not know what it is to be in nature—their natural habitat. Large corporate farms know that if a baby chick does not go outside in their first week or so—they will not. Therefore, this huge organic producers can put a small fenced in area (mostly dead soil, no grasses or bugs) and call them cage free/free range—jeez. They are not healthy. They are fed unhealthy food. Often GMO corn. Therefore we are not eating healthy food.

I know the toxins/chemicals released in animals on that 'Long Good Bye' Death walk to slaughter.

I know what the communities stink like where animals are slaughtered—how tightly they are packed in corrals.

I know that we have depleted the soil. I know that money talks. I know that we are the least BioDynamically farmed country in the world . . . check it out. I know that other countries use Flow Forms to create living pristine water . . . even from hog sludge. I know that we are laughed at regarding our 'water purification' attempts—all hidden within buildings. There is so much information regarding living water—*i.e.*, *Flow Forms* by John Wilkes for a start.

When we can get over ourselves and the quest for money and more money and power perhaps there would be space for wisdom. Perhaps, some of you could move on over and bring in some fresh insights/wisdom. There is enough for everyone.

Thank you for your time.

REED HEFFELFINGER.

COMMENT OF MARY HEFT

Date Submitted: Saturday, May 19, 2012, 4:58 p.m.

City, State: Kansas City, MO

Occupation: Registered Nurse

Comment: President Truman said, "nothing is more important in our national life than the welfare of our children, and proper nourishment comes first in attaining this welfare." For the first time in our national history our children have a lower life expectancy than we do because of what they eat.

Every leading cause of disability and death in the U.S.; obesity, diabetes, heart disease, stroke and cancer is correlated to poor nutrition. According to a USDA report in 2011 there is not even enough vegetables, fruits and grains in the American food supply to even meet dietary requirements for all citizens. Our citizens lack both physical and monetary access to safe, fresh, nutritious foods, and yet all physiological, biochemical, and immunological systems in the body are changed in the malnourished individual. Correcting our diets can decrease health care costs.

The mandate to increase ethanol production is devastating our food supply. Less and less edible produce is being grown due to the subsidies given for corn production.

The sugars in our processed foods have been repeatedly shown to cause disease and genetically modified crops are proving to do the same. Why are we one of the only industrialized nations to allow GMO's to flood our food environment without even basic labeling requirements?

Mission Readiness, the group of retired military generals, say that the leading medical disqualifier for military service is obesity—a diet related condition.

We MUST put our health before the powerful interests of agribusiness giants. We are dying and we are killing our children with our food.

Being free from hunger is not synonymous with being nourished.

Please subsidize fresh, nutritious foods. Require labeling for types of sugars and GMO ingredients.

Our country's food system is in crisis! It is only when all citizens, at all times, have physical and economic access to sufficient, safe, and nutritious food that our country can be healthy and our children's future secure.

Comment: Please give stronger consideration to practices that benefit the health of all, strengthen small communities, and contribute to sustainable practices in agriculture. It is time for communities and families to take priority over the financial gains of large ag companies.

COMMENT OF JEFF HEIDT

Date Submitted: Friday, May 18, 2012, 9:21 p.m.

City, State: Sedona, AZ

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Is it true that:

- Agribusiness has a stranglehold on our regulatory system and our political leaders?
- The Senate Agricultural Committee has already voted to cut \$4 million from organic research funding and cut funding to support Beginning Farmers in half?
- The Senate Ag Committee has voted to get rid of wasteful subsidy payments, and has proposed to replace it with a new subsidized insurance program that leading sustainable agriculture advocates are calling rife with opportunities for fraud and abuse?
- While Congress is looking to get rid of direct payments to commodity farmers, the subsidized insurance program it proposes to replace it with will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk?

U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

Thank you for your consideration of this important matter!

JEFF HEIDT,
Sedona, AZ.

Comment: We should have a right to know what we are eating? We want certified organic farming to get the subsidies? Stop GMO foods. At the very least label . . . them. So we can make our own decisions.

COMMENT OF ROSALIE HEIWNS

Date Submitted: Friday, May 18, 2012, 7:59 p.m.

City, State: Morrison, CO

Occupation: Retired

Comment: I believe in the right to have clean food without pesticides and non GMO modified. I believe that the toxins in our food chain are the cause of disease and cancer in this country. I believe our government should be protecting us from these harmful ingredients instead of protecting the very companies, such as Monsanto, who are producing foods that are bad for us, and not only that, but receiving huge subsidies. Now tell me why does a multibillion dollar company need farm subsidies. The only people who need subsidies are the small farmers and those starting up and growing organic produce. These are the people we need to support, not the multimillion dollar farm. It has been reported that many people in Congress, who happen to own farms, are receiving subsidies. This is absolutely wrong. Again, this is just another way that the good old boys club of Congress rewards itself. A subsidy is to support farmers who need the money to continue doing what they do and hopefully to encourage healthy and organic farms to start up and continue. Please do the right thing by awarding subsidies to the people who need it and not as bribes for votes.

COMMENT OF LAURA HELD

Date Submitted: Friday, May 11, 2012, 11:21 a.m.

City, State: Somerville, MA

Occupation: Graduate Student in Agriculture, Food, and Environment

Comment: We need a farm bill that supports low-income Americans, both producers and consumers. We need to support farms that practice sustainable agriculture and that are small to medium in size. We need to restrict abuses to animals in agriculture, particularly CAFOs.

COMMENT OF LYNETTE HELLE

Comment: I am concerned that the 2012 Farm Bill will not have provisions linking crop insurance subsidies to compliance with Conservation Plans. I want to ensure farmer's entitled to payments with my tax dollars be required to follow sustainable agriculture practices. Thank you.

COMMENT OF GAYLE HEMENWAY

Date Submitted: Friday, May 18, 2012, 12:00 p.m.

City, State: Fort Collins, CO

Occupation: Homemaker

Comment: It is high time we had a farm bill that did more than just continue subsidies to huge producers and alter in negative ways the competitive landscape for food production. Please support the kinds of farmers and ranchers and food production that those of us who cook, eat, and feed our families want to support: small farms, organic and biodynamic farms, local and regional farms that feed their communities with a harvest of variety. Thank you.

COMMENT OF DANIEL HEMESATH

Date Submitted: Saturday, May 19, 2012, 12:58 a.m.

City, State: Clovis, CA

Occupation: Photographer

Comment: Organic farming is vitally important. It is our only hope of solving the biggest problems facing the country. The playing field should be leveled. Organic farming should be given equal incentives. Otherwise big food conglomerates will continue to dominate and our health and the environment will pay the price.

COMMENT OF PHIL HEMESATH

Date Submitted: Friday, May 18, 2012, 11:02 p.m.

City, State: Decorah, IA

Occupation: Retired Dairy Farmer

Comment: Do away with direct payments. Connect conservation payments and incentives on outcome based criteria. Producers should develop a conservation plan that best fits their own farm. Phase out support prices. Keep crop insurance affordable.

COMMENT OF CARMEN HENDERSHOTT

Date Submitted: Friday, May 18, 2012, 11:57 a.m.

City, State: New York, NY

Occupation: Librarian

Comment: We need a farm bill that supports organic farming and small family farms; that stops subsidizing large agribusinesses, such as Monsanto, thereby wasting taxpayer monies; that works against genetically modified food, indiscriminate and excessive use of pesticides; and that encourages local buying, which would reduce transportation costs. Please remember this when you are drafting the farm bill.

COMMENT OF ELLA HENDERSON

Date Submitted: Thursday, May 17, 2012, 3:04 p.m.

City, State: Gallion, AL

Producer/Non-producer: Producer

Type: Greenhouse/nursery, Vegetables

Size: Less than 50 acres

Comment: I'm looking for a bill that will assist the 10 acre or less farmer. The farmers who really feed the communities. Invest in sustaining heirloom seeds. Foster innovation for future farmers and non-GMO food entrepreneurs.

COMMENT OF HEATHER HENDERSON

Date Submitted: Tuesday, May 15, 2012, 4:44 p.m.

City, State: Tallahassee, FL

Occupation: Student

Comment: I am a student at Florida State University studying Food and Nutrition Science. I am the president of a group called the Tallahassee Sustainability group, we have a community farm and a greenhouse at a second chance middle school. I would like for the farm bill to include community farms like ours. Promoting nutrition to the community through producing food is a wonderful tool. Grants are available but if there were more we could do more. We are currently attempting to incorporate a community kitchen at the farm and are having difficulty finding funding. More grants for projects such as this one would be greatly appreciated.

 COMMENT OF JANICE HENDERSON

Date Submitted: Friday, May 18, 2012, 5:28 p.m.

City, State: Medford, OR

Occupation: Retired from Self-Employment

Comment: It is critical that you do not cut funding to programs such as nutrition, conservation and support for organic agriculture. Organic farmers are vital to the sustainability of a **Healthy** food supply industry, sustainability of the land, and vital to sustaining public health which ultimately will lower healthcare cost. Please do the **Right** thing. Support the **Organic Farm Industry**. Our future depends on it.

 COMMENT OF JEANETTE HENDERSON

Date Submitted: Sunday, May 20, 2012, 9:59 a.m.

City, State: Seattle, WA

Occupation: University Employee

Comment: U.S. food and agricultural policy should preference public health, including local food produced by small farmers. It should focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture.

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

 COMMENT OF JOHN HENDERSON

Date Submitted: Friday, May 18, 2012, 6:16 p.m.

City, State: Chattanooga, TN

Occupation: Waiter/Food Activist

Comment: I believe in you, our legislators. And I believe in your commitment to the voice of the people, and your oath to pass laws that benefit the greater good. The farm bill should benefit the people, not corporate interests and agribusiness giants. Please uphold the sanctity of the Constitution and develop a bill that fully endorses all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). Provide full funding of conservation programs, such as the Conservation Stewardship Program, and make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. I would like to see the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), and please maintain the EQIP Organic Initiative. These are very important issues that will affect future generations, long after we are all gone. Let's move toward doing the right things for our world, not just for us, but for the benefit of our posterity. Thank you.

 COMMENT OF NANCY HENDERSON

Date Submitted: Friday, May 18, 2012, 9:52 a.m.

City, State: Lincoln, MA

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: It is critical that we wrest control of our food system from corrupt giant agribusinesses and allow farmers to grow food that is safe to eat and safe for the environment. Real inspections by independent (Government *i.e.*, FDA) inspectors and use every available means to educate the public as to where their food comes from and how they can become partners in making healthier choices that benefit good farming practice and the environment.

COMMENT OF PAIGE HENDERSON

Date Submitted: Friday, May 18, 2012, 12:11 p.m.

City, State: Grapevine, TX

Occupation: Sales Representative

Comment: Our nation is out of control. It is time to get back to the basics of agriculture and get big business out. I am tired of the "science" of pesticides which is killing people. Please get a clue.

COMMENT OF SHERRY HENDERSON

Date Submitted: Friday, May 18, 2012, 10:12 p.m.

City, State: Alpharetta, GA

Occupation: Magazine Publisher

Comment: The farm bill must support small farmers and abolish ridiculous rules against raw milk, free range poultry and eggs and other very healthy farm products.

We must stop the filthy factory farming practices that are poisoning our environment and bringing misery to livestock.

COMMENT OF KATE HENDRICKS

Date Submitted: Friday, May 18, 2012, 10:23 a.m.

City, State: Healdsburg, CA

Occupation: Farm Gleaner

Comment: Food production is connected to the health of our environment. Our current food system accounts for about 20 percent of our national energy consumption and relies heavily on chemical, fossil fuel, and water inputs. Unchecked, such practices can degrade our natural resources, erode our soil, and pollute our air and water. The next farm bill can help reverse these detrimental effects—the time to act is now!

COMMENT OF JEAN HENDRIX

Date Submitted: Sunday, May 20, 2012, 3:45 a.m.

City, State: Kamuela, HI

Occupation: Retired Sales Manager

Comment: Please save our family farms and our food. Protect us like you said you would when we elected you. We need safe **Non-GMO** food and we want labels on foods that contain any GMOs in any of the ingredients. We have the right to unmolested food, and the right to know when it has been played with.

COMMENT OF LINDA HENDRIX

Date Submitted: Saturday, May 19, 2012, 1:25 p.m.

City, State: Bend, OR

Occupation: Therapist

Comment: We deserve better than what we are getting all around from our government and the corporations that are using us as guinea pigs in their quest for record profits.

COMMENT OF JAMES HENRIKSEN

Date Submitted: Friday, May 18, 2012, 8:04 p.m.

City, State: Green Valley, AZ

Occupation: Retired

Comment: All farm subsidies should be implemented for the growing of crops, not for non-planting. Also, more attention should be given for crops that can be used for biofuel.

COMMENT OF MICHELLE HENSLEY

Date Submitted: Friday, May 18, 2012, 11:54 a.m.

City, State: Minneapolis, MN

Occupation: Theater Director

Comment: We barely live in a democracy any more. Corporate interests control our food supply and are ruining our health, our children's health and our planet's health! **Please Show Some Courage And Stand Up For The People—For The Children**—and stop pandering to wealthy corporations who are destroying us all!

COMMENT OF KAREN HENSON

Date Submitted: Saturday, May 19, 2012, 10:44 a.m.

City, State: Longmont, CO

Occupation: Elementary School Teacher and Landscaping Business Owner

Comment: Farmers are the ultimate entrepreneurs. Please continue to support these brave business people who are risking so much to serve us by growing beautiful organic food. Let's continue to encourage new farmers who want to feed us whole food without using insecticides. These people work **Hard!**

COMMENT OF APRIL HEPNER

Date Submitted: Saturday, May 19, 2012, 10:36 a.m.

City, State: Denver, CO

Occupation: Social Work

Comment: I would like to see an administration that puts the health of the people & the environment first. This would happen through allowing native crops to be grown, supporting crop rotation & land conservation, and the humane treatment of agriculture. I will continue to support local organic, grass-fed, and free range/pastured food. Please consider the demand for this in reviewing the future of the farm bill.

COMMENT OF JOSEPH HERBERT

Date Submitted: Saturday, May 19, 2012, 5:29 p.m.

City, State: Portland, OR

Occupation: IT Desktop Engineer, for a Steel Manufacturing Corporation

Comment: As a civic-minded citizen—and voter—I hereby urge you to carry out “in the strongest language possible”:

- (1) Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any “new insurance subsidies” are tied directly to “compliance with conservation programs.”
- (2) The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- (3) Maintaining the EQIP Organic Initiative.
- (4) The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

The goal of Ag must be to contribute to the health of all U.S. citizens, and to do so in an economically and socially sustainable manner.

In the past 60 years, the Dept of Ag has instead focused on: “Producing as much food as cheaply as possible” . . . which is direct opposition to the above-stated goals.

COMMENT OF NICOLE HERD

Date Submitted: Friday, May 18, 2012, 11:04 a.m.

City, State: Sunbury, OH

Occupation: Marketing

Comment: Please support local, organic farming and food stamps being accepted for healthy fruits and vegetables at farmers' markets. We need a healthier Ohio!

COMMENT OF CYNTHIA HERNANDEZ

Date Submitted: Friday, May 18, 2012, 1:31 p.m.

City, State: Ukiah, CA

Occupation: Therapist

Comment: The American people desire and deserve to know what is in their food. We want safe food and the ability to make an informed choice in what we are eating.

COMMENT OF GLENDARAE HERNANDEZ

City, State: Saugerties, NY

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I'd like to share my support for programs that help the next generation of growers build strong farm businesses. As it's estimated that 125,000 farmers will retire in the next 5 years, it's absolutely critical that farm bill programs help citizens get started in this challenging field. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Why only one young farmer was invited to be a member of the panel is an indication that the questions and problems as they relate to the **Future** of agriculture and farming are not to be addressed. In the same way not **One Woman** was on the panel that discussed **Women's** health issues, this again shows that Congress has not learned anything about talking with the people. To many of you talk **At** the people and turn to your money handlers for direction and advise. After the **Money** tells you what to think then you act. Money may be in short supply but there is always millions for the millionaire farmers. When these are dead and gone how will you feed those that are left?

Sincerely,

JOSEPH A. HERNANDEZ,

[Redacted],

Saugerties, NY.

COMMENT OF MICHELLE D. HERNANDEZ

Date Submitted: Wednesday, May 02, 2012, 4:57 p.m.

City, State: New York, NY

Occupation: College Student

Comment: As a concerned citizen, I write in support of increasing access of SNAP participants to farmers markets, in effort to provide those of lower income to fresh available foods. Coming from a city with many who fall under low income households but with many farmers markets, I feel that is unjust for a such large population to not have the chance to make more healthier choices, especially in a epoch of obesity and chronic diseases which tends to impact those of working class the most. With access to fresh produce at the farmer's markets, we can help tackle the

negative health effects that can come from picking unhealthy products at the super-markets as well as support a growing sector in our agricultural system which therefore supports small farmers and our local economy. Thank you for your time and consideration as you all go on to creating a better future for America.

COMMENT OF ANN HERNDAY

Date Submitted: Tuesday, May 15, 2012, 2:00 p.m.
City, State: Santa Rosa, CA
Occupation: Retired, Homemaker, Caregiver, Long Time Gardener
Comment: Dear Chairman Lucas,

I wish to express my agreement with the testimony of author Vicki Robin. A basis of our life depends on our healthy, life nurturing soils/environment and farmers who know how to support those healthy, life nurturing interactions. What could be more important.

Thank you for this opportunity.

ANN HERNDAY.

COMMENT OF IRMINE HERO

Date Submitted: Friday, May 18, 2012, 12:27 p.m.
City, State: Glen Ridge, NJ
Occupation: Mother of 4 and Small Green Business Owner

Comment: As a mother I want my kids to be safe when they eat or drink and have the right to chose products I know. Lately getting organic produce and ultimately non GMO products has been extremely difficult and next to impossible . . . tell me which cereal comes from a non GMO products? you can't and that is the saddest thing on Earth. Stop that and give consumer the right to know and the right to be able to choose by helping organic farmers to grow good food and helping them by not sponsoring corn and Monsanto.

COMMENT OF ANNIQUE HEROLD

Date Submitted: Friday, May 18, 2012, 1:25 p.m.
City, State: New York, NY
Occupation: SI Practitioner
Comment:

1. Redefine humane treatment to truly mean humane.
2. True humane treatment for all farm animals.
3. Strong labeling defining GMO *versus* non-GMO.
4. More sewer treatment for all animal waste on large farms.
5. Support/subsidize smallest farms.
6. End large farm subsidies.
7. Change definition of **Organic** so it somehow doesn't exclude smallest farms.

COMMENT OF JOHN HERR

Date Submitted: Friday, May 18, 2012, 2:49 p.m.
City, State: Everett, PA
Occupation: Retired

Comment: Given the general health of the U.S. population, primarily obesity and diabetes the current farm bill only exacerbates this situation by payment to support the corporate agriculture of sugar, corn (high fructose corn syrup)and soy most of which is GMO modified. All this finds its way into the food supply. There is little or no support of small farms with diversification and could be organic. The small dairy farmer which could sell raw milk, is being besieged by state and Federal agencies and is being prevented from selling raw milk across state lines. For the sake and security of our nation the sale of locally produced produce and non-CAFO meat and milk should be encouraged instead of legislation that favors the large corporate operations. Less and less of our produce is coming from the U.S. and is now imported. What happens when that supply is interrupted? By encouraging farmers, especially corporate farmers to grow the very foods that are having an adverse effect upon the health of the nation. This increases the cost of health care. Deep subsidy cuts would benefit not only the budget but the health of the nation.

JOINT COMMENT OF NANCY HERRICK, P.A. AND ROGER MORRISON, M.D.

Date Submitted: Saturday, May 19, 2012, 3:55 p.m.
City, State: Nevada City, CA

Size: Less than 50 acres
Comment: We support local foods and farms act (HR 3286).
 We support fully funding conservation programs.
 We support Beginning farmer and rancher Act (HR3236).
 We support maintaining EQIP Organic Initiative.

Sincerely,

NANCY HERRICK, P.A.;
 ROGER MORRISON, M.D.

COMMENT OF AMY HERRON

Date Submitted: Sunday, May 20, 2012, 1:40 p.m.
City, State: Virginia Beach, VA
Occupation: Student
Comment: Please do more to support family farms and growers of fruits and vegetables. Help produce "food" not commodities! The health of the nation depends on good quality food.

COMMENT OF ANDRIA HERRON

Date Submitted: Saturday, May 12, 2012, 2:06 a.m.
City, State: Bremerton, WA
Occupation: Student
Comment: I am a former Food & Beverage industry person who has been forced to change my profession in these hard economic times. I have returned to college to get my degree in Nutrition & Dietetics. It is more than obvious that the Big Agriculture has poisoned our land, waters and our food. Organic is the only option to restore our health and the health of our Earth.

COMMENT OF PAMELA HERRON

Date Submitted: Friday, May 18, 2012, 12:15 p.m.
City, State: El Paso, TX
Occupation: Educator and Writer
Comment: Our food is essential to our success as a nation. I was raised on a farm and am very selective about what I eat. I believe in supporting the small farmers, especially those who are attempting to incorporate organic or sustainable farming methods. The gov't. has to stop their continued support of huge agribusinesses and throw their support behind the local, family-run farms.

COMMENT OF BARBARA J. HERTZ

Date Submitted: Friday, May 18, 2012, 4:01 p.m.
City, State: Towaco, NJ
Producer/Non-producer: Producer
Type: Fruits, Vegetables, Other
Size: Less than 50 acres
Comment: The farm subsidy supporting GMO (Genetically Mutilated organisms (misnomer "modified") should be eliminated. The subsidy represents a violation of the U.S. constitution, separation of Church from affairs of State: the "belief" that GMO ingredients in our food supply and also in animal feed is safe, is a belief system that is challenged by a wide following of credible scientists from all over the world. In fact, there is no similar following of independent science contending that these are either similar in nutritional value or metabolized as the 'natural' (non-mutilated) foods. Therefore, it is established that 'GMO' is a false religion.
 In all areas and subjects where differing beliefs may be supported the topic under dispute is a belief and therefore, the U.S. constitution forbids select support. For this reason alone, the U.S. government and the elected officials responsible for its consideration must abstain from proving support of the 'false' faith—as a misguided belief that GMO ingredients could be tolerated since they are not safe, in any amount and not safe to include in animals feed (whether the flesh or the products of animals are used as food) or human directly in a healthy diet.

The fact that pesticide (GMO corn is registered as a pesticide by the DEP) is found in the blood of a consumer (including a pregnant woman) and also found in the fetal core blood (therefore, also in the unborn child) is sufficiently alarming to prompt swift recall and regulation of all GMO ingredients, until there is sufficient testing to conclusively establish the hazards. There is no doubt that allergies are increased in persons who consume GMO ingredients as well as the offspring of pregnant mother's—pesticide crossing the placental barrier and infecting the unborn (passive consumer) of pesticide.

I strongly recommend that the Members of the House Committee on Agriculture seriously consider revoking the carte blanche approvals and certainly revoke any farm subsidy supporting the hazards posed by GMO's. These facts are established and recognized by the international community of environmental medicine physicians.

COMMENT OF DON HESS

Date Submitted: Friday, May 18, 2012, 12:39 p.m.

City, State: The Villages, FL

Occupation: Retired Airline Captain

Comment: Too many foods are grown on plants that are addicted to pesticides. More pesticides are required every year to fend off weeds and insect pests. Genetically modified plants are exposing us to dangers that have never been tested for or whose time span of effects is longer than current evidence can show. Corporate agricultural conglomerates concentrate our crops into "monocultures" that are vulnerable to wipeouts by a single pest they have not been defended against. Diversity is the best protection against famine exposure through monoculture. Organic farming is the best protection for the consumer against unanticipated disease threats. Please don't let "politics" and moneyed interests get in the way of good policy and good nutrition.

COMMENT OF PHYLLIS HESS

Date Submitted: Sunday, May 20, 2012, 9:34 p.m.

City, State: Spokane Valley, WA

Occupation: Homemaker

Comment: I'm not really sure what the farm bill covers so I may be way off base here but my concern is that farmers seem to be prohibited from selling their meat, milk, eggs, produce, without a bunch of regulation. Why can't I just go next door and buy milk without the farmer being in fear of government reprisal? I was raised on fresh milk and want my children to have fresh wholesome food from the farm. I want to be responsible for choosing the quality of food my children eat. Right now the government says that genetically modified corn is ok for my family but I can't buy fresh milk. The government says its ok to sell chickens from confinement operations where the chickens are walking in their own feces and breathing powdered feces every day and eating genetically modified feed but the farmer who wants to raise clean free range chickens and process them in his own clean (by my standards and I'm the consumer) processing facility, is prohibited by government regulation. We need food choice and less regulation of the farmer. If we go to the farm and don't like the standard we see, we can stop buying there. We don't need government micro-managing our food supply. The constitution gives no authority to the government to manage the raising or selling of food. Just saying.

COMMENT OF KARL HESSE

Date Submitted: Friday, May 18, 2012, 8:10 p.m.

City, State: Huntersville, NC

Producer/Non-producer: Producer

Type: Fruits

Size: 50–150 acres

Comment: The current subsidies for commodity crops do not help farmers but raise land rents and give big business processors cheap inputs for junk food products. Further, such large scale industrial processing is a source for super bug breeding by excessive use of chemical and hormonal inputs.

Instead support and create programs that support beginning farmers and ranchers, organic farming, regional farm and food economies, and rural development. The future of the U.S. depends upon clean local food which means more small diversified farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;

KARL HESSE.

COMMENT OF SUZETTE HEWETT

Date Submitted: Thursday, May 03, 2012, 10:32 p.m.

City, State: Abington, PA

Occupation: Management Consultant

Comment: I work part time as a workshare with a local CSA. We produce a lot of food organically.

We don't use chemical sprays, fertilizers, or GMO seeds and we are thriving. We could put one of these in every neighborhood and still keep growing. People want local food.

Food that creates local jobs, that is safe to eat, that doesn't require you to subsidize it with large payments to large agriculture growers. We provide subsidized food to low income families and donate to food pantries.

Rethink the process you are doing and implement the needed changes to support local small agriculture. We can feed America and the World.

COMMENT OF ANGELA HIBBARD

Date Submitted: Friday, May 18, 2012, 9:27 p.m.

City, State: Detroit, MI

Occupation: Minister

Comment: I come from farm country and respect the land and the living that comes from it not just in terms of profit but the kind of "living" that comes from access to healthy fresh food. American agriculture is held hostage to agribusiness, chemical companies, and "markets" that have nothing to do with people's real needs. You are in the places of power which can maintain this hostage situation or begin to free both farmers and consumers to benefit the land and the food distribution system. In the name of the honesty which you entered public service I beg you to show some courage in the face of lobbyists and their money.

COMMENT OF ALISON HICKS

Date Submitted: Friday, May 18, 2012, 3:25 p.m.

City, State: Omaha, NE

Occupation: Call Center

Comment: Fake food is negatively impacting the health of many Americans. We require healthy food (not GMO) raised sustainably without the use of harmful pesticides, extra antibiotics, or GMO (Monsanto). Monsanto "food" is not healthy for human beings.

COMMENT OF BRIAN HICKS

Date Submitted: Monday, May 14, 2012, 11:12 a.m.

City, State: Oakland, CA

Occupation: Software Product Manager

Comment: The farm bill must serve Americans as a whole. This means several things:

1. Support for small local farmers, and for new farmers, so that rural communities can thrive;
2. Support for growing genuine food (not just industrial commodities like corn and soybeans) to feed people directly;
3. Ensure that our farmers are good stewards of the land so that it will be healthy and productive for many, many generations. This means supporting farming practices that build soil fertility and do not poison land, plants or animals for short-term productivity gains.

Thank you!

COMMENT OF MOLLY HICKS

Date Submitted: Sunday, May 13, 2012, 3:32 p.m.

City, State: Hilliard, OH

Occupation: Social Worker

Comment: Hello,

I am writing to urge Congress to NOT reduce funding in the current SNAP program. As a housing case manager for The Salvation Army, I see hunger firsthand

every day. If it weren't for the current SNAP program coverage some of my clients would not receive any assistance, which would be a huge burden to their already difficult lives.

COMMENT OF HARVEY HIEBEL

Date Submitted: Friday, May 18, 2012, 6:35 p.m.

City, State: Ramona, CA

Occupation: Retired

Comment: We need a farm bill that will encourage the small farm again not the big ConAgra business. We need to get back to organic farming to protect the soil we have and grow more healthy crops. no more farm aid to the big farms that grow GM crops. The ConAgra corporations do not care about how healthy our food is they only care about how much money they can make.

COMMENT OF ALISON HIGGINS

Date Submitted: Friday, May 18, 2012, 3:21 p.m.

City, State: Belpre, OH

Occupation: Office Manager

Comment: Please help farmers and stop the monopolization of seed patenting by Monsanto. The people of this country are becoming more informed about what is in our food and we do **Not** want genetically modified foods on the shelves of our grocery stores and markets! The more people become aware, the more people will stand up and say **No** to these practices that have become the rule instead of what use to be the exception. Please stop the madness.

COMMENT OF BRUCE HIGGINS

Date Submitted: Friday, May 18, 2012, 8:22 p.m.

City, State: Livermore, CA

Occupation: Sales

Comment: For me it's simple . . . help the small farmers who are using sustainable and organic practices . . . period. If large farmers commit to using 100% organic practices, then they should be included as well.

COMMENT OF LAURIE HIGGINS

Date Submitted: Friday, May 18, 2012, 11:54 a.m.

City, State: Collegeville, PA

Occupation: Homeowner

Comment: The farm bill must be changed. Support organic, vegetables, fruit, and **Small** family farms—**Not** agribusiness such as Monsanto, Cargill, ADM—or **Any** GMO "foods".

COMMENT OF SUSAN HIGGINS

Date Submitted: Wednesday, May 16, 2012, 1:25 p.m.

City, State: Phoenix, AZ

Occupation: Community Outreach Specialist

Comment: Problems for low-income people regarding the quality and quantity of food continue to appear as I visit my clients. We need to support community food banks with policies and programs like SNAP and others. Seniors especially need help in getting proper nutrition. Thank you for supporting food programs as part of the safety net for those who are struggling.

COMMENT OF MIKE HILAND

Date Submitted: Friday, May 18, 2012, 1:15 a.m.

City, State: Sherwood, OR

Occupation: Computer Programmer

Comment: Please restore full funding for the SNAP and TEFAP programs and do not cut them. Now is not the time to turn our backs on the poor and vulnerable, we cannot bring down the deficit on the backs of the poor.

Thank you.

COMMENT OF AMANDA HILBURN

Date Submitted: Friday, May 18, 2012, 5:09 p.m.

City, State: Fort Collins, CO

Occupation: Domestic

Comment: No GMO! Please consider how deadly and harmful it has been for rats . . . how would it be any better for humans. And no Monsanto crops that make their own pesticide . . . Monsanto is responsible for **Round Up** and **Agent Orange**. **Stop Killing Sustainable, Local Organic Farming**. Hemp can be used for thousands of purposes . . . please consider hemp.

COMMENT OF CINDY HILDEBRAND

Date Submitted: Friday, May 18, 2012, 3:12 p.m.

City, State: Ames, IA

Producer/Non-producer: Producer

Type: Specialty Crops

Size: 301–500 acres

Comment: I am a rural Iowa resident and own land in two counties. My land produces diverse prairie seed which is harvested every year, in addition to biodiversity, clean water, clean air, improved soil, stored carbon, research, and recreation.

My absolute number one priority for the new farm bill is conservation compliance in return for subsidized crop insurance. My second priority is the strongest possible Sodsaver provision. My third priority is conservation funding.

I will be blunt. As a rural Iowa resident, I can see for myself that the farm conservation situation in rural Iowa is bad enough even WITH conservation compliance in place. I don't even want to imagine what would happen if conservation compliance disappeared.

I can drive in any direction and see sheet erosion, gullying, officially-impaired rivers, creeks, and lakes, and more trees and perennial vegetation being bulldozed for the sake of more row crops. I drove through what looked like a miniature Dust Bowl scene just yesterday as planting was being done.

Iowa has some of the worst water in the nation and is a major contributor to the Dead Zone. The average Iowa row cropped acre is losing topsoil more than ten times as fast as it can be replaced. We desperately need more conservation in this farm bill, not less. And if more funding is not possible, American taxpayers have every right to at least expect conservation compliance in return for handing over money for crop insurance.

From what I read, new subsidized crop insurance plans promise to be very expensive. Why should my tax dollars subsidize soil erosion and water pollution so irresponsible producers can make more money?

Conservation compliance should be a bottom line requirement for any tax-subsidized crop insurance. Period. And the more that modest proposal is resisted by some farm organizations, the more it is obviously needed. If all farmers planned to do good conservation anyway, why would there be resistance to conservation compliance? Unfortunately, the question answers itself.

Thank you for reading this message.

COMMENT OF NITA HILDENBRAND

Date Submitted: Friday, May 18, 2012, 5:19 p.m.

City, State: Kirkland, WA

Occupation: Retired

Comment: This country needs to be more conservative in using GMOs, treating our farm animals more humanely, be more careful in farm pesticide use so that the runoff into our rivers and streams is kept at a minimum, stop using our land as if there is no such thing as poison, erosion *etc., etc., etc.*

Thank you.

COMMENT OF ALLISON HILL

Date Submitted: Friday, May 18, 2012, 6:36 p.m.

City, State: Taos, NM

Occupation: Chef

Comment: Increase subsidies to vegetable and Organic producers. Stop supporting factory farms. Let small producers prosper with a system so they can succeed. Boycott GMO crops completely, and ensure their labeling.

COMMENT OF STEVE HILL

Date Submitted: Friday, May 18, 2012, 2:34 p.m.

City, State: Brookings, OR

Occupation: Welder, Writer

Comment: My initial thought is to thank the members of the committee for serving, but I have to wonder who is being served. Less and less do I believe it is the consumer, or small farmer, but industrial agriculture and their moneyed concerns.

When I fly over the country, or see photos of current agricultural practices, what I am reminded of is not the hard-working American farmer, but the Soviet Collective we were taught to fear as children. I have to ask, does it matter if food supply is controlled by a Politburo or a boardroom? The reality is the end result is the same; no choice, no say, no recourse if there is a serious problem. Many say let markets sort it out, they'll do the right thing. When? The reality is that unless there is an untenable loss of life and resultant outcry that may impact the bottom line, there has never been an impetus for installing a moral compass at the helm of industry. Agriculture in this country is now an industry more than anything else. I read numerous fabrication journals relating to my business, and what I have noticed is industry today is focused not on quality of product, but efficiency of process. The push is not to make a good level of profit by turning out the very best products, but my streamlining and paring down the process so that the largest amount of product at the least cost is shoved out. I've not seen an article about maximizing quality of product in years (advertising notwithstanding), but hundreds about how to maximize profit.

Agriculture is the same. We turn out ton after ton of product with no real thought about its quality. Industry would say that isn't true, but if you do as many of us have and compare a personal diet of organic, heirloom, or homegrown produce, and meat not from a factory or feedlot but from a pasture, you will simply know that industry claims are untrue.

The backbone of the American diet is the small farmer growing high quality produce. Industrial agriculture and U.S. farm policy has made that backbone soft, porous, in danger of a major fracture.

In a world where money is deified, I urge the committee to make decisions that favor the farmers, and by extension the rest of us. Do what industry will not. Agribusiness has money enough. Help small organic farmers and their local communities.

COMMENT OF GABRIELLE HINAHARA

Date Submitted: Saturday, May 12, 2012, 10:24 a.m.

City, State: Middleton, WI

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I believe that America needs a farm bill that supports sustainable agriculture and access to healthy, fresh, local, and chemical and GMO-free food for everyone, including students eating school lunch. The priority should be on supporting agricultural and food systems that will benefit people and environment long-term, which means an emphasis on soil fertility, crop rotation, diversity (animals and crops being grown on the same piece of land), *etc.*

COMMENT OF SANDRA HINDS

Date Submitted: Friday, April 27, 2012, 2:32 p.m.

City, State: Las Vegas, NV

Occupation: Displaced Worker—Full Time Student UNLV—Elementary Education

Comment: Protect the TEFAP and SNAP programs within the farm bill. The statistics are staggering of those people who have been affected by the recession. Even though the economy is growing, the programs need to continue until the time those who **Need** these helpers are able to get on their feet and no longer need the programs! It will self correct with the economy going in the positive direction. Thanks for listening.

SANDRA HINDS,
Las Vegas.

COMMENT OF AREN HINELY

Date Submitted: Saturday, May 19, 2012, 1:12 a.m.

City, State: Portland, OR

Producer/Non-producer: Producer

Type: Vegetables
Size: Less than 50 acres
Comment: It's important that any Federal assistance for large farms be connected to conservation requirements, if only because large scale can lead to larger problems and benefits.

COMMENT OF ROBERT HINELY

Date Submitted: Friday, May 18, 2012, 1:23 p.m.
City, State: Sheridan, OR
Producer/Non-producer: Producer
Type: Fruits, Greenhouse/nursery, Livestock, Poultry/poultry products
Size: Less than 50 acres
Comment: I come from a health care background and when we started our farm a year ago I was shocked to see what it takes to earn a living from a small farm. In fact, both my wife and I still subsidize our farming activity with our day jobs and I think that is not fair. From talking with other family farmers, I think that is also the norm; at least one of the producers must work outside the farm. You should be able to make a living from growing good quality food for people without having to rely on outside income. I strongly urge this committee to end subsidies to large scale agri-biz so that smaller entities can compete. We should not need expensive lobbyists for you folks to see the light of day. (Read some Wendell Berry for heaven's sake). This country's agricultural policy started going downhill with Earl Butz in the 1970s but you can put us back on the road to sustainability with an improved farm bill. Good luck.

COMMENT OF BRANT HINRICHS

Date Submitted: Saturday, May 19, 2012, 1:17 a.m.
City, State: Springfield, MO
Occupation: Teacher
Comment: I support the following provisions:

- (1) The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- (2) Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- (3) The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- (4) Maintaining the EQIP Organic Initiative.

Local sustainable food supplies are absolutely essential if we are to get off our addiction to cheap energy and prepare for a difficult and challenging future. My kids are depending on it. What do big factory farmers fear? Let us have the opportunity to eat healthy sustainably grown food. The obesity epidemic in the USA pleads on both knees for it.

Please watch the movie *Food Inc.* to learn about how broken our "food;" system really is—economically, ethically, morally, environmentally, sustainably, healthily, etc., etc., etc.

Thank you for reading this far and taking my comments into consideration.

COMMENT OF RUTH HIPPI

Date Submitted: Friday, May 18, 2012, 12:05 p.m.
City, State: Alexis, NC
Occupation: Elementary School Media Assistant
Comment: As a cancer survivor, I know the importance of healthy food and environment. We must put a stop to GMO foods, excessive chemical use, and poor agricultural practices. Joel Salatin of Polyface farms in Va. has the right idea for growing crops and livestock for better food and environment. We **Must** support our local farmers, particularly those in organic growing and cut the mega factory farms and commodity crops that have been detrimental to our health and environment. Monsanto needs to be **Stopped** with all its GMO, pesticide related crop growing. They have sucked the life out of those farmers who initially grew their products for profit, only to find themselves trapped in a losing situation. America won't have to worry about being taken down by terrorists because we have become our own worst enemy by the way we practice agriculture and throw in big Pharma's drugs while you're

at it! **It Is Time To Take Back America's Health In Agriculture And Environmental Practices.**

COMMENT OF RUSSELL HIRSCH

Date Submitted: Friday, May 18, 2012, 4:06 p.m.

City, State: Kailua, HI

Comment: The security of our nation demands that we focus financial support of local, small farmers growing food products. We must be prepared for a future of high petroleum input costs and transportation costs that does not result in inflation in food costs for our people. Medical costs and the cost of sickness on productivity that are now skyrocketing can also be dramatically be improved by eliminating support for mono-field and GMO corn, soy, cotton, beet and canola. Encouraging the use of organic and natural system farming is key to our nation having a healthy, positive future.

COMMENT OF JERRY HIRSCHINGER

Date Submitted: Friday, May 18, 2012, 2:39 p.m.

City, State: West Lafayette, IN

Producer/Non-producer: Producer

Type: Field Crops

Size: Less than 50 acres

Comment: Support small farmers who attempt to grow their own seed. Stop subsidies to factory farms and agribusinesses which pollute heirloom gene pools with patented DNA. Allow consumers to choose organic and unpasteurized produce. Stop giving large corporate agribusinesses competitive advantages over small producers.

COMMENT OF WENDY HIRSCHMAN

Date Submitted: Friday, May 18, 2012, 2:21 p.m.

City, State: Frisco, TX

Occupation: Mom

Comment: I find it very interesting that the government wants to make restaurants to list on their menu's the fat content, *etc.* for each dish, appetizer, *etc.* but (and that is a big **But**) the Federal government is allowing GMO foods to be continued to be produced even though they have carcinogenics that could not only make the citizens of the U.S. sick, affect babies while they are still in the womb, *etc.* This is inexcusable and GMO grown food should be outlawed. Who knows what other horrendous effects that these GMO's products can do to a human being. The government does not do any studies about GMO effects on the populace—**Why**. I believe that the government should let the people to be able to purchase food for our families that do not have anything to do with GMO's. Please support the organic farmers who are trying to produce and sell their products to the American people. This will also lower our health care bills since we will not get sick as much. Thanks for your time. Wendy Hirschman a mom who wants to keep her family healthy and to be able to purchase safe food for us to consume.

COMMENT OF CAROL HIRTH

Date Submitted: Friday, May 18, 2012, 7:44 p.m.

City, State: Berkeley, CA

Occupation: State Employee

Comment: Please put small farmers, consumers and farmworkers first, not big agricultural corporations, they don't need or deserve subsidies, support or priority.

COMMENT OF JAMIE HIRTHLER

Date Submitted: Friday, May 18, 2012, 1:52 p.m.

City, State: Atlanta, GA

Occupation: Teacher

Comment: We need major reform for our country's policies on food and agriculture. Corporate agribusiness has become the dominant force in determining the agricultural practices of our nation, thus feeding our people based on cheap products with high profit margins instead of focusing on health. This in turn creates more sickness and disease because we are not eating right, and we end up spending more money on health care. Wouldn't it be better if we prevented the illnesses by eating healthy, natural, nutritious organic foods? We could also stop poisoning our Earth

and our farm workers with harsh chemical pesticides. Please support nutrition and organic farming in the next farm bill. Our country needs to be healthy in order to thrive!

COMMENT OF JOHN HIRTLE

Date Submitted: Friday, May 18, 2012, 2:20 p.m.

City, State: Lexington, MA

Occupation: Carpenter

Comment: Our survival depends on re-evaluating big ag—factory farming—which the U.S. has favored over smaller, family owned sustainable farms, which have been unfairly systematically destroyed by this imbalance. Giant wealthy ag corporations don't need subsidies or to be paid to not grow crops. Obviously factory farms are where the big money is and therefore have an army of lobbyists influencing policy. So instead of common sense, what prevails is what's good for rich factory farm operations that are only interested in profits that come at the expense of our environment, the ethical treatment of livestock, our health and countless traditional farming families who have been using the land sustainably for generations.

COMMENT OF BARBARA HLADUN

Date Submitted: Friday, May 18, 2012, 6:13 p.m.

City, State: Fairport, NY

Occupation: Retired

Comment: Please do the right thing for the people . . . give us food that is safe to eat and feed to our families. Leave politics and lobbyists, especially companies like Monsanto, out of the equation. And never forget you work for the people that put you in office, not the corporations with the big bucks.

Thank you.

COMMENT OF MICHAEL HOCEVAR

Date Submitted: Saturday, May 19, 2012, 4:48 p.m.

City, State: Georgetown, CO

Occupation: Finance Real Estate

Comment: If people let the government decide what foods they eat and what medicines they take, their bodies will soon be in as sorry a state as are the souls who live under tyranny.

COMMENT OF SUSAN HOCHANADEL

Date Submitted: Friday, May 18, 2012, 4:18 p.m.

City, State: La Follette, TN

Occupation: Retired

Comment: If we are serious about improving the health of the citizens of our nation (and reducing healthcare costs) we need to look first at our food and the source of our food. Please consider a farm bill that supports food production that is healthy for consumers and for our planet.

COMMENT OF AMY HOCKING

Date Submitted: Friday, May 18, 2012, 12:03 p.m.

City, State: Minooka, IL

Occupation: Substitute Teacher and Stay-at-Home Mom

Comment: Our family is a middle class educated family that lives in Minooka. I care what goes into the mouths of my family. Our diet consists of whole foods, barely any foods processed. We do not consume refined and artificial sugar (HFCS). We rely on organic farmers in our area for our beef, chicken, and produce. Please do not ignore our plea for a smart Farm bill. I want to be able to buy from local farms who grow food for my family responsibly without the use of pesticides or GMO seed.

COMMENT OF CLAUDINE HODGES

Date Submitted: Sunday, May 20, 2012, 9:55 a.m.

City, State: Fincastle, VA

Occupation: Organic Edible Landscape Design and Installer

Comment: I am 39 years old. I have an environmental Science degree from the University of Virginia. I have worked as an arborist, for the Department of Forestry,

and as a High School Horticulture and Ecology teacher for 3 years though the SOL requirements ran me off—When my provisional licensure ran out as I was missing two classes for dual certification, I quit. What I felt the education system needed that I might be able to provide was nutrition. My students had very limited familiarity and access to healthy food.

I started a pastured poultry farm with the Salatin method on a borrowed farm—paid for in \$6,000 of manure applied to the beef cattle pastures. When that farm went up for sale I ran another organic vegetable operation that also went up for sale 2 years later. Both operations were clearly headed for profitability after the first year! And I had no experience farming. Small scale farming works but I couldn't afford the land. Mentorship programs are key! I had a farmer pull up in front of my home in the middle of town and offer that first farm to me. Americans need healthy food—and they want it. My clients ask me to sell produce all the time, but I simply can't afford to get started. Now, I am just trying to teach them how to grow their own. Really the vast majority would rather just be able to buy greens and salad—my specialty and something that isn't available many places.

COMMENT OF SUEYAMA HODGES

Date Submitted: Friday, May 18, 2012, 9:09 a.m.

City, State: Ft. Myers, FL

Comment: We the people deserve fresh chemical free produce and at an affordable price. Where everyone involved in growing, transporting, selling and consuming is treated fairly. Keep our foods whole and healthy with minimal chemical use! Our kids need healthy unaltered fruits and vegetables on their tables!

COMMENT OF SUSAN HODGES

Date Submitted: Friday, May 18, 2012, 10:03 a.m.

City, State: Athens, GA

Occupation: Pastry Chef, Backyard Gardener

Comment: U.S. Agriculture policies need to change to reflect our growing understanding of the importance of supporting local and sustainable agriculture; we need to stop funding the biggest, most industrialized agricultural enterprises that do not need money and do not provide the most nutritious food, and use some of those funds instead to support smaller scale farmers and ranchers, especially those using environmentally friendly production methods.

Therefore, as the committee considers the 2012 Food and Farm Bill, I urge you to:

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;
- Provide an even “plowing” field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don't: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

COMMENT OF HEINZ HOEKE

Date Submitted: Friday, May 18, 2012, 2:19 p.m.

City, State: Highland, UT

Occupation: Retired

Comment: The American people need a farm bill that protects their interests, *e.g.*, food crops produced free of GMOs and organic. The agricultural corporations are only interested in profits regardless of the consequences. Organic farmers need

to be protected from inroads made by Monsanto, which are aimed to destroy family farmers.

COMMENT OF LINDA HOFF

Date Submitted: Friday, May 18, 2012, 12:17 p.m.

City, State: Grand Blanc, MI

Occupation: Advocate

Comment: I am a consumer and a back yard producer. As a taxpayer, I endorse legislative support of healthy farm practices, **Not** big business CAFOs, or tobacco farming, GM foods, or any other antisocial practices. I believe that our current system of farming with pesticides and antibiotics is harming people's health and our economy.

COMMENT OF ANTONIA HOFFMAN

Date Submitted: Saturday, May 19, 2012, 1:28 p.m.

City, State: Las Vegas, NV

Occupation: Realtor

Comment: I am all for **Organic** Farmers. I care where my food comes from and want pesticide free produce. We talk about health care when we should be concerned what we are eating first.

COMMENT OF CARLETON HOFFMAN

Date Submitted: Friday, May 18, 2012, 1:41 p.m.

City, State: San Francisco, CA

Occupation: Retired

Comment: Stop taking orders from Monsanto and other lobbyists and develop a policy that supports strictly defined organic standards and prohibits genetically engineered crops.

COMMENT OF MARC HOFFMAN

Date Submitted: Friday, May 18, 2012, 2:07 p.m.

City, State: North Wales, PA

Occupation: Real Estate

Comment: It is critical that a farm bill address the need for healthier, more humane foods. Organic food must play an important role. Our food choices in this country are entirely too unhealthy.

COMMENT OF PAULINE HOFFMAN

Date Submitted: Tuesday, April 17, 2012, 2:56 p.m.

City, State: Butler, PA

Occupation: Homemaker/Stay-at-Home Mother

Comment: Please sign the farm bill and give the people of your district the right to good, healthy, food and the choice to choose the additives and the lack of chemicals in our food. We want the choice of knowing what is being used, what is being put into our food. What the additives are, what the chemicals are that are used to grow the food. Pink slime is a terrible time in our country's history that I hope will never be again and we will look at it as a terrible mistake and learn from it, and never allow that kinds of additive in our food again without the express knowledge of the consumer and full disclosure. Thank you.

COMMENT OF JANET HOFFMANN

Date Submitted: Sunday, May 20, 2012, 3:04 p.m.

City, State: Campbell, CA

Occupation: Teacher

Comment: Please support a farm bill that stops giving subsidies to large, wealthy, growers for crops that are unhealthy and unsustainable. Instead we should be using public funding to support small farms who are truly struggling and for development of agricultural methods that use fewer herbicides and pesticides.

COMMENT OF KYLE HOFFMANN

Date Submitted: Friday, May 18, 2012, 7:15 p.m.

City, State: Newton, IA

Occupation: Student of Mechanical Engineering at Iowa State University

Comment: Please fund the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investing in sustainable agricultural research such as organic, permaculture, Holistic Management, and garden forestry while promoting local foods are essential to providing the quality of life we all deserve.

Please support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

Please support the full funding of conservation programs like the Conservation Stewardship Program (CSP), and make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. Also, improve CSP by ranking applications solely on their conservation benefits. Many farmers count on CSP as well as other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife while simultaneously farming profitably.

Please fully fund the Beginning Farmer and Rancher Development Program with mandatory funding that guarantees \$25 million per year while implementing all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). We need to support beginning farmers and ranchers entering agriculture.

Please support the maintaining of the EQIP Organic Initiative.

With the increase in energy costs, the increase in obesity, the increase in cancer and other chronic diseases we need to focus on improving the quality of food people are eating and that starts with improving the quality of the soil. We can't afford to have the average American meal shipped 1500 miles before it reaches our plate. We need to set up a system that relies on locally produced foods from farmers who use sustainable practices that builds soil instead of degrading it.

Please eliminate all subsidies that support ethanol production and ethanol research. Current research from the University of California, Cornell University, and others has shown that it takes more energy to produce ethanol than it saves when incorporating the overall energy balance. Therefore we have been wasting billions of taxpayers' dollars on a fuel that doesn't save energy and the practice of growing corn for ethanol has been degrading our soil, water, and air dramatically.

Thank you for your time.

COMMENT OF MARY HOGAN

Date Submitted: Friday, May 18, 2012, 1:00 p.m.

City, State: Guysville, OH

Occupation: Artist, Gardener

Comment: We need a farm bill that supports small diversified family farms. These farms provide true food security. Almost all food issues of safety and animal abuse are issues of mega, corporate farms, not small farms. Small, family farms, ideally using organic and sustainable methods, need support and exemptions from the rules needed by the mega-farms.

COMMENT OF SABRINA HOGAN

Date Submitted: Sunday, May 20, 2012, 9:05 p.m.

City, State: Monrovia, CA

Occupation: Actor/Artist/Environmentalist

Comment: Please keep Organic food pure, the way GOD create it, in the context of how it was grown in the early 1900's and before . . . before chemicals and science altered it! Keep the farms in the hands of the people not corporations or government and grow what we need not subsidize crops! Thanks!

SUBMITTED LETTER BY LAURA HOLBROOK

Hon. FRANK D. LUCAS,
Chairman,
House Committee on Agriculture,
Washington, D.C.

Dear Congressman Lucas:

I am writing to you about the U.S. farm bill. First, I hope you will accept the Senate's recent draft provisions that support healthy diets and food security, including the \$5 million annual funding increase for Community Food Projects and the inclusion of \$100 million over 5 years for healthy food incentives.

I have, however, several concerns about the draft bill that I hope can be addressed:

1. At a time when more households than ever rely on SNAP benefits that often run out before the end of the month, Congress should strengthen, not weaken SNAP, by raising benefits by adopting the Low-Cost Food Plan and eliminating restrictions such as the cap on shelter deductions. This bill would cut \$4 billion from SNAP by limiting states' ability to operate "Heat and Eat" policies, which would mean less food in the refrigerator for already hungry families.
2. We commend the Committee's recognition of the urgent need for additional funding for The Emergency Food Assistance Program (TEFAP) but it needs to be fully funded as the need for emergency food has grown substantially. Please include that in the farm bill.
3. Increased funding to the Senior Farmers' Market Nutrition Program (SFMNP) is needed as the program's demand already outpaces funding. Its mandatory allocation should increase.
4. While I congratulate you on proposing the elimination of direct payments for commodities and introduction of much needed whole-farm revenue insurance, it is unfortunate that these subsidies exist at all, especially in a period in which austerity is being applied in other areas. I would like to see a meaningful per-farm cap on subsidies and a lower individual income limit for recipients (which this bill in fact raises from \$500,000 to \$900,000). This would save enough money to spare conservation and anti-hunger programs from the proposed cuts. Such payments should be more strongly tied to conservation measures.
5. I would like to see the following revenue-neutral changes that were not adopted in this draft bill. Requiring that marketing agreements have a firm base price derived from an external source would help restore competition and promote fairness in our food system. Eliminating the EQIP livestock "set-aside" and reinstating caps on the size of livestock operations eligible for manure management funding would better achieve conservation goals. In this deficit-cutting climate, we should not miss the opportunity to make these and other important no-cost improvements.

Thank you for your time and attention.
Sincerely,

LAURA HOLBROOK.

COMMENT OF STEPHANIE HOLBROOK

Date Submitted: Saturday, May 19, 2012, 3:26 p.m.
City, State: Concord, NC
Occupation: Writer

Comment: I write to urge you to support organic farm funding and also to label foods that are genetically modified. The people have a right to know what they are eating. It might also help if you did not have a former Monsanto worker having free reign over our food supply. If I wanted polyester slacks I'd go to Monsanto but if I want good wholesome food I'll go to a local organic farmer.

JOINT COMMENT OF BILL, MARGOT & SCOTT HOLCOMB

Date Submitted: Friday, May 18, 2012, 1:30 p.m.
City, State: Tryon, NC
Occupation: Retired Educator(s) and Son

Comment: The older male member of this household was raised part-time on a (hard) working ranch on the Mojave Desert. We are all dedicated to the ideal organic farming and encouragement of relatively small family owned and operated farms.

COMMENT OF CHRIS HOLDER

Date Submitted: Sunday, May 13, 2012, 7:32 a.m.
City, State: Hammondsport, NY

Comment: Good grief, please restore all SNAP funding! Who truly believes it is a good idea to take from those who can least afford it? This punishes hungry children all across America.

COMMENT OF REBECCA HOLDER

Date Submitted: Saturday, May 12, 2012, 7:22 a.m.

City, State: Hammondsport, NY

Occupation: Retired

Comment: As a person who works with programs which feed hungry children and families in Yates County (Milly's Pantry Weekend BackPack program director and co-director of Food for the Needy,) I am distressed about the possibility of cuts to SNAP. We have already had large increases in need at our distributions. The local community cannot bear the hugely increased cost which will result if these cuts are enacted. Thank you for considering.

COMMENT OF KIM HOLETON

Date Submitted: Thursday, May 17, 2012, 11:33 p.m.

City, State: Sycamore, IL

Occupation: Organic Food Retailer Store Employee

Comment: As much as possible, I only buy organic food or locally, sustainable raised food. Please ensure that the providers of organic, sustainable and local food are protected and supported by the U.S. government.

COMMENT OF SHARON HOLFORD

Date Submitted: Friday, May 18, 2012, 1:53 p.m.

City, State: Portland, OR

Occupation: Retired Librarian

Comment: Please support small local farmers. Stop the subsidies to conglomerates that poison our food and make it impossible for farmers to compete to provide us with healthy, nutritious foods.

COMMENT OF DEL HOLLAND

Date Submitted: Friday, May 18, 2012, 5:28 p.m.

City, State: Iowa City, IA

Occupation: Retired

Comment: As the House Agriculture Committee prepares its version of the farm bill, I urge you to restore the link between taxpayer-supported subsidies for crop insurance and conservation compliance protections that will protect the nation's water and land.

COMMENT OF SAGE HOLLAND

Date Submitted: Sunday, May 20, 2012, 12:19 p.m.

City, State: Fox, AR

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Big farming and semi big Farms ruins the water and the soil and creates problems for all the small farmers downstream! If continually subsidized it will ruin the future of our hope for simple sustenance, there is too much food being wasted and too much commercial fertilizers going into the water table, now with drought conditions here in our area, entire regions are becoming deserts where there was once rain forests !They prevent this reoccurrence of the dust bowl days in other countries, but here sanity is seen as big government, when really the subsidies is the culprit! we need better regulations to make the production of food more long term environmentally sound. The little farmers shouldn't have to close up and move away because the big farms ruin the land and take all the water!

COMMENT OF JEFFREY HOLLAR

Date Submitted: Friday, May 18, 2012, 5:10 p.m.

City, State: Woodstock, VA

Occupation: Professor

Comment: Stop subsidizing corn and soybeans. This policy enables huge agribusiness to make more money while providing less nutritious food for consumption, particularly for low income people. Farm policies must be addressed in the context of health policies. Look at the data for diabetes and other chronic health issues and compare it to poor farm policies that help big business instead of the consumers. Thank you for considering my opinion.

COMMENT OF KIM HOLLENS

Date Submitted: Friday, May 18, 2012, 8:37 p.m.

City, State: Stewartstown, PA

Occupation: Homemaker

Comment: I have been supporting the organic farmer and sustainable practices as a consumer for over 10 years now. Spurred by my sons demand for quality food. We immediately experienced better taste, quality and nutrition. Even though the cost was 30% more, I found I needed less food as the food I was eating provided 30% more nutrition. My body demanded less. All of my grown children and their families make the sacrifice to pay more to eat better. Our food should not be a commodity for profit alone. It must come with care and concern for our environment, the Earth we grow on and the people we feed. We are growing Americans. Consider that when you eat food produced by industrial farms and wonder if there might be a correlation between what we feed our people and how poorly we perform when compared to many other countries that do take seriously what they put into their bodies.

I, Kim Hollens, a voting American, fully endorse the following bills,

- All provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF EUTRINA HOLLEY

Date Submitted: Thursday, May 10, 2012, 4:45 a.m.

City, State: Springfield, MA

Occupation: Cosmetologist/Entrepreneur

Comment: Please protect funding for critical Federal nutrition programs, and please take into consideration the Supplemental Nutrition Assistance Program (SNAP) as you re-evaluate the farm bill.

COMMENT OF ELIZABETH HOLLINGSWORTH

Date Submitted: Sunday, May 20, 2012, 7:26 p.m.

City, State: Pinetta, FL

Producer/Non-producer: Producer

Type: Greenhouse/nursery

Size: Less than 50 acres

Comment: Get agriculture out of the hands of factory farms & politicians! We can feed America just fine without them. Support small family farms, which built this country in the first place! And we'll all be the healthier for it!

COMMENT OF CHRISTOPHER HOLLIS

Date Submitted: Friday, May 18, 2012, 4:09 p.m.

City, State: Oakland, CA

Occupation: Entrepreneur

Comment: It would be good for this country if the government started helping to make this country healthy again and worked for the small farmers instead of just the corporations. Can you not see that the American people are growing tired of your love of campaign dollars at our expense?

COMMENT OF JUDITH HOLLIS

Date Submitted: Sunday, May 20, 2012, 4:22 p.m.

City, State: Fond Du Lac, WI

Occupation: Pharmacist

Comment: I am a natural medicine pharmacist & am concerned greatly about what our citizens are eating and the growing tons of insecticides used on our foods. Gastroenterologists are saying our G.I. tracts are becoming insecticide factories. What is that doing for our delicate enzyme systems? Too many people are on proton-pump inhibitors as it is. Start thinking about life and less about profits!

COMMENT OF ALICIA JOY HOLLOPETER

Date Submitted: Friday, May 18, 2012, 6:06 p.m.

City, State: Lexington Park, MD

Occupation: Mechanical Engineer

Comment: Please focus on small, local, sustainable farms, and organic foods. Congruently, if American awareness of reasonably priced, fresh, local produce is elevated, it would certainly help alleviate the pressing national problem of obesity. Southern Maryland has a great local farm community and access to healthy choices—and the farmers themselves are so knowledgeable about what they provide and offer clever recipes and suggestions. This is a lovely way to shop and eat, and I feel Americans could benefit from contact like this and become healthier. Please help these farms and others like them to thrive, and provide the opportunity for other farmers to benefit their communities with good, non-processed food.

COMMENT OF WILBUR HOLLOWAY

Date Submitted: Wednesday, May 09, 2012, 7:20 p.m.

City, State: Newark, OH

Occupation: Janitor

Comment: I believe that the United States and Mexico can work together showing them how to farm their land. In return the United States can buy back some of the food also to help feed the people here and also help lower cost here in the United States. Both countries can benefit from this we can save lives and it can spread to other countries helping there bordering countries.

COMMENT OF DELORES HOLMES

Date Submitted: Friday, May 18, 2012, 4:01 p.m.

City, State: Aston, PA

Occupation: Retired

Comment: As a board certified Holistic Health Counselor and a mother of children that have struggled with mental health problems I cannot stress it enough, how important it is to have access to good quality organic food. I have seen first-hand, how people are suffering due to eating poor quality food, either pay the farmer or pay the Doctor.

COMMENT OF DIANE HOLMES

Date Submitted: Saturday, May 19, 2012, 3:30 p.m.

City, State: San Juan Capistrano, CA

Occupation: Unemployed

Comment: Please support the Organic Farm Bill. Please continue to provide funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture. The future wellbeing of our population is in your hands.

COMMENT OF TYLER HOLMES

Date Submitted: Friday, May 18, 2012, 11:13 a.m.

City, State: Swannanoa, NC

Occupation: Adventure Education: SOAR Outdoor Trip Leader

Comment: The majority of government subsidies for conventional agricultural farms is far disproportionate to that of small farms who supply fresh local food, which is the most nutritious for the health of our nation. There needs to be substantial investments put into replenishing the soil with microbiology and nutrients, and scientific research is clearly showing that conventional agriculture is unsustainable and destructive. Remember the Dust Bowl? I was not alive but my grandfather remembers it clearly. He was a true American Farmer, and a government nature conservationist.

Please, think seven generations ahead.

COMMENT OF NANCY HOLSTE

Date Submitted: Friday, May 18, 2012, 12:00 p.m.

City, State: Fall City, WA

Occupation: Interior Designer and Health Coach

Comment: As someone who battled environmental illness with no insurance and still working at age 72 I can tell you GMO and chemicals are big business not con-

sidering the welfare of the people. May no one in your families experience the years of suffering, I endured. I finally overcame threew years of study and keeping my surroundings and food **Organic**.

COMMENT OF CHANDRA HOLSTEN

Date Submitted: Friday, May 18, 2012, 8:32 p.m.

City, State: Ashland, OR

Occupation: Gallery Director

Comment: We, as citizens and consumers, have a right to your considerations of our preferences for organic foods that has not been affected by GMOs. We are asking you to honor these needs above those of big agri-biz to protect us from foods we consider to be unhealthy, or even dangerous. Your department needs to be more directly involved in the overseeing and regulations that guarantee the purity and safety of our foods. Thank you.

COMMENT OF KENDRA HOLT

Date Submitted: Saturday, May 19, 2012, 8:52 a.m.

City, State: Wheaton, MD

Occupation: Professional Musician

Comment: It is of the utmost importance that U.S. organic standards be as strict as any states' (CA for instance) for the safety of consumers. I have bought organic products for years and expect them to be just that, not some halfway compromise of convenience. Please do your jobs and protect the public from the chemicals and dangers of big Agriculture.

COMMENT OF ANA HOLTEY

Date Submitted: Saturday, May 19, 2012, 8:10 p.m.

City, State: Prescott, AZ

Occupation: Retired

Comment: With impunity, big farmers ruin **Any** competition, but the small or organic farmer is the best farmer, so much so that they keep **Earth** the way it was meant to be. What are **You** going to eat when there is nothing free of chemicals or hormones left? Girls 13 or 14, with breast that Jane Mansfield would had envied, boys big or bigger at the same age that most adults, **Thanks** to the **Hormones** in milk. **Please**, stop this insanity of not giving people options! If you want poison, eat it, I don't and I want a choice.

COMMENT OF JAMES HOLTZ

Date Submitted: Friday, May 18, 2012, 10:49 p.m.

City, State: Petoskey, MI

Occupation: Manager for Casual Dining Restaurant

Comment: It is time to end hunger. We cannot continue to give funds to farmers so that do not have to grow food on the land. This must stop.

I would like to see aid to farmers to grow more food so that America can continue to help all Americans. I would think that it would be better to have a food surplus. Thank you.

COMMENT OF JAKE HOLTZMAN

Date Submitted: Friday, May 18, 2012, 10:37 a.m.

City, State: Oberlin, OH

Occupation: Student

Comment: We cannot live without food. So there needs to be more policy that allows all people to have access to clean and fresh produce. That should be an undeniable right. Secondly, the injustices that farmers face across the nation are unbelievable. No farmer should be forced into planting GMOs or spraying toxic pesticides that endanger the health of both the farmers and the consumers. Let's change the system now so that it actually abides by common sense!

COMMENT OF MARGOT HOLTZMAN

Date Submitted: Friday, May 18, 2012, 6:16 p.m.

City, State: San Rafael, CA

Occupation: Substitute Teacher

Comment: It is critical that we change our current agricultural laws and practices. We need to support sustainable and conservation land practices. We need to fund programs that support new and socially disadvantaged farmers and ranchers, organic farming and regional and local food economies. It is imperative that we end subsidies that award big industrial farms and replace that with loophole free agriculture risk coverage. Thank you for your consideration. It is in the best interests of all of us.

COMMENT OF MICHAEL HOLZMAN

Date Submitted: Friday, May 18, 2012, 5:49 p.m.
City, State: Lacey, WA
Comment: Stop supporting the Big Agra Corporations with subsidies, properly label food and it's ingredients (GMO) and if any assistance is to be given, let it be to the small farmers.

COMMENT OF KELLY HOLZWORTH

Date Submitted: Saturday, March 17, 2012, 7:34 a.m.
City, State: Saratoga Springs, NY
Producer/Non-producer: Producer
Type: Specialty Crops
Size: Less than 50 acres
Comment: Please support our small farms by increasing funding for programs that help farmers sell their products to their communities. Please stop subsidizing big ag and CAFOs. Please increase funding for research of organic growing techniques, beginner farmer training, and small farm distribution of products.

COMMENT OF DEANNA HOMER

Date Submitted: Friday, May 18, 2012, 12:21 p.m.
City, State: Stillwater, OK
Occupation: Retired
Comment: Big agriculture does not need to be subsidized, especially at the expense of hungry children. Monocultures have ruined the soil and the pesticides and herbicides used leave residues in the plants and in the soil before being washed into our rivers and streams. Compare the money earned by agribusiness with that earned by poor families who are trying to feed their children.

COMMENT OF KADY HOMMEL

Date Submitted: Friday, May 18, 2012, 1:06 p.m.
City, State: Colorado Springs, CO
Occupation: Marketing Consultant
Comment: Please—let's get this right. Let's make things fair for consumers, and for the producers who are working hard, with integrity, to bring us safe, sustainable food, and who are committed to good stewardship of our land resources.

COMMENT OF YUNIE HONG

Date Submitted: Thursday, May 17, 2012, 1:42 p.m.
City, State: Washington, D.C.
Occupation: Policy Advocate, Hmong National Development, Inc.
Comment: Hmong National Development, Inc. is a national advocacy organization that works on behalf of Hmong communities throughout the U.S. Large swaths of the Hmong communities are small family farmers that are filling the void in rural communities as older generations of farmers leave the industry. While they could benefit greatly from certain Federal programs, they lack access due to linguistic and cultural barriers. As you move forward with the farm bill, we encourage you to support and fund programs for small, beginner, minority, and socially disadvantaged farmers. Specifically, we ask that you incorporate programs that promote rural development such as the Beginning Farmer and Rancher Development Program and the Local Farms, Food, and Jobs Act. We also ask that you not cut vital SNAP and WIC benefits and continue to provide a safety net for those that are struggling. In addition, we ask that you support the language in the GIPSA rule that protects small farmers from unfair business practices. Hmong farmers, particularly those in the poultry business in the Ozarks, are being forced to file for bankruptcy and losing their life savings due to the conditions in the poultry industry, and they need the GIPSA rules to level the playing field.

COMMENT OF WENDY HONOLD

Date Submitted: Friday, May 18, 2012, 4:38 p.m.

City, State: Sheboygan, WI

Occupation: Managed Care Companion

Comment: I want GMO labeling on foods, and I support sustainable organic farms. I'm very unhappy that Obama appointed a former Monsanto Exec. to be the head of agriculture. I wish GMO mutated crop pollen invasion of neighboring fields was considered a punishable violation. All of your unnecessary pesticides are killing back the bee population and other valuable insects. **You Are Reforming The Earth In Detrimental Ways.**

COMMENT OF STAN HOOBING

Date Submitted: Wednesday, May 09, 2012, 3:08 p.m.

City, State: Boise, ID

Occupation: Ordained Lutheran Pastor

Comment: I would like to see in the farm bill items that strengthen such programs as SNAP, meals for senior citizens and that help feed young people in public schools.

COMMENT OF GREGORY HOOD

Date Submitted: Saturday, May 19, 2012, 2:21 p.m.

City, State: Apple Valley, CA

Occupation: Military Contractor

Comment: The food issue is a personal issue that goes beyond what I am putting in my mouth. My wife has an extensive number of food allergies and suffers from anaphylaxis to some very basic vegetables like carrots and celery. Bottom line is the toxicity of her body is in direct proportion with the amount of processed/industrially produced food she eats. Soy, wheat, corn and their secondary products like lecithin, which prevents proper liver function are far greater problems than mold on cheese (many of us pay extra for the mold). I could go on but most major industrial food operations are in the business of making money—not delivering healthy product. Example: Mad Cow is back. That didn't happen in a small dairy operation. Pink slime and meat glue are not present or employed to assemble meat products in small food operations. The bottom line is the FDA and government is lazy when it comes **To** foodborne illness prevention and disease control. It is far easier to monitor one large operation, if poorly, than to track the processes of 1,000 smaller ones. The fact that I can't sell or even give away fruit from my trees is without a license and overzealous regulatory control is crazy. It is waste. This is counter to free enterprise and is anti-democratic. Let the people chose what's good for them. If we are going to regulate, regulate what is bad, not what is good.

COMMENT OF MARGARET HOOS

Date Submitted: Friday, May 18, 2012, 2:20 p.m.

City, State: Royersford, PA

Occupation: Housewife

Comment: There is a limit to what this planet can give in resources and take in abuse. We will have to start to take care of it and get rid of the overload of man-made chemicals that will destroy nature. We have to think about sustainability and not profit (money).

COMMENT OF KIM HOOVER

Date Submitted: Saturday, May 12, 2012, 4:34 p.m.

City, State: Port Townsend, WA

Occupation: Home Health Care Worker

Comment: I am very concerned about the serious state of health of our citizens and our environment. Numerous reliable, peer-reviewed, governmentally funded studies show that eating an animal-based diet is deleterious to our health and that we would all be healthier eating a plant-based diet. Animal-based diets are correlated with obesity, cardiovascular disease, diabetes, and cancer,¹⁻³ the leading

¹ *The China Study*, T. Colin Campbell and Thomas M. Campbell.

² Dr. Neal Barnard's *Program for Reversing Diabetes*

³ *Prevent and Reverse Heart Disease*, Caldwell B. Esselstyn, Jr., M.D.

causes of deaths in the U.S., in addition to being a serious detriment to our economy. In addition, growing animals for food uses 50% more energy,⁴ takes much more water and land,⁵ and produces much more soil, air, and water pollution.⁶

Yet, the majority of our farm subsidies go to the dairy, meat, and fishery industries and to grow the monoculture of corn and soybeans that are fed to these animals. Basically, as taxpayers, and as a government, we are in reality PAYING to make people sick and to degrade the environment at the same time.

This is nothing less than a travesty and I implore you to please make the changes necessary to the next farm bill to eliminate these subsidies so as to support healthy plant-based diets for our school lunch programs, WIC and SNAP programs. Elimination of the meat and dairy subsidies will show the true cost of a fast food meal and will result in an increase in healthy eating habits of all Americans.

Sincerely,

KIM HOOVER.

COMMENT OF REV. GLENDA HOPE

Date Submitted: Friday, May 18, 2012, 2:35 p.m.

City, State: San Francisco, CA

Occupation: Clergy

Comment: For 40 years I have worked with the poor families, disabled people and others in San Francisco's Tenderloin. I know how vital the food stamps are for them.

Surely it is time to stop subsidies for such crops as cotton and soybeans and invest in developing farming practices that are sustainable and positive for the planet.

Thank you for considering this as you vote on this legislation.

REV. GLENDA HOPE.

COMMENT OF BRITTANY HOPKINS

Date Submitted: Sunday, May 20, 2012, 9:55 p.m.

City, State: Bangor, ME

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I am a young farmer in my first year as owner of Wise Acre Farm in Kenduskeag, Maine, which will be selling fresh vegetables to local farmers' markets and institutions in the greater Bangor area. I think it is important for the farm bill to include and expand programs that help the next generation of growers build strong farm businesses. The country needs us to grow food, create jobs and support the many other businesses that furnish our supplies and equipment. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country, including the Maine Organic Farmers and Gardeners Association's Journey person program, which is providing incredibly helpful educational and technical assistance to me for the next 2 years as I launch my farm business.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing

⁴*Food, Energy, and Society*. Pimental, D. and Pimental, M.H.

⁵*Bioscience* 54 (10): 909-918

⁶*Plan B: Rescuing a Planet under Stress and A Civilization in Trouble*, Lester R. Brown.

materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs. I have applied for funding to support a high tunnel, cover cropping and establishing organic certification through the EQIP Organic Initiative, and the cost share differential for beginning farmers makes a big difference in making this program worth the time and paperwork for me and other farmers starting out on a small scale.

- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

BRITTANY HOPKINS.

COMMENT OF ROBERT HORAN

Date Submitted: Friday, May 18, 2012, 2:02 p.m.

City, State: Vermilion, OH

Comment: Farm food should be free to grow, sell, eat, and transport **Period**. Only **Food Factories** and **Corporations** should be controlled and manipulated. It was the family farm that built this country and it was corporations and politicians who have ruined it. It's time once again for the Constitution to be used and our freedoms to reign. I have the right to drink raw milk should I chose to. It's none of your concern until factories poison our food and intentionally destroy the life within it. Family farms are to be protected and free at all costs. Corporations and food factories are to be discouraged and defeated at every turn and at all costs. Food should be grown, sold, and eaten locally without regulation. Bad farmers do not last long if his customers choose the farm down the road. The government is the one needing regulation, and it was written in the Constitution that it be severely limited.

COMMENT OF MAIKA HORJUS

Date Submitted: Sunday, May 20, 2012, 2:31 a.m.

City, State: Vancouver, WA

Occupation: Transportation/Administration

Comment: I appreciate your work on our nation's food and farm policy and strongly urge you to make this farm bill about **Food**. Make this a Bill about creating a healthy, resilient nation that values the health of its people, its land, and **All** of its farmers. Make this Bill about healthy, nutritious, accessible food for every child, family, and individual in every region of the nation.

I strongly support:

1. The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
2. Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
3. The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
4. Maintaining the EQIP Organic Initiative.

I also beg that you defend our democracy and keep the good of the people—particularly the most vulnerable in our nation—at the forefront of your policy-making. Thank you so much for your consideration in this matter and for your public service on behalf of all Americans—the hungry, the hardworking, the malnourished, the obese, the uneducated, the well-educated, the aspiring farmers, the health workers, the farm workers, the politicians, the fathers and mothers and sons and daughters, the grandchildren . . . this is not just a bill about agriculture; this Bill is about all of them. This Bill is about our values and priorities as a country. Please consider this as you discuss.

Thanks again.

City, State: Camillus, NY
Occupation: Marketing Consultant
Comment: We desperately need a farm bill that supports local, organic and NOFA pledged farming standards. Enough with all the subsidies for Big Agribusiness. I plead for a more local friendly farm bill.

COMMENT OF RUTH HOSEK

Date Submitted: Friday, May 18, 2012, 2:08 p.m.
City, State: Chicago, IL
Occupation: Retired Teacher
Comment: There is no excuse for growing crops that are injurious to the health of those who eat them. GMO crops are especially injurious and should be banned as soon as possible. They have already done great damage but perhaps their continued evil can be mitigated by destroying them forever. Oh, yes—poor Monsanto. They might lose money. It is only money and they can make more by devising helpful things instead of evil and polluting things. Interesting idea?
 I hope you will not condemn your progeny to early disease and death by allowing more distribution of these GMOs. Your name will live on only to be excoriated and hated by them as they live short, unhealthy lives.
 And we who now are alive, we need to have that produce labeled so we can choose between health and death. You were chosen to preserve and protect. Do your jobs. Or have they given you a cook book on how to prepare money as a meal?

COMMENT OF NANCY HOTALING

Date Submitted: Friday, May 18, 2012, 1:38 p.m.
City, State: Riverside, CA
Occupation: Grounds Keeper
Comment: We need to support Sustainable farming! AND make sure we have adequate oversight to assure that our food is kept safe. Please work to protect the American people's food sources. Take a look at the wonderful work being done by the Kansas Land Institute.
 Thank you.

COMMENT OF EVELYN HOUBEN

Date Submitted: Sunday, May 20, 2012, 4:39 p.m.
City, State: Ft. Lauderdale, FL
Occupation: Writer
Comment: Let's protect small farmers. We need locally grown food which isn't transported thousands of miles before it just reaches our stores. We need to do more to encourage organic foods. GMO foods or ingredients shouldn't simply be labeled, which, for the most part, they are not, and "natural" labeling allows consumers to be misinformed. We need a ban on GMO crops. We need high fructose banned from all foods. These are only some of the changes needed. Our food chain is making Americans **Sick** and think of how much health care costs! Agro-business is a shady industry. Do not allow it to continue poisoning us.

Thanks for your attention and concern about these matters.

Comment: I feel strongly that everyone should be able to know what is in the food we buy. Also, I support organic farming and all small farmers. I will be watching to see how you vote.

COMMENT OF BRIAN L. HOUSEAL

Date Submitted: Thursday, May 17, 2012, 12:25 p.m.

City, State: Elizabethtown, NY

Occupation: Executive Director—Adirondack Council

Comment: May 16, 2012

House Committee on Agriculture,
Washington, D.C.

Dear Mr. Chairman and the House Committee on Agriculture:

The Adirondack Council, a member based nonprofit organization dedicated to ensuring the ecological integrity and wild character of the Adirondack Park, appreciates the opportunity to comment on the 2012 Farm Bill. Our organization advocates for the conservation and improvement of agricultural lands in the Adirondack Park, for the sustainable production of food crops and forestry products, and for the protection of ecological resources. We seek to support and promote farming and forestry that upholds rural quality of life, clean air and water, native wildlife, and vibrant local communities. In addition to its recognition as the East's greatest wilderness, the Adirondack Park is home to approximately 52,000 acres of farmland, with the greatest concentration in the Lake Champlain and St. Lawrence River valleys.

Despite growing public interest in local food and open space preservation, these farmlands and forests face the same formidable list of challenges as others across the nation. The celebrated woodlands of the Adirondacks are under constant siege of fragmentation due to second home development, and similarly, small family farmers disadvantaged by incentives that favor large-scale agribusiness are pressured to subdivide or sell their land to developers.

Mindful of these challenges, it is imperative that the farm bill puts incentives in place to protect the quality and quantity of our forests, and strives to ensure that small farms remain economically viable, while also building upon past initiatives to promote ecologically sound farming practices and conservation efforts.

The Adirondack Council enthusiastically applauds the Senate Committee on Agriculture's continued and expanded support of the Forest Legacy Program, and wishes to see the House follow their example.

Additionally, the Committee's endorsement of the grant-based Northern Border Regional Commission is vital for advancing environmentally responsible community development projects in rural areas of New York, Vermont, New Hampshire, and Maine.

While the Senate's support of these programs is commendable, we urge the House Committee to distinguish itself by fully funding the Conservation Stewardship Program (CSP). As the primary vehicle for encouraging farmers to implement ecologically beneficial practices through economic incentives (encompassing issues such as soil quality, erosion, water quantity and quality, biodiversity, air quality, energy conservation, *etc.*), funding of the CSP would greatly improve the capacity of farmers to restore the resilience and health of their farmland and parent ecosystems throughout the country. Such an investment would not only pay dividends to farmers now, but the consequent boon to ecosystem services would yield sustained benefits for those farmers and adjacent communities in the future.

The farm bill has tremendous potential to positively influence the present and future livelihoods of American farmers and the millions of people they feed. The Adirondack Council firmly believes that a renewed commitment to the Conservation Stewardship Program is essential to realizing our vision of sustainable agriculture, and would effectively sow the seeds of a brighter future for not only our farmers, but our society as a whole.

Sincerely,

BRIAN L. HOUSEAL,
Executive Director,
Adirondack Council.

COMMENT OF ALAN W. HOUSEMAN

Date Submitted: Friday, May 18, 2012, 3:30 p.m.**City, State:** Washington, D.C.**Occupation:** Executive Director, Center for Law and Social Policy**Comment:** Dear Representative:

As Congress works to craft the FY 2013 Agriculture Appropriations bill, CLASP, the Center for Law and Social Policy, strongly urges you to protect the Supplemental Nutrition Assistance Program (SNAP) and other programs that serve vulnerable families, children and the elderly. CLASP is a national policy organization that seeks to improve the lives of low-income people by developing and advocating for Federal, state and local policies to strengthen families and create pathways to education and work.

In these tough economic times when unemployment and underemployment rates remain high and families across the country continue to struggle, vital nutrition programs have proven to be a lifeline for millions. According to a report by the U.S. Department of Agriculture (USDA) Economic Research Service released in April 2012, on average, SNAP helped 44.7 million individuals monthly with modest food supports averaging just \$134 in 2011. The findings showed that SNAP has lifted millions out of poverty, achieving an annual decline in the nation's poverty rate of 4.4 percent between 2000 and 2009. SNAP has effectively responded to the needs of low-income families and communities during times of economic downturn and increased struggle. Enrollment increases when the economy weakens and decreases when the economy recovers. It is a program that must be protected and strengthened to serve the needs of so many families still facing real hardship across this country.

One of the cuts that this committee has considered would eliminate states' ability to align SNAP's rules with other programs serving low-income families through "categorical eligibility." Categorical eligibility makes it simpler to administer the program, reduces administrative costs, and helps ensure that eligible households have access to all applicable support programs. Most categorically eligible recipients would still qualify for SNAP under the standard rules, but would have to struggle through additional red tape to do so. According to the Congressional Budget Office, eliminating broad-based categorical eligibility would save less than 2 percent of projected spending for the program between 2013 and 2022, because most recipients affected by it receive a minimal benefit. Increased time to verify information on SNAP applications would result in more errors and greater administrative costs, further diminishing savings. Categorical eligibility must be protected as Congress considers the FY2013 Agriculture Appropriations bill.

One of the ways that states have used categorical eligibility is to raise the excessively low asset limit that often traps people in poverty. According to Federal provisions, SNAP participants are disqualified if they have assets above just \$2,000. This very low asset limit discourages low-income families from saving for emergencies and building assets and it prevents families from escaping poverty. It also disqualifies the long-term unemployed from receiving benefits until they have completely exhausted their savings, making it harder for them to repair a car, buy an interview suit, or move in pursuit of a new job. Congress should consider raising this limit in all states. In President Obama's FY 2011 budget, he proposed setting a national asset limit floor of \$10,000 for SNAP and other programs serving low-income families to allow them to accumulate a modest amount of savings and still qualify for assistance.

While it is essential that SNAP remain available for those who need it, everyone agrees that it would be better for workers to have jobs that pay well enough that they no longer need benefits. Therefore, it is important to preserve the SNAP Employment and Training program, which prepares participants for jobs and ensures access to services for a particularly vulnerable group of people. SNAP Employment and Training must not be cut, especially in these times when unemployment is still high.

SNAP is particularly important given that millions of people will be exhausting their unemployment benefits over the next year due to the economy's slow recovery. For a significant share of recipients, SNAP is truly all that stands between them and destitution and is one of the few resources available to them. In fact, a U.S. Congress Joint Economic Committee report revealed that in 2010, more than one in five workers unemployed for over 6 months received SNAP benefits.

SNAP is a vital program to low-income individuals and to our recovering economy and it is necessary that we protect and strengthen it. Not only does it help individuals make ends meet, but the expenditures of SNAP help to boost the economy as low income families are able to make purchases in local grocery stores and markets.

We urge your strong opposition to any harmful attacks at restricting or cutting SNAP eligibility or benefits and efforts to weaken the responsiveness of the program, and ask that you support SNAP and other vital programs that serve low-income families, children and the elderly as discussions around the Agriculture Appropriations bill moves forward. In addition, we urge your steadfast leadership in ensuring adequate funding levels for SNAP to strengthen its reach to low-income families, children and the elderly.

Sincerely,

ALAN W. HOUSEMAN.

COMMENT OF DAVID HOUSEMAN

Date Submitted: Sunday, May 13, 2012, 4:48 p.m.

Occupation: Retired

Comment: We must have a farm bill that restores economic sense to viable family farms and to consumers, while it preserves/enhances our natural resources. That means not subsidizing large absentee landowners who abuse the land by using great quantities of fossil fuel inputs which, over the long term, ruin our soil and water resources and contribute to air and water pollution. Farmers and ranchers must use **Sustainable** practices that preserve our precious resources for generations to come and make it possible for young people to take over as existing farmer and ranch owners grow older.

COMMENT OF SUSAN HOUSTON

Date Submitted: Friday, May 18, 2012, 12:33 p.m.

City, State: Nashville, TN

Occupation: Computer Technician

Comment: I am deeply concerned with the growing power of corporate agribusiness in this country. It is destroying the future of independent farming. It is patently obvious that companies like Monsanto have no interest in preserving any livelihood but their own, and both the integrity of the food they produce and their lobbying in Washington is extremely suspect.

I believe that this is an issue that, in future years, is going to prove to be a significant turning point for this country, and I beg Congress to **Do The Right Thing** and help American farmers to survive and thrive, as well as ensure the safety and nutrition of the food produced.

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

This is not the time to be collecting donations from agribusiness; please, be on the right side of history instead of thinking about your next election, and vote for these measures.

City, State: Jacksonville, FL

Occupation: Professional Architect

Comment: Mr. Crenshaw,

Please do all you can to turn the health of our nation around, there is an epidemic of auto immune disorders due to the destruction of our food and water this is being ignored by the nation and big businesses. The Earth is waning away, mimicking the morals and depravity of man's minds and heart.

We talk about Greening America with LEED, *etc.*, however not one thing is being done to get rid of all the unnatural chemicals and the unproven GMO forced techniques we utilize in agriculture. The U.S. is allowing the destruction of our planet and this in turn is destroying everyone's health.

Look at your own family, I'm sure you will find at least one family member in dire straits. Our health industry is over burdened with this epidemic however no one seems to care. Let's just let the big business pad their pockets.

All the Obesity, Celiac, IBS, and myriad of auto immune disorders can be traced back to all the toxins we allow in our food and water, I personally just turned my health issues around by drinking and eating clean purified water and organic fresh fruits vegetables, however I understand if companies like Monsanto, DuPont have their way all of this healthy lifestyles will be a thing of the past. We need to turn this around and start "Paying this Forward" for the livelihood of our children's children.

COMMENT OF JAMES HOWE

Date Submitted: Friday, May 18, 2012, 11:11 p.m.

City, State: Goehner, NE

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Farm policy recently has focused far too much on allowing advantages to large corporate agribusinesses, which are as far removed from actual agriculture as one can get. The small farm, the family farm, organic farms, healthy farm practices that do not rely heavily on chemicals or genetically modified crop substances should be the focus. Genetically modified foods of all sorts should be scientific experiments in the labs only and are not fit to be fed to animals or people and should never have been unleashed onto the environment. Backing away from and eliminating policies they allow the altered organism to be found anywhere in our food supply would be a boon to the world at large and especially the people in America. Please focus farm policy on independently proven healthy choices (not industry proven), on small farms, organic farms and naturally reinigorated resources. Thank you.

COMMENT OF AMANDA HOWELL

Date Submitted: Friday, May 18, 2012, 1:22 p.m.

City, State: Los Angeles, CA

Occupation: Educator

Comment: Organic, local, sustainably farmed food is a must for this country's future. The innumerable environmental and health problems caused by the industrial agriculture system are destroying the U.S. and our planet.

COMMENT OF JO ANNE HOWELL

Date Submitted: Friday, May 18, 2012, 2:18 p.m.

City, State: Aromas, CA

Occupation: Librarian

Comment: When you are writing farm policy, please consider that our present farm policy encourages the growing of corn, which encourages the use of cheap high fructose corn syrup. The researchers from the Department of Psychology and the Princeton Neuroscience Institute just reported on two experiments investigating the link between the consumption of high-fructose corn syrup and obesity: <http://www.princeton.edu/main/news/archive/S26/91/22K07/>*

There seems to be a direct link between high obesity rates and our present farm policy. Perhaps we should be looking at alternatives.

I understand that the Senate Agricultural Committee voted to cut \$4 million from organic research funding and cut funding to support Beginning Farmers in half.

Please consider what you're doing.

Thank you.

COMMENT OF JAMES HOYLE

Date Submitted: Friday, May 18, 2012, 4:21 p.m.

City, State: Mount Vernon, WA

Occupation: Retail Wine Sales—Small Local Grocery Chain

Comment: Please support local small farmers, not just “big corp landowner farms”, support origin and content (GMO) labeling, protect open pollinated crops and seed savers, rights, spend money for agronomic crop diversity as well as minor crop research. Create buffers between big ag chemistry inputs and gov't. Decision makers; rethink “basically the same as” when it comes to genetic engineered or modified inputs and crops. Thanks for this input opportunity. Make good and right things happen for all our futures.

Sincerely,

JIM H.

COMMENT OF ALLEYNE HOYT

Date Submitted: Saturday, May 19, 2012, 10:00 a.m.

City, State: Louisville, KY

Comment: The integrity of our lands is important to me as they support our well-being. I want my tax dollars that go towards supporting this nation's food producers to be used in ways that protect the integrity of those lands & the quality of food they produce.

In 1985, American taxpayers and farmers entered into a compact to provide a safety net for the country's food producers in return for protection of critical natural resources. Known as “conservation compliance,” this policy requires farmers to follow conservation plans that limit soil erosion on highly erodible land as well as preventing destruction of wetlands and native grasslands. Farmers who willfully violate their conservation plans risk losing taxpayer funded benefits.

Today, this important connection is at risk. Taxpayer-funded subsidies for crop insurance are not currently linked to conservation compliance as they once were. In the current farm bill debate, Congress is considering eliminating Direct Payments, the major subsidy program that is linked to conservation compliance, and move some of those funds to support increased subsidies for crop insurance, which currently lacks compliance requirements. Unless Congress connects crop insurance subsidies to conservation compliance, a significant part of farmers' incentive to follow conservation plans will disappear this year.

In order to ensure that the agricultural safety net works in harmony with conservation programs and responsible land uses, conservation compliance provisions must be strengthened and enforced.

Thank you.

COMMENT OF LINDA HOYT

COMMENT OF CHRISTIE HUCK

Date Submitted: Friday, May 18, 2012, 1:30 p.m.

City, State: Avondale, AZ

Occupation: Retail Manager

Comment: At a time when you have the power to make very positive and forward thinking policies regarding food and nutrition in America, it is essential that you get Big agriculture (especially Monsanto) out of your pockets. This isn't about your money, this is about the health of the entire world really. This includes you and your family. We need laws protecting the small family farms and organic farmers, better regulations and auditing of farms and animal welfare and safety, transparency in all areas of food safety and stricter penalties for violating laws. **Stop** giving handouts to big Ag and let's get the food system in this country turned around. Insurance companies have no business in our food. Preventative health through a nutritious diet is what is needed to combat the influx of disease and obesity in this country, not big Pharma.

This problem is everyone's and you are not immune from it. It's time to put people first and tell corporations to get the hell out of our food system.

I support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF AMY HUDSON

Date Submitted: Tuesday, May 08, 2012, 6:03 p.m.

City, State: Atlanta, GA

Occupation: Communications Manager

Comment: Please do not cut SNAP and TEFAP! These programs are essential to millions of people—so many are out of work or working jobs that don't pay enough for them to purchase food and pay the bills. This is essential to those who are truly in need.

COMMENT OF CHARLES HUDSON

Date Submitted: Saturday, May 19, 2012, 11:56 a.m.

City, State: Arrowsic, ME

Occupation: Videographer

Comment: Corn, soy, and wheat subsidies need to end. These subsidies are in large part what is driving the epidemic in obesity, diabetes, heart disease, *etc.* . . . Food production should be driven by actual demand.

Small farms should not be held to the same standard as enormous industrial processing facilities. Consumers should have the right and opportunity to buy from local farmers that they know, and accept any risk themselves, rather than have the government dictate standards which are too costly for small farms to implement, thus driving small local farms out of business.

Raw milk should be legal! The **Absolute** risk from drinking raw milk from a local farm is much lower than the risk of eating raw spinach from an industrial farm. Why is raw spinach legal and raw milk illegal?!

COMMENT OF MICHELLE HUDSON

Date Submitted: Friday, May 18, 2012, 4:25 p.m.

City, State: Holly, MI

Occupation: Art Quilter

Comment: Please put the organic farmers back to work. Stop the ceaseless genetic modification of our food chain. Label all foods that contain genetically modified food products and get America back into the production of good nutritious fruits and

vegetables without the toxic chemical spraying that the Monsanto megalith decided “We” need. Thanks for listening and acting on same.

COMMENT OF JOSEPH HUFFORD

Date Submitted: Friday, May 18, 2012, 1:30 p.m.

City, State: Chico, CA

Occupation: Musician

Comment: Please ensure a future that is focused on responsible farming, limiting big business (and small farms alike) from abusing the financial help and reassurances they receive, conservation of soil and limitation of pollutants & the provision of healthy food for our citizens (*i.e.*, promote organics, limit the use of chemicals, further study any GMO’s, etc).

COMMENT OF ATHENA HUFF-SANDSTROM

Date Submitted: Friday, May 11, 2012, 12:07 p.m.

City, State: Chicago, IL

Occupation: Bartender/Server

Comment: The farm bill needs to focus on sustainable agriculture that gives more power and control to small farmers and organic farmers, and discourages the consolidation of power by “Big Ag” companies. A secure and diverse food supply will give America an economic and environmental boost.

COMMENT OF KITTY HUGENSCHMIDT

Date Submitted: Friday, May 18, 2012, 8:56 p.m.

City, State: Colorado Springs, CO

Occupation: Pet Sitter

Comment: Our Government’s JOB is to serve the People. How are you doing that when you approve poisoning the food the People eat? We have the right to **Life**—and Food and Water is the basis of that. Polluted Water, GMO’s, and Food sprayed with Cancer causing substances does not satisfy that requirement. Protect those growing **Healthy Food!** If you were really doing your job this letter would not be necessary!

