Comment: H.R. 3236 and H.R. 3286 should become the law of the land. Aligning SNAP benefits and farmers markets, where funds benefit the health of all, is far preferable to more Big Business/Bad Food subsidies. Please! Americans want good food and good health for all, but we don't want private corporations to control our water, air, soil, and foods!

COMMENT OF ERNEST J.P. MUHLY

Date Submitted: Friday, May 18, 2012, 4:22 p.m.

City, State: Walkersville, MD

Occupation: Consulting Ecologist and Educator

Comment: Slashing \$33 billion from the food stamp program to create a \$33 billion new entitlement program that guarantees the income of profitable farm businesses, on top of \$90 billion in subsidies for crop and revenue insurance policies is unacceptable.

I am also asking you to support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF HARUKO MUKASA

City, State: New York, NY

Occupation: Consultant

Comment: "Where there is no vision the people perish." Current policies are detrimental to the planet's long-term ability to produce food. We need a fair and healthy farm bill.

COMMENT OF KRIS MULLER

Date Submitted: Friday, April 27, 2012, 5:25 p.m.

City, State: Berkeley, CA

Occupation: Retired

Comment: While we do produce a portion of our own food, we also support local farmers at the farmers markets and through the grocery stores that buy from local farmers. We believe future food security depends on our now nurturing soil and water conservation, sound animal husbandry that minimizes CO₂ and water pollution, and teaches farmers and ranchers how to work with natural cycles without poisons that undermine future productivity. Please protect programs that give fair attention to small family farms and small organic farms.

COMMENT OF RENEE MULLIGAN

Date Submitted: Sunday, May 20, 2012, 6:32 p.m.

City, State: Bryson City, NC

Occupation: Health Educator

Comment: A \$36 million cut to SNAP is not the way to go. The Committee should focus on writing a farm bill that creates economic opportunity and improves access to healthy, affordable food for all Americans.

1. Community Food Projects Program—\$10 million per year to help communities build food self-reliance.
2. Farmers Market and Local Food Promotion Program—\$20 million per year to develop farmers market capacity and create food hubs to connect farmers with schools, hospitals, grocery stores and other markets.
3. Hunger-Free Community Incentive Grants—An average of \$20 million per year for a new SNAP local fruit and vegetable incentive grant program at farmers markets and other healthy food retailers.

COMMENT OF CATHLEEN MULLINS

Comment: Hello House Committee Members, I am writing to urge you to support the farm bill. Fairness is the bottom line and I know in your hearts you want fairness! Please do the right thing!

Thank you,

BEATRIZ MUNIZ.

COMMENT OF HIDEYUKI MURAKAMI

Date Submitted: Friday, May 18, 2012, 1:31 p.m.

City, State: San Diego, CA

Occupation: EMT

Comment: Please end subsidies to agribusinesses. These subsidies lead to over-production that result in surplus agriculture going to unhealthy products such as corn syrup. Alternatively, these foods may flood overseas markets, thus destroying rural communities globally.

COMMENT OF TERRI MURDOCH

Date Submitted: Friday, May 18, 2012, 1:08 p.m.

City, State: Little Rock, AR

Occupation: Homemaker

Comment: Dear House Committee on Agriculture,

Please consider the following abbreviated comments for long term sustainable healthy land, animals and people.

Move government subsidizing from:

- large monoculture farms
- production of grains and starches (wheat, corn, soybeans)

To:

- small, polyculture, heirloom, and eco-sustainable (non-pesticide and artificial fertilizer usage) farms; where animals are pastured, and various nutrient dense vegetables and fruits are grown.

Thank you,

TERRI MURDOCH.

COMMENT OF SARA MURDOCK

Occupation: Graduate Student, Artist, and Community Volunteer

Comment: We have the opportunity to positively impact the economy, living wages for more farmers, public health, societal perceptions about healthy food, and the environment. Let's not squander our future in favor of short-term political plays.

COMMENT OF RIAN MURNEN

Date Submitted: Saturday, May 19, 2012, 2:04 a.m.