COMMENT OF ABIGAIL HUGGINS

Date Submitted: Friday, May 18, 2012, 11:17 p.m.

City, State: Wilkesboro, NC

Occupation: Community Garden Coordinator

Comment: As a potential farmer, I deeply believe in the localization of our agriculture system, training and support for beginning farmers, and the implementation of sustainable practices that protect our environment and collective health. Agriculture affects everyone, everyday. The health of our nation depends on the health of our farms. As your constituent, I urge you to join me in supporting the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you in advance for advocating for the aforementioned issues which promote jobs, food security, health, and land preservation in this great nation we share.

JOINT COMMENT OF BROTHER & SISTER J.R. HUGHES

Date Submitted: Friday, May 18, 2012, 6:23 p.m.

City, State: Lebanon, KS

Occupation: Missionary Evangelist

Comment: Basically, private citizens and farmers should have the right to buy and sell between one another as they please. We do **Not** need to be a nanny state. Things like raw milk and cheese are **Not** harmful, but that is still a moot point. This is the United States of America, not Communist China. As a private citizen I have the right to eat and drink what I please. Get the government **Out** of my kitchen and pantry!

COMMENT OF LOMA HUH

Date Submitted: Friday, May 18, 2012, 11:49 p.m.

City, State: Viroqua, WI

Occupation: Editor

Comment: Do everything possible to support organic farming and small, local farms. Subsidizing the huge corporate farms encourages the use of drugs and chemicals and results in unhealthy food, and therefore unhealthy citizens. We should be wise stewards of the Earth, not abusers of it. Please wake up and recognize what's best for life and for all living forms, and stop being so concerned about keeping corporate pockets full of money.

COMMENT OF GERRIT HUIG

Date Submitted: Friday, May 18, 2012, 1:15 p.m.

City, State: Goshen, IN

Occupation: Retired

Comment: It seems normal and desirable to me that laws governing food production are based on health (inspection and organic standards), support for local and small producers (they **Are** America!), ecological impact (toxins, transportation, pollution), choice for those who care about their health and choice (labeling) and education (Americans need to know more about the food they eat), rather than on profits for a few oversized businesses, who spend their dubious profits on lobbyists and donations.

COMMENT OF JOSHUA HUISENGA

Date Submitted: Friday, May 18, 2012, 4:03 p.m.

City, State: Seattle, WA

Occupation: Graphic Designer

Comment: The farm bill should support working family farms over agribusiness, should support healthy practices over harmful pesticides and fertilizers, and should put Monsanto out of business.

COMMENT OF GENE HUISMAM

Date Submitted: Saturday, May 19, 2012, 8:42 a.m.

City, State: Sioux Center, IA

Occupation: Retired Farmer

Comment: I would like the congress to regulate farmers to use less chemicals on their land. Please allow small farmers to sell unpasteurized milk.

Thanks,

GENE NO

COMMENT OF NED HULBERT

Date Submitted: Friday, May 18, 2012, 5:44 p.m.

City, State: Harrisville, NH

Occupation: Education and Business Consultant

Comment: Dear Sir and/or Madam

Our government needs to support programs that emphasize producing, distributing and eating—much more widely—food with vitality (*i.e.*, organically grown food—not chemically grown food with little or no nutritional value). I hope that you will also support with practical initiatives those who are growing sustainable food on small privately owned farms, not more giant mono-cultured agribusiness farms.

We need to spread more private ownership, not more giant, owned by the few, corporate farms. This supports local communities and spreads the wealth and prosperity to more.

Organic food is ultimately what we all need to eat to stay healthy. We need to educate people to the fact that our science proves its nutritional value and our taste buds and bodily health confirm it as well.

Agri-biz grown food does not create healthy human bodies or healthy animals or healthy land—on the contrary it slowly poisons human bodies and farm-scapes and water systems. Likewise animals become less healthy and the drugs they are given create human and animal immunity problems.

The devastation the agri-biz companies are spreading is a proven fact and I hope you'll stand up to the corp lobbyists who do not want the truth told about what con-

stitutes healthy food, healthy growing conditions, healthy people and sustainable farms.

Thank you for considering these thoughts.

NED HULBERT.

COMMENT OF LISA HULETT

Date Submitted: Saturday, May 19, 2012, 3:47 p.m.

City, State: Arnold, MO

Occupation: Retired

Comment: Support organic farming, the small farmer, don't let Monsanto become a monopoly. Ban any more GMO's, at least require labeling. Support sustainable farming practices, ban the overuse of chemicals, in both fertilizer and as bug control.

COMMENT OF ROBBIN HULS

Date Submitted: Friday, May 18, 2012, 1:54 p.m.

City, State: Ottawa, IL

Occupation: Software Engineer/Part Time Home-Farmer

Comment: I have recently moved back to Illinois and am appalled by the amount of corn/beans farmland and the overabundance of chemicals required to keep them growing in the depleted soil. Having spent time learning about organic and sustainable farming, I have to say "this ain't it". Please do not limit reforms and leave the same system (that continues to fail us!) in place! Help sustainable farmers bring back the beautiful and fertile farms that don't poison us to feed big corporations' bottom lines.

COMMENT OF DEAN HULSE

Date Submitted: Friday, May 18, 2012, 10:51 a.m.

City, State: Fargo, ND

Occupation: Owner of Farmland

Comment: Please make sure the next farm bill does the following:

1. Eliminates funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure. Make these corporate operations pay for the pollution each causes. No more taxpayer-subsidized externalities.
2. Protects the Conservation Stewardship Program (CSP) from disproportionate cuts.

COMMENT OF KAREN HULTGREN

Date Submitted: Friday, May 18, 2012, 2:25 p.m.

City, State: Simi Valley, CA

Occupation: Technical Manager

Comment: I strongly urge you to support and protect local/small organic farmers who produce humanely raised livestock and non-GMO plants (vegs/fruit/herbs). I only purchase organic food. I do not want my food full of pesticides, hormones, antibiotics or stuff created in labs. I don't want the meat/eggs/poultry I buy to come from tortured animals pumped full of chemicals and not allowed to graze outside eating as they are meant to. We should be supporting and protecting the food God has provided us. It's perfectly made for the human body and we should be doing all we can to protect it. We should also be protecting farmers and farm workers to be sure they are working/living in a nontoxic environment, which growing organically ensures. We all know large factory farms take short cuts to make profits. They are compromising our health by adding all kinds of chemicals to livestock or grow genetically modified plants where no testing has been done to see if it's fit for human consumption. Look around you and see how it's affected Americans! People are over-weight and getting sicker! It's not working! Our top soil is dying because the chemicals sprayed on them kills the beneficial organisms. It's insane! We are slowing killing ourselves and compromising the future of the human race. Protecting the *health of people* is more important than making money. Let the chemical companies make money elsewhere and stay out of our food!

COMMENT OF JUDITH HUMBURG

Date Submitted: Friday, May 18, 2012, 2:29 p.m.

City, State: Menlo Park, CA

Occupation: Market Research and Oral Historian

Comment: For too long, our farm bill has supported practices and policies that have created a very unhealthy food system in the U.S. **Now** is the time to shift support to organic, sustainable farming practices and policies that encourage and support smaller, family farming operations.

COMMENT OF MATTHEW HUMPHREY

Date Submitted: Friday, May 11, 2012, 10:34 a.m.

City, State: Baltimore, MD

Occupation: Librarian

Comment: We need a farm bill that supports sustainable, innovative, ecologically friendly family farms, not gigantic, industrialized, polluting agribusiness operations. I want an America where small farmers can thrive by providing healthy, organic, locally grown food to consumers at a price that is competitive with the pesticide-, chemical- and hormone-laden products from distant factory farms which have no interest in the wellbeing of consumers.

COMMENT OF KIM HUMPHREYS

Date Submitted: Friday, May 18, 2012, 12:00 p.m.

Occupation: Doctoral Student/Teacher

Comment: Agribusiness and its unhealthy practices are making the people of this country sick. I support organic farmers and local farmers who are providing a healthy option for consumers. Stop supporting unhealthy, unconscious farming that harms our children and the land!

COMMENT OF ROBERTA HUMPHREYS

Date Submitted: Saturday, May 19, 2012, 11:05 p.m.

City, State: Topeka, KS

Occupation: Administrative Specialist

Comment: We want you to put the health of people and our environment before Big Corporations. I am tired of tax dollars subsidizing GMO Corn, etc and antibiotic research for CAFO's.

We want nutritious food not the junk that is making Americans sick and destroying the environment. The water, the land, the bees, *etc.* I am in support of Organic Farming that puts out more crops per acre and better all around for everyone. I am appalled at the Monsanto bullying other Farmers. I am not happy with conflict of interest at the Top of the FDA or the USDA not having power to shut down CAFO's with multiple health violations some resulting in death yet harassment over small farmers over raw milk and sheep that have no health violations or deaths. Something has gone terribly wrong in our system and needs to be made right again. Please do the right thing—we pay you to serve the people not BIG Corporations.

COMMENT OF SALLY HUNDLEY

Date Submitted: Friday, May 18, 2012, 6:59 p.m.

City, State: Park Forest, IL

Occupation: Secretary

Comment: Current agricultural law supports large producers at the expense of farmers working to expand organic options and sustainable practices. Everyone benefits from healthier food options for all and from farming practices that are designed for the long haul and not just for short-term profits for large corporations.

COMMENT OF JONI HUNT

Date Submitted: Thursday, May 17, 2012, 4:12 p.m.

City, State: Stuart, VA

Occupation: Director, Patrick Co. Community Food Bank

Comment: We need to do all we can to end hunger in our country, to take care of the elderly and children should not go to bed hungry. Support our local farmers encourage the growing of organic food not adding harmful hormones. There is more than just the "almighty buck."

COMMENT OF AMY HUNTER

Date Submitted: Friday, May 18, 2012, 1:29 p.m.

City, State: Staples, MN
Occupation: Director of Local Chamber
Comment: I am a consumer who wants a safe and healthy food source free of GMO's. We need to stop subsidizing bad farming techniques and help farmers grow healthy foods. **It Can And Must Be Done!**

COMMENT OF GENE HUNTER

Date Submitted: Saturday, May 19, 2012, 11:08 p.m.
City, State: Easton, PA
Producer/Non-producer: Producer
Type: Vegetables
Size: Less than 50 acres
Comment: Support small CSA type operations; Withdraw support from huge agribusiness and anyone using GMO crops. Encourage new farmers!

COMMENT OF BARBARA HUNTINGTON

Date Submitted: Saturday, May 19, 2012, 12:41 a.m.
City, State: Chula Vista, CA
Occupation: Premedical Advisor
Comment: I am very concerned about the use of pesticides and genetically modified food. These should all be labeled. I go out of my way to be sure I have organic, non genetically modified food and I want to be sure there is a high standard. I also want to know that there are no hormones or antibiotics in milk or egg products.

COMMENT OF LINDSEY HURD

Date Submitted: Tuesday, April 10, 2012, 5:43 p.m.
City, State: Fuquay Varina, NC
Occupation: Dietetic Intern
Comment: Dear Congressman Price,

As a future Registered Dietitian, it is my passion to see families grow into healthful citizens of the United States. In making this a reality, programs such as SNAP, a major component of the farm bill, are a necessary entity. Although SNAP consumes the largest portion of the farm bill funds, it offers families with low incomes, the ability to purchase and consume healthful foods that might have been too expensive to purchase on their own. Although the benefit outweighs the cost, purchasing healthy foods such as fresh fruits and vegetables may be out of reach for families living on very little income. Through your support, children across America are able to consume enough food to avoid being hungry in the day. They are able to learn and think better in school, in turn scoring higher grades and becoming a contributing member to society. It is a proven fact that SNAP families eat more healthfully than families without this service.

As a citizen of the U.S., and member of the nutrition community, I understand the cost constraints this program has placed on the farm bill spending. Through the increased participation of 26 million in 2007 to more than 44 million in 2011, SNAP families have cost the country \$69 billion in the fiscal year of 2011. As a future Registered Dietitian, my job will be to work toward preventing disease for families, avoiding the need for high priced medical care for illnesses and conditions that could have been prevented through a healthful diet. The top 3 causes of death in the United States are caused by nutrition related diseases. This provides evidence that although SNAP contributes to a large cost deficit, in the end it is beneficial for the individual and for the U.S. alike.

I hope that this information will motivate your team to continue supporting SNAP services in future farm policies, ultimately supporting low income families across the country. Thank you for your time and attention.

COMMENT OF BRION HURLEY

Date Submitted: Thursday, May 17, 2012, 9:29 p.m.
City, State: Iowa City, IA
Occupation: Engineer
Comment: I support the elimination of direct payments, and replacing them with crop insurance subsidies, but we need to make sure the previous conservation compliance is a requirement to receive the crop insurance, in order to protect our water and land for future generations.

COMMENT OF PAULINE HURST

Date Submitted: Wednesday, May 09, 2012, 5:00 p.m.

City, State: Lake Charles, LA

Occupation: Administrative Asst. for Relief Center

Comment: Please do not cut any funds or programs that involve our Seniors. It is such a challenge for them now to make ends meet. They should not have to decide between medicine and food. Most of these individuals have worked hard all of their lives and to be put in this type of situation does not speak well of our country. We are a wealthy nation.

COMMENT OF LISA HUSTON

Date Submitted: Friday, May 18, 2012, 1:50 p.m.

City, State: Husum, WA

Occupation: Analyst

Comment: Please support agricultural reform that focuses on sustainability and healthy food. Support organic and local food systems and smaller family farms.

COMMENT OF JULIE HUTCHINSON

Date Submitted: Sunday, May 20, 2012, 8:44 a.m.

City, State: Encinitas, CA

Occupation: Pharmacist

Comment: I endorse Slow Food's stand 100%. Family farming is an indelible part of America's heritage and should be preserved and kept alive, not relegated to a museum exhibit.

COMMENT OF AMBER HUTCHISON

Date Submitted: Friday, May 18, 2012, 2:47 p.m.

City, State: Springfield, MO

Occupation: Server

Comment: They're are so many ways to grow crops organically, as many organic farmers have shown. Let's get back to a simpler way of farming and eating. Why so many chemicals? Genetically modified corn is killing our bees, do you have any idea what this could mean for the future of **All** agriculture?

COMMENT OF LEAH HUTCHISON

Date Submitted: Friday, May 18, 2012, 1:36 p.m.

City, State: Aliso Viejo, CA

Occupation: Nanny

Comment: Our food is killing us, why we as a people have to fight for healthy safe food is **Ridiculous**. I am sick of money over people. You should be ashamed of yourselves. I know I'm ashamed of you.

COMMENT OF PAUL HWOSCHINSKY

Date Submitted: Saturday, May 19, 2012, 6:12 p.m.

City, State: Ashland, OR

Occupation: Retired Investor

Comment: We **MUST** label all GMO inputs on food. We must protect **Organic** as a label free of food grown without chemical fertilizer or GMO inputs so the consumers have a choice. This is a core choice in our democracy.

COMMENT OF LAURA HYBNER

Date Submitted: Friday, May 18, 2012, 2:15 p.m.

City, State: Austin, TX

Occupation: Manager

Comment: We'd like for our food to be free of chemicals if there are chemicals we'd like to be able to view an ingredient label. This would be great to mandate restaurants to do this and if any restaurants decide not to provide the info they should be fined a large amount of money.

We love our food from our local farmers and we hope that you would too join us in support of them.

COMMENT OF JENNIFER HYDE

Date Submitted: Sunday, May 20, 2012, 1:28 p.m.

City, State: Richmond, CA

Occupation: Research Administrator

Comment: The government needs to invest in organic farmers (and research) and beginning farmers, and not subsidize GMO corn and soy production. The over-production of corn which is used for livestock feed and high fructose corn syrup, contributes to the cheapness of unhealthy fattening food compared to healthy vegetables and fruit. Our priorities should be the health of our citizens.

COMMENT OF MARGARET HYLAND

Date Submitted: Wednesday, May 09, 2012, 5:09 p.m.

City, State: Louisville, KY

Occupation: Retired

Comment: Dear Agriculture Committee Members:

I am writing to urge you to pass a strong farm bill that protects programs like SNAP, TEFAP, and CSFP, which help provide food for millions of America's most vulnerable seniors. I have volunteered in the St. Vincent de Paul organization and have visited homes that have no food. Hunger is real in this country as well as abroad. Have you been hungry lately? What would it feel like if you had no way to get food for yourself or your family? I don't like being hungry. I don't like others to go hungry. Please do not cut these basic programs. Thank you.

COMMENT OF MONICA IANARELLI

Date Submitted: Friday, May 18, 2012, 1:30 p.m.

City, State: Pittsburgh, PA

Occupation: Teacher

Comment: Sustainable agriculture is the future of a healthy country. Chemicals, allowing GMO seed to mix with pure seed and cutting funding for health programs **Before** cutting massive farm subsidies is not the right direction in which we should be heading.

COMMENT OF JOAN IATRIDES

Date Submitted: Thursday, May 10, 2012, 5:08 p.m.

City, State: Brookfield, IL

Occupation: Retired Marketing at Credit Unions

Comment: I'm sending this e-mail to ask Congress to not reduce food benefits to the most needy.

I volunteer at a food pantry and can personally attest to the need of our clients. The clients are most grateful for any food they receive and will not take what is not needed. They thank us for our help and want to get back on their feet, so they too can volunteer at the food pantry.

COMMENT OF HENRY ICKES

Date Submitted: Friday, May 18, 2012, 9:20 p.m.

City, State: Arlington, VA

Occupation: Retired Communications Worker

Comment: There is no place in my view for weakening or otherwise interfering with the USDA's responsibility for maintaining oversight of agriculture in the U.S., and thus assuring that we have a reliable supply of wholesome food. This is, in fact, a matter of life and death for so many of us. The next farm bill must be as strong as possible, no matter what big-agribusiness says. I frankly don't trust them!

COMMENT OF JANET IEVINS

Date Submitted: Friday, May 18, 2012, 2:56 p.m.

City, State: Medford, OR

Occupation: Retired

Comment: We drive back and forth across the country every year. Many places have happy livestock out grazing. Many others have confined livestock which operations are smelled long before they are sighted. Not only do I feel sad for the animals, I do not want my food coming from such polluted environs. Either the stock is filled w/antibiotics or ill—or both. Not good for our food supply.

Similarly, when our policies subsidize huge crop production rather than diversified smaller farms, we are going against nature. For the sake of profit, we are gambling on the safety of our crops. For instance, the miles and miles of all one crop, all genetically identical, could be wiped out by a disease or pest. This doesn't happen on diversified acreage.

It is time to subsidize local farms and to stop subsidizing Agribusiness. Diversified farms are sustainable. Consumers can buy fresher food directly, energy use goes down, chemical use goes down, the land can be allowed to rejuvenate, and threat of crop failure is lessened.

Many farm families are willing to work hard against all odds, want to continue farming thru the generations. It is a good idea to allow these folks to work on behalf of all of us—just let's stack some of the odds in their favor for a change.

COMMENT OF KATIE IFERT-MILLER

Date Submitted: Saturday, May 19, 2012, 11:31 a.m.

City, State: Ridgefield, CT

Occupation: Laborer

Comment: Naturally grown foods are the only possibility this world has and robbing those who practice this noble endeavor is detrimental to any chance at a healthy life. We need to support them.

COMMENT OF MARY ANN IHM

Date Submitted: Sunday, May 20, 2012, 6:23 p.m.

City, State: West Bend, WI

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Please make mandatory funding for: Conservation Programs, Beginning Farmers (including the dis-advantaged, women, urban agriculture), Rural Development, Local Farm, Food and Credit, Research Programs on publicly funded seeds, Commodity Reform so that recipients must be directly involved with farming, not just an owner, Farm to School Programs.

COMMENT OF GLEN IHRIG

Date Submitted: Friday, May 18, 2012, 9:53 p.m.

City, State: Burbank CA

Occupation: Software Developer

Comment: I am very upset that the farm bill has become yet another vehicle for corporate welfare and subsidy of the SAD (Standard American Diet).

Until now, farm bill subsidies have drastically reduced the number small farmers, while expanding the control of a few mega-corporations over our food supply. This trend is not sustainable!

Tax payer dollars must be spent to support and encourage healthier, smaller, local agriculture.

COMMENT OF LUCY LJAMS

Date Submitted: Sunday, May 20, 2012, 6:57 p.m.

City, State: Utica, NY

Occupation: Ordained Clergy

Comment: End subsidies to Big Ag, which includes companies that create GMOs, keep the SNAP program, support small family farms and people who grow fruits and vegetables organically, encourage conservation of nutrient rich soil and water by encouraging biodiversity rather than monoculture, discourage use of pesticides and herbicides which are causing honeybee colony collapse, and no subsidies to factory farming of meat animals which creates huge problems for manure storage and inhumane conditions requiring the use of antibiotics and stop encouraging the use of growth hormones. Encourage local food production and consumption rather than transporting foods for thousands of miles.

COMMENT OF KATE INGERSOLL

Date Submitted: Thursday, April 26, 2012, 11:01 a.m.

City, State: St. Mary's City, MD

Occupation: Archaeologist

Comment: Please think long and hard about pesticides, American diets, children, and the future of our health. Only you can do the right thing, we—the voting public—can guide you, but we have given you the power to protect our health.

Sincerely,

KATE INGERSOLL.

COMMENT OF LAURA INGLIMA

Date Submitted: Friday, May 18, 2012, 6:11 p.m.

City, State: Homer, AK

Occupation: School Kitchen Manager

Comment: I consider myself a producer, but on a small scale family garden level. Local, organic food production is **Very Important** to me. I want the very best circumstances, conditions and requirements for **All** farmers and gardeners to practice sustainable gardening and farming that nurtures and builds the soil rather than poisoning it and depleting it.

I also **Strongly Support:**

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you for following up on these very important measures.

LAURA INGLIMA.

COMMENT OF CLAUDIA INGRAHAM

Date Submitted: Saturday, May 19, 2012, 7:37 p.m.

City, State: Denver, CO

Occupation: Interior Designer, Yoga Instructor, Sound Healer, Landlord, Nanny, Jewelry Designer

Comment: I strongly support organic farming. I try not to buy conventional vegetables and I am vegetarian. We need to support local farming which is healthier and not subsidize any GMO crops which have not been thoroughly tested in the U.S. In Europe they are banned. I support labeling of all GM ingredients in food.

COMMENT OF MARTHA INGRAM

Date Submitted: Friday, May 18, 2012, 10:27 a.m.

City, State: Brevard, NC

Occupation: Naturopathic Doctor

Comment: Please support organic and sustainable agriculture! The health of our nation and our planet are at stake. We are at a critical juncture and need to start making positive change. Subsidies to factory farms create an unfair playing field for organic farmers to compete in the marketplace.

COMMENT OF MRILL INGRAM

Date Submitted: Friday, May 11, 2012, 11:54 a.m.

City, State: Madison, WI

Occupation: Social Scientist

Comment: I would like to see the farm bill oriented to build diverse and flexible regional food systems. The farm bill should support policies that will enable small scale producers to compete and to make a sustainable living from offering care-fully grown food produced in ways that are humane and ecologically and socially sound. I would like to see food safety policies that respect local diversity and difference by putting enough well-trained, local inspectors on the ground. I would like to see support for urban agriculture and community supported agriculture as well as for natural resources stewardship in agriculture.

COMMENTS OF SHARON INTILLI

Date Submitted: Monday, May 14, 2012 5:09 p.m.

City, State: Warwick, NY

Occupation: Associate Director—Television Network

Comment: The 2012 farm bill needs to reflect what consumers today are demanding: **Healthy** food, not corporate sponsored profit driven dead and processed food! For that reason alone, the farm bill should include protection of our natural resources—which insures healthy quality grown food and **Non-GMO** seeds which protect our heirloom species—and it should add funding to the Organic Research Fund as that is what creates **More Small Farmers Which Is A Heck Of A Lot Better For Local Communities As Well As For Our Environment**. Please support what is HEALTHY and not what is healthy for one's re-election campaign. We all live in the same world and we all need healthy food and a healthy environment in which to grow it!

Date Submitted: Sunday, May 20, 2012, 5:07 p.m.

Comment: Please do as consumers desire: **More** organic, less industrial farming! **Protect** organic, independent, **Non-GMO** farming practices because **That Will Protect Our Environment—Which Is What Ultimately Protects Us!**

COMMENT OF KENNETH IRISH

Date Submitted: Thursday, April 12, 2012, 4:59 p.m.

City, State: Duvall, WA

Occupation: Designer

Comment: Current economic theory references three bottom lines to assess and track value. Our farm bill needs to address all three. We have failed in the past by thinking that easily quantifiable dollars represent the only bottom line. That's just the easy one. Please be complete in your assessment of costs and benefits as you formulate the farm bill. Don't do the simplistic calculations, but listen to your children and the health of your community to help you compute the real costs and the real benefits of a particular proposal.

Greater diversity within farming will bring health and strength in the same way that greater diversity through our long history of immigration has brought us great strength even though we have resisted the increased diversity at every turn. We are a nation made strong by the individual proclivities of the many, not by uniformity ruled by the few.

We count on you to not only refrain from playing politics with our health and future, but to legislate with wisdom, insight and foresight.

JOINT COMMENT OF EDIE IRONS AND ELANNE KRESSER

Date Submitted: Friday, May 18, 2012, 3:05 p.m.

Names: Edie Irons and Elanne Kresser

City, State: Oakland, CA; Berkeley, CA.

Occupations: Outreach Coordinator for Local Gov't Agency; Stay-at-Home Mom.

Comment: Please strengthen and protect programs in the farm bill that support nutrition, education, small farms, and organic and sustainable agriculture.

I also believe it is time to phase out support for factory farming and CAFOs, and commodity monocrops like corn and soybeans. These activities are run by huge, profitable corporations, and should not be so heavily subsidized by the Federal government.

Please use farm bill dollars to support agricultural practices that create living wage jobs, healthy food, animal welfare, and diverse thriving ecosystems.

COMMENT OF JEFFREY IRVINE

Date Submitted: Friday, May 18, 2012, 2:35 p.m.

City, State: Romney, WV

Occupation: Retired Educator

Comment: Please don't weaken the country's ability to enjoy safe, organic food stuffs and the small farmer's ability to prosper as good stewards of their land. Agribusiness has far too strong a voice in vital healthy foods decisions.

COMMENT OF LAURA ISELY

Date Submitted: Sunday, May 20, 2012, 8:00 a.m.

City, State: Staten Island, NY

Occupation: Chef/Unemployed

Comment: I currently receive food stamps, while not much, every little bit helps. Please do not cut this program. There are way more poor people than not.

COMMENT OF MICHAEL ISENSEE

Date Submitted: Friday, May 18, 2012, 11:59 p.m.

City, State: Ferndale, WA

Occupation: Dairy Nutrient Inspector

Comment: I have seen the power of a variety of farm bill programs to help producers farm smarter and in ways that work with natural systems. Enhance conservation, organic, and programs that directly link producers with consumers in the most direct way possible. When consumers know their farmers, farmers are better able to earn a living without government programs and are willing to meet the stewardship expectations of the vast majority of people who now live in urban areas.

COMMENT OF ANTONIO ISSE

Date Submitted: Friday, May 18, 2012, 1:21 p.m.

City, State: Fort Lauderdale, FL

Occupation: Internet Consultant

Comment: It's time to back the people, not huge corporations. I am ashamed that I've allowed my tax dollars to subsidize corn to provide cheap feed for meat companies. I refuse to let that happen anymore. There is no reason that organic broccoli is \$3 a pound except for this subsidizing of monocultures. Stop subsidizing big ag!

COMMENT OF CARLO IYOG

Date Submitted: Friday, May 18, 2012, 1:42 p.m.

City, State: San Francisco, CA

Comment: It is very important that we make this change now. There is no excuse for under nourishing and overfeeding our children at the same time with hormone and pesticide-treated rubbish.

COMMENT OF CELIA IZAGUIRRE

Date Submitted: Sunday, May 20, 2012, 7:50 p.m.

City, State: Miami, FL

Occupation: Student

Comment: Please support a farm bill that supports an agriculture that will help with our current crisis of global warming. We need to give incentives to farmers to be take care of the valuable resources we have (healthy soil, clean water) that are dwindling down and will only continue to do so if no action is taken now. your decision will affect every human being not only in our country but in our planet. The time is now, tomorrow might be too late.

COMMENT OF ALLISON JACK

Date Submitted: Saturday, May 19, 2012, 7:06 p.m.

City, State: Ithaca, NY

Occupation: Agricultural Scientist

Comment: I've seen firsthand how organic farming has revitalized the economy in Tompkins County. Many of my friends are running successful small and medium scale organic farms and/or organic food processing businesses in the area. My husband has worked as a laborer on many of these farms. I've also seen the importance of research in the creation of this economic opportunity.

My research centers around vermin-composted dairy manure, which allows a waste product from NY's thriving dairy industry to be sold off-farm as an organic nutrient source for greenhouse crops. Since this is a new material for organic farmers, it took state (NYFVI, NYSTAR), Federal (USDA SBIR) and non-profit (OFRF, OCIA) research support to figure out the best ways to use vermin-composted dairy manure in organic production systems.

Our industry collaborators have built a \$4.5 M facility in Livingston County and ship product all over the country. I feel this is a successful example of green rural development but it relies on mostly organic farms as customers and research funds targeted towards organic materials to fully understand the potential uses of vermin-compost. This is just one of many examples of researchers working with creative businesspeople and growers to build a sustainable regional food system. Organic farming is and can continue to be a huge part of rural economic green development in the U.S., but only if it is fully supported in the farm bill.

<http://innovationtrail.org/post/worm-power-high-tech-composting>

<http://www.css.cornell.edu/cwmi/vermicompost.htm> *

Please support organic agriculture in the farm bill:

- Fully fund the Organic Research and Extension Initiative (OREI) at the 2008 level.
- Endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Support all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintain EQIP Organic Initiative and do NOT cut the Conservation Stewardship Program.

COMMENT OF AMY JACKSON

Date Submitted: Friday, May 18, 2012, 11:27 a.m.

City, State: Fort Worth, TX

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: We need whole food and should provide subsidies to those that produce clean, whole food and not Agri-Products that are unhealthy and unsustainable. I spend my free time practicing, teaching and supporting Urban Agriculture to Be the Change I want to see in the world and teach others to Start where you are!

COMMENT OF BARBARA JACKSON

Date Submitted: Friday, May 18, 2012, 10:50 a.m.

City, State: Pocatello, ID

Occupation: Retired

Comment: The health of our nation (which is currently Unhealthy) depends on the small farmer who cares about producing clean, healthy food, as opposed to corporate farms who drench produce in pesticides and herbicides. These chemicals have not been sufficiently tested (thanks to corporate blocking) for the health damage these chemicals do to the human body (especially babies & children—your grandchildren and mine) and to the health of the ground this produce is grown in. Large corporate farms are killing us, Mr. Simpson!

COMMENT OF DAVID JACKSON

Date Submitted: Sunday, May 20, 2012, 10:16 p.m.

City, State: Newport News, VA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Dear Sirs,

Within the next year, my wife and I will be starting up own sustainable/organic farm business. As a beginning farmer, I'd like to share my support for programs that help new growers build strong farm businesses. It's absolutely critical that farm bill programs help citizens get started in this challenging field. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing

*The information referred to is retained in Committee file.

materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.

- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill. If it was for programs like the Beginning Farmer and Rancher Development Program, ATTRA, AND SARE . . . I likely wouldn't even consider getting into farming. To me, there's no more noble cause to support than to help the people that feed us. To me, we shouldn't even have to think about this.

Sincerely,

DAVID JACKSON.

COMMENT OF KENT JACKSON

Date Submitted: Monday, March 19, 2012, 6:29 p.m.

City, State: Hereford, TX

Occupation: Banker

Comment: The name should be changed from "farm bill" to the "Food and Fiber Bill" to more clearly convey its ultimate purpose; and it should be promoted to the public as a system that provides modest support for the most efficient, **Stable**, and economical production of food and fiber in the world.

COMMENT OF LISA JACKSON

Date Submitted: Friday, May 18, 2012, 11:10 p.m.

City, State: Loveland, CO

Occupation: Retired

Comment: Please! The U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

I would also like to advocate that funding **Not** be cut for conservation or for organic and sustainable agriculture.

- I support: The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Allowing big agribusiness profits at the expense of the smaller guys including those who need nutritious food is downright wrong. Listen to your heart. Wouldn't you want your family to have clean, healthy, nutritious food grown without pesticides?

Sincerely,

LISA JACKSON.

COMMENT OF MARTHA JACKSON

Date Submitted: Friday, May 18, 2012, 12:13 p.m.

City, State: Spring, TX

Occupation: Retired

Comment: It is the right of every person on Earth to have healthy food to eat. Those who are elected to office as leaders have a responsibility to make sure that our food source is not contaminated by things that will make people sick or worse.

Small farmers have been the backbone of this country for years and now there seems to be a movement by large food companies to destroy both the farmers and the food source for the people of America. GMO are mutated foods and have not been tested to see what harm they will cause.

It is time for our Government to stop siding with the big Corporations and get back to protecting the people who put them in office.

We want to know what is in our food and who is producing it. I trust the small farmers. I do not trust companies who are only looking to make money.

These unhealthy foods will get into **Your** families food too.

Protect the organic farmers and our food.

COMMENT OF MAUREEN JACKSON

Date Submitted: Friday, May 18, 2012, 11:02 p.m.

Comment: We have the right to know our food, to eat real food, healthy food. We have the right to feed our children wholesome, nutritious food. We want organic food grown in our fields. We are a democracy aren't we?

COMMENT OF DEBORAH JACOBS

Date Submitted: Sunday, May 20, 2012, 10:52 p.m.

City, State: Cottage Grove, WI

Occupation: Supervisor

Comment: Please consider taking a look at how the farm bill promotes the production of unhealthy foods in a monoculture by big ag and ignores the small family farms who are trying to make ends meet growing healthy foods. If we are going to supplement farmers income, lets send those checks to farmers who are farming sustainable, healthy products which will also keep prices down so everyone can enjoy healthy foods. If everyone could eat right, we might not have a health care crisis. Thank you.

COMMENT OF DEBORAH JACOBS

Date Submitted: Friday, May 18, 2012, 11:11 a.m.

City, State: Nisswa, MN

Occupation: Retired

Comment: Please think of this as a bill about the future of food in America, and about food independence. Not as another occasion to subsidize big growers.

COMMENT OF ELIZABETH JACOBSON

Date Submitted: Friday, May 18, 2012, 1:08 a.m.

City, State: Mt. Hood, OR

Producer/Non-producer: Producer

Type: Fruits

Size: 50-150 acres

Comment: My husband and I have been orchardists for 30 years on a century old farm. We were the first certified organic orchard in our area, and are the largest Biodynamic orchard in the U.S. We are considered a small family farm and make our living solely on our farm, and we are becoming a rare breed. Because we are specialty crop growers, we get no crop subsidies to help us survive. We are, however, enrolled in the CSP program, which is very beneficial for both the farmer and the environment. We have also participated in several EQUIP programs that have helped us update our irrigation system. The following are essential to the new farm bill:

- Fully fund the Organic Research and Extension Initiative (OREI) at the 2008 level.
- Endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Support all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintain EQUIP Organic Initiative and do NOT cut the Conservation Stewardship Progm.

Thank you for your consideration.

ELIZABETH JACOBSON,
Mt. Hood Organic Farms.

COMMENT OF MICHAEL JACOBSON

Date Submitted: Friday, May 18, 2012, 4:05 p.m.

City, State: Fort Wayne, IN

Occupation: Executive

Comment: My concern is that foods be properly labeled from production through blending as an ingredient or delivered as produce. GMO enhanced food should be identified as a way of protecting those that are concerned about them. Organic foods should be truly organic without GMO or chemical pesticide.

COMMENT OF SARAH JACOBSON

Date Submitted: Friday, May 18, 2012, 3:36 p.m.

City, State: Hartford, CT

Occupation: Nonprofit Worker

Comment: SNAP is a vital program to SO many people and it would do NO ONE any good to cut the funding. Food is a basic human right and as the government of this country and of these people who are living with hunger and food insecurity, you should be taking every possible step to help alleviate hunger from every man, woman and child in America. This will not be accomplished by cutting SNAP funding. I have seen first-hand the benefit and the good that the SNAP programs do. It is a crime to cut funding and marginalize the hungry. Keep SNAP funding, if anything, increase SNAP funding!

COMMENT OF SHIRLEY JACOBSON

Date Submitted: Friday, May 18, 2012, 11:57 p.m.

City, State: Bellingham, WA

Occupation: Retired Registered Nurse, USPHS

Comment: Our food system is killing us and will eventually lead to the end of our species. The problem is it is not focused on food that contributes to the health of people, animals or the planet. End industrial agriculture and support small local farms. We have made an excellent start here in Bellingham, WA. I buy all my meat and seafood from local farmers and fishers. Most of the year I get produce locally as well from small, organic farms. Having a direct relationship with the producers helps me know my food is safe. I shudder at what I see when I walk through a common grocery store but many people are not able to do this because they rely on cheap food, which is only cheap because the government is subsidizing it production. End that please.

COMMENT OF BEN JACOBY

Date Submitted: Friday, May 18, 2012, 10:24 p.m.

City, State: Bethesda, MD

Occupation: Bicycle Mechanic

Comment: Food is the most important factor in any society. Healthy food, a wide variety of fruits and vegetables, should be available to all people in our nation. Local and organic agriculture are very important for the efficiency of our food system. Businesses should be a moderate size and the control of the food market should be greatly distributed throughout many businesses opposed to few. Just some thoughts. Thanks.

COMMENT OF BRIAN JAEGER

Date Submitted: Friday, May 18, 2012, 10:17 p.m.

City, State: Laurence Harbor, NJ

Occupation: Retired School Counselor

Comment: I value the importance of real food, locally grown, non-GMO, pasture raised, **Not Big Ag And Their Industrial Food Mentality.** It's just not healthy. Please help by supporting the farm bill.

COMMENT OF KAITLIN JAFFE

Date Submitted: Friday, May 18, 2012, 2:33 p.m.

City, State: Berkeley, CA

Occupation: Environmental Policy Student

Comment: Please stop farm subsidies to large commercial farms. They are destroying farm land with monocultures, helping to support an unsustainable animal agriculture process, and increasing the availability of cheap, unhealthy foods. Instead spend that money on small and middle sized farms producing a variety of fruits and vegetables.

COMMENT OF CAROL JAGIELLO

Date Submitted: Friday, May 11, 2012, 10:34 a.m.

City, State: Bloomingdale, NJ

Occupation: Disabled

Comment: I want to see a farm bill equitable to those who really need support. Small farmers, new farmers, conservation programs.

Subsidies should not be for huge producers. Subsidies should be for those who truly need them. Fruit and vegetable growers, school access and inner city. Conservation and organics. Stop supporting the ideas that make food less safe like radiation.

Stop funding usable acreage to grow corn for fuel. The farm bill should be for everyone not just a few who play the biotech game.

COMMENT OF SUSAN JAILLET

Date Submitted: Friday, May 18, 2012, 11:55 a.m.

City, State: Mount Dora, FL

Occupation: Retired Teacher, Writer, Editor

Comment: Giant corporations should not be allowed to control our food sources or the quality of our food. My family heritage is farming and more and more I find myself returning to those roots. More and more Americans are and will be growing their own food.

Corporations are not individuals, nor should they be treated like individuals. They are business entities created to protect their owners and to generate a profit.

It's time for America to return to our basic values—the right to earn a decent living, the right to eat healthy food, the right to pursue our individuals goals without interference from corrupt politicians.

Please support the basic rights of all American citizens—men, women and children—over the rights of large multi-national corporations.

COMMENT OF SUSAN JAMERSON

Date Submitted: Friday, May 18, 2012, 2:50 p.m.

City, State: Missoula, MT

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Big Ag does not need subsidies or subsidized crop insurance. Small farmers and new farmers need the help and education to go sustainable. More American's are hungry than since the bread lines of the depression—how could you possibly cut food stamp money? Are you **Out Of Your Minds!**

Support local, organic, small farms = good food, healthy people, more jobs, less fuel for transport—it's so simple—**Why Don't You Politicians Get This!**

COMMENT OF LAUREN JAMES

Date Submitted: Friday, May 18, 2012, 1:31 p.m.

City, State: Jackson, WY

Occupation: Server at an Organic Restaurant

Comment: Agribusiness-people need to start focusing more on the welfare of **Americans** instead of the welfare of their wallets! Obesity and weigh-related disease is growing at an alarming rate. The first step in combating this issue is to start regulating the food industry better and educating the American people. It does nothing but hurt us when Big Ag spends millions on misleading advertising that only helps their bottom-line.

COMMENT OF LYNDA JAMES

Date Submitted: Wednesday, May 16, 2012, 1:03 p.m.

City, State: Bailey, CO

Occupation: Journalist

Comment: I support a farm bill that

1. Creates jobs and spurs economic growth—support programs like the Value Added Producer Grants Program by guaranteeing \$30 million of mandatory funding per year. VAPG provides seed money to help farmers innovate in agriculture and create jobs while securing a sustainable path to market-based farm profitability.

2. Makes healthy food widely available to all Americans—including school-children! We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.
3. Protects our natural resources—improves the Conservation Stewardship Program by ranking applications solely on their conservation benefits. Farmers count on CSP and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife all while farming profitably.
4. Guarantees \$25 million per year in mandatory funding for the Beginning Farmer and Rancher Development Program. We need a national strategy and commitment to support beginning farmer and ranchers entering agriculture. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new agriculture start-ups.
5. Funds the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.
6. Discourages genetically engineered food supplies including pesticide and herbicide resistant engineered plants.

COMMENT OF STACY JAMES

Date Submitted: Monday, March 26, 2012, 3:56 p.m.

City, State: Champaign, IL

Occupation: Water Resources Scientist

Comment: Since their enactment in 1985, the Conservation Compliance provisions of the farm bill have led to substantial reductions in soil erosion and wetland loss. Society has benefited from these provisions in the form of cleaner water, greater flood control, less dredging, and healthier farmland. Compliance has made an impact because hundreds of thousands of American farms are subject to its common sense requirements in exchange for receiving certain USDA benefits. However, there is a significant gap in the program, namely the absence of Federal crop insurance from the list of benefit programs linked to Compliance. With the looming departure of direct payments—which are linked to Compliance—now is the time to restore the link between Compliance and crop insurance. Otherwise, up to approximately 200 million cropland acres will not fall under Compliance and wetland and soil loss will likely increase in the face of high crop prices and tenant farming. Compliance needs to stay strong and far-reaching because agriculture remains one of the nation's top sources of water pollution. Sedimentation/siltation and nutrient pollution degrade thousands of stream miles and lake acres, and the larger society is paying for this pollution in the form of lost recreational opportunities, less flood storage capacity, and higher water treatment costs. Taxpayers fund the many benefit programs farmers receive. In return for this investment, farmers should be providing environmental benefits, not externalized costs. By linking crop insurance to Conservation Compliance in the next farm bill, the House Committee on Agriculture can maintain and enhance this mutually beneficial social contract and protect our common, shared resources for generations to come.

COMMENTS OF ABIGAIL “ABBE” JAMES-CUPP

Date Submitted: Saturday, May 19, 2012 2:11 a.m.

City, State: Gardner, KS

Occupation: Student Ambassador/Events Coordinator at JCCC

Comment: While I am sure there are many, complex sides to these issues; I urge you, as a representative of the people, to consider the repercussions of such serious cuts in the areas where we need the most growth as a nation. I am speaking on behalf of my people when I say that we do not, in fact, need more corporate agribusiness turning a profit at the expense of our nation's health. To remove funding from these beneficial programs in favor of such questionable alternatives leaves me questioning what other hands are at play in these changes? As a representative of the voice of the people, I ask you to truly consider the gravity of the weighty decisions yet before you. You hold the future of accessible, quality, cost effective nutrition in your hands, I would be saddened and disappointed to see such lofty responsibilities taken for granted.

We are waiting in anxious anticipation of the upcoming decisions and pray that our confidence in appointing you as our representative in office was not a sad mistake in need of remedying.

Thank you for your time,

ABIGAIL JAMES-CUPP

COMMENT OF DANETTE JAMMER

Occupation: Co-Owner of 2 Companies

Comment: Please vote down any bills that have to do with killing any and all natural, healthy farms, health food stores, scientific studies (that prove raw milk and organic foods are healthy for all of us) and keep fluoride out of our water. We are what we eat and drink. Yet the government allows alcohol, cigarettes and GMO in our lives. We already know Monsanto is hurting us with GMO foods. We can live without the government getting into every aspect of our lives. We were doing just fine without the government deciding what is good or bad for us. Now it's the natural food that are under attack. Enough is Enough. We have to eat healthy to survive. Our bodies want healthy foods. Please stop any and all bills that are shortening our lives. Cancer is up because the food we eat is creating it. Please stop these bills now.

COMMENT OF MURRAY JANKUS

Date Submitted: Friday, May 18, 2012, 12:08 p.m.

City, State: Morrisville, PA

Comment: The more we simplify things, on both the supply side and the demand side, the less stable and sustainable our systems of production and market become.

COMMENT OF JON JANOWSKI

Date Submitted: Thursday, March 22, 2012, 3:40 p.m.

City, State: Milwaukee, WI

Occupation: Nutrition Program Advocate

Comment: I am writing to ask Congress to protect and strengthen the Supplemental Nutrition Assistance Program (SNAP) and other Federal food assistance programs in the next farm bill.

For over forty years the SNAP has ensured that the poorest and hungriest people in our nation can put food on the table. The SNAP is this country's first line of defense against hunger. The program helps over 46 million Americans put food on the table each month, including over 831,000 people in our home state of Wisconsin.

The SNAP has a number of strengths, including:

- It responds quickly and effectively to economic downturns and increases in unemployment.
- Its benefits are spent quickly—97 percent of benefits are redeemed by the end of the month of issuance.
- The program is efficient and well-managed. SNAP's current accuracy rate of 96% is an all-time high.
- Its benefits go to the neediest and most vulnerable people—84% of all benefits go to households with a child, senior, or disabled person.
- The program benefits local economies. Moody's Analytics and USDA estimate that the economic growth impact of SNAP ranges from \$1.73 to \$1.79 per \$1 of SNAP benefits.

As a food bank in Milwaukee, we do our best to ensure that people who need emergency food get help today. We also work hard to advertise the SNAP and help people apply for and retain benefits. As an organization with over 30 years of experience working with SNAP applicants and beneficiaries, we ask Congress to invest in the SNAP in the next farm bill. In particular, we ask that Congress:

- Increase the minimum SNAP benefit to \$25 per month so that households receive at least an amount equivalent to base values set in the 1970's
- Extend SNAP to needy people currently excluded from benefits, including restoring eligibility to all legal immigrants and removing time limits on receipt of SNAP by jobless adults seeking employment
- Allow states to operate the SSI CAP model that seamlessly enrolls SSI recipients into SNAP

- Provide adequate resources to states and community partners for administration of SNAP and education, outreach and nutrition education projects
- Oppose any proposal to block grant SNAP, cap its funding, impose restrictive eligibility requirements or otherwise diminish benefits or limit participation
- Oppose any proposal that would limit states' ability to coordinate the Low-Income Home Energy Assistance Program (LIHEAP) and SNAP benefits

The farm bill must also invest in government commodity programs like The Emergency Food and Assistance Program (TEFAP) and Commodity Supplemental Food Program (CSFP) that fight hunger. As a food bank that operates both programs in Milwaukee County (Wisconsin), we see the impact of these programs every day. Almost $\frac{3}{4}$ of the food we now distribute to our food pantries, soup kitchens, and elderly feeding sites comes from TEFAP and CSFP. These programs allow us to serve over 35,000 people per month in our food pantry network and over 61,000 hot meals each month within our soup kitchens. In particular, we ask that Congress:

- Make mandatory funding for TEFAP food more responsive to changes in need by providing a "trigger" that ties funding to unemployment levels.
- Enhance the Secretary of Agriculture's authority to purchase bonus commodities in times of high need for emergency food as well as in times of low commodity prices so the program is responsive to excess supply and excess demand
- Provide TEFAP storage and distribution funding of at least \$50 million annually
- Expand CSFP to all 50 states and ensure that adequate funding exists for all states operating the program.
- Transition CSFP to a seniors-only program by phasing out eligibility of women, infants and children while grandfathering in current participants

Finally, we ask that Congress invest in the Senior Farmers Market Nutrition Program (SFMNP) within the farm bill. Hunger Task Force has administered this program in Milwaukee County for 7 years, last year distributing over 3,200 vouchers to needy seniors. We are consistently disappointed that we are only able to distribute 3,200 vouchers each year, despite the fact that we see increasing need among low-income seniors. We could easily triple the number of vouchers to low-income seniors if more Federal funding were available. We ask Congress to provide a mandatory annual amount of at least \$25 million through the farm bill to address this need in Milwaukee County and throughout the U.S.

Thank you for your attention to these issues and for your efforts to invest in Federal nutrition programs.

COMMENT OF ELAINE JANSON

Date Submitted: Friday, May 18, 2012, 1:30 p.m.

City, State: Long Beach, CA

Occupation: Student

Comment: Food is what powers the people of this country. Without clean and organic food, we have no foundation to stand on. In this economy, healthy food will make all the difference. The constant need for health care will diminish and the overall morale will skyrocket. GMOs are not the way of the future, they are the pathway to destruction.

COMMENT OF JOAN JANUS

Date Submitted: Friday, May 11, 2012, 10:01 p.m.

City, State: Milwaukee, WI

Occupation: Educator

Comment: Healthy, affordable food for everyone is important but especially for children. Let's put a provision in the new farm bill that will support farmers and ranchers to deliver fresh wholesome food to school lunch program. Proper nutrition is important for optimal learning. Fresh food from local sources is also a great teaching tool. Kids learn to appreciate where food comes from and what it takes to produce it.

COMMENT OF GAYLE JANZEN

Date Submitted: Friday, May 18, 2012, 6:05 p.m.

City, State: Seattle, WA

Occupation: Graphic Design

Comment: We can't keep doing business as usual when it comes to our farming practices. The govt. has got to stop subsidizing the biggest farms and factory farms

which are destroying the bees and the environment with their pollution, chemicals and GMO foods. Organic farming needs to subsidize as more and more people are turning to organic foods as they don't want to ingest chemicals and GMO products. Organic farming is GOOD for the environment and the food is healthy. If we only had organic farming, the bees wouldn't be dying. This is a new century yet we continue to hold onto the old policies and practices that are no longer sustainable and that are now destroying our environment. Subsidizing the heavy use of chemicals and pesticides may look good short term, but in the long term they are a disaster.

COMMENT OF MICHELLE JARVIS

Date Submitted: Friday, May 18, 2012, 3:29 p.m.

City, State: Hartford, CT

Occupation: AmeriCorps VISTA

Comment: SNAP benefits are essential to many peoples lives. Without assistance from SNAP, men, women and children WILL go hungry. Nonprofits and churches are already stretched too thin, they cannot pick up the ridiculous amount of slack that cutting back SNAP will leave. Do not cut SNAP benefits! We already have a large amount of hunger in the nation, let's try to help this issue, not cause more problems. Help feed children, keep SNAP!

COMMENT OF CATHY JASIENOWSKI

Comment: Please help establish laws that promote food equity for the people who produce, pick, and process our foods, as well as equity for people of all socioeconomic status to procure fresh, local, organic, and sustainable food with the resources available to them.

COMMENT OF RAJ JAWA

Date Submitted: Friday, May 18, 2012, 1:42 p.m.

City, State: Saugus, CA

Occupation: Business Owner & Filmmaker

Comment: We must ensure we maintain control; the people must always be able to grow their own, the farmers should be able to grow real crops with seeds as nature intended, as God intended. Created crops may as well be considered processed foods, taking away the heart and soul of the vegetables and fruits all in the name of control and money. Let the crops solve hunger issues around the globe but allow the self-reliance and the self-enterprising qualities of consumers thrive; don't not neutralize the seeds in an attempt to maintain steady business, let us do for ourselves if we will.

COMMENT OF BONNIE JAY

Date Submitted: Friday, May 18, 2012, 12:17 p.m.

City, State: Santa Monica, CA

Occupation: Nutritionist

Comment: Food is life.

Food tainted with chemicals and designer genes is death.

Monsanto is beyond evil. Get them out of agriculture.

Wholesome food, grown organically . . . for everyone.

No More Modified, Chemical Laden, Poison Laden, Processed Garbage Referred To As Food. It Is Not And It Should Not Be Produced Or Presented As Food.

Do something about Monsanto, like put them out of business. They are taking small organic farmers to court insinuating that gmo seeds were stolen because they blew onto the organic farmers land. This is the evil the government now allows. Make it stop.

We need more organic farms . . . these farmers work very hard to bring wholesome food to market and are being thwarted by big agra. **Big Agra Must Be Stopped. People Have A Right To Choose What They Put Inside Their Bodies, Not Have A Company Like Monsanto Dictate And Limit Choices.**

Monsanto Is Evil. Put Them Out Of Business. They Are Poisoning Our Land, Ground Water And Putting Good People Off Their Land.

Do Something About It!

**This Is A Matter Of Great Urgency!
Now!
Please!**

COMMENT OF JOHN JAYNE

Date Submitted: Friday, April 27, 2012, 5:22 p.m.
City, State: Weston, MA
Occupation: Unemployed
Comment: When kids are hungry, they don't do as well in school. Then they can't get jobs and can't earn money to support themselves. So it's a vicious circle. It's up to us to rescue them from this never-ending cycle of hunger and poverty.

COMMENT OF JAMIE JEFFRIES

Date Submitted: Friday, May 18, 2012, 1:41 p.m.
City, State: Santa Cruz, CA
Occupation: Chef/Food Writer & Educator
Comment: Please protect small family farms that produce organic foods & products for their communities and neighbors. We need our small farms. Please don't cut them out in favor of Big Ag subsidies . . . they're so big they don't **Need** subsidies. Small farms **Do!**
 Thank you.

COMMENT OF JOY JENA

Date Submitted: Friday, May 18, 2012, 7:41 p.m.
City, State: Lawndale, CA
Occupation: Retired Registered Nurse
Comment: As the committee considers the 2012 Food and Farm Bill, I urge you to consider the following:

- Small and medium scale farmers and ranchers **Need** subsidies **Not** industrial farmers and ranchers! It is time for an apple and all home grown fruits and vegetables) to be more affordable than a bag of potato chips or a piece of cake. It is time for animals to be fed what their DNA requires important nutrients, now missing in the American diet, will again be provided.
- Traditional farm subsidies which support grain fed animals must be stopped and provided to those who wish to make the transition to sustainable extensive farming.
- Limits on the production of corn, soy and wheat production must be reinstated. The over production of these products as animal fed, sugar and enriched white flour is now the leading risk factor for chronic preventable diseases.
- Nutritional support for school lunches and the SNAP programs must be improved to provide adequate nutrition. Low fat chocolate milk from grain fed cows is not a health food. Whole milk from a grass fed cow is. French fries, potato chips and sugary drinks led the list of foods most eaten by those who are overweight. Please see an example mocking the travesty that begins with a farm bill that does not provide the means to a healthy population (the Bodega food pyramid on you-tube)—this is not an anomaly but rather repeated over and over in poor neighborhoods.
- The farm bill must not be passed without strong support for small scale farmers and ranchers, and a healthier school lunch and SNAP program. If more information is required to validate the needs outlined above, the Bill should be postponed until this is done.

Thank for your attention.

COMMENT OF NANCY JENKINS

Date Submitted: Saturday, May 19, 2012, 8:16 p.m.
City, State: Rocksprings, TX
Producer/Non-producer: Producer
Type: Livestock
Size: 1,000+ acres
Comment: A nation that can feed itself can better defend it own autonomy globally. Organic food should be the norm not the exception so lower prices which are important for the dignity of the less able consumer can to maintain. Chemicals &

GMO foods are not the way for long-term commodity stability. Their use only limits plant diversity & raises prices for everyone.

NANCY JENKINS, *Rancher*.

COMMENT OF CORLISS JENKINS-SHERRY

Date Submitted: Thursday, May 10, 2012, 3:58 p.m.

City, State: Tucson, AZ

Occupation: Retired

Comment: I think it is important that Congress to cut farm subsidies to anyone with an average income over \$1 million. I would like to see the new farm bill increase funding for local sustainable food systems, provide assistance to farmers to prevent pesticide and fertilizer run off as well as providing funds to study ways to maintain healthy production levels while reducing CO₂ output. Lastly it is important to make healthy food available to everyone by reducing corn and soy subsidies and increasing support for healthy foods such as fruits and vegetables.

COMMENT OF DINA JENNEY

Date Submitted: Wednesday, May 16, 2012, 3:55 p.m.

City, State: Phoenixville, PA

Occupation: Billing Specialist

Comment: From 1933 with the passage of the *Agricultural Adjustment Act*, until 2008 when Congress approved the *Food, Conservation and Energy Act*, there have been 15 so-called farm bills. Over these many years, the official name of the bill has changed and the scope and reach of the legislation has expanded or contracted to reflect national needs, economic conditions and the political environment. Every 4 or 5 years, Congress "reauthorizes" the Federal programs affecting food and farms. In essence, the farm bill brings most of the critical anti-hunger programs into existence and dictates how they will operate. Among these are the Supplemental Nutrition Assistance Program (SNAP), The Emergency Food Assistance Program (TEFAP), and the Commodity Supplemental Food Program (CSFP). These programs comprised only one of the 15 sections of the bill, but they accounted for nearly 70% of the spending authorized by the 2008 Farm Bill. For those of us focused on fighting hunger, no other piece of legislation is more important.

COMMENT OF BARBARA JENNINGS

Date Submitted: Thursday, May 17, 2012, 10:58 a.m.

City, State: St. Louis, MO

Occupation: Administration & Investments

Comment: Farmers need to be rewarded for good conservation practices . . . planting refuges, hedges, winter cover crops, *etc.*

Poor soil = extra expense for fertilizer = poor water quality, and more nitrates *etc.* in our streams and rivers.

Please preserve our land and our water . . . subsidies should go to those who do this, not those who waste and ruin.

COMMENT OF MIMI JENNINGS

Date Submitted: Thursday, May 17, 2012, 12:38 p.m.

City, State: St. Paul, MN

Occupation: Retired Teacher

Comment: Please consider jobs, healthy food programs, our environment and small farms/diversity when you approach the farm bill. The pressure on you from large industrial farms with lots of lobbying money will be enormous, but (1) they don't need your support, and (2) there are other pressures to consider as well. These are: sustainability and a robust economy.

COMMENT OF SUSAN JENNINGS

Date Submitted: Friday, May 18, 2012, 10:59 a.m.

City, State: New York, NY

Occupation: Artist

Comment: Organic farming should be subsidized. Antibiotics, hormones and most pesticides should not be used in farming in as they are endangering the population.

COMMENT OF ERIN JENSEN

Date Submitted: Saturday, May 19, 2012, 12:09 a.m.

City, State: Vancouver, WA

Occupation: College Admissions Counselor

Comment: This planet cannot sustain agricultural practices that champion the bottom line over ecological common sense. This economy cannot sustain food production that subsidizes monocultures and encourages food insecurity. Please listen to your constituents and stand up for a farm bill that benefits our land and our citizens . . . **Not** big agribusiness.

COMMENT OF SHARLENE JENSEN

Date Submitted: Sunday, March 18, 2012, 3:32 p.m.

City, State: Oldham, SD

Producer/Non-producer: Producer

Type: Livestock

Size: 500–999 acres

Comment: I would like to see as much done as possible to help and encourage farmers & ranchers to reduce their use of chemicals (pesticides, fertilizers . . .), genetically engineered/genetically modified seeds, antibiotics, and hormones. I would like to see research directed toward non-toxic ways to control weeds and pests. I would like to see more incentives for farmers/ranchers to raise organic crops and livestock. I believe this is the only way to save what we have left for future generations.

COMMENT OF PATRICIA JERRELLS

Date Submitted: Saturday, May 19, 2012, 12:23 a.m.

City, State: Shelton, WA

Occupation: Retired

Comment: As a consumer of food, I want the best I can find. This means local and organic if possible. Small family farms are the ones that need help and support. The huge agribusiness farms do not need help and should not be paid to produce nothing. The whole business is out of sync and unreasonable. This is the time for an overhaul of the farm bill to support organic and small family farms that sell locally. This will bring local jobs and healthy food to the population.

COMMENT OF LISA JERVIS

Date Submitted: Friday, May 18, 2012, 1:40 p.m.

City, State: Oakland, CA

Occupation: Nonprofit Administrator

Comment: For the health of our country's families, communities, and economy, we **Need** farm bill reform that ends subsidies to large-scale monoculture farms whose crops get made into nutrition-free refined goods like sodas and chips or animal feed to support cheap fast-food meat. As a taxpayer, I want farm supports to go to small producers growing fruits, vegetables, eggs, dairy, and meat that go directly to people, no complex processing needed. Taking agriculture policy in this direction will help make healthy food more affordable and accessible, build local economies, increase food security, and increase quality of life for small farmers and their customers.

I also want food safety regulations that have appropriate provisions for small producers, without burdening them with over-regulation designed for huge factory farms. Factory farming is inherently less safe, as contamination in one space spreads to food meant for vast numbers of people. Small farms and meat processors don't need the same level of regulation, and if they have to invest in compliance at the same level as huge corporations, we will lose access to healthier, higher quality products.

Thank you for your time and attention.

Respectfully,

LISA JERVIS.

Comment: The total capitalization of organic life is going down a **Dead** end road. Right now capitalism is flat Earth thinking. Do you want to be part of the living future or just another jerk paid for politician?

COMMENT OF JULIA JIANNACOPOULOS

Date Submitted: Friday, May 18, 2012, 10:17 p.m.

City, State: Potage, WI

Occupation: Education

Comment: CAFO's are really unacceptable factory farms. They pollute, they force their 'waste' contracts on all the local farmers, they outcompete family farms, they flood the market with cheap, antibiotic filled milk and they reduce the water table and the quality of life in the communities they are in/near. Milk Source, n/k/a MS Holdings, Inc. has a CAFO 1 mile from Grand Marsh Elementary School. Talk to the Principal there about how she feels about sending 150 kids out to recess with the stench of the farm. Please require environmental regulations on CAFOs that will be supported/enforced by our sorely understaffed DNR! Thank you for listening.

COMMENT OF LIZZETTE JIMENEZ

Date Submitted: Friday, May 18, 2012, 4:43 p.m.

City, State: Addison, IL

Occupation: Manager, Strategic Planning

Comment: Please do not cut funding for organic farming or to beginning farmers. This is truly vital to our future as the current "factory farm" method is just simply not sustainable, less healthy and not to mention absolutely deplorable and conditions inhumane. I live in a city and go out of my way to work only with local farmers who are ethical, do things the right way, and use humane environments like allowing their animals to be out on pasture as nature intended.

COMMENT OF GLINDA JIMMERSON

Date Submitted: Friday, May 18, 2012, 9:52 p.m.

City, State: Oceanside, CA

Occupation: Nurse

Comment: Please support the farm bill. It is important that we, the consumers, taxpayers, and voters are given the choice to have local organic farms supported by the government for affordability and health. Organic and sustainable farming should be just as if not more subsidized than the large agribusinesses who do not care what we think or say. We do not want G.M.O. foods patented and blown by nature into our local farmer's property so they can sue them in court and shut down the competition. We do not want unlabeled G.M.O. products in our grocery stores. We would like our public schools to get their food from local farmers thereby reducing cost to the public school system and making a healthier menu for our kids.

COMMENT OF DONNA M. JITCHOTVISUT

Date Submitted: Saturday, May 19, 2012, 10:02 a.m.

City, State: Chicago, IL

Occupation: Retired

Comment: The strength of our nation depends on the health, fitness, and education of its citizens. We need to ensure that healthy affordable food is available to everyone regardless of where they live or what their occupation. Big Ag has lost sight of this original purpose: producing a food supply that is healthy and affordable and available to all of the citizens of this country. Big Ag is more concerned with creating wealth for its CEOs and stockholders than solving the problem of hunger in this country. In the process of maximizing the rate of return on investment for its stockholders, it is using chemicals and genetically modified crop seed that are already producing nightmarish "super weeds", poisoned soil, crop die-offs, and illnesses in the humans and animals alike. In short, Big Ag is destroying our farm land and making all of us ill with diseases that never existed before. We need to return to a time when production techniques were based in solid provable science; simple cultivation techniques of crop rotation, companion planting, reuse of farm waste as natural soil enhancements, and natural pest and weed control provided by "friendly" insects and animals. If our country is to become healthy and strong again,

we need to return control of our agricultural business to the people who know it best: the small family farmers.

COMMENT OF DONALD JOHANSSON

City, State: Tobaccoville, NC

Occupation: Retired Professor

Comment: Please look into the work done by Henry Wallace when he was Sec'y of Agriculture. The subsidies then made sense. We must see that the government's participation in agriculture benefits real farmers, not Monsanto and friends. Here's where you can really speak for American values.

COMMENT OF ANN JOHNSON

Date Submitted: Friday, May 18, 2012, 2:50 p.m.

City, State: Denver, CO

Occupation: Retired Nurse

Comment: I grew up on a farm and as far as I can tell farmers never get a fair shake. They feed this country with the hard labor of their bodies, and they operate huge machinery which can be quite dangerous, not to mention the cost of maintenance. So, while we eat food that they produce with never a day off, they don't ever get a fair shake. Do the right thing and make farming a top-notch priority and think about what's on your plate at your next meal, and the next one and the next one, *ad infinitum*.

COMMENT OF BETTEMAE JOHNSON

Date Submitted: Friday, May 18, 2012, 1:42 p.m.

City, State: Albuquerque, NM

Occupation: Retired

Comment: No more subsidies for "farmers" making more than \$1 million per *annum*: only for "small" family farmers! Also, additional support should be provided for those farmers who practice sustainable and organic farming!

COMMENT OF CAROL JOHNSON

Date Submitted: Friday, May 18, 2012, 1:18 p.m.

City, State: Deer Park, WI

Producer/Non-producer: Producer

Type: Poultry/poultry products

Size: Less than 50 acres

Comment: Small farmers have been struggling to keep going. I am a small sustainable poultry farmer. I focus on ethical treatment and feed organic, even though I am not certified. I honestly don't know if I can do it another year. Please stop subsidizing GMO crops that are bad for us and our animals and put more resources toward small, sustainable farmers so we can produce healthy food for all.

Date Submitted: Saturday, May 19, 2012, 10:57 a.m.

City, State: Cambridge, MA

Occupation: Retired Environmental Planner

Comment: It is time to stop subsidizing giant agribusiness companies and focus instead on the health of the American people. We need nutrition, conservation and organic produce programs, as well as support for the local food movement. Let's end the subsidies to large corporations and, instead, focus on the health of our citizens. Thank you.

COMMENT OF ELIZABETH JOHNSON

Date Submitted: Friday, May 18, 2012, 4:21 p.m.

City, State: Portland, OR

Occupation: Mother

Comment: My parents come from a long line of farmers dating back to the mid 1800's here in Oregon. My parents are very frustrated when they see large developments and shopping malls being built over land they know to be very fertile farming land, and then turn around just to see large farming corporations like Monsanto that use chemicals, and GMO seed on land that is not fit to be farmed. The only way that it is possible is with the destructive chemicals that are used on the land. The Monsanto company, is one of the most dangerous and evil global businesses because it is responsible for poisoning people, wildlife, farm animals and the environment at large—in other words Monsanto are a deadly threat to life on Earth.

COMMENT OF GEORGE JOHNSON

Date Submitted: Saturday, May 19, 2012, 12:29 p.m.

City, State: Laguna Woods, CA

Occupation: Clergy

Comment: Follow the movement of Jesus Christ and support efforts to help the poor. Don't cut funds for food stamps and small farmers. Security of votes sometimes robs one of courage. But not John . . . the Baptist or John Campbell.

Thanks,

GEORGE JOHNSON from Laguna Woods.

COMMENT OF K.L. JOHNSON

Date Submitted: Friday, May 18, 2012, 2:05 p.m.

City, State: Ft. Myers, FL

Occupation: Retired Agribusiness

Comment: We must protect our farming families from the chemicals that are killing us. Organics = **Life!** Rather than death from cancer . . . babies with autism . . . neurological abnormalities, cardiac problems, asthma . . .

After decades of farming with "recommended chemicals", my extended family is sick or pre-maturely dead!

COMMENT OF KARL JOHNSON

Date Submitted: Friday, May 18, 2012, 12:14 p.m.

City, State: Monroe, NH

Producer/Non-producer: Producer

Type: Poultry/poultry products

Size: Less than 50 acres

Comment: Consumer demand for organic produce that comes from sustainable, small, family-owned farms is increasing. Consumers are fed up with large-scale agribusinesses that mistreat livestock, pollute the environment, underpay their workers and deliver unhealthy products. It's time for real legislative reform that gives small farmers an opportunity to compete and gives consumers the information they need to choose their food through truthful labeling.

COMMENT OF KATHRYN JOHNSON

Date Submitted: Saturday, May 12, 2012, 12:41 p.m.

City, State: Plano, TX

Occupation: Student

Comment: The farm bill needs to prioritize healthy foods for growing kids. Obesity is a huge problem in America, yet we have school cafeterias stocked with Domino's pizza, pink slime, fries, and Dr. Pepper machines. School lunches are an opportunity to provide healthful foods to a huge swath of young people who otherwise may not have access to it, and we should capitalize on that. We also need programs that spread the agricultural wealth, so to speak. People across the country face far too many barriers to healthy eating, including cost and proximity. I also think that subsidizing the foods that make our population heavier and less healthy—the corn that becomes corn syrup, for instance—is irresponsible to the point of ridiculousness and really needs to be looked at logically.

COMMENT OF KATHYRN JOHNSON

Date Submitted: Sunday, May 20, 2012, 2:07 p.m.
City, State: Minneapolis, MN
Occupation: Homemaker, Nutrition Educator
Comment: Make a level playing field so small producers and co-ops can get good, safe food to consumers. Agri-industries are not the same as small farms—they are inherently more polluting, dangerous and wasteful.

COMMENT OF LESLIE JOHNSON

Date Submitted: Friday, May 18, 2012, 7:52 p.m.
City, State: Rowland, NC
Occupation: Registered Nurse/Math Teacher
Comment: I fully support a farm bill that promotes organic farming and sustainable practices. I believe that supporting Big Ag is wrong and that GM products are bad for people and the environment. Terribly bad. It is way past time to quit allowing corporations to run this country for their profit.

COMMENT OF MICHAEL JOHNSON

Date Submitted: Saturday, May 19, 2012, 8:07 p.m.
City, State: West Linn, OR
Occupation: Health Care Worker
Comment: Please stop subsidizing commodity crops and support real farmers—those that help feed our country. We are a nation in the midst of a health emergency caused by obesity, brought on by our government's farm bill.
 Let real food be supported the way corn, soy and the rest of Big Ag is.

COMMENT OF MICHELE JOHNSON

Date Submitted: Friday, May 18, 2012, 6:47 p.m.
City, State: Santa Fe, NM
Occupation: Book Artist
Comment: It's time to level the playing field in agriculture. For too long we have looked the other way while the family farm died a slow death and the big agribusiness folks took over. Factory farms that raise animals have shown they have a host of problems, including humane treatment of animals, questionable feeding practices, use of drugs and antibiotics, pollution, and insufficient oversight. Farms raising vegetable and grain crops have their own set of issues, including indiscriminate overuse of pesticides, herbicides and fertilizers and the proliferation of GMOs. The number of sources for food across the nation has dwindled to a "precious few", yet the problems have multiplied. Foodborne illness is at an all time high. Increasingly, we know less and less about where our food comes from, how it's produced and what's in it. Small farm operations, many of them committed to a healthier way of growing and harvesting are under constant threat of over-regulation, even extinction, from the policies that favor the giants of agribusiness. This has to stop. We deserve, at the very least, clean, healthy food, and we deserve to have choices about where that food comes from and how it is processed, stored and delivered. Personally, I no longer purchase meat or poultry from the standard super market, not only because I don't trust it anymore, but because it tastes like nothing. Americans have been lulled into a false sense of security about their food supply, and in the bargain, have been brain-washed to accept as "food" a whole host of products that are nutritionally worthless or even harmful. For starters, the people who are trying to resurrect the model of the small, independent farm should not only be applauded and encouraged, but regulations should be crafted that are favorable to them and not only the big players. It would be wise to pay attention to the environmental damage that has been done—and continues to be done—and take the necessary steps to halt and reverse this alarming trend. It would also be wise to take another look at the way we subsidize agricultural programs in this country. It simply makes no sense any more, given the many changes over the past decades. It appears that there is a lot of work to be done. Please put the process of future decision-making about all facets of agriculture on the "front burner" and listen to the "little folks" out there, not just the special interests of the agribusiness giants.

COMMENT OF ROBYN JOHNSON

Date Submitted: Sunday, May 20, 2012, 8:34 p.m.
City, State: Portland, OR

Occupation: Community Advocacy

Comment: Partners for a Hunger-Free Oregon (PHFO) commends the House of Representatives Committee on Agriculture for this opportunity to submit recommendations for the 2012 Farm Bill. PHFO recognizes this farm bill reauthorization as a tremendous and critical opportunity to strengthen and improve programs and policy that supports our nation's farms, farmers and food system. However, as the problem of hunger persists in Oregon and nationally, it is of tantamount importance to protect, strengthen, and improve the Supplemental Nutrition Assistance Program (SNAP), among other Federal nutrition programs, as a means of mitigating the tragic affects of hunger on our citizens and in turn, our communities. SNAP currently helps feed over 800,000 Oregonians and 49,000 million people nationally. Serving more people than at any time in the program's history, SNAP continues to be our first defense against hunger in the United States. As a program, it is working exactly as it was designed to combat hunger and malnutrition, and as such, should be maintained in its current structure to ensure that our citizens are fed and healthy.

PHFO is a statewide organization with a mission to end hunger before it begins by promoting the well-being and economic security of Oregonians and eliminating the underlying causes and consequences of hunger. We work with stakeholders throughout Oregon to advocate for public policy improvements on the local, state and Federal level, raise awareness of the extent of hunger and conduct outreach to expand participation in Federal nutrition programs. Our efforts are guided by a plan with three goals: (1) Increase economic stability for people, communities and the state, (2) Cultivate a strong regional food system and (3) Improve the food assistance safety net. Strengthening, improving and protecting federally funded nutrition programs is pursuant to our work on Goal 3 of Oregon's plan. However, we know these programs support strategies in all three goal areas. SNAP, The Emergency Food Assistance Program, Farmers Market Nutrition Programs, the Fresh Fruits and Vegetables Program, together and in conjunction with other nutrition programs, help low-income families piece together their meals every day and their food budget over the course of a month, and allows them to stretch their food dollars and increase their ability to afford to pay other basic living expenses. Additionally, these programs support local grocers, food distributors, processors, farmers, ranchers and dairies. Of equal importance, these programs strengthen our regional food system and the jobs that those sectors provide.

PHFO strongly supports the following improvements to nutrition programs:

Supplemental Nutrition Assistance Program

SNAP is the centerpiece of our nutrition safety net in the United States. We must ensure that SNAP benefits are sufficient to purchase a nutritious diet. In general, we ask that the House Agriculture Committee:

- Support proposals to increase access to adequate and nutritious food.
- Oppose attempts to weaken or restructure these programs that would result in reduced benefits.
- Oppose proposals that would cap or reduce funding.
- Oppose proposals that restrict or reduce program eligibility, benefits, or food choice.

Specifically, we suggest the following policy improvements for SNAP:

- Increase monthly benefit for the Supplemental Nutrition Assistance Program (SNAP) to allow for the purchase of a nutritious diet by moving from the Thrifty Food Plan to the Low-Cost Food Plan.
- Make the ARRA funding boost permanent.
- Align AmeriCorps VISTA SNAP eligibility with other AmeriCorps programs. Current legislation counts the living expense allowance against eligibility if a VISTA applies for SNAP after becoming a member. This change would align with medical programs, which currently excludes these payments.
- Allow college students to qualify for SNAP regardless of their work hours. Let college courses count as work participation, or eliminate the current 20 hour student work requirement.
- Expand the minimum benefit to all eligible households. Currently, the \$16 per month minimum benefit is allotted only to households with 1 or 2 people.
- Fully restore immigrant eligibility. Allow documented adult immigrants eligible based on income; eliminate restrictions including, 5 year work history.
- Add incentives for fruit and vegetable purchases in SNAP. These dollars will promote and encourage the purchase of a healthy diet.

- Remove “Able Bodied Adults Without Dependents” (ABAWDS) provision from regulations. Currently, Oregon must seek a waiver each year to be excluded from this requirement, which limits benefits for this population.
- Exclude income earned by members age 18 and under if in school at least half-time. Income from children under 18 should not count against household eligibility, and would align with medical and Temporary Assistance for Needy Families requirements.
- Increase the Transitional Benefit Alternative eligibility period to 12 months. Current law allows for a 5 month period. Expanding this will allow families leaving TANF for employment to receive a greater opportunity to transition off public benefits; it also aligns with extended medical program benefits.

The Emergency Food Assistance Program (TEFAP)

At a time of record-level need, we call on the Federal government to provide food banks the full assistance available through TEFAP.

- Make mandatory funding for TEFAP food more responsive to changes in need by providing a trigger that ties funding to unemployment levels.
- Enhance the Secretary of Agriculture’s authority to purchase bonus commodities in times of high need for emergency food relief in addition to times of low commodity prices so the program is responsive both to excess supply and excess demand.
- Reauthorize funding for TEFAP Storage and Distribution Funds at \$100 million per year and TEFAP Infrastructure Grants at \$15 million per year.

Support Oregon Agriculture

We support investments in local food production, processing and marketing systems.

- Increased funding and strengthen programs such as Farmer Market Nutrition Programs, Farmers Market Promotion Program, Fresh Fruits and Vegetables Programs for schools, and Community Food Projects.
- Support reforms to Federal farm support programs that create a more level playing field for Oregon’s small and medium size farms and ranches to ensure an affordable and healthy food supply, and protect Oregon’s natural resources.

PHFO respectfully asks that this Committee recognize the important role that federally funded nutrition programs play in ensuring that people access the food they need. While Oregon is one of the leading states in nation in terms of SNAP participation, we continue to be ranked as a top state for very low food security according to the USDA’s 2010 report Household Food Security in the United States. While the number of our ranking has dropped, the rate at which hunger occurs has remained the same. We credit the SNAP program and particularly provisions such as Categorical Eligibility and “Heat and Eat” as instrumental in allowing our state hold the line on hunger. It would be devastating to thousands of families in Oregon and other states that elect these options to lose them at a time of such great need. We need to protect the current structure of this successful program. Cuts to SNAP will result in increased hunger, as it will mean less food on the table of Oregon’s families. We further recognize that despite the strength and success of the Oregon Food Bank Network, the charitable food sector would not be able to fill in the gaps that cuts to SNAP would create.

PHFO appreciates the opportunity to contribute to this process.

ROBYN JOHNSON,
Community Advocacy Coordinator,
Partners for a Hunger-Free Oregon
[Redacted].

COMMENT OF RON JOHNSON

Date Submitted: Saturday, May 19, 2012, 7:23 p.m.

City, State: Portland, OR

Occupation: Energy Consultant

Comment: The level of hunger in the United States is shameful given our country’s wealth and resources. We take pride in saying this is a country of opportunity for all who are willing to make the effort, yet we deny children the food necessary for them to have fair opportunity. Please maintain or increase the funding for SNAP and TEFAP so our country does not fall further behind in feeding its people.

COMMENT OF SHARON JOHNSON

Date Submitted: Friday, May 18, 2012, 12:06 p.m.

City, State: Windsor Heights, IA

Occupation: Natural Health Coach

Comment: I shop farmers markets because I want to be healthy, not sick. I want to eat locally grown, organic products. I want to eat meat coming from animals that have NOT been fed antibiotics, hormones, and GMO grains. I want my foods to be labeled non-GMO or GMO.

The vast majority of the foods we are offered today are full of toxic additives, are GMO, and making us sicker, not healthier. If you want to curb the runaway costs of healthcare today, then change the way our foods are grown, manufactured, and marketed. **Put People Before Profits Of Big Ag!**

COMMENT OF TIM JOHNSON

Comment: If we have a "Farm" bill at all, it should be to help farms produce people food, not the genetically modified garbage we are planting now. No one with a Chicago, or New York, Los Angeles address is eligible!

COMMENT OF RONA JOHNSTON

Date Submitted: Friday, May 18, 2012, 10:13 p.m.

City, State: Garretson, SD

Occupation: Artist

Comment: The farm bill should support locally grown food grown in an environmentally responsible way. Foods for families and a healthy environment for everyone living in these communities.

COMMENT OF SIGNA JOHNSTON

Date Submitted: Sunday, May 06, 2012, 1:29 a.m.

City, State: Portland, OR

Occupation: Retired Executive Director, State Program on Aging

Comment: Please do all in your power to support and defend reinstating the funding and the structure of the SNAP (food stamp) program. I know personally the safety net this provides for our children, elderly, veteran and other disabled plus struggling unemployed and low income families.

The Senate approved farm bill calls for drastic cuts which must not become law. How can our nation ever expect to recover from this deep recession if so many of its citizens are left to go hungry and consequently become ill because of lacking adequate nutrition?

Thank you for supporting laws that strengthen our nation's leadership to feed the hungry, promote conservation, lifts up small family farms and helps rural America and thus all America thrive.

Please continue to oppose the drastic cuts to this vital safety net as you did when this formerly was put to a vote in the U.S. House.

Sincerely yours,

SIGNA JOHNSTON.

COMMENT OF VERONICA JOHNSTON

Date Submitted: Friday, May 18, 2012, 7:46 p.m.

City, State: Chicago, IL

Occupation: Health Research Writer

Comment: I buy organic food from small-scale Illinois farmers every week and would like to see their best interests, which are directly connected to our health,

looked after. Further, because of the dangers of the obesity epidemic to our nation's economy, health and security, I would like to see incentives for more farmland to be devoted to growing fruits and vegetables.

COMMENT OF VICKI JOHNSTON

Date Submitted: Friday, May 18, 2012, 1:42 p.m.

City, State: Evergreen, CO

Occupation: Healthy Foods Cooking Instructor

Comment: We would like major emphasis put on bio diverse, organic, family-farms. We would like a deemphasis on industrial agriculture and corporate livestock production. We want more heirloom species foods, more diverse crops like blue potatoes and red carrots. **No** GMOs! Tax credits for going organic and avoiding pesticides please.

VICKI JOHNSTON, MHN,
Evergreen, CO.

COMMENT OF KATHY JOHNSTON-KEANE

Date Submitted: Friday, May 18, 2012, 9:57 p.m.

City, State: Pittsburgh, PA

Occupation: Art Historian

Comment: Farming should contribute to the health of the nation . . . healthy crops grown for our consumption . . . and healthy farming practices with little negative impact on the environment. I support small farms that care about their farmland, their produce, their livestock, and the environment. They should be supported. Big Agriculture has been helped enough . . . help the little farms thrive.

COMMENT OF ALEXANDER JONES

Date Submitted: Friday, May 18, 2012, 11:37 p.m.

City, State: Eugene, OR

Occupation: Farmer

Comment: We need to close loops if we want to prevent the plethora of problems industrial agriculture and its inputs cause. Dead zones in the Gulf of Mexico, Bees dying by the millions, these are just a few of the destructive tendencies of industrial ag. The Dust Bowl was caused due to poor farming practices, let's not let that happen again!

Be Well,

ALEX.

COMMENT OF ANTHONY JONES

Comment: I Plead for **Reform!** Please stand up for all of the Americans who struggle with small local farms and gardens. Current policy threatens the livelihood and wondrous American heritage lifestyle which raises health well adjusted citizens.

COMMENT OF DIANE JONES

Date Submitted: Sunday, May 20, 2012, 11:36 p.m.

City, State: Fort Myers Beach, FL

Occupation: Real Estate Broker

Comment: Dear Representative Mack,

Please consider the following for the new farm bill. Don't sell out to the big factory farms. We'll know who you care about with your vote . . . your constituents or big corporations.

A \$36 million cut to SNAP is not the way to go. The Committee should focus on writing a farm bill that creates economic opportunity and improves access to healthy, affordable food for all Americans.

1. Community Food Projects Program—\$10 million per year to help communities build food self-reliance.
2. Farmers Market and Local Food Promotion Program—\$20 million per year to develop farmers market capacity and create food hubs to connect farmers with schools, hospitals, grocery stores and other markets.

3. Hunger-Free Community Incentive Grants—An average of \$20 million per year for a new SNAP local fruit and vegetable incentive grant program at farmers markets and other healthy food retailers.

COMMENT OF KRIS JONES

Date Submitted: Friday, May 18, 2012, 9:57 a.m.

Occupation: Special Ed. Teacher

Comment: Family farms are economical, social and spiritually the need of the present and the future. Big Ag pollutes and is bad for the planet and creates global warming.

COMMENT OF MARILYN JONES

Date Submitted: Friday, May 18, 2012, 4:46 p.m.

City, State: San Francisco, CA

Occupation: Designer

Comment: If you are truly interested in lowering health costs, you would encourage and support industry organic farming. I believe that many people my generation are healthy because we were born on the cusp of WWII Families across the U.S. who had no background in farming, grew as much of their own food as was possible. This happened all across the U.S. **Why** would you let healthy food that is grown organically by small farms be destroyed? Is the Committee is made up “fast food junk eaters”? Do they have no concept chemical free food.

It is a pathetic situation when America’s food production relies on chemicals and ignores the health factor of its Citizens.

JOINT COMMENT OF MAXINE & RALPH D. JONES

Date Submitted: Sunday, May 20, 2012, 8:33 p.m.

City, State: Midland, SD

Producer/Non-producer: Producer

Type: Livestock

Size: 1,000+ acres

Comment: First, I believe you need to do a serious job of educating the public, even including many farmers, on how the farm bill works and why it is necessary.

Too many do not know that the majority of the budget actually serves **All** people needing food assistance, rather than subsidizing farmers.

We livestock producers who don’t grow grain crops for sale rarely know how crop subsidies work and why they are necessary, if they really are.

Those two items generate a tremendous amount of distrust and resentment of those farmers who get “all that free money” as I’ve heard it described.

That said, I do believe cuts should affect **All** who receive money from USDA. I believe cuts should be proportional to need and benefit to the environment.

It appears that conservation will take the hardest hit, and that is not right. Many of us who practice good land stewardship have carried that load without assistance of any kind until very recently. Since the general public wants good stewardship of the land, they should be willing to put some of their own ‘treasure’ into assisting those of us who do not get real returns from our stewardship costs.

Currently, some segments of agriculture seem to be doing quite well. Speaking as one who produces beef cattle as our only ‘crop’, that is deceiving . . . since our costs for absolute necessities for production are going up far faster than our income, and the taxes, from local to the income tax are going up very fast, too.

And Death Tax, the most obscene of all taxes, is forcing us to spend money better spent to help our young grandsons increase their herd numbers so they can become viable ranchers, on even more estate planning with every assault on private businesses via that horrible tax. Remember the Death Tax has a very high compliance and collections cost, too.

Insurance subsidies for losses of our hay crops in times of drought or other weather disasters, and possibly for excessive losses of livestock in unusually difficult storms would be a very possible saving mechanism for our business some years. It is nearly impossible to justify carrying insurance due to high premium costs, however even one year of huge losses has come very near to ending our ranching careers more than once over the past 55 years we have been in business.

I believe ethanol has used up more than its share of subsidies. The market place is the proper place for new, non-fossil fuels to grow, now.

Thanks for the opportunity to comment. As the elder of a four generation ranch (two generations preceded us), we would prefer no ag subsidies, but cannot compete with the subsidized farmers who like to raise cattle to clean up their crop residues while we have to purchase **All** our feed, either by owning or leasing land, growing hay and grain, *etc.*

MAXINE & RALPH D. JONES,
Midland, SD.

Comment: Our health and the health of our planet depends on humans realizing sustainable farming practices. Huge agribusiness has only profit in mind. This needs to change. Please support organic farming in any decisions. Many health problems facing our nation could be helped by having healthy foods available . . . free of pesticides and chemicals.

COMMENT OF PAULA JONES

Date Submitted: Saturday, May 19, 2012, 5:15 p.m.

City, State: Manhattan Beach, CA

Occupation: Retired

Comment: Don't let our U.S. food and agricultural policy continue down the unhealthful road it's on. If you truly want to represent the people of the U.S., for policy development must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists. We want sustainable agriculture with GMO foods labels so that those of us who do not want to eat GMO foods can chose to avoid them. Stop the policies that support the excess production of com-

modity food ingredients that then get dumped on our kids in school. Show the world that we are a truly developed nation and that we can make tough but intelligent decisions about how to best manage our environment, our health and our future through the fundamental farm policies that you create.

COMMENT OF ROSEMARY JONES

Date Submitted: Sunday, May 20, 2012, 5:03 a.m.

City, State: Salinas, CA

Occupation: Educator

Comment: I am a consumer of farm products and find that I must shop with more and more trepidation due to the lack of oversight and protections. GMO and a chemical company named Monsanto, known for endangering populations for profits, are now growing our foods putting real farmers out of work and creating these oversized unwieldy industrial farms. Why must be forced to eat whatever they produce, and pay for the privilege?

COMMENT OF KAREN JONES, R.N.

Date Submitted: Friday, May 18, 2012, 11:34 p.m.

City, State: Bethlehem, PA

Occupation: Community Health Nurse

Comment: Based on the American Nurses Association code of ethics it is my duty to encourage you to support any legislation that would protect the health of our communities, and our environment. Please create and support a new movement in agriculture that is sustainable, local, organic and non GMF based. This is more than a health issue it is a matter of national security. Please act rightly.

Thank you,

KAREN JONES, R.N.,
Registered Nurse to MSN Program,
DeSales University.

COMMENT OF CALLIE JORDAN

Date Submitted: Friday, May 18, 2012, 3:42 p.m.

City, State: The Dalles, OR

Occupation: Teacher

Comment: U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

Farmers and eaters across the U.S. benefit from a fair and healthy farm bill. We need your help today. Right now the House Agricultural Committee is accepting public comments on this critical piece of legislation.

There are a lot of bad ideas that Congress is considering, including cutting funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture.

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF CAMILLE JORDAN

Date Submitted: Friday, May 18, 2012, 5:06 p.m.

Occupation: Retired

Comment: Let's give organic farmers the opportunity to expand & thereby lower costs. Many of us do not want to buy either GMO food or food contaminated w/ pesticides.

COMMENT OF JOHN JORDAN

Date Submitted: Friday, April 27, 2012, 10:04 a.m.

City, State: Bend, OR

Occupation: Home Designer

Comment: Dear Representative Walden,

I am writing to voice my concerns about current farming practices and subsidies. It is imperative that the current system be turned on its head and the emphasis be placed on sustaining the local family farm instead of the resource guzzling and pollution producing corporate farm industry.

Subsidies to industrial farms allow unsustainable practices to flourish while responsible organic and natural farmers struggle. Let us level the playing field and make industrial farms compete with the wholesome food producing family owned farms and place foods on the shelf that reflect the "real costs to produce" their products by eliminating subsidies.

Does this idea not reflect a true free enterprise capital system that our GOP representatives preach on a daily basis? Stop socialized farming practices. Call it what it is as most consumers are not aware how this system works for the wealthy industrial farms and not the just, hardworking family farmers that built this country.

The result of the current subsidies system promotes the production of unhealthy, petroleum based pesticide laden foods. Poisonous practices and GMO foods will lead to the downfall of our food supply as we continue to propagate poor farming practices.

Make the industrial farms compete on a level playing field and I assure you that the quality of food in this country will increase as costs decrease. Eliminate subsidies for farms.

Sincerely,

JOHN JORDAN.

COMMENT OF JOLYNN JORDAN

City, State: Oakland, CA

Occupation: Retired

Comment: Please help the American people to get safe food, and to take care of our precious resources *e.g.*, our soil. Cancer is rampant, my son just died from it, we need safe food.

COMMENT OF MELISSA JORDAN

Date Submitted: Sunday, May 20, 2012, 11:29 a.m.

City, State: Morrisville, VT

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: I produce vermicast (earthworms castings) from food scraps. I also try to buy locally raised produce and other food stuffs. I know an increasing number of people with different types of colitis and autoimmune diseases. I can't help but believe that these illnesses, and so many others, are due to the poor nutrient levels in foods from a chemical agriculture that does nothing to improve the quality of soil that food plants are raised in. I focus on producing healthy soil for healthy food. Our government should be doing the same, and supporting local, certified organic agriculture is the best way possible to achieve this goal.

COMMENT OF MICHELE JORDAN

Date Submitted: Thursday, April 26, 2012, 5:08 p.m.

City, State: Marion, MD

Occupation: Unemployed

Comment: First of all we need to protect our farmers on the shore and their right to farm, whether they be raising poultry or farming crops . . . They are being demonized for environmental problems when the fact is farmers were the "first environmentalists".

Second, I feel that any cuts to the Food Stamp program at this time would hurt only those who are struggling the most. The elderly and the working poor who are already close to "making too much" to qualify will be the ones cut off, not the perpetual needy people who have made no effort to work despite ability to and have fostered a dependence on government aid.

COMMENT OF PATRICIA JORDAN

Date Submitted: Friday, May 18, 2012, 2:42 p.m.

City, State: Montgomery, AL

Occupation: Health Coach

Comment: The farm bill needs to be for Real Farmers growing Real food not large corporations growing Frankenfood and not for land owners like your family and my family to be subsidized simply for owning land. Those things are welfare for the rich and are **Wrong**. Subsidizing those entities is shameful and is costing our country vast amounts of money beyond the subsidies. The American people are wise to this abuse of tax money and want this to stop!

COMMENT OF STEPHANIE JORDAN

Date Submitted: Friday, May 18, 2012, 6:23 p.m.

City, State: Benicia, CA

Occupation: Chef, Caterer, Culinary Faculty

Comment: It's time for real reform. Please fund vital programs including organic and sustainable farming methods, nutrition, and conservation. Specifically, I urge you to do the following:

- Maintain the EQIP Organic Initiative
- Fully endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully fund conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- Implement all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

For 20+ years, my father was a Nebraska farmer of corn, soybeans, and at times, popcorn. At age 63, he died of Lymphoma, which was caused by farm chemicals. He always wanted to try and grow organically, but due to too many pesticides and herbicides in the ground—not to mention GMOs (thanks a lot, Monsanto), he never had the chance. There are safe, effective ways to grow produce, but it can only happen if organic farmers are supported. Now is the time to support these organic farmers. As a chef, I work with food and the people who eat it every day. I can tell you that consumers across the country are realizing the health benefits of eating chemical-free. The demand is there, so please get on board to pass an Organic Farm Bill.

I am also calling on stricter standards for food safety in this country. Unfortunately, it seems our government is reactive, and not proactive. It seems there always needs to be an outbreak with excessive illness and death before anyone pays attention to the disgusting and inhumane ways in which animals are raised, and the effects this type of farming has on the environment (i.e. runoff into water supplies, neighboring farms). Please implement stricter standards that keep corporate ag businesses in check.

Thank you.

COMMENT OF AARON JOSLIN

Date Submitted: Sunday, May 20, 2012, 6:23 p.m.

City, State: Athens, GA

Occupation: Graduate Student—Agroforestry

Comment: The farm bill is a great tool to establish priorities for agricultural practices in the U.S. Those priorities should include support for organic, family-owned and/or ecologically pro-active farmers. Priorities should not include support for practices that concentrate more acreage under the control of corporate farming interests. Please consider reducing or rejecting subsidies paid for crops reliant on GMO technologies and increasing support prices for farmers who create diverse ownership and genetic traits within their crops.

COMMENT OF HARRIET JOSLIN

Date Submitted: Saturday, May 19, 2012, 8:57 a.m.

City, State: Raleigh, NC

Occupation: Retired/Home Gardener

Comment: As a lifetime backyard gardener, I know the work it takes to grow fresh, wholesome vegetables. I value locally grown produce and try to support local farmers as much as possible. But I know the way of life as a small farmer who sells locally is disappearing because the odds are stacked against them. I am appalled at the crazy laws that support unsustainable, unhealthy, environmentally destruc-

tive agribusiness and can't figure out how in the world members of congress can continue to vote for those laws. Please take a closer look at how the laws supporting agribusiness is threatening the quality of all of our lives.

Thank you,

HARRIET JOSLIN.

Date Submitted: Sunday, May 20, 2012, 7:56 a.m.

City, State: Asheville, NC

Occupation: Retired

Comment: My health is compromised. I am celiac. I scrutinize everything I put in my mouth. I want to know how the food is raised and handled. This is to sustain my life. Now my grandson is celiac, the family has food sensitivities and allergies. We really **Watch** and **Select** with great care what we eat. It is important for you to protect our food sources for purity.

COMMENT OF CHERYL JOYCE

Date Submitted: Friday, May 18, 2012, 10:00 p.m.

City, State: Rainbow Lake, NY

Occupation: Professor of Chemistry

Comment: Please, please stop companies like Monsanto and Syngenta from dictating horrible farming practices that are unhealthy for the people and the soil.

COMMENT OF PAUL JOZEF

Date Submitted: Friday, May 18, 2012, 4:32 p.m.

City, State: Phoenix, AZ

Occupation: Mediator

Comment: Please support organic farming and local distribution, and withdraw all support for farming that uses toxic chemicals of any kind, and work to improve the quality of nutrition in public schools.

COMMENT OF LILIA JUDD

Date Submitted: Sunday, May 20, 2012, 1:28 p.m.

City, State: Temecula, CA

Occupation: Courier

Comment: The current farm bill is a major reason why obesity, diet-related disease and health care costs are skyrocketing. It's partly why food production is responsible for more than 1/2 of greenhouse gas emissions and farm run-off is fouling drinking water and creating dead-zones in the ocean.

I would like to press Congress to cut corporate welfare and enact agriculture reforms that would create jobs, clean up the environment, strengthen sustainable local food systems and make healthy food available to everyone.

COMMENT OF PANDORA JUDGE

Date Submitted: Monday, April 16, 2012, 11:38 a.m.

City, State: Haydenville, MA

Occupation: Educator

Comment: Dear Ag Committee,

It is my fervent hope that as you continue to craft the 2012 Farm Bill, that you are taking to heart the dire need for our policies around farming to reflect a deep concern for the health of our people and the environment, protecting the family farm and rural/agrarian landscape as well as some innovation regarding the localization of our food system.

It is well known that agricultural runoff and pollution from massive industrial farms is a considerable toxic environmental issues for our lands and in particular, our waterways, and that it costs us many billions of dollars per year in clean up. And that is just the economic cost, the true costs to our health and environment of industrial farm pollution is a complex web that is difficult to measure.

The iconic American farmer is no longer represented by the corporate mega farming practices that exist today. There is, however, a strong people-led movement to bring our farming culture back around to a local system that brings the healthiest, freshest food to a people who are plagued with health issues related to food and obesity. The local food movement also tends to support small farmers who take vastly

better care of their land than large ones, reduces our fossil fuel resource needs significantly, brings better wages to farmers and enhances our cultural heritage. It is a strong movement on its own but it needs the help of a farm bill that is innovative and interested in supporting and enhancing this powerful trend. Infrastructure such as food hubs to help re-localize our food systems are critical. Regulation that takes to task (instead of protecting) the large farms that destroy the environment and put our health at risk is paramount, along with creative and flexible regulation that works with small farms to ensure they can continue to produce great products in sustainable ways. Blanket regulations that are designed for industrial agriculture do not make sense with many small farms.

Please please take this momentous opportunity to work with the food movement that is powerfully taking hold with your constituents. This farm bill is a chance to put the people before the corporations. I realize 'Big Ag' and 'Big Chemical' companies have lots of money and powerful lobbies. However, here you have the opportunity to make real change for the right stakeholders—the regular people who care about their health, the environment and their communities, rather than huge corporations whose bottom line is the dollar.

Thank you,

PANDORA JUDGE.

COMMENT OF LYN JUDKINS

Date Submitted: Monday, May 07, 2012, 6:09 p.m.

City, State: Chesterton, IN

Occupation: Disabled

Comment: It is time to help our neighbors living next door instead of across the oceans. Take care of our own families and friends. Senior citizens have to choose between life saving meds or foods. And young families have to depend on not so healthy starchy foods to make ends meet. Let's get healthy and get heart.

LYN from Chesterton Indiana

COMMENT OF MAILYN JUHLIN

City, State: Virginia Beach, VA

Occupation: Career Counselor

Comment: For our health and for future generations, please protect our food supplies and our soil. Many of these new mass-production farming practices are resulting in declining health in our country and what other countries know from extensive research. Let's stop living in a knee-jerk, reactionary mode and be proactive in our health by protecting our valuable food sources by supporting organic!

COMMENT OF KATHRYN JULIA

Date Submitted: Friday, May 18, 2012, 1:48 p.m.

City, State: Honolulu, HI

Occupation: Massage Therapist and Doula

Comment: There is no greater truth than 'we are what we eat'. In the land of the free we need to be free to know what is in the food we eat and how it was produced.

If you change the DNA in the food we eat you change the DNA in the humans who eat it.

COMMENT OF COURTNEY JUNG

Date Submitted: Friday, May 18, 2012, 5:06 p.m.

City, State: Lakeside Park, KY

Comment: Natural resources such as: seeds, herbs, fruits, vegetables, spices, nuts, berries, water, honey, cattle, sheep, goats, cows, ox, buffalo, bison, ostrich, pigs, emu's, poultry, chicken, turkeys, geese, ducks, and so much more should be considered a private industry of and by the people of America (if not the world). It should never be taxed or regulated by a government body. The government or a majority of governing corporations should never have autonomy over natural resources that mankind absolutely needs to survive.

That is unless you're trying to control what nutrition we have the right to choose from in order to starve us or kill us via malnutrition; what other reasons are there for the rationing of natural resources like warlords?

COMMENT OF ROXANNE JUNGE

Date Submitted: Tuesday, March 27, 2012, 9:54 p.m.

City, State: Glenview, IL

Occupation: Farmers Market Manager & Teacher

Comment: Local and regional food systems help create jobs and spur economic growth in rural and urban communities. Please support investment in this growing sector by including the Local Farms, Food, and Jobs Act in the next farm bill.

The future of family farming and ranching in America depends upon ensuring that would-be new farmers have access to land, capital, and markets. Please support beginning farmers and ranchers by including Beginning Farmer and Rancher Opportunity Act in the next farm bill.

Farmers depend on quality, cutting-edge research to stay successful—please make sure the next farm bill invests in this crucial work.

Working lands conservation programs help farmers maintain productivity while protecting our air, water, and soil, protect these programs from unfair funding cuts!

COMMENT OF CAROL JURCZEWSKI

Date Submitted: Friday, May 18, 2012, 1:41 p.m.

City, State: Riverside, IL

Occupation: Homemaker

Comment: As a person that values the environment and healthy foods, please incorporate funding for organic farmers. More and more people are turning to organic foods rather than cheaply subsidized crops, such as corn and soy.

COMMENT OF CYNTHIA JUSTICE

Date Submitted: Friday, May 18, 2012, 7:12 p.m.

City, State: Asheville, NC

Occupation: Homemaker, Volunteer

Comment: We expect monies given in the farm bill to support small farms, not the Big Agriculture raking in billions. This has been so abused and scammed, it IS a scam even when legal, that it is working against the average farmer and trashing, sapping the land.

COMMENT OF WENDY KACZERSKI

Date Submitted: Thursday, May 17, 2012, 1:45 p.m.

City, State: Princeton, NJ

Occupation: Foundation Program Officer

Comment: We need a farm bill that makes healthy food widely available to all Americans—including schoolchildren. We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers. Why aren't we doing this already? Think healthier people, lower medical expenses, lower insurance rates, more farms, better farm wages.

COMMENT OF MO KAFKA

Date Submitted: Friday, May 18, 2012, 11:51 a.m.

City, State: New Brunswick, NJ

Occupation: Property Management

Comment: Support for fair farming, for nutrition programs and programs that protect the environment are essential. If we do not protect the quality of the air, water and Earth the entire nation will suffer. This is a priority, support organic farms, small farms and good nutrition and proper environmental stewardship.

COMMENT OF LUCY KAGAN

Date Submitted: Wednesday, May 16, 2012, 3:52 p.m.

City, State: Fayetteville, AR

Occupation: Nonprofit Program Coordinator for Nutrition Education

Comment: Cutting Nutrition programs is unacceptable. We are putting out nation at risk: obesity rates continue to climb and the health effects associated with bigger waist lines are in the billions. We **Need** nutrition programs—A \$36 million cut to SNAP is not the way to go. The Committee should focus on writing a farm bill that creates economic opportunity and improves access to healthy, affordable food for all Americans. Supporting big business is killing our economy and our right to life and liberty. When unhealthy food is cheap due to subsidized commercial

crops, our health suffers as a result. Fund vegetable production and allow SNAP participants access to fresh produce. It **Will** pay for itself in the not so distant future.

COMMENT OF KATHARINE KAGEL

Date Submitted: Sunday, April 15, 2012, 9:11 p.m.

City, State: Santa Fe, NM

Occupation: Restaurateur

Comment: YIKES! We need more Food for our hungry neighbors—we've been cut 37% in 1 year—and have lost 1.2 million meals as a result—Please “beef up” the food banks ASAP! This country has surplus food—what's more important than filling bellies?

Thanks for making this a priority! This is an emergency.

KATHARINE KAGEL.

COMMENT OF JESSICA KAISER

Date Submitted: Monday, May 14, 2012, 4:56 p.m.

City, State: Pasadena, CA

Occupation: Teacher

Comment: Everyone has the right to eat & grow healthy food from farms in this country. We need to support all farmers and individuals, who grow organic produce, so that they may do so freely without having to struggle and can rely on each other. Not terrible giants like Monsanto.

COMMENT OF NATASHA KAISER

Date Submitted: Tuesday, April 03, 2012, 9:37 a.m.

City, State: Farwell, MN

Occupation: Social Worker

Comment: Dear Representative/Senator Collins:

I work as a social worker and strongly urge you to support existing funding levels for the Supplemental Nutrition Assistance Program (SNAP) within the farm bill.

One in 9 Minnesota citizens struggles to put food on the table. In MN, at least a large percentage of the population is food insecure. SNAP is critical to maintaining good nutrition and health among our population.

Economic studies in Minnesota show that people who lack access to adequate nutrition are more often chronically ill; children don't fully develop physically and cognitively and are more prone to fail courses, repeat grades and drop out of school before graduation. The cost of hunger's impact—largely as uninsured medical care—is conservatively estimated at \$1.6 billion annually. Cutting SNAP or limiting access to it will increase charity care caseloads for the counties, which will be borne by local property taxes.

Last but not least, every dollar of SNAP purchases goes into the local economy and generates \$1.73 in economic activity. This is not a net expense; it is a net gain of 73% that supports jobs on Main Street. In a time of high unemployment, we cannot afford to add to the unemployed by reducing community economic assets of which SNAP is one.

As a constituent and as a public servant, I strongly oppose cuts to critical anti-hunger programs SNAP, TEFAP as well as the Commodity Supplemental Food Program (CSFP) for seniors and Women, Infants and Children (WIC)

For the sake of our neighbors who can't earn enough to get the food they need, it is important to maintain funding for programs that provide basic food assistance programs.

Sincerely,

NATASHA KAISER.

COMMENT OF SHAWN KAKUK

Date Submitted: Friday, May 18, 2012, 9:00 p.m.

City, State: St. Cloud, MN

Occupation: Education

Comment: As a citizen who does their best to live a sustainable lifestyle, I believe that it is imperative that producers of our nation's food, as well as the world's food, have the opportunity to not be absorbed by giant corporate farms. The family farmer, and the family farmer who has not been co-opted by big agribusiness, have the ability to stay in business and provide those of us who desire our food to come

to us closer to home and from a sustainable entity. Thank you for your time in considering my opinion.

COMMENT OF JEFF KALEY

Date Submitted: Sunday, May 20, 2012, 8:13 p.m.
City, State: Brooksville, ME
Occupation: Former Farmer and Govt. Agriculturalist (Retired)
Comment: Dear Mr. Michaud,

I am writing about the farm bill . . . I have worked as a farmer in Maine, and I was an agriculturalist for the Peace Corps for 4 years. I am concerned about the direction farming has gone in this country.

I would like to see organic farming encouraged. I would like to see smaller farms operating and not rely on the big Agri biz which like most big biz really seem to care primarily for their own profits and not the consumers their business is ideally serving. I also have serious concerns about our environment!

Basically in political lingo here is what I would like to see happen.

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thanks for your help in serving us constituents in Maine.

COMMENT OF ROSLYN KALIFOWICZ-WALETZKY

Size: Less than 50 acres

Comment: Take a look at what God says about food and stop allowing American ag business to pay off government to make things better for themselves.

COMMENT OF BARBARA KANN

Date Submitted: Friday, May 18, 2012, 12:20 p.m.

City, State: Nokomis, FL

Occupation: Music Teacher

Comment: Dear Representatives,

We as a nation are suffering the terrible health consequences including rapidly rising obesity, diabetes and heart disease that are directly linked to the over consumption of sweet and fatty foods that have been subsidized by farm bills in the past. Our medical system is a financial disaster because of the extreme medical costs of diseases like diabetes and cancer, which has killed many of my family members, and it will be impossible to control our national debt without reducing medical costs.

A healthy farm bill can help resolve all of these problems. Please phase out all agricultural subsidies while boosting support for farmer's markets, land conservation and organic farming which protects farm workers and consumers against dangerous pesticides and herbicides.

Our nation does not need to subsidize large farmers and food companies. We can all benefit from healthier not cheaper food.

Thank you!

COMMENT OF SHARON KANSAS

Date Submitted: Friday, May 18, 2012, 4:45 p.m.

City, State: Garden City, KS

Producer/Non-producer: Producer

Type: Fruits

Size: Less than 50 acres

Comment: I'm a gardener, but I have a doctorate in alternative medicine. Go to kdhe.org and see that Kansas has 1% higher rate of infant mortality than other states. We have the highest rates of atrazine in our water in the U.S. the U.S. has the highest infant mortality of the developed world.

That impact on the healthcare system helped to destroy our economy. We must go organic-use of cover crops and crop rotation keeps weeds down everywhere else. We can't afford to do this and it's unchristian also.

COMMENT OF PAUL KAPERICK

Date Submitted: Friday, May 18, 2012, 2:53 p.m.

City, State: Lakewood, WA

Occupation: Real Estate Broker

Comment: We need an agriculture bill that provides a sustainable model for agriculture. Our current system of poisoning the soil with chemical on huge mono crop farms will not feed this nation properly.

COMMENT OF ADAM KAPLAN

Date Submitted: Sunday, May 20, 2012, 4:22 p.m.

City, State: Laguna Beach, CA

Occupation: Piano Tuner

Comment: Diversity in nature and business is our safety net. Many small(er) farms are better than a few giant ones. Efficiency and quality are actually better in smaller farms (or any other endeavor). Don't let the "Big Boys" crowd out the little guys.

COMMENT OF ANNE KAPLAN

Date Submitted: Friday, May 18, 2012, 4:41 p.m.

City, State: Philadelphia, PA

Occupation: Retired

Comment: We need to stop supporting agribusiness, the corn industry and abusive cattle practices. We need to support growing healthy vegetables, and non-hormone/antibiotic chicken, pork and beef. Please support a healthy and productive farm bill.

COMMENT OF BARRY KAPLAN

Date Submitted: Friday, May 18, 2012, 11:35 a.m.

City, State: Madbury, NH

Occupation: Environmental Science Teacher

Comment: Please support farm and food policy that will give the public good, whole food that is produced in a sustainable manner. As the population becomes more overweight and obese year by year, we must reduce our use of corn-based sugars in our foods and beverages. And as our climate continues to warm, we must shift our consumption of foods to those that produce less carbon as a by-product. Thank you!

COMMENT OF CAITLIN KAPOOR

Comment: This country is in a crisis. The obese are getting heavier. Our children are eating Twinkies instead of carrots, and government subsidized crops are the foundation for every junk food on the market, which the lobbyists are fighting hard to keep. Things **Have** to change. We need fresh produce to be affordable and accessible. Deprived socioeconomic classes need to be educated and given ways to provide more nutritious food for their families. The cycle we are currently in will kill this nation.

COMMENT OF ALAN KAPULER, PH.D.

Comment: We cannot allow agriculture to poison us.

First we poison the bugs, then the fungi and animals and now ourselves with the genetically engineered foods that have become our major crops.

Support for organic agriculture by developing microbiological fertilizer regimes will improve our land, water and human health.

It is time for a change from supporting large mega corporations parasitizing our society to helping more people farm organically.

Is it a wonder that we have a set of epidemics *i.e.*, diabetes, obesity, chronic heart disease, Alzheimer's . . .

Too many monocultures, too many huge machines, not enough devoted farmers, not enough biodiversity.

It is time for a change for the good not the greed.

COMMENT OF SALLY KARABELNIKOFF

Date Submitted: Friday, May 18, 2012, 1:49 p.m.

City, State: Anchorage, AK

Occupation: Organic Grower

Comment: Our country is desperate to have organic food available for improving health. Every time I get my organic food done to eat I feel so much better. Working on health saves thousands of dollars against pills! The talk about expensive organic food is not correct when you count the cost of pills that can be eliminated . . .

COMMENT OF KLAUS KARBAUMER

Date Submitted: Saturday, May 19, 2012, 12:35 p.m.

City, State: Platte City, MO

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: The new farm bill has to make sure that small-scale organic producers are not out-competed by large scale industrialized farms, which generally are neither able to give as much attention to the needs of the plants and the soil as smaller producers do. Even more important is the social aspect of keeping people on and in the land with gainful occupation and not depending on the exploitation of cheap migrant labor.

COMMENT OF BROWN KAREN

City, State: Ridgefield, WA
Producer/Non-producer: Producer
Type: Vegetables
Size: Less than 50 acres
Comment: I'm 37, have been farming part-time for 7 years, finally bought my own property in 2011 and continue to make a go of fruit and vegetable farming in SW Washington. The demand is through the roof. If I had the money, I would increase 10-fold in production, hire full-time staff, and work full time myself. Instead, I'm my own loan officer with off-farm income keeping me afloat. I want you to know that I fully endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

Within a year of owning our farm, we applied and were awarded conservation funding. I believe congress should fully fund conservation programs, such as the Conservation Stewardship Program, and ensure enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

The past winter, I attended evening classes through my local extension office, to bolster my small business skills and learn about programs designed for beginning farmers. The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236) is key to ensuring the next generation of farmers can produce food made in the USA.

Based on advice from another beginning farmer, I applied for an EQIP grant originally under the organic standards. Since we had just purchased the property, we were still waiting on our Organic Certification but were still awarded a standard EQIP grant to construct efficiencies and conservation initiatives. Please maintain the EQIP Organic Initiative.

I understand you are faced with tough decisions every day. Please take a moment to consider that with little outreach from ourselves, our farm can not keep up with orders, neighbors knock on our door and ask when they can come visit and help, and with only 7 years under our belts, I now have interested younger folks contacting me to learn the ins and outs of local, organic fruit and vegetable production. Farms once served as hubs of the community, but socially and economically. My goal is to build such a hub, work tirelessly, and build a stronger local economy. Thank you for your time.

JASON.

COMMENT OF PATRICIA KARR-SEGAL

Date Submitted: Friday, May 18, 2012, 1:06 p.m.
City, State: Ithaca, NY
Occupation: Social Work
Comment: As a consumer and parent, I am increasingly concerned about the inequitable policies in the proposed farm bills that favor large farms and agribusiness. Supporting family farms and local food production has become a pivotal issue for me as I consider where my votes and dollars go.

SUBMITTED STATEMENT BY CORNELL KASBERGEN, VICE CHAIR, DAIRY COMMITTEE,
LAND O'LAKES BOARD; SECOND VICE CHAIRMAN, NATIONAL MILK PRODUCERS FED-
ERATION

Good morning, Congressmen Costa and Cardoza. Thanks for holding this field hearing today, and inviting me to testify. I am Cornell Kasbergen, a dairyman from Tulare, where I farm with my wife Teri, son Case and his wife Allison. I am a member of the Land O'Lakes Board, serving as vice chair of the Dairy Committee, and serve as the Second Vice Chairman on the National Milk Producers Federation board.

California's dairy sector faces serious challenges. I think you're aware of that, which is why we're all here today. Some of these are local or state issues which, for better or worse, are out of the jurisdiction of the U.S. Congress.

I'm not going to spend time on those issues, because while they're very important, that's not what we need your help with. What we *do need you to do* is enact a new farm bill, containing the provisions of the Dairy Security Act that Congressman Peterson of Minnesota first introduced last fall.

As I think you're aware, one element of the current safety net for dairy farmers is the price support program. It was created after World War II. The other element, the MILC payment program, was modeled after that Northeast Dairy Compact from the 1990s. These 20th century programs aren't doing us any good in the 21st century. Neither the price support program nor the MILC program provides any kind of safety net, because they're tied to the price of milk. They can't address the other key economic driver of our bottom line, which is feed costs.

Perhaps even more so than volatile milk prices, it is this volatility in feed costs that is determining whether we make money, or lose money, in a given year. By ending the price support and MILC programs, as well as the Dairy Export Incentive Program, we can shift those Federal resources to margin insurance. Such insurance will help protect against the type of disastrously low margins we experienced in 2009.

This new approach will be particularly valuable for dairy farmers in our state. It helps guard against surges in feed costs. It doesn't have production or volume limitations, which for larger farmers is a basic matter of fairness. We shouldn't have a significant part of our milk supply exposed, with no safety net coverage at all, which is the problem with the MILC program. Margin insurance will complement our existing ability to use the futures markets to help mitigate our price risk.

The best thing is, this is a voluntary program. Those who don't want this protection don't have to use it. Those who do, will help share in the cost, and they are subject to in the provisions of the Market Stabilization program. This to me is a reasonable and appropriate trade-off. There's no free lunch.

Some have argued that within this proposed program, we should not have a national feed cost calculation, but should make allowances for certain states . . . such as California. I have three reactions to that: first, even within California, the California Department of Food and Ag tracks are four different feed costs. Which of those should be used? Whichever you pick, you're leaving out the other three.

Second, let's be frank: it is not feed costs that are the issue, it is the way milk is priced in California. On average, our feed costs are a little higher than the national average, according to USDA, but our milk price in California averaged 10% less than the average of the top 23 dairy states between 2005 and 2010.

There have been preliminary discussion at our board to analyze if California should join the Federal Order. This would require the farm bill to contain a provision to allow California to join the Order with the current quota system intact. This provision was in the 1996 Farm Bill.

Third and most importantly, I would argue that once you go down the road of making exceptions, we'll lose the national consensus we have achieved so far. The Dairy Security Act was not created to change the competitive dynamic between states.

And we can't afford it. You know how Washington works. It's no different in the dairy business. Once the compromise unravels, we'll be back to square one. And that is unacceptable.

The NMPF effort has come to Congress for the first time in history with a majority of the dairy producer community supporting one bill. This process has involved compromise between large and small farmers and farmers from east to west and north to south.

In conclusion I would say this is your chance to make history and change dairy policy for the better. This is our once in a lifetime opportunity to make history, let's make it happen.

Thank you.

COMMENT OF STEFANI KASDIN

Date Submitted: Thursday, April 26, 2012, 12:25 p.m.

City, State: Cherry Hill, NJ

Occupation: Cashier

Comment: The farm bill needs to include laws for the production of sustainably produced and distributed produce, fruits and meats that affords fair food access for all regardless of income or location with a focus on reduction of chemical usage and promoting locally produced farm products and fair labor practices.

COMMENT OF STEPHEN KASEMAN

Date Submitted: Friday, May 18, 2012, 1:55 p.m.

City, State: Peachtree City, GA

Occupation: Jewelry Craftsman

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.
- Cutting subsidies to wasteful monocrop agribusiness using GMO crops.
- Maintaining USDA SNAP program to help hungry families meet dietary and nutritional needs to be healthy.

COMMENT OF KATHRYN KASSNER

Comment: As an elder who has grown up in rural MN, with home grown chemical free and diverse, delicious food, and as one who has experienced the beauty of growing it and **Knowing** it, it is sad and frightening to see what is happening in the name of "health" and "feeding the world". Profit and abuse of people and land prevail all around. Many of us are waking up to the damage we are doing to ourselves and the planet. Please hear the cry and needs of organic growers and eaters. In the end, it will be profitable all around. A win-win. Thank you.

COMMENT OF MATTHEW KATINSKY

Date Submitted: Friday, May 18, 2012, 1:39 p.m.

City, State: Fort Wayne, IN

Occupation: GIS Programmer

Comment: My daughter has a life-threatening tree-nut allergy, and asthma which is induced by several environmental allergies. Living in Indiana, we are constantly exposed to agricultural pollution from large-scale industrial practices that dump toxins into the air and water while squeezing family farms out of business.

I urge you to shift course. Consumers may want cheap food, but they want healthy food, and they want a clean safe place to raise their children. In constantly putting profit and yield first, our industrial agricultural system does not care how many pesticides, hormones, antibiotics, and other chemicals enter our bloodstreams. This is short-sighted, unsustainable, and morally indefensible.

I support full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286), fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs, the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), and maintaining the EQIP Organic Initiative.

COMMENT OF BARB KATZ

Comment: America is hungry. Please put the people in need back on the list of those we help. We are the richest country with the most selfish congress in history. Let's care for our people.

COMMENT OF PAULA KATZENMEYER

Date Submitted: Friday, April 06, 2012, 3:15 p.m.

City, State: Hutchinson, MN

Occupation: Teacher/Trainer

Comment: As a member of McLeod County's Emergency Food and Shelter Program board, I urge you to resist making any cuts to the Nutrition Programs.

As a constituent and as a public servant, I strongly oppose cuts to critical anti-hunger programs SNAP, TEFAP as well as the Commodity Supplemental Food Program (CSFP) for seniors and Women, Infants and Children (WIC)

For the sake of our neighbors who can't earn enough to get the food they need, it is important to maintain funding for programs that provide basic food assistance programs.

Our local food shelves are already struggling to keep enough food on their shelves to provide to those in need. Any cuts to the Nutrition Programs would have a significant impact on our local resources and the health and welfare of our community.

Sincerely,

PAULA KATZENMEYER.

COMMENT OF LUCY KAUFMAN

Date Submitted: Friday, May 18, 2012, 3:30 p.m.

City, State: Goldendale, WA

Occupation: Retired

Comment: The number of Americans seeking food sources free of pesticides, chemicals, and GMOs is growing daily. Those who care of their health and the health of their families look for organic foods every day. We need a Healthy farm bill and we need to get agribusinesses out of our lives.

COMMENT OF ANDREW KAVANAGH

Date Submitted: Friday, May 18, 2012, 1:28 p.m.

City, State: Los Angeles, CA

Comment: There must be reform to Genetically Modified foods! America should unite with the rest of the world & ban GMO's! Don't put profit over people's health.

COMMENT OF MAUREEN KAVANAGH

Date Submitted: Sunday, May 20, 2012, 12:50 a.m.

City, State: Woodside, NY

Occupation: Unemployed

Comment: We need a farm bill that gives help to the family farmer, not big farming corps like Monsanto, who want to shove GMO's down our throats . . .

COMMENT OF JUDITH KAWA

Date Submitted: Friday, May 18, 2012, 9:14 a.m.

City, State: Johnston, RI

Occupation: Chair of Johnston Municipal Land Trust

Comment: I urge you to support the Senate funding levels for Agricultural Land Easements which advance the proven model of leveraging Federal funds through local partners to secure perpetual conservation easements that help keep farm lands in production while conserving important natural resources. Our community is rich with farmland . . . a way of life that is becoming increasingly harder to maintain. Through Federal funding we will be able to work with our farm owners in preserving our natural resources while helping them to produce the food our community needs and deserves.

Restore the existing FRPP match formula to encourage bargain sales & allow waivers of the match requirement for strategic projects.

Restore language clarifying that the Federal government is not acquiring a real property interest and has only a "contingent right of enforcement" should the cooperating entity fail to enforce its easement.

As always, thank you for your continued support.

JUDY KAWA,

Chair,

Johnston Municipal Land Trust.

COMMENTS OF SHEILA KAYE

Date Submitted: Friday, May 11, 2012, 2:27 p.m.

City, State: Palm Harbor, FL

Occupation: Licensed Clinical Social Worker

Comment: I was raised in farm country; I am committed to having healthy foods, supporting organics, and educating about the ill effects of GMO and corporate farming & pesticides. Support our family farmers and respect for the Earth before we are completely compromised!

Date Submitted: Saturday, May 19, 2012, 12:11 p.m.

Comment: Please listen to citizens wanting organic foods, healthy eating to maintain our well being. The pesticides and processed foods are contributing to increased disease, diabetes, obesity, cancers. You are supposed to represent citizens, **Not Corporate Greed!**

COMMENT OF MEGHAN KEANE

Date Submitted: Friday, May 18, 2012, 12:21 p.m.

City, State: Brooklyn, NY

Occupation: Artist

Comment: My grandfather was a farmer for 50 years in south western Minnesota. I come from a culture and family of farmers as well as educated individuals who care about the future of the planet and its inhabitants. Thus, I support: the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). I support congressional funding of conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

I also support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). Last, I emphatically support both maintaining the EQIP Organic Initiative and cannot stress enough the need to have a universal standard for organic foods, including differentiating between GMO seeds *versus* organic seed sprayed with chemicals. We need to know where our seeds come from and how our food is subsequently grown in order to make informed decisions.

COMMENT OF LANDIS KEARNON

Date Submitted: Friday, May 18, 2012, 5:53 p.m.

City, State: Tucson, AZ

Occupation: Library Clerk, Writer

Comment: We must move firmly and as rapidly as possible in the direction of sustainable and organic farming practices. No more killing our land and water—and us—for big profits.

COMMENT OF EDIE KEASBEY

Date Submitted: Friday, May 18, 2012, 12:09 p.m.

City, State: Patterson, NY

Occupation: Retired Environmentalist

Comment: I grew up on a NY dairy farm. We took care of our animals, we took care of our soil. We worked with the weather. We rotated our crops, we did not drench our soils with poisons. Our animals were fertile, they ate healthy food, not recycled manure. Our crops did not need poisons in order to grow. That farm sustained farmers from before there was a New York State. Today's industrial farms will be useless within the next 50 years, worn out, and poisoned to death. It's time the USDA woke up.

Thank you,

EDIE KEASBEY.

COMMENT OF SUZANNE KEATING

Date Submitted: Tuesday, May 15, 2012, 11:07 a.m.

City, State: Woodstock, VT

Occupation: Consultant

Comment: The backbone of America is in the small farms and farming communities that helped build this country. The future of America lies in promoting and supporting the Organic Farmers in every community and state in this great country. The health and well-being of our children and this country depends on our governments' support of the small farmers who grow non-GMO crops to feed their communities.

COMMENT OF CAROL KEGERIZE

Date Submitted: Friday, May 18, 2012, 5:45 p.m.

City, State: Cherokee Village, AR

Occupation: Retired

Comment: I'm concerned and upset about the nutritional value of our food. Mega farm companies is not the answer. We need organic food to produce healthy people and animals. I resent having to take supplements in order to feel good and maintain the health level I'm at, which isn't the greatest because of the unhealthy additives in our food. I'm embarrassed to think our Congressional representatives want to reduce food stamps at a time when so many are hungry due to no jobs. Your goals must be rethought if you are to provide the leadership we require.

COMMENT OF LORI KEGLER

Date Submitted: Friday, May 11, 2012, 4:42 p.m.

City, State: San Pedro, CA

Occupation: Science Teacher

Comment: The farm bill needs to support small farmers, not the monolithic giants. Stop welfare funding farmers that are destroying the land with chemicals and GMOs, and support the farmers that practice conservation methodologies.

The Farm bill needs to stop subsidizing dairies, ranchers, and other factory farms, and subsidize those who raise animals humanely. Killing mustangs so they don't compete with beef cattle must be stopped. They are a vital part of our history and heritage.

COMMENT OF KAREN KELLER

Date Submitted: Friday, May 18, 2012, 8:40 p.m.

City, State: Del Mar, CA

Occupation: Physical Education Teacher

Comment: Stop subsidizing factory farms, corn, soy, and GMOs.

The use of pesticides, hormones and antibiotics in industrial agriculture should not be paid for by the taxpayers.

The American health crisis and obesity epidemic are results of the subsidies for foods which have made Americans sick and **Fat**. If there are any subsidies, they should only be for small, local, organic farmers to grow vegetables and fruits.

- Pesticides are responsible for the collapse of the bee colonies.
- Stop subsidizing corporations.
- No taxpayer money for corporations that use pesticides.

COMMENT OF DORINDA KELLEY

Date Submitted: Wednesday, May 16, 2012, 9:51 p.m.

City, State: Portland, OR

Occupation: Retired

Comment: I am a Senior who, because of disability and forced early retirement, live on \$850.00 a month and pay \$700 a month for rent and utilities. If it were not for the SNAP program, I would not be able to afford food. Please think of the poor while you are writing the farm bill.

COMMENT OF ERIN KELLEY

Date Submitted: Wednesday, May 02, 2012, 10:45 a.m.

City, State: San Antonio, TX

Occupation: Student

Comment: Given the results from the 2007 Census of Agriculture revealing that American farmers are becoming increasingly concentrated in the 55 years and older age bracket, programs to aid young and beginning farmers and ranchers must be made a priority in the current farm bill. In particular, microloan programs that specifically target young, beginning farmers are essential to ensure the future viability of agricultural production in the United States, as these programs have been proven to especially effective in aiding these new producers.

COMMENT OF JANE KELLOGG

Date Submitted: Friday, May 18, 2012, 5:43 p.m.

City, State: Ithaca, NY

Occupation: Retired

Comment: Please stop paying subsidies to large corporations and wealthy foreigners who do not even farm. The money is needed here at home to support small family farms and provide healthy food for us all.

COMMENT OF TRACEY KELLOGG

Date Submitted: Friday, May 18, 2012, 12:32 p.m.

City, State: Poulsbo, WA

Occupation: CPA, Finance Manager

Comment: I'm appalled that impact of big agriculture on the quality of our food and its impact on the environment. It is the small, local farmers that need the support, not mega corporations. Obesity is an epidemic in the U.S. and the public health issues are enormous. There is nothing about big agriculture that will help us with this problem.

COMMENT OF ANN KELLY

Date Submitted: Friday, May 18, 2012, 9:58 a.m.

City, State: Mount Laurel, NJ

Occupation: Retired

Comment: I want to know that my food and the food that my children and grandchildren are free from pesticide, chemicals, and are affordable. It is criminal that a bag of chips is less than a bunch of grapes. Big lot feeding and inhumane treatment of animals is unnecessary. Stop subsidizing big agriculture and allow for organic and more self sustaining farming. End direct payments and countercyclical commodity programs, and replace them with loophole-free agriculture risk coverage.

COMMENT OF C. KELLY

Date Submitted: Saturday, May 19, 2012, 4:16 p.m.

City, State: Elk Grove, CA

Occupation: Life Coach

Comment: Responsibility in the growing and producing of life sustainable food is incumbent on the representatives of this country. Moreover foods must be free of GMO's and any other chemicals, Preserving human lives and ending GMO war on un-suspecting people in this country is of priority.

As a constituent in your district this issue is significant and meaningful to all.

Sincerely,

C. KELLY.

COMMENT OF DANIEL KELLY

Date Submitted: Friday, May 18, 2012, 11:01 p.m.

City, State: Canton, MO
Producer/Non-producer: Producer
Type: Fruits
Size: Less than 50 acres

Comment: I am an organic farmer, not for the recent benefits (EQIP), but because of health and environmental concerns. I Started out as a volunteer at the NRCS (SCS) and I am greatly concerned about both water quality and keeping soil on the land, not downstream from poor land stewardship. Please, support an Organic Farm Bill. As a certified organic grower, all my decisions are documented with a great emphasis and care for quality nutrition and environmental rigor. I only wish all landowners would do the same. Most of them are not farmers, just landowners, with little connection to our once heritage, good land stewardship.

JOINT COMMENT OF JESSICA AND KASEY KELLY

Date Submitted: Friday, May 18, 2012, 1:22 p.m.
City, State: Faribault, MN
Occupation: Teacher
Comment: Dear Representative Kline,

As a mother and educator it scares me to know what goes into our food on a daily basis. Organic foods we know are safe, healthier and tastier than the alternative and with government support cheaper. The = toll mass produced agriculture has on water quality, soil quality, air quality and societal health is incredibly scary. I want this world to be a safe place for my students and children to grow up in. That is why I am asking you to seriously consider the farm bill and making it one what we can all live with for years to come.

Sincerely,

JESSICA KELLY.

COMMENT OF MARGARET KELLY

Date Submitted: Friday, May 18, 2012, 11:50 a.m.
City, State: St. Louis, MO
Producer/Non-producer: Producer
Type: Vegetables
Size: Less than 50 acres

Comment: I grow my own vegetables in my urban garden. These would be specialty crops and are expensive to buy if you can find them. They are chemical free and NOT subsidized, yet I still pay taxes to subsidize 'food' I am that I am unwilling to eat or feed my family. The farm bill is off the rails and destroying this country's health, economy and foreign relationships. **Do something! Please!**

COMMENT OF PATRICIA KELLY

Date Submitted: Friday, May 11, 2012, 10:17 a.m.
City, State: Tucson, CT
Occupation: Retired

Comment: Right now the need for assistance with food is greater than ever, and the idea of refusing to help the impoverished after we supported Wall Street is unthinkable. Congress is there to help the public defined as citizens, not corporate to retain their profits. **Do Your Jobs Or Get Off The Ballot, But People Are Suffering.**

COMMENT OF THOMAS KELLY

Date Submitted: Saturday, May 19, 2012, 12:59 p.m.
City, State: Flemington, NJ
Occupation: IT

Comment: I believe the future of farm policy must be directed towards adopting agricultural practices focusing on health and nutrition, along with the land itself, specifically it's ability to sustain and grow not just food, but nutritious food time and again.

Before I mention my own personal thoughts, I would like to lend support to several items already in play:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Specifically, I would also like to mention:

- Soil Quality & Soil Erosion.

Soil erosion is already a large and mostly unspoken issue, and what soil we do have to grow food with is severely lacking in its ability to produce nutrient dense food, and is increasingly becoming saturated with toxins. The current industrial practices of farming yield food less and less nutritious and yet more and more expensive to produce. Further, it is a major source of the toxins mentioned. Numerous instances have been seen and documented indicating devastating effects from the byproducts of industrial farming in the surrounding environment, as well as the wildlife populations in that environment. These toxins are carried in runoff water far from their originating sources and are building up to hazardous levels well beyond the initial bounds of the problem. Contrary to this, organic farming practices yield nutrient dense food, while enriching the soil and contributing to a healthy and self sustaining environment. Wildlife flourishes in this environment, and farming actually becomes less expensive as the continued practice of organic farming builds up the quality of the soil, requiring less resources to produce bountiful quantities. Current methods of complementary planting should also be introduced along with organic farming practices, as it has shown dramatically beneficial results in controlling pests—one of the big sources of toxins in current farming practices are pesticides.

- Sustainability, Health & Cost

While already mentioned above, I will mention again: organic farming practices lead to sustainable, long term solutions to the current rising cost of food and, therefore, the unsustainable practices in use today. Along with this, I want to introduce the concept of distributed farms as being far more resilient and cost effective than massive farms. In today's environment and changing weather patterns, keeping farming localized to only a few regions leads to massive price fluctuations, as well as shortages. Atypical weather and disease can devastate production. Distributed farms produce food across a wide and varied scope of weather, thereby making weather patterns and their changes and unpredictability less able to impact the total yield. Should disease, bad weather, or unforeseen catastrophe (such as an earthquake or flood) damage, halt or destroy food production in one location, the distributed nature of the overall food production would minimize the overall damage to the food supply as well as fluctuation in prices. Further, as noted in many studies now available, the worldwide spread of factory farming is increasing poverty and threatening health (for a reference among many possible: a report by Compassion in World Farming <http://www.organicconsumers.org/toxic/factoryfarm082902.cfm>).* Beyond the human considerations of factory farming, it is both clear and readily evident, it is both proven and alarming, that current methods of farming are contributing in a dangerous way to the general decline in our ability to deal with emerging threats to human health, they are contributing to the threats themselves, and they are contributing to the decline of the accepted level of health of the general population.

- Future & Economic Uncertainty

Last, I would like to touch upon what it means to have a thriving, distributed, organic farming practice as the primary method of food production in our country. It would practically do away with the need to subsidize the population in order to feed itself. It would ultimately employ a vast number of currently jobless citizens. It would also provide the us with the ability to feed ourselves regardless of what happens to The Dollar on the world stage. Once a certain point in production is reached, we can begin exporting a surplus: there will never be too much food for the world, and exporting high quality, organic items will ensure demand for our surplus the world over.

Thank you for taking time to read my comments, and I hope you consider them, and the importance of removing large corporate interests, control and profit from forming a smart and considered path to a future, healthy America.

*The information referred to is retained in Committee file.

SUBMITTED STATEMENT BY WILLIAM H. KELLY, VICE CHAIRMAN, JELLY BELLY CANDY COMPANY

The history of our company began in Belleville, IL in 1869, when my great-grandfather and his brother bought a small store-front candy business. After that time, several family candy businesses disappeared but the business that is today Jelly Belly Candy Co. moved to Chicago in 1903 and then to North Chicago in 1913, where we still make candy. Over the years we have fought along with others in our industry to change the antiquated sugar provisions of the farm bill. There have been years when we ran out of beet sugar in the fall. We have endured price spikes that stopped retailers from buying candy because they felt the public would not purchase the candies at ever-escalating prices. We have watched while other companies moved to foreign countries or went out of business because of the high price we pay for sugar. It is time to change this law.

The U.S. confectionery industry is still made up of hundreds of small- and mid-sized businesses in addition to well-known international brands. The industry's three largest manufacturing subsectors employed 48,653 workers in 2010, according to the U.S. Census Bureau's Economic Census & Annual Survey of Manufactures. Most confectioners are family-owned, often multi-generational businesses.

Sugar policy affects our company and other confectioners, but it also has an impact on a wide range of other food industries. Sugar is an ingredient in frozen vegetables, pasta sauce, peanut butter, canned fruit and many other products.

Our current sugar policy has clearly failed and needs to be scrapped. Congress should reform the outdated, cumbersome, counterproductive Federal sugar program immediately.

The sugar program does not usually involve direct Treasury outlays, but it certainly imposes significant costs on consumers and the food industry. Study after study has found that it raises consumer costs by billions of dollars each year. This means that the sugar program's costs are regressive, since lower-income Americans spend a much higher share of their income on food than do middle- and upper-class citizens.

A recent study by Iowa State University economists estimated that U.S. consumers could save up to \$3.5 billion a year, and our economy could add 20,000 jobs each year, if Congress reformed the sugar program. At a time when unemployment remains too high and economic growth remains too slow, Congress should take advantage of this opportunity to boost the economy and bolster employment by getting rid of a classic example of big-government intrusion into the private sector.

The sugar program exists in order to restrict sugar supplies and drive up prices. Every part of the program is designed with those goals in mind. There are price supports to put a floor under domestic market prices; there are import quotas to restrict competition from international sources; there is a truly outlandish program (thankfully never used, so far) to buy up surplus sugar and re-sell it to ethanol plants at a loss to taxpayers; and then there is a byzantine system of company-by-company sales quotas, established by U.S. Department of Agriculture bureaucrats, that make it illegal for sugar processors to sell more than their quota.

Yes, in the sugar program the Federal Government tells private companies how much sugar they are allowed to sell. There are hefty penalties for violating these "marketing allotments," which result in a kind of Congressionally-established cartel. If you think that doesn't sound like America, you're absolutely right—but it's the law of the land.

As a result of policies like these under the 2008 Farm Bill, retail sugar prices set a fiscal year record in 2011, at 66.7¢ per pound. That was 20¢ a pound higher than the average under the 2002 Farm Bill. So much for the sugar lobby's claims that consumers aren't harmed by the sugar subsidy.

Companies that have to buy sugar, of course, are also paying a price. FY 2011 also set a record for wholesale sugar prices—the prices that companies like ours pay. The 2011 wholesale price averaged 55.8¢ a pound, compared to an average of 28¢ under the 2002 Farm Bill. Today, spot prices remain above 50¢ per pound.

This wholesale price is more than double the government support price for refined beet sugar. And it remains far above the world price of refined sugar, which was recently about 29¢ per pound.

Unfortunately, our company has to compete with products made with this world-priced sugar. It's no surprise that imports have accounted for a growing share of the confectionery market, especially for hard candy that doesn't contain chocolate, and where sugar is therefore a higher percentage of the total value. In fact, attached to this statement is an official brochure circulated by the Canadian Government, urging candy companies to relocate to Canada because **"the average price of refined sugar is usually 30 to 40 percent lower in Canada than in the U.S."**

In today's economy, businesses like ours face enough challenges without our own government deliberately forcing up the price of its key ingredient. It has never been more obvious that the sugar program is a failed policy that hurts consumers, businesses and workers. Congress should get rid of this anachronistic monstrosity and make real reforms in 2012.

Sincerely,

A handwritten signature in cursive script that reads "William H. Kelly". The signature is written in dark ink on a light-colored background.

WILLIAM H. KELLY,
Vice Chairman,
Jelly Belly Candy Company.

CANADA'S AGRICULTURE, FOOD AND BEVERAGE INDUSTRY

CANADA

North America's Location of Choice for Confectionery Manufacturers

OH CANADA: HOW SWEET IT IS!

Canada's business environment is among the best in the world. Indeed, given its openness to foreign trade and capital investment, a superb infrastructure and ready access to American and Mexican markets, Canada is the location of choice for manufacturers of confectionery products wishing to supply North America.

The North American Free Trade Agreement (NAFTA) makes Canadian, American and Mexican markets a single trade entity. This provides Canadian-based businesses access to a market of more than 400 million consumers. U.S. markets can be supplied quickly and efficiently, as most Canadian manufacturing centres are less than 90 minutes from the border and 50 per cent of American consumers live within a one-day's drive.

In the last ten years, the value of Canadian exports of confectionery products to the U.S. has increased fourfold, and in 2004, Canada enjoyed a trade surplus of US\$700 million.

Moreover, the recent KPMG study, *The CEO's Guide to International Business Costs, G7-2004 Edition*, confirms that Canadian-based food processors, in general, enjoy significant cost advantages compared to their U.S.-based competitors.

Many of the world's largest confectionery firms have established operations in Canada. Many others have chosen to have their products co-packed in Canada, where agricultural inputs and packaging materials are readily available at competitive costs.

Firms seeking to invest in North America should consider Canada first.

Exports to the US in Confectionery Products

Source: Statistics Canada

Consider these HARD FACTS

SUGAR REFINERS IMPORT THE VAST MAJORITY OF THEIR RAW MATERIALS AT WORLD PRICES:

Canadian sugar users enjoy a significant advantage – the average price of refined sugar is usually 30 to 40 per cent lower in Canada than in the U.S. Most manufactured products containing sugar are freely traded in the NAFTA region.

SPECIALLY PRICED DAIRY INGREDIENTS:

Confectioners benefit from highly competitive dairy prices administered by the Canadian Dairy Commission (CDC) under five-year agreements with the sector. Details, including administrative requirements, can be found on the CDC Web site, referenced as "Class 5" under the Special Milk Class Permit Program. For more information, visit: www.edc-ccl.gc.ca.

SKILLED WORKERS AND COMPETITIVE LABOUR COSTS:

Canada possesses a highly skilled workforce known for its loyalty to employers. Canada's average labour costs are lower than in the U.S., which are attributed to Canada's lower salaries and wages combined with Canada's universal health coverage.* In addition, federal and provincial programs provide assistance for training and re-training of employees.

COMPETITIVE ENERGY, LAND AND BUILDING COSTS:

Canadian electricity and gas costs are lower than those in the U.S. and most of Western Europe. Canada's serviced industrial land and factory construction costs are lower than those in most of Western Europe and competitive with those of the U.S.*

LOWEST COST R&D:

Canada's RBD tax treatment is the most generous in the industrialized world.*

IMPORT FOR RE-EXPORT:

Confectioners manufacturing products exclusively destined for export markets may import duty-free ingredients used in the manufacturing process.

COMMENT OF MONICA KELLY WRIGHT

Date Submitted: Thursday, May 10, 2012, 1:37 p.m.

City, State: Hayden, ID

Occupation: Retired

Comment: Please pass a strong farm bill that protects programs like SNAP, TEFAP, and CSFP, which help provide food for millions of America's most vulnerable seniors.

In 2010, 7.9 percent of households with seniors (2.3 million households) were at risk.

Many households with seniors have had to choose between food and medical care or between food and paying for heat/utilities.

In 2009, nearly 9 million people over the age of 50 and nearly 4 million people over the age of 60 lived in at-risk households.

We must ensure hunger-relief programs remain protected so that seniors who have worked their entire lives continue to have access to these vital programs.

COMMENT OF VICKIE KEMPE

Date Submitted: Saturday, May 19, 2012, 1:27 a.m.

City, State: Phoenix, AZ

Occupation: Florist

Comment: The so called "science" behind anything other than Organic is killing us. The Toxic chemicals necessary to grow GMO's **Never Ever** goes away . . . And the bugs they are meant to kill are becoming immune so **More** and **Different** Chemicals must now be used. The scary part is we allow the Manufacturer of the chemical to run his own Safety Tests . . . ! Stupid.

COMMENT OF CHRISTY KENNEDY

Date Submitted: Saturday, May 19, 2012, 10:39 a.m.

City, State: Sedalia, CO

Occupation: Retired—formerly 20 years USDA/FNS in Child Nutrition Programs

Comment: Support our small farmers and ranchers who are true stewards of the land. Allow farmers to save heritage seeds w/o fear that the large seed growers will be able to sue because cross pollination may have occurred from a nearby field owned by another farmer that now renders the seeds a product of the large seed grower.

In the Child Nutrition Programs, update standards for good nutrition that are based on science—not by the special interest groups supporting factory farms/ranches that try to sway elected officials as laws are updated or written. I'm very troubled by how certain aspects of the meal patterns are developed.

Require food label writers to clearly state the ingredients for a food item, *i.e.*, GMO products used.

Allow for free and unfettered sale of raw milk and other dairy products! Why should I have to buy a part of an animal to enjoy buying the dairy products?

COMMENT OF RICHARD KENNEDY

Date Submitted: Friday, May 18, 2012, 2:52 p.m.

City, State: Normandy Park, WA

Occupation: Information Technology

Comment: My grandparents lived on a farm until they passed and they never needed or asked for 1¢ from the Federal government. To help balance the budget eliminate all farm entitlements.

COMMENT OF SAMUEL KENNEDY

Date Submitted: Friday, May 18, 2012, 11:12 a.m.

City, State: Hamilton, NJ

Comment: I would like to see a turn from the funding of large agro-giants who do not have the American public/environment in the best interest. To small farms who are transparent and have the best interest of our great country for years to come.

COMMENT OF TANGELA KENNEDY

Date Submitted: Friday, May 18, 2012, 4:42 p.m.

City, State: Hartford, CT

Comment: Because I am a diabetic and I need certain foods to eat. My SNAP benefits help me get the things I need like fruits, vegetables, juice with no sugar added. And without those certain foods it could cause my diabetes to be not so good. I wouldn't be in good shape at all. Thanks Congress.

COMMENT OF EVELYN KENNENWOOD

Date Submitted: Friday, May 18, 2012, 12:05 p.m.

City, State: Syracuse, NY

Occupation: Retired Teacher

Comment: It is so important that small independent farmers be encouraged. Large agri farms use methods that encourage mono cultures which are at high risk of failure without use of chemicals which are destroying our health and environment. Support methods that support diversity, independence, and health.

COMMENT OF LOIS KENNIS

Date Submitted: Friday, May 18, 2012, 1:07 p.m.

City, State: Rochester, MN

Occupation: Office Support, U of M Extension, Farm to School and Nutrition Programs

Comment: In order to address our country's obesity epidemic and provide access to healthy food for all, it is time to stop subsidizing large commodity crops. We need to invest in building local and regional food and agriculture systems that reduce dependence on oil and chemicals. Organic and smaller farms can feed our country. Citizens, farmers, suppliers and school nutritionists will need to be taught, but the results will be worth it. Stop the subsidies to commodity crops, and invest in building local food systems to stimulate our economy and provide quality whole foods that are less processed and more nutrient dense. Smaller farms and grass-fed animals will also reduce water pollution and stimulate tourism by cleaning up the countryside. The country will smell good again. Thank you.

COMMENT OF DIANE KENT

Date Submitted: Saturday, April 28, 2012, 7:20 p.m.

City, State: Phoenix, AZ

Occupation: Director, Payroll

Comment: Any Farm bill needs to be created to ensure that only organic and humane farming is the complete requirement. We need to establish egg, dairy, meat, fruit and vegetable farmers and producers who use 100% non chemical and free roaming practices. This is needed for a healthy food intake for our children.

COMMENT OF REBECCA KENT

Date Submitted: Friday, May 18, 2012, 8:22 p.m.

City, State: Florence, OR

Occupation: Unemployed Nutritionist/Chef

Comment: Please make the right decision for our entire society's future. Please don't give everything to those who need it least, give it to those who need it most and those who will benefit most from it (not necessarily in the bottom line, but in life!).

COMMENT OF ZACH KENT

Date Submitted: Friday, May 18, 2012, 10:50 a.m.

City, State: Jefferson, MA

Occupation: Student

Comment: Excessive use of petroleum-based pesticides, herbicides, and fertilizers that poison our water, deplete our soil, and damage our health; excessive capital inputs that drive farmers into debt and reduce rural employment; and a huge loss of biodiversity that threatens the future of agriculture itself—this is not the way to grow an effective, sustainable, healthy, and equitable food system. We need to change the way we do things TODAY, or explain our selfish weakness to our children when they are left to deal with the consequences.

COMMENT OF SUSAN KEPNER

Date Submitted: Friday, May 18, 2012, 7:20 p.m.

City, State: Hampton, NH

Occupation: Retired Cosmetologist

Comment: Any new bill **Must** provide protection and encouragement for organic farmers. Research \$\$\$ for organic plants and nonchemical pesticides should be continued, not cut out! Bees are dying and it is more than likely that chemicals used in farming are causing it! It also needs to help out new small farmers so that we don't end up with a lack of competition. Big Corporate Farms do **Not** need the huge subsidies! Fraud within the system must be prevented and insurance be monitored so that large corporate farms and insurance companies do **Not** get huge payouts at the expense of the taxpayer! Please have the courage to make **Real Reform!**

COMMENT OF VALERY KERAMATY

Date Submitted: Saturday, May 19, 2012, 11:39 p.m.

City, State: Katonah, NY

Occupation: Information Technology

Comment: Take care of U.S., the people that eat the food, not the corporate producers who are willing to risk our health for their profit. We need pesticide free, GMO free local produce. Get rid of the food deserts in our country and encourage small farmers.

Agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

I Support:

1. The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
2. Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
3. The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
4. Maintaining the EQIP Organic Initiative.

Thank you for working to protect everyone's health by conserving our farmland and protecting our supply of local organic produce.

COMMENT OF SUSAN KERR

Date Submitted: Friday, May 18, 2012, 1:20 p.m.

City, State: Pittsburgh, PA

Occupation: Social Worker

Comment: Please fully fund SNAP. I see everyday how many people do their part to support the private hunger safety net. Cutting this program will send people straight to over-exhausted programs. We cannot balance our budget on the backs of the most vulnerable—children, seniors, disabled Americans who somehow survive on \$1.40 per meal. It's immoral to ask them to bear this burden.

Government's responsibility to all should include basic safety net programs. Do not allow American to starve. Thank you.

COMMENT OF LUCAS KERSHAW

Date Submitted: Saturday, May 19, 2012, 7:17 a.m.

City, State: Bellevue, NE

Occupation: Composer

Comment: Organic farming needs more support. People are getting more and more sick today because of the crap that they are ingesting which has been genetically modified. The best way to lower health care costs is to promote healthy organic eating.

COMMENT OF MARGARET KERTESS

Date Submitted: Friday, May 18, 2012, 10:41 p.m.

City, State: Locust Grove, VA

Occupation: Retired

Comment: We need a farm bill which is a healthy food bill for all Americans. The bill should provide funding for all conservation programs and tie insurance subsidies to compliance with conservation. The bill should fully support local foods, farmers, and jobs, as well as beginning farmers and ranchers. The bill should pro-

vide full support for organic farming. The bill should not put money in the pockets of big commodity farmers or insurance companies.

COMMENT OF CHESTINA KIDD

Date Submitted: Friday, May 18, 2012, 8:05 p.m.
City, State: Louisville, TN
Occupation: Unemployed
Comment: I am a disabled veteran and I would appreciate it if you would not cut funding. I receive disability and yet I do not qualify but many are worse off than me. Please keep the funding.

COMMENT OF SUSAN KIERSTEAD

Date Submitted: Friday, May 18, 2012, 5:09 p.m.
City, State: Amherst, NH
Occupation: Horticulturist
Comment: Agrifarming is harmful to the environment and we all lose in more ways than one. Please do all you can to encourage sustainable farming, and quit the free giveaway of taxpayer money to huge farms.

COMMENT OF CHIP KIGER

Date Submitted: Friday, May 18, 2012, 10:47 a.m.
City, State: Eugene, OR
Occupation: Retired Teacher
Comment: Recommendations:

1. Require labeling of all GMO foods
2. Ban the use of neonicotinoid pesticides pending thorough field testing of these products conducted by research teams not affiliated with the pesticide industry
3. Provide tax credits to farms where at least 3% of cultivatable land is devoted to pollinator friendly plant diversity zones where a wide array of different flowering plants provide nectar and pollen for insects.

COMMENT OF KIM KILCHENSTEIN

Date Submitted: Friday, May 18, 2012, 2:45 p.m.
City, State: Cambridge, MA
Occupation: Healthcare
Comment: It is time to stop funding the poisoning of our Earth, air, and water. It is **Past Time** to stop funding insanely cruel and inhumane factory farms, which torture animals throughout their lifetime.
 Use funds from American taxpayers to support **Organic** farmers and farming, **Non-GMO** crops, and **Free Range** animal farms. I do not want a penny of my money to be funneled into Monsanto corporation's agricultural "solutions", which solve no problems, just create worse ones: such as poisoning our land, air, water wildlife, and destroying our health—and creating disease and mutations in our shared ecology.

I also do not want a penny of my money funneled toward factory farms—this is a despicable industry, which tortures conscious living/feeling animals for profit. Our nation has no honor left as long as it supports this industry, or even allows it to exist.

There is no more fooling the American public. We see your priorities, your ethics, and your integrity by the choices you make—and we are watching to see how well you represent our deepest values of decency and humanity.

COMMENT OF PATRICK KILEY

Date Submitted: Friday, May 18, 2012, 12:16 p.m.
City, State: Ridgewood, NY
Producer/Non-producer: Producer
Type: Vegetables
Size: Less than 50 acres
Comment: Hi—I grow food in New York State. Please protect land and fund programs to support young farmers working in sustainable agriculture, particularly small and medium size producers in their first 10 years. I have found these new professionals are the backbone of the small towns in NY State and offer the promise

of food security into the future that does not need to be subsidized at the same vast amount that currently goes to wasteful corporate agriculture. Thank you.

COMMENT OF MAGGIE KILLEEN

Date Submitted: Friday, May 18, 2012, 9:58 a.m.
City, State: Prescott, WI
Occupation: Teacher, Mother, Wife
Comment: Please do not allow GMO, pesticides, and such without notification to me, the consumer. I do not want to eat artificial food that has been changed from its original form.

COMMENT OF DEBORAH KILLINGER

Date Submitted: Friday, May 18, 2012, 11:19 p.m.
City, State: Filer, ID
Occupation: Inspector
Comment: As a concerned citizen, we need to keep laws in The baby needs to get tested against Tim's DNA place to assure good health for everyone. We do not need spending cuts on organic foods and other healthy foods.

COMMENT OF CAROL KILLINGSWORTH

Date Submitted: Friday, May 18, 2012, 1:42 p.m.
City, State: Fall City, WA
Occupation: Audiologist
Comment: It's time to subsidize healthy foods for our populace rather than the damaging foods that are turned into processed "junk". If we want a non-political answer to our health care crisis, then make fruits and vegetables affordable and readily available. A revised farm bill would be the foundation of the beginning to reducing obesity and expensive, chronic health problems in our nation. This is so simple—we just need legislative courage.

SUBMITTED STATEMENT BY MICHAEL KILPATRICK, KILPATRICK FAMILY FARM, MIDDLE GRANVILLE, NY

Members of the House Agriculture Committee, thank you for the opportunity to submit testimony for the 2012 Agriculture Bill. I am twenty-four and a first generation farmer. I've wanted to farm since I was 6 years old. My family has pictures of me standing in my first garden, grinning from ear to ear, holding the first cucumber of the season. I started farming commercially with my brother when I was fourteen, raising a variety of domesticated fowl, hatching the eggs, and selling the young. When I was sixteen, we realized that vegetable production was more profitable and sold the hatchery business. As the vegetable farm grew, we rented more land, put up more greenhouses, and hired more employees.

Now, in our eighth year of commercial production, we have expanded to selling retail at three large farmers' markets (2 year-round), have a retail CSA (Community Supported Agriculture) supplying almost 300 families, and sell a limited amount of produce wholesale. We have 1/3 of an acre of covered (greenhouse and hoophouse) production, raise twelve acres of vegetables, and manage over sixty other acres in a mixture of pasture and woodlot for our laying flock, pastured poultry, and pork. The farm grosses well over \$300,000 per year, hires six full-time and twelve part-time employees, helps support six different families, and has helped put five employees through college. This is a testimony to the viability and profitability of small, organic farms. The farm has become internationally known as a leader in year-round vegetable production and high-tunnel innovation, allowing me to travel across the country and into Canada to speak about the way we farm.

Our business, as well as the organic market, is growing rapidly, with double digit growth every year. We get requests on an almost weekly basis to begin a relationship with another farmer's market, local school, wholesaler, restaurant, or food coop. We have hit our limit in land, infrastructure, and what we can manage as a small, family-run operation. We get an average of ten job inquiries for every open position on the farm. I get twice as many speaking requests as I can reasonably fill. People are hungry for clean, safe, locally produced food and will spend more money and more time to find and purchase it.

What challenges do we face and what keeps us up at night? What should the next farm bill focus on to bring about real, effective change and make farms affordable once again?

Regulation: From the FDA to the EPA to the DEC to the USDA, we are constantly trying to keep up with the latest codes, rules, and laws. From worrying about how much irrigation water we are using and where we're pumping it from, to the latest poultry processing regulations, to the new Food Safety Modernization Act, the regulations that U.S. farmers are subjected to has reached a critical level. The fact that the government feels that it must regulate direct producer-consumer sales is wrong. Many consumers now take the time to research where their food is coming from, how it is grown, and can establish a relationship with their farmer. They should have every right to purchase what they feel is in the best interest of their family's health and wellness.

Farmer Education: When we got started in farming, we received help from many sources. Two in particular stand out: SARE (Sustainable Agriculture Research and Education) and our local extension agents. Both were key to getting us off to a good start. When we're researching a new cover crop, looking for a new way to grow a vegetable, or just need some data, SARE has been the place to go. Even now, we research their database whenever we face a new or challenging problem. Our local extension agents have been an amazing resource to help us with personalized information and ideas. They were with us through the late blight of 2009 and the flooding of 2011, bringing seasoned, experienced advice to help us make the tough decisions about our crops. Over the last couple of years, both of these programs have had funding cuts which has decreased the availability of information and field agents. As organic agriculture changes, and as localized, year-round vegetable production becomes more prevalent, there are many questions that need good answers and many ideas that we would love to research. We just lack the time and resources to do it.

Farmland Preservation: Part of America's greatness is in its amazing soil. It fueled the Westward Expansion, and even now its products are a major part of our exports and competitive edge. Good farmland is not cheap and it is being gobbled up by development companies at an alarming rate—over 1,200,000 acres in 2011 alone. That is 1,200,000 acres that will probably never be farmed again, that is forever lost to urban sprawl, shopping centers, or factories. While these need to be built too, there is plenty of space that is not on prime agricultural soils. As a young farmer who rents ninety percent of the land we farm, we personally feel the lack of good land available to us. Currently, we rent parts of four different farms, with leases ranging from a handshake to a 3 year signed lease. None of these relationships are sustainable, and until the prices of good agricultural land drop to a reasonable level through the help of conservation easements, we will still be laying awake at night, worrying about losing the land we have worked so hard to make productive.

So what can you, our elected officials in Washington, do to make me a better farmer and help me feed our part of this great nation? How can you work to make the honorable profession of farming an easier field to enter and farmland more accessible to those who love the land and wish to steward it?

Food safety should be testing based, not infrastructure based. Requiring a certain type of infrastructure and having a "one-size-fits-all approach" creates prejudicial hardship on smaller operations and stymies new farmers and producers. Saying that we have to have a million dollar processing plant before we sell 1 pound of beef to our neighbor is a huge impediment to food safety, sustainability and profitability. Why would safety be a part of this statement? When you have 1,000 cows being processed at a plant each day, the probability of cross-contamination is much higher than if you have ten. The reach of a foodborne illness outbreak for a local farm *versus* a nationally-based conglomerate is much less.

The government should pay for all testing to remove the financial burden on small farms. Testing must recognize the difference between pathogenic and non-pathogenic strains of contaminants. There is a difference in strains of *E. coli*. Some are normally found in your gut; some will kill you. Condemning product because it has *E. coli* in it without testing for the specific strain is not only wasteful but wrong. If (and only if) pathogenic contaminants are detected, infrastructure should be required, but only the amount necessary to correct the problem.

Unregulated direct producer to consumer relationships should be allowed. When you put the human aspect of a food transaction back into the equation instead of food being just another PLU or feeling that your product is just another cog in the food machine, growing food for your customers becomes almost a sacred trust. Remember, it's the spinach fields producing truckloads of spinach a day, the melon farms producing hundreds of thousands of melons a week, and the beef plants processing thousands of animals a day that are the cause of major illness outbreaks, not the small family farms selling locally to neighbors and friends. When you bring

transparency and an open door policy back into the food transaction, everyone benefits.

Crop production and experimentation should be encouraged through research grants, extension, and land-grant universities, not government subsidies. All government subsidies should be ended. If a crop needs price support to be profitable, maybe we are growing too much of it, or need to rethink how we are growing it. Subsidies encourage waste, gaming the system, and poor farming practices. In 2009 alone, our country spent \$6,100,000,000 alone on direct payments, an outdated and fantastic system that pays a farmer, even if no crop is produced. On a side note, EPA ethanol mandates should be ended. It reduces the efficiency of engines, harms carburetors, and drives up the price of corn to unrealistic and reckless highs. It is a wasteful use of farm land and an energy neutral process. In the last 2 years, we have had to replace carburetors and rebuild engines on three machines on the farm. When we inquire the cause, it's always linked to the ethanol.

More money needs to be spent funding SARE, Cooperative Extension services, and general education. The Local Farms, Food, and Jobs Act (H.R. 3286) should be fully funded. It has the power to change how the local food system works through education, grants, and research. On another note, land-grant universities should not be able to accept funding from companies that have a vested interest in the outcome of the the study, i.e., pesticide and fertilizer manufacturers. The revolving door between agricultural manufacturing companies and the U.S. Government needs to be stopped. This would apply, for example, to Michael Taylor (previously employer by Monsanto and now Obama food czar).

Protecting our farmland is also vitally important. The Farm and Ranch Lands Protection Program (FRPP) administered by the United States Department of Agriculture has been a significant partner in this effort. The main goal of this program should be to protect at risk, working farmland for active agricultural production. Program funds should only be used for permanent agricultural conservation easements. Since the 1970's, almost 800,000 acres have been conserved. Unfortunately, however, far more than this is lost every year to development. It's a sad day when the cows are sold, the barns are torn down, the fields bulldozed, and concrete and house numbers take the place of corn and green pasture.

Farming is not just another career for us. It's in our blood, our way of life, and a lifelong passion. We want to grow old on our farms and see them passed on to our children and grandchildren. We want the government to support us through less regulation, less intervention, and with the tools and research to keep us competitive and on the land. We want to see our land conserved and not bulldozed for the sake of McMansions and Wal-Mart. Let's work together to make this happen.

Thank you for your time and the opportunity to testify. My contact information is below,* feel free to reach me if you have any questions.

MICHAEL KILPATRICK,
Middle Granville, NY.

COMMENT OF JULIE KIM

Date Submitted: Friday, May 18, 2012, 2:57 p.m.

City, State: Seattle, WA

Occupation: Illustrator

Comment: We need to support small farmers and organic farming industry by not allowing Monsanto and the like compromise these people's livelihood and the future of our food industry. It isn't in the best interest of this nation to only allow big farmers and agricultural industries to survive. It is wise to diversify.

COMMENT OF CLARK KIMBALL

Date Submitted: Friday, May 18, 2012, 11:58 a.m.

City, State: Asheville, NC

Occupation: Real Estate Broker

Comment: Heath,

You of all representatives should understand that the small and family farm is important for so many reasons and that anything which adversely affects the farm affects the people and therefore the nation. Thanks!

* **Editor's note:** the referenced information has been **Redacted**.

COMMENT OF MARLENE KIMBALL

Date Submitted: Wednesday, May 09, 2012, 7:50 p.m.

City, State: Brevard, NC

Occupation: Retired

Comment: I am dependent on TEFAP and SNAP & barely make it with my \$92 monthly allotment from SNAP. As you are aware, food prices have skyrocketed and I do try to eat healthy foods. I'm frugal and cook my meals at home yet I'm very challenged while trying to eat clean. Please do not make any more cuts to these programs as the health and welfare of a large majority of senior citizens and children depend on them.

COMMENT OF KIM KIMBLE

Date Submitted: Friday, May 18, 2012, 12:12 p.m.

City, State: New Paltz, NY

Comment: Please support the small local organic farmer on my street who provides healthy for, supports his family, and cares for the land for future generations.

COMMENT OF RAENA KIM-GEYER

Date Submitted: Friday, May 18, 2012, 1:43 p.m.

City, State: El Paso, TX

Occupation: Stay-at-Home Mom

Comment: Please Do **Not** take away funding—for organic foods. This is all we have to keep our families healthy and keep away from GMOs. I am very aware of the dangers of these GE foods. I wish GMOs would be eliminated from our fragile food supply. We desperately **Need** organic farmers for the health of this once great nation and be an example to other nations that organic and sustainable farming practices are of the utmost importance to the human race.

“The breakfast slimes, angel food cake, doughnuts, and coffee, white bread and gravy cannot build an enduring nation.”—Martin H. Fischer.

Thank you,

RAENA KIM-GEYER,

Mother of two of our future citizens.

COMMENT OF SARAH KIMMES

Date Submitted: Friday, May 18, 2012, 1:40 p.m.

City, State: Coon Rapids, MN

Occupation: Disabled

Comment: I have tried to live a healthy lifestyle and find it unbelievable that a good, firm farm bill has not been passed to support small farmers and organic foods. How can I have healthy choices, if healthy farms are unsupported. I don't want better insurance against “illness care”, I want better practices that promote “well care”. Save us **All** a \$\$\$\$ or two, if the bottom line is all you are concerned with. Wise up, will ya? The suffering has **Got** to end!

SARAH.

COMMENT OF REBECCA KIMSEY

Date Submitted: Friday, May 18, 2012, 1:27 p.m.

City, State: Sublimity, OR

Occupation: Retired

Comment: There's too much big business in agriculture these days and not enough stewardship of the land and animals that we depend on for life itself. Big Ag has become a dictator and as such abuses the land, the animals, even the farmers. And we who rely on our representatives to ensure that the right thing is done, find too often that Big Ag controls you. Start doing the right thing for America, and for Oregon. Let's get a farm bill that does right by the land, the animals, the farmers, and the general public.

COMMENT OF ELISA KING

Date Submitted: Friday, May 18, 2012, 9:57 a.m.

City, State: Wilmington, DE

Occupation: Student of Agriculture and Natural Resources

Comment: It is time that this country start planning for the future. The youngest generation will be the first in history to not live as long as their parents due to obesity. We need to support local and organic farming efforts to reinstall a connection between people and food. As long as big agribusiness has all the control, the health of our people is not of concern. Subsidies for industrial farming are not helping the current health and economic crises. The farm bill should have a focus on what is best for the nation, not what is best for corporations. There are true costs not shown in the price of cheap food that are surfacing and its not pretty.

COMMENT OF GAYLE KING

Date Submitted: Friday, May 18, 2012, 2:03 p.m.

City, State: McAllen, TX

Occupation: Broker

Comment: Its time for the people to have a say in what we eat, we are becoming an obese nation, we should support measures that encourage a healthy food supply.

COMMENT OF JEAN KING

Date Submitted: Friday, May 18, 2012, 8:39 p.m.

City, State: Livermore, CA

Occupation: Retired

Comment: Please support the Senate funding levels for Agricultural Land Easements, which advance the proven model of leveraging Federal funds through local partners to secure perpetual conservation easements that help keep farm and ranch lands in production, while conserving important natural resources.

As a director of a local agricultural land trust, I know it is important to keep ag land in production.

COMMENT OF MELANIE KING

Date Submitted: Friday, May 18, 2012, 1:59 p.m.

City, State: Boise, ID

Occupation: Paralegal

Comment: I am very concerned about the quality of the food that is currently being provided to not only myself, but to our nation's children. Also, no child should have to go hungry and while food stamps are a subject nobody wants to talk about, other than ending them, they are necessary for the well being of many, the most important of whom are children who cannot otherwise fend for themselves.

COMMENT OF RICHARD KING

Date Submitted: Thursday, May 03, 2012, 4:00 p.m.

City, State: Monroe, LA

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: Making the changes proposed by the House of Representatives would have tragic consequences for millions of the most vulnerable citizens of our nation. It is almost beyond my comprehension that this could even be considered much less enacted.

COMMENT OF WES KING

Date Submitted: Monday, March 19, 2012, 5:28 p.m.

City, State: Springfield, IL

Occupation: Nonprofit Sector

Comment: Please use the farm bill to create a new and bold path for the country's food and farm system. Support the re-localization or America's food supply. Peak oil is a real issue that threatens the long term security of this country, especially our food security, we need to plan for a future that will include less fossil fuels and less financial resources by investing now in new system of food and farming not simply maintaining the energy intensive industrial model that currently dominates the food and farm systems. Support local food, beginning farmers, and conservation now!

COMMENT OF RASHA KINNAMAN

Date Submitted: Friday, May 18, 2012, 10:51 a.m.

City, State: Elma, WA
Occupation: Homemaker

Comment: This madness has got to stop now. I am a stay-at-home wife and mother to 2 children. I am a Conservative, reasonable, level-minded person and even I know that there are serious issues with the food that we produce in this country. It IS a large reason why we have an obesity epidemic in this country. We're killing people with the food, then turning around and killing them some more with the meds. The greed and stupidity have to stop. This is ridiculous and this is NOT the example that I wish to set out for my children. No thank you. PLEASE change this.

COMMENT OF YANNICK KINNIE

Date Submitted: Friday, May 11, 2012, 6:41 p.m.

City, State: Orlando, FL
Occupation: Entrepreneur

Comment: Support small farms, take away subsidies to large agribusinesses, quit undermining organics, get rid of Genetically Engineered seeds engineered to enslave farmers to Monsanto and pesticides and poison our food supply and water supply.

COMMENT OF CHRISTINE KINTNER

Date Submitted: Friday, May 18, 2012, 1:59 p.m.

City, State: Chicago, IL
Occupation: Homemaker

Comment: Please support and continue funding organic farming and the small farmer. Please do not cut funding for organic farming and the beginner farmer. In this era we need to embrace the organic industry and the place in the market they deserve. If nothing else, we as consumers deserve a choice of what foods to bring to our table. Thank you for your attention.

COMMENT OF PAULA KINZIGER

Date Submitted: Saturday, May 19, 2012, 7:36 a.m.

City, State: Lake Wylie, SC
Occupation: Homemaker

Comment: Please stop with all the farm subsidies . . . including ethanol . . . let the free market decide what's best. Stop letting the Federal government take over our farms as well and stop paying farmers not to farm. Get out of the farming business altogether because government ruins just about everything it touches. Get the environmentalists out of farming too. They're destroying this great country.

COMMENT OF SUTTON KIPLINGER

Date Submitted: Friday, May 18, 2012, 8:20 p.m.

City, State: Cambridge, MA
Producer/Non-producer: Producer
Type: Vegetables
Size: Less than 50 acres

Comment: Dear Rep. Capuano:

I spent my early career working in public health in Boston before transitioning to farming 2 years ago. I had seen enough of the havoc our food system wreaks on the health of Americans to believe that the only truly preventative work I could do on the myriad health crises that are bankrupting us and taking years off our lives was further upstream even than the public health profession itself.

Americans are beginning to understand what food means for their health and their communities, and they want better. It is my sincere hope that our national policy can reflect and bolster these trends, rather than continuing to subsidize the production of crops that don't nourish us by corporations that systematically destroy the small farm economy.

Thank you so much for your work on this issue.

SUTTON.

COMMENT OF JAMES KIPP

Date Submitted: Saturday, May 19, 2012, 7:31 a.m.

City, State: Wilmington, DE
Occupation: Systems Engineer

Comment: Please do not stop funding for vital programs such as nutrition, conservation and support for organic and sustainable agriculture. We need to improve the health of Americans.

COMMENT OF JUSTIN KIRITSIS

Date Submitted: Sunday, May 20, 2012, 5:52 p.m.

City, State: St. Clair Shores, MI

Occupation: Sales Associate

Comment: I am a concerned citizen of a suburb of Detroit, Michigan. I am concerned that Michigan and the country as a whole has not fully addressed a food policy from a holistic point of view. I fear that the small farmers are getting squeezed out, there are a record low number of minority owned farms, and not nearly enough non-GMO farms and Co-ops. I also believe that the USDA and FDA need to have a stronger consumer mindset, and allow for certain things like raw milk for local farmers. While not allowing for others like GMO products rated for dog food getting sent overseas as food aid. Please allow for schools to have more flexibility of the menus, listen to the First Lady and Jamie Oliver. I hope that these concerns are addressed. Thank you.

COMMENT OF ALEXANDRA KIRKILIS

Date Submitted: Friday, May 18, 2012, 3:35 p.m.

City, State: Austin, TX

Occupation: Technical Editor

Comment: **Stop** subsidizing GMO-commodity crops. **Start** subsidizing small, organic local farms! Processed junk should not be cheaper than real food! Conventional agriculture is by definition unsustainable. We **Must** move to a sustainable, organic food system, and we can't wait any longer. Demand humane treatment of food animals. **Label** GMOs, then **Ban** them! They're slowly destroying our ecosystem and we have **Not** done any testing on them to determine if they're safe for consumption!

COMMENT OF MARK KIRKPATRICK

Date Submitted: Thursday, May 17, 2012, 1:28 p.m.

City, State: Amarillo, TX

Producer/Non-producer: Producer

Type: Field Crops

Size: 500-999 acres

Comment: I am concerned about the crop subsidy check being eliminated completely. I understand producers taking a cut, but if the producer is to take a cut, I think food stamps and other entitlements should take their share of the cuts also. After all, without the farmer there would be no food. He should have a secure safety net for the amount of risk he takes.

COMMENT OF LILY KIRSANOW

Date Submitted: Friday, May 18, 2012, 2:38 p.m.

City, State: Austin, TX

Occupation: Retired

Comment: We need conservation and support for organic and sustainable agriculture, but corporate agribusiness has a stranglehold on our regulatory system and our political leaders.

Get rid of Genetically Engineered consumables that masquerade as real food. We, consumers and producers, will and currently are suffering the ravages of that horrible science. Oh, I'm sorry . . . it's about the money. My mistake.

Also, limit chemical additives to soil and plants. They are only creating weeds that are adapting, needing stronger chemicals. It can be done. Once again . . . it's about Monsanto, Dow and others like them to sell their poison.

By not doing anything and folding to their influence (money) you are NOT representing the people.

COMMENT OF ALISON KIRSCH

Date Submitted: Thursday, May 03, 2012, 3:19 p.m.

City, State: Fairfield, CT

Occupation: Student

Comment: When working on the farm bill, I urge the members of the Agricultural Committee to keep in mind the needs of the variety of individual American consumers and producers that the farm bill effects, rather than solely the priorities of large industrial corporations. First, I believe that agricultural workers should enjoy the same rights as other workers, such as minimum wage and protection from harmful and exploitive working conditions. Additionally, I think that farm-to-school programs, including those that bring healthy local produce to school cafeterias, should be a high priority of the 2012 Farm Bill. This will have a myriad of immediate and long term effects, such as increasing the health of schoolchildren, stimulating regional food production, and increasing awareness of nutritional and agricultural concerns in students. In enhancing these programs, the farm bill could also increase the amount of grant money available for schools to implement gardens and garden-based learning curricula. School gardens have been proven to improve health and wellness of students, increase learning achievements, enhance life skills, encourage interest in agriculture, and foster cultural appreciation. Students are the future leaders of our society, which is why it is so important to instill eco-literacy in them at a young age. Last, I believe the subsidy system should be reformed to encourage more growing of fruits and vegetables. Also, the reformed system should include assistance to farmers for running smaller-scale, closed-circuit farms that efficiently use crop rotation and take ecological concerns into account. In conclusion, as a concerned and aware college student in an urban area I feel that it is imperative that our farm bill be revised to take into account the diverse conditions of farming around the country as we work to reform our food system. Thank you.

COMMENT OF SARAN KIRSCHBAUM

Date Submitted: Saturday, May 19, 2012, 6:28 p.m.

City, State: Los Angeles, CA

Occupation: Retired

Comment: The lack of healthy soil because of chemicals and GMOs is taking a toll on farming. Pollinators are being hurt too and without them there can be no healthy ecosystems. Changing weather patterns, too much or too little water are having negative affects also. It is incumbent to protect the small farms from the practices of the larger ones, our future depends on it. This says it all: "Human beings are the only species that won't save itself because it's not cost-effective."—Kurt Vonnegut.

COMMENT OF MERLIN KIRSCHENMAN

Date Submitted: Thursday, May 17, 2012, 8:22 p.m.

City, State: Moorhead, MN

Producer/Non-producer: Producer

Type: Field Crops

Size: 301–500 acres

Comment: Keep GMO's out of our food supply. Require labeling of food ingredients to show if GMO's are in the food. Quit supporting large industrial farm operations. Create a balance and support many food crops, not mainly just corn and beans.

COMMENT OF HAROLD KIRTZ

Date Submitted: Wednesday, May 16, 2012, 11:38 p.m.

City, State: Atlanta, GA

Occupation: Attorney

Comment: I am very concerned about putting SNAP and other nutrition programs at serious risk of funding cuts and harmful policy changes.

Decisions that have been placed in the farm bill threaten to cut nutrition assistance for millions of our most vulnerable low-income families, children, and seniors.

Please change the Bill to put back all or most of the \$36 million back into the SNAP program. We cannot put the financial concerns of the nation on the backs of the most vulnerable.

As someone in the top 5% in this country, I would be willing to pay more in taxes. Certainly those in the top 1% must be allowed to share in the stakes of this country on an equitable, proportional basis.

Thank you.

COMMENT OF JOHN KISSEL

Date Submitted: Wednesday, May 16, 2012, 8:18 p.m.

City, State: University City, MO

Producer/Non-producer: Producer

Type: Fruits, Vegetables

Size: Less than 50 acres

Comment: Based on first-hand knowledge of the current state of farming in MO/IL, I urge your consideration of several objectives in creating the extremely important Farm Bill of 2012:

- The link between conservation compliance and taxpayer subsidies must be preserved and strengthened. There are, sadly, too many farmers of all sizes who feel they cannot afford to preserve our soil and water for future generations.
- Programs to help and encourage new farmers, such as the Beginning Farmers program are essential, as the majority of American farmers, like myself, are getting too old to continue.
- Programs to support small farmers, organic production, and research and innovation are also critical.

Our current approach to agriculture is not sustainable, and we desperately need a Plan B.

COMMENT OF ANDREA KITREL

Date Submitted: Saturday, May 19, 2012, 5:31 p.m.

City, State: Miami, FL

Occupation: Administrative Assistant

Comment: Please support **Real Organic** farming and stop this cancer epidemic! In a matter of 1 year I have lost 2 people to cancer, 2 are battling and 2 very young artists have also lost their lives to cancer. Please stop poisoning our food. I believe the **People** have had **Enough**.

COMMENT OF JANET KITSMILLER

Date Submitted: Saturday, May 19, 2012, 6:26 a.m.

City, State: Orlando, FL

Occupation: Teacher

Comment: We need a farm bill which will allow farmers to produce healthy food. Food which will support the health of people and animals and will heal the environment and allow the bees to thrive. In order to do this, we have got to have sustainable organic, non-GMO farming practices. It is time to stop letting corrupt, greedy big-business make the rules for everyone just so that a few people can have more money. It is time to start legislating for the people and growing food that everyone would want to eat if they understood the health values of organ *versus* the detrimental effects of sprayed, genetically manipulated food.

Please do the right thing.

COMMENT OF KIM KITTREDGE

Date Submitted: Friday, May 18, 2012, 7:46 p.m.

City, State: Santa Maria, CA

Occupation: Nursing Student

Comment: As a consumer, I want my health and the health of my family to be your #1 priority. I will not purchase or consume GMO products. They are the lead chalice of this nation.

COMMENT OF DONNA KITTRELL

Date Submitted: Friday, May 18, 2012, 5:50 p.m.

City, State: Manassas, VA

Occupation: Artist

Comment: We need to subsidize small organic farms to make organic food more economical and available to more people. Most people need to stretch their food dollar so they buy processed food because it is cheap. It is cheap because we still subsidize big AG. Subsidies need to go to small upstart companies, **Not** corporations!

COMMENT OF PAMELA KJONO

Date Submitted: Friday, May 18, 2012, 7:47 p.m.

City, State: Grand Forks, ND

Comment: Future farm policy must not be allowed to become corporatized at the expense of small farmers and organic producers. You must not allow Monsanto and Dow to continue to poison through the use of their GMO's and use of 2,4-D on crops. Rational thinking must be used along with scientific data about the complications of the use of these products which are already being seen in fields of our farmers, large and small. It gives new meaning to the phrase, "you are what you eat". No wonder traces of roundup are being found in blood tests of human beings. Just another example of unintended consequences of allowing corporations free rein in the use of their products. The USDA must do their job to protect the citizens of this country instead of rubber stamping corporate requests.

COMMENT OF SANDRA KLAHN

Date Submitted: Friday, May 18, 2012, 3:36 p.m.

City, State: Bloomington, IN

Occupation: Project Manager

Comment: I grew up on a farm, we did not use pesticides or government money. We relied on what God had provided and the knowledge of soil, wind, rain and seasons-knowledge that came from God. We understood, rotation, relationship between land, animals and people, we knew when to till, fertilize (with organic material) and when to let soil rest. Most of all, we used seeds that the Good Lord made and gave to us, not from any lab manipulated seed from mans creation. Our crops, land and animals all flourished because we believed in living within the means we were provided. Stop 'playing' God with creation, live within your means.

COMMENT OF HELMUT KLAUER

Date Submitted: Sunday, May 13, 2012, 11:10 a.m.

City, State: Gaviota, CA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: America needs a farm bill that makes healthy food widely available to all Americans—including schoolchildren! We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.

COMMENT OF JAN KLECKLER

Date Submitted: Saturday, May 19, 2012, 1:11 a.m.

City, State: Loveland, CO

Occupation: Retired

Comment: Food and it's quality is important to the health of our nation and it's people. Lack of healthy food choices impacts our health and well being. Protect product diversity, purity and our choice to choose non-GMO produce.

COMMENT OF AMY KLEE

Date Submitted: Friday, May 18, 2012, 2:52 p.m.

City, State: San Francisco, CA

Occupation: Speech Pathologist

Comment: The evidence is here. Pesticides, hormones and chemical fertilizers are not healthy for us. If we want to represent ourselves as a nation that cares for its people, what better way to show the world then stepping up to the plate and offering healthy organic food for all of our people.

COMMENT OF MARJORIE KLEE

Date Submitted: Saturday, May 19, 2012, 12:10 a.m.

City, State: Summerfield, FL

Occupation: Retired

Comment: I have cancer and from research it seems as if the pesticides and additives to our foods are at least partially responsible. It seems that healthy, pesticide free food should be the standard, not the exception.

COMMENT OF PAULA KLEIHAUER

Date Submitted: Friday, May 18, 2012, 5:18 p.m.

City, State: Van Nuys, CA
Occupation: Retired LAUSD

Comment: I am retired and an active volunteer in several Social Justice/Food Security organizations.

I am a University of California Cooperative Extension, LA County, Common Ground Program trained and certified Master Gardener. As such I volunteer to teach/train underserved populations (in schools, community gardens, shelters and through our Victory Garden Initiative, how to grow edibles and the importance of "real food" as opposed to "frankenfood."

I grow some of my own organic produce in a Community Garden and purchase what I don't grow from organic family farmers at local Farmer's Markets.

I cannot stress to you how important it is that local, small scale food production that does not "rape" the environment and mother Earth, be supported and shielded from the attacks by big Agribusiness. I support the following from Slow Food.

As the committee considers the 2012 Food and Farm Bill, I urge you to:

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;
- Provide an even "plowing" field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don't: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

Thank you.

COMMENT OF ANN KLEIN

Date Submitted: Saturday, May 19, 2012, 6:36 p.m.

City, State: Savannah, GA

Occupation: Retired

Comment: Please do your homework and talk to organic farmers who are restoring the land rather than depleting it. You are killing yourselves and everyone else. How do you sleep at night knowing this?

COMMENT OF HENRY KLEIN

City, State: Pahoa, HI

Producer/Non-producer: Producer

Type: Fruits

Size: Less than 50 acres

Comment: I'm 91 years old and grew up on an organic farm. I'm still alive and healthy because I ate fresh food as a child. I still grow my own food today. Please support small farmers and organic farmers in the farm bill.

COMMENT OF JOHN KLEIN

Date Submitted: Sunday, May 20, 2012, 9:49 a.m.

City, State: Carroll, IA

Producer/Non-producer: Producer

Type: Field Crops

Size: 151–300 acres

Comment: If we do not cut down on the soil loss of our wonderful agricultural lands, our nation will suffer the fate of past civilizations. We are living high now, and producing food for the world, at the loss of our productivity and soil resources. But our great grandchildren will see huge changes as our topsoil becomes depleted.

We are not making more soil! We need to stop thinking of ourselves and how rich we can become in our lifetime, and start thinking long-term. Food comes at the price of soil loss.

Please quit supporting big agricultural commodity groups and corporate industrial agriculture. They are big enough to grow or fail by themselves. They are profit motivated only, and care nothing about our nation's resources or sustainability beyond their own greed.

COMMENT OF JUDITH E. KLEIN

Date Submitted: Sunday, May 20, 2012, 11:20 p.m.

City, State: New York NY

Occupation: Dance/Movement Therapist

Comment: We need to have **Organic Food** supports **Not GMO Food** and agribusiness supports. Monsanto is poisoning our food supply. I have a sister who has many allergies and can eat **Only Organic Food**. Monsanto's products are contaminating organic fields rendering them non-organic. GMO foods not being labeled and the possibility of there being no organic foods available because of them means people like my sister may eventually have **Nothing To Eat**. Small family farms and organic farming should be supported and encouraged. Agribusiness does not need support. It is destroying family farms and the environments and destroying the possibility of having a varied, safe, nutritious foods supply.

There should also be adequate funding for nutritious meals for children in school and sufficient funding for Food Stamps for everyone who needs them. Food Stamps should be usable for fresh fruits and vegetables and organic food as well as regular staples. They should not be used for junk food.

COMMENT OF KIRSTEN KLEIN

Date Submitted: Friday, May 18, 2012, 2:56 p.m.

City, State: Monroe, CT

Occupation: Sales

Comment: Organic farming is the one way to reduce the obesity rate in America. If we start producing organic fresh food people will be healthier and farmers will be happier and hopefully better paid.

COMMENT OF MOLLY KLEIN

Date Submitted: Saturday, May 19, 2012, 2:26 p.m.

City, State: Portland, OR

Occupation: Stay-at-Home Mom

Comment: Please keep farming natural. Encourage farming for heirloom varieties of fruits, vegetables, and grains. Encourage organic farming. Say no to GMOs. Say no to huge farms. Say yes to funding for smaller farms. Say yes to sustainable farming practices. Please, we can't afford not to. Our health and our children depend on the decisions we are making today.

Thank you for listening.

Sincerely,

MOLLY KLEIN.

COMMENT OF LISA KLEINWOLTERINK

Date Submitted: Monday, April 02, 2012, 4:56 p.m.

City, State: Morris, MN

Occupation: County Social Worker

Comment: I cannot begin to tell you how important the current food programs are to help feed our local residents. I cannot imagine not being able to meet this need in my position as a county social worker. There are so many problems in my work that I cannot fix. However, one thing I have been able to consistently do for 22 years as a county social worker is to connect people with food. Please do not compromise on this basic provision that defines us as a community, a State and a Nation.

COMMENT OF LAURIE KLEISINGER

Comment: Please label foods that are genetically modified. Please label foods that are made from animals treated with antibiotics and hormones. Please maintain strict standards for organic foods both domestic and imports. I rely on you to inform me and keep me safe as an American citizen. Many Americans are sick and obese from tiny levels of toxins in their food supply that are ingested over decades. We need the government to allow us the freedom to make informed choices by requiring labeling of food and drinks. Please do your job to the best of your ability and with integrity to keep Americans safe.

COMMENT OF KENNETH KLEMP

Date Submitted: Saturday, May 19, 2012, 1:13 a.m.

City, State: Appleton, WI

Occupation: Retired

Comment: It is time for the American people to realize that the food we eat determines the health of our bodies to a greater extent and a farm bill that steers our country to that direction will be a plus for everyone involved.

COMMENT OF DR. R.H. KLIEWER

Date Submitted: Friday, May 18, 2012, 3:29 p.m.

City, State: Cromwell, CT

Occupation: Retired Ag. Prof. & Dir. of R&D for U.S. Holstein Assoc.

Comment: Let's get down to Earth and realize that the family farm of 10 to 12 cows is impractical as well as organic dreams that cost the public a fortune to purchase. Industrialized farming is the future which includes good care of the individual animal and sound conservation of the product and byproducts in a conservation process which uses the food produced and the byproducts which can be converted to energy (methane).

Get over the last hundred years and step into the future of food production. Quit horsing around with B.S. from the past and join the future of food production. We used to milk nearly 30 million cows at the end of WWII and now we only need about 9 million to produce our food needs in America and still have a surplus. We're the envy of all underdeveloped countries. Why go backwards. I worked 15 years with the Hungarian Ministry of Agriculture & Food and by 1988 they were sixth in average milk produced per cow as reported by FOA of the United Nations. We only needed 400,000 cows at that time compared to the 800,000 we started with. And they were exporting to their neighbors.

Let's get our heads out of the sand and listen to progressive farmers and not old wives tales! The past is history, let's move forward!

DR. R.H. KLIEWER.

COMMENT OF LARRY KLINE

Date Submitted: Friday, April 20, 2012, 11:01 a.m.

City, State: Pittsburgh, PA

Occupation: Retired

Comment: I contribute to local and national hunger programs. I believe that Federal anti-hunger programs should be funded at present levels or be increased.

LARRY KLINE.

COMMENTS OF ANGEL KLOCK

Date Submitted: Friday, May 11, 2012, 5:15 p.m.