City, State: Portland, OR

Occupation: Designer

Comment: Honorable Representatives,

I'm writing to express my deep concern with the current state of Federal law as it pertains to agriculture. A culture of inappropriate dependence on big dollar campaign donors has distorted past Representatives actions in regard to the farm bill—but here and now, you have the opportunity to make the decision to realign legislation with the will of The People rather than The Funders. You may become the wise leaders who set our nation on a path to a healthier food system.

During my brief lifetime Congress has allowed, and at times actively engaged, in eroding the farm bill and related legislation causing deep harm to our food systems, environment, farming families and their communities. In hopes of redressing this degradation, I petition you to fully endorse the Local Foods, Farms and Jobs Act (H.R. 3286).

Please reorient the priorities of Congress to focus on the health of our citizens, small family farms, farming communities and environment. Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

Here in my home town of Portland, Oregon, I am an “eater” living in an urban environment who depends on small family farmers. I volunteered with my community in 2011 to establish a neighborhood farmers market. Through this engagement with my neighbors and farmers, I've had opportunity to gain a direct connection to the food on my plate and support the professionals who make that food possible.

In doing so I've also met a number of peers who are working to enter the field of small-scale farming. Beyond providing them my encouragement and support, I call on you to implement all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236) to foster this professional field in a time when jobs are sorely needed and family farms are struggling to train up the next generation.

If you doubt the existence of these “beginners” I encourage you to contact Rep. Blumenauer. On occasion he has joined my neighbors, area farmers and my family at our monthly “InFARmation” networking event were farmers young and old join with eaters in dialog to learn more about food and farm issues. I'm confident he would be happy to share his personal experience meeting young beginning farmers who need our nation's support in engaging in this challenging field.

My own interest in farming began with my grandfather, who is now past. He was a first generation American, who farmed and raised livestock. He taught me to cultivate organically, skills I use to this day in my small urban garden. The values he instilled in me, a respect for the soil, seed and animals has made me confident that maintaining the EQIP Organic Initiative a responsible act that the House should pursue with pride.

There are a number of ways that legislation could reverse the destructive trend of the last several decades, but these specific immediate actions are steps the Congress should take today.

Thank you for your service on the House Agriculture Committee and for acknowledging that individual citizens, The People, should have the strongest voice in guiding your legislative work.

COMMENT OF SANDY MURPHREE

Date Submitted: Friday, May 18, 2012, 6:05 p.m.

City, State: Elgin, TX

Occupation: Retired

Comment: I don't grow but we like to eat. I work at the local Community Cupboard (food pantry) which sees new people line up every Tuesday. Lots of job loss here, **Lots**. If you're not a techie or bartender, there's not much here and people need food so they can pay for rent and utilities, and shoes, and medical. What is the matter with you people? Get out and talk to the people. Mr. McCaul, you have been the biggest disappointment from the beginning, with your nod to tax cuts for friends, ignoring children and seniors. Locked by the hip to GWB, and his wars, tax cuts and lies.

COMMENT OF BRIAN MURPHY

Date Submitted: Friday, May 18, 2012, 2:20 p.m.

City, State: Hartford, CT

Comment: SNAP is important cause it helps many Americans, especially due to no one being able to get jobs. SNAP helps a lot of families eat, and eating is real important.

COMMENT OF VASU MURTI

Date Submitted: Friday, May 18, 2012, 10:29 p.m.

City, State: Oakland, CA

Occupation: Social Services

Comment: Let's transition to a plant-based economy. Veganism is direct action! "A (meat-centered) diet that can lead to heart attacks, cancer, and numerous other diseases cannot be a natural diet," writes Keith Akers in *A Vegetarian Sourcebook* (1983). "A (meat-centered) diet that pillages our resources of land, water, forests, and energy cannot be a natural diet. A (meat-centered) diet that causes the unnecessary suffering and death of billions of animals each year cannot be a natural diet."

I understand there are conservative Christians who fear vegetarianism . . . which is kind of like being afraid of nonsmoking, nondrinking, or recycling. Ronald J. Sider of Evangelicals for Social Action, in his 1977 book, *Rich Christians in an Age of Hunger*, pointed out that 220 million Americans were eating enough food (largely because of the high consumption of grain fed to livestock) to feed over one billion people in the poorer countries.