City, State: Colville, WA

Producer/Non-producer: Producer

Type: Livestock

Size: Less than 50 acres

Comment: As a biologist and small farmer I now what America needs in a farm bill. One that creates jobs and spurs economic growth—support programs like the Value-Added Producer Grants Program by guaranteeing \$30 million of mandatory funding per year. VAPG provides seed money to help farmers innovate in agriculture and create jobs while securing a sustainable path to market-based farm profitability.

America also desperately needs a farm bill that makes healthy food widely available to all Americans—including schoolchildren! We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers and not from giant corporate entities.

America needs a farm bill that protects our natural resources and addresses the issues of environmental destruction brought about by practices that encourage and benefit large monopolies like CAFOs of all kinds,

CAFOs are the single most destructive farm policy that has ever been enacted. The mass benefits of a few becomes the liability of the many. The environment, local communities and the lives of millions of animals are unnecessarily degraded, polluted and farm animals undergo extreme suffering and cruelty. Therefore please protect the Conservation Stewardship Program from unfair funding cuts, and improve it by ranking applications solely on their conservation benefits. Farmers count on CSP and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife—all while farming profitably.

America needs a farm bill that invests in the next generation of farmers and ranchers—guarantee \$25 million per year in mandatory funding for the Beginning Farmer and Rancher Development Program. We need a national strategy and commitment to support beginning farmer and ranchers entering agriculture. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new agriculture start-ups.

America needs a farm bill that drives innovation for tomorrow's farmers and food entrepreneurs—fund the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.

Date Submitted: Sunday, May 20, 2012, 10:39 a.m.

Comment: We need the farm bill to take a more holistic and comprehensive view of our domestic agricultural development. We need to widely disperse our farm aid programs to stimulate small farms over the entire country, and REMOVE the incentives and rewards that have created the major consolidation in agricultural production practices. These practices have given us GMO seeds, CAFOs, and other monopolies that have destroyed communities, small farming operations, and the well-fare of millions of people and farm animals. These incentives have also the added benefit of degrading the environment and externalizing the costs to the public. U.S. agriculture should foster millions of small farms, which will improve our food quality, decrease the costs of delivery (improving energy policy), produce healthier and safer food, secure the availability of food and the resilience of our food system, and most importantly improve the lives of people that want to farm and raise crops and animals responsibly within a sustainable model of land and water use. In these days of concern about terrorism, foodborne illness, energy efficiency, costs, and quality there is no better insurance to a food production and delivery system other than millions of small, local farms. The public is behind this and its time for the government to follow suit.

COMMENT OF ROBERT KLUSON

Date Submitted: Sunday, May 20, 2012, 7:42 p.m.

City, State: Bradenton, FL

Occupation: Ag Extension Agent

Comment: Dear Representative Buchanon, I'm sending you my input to prioritize your analysis and actions in the development and passage of the 2012 Farm Bill. We are at a turning point in our country concerning the intersection of our agriculture sector and the rest of our society. Please, take the time to seriously read my input and integrate them in your on-going participation in the development and implementation of the 2012 Farm Bill:

- (1) support the expansion of the initiatives of the USDA/SARE program to implement local food system development in all 50 states, especially infrastructure, policy, and community issues.
- (2) take yourself and have your entire staff take the online self-tutorial about sustainable agriculture—see <http://www.sare.org/Learning-Center/Courses-and-Curricula/National-Continuing-Education-Program/Course-1-Sustainable-Agriculture>
- (3) add funding that will fully implement a separate section in USDA to implement urban agriculture development to develop job and economy opportunities. To this end, also allow full access of urban food producers to all of the funded programs of USDA
- (4) support a 3 year gradual elimination of the commodity support program and a 3 year gradual substitution of a national program to support these producers for a transition to an organic and sustainable system of food production. This

program would include Federal funding to support local food purchasing programs at the state, county and municipality levels to create consumer demand to make the diversification of these farms as profitable as possible.

(5) provide full funding to USDA School Lunch Program to provide purchasing capacity to 25 pilot project per state to fully implement Farm to School Programs

Thanks,

ROBERT KLUSON.

COMMENT OF RENEE KNIGHT

Date Submitted: Friday, May 18, 2012, 11:58 a.m.

City, State: Madison, WI

Occupation: Agricultural and Environmental Justice Funder

Comment:

- Eliminate corporate ag subsidies
- Support family farms, especially with less than 10 employees
- Support urban ag development
- Support clear and fair sustainable organic regulation that emphasizes small scale local production and distribution
- Eliminate corn for fuel subsidies
- Support farm land conservation initiatives and conservation easements

COMMENT OF ANNE KNOLL

Date Submitted: Friday, May 11, 2012, 10:16 a.m.

City, State: Post Falls, ID

Occupation: Graphic Designer

Comment: Please support organic and non-GMO farming. As a consumer, I am critically concerned about my right to choose Earth friendly organic, non-GMO products grown by local farmers as opposed to commercial farms, many of whom choose to use toxic herbicides, pesticides and dangerous GMO's.

COMMENT OF KIMBERLY KNOLLENBERG

Date Submitted: Saturday, May 19, 2012, 7:36 a.m.

City, State: South Tamworth, NH

Producer/Non-producer: Producer

Type: Dry Beans & Peas, Fruits, Vegetables

Size: Less than 50 acres

Comment: It took less than one generation for our country's families to go from eating low-calorie, nutritious, meals together in a healthy way to eating fast, empty-calorie, over-processed "happy" meals from the freezer or a pick-up window. In that time, our nation has become overweight and under nourished. This can be reversed in just as much time . . . but the time to make that change is **Now**. Please include nutrition initiatives in the farm bill, just as initiatives to help fund processed, empty foods were included just decades ago. Thank you.

COMMENT OF CONNIE KNOX

Date Submitted: Friday, May 18, 2012, 8:01 p.m.

City, State: Fort Madison, IA

Occupation: Writer

Comment: I do grow organic produce, but not commercially. I'm getting more and more concerned about the direction I see our food going in, with a lot of help from companies like Monsanto. Does it take a genius to figure out why we have an epidemic of obesity in this country? Or diabetes? Or heart disease? And let's not forget cancer. Leave our food alone, unadulterated, the way nature meant for it to be consumed. You will see a remarkable return to health. Yes, it might cost you some campaign money from the big boys, big Ag, big Pharma, *etc.* But you will win more votes at home and you will be doing the right thing. How important is that going to be on your final day? And I have a question for the people who run Monsanto. "If you're so proud of what you produce, why are you fighting the labeling so hard?"

COMMENT OF KATE KNOX

Date Submitted: Monday, May 14, 2012, 11:27 a.m.

City, State: Seattle, WA

Occupation: Scientist

Comment: Please design a farm bill that will start farmers from farming the system and stop providing free programs, food, food stamps/EBT, and other benefits to those who can work. I support a farm bill which encourages integrating environmental conservation and integration of natural environment with food production. The United States needs productive farmlands that grow healthy foods without relying on destroying top soil (a limited resource) and without heavy inputs of artificial fertilizers and toxic pesticides, herbicides, and fungicides. The farm bill should support local small scale agriculture above large-scale commercial agriculture which relies on pesticides and other chemicals and subsidies to make a product and/or profit.

Thank you for your consideration of the important need for small scale food crops rather than more corn and soybeans.

COMMENT OF MARGARET KNUTH

Date Submitted: Friday, May 18, 2012, 2:15 p.m.

City, State: Cedar Bluffs, NE

Comment: If we cannot drink the water because pesticides *etc.*, have filtered through the soil and there are no more animals living in the fields, how can humans consume what is being produced?

COMMENT OF ROSEMARY KNUTSON

Date Submitted: Friday, May 18, 2012, 8:10 p.m.

City, State: Minneapolis, MN

Occupation: Residential Real Estate Sales

Comment: I'm a born and raised Minnesota farmer's daughter. I learned to love the land early. Please, stop the degradation and destruction of this precious resource. Ban GMO's! Encourage and support the small, independent, organic farmers. They are our lifeblood and the future of our civilization. Corporate farmers are destroying our land! In the name of greed. Please, think about our children and future generations. If we continue with this madness we will destroy our very Earth. It's not too late. Thank you for your service and for your attention to this issue.

ROSEMARY KNUTSON.

JOINT COMMENT OF DAVID AND BETTY KNUTZEN

Date Submitted: Friday, May 18, 2012, 6:35 p.m.

City, State: Waunakee, WI

Occupation: Retired

Comment: The SNAP program is essential now in an economy which has failed millions of citizens and where 20% of children go to school hungry. Please do not make cuts to this vital program. Also, provide more assistance to small producers and organic farmers. The huge agribusinesses receive far too much of the assistance which should be helping the small producers.

COMMENT OF JOAN KOC SIS

Date Submitted: Friday, May 18, 2012, 1:11 p.m.

City, State: Buzzards Bay, MA

Occupation: Writer

Comment: Why does the farm bill give billions to giant corporations like Cargill and Monsanto to produce food that only makes people fat (like high-fructose corn syrup)? They certainly don't need government help. The bulk of subsidies should go to growers of fruits and vegetables—the stuff that government tells us we should be eating much more of—especially to those who sell locally. Please use your voice to ask for radical change in the farm bill. We also need to know what foods are genetically modified; as it is, we're running a giant experiment on how GMOs will affect humans and the natural world. The U.S. may be the largest, richest country that doesn't mandate GMO labeling. Even repressive China lets its citizens know what food contains GMOs.

COMMENT OF SPERIE KODA

Date Submitted: Friday, May 18, 2012, 9:57 p.m.

City, State: Leicester, NC

Occupation: Artist—Landscape

Comment: My main concerns are for mandatory decent conditions for livestock right up to the very end and also for common sense laws regarding chemical additives and genetic tampering. 200 million male chicks killed the same day they are born is a pathetic practice for example.

COMMENT OF AMY KOEGEL

Date Submitted: Friday, May 18, 2012, 10:29 p.m.

City, State: Lexington, KY

Occupation: Self-Employed

Comment: Our health and nutrition needs are directly impacted by the quality of food we consume. I support sustainable farming and local, organic produce to help meet my family's nutritional needs. Please keep our nation's health at the frontlines when discussing the new farm bill. Thank you.

COMMENT OF MATTHEW KOELSCH

Date Submitted: Saturday, May 19, 2012, 10:24 a.m.

City, State: Honeoye Falls, NY

Occupation: Father/Student

Comment: Agricultural policy should be focused on:

1. safe, responsible, sustainable practices
2. full, grassroots, employment
3. production of safe and healthy food
4. local production and distribution

Large scale, mechanized, petrochemical-intensive operations employ fewer Americans, pollute and degrade our soil and water, and produce massive quantities of fodder to be processed into the low-nutrient, high calorie foodstuffs that leads to obesity and diabetes. Policies that favor this approach enrich corporate shareholders at the expense of our nation's health and the purity of our soil and water. Please support the alternatives: organic, local, small-scale, family and community-owned farms. Thanks for listening.

COMMENT OF RON KOENIG

Date Submitted: Friday, May 18, 2012, 7:20 p.m.

City, State: Bellevue, WA

Occupation: Organist/Newspaper Delivery

Comment: I am concerned that money will go to promote large agricultural companies and the small sustainable farmer will be left out. Please do not cut funding for the food stamp program as many people rely upon it to be able to buy food. As the rich continue to get richer and more jobs leave the country, more and more people are unable to buy food without government programs such as food stamps.

COMMENT OF ELAINE KOKAI

Date Submitted: Friday, May 11, 2012, 11:40 a.m.

City, State: Daytona Beach, FL

Occupation: Retired

Comment: Please consider all the working poor, children and women who rely on help with the basic need for food. Even in this wealthy country we have those who through no fault of their own cannot feed themselves. I work at a food pantry where the number of families we are helping has increased steadily over the last year. Please think of those less fortunate and help them.

COMMENT OF REGINA KOLBER

Date Submitted: Friday, May 18, 2012, 11:55 a.m.

City, State: Brooklyn, NY

Occupation: Admin. Worker

Comment: I want fresh, healthy food without pesticides and all the workers involved from beginning to end should be treated well and paid a decent wage. If we can put people on the moon, we can pay agricultural workers well with safe working conditions. I'd also like to see a lot more attention paid to organic farming and the small family farm.

COMMENT OF SUSAN KOLLAR

Date Submitted: Friday, May 11, 2012, 6:04 p.m.
City, State: Westlake, OH
Occupation: Realtor
Comment: We need the Congress to focus on protecting small farmers, organic farmers. We do not need to pay big farm corporation to pollute our environment and control what we eat. We need to protect the **Environment** for honey bees, our children. Tell Monsanto no more controlling what is planted.

COMMENT OF STEVE KONIGSBAUER

Date Submitted: Friday, May 11, 2012, 9:27 p.m.
City, State: Salley, SC
Occupation: Stocker Cattle Grazing
Comment: We need to keep American AG. strong and sustainable for the long haul. We must all support programs that:

- (1) creates jobs and spurs economic growth.
- (2) makes healthy food widely available to all americans.
- (3) protects our natural resources.
- (4) invests in the next generation of farmers and ranchers.
- (5) drives innovation for tomorrows farmers and ranchers. Please do the right thing, our children are Humanity's reach into the future and we must leave them well equipped to survive whatever shall come along. Thank you.

STEVE KONIGSBAUER.

COMMENT OF CLAUDIA KONKUS

Occupation: Retired

Comment: I am a consumer of certified organic produce and selected animal meats. Please do nothing to impair my ability to purchase food that is pesticide-free, chemical fertilizer-free, hormone-free, antibiotic-free, and free of any other additives that do not belong in the food chain.

COMMENT OF TERESA KOSCHMEDER

Date Submitted: Friday, May 18, 2012, 12:17 a.m.

City, State: Lawrenceburg, IN

Occupation: Full-Time Homemaker

Comment: America needs a farm bill that allows organic foods to thrive and become mainstream.

America needs a farm bill that encourages the small family farmers to grow again.

No pesticides, no chemicals, no preservatives no hormones on the animals should ever be used. Humane treatment for all the animals and farmers. Allow fair trading and innovation that encourages research for healthier foods. America should be able to feed everyone in America with healthy food.

There should be plenty of support with the acceptance of science. No one should be able to change the facts because of their belief system. Thank you for your time and consideration.

COMMENT OF KATE KOSEK

Date Submitted: Saturday, May 19, 2012, 1:28 p.m.

City, State: Hopewell Junction, NY

Occupation: Educator/Writer

Comment: Let's help the small, responsible farmers to provide us with healthy, affordable food while supporting a healthy, bio-diverse environment. Supporting industrial ag is corporate welfare.

COMMENT OF DEBI KOSHIK

Date Submitted: Friday, April 27, 2012, 3:26 p.m.

City, State: Chula Vista, CA

Occupation: Retired

Comment: The government of this country need to make sure us low income people get fed before you send food off overseas for one thing . . . there are people starving here even in Cities like San Diego! Just because our income is "middle" we get no help and that dollar don't go far any more . . . make the consumer cost in America go down and the export cost to go up!

COMMENT OF JOHANNA KOVITZ

Date Submitted: Friday, May 18, 2012, 2:28 p.m.

City, State: Allston, MA

Occupation: Transcriber

Comment: I believe the U.S. government's responsibility should be less about supporting large agribusiness, and more about encouraging small independent farmers, organic farming, and opportunities for citizens to buy locally grown and organic produce. The aim should be to ensure that all Americans have access to fresh, healthful, and affordable food, not to make sure agribusiness stays rich by growing and selling things that Americans don't need, or selling commodity products at home and abroad while many Americans go hungry or become obese on a diet of junk food.

Just one example of our wrong priorities: As a result of subsidized corn production, it is almost impossible to find processed foods in this country that don't contain

high fructose corn syrup, which keeps Americans addicted to sugar and increases the rates of obesity and diabetes. The incentives in this system are all wrong.

If any of the Representatives on this committee do their own shopping or cooking, they will know how much easier it is to find junk food in our supermarkets it is than to find quality food and produce. Our agriculture system should do everything possible to turn around this unhealthy reality. As you consider the next farm bill and as you meet with lobbyists from agribusiness, please don't lose sight of the nutritional and health needs of the American people as a whole.

COMMENT OF DOUGLAS KOWALEWSKI

Date Submitted: Thursday, May 17, 2012, 5:46 p.m.

City, State: Lake in the Hills, IL

Occupation: Realtor

Comment: Stop selling out to multi-national corporations and their terrorist tactics. Protect the small farmer, help these small businesses succeed and encourage the farming of healthy, real food. Because politicians get wealthy by serving the masters of big companies, I have no hope that the Agricultural Committee will ever do anything that helps a small farmer. It just doesn't put enough in their pockets.

COMMENT OF KELLY ANN KOWALSKI

Date Submitted: Friday, April 20, 2012, 3:55 p.m.

City, State: Cheektowaga, NY

Occupation: Program Director

Comment: It is so important that we protect and do not harm the Food Stamp program under the farm bill. In these hard times, people need a program like Food Stamps to have healthy and productive lives. The average person who uses food stamps much whether have a job that pays enough that they do not have to use Food Stamps. Being able to buy healthy food on your table is so important and it will cost the nation less money in the long wrong. Please do not harm this program.

COMMENT OF MICHAEL KOZAK

Date Submitted: Friday, May 18, 2012, 10:15 a.m.

City, State: Pittsburgh, PA

Occupation: College Admission Counselor

Comment: As the committee considers the 2012 Food and Farm Bill, I urge you to:

- Support small, sustainable family farms.
- Support organic agriculture that does not harm the environmental with chemical inputs.
- Take a stand against subsidies for large scale farms that do not need them.
- Take a stand against GMOs in our food system.
- Focus on providing access to good, local, organic produce to all.
- Support young and beginning farmers with access to land and funding. There are many who want to farm, but the barrier to entry is too high for most.

COMMENT OF CONSTANCE KOZEL

Date Submitted: Friday, May 18, 2012, 2:29 p.m.

City, State: Dallas, PA

Occupation: Retired Teacher

Comment: Farms are one of our most precious and indispensable resources. We must protect them and what is grown on them for the health of **Earth And All Its Inhabitants.**

COMMENT OF DAVID KOZLOWSKI

Date Submitted: Friday, May 18, 2012, 1:58 p.m.

City, State: Santa Fe, NM

Occupation: Woodworker

Comment: The agricultural industry should be encouraged to produce fresh food instead of processed food. Our food right now is based on exploiting corn and corn products to the maximum. This has resulted in an explosion of carbohydrates in our food supply and has resulted in an obesity epidemic that especially affects the poorest members of our society.

For most of history, after all, the poor have typically suffered from a shortage of calories, not a surfeit. So how is it that today the people with the least amount of money to spend on food are the ones most likely to be overweight?
<http://www.nytimes.com/2007/04/22/magazine/22wvlnlede.t.html?pagewanted=all>*

Iowa Senator Chuck Grassley has said: “The agriculture industry has consolidated to the point where family farmers, independent producers and other smaller market participants do not have equal access to fair and competitive markets,” he says. “Increased concentration in agriculture will lead to fewer product choices and higher product prices for the American consumer.”

COMMENT OF JOHN KOZMA

Date Submitted: Saturday, May 19, 2012, 1:23 p.m.

City, State: Charleston, SC

Occupation: College Instructor

Comment: Although I am not a producer, I am very interested in agriculture policies. I am an elected member of the Charleston County Soil and Water Conservation District Board of Commissioners, but these comments are my own, in no way endorsed by the board.

I am also a member of a local CSA, and I buy organic, local non-GMO food when it is available and affordable. I understand that non-organic practices are the only practical way to produce enough food to satisfy everyone’s needs, and that economies of scale sometimes demand that food be shipped long distances from farm to table. I also understand that genetically modified foods can be beneficial. However, there are known—and not yet known—problems with these practices. The use of chemical pesticides and herbicides leads to increased resistance among the species sought to be controlled. Likewise, dependence on mono-cultures increases susceptibility to insects and diseases. There is also evidence that crop varieties selected for mono-cultures sacrifice nutritional value for high yield. Transporting farm products to distant processing facilities and markets requires additional expense and pollution. And while I don’t believe, as some may, that genetically modified food products are inherently unsafe, I find it troubling that there is no requirement that they be tested more rigorously.

By subsidizing farmers on the basis of the quantity of crops they produce, as all U.S. farm bills have done for at least the past twenty years, our farm policy makes organic, local, non-GMO choices relatively more expensive. I am among many who believe that many of the health problems in the U.S. are related to our diet, which to a large extent is shaped by farm policy. Yet another consequence of our current farm policy is increased dependence on foreign oil due to the widespread use fertilizers and long distance transportation of farm products. Even immigration is impacted by farm policy, since the export of cheap, subsidized farm products from the U.S. drives many farmers out of business in Mexico and other Central and South American countries, with the result that many displaced workers from those countries to seek employment here.

The admonition to first, do no harm might well be applied to farm policy. There is no need to subsidize corn, wheat, rice, cotton, and soybeans—the market can effectively deal with them without government intervention. Even if the current subsidies are not redirected to organic and local production, there should at least be a level playing field.

COMMENT OF MARYLOU KRAEMER

Date Submitted: Friday, May 18, 2012, 4:05 p.m.

City, State: Albuquerque, NM

Occupation: Marketing Director for a Independent Pharmacy

Comment: This country needs good, healthy clean food. I am sick and tired of McDonalds and Burger King ruling Americans. I only eat organic and real food. Please return our country to this state. The food is making this nation obese and sick!

COMMENT OF DIANE KRAFT

Date Submitted: Friday, May 18, 2012, 6:16 p.m.

City, State: Niagara Falls, NY

*The information referred to is retained in Committee file.

Occupation: Psychotherapist

Comment: The feeding of America and the decisions made to this end, requires a serious shift in our goals. It is time to think smarter about the healthy sustainability of our food supply.

COMMENT OF MARYLIN KRAKER

Date Submitted: Friday, May 18, 2012, 12:01 p.m.

City, State: Fremont, MI

Occupation: Retired

Comment: It is important to support small farmers more than big Ag, especially organic farmers. Also to support/fund healthier school meals, as well as nutrition support for those in need. This is **Not** the time to cut 'food stamps' or subsidies for school breakfasts and lunches for poor children.

COMMENT OF ANN KRAMER

Date Submitted: Saturday, May 12, 2012, 12:26 a.m.

City, State: Hood River, OR

Occupation: Counselor

Comment: We need a farm bill that supports small farmers and a diverse, regional food system. For far too long only the large producers have benefited by the farm bill. This is short sighted and has resulted in a food system that is leaving us with limited food diversity. Obesity and Type II Diabetes have grown steadily due to this commoditized food system. Solutions like in small farmers, regional food systems.

COMMENT OF JOEL KRAMME

Date Submitted: Sunday, May 20, 2012, 2:14 p.m.

City, State: Rolla, MO

Occupation: Retired Teacher

Comment: Your constituent's health and well-being must be your top priority when setting farm policy. Just look at the increasing popularity of local farmers' markets and you will see a ground-swell of concern about people's individual health. Big Agra. needs to revamp their priorities or we will soon tell them, RIP.

COMMENT OF BRUCE KRAN

Date Submitted: Friday, May 18, 2012, 4:00 p.m.

City, State: Reno, NV

Occupation: Retired

Comment: Organic and small farming are on the comeback because big ag has maximized profits without regard to health concerns. Health care costs too much to ignore this healthy trend. Support it.

COMMENT OF GRETA KRANZ

Date Submitted: Friday, May 18, 2012, 12:13 p.m.

City, State: Sun Valley, ID

Occupation: Consultant

Comment: Stop promoting the use and destruction of our land, our farming communities, and the health of our nation by supporting terrible companies like Monsanto! I want the working farmer to be able to do just that—work, and produce true crops in the ways he/she know are best.

COMMENT OF MICHAEL KRASNER

Date Submitted: Sunday, May 20, 2012, 10:16 p.m.

City, State: Putney, VT

Occupation: Teacher, Hobby Farmer

Comment: Please craft a bill that continues to provide generous support via SNAP for those people who continue to be hurt by our economic situation. Please also support measures that will allow young and innovative farmers to begin farming and flourish and that will direct aid to them and other family farmers who truly need help as opposed to the large, industrialized farming enterprises that do not.

Thank you,

MICHAEL KRASNER.

COMMENT OF C.E. KRAUSE

Date Submitted: Friday, May 18, 2012, 1:35 p.m.

City, State: La Quinta, CA

Occupation: Environmentalist, Teacher, Political Activist, Artist

Comment: Food and Farm Bill? HA! What do you think I think you're going to do with my input!?!

Well, our food is unhealthy from start to stomach: whether grown from genetically modified seeds that have had all the nutrients extracted and are Round-Up Ready and filled with noxious chemicals; or raised in filth, crammed together, abused and tortured, force-fed and plied with steroids and unhealthful chemicals; our food doesn't taste like it should, doesn't look like it should (colorized) and doesn't nourish like it should.

And, well, our farms are all run by big multinational agribusiness monopolies and chemical manufacturing conglomerates, subsidized by taxpayers; they serve the agenda of the 1%: to wipe out large populations who own coveted natural resources and/or are otherwise undesirable. [There would be no world hunger, except that it is part of the New World Order!]

That's what I think. What do I want? Stop subsidizing multinational corporations; label GMO foods; let us know which petro-chemical corporations are involved (as owners, producers, *etc.*) and which petro-chemicals are being forced upon us via our edibles and potables; regulate, regulate, regulate; start treating animals humanely and stop over killing; stop allowing our soil to be contaminated and our food to be grown in contaminated soil; and stop the pollution of our water—rivers, streams, lakes, seas, oceans (including by the inevitable big oil spills and nuclear waste leakage!) and stop the watering of our food with polluted liquids!

That's a start! Do these things and you'll be doing the decent thing, doing right by your constituents and all of (wo-)mankind.

COMMENT OF HAROLD KRAVITZ

Date Submitted: Thursday, May 17, 2012, 12:34 a.m.

City, State: Minnetonka, MN

Occupation: Clergy

Comment: I am profoundly troubled by the proposed cuts to Federal Food benefits in both the House and Senate Ag Committees budgets. It is shameful to balance the Federal budget at the expense of those who are most vulnerable.

COMMENT OF CLARENCE KREITER

Date Submitted: Thursday, May 17, 2012, 8:25 p.m.

City, State: Iowa City, IA

Occupation: Professor—U of Iowa

Comment: What I see in Iowa is truly heartbreaking. So much land going into production and so little nature left. The rivers are totally polluted. This is important legislation—please put the brakes on refunding. This state is destroying itself by putting so much land into production.

COMMENT OF REBECCA KRIEGER COTTINGHAM

Date Submitted: Friday, May 18, 2012, 11:02 p.m.

City, State: Batesville, IN

Occupation: Homemaker/Mother

Comment: It's time for real reform. I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

To be totally honest, I grew up on a small farm, but my family never ever had any benefit from all of these subsidies, *etc.* . . . that are always discussed. All of these subsidies only go towards one place . . . **Big Business** . . . Thus, in the U.S., it is now difficult to even buy meat, *etc.* that is not produced by one of the three major meat producers . . . Consequently, we now have food that is so standardized

and industrialized that it does not have the benefits and nutrition, nor the taste, of “real food”.

I am disappointed that the Senate Agricultural Committee has already voted to cut \$4 million from organic research funding and cut funding to support Beginning Farmers in half. We cannot let this stand!

At the same time, the Senate Ag Committee has voted to get rid of wasteful subsidy payments. It has proposed to replace it with a new subsidized insurance program that leading sustainable agriculture advocates are calling rife with opportunities for fraud and abuse. If course, from our past experience, this is bound to happen. Thus, why are we doing this once again?

While Congress is looking to get rid of direct payments to commodity farmers, the subsidized insurance program it proposes to replace it with will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk. Thus, big business will once again benefit.

According to the National Sustainable Agriculture Coalition’s Ferd Hoefner, “By failing to place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs, the Committee has failed to do the full reform that is needed.”

We can’t allow this to happen. Please help to create real reform and a healthy, organic future! Please do not just think of the large businesses that are located your districts asking for your support. Think of your children and grandchildren, Do you not want your children and grandchildren to be able to experience “real food” with real nutrition and benefits . . . rather than mass produced food? As is proven, this is a key to good health and less obesity . . . which Americans desperately need. If Americans ate more real food, then health care costs would decrease. Of course, once again, that would hurt big business.

I personally find it affronts me that many of these policies are introduced and supported by males . . . who definitely don’t seem to have the some forward thinking as mothers who worry much more about the future of their children, and their children. Thus, these policies are often made with big business in mind, NOT for the people.

To conclude, thank you for your attention.

COMMENT OF SUSAN KRIVIN

Date Submitted: Friday, May 18, 2012, 9:25 p.m.

City, State: Santa Cruz, CA

Occupation: Custom Sewing/Tailor, Former Food Producer

Comment: As a former food producer, I know from personal experience how difficult it is for small farmers to make a living, so first I ask that you end farm subsidies. The largest farms that need the least help seem to benefit most from these. Instead, I would urge you to support programs benefiting smaller farms serving their local communities, especially those of low income.

Please strengthen, as opposed to cutting back, nutrition programs in this time of great economic instability. Everyone deserves access to healthy food, especially children.

Last, but equally important, protect the Conservation Stewardship Program to insure farmers have incentives to adopt practices that protect the soil, water, air, and surrounding landscapes for the benefit of current and future generations.

COMMENT OF GERI KROMMINGA

Date Submitted: Sunday, May 13, 2012, 12:55 a.m.

City, State: Vancouver, WA

Comment: Our family farmers need support for their farms, especially when they are marketing directly to the public. Consumers need access to clean, healthy food grown in ways to support our environment, not deplete it. Family farms are much more efficient than corporate farms. We need to end subsidies for corporate farms.

COMMENT OF ESTHER KRONENBERG

Date Submitted: Friday, May 18, 2012, 3:07 p.m.

City, State: Olympia, WA

Occupation: Retired Educator

Comment: As an educated person who is aware of the current agribusiness model and its disastrous consequences for the health of the land and the people, I write to urge you to fully endorse all provisions of the Local Foods, Farms and Jobs Act

(H.R. 3286), to fully funding conservation programs, such as the Conservation Stewardship Program, and to make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. I also support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236) and maintaining the EQIP Organic Initiative.

Continuing to run this country at the behest and for the profit of the 1% who have absolutely no interest in their fellow man or the sustainability of the planet, but only in short-term profit is the road to **Hell**. In the end, **All** of us including all the living creatures with whom we share this Earth, will suffer. The actions of this government are so contrary to basic Western religious tradition that continuing on is a **Grave Sin**.

I urge you to act in the best sense of being human—with compassion and common sense. Do not let our fellow citizens go hungry while continuing to cater to those who would rape the land for profit.

Thank you.

COMMENT OF CAM KROSNOFF

Date Submitted: Friday, May 18, 2012, 12:08 p.m.

City, State: Wills Point, TX

Occupation: Retired

Comment: Politicians out of touch with the values of the American people; and, corporate agribusiness has a stranglehold on our regulatory system and our political leaders.

Farmers and eaters across the U.S. benefit from a fair and healthy farm bill.

I support:

1. The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
2. Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
3. The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
4. Maintaining the EQIP Organic Initiative.

While Congress is looking to get rid of direct payments to commodity farmers, the subsidized insurance program it proposes to replace it with will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk.

By failing to place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs, the Committee has failed to do the full reform that is needed . . . do something right for America **Now** . . . otherwise all of you will be out of office before you realize it . . . I promise.

COMMENT OF DIANNE KRUEGER

Date Submitted: Friday, May 18, 2012, 8:40 p.m.

City, State: Delafield, WI

Occupation: Teacher

Comment: Keep the family farm alive. We need to support new farmers not the huge commodity farms. Taking money away from the food stamp programs and giving it to large farms is wrong. Organic, sustainable farming is the best alternative for healthy, nutritious food for all. Support local farms and farmers.

COMMENT OF FRANCES KRUEGER-JACKSON

Date Submitted: Friday, May 18, 2012, 6:52 p.m.

City, State: Chicago, IL

Occupation: Bookkeeper and Artist

Comment: I feel that there needs to be more emphasis put on helping the small farmer rather than big Agribusinesses. Small farms and organic farming is better for the environment, is more sustainable, and ultimately better for the people and communities involved. I would also like to see tougher standards in long term research on the environmental and health effects of GMO crops as well as labeling of GMO foods.

In addition, I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

I support fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

I also support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

And, I support maintaining the EQIP Organic Initiative.

Your job is to protect the long term health (and I mean more than medical) of the people and the environment we live in not corporate interests (and despite what the courts may say, they **Are Not** people, they are entities with different priorities, values, and interests).

COMMENT OF RYAN KRUG

Date Submitted: Friday, May 18, 2012, 12:13 p.m.

City, State: Eagan, MN

Comment: Steps need to be taken to pass along the real costs of farming. Taxes should be added to products based on their manufacturing process to take into account the environmental impact of production.

COMMENT OF ROBERT KRUGER

Date Submitted: Friday, May 18, 2012, 1:43 p.m.

City, State: Chicago, IL

Occupation: Social Worker

Comment: This Nations children & people need a future where non GMO/Corporate food exists. Our plant needs crops that don't rely on the chemical fertilizers & pesticides promoted by the **Corporations!** This Earth is fragile and those chemicals are destroying our water supply and when they flow into the Gulf life there.

Someone must stand up for the people & not the Corporations. We the people are the ones who put you in office to voice our wishes and **Not The Corporations!**

Thanks for your time and support.

COMMENT OF WENDY KRUPNICK

Date Submitted: Saturday, May 12, 2012, 12:20 a.m.

City, State: Santa Rosa, CA

Occupation: Instructor, Organic Farming and Gardening

Comment: It is time for the farm bill to get back to its original intent—to keep American agriculture the strong backbone of our economy and protect the food security of the American people. It was not designed to support the huge corporate agribiz profit structure which has no regard for the destruction of our natural resources and the diverse family farm, and is producing food products that are making Americans sick. It is time to eliminate subsidies for corn that is used as a sweetener and ethanol. Instead, conservation, organic farming, and the local food movement must receive more support. With millions of Americans out of work and below poverty level, food support programs need to also support local farmers and a healthy food supply, circulating these dollars in our communities and creating better health outcomes for all.

COMMENT OF SCOTT KRUSE

Date Submitted: Friday, May 18, 2012, 6:35 p.m.

City, State: Fresno, CA

Producer/Non-producer: Producer

Type: Specialty Crops

Size: 301–500 acres

Comment: Support specialty crops, organic farming and Slow Food. Time is overdue to wean industrial farming off of subsidies and crop insurance. All crops should be climate- and soil-appropriate (you don't grow oranges in Montana). Restore the San Joaquin River to sustainability for both the watershed and growers.

COMMENT OF WILLIAM KUEHL

Date Submitted: Tuesday, May 15, 2012, 8:16 p.m.

City, State: Astoria, OR

Occupation: Volunteer Pantry Manager

Comment: Suzanne Bonamici:

It is not time to make cuts in these programs. I know so many that are in hard times and not of their own doing and having to swallow their pride and go to pantries for the first time in their lives. it's bad enough that people are losing their homes. As a pantry manager I see the fear in these good people's eyes first hand. **Please Protect This Life Line For The People That Need It.**

COMMENT OF SARA KUHN

Date Submitted: Friday, May 18, 2012, 3:45 p.m.

City, State: West Hollywood, CA

Occupation: Teacher, Writer

Comment: I urge you to return to the roots of farming in this country. Support small, beginning, and socially-disadvantaged farmers and ranchers. Fund programs that support organic, sustainable, and local and regional farming practices—not the detached and inhumane mentality of corporate farms and big agribusinesses. **I Beg** of you to please end our government's support of corporate farms and big agribusiness. The result of their production is chemically-enhanced and non-sustainable farming/ranching practices—that, in the long run, are not good for any of us. **I Plead** with you to please act out of concern for the population of this country and not with regard to the corporate farming and agribusiness companies who seem to have their hands in the pockets of everyone on Capitol Hill. Support critical nutrition programs and fight food insecurity. Stop giving breaks to those who over-produce, those who are inhumane to food animals, those who pollute the environment with disregard for the delicate ecological balance. Our small and family farmers work hard to continue the tradition of working WITH the land, not raping it, to provide healthy food to the people of this country in a sustainable manner. Yet increasingly, they are being put out of business by large corporations. Please, please, please—act with regard for the people, the animals and the environment. Don't give to greedy corporations and lobbyists. Do the right thing.

Comment: Please support the smaller family farms. Please keep our food supplies clean and without harmful toxic pesticides and fertilizers. Please help to provide clean and healthy food for the disadvantaged, elderly, and young.

Thank you.

AMY KUNDE.

COMMENT OF HAROLD J. KUNISCH

Date Submitted: Tuesday, May 08, 2012, 2:18 p.m.

City, State: Winter Park, FL

Occupation: Employment Counselor

Comment: This is a "double sword" situation . . . at some point we have to cut our spending. The taxpayers are "not" a bottom less pit when it comes to spending. I work with a lot of people on food stamps & I've come to the conclusion based on who gets & who does not & the amounts given, it is a corrupt system. All things being equal some get \$16 (which is hardly worth all the paper work), some get \$200 & then I see people with \$500-\$600-\$700 a month all with basically the same similar situations. I am tired of people who get high amounts of food stamps, live on welfare, haven't worked in years & don't intend on doing so. It's time to take the politics out of food stamps & make sure only people who truly deserve them, get them . . . throw all the "dead beats" off the program, **Now!** . . . I support the cut in food stamps as tough as it maybe . . . we are going bankrupt, maybe (?) people will get off the couch & fend for themselves.

JOINT COMMENTS OF MIKE AND MIRIAM KURLAND

Comment: We are eating fossil fuel derived, genetically engineered garbage. The nutrition is greatly lower than organic produce. Your progeny are getting short-changed. Better wake up and convince the public that muscle power would grow better food plus help the obesity epidemic.

COMMENT OF MICHAEL LA COURSE

Date Submitted: Sunday, May 20, 2012, 11:32 p.m.

City, State: Vista, CA

Occupation: Educator

Comment: We need to get a sustainable agriculture in this country, without GMO's which have no long term health studies. I do not want my children poisoned, just because the status quo states as long as it is not proven dangerous it isn't (DDT anyone?). Please help the public be able to make a decision about if they want to buy GMO foods or not.

COMMENT OF DEANNA LACK

Date Submitted: Friday, May 18, 2012, 10:26 a.m.

City, State: Sparta, TN

Occupation: Medical Transcriptionist

Comment: Please include small farmers and organic farming in the next farm bill. Our current farming system is unsustainable and is damaging the health of the nation. End subsidies and replace with agricultural risk coverage. At least some of the money Big Ag gets should go to small operations, and there should be some accountability for environmental practices.

Thanks for your attention to this matter.

COMMENT OF BARBARA LADD

Date Submitted: Friday, May 18, 2012, 12:06 p.m.

City, State: Croton on Hudson, NY

Occupation: Publishing

Comment: We want reform! U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

Politicians out of touch with the values of the American people, and corporate agribusiness has too much influence over our regulatory system and our political leaders.

A fair and healthy farm bill is a win for farmers and eaters across the U.S. Don't cut funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture.

COMMENT OF RYAN LADUC

Date Submitted: Friday, May 11, 2012, 2:48 a.m.

City, State: Saugerties, NY

Occupation: Student

Comment: Congressman Hinchey,

The writing of the nation's new farm bill is an important time for us. There is a lot that is disturbing about our current agricultural system, most of which is unknown to society because we lack information on how and where our food is coming from. Science and economics argue that pesticides, herbicides, fertilizer, GMOs and monoculture farming on a massive scale are the only way to effectively and efficiently grow crops to feed our hungry nation. Those same experts claim that livestock should be mass-produced, injected with antibiotics, growth hormones, fed foods which are largely disagreeable with their digestive systems, and then never shown the light of day, before they are herded into slaughter houses after standing in their own feces for months on end, as the only effective and efficient way to feed our nation. I disagree. Not only are such methods of agriculture and livestock production, wildly destructive to the environment, but they are also destructive to our health. Research shows that mad cow disease, *E. coli*, *Salmonella* poisoning, diabetes and many other health issues, including links to cancer, and even autism, have been caused or worsened by our industrial agriculture system. Large scale does **Not** mean efficient, when it puts our planet, our environment, our oceans, our health, especially that of our children and the elderly, at risk! I urge Congress to demand open information on food, and better labeling, so that the public can hold our food suppliers responsible. After all, business is driven by the consumer, and it should be up to us to decide what we buy. If government subsidies only support massive food corporations, what choice do we have in our health and in our planet's future? Not only that, but such biased agricultural subsidies allow for every small-scale mom and pop farm to be squashed by the bigger corporations within months, both financially and legally over issues of GMOs.

Government subsidies lean heavily towards corn and soy—two of the most environmentally destructive crops in the world. Such crops are then used in ethanol which is anything but sustainable or helpful to the environment. With such subsidies, corn is the cheapest thing for food conglomerates to produce, so they feed it to their livestock, which their digestive tracts can't handle, causing *E. coli* to run rampant, and for our meat to be filled with bacteria, and antibiotics to try and curb it. The corn that is leftover is then used in the making of chips, alcohol, soda, popcorn, butter, sugar, candy, cookies, fast foods, such as McDonald's, microwaveable foods, and other nutritionally lacking foods all of which can be sold dirt cheap due to subsidies. As a result of their cheap costs, these foods make up the primary food

diets of poorer consumers, including those who are on your government assistance programs. What other choices do they have? Beer and potato chips are cheaper to buy than carrots and celery! No wonder our nation is continually battling a rising obesity and diabetes epidemic. I urge Congress to use this opportunity of a new farm bill, to spend money investigating the health and environmental impacts of our current agricultural system. I urge you to urge Congress to support and give subsidies to organic farms and to support small-scale local farms who, like any other small business trying to make it big, should **Not** be run out by monopoly corporations. They have every right to our free markets as the big food producers do, and they are using better, healthier, more sustainable, and friendly methods. I urge you to urge Congress to create better labeling laws so that we as consumers can reclaim our rights to free information, especially in regards to our health, and so that we can know what it is that we are eating. After all, like any global market, the consumers should hold the control, not be controlled by the producers. This is the basic principal upon which our economic system is based. I also urge you to urge Congress to renew the SNAP, TEFAP, CSFP, WIC and other nutrition programs instituted by previous bills. These programs and initiatives are necessary for the stability of our nation. In these times of economic struggle and hardship, health should not be put on the back-burner and neither should the hunger of 1,000s of poor families. There are many Americans in need of food assistance and programs such as these are their only hope in many cases. However, I hope that Congress can come to understand, that such programs are only effective if they allow for the recipients to purchase healthy foods, not beer and potato chips, which add to national health problems and consequently, healthcare issues. We can't simply continue food assistance, we have to specify what foods are supported and subsidized, and allowable for purchase by these systems.

And we all reserve the right to know **What It Is That We Are Buying**. What we eat is who we are, and we all need to realize that more, and act in our own interests to better our food market. We the people, humbly in your hands Congressmen, and I ask that you heed our cries for change and help our nation move towards a better, brighter, healthier, more sustainable future. Our country's agricultural system needs some serious restructuring and it starts here!

COMMENT OF SHAWN LADUKE

Date Submitted: Friday, May 18, 2012, 10:47 a.m.

City, State: Sheboygan, WI

Occupation: Self-Employed Yoga Studio Owner

Comment: I support organic farming! I do not want to each food that has been altered, sprayed with herbicide, pesticide or any chemicals that have been shown to cause cancer in animals. Please support local small farmers that give a shit about the environment and aren't in it for the money. They need jobs too!

COMMENT OF MICHELLE LAFAYE

Date Submitted: Saturday, May 19, 2012, 8:57 a.m.

City, State: Grants, NM

Occupation: Teacher

Comment: Have our leaders all gone mad and lost all forms of any moral compass and common sense?

Why does the government insist on supporting the likes of the mega agricultural industry through subsidies? Our food is poison! It is really that simple. You are an accomplice poisoning a massive number of people . . . perhaps that is the goal. But, more than likely, it is a deeply embedded greed where all the dots connect on the money trail. The government does not represent the people any longer but it does represent corporate interests completely which is wrong! It is wrong even more so when people's health is placed at risk due to preference for corporations over people.

It makes no sense that government would, at this time in our history, with the knowledge we now possess, even consider obliterating conservation, and stewardship programs. Local organic farmers and small growers need to be a part of our nation's sustainable food growing programs. New and small farmers and growers need the opportunity to begin to farming again. We may even need to create homesteading for organic growers so they may have the opportunity to grow crops again. They do not need loans . . . they need some of the subsidies which are given to the Mega Agricultural Industry.

Farmers grow the gift of health for all of the people. Government policies of past have created this mess we are in by basically ruining farmers through the loan system for equipment, buildings and the methods the government demanded.

It is ridiculous to believe that a farmer is going to quickly rebound from a flood, drought, insects, tornado, late frosts, and *etc.* Farmers must deal with nature as it comes . . . it doesn't fit into our neat little boxes which the government loves to create. We don't need pesticides in all of our food, or artificial chemicals fertilizers, or Genetically modified crops, Bigger is not better. Bigger is out of control and the risks are to great.

Organic local farmers take great pride in their crops. They know their customers on a personal basis and vice versa. If a farmer is not meeting standards of cleanliness and high quality farming practices the farm will either have to change or end up out of business. Locally people have more control over their food and word passes quickly between people when there is a problem.

What can you do to help the situation? You can support small farmers by supporting the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I would also like to see the USDA, FDA, meet the California standard and definitions for Organic foods.

I would like for Monsanto be closed down. They do not deserve the honor of being in business, for they are the major contributors to the poisoning of our lands, waters, and the people of our nation and others. It began with their "harmless" DDT, Dioxin, Agent Orange, and now GMO crops which control the market in corn, soy, cotton, Canola, and sugar beets.

How is it that Monsanto got GMO foods into the market place without allowing full independent research into the safety. I can find research from other nations regarding GMO's but none in America? Why is it that research on this has not happened in America? How is it that they have been able to fight GMO labeling? How is it that when Monsanto crops cross pollinate with a farmers heritage seeds the farmer always loses in court? We really need for government to solve these problems and quit the petty stalemates in government.

COMMENT OF BARBARA LAING

Date Submitted: Friday, May 18, 2012, 11:54 a.m.

City, State: Chicago, IL

Occupation: Photographer and Custom Framer—Small Business Owner

Comment: Why are we continuing to subsidize a mega-agricultural industry that produces food that is endangering and possibly even killing our children—corn and soy = high fructose corn syrup and fatty processed food products that are known to be unhealthy, are heavily marketed to kids especially and lead to obesity and diabetes. Talk about skyrocketing health care costs? Very foolish and taking our nation in the completely wrong direction.

Support small family farms and support more growing of health-giving fruits and vegetables. It's not rocket science!

Stop lining the pockets of huge corporate food interests and keep the interests of the American citizenry on your plate.

Thank you,

BARBARA LAING.

COMMENT OF GEORGE LAKOFF

Date Submitted: Friday, May 18, 2012, 2:26 p.m.

City, State: Berkeley, CA

Occupation: Professor

Comment: Food is central to life and health. The farm bill is really a Food Bill. It should be supporting organic, local farming, not factory farms that introduce toxics into our foods and make foods unhealthy.

COMMENT OF THERESA LAM

Date Submitted: Friday, May 18, 2012, 3:33 p.m.

City, State: East Brunswick, NJ

Occupation: Home Gardener

Comment: Since we are all working towards the establishment of local food systems, I would like to suggest giving some type of offering some type of benefit to farmers that farm on microfarms. Also is it possible to encourage local governments to become more tolerant of backyard animals such as chickens, goats, *etc.*? And give small incentives for this?

Thank you,

THERESA LAM.

COMMENT OF JOE L'AMARCA

Date Submitted: Friday, May 18, 2012, 3:20 p.m.

City, State: University Place, WA

Occupation: Iron Worker/Local 9/11

Comment: If they pass this bill, then feed the criminals that engineered this food/plant to start with! And then the crown of England, the Vatican, and the Zionist of Washington.

This food bill should be called the population reduction by Bill Gates Sr.

Natural seeds, in order to germinate them they must be kept alike Condition as if they were out on the field but not like in a seed vault.

You can't beat nature it was here before humanity and it will be here when it ends and restarts, also the fact that Mother Nature can be present in the Universe without humanity or a license but Humanity can't be anywhere without Mother Nature and their license.

Anyone of you see's God give him my e-mail and I will tell him all about the criminals that causes Humanity to suffer on this Planet.

Thank you,

JOE L'AMARCA.

COMMENT OF GWEN LAMBERT

Date Submitted: Friday, May 18, 2012, 10:13 p.m.

City, State: Dayton, OH

Occupation: Manager

Comment: Please consider keeping the full funding of organic farming and also of helping new farmers to ensure a strong next generation of farmers. Cut subsidies to big agriculture CAFO's and GMO corn, soy, rapeseed, and cotton, which have not only proved to be inferior to natural strains of the same crops, but also continue to pollute our ecosystems and compromise our own health in the long run. Please also keep intact funding for healthy lunches for children. Thank you for your consideration.

COMMENT OF KRIS LAMBERT

Date Submitted: Friday, May 18, 2012, 5:58 p.m.

City, State: Kailua, HI

Occupation: Assistant Professor

Comment: As the resident of a state where food security has been 90% dependent on importation of industrial agricultural commodities, I have experienced the effects of accidental and deliberate manipulation of Island access to food supplies mainland capriciousness.

This has made me, and many Island citizens keenly aware of the need to protect and promote small local farmers, and move toward a more self-sustainable future.

To this end I support a 2012 Food and Farm Bill that supports small farmers—not the huge factory farms that are currently the recipients of governmental subsidies.

COMMENT OF IDA LAMBRECHT

Date Submitted: Saturday, May 12, 2012, 8:23 a.m.

City, State: El Dorado Springs, MO

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: We have a small farm with a greenhouse and small livestock fruit and orchard specialty crops. I want to teach kids with disabilities (Autism spectrum disorders) how to farm and sell at local farmers market for hands on skill unable to obtain in public school. I want to see more easily obtainable grants for these types of farm program.

COMMENT OF VANESSA LAMERS

Date Submitted: Friday, May 18, 2012, 10:59 p.m.

City, State: New Haven, CT

Occupation: Student/Researcher/Consultant

Comment: We need a real farm bill—we need to cut the subsidies for unhealthy processed food and farm feed, and we need to increase the subsidies and programs supporting farmer's markets, produce, and whole foods. Really, it's that simple. Support SNAP, don't support big production. Give the people what they want—fresh food. Help us build a real agricultural system again in the U.S.!

COMMENT OF TARA LAMKIN

Date Submitted: Friday, May 11, 2012, 12:16 p.m.

City, State: Skokie, IL

Occupation: Food Scientist

Comment: I would like to see a farm bill that has the best interest of our citizens at heart, rather than the best interest of the few giant corporations that control the majority of our national food system. This would mean much less subsidizing of commodity crops to encourage farmers to branch out into other food products that can be sold more locally.

COMMENT OF TANYA LAMOTHE

Date Submitted: Sunday, May 20, 2012, 7:26 p.m.

City, State: Malta, NY

Occupation: Volunteer/Community Member/Mom/Wife

Comment: I believe we as citizens of the United States of American have a say on the food we eat, as our quality of life depends on it. My family enjoys the taste of our healthy, organic, naturally grown food from local farmers. We have the right to choose that food & know that the farmers we choose to support, continue to have the right to farm, to grow unsprayed, non-GMO, high quality food. To lose the right to farm, purchase & eat good, wholesome food to the control of corporate greed is against every Law of the Universe & that infraction will have a very high price for the future of America & our Earth. Countries around the globe are passing laws to protect their citizens from large corporations who don't care about the planet, the health of their citizens and all living things for that matter. It is the responsibility for you, those people voted into office & those appointed by the President to make wise decisions for the People of this Nation, not for the corporate few who are only interested in big \$'s for a very small community of U.S. citizens. It is my hope that this House Committee on Agriculture remembers who they are reviewing info for & in the end voting for—the American People. Please hear our words and give us back the Hope & Trust in our government to make the right choices & decisions when it comes to the food of our Nation. Let us join those countries around the globe who are interested in protecting this planet and people who live on it, with much thought and consideration for the generations beyond. Please make your contribution today—good, responsible decisions for we the People of the World.

Very truly yours,

TANYA LAMOTHE.

COMMENT OF MICHAEL LAMPI

Date Submitted: Friday, May 18, 2012, 11:41 p.m.

City, State: Bellevue, WA

Occupation: Software Engineer

Comment: Farm subsidies should be eliminated for all farming organizations with over \$1 million in revenue. Absolutely no support should be given for GMO crops and animals. Support should be given to organically grown crops and animals, and for non-aquifer depleting farming.

COMMENT OF GARY LAMPMAN

Date Submitted: Wednesday, May 09, 2012, 7:12 p.m.

City, State: Hendersonville, TN

Comment: Ladies and Gentleman,

I'm a consumer or end-user if you will. My concerns are varied but the most immediate concern is to stop the abuse of Antibiotics, Steroids, and Hormones in our food supply. Agriculture uses 8 times the amount of Antibiotics than Humans and another Point is these Antibiotics are Used on **Healthy Animals Which Become Antibiotic Resistant** and **They Cause** antibiotic resistance in Humans! These abuses have caused Humans to be Maimed and cause complications and death!

These CFO Confined Factory Organizations need to be shut down and Best Practice open range methods need to be re-established. The Biggest threat to our National Security is Monsanto who pollutes the land with terminator seed that causes farmers to buy new seed each year. Then crushing farmers who disagree with them if they choose to remove themselves from land pollution. This same company has placed third world farmers into bankruptcy and poverty. This company is no different than a payday loan shark. Monsanto seeds contaminate the soil and compromise our Food Supply! Last, GMO's need to be **Labeled!** We have a right to know where food comes from and if it is a GMO product. The FDA and the USDA have F@cked us on this recently. Are you going to do the same?

COMMENT OF MARILEE LAMPMAN, R.N.

Date Submitted: Saturday, May 19, 2012, 10:52 a.m.

City, State: Red Wing, MN

Occupation: Registered Nurse

Comment: We Need To Protect Our Food Supply!

We Cannot Allow Factory Farms And Corporate Agriculture To Control Our Food Supply! . . . By Contaminating Our Ground Water With Chemicals, Or Using Gmos In The Seed, Cross-Pollinating With Organic Farmers' Crops! This Must Stop!

I Hold Congress Responsible For Protecting The American People!

I Support:

- (1)The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- (2)Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- (3) The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- (4)Maintaining the EQIP Organic Initiative.

MRS. MARILEE LAMPMAN, R.N.

COMMENT OF ROSANNE LANDES

Date Submitted: Friday, May 18, 2012, 12:09 p.m.

City, State: Harrisonburg, VA

Occupation: Admin. Assistant

Comment: I believe that family farms are vital to the diversification and localization of food without them you are dependent on huge agricultural corporations who have no interest in providing wholesome food to a community instead they are solely interested in profit. Do not destroy family farms.

COMMENT OF LAUREN LANDFRIED

Date Submitted: Thursday, May 17, 2012, 3:23 p.m.

City, State: Affton, MO

Occupation: Dietitian

Comment: I would like to see a push to use SNAP at Farmer's Markets. This would give people who need to live off of SNAP an opportunity to purchase local produce that has been shown through research to be nutritionally superior than produce that is not grown to its prime. It also provides more money for the local

farmers to continue to farm. According to a research article, farmers have had to decrease their labor costs, accept the possibility that they may lose money, and find jobs away from the farm in order to break even financially (Hoppe, 2010).^{1*} Let's stop this trend and allow the farmers to keep their job on the farm.

COMMENT OF MOLLY LANDIS

Date Submitted: Wednesday, May 02, 2012, 2:47 p.m.

City, State: Old Greenwich, CT

Occupation: Student

Comment: Mr. Himes,

I am a student at Brown University interested in the U.S. agricultural system. I am currently taking a class about it, and it is clear that the U.S. needs to work toward a more sustainable system: ecologically, economically, and nutritionally.

So much of the farm bill allocates money toward food assistance programs such as SNAP, which is obviously important in economically difficult times when unemployment is high and many struggle to find food. The food that programs like SNAP have people buying though are not ideal—most of it is processed, high in sugar, fat and refined ingredients. Supply-side policy might be good here—help producers, local especially, to produce fresh vegetables and fruit and to have viable businesses. Also the consumer side, though—make it easier for low-income people relying on food stamps *etc.* to access fresh produce.

We need to conserve open lands as well. Incentivize farmers and land owners to keep their lands free of development, and in production.

Obviously these problems are extremely complex, and I'm sure that you understand them far better than I do. As my representative, though, I would very much appreciate if you would try to address these issues as best you can in working towards a more sustainable system.

Thank you for all your hard work.

COMMENT OF JOANN LONDON

Date Submitted: Friday, May 18, 2012, 2:24 p.m.

City, State: Ventura, CA

Occupation: Teacher

Comment: I want an organic farm bill. I want to stop subsidizing agribusiness. I want GMO's labeled. I want my food to be grown organically. I want small farmers protected. I want an end to factory farms and corn fed hormone fed cows. I support:

- the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286);
- fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs;
- the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236); and
- Maintaining the EQIP Organic Initiative.

Thank you.

COMMENT OF ARTHUR LANDRY

Date Submitted: Tuesday, May 01, 2012, 10:56 a.m.

City, State: Baton Rouge, LA

Comment: The farm bill needs to incorporate a change into the tax code for an "extended period (10 year minimum)" of the encouragement of conserving lands for agriculture, with a modification from the existing, in limbo, conservation easement legislation.

The modification would be as follow: Land placed into a perpetual conservation easement for "Agricultural Use" would allow the landholder to sell their "tax benefits" to the taxpayer of their choice within 48 months after the conservation easement is put in place.

¹Hoppe, R.A., MacDonald, J.M., Korb, P. (2010). Small farms in the United States: persistence under pressure. Economic Information Bulletin No. (EIB-63) 39 pp. <http://www.ers.usda.gov/Publications/EIB63/EIB63.pdf>.

*The information referred to is retained in Committee file.

This in addition to conserving land for agriculture uses, especially smaller landowners; (600 acres and less farmers, which encompasses the largest number of our farm properties in the USA), would also act as an “economic stimulus” for these rural areas. First, the placement of a conservation easement for agriculture uses on land that is in agriculture use, it will allow land to stay in agriculture, Second, it will trigger a taxable event on land that has traditionally not been taxed on the “hidden value” useless it is converted to some form of developed land and thus out of agriculture, permanently. Third, it will allow the small landowners to play on a level playing field as the wealthy individuals that are conserving land that only the “higher tax-bracket groups can use currently”. Fourth, it will trigger a re-investment by landowners into agricultural/rural communities throughout America. Fifth, this would make sure that monies intended for conserving agricultural lands do not get redirected. The Tax Code could limit the % a taxpayer could use of these “purchased benefits” to no more than 35% of their current tax bill. This would help all because in the long and short of it no reduction in tax revenues would be involved and it would create jobs and businesses from local business people.

COMMENT OF GISELE LANDRY

Date Submitted: Friday, May 18, 2012, 3:48 p.m.

City, State: Housatonic, MA

Occupation: Self-Employed

Comment: Large agribusiness do not understand or care about health and they must not be in charge here! It is time we reorder our priorities with a farm policy that will put organic family farms first and foremost. This is foundational for a system that will truly provide for the health and vitality of our people and environment. This will benefit your family and loved ones also. We are all in this together.

COMMENT OF PAUL LANDUSKY

Date Submitted: Friday, May 18, 2012, 3:09 p.m.

City, State: Appleton, WI

Occupation: Painter

Comment: This is about American *Family Farms*, not lobbyists or multinational agribusiness. Please consider this and vote what you know is right for all of “U.S.” and our future food security.

Thank you, Rep. Ribble.

COMMENT OF ABBIE LANE

Date Submitted: Friday, May 18, 2012, 6:21 p.m.

City, State: Atlanta, GA

Occupation: ITIL Change Manager

Comment: Please fix the Farm bill so it will actually **Help** the organic farmers, and punish **Monsanto** and other GMO organizations. Monsanto is putting farmers out of business, and this country would not be where it is today without our wonderful farmers. Please stop listening to your greed from a big bad corporation and help the little man. From a concerned consumer. Thank you.

COMMENT OF CRAIG LANE

Date Submitted: Friday, May 18, 2012, 3:02 p.m.

City, State: Santa Cruz, CA

Occupation: Nutrition, Herbal Medicine

Comment: We need more local grown foods, more organic safety, more protection for small family farmers. We need raw milk, raw cream, more sanity than mass produced Monsanto GMO unproven “so-called” foods.

COMMENT OF DARYN LANE

Date Submitted: Friday, May 18, 2012, 12:53 p.m.

City, State: Chapel Hill, NC

Occupation: Intern with Student Action With Farmworkers

Comment: I am aware that the Senate Agricultural Committee has already voted to cut \$4 million from organic research funding and cut funding to support Beginning Farmers in half. I am outraged over these cuts.

While Congress is looking to get rid of direct payments to commodity farmers, the subsidized insurance program it proposes to replace it with will allow giant com-

modity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk.

I would like to see Congress' full support for:

- (1) The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- (2) Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- (3) The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- (4) Maintaining the EQIP Organic Initiative.

COMMENT OF GINNY LANE

Date Submitted: Thursday, May 17, 2012, 9:24 a.m.

City, State: Grafton, WI

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: It is imperative that the farm bill stretches to include real incentives for farmers who are not using petrochemicals and genetically modified seed for the health of the people and the land. We can no longer deny the detrimental effects of current agribusiness on our collective health and the health of the ecosystems we live in. The farm bill needs to require that big farms have risk management plans, conservation plans. The way to grow a healthy America is not to increase the quantity of cheaply grown food or to fund access to low nutrient grocery store food, but to strengthen local food systems and fund community projects involving participatory food production, nutrition education and access to locally grown vegetables.

COMMENT OF BARB LANGER, PH.D.

Date Submitted: Friday, May 11, 2012, 1:59 p.m.

City, State: River Forest, IL

Occupation: Scientific and Regulatory Analyst

Comment: As a volunteer, I serve hungry people several times a month at the Oak Park-River Forest Food Pantry. Cutting SNAP will mean that even more of my neighbors will go hungry. Even families who receive food stamps sometimes need to come to our food pantry. Cutting SNAP will mean even less food for people already in poverty.

Government wastes so much of our tax dollars. But ensuring basic nutrition to fellow citizens and families is **Never** a waste. It is **Not** negotiable. It is **Always** the right thing to do. How can we have a civil society with starvation in our midst? Folks who don't get basic daily nutrition are unable to contribute and eventually end up in emergency rooms or worse at far higher public expense than it would have cost to ensure their basic nutrition in the first place.

To even contemplate cutting SNAP is to regress centuries to the horrors of the industrial revolution in England, when starvation in the midst of plenty was rampant. Remember Dickens' *Oliver Twist* and Blake's *Jerusalem*:

And did those feet in ancient time
Walk upon England's mountains green
And was the holy lamb of God
On England's pleasant pastures seen
And did the countenance divine
Shine forth upon our clouded hills
And was Jerusalem builded here
Among those dark Satanic mills
Bring me my bow of burning gold
Bring me my arrows of desire
Bring me my spears o'clouds unfold
Bring me my chariot of fire
I will not cease from mental fight
Nor shall my sword sleep in my hand
'Til we have built Jerusalem
In England's green and pleasant land

We're one vote away from a revival of those horrors here, such as WE have not seen since the Great Depression.

Please don't cut SNAP.

COMMENT OF CHARLES LANGFORD

Date Submitted: Tuesday, May 15, 2012, 11:24 p.m.

City, State: Corvallis, OR

Occupation: Retired College Teacher

Comment: I believe people should not go hungry, here in the U.S. or anywhere in the world. In this country we should increase the SNAP program as well as the program that supplies food banks. The stress should be on providing nutritious food, not on getting rid of agricultural surpluses. Expansion should also be made so the SNAP program could be used at farmers' markets all over the country. Thank you for your attention to this matter.

COMMENT OF SHANNON LANGHAM

Date Submitted: Friday, May 18, 2012, 6:43 p.m.

City, State: Austin, TX

Occupation: Homemaker

Comment: I am a suburban homemaker. The more I learn the more I must demand that the industrialization of our food sources, the destruction of the small farm and the dismantling of our freedom to choose something as simple as raw milk *versus* pasteurized milk. My grandfather was a dairy farmer in Mexia, TX. My great-grandparents were share-croppers in Caldwell County, TX. I'm appalled at what I am learning about where/how our food gets to the table, and concerned that government no longer represents people, but corporations. Please vote to protect our rights to sustain ourselves in the same manner that has been done since the beginning of time. Do not vote to make the masses dependent upon the profit margins of industrialized food. Thank you for your time.

Respectfully,

SHANNON LANGHAM.

COMMENT OF JUDITH LANGHANS

Date Submitted: Friday, May 18, 2012, 2:13 p.m.

City, State: San Diego, CA

Occupation: Retired

Comment: The farm bill comes up so infrequently, we have to get this right. It is time for the citizens to be heard. We want subsidies for **Good** food; not Monsanto type and non-organic foods.

COMMENT OF ELIZABETH LANGHORNE

Date Submitted: Friday, May 18, 2012, 12:14 p.m.

City, State: Lexington, VA

Occupation: Retired

Comment: Please consider the importance of preserving the small family farmer. More and more people are becoming aware of the value of their products to personal welfare and to preserving many of the values that helped this country grow. Monsanto and the large commercial farms are undermining health while the small farmer contributes to the well-being of the Earth as well as of its people.

COMMENT OF MARGARET LANGTEAU

Date Submitted: Friday, May 18, 2012, 8:06 p.m.

City, State: Plano, TX

Occupation: Health Coach

Comment: The current health crisis and obesity epidemic is a direct result of corporate influence in Washington. My job is to re-teach people on what it means to eat healthy. The current processed food system is creating our healthcare unsustainable cost situation and a nation of sick people. Help me do my job by making it cost more for people to make unhealthy choices and less to eat good fresh organic whole foods.

COMMENT OF SUSAN LANNIN

Date Submitted: Tuesday, May 15, 2012, 10:46 p.m.

City, State: Chicago, IL

Occupation: Community Volunteer

Comment: The farm bill gives us the opportunity to shape the health, equity, and long-term environmental sustainability of our American farm and food system. In shaping the omnibus bill, please include the provisions currently captured in the following three marker bills:

- The Local Farms, Food, & Jobs Act (H.R. 3286/S. 1773)
This bill sponsored by Rep. Chellie Pingree (D-ME) & Sen. Sherrod Brown (D-OH) will encourage growth in our economy by:
 - Creating economic opportunities for farmers and ranchers through local and regional markets.
 - Improving processing and distribution infrastructure for local and regional agriculture.
 - Expanding access to healthy food for consumers, including underserved communities.
 - Providing research, training, and information that farm entrepreneurs need succeed.

More info: <http://sustainableagriculture.net/our-work/local-food-bill/>

Please support local food, farmers markets, and small farmers by becoming a co-sponsor of the Local Farms, Food, & Jobs Act.

- The Beginning Farmer & Rancher Opportunity Act (S.1850/H.R. 3236)
This bill sponsored by Rep. Walz (D-MN), Rep. Fortenberry (R-NE), and Sen. Harkin (D-IA) invests in the next generation of American producers by:
 - Enabling access to land, credit, and crop insurance for new producers.
 - Assisting new producers to start and strengthen new farm and value-added businesses.
 - Helping new producers become good stewards of the land.
 - Providing training, mentoring, and research that beginning farmers and ranchers need to succeed.
 - Conducting outreach on agricultural job opportunities for military veterans.

More info: <http://sustainableagriculture.net/our-work/beginning-farmer-bill/>

Please support beginning farmers and ranchers by becoming a co-sponsor of the Beginning Farmer and Rancher Opportunity Act.

- The Community Agriculture Development Act (H.R. 3225)
This bill sponsored by Rep. Marcy Kaptur (D-OH) will promote and enhance community agricultural development in urban and other non-traditional agriculture areas by helping to:
 - Create the next generation of farmers in our nation's cities.
 - Work to eliminate food deserts.
 - Strengthen local food systems and increase marketing opportunities for small farmers.

More info: <http://www.foodsecurity.org/>

Please support urban agriculture by co-sponsoring the Community Agriculture Development Act.

Thank you for this opportunity to participate in creating our 2012 Farm Bill, a bill that will impact the health and economic well-being of all Americans, whether living in cities, suburbs, or rural areas.

COMMENT OF RUTH LANTON

Date Submitted: Friday, May 18, 2012, 12:52 p.m.

City, State: Plainview, NY

Occupation: Stay-at-Home Mom

Comment: For the next farm bill, please support organic farming and nutrition programs.

Big agricultural corporations don't need financial help, and it's a waste of taxpayer money to award subsidies to them.

Use the farm bill to support smaller farmers, newer farmers, and farms that are using fewer pesticides, including organic farms and farms using IPM.

Also save programs such as SNAP and WIC so that everybody has access to healthy food.

COMMENT OF ANGELA LAPORTA

Date Submitted: Friday, May 18, 2012, 3:54 p.m.

City, State: Pleasant Hill, CA

Occupation: Small Business Owner

Comment: Despite the influence of lobbyists, the committee must always remember that its first responsibility is to the largest number of people . . . the public. Food grown that does not treat the crops, land, and the workers who work it with respect, is not healthy, vital food for the people it feeds. Agribusiness is tainting our food and water with chemical fertilizers and pesticides, and persecuting farmers for practicing healthy agriculture simply out of control and greed. This is a crime against the American people. It is a crime against the land.

COMMENT OF ANNA LEE LARIMORE

Date Submitted: Friday, May 18, 2012, 12:19 p.m.

City, State: Portland, OR

Occupation: Student

Comment: I shop for food with the following criteria:

- (1) Are the people who grow this food getting a fair wage and wholesome working and living conditions?
- (2) Is the food grown sustainably, without chemicals and drugs or cruel conditions?
- (3) Does the farming of this food enhance the Earth or diminish it? Is the soil enriched or depleted? Are the aquifers being consumed too quickly? Is surface water being polluted?

These are the considerations I want to see put to this farm bill.

Thank you for listening,

ANNA LEE LARIMORE.

COMMENT OF GLORIA LARKIN

Date Submitted: Sunday, May 20, 2012, 7:11 p.m.

City, State: Los Angeles, CA

Occupation: Corp. Administrator

Comment: We, especially **Organic Farmers**, deserve a fair farm bill!

We're tired of the corporate agribusiness stranglehold on our system and **You**, who seem to be very out of touch with most Americans!

You need to fully fund the Conservation Stewardship Program!

Please Maintain The EQIP Organic Initiative!

No Subsidized Insurance Program! Just another way our tax dollars will get ripped off while putting our soil, environment and, therefore, our health at risk!

A lot more people are watching what happens with this farm bill than you think. If you don't do what's right for the people, **We Will Vote All Of You Out Of Office!**

Thank you.

COMMENT OF SARAH LARRABEE

Date Submitted: Friday, May 18, 2012, 2:06 a.m.

City, State: Boulder, CO

Occupation: Realtor

Comment: It's time to stop subsidies for mono-cropping, big ag, biofuels, GMO's, and toxic chemicals that pollute the Earth and grow food that is unsafe for human consumption. We need to farm in harmony with Nature, preserving wildlife, clean air, rich fertile, natural soil and untainted water.

Support family and community farms. Support organic agriculture. The citizens want that, and it is the right thing to do.

COMMENT OF JOHN LARRIEU

Date Submitted: Friday, May 18, 2012, 2:52 p.m.

City, State: Chicago, IL

Occupation: Student

Comment: Control of food sources need to belong to the people that live on that land in question, less control by big corporations when it comes to sustenance.

COMMENT OF DENISE LARSEN

Date Submitted: Friday, May 18, 2012, 3:18 p.m.

City, State: Fairfax, CA

Occupation: Corporate Trainer, Licensed Marriage and Family Therapist and Nutritionist

Comment: As someone who grew up in a farming area in Northern Cal. and with friends still farming, I understand what they are facing. I also spend the vast majority of my food dollars buying organic food at Farmer's Markets (where local farmers sell directly to us). Again, I know what they are up against with Big Ag and Monsanto. I am tired of people we elect and pay being in the pockets of Big Ag and lobbyists. **You** are working for U.S. citizens! I ask that you maintain the EQIP Organic initiative, fully endorse all of the provisions of the Local Foods, Farms and Jobs Act, fully fund the conservation program and have any new insurance subsidies be tied directly to compliance with conservation programs, and implement all provisions of the Beginning Farmer and Rancher Opportunity Act. Please start doing the Right Thing *versus* continuing to do the Wrong Thing. We are sick and tired of it! Our health, environment, country, and future are depending on people like you doing what is truly right for once.

COMMENT OF WINIFRED LARSEN

Date Submitted: Friday, May 18, 2012, 5:13 p.m.

City, State: St. Paul, MN

Occupation: Disabled

Comment: I can't help but wonder why anyone, given the choice, wouldn't want non-GMO organic foods to eat. Clean, healthy food creates healthy humans. GMO's are killing us! So called 'cheaper foods' that destroy our bodies and minds—what kind of bargain is that?

COMMENT OF LINDA LARSON

Date Submitted: Thursday, April 12, 2012, 12:10 a.m.

City, State: Silver City, NM

Occupation: Retired Retail Executive

Comment: Food insecurity impacts 25% of our nations children and it is time for congress to act to eliminate systemic hunger in this great country. Surely as the richest nation in the world we can look inward and find the compassion to do the right thing by providing food to the poor & disenfranchised.

COMMENT OF LINDA LASALLA

Comment: I grew up in Chattanooga, TN . . . many, many days I was hungry . . . I still remember those days. I am now 63—I am going to have to find a place to live and food to eat and not real sure how I am going to do that on 928.00 per month, so since I am having problems finding a part time job, I am going to have to relive my first years of my life. Shame on you for letting that happen. We have given to our country, we aren't asking for something we haven't earned . . . go look at your mom, your kids . . . do they have what they need? We don't deserve the same thing?

COMMENT OF ELIZABETH LASENSKY

Date Submitted: Friday, May 18, 2012, 3:05 p.m.

City, State: San Carlos, CA

Occupation: Administrator

Comment: It's time that the "farm bill" became the "Food Bill" and directed our national resources into encouraging healthy, locally and sustainably grown, food. We should stop paying subsidies, including crop insurance, to agribusinesses and redirect that money to assisting small and medium size farmers and ranchers and in promoting conservation and restoration of our resources.

COMMENT OF COY M. LASISTER

Date Submitted: Thursday, May 17, 2012, 8:47 p.m.

City, State: Saint Petersburg, FL

Occupation: Community Victory Garden Coordinator

Comment: I believe the House Agriculture Committee needs to explore the Farm to Fork initiatives to develop more collaborative efforts between local farm pro-

ducers, food suppliers, retail and wholesale food markets, community victory gardens and agricultural schools to improve the food delivery system that serve to produce more and better nutritional fruits and vegetables to build stronger minds and bodies of youth, adults. And seniors in underserved communities nationwide. I further believe that the community victory garden concept developed in war effort in the 1940s in communities nationwide, particularly underserved minority communities can not only serve to improve the health and well being of citizens but teach our youth the meaning of nutrition and health in all of our daily lives. I challenge the House Agriculture Committee to seek out certain Farm to Fork initiatives in the farm bill and upcoming legislation to better utilize community victory gardens and link them with farms and agricultural producers to improve the health of all American senior and youth citizens. I stand ready to work with House Committee members to develop solutions to our food and health issues. Thank you for taking the time to read this statement. Please contact me at your earliest convenience.

COY M. LASISTER,
*Senior Resident,
 Community Victory Garden Coordinator.*

COMMENT OF IRA LASTER, JR.

Date Submitted: Wednesday, May 09, 2012, 4:36 p.m.

Comment: As Congress works to modify the farm bill please do not cut aspects of the program that provides funds that provide food to needy individuals and families.

COMMENT OF JENNIFER LAUCLAN

Date Submitted: Saturday, May 19, 2012, 7:56 p.m.

City, State: Washington, D.C.

Occupation: School Librarian

Comment: We need to reform farm policies so that they support small farms and real food, not big agribusiness and processed artificial foods.

COMMENT OF JOHN LAUDENSLAGER

Date Submitted: Friday, May 18, 2012, 1:48 p.m.

City, State: Fort Worth, TX

Occupation: Graduate Student

Comment: I've heard about some of the elements of the farm bill and would like to offer my feedback. I think the time has come to reduce the amount of subsidies going to corporate farms. I know many of them get hundreds of thousands in subsidies, possibly more, that just pads their bottom line. It's hard for me to understand that in an era of conservative economics, conservative politicians want to increase those subsidies at the expense of programs that support sustainable farming. It just sounds like undue industry influence by large agribusiness and the likes of Monsanto.

Here are my other positions:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF MAUREEN LAUDER

Date Submitted: Friday, May 18, 2012, 11:54 a.m.

City, State: Victor, NY

Occupation: Retail

Comment: Please support sustainable, local, and organic agriculture in the U.S. Our reliance on pesticides, GMOs, and environmentally unsound farming practices is endangering our nation's health and food security. And concentrating our food supply in the hands of huge corporations whose primary motivations are corporate share value and profit all but ensures that our nation's food production will not be aligned with the best interests of our citizens. Please take a stand against big ag

and help craft an agriculture policy that serves the best interests of our citizens and small farmers.

COMMENT OF ANGELA LAUGHINGHEART

Date Submitted: Friday, May 18, 2012, 12:13 p.m.
City, State: Milwaukee, WI
Occupation: College Instructor
Comment: City dwellers have no understanding or control over our food industry. Legislation must protect us, not fleece us. You must be the guardians of the food supply of the people.

COMMENT OF ROSE LAUGHLIN

Date Submitted: Friday, May 18, 2012, 1:26 p.m.
City, State: Seattle, WA
Occupation: Office Manager
Comment: Organic food should be affordable for all people. Please consider subsidizing organic agriculture. It is better for our bodies it is better for the Earth. The agri-industry is obviously in cahoots with the American government. It is time for a sustainable food system in America.
 Thank you,
 ROSE LAUGHLIN,
 Seattle, WA.

COMMENT OF SUZANNE LAVINE

Date Submitted: Friday, May 18, 2012, 1:24 p.m.
City, State: Grants Pass, OR
Occupation: Sales
Comment: Please continue to support the small family farmers. It is vital that all farmers that want to farm organically can safely do so with full gov't support and no bullying by large corporations. Keep Genetically Modified products out of Oregon.

COMMENT OF SUZANNE LAW

Date Submitted: Friday, May 18, 2012, 4:59 p.m.
City, State: Ijamsville, MD
Occupation: Bookkeeper, Grandmother
Comment: Please recognize that our future depends on healthy farm practices, *i.e.*, soil and water conservation, crop rotation, and careful preservation of heirloom plant varieties. The more mankind has intensely farmed the land, the sicker we have become, and the less sustainable our practices have become. We cannot afford to abuse ourselves and our environment any longer.

COMMENT OF LIANA LAWRENCE

Date Submitted: Friday, May 18, 2012, 2:09 p.m.
City, State: Oakland, CA
Occupation: Graphic Designer
Comment: The health of the citizens of this nation depends on the food produced by the country's farmers. The current Farm Policy around subsidies allows for cheap unhealthy food to flow abundantly in our food supply. This in turn makes it easier for our population to consume, which is one of many factors contributing to the obesity epidemic. I'd like to see a farm bill that makes healthier food flow abundantly to our citizens. So that an easier, more affordable, and wiser food choice is made readily available to everyone in our communities.

COMMENT OF CHRIS LAWRENCE

Date Submitted: Friday, May 18, 2012, 6:17 p.m.
City, State: Terrebonne, OR
Producer/Non-producer: Producer
Type: Field Crops, Vegetables
Size: 50-150 acres
Comment: The farm bill has included some small budget items to encourage organic production. It is imperative that we increase spending in this area. Our gov-

ernment should not favor through legislation the growth of corporations like Monsanto. Science and experience on the ground, have clearly demonstrated that genetic modified crops are causing some serious problems in the field with the increased use of herbicides and are threatening our health in this country. If we are to continue to feed our people and be good stewards of the land, we need diversity in our cropping methods, number of seed varieties and availability of seed. I know that our elected officials have been hearing from individuals and groups that are concerned about these issues. They also donate to campaigns and deserve to be represented. It is critical to do the right thing and not favor any one side.

I would also urge lawmakers to carefully evaluate the effects of crop subsidies beyond their backyards.

Thank you for your time.

COMMENT OF TRACEY LAWRENCE

Date Submitted: Friday, May 18, 2012, 12:01 p.m.

City, State: Ringwood, NJ

Occupation: Digital Arts Consultant

Comment: I highly value the food I put in my body, and am very concerned with the farming practices being subsidized in this nation. We should be supporting small family farms that produce livestock and plant produce responsibly and healthfully. The health of our people and planet are at stake.

COMMENT OF TRINA LAWRY

Date Submitted: Friday, May 18, 2012, 12:38 p.m.

City, State: Ambler, PA

Occupation: Long-Term Unemployed

Comment: For the health of our people and the security of our nation, we should be supporting local, sustainable farms. Instead of huge corn and soy subsidies, pay large farmers to change their fields over to grow more diversified fruits and vegetables. Support initiatives that bring healthy food to the small stores in food deserts. Increase the SNAP payments for use at Farmer's Markets and stop all SNAP payments for soda and sugared drinks. Use the tax dollars you are already spending to steer the nation to a more balanced food system. Also, with so many unemployed, sustainable ag would be a great way to employ more people.

In addition, I support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF LINDA LAYER

Date Submitted: Friday, March 16, 2012, 3:06 p.m.

City, State: Lockport, NY

Occupation: Retired Cust. Service Representative

Comment: Please make sure that the farm bill passed continues to support the Food Banks and government programs such as SNAP. Many families and especially seniors depend on food banks for help. Thank you.

COMMENT OF BETTY LAYNE

Date Submitted: Wednesday, April 11, 2012, 1:33 a.m.

City, State: Albuquerque, NM

Occupation: Founder and Chairperson of a Food Pantry

Comment: I founded a Food Pantry 3½ years ago. In that period my "Participant" numbers have **Increased** by 146%. Of those we serve, 97% are Seniors living on horrific, fixed incomes. Social Security and other retirements had no COLAS for 2 years. In that same period how much did **All** other prices raise? Have you ever tried to survive on under \$800 per month income in today's world? My Participants rely on our Pantry to simply survive. It doesn't cure, but it certainly helps when they have to decide between buying food or their prescriptions. The National statistics are appalling regarding Americans who are food challenged. The U.S. spends

more money on foreign food aid for other countries than they spend for our own people who battle hunger every day. Please, please **Increase** the funding for TEAFAP programs—the need grows more each day. Roadrunner Food Bank impacts thousands of New Mexicans every, single day. A 37% decrease in Federal funding from 2010 to 2011 is criminal. More food assistance is mandatory for a disproportionate number of our State's population—not less. Thank you.

BETTY LAYNE,
Helping Hands Food Pantry,
[Redacted].

COMMENT OF LINDA LAYNE

Date Submitted: Saturday, May 19, 2012, 11:22 p.m.

City, State: Woodbridge, VA

Occupation: Unemployed

Comment: Our current agricultural system is totally broken. Full reform is desperately needed to improve our access to healthy, non-GMO food. I fully support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied **Directly To Compliance** with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

It is also **Essential** to fully fund organic research, nutrition, sustainable agriculture, and true conservation programs as this is extremely necessary to free our country from the control of industrial agriculture entities that don't have the health of the public in mind but seek to walk away with billions in taxpayer money while putting the land, soil, and environment in serious continued jeopardy.

Please Take This Opportunity to fully reform agricultural policies to protect the environment and the health of the American people while removing the subsidies that go to gigantic commodity farmers and insurance companies that don't actually comply with any established conservation policies.

COMMENT OF STEVE LAZARSKI

Date Submitted: Saturday, May 19, 2012, 10:54 a.m.

City, State: Minneapolis, MN

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: As a small scale producer and crop consultant, many of my clients are organic or sustainable farmers. They are a fast growing market, that serves the demands of the public desire to have safe, organic and sustainably raised foods. By cutting funding to organic and sustainable you will be affecting the lives of 1,000 or small scale, organic and sustainable farmers and those that support them.

It is time to do the right thing for the farmer and not for the large corporate entities that appear to be buying their way into our legislation. Get Big Business out of Congress and do the right thing for the people, the farmers, the land and the nation.

COMMENT OF HOLLY LE DU

Date Submitted: Friday, May 18, 2012, 1:47 p.m.

City, State: Oakland, CA

Occupation: Catering Chef

Comment: PLEASE do not cut the funding for organic research and to small farmers! Organics are the direction we must take for the health of society. There has been too much independent research and anecdotal evidence that pesticides and GMO's will cause huge health problems in the future and cost society millions of dollars. Please, I urge you to put as much money towards organic agriculture and small farms as possible. Thank you.

COMMENT OF ANDREA LEA

Occupation: Health Worker
Comment: Please support organic practice, local small farming and organic research. Please discontinue farm subsidies in response to agribusiness lobbies.
 Thank you.

COMMENT OF MICHAEL LEAHY

Date Submitted: Friday, May 18, 2012, 10:29 a.m.
City, State: New York, NY
Occupation: Consultant
Comment: I would like to see a food system that could react to market demands rather than be distorted by subsidies and intervention. Remove subsidies to allow small and medium-sized farmers and ranchers to earn an honest living growing and raising what they think will best meet consumer demand and protect their land and community.

JOINT COMMENT OF NANCY AND GARY LEAHY

Date Submitted: Saturday, May 19, 2012, 9:42 a.m.
City, State: Portland, OR
Occupation: Professional Window Washer
Comment: Please take in consideration the food that our population is currently taken in, in their diets. I recently changed my diet to whole foods, no dairy, no gluten and cut my meat consumption to 10%, I was having a lot of health problems and depression before I changed my diet, once I cleaned up what I was eating and went to a whole food, plant based diet, all my symptoms went away. I could not believe the energy and the clarity in my thinking after I did this. We could really make a difference in this world of ours if we could get others to eat like this, but it won't happen until we get the GMO's out of our food system. I have been a farmer all my life up until now and my husband was an agronomist we have seen firsthand what happens by putting chemicals in to our food, and the corruption in the industry. We had to sell our farm because we could no longer make a living due to the farming practices that are out there today. We have seen our community dying over the past years, due to corporate farmers buying up family farms because they could no longer compete with the bigger farmers. People have had to move away to find work because there is nothing left in the community except for a few big farmers. Again I plead please make the changes that we need so that we can have a healthier and sustainable world. Thank you for taking the time to read this.
 NANCY and GARY LEAHY

San Antonio, NM.

COMMENT OF JACQUELINE LEAVY

Date Submitted: Friday, May 18, 2012, 3:11 p.m.

City, State: Oak Park, IL

Occupation: Consultant to Nonprofit Organizations

Comment: I am a mother who's always tried to feed my family healthy foods. I reared a daughter who now helps run a restaurant with healthy foods, and a son who also advocates for community-supported agriculture, neighborhood "Farmers' Markets" and organic food to become mainstream parts of our society and economy. We must acknowledge all of the threats to health from GMOs and Factory-style farming & livestock production, and move forward toward a real transformation of our food system, including assurances that **All** Americans—no matter their race or income—have access to healthy foods. Just think how much money could be saved by providing healthy food, instead of millions of Americans suffering from obesity, cancer, and preventable diseases!

COMMENT OF RICHARD LEBER

Date Submitted: Thursday, May 10, 2012, 10:07 a.m.

City, State: Atlanta, GA

Occupation: Executive

Comment: I strongly urge the Committee not to cut the Food Stamp program. This program has been demonstrated to be one of the most effective tools for assisting Americans in poverty and experiencing hunger. Millions of American families and children rely on it every year. Cutting it would be disastrous for them and bad social policy for the country.

COMMENT OF ELAINE LEBLANC

Date Submitted: Friday, April 20, 2012, 9:57 a.m.

City, State: Shrewsbury, MA

Occupation: Director, Shrewsbury Human Services Food Pantry

Comment: I am the Director at the Shrewsbury Human Services Food Pantry, a partner agency of the Worcester County Food Bank, located at St. Anne's Church in Shrewsbury, MA. Thank you for this chance to share my concerns about hunger in Massachusetts with you.

First, I would like to tell you a little bit about the Shrewsbury Human Services Food Pantry. We are a group of volunteer-only staff consisting of women and men of all ages, backgrounds and economic situations. Our income is derived from our thrift shop as well as other benefactors who help us in this endeavor. Schools, civic organizations, churches and companies throughout the community provide support in a variety of ways. We also receive private and memorial donations along with having yearly food drives and fairs in order to better service our clients.

As of March 2012, we provided food for 1,810 registered people, which is 5% of the Shrewsbury population. Our clients represent 692 families, which has increased 13% since January. Unfortunately, there is significant potential that this number will continue to increase due to the current state of the economy, even more so during any holiday season.

Second, I know there are great difficulties ahead for you while drafting a farm bill in today's economy. But without a strong farm bill, not only will The Emergency Food Assistance Program and the Supplemental Nutrition Assistance Program struggle to maintain food resources but so will food banks across the country. This is why I ask you to continue to support these anti-hunger programs. Programs that help put food on the tables of Americans who are having trouble making ends meet.

Many of your constituents rely on the Shrewsbury Human Services Food Pantry to ensure they and their families at least meet their basic food needs and we do all we can to help them. However, charity alone cannot meet the ever increasing need for assistance in Massachusetts and the country, Federal support is extremely important, more so now than ever. Supporting and protecting anti-hunger programs is not only imperative, it's the right thing to do for Americans in need.

Again, I thank you for this opportunity to provide my thoughts about hunger in Massachusetts and the upcoming farm bill.

COMMENT OF DENNIS LEDDEN

Date Submitted: Saturday, May 19, 2012, 8:14 a.m.

City, State: Fiddletown, CA

Producer/Non-producer: Producer

Type: Fruits, Vegetables

Size: Less than 50 acres

Comment: We farm organically, yet find little or no support in the current Farm bill like "factory" farms who use insecticides, pesticides, and chemical fertilizers. Please consider the small farmer who grows organically and focuses on sustainability and enrichment of the soil and our Earth by including a provision for "Organic Farming".

Thank you.

SUBMITTED STATEMENT BY MICHELE E. LEDOUX, EXECUTIVE DIRECTOR, LEWIS COUNTY COOPERATIVE EXTENSION ASSOCIATION, LEWIS COUNTY, NY

This is some information I have from working with forestry communities and individuals in Northern New York. Thank you for letting me submit this important information.

Farm Bill Programs and the Northern New York Forest Communities

The 2008 Farm Bill authorized several programs targeted specifically to the opportunities and needs of Northern New York and Northern Forest communities. These programs address the crucial intersections between forest stewardship and sustainable economic development by directing resources to projects that grow jobs and create local wealth through the sustainable use and management of natural resources. In reauthorizing the farm bill in 2012 Congress should focus on five key areas (in priority order) that will better enable forest conservation, stewardship and benefit New York's rural economy:

1. Maintain Rural Development investments and sustain focus on the Northern Forest region.
2. Promote policies for sustainably produced biomass energy production.
3. Improve conservation programs for forests.
4. Combat forest-related invasive species.
5. Strengthen forestry outreach, education, research and inventories.

Maintain Rural Development Investments and Focus on the Northern Forest Region

Extreme fiscal challenges under which the farm bill will be written and the pressure to cut mandatory funding. However, Rural Development investments have already made a disproportionate contribution to deficit reduction as investments in this critical area have fallen by nearly $\frac{1}{3}$ since 2003. These huge cuts to Rural Development come at a time when the rural communities and individuals represent the most need access to the agency's grants and loans, which help spur private capital to finance infrastructure, housing and business development. Action to reverse this decline in funding and the impending deeper cuts signaled by the discretionary spending targets of the Budget Control Act are critical to helping rural individuals create and sustain vibrant rural communities and regions. Nearly all Rural Develop-

ment programs are funded with discretionary funding through the appropriations process. However, Rural Development did receive mandatory funding in the 1996, 2002 and 2008 Farm Bills. The Rural Development title has no baseline for the 2012 Farm Bill. Congress and the Administration need to work to ensure that rural investments such as USDA Rural Development do not receive disproportionate cuts. Rather inclusion of mandatory funding for Rural Development in the 2012 Farm Bill should be considered. The 2012 Farm Bill will be seriously flawed if no funding is maintained to enhance economic opportunity in rural communities and regions.

For the Northern Forest region, the 2008 Farm Bill established the **Northern Border Regional Commission**. This Federal-state regional commission was created to target resources to promote economic growth strategies and projects within the northern portions of the four-state region of Maine, New Hampshire, New York and Vermont. These efforts focus on leveraging the public, private and philanthropic resources needed to develop and sustain the community building blocks for economic competitiveness and development in the most severely distressed portions of the Northern Forest region, such as: transportation and basic infrastructure, job skills training and entrepreneurial development, telecommunications, resource conservation, tourism, and recreation, and sustainable energy solutions. The Commission has awarded a total of \$2.5 million in grants in the region since FY10. Retaining this regional focus not only helps to leverage rural investment in Northern New York and the Northern Forest but provides the flexibility to help meet the unique needs of this four state region.

Promote Policies for Sustainably Produced Biomass Energy Production

The 2012 Farm Bill has the opportunity to respond to the regionally significant needs of fuel oil dependency in the Northeast while leverage substantial local economic benefits to Northern New York and the Northern Forest region by strengthening policies and programs that enable generation of renewable energy from forests. Renewable energy markets have potential to help supplement traditional forest products markets with a complimentary market for forest owners, helping to keep forests as forests. Wood energy represents a tremendous economic opportunity in the Northeast, which accounts for 84% of the U.S. consumption of home heating oil. A homeowner switching from oil to wood pellets for heat will save an average of 40% annually on their heating costs. Substituting a locally produced fuel for imported oil keeps energy dollars local, and strengthened demand for local wood pellets and wood chips sustains and grows jobs in the local forest economy.

The farm bill can strengthen these opportunities by continuing to support renewable energy research and development and strengthening the focus in R&D on forest-related energy opportunities that minimize impacts on wildlife, water and habitats. The farm bill should also include renewable energy infrastructure development assistance for sustainable community scale projects that focus on efficient biomass technologies such as **thermal and combined heat and power applications** through the Community Wood Energy Program. The purpose of the Community Wood Energy Program is to encourage the development of community wood energy plans and to provide resources for the acquisition or upgrade of community wood energy systems. These “community scaled” efficient technologies have the strongest potential to support sustainable forest management, enable new local markets for forest land owners, and support rural economic development. Several communities in the North Country have taken advantage of using wood for thermal applications that reduce their dependency on foreign oil and are seeing annual fuel cost savings that can help reduce property taxes.

Improve Conservation Programs for Forests

Farm bill conservation programs offer a variety of tools for forest owners to improve their management practices as well as help keep their forests intact and economically viable. These programs help improve wildlife habitat for hunting and fishing, help forest landowners and farmers who own forests implement practices to keep our water and our air clean, lessen flood impacts, and help landowners combat insects, disease, and invasive species.

To ensure these Conservation Programs continue to provide conservation tools for forest owners, the 2012 Farm Bill should:

- Reauthorize the **Environmental Quality Incentives Program (EQIP)** and the **Conservation Reserve Program (CRP)** that benefit forest and agricultural land owners by encouraging sound management practices and protecting critical ecological resources.
- Reauthorize the **Forest Legacy Program (FLP)**, and the **Community Forestry and Open Space Conservation Program**.
- Reauthorize and revise the **Grassland Reserve Program (GRP)** and the **Farm and Ranch Lands Protection Program (FRPP)**.

Combat Forest-Related Invasive Species

19 million acres of New York forests are at risk of increased mortality due to insects and disease. To help combat these forest-related invasive species the 2012 Farm Bill should support programs that enable New York and our communities detect and rapidly respond to invasive pest threats that if not addressed could result in ecological and economic damage possibly in the hundreds of millions of dollars. Specifically, the 2012 Farm Bill should:

- Maintain the **Plant Pest and Disease Management and Disaster Prevention Program**. This program helps build and preserve critical plant health safeguarding initiatives, helping to protect forests or mitigate damage of invasive.
- Support continued funding as authorized for **Early Plant Pest Detection and Surveillance Improvement Program**.
- Support **Cooperative Forest Health Management Program** within USDA Forest Service State and Private Forestry.