A pamphlet put out by Compassion Over Killing says raising animals for food is one of the leading causes of both pollution and resource depletion today. According to a recent United Nations report, *Livestock's Long Shadow*, raising chickens, turkeys, pigs, and other animals for food causes more greenhouse gas emissions than all the cars, trucks and other forms of transportation combined.

Researchers from the University of Chicago similarly concluded that a vegetarian diet is the most energy efficient, and the average American does more to reduce global warming emissions by not eating animal products than by switching to a hybrid car.

"Livestock are one of the most significant contributors to today's most serious environmental problems. Urgent action is required to remedy the situation."—Union Nations' Food and Agriculture Association

Nearly 75% of the grain grown and 50% of the water consumed in the U.S. are used by the meat industry. (Audubon Society)

Over 260 million acres of U.S. forest have been cleared to grow grain for livestock. (Greenpeace)

It takes nearly 1 gallon of fossil fuel and 5,200 gallons of water to produce just 1 pound of conventionally fed beef. (Mother Jones)

Farmed animals produce an estimated 1.4 billion tons of fecal waste each year in the U.S. Much of this untreated waste pollutes the land and water.

The following points and facts are excerpted from *Please Don't Eat the Animals* (2007) by the mother-daughter writing team of Jennifer Horsman and Jaime Flowers:

"A reduction in beef and other meat consumption is the most potent single act you can take to halt the destruction of our environment and preserve our natural resources. Our choices do matter: What's healthiest for each of us personally is also healthiest for the life support system of our precious, but wounded planet."—John Robbins, author, *Diet for a New America*, and President, EarthSave Foundation

One study puts animal waste in the United States to between 2.4 trillion to 3.9 trillion pounds per year. The United states produces 15,000 pounds of manure per person. This is 130 times the amount of waste produced by the entire human population of the United States.

A 1,000 cow dairy can produce approximately 120,000 pounds of waste per day. This is the functional equivalent of the amount of sanitary waste produced by a city of 20,000 people.

A 20,000 chicken factory produces about 2.4 million pounds of manure a year. Poultry factories are one of the fastest growing industries throughout Asia.

One pig excretes nearly 3 gallons of waste per day, or 2.5 times the average human's daily total. One hog farm with 50,000 pigs in France produces more waste than the entire city of Los Angeles, and some pig farms are much larger.

Factory farm pollution is the primary source of damage to coastal waters in North and South America, Europe, and Asia. Scientists report that over sixty percent of the coastal waters in the United States are moderately to severely degraded from

factory farm nutrient pollution. This pollution creates oxygen-depleted dead zones, which are huge areas of ocean devoid of aquatic life.

Meat production causes deforestation, which then contributes to global warming. Trees convert carbon dioxide into oxygen, and the destruction of forests around the globe to make room for grazing cattle furthers the greenhouse effect.

The Food and Agricultural Organization of the United Nations reports that the annual rate of tropical deforestation has increased from 9 million hectares in 1980 to 16.8 million hectares in 1990, and unfortunately, this destruction has accelerated since then. By 1994, a staggering 200 million hectares of rainforest had been destroyed in South America just for cattle.

“The impact of countless hooves and mouths over the years has done more to alter the type of vegetation and land forms of the West than all the water projects, strip mines, power plants, freeways, and sub-division developments combined.”—Philip Fradkin, in *Audubon*, National Audubon Society, New York

Agricultural meat production generates air pollution. As manure decomposes, it releases over 400 volatile organic compounds, many of which are extremely harmful to human health. Nitrogen, a major by-product of animal wastes, changes to ammonia as it escapes into the air, and this is a major source of acid rain. Worldwide, livestock produce over thirty million tons of ammonia. Hydrogen sulfide, another chemical released from animal waste, can cause irreversible neurological damage, even at low levels.

The World Conservation Union lists over 1,000 different fish species that are threatened or endangered. According to the United Nations Food and Agriculture Organization (FAO) estimate, over 60 percent of the world's fish species are either fully exploited or depleted. Commercial fish populations of cod, hake, haddock, and flounder have fallen by as much as 95 percent in the north Atlantic.