Strengthen Forestry Outreach, Education, Research and Inventories

Forestry outreach and education activities are essential for engaging forest owners in conservation and management activities on their land. Without these activities and programs, landowners will not have the knowledge and tools to take the next steps and practice responsible management on their land. This education and outreach must be informed by solid forestry research and a comprehensive forest inventory that provide real-time information on health and condition of our forests. To strengthen the availability of forestry outreach, education, research, and inventory, the 2012 Farm Bill should reauthorize and reaffirm the importance of the **U.S. Forest Service's Forest Inventory and Analysis Program (FIA)** and direct the Agency to enhance the program's efficiency and effectiveness to ensure the program is fully implemented.

COMMENT OF ANTHONY LEE

Date Submitted: Friday, May 18, 2012, 2:32 p.m.

City, State: Irondequoit, NY

Occupation: Attorney/Consultant

Comment: My wife and I would like to see Congress pass a Food & Farm Bill that enhances food safety, helps small family farmers, preserves SNAP and WIC programs and limits or eliminates the subsidies for "industrial factory farms" and (CAFOs). Encouraging more small family farms to develop and flourish, limit the proliferation of highly processed and nutritionally barren foods while allowing access to fresh fruits and vegetables for **All** American should be a priority for both the House and Senate. I urge you to make this a Bipartisan effort to help make this nation strong again. A strong healthy body in our children will help them to have strong and sharp minds to keep American on top.

COMMENT OF GLORIA LEE

Comment: As someone who recently stopped eating all animal products due to health and moral reasons, I think that it's irresponsible for our government to continue to pump money into an industry that is more concerned about profit than putting healthy, uncontaminated food on tables. Instead of subsidizing farmers to grow grain for livestock that will be slaughtered, that money could be funneled into growing organic vegetables and grains for human consumption. Why do I have to pay more money to eat non-GMO and pesticide free food? Food that costs less to produce might I add.

COMMENT OF ANNE LEGÈNE

Date Submitted: Friday, May 18, 2012, 1:03 p.m.
City, State: Great Barrington, MA
Occupation: Musician
Comment: The new farm bill needs to look to the future health of the planet and the population. It needs to reflect the vital understanding that small organic farms are the future, the only sustainable way to produce healthy food in a time when agriculture is contributing heavily to global warming. Genetically modified products, exposed to ever growing amounts of pesticides, are threatening the health of livestock and people, and mass produced food is lacking more and more in vital nutrients, though not in chemical additives. Hence the bill needs to support and encourage small (organic) farms, rather than make life more difficult for them. It needs to cut out all subsidies and loopholes for industrial giants like Monsanto and factory farms. It needs to reflect the reality of the strain that Monsanto's monopoly on seed has caused small farmers, who now pay many times the amount for their seed corn that they used to pay, and it needs to help get this situation back to normal. The farm bill needs to reflect the needs of farmers, not the wishes of corporate power.

COMMENT OF EMILY LEHECKA

Date Submitted: Friday, March 23, 2012, 3:27 p.m.

City, State: Harrisonburg, VA

Occupation: Self-Employed

Comment: It is so disheartening and unnecessarily difficult to find meat that is not tainted with hormones or antibiotics. It is even more difficult find fruits and vegetables that have not been subjected to pesticides and genetic wizardry.

STOP allowing companies like AIG and Monsanto from manipulating the toxicity of our nation's foods.

COMMENT OF GARY LEIGH

Date Submitted: Thursday, May 17, 2012, 8:18 p.m.

City, State: Granada Hills, CA

Occupation: Retired

Comment: You need to promote hydroponics to grow crops we are losing good ground soil to plant crops we need ways that could be used in deserts to grow fruits and vegetables. This would help third world countries as well. Also use of solar and led technology to help grow 24 hrs. a day.

COMMENT OF LEN LEIKAS

Date Submitted: Friday, May 18, 2012, 11:01 p.m.

City, State: Fargo, ND

Occupation: Retired (Former Farmland Owner)

Comment: I'm very concerned about the state of agriculture in the USA. My roots are with the old fashioned family farm. I think there is much evidence that the corporate controlled agriculture produces an inferior product that has resulted in a steadily deteriorating health of our citizens. The emphasis on GMO crops, anti-

biotics, growth hormones and the like will only lead to health problems and many countries ban such products for human consumption. I accept that the consumer is also to blame for the epidemic of diabetes and obesity, but I ask that you look beyond pragmatics and your loyalty to big ag and push for the family farm and the health of our nation. Thank you.

COMMENT OF SUSAN LEITE

Date Submitted: Friday, May 18, 2012, 10:10 a.m.

City, State: Quinault, WA

Occupation: Clerk

Comment: Please support American farmers and fund the Organic Agriculture Research and Extension Initiative. Organic food is healthier for people and the environment.

COMMENT OF JOSEPH LEMIEUX

Date Submitted: Thursday, May 17, 2012, 8:29 p.m.

City, State: Spring Hill, FL

Occupation: Retired

Comment: Give the money to Organic Farmers, we don't need your chemical fertilizers and pesticides and GMO crops. What we need is clean food and healthy soil.

COMMENT OF JANIE LEMKE

Date Submitted: Thursday, May 17, 2012, 3:55 p.m.

City, State: Bedford, IA

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: Get the government out of private business . . . phase out the "crop insurance" and subsidy payments over a period of 5–10 years and let the farmers who can farm do so. Eliminate the Dept. of Ag., along with most of the Federal departments and **All** of the "czars". The Federal government is usurping the authority and responsibility of the state and local governments. Stop it now or it will become unstoppable.

COMMENT OF EDWARD LEMON

Date Submitted: Friday, May 18, 2012, 12:19 p.m.

City, State: Brattleboro, VT

Occupation: Software Engineer

Comment: Living in rural Vermont, I have ready access to healthy food, at least during the summer. Unfortunately, many Americans do not have this luxury, because the farm bill currently skews production in the direction of unhealthy foods like corn syrup. You can see the consequences of this in any grocery store—lots of junk food, and very little quality food. You can see it in our school cafeterias, where recently pizza was listed as a vegetable.

This needs to change. The farm bill should be promoting the production of foods that are safe and healthy, not foods that produce obesity. The focus should be on quality, not quantity. Subsidies to corporate farms need to stop. The United States can't afford to continue promoting unhealthy eating habits with tax dollars.

COMMENT OF CHRISTA LEMONS

Date Submitted: Saturday, May 19, 2012, 8:09 a.m.

City, State: Paw Paw, WV

Occupation: Artist

Comment: We, as a country, need to be much more diligent about food supplies. Knowing where the food comes from and that it is being grown safely and with our health foremost in mind should be key in any Food Bill that is under consideration. I **Do Not** want to eat GMO foods, meat that has been raised in horrendous conditions and then slaughtered in even worse facilities let alone food from across the world. We **Must** stop thinking that money and big agribusiness is the way to go. We need to support small local farmers and Community Supported Agriculture so we can insure safe healthy food for us all.

COMMENT OF LUKASZ LEMPART

Date Submitted: Friday, May 18, 2012, 1:33 p.m.

City, State: Santa Clara, CA

Occupation: Software Engineer

Comment: We need to stop subsidizing corn and meat. Corn is essentially a nutritional no-op and meat is one of those things at the smallest point of the food pyramid. We should be eating significantly less of it than anything else. Subsidies need to go to local, sustainable farmers who grow nutritious fruits, vegetables, and grains not to polluting money hungry agribusiness.

Farming has a great effect on our environment and the health of Americans. With good farming practices we can clean up our rivers, cut down on land use and water use, and at the same time provide the population with the nutrients they really need.

I firmly believe that re-evaluating food subsidies will save the country billions of dollars in long term health costs.

COMMENT OF HEIDI LENERT

Date Submitted: Friday, May 18, 2012, 1:50 p.m.

City, State: New Orleans, LA

Occupation: Glass Blower

Comment: I come from a farming family in Louisiana and have watched them struggle, but am very proud of the hard work and dedication they have shown. With all the new research on the dangers of GMO foods and chemicals like fertilizers, organic agriculture has become more important than ever. Please support small farms and the backbone of our state and country.

COMMENT OF PATRICIA LENNOX

Date Submitted: Friday, May 18, 2012, 1:44 p.m.

City, State: Potsdam, NY

Occupation: United Methodist Pastor

Comment: I believe all people, rich and poor, deserve healthy, organic unprocessed foods to eat. We are seeing the results of farm/factory diets with excessive obesity and diabetes. Why are we allowing the American people to be experimented on with GM foods and rewarding farmers for their use of chemicals that don't belong in our bodies, selling us crops harvested from toxic soils? I support local, small sustainable farming practices and I support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF KELLY LENTZ

Date Submitted: Friday, May 18, 2012, 1:21 p.m.

City, State: Ukiah, CA

Occupation: Assistant Store Manager

Comment: In order to meet the serious challenges of the 21st century, U.S. agricultural policy in the farm bill must shift from its focus of creating cheap commodities and artificially propping up income for farmers, toward implementing best agricultural practices for sustainable and organic production methods. U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers first.

I fully support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

- Maintaining the EQIP Organic Initiative.

COMMENT OF NICK LEON

Date Submitted: Friday, May 18, 2012, 6:12 p.m.

City, State: San Jose, CA

Occupation: Retired Educator

Comment: Corporate welfare in the form of agriculture subsidies needs to be ended. Assistance to family farms and ranches is where the money needs to be channeled.

COMMENT OF BILLIE LEONARD

Date Submitted: Saturday, May 19, 2012, 12:12 a.m.

City, State: Rathdrum, ID

Producer/Non-producer: Producer

Type: Greenhouse/nursery

Size: Less than 50 acres

Comment: Dear Raul Labrador, we as consumers and producers need laws that protect natural food production. We need to be able to produce organic food for ourselves as well as other consumers. Please support a fair farm bill that protects the "little farmer" as well as the corporate farms in their production of agricultural products.

Thank you,

BILLIE LEONARD.

COMMENT OF JOAN LEONARD

Date Submitted: Friday, May 18, 2012, 8:41 p.m.

City, State: Fridley, MN

Occupation: Retired

Comment: The small farmers should be the only farmers who receive farm subsidies as they are the ones who actually farm and care for their land. Large agribusinesses are only in it for the profit and will put whatever it takes, no matter how much herbicides and fertilizers until the land can produce no more. Land is our precious resource and we need to carefully guard it. In other words, we need stringent regulations on this.

COMMENT OF RITA LEONARD

Date Submitted: Sunday, May 20, 2012, 12:52 a.m.

City, State: Portland, OR

Occupation: Special Ed Para-educator

Comment: It's time we redirected military funding that is going toward preemptive invasions and apply it instead toward helping feed people. It's a poor choice whether to starve to death or be shot to death.

COMMENT OF SAM LEOPOLD

Date Submitted: Friday, May 18, 2012, 10:12 p.m.

City, State: Airmont, NY

Producer/Non-producer: Producer

Type: Dairy, Field Crops, Nuts, Poultry/poultry products, Vegetables

Size: 50-150 acres

Comment: We grow for a community of 150 people. We share labor and produce. Sell what is left. We have a care facility for our elders, and gardens provide life sustaining food and activity. I am convinced that outside business interests could never respect us or even understand how people would want to live for the values we enjoy. Cooperative ventures are not safe if organic agriculture is not safe.

COMMENT OF LORRAINE LEPORE

Date Submitted: Saturday, May 19, 2012, 8:13 a.m.

City, State: Egg Harbor City, NJ

Occupation: Executive

Comment: Vital programs such as nutrition, conservation and support for organic and sustainable agriculture must not be cut. Also, GMO's must be stopped to ensure the health of our nation!

COMMENT OF GAIL LESCHER

Date Submitted: Saturday, May 19, 2012, 7:43 p.m.

City, State: Springfield, MO

Occupation: Organic Gardener, Housekeeper, Community Education

Comment: Dear members of the House Committee on Agriculture,

The time is now to make significant changes in the way agriculture is funded in this country. All signals point to a degradation in the environment, in our citizen's health, and in the compromised nature of our politicians to act on behalf of the people of the United States. We need those who were elected by the people to support the local foods and farms act (H.R. 3286), and support conservation issues that positively benefit the citizens of this country through long term benefits of clean air, water, and the rebuilding of our soils depleted by commercial agriculture. Please turn a deaf ear to the money coming from self-serving corporate entities and start making decisions that benefit the people.

Sincerely,

GAIL LESCHER.

COMMENT OF DANIEL LESTER

Date Submitted: Friday, May 18, 2012, 2:50 p.m.

City, State: Columbia, MO

Occupation: Graduate Student

Comment: Please make sure and support a farm bill that supports sustainable, local, organic agriculture that is fair to producers, consumers, and the land.

COMMENT OF LAURA LESTER

Date Submitted: Wednesday, May 09, 2012, 12:25 p.m.

City, State: Atlanta, GA

Occupation: Advocacy and Education Director Atlanta Community Food Bank

Comment: I work with the Atlanta Community Food Bank, which serves 38 counties in NorthWest Georgia. In the last 2 years we've seen a 30% increase in our food distribution per year. This is because the demand for emergency food assistance has skyrocketed in the last several years. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs. We can't allow our children and seniors to go hungry. This is not only a moral imperative, but an economic one as well. Hungry people can't learn in school, have increased health problems, and miss more days off from work. Cuts to the nutrition programs will only increase our costs in the long-term. Please protect these programs.

JOINT COMMENT OF RUSS LESTER AND JENNIFER MOFFITT

Date Submitted: Friday, May 18, 2012, 12:09 p.m.

City, State: Winters, CA.

Producer/Non-producer: Producer.

Type: Nuts.

Size: 1,000+ acres.

Comment: As a organic walnut farmer, I ask that you . . .

1. Maintain EQIP Organic Initiative and protect the Conservation Stewardship Program from unfair funding cuts, and improve it by ranking applications solely on their conservation benefits. As farmers, we count on CSP and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife—all while farming profitably.
2. Endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). This act will help ensure that the farm bill makes healthy food widely available to all Americans—including schoolchildren! We must provide flexibility for states and local districts to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.
3. Fully fund the Organic Research and Extension Initiative (OREI) at the 2008 level.
4. Support all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

COMMENT OF COURTNEY LEVASSEUR

Date Submitted: Friday, May 18, 2012, 2:29 p.m.

City, State: Omaha, NE

Occupation: Grocer

Comment: As a consumer and member of the public, I believe it has become increasingly important to practice better farming techniques and to share more information with the public about where our food is coming from. I volunteer on a weekly basis at a local organic farm with in my community and I believe that supporting more local organic farming practices will not only benefit our health, but helps build support and cohesiveness in our communities. Too long have we had to ask for our local grocery products to be labeled more clearly, too long have I had to wonder, what are ½ the ingredients in this box of food and too long have the good men and women of this country had to fight for their own rights and land when big ag. companies get handed regulations in their favor. I want to live in a country where I can trust my government and be proud of what they do for us and ethical/sustainable farming practices. Please help us build better communities and grow healthier food.

Thank you for listening,

COURTNEY LEVASSEUR.

COMMENT OF JOSLYN LEVE

Date Submitted: Saturday, May 19, 2012, 12:43 p.m.

City, State: Palo Alto, CA

Occupation: Homemaker

Comment: I am appalled by the drastic cut to food stamp funding when farm subsidies are still in place. There needs to be a shift in priorities in our farm policy, where we support sustainable growth while actually feeding our citizens. We are doing something wrong when nearly 10% of children in the U.S. have experienced food insecurity in 2011.

Our reliance on industrial agriculture brought advances and prosperity in the past; now we are both an obese and malnourished society, saddled with a system that leads to environmental degradation.

I urge you to support legislation that takes care of our citizens, our environment and that helps create the next generation of farmers. Please vote for H.R. 3286 and H.R. 3236.

COMMENT OF DAVID LEVIN

Date Submitted: Friday, May 18, 2012, 2:40 p.m.

City, State: Haverford, PA

Occupation: Disabled Teacher

Comment: Please focus on support for small, family farms as opposed to large, industrial ones. Please regulate these larger ones carefully to protect the environment and minimize the damage of using chemicals such as pesticides. Please label genetically altered produce and products, ensure sustainability of land and of good lives for these hard-working providers of what feeds and sustains us all. Help them channel excess production to feed the poor, practice their craft with the most humane treatment of animals and land.

Thank you,

DAVID WALDEN,
Levin, PA.

COMMENT OF DEBORAH LEVIN

Date Submitted: Friday, May 18, 2012, 2:06 p.m.

City, State: Camarillo, CA

Occupation: Retired

Comment: I oppose the current way most of our produce and animal foods are being grown and raised (the big, corporate, inhumane way of producing food). Particularly the cruel and inhumane way animals are raised, housed, and killed for food production; and the use of pesticides, harmful substances, and GMOs in growing our produce.

COMMENT OF GORDON LEVIN

Date Submitted: Friday, May 18, 2012, 4:04 p.m.

City, State: Helena, MT
Occupation: Scientist
Comment: Our farm policy needs to support small producers, crop diversity, sustainable practices and soil conservation. The farm bill should not be a subsidy for Big Ag and Big Chem.

COMMENT OF PENNY LEVIN

Date Submitted: Friday, May 18, 2012, 1:39 p.m.
City, State: Wailuku, HI
Producer/Non-producer: Producer
Type: Field Crops, Specialty Crops, Vegetables, Other
Size: Less than 50 acres
Comment: Look to history. The ability of this nation to feed itself with healthy, organic, locally-sourced inputs is how we have weathered all storms in the past, and will in the future. Every community should be able to source the food on their plates within a radius of 50 miles or less. This will cut dramatically reduce our intake and dependency on fossil fuels and increase local farm employment. Nationally and internationally, the data is clear that small farms (a few acres) provide a livelihood to more people per acre than industrial agriculture. The highest on-farm costs are fossil fuel based inputs (chemical fertilizers, herbicides and pesticides). None of those inputs create more soil. Supporting organic agriculture and small farms is imperative to restoring and creating better soils. That only comes from organic material inputs (mulch).

Here in Hawaii, the runoff from large scale agriculture into our oceans, kills our reefs and causes tremendous soil loss. On the mainland, the same practices fill your rivers and end up in the ocean. The deep poverty of the dust bowl era was caused by the very same agricultural practices the farm bill continues to maintain and support. We need a shift from subsidizing large agriculture and bad practices, to supporting small scale, localized and organic agriculture. It's time to get off the debt machine. I support you support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs **Or** organic agriculture practices.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

I do not support NRCS becoming the deciding factor for compliance, as it is a program that does not work, nor is of interest for all farmers who may be implementing excellent practices; however, I support maintaining the EQIP Organic Initiative.

Please support these measures and help to improve the capacity of this nation to feed itself and care for its natural resources for our future generations.

Thank you.

COMMENT OF DONNA LEVINE-SMALL

Date Submitted: Friday, May 18, 2012, 2:00 p.m.
City, State: Greeneville, TN
Occupation: Writer
Comment: We need an organic food bill and a healthy food bill—please don't approve a bill that will reward agribusiness for not having the decency to keep consumers' health in mind and trying to destroy small farms—please remember that you too have to eat and if you approve bills that continue to allow agribusiness to contaminate the food supply you and your family will have to eat this food also—and if you take food stamps away from people—many people will starve.

COMMENT OF PEGGY LEVITON

Date Submitted: Friday, May 11, 2012, 7:28 p.m.
City, State: McKinleyville, CA
Comment: Please fund the Organic Agriculture Research and Extension Initiative at \$30 million per year. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture. As an eater, this is important to maintain the vitality and ability to feed all of us in the most healthful way possible, avoiding unnecessary contaminants and toxic chemicals.

COMMENT OF CORINNA LEWIS

Date Submitted: Friday, May 18, 2012, 12:37 p.m.

City, State: Ithaca, NY

Occupation: Program Coordinator

Comment: Please pass the Healthy farm bill. I live in a rural community, and wish there were balanced incentives that promote the long term health of farmers, consumers and our land. But it is more like Wall Street, where you get rewards for pillaging today and leaving the bill for tax payers tomorrow. Please improve our democracy by improving smart, long-term planning. Thank you.

COMMENT OF DONALD LEWIS

Date Submitted: Friday, May 18, 2012, 10:00 p.m.

City, State: Goode, VA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I was an Organic Dairy Farmer in Vermont 1950. Won The New England in Winter Green Pastures Contest over hundreds of Chemical Farmers. Wrote A Book, *Leaned by the Fencepost*. It is a story, information and education doing without chemical. Theme SOIL FOOD and Health. Can prove Organic is best.

COMMENT OF GRAHAM LEWIS

Date Submitted: Saturday, May 19, 2012, 2:17 a.m.

City, State: Eugene, OR

Occupation: Retired

Comment: We the People are outraged at how the U.S. government has allowed Big Corporate/Industrial Agribusiness to squeeze out the family farmers who still give a damn about People Over Profits. Local and organic is the massive trend. I hope you catch up, sooner rather than later. Thank you.

COMMENT OF JILL LEWIS

Date Submitted: Friday, May 18, 2012, 10:22 p.m.

City, State: Horseheads, NY

Occupation: Industrial Engineer and Strong Environmentalist

Comment: In general the U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists. Organic farming is critical to our health and we need to start labeling food that contains GMO's!

We need you to fully endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

Also, fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

Maintaining the EQIP Organic Initiative.

COMMENT OF LAWRENCE LEWIS

Date Submitted: Friday, May 18, 2012, 5:55 p.m.

City, State: Osceola, MO

Occupation: Retired Minister

Comment:

- (1) I'd like to see compliance with conservation practices as a requirement for receiving crop insurance assistance.
- (2) Let's retain value-added producer grants for existing food procurement programs. That will encourage local food production and processing, which in turn will increase food security for our region and nation. Also, it opens the way for schools to buy local, in-season food which will reduce the obesity rates and enhance over-all health among our young people.
- (3) Retain effective conservation programs.

(4) Fund beginning farmer/rancher development programs, which like the value-added grants will strengthen local food production in a decentralized way and hence strengthen the U.S. as a nation.

(5) Fund organic agriculture research and extension initiatives, for long-term better health for all.

Thank you for your attention to my recommendations. The Missouri Environmental Coalition did the research that enabled me to form my convictions. As I live in a rural county seat town in western Missouri, the agriculture legislation will have a direct effect on people I know and on the quality of life in my region in the Osage River watershed.

COMMENT OF PATRICK LEWIS

Date Submitted: Friday, May 18, 2012, 3:18 p.m.

City, State: Emeryville, CA

Occupation: Retail Food Buyer

Comment: I have worked in the food industry (either manufacturing or retail) for over 27 years of my life. As such, I feel qualified to state that the current farm bill is insufficient to support U.S. agricultural needs. We need to stop giving subsidies to huge agribusiness and insurance companies, and instead focus Federal funding on a more efficient and localized system to support the needs of the American people. I advocate for:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Please consider my comments equally as an average citizen despite my inability to compete vocally with those who may have greater influence on your committee due to the depth of their pockets. We need to create a level playing field for all, rather than the “same old, same old” which is failing the American people by repeatedly giving our tax \$ to those **Not** in need of them. Thank you.

PATRICK LEWIS.

COMMENT OF PRISCILLA LEWIS

Date Submitted: Tuesday, May 15, 2012, 6:49 p.m.

City, State: Portland, OR

Occupation: Health Care Administration

Comment: Dear Representative Bonamici,

I am writing to stress the importance of reauthorizing the farm bill for hungry Oregonians. Oregon ranks number 1 in childhood hunger nationally—SNAP and TEFAP are essential for ensuring that these children have any shot at a healthy future.

Best,

PRISCILLA LEWIS.

COMMENT OF VICKI LEWIS

Date Submitted: Friday, May 18, 2012, 11:57 a.m.

City, State: Olympia, WA

Occupation: Retired

Comment: It is time to get rid of tax breaks to big farm operators and give to the small farms and organic farmers. They are the future of this country. Stop GM food.

COMMENT OF MARIANNE LEWMAN

Date Submitted: Saturday, May 19, 2012, 12:49 p.m.

City, State: Manson, WA

Producer/Non-producer: Producer

Type: Fruits

Size: Less than 50 acres

Comment: My husband grows apples the conventional way. In order to grow organically the growers surrounding us need to do the same. The “system” does not support organic. We can’t go to Wilber Ellis or Northwest Wholesale for support if we want to cut down on the dangerous chemicals. The industry won’t change unless they are forced to for monetary reasons, or if mandated. Our beautiful valley is choked with chemicals.

COMMENT OF OLIVA LEYTON

Date Submitted: Friday, May 18, 2012, 12:06 p.m.

City, State: Los Angeles, CA

Occupation: Self-Employed

Comment: Please, **Please**, do everything you can to help protect small farmers and their ability to carry on their livelihood, both conventional and organic farmers alike. Don’t let big ag squeeze them out because they don’t want the competition . . . we the people **Want** our small, local farms!

COMMENT OF BARRY LIA

Date Submitted: Friday, May 11, 2012, 5:47 p.m.

City, State: Seattle, WA

Occupation: Consultant

Comment: I am an urban homesteader and consultant, researcher, and educator in biodynamic husbandry. We need support for research in organic, biodynamic, permaculture, and agroecological farming. See the National Research Council report, *Toward Sustainable Agricultural Systems in the 21st Century*.^{*} We need support for educating and training these new farmers.

COMMENT OF LINDA LIANG

Date Submitted: Friday, May 18, 2012, 2:34 p.m.

City, State: San Francisco, CA

Occupation: Professional

Comment: I want the House of Representatives to make policies that support small-scale family farmers who are stewards of our land and nourish our communities with clean, healthy food.

COMMENT OF WENDIE LIBERT

Date Submitted: Friday, May 18, 2012, 12:42 p.m.

City, State: Washburn, WI

Occupation: Registered Nurse/Adjunct Faculty WI Indianhead Technical College

Comment: It is clear from an ever-growing body of research that our current short-sighted practices in agriculture/agribusiness put the health of people across the globe and the very sustainability of life on this planet at risk. I am, as healthcare professional and American consumer, in support of development of agricultural policy and practices that focus on unbiased and transparent research information, promoting local food production, supporting family and small-scale producers, promoting biodiversity in food production, and supporting organic/sustainable farming methods. It is not acceptable to me for policy-makers to continue to subsidize agricultural practices based on “big business” at the expense of the livelihood of small producers and the health and wellbeing of human beings. This is the basis of my voting decisions.

COMMENT OF ROBIN LIBOW

Date Submitted: Friday, May 18, 2012, 5:10 p.m.

City, State: New York, NY

Occupation: ESL Teacher

Comment: I am disgusted by the amount of taxpayer money that is going to grow tons and tons of soy and corn, that goes only to Agribusiness.

It is about time my government responds to the needs of the obesity crisis among children and adults in this country, and supports small local farmers, and subsidizes **Vegetables and Fruits**, not fast food and corn, and agribusiness.

^{*}**Editor’s note:** the report, *Toward Sustainable Agricultural Systems in the 21st Century*, is available at http://www.nap.edu/catalog.php?record_id=12832. The “Brief” is retained in Committee files.

COMMENT OF JULIANNA LICHATZ

Date Submitted: Friday, May 18, 2012, 3:44 p.m.

City, State: Carbondale, CO

Occupation: Teacher

Comment: I support a right to choose from whom I buy my food. I want my food labeled and I want to be able to buy, local, non-fertilized, non-herbicides, non-GMO food. Please support family farmers and local economies.

COMMENT OF REGAN LICHTENBERG

Date Submitted: Wednesday, May 02, 2012, 10:40 a.m.

City, State: Baltimore, MD

Occupation: Student

Comment: Hello Congressman Sarbanes, below are some priorities that I feel are important when it comes to the farm bill:

- I know you have a record of being concerned about the environment and fighting for it, especially when it comes to the Bay. I believe it is very important that we continue to fight for the environment in the farm bill by not forgetting to focus efforts and resources on conservation.
- Also I think a large chunk of farm bill resources should be allocated to the nutrition and horticulture committee. I know that now the majority of resources go to food programs, and I think that this causes other aspects of this committee to be overlooked. More subsidies for organic growers and “specialty crop” growers should be available in order to encourage diversified farms
- Finally I think that there should be a place in the farm bill this year for programs that help to encourage and train young farmers

COMMENT OF YEHUDIT LIEBERMAN

Date Submitted: Thursday, May 17, 2012, 9:12 p.m.

City, State: Pleasant Hill, CA

Occupation: Musician

Comment: As a subscriber to a local CSA, I want a farm bill that:

- supports small, local, organic farming and farmers,
- promotes access to healthy, locally grown fresh food for all Americans, regardless of economic circumstances,
- cuts subsidies for large-scale farms growing commodity crops,
- increases funding for the Conservation Stewardship Program and other programs that promote soil and habitat conservation,
- discourages the intensive use of chemicals and the unregulated planting of GMO crops.

COMMENT OF MICHAEL LILLIE

Date Submitted: Wednesday, May 09, 2012, 4:11 p.m.

City, State: Sterling, VA

Producer/Non-producer: Producer

Type: Greenhouse/nursery, Nuts, Specialty Crops, Vegetables, Other

Size: Less than 50 acres

Comment: The future of farming will require an infrastructure investment, training, college incentive and public marketing to turn America back into a healthy country. Food impacts literally every faucet of our economy. Understand that you, the government, are holding the purse strings which have the capability to make America the leading exporter of every major crop. It's time we grow our way out of the Great Recession.

COMMENT OF MICHAEL LILLIQUIST

Date Submitted: Friday, May 18, 2012, 3:27 p.m.

City, State: Bellingham, WA

Occupation: Municipal Official in Agricultural County

Comment: I am very concerned that the farm bill is headed in the wrong direction, away from healthy foods and sustainable agriculture. I fear that the bill would continue unwise subsidies to commodity crops, rather than continued nutritional aid and support for a wide range of food crops, organic farms, and locally-produced and locally consumed produce.

In particular, I urge full inclusion of all parts of H.R. 3286, the *Local Food, Farms, and Jobs Act*, as well as carrying out all aspects of H.R. 3236, the *Beginning Farmer and Rancher Opportunity Act*.

Do not cut organic farming research funding!

Do not replace direct commodity subsidies with an even worse subsidized insurance scheme! There needs to be caps or limits on the subsidies available to giant agro-businesses and to insurance companies.

We need real reform, and the committee's version fall very wide of the mark. Please re-focus on healthy foods and smaller farmers, who genuinely need support and government cooperation.

COMMENT OF DAVID LIMPERES

Date Submitted: Saturday, May 19, 2012, 11:10 a.m.

City, State: Sheboygan Falls, WI

Occupation: Unemployed

Comment: Stop taxing, stop subsidizing, stop **Meddling**. **Get Out** of the business of trying to "manage" an industry you know **Nothing** about. Let the free market work.

We will be watching very carefully, and taking note of your names and actions, to be evaluated and **Widely** distributed in **Your** next election.

COMMENT OF LAURA LINDEKUGEL

Date Submitted: Friday, May 18, 2012, 2:16 p.m.

City, State: Minnetonka, MN

Occupation: Photographer

Comment: I hope that the committee will work to end or reduce subsidies and insurance to corporate and large-scale farming operations and implement support for small operations growing fruit and vegetables, especially organics.

COMMENT OF JUSTIN LINDENMAYER

Date Submitted: Friday, May 18, 2012, 1:31 p.m.

City, State: Farmington, CT

Occupation: Student

Comment: The farm bill is our best chance at addressing environmental and health related issues that are destroying our country. Please let the 2012 Farm Bill address some of these issues before we lose yet more time.

COMMENT OF DENISE LINDOW

Date Submitted: Friday, May 18, 2012, 11:39 a.m.

City, State: Cornville, AZ

Producer/Non-producer: Producer

Type: Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: I would like to see more emphasis on local food production/distribution, more sustainable food operations and the total elimination of subsidies that turns farmers into cogs in a wheel instead of our first line of defense in our nation's food security. More concentration of production only weakens us as a nation.

COMMENT OF ANNIE LINDSTROM

Date Submitted: Friday, May 18, 2012, 7:48 p.m.

City, State: Cape Coral, FL

Occupation: Writer

Comment: Please provide support for more small local chemical free (organic) farmers! And write a law that requires GMO's to be labeled. Also, do not allow FDA to let ingredients go unlisted such as new sugar substitutes, *etc.* I want to **Know** what is in my food. Support diversity in farming. We need variety and local access to food. Thanks for listening.

COMMENT OF ANDREA LINEBAUGH

Date Submitted: Friday, May 18, 2012, 2:38 p.m.

City, State: York, PA

Occupation: Self-Employed/Student

Comment: Monsanto, it's products, it's policies—let's just say **Hell No!**

We don't want genetically modified foods! We want organic, heirloom, back to nature—the way GOD intended.

I don't care what policies you enact as long as it supports local, organic, and small farmers. It should put a stop to chemicals and poisons used in the growing of foods and label those that are grown using it. Label those GMO foods. I don't want that crap in my food supply. **Support** local family farms and get rid of factory farms.

COMMENT OF JULIAN LINES

Date Submitted: Friday, May 18, 2012, 3:27 p.m.

City, State: Mount Tremper, NY

Occupation: Retail Store

Comment: My son farms and I am a member of Community Supported Agriculture. I want you to support small independent farmers, crop insurance and organic farmers. The effects of chemicals on bees is of national and international importance. Prioritize for the one's who keep us healthy.

COMMENT OF NOAH LINK

Date Submitted: Thursday, May 17, 2012, 8:58 p.m.

City, State: Detroit, MI

Producer/Non-producer: Producer

Type: Dry Beans & Peas, Field Crops, Fruits, Greenhouse/nursery, Nuts, Poultry/poultry products

Size: Less than 50 acres

Comment: I am a young organic farmer on several acres in the city of Detroit. As you know, it is extremely difficult for new farmers to obtain land and capital needed for equipment and supplies, despite surging interest and participation in organic farming. My business has developed thanks to a loan from our state's Farm Service Agency and the Beginning Farmers and Ranchers program. These programs are essential to supporting new farms and businesses. As a strong supporter of organic farming, I ask that you to:

- Fully fund the Organic Research and Extension Initiative (OREI) at the 2008 level.
- Endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Support all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintain EQIP Organic Initiative and do NOT cut the Conservation Stewardship Program.

COMMENT OF ADRIAN LINTON

Date Submitted: Friday, May 18, 2012, 8:37 p.m.

City, State: Mountlake Terrace, WA

Occupation: Facilities Rep.

Comment: Hello, I think when deciding on a bill that influences the nation's food supply it is important to consider all opinions in the matter, the interests that generates those opinions and what percentage of the population those interests represent. I do not want to demonize big business as there will always be a place for big business. However, there is no denying that when considering the subject of agriculture the interests of the mufti-national companies involved in the matter are tied primarily to the free-market and generating profitability, not the sustainability of the land and welfare for the farmers who tend the land. It is also important to point out that although the opinions of the big companies involved in this issue, though incredibly influential, represents by law only one "person" who exists in a group of similar corporate "persons" which combined equates to a tiny fraction of the population who have rights under the law. If we truly are being democratic and putting the welfare of the land, the farmers and greater population who will consume the food we need to consider more than the opinions of our fellow corporate "persons" and look at this bill holistically in terms of what is truly the best long terms agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers first. The latter part of the aforementioned groups involved represent undeniably a massively larger percentage of the population than our fellow corporate "persons".

Thank you for hearing my thoughts,

ADRIAN.

COMMENT OF RITA LIPHAM

Date Submitted: Friday, May 18, 2012, 5:57 p.m.

City, State: Oxford, AL

Comment: As a consumer I desire to purchase food items that are grown locally by local farmers growing natural and organic produce. Farmers raising animals in environments which are natural to the particular animal eating foods which are natural and organic to the animal and therefore the animal is able to digest the food they are given—food without unnecessary antibiotics, hormones of various sorts, *etc.* Healthy food promotes healthy people.

COMMENT OF SUZANNE LIPKIN

Date Submitted: Wednesday, May 16, 2012, 10:56 a.m.

City, State: Brooklyn, NY

Occupation: Nonprofit Program Officer

Comment: A \$36 billion cut to SNAP is not the way to go. The Committee should focus on writing a farm bill that creates economic opportunity and improves access to healthy, affordable food for all Americans.

COMMENT OF VICKI LISH

Date Submitted: Friday, May 18, 2012, 10:52 a.m.

City, State: Pittsburgh, PA

Occupation: Farm Stand Coordinator

Comment: Feeding our neighbors is a public-private partnership, and I am doing my part and I want our government to do its part.

Cutting anti-hunger programs will increase hunger in America, as well as the associated health care, educational, and economic costs of food insecurity and poor nutrition.

Please remember the families who are struggling in our community, and we must protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization.

COMMENT OF LYNN LISTON

Date Submitted: Friday, May 18, 2012, 9:16 a.m.

City, State: Belvidere, IL

Occupation: Infant/Early Childhood Mental Health Consultant

Comment: I am a member of a CSA-community supported agriculture-farm. I belong to a community food coop and I have gardened my whole life. Small family farms and community supported farms increase the availability of fresh quality food for all. Subsidies to large agribusinesses hurt these local sustainable efforts and benefit only the wealthiest producers.

Please level the field.

COMMENT OF MERCI LITTAUA

Date Submitted: Friday, May 11, 2012, 2:43 p.m.

City, State: Fontana, CA

Occupation: Service Coordinator

Comment: Dear Congressman Baca:

I do believe that as a member of the Agricultural Committee you are already and always doing your best in ensuring that programs supporting the poor and hungry are maintained and sustained. I personally, thank you for all these things that you do. Thru this letter I just want you to know that I am joining those little voices, like me, reminding you to take our voices with you to the Congress, as you consider the 2012 Farm Bill.

As the economic condition gets tougher and tougher, the more that All of us rely on those who toil the soil, plant the crops, and move the produce from the farm to our table.

Please do all you can so that they who cultivate the land, grow and gather the harvest, can have more resources—financial, technology, communications and transportation services, available to them so that they can do best in providing food to feed the world, especially those who have less or even, do not have anything to eat.

God bless.

MERCI LITTAUA,
Diocese of San Bernardino.

COMMENT OF KARA LITTELL-MCWILLIAMS

Date Submitted: Saturday, May 19, 2012, 11:45 p.m.

City, State: Byron, CA

Occupation: Caregiver

Comment: I am very concerned about the quality of the nation's food supply. I am concerned that profit driven big Ag will trump good, sound policies that protect the small farmer, organic farmer and most importantly, the public. I believe that big Ag will always succumb to the "fiduciary responsibility" they have to their stockholders and their own coffers over the moral, ethical and health driven responsibility they have for the nation's food supply. The House Agriculture Committee's responsibility is to the people of this nation and their expectations of protection, not to lobbyists and their hundreds of thousands of "donations". My expectation is for bi-partisan support of what is morally and ethically "right". This should not be "political". This is about people's lives. Stop playing Russian roulette with us.

COMMENT OF ANTHONY LITTLE

Date Submitted: Friday, May 18, 2012, 11:56 a.m.

City, State: Philadelphia, PA

Occupation: Medical Research Associate

Comment: Please provide adequate funding for the Beginning Farmer and Rancher Development Program. Please support initiatives that reduce soil erosion and provide meaningful opportunities for small/rural farmers and their communities instead of massive agricultural businesses that do not use sustainable methods. Protect the health of Americans first and foremost.

COMMENT OF SHANNA LIVERMORE

Date Submitted: Wednesday, May 09, 2012, 4:41 p.m.

City, State: Ontario, CA

Occupation: Student

Comment: Feeding America's, *Hunger in America 2010*, study unearthed some startling facts about senior hunger that everyone should know:

- In 2010, 7.9 percent of households with seniors (2.3 million households) were at risk;
- 30 percent of client households with seniors indicated that they have had to choose between food and medical care and 35 percent have had to choose between food and paying for heat/utilities;
- In 2009, nearly 9 million people over the age of 50 and nearly 4 million people over the age of 60 lived in at-risk households.

Cuts to SNAP (food stamps)—like the ones currently under consideration in the farm bill—would further limit access to the food and nutrition programs that millions of older Americans rely on. Meanwhile, the Commodity Supplemental Food Program (CSFP), which provides monthly boxes of food to low-income seniors, faces its own funding threats. These issues matter. What will seniors do if they no longer have access to these vital programs?

COMMENT OF HELEN LIVINGSTON

Date Submitted: Friday, May 18, 2012, 10:14 p.m.

City, State: Laurinburg, NC

Producer/Non-producer: Producer

Type: Field Crops, Forestry, Specialty Crops, Vegetables

Size: 500–999 acres

Comment: My family has both conventional farming and organic farming. The need for a shift towards local, organic is clear to me. My own health has been affected by ag. chemicals. For the sake of the costs of health care, care must be taken to care for our food.

COMMENT OF RICHARD LIVINGSTON

Date Submitted: Sunday, May 20, 2012, 9:54 a.m.

City, State: New Canaan, CT

Occupation: Finance

Comment: Consolidation of our food production into a handful of monster organizations is dangerous on many levels, not to mention economic monopolization, lack of diversification and "too big to fail" issues. Please do the right thing and give the

small guys a chance. Get rid of the ag subsidies to these behemoth companies and open up the market to consumer driven healthier food!

COMMENT OF SALLY LIVINGSTON, R.D.

Date Submitted: Tuesday, May 15, 2012, 6:40 p.m.

City, State: Fairfield, CA

Occupation: Registered Dietitian/Nutrition Consultant

Comment: As a Registered Dietitian, I am writing to share my concern about hunger in California. With unemployment still high and many Americans still struggling to make ends meet, anti-hunger programs are helping many of our neighbors just put food on the table.

Nearly 50 million Americans are living in food insecurity. While food banks, churches, and pantries are doing great work in our community, charity alone cannot meet the need for food assistance. Feeding our neighbors is a public-private partnership. I try to do my part by supporting the Food Bank of Contra Costa and Solano.

Congress should do its part by continuing to support anti-hunger programs like the Supplemental Nutrition Assistance Program (SNAP) and The Emergency Food Assistance Program (TEFAP), which are authorized in the farm bill.

Cutting anti-hunger programs will increase hunger in America. Given the associated health care and educational costs of hunger and poor nutrition, cuts to anti-hunger programs are short-sighted.

I ask you to please remember the families who are struggling in our country, and urge you to protect and strengthen important anti-hunger programs like TEFAP and SNAP in the 2012 Farm Bill reauthorization.

COMMENT OF BEVERLY LIZANICH

Date Submitted: Monday, May 07, 2012, 5:49 p.m.

City, State: Sandusky, OH

Occupation: Agency Relations Manager, Second Harvest Food Bank of North Central Ohio

Comment: Hunger is not a partisan issue. Please unite and all stand with us and the families, children and seniors we assist. I am the Agency Relations Manager at Second Harvest Food Bank of North Central Ohio. I respectfully request that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. The counties we serve in Ohio (Erie, Huron, Crawford and Lorain) cannot afford cuts to these programs, as many families we serve are still struggling. 77, 200 families are seeking assistance annually in our service area, a 134% increase in demand for emergency food assistance since 2006. (*Hunger in America*, 2010) Second Harvest and our agencies are working hard to meet the needs of our communities, utilizing volunteers and donated products. However, with such an increase in demand, higher food and gas prices, and declines in TEFAP commodities, our agencies are having serious difficulty. TEFAP is a major source of the food we distribute and a decrease in SNAP benefits will overflow our emergency food pantries and soup kitchens, which are already serving record numbers of people each month. We need your commitment to help us assist struggling families to put food on their table. Thank you for your support.

COMMENT OF DEJA LIZER

Date Submitted: Saturday, April 28, 2012, 7:57 p.m.

City, State: Asheville, NC

Occupation: Operations Manager

Comment: I am a supporter of Feeding America and my local food bank. Despite the recent improvement of the economy, there are still many people who may not know where their next meal will come from. We need a strong farm bill to help put food on the table for vulnerable children, seniors, and low-income families. Please pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. Cutting these programs is not the way to balance the budget. I urge you make them a priority in the next farm bill. If it weren't for assistance programs, I would have gone without many meals a child and teenager. My father contracted Polio as a child, and worked hard to further his education while us kids were young. That was because without additional education he could not provide for a family of 5. I was able to eat breakfasts at school that I would have otherwise missed, as well as lunches. We had food for dinners and I was able to focus on school work and do well enough to get grants and scholarships so that I could attend college. Please help feed these children and families. It made all the difference for me growing up,

and I am able to donate my time and money to local programs that assistance children and families in the same predicaments.

COMMENT OF JANE LLOYD

Date Submitted: Friday, May 18, 2012, 1:59 p.m.

City, State: Anacortes, WA

Occupation: Artist

Comment: Agriculture policy should be set by what's best for the health of the citizens and planet not by chemical companies and big agra corporations that are literally poisoning us through tainted food and water supply as well as air born chemicals and ones out-gassing into our environment. There is enough evidence that organic is better! Do the right thing!

COMMENT OF KURT LLOYD

Date Submitted: Friday, May 18, 2012, 12:48 p.m.

City, State: Hudson, NH

Occupation: Engineer

Comment: It is critical that we move swiftly toward a different way of growing food. One where smaller-scale organic farming is the norm, not the large unnatural monoculture techniques. I am not a science experiment . . . genetically engineered crops are totally unnecessary, are insufficiently understood, and should be banned from widespread use. Health of the soil should be paramount, unlike what has happened to the soil of this country after decades of bombardment with unnatural chemicals and practices. We could easily reduce health care costs in this country by more than 50% if everyone migrated to a diet so incredibly more natural than the totally absurd diet that the vast majority of the people in this country eat today. Our agricultural policy must be changed drastically to facilitate this.

COMMENT OF ANNA LOAR

Date Submitted: Friday, May 18, 2012, 12:07 p.m.

City, State: Middletown, CT

Occupation: Technical Specialist, Yale University

Comment: I am writing today to ask that the HAC support a farm bill that puts the interests of farm workers, citizens, and consumers ahead of the profits of large agribusinesses. This would include:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

In addition, we as citizens are concerned with the governmental lack of concern for both citizen outcry and a flood of scientific data that showing that genetically modified foods are linked to a range of health problems and should be clearly labeled if they are approved at all.

COMMENT OF JAMES LOBDELL

Date Submitted: Friday, May 18, 2012, 4:15 p.m.

City, State: Santa Rosa, CA

Occupation: Retired College Professor

Comment: We urgently need a farm bill that doesn't compromise standards for the health and safety of farm workers and consumers. I know lots of farmers because I grew up in farming country and currently reside in an area where farming is one of the major industries. As a consumer, I want to be sure my food is safe, and I'd like it to be locally produced, not shipped in from some factory farm whose practices are unknown and probably suspect.

COMMENT OF MARGARET LOBUE

Date Submitted: Wednesday, May 09, 2012, 9:35 a.m.

City, State: Orlando, FL

Occupation: Retired

Comment: I volunteer at my church's food pantry and have seen the numbers of families needing food assistance increase dramatically over the years. How can we reduce the aid available to these families when the economy is so distressed? Please help them and find some other area to cut expenses.

COMMENT OF GEORGIA LOCKER

Date Submitted: Saturday, May 19, 2012, 12:08 p.m.

City, State: Fort Collins, CO

Occupation: Retired

Comment: The farm bill must remove subsidies for corn. It must support small farmers. It must support organic farming. It absolutely must oppose the Monsanto chemical alterations of corn, canola, rice, *etc.* They are bad for the environment, with the increased use of herbicides and pesticides, bad for our health.

COMMENT OF TRENT LOCKHART

Date Submitted: Thursday, May 10, 2012, 11:52 p.m.

City, State: Bloomington, IN

Occupation: U.S. Air Force Active Duty Service Member

Comment: I support the strengthening and protection of nutritional assistance programs funded by the farm bill. I read and hear so much about efficiency and the current economic situation, but I cannot help but feel disgusted at the idea that we would cut into much needed programs for low-income families to balance debt and fix a financial crisis so firmly connected to the wealthy in our society. Fraud, waste, and abuse should be eliminated at all levels of government and in all Federal and state programs, but reducing benefits for those in need is nothing short of immoral.

I have been a recipient of nutritional assistance, and it helped bridge the gap for my family between post-student temporary jobs and my current full-time position in the Air Force. My family accepted help so that we didn't become dependent on nutritionally defunct cheap food sources when our income wasn't steady. Once we found solid financial footing, we began supporting ourselves. Keep nutritional assistance programs strong for the future of this country.

COMMENT OF CORY LOCKINGTON

Date Submitted: Friday, May 18, 2012, 5:17 p.m.

City, State: La Crosse, WI

Occupation: Workplace Manager

Comment: Small farms that can produce local foods without chemicals are the most helpful and least harmful entity in the food chain. Family farms need protection from corporations that are using Americans as chemical testing lab rats. I do not want arsenic in my chicken or corn in my beef. I do want non-toxic food. I do not want GMO's in any of my foods and I do want **All** GMO's to be labeled like other countries.

COMMENT OF DIANE LOCKSPEISER

Date Submitted: Saturday, May 19, 2012, 7:30 p.m.

City, State: Melville, NY

Occupation: Artist, Herb Gardener at a local CSA

Comment: I am not good with details, but I do know that for the public health we do need to discourage CAFOs, GMOs, and pesticide/herbicide use and better support the small, healthy farms.

COMMENT OF EDWARD LOEFFLER

Date Submitted: Saturday, May 19, 2012, 12:05 p.m.

City, State: New York, NY

Occupation: Retired

Comment: Stop giving huge farm subsidies to MegaFoods and start giving help to the new, small farmers. Corporate agribusiness shouldn't have the influence that it does over regulations, as is easily shown by the food poisoner corporation Monsanto.

COMMENT OF ANNE LOFTFIELD

Date Submitted: Tuesday, May 08, 2012, 1:23 p.m.

City, State: Tucson, AZ
Producer/Non-producer: Producer
Type: Poultry/poultry products, Vegetables
Size: Less than 50 acres

Comment: We are working hard to grow healthy non-GMO foods through biodynamic methods which enhance our soil rather than deplete it, using all our resources as efficiently as possible, yet our tax dollars are passed out to corporate farms who are raping our land. The food stamp program sounds good on paper but is producing a dependent society which is getting more obese each day; is that your intention?

COMMENT OF CORINNE LOGAN

Date Submitted: Saturday, May 19, 2012, 10:13 a.m.
City, State: Boise, ID
Producer/Non-producer: Producer
Type: Livestock
Size: Less than 50 acres

Comment: The subsidies and entitlements have **Got To End!** It is ridiculous that we still have such wasteful spending going on to the tune of Billions of dollars. Stop the subsidies and entitlements and food prices will be what they are.

COMMENT OF SHANE LOGAN

Date Submitted: Friday, May 18, 2012, 4:46 p.m.
City, State: Interlaken, NY
Occupation: Chef

Comment: I am concerned with the state of the American diet. Subsidizing socially disadvantaged farmers, local farmers markets and local organic farms is important to me because right now eating an unhealthy meal is cheaper than farm fresh food and proper nutrition is the base from which we need to fight hunger.

COMMENT OF KATHLEEN LOGAN SMITH

Date Submitted: Saturday, May 19, 2012, 6:08 p.m.
City, State: Saint Louis, MO
Occupation: Executive Director, Missouri Coalition for the Environment
Comment: Dear House Agricultural Committee:

On behalf of the Missouri Coalition for the Environment, our members and our Board, thank you for the opportunity to submit comments on the 2012 Farm Bill.

We work to promote stewardship of Missouri's soil and water resources, to reduce our dependence of fossil fuels and encourage food and energy security.

Nothing concerns thoughtful Americans more than the state of our nation's food supply and the water and soil resources upon which its productivity depend. The 2012 Farm Bill will succeed if it responds to that concern through the following key measures:

1. Restoring the link between conservation compliance and crop insurance subsidy programs.

Because of the important role farmers play in our food system, taxpayers have supported a safety net for farmers for nearly 30 years, always in return for a guarantee that subsidized farmers will follow basic conservation practices in their fields. This revolved around the basic realization that while Americans needed food, it was critical to utilize conservation practices in order to preserve the economic viability and productivity of our farmlands and resources for the future.

As the House Agriculture Committee prepares their draft of the farm bill, I urge you to restore the link between taxpayer-supported subsidies for crop insurance and conservation compliance protections that will protect the nation's water and land.

This action is especially important as Congress considers eliminating direct payments, the major subsidy program that is linked to conservation compliance, and moving some of those funds to support increased subsidies for crop insurance, which lacks compliance requirements. Unless you help to reconnect crop insurance subsidies to conservation compliance, a significant part of farmers' incentive to follow conservation plans will disappear this year.

Farmers need crop insurance as part of their safety net and the public needs basic conservation practices on farms to make sure that quality farm land and water can support future generations as well as the current needs of our country. We cannot accept sacrificing long-term economic and environmental sustainability for short-sighted and short-term economic profits.

Connecting eligibility for crop insurance subsidies to conservation compliance is fiscally responsible and ensures public subsidies for farmer's insurance premium payments align with the public's interest in basic conservation of our soil and water.

Missouri's water and soil resources are suffering now as farmers violate conservation agreements and ignore good conservation practices while still collecting taxpayer subsidies. This must end. Taxpayers should not be subsidizing destruction. Our state is among the top five in the nation for soil loss and our farmers need incentives to save soil—not to abuse it.

2. Meaningfully incorporate whole farm insurance for diversified farming operations and beginning farmers.

Producers of diversified, non-commodity crops and livestock need to be able to manage their risks too. A crop insurance policy that offers a whole farm revenue protection plan to protect against low revenue due to unavoidable natural disasters and market fluctuations would allow farmers to insure all the crops grown to feed Americans. Effective risk management products also need to be available nationwide. And they too **Must** require conservation compliance to protect soil and water resources.

3. Capping premium subsidies.

Currently there are some proposals circulating that would limit the amount of crop insurance subsidies—which make good sense and would help ease the burden on the taxpayers.

4. Cutting payments to crop insurance companies and agents.

Recent data indicate that crop insurance companies and agents collect \$1 for every \$1 farmers receive in crop insurance. Congress could generate significant savings and more than eliminate the need to slash anti-hunger or environmental programs by setting a more modest payment level.

5. Strengthen “sod buster” and “swamp buster” provisions in ALL Farm programs.

The pursuit of profits from commodity crops, and their accompanying lucrative revenue insurance programs, has enticed farmers across the plains to plow grasslands and prairie and drain wetlands though they can never hope to get a consistent and decent harvest on those lands—except what profits are harvested from taxpayer funded programs. Planting commodity crops in most of the dry and arid Texas panhandle and irrigating it with the non-renewable Ogallala Aquifer is one example of where our tax dollars are sent to just blow in the wind—along with the thin layer of eroding soil. Ground suited to tumbleweeds and prickly pear cactus or to cattails and water lilies—should not receive crop-oriented taxpayer dollars because they do us more good left undisturbed (and cost less too). Plowing these marginal grounds increases water pollution, soil erosion, and destroys important ecosystem functions. It's a foolish short-term gamble and the 2012 Farm Bill needs to stop it from being a taxpayer payout.

6. Maintain funding for conservation programs.

Title II funding continues to be eroded farm bill after farm bill. Proven programs, like the Wetland Reserve Program, should be maintained and funded. Per producer caps for each program would be a prudent way to maximize the impact and productivity of these programs.

7. Include mandatory funding for Beginning Farmer and Rancher Development Program.

Food creates jobs. Let us create these in America and increase our food security in the process by growing the next generations of farmers and ensuring they are trained and equipped to produce healthy food and conserve critical resources. The National Sustainable Agriculture Campaign recommends \$30 million in mandatory funding. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new agriculture start-ups.

8. Help grow jobs by retaining programs like the Value Added Producer Grants Program.

Guarantee \$30 million of mandatory funding per year. VAPG provides seed money to help farmers innovate in agriculture and create jobs while securing a sustainable path to market-based farm profitability.

9. Help grow local farm economies and support healthy food in schools by providing flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.

10. Secure our food future and fund the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding.

Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.

Thank you for your commitment to America's food system.

Yours truly,

KATHLEEN LOGAN SMITH,
Executive Director
 Missouri Coalition for the Environment

COMMENT OF SHARON LOHRMANN

Date Submitted: Thursday, May 17, 2012, 8:29 p.m.

City, State: Sisters, OR

Producer/Non-producer: Producer

Type: Field Crops

Size: 50–150 acres

Comment: The time to support organic farmers is now! I own cropland and I am a cancer survivor. I understand the importance of what we eat, breathe and drink. Please consider our future generations when contemplating the various aspects of the next farm bill.

COMMENT OF REBECCA LOKEN

Date Submitted: Friday, May 18, 2012, 4:35 p.m.

City, State: Lake Nebagamon, WI

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: What really bothers me the most is how tight the FDA and Monsanto is. The former lawyer for Monsanto is the head of the FDA. That is absurd! The Farm Bill should be small farmer friendly, not just corporate friendly.

COMMENT OF ROBERT LOMBARDO

Date Submitted: Friday, May 18, 2012, 3:44 p.m.

City, State: Boulder, CO

Occupation: Computer Support

Comment: I understand that there are strong incentives to continue taking from the poor to give to the rich but I ask that you please consider the long term results of such unethical behavior. Thou there is no compelling reason to do the right thing for America and American's, there should be and you should not need to be compelled to do what you were elected to do.

COMMENT OF SCHERYL LOMONICO

Date Submitted: Friday, March 16, 2012, 5:50 p.m.

City, State: Ft. Edward, NY

Occupation: Retired Professional and Homeowner

Comment: I am a retired professional who cares deeply about the environmental impact that farming has on our rivers, soil, oceans, and the meats and produce grown for our consumption. I am fortunate to be able to afford organic produce and locally grown, grass-fed meats. I know by talking to the farmers at the Saratoga Springs and Glens Falls markets how important sustainable farming is to them. I buy only those products that I know do not have additives and have been grown using organic methods. The farming industry in our country is decades behind the industries in Europe, the UK and Australia/New Zealand. I would like to see more conventional farms and dairies change to organic methods. I don't want RBHT used on dairy cows ever! I recently saw a sign in the dairy section of my local supermarket apologizing if I could not find organic milk, as the supply could not keep up with the demand. Now that's saying something. I will continue to speak with my dollars, and I know others will too. We need your help to make our farmers change their methods. They need our support, and I want my tax dollars to work for them and, indirectly, for the consumers. Our land and waterways and the creatures living on or in them deserve to be free of chemicals. I'll be watching.

COMMENT OF DONNA LOMP

Date Submitted: Friday, May 11, 2012, 11:45 a.m.

City, State: Newton, MA

Occupation: Investor/Philanthropist

Comment: Please take out all assistance for GMO and pesticide-laden crops and big agribusiness. Please help the local organic biodynamic farms. Please let's get healthy organic food back on our table. GMOs, pesticides, herbicides, and chemical fertilizers are killing us. Monoculture crops, along with chemical agriculture are killing the bees and animals. Let's get back to nature and eat the way we are intended to eat. It IS NOT true that GMO/pesticide crops provide better yields, they don't! Organic crops do just as well and better! And truthfully, even if they didn't, what's the point of producing more food if it is causing cancer, allergies, infertility, and many diseases directly related to GMOs and farming chemicals? Both my parents died young from cancer. There is enough evidence that organic farming is better for people, animals, and the planet! Please help local organic farmers thrive! The only reason we pay more for organic food is because of big agribusiness farm subsidies (put in place by the original farm bill). Please at least make it a "fair fight" and stop supporting Monsanto/Dow/Bayer and big agribusiness. Because when you help the big farms, you are helping the big chemical companies. And hurting people in the process! Please rethink everything in that bill and make organic/biodynamic/sustainable farming (and the health of people and the planet) priority! Thank you.

COMMENT OF DAVID LONG

Date Submitted: Friday, May 18, 2012, 5:45 p.m.

City, State: Jonesboro, AR

Producer/Non-producer: Producer

Type: Forestry

Size: 50-150 acres

Occupation: Private Lands Supervisor, Arkansas Game & Fish Commission

Comment:

March 30, 2012

To: Chairman, Agriculture Committee, U.S. House of Representatives

Reference: 2012 Farm Bill Hearings

Comments in support of continuing a strong Conservation Title in the 2012 Farm Bill:

I am David Long, Private Lands Supervisor for the Arkansas Game and Fish Commission (AGFC) and also a landowner managing a tree farm here in Arkansas. AGFC has a staff ranging from 8 full time private lands biologists that work with hundreds of row-crop farmers and ranchers each year to assist them in improving their lands for fish and wildlife while recommending practices that also improves water quality, reduces erosion and helps reduce flooding. We work side by side with the Natural Resources Conservation Service and the Farm Service Agency and farm producers to promote farmland conservation through farm bill conservation programs.

We am providing comments to lend support to continue funding and conservation programs in the 2012 Farm Bill that has been so successful here in Arkansas.

The people of Arkansas are strong supporters of conservation in Arkansas and conservation is so important to our citizens they passed a $\frac{1}{8}$ of 1% conservation sales tax in 1996 to help ensure the future of fish and wildlife populations across Arkansas.

The conservation programs in the farm bill are vital not only to the sustainability of production agriculture, but equally our fish and wildlife populations and their required habitats.

Programs like the Wetland Reserve Program (WRP) and the Conservation Reserve Program (CRP) are incentive programs that have helped farmers stay on the farm by retiring unproductive, hard-to-farm croplands they lose money on most years. These programs help improve the farmer's financial health while providing tremendous environmental benefits to society. Bottom-line, these programs help keep farmers-farming.

USDA conservation programs here in Arkansas have and continue to provide significant benefits to fish and wildlife resources along with improving water quality where conservation practices are applied. However, without continued funding of these critical programs, sustainability of these resources will not be possible.

We have much work ahead of us to implement conservation practices at a landscape scale to see significant improvements in our water quality and fish and wildlife resources across our farmlands in Arkansas. Cutting programs to deeply while

we continue to battle water quality problems and declining habitats for farm wildlife could result in future regulatory requirements and the listing of more species on the Threatened and Endangered Species list, neither of which anybody desires because of all the problems these regulatory functions place on our farm producers. Conservation programs provide financial assistance to our farm producers to ensure we maintain productive, healthy lands and natural resources to include soil, water and wildlife for the present and future generations.

We would like to provide specific comments on the conservation programs and their continued importance to farmers, ranchers, fish, wildlife and society as a whole and recommend this Committee support continued strong conservation opportunities in the 2012 Farm Bill.

Wetland Reserve Program (WRP)

Arkansas farmers have enrolled over 200,000 acres in the program since its beginning. We have numerous field reports from our biologists and WRP farmer owners of increased populations of migratory birds, numerous resident birds along with a host of other wildlife species utilizing these WRP lands. In addition, increased populations of deer, turkey, quail, rabbits, all game species important to the economy and outdoor recreation in the delta, have been observed on WRP lands across the delta of Arkansas.

WRP is another program that helps producers keep producing and staying on the farm.

We encourage you to support continued WRP funding and the acreage caps sufficiently for states to continue their wetland restoration success story and provide this critical financial assistance to our farmers.

Conservation Reserve Program (CRP)

Arkansas is not a big CRP state in terms of millions of acres enrolled under the General CRP sign-up as many other states have realized. However, our biggest benefits of the program in Arkansas are found under the Continuous CRP where conservation buffers, wetlands and bottomland hardwoods may be enrolled. As of January 2012, Arkansas row-crop farmers and ranchers have enrolled 70,239 acres of buffers. These conservation buffers cover an estimated 5,853 miles of stream, rivers, and creeks across Arkansas. Arkansas has an estimated 90,000 miles of streams with approximately 36,000 miles (40%) degraded either with nutrients, sediments or both. Yea, this is very disheartening for the state called the "Natural State". How exciting it would be if we could buffer all of these degraded riparian edges that are contributing to our water quality problems using CRP. We could capture a significant percentage of the sediment and nutrient from run-off in Arkansas' waterways by using CRP buffers while paying producers rental and incentive payments along with cost-share assistance to install.

The Continuous CRP has enrolled 44,103 acres of wetlands along with another 51,299 acres of bottomland hardwoods in Arkansas. These are mostly hard-to-farm, unproductive croplands that farmers enrolled that now are serving to improve water quality, increase flood water storage, and reduce sediments and nutrients from entering our waterways while improving farm producers financial bottom-line, assisting in keeping them on the farm.

Maintaining the CRP with an adequate national acreage cap is critical to assisting states like Arkansas to continue to promote CRP buffers and wetland/bottomland hardwood restoration to achieve cleaner waters, higher fish populations, benefit migratory birds and reverse the number of declining species of wildlife on farms across the state.

Environmental Quality Incentive Program (EQIP)

This cost-share program is providing significant conservation on working farmers across Arkansas. In 2011, over 161,000 acres of critical conservation practices were installed to: reduce erosion and pollution from nutrients, animal waste, and sedimentation; improve irrigation while reducing ground water use; improve forest health; improvements to grazing lands; and creating and improving wildlife habitat.

Wildlife Habitat Improvement Program (WHIP)

This program places emphasis on declining species to include bobwhite quail, elk, neo-tropical migratory songbirds, and threatened and endangered wildlife species along with numerous other game and non-game species.

In 2011, WHIP funded conservation practices to benefit fish and wildlife covering more than 46,500 acres. Over the course of its existence, the WHIP has help create and improve habitat in Arkansas on over 500,000 acres.

With talk of consolidating WHIP into EQIP, we are concerned WHIP funding will be lost in this larger program targeting primarily soil and water conservation prac-

tices and expect fish and wildlife practices will not compete with these resource concerns. Any consolidation of WHIP into EQIP should include language in the legislation emphasizing fish and wildlife habitat restoration in the EQIP and a minimum of 5% of EQIP funds be available for wildlife habitat restoration to ensure landowners continue to have financial assistance available to target habitat restoration on their lands.

Mississippi River Basin Initiative (MRBI)

We recommend the ability of NRCS to continue to develop special initiatives such as the MRBI using farm bill conservation programs. We have significant waterways degraded with sediment and nutrients that need conservation practices installed. The MRBI provides funding for targeting the most degraded sub-watersheds first and practices are being implemented across the row-crop areas of the Mississippi delta in Arkansas to reduce this pollution.

Arkansas is a significant contributor to the nutrient pollution (nitrogen and phosphorous) in the Lower Mississippi River Basin and the creation of the hypoxic zone (dead zone) in the Gulf of Mexico with the largest coverage ever recorded of 8,481 square miles reported in 2002. The MRBI funding is providing critical assistance to abate this pollution in the Arkansas portion of the watershed.

Closing

With the increased frequency of flooding and droughts occurring across our state and the nation, farm producers will continue to experience cropland losses. As a result, conservation programs are more important today than ever. Farmers need options to take these revenue losing croplands out of production with compensation to remain a viable farming operation and continue to produce the food and fiber we require as a nation. Our policy should continue to be—farm the best, retire the rest. Programs like WRP and CRP have helped do that over and over and farmers are farming today because of these programs. Plus, these programs have resulted in huge fish, wildlife and environmental benefits to society. However, we have a ways to go to ensure soil, water and wildlife sustainability across the agricultural lands in Arkansas.

Estimates are circulating that the world population will reach 9 billion by the year 2050. The pressure on food production on U.S. farms to help feed this growing population will rise proportionally. However, you don't have to be a rocket scientist, not even a biologist, to know without substantial conservation funding in place to ensure the sustainability of our farm lands, maintain fishable streams and rivers, provide habitat for terrestrial wildlife and outdoor recreation, and plentiful drinking water, environmental problems can be expected to increase dramatically which ultimately will greatly impact our quality of life as we know it here in the natural state and across the nation. Are we going to strive to feed the world while destroying our very own natural resources and environment? Conservation funding has never been as important as it is today.

Thanks for the opportunity to provide critical input this this vital component of the 2012 Farm Bill.

DAVID LONG,
Private Lands Supervisor,
Arkansas Game and Fish Commission,
Wildlife Management Division.

COMMENT OF DWIGHT LONG

Date Submitted: Friday, May 18, 2012, 4:07 p.m.

City, State: Klamath Falls, OR

Occupation: Retired

Comment: I work with several groups in Klamath Falls that are concerned about food security in Klamath County.

The following should be included in the bill to increase food security:

Community Food Projects Program—\$10 million per year to help communities build food self-reliance.

Farmers Market and Local Food Promotion Program—\$20 million per year to develop farmers market capacity and create food hubs to connect farmers with schools, hospitals, grocery stores and other markets.

Hunger-Free Community Incentive Grants—An average of \$20 million per year for a new SNAP local fruit and vegetable incentive grant program at farmers markets and other healthy food retailers.

COMMENT OF GLORIA LONG

Date Submitted: Sunday, May 20, 2012, 12:20 a.m.
City, State: Hartford, CT
Occupation: Retired Teacher
Comment: Please pass a strong farm bill which will enable food banks, food stamps, *etc.* to feed the hungry. This is a most basic human need (which is unconscionable to deny). Thank you.

COMMENT OF HOLLY LONG

Date Submitted: Friday, May 18, 2012, 7:25 p.m.
City, State: Menomonie, WI
Occupation: Homemaker/Disabled
Comment: It is not a difficult concept to realize we need a safe and healthy food supply. Keeping it safe also protects the environment. Subsidize small farmers or those who organically produce. Subsidize fruit and veggies. Stop the pollution and support of nasty factory farms which are cruel to the animals and the environment. God intended free range and clean specie appropriate sources of foods and water for the animals to be healthy and in turn provide healthy food for humans. Go back to the basics. Bigger is not always better. Mass produced food-like items genetically modified are not healthy. When we take care of the Earth it will take care of us. Our programs need to be safe, clean and sustainable so there is a safe food supply for our grandchildren. **Support Local.**

COMMENT OF JOHN LONG

Date Submitted: Saturday, May 19, 2012, 7:32 p.m.
City, State: Houston, TX
Occupation: Laundry Owner
Comment: Americans need more organically-grown, locally-produced food. Achieving this means eliminating, at all government levels, the rules and subsidies that favor large commercial farms. It also means investigating the practices of companies like Monsanto who are attempting to monopolize the production of seed. The Department of Agriculture has become a shell for corporate agribusiness, whose institutional objective seems to be to protect the profits of the large corporate players, even when doing so works against the health and long-term economic interest of the consuming public. Congress must recognize that the wholesome, nutritious food that Americans increasingly demand has far-reaching benefits for our society.

COMMENT OF VALERIE LONG

Date Submitted: Monday, April 02, 2012, 6:27 p.m.
City, State: International Falls, MN
Occupation: Economic Assistance Supervisor
Comment: To decrease funding for economic assistance programs such as SNAP, WIC, *etc.*, would increase the number of Minnesota families having to choose between eating or paying bills.

COMMENT OF TONI LONGLEY

Date Submitted: Friday, May 18, 2012, 1:52 p.m.
City, State: McKinleyville, CA
Occupation: Environmental Agroecology
Comment: I would like to see subsidies for conventional crops ended completely. No more flooding the market with corn, wheat, and soybeans that are genetically modified and bathed in synthetic chemical herbicides, pesticides, and fertilizers. Farms should be smaller and more diverse, growing many crops rather than one or two. The cheap commodity crops have created an obese and overweight society by encouraging fast eating and a complete disconnect from where, how, and by whom the food was produced. Organic and sustainable agriculture is what we should be encouraging. I propose a tax on unhealthy foods such as soda and fast food such as McDonalds, Taco Bell, Burger King, Wendy's, KFC, *etc.* If people aren't going to make the right decisions with their eating choices to lead to healthy living, then they ought to be swayed by tax incentives or disincentives. I would also like to see priority places on integrated pest management rather than chemical pest management. I'd like to see less mechanization and less factory production of our food. I want factory farms and CAFOs for animals to end completely, they are heinous and inhumane. I want to see GMO crops and foods labeled clearly in stores. I am not

a proponent of GMO crops, it is just a way to maintain monocultures and continue using the chemicals. Also, the horror stories about GMOs spreading to organic fields and having those fields be contaminated and ruined are enough to make GMOs seem like a dangerous alternative. I don't believe anyone who says that GMO's are going to make it so that there are less starving people on Earth. From my understanding, enough food is produced every year to feed everyone on the planet. Probably enough food is wasted or thrown out to feed the starving. It is more a matter of equity, access, and distribution. By encouraging other countries to use agroecological farming methods, rather than dump cheap commodity corn and wheat on them and take their food sovereignty away in the name of aid, their people can grow their own food while benefitting the land that they live on, rather than degrading and polluting it with GMO crops, fossil fuel agriculture, and chemicals. People should do agriculture where there is water, not in deserts and places where water must be stolen from a river or watershed far away.

SUBMITTED STATEMENT BY DR. KARL LONGLEY, P.E., B.C.E.E., CALIFORNIA WATER INSTITUTE, CALIFORNIA STATE UNIVERSITY, FRESNO

Congressman Costa, Congressman Cardoza Under Secretary Schubert, I thank you for inviting me to address you today. The agenda shows that I am associated with California State University, Fresno's California Water Institute. In the interest of full disclosure, I am also a member and current chair of the Central Valley Regional Water Quality Control Board.

I will briefly describe some of the more significant water quality threats to Central Valley agricultural production and the health of Valley residents that require protective action and funding and other legislative support in the 2012 Farm Bill.

The first water quality issue I will discuss is the salinity impacts that can be measured as yearly reduction of crop production and farmable land across an impacted region, lost jobs, higher utility rates, reduction of community growth potential, loss of habitat, premature corrosion of equipment, and other lost opportunities.

Salinity issues are rarely considered newsworthy until the impacts have already occurred—it is like a cancer—slow to develop but often fatal when it does occur. A current example is Australia's Murray-Darling Basin, an agricultural area larger than California where agricultural production was reduced by more than fifty percent by drought and horrific salinity impacts. A SWRCB report authored by Dr. Howitt of UC Davis confirmed that very significant salinity impacts are occurring in the Central Valley (2008). Similar studies have been performed in other parts of the state and all indicate that proactive salt management is economically beneficial.

Salinity management includes source control, treatment (membrane or distillation technologies), collection and storage, real-time salinity management, salt recycling, and export. Significant continued funding is needed for the ongoing development of saline water treatment and Best Management Practices.

The second water quality issue I will discuss is nitrate contamination of groundwater. A recent report by Dr. Thomas Harter of UC Davis provides the scientific study that documents the nitrate groundwater contamination problem with the major source of nitrate being irrigated agriculture and dairy manure. This groundwater nitrate contamination issue is the subject of a SWRCB workshop on May 23, 2012.

Nitrate contamination of groundwater poses major problems including public health risks. It also can have an adverse impact on the production of certain crops such as grapes. Remediation of nitrate in groundwater is necessary for both the support of agriculture and safe drinking water supplies for many Central Valley communities, particularly disadvantaged communities. Besides treating nitrate contaminated groundwater, remediation also can be accomplished by using groundwater contaminated with nitrate for fertilization of crops applying it when the contaminated groundwater is used for irrigation.

Dairy manure can be processed to produce bioenergy and a very good fertilizer that reportedly increases crop production substantially and is capable of meeting organic standards. Under one scenario over fifty percent of the optimized revenue potential from dairy manure can be from an enhanced fertilizer made from anaerobically digested manure with a substantial amount of the remaining revenue from bioenergy production.

A Federal-State Dairy Digester program being led by some very knowledgeable and far-sighted individuals, including Ed Burton and Sandy Schubert here with us today, addresses the regulatory, technical, and economic issues of implementing the use of manure digesters on dairies. 2012 Farm Bill support is needed to be focused on bioenergy from dairy manure and the development of Best Management Practices for enhanced use of dairy manure for crops.

The Central Valley Salinity Alternatives for Long Term Sustainability (CVSALTS) is a stakeholder focused on the development and adoption of a Central Valley Salinity Management Plan. Implementation of CVSALTS is essential for insuring the future availability of good water quality for both urban and agricultural use. The implementation of an effective Central Valley Salinity Management Plan will require research and significant funding. Nevertheless, salinity management produces revenue and economic sustainability. It is being done elsewhere but not on the scale needed in the Central Valley.

The Irrigated Lands Regulatory Program was initiated nearly a decade ago addressing agricultural non-point source water quality impairments to surface waters. The revised Irrigated Lands Regulatory Program to be adopted soon will add measures for controlling contamination of groundwater by agricultural practices including contamination by salinity and nitrates.

The Dairy Program, another Regional Board program, is a program similar to the Irrigated Lands Regulatory Program but tailored for the specific safe manure management needs necessary for dairies.

The identification and development of effective Best Management Practices, including improvements to irrigation technology, is a critical element for protecting water quality and can benefit greatly from funding available from the 2012 Farm Bill. Monitoring of water quality also is an important element of all water quality protection efforts. While expensive these costs can be significantly lowered with research and development with funding available from the 2012 Farm Bill.

This quick overview points out the necessity to protect Central Valley waters to protect health, support agricultural production, and to protect a number of other beneficial uses. The 2012 Farm Bill can provide critical funding and other legislative measures necessary to keep this Valley healthy and productive. These funding and legislative issues can be critical in the research necessary to develop best management practices and to better and more cost effectively irrigate the Valley's lands and monitor water quality.

Sustainable agriculture in the Central Valley assisted by the 2012 Farm Bill is able to locally provide healthy communities with safe drinking water for all residents, a life style treasured by many and, very importantly, a vigorous and sustainable Valley economy capable of continuing to supply the agricultural product needs for the United States and many elsewhere in this world.

Thank you.

COMMENT OF ADAM LOOMIS

Date Submitted: Friday, May 11, 2012, 4:38 p.m.

City, State: Locke, NY

Occupation: Student

Comment: I believe the farm bill should be a tool for the positive change of the food system in our country. We need healthier and more sustainably produced food. With that in mind I think the food bill should:

- Support new farmers, particularly organic farmers, so that our rich farming heritage will safely be ushered into the future.
- Support innovation in areas that will help farmers grow our food more sustainably and protect the environment.
- Cut funding to corporate farms that don't produce the healthy foods that we need more of. Instead fund farms that grow fruits and vegetables to make those healthy foods easier for us all to afford.

COMMENT OF JENNIFER LOOS

Date Submitted: Saturday, May 19, 2012, 12:50 a.m.

City, State: Los Angeles, CA

Occupation: Director of Operations, Marketing

Comment: Stop subsidizing filler crops! Corn, soy, etc are in all processed food and are probably why we have a major obesity epidemic in our country. Why can't we focus on diversity in our crops and organic options? Heath over scale is what's important.

COMMENT OF LOREN LOPES

Date Submitted: Sunday, May 20, 2012, 10:12 a.m.

City, State: Turlock, CA

Producer/Non-producer: Producer

Type: Dairy

Size: 151–300 acres

Comment: We need the cost of production factored into the pricing of raw milk in the United States. Most all other crops have fared well dairy has been hijacked by the global buying power of dairy food companies and it has to stop or the corporate investor dairies will take out the family dairy farm. Many of these dairy clusters are claiming to be family owned but in reality are investor owned with a individual spokes person. These dairy clusters have access to big money and make their profits from tax right off not milk production. However the majority is still in the hands of the independent family dairy operator so we need to protect this for the future generations. The S. 1640 the Milk Marketing Improvement Act of 2012 is the prime example of achieving this.

COMMENT OF ELLERI LOPEZ

Date Submitted: Friday, May 18, 2012, 2:58 p.m.

City, State: Sparks, NV

Occupation: WIC Staff

Comment: I would like to know for myself and my family what I'm eating. All this genetic engineering is so bad and never been tested. We deserve to know where our foods coming from. Organic food is real food!

COMMENT OF LAURA LOPEZ

Date Submitted: Friday, May 18, 2012, 10:30 a.m.

City, State: Mt. Sinai, NY

Occupation: Information Technology

Comment: Protecting farmland against urban sprawl is very important in protecting our farmland which is dwindling. In my home town, there were beautiful farms everywhere, not they are all condominiums and the traffic is out of control, it ruined our town.

Factory farmers must be held accountable for their actions in polluting our waters and for providing torture chambers for farm animals. We must grow up as a race and begin to be more compassionate about how our farm animals are raised and slaughtered. Let's get real.

COMMENT OF STACIA LOPEZ

Date Submitted: Saturday, April 28, 2012, 6:28 p.m.

City, State: Gilbert, AZ

Occupation: Homemaker

Comment: My name is Stacia Lopez. I am a resident of Gilbert Arizona. I am writing as a mother and a concerned citizen. My main concerns are providing healthy nutritious food to my family and our communities. I am also a supporter of Feeding America and my local food bank. This next farm bill should make feeding vulnerable children, seniors, and low-income families a priority. I also believe we need to concentrate on more local sustainable farms to provide nutritious fruits and vegetables to our communities.

After reading testimonies given to your committee, I have concerns regarding the feed and livestock industries. Their representatives keep quoting the predicted increasing world population of 30% by 2050 and the corresponding demand for more food. A large portion of the crops grown, however, are for non-consumable goods. They support feed products for meat production but also corn products for processed food, and other corn byproducts and biofuels. While the latter is a noble endeavor, if it is taking the majority of our farming lands I say we look elsewhere for fuel. I do not believe this is our best option just the most convenient for now, but it is not worth the effect on food production.

As I understand it, in the 2008 Farm Bill a whopping 60% of EQIP funds were guaranteed to the livestock industry. I am not against eating meat. I personally eat beef, pork and chicken. I am also aware, as the vast majority of Americans are, that we as a nation have a nutritionally poor diet and obesity and diabetes are becoming the norm. The feed and livestock representatives also brag of their increase in exports of meats over the past 15 years. I see this as just spreading our "wealthy", unhealthy diet. At the same time as guaranteeing 60% of funds to livestock the previous bill has put a cap of \$20k on organic farms. I do not believe that the USDA recommends a diet consisting of 60% meat products.

I also read of their complaints that the CSP has not kept up with "their" new technologies and should release more of the conservation land. (To them I presume.) I am not sure I am exactly thrilled with their new technologies or the pesticide com-

pany's control of the industry. This however is too big of an issue to address fully here.

I discovered during my reading that the majority of the areas of conservation that these cooperatives are using to qualify for funds are vastly directed towards preventing their waste and their large amounts of chemicals from reaching our waterways. The top of the list should be to maintain healthy lands not protecting the healthy from the contaminated.

As to the ideas that I support I will refer you to testimonies from Mr. Carl Homan, Homan Family Dairy Farms, on behalf of National Sustainable Agriculture Coalition, Centre Hall, Pennsylvania and Mr. David Bell, Executive Director, Wild Blueberry Commission of Maine, on behalf of Specialty Crop Farm Bill Alliance, Orono, Maine.

In conclusion, I believe our entire food chain is in crisis. Our land is corrupted, our food is poisoned, and here in America people are starving. I believe we need to look at more natural healthy ways of producing food. We can look for working models such as Carl Homans' dairy farm and find ways to increase production. We need to promote real conservation activities and more organic farms. We cannot just look at output but rather long term outcomes.

Thank you for your time,

STACIA LOPEZ.

COMMENT OF THOMAS LOPEZ

Date Submitted: Friday, May 18, 2012, 7:52 p.m.

City, State: Northville, MI

Occupation: Social Worker

Comment: I want a farm bill that favors local farmers, NOT corporations! I want transparency and fairness to be expected of all farmers and their farming practices. And I believe small producers deserve more protection under the law that huge corporations, who honestly monopolize the market. Also, end the subsidies for certain crops (*i.e.*, corn and soybeans)! The Monsantos didn't need the assistance and they push the smaller farmer out of the market. I appreciate your listening to my input.

COMMENT OF APRIL L'ORANGE

Date Submitted: Friday, May 18, 2012, 3:26 p.m.

City, State: Binghamton, NY

Occupation: Unemployed

Comment: We support our local farmers and ranchers and would appreciate it if the U.S. government did the same. Studies show that there is no gain in efficiency when farming and ranching operations grow above a certain size, and we are currently seeing exactly what kind of ill effects (Roundup resistant weeds, a move back toward the components of Agent Orange) we can expect from haphazardly trying to genetically modify crops to avoid extra labor, rather than buying seed that doesn't include any intellectual property fee and putting the money back into jobs that make those modifications unnecessary. The way we eat is making a whole lot of us sick, and it stems from the way we grow food in a country dedicated to rooting out any alternatives. It's time to stop subsidizing agribusiness and put our backing into small and midsized farming and ranching operations, where it belongs.

COMMENT OF WEN LOREN

Date Submitted: Friday, May 18, 2012, 7:10 p.m.

City, State: Eugene, OR

Occupation: Instructor and Licensed Massage Therapist

Comment: I fully support all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). This will be a start in adopting best agricultural practices for the health of citizens, the land and the livelihood of farmers and farm workers.

By fully funding conservation programs, such as the Conservation Stewardship Program, we make sure that enrollment in new insurance subsidies are tied directly to compliance with conservation programs & our farmland will be protected.

The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236) will assist in long term goals for Food, Farms and Jobs. Maintaining the EQIP Organic Initiative is necessary for health and well-being of us all.

COMMENT OF LLOYD LORING

Date Submitted: Friday, May 18, 2012, 12:42 p.m.

City, State: South Bend, IN

Occupation: Retired

Comment: Agribusiness methods are changing the value of foods they offer. Farmers who reject the brute force methods now urged by chemical firms to control weeds and pests are being victimized by rules that deny them the opportunity to create healthful and nutritious food. I need better food on my table, not bigger profits for a handful of investors.

COMMENT OF JOE LORIO

Date Submitted: Friday, May 18, 2012, 2:59 p.m.

City, State: Ossining, NY

Occupation: Journalist

Comment: Stop subsidizing corporate farms. Stop subsidizing commodity crops like corn. Corporate agriculture is poisoning the American food supply, creating obesity, and driving health-care costs through the roof. It's time to stand up to these entrenched interests and tilt the scales in favor of smaller, organic, sustainable producers.

COMMENT OF SABRINA LOUISE

Date Submitted: Saturday, May 19, 2012, 6:59 p.m.

City, State: Portland, OR

Occupation: Whole Foods Consultant

Comment: It is incredibly important to realize the magnitude of the farm bill as it relates to the permanency of our choices. We need to do whatever we can to preserve our right to seed heritage and food security, nutritionally and organically. This means less GMO's and more plant diversity . . . This also means more food going to feed humans than livestock, because meat and dairy long term is not going to be sustainable for 9 billion on one planet. Please rethink your decisions and take into account future generations. If we do not halt the planting and spraying of poisons, we risk global bee collapse, resource depletion, and potentially the end of all food systems, and thus, civilization.

COMMENT OF KATHRYN LOVE

Date Submitted: Friday, May 18, 2012, 4:19 p.m.

City, State: Columbia, MO

Producer/Non-producer: Producer

Type: Dry Beans & Peas, Livestock, Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: Agricultural subsidies for corn have led to the country's obesity epidemic. It is time to subsidize **Healthy** food, not the crops that have the most clout in Congress due to their lobbyists' influence. Please keep soil and water conservation and the health of U.S. citizens your foremost concerns when drafting the new farm bill.

Sincerely,

KATHRYN LOVE.

COMMENT OF ARLENE LOVE LIPPMAN

Date Submitted: Friday, May 18, 2012, 1:26 p.m.

City, State: Philadelphia, PA

Occupation: Artist/Photographer

Comment: We are like the growing number of people who have stopped buying meat and poultry in supermarkets. Food safety is below par. Turning it over to private companies will only increase the climate for corruption.

COMMENT OF GEORGE LOVEDAY

Date Submitted: Saturday, May 12, 2012, 1:33 p.m.

City, State: Grass Valley, CA

Occupation: Teacher

Comment: We are under control by the monopolistic farm industry, and they are poisoning America. How excited can one get about products full of pesticides, corn,

antibiotics, growth hormones, untested chemicals, GMO, and products full of fat, salt, and sugar that can stay on the shelf for 20 years? The bees are dying, super weeds are now spreading everywhere, poisons are allowed to travel downstream into water supply of communities, and we have a dead zone in the gulf that continues to grow.

Yet, you do nothing. You kick the can farther down the road rather than stand up and be responsible.

The change is simple if you are willing to take a swallow of integrity and courage. Money for organic farming only, and stop giving money away to the corn industry.

More cancers, birth defects, diseases, allergies, hormone imbalances, infertility, and on and on and on.

COMMENT OF SHEILA LOW-BEER

Comment: Our health and the planet do not benefit from subsidies to industrial agriculture! We desperately need a food system based on local and organic food! Please **Think**, and do the right thing. **Please!**

COMMENT OF STEPHAN LOWER

Date Submitted: Thursday, May 10, 2012, 2:21 p.m.

City, State: Reno, NV

Occupation: Retired

Comment: Our community has been hit especially hard by the recession. Providing enough healthy food for our neighbors is an enormous effort. Cutting Federal assistance, such as SNAP, simply means somebody is going to go hungry. That somebody is most likely to be children or seniors. You have duty, as do we, to be sure Americans have enough to eat.

COMMENT OF REBECCA LOWERY

Date Submitted: Friday, May 18, 2012, 3:06 p.m.

City, State: Eldersburg, MD

Occupation: Educator

Comment: As a consumer of pure, sustainably-produced, organic foods, I am tired of Big Agriculture lobbies ruling the food production in this country. My children have health conditions that require them to eat only pesticide- and GMO-free foods. We rely on several small local farmers to provide us with the nourishment we need. Big Agriculture lobbies are trying to put my farmers out of business and leave us with only toxic food. It is time that you honor the will of the people and not those seeking to profit from the destruction of sustainable, nutrient-rich food choices. Thank you for your consideration of this very important issue.

COMMENTS OF SANNA LOWRANCE

Date Submitted: Friday, April 27, 2012 6:05 p.m.

City, State: Hattiesburg, MS

Comment: I'd like to see more support for small farmers, some effort to end the massive environmental contamination of genetically modified crops that are devastating the nation and threatening the health of all those who consume them. I'd also like to see mandatory labeling of all genetically modified produce, meat, and processed foods . . . until then, I will not buy anything that I cannot source as local. It's simply too dangerous.

I'd also like to see some controls on the massive use of fertilizers, weed killers and pesticides that are producing super weeds, poisoning our air, water and the foods we eat, and quite possibly killing off the bees we need to continue to produce food at all.

Date Submitted: Wednesday, May 09, 2012, 3:28 p.m.

Comment: Provide more support to family farmers, to organic producers, and begin to phase out the GMO debacle that is ruining our health, our food supply and our faith in American food products. By requiring ever more pesticides—and more dangerous ones as well—genetically engineered crops are threatening our very survival by poisoning the environment, creating adverse health impacts from ingesting these pesticides, and promoting the growth of superweeds, which threaten all agricultural producing.

Date Submitted: Friday, May 18, 2012, 4:00 p.m.

Comment: I would like shopping to be easy again. I want to be able to trust the foods on the grocer's shelves. Instead, I have been forced to abandon any and all meat products, processed foods, most cooking oils and shortenings, dairy products, fresh, frozen and canned vegetables in order to avoid genetically engineered foods and ingredients that our ruining our health and our environment. It's time to return to common sense agriculture and to healthy, life giving foods.

"The USDA surveyed 43 foods and compared their nutritional content in 1999 to original testing that took place in 1950. Half of the nutrients measured declined by 6 to 38%."—The Cornucopia Institute

"Micronutrients such as iron, manganese and zinc can be reduced by as much as 80–90 percent in GE plants!"—Stingray

For a healthy America, our citizens must has healthy foods. To have access to healthy foods, producers must produce healthy foods, and food labeling must enable consumers to make the healthy choices when they shop.

COMMENT OF EMMA LOWREY

Date Submitted: Saturday, May 19, 2012, 5:06 a.m.

City, State: Hilo, HI

Occupation: Curves Employee, Freelance Writer and Proofreader

Comment: Food policy is one of the most important political issues, though many people do not realize government substantially shapes our food economy. As you consider our next farm bill, I urge you to:

End subsidies (aka direct payments and countercyclical commodity programs)! Current subsidies favor crops such as corn and soybeans that end up as highly processed food products largely devoid of fiber and nutrients. Research is showing that consumption of processed grains leads to an increased risk for obesity. If anything, our taxpayer dollars should be going towards helping local farmers who provide fresh food farmed in a sustainable manner.

I sincerely hope you take my points into consideration. I am only one of many citizens who share this view.

Thank you for your time.

COMMENT OF LYN LOWRY

Date Submitted: Friday, May 18, 2012, 12:38 p.m.

City, State: Takoma Park, MD

Occupation: Editor

Comment: We need real reform of our farm policies, from food safety and inspection to humane treatment and living conditions of animals. The situation regarding both these issues is abysmal and alarming. We can and should do better as a nation, and you should do far better as our Representatives.

COMMENT OF SARAH LOWRY

Date Submitted: Friday, May 18, 2012, 12:00 p.m.

City, State: Deerfield, OH

Occupation: Teacher

Comment: The industrial agriculture system is one that is ruining the health of U.S. citizens and the environment we all live in. We need to make sweeping changes in order to live better lives in the future. Please reform farm policy; if not for your own health, than for your children's.

COMMENT OF CAROL LUBETKIN

Date Submitted: Friday, May 18, 2012, 4:23 p.m.

City, State: Moore Haven, FL

Occupation: Retired Teacher

Comment: We must have an organic farm bill—accurate labeling and info for the public consumer. It is of grave importance to our health and the health of our planet Earth. Thank you very much.

COMMENT OF JILL LUBIN

Date Submitted: Thursday, May 17, 2012, 1:19 p.m.

City, State: Spotswood, NJ

Occupation: Chemist

Comment: Organic agriculture should be highly funded above all other agriculture. It is the only way the future of our land and agriculture will succeed. Genetically modified crops are rendering America's soil infertile and is not doing what it promised it would do.

COMMENT OF MICHAEL LUCA

Date Submitted: Friday, May 18, 2012, 12:03 p.m.
City, State: Shrewsbury, NJ
Occupation: Computer Consultant
Comment: I am concerned about what is going on in the food industry. We have lost our way and I am horrified at the level of influence the current Agribusiness has over our elected officials. I did not vote for Monsanto et al., and this needs to change.

COMMENT OF KRISTA LUCCHESI

Date Submitted: Wednesday, May 09, 2012, 3:59 p.m.
City, State: Oakland, CA
Occupation: Director of Nonprofit
Comment: Please consider those with no other resources to get food when you consider cuts to programs like the commodities program or SNAP. These folks have no other options for food and programs like mine cannot keep up with the need. We need your help. Please do not cut these programs.

COMMENT OF BARBARA LUCE

Date Submitted: Friday, May 18, 2012, 12:37 p.m.
City, State: Clinton, ME
Occupation: CS
Comment: I think that local food and small farms are a better value than large agribusiness. Food should be labeled so the consumer can make informed decisions.

COMMENT OF URSULA LUCKERT

Date Submitted: Tuesday, May 15, 2012, 6:41 p.m.
City, State: Portland, OR
Occupation: Accounting/Operations Executive
Comment: The SNAP and TEFAP programs are critical to our nation's mission that no one in our country should be hungry. These are effective programs with high efficiency and returns and such be supported by our legislature.

COMMENT OF NANCY LUEDERS

Date Submitted: Friday, May 18, 2012, 3:42 p.m.
City, State: Covington, GA
Producer/Non-producer: Producer
Type: Vegetables
Size: Less than 50 acres
Comment: Family gardens are great for harmonizing with each other, the Earth and God. We were meant to eat real food, not food containing chemicals. The GMO, chemicals, and techniques for raising gardens, livestock and human children are poison for all humans, gardens and livestock. We are destroying our home, Mother Earth, with all of these poisons. It is on your conscience how you vote, not mine, so good luck and do the right thing.

COMMENT OF DR. CATHERINE LUIB

Date Submitted: Sunday, May 20, 2012, 4:52 p.m.
City, State: Moreno Valley, CA
Occupation: Chiropractor, Acupuncturist, Clinical Hypnotherapist
Comment: We deserve a right to know what is in our food and if they are GMOs! GMO are horrible and detrimental, affecting and changing human DNA! We need to know about our food sources and have better quality of it. Protect organic farm lands and treat organic farmers better! Monsanto needs to go down, stop any support for this terrible money hungry company!