The United States and Europe lose several billion tons of topsoil each year from cropland and grazing land, and 84 percent of this erosion is caused by livestock agriculture. While this soil is theoretically a renewable resource, we are losing soil at a much faster rate than we are able to replace it. It takes 100 to 500 years to produce 1 inch of topsoil, but due to livestock grazing and feeding, farming areas can lose up to 6 inches of topsoil a year.

Livestock production affects a startling 70 to 85 percent of the land area of the United States, United Kingdom, and the European Union. That includes the public and private rangeland used for grazing, as well as the land used to produce the crops that feed the animals.

By comparison, urbanization only affects three percent of the United States land area, slightly larger for the European Union and the United Kingdom. Meat production consumes the world's land resources.

Half of all fresh water worldwide is used for thirsty livestock. Producing 8 ounces of beef requires an unimaginable 25,000 liters of water, or the water necessary for 1 pound of steak equals the water consumption of the average household for a year.

The United States government spends \$10 million each year to kill an estimated 100,000 wild animals, including coyotes, foxes, bobcats, badgers, bears, and mountain lions just to placate ranchers who don't want these animals killing their livestock. The cost far outweighs the damage to livestock that these predators cause.

The Worldwatch Institute estimates 1 pound of steak from a steer raised in a feedlot costs: 5 pounds of grain, a whopping 2,500 gallons of water, the energy equivalent of a gallon of gasoline, and about 34 pounds of topsoil.

Thirty-three percent of our nation's raw materials and fossil fuels go into livestock destined for slaughter. In a vegan economy, only two percent of our resources will go to the production of food.

“It seems disingenuous for the intellectual elite of the first world to dwell on the subject of too many babies being born in the second- and third-world nations while virtually ignoring the overpopulation of cattle and the realities of a food chain that robs the poor of sustenance to feed the rich a steady diet of grain-fed meat.”—Jeremy Rifkin, pro-life **And** pro-animal author, *Beyond Beef: The Rise and Fall of the Cattle Culture*, and president of the Greenhouse Crisis Foundation

“Carl Pope could probably affect the world more by being a vegetarian than through his job as president of the Sierra Club,”—quipped Jennifer Horsman in 2007.

According to the editors of World Watch, July/August 2004:

“The human appetite for animal flesh is a driving force behind virtually every major category of environmental damage now threatening the human future—deforestation, topsoil erosion, fresh water scarcity, air and water pollution, cli-

mate change, biodiversity loss, social injustice, the destabilization of communities and the spread of disease.”

Brother David Steindl-Rast, a Benedictine monk, similarly says in the February 1995 issue of *Harmony: Voices for a Just Future* (a peace and justice periodical on the religious left):

“. . . the survival of our planet depends on our sense of belonging—to all other humans, to dolphins caught in dragnets to pigs and chickens and calves raised in animal concentration camps, to redwoods and rainforests, to kelp beds in our oceans, and to the ozone layer.”

The number of animals killed for food in the United States is nearly 75 times larger than the number of animals killed in laboratories, 30 times larger than the number killed by hunters and trappers, and 500 times larger than the number of animals killed in animal pounds.

People for the Ethical Treatment of Animals (PETA) is challenging those who think they can still be “meat-eating environmentalists” to go vegan, if they really care about the planet.

peta2 is now the largest youth movement of any social change organization in the world.

peta2 has 267,000 friends on MySpace and 91,000 Facebook fans.

A few years ago, PETA was the top-ranked charity when a poll asked teenagers what nonprofit group they would most want to work for. PETA won by more than a two to one margin over the second place finisher, The American Red Cross, with more votes than the Red Cross and Habitat for Humanity combined.

“If anyone wants to save the planet,” says Paul McCartney in an interview with PETA’s *Animal Times* magazine from 2001, “all they have to do is stop eating meat. That’s the single most important thing you could do. It’s staggering when you think about it.”

“Vegetarianism takes care of so many things in one shot: ecology, famine, cruelty. Let’s do it! Linda was right. Going veggie is the single best idea for the new century.”

Les Brown of the Overseas Development Council calculates that if Americans reduced their meat consumption by only ten percent per year, it would free at least twelve million tons of grain for human consumption—or enough to feed sixty million people.