COMMENT OF CAROLINE LULEY

Date Submitted: Sunday, May 13, 2012, 10:48 a.m.

City, State: Cape Canaveral, FL

Occupation: Retail Sales

Comment: Please see that the farm bill is strong and protects our food supply. We need an end to farm subsidies with a strong labeling process. We need to support locally grown organic foods. We need to protect programs like SNAP, TEFAP, and CSFP so that poor children don't go hungry. Oversight and strong regulations on disease and farm animal treatment. All of these things needs to be considered and included in this bill. Our farm industry predicts the health and well being of all Americans.

COMMENT OF NEIL LUMBARD

Date Submitted: Monday, March 19, 2012, 6:20 p.m.

City, State: Waco, TX

Occupation: Student

Comment: Please consider the importance of nutrition programs and do not consider cutting funds helping these necessary health-related and hunger-related issues.

It would significantly affect our country, it's people, and not in a good or positive way. We must remember to help those in need. Hunger is never an acceptable option to even consider so far as possible budget cuts.

Please support all Hunger related bills to help the struggling and under-served members of our population. It helps everyone. It is the best and only option.

COMMENT OF KIRK LUMPKIN

Date Submitted: Sunday, May 20, 2012, 2:00 p.m.

City, State: El Cerrito, CA

Occupation: Farmers' Market Special Event Coordinator

Comment: Historically most of the money in the farm bill has gone to conventionally produced commodity crops, but these are the things that now need the least support. We need to support small organic farms—they represent the healthy future that will benefit the most people. We need to facilitate access to healthy food by increasing support for EBT (Food Stamps).

COMMENT OF RHONDA LUNDIN

Date Submitted: Tuesday, April 24, 2012, 1:18 p.m.

City, State: Reno, NV

Occupation: Public Relations

Comment: Mr. Amodei:

The cuts that the House Agriculture Committee has recommended making to the SNAP program would be absolutely disastrous to Northern Nevada. Need at the Food Bank of Northern Nevada has doubled in the last year and a half and more than one in four children in Nevada is food insecure. Losing access to SNAP benefits would be devastating to these families, and the Food Bank and other charities would never be able to fill the need created by these cuts.

I know cuts must be made, but please reconsider such dramatic cuts to SNAP. We are still dealing with double-digit unemployment in Nevada, and this kind of move would exacerbate the struggles that our state and communities are going through.

Sincerely,

RHONDA LUNDIN,

[Redacted],

Reno, NV.

COMMENT OF KATHLEEN L. LUNDY

Date Submitted: Friday, May 18, 2012, 4:20 p.m.

City, State: Salt Lake City, UT

Occupation: Self-Employed

Comment: There is much wrong with the proposed farm bill—it is doing nothing to help the long range development of farming as a way of life; healthy farming; and small local farms. It seems to promote more industrialization of farms . . . this practice leads to unhealthy for people crops . . . this bill undermines the very

things that would help our people . . . help us be healthy and more secure. More later . . .

COMMENT OF PATRICK LUNEMANN

Date Submitted: Sunday, May 20, 2012, 10:56 p.m.

City, State: Clarissa, MN

Producer/Non-producer: Producer

Type: Dairy

Size: 500–999 acres

Comment: As the President of the Minnesota Milk Producers Association (MMPA) and as a constituent of Congressman Peterson, I thought I should provide feedback regarding the dairy provisions of the proposed farm bill. MMPA's Board of Directors has voted to oppose the dairy provisions contained in the draft 2012 Farm Bill. MMPA, which represents Minnesota dairy farmers, believes the bill does not adequately address the challenges facing Minnesota's dairy farmers.

We ask that the language referring to "Milk Stabilization" be decoupled from the Dairy Producer Margin Protection Program. Or, another option would be to keep the existing language and then make Livestock Gross Margin—Dairy (LGM-Dairy) a permanent program and provide some additional funding. Therefore, producers could still choose to have a Federal supported safety net without being forced into a supply management program. They could choose LGM-Dairy or the Dairy Producer Margin Protection Program that includes Milk Stabilization.

MMPA's first priority is the long-term success of Minnesota dairy farmers. One major component of achieving this priority is to ensure that our dairy farmers have a solid infrastructure. Analysis of the current Senate language would force Minnesota dairy farmers to cut up to 6% of milk production—Today.

Certain regions are currently producing milk in excess of their processing capacity. Here in Minnesota, we are dangerously close to losing some of our processing plants due to lack of locally produced milk. A cut in other regions would just balance their supply to plant capacity. Here, with a production cut, our Minnesota dairy farmers could lose infrastructure, leading to further decline in an industry that adds over 40,000 jobs and over \$11.6 billion of economic impact to Minnesota alone.

Dairy farmers also deserve promised market reform. The United States dairy industry must move toward a two class pricing system and it must move toward a competitive pay price.

I also ask to please include California under the Federal Milk Market Order system. And, we should increase our solids non-fat standards up to the same level as California.

Thank you for the opportunity to share our feedback on the proposed dairy provisions of the current draft of the farm bill.

PATRICK LUNEMANN,
President, Minnesota Milk Producers,
 Clarissa, MN.

COMMENT OF JAMES LUNG

Date Submitted: Friday, May 18, 2012 2:20 p.m.

City, State: Portland, OR

Occupation: Graphic Designer and Avid Gardener/Food Grower

Comment: I am writing to voice my support for the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

We need to build resilience in our food system by supporting policies other than large mechanized big agribusiness. Our soils are getting salted by fertilizers and poisoned by pesticides. Our infrastructure is entirely based on a fossil fuel paradigm as we enter the 6th year of peak oil according to the International Energy Agency. Wes Jackson is an example of someone pioneering a more sustainable system that is resilient: he uses a perennial polyculture to withstand drought and hail without using pesticides and fertilizers. Please look at the risks of agribusinesses that are analogously 'too big to fail' and know that our food and soils are more precious than

money. True wealth is a healthy, productive land and we have farm lands that are desert equivalents that insects can't live on. We are making it so that even plants can't live on the land unless we bioengineer them to resist the poison we apply. We are at risk—make no mistake.

COMMENT OF CHRISTOPHER LUNN

Date Submitted: Friday, May 18, 2012, 3:25 p.m.

City, State: Genoa, NV

Occupation: Technology Executive

Comment: As you gentlemen and gentlewomen take care of and seek the best for your families, so should our laws seek to nurture what is best for the Earth that sustains humanity.

It is an obvious point of logic that replenishing Earth's soil with just 3 basic chemicals and then relying upon herbicides, pesticides and fungicides defies basic human and soil health needs.

Soil becomes too 'hot' for natural microbe and enzyme activity to thrive. Those nutrient releasers die and the cycle of replenishing with artificial chemicals takes over.

Organic farming research and implementation MUST be sustained and enhanced for the well being of present and future generations.

I urge you to **Please** look beyond the presentations of vested, corporate agriculture presents you.

GMO's **Be Gone!**

COMMENT OF JOANNE LUONGO

Date Submitted: Friday, May 18, 2012, 10:27 a.m.

City, State: Kettle Falls, WA

Occupation: Home Gardener/Writer

Comment: It is imperative that the small farm receive every consideration that industrial farming is offered. What is meant by "every consideration" is fairness, respect & economic advantages that large industrial farms are given.

COMMENT OF GRANT LUPHER

Date Submitted: Friday, May 18, 2012, 7:09 p.m.

City, State: Los Angeles, CA

Occupation: Unemployed

Comment: I believe that given the growing problem with hunger in this country, due to a still uncertain economy, that our Congress needs to put strong support behind farm aid bills.

COMMENT OF MAYRA LURIA

Date Submitted: Thursday, May 10, 2012, 3:08 p.m.

City, State: Ft. Lauderdale, FL

Occupation: Herbalist

Comment: We have lived the failure of corporate farms and it is time to help the individual small farmer again. Monsanto is not a farmer it is a corporation with Nazi ideals of ruling the world through food control. We need to encourage and support organic and non GMO food sources. The U.S. with all its knowledge is falling and failing the People in its agricultural policies.

COMMENT OF DEBORAH LUSCOMB

Date Submitted: Saturday, May 19, 2012, 1:24 p.m.

City, State: Boulder, CO

Occupation: Seamstress, Gardener, Nutrition Coach, Food Activist

Comment: In the name of sanity, compassion and health, it is time to discontinue subsidies to industries that are destroying the planet, like big agriculture, and increase subsidies to small, community, organic farmers. Let's put people and the planet before profit for a change. It's high time.

COMMENT OF MARC LUSSIER

Date Submitted: Friday, May 18, 2012, 11:28 a.m.

City, State: Florence, MA

Occupation: Restaurant Server/Milk Courier/Father

Comment: The support of smaller community based, family oriented farms is a key piece of our democracy. Our country was based on such things, and the “American Spirit” evolved from the independence created by small farms. The world changes, but a return to the past allows for a model that maintains an individual’s ability to work and see the results of the work. It moves us away from the large amounts of petroleum that now pervade our food sources in the form of fertilizers, and the need for petrol to ship products thousands of miles. Please take any GMO supporting provisions out—they are a dark path fraught with peril.

COMMENT OF ESSIE LUTES

Date Submitted: Friday, May 18, 2012, 1:48 p.m.

City, State: Indianapolis, IN

Occupation: Retired

Comment: Honorable Carson,

We need to stop funding for large industrial farmers and support our local as well as organic family farms. This is the heart land of America . . .

Regards,

ESSIE LUTES.

COMMENT OF HARRY LUTON

Date Submitted: Saturday, May 19, 2012, 4:01 p.m.

City, State: Bloomington, IN

Occupation: Biologist, Indiana University

Comment: As a biologist and someone literate in the science of our times as well as in world issues, I must stand up strongly for a farm bill that would encourage small-scale, organic farming rather than large-scale commodity farming. “Factory farms” rely heavily on synthetic fertilizers and pesticides, with a huge cost to our environment. In my hometown in Louisiana, the agricultural runoff coming down the Mississippi has numerous ill effects on the wildlife in the wetlands and coast, and also hurts our fishing industry. Similar issues occur all over the country, and ultimately the American people will suffer the cost of faltering ecosystems.

I also want to point out the unhealthy food systems that are tied to large monoculture operations. At a time when the rate of diabetes is steadily increasing, our stores are flooded with high fructose corn-syrup and refined wheat products rather than local greens.

The farms that should be subsidized are not those who are willing to stress our environment and our health in order to ensure their crops success and turn a dollar. Rather, I want my tax dollars going to those who are willing to take risks using natural growing techniques. For me this is a moral issue, as well as a common-sense issue. Those taking the big risks involved in small operations are the ones who really need the money.

For all of the reasons above, and many more I recommend a farm bill with the following features:

- Full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF LAURA LUTTRELL

Date Submitted: Friday, May 18, 2012, 12:06 p.m.

City, State: Milwaukee, WI

Occupation: Student—Future Farmer

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

- Maintaining the EQIP Organic Initiative.

I currently work with a nonprofit organization that daily encounters hundreds of individuals that are utilizing the SNAP program and vitally need it. How will they meet their basic needs without at least the same support?

I also plan to have a small organic farm in the future, but some of the suggestions on the table make me second guess whether you will make it too hard for me to do that.

I believe the only way forward for our country is to reduce the size of farms and increase the variety. Please help me to be able to be part of this.

COMMENT OF PATRICIA LUX

Date Submitted: Sunday, May 13, 2012, 9:23 a.m.

City, State: Oak Park, IL

Occupation: Self-Employed

Comment: Even families who receive food stamps sometimes need to come to our food pantry. Cutting SNAP will mean even less food for people already in poverty. Please don't cut SNAP.

COMMENT OF LYNNEA LUX-KOSIEWICZ

Date Submitted: Friday, May 18, 2012, 10:55 p.m.

City, State: Portland, OR

Occupation: Illuminated Calligrapher

Comment: We need real reform that supports a healthy, long term, bodiverse crop rotation that emphasizes organics and sustainable farming practices. Big ag fulfills none of these necessary requirements.

COMMENT OF AIMEE LUZWICK

Date Submitted: Tuesday, May 08, 2012, 5:09 p.m.

City, State: Griffith, IN

Occupation: Database Analyst

Comment: I recently read that the committee has approved cutting the Food Stamp Program that I believe is now called SNAP. I am personally appalled by this decision and I hoping what I read was wrong. I can honestly say that my family has been truly blessed during what I call a depression. However, the number of people that are struggling are far greater than any political poll can even gage. I have never seen so many people desperate for food on street corners, parking lots, and even children heading for school. My family has been trying to help as many families as much as possible through these horrible times. I cannot believe you now want to take food from these people when they've already lost everything. **Does Anyone On The Committee Know What It's Like Out Here In The Real World?** I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Too many people in my town will suffer greatly if you cut these programs.

COMMENT OF DEBORAH LYLE

Date Submitted: Sunday, May 20, 2012, 2:07 p.m.

City, State: Edgewater, MD

Occupation: Housewife

Comment: I am offended by the idea you want to further Monsanto and their unsafe gardening practices and round-up in the seed corn. The unsafe practices of these so called organized big businesses are what is killing our country. Killing the bees that pollinate our crops and wondering what has happened? We need safe practices in organic small farms to keep us eating healthy foods. Don't cave to big business and support our local farms instead. Thank you.

COMMENT OF DAVID LYNCH

Date Submitted: Friday, May 18, 2012, 2:01 p.m.

City, State: Lexington, KY

Occupation: Homemaker

Comment: Our country is turning into McDonalds, it is shameful that we give school children Roundup pesticide chips, but can't give them organic apples. If you want the USA to die continue supporting the McDonaldization of America. We need to double organic funding and farming, stop subsidizing Monsanto.

COMMENT OF JILL LYNCH

Date Submitted: Friday, May 18, 2012, 11:59 p.m.

City, State: Viroqua, WI

Occupation: Clinical Mental Health Counselor

Comment: Dear House Committee on Agriculture,

We really do need to wake up . . . we've needed to for a very long time, but we can **No Longer** continue on this path of unsustainable agriculture which contributes to unsustainable health & well-being, at home and around the world.

I grew up on an Iowa farm and know corn and soybeans, and worked in the fields. I loved being on the family farm. However, "factory farming" has taken over, aided by the agenda of agribusiness (which should not be synonymous with agriculture and farming) and the way we, the government, have subsidized corn for decades.

Also, I became sick from the commonplace and casual use of herbicides and pesticides. There is a problem here, and we need to stop dismissing or downplaying the problem. It is not going to go away through ignorance or dismissal of the problems.

My undergraduate degree is in home economics and I taught high school level in Iowa before teaching as a Peace Corps Volunteer in Sierra Leone, West Africa. I want you to know that the Beef, Dairy, Pork Councils wrote out curriculum materials for teachers to use for cooking and nutrition classes. Let me tell you, this was biased information and clearly inappropriate. As a young teacher I didn't know better, and many continue today not knowing any better.

Also, when I went to Sierra Leone (1977-79) shops were selling DTD that the USA shipped there because it was banned here in our country because it was a health risk. I was appalled and ashamed that my country did this. I also saw clearly how the local Sierra Leonans did not know how to read the labels or use such toxic materials.

These stories are about my direct experience, and just are small examples of the monolithic problem. Perhaps they sound unrelated to each other, but they are not. Perhaps they sound exaggerated, but they are not. The kind of industrial and chemical farming we are engaged in and supporting is dead wrong—as in killing us and throwing things way, way out of nature's balance—affecting our food, our water, our soil, our bodies, our wildlife. These pieces are all interconnected and impact locally and globally.

Please, I ask you to look closely and deeply into the farm bill. I am aware how complex this situation is with agribusiness lobbying, the history of subsidy, the impact on informed and uninformed REAL farmers, and the distasteful politics that gets played out to the detriment of our health.

You have no small task on your hands. This is a huge issue about personal, family, community, national and international well-being; including the health and safety of our water, our soil, our air, our plants, our livestock.

May you approach this new farm bill with wisdom!

Kindly,

JILL.

COMMENT OF MARTHA LYNCH

Date Submitted: Friday, May 18, 2012, 1:41 p.m.

City, State: East Lansing MI

Occupation: Spiritual Director & Pastoral Care Coordinator

Comment: Food is not a 'commodity', it is the gift that sustains life for the whole Earth. With the health and welfare of that precious ecosystem precariously hanging in the balance, we must be mindful always of generations to come. May you find the courage to release the power grip that industrial agriculture has on our food, and begin to let in the light of science and moral understanding. Seeds must remain in pure form—without chemical additive or genetic modification. Animals must be treated humanely—able to live a life of dignity and comfort. 'You are what you eat' is not only a catchy slogan, it speaks the truth of how we are making ourselves and the planet sicker and sicker. To continue to subsidize poisons and maltreatment of animals is unconscionable! It's time to subsidize and lift up small, local, sustainable, healthy farming practices that are organic and biodynamic—for the sake of our children and grandchildren!

COMMENT OF MEGAN LYNCH

Date Submitted: Saturday, May 19, 2012, 9:06 a.m.

City, State: Prairie Village, KS

Occupation: Hospital Admitting Representative

Comment: We need food to live. Why wouldn't the government want to make sure that we and our kids have access to healthy foods? I hope they take more of an interest in the issue.

COMMENT OF MARCY LYNN

Date Submitted: Friday, May 18, 2012, 7:23 p.m.

City, State: Brooklyn, NY

Occupation: Parent

Comment: Any farm bill should subsidize and support organic agriculture and organic farming practices (even where full organic certification isn't affordable). Organic vegetable crops should be subsidized so as to make organic local vegetables more affordable for all. Our govt. should not be subsidizing junk crops like soy or corn or potatoes or even wheat. They are used to make junk foods and flours that make . . . more junk foods. They are cheap (because they are subsidized) and that lines the pockets of statin makers but frankly most of us are having trouble affording \$5 bunches of organic broccoli. So subsidize vegetables, not junk starch crops. Do not support any GMO crops. And work to eliminate pesticides over all so we keep our bees—which are indeed needed to keep crops growing and maintain food supply. Also would request:

1. The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
2. Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
3. The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
4. Maintaining the EQIP Organic Initiative.

COMMENT OF MATTHEW LYNN

Date Submitted: Sunday, May 20, 2012, 11:08 p.m.

City, State: Venice, CA

Occupation: Film/TV

Comment: Please support a healthy farm bill that puts organic farming and free-range livestock as a priority.

Why can't we STOP subsidizing corn, which just leads to obesity, and **Start** subsidizing organic and healthy farming practices?

After all, we are what we eat, and Americans are growing tired of eating factory farmed subpar food!

Please help make a difference in the right direction!

Thanks!

COMMENT OF MEGHAN LYNN

Date Submitted: Saturday, May 19, 2012, 1:31 p.m.

City, State: Antioch, IL

Occupation: Education

Comment: I am a supporter of Organics as they are much healthier with all the chemicals that are being put into people's foods. It is important that people are educated on the facts of what is going into their foods so they can make more informed decisions on the products they consume. As Americans, we should be supporting healthier lifestyles with no GMOs. The number of people with diseases such as cancer and diabetes rising at an alarming rate.

COMMENT OF BRENDA LYON

Date Submitted: Saturday, May 12, 2012, 3:41 p.m.

City, State: Branchport, NY

Occupation: Unemployed

Comment: Our counties backpack program feeds over 400 children each weekend. Children who otherwise would not have food to eat. Cuts to the SNAP Program will put these children in jeopardy.

You may want to visit Milly's Pantry in Penn Yan and meet with the director of this program Becky Holder, to get the specifics and needs of our children. Becky's mother Milly, a retired lunch lady, started this program.

COMMENT OF JANET LYON

Date Submitted: Sunday, May 20, 2012, 1:28 a.m.

City, State: Missoula, MT

Occupation: Land Owner/Social Worker

Comment: As a family descendent of Montana homesteaders, I know the importance of protecting our country's family farms and preventing them, through education and legislation, from becoming sources of pollution of our land and water. Let the farm bill pave the way for helping Americans become healthier and protect our land and water through the use of environmentally sound best management practices. The organic food movement is an idea whose time has come. Let the new farm bill provide the support to this movement that we all deserve.

The Whole World Is Watching.

COMMENT OF CURT LYONS

Date Submitted: Friday, May 18, 2012, 11:08 p.m.

City, State: Fort Collins, CO

Occupation: Construction

Comment: I am so tired of big agribusiness that only cares about the bottom line of making money wining out over farms trying to grow the best most healthy food, that I would actually feed my child.

COMMENT OF SHANNON LYONS

Date Submitted: Saturday, May 19, 2012, 8:27 a.m.

City, State: Sarasota, FL

Occupation: Yoga Instructor

Comment: No farms, no food. The people are exclaiming that they do not want mass produced, processed, and shipped food. See the opportunity to thrive as a well-nourished country fed on local family farms. Support local economy and enrich the lives of humans, animals, and soil with humane and sustainable practices.

COMMENT OF CHARLES MA

Date Submitted: Friday, May 18, 2012, 10:25 a.m.

City, State: Magnesian, MA

Occupation: Engineer

Comment: Please support our local farmer. Stop subsidizes to big farmers & the production of food that is making us and our planet sick. Please support feeding the hungry!

JOINT COMMENT OF JOAN AND WALLACE MACDONALD

Date Submitted: Saturday, May 19, 2012, 8:41 p.m.

City, State: Mountain View, CA

Occupation: Retired Teacher and Management Analyst

Comment: We feel strongly that subsidies to agribus should stop. That is wasted dollars that should be given to authentic small family farms, especially organic farms. Subsidies to huge corn producers for ethanol is totally unrelated to food production.

Further, we want more inspectors to protect consumers from tainted or diseased food. The instances of food that has had to be recalled have risen. Clearly, more efforts in prevention are needed.

And GMO foods need clear labeling now.

COMMENT OF JOANN MACDONALD

Date Submitted: Saturday, May 19, 2012, 8:12 a.m.

City, State: Joppa, MD

Occupation: Retired

Comment: I'm an "eater", and I want my food safe from farms to my table. Organic should mean **No** pesticides, no antibiotics, and only preservatives that have been approved safe for consumption. Salt is one!

We have come so far in protecting the health of our citizens. Don't stop now!

COMMENT OF LEO MACDONALD

Date Submitted: Friday, May 18, 2012, 6:46 p.m.

City, State: Erwinna, PA

Occupation: Chemistry Teacher

Comment: Our food is healthier when organic and natural and humane methods of food production are used. Large doses of toxic chemicals are bad for the plants (pesticides) and bad for animals (hormones and antibiotics) and finally bad for the end consumer (the people who eat, which includes ALL people. Big corporate agri-chembusiness wants everyone to think these "lots of chemicals" are essential to food success. Nothing is further from the truth. My family eats healthy organic local food and are healthier and my little kids (2 & 4) will grow up stronger without chemical toxins in their bodies. Please enact a farm bill that supports small healthy farms and discourages large factory farms dependent on chemicals.

COMMENT OF MYRA MACDONALD

Date Submitted: Friday, May 18, 2012, 2:02 p.m.

City, State: Berkley, MI

Occupation: Educator

Comment: I want my food to be organically grown and not genetically modified. I also want it clearly labeled so I know what I am buying. Please make sure any legislation that passes includes these two important considerations. Thank you.

COMMENT OF SHAUN MACDONALD HAWKE

Date Submitted: Sunday, May 20, 2012, 1:16 a.m.

City, State: Angelus Oaks, CA

Occupation: Teacher

Comment: Safety of our food production should be one of our nation's highest priorities. The safety of our food production depends on diversity—in seed resources, ideas, and people in farming. Small farms and organic practices have had centuries to prove their safety. Corporate giants do not protect our nation's food supplies—except in ways it helps their bottom line.

COMMENT OF MARIE MACDOUGALL

Date Submitted: Friday, May 18, 2012, 3:13 p.m.

City, State: Lovelock, NV

Producer/Non-producer: Producer

Type: Field Crops, Poultry/poultry products

Size: 50–150 acres

Comment: I am completely against tax money being used to pay subsidies to agricultural corporations, under any guise including crop insurance. Enough already—we are hurting in this country, even those of us with jobs. It angers me to see my hard-earned dollars being handed over to corporations.

COMMENT OF ADAM MACGREGOR

Date Submitted: Friday, May 18, 2012, 2:49 p.m.

City, State: Pittsburgh, PA

Occupation: Communications Specialist

Comment: I urge the committee to oppose any measure that would weaken or dismantle SNAP by cutting its funding or changing it to a block grant program. SNAP is a vital safety net program that must be protected and strengthened to meet the still-growing need from families who are reeling from the effects of the economy. Reducing its funding, altering its structure, or otherwise artificially contracting the program in spite of this need spells trouble for hungry households across our country. I call upon you to please also protect and strengthen important anti-hunger programs like TEFAP and CSFP in the 2012 Farm Bill reauthorization.

COMMENT OF SUSANNA MACGREGOR

Date Submitted: Friday, May 18, 2012, 10:04 p.m.

City, State: Fairfield, IA

Occupation: Architectural Designer

Comment: I am very concerned that corporate agriculture interests are controlling and co-opting most of the Agriculture legislation. I want subsidies to big corn and soy and similar commodity producers to be cut, so that the least healthful food no longer is the cheapest for consumers. I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
 - Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
 - The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
 - Maintaining the EQIP Organic Initiative.
- For the sake of the health of our people and the well-being of our environment, we must move toward sustainable agriculture—more conversion to organic practices.

COMMENT OF THERESE MACKENZIE

Date Submitted: Friday, May 18, 2012, 5:38 p.m.
City, State: Chicago, IL
Occupation: Education
Comment: Food safety concerns affect more than food. The future of our soil, air, and water are involved. Please do anything possible to stop wasting money on agribusiness and everything possible to support organic farming.
 Thanks!

COMMENT OF DEB MACLEOD

Date Submitted: Friday, May 18, 2012, 3:11 p.m.
City, State: Nantucket, MA
Occupation: Small Elegant Space Designer
Comment: Should be obvious to everyone by now that 3 generations migration away from the land & local food production has changed the country's overall health. Food comes from soil. Not labs. Health comes from food. We are what we eat. What's working is honoring the land & the true stewards of that land. Stand up for this country. People will help you carry the banner! Thank you!

COMMENT OF DIANNA MACLEOD

Date Submitted: Friday, May 18, 2012, 1:54 p.m.
City, State: Langley, WA
Occupation: Writer
Comment: We need real reform that places the health of consumers above the profits of agribusiness. Support organics, family farms, and agricultural practices that enhance, not destroy, the land and water.

COMMENT OF MARGARET MACIBORKA

Date Submitted: Friday, May 18, 2012, 4:39 p.m.
City, State: San Francisco, CA
Occupation: Commercial Insurance Underwriter
Comment: Just as food sustains us, we must sustain the producers of quality, chemical-free food not "Big Ag", but those that care about the land and the air and water quality that result from their operations. We must also support methods to get good quality food to those less fortunate. These methods could be funded by eliminating subsidies to "Big Ag". It's time to cut the purse strings!

COMMENT OF CHRISTINE MACIEL

Date Submitted: Wednesday, May 09, 2012, 10:07 p.m.
City, State: New Windsor, NY
Occupation: Retired
Comment: Food is the most important, basic necessity for every one of us. To neglect to protect our food producers and encourage them to use safe sustainable methods is unthinkable. And to refuse to provide food aid for those of our most vulnerable citizens, our children and our elders, is a crime.
 We must double our efforts to protect the young for hunger! They are our future!

COMMENT OF NANCY MACY

Date Submitted: Saturday, May 12, 2012, 5:52 p.m.
City, State: Boulder Creek, CA
Occupation: Director of Recycling

Comment: Eliminate subsidies to industrial agriculture (corn, soybeans, canola or rape seed, wheat and rice) in favor of vegetables and fruit (encourages health eating and can reduce obesity), and **Expand** policies which encourage and foster organic agriculture, long since proven to yield as much as industrial agriculture, without poisoning the land with herbicides and pesticides (thus eventually eliminating the huge dead zone in the Gulf of Mexico). **Retain And Fully Fund** programs that benefit women with children (Food Stamps and WIC).

COMMENT OF TIA MADDOX

Date Submitted: Sunday, May 20, 2012, 1:44 p.m.

City, State: Bend, OR

Occupation: Chef

Comment: As a restaurant chef and manager, it is of absolute importance the quality of food. Genetically modified foods are so prevalent now, and mandatory labeling of these foods at the very least is a must. I only choose organic foods for consumption out of fear of what is hiding in conventional products. Most people are not aware of GMOS and the toxic side effects they have on human health, no matter what Monsanto and other people may claim. Food is meant to be pure, organic, and real, not created in a laboratory or a factory. what are the Monsanto, the government and all the top people eating? are they poisoning themselves with toxic conventional foods? Highly unlikely. Changes need to be made now.

COMMENT OF MONICA MADER

Date Submitted: Friday, May 18, 2012, 3:26 p.m.

City, State: Pasadena, CA

Occupation: Sales Representative

Comment: To Whom It May Concern:

As a concerned citizen, I am writing to propose reasonable ideas. Please do not cut funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture. Also, consider and take action to protect and assist small and beginning farmers. Stop subsidizing corporate agribusiness. Focus on and implement adopting best agricultural practices that put the health of the citizens, animals, the land and the livelihood of farmers and farm workers over the interests of giant agribusiness owners, insurance companies and industrial agriculture lobbyists.

I support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF CARLEEN MADIGAN

Date Submitted: Friday, May 18, 2012, 11:39 a.m.

City, State: Cummington, MA

Occupation: Book Editor

Comment: I would like to see more financial support for small farms and beginning farmers, and a decrease in funding for corporate farms. The future security of America's food supply rests with diversified small farms. Thanks!

COMMENT OF REBECCA MADSEN

Date Submitted: Friday, May 18, 2012, 11:27 a.m.

City, State: New York, NY

Occupation: Attorney

Comment: With respect, some of your constituents have found that the health of our children is affected by the food that is most readily available to them. Please help us create a healthy environment!

COMMENT OF JEFF MAEHR

Date Submitted: Friday, May 18, 2012, 4:04 p.m.

City, State: Pagosa Springs, CO

Occupation: Health Care

Comment: The House Agriculture Committee must surely be aware of the rapidly expanding demand for organic foods and products. Locally grown is “the” next step in this movement. This issue involves health, environmental safety, and national security for Americans. The damage done by complying with megafarming corporations which are attempting to control food and distribution is well established. The threat of GMO foods to human and animal health is well settled science. Please do the right thing and support organic farming in every possible. It will happen and is happening through other major efforts, so don’t be left behind the “8” ball.

COMMENT OF RACHEL MAEROFF

Date Submitted: Friday, May 18, 2012, 6:57 p.m.

City, State: Plantation, FL

Occupation: Health Counselor

Comment: The farm bill has become a piece of legislature that supports large corporations more than the small farmer and supports crops that turn into junk food. The farm bill should provide a safety net in **Emergencies** (like droughts and natural disasters) and if it supports **Any** crops, it should support fresh fruits and vegetables, the type of foods people need to eat more of.

COMMENT OF JON MAGEE

Date Submitted: Sunday, May 20, 2012, 10:26 p.m.

City, State: Greenfield, MA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I am a young farmer myself and I have benefited from the few programs already extant to support new growers. Under the NRCS EQIP program our farm has built high tunnels and improved drainage on our small acreage. From the ATTRA/NCAT program, I received a wealth of information as well as referrals to my first two full-time jobs in agriculture. We enjoy all the shared knowledge brought about by the SARE program’s farmer grants and partnership grants, as well as its valuable publications. Our local extension provides active support for small-scale farmers, in spite of a lack of funding. Small scale farmers are admittedly not a large source of income for the large funders of agricultural education and research, the conglomerates of agribusiness. So it is all the more critical, if this way of life is to continue, that we as a society stand up and make it continue. This can only be done through deliberate action, through real funding of the programs which support new and small farmers. I’d like to share my support for programs that help the next generation of growers build strong farm businesses. As it’s estimated that 125,000 farmers will retire in the next 5 years, it’s absolutely critical that farm bill programs help citizens get started in this challenging field. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project’s costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.

- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

JON MAGEE,
{Redacted},
Greenfield, MA.

COMMENT OF JIMMY MAGIASIS

Date Submitted: Thursday, May 17, 2012, 12:38 p.m.

City, State: Seattle, WA

Occupation: Naturopathic Doctor

Comment: Lower subsidies by 25% and use that money to support schools to feed children more organic vegetables and fruits. Take the rest of the subsidies and divide it among all farms, including small organic farms.

COMMENT OF JENNIFER MAGLIONE

Date Submitted: Friday, May 18, 2012, 12:57 p.m.

City, State: Mineola, NY

Occupation: Nurse

Comment: I want my tax dollars to go towards good nutrition. Stop with the GMO's and stop denying that good nutrition is not a right in this country. Listen to the people not the corporations.

COMMENT OF ANGELA MAGNUSON

Date Submitted: Friday, May 18, 2012, 1:11 p.m.

City, State: Louisville, KY

Occupation: Teacher

Comment: Our congress must defer to the wisdom of both small and large organic farmers. They and I believe in hard work that sustains the land and is meant to healthfully affect the lives of people who rely on their knowledge and toil. The greed that drives agribusiness is out of control! Our legislative bodies should be the defense against such insatiable operators who care little about the land and product they put out beyond their profitability. Please, carefully consider the details of the next farm bill and fight to ensure the protection of the land, the water and the good women and men who put their hands in both and sew the seeds of love and life.

COMMENT OF JEANNE MAGUIRE

Date Submitted: Saturday, May 19, 2012, 11:36 a.m.

City, State: Long Beach, CA

Occupation: Doctor

Comment: How long can you live without clean **Food, Water & Air**, the way **Nature** intended? Make the moral and ethical choice. Give us an organic farm bill protecting sustainable farming. The future of our lives and Mother Earth depend on **You**.

COMMENT OF CYNTHIA MAHAMDI

Date Submitted: Saturday, May 19, 2012, 6:11 p.m.

City, State: Boulder Creek, CA

Occupation: Professor

Comment: To be denying the needs and will of the American people in favor of the profit margins of agribusiness is not only anti-democratic, it's stupid. It is jeopardizing the health of the economy and the health of the nation by favoring cheap, toxic, and nutritionally dubious products over organic, sustainably farmed, nutritious food. Will 2012 go down in U.S. history as the year that democracy died in America? Will we remember this administration as the government that sold its

people to big business interests? If legislators would simply take the time to inform themselves instead of behaving like paranoid sheep, following whatever they are told, ignoring any information that does not adhere to the official line of corporate power, we might have a chance. There is **So Much** on the line—please, think carefully about what you are doing.

COMMENT OF MARGARET MAHLER

Date Submitted: Friday, May 18, 2012, 12:07 p.m.

City, State: Tonganoxie, KS

Occupation: Retired Kansas Educator

Comment: Dear Rep. Lynn Jenkins,

Per Sen. Dole's *Tell The Truth* 1996 Presidential campaign ad—Kansas homesteaders and small family-owned farms have been the foundation for employing and feeding livestock and people.

I support legislation for sound conservation practices and avoiding GMO's, big corporations including Monsanto's practices and greed.

I support buying local products and educating youth through 4-H and FFA.

Thank you.

COMMENT OF KATE MAHONEY

Date Submitted: Friday, May 18, 2012, 12:38 p.m.

City, State: Dartmouth, MA

Occupation: Caretaker/Organic Gardener/Innkeeper

Comment: It is time for a drastic overhaul in our food industry. Every day I read about foods that are actually poisoning our bodies and making us sick. GMO's and pesticides are prevalent at unhealthy levels in the food we buy in our grocery stores. Anyone voting against this bill is voting based on ignorance. Wake up. Our representatives need to do some extra homework and reading so that they are aware of the bigger picture here. It is absolute and utter **Ignorance** that keeps a bill like this from passing. It is a **Common Sense** bill. Please support it.

COMMENT OF VALERIE MAILLE

Date Submitted: Thursday, May 10, 2012, 6:50 p.m.

City, State: Hudson Falls, NY

Occupation: Unemployed

Comment: As what is supposed to be richest country in the world I think it is time we held our senior citizens with a much higher regard than we do. We need to make sure they want for nothing especially food. No senior citizen should have to make the choice of food, bills or medicine it should all be easily accessible to them financially.

COMMENT OF CLAUDETTE MAIN

Date Submitted: Friday, May 18, 2012, 8:59 p.m.

City, State: Foster City, CA

Occupation: Travel Agent

Comment: As a non-smoker who was diagnosed with Lung Cancer 6 months ago, I am extremely concerned with all of the pesticides and chemicals that are used on our Agricultural products. I only buy organic now and will not expose myself to these dangerous pesticides and chemicals ever again. Life is too precious to waste it on cheap poisonous fruits and vegetables!

COMMENT OF GRETCHEN MAINE

Date Submitted: Saturday, May 19, 2012, 11:52 p.m.

City, State: Waterville, NY

Producer/Non-producer: Producer

Type: Dairy

Size: 500-999 acres

Comment: To the members of the House Ag Committee:

We are dairy farmers in central NY state. We are third generation farmers on this 500 acre farm. "We" have been here for over 100 years. It's looking more and more like the end is near. We simply cannot survive on \$16 milk. Our feed is now almost \$400 per ton and rising. Fuel is \$4 a gallon. Fertilizer is up \$80 a ton over last year. Everything else that we need is up.

We figured today that we get \$16 per cwt for our milk. When that same milk is sold in the store, it fetches \$44 in Wal-Mart, more in other stores. In other stores it can fetch up to \$48+. That is just not right. Our milk is robbed from us. We have to pay hauling to the processor's and then to the store. Since when should we have to pay "freight" on what we sell? The buyer should be paying the "freight".

If the Dairy Security Act gets into the farm bill, nothing will change. We will still be at the mercy of the processors.

I am a member of the National Family Farm Coalition as well as Progressive Agriculture Organization and get no respect. We support S. 1640, the *Federal Milk Marketing Improvement Act*, or the Cost of Production Bill. We have tried to get support for it, but we have been shut out of everything. Whenever there is a hearing of any kind, the only ones who can speak are handpicked by the co-ops, and the independent farmers have no say. Politicians have been bought by the big co-ops, lobbyists, and big processor money.

Someone Needs To Listen!

No industry can survive without their cost of production. **We Need A Cost Of Production!**

At the same time we need a supply management program. With the Dairy Security Act supply management would be "voluntary." What would keep the oversupply of milk from being balanced on the "volunteers" backs while the big guys just kept cranking out more milk? If the DSA were in effect now, "volunteers" would receive a payment only if they purchased enough insurance to cover their losses and would still be penalized if they did not cut their production 2% below their bases.

We Cannot Survive This BS.

Please, please take a look at S. 1640 and its merits. If the Dairy Security Act is passed, we are done. Yes, the major co-ops support it, but that doesn't mean that their individual members do. They really don't have anything to say. The masterminds of the co-ops do pretty much as they please as long as their pockets are being filled.

I applaud Senator Gillibrand for standing up for her farmers and wish that other politicians would follow suit.

Sincerely,

GRETCHEN MAINE.

COMMENT OF DONNA MAINS

Date Submitted: Thursday, May 10, 2012, 11:34 a.m.

City, State: Oak Park, IL

Occupation: Executive

Comment: There are many Americans in dire straits these days. I see it every day on my commute to and from downtown Chicago. Please ensure that these people who are in very unfortunate circumstances can continue to feed themselves and their families. **Don't Cut SNAP.** Many, many people need this benefit.

Thanks.

COMMENT OF CHRISTOPHER MAIURRO

Date Submitted: Friday, May 18, 2012, 2:40 p.m.

City, State: Brooklyn, NY

Occupation: Small Business Owner

Comment: When is it our turn? When will our elected officials represent our interests instead of those who can afford to hire lobbyists? Is it the fancy dinners? The escorts? What do you guys want? Just do your jobs . . . for once.

COMMENT OF JUDY MAJOR

Date Submitted: Friday, May 18, 2012, 10:25 a.m.

City, State: Yorktown, VA

Occupation: Retired Teacher

Comment: I would like the government to stop subsidizing corporate farms and start supporting the farmers who produce healthy, non-GMO foods and who treat animals grown for food with respect. Our obesity and diabetes epidemics are a direct result of our chemical-laden food, and you have the responsibility and the power to change that.

COMMENT OF IGGY MAKAREVICH

Date Submitted: Friday, May 18, 2012, 11:54 a.m.

City, State: Cos Cob, CT

Occupation: Artist

Comment: It's simple. Human beings require healthy food. Human beings do not require genetically altered toxic junk passed off as "food" by corrupt corporations and government. These things must be disallowed, unless your goal is to kill us all slowly, which seems to be the case. I must say that I do not trust any of you to do the right thing as you so rarely do, but hope that this plea will nudge you into protecting us in this matter. Farms should be natural. Not toxic. Can you not understand this?

COMMENT OF JANET MAKER

Date Submitted: Wednesday, May 02, 2012, 7:40 p.m.

City, State: Los Angeles, CA

Occupation: Retired

Comment: Please protect programs vital to people struggling with hunger. Cutting programs that help feed our hungry neighbors is unacceptable! Please help save things like SNAP (food stamps) and our Emergency Food Programs! This is not just for farmers. This impacts all of our Food Pantries who are struggling to help the hungry.

COMMENT OF ANNE MALCORE

Date Submitted: Wednesday, May 16, 2012, 7:11 a.m.

City, State: Green Bay, WI

Occupation: Membership Services Representative

Comment: I am a huge advocate of healthy eating initiatives. I have recently taken on gardening, and I hope to assist with some of the school gardens in Green Bay this summer. With the obesity issues our state and nation are facing we need to connect schools to local farms for healthier, more nutritious lunch programs and supporting organic farming is essential. We are poisoning ourselves with pesticides and only setting ourselves up for increased health issues in the future if we continue to contaminate our ground water, air, and soil. We need sustainable, environmentally conscious agricultural ingenuity that awards farmers for producing our nation's food conscientiously. Please be a leader in creating a new food and farm bill that will consider the issues we face in regards to health and nutrition; as well as, sustainability and environmental awareness for our future and the future generations to come!

COMMENT OF EDITH MALIN

Date Submitted: Friday, May 18, 2012, 12:25 p.m.

City, State: Hatfield, PA

Occupation: Wellness Consultant

Comment: U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of (small) farmers and farm workers **Over** the interests of industrial agriculture lobbyists. Agribusiness is destroying too much of the quality of our food, destroying the land, the small local farmers, the quality of water, and their pesticides are killing the honeybees, *etc., etc., etc.* GMO producers are using far too many chemicals on the land, and crushing local farmers for patent infringement when their plants 'infect' the neighbors fields. Agribusiness is not the future.

COMMENT OF ROBIN MALLERY

Date Submitted: Friday, May 18, 2012, 10:57 a.m.

City, State: Grass Valley, CA

Occupation: Professional

Comment: From this day forward, our decisions must be made with the environment in mind. We can no longer let Big Farm/Ag Industry rule, we need to support small, local farms and farmers. Think about your children and grandchildren as you make recommendations for the future. Thank you.

COMMENT OF JANIE MALLOY

Date Submitted: Friday, May 18, 2012, 12:12 p.m.

City, State: Canby, OR

Occupation: Designer

Comment: Please stop subsidizing a system that is too big to fail. Sustainable agriculture does not include GMO seeds, monoculture, or rendering the soil impotent for seven generations. Be responsible, and do the right thing. Humanity may depend on it.

COMMENT OF PEGGY MALNATI

Date Submitted: Saturday, May 19, 2012, 12:41 p.m.

City, State: Farmington Hills, MI

Occupation: Writer/Journalist

Comment: As the daughter of farmer who grew up on a multi-generation family dairy farm, the farm bill is something that I always keep an eye on, as I know that it can have a big impact on the already difficult lives of small family farmers. For too long, the farm bill has been written for Big Ag and has failed to address the needs of smaller family farms and more sustainable farming practices. It's time we changed that and created a saner and fairer method of producing the foods this country and much of the rest of the world relies on for its needs.

COMMENT OF ANN MALONE

Date Submitted: Friday, May 18, 2012, 1:05 p.m.

City, State: Sugar Grove, VA

Occupation: Home Health Aide

Comment: Subsidies need to be cut to the huge producers and CAFO farms, and help given to the family farmers. Here in the 9th, I have many neighbors who have dairy and meat cows, or raise crops for market. They have to compete with the "too big to fail" welfare farms. Time to give that subsidy money to producers who are actually living and working on the farms, not to huge corporations.

I do not want to eat pesticides or GMO food. Special consideration needs to be given to those farmers who are caring for the land, and not putting poison into the food chain. Organic standards need to be respected and treated fairly. It is the agri-business sector who needs to be regulated and closely watched, the organic farmers need to be able to sell their crops without spending huge amounts of money to the government.

Thank you for the opportunity to comment.

COMMENT OF BARBARA MANALILI

Date Submitted: Sunday, May 20, 2012, 9:09 a.m.

City, State: Baiting Hollow, NY

Occupation: Teacher

Comment: I have a family food garden. This garden provides food for 4 to 6 people all season. The reason for this garden is that I do not trust the food at our chain food stores. England pulls yellow dye #6 from all foods. But our government doesn't think that it's "That" harmful to the people in the USA! **Shame** on us. I hope that your vote is **Yes** to help our Organic Farmers/ranchers and to support the acts/bills that help our producers!

Thank you,

BJM.

COMMENT OF PAULA MANALO

Date Submitted: Thursday, May 03, 2012, 11:42 p.m.

City, State: Redwood Valley, CA

Producer/Non-producer: Producer

Type: Dry Beans & Peas, Field Crops, Fruits, Livestock, Poultry/poultry products, Specialty Crops, Vegetables

Size: 50-150 acres

Comment: I am a first-generation beginning farmer and part of the next generation of American farmers. At 30 years old, my fiancé and I lease over 100 tillable acres and roughly 1,000 acres of rangeland. We are a diverse farm selling primarily direct-to-consumer. The challenges we have faced and continue to face are access to land and lack of capital. This farm bill needs to provide solutions to these problems if more young people are going to enter farming. We have benefitted from NRCS EQIP cost-share assistance and BFRDP-funded educational programs. Please allocate more funding to these important programs; we are a testament to their success. Support for small- and medium-size farms, diverse sustainable farms, and beginning farmers is an investment in the future of American agriculture and food security.

COMMENT OF FLORIE MANASIA

Date Submitted: Saturday, May 19, 2012, 8:55 a.m.

City, State: Simsbury, CT

Occupation: Retired

Comment: We the people need to have laws protecting our food production. There is so much garbage put in today's foods and so much chemicals and this needs to be stopped. I know the population is getting out of control, but let's not fill our food with chemicals so people get sick. There are other things that should be cut that are draining our taxes and that is benefits to all government employees. Cut health and retirement benefits and see how much money we save. Pass laws to stop food from coming from China and encourage farmers to grow healthy food and safe and humane animal production for food right here in our country. That is what you should be doing. That is your job.

COMMENT OF WILLIAM MANCUSO

Date Submitted: Friday, May 18, 2012, 1:23 p.m.

City, State: Ada, OH

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I live in the middle of a food desert, surrounded by thousands of acres of corn and soy that is unfit for human consumption and is actually turned into "foodstuff", like high fructose corn syrup, that is killing the American public one soda at a time. With so much scientific research indicating the link to obesity, *etc.*, how can our "Representatives" continue to kill the American public by providing subsidies and protection for what, in effect, is state sanctioned genocide one mouthful at a time? And actually obstruct access to information about the quality of the food and free choice about what an individual decides to eat. Is it truly about life, liberty, and the pursuit of happiness for the majority? Or is it all about perpetuating the entrenched bureaucracy, about making money at any cost, even if it means the ultimate elimination of the consumer and American public? Are there no genuine representatives for the majority of voting and working people left? Representatives concerned about authentic pursuit of life, liberty and happiness for all? I'm afraid Jefferson would be ashamed to see that what he, and so many others, worked so diligently to create had degenerated to such a mean spirited form of government based more upon economics than human rights.

COMMENT OF MELISSA MANDEL

Date Submitted: Saturday, May 19, 2012, 1:14 p.m.

City, State: Oakland, CA

Occupation: Retired Computer Programmer

Comment: We have been supporting organic agriculture for over 20 years. It's about time for the U.S. to step up to this plate and move off the deadly and dead-ended chemical agribusiness position. The people and the planet require this change for survival and we all know it in this day.

COMMENT OF BONNIE MANDELL-RICE

Date Submitted: Friday, May 18, 2012, 4:13 p.m.

City, State: Broomfield, CO

Occupation: Retired Attorney

Comment: Our government's policy for farmers has for too long padded the wallets of agribusiness, encouraged destructive farming practices, and made the most unhealthy foods the most affordable. We have an obesity crisis in this country. We have sky-rocketing medical costs, many (if not most) of which are attributable to obesity-related disease. Factors in obesity, diabetes, heart disease and cancer include too many fats, meat, dairy, processed foods—which typically are loaded with sugar, fat, corn and/or wheat. These are all the foods that our farm policy supports and subsidizes. When people eliminate these foods, many of their health issues resolve. We need to stop subsidizing those foods and begin to subsidize or incentivize growing organic fruits and vegetables. In doing so, we also will help to repair soils and water quality. While we are at it the farm policy also should encourage humane animal husbandry, allowing the animals free range and humane care, all of which helps people by providing healthier animal products and a cleaner environment. Thank you.

COMMENT OF NIAL MANGAN

Date Submitted: Friday, May 18, 2012, 12:12 p.m.

City, State: Cambridge, MA

Occupation: Graduate Student

Comment: I feel it is very important to support small family farms as well as large corporate farms. Additionally, all incentives, including any tax or insurance incentives, need to be tied to sustainability and conservation requirements. We need to continue to support organic and sustainable farming research, so that farms of all sizes continue to improve in their farming techniques. The goal should be healthy, sustainable food which is profitably produced, not just more profits for large agricultural producers.

I do not support any farm bill which reduces these efforts, and support one which improves such programs.

COMMENT OF MICHELLE MANN

Date Submitted: Saturday, May 19, 2012, 3:34 a.m.

City, State: Encinitas, CA

Occupation: Homemaker

Comment: No more big gov't./corporate America in my food. Let people do what they do best, work on their corner of the world on small local level. It's the key to greatness.

COMMENT OF PATTI MANN

Date Submitted: Friday, May 18, 2012, 11:57 a.m.

City, State: Nederland, TX

Occupation: Disabled

Comment: I have MS and to keep my condition from declining further I need food that has been grown without chemicals. I am against chemicals in growing food, yes, I am aware that there will be higher prices but for my health it will be worth the cost.

COMMENT OF SARAH MANNO

Date Submitted: Sunday, May 20, 2012, 2:49 p.m.

City, State: Ft. Collins, CO

Occupation: Retired

Comment: Please protect the interests of small farmers, organic farmers and healthy sustainable practices in this farm bill. These are the wave of a sustainable future which needs to supplement if not replace the destructive fallout from the giant farming corporations.

COMMENT OF CALLISTA MANSELL

Date Submitted: Saturday, May 19, 2012, 3:27 p.m.

City, State: Greensboro, NC

Occupation: Consultant

Comment: I am in favor of supporting our local farmers and their efforts to provide fresh local foods in our community. One of the farmers at our local market even takes donations of fresh food and shares it with an after school program in a needy neighborhood. Our local farmers care about us. Let's show them that we care about them too.

COMMENT OF STEVEN MANSFIELD

Date Submitted: Thursday, May 17, 2012, 8:53 p.m.

City, State: Miami, FL

Occupation: Paramedic

Comment: I believe we should fully support this organic farming initiative. I believe America must get away from it's addiction to insecticides, herbicides and all forms of poisons that we're spraying on our farms every year. America needs to shift to a more natural, renewable form of farming now. I believe all the extra money we can afford to allocate to this organic movement, we must do it now. Right now, I'm a paramedic. But I'm taking courses to transfer to the University of Florida to major in Plant Sciences and I think this bill needs to be passed ten times more than I think we need to be in the Middle East.

- Fully fund the Organic Research and Extension Initiative (OREI) at the 2008 level.
- Endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Support all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintain EQIP Organic Initiative and do NOT cut the Conservation Stewardship Program.

COMMENT OF DEBORAH MANUS

Date Submitted: Thursday, May 10, 2012, 1:53 p.m.

City, State: Oak Park, IL.

Occupation: Doctor.

Comment: Please adopt the Bowles-Simpson principle of protecting the disadvantaged and avoiding measures that would increase hunger, poverty and hardship. Increase both TEFAP and SNAP. As a volunteer at my local food pantry, I have witnessed an increase in need for food from the pantry, in working poor, those on food stamps, in families and in the mentally ill. Cutting SNAP will cause more hunger and suffering.

COMMENT OF AL FRANCIS MAQUILAN

Date Submitted: Friday, May 18, 2012, 1:28 p.m.

City, State: Alameda, CA

Occupation: Student

Comment: Dear Mr. Stark,

Please push towards the Organic agriculture bill. I believe that as a nation with an increasing number of people with obesity, this is a step in the right direction. We must catch up with the rest of the world in terms of food regulation.

COMMENT OF NATHANIEL MARAM

Date Submitted: Saturday, May 19, 2012, 2:22 p.m.

City, State: Boone, NC

Producer/Non-producer: Producer

Type: Greenhouse/nursery

Size: 50–150 acres

Comment: It is farmers—not housing or industrial developments that feed us. What the corporate farms produce cannot be called food, rather an exotic blend of chemicals. As costs escalate the small farm cannot keep up.

COMMENT OF MARC MARCHIOLI

Date Submitted: Friday, May 18, 2012, 7:19 p.m.

City, State: Pittsburgh, PA

Occupation: Physician Assistant

Comment: We need clean, healthy and wholesome food to support a healthy America. It's time we said no as citizens of the U.S. to conglomerates that have only a profit motive while using every dirty hand trick in the book to produce what appears to be food but is in fact poison.

Let's support the small farmers and independents of American. We care and we vote!

COMMENT OF MERLE ZIPORAH MARCUS

Date Submitted: Friday, May 18, 2012, 3:51 p.m.

City, State: Second Mesa, AZ

Occupation: Seamstress, Organic Cook

Comment: Please take our food safety seriously. Pesticides, toxins from overcrowding in commercial feedlots & chicken factories, widespread use of antibiotics because of the poor sanitary conditions are important considerations.

COMMENT OF JEAN MARGOLIS

Date Submitted: Friday, May 18, 2012, 4:23 p.m.

City, State: Grants Pass, OR

Occupation: Retired

Comment: We need to empower our small farms and rein in the use of pesticides, GMOs and artificial fertilizers which are killing the soil and impacting the environment negatively.

COMMENT OF JENNIFER MARIANO

Date Submitted: Wednesday, May 9, 2012, 3:48 p.m.

City, State: Fountain, CO

Occupation: Director of Programs, Food Bank

Comment: Please do not make cuts to the farm bill. Our local food pantries continue to see a rise in the number of people seeking assistance. These are families and individuals that are working and truly trying to make ends meet, but they simply don't make enough to cover all of their expenses. If you make cuts to vital programs like SNAP, TEFAP, and CSFP, these folks will be forced to make decisions between paying bills and feeding their families. They will spend less, which will in turn affect the economy.

Please consider going to a local food pantry and taking some time to meet those that are struggling to make it work.

COMMENT OF LORRAINE MARIE

Date Submitted: Friday, May 11, 2012, 10:46 a.m.

City, State: Colville, WA

Occupation: Self-Employed Writer, Craftswoman

Comment: With record-high autism and childhood obesity rates, *etc.*, and the accompanying tax expense, we cannot afford to keep cranking out poison-grown foods. We need to support organic ag to the highest degree. That should include organic foods for all school lunch programs and for food assistance recipients.

Sincerely,

LORRAINE MARIE.

COMMENT OF MART MARINKOVICH

Date Submitted: Friday, May 18, 2012, 3:35 p.m.

City, State: Port Townsend, WA

Occupation: Retired Corporate Executive from United Airlines

Comment: Dear Norm, always good to have an opportunity to chat with you. We all know that cuts have to be made. But we need to prioritize cuts by keeping programs/funding in areas that are "green" and that provide solutions to eco-bombs, and offer options for sustainability.

I have concerns about the farm bill.

This is no time to be cutting funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture.

Please use your influence to ensure that the farm bill is forward looking, and does not simply continue the support of old guard corporate agribusinesses.

I wish you a healthy and successful summer, and thank you for your service to the 6th congressional district.

COMMENT OF CAROLE MARK

Date Submitted: Friday, May 18, 2012, 11:59 a.m.

City, State: Evanston, IL

Occupation: Retired

Comment: While we suffer as a nation from major health issues, the connection to food availability and farming becomes more and more significant. Healthy food leads to healthy citizens. Time is now to eliminate toxins in the food supply.

COMMENT OF LYNNE MARKO

Date Submitted: Friday, May 11, 2012, 10:31 a.m.

City, State: Kalispell, MT

Occupation: Hospitality Industry

Comment: It is time for a sensible bill that protects organic and small farm production. Subsidies going to commercially large agriculture is not right when it is squeezing out the small farm operations. A free and just society allows for diversity. Thank you.

COMMENT OF BERTHA MARKOWICZ

Date Submitted: Friday, May 18, 2012, 1:29 p.m.

City, State: Portland, OR

Occupation: Clothing Designer

Comment: We need local, organic produce that is healthy for the planet as well as our bodies. When people eat produce that has not been treated by chemicals, they use less health care, they are more productive and the planet can keep producing healthy food. Preserve this for your children and grandchildren.

Supporting smaller, and organic farms helps communities on non organic farms, all of the chemicals that are used create health problems to the workers, who do not have health insurance, and end up in emergency care. You can correct some of this by increasing support to the organic farms and eliminating support for the corporate farms.

COMMENT OF LAURA MARKOWITZ

Date Submitted: Friday, May 18, 2012, 12:27 p.m.

City, State: Oak Creek, WI

Occupation: Marketing Associate

Comment: The health of our nation's people as well as environment is dependent upon good food that is clean of toxins. The future of our children is dependent upon proper nutrition, so they can grow and learn and realize their full potential as the next generation. Local commerce and many families' livelihoods are dependent upon smaller local farms. As you write the next farm bill, please put the best interests of our country—its lands and people and long-term future—above that of industrial agricultural corporations. Programs supporting nutrition, conservation, and organic and sustainable farming are essential, not luxuries. Given a real chance, these are the programs that can lead us to a sustainable future of good health, lowering national healthcare costs and improving our quality of life from multiple angles. Please think of the big picture. Thank you.

COMMENT OF JOAN MARKS

Date Submitted: Wednesday, May 09, 2012, 5:02 p.m.

City, State: Tehachapi, CA

Occupation: Unemployed

Comment: Bottom line seniors need to eat and pay bills too . . . it is time that attention is paid to the senior citizens needs and make sure that they have what is necessary to survive and forget about paying attention to the illegals that are in this country and draining the taxpayers.

COMMENT OF EUGENE MARNER

Date Submitted: Friday, May 11, 2012, 10:52 a.m.

City, State: Franklin, NY

Occupation: Retired Filmmaker & Theatre Director

Comment: In the now commencing age of energy descent, many more people will need to be engaged in agricultural production than in the now expiring age of fossil-fueled industrial agriculture. The farm bill should encourage education in scientifically based organic methods that respect the environment and preserve our remaining topsoil and other resources.

The farm bill should also protect agricultural lands and precious water from the insanity of hydraulic fracturing for yet more fossil fuels that are destroying the biosphere.

COMMENT OF MARY MARSH

Date Submitted: Sunday, May 20, 2012, 7:58 p.m.

City, State: Atlanta, GA

Occupation: Public Relations

Comment: Please support local economies and small-scale farmers.

End subsidies to those who grow large amounts of corn and soy. Obesity is killing our country, literally and figuratively. Encourage the production of fruits and vegetables!

COMMENT OF NANCY MARSH

Date Submitted: Friday, May 18, 2012, 5:13 p.m.

City, State: Rancho Cordova, CA

Occupation: Grant Writer, Parent, Volunteer

Comment: We need healthier food for our children and ourselves—please support subsidies to organic farms and reduce the subsidies to corn/soy farmers who are at the source of creating unhealthy food for our nation.

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I am quite aware that you do not support these initiatives, but as always, my vote goes to those who do.

Take a look at the positive things that the small organic, urban farm is doing in your neighborhood—Soil Born Farms is educating, feeding, growing, restoring. It is a small drop in the bucket. There is so much wasted land (really **Wasteland**) in Rancho Cordova that could be put to great use in our city by making healthy food available to the poorer residents, creating jobs and viable job skills and teaching the children who live here that they can have a beautiful and productive place in which to live . . . not just a place where gangs will soon reign.

COMMENT OF CAROLYN MARSHALL

Date Submitted: Friday, May 18, 2012, 1:30 p.m.

City, State: Mercer Island, WA

Occupation: Clinical Psychology Candidate

Comment: My sister is a veterinarian epidemiologist. She has worked for the USDA on issues such as bird flu, swine flu and mad cow disease. Unfortunately, the funding was cut and now she works internationally, helping other countries to develop plans to prevent and combat these potential epidemics. When funding is cut from our own programs, it's no wonder that there are recent incidents of mad cow disease. Do you know that their brains look like Swiss cheese?

As your constituent, I ask that you support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF LISA MARSHALL

Date Submitted: Friday, May 18, 2012, 8:46 p.m.

City, State: Spring Mills, PA

Occupation: Executive Coach

Comment: Industrial agriculture puts the safety of our food at risk. Please do not continue to subsidize big agriculture at the expense of smaller, safer farmers.

COMMENT OF THOMAS MARSHALL

Date Submitted: Friday, May 18, 2012, 1:27 p.m.

City, State: Seattle, WA

Occupation: Web Analyst

Comment: Specialty crops are better for our health than the big five. The farm bill should encourage the production of specialty crops more than corn, wheat, soybeans, *etc.*

Also, school lunches should be controlled by Education not by Agriculture. Today school lunches aren't part of children's education, but rather a dumping ground for cheap food.

COMMENT OF AMY MARSMAN

Date Submitted: Friday, May 18, 2012, 12:53 p.m.

City, State: Madison, WI

Occupation: Civil Service

Comment: Please revamp the farm bill. It is an economic and health imperative that we encourage organic family farms, not corporate owned factory farms. While a 20th century economy may have benefited from industrialized farm system, the 21st century economy cannot sustain that system. It must be reformed. I do not want my tax dollars to be sent to subsidize corporate farms.

COMMENT OF BRIAN MARTENS

Date Submitted: Friday, May 18, 2012, 1:35 p.m.

City, State: Forestville, CA

Occupation: Consultant, Winery Worker

Comment: I grew up in a small Midwestern town in Iowa. My father sold International Harvester farm machinery and I know how important farming is to our communities and country. Back then there were many small farmers and they tried to grow the best crops they could. Now the Big Agribusiness farms are more concerned with profits than what food is best for families. Because of all the chemicals used on crops today the soils and foods are less healthy than they were. I am now involved in the Organic trend to bring back the health of the soils and foods coming from our farms. We need more diversity on our farms and more organic. European countries and Japan are listening to their families who want healthy farms and healthy foods. Please listen to the new voices that are asking for more organic produce and better farming practices so that the United States can become a leader in the world for change in our food Production. We can change by listening to the small farmers and those interested in changing our antiquated farming practices. Please get the Monsanto's and other big interests to listen to what the people really want.

BRIAN.

COMMENT OF KLAAS MARTENS

Date Submitted: Thursday, May 17, 2012, 10:57 p.m.

City, State: Penn Yan, NY

Producer/Non-producer: Producer

Type: Dairy, Dry Beans & Peas, Field Crops, Forestry, Fruits, Greenhouse/nursery, Livestock

Size: 1,000+ acres

Comment: I am an organic farmer and also operate an organic feed and seed business in Penn Yan. Organic farming is a major factor in the economy of Yates County and throughout the United States. The demand for organic food is one of the few bright spots in American agriculture. Federal support for research and development of organic farming as a percentage of the total money spent on agriculture is far less than the percentage of farming in this country that is certified organic. Organic agriculture has thrived despite this lack of financial support from USDA. As a strong supporter of organic farming, I ask that you:

- Fully fund the Organic Research and Extension Initiative (OREI) at the 2008 level.
- Endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Support all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintain EQIP Organic Initiative and do NOT cut the Conservation Stewardship Program.

COMMENT OF AMY MARTIN

Date Submitted: Friday, May 18, 2012, 3:26 p.m.

City, State: Abington, PA

Occupation: Chef/Mommy

Comment: As a former executive chef, now mom of two young children, I want the opportunity to feed my children the best quality food possible. I primarily buy organic foods whenever possible, it would be great if more of those foods were from U.S. soil as opposed to Mexico! Please take this into consideration in the writing of the next farm bill. Let's give our children; our future, and our farmer's the support that they need to live healthy, prosperous lives.

COMMENT OF AVRIL MARTIN

Date Submitted: Friday, May 18, 2012, 9:53 a.m.

City, State: Los Angeles, CA

Occupation: Interior Designer

Comment: I am tired of Big Ag getting ahead. It's time to help the small, organic, family farmers of this country. I purchase organic as much as possible and get produce from a local CSA. I want the farmers that are protecting my health and the environment to be supported, not the ones that are spraying carcinogens and planting genetically modified crops.

COMMENT OF BARBARA MARTIN

Date Submitted: Friday, May 18, 2012, 6:20 p.m.

City, State: Albany, NY

Occupation: Teaching Assistant in residential placement for troubled teenage girls

Comment: I am requesting that you keep all funding for vital programs such as nutrition, conservation, and support for organic and sustainable agriculture. U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

Points:

- Do not slash \$33 billion from the food stamp program, leaving farm subsidies unscathed.
- Don't pass a \$33 billion new entitlement program that guarantees the income of profitable farm businesses—on top of \$90 billion in subsidies for crop and revenue insurance policies. The proposed subsidized insurance program will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk. Place limitations on crop insurance subsidies. Re-attach soil erosion and wetland conservation requirements to crop insurance programs.
- Don't cut \$4 million from organic research funding.
- Don't cut funding to support Beginning Farmers in half.

I support:

- the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286),
- fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs,
- the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), and
- maintaining the EQIP Organic Initiative.

In sum, I support a farm bill that protects and enhances family farmers and promotes environmental health and agricultural sustainability.

We all live on a single planet; let's protect it and each other.

Thank you.

COMMENT OF BARBARA MARTIN

Date Submitted: Friday, May 18, 2012, 12:22 p.m.

City, State: Newton, MA

Occupation: Retired

Comment: We must care for those in our nation who need support in this time of economic distress. Those companies who are making profits for shareholders while poisoning our land, air and water, should not receive any monetary support of any kind.

COMMENT OF BYRON MARTIN

Date Submitted: Friday, May 18, 2012, 10:04 p.m.

City, State: Danielson, CT

Producer/Non-producer: Producer

Type: Greenhouse/nursery

Size: Less than 50 acres

Comment: The people of this country and future generations desperately need a farm bill that supports the majority and not the minority. The present system of

agricultural production is not sustainable and creating a farm bill that supports the long term sustainability of our agricultural resources is the responsibility of our leaders. Please in the creation of the next farm bill give credence to the land and its resources of life and the people and future generations of our country rather than a few large corporations who primary goal is profit. We need a balanced approach of health, public welfare, resource preservation, economic stability and profit.

BYRON MARTIN.

COMMENT OF CODY MARTIN

Date Submitted: Friday, May 18, 2012, 7:24 p.m.

City, State: Burbank, WA

Occupation: Harley Davidson Tech/Self-Sustaining Farmer

Comment: Why would you cut funding for Small start up farmers is it because big agriculture has its tentacles so deep into our Federal government that you no longer have our best interest in mind? Is it so big corporations can destroy the land and feed the American public toxic food that causes cancer and new allergies? Your right organic sustainable production of foods is a waste of money let's just burn this one and only world we have down! You people disgust me!

Sincerely,

CODY MARTIN.

COMMENT OF EMILIE MARTIN

Date Submitted: Monday, May 14, 2012, 1:13 p.m.

City, State: Alturas, CA

Occupation: Social Worker

Comment: I work with senior citizens and I see how difficult it is for some of them to make ends meet. Often, food is the item that goes in order to pay other bills. I urge you to maintain the programs that make it easier for low income senior citizens to procure food so they eat a healthy diet.

COMMENT OF HOLLY MARTIN

Date Submitted: Wednesday, May 09, 2012, 12:50 p.m.

City, State: Bristow, VA

Occupation: Freelance Writer

Comment: I believe we need to reduce subsidies that are making it impossible for small family, organic farmers to compete with corporate Giants, such as Monsanto. I also believe we need to **Slow Down** the genetic engineering of crops until we get a lot more data. For example, the bee colonies may be dying off due to genetic engineering of crops. And small farmers' lands are being contaminated with GMO seeds, leading to huge legal entanglements that are caused by the giant agricultural firms and which are killing small farmers.

COMMENT OF JEFF MARTIN

Date Submitted: Friday, May 18, 2012, 1:14 p.m.

City, State: Knoxville, TN

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: I would like the farm bill to cater towards smaller farms that put money back into their local economy.

When you make changes that benefit large farms contracted by companies/corporations, the money is in a tight group that never benefits the local economy. I understand food subsidies, but you are subsidizing foods that may cause obesity, diabetes and unhealthy eating habits.

Our goal as a country should be to provide nutritious, whole foods to consumers at a reasonable price without bias.

COMMENT OF KATHERINE MARTIN

Date Submitted: Friday, May 18, 2012, 4:55 p.m.

City, State: Manchester Center, VT

Occupation: Cook

Comment: Dear Committee Members,

I believe our agricultural funding and laws should be structured to favor smaller farms and organics. I oppose GMO crops and animals and as a consumer am horrified that the GMO crops are not labeled. I believe that no animal should be raised in an industrial setting. I see the job of your committee as protecting small farmers and farms, which should receive the bulk of any subsidies. I would like to see a reversal of funding to emphasize smaller and organic operations.

COMMENT OF GAYLA MARTINDALE

Date Submitted: Friday, May 18, 2012, 10:10 a.m.

City, State: East Peoria, IL

Occupation: Librarian

Comment: Please consider the consumer and the small farms (instead of corporate farms) when deciding who and what is important. Don't continue putting money into farms that harm our health (remember the obesity epidemic?) and our environment. It's time to give the "small guy" a hand-up instead of giving the "big guy" a hand-out. Thanks.

COMMENT OF RENA MARTIN-ERRICK

Date Submitted: Friday, May 18, 2012, 6:47 p.m.

City, State: Louisa, VA

Occupation: Retired

Comment: **Think** about the poor people in your district! Support local, small farmers in VA and in USA. If poor people can't afford to buy fresh, healthy produce, obesity & poor health & emergency room costs will continue to rise. The wealthy, of course can continue to buy healthy organic food no matter what it costs. Since you & your family never, ever have to worry about good food, I think I understand how hard it is for you to see the huge problem for us. **We Need You To Support The Small Local Farmers.**

COMMENT OF LISA MARTINO

Date Submitted: Friday, May 18, 2012, 6:56 p.m.

City, State: San Rafael, CA

Occupation: Homemaker

Comment: I hope this year's farm bill is more focused on promoting good, clean food, also that it addresses the horrible inequality between agribusiness and private farmers.

COMMENT OF LISA MARTINOVIC

Date Submitted: Friday, May 18, 2012, 1:54 p.m.

City, State: Berkeley, CA

Occupation: Wellness Coach

Comment: It's time to wean Big Ag off govt subsidies. We must stop underwriting GMOs and monocropping. Start subsidizing family farms and organic farms. This will both create more jobs and make for a less toxic environment.

COMMENT OF JANET MARTUCCI

Date Submitted: Friday, May 18, 2012, 8:18 p.m.

City, State: Roanoke, VA

Occupation: Student

Comment: I fully support efforts that encourage organic farming. Agribusiness has gone too far, to the extent that it is the cause of many farmer suicides. The welfare of animals, people, and this Earth should be top priority.

COMMENT OF TAMAR MARVIN

Date Submitted: Friday, May 18, 2012, 12:43 p.m.

City, State: East Brunswick, NJ

Occupation: Ph.D. Student

Comment: I am the mother of a preschooler and expectant mother of twins. Every trip to the grocery store is a source of intellectual, ethical, and financial strain for me, and I do not think it should be so difficult to buy food for my family that will not harm the health of humans, animals, and the environment. I hope you will use the farm bill to legislate against using harmful chemicals in food produc-

tion, including pesticides, animal hormones and antibiotics, food additives, and chemically extracted and altered oils. All “conventional” products should free of these, and consumers should not be subjected to “premium” prices for a product that won’t harm them. Producers who make responsible products should be rewarded, while those who use unhealthy means to produce cheap food should be penalized. I look forward to the day when I can be assured that every product in my local grocery store—including those targeted to my preschooler—has been healthfully and ethically produced.

COMMENT OF TIMOTHY MASANZ

Date Submitted: Saturday, May 19, 2012, 4:47 p.m.

City, State: Clearwater, FL

Occupation: Retired

Comment: First, the farm bill should support fruits and vegetables, the foods most Americans do not get enough of.

Second, the farm bill should start weaning the industry off oil and both support local farming and local delivery of food as well as natural (non-chemical) fertilizing methods (manure).

Third, the farm bill should begin securing the nation’s future by limiting soil erosion and promoting manageable farms with sustainable farm practices.

Finally, the farm bill should limit all crop supports and all payments of any kind to those with incomes below \$150,000 as well as limiting total awards to those individuals.

COMMENT OF MICHAEL MASILKO

Date Submitted: Friday, May 18, 2012, 1:12 p.m.

City, State: O’Fallon, MO

Occupation: Unemployed

Comment: Only Privately owned farms should be subsidized not corporate owned and all food that is or has any component of GMOs should be labeled. Privately owned farms/farmers should have more say than they do with what and how they grow food products.

COMMENT OF KATHRYN MASON

Date Submitted: Friday, May 18, 2012, 12:05 p.m.

City, State: Philadelphia, PA

Occupation: Educator

Comment: We need a bill to protect and promote the production of food that is healthy (produced organically and humanely) and that protects the environment that produces our food, our air, our water, everything we need to live.

COMMENT OF KIRBY MASON

Date Submitted: Friday, May 18, 2012, 12:51 p.m.

City, State: Austin, TX

Occupation: Writer

Comment: The future of America’s food production must be met by numerous, caring, small farms committed to healthy, natural foods not by heartless slime factories whose products create disease.

COMMENTS OF MARILYN MASON

Date Submitted: Saturday, May 12, 2012, 1:19 p.m.

City, State: Evanston, IL

Occupation: Social Worker, Semi-Retired

Comment: I’d like to see the end to farm subsidies especially to big farmers who don’t need it. I believe in smaller farmers, especially if they use sustainable processes in growing food, especially not adding a lot of fertilizer and pesticides that make the food dangerous to eat.

Date Submitted: Saturday, May 12, 2012, 1:22 p.m.

Comment: In addition to previous comments, I ask that you protect SNAP, TEFAP and CSFP. I am 76 years old and thus am one of those “seniors” who need affordable food sources protected.

COMMENT OF RICHARD MASON

Date Submitted: Friday, May 18, 2012, 3:23 p.m.

City, State: Laredo, TX

Occupation: Retired

Comment: Our current agricultural policy and its priorities are an embarrassment. Like our energy policy, there is little or no support for an agricultural policy that is actually sustainable for the generations that will follow us. From what I have read about the deliberations of this committee, its short-sighted priorities continue to destroy the quality of our farmland, disenfranchise the family farmer, and distribute increasingly unhealthy food to our already sick and obese population.

In the interests of a healthier, more sustainable future, I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF BARBARA MASONER

Date Submitted: Friday, May 18, 2012, 5:58 p.m.

City, State: Denver, CO

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: The Food and Farm Bill needs to reflect the current movement in food production in our country. More and more Americans are looking to small farmers and local producers from whom to purchase their food from. Help this growing number of food producers by leveling the playing field.

COMMENT OF ARETA MASTERS

Date Submitted: Sunday, May 20, 2012, 6:53 p.m.

City, State: Marlton, NJ

Occupation: Engineer

Comment: Organic food producers have spent many decades building a customer base and demonstrating that their methods are not only sustainable and healthful (to both human beings and our environment) but are also scalable and adequate for meeting the needs of American consumers.

Industrial agricultural practices have been shown to damage the environment, pose health risks to consumers, and place the nation at grave risk due to vulnerabilities of a monocultural food system. It is time to stop subsidizing bad practices and begin supporting organic methods food production for the sake of each and every American citizen.

COMMENT OF JIM MASTRO

Date Submitted: Friday, May 18, 2012, 2:40 p.m.

City, State: Dover, NH

Occupation: Writer

Comment: Family farms have been the backbone of this nation since its inception. It is very important to me that any farm legislation be primarily focused on supporting family farms. I think it's also very important that we support sustainable and organic farming to the greatest degree possible. Industrial agriculture does not need government help.

I am also very concerned about the volume of toxic compounds industrial agriculture is introducing into the environment, and I am absolutely opposed to genetically modified crops. As a biologist, I am very concerned about the health and environmental effects of these products.

COMMENT OF CASSANDRA MASTROSTEFANO

Date Submitted: Wednesday, May 02, 2012, 2:40 p.m.

City, State: McLean, VA

Occupation: Student

Comment: Disagreement and the stalling that has accompanied the 2012 Farm Bill indicate that there is a need to review and (hopefully) restructure the methods by which farming is legislated in America. Currently, the farm bill acts as all-encompassing legislation which hits upon anything that has something to do with farming. This coverage is too wide and there are too many varying interests for the farm bill to adequately address regional concerns. Instead, there should be a series of farm bills covering different regions of the United States.

COMMENTS OF HANEEFA MATEEN

Date Submitted: Friday, April 27, 2012, 10:59 a.m.

City, State: Chicago, IL

Occupation: Case Worker Counselor (Retired)

Comment: Please support local and commercial farmers in providing safe and healthy foods in enough abundance that everyone in the United States is fed. Keep in place the Food Depositories but also TANF and WIC so that families have some choice of healthy foods to eat.

Date Submitted: Wednesday, May 09, 2012, 5:27 p.m.

Comment: Many seniors worked hard and long yet their social security or pension checks are still lower than a young person who becomes disabled after 10 years employment history. In addition, there was discrimination against women's and other groups' jobs so that social security was not taken out for years. Their menial incomes leaves them without both food and housing.

COMMENT OF LYNNE MATEJCEK

Date Submitted: Sunday, May 20, 2012, 5:18 p.m.

City, State: Ashland, OR

Occupation: Teacher

Comment: Please shift to heavily regulating and taxing the use of toxic pesticides and GMO technologies on our crops and seeds until these businesses go extinct. Write into law that these corporations must pay for the damages to humans, animals, water sources, ecosystems and farms from their savage business practices.

A promotion of Organic, sustainable and non-toxic farming practices needs to once again be the policy of our National Agriculture work and policies.

My great mother said it best, "The elderly and children of the world need to have access to the healthiest food, water and air available", and I agree.

Thank you for your time and consideration of my vote for a healthy, and sustainable farming future.

Date Submitted: Wednesday, May 02, 2012, 7:02 p.m.

City, State: Flushing, NY

Occupation: Mom/Sales Executive/Economist

Comment: Dear Representative:

This message it is to ask anyone in this matter to be part of helping our farmers and hunger children in our food distribution and quality. Our agriculture is so necessary and new plans are there to supplement our country needs. The new machineries and labor and sanitations are primordial to our subsistence. The Agriculture.

It is a vital part in our economy. Many farmer are looking to expand and present a better produce and services to our consumers.

And linking the needs to the primordial distention, which is our children, they need your support!

Please take part of this petition and show us your concern and caring!

Help our farmers and help Feeding American Children!

Thank you very much for your kindness again!

Sincerely,

BEATRIZ IVELISSE MATEO.

Date Submitted: Wednesday, May 09, 2012, 5:39 p.m.

Comment: Dear Representative:

Please review my previous letter where I express the need to help our farmers in productivity and sanitation. This way they can provide a better result and increase our economy. Our children need a lot of assistance in their health. Nutrition

and feeding America cares among other for our children better health and a balance meals! Please support Feeding America! Thank you very much!

Sincerely,

BEATRIZ IVELISSE MATEO,
Flushing, NY.

COMMENT OF ADAM MATHEWS

Date Submitted: Friday, May 18, 2012, 12:29 p.m.

City, State: Elverson, PA

Occupation: Furniture Maker

Comment: Organic small farms are essential to the health of the planet and to human beings. I have been really ill for many years, traditional medicine unable to help me after spending a small fortune. It was not until I started eating local organic produce and eschewing big Pharma that I started to regain my health. Commercial farming is toxic with it's use of GMO's, herbicides, pesticides, petro-chemical fertilizers, lack of crop rotation, lack of letting fields go fallow to restore vital minerals. All this in the name of profit before all else. It's easier to farm this way but the resulting food has very little nutritive value. Small farms are integral to the beauty of this corner of PA. There is nothing pretty or healthy about commercial large scale farming.

COMMENT OF CHRISTINE MATHEWS

Date Submitted: Friday, May 18, 2012, 12:40 p.m.

Occupation: Admin.

Comment: Please support small, locally grown, organically grown food products, as well as conservation efforts for a sustainable future. Thank you for your time!

COMMENT OF JENNIFER MATHEWS

Date Submitted: Saturday, May 19, 2012, 1:34 a.m.

City, State: Spokane, WA

Occupation: Registered Nurse

Comment: Please do not cut funding to support local and beginning farmers. Please do not cut funding for research on organics. Please consider the ethics behind labeling genetically engineered foods. Consumers deserve the right to know what is in our food. Thank you.

COMMENT OF LILLIAN MATHEWS

Date Submitted: Wednesday, May 02, 2012, 10:49 a.m.

City, State: Providence, RI

Occupation: Student

Comment: There are a couple of priorities I would like to see in the upcoming farm bill.

First, I want to see much more support for young farmer assistance and training. Right now most farmers are over 65 years of age and the threat of losing their land and knowledge is threatening our country's agricultural base. We absolutely need more funding to help new farmers—particularly those focusing on organic production and ecologically diverse production—to survive.

Additionally, crop insurance needs to be **Affordable** for small scale producers. With an increase in natural disaster and weather-related problems, there will be more issues ahead for the agricultural sector. Small scale and organic producers rarely opt in for this insurance program because of the lack of affordability.

Additionally, nutritional assistance must remain a priority. Funding for low-income food stamps cannot be cut, especially in this time of economic need.

COMMENT OF MILLARD MATHEWS

Date Submitted: Saturday, May 19, 2012, 2:41 p.m.

City, State: Waynesboro, VA

Occupation: Retired

Comment: I've farmed all my life and much of my health problems are a result bad practices of the farms I worked on. It time to start supporting practices that protect people, the land, water and life in general instead of industries who could care less about these things as long as they keep getting richer. I've watched what

happens to land when the farmer stops dumping the chemicals on it, it won't grow anything Do the honorable thing.

COMMENT OF BRUCE MATHIS

Date Submitted: Friday, May 18, 2012, 9:58 p.m.

City, State: Chipley, FL

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Please stop the farm payment programs, they are killing small farms. By subsidizing some farms and not others you are putting me at a great disadvantage. Let the market decide who is a good farmer, don't keep propping up bad farmers with payments that only serves to keep bad farmers farming. Currently my tax dollars are allowing marginal farmers to stay in business and making it hard for me to make a living.

SUBMITTED STATEMENT BY RICHARD MATOIAN, EXECUTIVE DIRECTOR, AMERICAN PISTACHIO GROWERS

The American Pistachio Growers (APG) is pleased to have the opportunity to submit our views for the 2012 Farm Bill. Over the duration of the new farm bill, the U.S. pistachio industry will significantly increase in production, sales and capital investment. The new farm bill will be of great interest to the industry.

Since 1976, the U.S. pistachio industry has moved from producing 1 million pounds of pistachios to a high of 528 million pounds in 2010. At the end of this decade we expect to have a 1 billion pound crop. In 2011, approximately 153,000 acres were in production with 83,000 acres non-bearing, for a total of 245,000 total pistachio acres. We are projecting at least 70 percent of the production will be exported. Our current production is in the States of California, Arizona, and New Mexico.

The APG is the grower trade association representing the interests of the entire U.S. pistachio industry. We are governed by a democratically elected board that is comprised of 18 members. The mission of our organization includes nutrition and health research, food safety, marketing (domestic and international), and government relations.

Today we want to share with you our industry's thoughts on some of the specialty crop programs in the existing 2008 Farm Bill.

Market Access Program

The Market Access Program (MAP) has proven to be a very helpful resource to our industry. Because of our trade competition with Iran, we have found it difficult to break into many markets that Iran already dominates. An example would be the European market where MAP, plus industry dollars assisted in promoting and marketing our pistachios throughout Europe. Currently, Europe is one of our industry's strongest markets and continues to grow. In Asia, MAP funds assisted in opening up the markets of Japan and China, which ultimately lead to market access throughout Asia. In Japan, California pistachios are sold in cities such as Tokyo, Kansai, and Fukuoka as well as in new areas such as Tohoku and Nagoya. In 2009, a California pistachio grower, and his orchards, was featured on Japanese television. MAP funds made this possible. In addition, MAP funds allowed the industry to promote our product to the Japanese food industry as well as to consumers through in-store tastings and displays.

We understand the budgetary limitations of the Congress, but we see this program as an important tool in achieving President Obama's National Export Initiative (NEI). The President intends to see U.S. exports doubled over the next 5 years; the agriculture community, specifically the specialty crop industry, can help to make this happen with MAP and U.S. backing in opening key markets for U.S. grown goods. We recommend that the MAP remain intact, and that the funding continues at the current level, \$200 million each year.

Foreign Market Development Cooperator Program

The Foreign Market Development Program (FMD) aids to the U.S. agriculture industry in creating, promoting and expanding long-term export markets. We encourage the House Committee on Agriculture to continue to support this program, which is essential to specialty crop businesses. The FMD program is vastly different than MAP, and therefore we also encourage the Committee to keep these programs intact and separate.

Technical Assistance for Specialty Crops

The U.S. pistachio industry has encountered various trade barriers to our exports. Our pistachio industry has been able to use Technical Assistance for Specialty Crops (TASC) for problems encountered in the new European Commission's countries with regard to food safety. We have worked diligently throughout the years to eliminate these barriers, and TASC has proved to be helpful in defraying many of the costs that amass when dealing with these issues. We encourage the continued support by the House Committee on Agriculture of this very important program for the specialty crop industry.

Emerging Markets

In the last decade, China, Brazil, and India have emerged to offer new trade opportunities for specialty crops. In these countries, there is a strong middle income consumer class that has the ability to purchase our products. These consumers are health conscious buyers prepared to purchase quality U.S. products. Additionally, export credit and insurance programs is a necessity if specialty crops are to participate and benefit from NEI. We greatly appreciate the Administration's renewed efforts in removing foreign sanitary and phytosanitary barriers, but if small and medium size exporters are to benefit from the success of the NEI, new export programs are and will be necessary.

Specialty Crop Export Credit Program

The new farm bill is predicted to end many program crop payments. We learned in the past decade that in states where specialty crops can be planted, program crop land is being planted with fruits, vegetables and tree nuts. California's specialty crop production is increasing in crops such as almonds, blueberries and pistachios. We need to export.

The NEI was created to assist small and medium size farmers and processors to export. Yes, MAP, FMD, TASC, and emerging markets are important, but our small and medium size businesses need export financing and insurance. The GSM-102 program finances in excess of \$3 billion each year, but little finance is provided to the produce industry.

Furthermore, until 2008, the produce industry had the benefit of the Fruit and Vegetable Supplier Credit Guarantee Program, but this was repealed because of a fraudulent grain shipment. We recommend the re-instatement of the Supplier Credit Guarantee Program solely for the produce industry. This program would be beneficial to the small and medium size specialty crop businesses that are increasing their exports in new and old markets.

Sanitary & Phytosanitary and Quality Export Insurance Program Study

As mentioned above, the fruit, vegetable and tree nut industry is now exporting in excess of \$10 billion. For most exports, the shipments are delivered to the foreign buyer without any problem. Occasionally, a container is prevented from entering the foreign country because of an alleged Sanitary or Phytosanitary issues or quality problem, despite being cleared for export by the various U.S. Government inspections. If the container is prevented from entering the country, this can amount to a serious financial problem. A container being destroyed could bankrupt a business, and since the Federal Government is recommending small and medium sized businesses to export, these businesses need an insurance program. We envision a study that would determine the extent of SPS or quality problems, a self-funding export insurance program and its premium.

Conclusion

In conclusion, we strongly encourage the continuation of these programs through the 2012 Farm Bill. The specialty crop industry is a significant U.S. crop and our challenges are vastly different than those of program crops. Fruit, vegetable and tree nut producers work without the same safety net of program crops, and yet our competition continues to increase annually with more imports reaching U.S. shores. Any edge in research or market access aids our farms and therefore our livelihoods. We thank you for this opportunity to present our thoughts on farm bill programs, and we look forward to working with you further as this process moves toward completion.

COMMENT OF LAUREL MATSUDA

Occupation: Sales Trainer

Comment: The hidden agenda of inequity and manipulation by Big Ag is transparent now, and the sham can no longer continue. How much longer will we let corporate greed destroy our biosystems and ultimately the health of the sentient beings on our planet. The lives of future generations are in your hands.

COMMENT OF JUDITH MATTSON

Date Submitted: Friday, May 11, 2012, 10:52 a.m.

City, State: Tucson, AZ

Occupation: Publisher and Advocate of Local Food

Comment: I have invested thousands of hours and miles to expand my knowledge through local food producer friendships and business relationships. These experiences, including helping with the harvest days on the farm, and writing a successful VAPG grant for a colleague farmer/rancher, have educated me in the multiplicity of factors that shape food production, distribution and marketing in southern Arizona. It is my intent to be involved even more broadly in this movement in the months and years ahead. I also publish a biweekly email newsletter, *Tucson Local Food News*. Tucson also has a strong leadership alliance for promotion of local food for the future. A primary goal of both of these local food advocacy activities is to increase the sustainability of our local food supply here in the Sonoran Desert and southern Arizona through programs to strengthen the very small and small farms we have and also through programs to bring new younger farmers to this area. We look to the farm bill, the Value Added Producer Program, the Farmers Market Promotion Program, and others to help provide support for this goal. Please keep these programs in the farm bill and Budget so that we can continue to expand local food production in southern Arizona. Thank you.

COMMENT OF SCOTT MAURER

Date Submitted: Friday, May 18, 2012, 1:27 p.m.

City, State: Leander, TX

Occupation: Manager of Limited Partnership

Comment: Organic and sustainable agriculture is the **Only** agriculture that will support you and your family's health. Industrial agriculture is killing this world. GMO's are an abomination. Insecticides and other toxic materials used in industrial farming are unacceptable to a healthy person and a healthy environment. Did you know that a 100 square mile blue-green algae farm in each country will nutritionally sustain 1 billion people on the algae alone. Write the farm bill as if the health of you and your kids and their kids depends on it—because it does. Organic and sustainable is the only way.

COMMENT OF YEVETTE MAURER

Date Submitted: Friday, May 18, 2012, 2:19 p.m.

City, State: Lake Elsinore, CA

Occupation: IT Manager

Comment: We want an Organic Farm bill. In order to meet the serious challenges of the 21st century, U.S. agricultural policy in the farm bill must shift from its focus of creating cheap commodities and artificially propping up income for farm-

ers, toward implementing best agricultural practices for sustainable and organic production methods. America can no longer afford to continue to blindly stumble down the toxic and costly path that industrial agriculture has paved for far too long. It's time for wise solutions posed by our nation's leading sustainable and organic farmers that work with nature and prioritize human health and environmental stewardship.

Implement a \$25 billion plan to transition to organic food and farming production, to make sure that 75 percent of U.S. farms are U.S.D.A. organic certified by 2025. Feed organic food to all children enrolled in public school lunch programs by the year 2020. Pass a Beginning Farmer and Rancher Bill to place a million new farmers on the land by 2020. Link conservation compliance with government-subsidized insurance programs and create a cutoff so each farm receives government funds for land only up to 1,000 acres.

Please offer more support for Organic Farmers and small farmers in general. No more loop holes for big agriculture. No more favors for big Ag! The American people know how powerful their lobby is, how much money is in it for members of congress and the government, and we are watching you! Quit taking payoffs for big agriculture at the expense of the American people. Stand up for the American people, stand up for the small farmer, stand against big agriculture and their efforts to monopolize everything and shut down the little guy. Remember you, your children and your grandchildren will be eating this stuff too!

COMMENT OF DEBORA MAWJI

Date Submitted: Sunday, May 20, 2012, 2:44 p.m.

City, State: Sunset Beach, NC

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: I would like to see our gov't subsidize fresh foods and small farms, to reduce wholesome food costs and encourage local farm markets; instead of subsidizing huge agribusiness, corn syrup and other cheap processed foods. People buy what they can afford, even if it makes them sick (and forces healthy people to pay higher health care premiums due to many preventable diseases). The whole system is insane. Wholesome ingredients and/or unprocessed foods should be the new standard for any food subsidy (including food stamps and schools) and the American public should be heavily encouraged to support local farm markets.

COMMENT OF DAWN MAXON

Date Submitted: Friday, May 18, 2012, 6:14 p.m.

City, State: Waterford, VA

Occupation: Engineer

Comment: As a working mom, I want to feed my family organic produce but am time-constrained so in addition to my own little organic veggie plot I purchase veggies at grocery stores/farmer markets also. Because of this, I am troubled by the decision to cut \$4 million from organic research funding and to cut funding to support Beginning Farmers. Small farmers preserve genetic diversity in our crops and usually manage to do it organically without petrochemicals or pesticides. We need more of them, not less. I have no problem with reforming the farm subsidy program, especially as it impacts large corporate factory farms . . . but want to make sure that these cuts don't impact small farmers growing genetically diverse crops. We have wonderful growing conditions and soil in the U.S., and we must be good custodians of the soil and genetic crop diversity.

COMMENT OF ANDREW MAY

Date Submitted: Saturday, May 19, 2012, 10:40 p.m.

City, State: Emmetsburg, MD

Occupation: Contractor

Comment: It is time for legislation that specifically enables the development of 100% organic agriculture, featuring crops raised without industrial fertilizers and protected with methods such as integrated pest management, while banning all industrial pesticides.

COMMENT OF EMILY MAY

Date Submitted: Friday, May 11, 2012, 10:43 a.m.

City, State: Hickory Corners, MI
Occupation: Student
Comment: Dear House Agriculture Committee:

I would like to express my support for continued mandatory funding for the conservation, beginning farmer, and research programs contained in the 2012 Farm Bill. I have lived in several rural areas around the country (Michigan, Washington State, Vermont, Maryland), and have seen that the importance of farm bill programs in these areas cannot be overstated.

I urge you to continue funding for the conservation programs like CSP, WRP, EQIP, WHIP, *etc.*, that conserve soil for future generations, keep water and air clean, and create habitat for wildlife—and perhaps more importantly, make rural areas beautiful and healthy places to live! These programs also create habitat for important agricultural pollinators, ensuring a secure food supply as honeybees become less stable in their delivery of pollination services.

I can see just by looking at the faces of our Michigan fruit growers that the average age of farmers is close to retirement age. Now that family farms are less common and farming is seen as a difficult financial venture with the upfront capital required as well as the risk involved with variable weather in most parts of the country (just take this spring as an example—many fruit crops in Michigan were heavily damaged), it's important that the farm bill include funding to support beginning farmers and ranchers (and farmer-veteran programs, if possible). We need an infusion of youth and energy on our nation's farms, not to mention a guarantee of continuity of the food supply as our current farmers retire.

Finally, as a graduate student in agriculture, I hope that you will continue support for research programs (AFRI, OREI, *etc.*) that help us continue to make strides in making agriculture more productive, safer, and more sustainable.

Thank you.

EMILY.

COMMENT OF TAMMY MAY

Date Submitted: Thursday, March 29, 2012, 11:05 p.m.