COMMENT OF CHRIS MUSELLA

Date Submitted: Saturday, May 19, 2012, 7:56 a.m.

City, State: Brooklyn, NY

Occupation: Restaurant Manager

Comment: The importance of sustainable agriculture to our present and future food supply cannot be overstated. The relationship between our health and the food we eat is understood and indisputable. Congress must act on the behalf of the American people and maintain funding in the fields of sustainable farming, nutrition education and they must act to **End** the monopoly held by companies that do not support sustainable and organic farming.

COMMENT OF NATASHA MUSIL

Date Submitted: Tuesday, May 08, 2012, 5:52 p.m.

City, State: Seattle, WA

Occupation: Housekeeper/Service

Comment:

- Reserve the term “natural” for non-GMO foods.
- Require labeling for all GMO foods.
- Require labeling for all animal products that have used growth hormones and/or antibiotics during the animals lifespan.
- Stricter guidelines for “humane” treatment of animals and regulation of the use of the word “humane” in packaging.
- Allow small family farms and back yard gardens/farms to operate without regulations, period. Gardening and farming are not only for profit but for family and community and therefore should be protected from the same laws that govern large farms and corporate farms.
- The protection of small family farms and organic farms from bullying and intimidation of corporate patent owners in the case of accidental cross contamination of GMO plants.

- Government support for farms being bullied, sued or otherwise intimidated by corporations for accidental cross contamination of patented GMO seeds/plants.
- Subsidies for small family farms and organic farms for using methane conversion for fuel.
- Subsidies or tax breaks for small family farms or organic farms and co-ops who participate in teaching sustainable agriculture to the communities they serve.
- Subsidies or tax breaks for small farms or organic farms experimenting with alternative methods of perma/aquaculture including vertical farming.
- Subsidies or tax breaks for small family farms or organic farms whose produce/products are sold and consumed within 50 miles of the farm (dis-including selling to a processor who then sells the product nationally)
- Subsidies or tax breaks for alternative agriculture programs in urban area including community pea-patches, urban gardens, rooftop gardens, vertical farming and more.
- Ending the poor diets of farm animals, including cattle, that requires the animals natural biology be altered. (*i.e.*, having holes to a cows stomach because their bodies are processing too much grain)
- Criminalizing the mutilation of chickens for confined egg operations.

COMMENT OF ALAN MUSSEN

Date Submitted: Sunday, May 20, 2012, 6:42 p.m.

City, State: Franklin Square, NY

Occupation: Stagehand

Comment: Oil-based corporate agriculture does not produce food that is as healthy as that produced by small farmers. The health of the nation's people depends on the economic health of small farmers.

COMMENT OF MARY MUTCH

Date Submitted: Thursday, May 03, 2012, 11:21 a.m.

City, State: La Crosse, WI

Occupation: Retired Office Worker

Comment: The protections and policies contained in the farm bill are essential to continuing and maintaining the health and nourishment of **All** of the people in his country. That's a pretty hefty responsibility, so I urge you to give this issue careful and conscientious consideration. Thank You.

COMMENT OF GEORGIA MYER

Date Submitted: Monday, April 02, 2012, 8:58 p.m.

City, State: East Calais, VT

Occupation: Magazine Circulation Consultant

Comment: It is essential that the farm bill be renewed so that the hungry in Vermont and elsewhere can rely on USDA to feed their families and themselves. Such an essential necessity shouldn't be held hostage.

COMMENT OF CONNIE MYERS

Date Submitted: Friday, May 18, 2012, 1:23 p.m.

City, State: Saint Charles, IL

Occupation: Retired

Comment: Please close Farm Service Agency state offices. Do Regional offices to administer programs. This could save at least \$1 million per state when you count all the administration salaries, rent, office supplies, office machines *etc.* There would be a possible savings of \$50,000,000 per year. Keep the District Directors and county offices for the hands-on for farmers.

A good Administration example is NCUA.