Producer/Non-producer: Producer

Type: Field Crops, Livestock

Size: 500–999 acres

Comment: I know we should of had a good year income wise because we got a better price but input costs went up more than the commodity prices. I just almost went under this year and the weeds becoming resistant didn't help.

COMMENT OF SHEILA MAYBERRY

Date Submitted: Sunday, May 20, 2012, 1:58 a.m.

City, State: Decatur, IL

Occupation: Customer Service Manager

Comment: Its time to get back to real food. Not GMO pesticide riddle food. We need a fair and healthy food bill. One that does not penalize small local farmers. We need to get back to taking care of our farm land not killing it with glyphosate.

COMMENT OF COREY MAYER

Date Submitted: Friday, May 18, 2012, 2:59 p.m.

City, State: Olympia, WA

Occupation: Food Retailer

Comment: The customers visiting our two stores in Olympia, WA want the cleanest, most local fresh food they can find. We prioritize supporting local organic farms and want to make sure that they are not run out of business by larger agribusinesses that don't always focus on the health of the consumer. We need to support small local agriculture as much as possible and not only cater to the larger food producing corporations.

COMMENT OF GLENNA MAYER

Date Submitted: Saturday, May 19, 2012, 10:02 a.m.

City, State: Jupiter, FL

Occupation: Homemaker

Comment: To keep subsidizing in this way, even though it is with insurance instead of direct payments, will be more damaging to our economy and to the health

of our lands. The subsidized insurance program it proposes to replace it with will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk.

Meanwhile, the small farmer still suffers from unfair restrictions and demands and our economy and lands suffers as well. Please have a real solution, not this one. Please offer real reform and not just alternate funding.

COMMENT OF ROBIN MAYERAT

Date Submitted: Saturday, May 19, 2012, 9:52 a.m.

City, State: Hamburg, NY

Occupation: Piano Teacher/Blues Singer

Comment: It's so important to take care of the land we farm on and to be feeding our children with safe & nutritional produce. Please help keep us all healthy.

COMMENT OF LISA MAYNARD-BIBLE

Date Submitted: Friday, May 18, 2012, 4:48 p.m.

City, State: Asheville, NC

Occupation: Gardener

Comment: Farm Bill needs to support small, local, organic, and non-monoculture farms. Safety and health are key, not blind support of large corporations.

COMMENT OF NANCY MAYO

Date Submitted: Friday, May 18, 2012, 12:14 p.m.

City, State: Needham Heights, MA

Occupation: Retired MSW

Comment: Have you noticed that as the absolute numbers of small family farms decreases the general quality of life in the U.S. also has gone down? Just take infant mortality in the U.S. as one indicator. Or juvenile crime. Or the amount of pollutants in our food.

COMMENT OF LINDA MAYS

Date Submitted: Friday, May 18, 2012, 11:50 a.m.

City, State: Conyers, GA

Occupation: Housewife

Comment: We need an organic farm bill, we as citizens of America have the right to choose what to eat. We want to support our local farmers, please help support our local farms for organic food.

COMMENT OF ROCHELLE A. MAZER

Date Submitted: Friday, May 18, 2012, 2:28 p.m.

City, State: Granada Hills, CA

Occupation: Business Owner

Comment: As a business person, parent and consumer, I am very concerned about the direction agriculture has gone in this country. As a country, we need to support small businesses, specifically the family farms. And as a parent, I need to have unadulterated, organic food available for my growing children. And for all of us consumers, we need the huge diversity of food that is only grown by these smaller farms.

By limiting what produce is grown to a just a handful of different fruits, vegetables, and grains, and by specializing in only one strain of each, we are leaving ourselves in a precarious situation, setting ourselves up for disaster when a shift in the weather or an insect or a new disease can wipe out that entire species.

COMMENT OF HEATHER MAZEROLL

Date Submitted: Friday, May 18, 2012, 4:34 p.m.

City, State: Augusta, ME

Occupation: Stay-at-Home Mom

Comment: Please support the organic farming industry. Our lives depend on it. The thought of any more harmful and unnecessary pesticides continuing to be allowed to be used on what is suppose to be natural, healthy food is dangerous and frightening.

COMMENT OF DEB MAZZAFERRO

Date Submitted: Sunday, May 20, 2012, 7:39 a.m.

City, State: Sarasota, FL

Occupation: Consultant-Specialty Foods

Comment: I believe all subsidies to agricultural businesses doing over \$1,000,000 in revenue per year should end.

We should reward farmers with tax rebates for using renewable energy, for protecting the environment (by not polluting) and for creating jobs with a living wage (a minimum of \$40,000/year).

We should also police existing food safety issues more heavily, especially in meat, chicken and produce producers.

COMMENT OF JOHN MAZZITELLO, M.S.W., L.I.C.S.W.

Date Submitted: Tuesday, April 03, 2012, 1:09 p.m.

City, State: St. Cloud, MN

Occupation: Clinical Program Therapist 4, DOC

Comment: Dear Senators Klobachar and Franken:

I work as a therapist in Stearns County and Chisago County State Prisons and strongly urge you to support existing funding levels for the Supplemental Nutrition Assistance Program (SNAP) within the farm bill.

One in 9 Minnesota citizens struggles to put food on the table. In Stearns County at least 20 percent of the population is food insecure. SNAP is critical to maintaining good nutrition and health among our population. Since 2008, SNAP's caseload has risen in the face of the on-going recession.

Economic studies in Minnesota show that people who lack access to adequate nutrition are more often chronically ill; children don't fully develop physically and cognitively and are more prone to fail courses, repeat grades and drop out of school before graduation which often leads to criminal activities on the street. The cost of hunger's impact—also as uninsured medical care—is conservatively estimated at \$1.6 billion annually. Cutting SNAP or limiting access to it will increase charity care caseloads for the counties, which will be borne by local property taxes.

Last but not least, every dollar of SNAP purchases goes into the local economy and generates \$1.73 in economic activity. This is not a net expense; it is a net gain of 73% that supports jobs on Main Street. In a time of high unemployment, we cannot afford to add to the unemployed by reducing community economic assets of which SNAP is one.

As a constituent and as a public servant, I strongly oppose cuts to critical anti-hunger programs SNAP, TEFAP as well as the Commodity Supplemental Food Program (CSFP) for seniors and Women, Infants and Children (WIC)

For the sake of our neighbors who can't earn enough to get the food they need, it is important to maintain funding for programs that provide basic food assistance programs.

Sincerely,

JOHN ALLAN MAZZITELLO, M.S.W., L.I.C.S.W.,

Clinical Program Therapist 4,

Release and Reintegration Specialist,

Dept. of Corrections, St. Cloud and Rush City Prisons.

COMMENT OF GLORIA MCADAM

Date Submitted: Thursday, May 03, 2012, 11:52 a.m.

City, State: Windsor, CT

Occupation: Executive

Comment: It is critical that the farm bill protect the programs like SNAP and TEFAP which provide the food that helps people in need survive and thrive. And the need remains high despite a slightly improved economy. Here in Connecticut, even though it's a wealthy state, 1 in 8 of our residents rely on private charities for part of their food needs.

But private charities cannot do this alone! Currently in CT, only about 6% of the food given to people in need comes from private charities, the balance is from Federal nutrition programs like SNAP and TEFAP. Yet still, all of the needs are not being met. We estimate that the private charities only meet about 1/2 of the needs that are over and above what the Federal programs provide. Cuts to Federal nutrition programs will just put us that much further behind!

SNAP and TEFAP are some of the most efficient and effective programs the Federal government provides, with most benefits going to children, seniors, and disabled people.

Investing in hunger-relief is an investment in the future health and education of our citizenry and workforce. Kids who are not hungry will do better in school. Adults who are not hungry will be better able to find and hold a job.

Pass a Farm bill that protects and strengthens SNAP and TEFAP.

COMMENT OF DR. PHILIP MCANDREW

Date Submitted: Monday, May 14, 2012, 3:05 p.m.

City, State: Oak Park, IL

Occupation: Physician

Comment: Please support food for the hungry in the next farm bill. I volunteer for the food pantry in Oak Park and there is a tremendous need for food for the food insecure.

Thanks,

DR. PHIL MCANDREW.

COMMENT OF KRIS MCARTHUR

Date Submitted: Friday, May 11, 2012, 4:34 p.m.

City, State: Lynnwood, WA

Occupation: Environmental Engineer

Comment: I want America to produce healthy, organic, sustainable, non-GMO food. I want to invest in local farmers and ranchers, and preserving habitat. I want to see soil, air, groundwater, surface waters and marine waters all protected for future generations use and ecological benefit. I want to see a nation that eats healthy, lowering insurance costs, lowering medical costs, increasing lifespans and generally increasing America's (and the worlds) ability to live healthy, productive, joyful lives.

I want this for our today, our tomorrow, and for the future beyond all of our finite lives.

COMMENT OF CYNTHIA MCAULIFFE

Date Submitted: Friday, May 18, 2012, 12:57 p.m.

City, State: Saint Augustine, FL

Occupation: Retired

Comment:

(1) Please reinstate \$4 million for organic farming and reinstate full funding for "Beginning farmers".

(2) Please place limitations on crop insurance subsidies and re-attach soil erosion and wetland conservation requirements to crop insurance programs.

Protect our environment first and foremost.

COMMENT OF LYNNE MCBRIDE

Date Submitted: Sunday, May 20, 2012, 10:37 a.m.

City, State: Lafayette, CA

Occupation: Executive Director, California Dairy Campaign

Comment: If the dairy support purchase program is eliminated, as called for under both the House and Senate farm bills, dairy producers will have little ability to negotiate a fair price for the milk they produce and there will be even less competition than the limited competition that exists today. Without an adequate price safety net, producers will be forced into forward contracts, which will increase consolidation of the dairy industry, lower prices paid to producers and significant numbers of producers will be forced out of business as processors dictate forward contracting terms.

The dairy inventory management program in both the House and Senate bills would penalize all producers regardless of whether they have increased production or not. The Senate bill will allow dairy operation to update its production base for the supplemental insurance lessening the effectiveness of the inventory management program in the bill. We strongly support the legislation you introduced, "The Dairy Price Stabilization Act" which would establish an inventory management program to balance milk supply with market demand. Instead of penalizing producers the "Dairy Price Stabilization Act" would provide financial incentives for producers to manage their growth.

Two recent analysis of the Senate passed dairy title provide the necessary economic data to show that the bill would need to be improved substantially in order to be effective in California. The Food and Agriculture Policy Research Institute (FAPRI) study concludes that in just 5 years, dairy producers will likely be asked to pay 23¢ per hundredweight for margin insurance and receive just 15¢ in return, a losing proposition. The analysis completed by Mark Stephenson at the University of Wisconsin and Andrew Novakovic of Cornell University concluded that the decrease in the feed cost calculation by 10 percent in the Senate bill will have a substantial impact on the program and make it even less likely that the margin insurance program will be activated in the future.

An increasing number of dairy farms throughout California are going out of business or on the brink of bankruptcy due to low producer prices that do not cover rising production costs. The next dairy title must provide an effective safety net for periods of chronic low prices such as today and establish an inventory management system as outlined in the "The Dairy Price Stabilization Act" that is fair to all producers. We call on lawmakers to support elements included in the "Federal Milk Marketing Order Improvement Act" S.1640 introduced by Senator Bob Casey, D-Penn. S. 1640 which would pay dairy producers based upon their cost of production, manage milk inventories to meet market demand and address the impact of unregulated concentrated dairy imports which are now on the rise. We look forward to working with you and your staff to reform Federal dairy policies so that dairy producer can receive a fair return for the milk they produce.

COMMENT OF M. McBRIDE

Date Submitted: Friday, May 18, 2012, 3:21 p.m.

City, State: Atlanta, GA

Comment: More affordable organics, grass fed beef and natural pork. All GMO food must be labeled! Quit expecting us to eat crap so large companies can make absurd profits. Quit subsidizing tobacco and large corps. Support the small farmers. Stop animal cruelty!

COMMENT OF VIRGINIA McBRIDE

Date Submitted: Friday, May 18, 2012, 10:40 p.m.

City, State: St. Paul, MN

Occupation: Retail Manager and Parent

Comment: We must have a bill that encourages and supports organic farming practices and small farms. Furthermore, we should not be enabling or subsidizing chemical use or big agriculture? I think it is a big mistake to allow GMO crops to continue. It is destructive to soil, water, human and animal health.

COMMENT OF JEFF McCABE

Date Submitted: Friday, May 18, 2012, 12:38 p.m.

City, State: Ann Arbor, MI

Occupation: Hoophouse Manufacturer and Installer

Comment: We have a historic chance to break from the status quo and support programs, through the farm bill, that will improve the health of farmers, Americans, and the economy. Please, cut subsidies to commodity crops that are simply making corporations and Americans fat and invest in programs that produce fresh foods that people eat: EQIP, Beginning Farmer and Rancher, *etc.* We must act now to re-direct farming to grow healthy foods before we bankrupt our country with diabetes treatment for 50% of our population. We have an amazing cadre of young farmers that are eager to go in to business growing the food that we need. Please shift the incentives to this important new segment of farming, for all of our good.

COMMENT OF JODY McCABE

Date Submitted: Tuesday, May 15, 2012, 10:40 a.m.

City, State: Rio, WV

Producer/Non-producer: Producer

Type: Fruits, Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: I realize the committee has the difficult job of ensuring funding for various projects, but, as a farmer, I believe we need a farm bill that makes fresh, healthy, local, food available to all Americans, including schoolchildren. We also need to invest in the next generation of farmers and ranchers by guaranteeing the

\$25M per year in mandatory funding for the Beginning Farmer and Rancher Development Program to support and encourage beginning farmers and ranchers entering agriculture. The investment in Organic Agriculture Research and Extension Initiative at \$30M per year is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture, which I am a part of with my farm. Further, by keeping the Value-Added Producer Grants Program at \$30M per year provides seed money to help farmers innovate in agriculture and create jobs while securing a sustainable path to market-based farm profitability. I believe America is at a pivotal point in time where it is of extreme importance to bring Americans back to organic and sustainable food products, and away from GMO, fat producing food processes, thus helping Americans become healthier and less obese. That can be accomplished by a better 2012 Food & Farm Bill that assists local farmers and ranchers in helping all Americans.

Thank you for your consideration.

COMMENT OF MICHELLE MCCABE

Date Submitted: Saturday, May 19, 2012, 7:25 a.m.

City, State: Fairfield, CT

Occupation: Research Assistant, Public Policy

Comment: Divert subsidies for corn and soy to support local food sheds, fruit and vegetable crops, research and development, humane animal raising and slaughter.

COMMENT OF MARIE MCCAFFREY

Date Submitted: Friday, May 18, 2012, 12:52 p.m.

City, State: Landenberg, DE

Occupation: Web Designer

Comment: I know that the squeaky wheel gets the grease but U.S. food and agricultural policy **Must** focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers over the interests of industrial agriculture lobbyists.

I am FOR:

1. GMO Labeling
2. Free Speech being reinstated regarding the health benefits of food and which foods best fight specific diseases. Foods must not be allowed to be classified as drugs just because they can have the same effect. It's just wrong.
3. Placing the burden of proof on the government before censorship is allowed . . . Stripping the FDA of its power to regulate free speech as it pertains to the above . . . and of its powers of search and seize without a warrant.
4. Getting Government out of the marketplace and allowing free-enterprise and honest competition to reign. No more favoring big Agra. Leave the Amish alone. Get out of the raw milk debate. Label it and allow the American public to decide what's on their dinner plate.
5. A cessation of copyright lawsuits from Monsanto regarding their seeds blowing into organic farmers' fields. This ruins the field and creates hardship for organic farmers. Companies should be required to pay organic farmers for the land that becomes infected with GMO seeds.

COMMENT OF AUDREY MCCAGUE

Date Submitted: Friday, May 18, 2012, 12:44 p.m.

City, State: Royse City, TX

Occupation: Oil Industry

Comment: The purity of our food and protecting our farmers is first and foremost. Big companies must not be allowed to harass our farmers with bogus lawsuits and they must not be allowed to produce GMO food that is not labeled as GMO or any other unnatural process or ingredients. They must not be allowed to monopolize. There must be fair and equal treatment.

Thank you.

COMMENT OF NANCY MCCAMMON-HANSEN

Date Submitted: Sunday, May 20, 2012, 7:19 p.m.

City, State: Fort Wayne, IN

Occupation: Marketing Coordinator at the History Center

Comment: As convener of the Fort Wayne area League of Women Voters, I personally support the state League's position on the farm bill in regard to SNAP.

The FY 2013 Agriculture Appropriations bill should:

- Oppose funding cuts and harmful policy proposals to SNAP, including efforts to block grant, cap, or cut funding;
- impose restrictive work requirements; or otherwise reduce benefits or restrict participation.

The 2012 Farm Bill should:

- Maintain funding to support current eligibility and benefit levels and oppose harmful policy changes.

Thank you!

COMMENT OF ANNIKA MCCANN

Date Submitted: Friday, May 18, 2012, 2:24 p.m.

City, State: St. Johnsbury, VT

Occupation: Registered Nurse

Comment: Please increase funding for small family farms, farmers markets, and sustainable/organic practices. Please reduce subsidies to big corn and soy producers; these crops are used to make processed foods which harm the health of citizens. I support Local Foods, Farms and Jobs Act (H.R. 3286).

COMMENT OF SHERI MCCANN

Date Submitted: Sunday, May 20, 2012, 4:30 p.m.

City, State: Marshalltown, IA

Occupation: Controller

Comment: Please create a bill that allows my granddaughter to receive health meals in school. One that is based on a sustainable, chemical-free future.

COMMENT OF ANDY MCCARRON

Date Submitted: Friday, May 18, 2012, 1:35 p.m.

City, State: Keene, NH

Occupation: Mechanical Engineer

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

The current agricultural subsidization leads to mass production of “cash crop” (ex. corn) grown with chemicals and without regard for the conservation of land on which it is grown, typically grown on large mega farms. This type of farming results in more pollution (more chemicals are made, transportation of goods, operation of machinery, *etc.*), and crops (specifically corn) are driving health care cost up (look at the obesity rates resulting from an excess of corn intake in most Americans). The government needs to take care of its people—and corporation are not people (I don’t care what the supreme court says about that).

COMMENT OF MAUREEN MCCARTER

Date Submitted: Sunday, May 20, 2012, 11:54 p.m.

City, State: St. Cloud, MN

Occupation: Teacher

Comment: Our policies should support family farms, not corporate giants. Stop subsidizing corn and start subsidizing foods that are healthier for Americans, including vegetables. Reward farmers who use little or no pesticides. Stop Monsanto from taking complete control of the seed market. Stop CAFOs.

COMMENT OF CALY MCCARTHY

Date Submitted: Friday, May 18, 2012, 7:41 p.m.

City, State: Port Murray, NJ

Occupation: High-School Student

Comment: The farm bill has great potential to help those who honor the Earth: small-scale, organic farmers. We must **Stop** pouring money into agro-businesses which profit off the demise of the Earth and those who inhabit it (animals, plants, and humans). The farm bill should support diverse farms that follow traditional practices of crop rotation and seed saving. What with GMOs, pesticides, fertilizers, and oil-intensive agriculture, our food system is great peril. We have an obligation to protect consumers, but even more importantly, the Earth from which all life comes.

Please use the power entrusted in you to honor the Earth!

COMMENT OF JAMES MCCARTHY

Date Submitted: Friday, May 18, 2012, 9:54 a.m.

City, State: Fort Myers, FL

Comment: Less funding for huge farming companies. Make sure food stamps stay in the Bill. More money for urban, small and black farms. Real food not generic corn.

COMMENT OF SUZANNE MCCARTHY

Date Submitted: Friday, May 18, 2012, 9:28 p.m.

City, State: Port Murray, NJ

Occupation: College Academic Advisor

Comment: I wish to see support for local, non GMO agriculture. Please provide support for farm preservation and support for those you want to be part of a sustainable food system. Feedlots and mono-cultures are destroying our environment and ultimately our food supply.

COMMENT OF KIM MCCARTNEY

Date Submitted: Friday, May 18, 2012, 4:17 p.m.

City, State: Santa Rosa, CA

Occupation: Engineering Professor

Comment: We know now that durable, resilient action plans are the only option offering life-sustaining potential for the common good of humanity. What species would willfully eliminate itself? And yet, if we continue in the same delusional mind set, this is what we would do. Please act in time.

COMMENT OF RACHEL MCCAUSLAND

Date Submitted: Friday, May 18, 2012, 6:13 p.m.

City, State: Bellingham, WA

Occupation: Art Team at Premier Graphics

Comment: Since the way our food is produced affects everyone, I'm glad for this opportunity to share what I think is most important.

We need to focus on healthy and organic plant foods. The production of organic plant foods is more ecologically sound in a lot of ways. It takes less water and land to produce plant foods than livestock or eggs or poultry, and if the plant foods are grown organically there is far less toxicity to the food. With commercial animal agriculture, grain and corn must be grown to feed the animals, and the animals create a great deal of waste which is very polluting to the environment, never mind the antibiotics and hormones which are routinely fed to the animals and which help encourage the development of antibiotic-resistant illnesses. Livestock also create a lot of CO₂ emissions.

Please find ways to encourage and support the growth of healthy and organic plant foods so that our air, water, land, and food, can be free of harmful chemicals and pesticides. Invest in more local farms and find a way to discourage outsourcing. Emphasize the dignity of the farmer, the producer.

COMMENT OF LARRY MCCHESENEY

Date Submitted: Friday, May 18, 2012, 12:26 p.m.

City, State: Warren, CT

Occupation: Retired

Comment: Let's give people first thought rather than corporations. Corporations don't vote. People DO, and we will! Do what is right and what the majority of folks want, not what will line your own pockets fastest.

COMMENT OF MIKEL MCCLAIN

Date Submitted: Tuesday, May 15, 2012, 7:12 p.m.

City, State: Portland, OR

Occupation: Retired Clergy

Comment: Please don't stop SNAP! I help a family of three who needs all the food stamps possible. This working mother has two teenage boys with hearty appetites. The \$142 a month does not currently cover all the food costs, but things would be a lot worse without it or if it is reduced.

COMMENT OF LOIS M. MCCLAVE

Date Submitted: Friday, May 18, 2012, 12:59 p.m.

City, State: Albuquerque, NM

Occupation: Registered Nurse

Comment: Please support local farmers AND provide subsidies for fruits and vegetables.

I do **Not** want further subsidies for CORN and SOY because most of those products are from GMO seeds which have detrimental health benefits to the body (genetic material of bacteria and pesticides packed into the seed!)

I want to be informed that the products I eat are not GMO and that as a nation we are feeding our children fruits and vegetables, not just products with high fructose corn syrup and other corn derivatives, which are cheaper because it is subsidized!

I am appalled by factory farming and the horrible conditions animals are kept in. It is incredibly unhealthy and unjust.

Please support local farmers and stop the big agricultural subsidies! We will not starve if you weigh in on the side of local farmers and healthy food! If anything it will reduce our health care costs from all the problems associated with obesity that itself is associated with corn derivatives in particular (how they affect appetite and have an addictive activating mechanism in the brain).

Do the right thing! We really are what we eat!

LOIS M. MCCLAVE,

1st District—Martin Heinrich.

COMMENT OF RICHARD MCCLAVE

Date Submitted: Saturday, May 19, 2012, 10:51 a.m.

City, State: Albuquerque, NM

Occupation: Dentist

Comment: Please put some incentives in this farm bill to encourage the growth of local and organic producers. Both small, local and big, corporate farms have a place in our world.

COMMENT OF ROBIN MCCLAVE

Date Submitted: Friday, May 18, 2012, 12:34 p.m.

City, State: Columbia, MD

Occupation: Public Health

Comment: I would like the farm bill to give greater consideration to the quality of foods produced and the subsidies that support specific commodities. The farm bill is not just about food, it is about the health of our nation. Food is the currency that connects us all and will allow America to grow strong both economically and culturally. Though certain investments seem to be larger on the front end, they inevitably cover their costs on the back end. This is a pivotal time in the history of American health. If our congressional representatives do not look at this from the long-term perspective of the health of current and future generations, you will be costing America any chance it has at taking care of its citizens and providing a healthy future.

COMMENT OF SCOTT MCCLAVE

Date Submitted: Friday, May 18, 2012, 3:04 p.m.

City, State: Costa Mesa, CA

Occupation: Insurance Consultant

Comment: Get rid of farm subsidies. This is just pure silliness and archaic. Control the problem of excessively cheap imported ag by tariffs, but quit wasting taxpayer money on subsidizing our own farms. Let competition have its way and let

voters vote by making choices at the grocery store instead of government thinking they know what's best.

COMMENT OF JEFF MCCLEAVE

Date Submitted: Sunday, March 18, 2012, 2:21 p.m.

City, State: Olney, IL

Occupation: Retired

Comment: Please don't use poor people as a political football when acting on this bill. Their already has been used in ads calling Obama the food stamp president. Kicking the poor people is easy they don't have lobbyists looking out for them. That's what the elected Representatives used to do now they are for sale to the highest bidder.

COMMENT OF MICHAEL MCCLELLAN

Date Submitted: Friday, May 11, 2012, 2:12 p.m.

City, State: Bowling Green, KY

Occupation: Government

Comment: Honorable Mr. Guthrie,

As a Kentuckian and health-conscious American from a rural background, I am very concerned about the state of America's agriculture on many levels, not the least of which are the following:

- (a) sustainability of rural communities
- (b) sustainability of our soils and farmland
- (c) availability of organic meats and produce at prices all can afford
- (d) viability of small farms for local markets in the face of unrelenting pressures from industrial ag companies
- (e) non-interference by the Federal government with the work of small farmers who are working on smaller scales and catering to local markets.

Please ensure that the upcoming farm bill reflects policies that will promote small farms, local food production, organic agriculture (REAL organics, not the pseudo-organics of Monsanto and other large ag concerns), and the sustainability of rural communities. A good farm bill will create many "jobs" by promoting the small business of farming, improve the nation's health with better quality foods, and help our environment by improving our soils, using more solar energy the natural way, and reducing our dependence on chemicals and artificial inputs.

We need your support! The family farm depends on it! Thanks.

MICHAEL MCCLELLAN.

COMMENT OF FRANCES MCCLELLAND

Date Submitted: Saturday, May 19, 2012, 11:55 p.m.

City, State: Ojai, CA

Occupation: Retired-Biointensive Gardener at our Church

Comment: I help grow food for the hungry in Ojai by using some of the land at our church, St. Andrew's Episcopal Church in Ojai, CA to grow food for the Community Assistance Program. I felt that it was wrong to use our land and water for grass and trees only. I would like to see all common land used to grow food but it is a lot of work and people are not aware of what they could have. We grow organic and "Biointensively" which is very good use of the space.

FRANNA MCCLELLAND.

COMMENT OF B.A. MCCLINTOCK

Date Submitted: Friday, May 18, 2012, 12:27 p.m.

City, State: Honolulu, HI

Occupation: Disabled with MCS

Comment: Because I and millions of others world-wide are disabled with MCS we rely on you, our government, to protect us, especially our food & water supply. More & more chemicals are being added into our environment and on our food & water. For us this is tantamount to murder. If our food is contaminated and we have a reaction to it, we can die, plain and simple. We look to you to help us. The farm bill is the first important step to doing so. Everyone deserves healthy foods.

JOINT COMMENT OF SUE AND BRIAN MCCLUSKEY

Date Submitted: Friday, May 18, 2012, 1:39 p.m.

City, State: Carbonado, WA

Occupation: Retired

Comment: I don't think that huge agribusiness is the way to grow healthy food for America. As a onetime dairy farm operator we know that if 1 or 2 dairies bought up all the family owned farms we would have costs the only concern. I resent tax dollars going to large corporations while they lower the quality of our foods and fill the environment with pesticides, herbicides and other chemicals. Help the small farmer not big agribusiness.

COMMENT OF KARL MCCONNELL

Date Submitted: Friday, May 18, 2012, 1:32 p.m.

City, State: Whitefish, MT

Occupation: Disabled

Comment: Please put the health and safety of American consumers over the financial interests of big ag. I am 24 and have spent almost 1/2 my life extremely ill with an inflammatory bowel disorder and food allergies, and GMO foods cause allergic reaction and pain and inflammation even if they are "safe" foods for me. Please don't condemn people like me to a worse more painful life than we already have by allowing GMOs to continue polluting our organic food sources.

COMMENT OF MELISSA MCCOOL

Date Submitted: Sunday, May 20, 2012, 5:39 p.m.

City, State: Selah, WA

Occupation: Self-Employed

Comment: I support the following and hope you will consider these points:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

The Senate Ag Committee has voted to get rid of wasteful subsidy payments, and it has proposed to replace it with a new subsidized insurance program that leading sustainable agriculture advocates are calling rife with opportunities for fraud and abuse.

While Congress is looking to get rid of direct payments to commodity farmers, the subsidized insurance program it proposes to replace it with will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk.

According to the National Sustainable Agriculture Coalition's Ferd Hoefner, "By failing to place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs, the Committee has failed to do the full reform that is needed".

Thank you for your consideration.

Most sincerely,

MELISSA MCCOOL.

COMMENT OF KIM MCCORMACK

Date Submitted: Friday, May 18, 2012, 6:32 p.m.

City, State: Boulder, CO

Occupation: Nutrition Consultant

Comment: The farming practices being promoted and used nationwide are unsustainable. Not only that, they are undermining the general health of our nations people. There must be a substantial shift away from the use of hormones, pesticides, animal cruelty and genetic modifications if we are going to heal ourselves and our agriculture.

COMMENT OF SARAH MCCORMICK

Date Submitted: Thursday, May 10, 2012, 2:19 p.m.

City, State: Loveland OH

Occupation: Research Consultant

Comment: Cutting assistance to food-insecure families is not the answer to our budget crisis. Reductions in benefits would hit nearly all of the 44 million Americans (more than 10% of our fellow citizens!) who receive SNAP benefits. It is not right to balance our budget on the backs of children and elderly, who make up more than 90% of SNAP recipients. As well, the purchasing power that SNAP benefits provide to the rest of the economy will further hurt our financial situation as a country. Please strengthen the SNAP program, don't undermine it.

COMMENT OF GLORIA MCCRACKEN

Date Submitted: Sunday, May 20, 2012, 3:44 p.m.

City, State: Chiloquin, OR

Occupation: Student

Comment: If we're really serious about debt, we don't need to make those with less pay for the tax benefits those with so much get. We can't afford to cut benefits for the SNAP program. We're talking about children who will be adults, and hopefully they'll be healthy, and therefore not a drain on society, but this cannot happen if they don't have access to food! A fundamental idea, I admit, but one that seems beyond many individuals in Congress.

In addition, Congress should include the following in any bill that is supposed to help agriculture:

- Community Food Projects Program—\$10 million per year to help communities build food self-reliance.
- Farmers Market and Local Food Promotion Program—\$20 million per year to develop farmers market capacity and create food hubs to connect farmers with schools, hospitals, grocery stores and other markets.
- Hunger-Free Community Incentive Grants—An average of \$20 million per year for a new SNAP local fruit and vegetable incentive grant program at farmers markets and other healthy food retailers.

COMMENT OF GRANT MCCRACKEN

Date Submitted: Friday, May 18, 2012, 11:40 a.m.

City, State: Cincinnati, OH

Occupation: Brewer

Comment: I would like the farm bill to reflect my family's beliefs in good, clean and fair food. Stop subsidization of food that is making my family and planet sick. GMO/non-GMO should be a required label on every food. We should be testing these GMOs for long term implications and not relying on the producers of pesticides *etc.*, to provide their own findings (short term). Colony collapse in bees has been noted by Harvard as a direct link to an imidacloprid pesticide and should be banned to prevent the destruction of our country's natural pollinators. Please change our system for the better, not for the giant companies like Monsanto and Dow, who's best interest is to keep producing these toxic chemicals.

COMMENT OF CONNIE MCCULLAH

Date Submitted: Friday, May 18, 2012, 3:24 p.m.

City, State: Berkeley, CA

Occupation: Project Manager, Food Explorer Program and Farmers' Market Education

Comment: It is imperative that you ensure a secure, healthy and safe local food supply that supports local regionally grown food *versus* agrafarming and central distribution. That truth in labeling is required and people are empowered to make their own health decisions. This has truly become an issue of national security! The power to feed our local communities with locally grown food, secures a more healthy future for our population and our communities.

COMMENT OF DENNIS MCCULLAH

Date Submitted: Friday, May 18, 2012, 12:19 p.m.

City, State: Berkeley, CA

Occupation: Facilities

Comment: Please pay attention to the small organic farmer and the health of our children. We have a right to know if our food is a GMO. We should have the right to choose what we eat and drink. It is time that we do not support greed over health and education. We need to pay attention to our children.

COMMENT OF KAREN McCULLEY

Date Submitted: Saturday, May 19, 2012, 1:01 p.m.

City, State: Laguna Beach, CA

Occupation: Retired Landscape Architect and Banker

Comment: Please support truth in labeling foods so that we, the consumers and your constituents, know if GMO foods are in the products. Such legislation is common in Europe and hasn't harmed their economy, but rather made corporations responsive to their consumers. Please do not cave—like VT and CT—to the litigious corporations and PAC's like Monsanto and put your constituents needs first. Thank you.

COMMENT OF MARTHA McCULLOCH

Date Submitted: Saturday, May 19, 2012, 9:10 a.m.

City, State: Gardiner, NY

Occupation: Self-Employed

Comment: Our food subsidy program up to now has only served to increase the profits of the large industrial farming operations, with dire results for public health and nutrition. **Now** is the time to support sustainable agriculture and small, independent farmers who produce healthy food with humane and sustainable methods.

COMMENT OF ABBI MCDANIEL

Date Submitted: Friday, May 18, 2012, 10:13 p.m.

City, State: Newburgh, IN

Occupation: Homemaker

Comment: I want to know that my family is getting the best nutrition possible. Every day I learn more and more how our current model of agriculture is doing nothing to improve the health of the people. We need to get back to the best way to raise crops and feed our families.

COMMENT OF COLLEEN MCDANIEL

Date Submitted: Friday, May 18, 2012, 11:10 a.m.

City, State: Kannapolis, NC

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: I have participated in an Incubator Farm program with Cabarrus county and will take the skills I have learned there to begin a small farm operation. Though it is difficult to enter this as an occupation, I have found that markets are demanding sustainable, organic produce, meat and poultry. People want to know their farmer personally. I am also a member of the Food Policy Council of Cabarrus County and we see the absolute need for healthier food in our schools. This means we, as a society must ensure that healthy foods are more competitively priced so that schools can afford them. Subsidies for non sustainable agriculture must be diminished, *i.e.*, GMO corn, GMO soy, GMO cotton, and other subsidized products that encourage herbicide and pesticide use that is now at an all time high worldwide. This farming is not sustainable and our health suffers from eating these products with chemical (and sometimes biological as in BT corn) inputs, the healthy microbes in our soil suffer, the skills of farming more than a handful of items is nearly wiped out as the average farmer is nearing 60 years old and with 2% of the U.S. population farming, this means we have very few educated farmers to take their place. Mono crops should become a thing of the past as we look to sustainability and we must re-learn how to work with nature in a balance of plant animal and microbe to create a healthier future.

COMMENT OF PAMELA MCDERMOTT

Date Submitted: Friday, May 18, 2012, 7:00 p.m.

City, State: Colorado Springs, CO

Occupation: Educator

Comment: Organic GMO-free small farm agriculture is a better investment than big corporate GMO-filled agriculture, and agricultural subsidies should reflect that but they currently do not. The FDA and USDA, charged with regulating the agricultural sector, are also failing to enforce the agricultural laws we already have and all too often side with the interests of big corporate agriculture instead of holding them accountable for dangers to public health, watershed pollution, destruction of

living soil (it's dead now), and their dependence on fossil fuels leaving a huge carbon footprint. GMO pollen is an environmental pollutant that can devastate neighboring organic farms; pollen drift can cause an organic farmer to lose organic certification, forcing that farmer to desist from farming for at least 3 years before becoming eligible for recertification (providing his or her farm is not continuously polluted by GMO pollen drift) and I think they deserve to be financially compensated for the entirety of that process by the polluter(s) around them. There are so many issues in agriculture that I could point to that are harming our lands, waters, air, food system, economy, and the future of our country. I call on the Agriculture Committee and all Congressmen to educate themselves on the issues (free of corporate ag propaganda and marketing).

COMMENT OF MARGARET McDONNELL

Date Submitted: Saturday, May 19, 2012, 2:18 p.m.

City, State: Bettendorf, IA

Occupation: Exec. Assistant

Comment: Elected representatives job is to see that his/her constituents are provided the best possible opportunities. It is **Not** to support a few large businesses. Natural, organic, farming practices support a cleaner environment for our families. And locally produced food is allowed to mature in the field and is not artificially ripened, hence is healthier. Also local food sources support local economy and can reach the consumer without subsidized transportation. It is a win win for all but chemical and oil companies who like you to assist them in building their monopolies. America was not formed to support monopolies.

COMMENT OF MIRIAM MCFADDEN

Date Submitted: Friday, May 18, 2012, 9:49 p.m.

City, State: Waverly, NE

Occupation: Retired

Comment: Please read the following and others you can find by googling "obesogens": <http://www.doctoroz.com/videos/understanding-obesogens>

Our current mega farmers assisted by companies like Monsanto, are killing us! Please write a farm bill that will assist organic farmers, will get healthy and safe foods into our schools, and will eliminate poisons from our food and water systems.

COMMENT OF STEVEN MCFADDEN

Date Submitted: Friday, May 18, 2012, 12:57 p.m.

City, State: Lincoln, NE

Comment: Dear House Agriculture Committee—I urge you to support and to fund the sustainable, organic pathways to food production that are the true 'tradition' of American Agriculture, and to cease support of the kind of industrial agriculture that has dispossessed so many American farm families and caused so much environmental destruction, and serious chronic health problems.

I urge Congress to support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Sincerely,

STEVEN MCFADDEN.

Date Submitted: Saturday, May 19, 2012, 11:07 a.m.

City, State: Point Arena, CA

Occupation: Horse Rancher

Comment: Don't let corporate agribusiness highjack the farm bill! Endorse Local Foods, Farms and Jobs H.R. 3286. Implement all provisions of the Beginning Farmers and Ranchers Opportunity Act H.R. 3236. **Increase** funding for Organic Research and Sustainable Agriculture. Don't let your constituents go hungry, support

existing food stamp program. Stay out of the insurance business. Stop subsidizing profitable agribusiness. Maintain strict soil erosion and wetland conservation requirements. LABEL genetically modified foods and STOP supporting **Any** farmer or corporation that is promoting them.

COMMENT OF MELISSA MCGILL

Date Submitted: Friday, May 18, 2012, 1:48 p.m.

City, State: Las Vegas, NV

Occupation: Commercial Illustrator

Comment: If we would subsidize sustainable food production and organic foods we would have a healthier population with lower food related illnesses. Without constant spraying of chemical pesticides we would have lower rates of Cancer, ADD and Autism. Food is supposed to nourish and provide health, not just for those who can afford organics. We now have food that **Causes** illness. You have the opportunity to make a huge difference in the quality of life of many by providing low cost, healthy, whole food for the people whose interests you have pledged to serve.

COMMENT OF M. MCGILLIVARY

Date Submitted: Friday, May 18, 2012, 3:30 p.m.

City, State: Eugene, OR

Occupation: Self-Employed

Comment: My ancestors were Farmers & they would be and I am appalled at the **Animal Cruelty, Drugs, Crates, Torture, Doped Up Animals Making Us All Fat & Unhealthy, Genetic Fake Food, Cloning, Mankind Is A Mess for Messing With Animals & Agriculture . . . Down with Big Corporate Farming** I have stopping eating at **All Fast Food Restaurants & Regular Restaurants** that are supplied by **Tyson** & others. My nose actually itches from some unknown ingredient **Only** when I eat in franchised restaurants that buy from **Big Ag Corps** . . . My family & I wonder **What Are You Doing To Our Food Supply?**

COMMENT OF KRISTINE MCGINLEY

Date Submitted: Friday, May 18, 2012, 5:19 p.m.

City, State: Ridgefield, WA

Occupation: Manager of Boutique Wine Shop

Comment: Nothing is more important than protecting the land that feeds the people of this country. Without proper nutrition we are all (democrat or republican) doomed to a life of poor health and chronic illness. This problem will only compound with each subsequent generation. We must take measures now to guarantee a healthy future for our country and the world.

COMMENT OF MARIE MCGLASHAN

Date Submitted: Friday, May 18, 2012, 11:47 p.m.

City, State: Mill Valley CA

Occupation: Mother/Acupuncturist

Comment: We need to have our tax dollars go to help put healthy real whole food on our tables—**No** GMO's, **No** heavy synthetic fertilizers, **No** heavy pesticide use!

COMMENT OF RICHARD MCGLYNN

Date Submitted: Tuesday, March 20, 2012, 1:30 a.m.

City, State: Chicago, IL

Occupation: Retired

Comment: I am in favor of cutting spending on agriculture and reversing the government takeover of this important segment of our economy. Let the farmers and ranchers decide for themselves without Washington's money or advice.

COMMENT OF KATHERINE MCGOWAN

Date Submitted: Saturday, May 19, 2012, 7:18 a.m.

City, State: Carmel, NY

Occupation: Paralegal

Comment: We need small local organic farms and safe food. Food that does not have BST growth hormone or food that is not genetically modified (GMO foods should be banned as it is in France). We need to ban the growing of crops with ge-

netically modified seeds before the genetically modified seeds totally ruin heirloom or organic seeds. We need the FDA to protect the consumers not promote big business' unhealthy interests.

COMMENT OF LAURA MCGOWAN

Date Submitted: Friday, May 11, 2012, 4:18 p.m.

City, State: Lothian, MD

Occupation: Administrative Assistant/Retired Registered Nurse

Comment: I would love to see more local, small farms that care about the animals, the land and water. Massive industrial farming is killing our planet with pesticides and misuse of land and water. I also no longer eat meat now because I refuse to be part of **Any** animal cruelty, and factory farming is notorious for cruelty, torture and inhumane treatment of animals who sacrifice their lives for humans. Unless we make a real commitment to making real changes to our present farming techniques, we can expect human overpopulation to destroy this precious and beautiful planet.

COMMENT OF ELISABETH ANN MCGRATH

Date Submitted: Sunday, May 20, 2012, 7:55 a.m.

City, State: McArath, NJ

Occupation: Teacher

Comment: Please support farmers who produce our food supply. Do everything possible to enable them to grow what they produce in a healthy environment free of toxic chemicals while still allowing them to make a living. We cannot survive without the valuable contribution farmers make.

COMMENT OF MICHELLE MCGRATH

Date Submitted: Friday, May 18, 2012, 3:17 p.m.

City, State: Underwood, WA

Occupation: Agricultural Nonprofit

Comment: I work with beginning farmers and ranchers and I see the importance of the farm bill on their livelihoods. Protecting programs that allow small, beginning farms access to resource is **Vital**. The majority of Federal programs are geared toward multigenerational mega-farms. With the farming population 'greying out', supporting small family farms is not just economic sense, but homeland security for the future of our nation.

As the committee considers the 2012 Food and Farm Bill, I urge you to:

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;
- Provide an even “plowing” field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don't: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

COMMENT OF SARAH MCGRAW

Date Submitted: Saturday, May 19, 2012, 12:29 a.m.

City, State: Owens Crossroads, AL

Occupation: Electrical Engineer/Program Manager

Comment: U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

Americans are becoming more obese and are eating food that has been rushed to market, thus contain fewer vitamins and minerals than organic foods. We are the only country that insists upon genetically altering everything from plants to fish for the sake of producing more for less money.

We are being poisoned with pesticides, and our bodies are not as healthy as they could be because “natural” is no longer natural; it is altered in many ways. We are the only country that allows high fructose corn syrup in foods and beverages—therefore, I only buy Mexican Coca-Cola, **Not** American Coca-Cola! I only drink sodas that have real sugar; never diet sodas!

Our animals are injected with hormones and antibiotics, even when they do not need them! Stop this practice, please.

COMMENT OF DONNA MCGREEVY

Date Submitted: Friday, May 18, 2012, 4:15 p.m.

City, State: Columbia, SC

Occupation: Registered Nurse (Retired)

Comment: We as a nation should be more concerned about the health of our citizens than the huge profits of the giant Ag corporations! Let’s get some honest and forthright input from health care professionals in the mix before legislation is enacted that hurts our people and only help corporations **Which Are Not People**.

COMMENT OF MOLLE MCGREGOR

Date Submitted: Friday, April 27, 2012, 3:01 p.m.

City, State: Biltmore Lake, NC

Occupation: Realtor

Comment: Please consider the importance of small farmers and their needs as you write the next farm bill. Small farmers are a wonderful resource for their communities and should have their interests supported as much as the larger conglomerates.

Thank you!

COMMENT OF DONNA-CHRISTINE MCGUIRE

Date Submitted: Sunday, May 20, 2012, 1:07 a.m.

City, State: Santa Barbara, CA

Occupation: Neuroscientist

Comment: Please do all you can to encourage small, family farmers committed to feeding Americans organic food, using sustainable methods.

Thank you,

D.C. McGuire.

COMMENT OF MARY MCGUIRE

Date Submitted: Sunday, May 20, 2012, 3:42 p.m.

City, State: Wheat Ridge, CO

Occupation: Herbalist and Nutritionist

Comment: It’s critical to main the EQIP Organic Initiative. And, we need to provide healthy, non-GMO foods for U.S. citizens which will cut down on healthcare costs. Additionally, the Food Stamp program is imperative for many of our citizens—streamlining the program and putting systems in place to detect and eliminate fraud is very important. Also, please implement all the provision of H.R. 3236.

COMMENT OF RUSSELL MCGUIRE

Date Submitted: Saturday, May 19, 2012, 4:39 a.m.

City, State: Honolulu, HI

Occupation: Restaurant Manager

Comment: End all farm subsidies. Mandate GMO foods labeled as such. Free farmers from regulatory burdens that larger corporate farmers are able to afford. Allow dairy farmers to sell raw milk to willing buyers.

COMMENT OF SHARON MCHOLD

Date Submitted: Thursday, May 17, 2012, 9:34 a.m.

City, State: Yarmouth, ME

City, State: Saint Louis, MO

Occupation: Teacher, Retired

Comment: New farm bill? **Subsidize** family farmers NOT agribusiness's profits from artificial oil-based fertilizers, pesticides & GMO seeds: **Other Countries Forbid** these to protest **Health**. Provide all of U.S. healthy, nutritious food. **Ignore** agribusiness's lobbyists. Thanks.

Date Submitted: Friday, May 18, 2012 8:27 p.m.

Comment: Support **Family Farms** and **Not** fat-cat agribusiness's obscene profits!

COMMENT OF RACHAEL MCINDOO

Date Submitted: Friday, May 18, 2012, 4:04 p.m.

City, State: Carbondale, IL

Occupation: Student

Comment: Make it mandatory to label foods that have GMOs and/or label foods that are non-GMO.

Help fund and support family and smaller farms rather monopolizing the industry under a few major profitable farms.

Allow farmers the right and power to save seeds and grow varieties outside of Monsanto—do not let Monsanto control the farming industry just because it has governmental ties, wealth, and power.

SUBMITTED STATEMENT BY MATT MCINERNEY, EXECUTIVE VICE PRESIDENT,
WESTERN GROWERS

Thank you Congressman Costa and Congressman Cardoza for facilitating this Farm Bill Forum today. My name is Matt McInerney, Executive Vice President of Western Growers, and on behalf of our 2,500 members who grow and ship fresh fruits, vegetables and nuts, I appreciate the opportunity to provide comments and observations relevant to specialty crop priorities in the 2012 Farm Bill.

First, let me thank you both for your leadership in the 2008 Farm Bill that created a new paradigm in the U.S. agriculture policy that provided, for the first time, a meaningful investment in special crops to enhance the competitiveness and profitability in this strategic area of U.S. agriculture.

The highlighted programs in the 2008 Farm Bill included School Fruit and Vegetable Snack, State Block Grant, Pest and Plant Disease, SCRI (Specialty Crop Research Initiative), and Market Access Program. These targeted initiatives have been invaluable to our industry and have provided the foundation by which to build the 2012 Farm Bill.

(1) Block Grants

One of the signature achievements in the 2008 FB was the creation of the Specialty Crop Block Grants program. We strongly urge you to continue this innovative approach that establishes a Federal-state partnership designed to enhance the competitiveness of the industry through funding to address immediate research needs, pest and disease, food safety, resource efficiency, and marketing. Over the years our state has benefited greatly from this funding. An example of the targeted use of these dollars is in terms of research dollars to help address the emergence of food safety concerns. The Center for Produce Safety at UC Davis, a recipient of such dollars and is a model for ongoing research needs to validate and improve on-farm practices to continuously improve food safety.

(2) Nutrition

The 2012 FB must renew a commitment between specialty crop growers and America's children and those less fortunate via the purchase and then distribution of our produce through the nutrition programs. I know you will have witnesses later that discuss the importance of nutrition programs to the residents of our great state, but I want to emphasize that our growers view those programs as critical to provide healthy choices. These programs are critical to feeding our less fortunate and our nation's children who need assistance. Our growers are proud to be part of those efforts and we want to maintain the increased role we have had in nutrition programs since the 2008 FB as we move forward in 2012. Western Growers has said

for years that “fresh fruit, vegetables and nuts provide the best medicine” and ensuring that all Americans can share in that medicine in these difficult economic times we think is important.

(3) Pest and Disease

For specialty crop producers Federal dollars spent on pest and disease prevention, detection and eradication represent vital opportunities to strengthen our industry, protect farmer’s livelihoods and preserve jobs. Tens of millions of dollars nationally flow annually for this activity which is critical here in California especially with the state resources difficulties. We remain uncertain of the funds the state might be able to provide. The Senate bill provides a new version of the existing Plant Pest and Disease Program [the new one absorbs the Clean Plant Network program] funded at \$60 million in FY13–16 and \$65 million in FY17 which is an increase of \$109 million over 10 years. We encouraged the adoption of this provision in the House version that will duplicate or improve on the monies in the Senate.

(4) Resource Management

FB dollars assist producers across the state to better and more efficiently use resources. For our growers that represents many resource concerns however in our state clearly water is among our highest priorities. FB programs such as the Environmental Quality Incentives Program (EQIP) provide critical resources to upgrade irrigation systems and improve on-farm water use efficiency through other techniques. Research dollar spending then helps our industry plan for the longer-term by working on creating the next generation of crops that will use less water. Ensuring that FB spending continues to fund these priorities is critical in our state in which competition for resources is intense and growing.

(5) Crop Insurance for Specialty Crops

This is an emerging topic in this farm bill, and I would suggest that Western Growers board of directors has discussed this issue more over the last few months than we have over the last 10 years. We know that crop insurance beyond the traditional catastrophic coverage is the new trend in agricultural policy and we want to first understand it, then ensure that implementation of any program not create unintended consequences. We also want to explore how crop insurance could be more beneficial to us. Why do we have concerns? We are worried about insuring for speculation and make sure insurance products do not distort the sensitive supply/demand marketplace. The watermelon pilot program of 1999 by RMA is a perfect example. With that said we know crop insurance has come a long way since 1999 so we are open to learning more. Indeed, we are interested in seeing how crop insurance might be shaped with input from growers to deal with the new catastrophic dilemmas of the 21st century food safety and quarantine issues.

In closing, the 2008 Farm Bill established new programs that recognized the importance of the specialty crop sector and its role in the economic well being of individual states and in improving the health of consumers across the land.

We look forward to working with you both on these beneficial programs to the specialty crop sector. Thank you.

COMMENT OF LEAH MCINTOSH

Date Submitted: Sunday, May 20, 2012, 11:26 a.m.

City, State: Austin, TX

Occupation: 9–1–1 Dispatcher

Comment: I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act—H.R. 3286.

I support fully funding conservation programs, such as the Conservation Stewardship Program and making sure that enrollment in any new insurance subsidies is tied directly to compliance with conservation programs.

I support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

I support maintaining the EQIP Organic Initiative.

I do not support cuts to funding of organic research.

I do not support subsidies to already-profitable farm businesses or subsidies for crop and revenue insurance policies.

I do not support direct payments to commodity farmers, nor do I support the proposed subsidized insurance program that is proposed to replace direct payments, but will allow giant commodity farmers and insurance companies to take billions of tax dollars while putting the land, soil and environment at greater risk.

I ask you to place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs.

I want real reform, and a healthy organic future!

COMMENT OF RENE MCINTYRE

City, State: San Francisco, CA

Occupation: Music Teacher

Comment: Can we all agree that we need to do something about our attitude about the farming industry? Farmers and consumers need assistance and support: most farmers don't get enough assistance and support in producing food in the "best of ways," and a good deal of the nation's poor live in "Food Desserts." We need to change this if our nation is going to continue to be the "best" in the world and for the sake of our future generations.

COMMENT OF KATHERINE MCKEEN

Date Submitted: Wednesday, May 02, 2012, 10:52 a.m.

City, State: Oakland, CA

Occupation: Student

Comment: Hello,

I am writing to voice my support for maintaining funding for the National Organic Certification Cost-Share Program. By helping organic farmers offset the costs of certification, the Program helps support both individual family farms through small payments (no more than \$750 annually per farm) while also advancing organic agriculture nationwide. Organic agriculture is a highly important part of America's economic future; the sector has continued to grow by almost 20% per year, even during the current economic downturn, and contributes \$29 billion annually to our economy. If we do not maintain or increase funds for the Program in the next farm bill, we risk compromising a vital part of the American agricultural economy. In addition, organic farming has indispensable benefits for human health and environmental concerns.

Although the farm bill has the express goal of "supporting" farm "both big and small", I would urge increased discretion over what really constitutes a "farm" in the farm bill. Can large agro-food businesses which do not promote environmental sustainability or community health really be considered farms? I would consider re-examining the farm bill to support **Actual** farms, not huge agricultural machines trying to disguise themselves as farms in order to grab government subsidies.

Thanks you for your consideration,

KATHERINE MCKEEN.

COMMENT OF MARY MCKEOWN

Date Submitted: Saturday, May 19, 2012, 12:34 p.m.

City, State: Black Mountain, NC

Occupation: Retired Real Estate Agent

Comment: Farm subsidy payments must be reined in, especially payments made to large corporations and people who no longer farm. Closing loopholes is of the greatest importance.

Thank you.

COMMENT OF GENESIS MCKIERNAN-ALLEN

Date Submitted: Sunday, May 20, 2012, 11:22 p.m.

City, State: Indianapolis, IN

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. My name is Genesis McKiernan-Allen and I am 28 years old. My husband and I recently moved back to our home state of Indiana to start a small business—a vegetable farm. Just this morning we harvested over 100 pounds of produce for our local Saturday morning Farmers' Market. If we are to succeed at this entrepreneurial effort, we need more support! I am one of hundreds (thousands?) of young farmers across the country trying to get started producing food and revitalizing rural communities. I'd like to share my support for programs that help the next generation of growers build strong farm businesses. As it's estimated that 125,000 farmers will retire in the next 5 years, it's absolutely critical that farm bill programs help citizens get started in this challenging field. I ask that the Com-

mittee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

GENESIS MCKIERNAN-ALLEN,
Full Hand Farm.

Comment: Dear Members of the House Committee on Agriculture,

I am writing today in support of the following policies. The current food bill being discussed lacks many of the vital components to address the nation's food problems such as obesity, soil erosion, excess run-off, and other public health related issues.

I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

I support fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

I support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

I support maintaining the EQIP Organic Initiative.

Please consider these recommendations when discussing the current food bill.

Thanks.

COMMENT OF MARTHA MCKINNEY

Date Submitted: Friday, May 18, 2012, 8:35 p.m.

City, State: Swannanoa, NC

Occupation: Pastor

Comment: Please protect SNAP, TEFAP, and CSFP in the upcoming farm bill. Hunger is rampant in Western North Carolina. We need the government's help. The charitable sector can only do so much.

COMMENT OF L. MCLEAN

Date Submitted: Friday, May 18, 2012, 2:21 p.m.

City, State: Seattle, WA

Comment: I write today to voice my strong support of the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.
- Ending the stranglehold that BigAg has on our regulatory system and you, our political leaders. Immediately. The proposal to replace subsidy payments with a new subsidized insurance program is, quite frankly, cynical at best and criminal at worst. Stop the madness now.

Thank you for your attention to these comments.

COMMENT OF DR. R.G. MCLELLAN

Date Submitted: Friday, May 18, 2012, 9:15 p.m.

City, State: Marietta, GA

Occupation: Doctor

Comment: Value the health and well-being of the people rather than corporate agribusiness. Beautiful concept and must be put into practice in this country!

COMMENT OF ROBERT MCLINDEN

Date Submitted: Sunday, May 20, 2012, 8:22 p.m.

City, State: Germantown, MD

Occupation: Scientist

Comment: It has been proven, scientifically, time and again that biological diversity is the key to sustainable agriculture. By squeezing out the small farmer and supporting (unnecessarily) big agribusiness, we are flying in the face of this fact.

I will not vote for anyone who supports big agribusiness at the expense of the small farmer.

COMMENT OF BETSY MCMAHON

Date Submitted: Friday, May 18, 2012, 2:03 p.m.

City, State: Manzanita, OR

Occupation: Teacher at Community College

Comment: Please take away subsidies from **Huge Corporate Farms** and support the small farmer in any way possible.

Stop supporting all the chemicals that are killing our soils and instead support organic (what farming is supposed to be) farming.

We need to stop these **Huge** beef, pork and chicken factories where animals are grown for profit and are fed chemicals, never see the sun and are crammed into these monstrous buildings. Creates very bad pollution of soil and air.

COMMENT OF DENNIS MCMANUS

Date Submitted: Monday, April 09, 2012, 10:27 a.m.

City, State: Pittsburgh, PA.

Occupation: Government Relations Manager.

Comment: Congress should do its part by continuing to strongly support anti-hunger programs like the Supplemental Nutrition Assistance Program (SNAP), The Emergency Food Assistance Program (TEFAP), and the Commodity Supplemental Food Program (CSFP), all of which are authorized in the farm bill.

Cutting anti-hunger programs will increase hunger in America. Given the associated health care and educational costs of hunger and poor nutrition, cuts to anti-hunger programs will hurt both those struggling with hunger and those who must contend with the impact of hunger on government services and economic productivity. Fighting hunger is not only the morally right thing to do, it is the economically smart thing to do as well. Please protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization. Thank you.

COMMENT OF MEGAN MCMANUS

Date Submitted: Friday, May 18, 2012, 10:29 a.m.

City, State: Woodbridge, VA

Occupation: High School English Teacher

Comment: Please lend your support to the small family farmers who grow diverse plants and animals. Subsidize the carrot and eggplant, not **Corn!** Support the health of Americans by encouraging these small, local farms and not by encouraging biodiversity and not products (corn, soy) that contribute to junk food. Show that you care about healthy lives and not big business!

COMMENT OF RYAN MCMICHAEL

Date Submitted: Friday, May 18, 2012, 4:11 p.m.

City, State: Canton, OH

Occupation: Physician

Comment: We need dramatic reform of the current farm bill regulations that clearly subsidize the production of food products that have the most devastating impact on our health. This needs to change and we need to find ways to incentivize the production and sale of nutritious foods—organic is a great place to start. As a physician, I see the side effects of the current policy everyday on the front lines, and it is extremely detrimental.

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF MARNIE McMULLIN

Date Submitted: Saturday, May 19, 2012, 1:55 p.m.

City, State: Olympia, WA

Occupation: Agriculture Student, Farm Aide

Comment: This is a time to ensure food security and stop ignoring the blatantly obvious problems in our current agricultural system. The current system will inevitable fail and the people of this country, the people that you represent, will suffer. It is time to stop being bullied by mega-corporations and allowing them token organic and sustainable standards. It is clear that this will not work anymore. Open your eyes and see that these decisions destroy our people, land and country. Please support programs that aid small, diverse farms that practice truly sustainable methods of farming.

COMMENT OF JEAN G. McMURRAY

Date Submitted: Wednesday, March 21, 2012, 11:52 a.m.

City, State: Shrewsbury MA

Occupation: Executive Director, Worcester County Food Bank

Comment:

March 21, 2012

House Committee on Agriculture
Washington, D.C.

Dear Chairman Lucas, Ranking Member Peterson, and members of the Committee:

Thank you for the opportunity to provide input on the upcoming farm bill reauthorization. Given the need for food assistance in our state and the declining supply of Federal commodity support, I strongly urge you protect and strengthen nutrition programs in the 2012 Farm Bill.

Every day, the Worcester County Food Bank and its network partners of 94 emergency food pantries, see how important Federal nutrition programs are in our community and how effectively they are working to ensure that struggling Massachusetts residents can provide enough food for their families. Currently, the Worcester County Food Bank and its network serve 83,145 different people annually, including over 32,000 children under the age of 18.

Over the last 3 years, the Worcester County Food Bank and its network have been challenged by unprecedented demand and uncertainty over available food resources. Throughout the region, we have seen a 12 percent increase in the number of people helped since 2008. Food is a fundamental need that people are struggling to meet because they are unemployed or underemployed. Many are asking for help with feeding their families for the first time in their lives. When the Worcester County Food Bank network provides emergency assistance to households, we also connect them to a range of Federal nutrition programs that provide a lifeline, like the Supplemental Nutrition Assistance Program.

Without strong farm bill nutrition programs like The Emergency Food Assistance Program (TEFAP), the Supplemental Nutrition Assistance Program (SNAP), and the Commodity Supplemental Food Program (CSFP), the Worcester County Food Bank and food banks across the country will struggle to fill the gap for food.

We recognize the challenge you face drafting a farm bill in a time of deficit reduction, but we are also sensitive to the tremendous, ongoing need in our state. As such, we have two key priorities for the farm bill.

First, we urge you to strengthen TEFAP to help us keep up with demand. TEFAP supplies about 25 percent of the food moving through Feeding America's national network of over 200 food banks, including 28 percent for Worcester County Food Bank. But because of strong commodity prices, TEFAP food declined 30 percent last year, and it is challenging for our food bank to make up the difference. We urge you to make TEFAP more responsive during times of high need by tying increases in mandatory funding to a trigger based on unemployment levels. We also propose to enhance the Secretary of Agriculture's authority to make TEFAP bonus purchases at times when the need for emergency food assistance is high—for example high unemployment—in addition to times of weak agriculture markets so that the program can respond to both excess supply and excess demand.

Second, we also strongly urge you to protect SNAP from harmful funding cuts or policy proposals that would restrict eligibility or reduce benefits. SNAP has responded effectively to growing need in the recession with benefits that are timely, targeted, and temporary. The average SNAP household has an income of only 57 percent of the Federal poverty guideline, and 84 percent of benefits go to households with a child, senior, or disabled person. The program is working to support vulner-

able families in Massachusetts, and our food bank network would not be able to meet the increased need for food assistance if SNAP were cut.

These programs have a real impact on your constituents, many of whom must rely on food banks and their partner food pantries as well as Federal nutrition programs to meet their basic food needs. I encourage you to visit the food banks serving your district before the Committee marks up a farm bill so you can meet our neighbors in need and see firsthand how Federal nutrition programs are working to protect vulnerable Americans from hunger.

The Worcester County Food Bank believes that feeding our neighbors is a shared responsibility, and food banks like ours rely on a variety of food sources to support our communities, including generous support from partners in retail, manufacturing, and agriculture. However, the Federal government is an equally critical partner through programs like TEFAP, SNAP, and CSFP, and with tremendous, ongoing need in our state, continued Federal support is more important than ever.

As the House Agriculture Committee moves forward with farm bill reauthorization, it is imperative that you do not take food away from Americans in need. Investing in anti-hunger programs is not only the right thing to do but also makes fiscal sense, as these programs allow us to care for our neighbors, build our communities and lead to savings in healthcare and education down the road. Worcester County Food Bank urges you to protect the nutrition safety net and offers the specific recommendations below as a member of the Feeding America national network of food banks.

Sincerely,

JEAN G. MCMURRAY,
Executive Director.

Feeding America 2012 Farm Bill Priorities

The Emergency Food Assistance Program (TEFAP): TEFAP is a means-tested Federal program that provides food commodities at no cost to Americans in need of short-term hunger relief through organizations like food banks, pantries, soup kitchens, and emergency shelters. Nutritious food commodities provided through TEFAP are an essential resource for Feeding America food banks. As the demand for food remains high at food banks across the country, a continuous stream of TEFAP is necessary for the provision of a steady emergency food supply.

- TEFAP commodities account for approximately 25% of the food moving through Feeding America food banks. Food banks combine TEFAP with private donations to maximize TEFAP benefits far beyond the budgeted amount for the program. In this way, food banks exemplify an optimum model of public-private partnership.
- TEFAP has a strong impact on the farm economy. According to USDA's Economic Research Service, producers of commodities provided as bonus TEFAP (those purchased by USDA to intervene in weak agricultural markets) receive an estimated 85¢ per dollar of Federal expenditure. Producers of other commodities provided through TEFAP receive about 27¢ per dollar. By contrast, only about 16¢ of every retail food dollar goes back to the farmer.
- Declines in Section 32 funding and strong agriculture markets resulted in a 30% decline in TEFAP purchases during FY2011. This decline is expected to continue in FY2012 as food banks continue struggling to meet increased need. The shortfall between supply and demand will only worsen when the SNAP ARRA benefit boost expires, as many participants turn to food banks to make up for the reduction in benefit levels.

Farm Bill Priorities for TEFAP:

- Make mandatory funding for TEFAP food more responsive to changes in need by providing a trigger that ties funding to unemployment levels
- Enhance Secretary of Agriculture's authority to purchase bonus commodities in times of high need for emergency food relief in addition to times of low commodity prices so the program is responsive both to excess supply and excess demand
- Reauthorize funding for TEFAP Storage and Distribution Funds at \$100 million per year
- Reauthorize funding for TEFAP Infrastructure Grants at \$15 million per year

Supplemental Nutrition Assistance Program (SNAP): SNAP is the cornerstone of the nutrition safety net, providing over 46 million low-income participants with monthly benefits via a grocery debit card. Eligibility is based on household income and assets and is subject to work and citizenship requirements. SNAP is one of the most responsive safety net programs, expanding quickly to meet rising need

during the recession. The program is targeted at our most vulnerable; 76% of SNAP households contain a child, senior, or disabled member, and 84% of all benefits go to these households.

- As the number of people unemployed grew 110% from 2007 to 2010, SNAP responded with a 53% increase in participation over the same period. As the economy slowly recovers and unemployment begins to fall, SNAP participation and costs too can be expected to decline.
- The SNAP accuracy rate of 96.19% (FY10) is an all-time program high. SNAP error rates declined by 61% from FY1999 to FY2010, from 9.86% to a record low of 3.81%.
- SNAP benefits supplement a household's food budget but are insufficient to last most participants through the month, causing many participants to rely regularly on food banks. Among food pantry clients receiving SNAP benefits, over ½ (58%) reported having visited a food pantry at least 6 months or more during the prior year.
- The average SNAP household has a gross monthly income of \$731 and countable resources of \$333, consists of 2.2 persons, and participates in the program for 9 months. The average household receives a monthly benefit of \$287, or about \$1.49 per person per meal.

Farm Bill Priorities for SNAP:

- Protect SNAP by opposing proposals to cap or reduce funding, restrict eligibility, reduce benefits, or otherwise impede access or benefit adequacy. Recent proposals to block grant the program would prevent it from responding effectively to fluctuations in need, and efforts to limit broad based categorical eligibility would increase administrative costs and access barriers.
- Restore the cut to the SNAP ARRA benefit boost used to pay for the 2010 child nutrition bill and phase out the boost in a way that protects families from a cliff in benefit levels.
- Encourage better nutrition by maintaining nutrition education, incentivizing the purchase of healthy foods, and ensuring that retailer standards balance adequate access to stores with access to a range of healthy foods and moderate prices.
- Build on SNAP's strong record of integrity and payment accuracy by issuing guidance to states on the eligibility of lottery winners and college students and upgrading resources and technology for trafficking prevention.

Commodity Supplemental Food Program (CSFP): CSFP leverages government buying power to provide nutritious food packages to approximately 599,000 low income people each month. Nearly 97 percent of program participants are seniors with incomes of less than 130% of the poverty line (approximately \$14,000 for a senior living alone). Currently, 39 states and the District of Columbia participate in CSFP. Another 6 states (CT, HI, ID, MD, MA, & RI) have USDA-approved plans, but have not yet received appropriations to begin service.

- CSFP is an efficient and effective program. While the cost to USDA to purchase commodities for this package of food is about \$20 per month, the average retail value of the foods in the package is \$50.
- CSFP helps to combat the poor health conditions often found in seniors who are experiencing food insecurity and at risk of hunger. CSFP food packages, specifically designed to supplement nutrients typically lacking in participants' diets like protein, iron, and zinc, can play an important role in addressing the nutrition needs of low-income seniors.
- Many seniors participating in CSFP are able to have their food boxes delivered directly to their homes or to seniors' centers nearby, an important benefit for those who are homebound, have limited mobility or do not have convenient access to a grocery store.

Farm Bill Priorities for CSFP:

- Transition CSFP to a seniors-only program by phasing out eligibility of women, infants, and children while grandfathering in current participants.

COMMENT OF PATRICIA MCNABB

Date Submitted: Friday, May 18, 2012, 12:33 p.m.

City, State: New Brighton, MN

Occupation: Retired

Comment: To Large Commercial Farmers: I am terribly concerned about the current farming practices of large commercial farming companies. Your continuing use

of pesticides and “Agent Orange”-type chemicals makes me want to live off the grid by buying only locally produced food through cooperatives or local farmers. As you know bee colonies are falling apart and suffering badly. Furthermore, genetically altering seeds, especially when we consumers are not notified, is especially dangerous.

You (and I) have no idea what the end result of such dangerous practices may be. Please take these ideas to heart and put them above your concern for your bottom line!

COMMENT OF AMY MCNAIR

Date Submitted: Friday, May 18, 2012, 9:19 a.m.

City, State: Hilliard, OH

Occupation: Mom and Nurse Practitioner

Comment: Dear Members of the House:

You can judge a society based on the way they treat their most vulnerable populations. If we look at our children and our elderly, what would people say about our philosophy of life? It is time to step up and support farms that produce healthy foods, foods for all of us, but especially for our vulnerable populations. It is time to make healthier food affordable and accessible to these populations. It is time to raise our animals used for food with respect and dignity. As both a mother and a health care provider, I urge you to support this bill to make healthy foods more readily available to all of us.

Thank you,

AMY MCNAIR.

COMMENT OF CLAIRE MCNEELY

Occupation: IT Engineer

Comment: Please support organic farmer including local and nationwide to grow healthy and organic crops, not allow corporate control our farmers' crops. I want to eat healthy produce.

COMMENT OF MARNIE MCPHEE

Date Submitted: Friday, May 18, 2012, 2:16 p.m.

City, State: Portland, OR

Occupation: Writer and Former Farmer

Comment: As a former organic farmer and co-founder of National Organic Harvest Month, I am well aware of how farm policy shapes land, lives, communities, and economies. Farm policies that support **Family** farms and the communities those farmers support, and standards that protect local and global environment are good for everyone, in the short- and long-term.

COMMENT OF HOLLY MCPHERSON

Date Submitted: Monday, March 19, 2012, 6:36 p.m.

City, State: Denver City, TX

Occupation: Teacher/Rancher

Comment: Make sure that politicians support farmers—they are the backbone of American exports.

Please remember in your deliberations that government jobs do not create wealth for the United States they take money from the nation and that 1 farmer creates more than 11 jobs in support for the creation of exports to the world in food/fiber for the U.S. Private Industry makes \$\$\$ for the nation NOT more govt. job or regulation.

HOLLY MCPHERSON, Denver City, TX.

COMMENT OF PAT MCQUADE

Date Submitted: Friday, May 18, 2012, 9:50 p.m.

City, State: Carmel, NY

Occupation: Housewife and Gardener

Comment: When are politicians going to start representing the **People** of this country, instead of your own selfish interests and corrupt corporations? Don't you realize your children's families will have to live in this mess you're creating long after you're gone? Do the job you were voted for . . . for a change.

COMMENT OF SUSAN MCSHERRY

Date Submitted: Friday, May 18, 2012, 4:21 p.m.

City, State: Dayton, OH

Occupation: Teacher

Comment: Current industrial agribusiness policies are a threat to American health. It is time to put the health of the American public before the interests of the monied agribusiness lobbies. It is time to move away from chemical and GMO contamination of our food supply and move toward a healthier organic or permacultural means of supplying the food we eat.

COMMENT OF WINSTON MCTAGUE

Date Submitted: Wednesday, May 09, 2012, 2:55 p.m.

City, State: Newport, ME

Occupation: Machine Operator

Comment: Every farmer in America is going under and hunger is coming on strong and poor, disabled, homeless, shelters, food banks, veterans all cannot buy food now and republican screwballs are taking it all away **And Needs To Stop Damit!**

COMMENT OF ELIZABETH MCTEER

Date Submitted: Friday, May 18, 2012, 12:16 p.m.

City, State: Sarasota, FL

Occupation: Operations Manager

Comment: Please don't subsidize GMOs! Please work against GMOs. They are not yet proven safe and are banned virtually in every other country for this reason!

We as a nation are suffering the terrible health consequences including rapidly rising obesity, diabetes and heart disease that are directly linked to the over consumption of sweet and fatty foods that have been subsidized by farm bills in the past. The health of our citizens and the medical system would greatly benefit in the promotion of whole plant based foods (not GMO corn grown for cattle and GMO soy and beets for sugar and junk-food fillers). A healthy farm bill can encourage people to eat whole foods and resolve many of our budget/health care cost problems. Please phase out all agricultural subsidies while boosting support for farmer's markets, land conservation and organic farming which protects farm workers against dangerous pesticides.

Thank you!

COMMENT OF JAN MCVEY

Date Submitted: Saturday, May 19, 2012, 7:33 a.m.

City, State: Harper Woods, MI

Occupation: Sales

Comment: I have several health issues which I truly rely on **Organic** foods for myself and my family. Our bodies are on over-load from all the chemicals we are ingesting already. It is absolutely imperative that farmers are allowed to grow food without more chemicals added.

Look at the amount of sickness already, please take time to re-think these decisions, and save our families from further illnesses. Our Food needs to be protected! God intended for our food to be naturally grown and not tampered with.

COMMENT OF TRISHA MCWATERS

Date Submitted: Friday, May 18, 2012, 12:02 p.m.

City, State: Wimberley, TX

Occupation: Artist

Comment: I think the food industry is a sham. I feel mainstream public has no idea what they are eating, and how many deadly chemicals are in food today. Please do away with GMO foods and please allow local farmers and local organic farmers to just grow their food without government stepping on them.

COMMENT OF MORGAN MEAD

Date Submitted: Saturday, May 19, 2012, 12:23 p.m.

City, State: Marblehead, MA

Occupation: Student

Comment: Many of us, such as those required to have meal plans on campuses, are not able to choose the food that we eat. Requirements need to be stricter on places like these to ensure the health of students. They can basically feed us anything they want since we have to have it.

COMMENT OF NATHANIEL P. MEAD

Date Submitted: Saturday, May 19, 2012, 3:39 a.m.

City, State: Spring Valley, NY

Producer/Non-producer: Producer

Type: Dairy, Field Crops, Fruits, Greenhouse/nursery, Vegetables

Size: 50–150 acres

Comment: Ecological diversity is what has created and will continue to create the foundation we have for our existence. Profit oriented endeavors leading to deterioration of our social and ecological networks need be seriously analyzed and hindered in favor of initiatives that encourage social and ecological diversity.

Please give room for the future generations to have a meaningful, respectful and healthy relationship to the land.

COMMENT OF PAO MEADER

Date Submitted: Friday, May 18, 2012, 12:13 p.m.

City, State: Westbrook, ME

Occupation: Information Technologies—MLTI Tech Leader

Comment: I believe we need to adjust farm bill policies to support small, local agriculture. Too often, subsidies and policy favor large farms which cause further damage to our food supply both in quality and in reliability. Having discovered from personal experience how much a healthy diet can reduce health issues and generally improve a person's life. Please consider supporting local small agriculture.

COMMENT OF ANNE MEADOWS

Date Submitted: Friday, May 18, 2012, 4:03 p.m.

City, State: Washington, D.C.

Occupation: Retired

Comment: One of the reasons the nutrition programs were started in the first place was to support the agriculture industry. It's more than just a "handout" to the poor. Poor nutrition leads to poor students and workers. We need healthy, locally grown food in our schools and grocery stores.

COMMENT OF CLAIRE MEADOWS

Date Submitted: Friday, May 18, 2012, 8:11 p.m.

City, State: Lafayette, CO

Occupation: Gardener/Cook

Comment: Please keep corporate agribusiness out of the American Farm. Help us keep our food production at a local level and observing healthy, sustainable farming techniques.

COMMENT OF TERI MEADOWS

Date Submitted: Friday, May 18, 2012, 1:37 p.m.

City, State: Fairfax, CA

Occupation: Homemaker

Comment: We need separate regulations for small farmers! Do not treat small farms like large AG! Let small farmers sell raw milk! Talk to small farms and understand their needs. People drank raw milk for thousands of years—it is normal and natural. We need local, organic produce as a means of national security. We need reform now.

COMMENT OF A.E. MEDINA

Date Submitted: Friday, May 18, 2012, 1:46 p.m.

City, State: Paterson, NJ

Occupation: Retired Educator

Comment: Do the right thing please before we eat ourselves into nonexistence with the polluted food that is prevalent in our supermarkets. We all want and deserve good, clean, wholesome food. The wave has arrived, the farm bill needs to get onboard for the good of **All** of us. Go organic, everywhere!

COMMENT OF HALE MEDNICK

Date Submitted: Sunday, May 20, 2012, 9:23 p.m.

City, State: Gresham, OR

Occupation: Teacher, Former Farmer

Comment: As a former organic farmer for 8 years, I can guarantee you that you cannot cave into the unreasonable demands of corporate agriculture and expect people's health and welfare not to continue to deteriorate. You need to support small, local organic farmers to have a strong food supply. Period. Make a stand now against corruption from corporate agriculture who only want profits.

COMMENT OF LEX MEDVED

Date Submitted: Friday, May 18, 2012, 6:44 p.m.

City, State: Rahway, NJ

Occupation: Architectural Draftsman

Comment: Preserve the small farms. If not we will need bailouts to protect the large mega corporation which will then be deemed "too large to fail" Small and varied farming protects the environment, encourages diversity, and stimulated competition for the best food at the best prices. Isn't that the America we grew up with? Large firms will sell you "what they got", whether you want that or not.

Thanks for reading this.

LEX.

COMMENT OF LEONOR MEEK

Date Submitted: Wednesday, May 02, 2012, 7:42 p.m.

City, State: San Antonio, TX

Occupation: Homemaker

Comment: Please put necessary funds towards needy children first. It is so important to feed the future not putting more cash into rich people's pockets. Put all of yourselves in the position of individuals bringing in low wages or out of work. Thank you for your attention to this matter.

LEONOR MEEK.

COMMENT OF HUMERA MEGHANI

Date Submitted: Friday, May 18, 2012, 12:15 p.m.

City, State: Killeen, TX

Occupation: Retail Sales

Comment: I would like to have taxpayer-derived government subsidies be designated to local and organic farmers, as well as denying patents on genetically engineered seeds/plants/produce.

COMMENT OF DIANE P. MEIER

Date Submitted: Thursday, May 17, 2012, 1:20 p.m.

City, State: Palo Alto CA

Occupation: Partnership & Business Strategist; Local/Sustainable Food Advocate

Comment: Dear members of the House Agriculture Committee:

I am a partnership and business strategist committed to local/real food and sustainable agriculture. I am particularly passionate about edible education and connecting children to the food they eat, including the consequences of their food choices for themselves and the planet.

We need a farm bill that:

- creates jobs and spurs economic growth;
- makes healthy food widely available to all Americans, especially schoolchildren;
- protects our natural resources;
- invests in the next generation of farmers and ranchers; and
- drives innovation for tomorrow's farmers and food entrepreneurs.

Please, invest our money in a farm policy that really matters!

Thank you,

DIANE P. MEIER.

COMMENT OF JANE MEIGS

Date Submitted: Friday, May 18, 2012, 12:45 p.m.

City, State: Millerton, NY

Occupation: Teacher

Comment: For too long, large agribusiness interests have received the lion's share of Federal agricultural support. It is time to reverse that trend and support local, small family farms and protect the environment and our natural resources. More support should be given to small farmers and organic farmers. We need to move away from a system that is overly dependent on harmful pesticides and overly reliant on huge fossil fuel inputs. Please do all that you can to strengthen the small farming communities and increase support of organic agriculture.

COMMENT OF MIRIAM MEISLER

Date Submitted: Wednesday, May 09, 2012, 7:05 p.m.

City, State: Ann Arbor, MI.

Occupation: Professor.

Comment: I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

COMMENT OF DEBRA MELLENTINE

Date Submitted: Friday, May 18, 2012, 8:24 p.m.

City, State: Bannister, MI

Occupation: Housewife, Hobby Gardener, Mom, Grandma, Oil Painter, Avid Organic Advocate

Comment: I personally don't want Monsanto controlling my food supply. I was raised on canned produce and my parents purchased locally grass fed, free to graze beef as well as free range chickens for meat and eggs. I can tell you from experience there is no comparison when it comes to flavor from then to today's store fodder. Plus, who really wants a corn product that's been GMO produced so it can withstand having more poison (herbicides) added to it. Enough to kill anything else and probably us farther on down the road. I had a cousin who worked in a field that would know the dangers of this stuff who would constantly tell everyone that herbicides and pesticides would be the end of us.

COMMENT OF ROSEMARY MELLI

Date Submitted: Friday, May 18, 2012, 12:18 p.m.

City, State: Westport, MA

Occupation: Speech Language Pathologist

Comment: We need a **Food** and farm bill that supports sustainable agriculture and works to fix our present broken food system by discouraging the practices that have created 'industrial agriculture', 'factory farms', and food production that is non-nutritious, unhealthy, and harmful to our environment.

COMMENTS OF GWENN MELTZER

Date Submitted: Wednesday, May 02, 2012, 8:56 p.m.

City, State: Woodlyn, PA

Occupation: Advocate Advisor

Comment: Farming is the backbone of our culture . . . if nothing else, they are the soul of our country and it's hard working people . . . as the Native American Indian is the soul of our nation of our land and the wildlife.

Date Submitted: Wednesday, May 09, 2012 2:49 p.m.

Comment: Farmers, as well as The Native American Indian, are the caregivers and caretakers of the land . . . ! . . . Do Not Disturb the Protector or the Provider . . . It **Is** part of a 'Sacred Trust' that should be respected . . . and kept safe . . . !

COMMENT OF NANCY MELVIN

Date Submitted: Sunday, April 22, 2012, 5:51 p.m.

City, State: Chicago, IL

Occupation: Gardening Teacher

Comment: Food freedom is important. Now that the state of Michigan has passed a law that makes it illegal for a farmer to raise heritage pigs, calling them feral even when they are well cared for with good husbandry practices, it is most important that all of us consumers stand up for our rights. We should be able to eat what small farmers want to sell us. That means being able to buy raw milk, healthier by far than antibiotic laden pasteurized milk. I am forbidden by the state of Wisconsin from buying raw milk from a perfectly clean and responsible farmer. This broke his heart and he died of heart failure and his wife went insane with grief. Governments should have no right to bend to agribusiness by legislating what small farmers can and can grow and sell. Why should one large business be allowed to sell what it wants and another small business be forbidden? Healthy pork and healthy milk are now forbidden to us in the Midwest. It is insane that the state of Michigan can send police to a farm to shoot pigs and arrest farmers! It is unbelievable that the state of Wisconsin can close down a dairy, put the farmers in jail and force the sale of all their healthy cows! Protect the small farmers. Yes, I want the member of the house committee to hear this!

COMMENT OF JOANNE MEMHARDT

Date Submitted: Saturday, May 19, 2012, 11:21 a.m.

City, State: Schaumburg, IL

Occupation: Retired

Comment: Please oppose any proposals that would change SNAPs structure or funding restrict eligibility or reduce benefits. I am volunteer at our church food pantry.

COMMENT OF PATRICIA MENA

Date Submitted: Friday, March 16, 2012, 4:56 p.m.

City, State: Oswego, NY

Occupation: Retired

Comment: Please do not allow the expiration of the portion of the farm bill that pays farmers whose land has gotten too wet to profitably farm to allow it to return to wetland. This only sounds counterproductive. Much farmland was "forced" out of original wetlands. To allow the return, we keep land that filters our drinking water, cleans toxins out of the air, and allows the balance of wildlife to return. Each part is needed.

COMMENT OF MARCY MENARD

Date Submitted: Tuesday, April 10, 2012, 9:28 p.m.

City, State: Zebulon, NC

Occupation: Student

Comment: My name is Marcy Menard and as a Dietetic Intern at Meredith College in Raleigh, NC, I would like to express my concern for the upcoming farm bill

renewal. I am originally from Long Island, NY, and have grown up with a wide variety of crops in my backyard: potatoes, apples, and vineyards just to name a few. Not only are these fields and farmlands pleasing to the eye, but they are also essential to the farmer's lives and the sustainability of our local food system. I feel the same way about the food system here in Raleigh. Though the food may travel slightly farther within the state to get to me, the production of North Carolina grown produce is vital to sustain the local economy. In addition, such locally sourced and sustainably grown crops can promote improved nutritional status of our society. It is estimated that to meet the 2010 Dietary Guidelines recommendations for fruit and vegetable intake, the U.S. must dedicate an additional 13 million acres of farmland, which illustrates the necessity of farmland conservation and development. I am in support of the upcoming farm bill. In particular, I believe that Title X (Horticulture and Organic Agriculture) deserves great consideration to help encourage and promote the production of fruits and vegetables among U.S. farmers to help improve the intake of fruits and vegetables among Americans.

COMMENT OF JOSEPH MENDOZA

Date Submitted: Wednesday, May 09, 2012, 5:57 p.m.

City, State: Denver, CO

Occupation: Unemployed

Comment: Every half-hour a farmer commits suicide in the third-world for having to abide impossible to obey ultimatums. And the American senior citizens, themselves, are fed up with any merit-less obedience.

COMMENT OF MAX MENSING

Date Submitted: Friday, May 18, 2012, 4:35 p.m.

City, State: Yachats, OR

Occupation: Business

Comment: As a consumer I want to have the ability to buy food that is produced in ethical and wholesome ways , grass fed beef, non GM alfalfa, soy, and corn.

We have allowed a few agricultural companies to monopolize the food production in this country.

Small independent producers are being criminalized so the big agribusiness can monopolize what I and my family can eat.

I urge you to cut subsidizes to large producers and give aid to the small family farmer.

Also do not allow any more consolidation of farm resources like seeds.

Best land management practices also need to be the law. Every river needs a greenbelt, and the soil needs to be protected.

The knowledge that was painfully learned in the Dust Bowl of the 1930's should not be repeated.

Also pesticide and antibiotic use needs to be brought back down to levels used in the 1960's.

Thanks for hearing me.

Don't let agriculture be controlled by a few large corporations.

For the banks to fail you borrowed and loaned and brought things back for food to fail, starvation in America could be the result.

It happened in Ireland, don't let it happen here.

COMMENT OF ELIZABETH MERCADO

Date Submitted: Friday, May 18, 2012, 1:50 p.m.

City, State: Lutz, FL

Occupation: Homemaker and Small Business Owner

Comment: It's all about having all natural foods with no chemical . . . I'm healthy and want to remain that way also for my future generation . . . thank you . . . p.s. I will start suing companies for using chemicals in my food.

COMMENT OF LEONE MERCHANT

Date Submitted: Friday, May 18, 2012, 11:33 a.m.

City, State: San Francisco, CA

Occupation: Marketing Manager

Comment: End subsidies to big business agriculture on corn and soy. Support local, organic family farms. Label all GMO food products s as so. End funding to CAFO's.

COMMENT OF ROBERT MERHAR

Date Submitted: Friday, May 18, 2012, 4:55 p.m.

City, State: Hudson, WI

Occupation: Insurance Agent

Comment: We need farming on a much smaller scale i.e.; regional farming, organic farming and of course the rapidly vanishing family farm. Our existing corporate farming model is not working and will only lead to more outbreaks of deadly diseases and fatter Americans with more diabetes and many other illnesses. Put the money where it can do the most good—in the regional local farms and encourage organic farming. For quite a few weeks now I have been going to my local chain grocery store looking for 1% organic milk and they have posted signs saying there is a shortage and they cannot adequately stock their shelves. Also stop supporting huge chemical corporations like Monsanto who do nothing but pressure and attack small farmers to by their genetically altered seed, with weed retardant and insect resistance genetically inserted into the seed. Thanks for your consideration.

COMMENT OF LAWRENCE MERLINO

Date Submitted: Saturday, May 19, 2012, 3:27 p.m.

City, State: Shady, NY

Occupation: Internet Sales

Comment: The dismal failure of biotech crops *i.e.*, producing super-weeds and super bugs, and the poisoning of the land and water by big agriculture companies shows the need for a sustainable farm bill which helps preserve family farms and common-sense rules and support for organic farming. As more and more people become aware of the state of our food supply the demand for healthy foods is increasing. Congress can prove their leadership by taking the lead in a movement which will be for the future good of our nation. Congress needs to stop pandering to these companies which almost assuredly will become dinosaurs and recognize the sustainable agriculture movement as the way of the future.

COMMENT OF ROBYN MEROOK

Date Submitted: Thursday, April 26, 2012, 11:46 a.m.

City, State: Morristown, TN

Occupation: Medical Field

Comment: Please support the farmers of American and encourage them to grow more crops instead of paying them not to. Our food supply is growing increasingly dependent on other countries when we have the capability to grow what we need. The safety of the food we eat is also getting more unstable—why are we bringing meat to the U.S. from other countries—are you people crazy? Our country and our citizens future is riding on the decisions you are making in Washington, please take time to think about and also **Consider** the people who put you in office and how these things will affect them before you make these decisions.

COMMENT OF EDWARD MERRIMAN

Date Submitted: Sunday, May 20, 2012, 7:12 p.m.

City, State: Villanova, PA

Occupation: Librarian

Comment: I favor an immediate investigation (by an independent agency with no possible conflicts of interest or links to any biotechnology firms) be made into the linking of BT and other pesticides in the massive honeybee deaths that have occurred over the past several years.

COMMENT OF TIMOTHY MERTON

Date Submitted: Friday, May 18, 2012, 11:59 a.m.

City, State: Putney, VT

Producer/Non-producer: Producer

Type: Forestry, Other

Size: 50–150 acres

Comment: It is only a matter of time before the Members of the House Committee on Agriculture are going to have to deal with and accept labeling of Genetically Modified foods for consumers. I suggest that anyone on the Committee who has affiliations with Monsanto Corporation be removed from the committee in the name of “conflict of interest”.

COMMENT OF GENE MESSICK

Date Submitted: Saturday, May 19, 2012, 5:45 p.m.

City, State: Christiansburg, VA

Comment: U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of our citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

I fully support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Federal assistance to family and organic farmers in equivalent amounts as agribusiness farms are supported.

Please do **Not** attempt to balance any budgets by cutting Food Stamp funding. Because of my age, I for one could not survive without Food Stamps, much as I would prefer not needing them.

I do as much as I can to raise my own food with my victory gardening, which has grown in size and production each of the past 4 years.

COMMENT OF JOHN METZ

Date Submitted: Sunday, May 20, 2012, 9:34 p.m.

City, State: Cincinnati, OH

Occupation: Professor

Comment: Dear Committee members,

I urge you to support H.R. 3236, Local Foods, Farms, and Jobs bill. Our food system needs fundamental reform. Whether we look at the farmers, who are must grow larger and larger and specialize on a few crops and whom have been going bankrupt at very high rates over the last 60 year, or if we look at the meat production system with its recurring contamination and recalls, or the obesity epidemic, which is driving our medical costs out of reach—the system is broken. HR 3236 will begin to address these critical questions. I urge you to consider this bill carefully and vote for it.

Sincerely,

JOHN METZ.

COMMENT OF KAREN B. MEYER

Date Submitted: Sunday, May 20, 2012, 11:39 a.m.

City, State: St. Louis, MO

Occupation: Accounts Payable Senior Specialist

Comment: Dear House Agriculture Committee:

I urge language in the farm bill that will ensure sustainable practices for our soils and protection of our waters.

Taxpayers have supported a safety net for farmers for nearly 30 years with a guarantee that subsidized farmers will follow basic conservation practices in their fields to protect soil and water. Farmers provide an important commodity to the American public, and have an urgent need to employ conservation practices in order to preserve the economic health and productivity of our farmlands and resources for the future.

As the House Agriculture Committee prepares your draft of the farm bill, I urge you to restore the link between taxpayer-supported subsidies for crop insurance and conservation compliance protections that will protect our water and land.

This action is especially important as Congress considers eliminating direct payments, the major subsidy program that is linked to conservation compliance, and moving some of those funds to support increased subsidies for crop insurance, which lacks compliance requirements. Unless you help to reconnect crop insurance subsidies to conservation compliance, farmers will no longer have incentive to follow conservation plans.

Farmers need crop insurance and the public needs basic conservation practices on farms to make sure that quality farmland and water can support future generations as well as the current needs of our country. It's not acceptable to sacrifice long-term

economic and environmental sustainability for short-sighted and short-term economic profits.

Connecting eligibility for crop insurance subsidies to conservation compliance is fiscally responsible and ensures public subsidies for farmers' insurance premium payments align with the public's interest in basic conservation of our soil and water. Since Missouri consistently ranks in the top five for soil loss, losing more than 5 tons per acre per year, we must make soil conservation a priority.

Sincerely,

KAREN B. MEYER,
[Redacted],
St. Louis, MO.

COMMENT OF MELANIE MEYER

Date Submitted: Friday, May 18, 2012, 12:05 p.m.

City, State: Springfield, VA

Occupation: Translator

Comment: My family and I are extremely concerned about the current practice of wide-spread factory farming and about all the damage it does to people's health (antibiotic overuse, pesticide and other toxin exposure) to the environment and the often needless suffering inflicted on animals.

We would like to strongly urge decision makers to put more emphasis on supporting small local farmers instead, especially organic farmers and to make organically produced food more readily available to the American people. Please stop the subsidies for large scale industrial farming and for junk food production and let those funds flow into local farming!

The health benefits of natural food (and the lower foot print on the environment) will pay off in the long run in lower health care costs (both through healthier food and through cleaner air, water, *etc.*).

COMMENT OF PATRICIA MEYER

Date Submitted: Friday, April 20, 2012, 8:47 p.m.

City, State: Albuquerque, NM

Occupation: Teacher

Comment: Please vote for the farm bill. The money is used in all our schools and for those kids who have no food at home. The subsidy programs feeds many hungry people who would have to go without. I have seen many parents choose to not eat so that their kids can. Cereal for all meals is very common. The cheapest foods are not always the most nutritious. In fact they are high carbohydrate and fruit is too expensive to eat. The programs that the Farm bill funds do make nutrition a priority.

COMMENT OF RONALD MEYER

Date Submitted: Friday, May 18, 2012, 11:53 a.m.

City, State: Fresno, OH

Producer/Non-producer: Producer

Type: Vegetables

Size: 151-300 acres

Comment: We have a surplus of corn and soybeans. It's time to stop subsidizing huge farms and change the farm bill to support small farmers, especially organic farmers, who supply the vegetables, fruits, and healthy meats that people want!

COMMENT OF BEN MICEK

Date Submitted: Saturday, May 19, 2012, 4:15 p.m.

City, State: Evergreen, CO

Producer/Non-producer: Producer

Type: Bioenergy, Greenhouse/nursery

Size: Less than 50 acres

Comment: It's time to think locally about food and to reallocate current subsidies to diverse farms replacing monocultures and ranches. We need to restore our soils, heal the land, and take care of the vital needs of one another.

COMMENT OF ALEXIS MICHAELS

Date Submitted: Friday, May 18, 2012, 1:07 p.m.