Size: Less than 50 acres

Comment: Sir, I am a small scale farmer, producer, and Sustainable Food Systems Consultant and Analyst. Our current national food system has been hijacked by BIG Ag and BIG Pharma, particularly with the **Corporation Monsanto**. This organization has made it **Illegal** for Professional, ethical Scientists to conduct studies on the side effects and harm that studies have shown to influence many of our current immunity health problems today. In addition, the current WAR on **Small Scale Farming**, with the FDA arresting people for having a business providing raw milk, cheeses, and heritage animal meats is against **Constitutional Rights** for a **Right To A Happy, and Productive Life**. I cannot **Urge** you **Enough** to please remember why you took your oath and what it means to **Serve** the **People**. We deserve clean, healthy, nutritious food that each individual has chosen. This means **Mandatory Labeling For Genetically Modified Organisms**. This is more dangerous than terrorism across the world, this is **Food Terrorism**, taking over our entire food system, but especially the **Natural Ecosystem** through **Bio-Pollution**. Once it's in our natural ecosystem there is **No Way To Retrieve It**.

Please support our farm bill and our right to public service to help feed the hungry, mothers and children.

Thank you very much for your valuable time and thoughtful consideration.

RENE MYERS.

COMMENT OF SHERI MYERS

Date Submitted: Friday, May 18, 2012, 12:38 p.m.

City, State: McKinney, TX

Occupation: Homemaker

Comment: We support the farm bill 100% and everything it stands for. I am hoping that you will be our voice to congress to let them know this. Corporate agribusiness will continue their in their efforts to ensure that they continue to grow, making themselves wealthier at our expense and our grandchildren's. We may not experience the cumulative effects of corporate agribusiness, but if this farm bill is not passed, our children and theirs, will suffer for us. I know you will do the right thing and I thank you in advance.

COMMENT OF RENEE MYSLIWIEC

Date Submitted: Friday, May 18, 2012, 1:49 p.m.

City, State: St. George, UT

Occupation: Massage Therapist

Comment: As a massage therapist working in the health and wellness field, I recognize the connection between good health and diet. We need better nutrition in our lives and this will come primarily by having good healthy organic foods available to us. I feel that government should give farmers the freedom to farm the way they want to. We need to get rid of GMOs and allow our farmers to produce **Real** food again. The health and wellbeing of our nation depend on it.

COMMENT OF JANE NACHAZEL-RUCK

Date Submitted: Friday, May 18, 2012, 2:28 p.m.

City, State: Los Angeles, CA

Occupation: Administrative Assistant

Comment: The U.S. currently has both a deficit crisis and an obesity crisis. The latter is estimated to generate more health-related costs than smoking—further adding to the deficit. Current farm policies reward agribusiness which does not need funding and generates many dubious products laden with pesticides and fertilizers that have been shown to harm health. Other “farmers” receive funds who do not even farm. We desperately need a new farm bill that supports organic and small farmers while maintaining healthful land practices for our future and supporting good food for “food deserts.” Don’t waste our taxes! Target them where they will support healthful food and the land to grow/raise it rather than line corporate pockets. We know it’s hard to stand up against lobbyists. But you took an oath to work on behalf of the people. Those people include your own families and friends. Help them and us live healthy lives. You can do it!

COMMENT OF ULRIKE NAGEL

Date Submitted: Friday, May 18, 2012, 12:02 p.m.

City, State: Lee, MA

Occupation: Fitness Trainer

Comment: It makes no sense that big agro business is being subsidized, while farms who work on a sustainable basis are not. We do need food that is affordable, but that food should also be healthy for people, farmers and the planet. Food should never really be a business, the results of current farm bills are visible in the overload on our population’s bodies (obesity and diabetes can be traced to corn subsidies), the healthcare system and the environment. We have a chance to rethink the system and I urge you to do so independently of current vested interests, in a truly democratic spirit.

Sincerely,

U. NAGEL.

COMMENT OF ALEXANDRA NAGY

Date Submitted: Saturday, May 19, 2012, 11:52 a.m.

City, State: Irvine, CA

Occupation: Marketing Assistant

Comment: Our current food system is unsustainable. We are producing food in a system that has internal contradictions and will not continue to exist if we do not begin to prioritize the future and health of our soils, water, crops, producers, communities, consumers and the Earth.

I have talked with local farmers at OC Produce, Tanaka