City, State: Dearborn Heights, MI

Occupation: Physician

Comment: There can be nothing more important after defense than allowing people who are now trapped in cities with no other means than grocery stores, to choose to eat organic safe and nutritious foods from local farmers that contribute to the environment in a safe and thoughtful way. How can I tell my patients to make healthy food choices when Washington is collaborating with food industry to wipe out the local organic farmer. Has the bee crisis taught us nothing?

We need to support local organic farming and reverse the damage done to our health, our local farmers, and our environment with corrupt policies that only support big farm business. What Washington finds expedient today for their own personal political needs, the country and the world will suffer with poor health and an environment that will no longer support healthy life.

COMMENT OF DALE EKAHI MICHAELS

Date Submitted: Friday, May 18, 2012, 4:42 p.m.

City, State: Honolulu, HI

Occupation: Healthcare Professional

Comment: I am in support of an Organic Farm Bill. Organics are currently our only guarantee of foods being free of GMO.

I support organics, I'm opposed to GMO, If anything does contain GMO, it must be clearly labeled as such.

The health of the population that particularly of our children is all at stake here. Thank you for listening.

DM.

COMMENT OF NANCY MICHELLI

Date Submitted: Friday, May 04, 2012, 2:22 p.m.

City, State: Hercules, CA

Occupation: Retired

Comment: I strongly urge the House Agriculture Committee to support small family farms. Large corporate ranching and farming has brought the citizen's of this country to poor health and disease. We need family farms more than ever.

I personally only purchase organic produce from local farms through farmer's markets. I do grow much of my own as well. I also only purchase meat, eggs and dairy from a local meat CSA where the animals are grass fed and pasture raised. I refuse to buy the diseased and poisoned factory farmed meat predominant in the market today. Not to mention the disgusting and inhumane conditions in which they are kept, treated and slaughtered. Nor do I wish to purchase or consume GMO raised produce that has been treated with chemical fertilizers and pesticides and shipped across the country.

In order for this country to survive there needs to be a return to the family farms and the end to corporate dominance when it comes to our food. We all need healthy unadulterated food to thrive as a nation. The citizens of this country deserve nothing less.

I urge the House Committee on Agriculture to support the following amendments:

- Family Farms First and Training for Beginning Farmers—put forward by Senators Brown (D-OH) and Nelson (D-NE)
- Affordable Land for Farmers, Forever—put forward by Senator Leahy (D-VT)
- Non-GMO Plant and Animal Breeding—put forward by Senator Gillibrand (D-NY)
- Crop Insurance for Organics—put forward by Senator Casey (D-PA)
- Beginning Farmer and Rancher Opportunity Act—put forward by Congressman Walz (DFL-MN) and Congressman Fortenberry (R-NE)
- The Local Farms, Food, and Jobs Act—put forward by Congresswoman Pingree (D-ME) and Senator Brown (D-OH)

Thank you for taking the time to read my comments. Please give this serious consideration and do the right thing.

COMMENT OF KATHY MICKEL

Date Submitted: Wednesday, May 09, 2012, 3:04 p.m.

City, State: Johnstown, NY

Occupation: Retired

Comment: Please pass a strong Farm bill that protects programs like SNAP, TEFAP & CSFP which help provide food for millions of America's most vulnerable seniors. My husband and I have been running a food pantry for 5 years and each month, the numbers go up for people that are in need of providing food for their families.

This should also do away with subsidies that are for crops that are not grown.

COMMENT OF CHARLES MICKELSON

Date Submitted: Friday, May 18, 2012, 3:22 p.m.

City, State: Laramie, WY

Occupation: Retired

Comment: 90% of our health problems come from our food supply and our bad air. What we eat and breath is killing us. Stop thinking about your hip pocket and start thinking about the American people.

COMMENT OF MELISSA MIDDLEBROOK

Date Submitted: Friday, May 18, 2012, 12:08 p.m.

City, State: Seattle, WA

Occupation: Yoga Teacher, Full-Time Mother, Designer

Comment: We need a farm bill that supports small, local farmers and not big industrial agriculture. Big ag is poisoning our food and water supply, depleting farmland and has been on very dangerous course for too long. For our children and our planet, we need fundamental change towards sustainable agricultural. Thank you for your thoughtful consideration.

COMMENT OF DAVID MIDDLETON

Date Submitted: Friday, May 18, 2012, 12:53 p.m.

City, State: Skaneateles, NY

Occupation: Industrial Design

Comment: Please consider the following:

1. eliminate subsidies for bio-fuel feed-stocks that involve food crops or land used (or could be used) for growing food crops.
2. eliminate use of antibiotics in farm animals.
3. label GMOs
4. The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
5. Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
6. The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
7. Maintaining the EQIP Organic Initiative.

COMMENT OF CLARE MIPLIN

Date Submitted: Friday, May 18, 2012, 2:52 p.m.

City, State: Brooklyn, NY

Occupation: Architect

Comment: Agriculture uses most of the planets fresh water and is the biggest polluter. We must reform the agriculture of the USA and promote local and organic foods from smaller farms which have an immensely smaller carbon footprint.

COMMENT OF CHRISTINE MIGEOT

Date Submitted: Wednesday, May 16, 2012, 8:44 p.m.

City, State: Clementon, NJ

Occupation: Web Designer

Comment: Why would a humane country cut food stamps for the desperately poor and struggling at a time when unemployment is at 9% and so many can't find work that pays a living wage? I guess too many Congressional Reps feel a real need to punish those who already suffer so much. Food banks cannot make up for this. I've never protested for the hungry but perhaps it's time to start.

COMMENT OF JARED MIKE

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

We need healthy food, and right now, industrial farming practices are not—for both the environment (look at the state of wetlands, the huge subsidies for corn, algal blooms, water contamination, overuse of chemicals, *etc.*) and for people (overuse of chemicals, again, and decrease of nutrient content). Most of the chemicals we use pose significant risks to both health and environment and many do not decompose in a reasonable time-span, eventually contaminating the water supply. In addition, the overuse of chemicals leads to resistance, which, in turn, requires the development of new, sometimes harsher chemicals. We need to focus on alternative, sustainable farming practices.

City, State: Santa Cruz, CA

Occupation: Disabled Railroad Trainman

Comment: The truth of the matter is all great Civilizations fall because they abuse their soil thereby have less healthy food less healthy people less healthy brains and lose the ability to do what it takes to solve the problems to save the civilization. **We Are Doing This To Ourselves And If We Don't Turn It Around With Healthy Soil And Real Healthy Food We Are Doomed To The Same Fall. It Is Not Rocket Science.** Read the book, *Topsoil and Civilization*, and you will see why we must go back to healthy soil and healthy food for people Not profit if we are to survive. Do you have enough clarity to see this? I hope so for our nations sake . . .

COMMENT OF ROBIN MILCOWITZ

Date Submitted: Friday, May 18, 2012, 12:16 p.m.

City, State: Tampa, FL

Occupation: Local Food Advocate/Graphic Designer

Comment: A considerable restructuring of the subsidy formula and support structure for small farms, sustainable and organic farms needs to be made. The system now forces the hand of farmers to raise their product conventionally and in effect an inefficient, environmentally hazardous, inhumane, human-health deficient and fiscally irresponsible way. Retrofitting our food system to support the farmer, environment and physical and fiscal health of the population is what needs to occur. Please examine this bill in order to serve more than just “big ag”—their money means nothing if it overrides your constituents’ environmental, economic and physical health.

COMMENT OF MICHAEL MILLARD

Date Submitted: Friday, May 18, 2012, 12:43 p.m.

City, State: Chelsea, VT

Occupation: Woodworker

Comment: Regulations which support and encourage small family farms and meaningful support of true organic agriculture are essential. Agribusiness is **Not** serving either the health and nutritional needs of this nation, though it **Is** damaging the long-term health of our soil and land. Family farms, **Not** Monsanto, please. Thank you.

COMMENT OF ANTOINETTE MILLER

Date Submitted: Saturday, May 19, 2012, 12:46 p.m.

City, State: Sioux Falls, SD

Occupation: Retired

Comment: I would love to see farming in our country return to more sustainable permaculture practices with more food crop diversity and much less chemical usage. I would love to see us move away from damaging monoculture.

The corporate factory farm practices damage the soil, pollute our air and water and are making it ever more difficult to grow conventional and organic crops that don't rely on such heavy chemical usage and are more nutritious.

Factory farms are becoming a huge source of health problems in our country, IMO, as are the CAFOs.

GMOs that require the use of toxic herbicides & pesticides are a threat to our health, the health of our planet and its inhabitants. The overuse of these chemicals has created super weeds and resistant insects which the bio-tech industry claims can be handled with **More** toxic chemicals. That's **Insane!**

It's no surprise to more Americans than you seem to be aware of that our food quality has fallen so far below standard and so many more health problems now plague us from womb to grave.

I would love to see subsidies go to smaller, more sustainable farms and ended for corporate factory farms. Their profits are high enough that they shouldn't need to be subsidized any longer. Studies have shown that we can feed America and share with other countries using more sustainable farming practices. The bio-tech and chemical companies have our government, from top to bottom, in a choke hold. They are only concerned with their bottom line and "profits before people" has become the norm. It's shameful.

Corporate factory farms, the bio-tech industry and pharmaceutical industries are influencing lawmakers and slowly but surely destroying our small, sustainable farmers. For example, the feral hog hype that has caused farmers to kill their pigs to avoid charges. Factory farm pigs can also escape and become feral. There was no legitimate reason to outlaw the breeds of pigs the small farmers were raising. It was intended to eliminate competition for the corporate factory farms.

People have wakened and are seeking local small farmers knowing the food they buy is healthier, safer and more nutritious. They want to avoid buying GMOs, factory farm produced food and animal products from CAFOs.

Don't let corporate money and the power that goes with it destroy the only home we have, Earth, and all of us with it for the sake of higher profits now and no regard for our future.

We **Can** feed ourselves using more sustainable farming practices if we are not held back from doing it.

Put political party aside.

Think carefully and with an eye toward our future.

You can protect us from greed fueled harm or you can allow our destruction.

You decide which is the RIGHT way to go.

Hopefully yours,

ANTOINETTE MILLER.

Size: Less than 50 acres

Comment: Our agricultural product is informed educated organic grower producing food on their own property. Please consider the inefficiency and vulnerability of our current food system that wastes resources (jobs, money, ecological degradation through chemical inputs). If you or any other political service member need a crutch (advertisement dollars for your position) to stand, then your service lacks meaning and purpose. Please do your volunteer job and teach your constituents what the issues are and how they affect our economy, health, and most importantly our attitude towards our own capacity to provide for ourselves.

COMMENT OF BEN MILLER

Date Submitted: Saturday, May 19, 2012, 11:39 a.m.

City, State: Montague, MA

Producer/Non-producer: Producer

Type: Livestock

Size: 50-150 acres

Comment: Allowing food production in this country to be dominated by industrial concerns for the last fifty years has been environmentally devastating. Food producers are innovative and dynamic, but cannot change to sustainable practices under the current system. Moving away from commodities crop subsidies and back to a system of price floors will liberate the food producers of this country in a truly competitive system. Let's begin the shift to a saner agriculture.

COMMENT OF DAVID MILLER

Date Submitted: Friday, May 18, 2012, 2:25 p.m.

City, State: Berkeley, CA

Occupation: Food and Beverage Quality Control Supervisor

Comment: "Non-producer" but former organic farmer and always organic gardener also raising chickens and tree crops in small urban (Berkeley) front & backyard. Co-founder of 1st organic producers wholesale warehouse in SW Washington

Essential to further fund and support industry standards for organic GMO free farm products and support sensible and humane programs for low income food and nutritional programming.

COMMENT OF DEBRA MILLER

City, State: Shingletown, CA

Occupation: Dog Trainer

Comment: I have taken an active interest in where my food comes from in the last 6 months. I no longer am interested in buying or supporting the factory farm industry. I am prepared to pay the extra or go without to support organic or natural methods of farming. I was appalled to learn how the meat animals are kept and am not interested in eating genetically modified produce.

COMMENT OF JENNIFER MILLER

Date Submitted: Friday, May 18, 2012, 9:28 a.m.

City, State: Delmont, PA

Occupation: Development Director

Comment: I would like to make a statement in regards to the House Agriculture Committee as they develop the Farm Bill 2012. In Westmoreland County we feed over 15,000 people each month; it is a struggle year after year with continuing cuts to both our state and Federal funding. We have become more reliant upon fundraising; in fact in 2000 our budget relied upon 10% from fundraising and this year we are at 60%. In this economy that statistic is very frightening. Cutting anti-hunger programs will do nothing but **Increase** hunger in America, as well as the costs associated with health care, education, *etc.* It will also increase the amount of crime as people will do anything to feed their families and if help is not there I worry about the end results. Please remember the families, who are struggling in our community and protect & strengthen the anti-hunger programs like TEFAP, CSFP and SNAP in the 2012 Farm Bill reauthorization. We need your help to end hunger here at home . . . make it start with you! Thank you.

COMMENT OF JERRE MILLER

Date Submitted: Friday, May 18, 2012, 12:07 p.m.

City, State: Willow Springs, MO

Occupation: Retired

Comment: I am disheartened that Congress always seems to side with , protect and pass over reality in favor of large agribusiness to the detriment of nutrition, support for organic farming (or any small size farming) and sustainable agriculture. If you are run only by the big agriculture industry and not the people then our food will always be in jeopardy. If you only care about the money you receive from big agriculture then maybe you should call yourselves lobbyists. That has been what has evolved. Maybe you might have a chance to be ethical for a change. Hoping!

COMMENT OF JESSICA MILLER

Date Submitted: Friday, May 18, 2012, 5:29 p.m.

Comment: Stop the heavy use of pesticides which are now known to be causing colony collapse disorder in bees and poisoning our food, land and water. Encourage

turning to organic methods and reject Monsanto and other unethical and environmentally unsound companies.

COMMENT OF JOAN MILLER

Date Submitted: Saturday, May 19, 2012, 5:13 p.m.

City, State: Danville, IN

Occupation: Masonry Contractor, Small Farm, Retail Establishment

Comment: Please consider using common sense.

We the people must take care of this Earth, the air we breathe and food we eat.
By food

I mean real food. Not split into this and that so the stalk can stand higher and the bugs won't eat. The GMO corn looks terrible. Our animals were not made to eat yellow stuff, corn yes, what is in a supposedly corn seed now? What kind of nutrition does it have? What is it doing to the fertility of our cows?

Are you creating more loop holes in the new laws you are creating. Why don't you work with the laws you have and modify them? Create bills or laws the common person can read and understand. We shouldn't need a lawyer for interpretation. Our society keeps talking about obesity, look back in history, where did it really start. With artificial sweetener! You allow our food to be spliced and diced, our body's were not made that way. Do what is right for we the people and not the big those that call themselves ag producers, they are not producing good food. You are trusted by millions—earn it!

COMMENT OF KATHRYN MILLER

Date Submitted: Saturday, May 05, 2012, 7:03 p.m.

City, State: Providence, RI

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: To the Members of the House Committee on Agriculture,

I am a young, small-scale organic CSA farmer in Rhode Island. Policies that support the production of cheap food at the cost of the environment and the health of farm workers hurt small scale producers by making it difficult for us to compete with cheap food. We are the future of agriculture in the U.S., please pay attention to our needs. Here are my thoughts.

- I am glad that there is funding for CSAs and farmers markets to accept SNAP benefits. I suggest that the funding be used to buy CSA farmers and market managers Snap card swipe machines, as well as provide matching funds for Snap dollars spent on CSAs and at markets.
- The EQIP High tunnel program has been wonderful for me. We have increased our winter production because of it. However, the structure of EQIP funding needs to be changed. As it stands, farms get EQIP funding if there is an existing conservation concern, and are paid to correct it, paying farmers for bad behavior. The practices that cause these conservation concerns should be controlled through regulation and fines, and farmers who are practicing sustainable farming methods should be paid to continue doing things well.
- Regulations should always be scale appropriate
- Research conducted by farmers is always more useful to me as a beginning farmer than research done by extension agents, grad students, or professors. Please cut funding for academic agricultural research, and fund more on-farm research.
- Cap subsidy amounts on a per-farm basis and reinstate mandatory funding for 2501 under Title XIV (Miscellaneous) in order to support disadvantaged farmers and continue the standing fund for farm worker disaster relief.
- Shift funding away from ethanol and commodity production and towards sustainable agriculture and rural development research and training in Title VI (Rural Development) and Title X (Horticulture and Organic Agriculture).
- Although there has been a great deal of positive press regarding the shifts in Title I (Commodities) to reduce direct crop subsidy payments and shift towards crop insurance support, in reality, the tax payer resources will be directed to the same large-scale, conventional production, monocrop operations, that have harmful environmental and social consequences. With no conservation require-

ments within the new Revenue Insurance Scheme we fear production will be pushed onto marginalized land causing adverse affects on our natural resources.

Thanks,

KATIE, Scratch Farm,

City, State: Austin, TX
Occupation: Educator/Therapist
Comment: Michael T McCaul,

Cutting funding for the farm bill is a **Bad** idea! Our food supply in the country is Horrible and cutting funds will make it worst. If you give a damn about your kids, grandkids, their friends, and the future of our kids please WAKE up! Go rent the movie *Food Ink*. **I Dare You To See This Movie!** We originally were a country of wholesome farmers eating wholesome food from the land. Most of our health problems starts with the quality of food we eat. We are becoming a nation of obese, poor nourish, diabetic, cardiac citizen. **We Must Change This Now!** You are in the unique time and place to make a change in a bill that will impact the health of your family, cousins, kids, and gr and kids. **Hurry** you must act now. I am **Begging You.**

U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists. We need to increase funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture. Are you my superhero are you going to try to correct this terrible bill? Do you even give a damn?

Comment: While some may think Thomas Jefferson's agrarian ideal is a myth, I believe his understanding of the relationship between farming and democracy still holds true today. The small family farm is an ideal expression of democratic values, self-sufficiency, and productivity.
 The farm bill has done more to support Corporate Agriculture than it has done to support family farms and individuals. By catering to the desires of Big Ag lobbyists, the farm bill has lost both its integrity, and more importantly, its contract with the American people to provide safe, healthy alternatives to the destructive agricultural and food production practices of Corporate Agriculture. I fear that the House Committee will only 'listen' to lobbyists, leaving the needs of true working farmers off the table.
 How sad to see that Jefferson was right—where do we see democratic values being exhibited in Agriculture policy? Certainly not in the farm bill.
 Please, for the sake of this country, and those of us who don't have lobbyists to represent us (the majority), listen to ordinary Americans and create a farm bill for the people, not for Corporate Agriculture.
 Thank you for taking the time to read this.

Sincerely yours,

PAM MILLER,
 Main Street Farm.

Occupation: Small Business Owner

Comment: We are concerned about the forced use of proven poisons (GMO) in food and livestock production. We are also concerned that the committee has been corrupted by their past associations with Monsanto and the like. We are also concerned by the present weather manipulation (chemtrail) that we see almost daily and which has been admitted publicly.

COMMENT OF TAMRA MILLER

Date Submitted: Friday, May 18, 2012, 9:58 p.m.

City, State: San Diego, CA

Occupation: Singer Songwriter

Comment: It is my belief that access to organically grown meats and produce from small farms is the saving grace of our people and our planet. Please stop placing corporate greed and alliances over what is best for humankind and all the beautiful creatures we inhabit the Earth with. Large scale industrial monoculture is leaving our soil in ruin and is deriving us of nutrient dense food to nourish ourselves. Stop the madness!

COMMENT OF TARA MILLER

Date Submitted: Sunday, May 20, 2012, 9:50 a.m.

City, State: Lexington, VA

Occupation: Owner, Local Foods Retail Shop

Comment: Americans are (finally) waking up to the terrifying reality of our food system. It's time for Congress to do the same. It is not viable or sensible for our government to continue to support agribusinesses whose aim is to effectively own our (and the world's) food supply. We need a farm bill that will assist in the development of community-based food systems. Community systems (unlike our current agribusiness system) are transparent, safe and self-regulated (because the consumers know the producers). Community systems produce healthful, nutritious, unprocessed and very delicious foods. Agribusiness produces "food-like substances" that many Americans have, sadly, come to think of as "food". Agribusiness foods have spawned obesity and diabetes epidemics—look around and take notice of all the overweight kids in your district; then visit their schools and see what your government (thanks to you) is feeding them. Congress can change all of this in a heartbeat if you put the health and well-being of your constituents above the monetary support (direct and indirect) of agribusiness. It's time to step up to the plate!

COMMENT OF EHREN MILLER-NOGUEIRA

Date Submitted: Friday, May 18, 2012, 12:48 p.m.

City, State: E. Calais, VT

Occupation: Teacher

Comment: A couple of important points.

- (1) Require labeling of foods containing GMOs
- (2) Stop the spread of GMO cross-contamination
- (3) Support humane food practices and support small scale production instead of large scale.
- (4) Diversify crop production. Support only sustainable agriculture including fish farming.

If the government invests as much money in sustainable production as we do now in large corporate operations food we will all be in way better shape.

COMMENT OF SUSAN MILLER-STIGLER

Date Submitted: Friday, May 18, 2012, 10:13 a.m.

City, State: Cincinnati, OH

Occupation: Homemaker

Comment: I am very interested in family scale agriculture and supporting people not industry in farming. I am concerned about the health of my family and community and want access to high quality foods. I am saddened to see the disease our people are suffering as a direct result of the cheap junk they are eating and urge you to end subsidies for wheat, corn and soy, especially GMO varieties. Thank you.

COMMENT OF KARI MILLETE

Date Submitted: Friday, May 18, 2012, 12:55 p.m.

City, State: Sacramento, CA

Occupation: Personal Chef

Comment: As a chef and mother, I want the best possible ingredients I can find. I do not want my food supply to be decided by giant agri-corporations who only care about the bottom line. In this day and age of persistent mad cow, *Salmonella*, *Listeria*, etc. outbreaks, the right thing to do is to protect the small farmers and try to ensure the population's safety from massive outbreaks. Please do the right thing.

COMMENT OF PAT MILLIREN

Date Submitted: Friday, May 18, 2012, 6:16 p.m.

City, State: Port Angeles, WA

Occupation: Retired Park Ranger

Comment: I **Do** produce some of my own food. Partly because I love to work out of doors in direct relationship with the Earth and partly because I want organic, local produce. Our Farmers' Market is critical to me and our county. We **Must** provide support for small, organic and becoming-organic farmers to grow local food. It is part of our national security. Large agribusinesses do **Not** need Federal support, no matter what they tell you. They are ruining our land with their mono-cultures, GMO products, vast plantings and equipment that separate people from the land, and practices that do not work with wildlife and weather. We are losing our soil for the second time (can't we learn from our mistakes?), and we are losing our souls as we separate ourselves from the land.

I endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

I beg for full funding of conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

Our nation desperately needs implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), and we must maintain the EQIP Organic Initiative.

COMMENT OF HENRY MILLIS

Date Submitted: Saturday, May 19, 2012, 9:14 a.m.

City, State: Charleston, SC

Occupation: Long Shore

Comment: I know you people are religious, so do you not think your **God** made the Earth and its food perfect. Monsanto is not god and I do not like eating chemicals that **God** did not plan on us eating. The only thing we have on this Earth is '**Clean Food**' **Water** and **Air** but now you have let the corporations destroy the only pure thing left on this planet, and yes that includes your children and grand children and if you think they are immune to what you have let happen why don't you get them tested and see how many of these great toxins you can find in their bodies. **Stop The Madness** all the **Money** in the world can't save you or your families from this.

COMMENT OF ANDREA MILLS

Date Submitted: Friday, May 18, 2012, 8:00 p.m.

City, State: Websterville, VT

Occupation: Co-Op Sales Person

Comment: Please do not cut \$4 million from organic research funding. Please do not cut in half funding to support Beginning Farmers. Please support organics. Agribusiness like monoculture farming and antibiotic stuffed meats is killing the environment. We really have to change direction to support the environment so that it

can support us. No matter who is putting money in your pocket to have you vote otherwise if you do that will be wrong for everyone you represent. Please consider the consequences.

COMMENT OF BEVERLY MILLS

Date Submitted: Friday, May 18, 2012, 1:49 p.m.

City, State: San Francisco, CA

Occupation: Communications

Comment: Agricultural policy has contributed substantially to the obesity problem in America. We are going to be paying huge amounts of money in the future to deal with it so **Stop Subsidizing Sugar And Other Unhealthy Food Programs.**

COMMENT OF IGALIOUS MILLS

Date Submitted: Sunday, May 20, 2012, 10:24 p.m.

City, State: Port Arthur, TX

Occupation: Legislative Liaison/Farmer

Comment:

1. Why is there so much red tape just trying to get information from the State and Federal USDA agencies in a timely manner regarding the historical disparities of information, access to funding (public and commercial financial institutions) grants, research and development pilot projects, *etc.*

2. Will Members of the House Committee on Agriculture support an Interim Study for Historically Underrepresented farmers and Ranchers in the State of Texas? If not why not? The Texas Small Farmers and Ranchers/CBO has requested this study by the Texas House Speaker, but has not been considered.

3. Why has the House Committee on Agriculture refuse to hear from the Black farmers and ranchers in the State of Texas? Having one "Field Hearing" located in Lubbock, Texas in 2010 is "unacceptable" unless the intention was not to get diverse feedback in an open honest manner.

4. What agency or agencies are responsible for monitoring land grant colleges in the State of Texas? Funding disparities? Student agriculture graduation impact?

Closing Statement: It is our hope that this House Committee on Agriculture does not overlook the contributions Black farmers and ranchers has made and continue to make for a stronger country where we all should be treated equally and given the opportunity to fulfill the American Dream, one Nation Under God with Liberty and Justice for all.

God Bless the United States of America,
IGALIOUS MILLS, LEGISLATIVE LIASION,
Texas Small Farmers and Ranchers/CBO,
Port Arthur, Texas.

COMMENT OF KERRY MILLS

Date Submitted: Friday, May 18, 2012, 9:38 a.m.

City, State: Richmond, VA

Occupation: Art Historian

Comment: Please put an end to corporate food production! Support local and sustainable farming practices for safer and more healthy food and to save the environment from CO₂.

COMMENT OF MICHAEL MILLS

Date Submitted: Friday, May 18, 2012, 9:45 a.m.

City, State: San Francisco, CA

Occupation: Nonprofit Administrator

Comment: It is time to stop subsidizing sugar and corn which is causing people to eat unhealthy foods costing the country billions in unnecessary and preventable health care costs. Support organic, sustainable farming and stop supporting factory farms and pesticide laden agriculture. Farm workers and consumers continue to be hurt every day by the subsidization of unhealthy foods, pesticides, and companies that care only about profit and not the public health.

COMMENT OF SASKIA MILLS

Date Submitted: Friday, May 18, 2012, 11:41 a.m.

City, State: Davis, CA

Producer/Non-producer: Producer

Type: Field Crops, Specialty Crops

Size: Less than 50 acres

Comment: Please end subsidies to large corporate farms in America, in favor of support for small and new farmers. Please maintain programs to support better nutrition and environmental conversation in agriculture, and put caps on subsidies of crop insurance premiums. Please focus on what's good for the people of America, not the corporate agribusiness community.

COMMENT OF WANDA MILLS

Date Submitted: Monday, April 09, 2012, 3:22 p.m.

City, State: Austin, TX

Occupation: Retired Administrator

Comment: Committee Members: I am so concerned about the large number of children that each day go to bed and to school hungry. The situation with adults is dire too. Please make sure that adequate funding is provided to those agencies that attempt to address hungry. It is essential we feed especially our small children so they can learn and be of future benefit to society. Even one child going to bed with an empty stomach is **Too Many!** We are a compassionate nation and we should show it in ways that benefit our children. Please fund hunger programs.

COMMENT OF KARLA MILOSEVICH

Date Submitted: Friday, May 18, 2012, 1:39 p.m.

City, State: San Francisco, CA

Occupation: Artist

Comment: No more money for environmentally damaging crops such as GMO corn. Long term environmental health is in the best interest of everyone ultimately, way more important than short term financial gain. Just say no to Monsanto and yes to small family farms.

Thank you for all you do,

KARLA MILOSEVICH.

COMMENT OF PETER MINDE

Date Submitted: Friday, May 18, 2012, 3:08 p.m.

City, State: Dover, NJ

Comment: Farm policy should ban genetically modified organisms and irradiation of food. If you intend to allow these practices, food manufacturers should be legally compelled to inform consumers on the label. You should be supporting small farms and organic agriculture, NOT factory farms.

COMMENT OF MARILYN MINDER

Date Submitted: Friday, May 18, 2012, 1:35 p.m.

City, State: Charlotte, NC

Occupation: Retired

Comment: I am an organic vegetable gardener. I hope you don't realize too late that we are poisoning ourselves and our children with current farming practices. Many health conditions are related to the pesticide-laden foods we eat. Or do you eat organic veggies already for yourself and your family? Can you afford the best?

COMMENT OF MADELINE MIOTTO

Date Submitted: Friday, May 18, 2012, 12:25 p.m.

City, State: Southgate, MI

Occupation: Retired—American Airlines

Comment: A healthy nation would far benefit our future . . . not money hungry industrial agriculture lobbyists. Consider what's best for the nations people as a whole.

COMMENT OF TESS MIRABAL

Date Submitted: Thursday, April 12, 2012, 4:54 p.m.

City, State: Albuquerque, NM

Occupation: Director of Resident Services, YES Housing, Inc. Nonprofit Organization

Comment: Please increase funding to the farm bill. These funds help us to provide food through partnership with our local food bank to the residents of the affordable housing communities we develop and rehab across the state of New Mexico. Several counties still go without services due to lack of funding. Very low income elderly, disabled and families with children are having to make tough choices between food on the table or shelter, meds, utilities, *etc.*

COMMENT OF RICH MIRES

Date Submitted: Friday, May 18, 2012, 3:58 p.m.

City, State: Prineville, OR

Occupation: Local School Board Member (Retired)

Comment: We need to insure that small farms and organic farms are protected. It is important that a safe, nutritious and edible food supply is made available to our schools—let alone all other citizens. Corporate America has too much freedom to give us whatever they want and expect us to eat it.

COMMENT OF TERESA MITCHEL

Date Submitted: Saturday, May 19, 2012, 6:46 p.m.

City, State: Ashland, OR

Occupation: Public Health Educator around Food

Comment: I am extremely disappointed at the continuance of policies that support an unsustainable food system, while disregarding and under-supporting those methods that sustain healthy people and a healthy environment. Healthy small family farms are a vital and necessary commodity in our world, and need additional resources and favorable policy decisions directed towards making these entities strong.

COMMENT OF ALEXANDER MITCHELL

Date Submitted: Friday, May 18, 2012, 10:31 a.m.

City, State: Napa, CA

Occupation: Machinist

Comment: Please implement policy that promotes small local agriculture, and limits the use of fossil based fertilizers. We need to steer away from huge monocultures and give the helping hand to forms of agriculture and food that work towards a more diverse and natural product.

COMMENT OF BRENT MITCHELL

Date Submitted: Friday, May 18, 2012, 1:41 p.m.

City, State: Carlsbad, CA

Occupation: Real Estate Developer

Comment: Please label GMO crops, purge government incest with Monsanto. Decrease the use of harmful pesticides/fertilizers to protect our lives and water supplies. Stop giving subsidies to large profitable agribusiness.
Please!

COMMENT OF CLINT MITCHELL

Date Submitted: Friday, May 18, 2012, 1:57 p.m.

City, State: Fort Collins, CO

Occupation: Trail Maintenance Crew Member

Comment: The support of organic agriculture could stimulate economic growth by giving farmers the opportunity to enter niche organic markets that could not be attainable without Federal support.

COMMENT OF EDWARD MITCHELL

Date Submitted: Friday, May 18, 2012, 12:23 p.m.

City, State: Barnesville, GA

Producer/Non-producer: Producer

Type: Livestock
Size: 1,000+ acres

Comment: Please for the love of all that America pretends to stand for, break ranks from your corporate sponsors, vote against this fascist agenda, vote in favor of local communities, economies and support the plight of small farmers.

COMMENT OF JOAN MITCHELL

Date Submitted: Friday, May 18, 2012, 12:35 p.m.
City, State: Bushkill, PA
Occupation: Pastor

Comment: How our food is grown is vital to the health and welfare of all our citizens. Huge "factory" farms pay less attention to quality than to profits, whereas supporting the family farms will tend to produce the best quality for all, as well as assuring a living to ordinary people. I urge you to vote in a direction that supports working families and healthy crops for all.

COMMENT OF JOHN MITCHELL

Date Submitted: Friday, May 18, 2012, 9:00 p.m.
City, State: Somerset, CA
Producer/Non-producer: Producer
Type: Vegetables
Size: Less than 50 acres

Comment: I am a small organic specialty vegetable farmer it is critical that the American people have a voice in the manner in which their food is grown and processed before it is consumed. At this time those decisions are being made by agribusiness concerns whose primary interest is money, and care little or nothing about the quality, or health value of their crops.

COMMENT OF ROBIN MITCHELL

Date Submitted: Friday, May 18, 2012, 7:07 p.m.
City, State: El Cerrito, CA
Occupation: Building Energy Efficiency Research

Comment: Fully fund the Organic Research and Extension Initiative (OREI) at the 2008 level.

I hope that the farm bill will strongly support organic farmer and farming, as well as conservation measures. I obtain 99.9% of all my food from the local organic farmers' market or the local natural grocery store, which buys from local and non-local organic farmers. It is vital for the health of the ecosystem and our continued existence as a species that we wean ourselves off herbicides, pesticides, and fossil fuel based fertilizers, all of which organic farmers do.

I encourage you to:

- Endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Support all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintain EQIP Organic Initiative and do NOT cut the Conservation Stewardship Program.

COMMENT OF EILEEN MITRO

Date Submitted: Sunday, May 20, 2012, 11:51 a.m.
City, State: Ukiah, CA
Occupation: Retired Educator

Comment: Too much support is given to agribusiness putting out toxic fertilizers and pesticides to grow genetically modified plants. Too little support goes to small farmers growing responsibly clean food using fertilizers and pest control methods that work and do not poison our environment. It's an easy switch to a healthier farm bill. Will the money with which Big Agriculture peppers Congress work yet again to subsidize them?

COMMENT OF ALISON MITTELBERGER

Date Submitted: Wednesday, May 02, 2012, 10:49 a.m.
City, State: Oakland, CA
Occupation: Student
Comment: Dear Representatives,

I want to write to you to voice a priority that I believe the 2012 Farm Bill must emphasize. As a young person with an interest in sustainable agriculture, I think there should be big emphasis on adequate support of new and coming farmers who want to begin their own farms. In theory, the farm bill provides funding for new farmers, but in practice, it should support new farmers by allowing for there to be training and network support systems as well as funding to make it possible for new farmers to survive. I hope that the real effects of the policies that this bill puts in place are kept in mind before it is passed.

Sincerely,

ALI MITTELBERGER.

COMMENT OF MIKE MITTENBERG

Date Submitted: Friday, May 18, 2012, 11:55 a.m.

City, State: Astoria, NY

Occupation: Unemployed

Comment:

- no subsidies for ethanol
- label all GMO's
- no subsidies for genetic engineering
- more money for organic farming
- no subsidies for anything ever

COMMENT OF RAYMOND MLYNCZAK

Date Submitted: Friday, May 18, 2012, 12:38 p.m.

City, State: Horsham, PA

Comment: I would like a fair bill that serves the interests of organic farms and farm workers. This bill would not favor farms that used GMO's. The people don't want to wait 50 years, like we did with tobacco, to learn that GMO's are a hazard to our health. By that time there will be no turning back, because due to the reproductive cycle in Nature, pollination will have modified all our natural crops.

There is a body of information currently, even though suppressed or ignored, to show the dangers of GMO's to human health, animal health and Nature in general to restrict the use of GMO's. The EU and other countries already recognize this and have taken actions to protect the food supply for all creatures.

You have the power to change things. Do not act like straw men (T.S. Elliot) and sell us all out. Real farmers producing real food need you now.

COMMENT OF ANTHONY MOATON

Date Submitted: Thursday, May 10, 2012, 10:44 p.m.

City, State: Oak Park, IL

Occupation: Student

Comment: Being someone who formerly had to rely on a SNAP account, and has now found themselves in the position to have to use it again, I pray that SNAP doesn't get cut. Not just for me and my family, but for the many others who need it to survive.

COMMENT OF VALEREI MOE

Date Submitted: Friday, May 18, 2012, 3:33 p.m.

City, State: Palm Desert, CA

Comment: Please support Organic Farmers and put Monsanto and other GMO /GE companies through tougher regulations to keep them from further damaging the U.S. Agriculture, Organic Farmers, U.S. Waters and overall environment.

Thank you!

COMMENT OF DOUG MOELLERING, PH.D.

Date Submitted: Friday, May 18, 2012, 2:44 p.m.

City, State: Birmingham, AL

Occupation: Research Scientist/Instructor Nutrition Sciences

Comment: Dear Congress,

Please value our health and our children's and their children's children's health and well being and please seriously consider protecting our organic, sustainable agriculture and beginning farmers instead of insurance companies and large agri-

business operations which have been shown to produce less nutritional products and perform risky & harmful farming practices. I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). I also support fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to and held accountable for compliance with conservation programs. I support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236) and maintaining the EQIP Organic Initiative.

Please look beyond the lobbying, campaign support promises, money, political maneuvering, or whatever may prevent you from objectively looking at what is best for us the consumers, the people, the masses, and protect our farmers who are growing organic foods or beginning farmers who could increase locally available fruits and vegetables!

As a nutritional research scientist highly motivated and involved in counteracting our diabetes and obesity epidemic, I beg you to endorse protection for our farmers and strict compliance with conservation programs since we are likely victim to their demise already.

Thank you for your time and considerations,

DOUG MOELLERING, PH.D.

COMMENT OF ALEX MOHBACHER

Date Submitted: Friday, May 18, 2012, 12:31 a.m.

City, State: Esko, MN

Producer/Non-producer: Producer

Type: Vegetables

Size: 50–150 acres

Comment: Dear Congress,

I would like to send you my support for organic agriculture in the upcoming farm bill. Programs like the OREI and EQIP are vital to our operation and food system. Not only do these help organic farmers, but I know many conventional farmers find use in these results as well and incorporate certain systems born out of the organic field. Thanks for thinking of us there!

Sincerely,

ALEX MOHRBACHER.

COMMENT OF ANTHONY MOHEN

Date Submitted: Friday, May 18, 2012, 5:22 p.m.

City, State: Brooklyn, NY

Occupation: Legal/Nonprofit

Comment: We must focus our agricultural policy on supporting local and family-owned farms, promoting the consumption of healthy food by communities, protecting land for farming (and preventing over-development and sprawl encroaching on farmland), and empowering consumers to choose what they eat by creating labeling of genetically modified food and food grown using chemical fertilizers.

COMMENT OF KATHLEEN MOLATCH

Date Submitted: Friday, May 18, 2012, 7:29 p.m.

City, State: Eastbrook, ME

Comment: Let's get our priorities straight in this country. It is **Not** big agribusiness that we need to be supporting. They're already making profits off the citizens of this country without regard for quality of produce unless the government forces regulations on them. The small and local farmers who grow organically provide top quality produce without the need for chemical pesticides or genetically-engineered crops. They are in business for themselves . . . remember when most businesses were family-run and provided not only quality goods but local employment, not to mention a person with whom you could interact who wasn't based in a foreign country by telephone? Please get it right with this bill. Thank you.

COMMENT OF SALLY MOLE

Date Submitted: Sunday, May 20, 2012, 5:02 p.m.

City, State: Arlington, VT

Occupation: Small Farm Consultant

Comment: Our small diversified farms and locally grown foods movement is growing by leaps and bounds. This sector of our agricultural system should be en-

couraged and supported in our farm bill. It is healthful, efficient, conserves our farmland and supports our communities.

COMMENT OF PETER G. MOLLER

Date Submitted: Sunday, May 20, 2012, 9:28 p.m.

City, State: Traverse City, MI

Occupation: Retired Professor

Comment: Dear Members of House Committee on Agriculture:

I am concerned that the food system in our country appears to be broken, both from the consumer and producer ends of the spectrum. We live in a country where quality food, especially fruits and vegetables, referred to as specialty crops, has become economically out of reach for a growing segment of our population, and consequently the health of our nation. As you consider what needs to be cut in the 2012 Farm Bill, I urge you to not let the growing poor pay for these deficit reduction measures. The Food Stamp program has overall been a success and should not be reduced in size.

I urge you to consider the interests of the small and independent farmer, who over the last few decades has not been able to compete with large agribusiness. The large farmer has been receiving Federal subsidies for commodity crops, such as corn, soy beans, rice, cotton, and wheat, while the small producer is increasingly going out of business.

Market manipulation, monopoly control over seeds, and enforcement of anti-trust laws are all issues that need to be addressed to increase competition in the food production sector of our economy. The plight of the small farmer can also be alleviated by continuing to fully fund the Conservation Reserve Program.

It is the health of our country that is at risk, and thus our national security. The profits of a small number of large corporations should not get in the way of the well being of our nation.

Thank you for your consideration.

Sincerely,

PETER G. MOLLER.

COMMENT OF RENEE MOLLER

Date Submitted: Friday, May 18, 2012, 5:10 p.m.

City, State: Vancouver, WA

Occupation: Disabled

Comment: I am discovering, daily, that the illness I have that has placed me on disability and which Drs and Big Pharma can't "fix," nor find a cause of, can **Not** be taken care of by more and more drugs (which Big Pharma wants to shove down my throat), nor more testing (which is all the traditional medical community can offer); however, if I eat strictly organic (as well as weeding a few other dietary foods from my system), non-processed foods, I am slowly getting better. Without food labeling, better access to these foods, and an understanding that whole, healthy, pesticide-, hormone- and GMO-free food, if that is what one wishes to put in one's body, is as important as safe water and air, and should be just as vital.

COMMENT OF KATHY MOLONEY

Date Submitted: Saturday, May 19, 2012, 7:44 a.m.

City, State: Grosse Pointe, MI

Occupation: Health Educator

Comment: I strongly urge you to provide our country with a reformed farm bill that stops providing massive subsidies to corporate farmers, and instead supports smaller local farms (H.R. 3286) true care and conservation of soil and land; support for new farmers (H.R. 3236) and assistance to organic farming. As all of you know, the farm bill has great importance to what our Food System will be in our country and the food we all will eat. You are accountable.

COMMENT OF KELLY MOLTZEN

Date Submitted: Saturday, May 19, 2012, 3:48 a.m.

City, State: Bronx, NY

Occupation: Public Health Professional/Registered Dietitian

Comment: As the Committee considers the 2012 Food and Farm Bill, I urge you to:

Preserve and expand funding for the Healthy Food Provisions Package which includes policies and programs supporting public health. These programs, which successfully help improve access to healthy food for low-income communities, include:

- Senior Farmers' Market Nutrition Program
- Fresh Fruit and Vegetable Program
- Farmers' Market Electronic Benefits Transfer Program
- Healthy Urban Food Enterprise Development
- Community Food Projects
- SNAP Nutrition Education Program (SNAP-Ed)
- Also, the WIC Farmer's Market Nutrition Program—which promotes nutrition while successfully creating a customer base for farmers at farmer's markets—belongs under the farm bill instead of under Child Nutrition Reauthorization;
- Next, provide an even “plowing” field by fully funding programs supporting beginning and socially disadvantaged farmers and ranchers, organic farming, regional farming and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Fourth, end direct payments and countercyclical commodity programs, replacing them with loophole-free agriculture risk coverage and implement a cap on crop insurance premium subsidies. We must support farmers that really need the help, not the biggest farms that don't;
- And last, eliminate the Environmental Quality Incentives Program (EQIP) livestock set-aside to limit funds granted to concentrated animal feeding operations (CAFOs) for waste management infrastructure and protect the Conservation Stewardship Program (CSP) from disproportionate cuts and improve it by ranking applications solely on their conservation benefits. We must ensure that limited conservation funding maximizes lasting environmental benefits.

Thank you.

COMMENT OF SHANNON MONDOR

Date Submitted: Saturday, May 19, 2012, 1:28 p.m.

City, State: Arcata, CA

Occupation: College Writing Teacher

Comment: Please be aware that I propose the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

I encourage fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

I desire the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

I also support maintaining the EQIP Organic Initiative.

The country needs to focus more energy, money, and support on local and sustainable farming so that we achieve true food security. Industrialized food production is not healthy for the people, the animals, or the planet upon which we depend for our continued sustenance. We are seeing the dramatic negative health impact across the spectrum, a serious and violent cost of allotting public money to subsidize the wrong kinds of farming and growing practices. We need a new Victory Garden campaign for the new century, so that people are once again connected to the source and sustenance of their food systems, can identify and nurture actual foods of their own, and are free from dependence on the industrial food machine that only has profits rather than health in the forefront of its decisions and actions. GMOs **Must** be labeled, if not banned outright. Please do keep your minds on the sanctity of the American rights to true freedom to choose and be informed.

COMMENT OF CAROL MONE

Date Submitted: Friday, May 18, 2012, 7:50 p.m.

City, State: Trinidad, CA

Occupation: Educator

Comment: Factory farms should be regulated as industry, not agriculture. Farms should be defined as agriculture—producing crops or animals on **Land**. We need to end subsidies and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies. We need to fully fund programs that support beginning farmers and ranchers, organic farmers, and rural development. We need more farmers more sustainable food production, and more economic opportunity in our food system!

COMMENT OF BARBARA MONEY

Date Submitted: Friday, May 18, 2012, 4:52 p.m.

City, State: Foster, RI

Occupation: Self-Employed

Comment: The farm bill needs to take into consideration the wishes of the American people for sustainable food production and cut back the subsidies to Big Ag corporations. Organic farming needs to be encouraged if we are ever to restore our soils. We need to make it easier for new farmers and family farms to make a living without tons of bureaucratic red tape. I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF ANN MONGOVEN

Date Submitted: Thursday, May 17, 2012, 4:26 p.m.

City, State: Saint Paul, MN

Occupation: Self-Employed

Comment: I believe the 2012 Farm Bill must work for the health and safety of all. Support must be given to re-structure the ag system to all more local and organic production.

COMMENT OF KIM MONJOY

Date Submitted: Sunday, May 20, 2012, 9:39 p.m.

City, State: New York, NY

Occupation: Admin. Manager

Comment: This is my most important issue. I need to know what I'm eating (label it) Is it safe not fake no genetically modified food. Allow small farmers the chance to use real seed and survive.

COMMENT OF GLORIA MONROE

Date Submitted: Friday, April 27, 2012, 7:36 p.m.

City, State: Paris, TN

Occupation: Retired

Comment: I am all in favor of families being able to have food everyday! I would like to see certain items excluded from the food stamp program, sodas, cookies, chips, sugary cereals, toaster pastries, doughnuts *etc.* basically the items that offer very little if any nutritional value! I have witnessed many times people using an EBT card in front of me in the store and the majority of their purchase is the above mentioned items! I have even seen a store decorated cake being bought with an EBT card at the cost of \$32.00! How in the world is this justified? The money being used for these items are preventing the family from having a balanced nutritional diet in my opinion! Thank you for allowing me to express my opinion!

COMMENT OF RICHARD MONROE

Date Submitted: Thursday, May 10, 2012, 10:05 a.m.

City, State: Rochester Hills, MI

Occupation: Retired Senior Citizen

Comment: The farm bill must be structured in a way which protects seniors and children from hunger. We must strive to get our priorities in order—eliminating hunger trumps making a new Star Wars Defense System on the East Coast.

COMMENT OF ARIEL MONSERRAT

Date Submitted: Friday, May 18, 2012, 12:29 p.m.

City, State: Sneedville, TN

Occupation: Retired

Comment: No chemicals or pesticides, organic is always best as it has more nutrients and doesn't harm any wildlife *i.e.*, bees, *etc.* Quit harassing small farmers.

I'm for whatever helps to support our farmers in producing healthy food. The man I buy hay from had the USDA come to his house basically to harass him. **This Has To Stop!** Raw milk is highly important to our health and must be made available to all.

COMMENT OF RUTH MONSON

Date Submitted: Friday, May 18, 2012, 6:48 p.m.

City, State: Louisville, KY

Occupation: Social Work

Comment: Please mandate that all GMOs must be labeled! Americans have the right to know what we are eating. We have the right to decide what goes in our bodies. Huge agricultural corporations have had way too much power in deciding what we eat and the lack of healthy, quality food has contributed to our obesity epidemic and many other health problems. Also, organic farming needs as much support as possible. Please put the health of our nation before the interest of corporate America. Thank you.

COMMENT OF JULIANNE MONTANO

Date Submitted: Sunday, May 20, 2012, 7:17 p.m.

City, State: Tucson, AZ

Occupation: Health Advisor

Comment: As a Health Advisor for a Corporate Wellness company, I have the opportunity to speak with thousands of citizens across the country. These citizens range in age from 20–65 years old, some of them are in decent health, but most are unhealthy—with either obesity and poor eating habits, or a chronic illness or disease. It is critical for our government to stop turning a blind eye to what is happening with the agriculture system and corporations like Monsanto who negligently continue to create products that harm human health. If you sit in a position of power where your vote counts towards the ability to create change and improve the health of our citizens, you are obligated to wake-up and vote with integrity for choices that will help people thrive. Stop turning a blind eye to what is happening with Farming.

COMMENT OF LISA MONTANUS

Date Submitted: Sunday, May 20, 2012, 10:41 a.m.

City, State: Woodstock, NY

Occupation: Educator

Comment: Please support all provisions, acts and initiatives that support local, organic agriculture and the farmers that grow this food.

SUBMITTED STATEMENT BY DARRIN MONTEIRO, DIRECTOR OF MEMBER RELATIONS,
CALIFORNIA DAIRIES, INC.

Congressman Costa, Congressman Cardoza (and other members of the Listening Panel):

Good morning. My name is Darrin Monteiro and I hold the position of Director of Member Relations for California Dairies, Inc. ("California Dairies"), whom I am representing here today. California Dairies is a full-service milk processing cooperative owned by approximately 420 producer-members located throughout the State of California. Our producer-members collectively produce over 17 billion pounds of milk per year, or 43% of the milk supply in California. Our producer-members have also invested over \$500 million in large processing plants at six locations. My presentation is consistent with the direction on national dairy policy approved by the California Dairies' Board of Directors.

We appreciate your willingness to hold this listening session to gather information from a wide variety of companies that collectively represent California agriculture and hope to leave you with a sense of the topics that resonate strongly with our producer-members.

Position on Recent Announcements for National Dairy Policy Changes

In 2011, Congressmen Peterson and Simpson introduced legislation that placed National Milk Producers Federation's "Foundation for the Future" proposal into a legislative format. While the California Dairies Board of Directors have not taken a formal position on H.R. 3062, *The Dairy Security Act of 2011* (DSA), the Board did approve a position statement on Congressman Peterson's "Discussion Draft", which *largely opposes* the elements contained in the document. While the DSA cor-

rects some of the flaws from Congressman's Peterson's "Discussion Draft", it still contains provisions that would negatively impact California Dairies by imposing restrictions on its business model. Other provisions have the potential of treating the producer-members of California Dairies disproportionately worse than other dairy producers in the U.S.

Four Main Points on National Dairy Policy:

1. California Dairies is supportive of margin insurance as a stand-alone program. The dairy title of the next farm bill should include risk management tools. Dairy producers have been working toward developing some proficiency with hedging and forward contracting in milk and feed markets, both of which are characterized by extreme price volatility. In recent times, the discussion of traditional risk management has changed to discussions on "margin management" and "margin insurance". We applaud those in Congress who have taken the time to conceive alternative programs for dairy producer margin insurance. There are two aspects embedded in some of the proposed margin insurance programs that need further refinement or modification. First, the trigger mechanism for margin insurance is a milk price-to-feed cost calculation that uses national data. However, every region of the U.S. will have its own "implied margin", depending on prevailing milk prices and feed costs. With California being an area with relatively low milk prices and relatively high feed costs, there is a very good chance that the national calculation will not be activated timely enough to be helpful for California dairy producers. Second, recent proposals have offered a two-tiered premium schedule to purchase supplemental margin insurance. Basically, the lower cost premium schedule applies to the milk produced by a dairy's first 150 cows. Thus, a small dairy can expect to pay considerably less in margin insurance premiums than a large dairy under any comparable circumstances. Both of these faults should be corrected to remove the biases against large dairy farms and against dairy farms that are located in high feed cost areas.

2. We continue to support the elimination of export subsidies and correction of inequities in market access and domestic support. In the past few years, the U.S. dairy industry has been shown quite clearly how important international trade has become. Export sales have grown to represent 12% to 15% of U.S. product sales, and we must continue to grow that aspect of the U.S. dairy industry.

3. California Dairies supports the elimination of the MILC program and diverting those funds to support alternative dairy programs. During the formulation of the 2002 Farm Bill, Congress enacted the Milk Income Loss Contract (MILC), which makes direct payments to dairy producers when milk prices fall below specified levels. The 2008 Farm Bill modified the MILC slightly but not enough to change the fact that it benefits smaller dairy producers disproportionately more than larger producers. Again, biases against large dairies need to be removed.

4. Federal policies that favor fuel over food must be changed. The basic theme for dairy producers since 2009 has been one of survivability. The largest influence in recent times has been the skyrocketing cost of feed. In the last 2 years, the California dairy industry found out what happens when unanticipated influences and subtle shifts in national policy come to pass—the focus on ethanol as a fuel alternative, a weak dollar and high demand for grains from other countries. California dairying relies heavily on what used to be inexpensive feeds that were shipped in from the Midwest, and there are few tools or strategies readily available to protect dairy producers from higher costs of feed, which represents almost 60% of the cost of producing milk in California.

The national policy favoring fuel over food, particularly the Renewable Fuel Standard, must be changed. Whether or not the farm bill is the appropriate place to tackle such a weighty issue may be debatable. However, with feed costs being the most challenging aspect affecting California dairy producer viability, we must make the arguments against the Federal ethanol program whenever and wherever we can.

In the interest of time, I will just briefly mention that we would support the availability of low interest loans and tax-deferred savings accounts for dairy producers and the reauthorization of the Environmental Quality Incentives Program, which provides technical assistance and financial cost-sharing in exchange for implementing conservation practices on agricultural lands.

Thank you for allowing me the opportunity to share these thoughts with you today.

COMMENT OF CHRIS ELLEN MONTGOMERY

Date Submitted: Saturday, May 19, 2012, 9:29 p.m.

City, State: San Francisco, CA

Occupation: Gardener

Comment: I'm very concerned about the health of our soil, as well as the importance of being good stewards of the land. This is best done with a combo of organic & conventional methods with an emphasis on IMP **Not** GMO. GMOs are wreaking havoc on life itself . . . They are **Not** any part of the answer . . .
More money for conventional to organic farm conversions . . .

COMMENT OF DEBORAH MONTGOMERY

Date Submitted: Wednesday, May 16, 2012, 11:05 a.m.

City, State: Champaign, IL

Comment: Please preserve funding for the Food for Peace Development at the current level. Please oppose cuts to SNAP, CSFP and TEFAP. Maintain funding for the Value-Added-Producer grants.

COMMENT OF EDITH MONTGOMERY

Date Submitted: Friday, May 18, 2012, 5:27 p.m.

City, State: Ashland, OR

Occupation: Retired

Comment: I want to eat healthy food not contaminated with pesticides and chemicals. Small farmers work hard to raise healthy food. They need to be supported. Big Ag makes enough money. It doesn't need more subsidies. Cutting money for Food Stamps and other food delivery programs is just plain wrong. Please write and pass a farm bill that benefits the people, not Big Ag corporations.

COMMENT OF LANELLE MONTGOMERY

Date Submitted: Friday, May 18, 2012, 6:43 p.m.

City, State: Austin, TX

Comment: Please listen to the small farmers. We deserve to have "real", unadulterated, nutritious food. There are undoubtedly many items which need to be cut, but not funding for nutrition, for supporting organic farmers and for other programs which assure high qualified, non-genetically modified foods. It doesn't matter how much money, status, big houses, *etc.* that one owns, if we are unable to get good nutritious food, we are killing ourselves and our children.

COMMENT OF LYNN MONTGOMERY

Date Submitted: Friday, May 18, 2012, 4:19 p.m.

City, State: Placitas, NM

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: I am a small organic market farmer and am a supervisor on our local soil and water conservation district. (a volunteer position) It seems that big money, in the form of big corporations and their ability to buy undue influence makes me something very expendable and worthless in your eyes. I am an American. I pay taxes. I work hard to grow good, wholesome food for my fellow Americans. Your actions have been more than grossly unfair and destructive to honest citizens like myself. Hopefully, you will tap into your basic sense of fairness and give us our fair share, and stop making it impossible for us to exist.

COMMENT OF PATTI MONTGOMERY

Date Submitted: Friday, May 18, 2012, 3:08 p.m.

City, State: Fort Bragg, CA

Occupation: Retired Bodyworker

Comment: My father was a produce broker, and I worked in his office, so am somewhat familiar with the commercial food production business. As a bodyworker, a significant portion of my training involved nutrition, and I have continued this research to the present day. I can tell you this—today's food, grown by Big Ag, chemically fertilized, genetically altered, and processed beyond recognition, is not only devoid of all nutrition, but a monumental health hazard, all by itself. I have not consumed it for decades, opting for organic (and local, when possible) instead.

And guess what? I'm not plagued with any of the "diseases" typically suffered by my contemporaries. I would encourage you all to support organic agriculture with the strictest standards, to ban GMOs from our crops, stop with the chemical fertilizers. Chemical fertilizers have killed our soil, leaving our crops devoid of nutrition, since the end of WWII. I could go on and on.

COMMENT OF JANE MOODIE

Date Submitted: Friday, May 18, 2012, 5:33 p.m.

City, State: Eugene, OR

Producer/Non-producer: Producer

Type: Bioenergy, Dairy, Forestry, Greenhouse/nursery, Livestock, Poultry/poultry products, Specialty Crops

Size: Less than 50 acres

Comment: Small farms have started feeling like targets, with so many efforts being made to hamstring them, restrict them, starve them, even criminalize them. "Organic" is assigned a woo-woo status, while big bucks are thrown at the guys spreading Roundup, and now 2-4-D, on our soil, in our water, and in our food. Our priorities have been seriously misplaced and profoundly harmful. People have less access to safe, nourishing food than ever before, and the occurrence of disease gets more and more common every year. This is exactly the opposite of what should be happening. Subsidies to industrial agriculture need to be stopped. They provide nothing helpful any more, except to those getting their pockets lined. Incentive monies need to be placed where they will provide benefit for consumers, in the form of fresh, clean, safe, health-promoting foods, and modest incomes for many small farmers.

COMMENT OF ALLEN MOODY

Date Submitted: Friday, May 11, 2012, 11:24 a.m.

City, State: Viroqua, WI

Occupation: Organic Inspector

Comment: Please fund the following programs at the highest level possible:

- National Organic Program
- Organic Agriculture Research and Extension Initiative
- Beginning Farmer and Rancher Development Program
- Conservation Stewardship Program
- Value-Added Producer Grants Program

Please provide focus on HEALTHY food for our children in schools. Make It Illegal To Sell Junk Food In Our Schools!

It's about time to get the words *Family Farm* in the Food Security Act. Every **Family Farm** is a **Business** that pays taxes to its local community. The **Profits Stay In The Community. Family Farms Are As American As Apple Pie.**

Support programs that allow farmers to **Raise Their Own Fuel!**
Get It?!

COMMENT OF NATHAN MOOMAW

Date Submitted: Friday, May 18, 2012, 8:13 p.m.

City, State: Portland, OR

Producer/Non-producer: Producer

Type: Livestock

Size: Less than 50 acres

Comment: Please fully fund programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system. As a 32 year old trying to get my own pasture-raised livestock ranch started, I feel like the deck is stacked against me in a number of ways. Financing is a really big hurdle for people like me who are trying to start from scratch. New farmers, especially those attempting to serve non-commodity markets, need easier access to small amounts of capital. I have heard of many young farmers who have been unable to receive loans from the FSA because the FSA is oriented primarily towards helping large farms that produce commodity crops. We need more new direct-to-customer, small-scale, humane, and environmentally-friendly farms, and the government should be actively supporting these types of start-ups.

Please support family farmers that actually need help, not the biggest farms that don't: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies. Subsidies have evolved into something that no longer provides the right incentives for agriculture in this country and have created a situation that isn't good for farmers, nor for consumers. We should be providing incentives for farmers to be more environmentally responsible.

Please ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits. Making agriculture more environmentally-friendly should be one of our primary methods of protecting this country's ecosystem services and natural resources.

COMMENT OF ELIZABETH MOONEY

Date Submitted: Sunday, May 20, 2012, 5:29 p.m.

City, State: Forest Hills, NY

Occupation: Housewife

Comment: As a taxpayer and food consumer, I would like the limited amount of Federal agriculture dollars available to be used wisely. First and foremost, we don't need to subsidize wealthy, conglomerate agribusinesses. They are doing just fine. We need to help and promote smaller farmers and to promote farmland conservation and farmland stewardship.

COMMENT OF LEN MOONEY

Date Submitted: Friday, May 18, 2012, 3:04 p.m.

City, State: Bangor, PA

Occupation: Musician

Comment: My wife is an organic farmer so I know firsthand the importance of good healthy food. Being aware of where my food comes from and how it's grown is critical. With the influx of GMO products being slipped in to our food supply without labeling and our knowledge I believe is criminal. My question for corporations like Monsanto and Dow if GMO products are so good for us why not label them and let the consumer decide.

COMMENT OF ALISSA MOORE

Date Submitted: Sunday, May 20, 2012, 10:22 p.m.

City, State: West Bend, WI

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. My name is Alissa Moore, I am 31 years old and this will be my 6th farming season. I currently manage a nonprofit farm in Southeastern Wisconsin. I chose to manage this farm instead of attempting to start my own farming business, because of the very high price of land, and the large amount of capital needed to start a small scale (or any scale) farming operation. With all of the handouts the U.S. government provides to commodity farmers in the farm bill, I believe it's only fair that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.

- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

ALISSA MOORE.

COMMENT OF BRIAN MOORE

Date Submitted: Friday, May 18, 2012, 12:29 p.m.

City, State: New Hampton, IA

Occupation: County Conservation Board Director

Comment: In these days of high crop values, we need to consider conservation programs more than ever. Do not decrease the value of what will encourage farmers to enter into conservation programs. I am not sure I agree with all the subsidies farmers get, but if that is what it takes to keep them interested in conservation programs, then let's do it.

COMMENT OF CARRIE MOORE

Date Submitted: Friday, May 18, 2012, 3:36 p.m.

City, State: Littleton, CO

Occupation: Stay-at-Home Mom

Comment: Decisions that are made now will affect our food supply for many years to come. As an educated consumer I would like to see the government support more small family owned farms.

COMMENT OF EMILIE MOORE

Date Submitted: Saturday, May 19, 2012, 12:01 a.m.

City, State: Austin, TX

Occupation: Scientist

Comment: I would like to see subsidies directed toward practices that are both environmentally sustainable and promote good health—fruit and vegetables instead of meat, and organic/sustainable production instead of large-scale commercial agriculture.

COMMENT OF EMILY MOORE

Date Submitted: Wednesday, May 02, 2012, 10:41 a.m.

City, State: San Francisco, CA

Occupation: Student

Comment: Hello,

Below are some priorities that I would like to see included in the farm bill:

- encourage environmental sustainability by increasing funding for conservation programs that help farmers manage soil and water resources.
- disincentivize environmentally harmful farming practices. Changes in agriculture practices are a cost-effective and straight-forward way to improve water quality.
- increase funding for new farmers through the Beginning Farmer and Rancher Development Program. Five times as many American farmers are over 65 years of age than are under 35 years of age. We need more money to encourage young stewardship of the land.
- increase funding for the Farmers' Market and Local Food Production Program

- increase subsidies for “specialty crops” like fruits and vegetables.
- Thank you!

COMMENT OF LAUREN MOORE

Date Submitted: Friday, May 18, 2012, 12:59 p.m.

City, State: Greenwood, IN

Occupation: Material Handler

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

The more I have researched, the more I see that the government’s agenda is to cut funding from the poor to fill the pockets of the rich. Put an end to the selfishness. Put an end to the unhealthy food practices. Start taking the steps to positively impact our local farmers and the everyday consumers in this country. We can make a change, but it starts with our health. Keep this country healthy by allowing us full access to organic food and ridding us of these big business agendas. Please put the people first. Thank You.

COMMENT OF LESLIE MOORE

Date Submitted: Saturday, May 19, 2012, 11:44 p.m.

City, State: Shoshone, ID

Occupation: Nurse and Gardener, Former Goat Keeper

Comment: Organic soils perform much better in drought and flood conditions because there is a complex food web in natural soil. So organic soil is the best crop insurance, does this make sense? Please start to care about the health of soil and our children—there is an epidemic of autism and it needs to get figured out, start testing for levels of pesticides in the population even if pesticide makers don’t want it. Be for the people, not just for business as usual, please I beg you, do you want to have autistic relatives?

COMMENT OF LORRAINE MOORE

Date Submitted: Saturday, May 19, 2012, 1:26 p.m.

City, State: San Antonio, TX

Occupation: Artist

Comment: Subsidizing industrial agriculture with its pesticides, chemical fertilizers and genetic engineering is not in the best interest of the American people. Instead of adopting policies that deplete the soil and kill bees and other insects that pollinate naturally, I urge you to support organic research and best agricultural practices. Small organic farmers need government support and encouragement so that many more people will start their own small farms near cities and suburbs and continue to make inroads toward sustainable farming.

COMMENT OF LYNN MOORE

Date Submitted: Saturday, April 28, 2012, 7:52 a.m.

City, State: Woodbine, MD

Producer/Non-producer: Producer

Type: Fruits

Size: 151–300 acres

Comment: The funding of research for fruits and vegetables has been crucial for the mid-Atlantic area farmers. The attack from the Brown Marmorated Stink bug and the Spotted Wing Drosophila have devastated many farms. The lead scientists working on the problem are at the Appalachian Fruit Research Station in West Virginia. Without farm bill funding the research would not have been done. Much more damage would have occurred and continue to occur. This would lead to bankrupt farmers. This soil is too fertile and too precious to lose to invasive insects. The development pressure is already too much. Crop losses just make it worse. These invasive insects can occur at any time. So funding needs to be available. A safe af-

fordable food supply is the basis for our modern society. Just because we have an abundant safe food supply today, don't cut the funding that will determine tomorrow's food supply. Fruit farmers need to be planning about 10 years ahead to stay in production. The scientist that support the fruit industry need to be about 20 years ahead of the farmer. So funds cut today will seriously affect today and the next 3-5 decades. We all need to eat today and tomorrow. Thanks.

COMMENT OF MICHELE MOORE

Date Submitted: Friday, May 18, 2012, 1:15 p.m.

City, State: Alstead, NH

Occupation: Physician

Comment: We need a farm bill that recognizes the need for sustainable agriculture, ensuring the health of the consumer, the land, and enabling this country to have a diversified and vigorous agriculture. The bill should stop favoring agribusiness at the expense of the family farmer and should support regional agriculture so that we can all eat the freshest food, grown closest to home.

COMMENT OF TERRI MOORE

Date Submitted: Friday, May 18, 2012, 3:01 p.m.

City, State: Portland, OR

Occupation: Meeting Planner

Comment: Please stop the subsidies to big business farms that create problems with the diets of millions of people. Provide the citizens with fresh, healthy, local food choices. No corn syrup subsidies, no pink slime subsidies. Yes to organic, yes to small farmers.

COMMENT OF RACHEL MOORMAN

Date Submitted: Friday, May 18, 2012, 1:22 p.m.

City, State: Greenwood, IN

Occupation: Former TV News Producer, now Stay-at-Home Mother

Comment: Cutting funding for organic food research and small/beginning farmers, while propping up existing "food" magnates cannot stand! I rely on small farmers growing excellent food to feed my family . . . This is by far the majority of food we eat, and my family is healthier and rarely sick because of it. Supporting organic food creates a chain reaction of healthy living that will impact the health of the entire nation. I support:

- funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs;
- the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236);
- maintaining the EQIP Organic Initiative.

Please do not betray the lives and health of every American!

COMMENT OF MARY ETTA MOOSE

Date Submitted: Friday, May 11, 2012, 12:38 p.m.

City, State: San Francisco, CA

Occupation: Retired Restaurateur

Comment: The next farm bill should include encouragement and aid to organic producers; Mandatory \$30 million funding of the Organic Agriculture Research and Extension Initiative; \$25 million/yr for the Beginning Farmer & Rancher Development Program; protect the Conservation Stewardship Program from unfair funding cuts; support VAPG; provide flexibility for states to use food procurement programs to buy from local producers.

COMMENT OF JANA MORAN

Date Submitted: Friday, May 18, 2012, 2:21 p.m.

City, State: Anchorage, AK

Occupation: Writer/Photographer

Comment: Please, please please listen to the people of this great country who are concerned about our farms, fields, workers and **Our Food Supply**. This choice is

so simple, we either trash the land or save and nurture the land God gave us.
WWJD?

Thank you,
JANA MORAN.

COMMENT OF PATRICA MORFORD

Date Submitted: Friday, May 18, 2012, 11:34 a.m.

City, State: Logsdon, OR

Producer/Non-producer: Producer

Type: Dairy

Size: Less than 50 acres

Comment: Small dairy producers need help. We are licensed legal producers of healthy food but we are burdened with unfair competition from huge corporations and imports.

COMMENT OF ALEXANDRA MORGAN

Date Submitted: Friday, May 18, 2012, 5:09 p.m.

City, State: Saratoga Springs, NY

Occupation: Landscape Architect

Comment: I believe in the small farmer who is closer to the rhythm of his land than big corporate farms. And concentrated feed lots are a hazard to everyone's health, let alone being inhumane.

COMMENT OF ANGEL MORGAN

Date Submitted: Thursday, May 17, 2012, 2:18 p.m.

City, State: Hartford, CT

Occupation: Student

Comment: As a junior in college, I feel that the SNAP program helps plenty of families who get help with their kids. What type of human being would do such a horrible thing such as that. It's not fair to those who need SNAP to survive. I feel that instead of taking programs away you, Congress, should be adding things like jobs and more education for our youth so that they can stop killing one another.

COMMENT OF BILL MORGAN

Date Submitted: Friday, May 18, 2012, 7:38 p.m.

City, State: Fairfield, IA

Occupation: Software Programmer

Comment: The U.S. needs thorough biotechnology regulation that includes mandatory labeling for genetically engineered food (a requirement that 90% of Americans want and that 50 other countries, including Russia/China/EU already have).

Genetic Engineering is a subtle and powerful science, but it is also an infant science. The U.S. is currently not adhering to the Precautionary Principle, is not providing adequate oversight of the Biotech Industry, and so what is being sold as a Green Revolution is actually more like a Greed Revolution.

In addition, there should be far more legislated and enforced distance between Biotech Industry interests and the U.S. Government agencies that regulate it. The influence of Monsanto et al. on the current Administration, Congress, USDA/FDA is deplorable. We are not a Corporatocracy; we are a Democratic Republic.

Remember that we are of-by-for the People, not of-by-for Monsanto, Dow Chemical, and Dupont.

Thanks for listening . . .

BILL MORGAN,
Iowa.

COMMENT OF CHRISTOPHER MORGAN

Date Submitted: Saturday, May 19, 2012, 7:09 p.m.

City, State: Los Angeles, CA

Occupation: Hospital Admissions Rep.

Comment: I want an organic farm bill. I want a bill that's effective and that actually focuses on correcting the years of abuse we've experienced from hypocritical politicians and the bogus policies they've endorsed.

We must maintain the EQIP organic initiative.

We must ensure that any new insurance subsidies are directly tied to compliance with conservation programs.

We must provide the complete funding requirements of conservation programs, such as the Conservation Stewardship Program.

We must implement all the provisions of the Beginning Farmer and Rancher Opportunity Act.

We must fully and endorse and support all of the provisions of the Local Foods, Farms, and Jobs Act.

There is currently a very large population of native born Americans and immigrants that are truly fat, sick, and dying from many of the choices that have been made by politicians who've chosen money over the best interest of the people. How can we continue to live in a world where people are used as road blocks, door stops, and pin cushions?

Without positive and progressive change we will fade away as a once great nation into the infinite abyss and in a matter of time humans will cease to exist anywhere on the entire planet while the cockroaches eat the organic food that nature produces after we're all gone.

COMMENT OF WILLIAM MORGAN

Date Submitted: Friday, May 18, 2012, 12:00 p.m.

City, State: Baker, FL

Occupation: Technology

Comment: We the people need you to be our voice concerning our health from food and sustainability in true organic food crops. This is your job—to represent our voice.

COMMENT OF RICHARD MORGESE

Date Submitted: Friday, May 18, 2012, 2:09 p.m.

City, State: San Francisco, CA

Occupation: Medical Doctor

Comment: Evidence grows daily about the dangers of this unbridled and untested GMO experiment. Why is our government protecting big business instead of the populace? I'm stunned, witnessing a Sci-Fi horror story of some corrupt civilization destroying its future for some false short term gain. Toxic food as long as it's cheap?!

COMMENT OF TOOCHIS MORIN

Date Submitted: Friday, May 18, 2012, 4:17 p.m.

City, State: Los Angeles, CA

Occupation: Agent

Comment: Please stop catering to big agro like Monsanto and GE and their GMO products and pesticides. You are destroying the farmers' livelihood, health and our planet. Please refuse to bend to the big money these corporations are giving you and do your job and look out for the welfare of the people. Thank you.

COMMENT OF ROBERT MORLEY

Date Submitted: Friday, May 18, 2012, 2:31 p.m.

City, State: Spring Hill, FL

Occupation: Aviation

Comment: As a consumer I should have a right to know what is in my food and where it comes from and how it is grown. Companies like Monsanto should not have the last and only word concerning MY food! These corporations already have way too much power and it's time they get put in their place.

COMMENT OF GABRIEL MORNER

Date Submitted: Friday, May 18, 2012, 1:50 p.m.

City, State: Rutherford, NJ

Occupation: Architect

Comment: Please end farm subsidies encouraging corporate farming and putting small farmers out of business. It is creating a hazardous condition in our food chain. An over dependence on chemicals and GMO's is killing the soil, poisoning our water and perverting our seed stock.

COMMENT OF GLORIA MOROTTI

Date Submitted: Friday, May 18, 2012, 7:10 p.m.
City, State: Bradenton, FL
Occupation: Retired
Comment: First of all, most of the food grown should be organic. There should be no GMOs. Corporate agriculture should be abolished as much as possible.

COMMENT OF ROSEMARY MORRETTA

Date Submitted: Friday, May 18, 2012, 1:32 p.m.
City, State: Ridgefield, CT
Occupation: Nonprofit Executive
Comment: Please support environmental programs and local food, community supported agricultural initiatives and the policies and laws that effect the adoption of clean air and organic, local food. Thanks.

COMMENT OF MCKENNA MORRIGAN

Date Submitted: Sunday, May 20, 2012, 3:28 p.m.
City, State: Seattle, WA
Occupation: Consultant
Comment: As the committee considers the 2012 Food and Farm Bill, I urge you to:

- (1) Strengthen critical nutrition programs. The Recession has plunged tens of thousands of families into economic vulnerability, where they must make tough choices between healthy food and keeping a roof over their heads or the lights on. These families depend on the support provided through the Food and Farm Bill nutrition programs, and they cannot afford to lose that support due to unwise budget cuts.
- (2) Provide an even "plowing" field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- (3) And please finally find the political courage to make structural adjustments to the farm bill that many people acknowledge is necessary, so that it provides support to family farmers that really need help, not the biggest farms that don't. End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage; and implement a cap on crop insurance premium subsidies.

Thank you.

COMMENT OF CHRYS MORRIS

Date Submitted: Friday, May 18, 2012, 6:01 p.m.
City, State: Imperial, PA
Occupation: Homemaker
Comment: It's time to put American families and family owned farms ahead of agribusiness. Agribusiness doesn't care about the preserving the land for future generations—they only care about profits today. Small farmers are caretakers of the land, not rapists. Please take the opportunity to correct this terrible situation.

COMMENT OF ELIZABETH MORRIS

Date Submitted: Friday, May 18, 2012, 2:24 p.m.
City, State: Seattle, WA
Occupation: Medical Education
Comment: Support of local, organic agriculture should be the future of the farm bill. Please respectfully listen to the voices of the individuals who elected you.

COMMENT OF GARY MORRIS

Date Submitted: Friday, May 18, 2012, 8:57 p.m.
City, State: Neskowin, OR
Occupation: Alternative Health
Comment: We are desperately in need of a measure that **Protects** our Organic Farmers and the culture that is supporting them! The movement to place 100%

GMO foods on the market by the Monopoly known as Monsanto is a travesty to intelligent life on the planet! We are morally obligated to **Stop** producing GMO fruits and vegetables as we are messing with what **God** has created. We do not have the consciousness to absolutely know the long-term effects of these products, but there is one clear issue here! That we are not being informed as to the condition of our food supply! This is **Criminal** and what Monsanto has done to **Organic** Farmers in the court system is a Travesty of Immense Proportions! Shame on our Judicial System and **Shame** on **Congress** for allowing Monsanto to do their immoral GMO seeds with NO legislation or registration of their products whatsoever! Enough of this! It has to **Stop Now**. Please protect Organic Farming as preserve our right to eat Whole Healthy Foods without insecticides or weed killer genetically engineered into them! Thank you for considering and allowing our Natural Way of Living to continue as Mother Nature designed it to be!

COMMENT OF JOHN MORRIS

Date Submitted: Friday, May 18, 2012, 4:54 p.m.

City, State: Eugene, OR

Occupation: Designer

Comment: I write to strongly urge you to adopt policies that support small family farms, those practicing ecologically sustainable practices and organic farming methods. Too often our nation's lawmakers respond to the influence of agribusiness and related industries, including the petrochemical industry. I shouldn't need to remind you that you represent all the people, not just the entrenched special interests.

COMMENT OF MARY MORRIS

Date Submitted: Friday, May 18, 2012, 10:25 a.m.

City, State: Colton, CA

Occupation: Researcher

Comment: It is time for a farm bill that supports good nutrition, and livelihoods and decreases the public health burden, not a farm bill that supports wealthy agribusinesses to produce excess unnecessary commodities. Please increase SNAP incentives to shop directly and eat produce, and remove subsidies for farms netting over \$250,000 per year while favoring small farms producing organic produce.

COMMENT OF NANCY MORRIS

Date Submitted: Friday, May 18, 2012, 4:46 p.m.

City, State: Seattle, WA

Occupation: Writer

Comment: To the House Agriculture Committee:

Your allegiance is to the citizens of the United States—not industrialized GMO chemically based corporate agriculture. I demand you continue to support research into sustainable organic agriculture. Do not cut funding to this sector. I demand labeling of GMO's. Stop subsidizing the major agricultural corporations that continue to degrade the biosphere on which we are all dependent, including you.

COMMENT OF PETER MORRIS

Date Submitted: Friday, May 18, 2012, 5:50 p.m.

City, State: Bradford, VT

Occupation: Photographer

Comment: Our health needs to be placed first. If we are becoming, sick, fat, and full of cancer, we can't work as hard or make good money to buy all the stuff the economy makes. Immediate profit without thought of cost is killing America. A smart and healthy economy takes good care of its workers and the rest or collapses and pays insane health care costs. Stop killing America with bad food and destruction of the family farm. Make good health profitable for the many instead of just making profit for the few.

COMMENT OF SHIRLEY MORRIS

Date Submitted: Saturday, May 19, 2012, 10:43 a.m.

City, State: Portland, OR

Occupation: Realtor

Comment: Please vote to help the organic food movement that is just now really beginning in many areas of the United States! These people are helping to sustain

the land as well as provide much needed food that we depend on every day to nourish our bodies and keep healthy! Big agriculture is just that, a **Business**, and has gotten completely out of control with Congress ignoring what is going to completely tear apart our food and the land it is grown on.

Sincerely,
SHIRLEY MORRIS.

COMMENT OF CHAD MORRISON

Date Submitted: Tuesday, April 24, 2012, 11:07 a.m.

City, State: Gassaway, WV

Producer/Non-producer: Producer

Type: Livestock

Size: 301–500 acres

Comment: As an American, the farm bill is one of the most important and impactful parts of our infrastructure. Conservation and insurance set the tone for our country in the present and for the next generations as far as food supply and production. Our country is now in a place where self-sufficiency and sustainability are at the top of our priority list.

In my opinion, our entire food system as a whole in the United States is failing. The cost of foods has skyrocketed, much to the point where families and individuals cannot afford to buy healthy foods to support their families. We become reliant on cheaper processed foods, which in the long term, cost us our health tenfold more. Our children are suffering from health diseases such as diabetes and obesity.

As a resident of a rural state, West Virginia, transportation becomes a major issue. We constantly fight the battle between purchasing goods at higher prices locally or traveling to buy at a lower price. Again, traveling means less trips, and less access to perishable foods that tend to be healthier and more nutritious for our families.

As an employee of a hunger relief organization, I see on a daily basis the impact of USDA commodity program and SNAP. People are no longer able to use these programs as an emergency (unless you consider it a long-term emergency), as it has become a forced way of life for many people. They have no other choice: use the resources available or starve or freeze. In West Virginia, the TEFAP program affects over 275,000 people or more. What a huge number, considering it is 15% of our population.

As the son of a farmer who was the son of a farmer for many generations, I see farmland and the occupation slowly disappearing. Invest in a future for West Virginia and the United States. Invest in programs that provide jobs that provide food, so that individuals can afford to buy food. Our country depends on being sustainable, and cuts to the farm bill may be irreversible. Cuts to the commodity program or SNAP will devastate our food banks and destroy any hope these citizens have.

COMMENT OF CHERYL MORRISON

Date Submitted: Sunday, May 20, 2012, 12:16 a.m.

City, State: Fairview, NC

Comment: Please help make sustainable and organic farming practices the standard in our country. This will help future generations and keep us and our Earth healthy and happy. Thank you.

COMMENT OF DANIEL MORRISON

Date Submitted: Saturday, May 19, 2012, 11:07 a.m.

City, State: Fredericksburg, VA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: My family owns a 15 acre farm in VA. We grow heirloom tomatoes, peppers, carrots, beets, squash, *etc.* We started growing for ourselves and then found we were producing a lot more than we could eat so we expanded and are now growing for local restaurants. We do this all while having full time jobs. We don't use any chemicals or genetically modified seeds. If you spend take care of your soil and you don't overplant one crop, you can produce a lot more edible food than overplanting corn or soy. It is the over production that requires such large amounts of chemical fertilizers, pesticides and herbicides. And those chemicals have direct and indirect impacts on our bodies, health, environment and society. Please revise and rewrite the farm bill to be about food and people.

COMMENT OF LESLIE MORRISON

Date Submitted: Friday, May 18, 2012, 12:14 p.m.

City, State: Passaic, NJ

Occupation: Natural Foods Chef and Culinary Instructor

Comment: As a mother and chef for families with children, it's my personal responsibility to use the safest ingredients for humans I can find. Our country needs MORE options for safe, nutritious, and affordable food free of chemicals, GMO ingredients, and pesticides. They are contributing to all kinds of diseases—cancer, ADHD, Autism, *etc.* These are costing our government and citizens way more money in health care than had we focused more on prevention in the first place! And it causes all who are touched by health problems and disease much more unnecessary heartache. Please, through legislation, put the health of our citizens first, and not big agriculture.

Thank you!

LESLIE MORRISON.

 JOINT COMMENT OF ROGER MORRISON, M.D. AND NANCY HERRICK, P.A.

 COMMENT OF BERNARD C. MORRISSEY

Date Submitted: Thursday, May 17, 2012, 11:38 a.m.

City, State: Ephrata, PA

Occupation: Founder, Bernard C. Morrissey Insurance, Inc.

Comment: I am against any and all milk supply management provisions being included in the dairy title of the farm bill. Dairy producers should not have to be the only ag sector governed by arbitrary production caps as a prerequisite for access to a safety net or risk management tool (as proposed in the Dairy Security Act—being considered as the new dairy policy in the farm bill). Simply move LGM-Dairy from pilot status to regular crop insurance status and make this effective margin protection program more widely available to dairy producers.

 COMMENT OF CHRISTINE MORRISSEY

Date Submitted: Friday, May 18, 2012, 12:26 p.m.

City, State: Ithaca, NY

Occupation: Retired

Comment: I rely on local organic produce to support my local farm businesspeople and to assure my healthy veggies remain a reasonably priced option without GMO pollution.

 COMMENT OF DOREDN MORRISSEY

Date Submitted: Friday, May 18, 2012, 10:10 p.m.

City, State: Los Angeles, CA

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: As a landscape architect by training, I can tell you that my best paying clients ask for sustainable practices and small plots for growing vegetables. It is a shift and the market dictates that we stay ahead of the curve. Please pave the way to support the shifts in market. The genie is out of the bottle and the fight against it will be just as arduous a fight, but additionally with a long-term losing proposition. Surely you are aware of this.

Many of our founding founders had a deep respect for farming, and in summer sought respite from the troubles in Washington D.C. by returning to their farms and working the land with integrity. Please support farming that does not weaken our soils, our plants, our health, and ultimately our nation. Agribusiness may be a (relatively short term) profitable business, but it is not appropriate for the food we feed our families with, nor for the rich land we have as a nation. Healthy farmed agriculture yields higher market prices locally (and eventually internationally), but for agribusiness it is an expensive shift. As elected leaders, I deeply hope you are concerned with the quality of life for both your constituents and our great and unique nation. Please be judicious and long-sighted in your decision making.

Thank you for all your efforts.

COMMENT OF SAMANTHA MORROW

Date Submitted: Friday, May 18, 2012, 3:16 p.m.

City, State: Ferndale, WA

Occupation: Teacher & Mother

Comment: I grew up in a farming family in OH. Corn and soy and cooped-up, grain-fed cattle was the only viable option for my uncles and father. As a mom, I've learned more so that I am sure to feed my children nutrition without the extra helping of pesticides, insecticides, artificial fertilizers, and excessive amounts of high fructose corn syrup. On the small plot of land, I am employing sustainable practices to help feed my family and neighbors. When I share with my father, he longs to be able to do it all over again. He regrets the choices he and his brothers made. He sees the results on the land.

I support all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). I support fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. I support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). I hope you maintain the EQIP Organic Initiative.

COMMENT OF ANNE JUNIPER MORSE

Date Submitted: Friday, May 11, 2012, 12:46 p.m.

City, State: Hillsboro, OR

Comment: I work for Adelante Mujeres a nonprofit organization in Oregon that supports Latino farmers. I hope that in the new farm bill their continues to be support for socially disadvantaged farmers and ranchers. Outreach and Assistance for Socially Disadvantaged Farmers and Ranchers Program (OASDFR) is a valuable program. We would like to encourage its inclusion as another vital piece of the farm bill that is under consideration. In the past our organization was able to secure funding from this program to help underserved Latino farmers in Oregon. We hope you will consider adding it.

COMMENT OF ELIZABETH MORSE

Date Submitted: Friday, May 18, 2012, 4:04 p.m.

City, State: South Bend, IN

Occupation: Self Employed and Member of Local Food Co-Op

Comment: We need to stop the usage of GMO seed. We need to focus on reducing that amount of fuel used in commercial ag. Healthy land is essential to maintaining our health as a nation.

COMMENT OF LINDA MORSE

Date Submitted: Friday, May 18, 2012, 3:22 p.m.

City, State: Durango, CO

Occupation: Energy Consultant

Comment: I would like to make sure we have the right to know what is in our food by having all things labeled as to whether items are GMO or GMO-free.

COMMENT OF STACY MORSE

Date Submitted: Friday, May 18, 2012, 9:39 p.m.

City, State: Nashville, TN

Occupation: Training Coordinator

Comment: I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). I also believe in fully funding conservation pro-

grams, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

I support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

We should also maintain the EQIP Organic Initiative. We should not be cutting funding for vital programs such as nutrition, conservation and support for organic and sustainable agriculture. We do need to eliminate wasteful subsidies for corporate agribusiness, but the proposition that we replace them with a new subsidized insurance program that is full of opportunities for fraud and abuse is not an improvement nor real reform. The proposed subsidized insurance program will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk.

COMMENTS OF VIVIANNE MOSCA-CLARK

Date Submitted: Friday, May 11, 2012 6:26 p.m.

Occupation: Retired

Comment: What I can see is more farms, farming organic and sustainable food. That will create more jobs. Non GMO foods growing in our fields. GMO's kill the ground and use more pesticides, and herbicides. We need real whole food for real people.

Date Submitted: Thursday, May 17, 2012 7:23 p.m.

Comment: Since eating good food is essential for healthy humans, I think good food is important. I have worked on organic farms in my life. I never got sick from working on the land. All people need to live with dignity and justice. Starving does not work with this comment.

Date Submitted: Friday, May 18, 2012, 5:17 p.m.

Comment: Life forces on our planet suffer when poisoned.

When we feed poison to the plants we eat that poison. Poison goes into the body of the plants/animals. I do not understand what is so confusing about this.

It is simple . . . stop poisoning the food and the beings that eat it will thrive.

Money is the issue for why there is so much controversial issues about it all.

Somewhere in all of this garbage is the real issue. Survival, and the quality of survival.

I vote for a healthy survival.

Date Submitted: Sunday, March 18, 2012 7:28 p.m.

Comment: Eating good well grown food is very important to have healthy citizens in our country. Being able to buy local grown foods helps local communities. Clean whole foods is important in human health, as GM foods are proving they are not good for health in people or animals. Animals are having 70% spontaneous abortions. And more women are having the same. This needs to be stopped.

COMMENT OF LINDA MOSCARELLA

Date Submitted: Friday, May 18, 2012, 7:42 p.m.

City, State: El Prado, NM

Occupation: Retired

Comment: The farm bill must be reformed, to focus on healthy food rather than profits for industrial scale farmers. The current bill is wasteful, costly to the taxpayers, and rewards the wrong people.

COMMENT OF RICH MOSER

Date Submitted: Friday, May 18, 2012, 1:45 p.m.

City, State: Santa Barbara, CA

Occupation: Consultant

Comment: Support sustainable practices and small farms. Eliminate subsidies for large growers. Eliminate all funding for genetically-modified items.

COMMENT OF MELANIE MOSHIER

Date Submitted: Saturday, May 19, 2012, 1:39 a.m.

City, State: Pomona, CA

Occupation: Substitute Teacher

Comment: We cannot allow agribusiness to continue to pollute our food and our land. It is a disgrace that profit is the chief motive of business in America; it should

be service to our fellows. It is your duty to stand up for the health of Americans and our land.

COMMENT OF ROBERT MOSKOWITZ

Date Submitted: Friday, May 18, 2012, 5:37 p.m.

City, State: Santa Monica, CA

Occupation: Retired

Comment: American food should be the purest in the world. We should have honest and simple labeling laws: if it's in there, label it. We should let "organic" mean no chemicals of any kind. We should stop subsidizing pesticide use and petrochemical-based farming. We should work toward more conservation of scarce resources.

Thanks for thinking of the American people rather than Agribusiness economic interests.

COMMENT OF ANDREW MOSS

Date Submitted: Friday, May 18, 2012, 4:26 p.m.

City, State: Ruby, NY

Occupation: Graphic Designer

Comment: We should encourage and support small family farms, organic farms and small entrepreneur farms. Big agricultural corporations that use the most pesticides and herbicides, chemical fertilizers and genetically modified crops, are in it purely for profit, not for the quality of the product or its impact on our health. I support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I want to get my meat, dairy and produce from my local farms, not from a corporate farm across the country. I want to support my local farms and have the freshest products possible.

COMMENT OF LAURA MOSSER

Comment: Please stop giving help to big ag so that they can produce more and more GMO corn. **We Don't Want GMO Corn!** We want healthy, sustainable, **Real** food! Support small farmers growing real food using sustainable methods.

COMMENT OF JEROME MOTON

Date Submitted: Friday, May 18, 2012, 8:12 p.m.

City, State: El Paso, TX

Occupation: Writer and Aspiring Gardener

Comment: Dear Representatives:

The U.S. agricultural system needs much improvement. So please consider encouraging the flourishing of healthy, organic farming. We are long overdue for a food renaissance, as national health continues to plummet despite the efforts at disease prevention and the promotion of exercise. Your policies in this regard must include healthy food production practices to garner physical and mental vibrancy. Clean

food and soil are key to restoring wellness. Please fund best practices agriculture programs that encourage local, organic food production and wellbeing.

Thank you,

JEROME MOTON.

COMMENT OF SATO MOUGHALIAN

Date Submitted: Friday, May 18, 2012, 6:40 p.m.

City, State: New York, NY

Occupation: Flutist

Comment: It is time to stop supporting giant agribusiness and the products that flow from giant agribusiness which are so detrimental to the health of our nation's people. If we are to provide any kind of farm support any more, it should go equally to small farmers who promote biodiversity and produce more healthful food. Genetic engineering has not proven itself to be of value in feeding the hungry, and the products that are produced in this manner require ever increasing loads of toxic chemicals, substances which are contributing to our chronic illnesses. Confined animal farming operations also promote illness both in the animals, and in the increasing number of antibiotic resistant strains which are developing because of these factory farming methods. It is time to stop the handouts to giant businesses and to ease conditions for a greater amount of small, diverse and sustainable farming.

Sincerely,

SATO MOUGHALIAN.

COMMENT OF LINDA MOULDER

Date Submitted: Thursday, May 17, 2012, 5:58 p.m.

City, State: Spokane, WA

Occupation: Retired

Comment: I hope the farm bill will assure everyone, regardless of income level, has access to healthy, real food. I want the bill to assure protection of our nation's soils and waters and provide encouragement of new small farmers and growers.

COMMENT OF LAURIE MOXLEY

City, State: Green, OH

Producer/Non-producer: Producer

Type: Fruits

Size: Less than 50 acres

Comment: Everybody in this industry knows that the future is organic growing systems, which removes harmful and unnecessary chemicals from our food chain.

COMMENT OF DAWN MUELLER

Date Submitted: Friday, May 18, 2012, 2:39 p.m.

City, State: Clifton, NJ

Occupation: VP in Music Publishing

Comment: Why do I have to eat tomatoes that have no taste? In Europe they don't! Why is my fruit tasteless? In the Caribbean it isn't. The reason is because my government would rather let corporations profit and sell terrible food, then let farmers sell us good, health, vitamin filled food. **Stop This Insanity And Get On The Right Track Already!**

COMMENT OF GEORGE B. MUELLER

Date Submitted: Saturday, May 12, 2012, 12:13 p.m.

City, State: Clifton Springs, NY

Producer/Non-producer: Producer

Type: Dairy

Size: 1,000+ acres

Comment: Dear House Ag Committee,

We Never—Never—Never—Should Adopt The Idea Of A Government Run Quota (Supply Management) System In Our Vibrant And Expanding Dairy Industry. (115 Billion Pounds In 1965, 200 Billion Pounds Per Year Today!) Canada With Its Quotas Is Dead In The Water. We In The USA Have Great Potential If We Can Keep Quotas Out Of Our Industry.

I, and my family have been milking cows for 52 years. The dairy industry has been very good to the Mueller Family. Please don't let the age old dream of controlling supply to raise prices stagnate our industry.

Yes, I know they say the quota will be voluntary. (Not so voluntary if your banker insists you adopt a quota to gain margin insurance.)

But let us not allow the age old and foolish concept of cutting production to raise prices gain a foothold in dairy.

How would we like it if the government told the auto industry to cut back on production so as to raise the price of the cars we buy?

Exports of dairy products is booming. Let us serve that growing market. Not cut back!

Yogurt and Greek yogurt sales are booming. Let us serve that growing market. Not cut back!

Argentina, Brazil, and Eastern Europe will serve the world markets if we are slow and cut back. We have the infrastructure and head start and we know the dairy industry. **Please Don't Saddle My Industry With The Beginning Of A Foolish Quota System!**

Sincerely,

GEORGE B. MUELLER,
Willow Bend Farm, Clifton Springs, NY.
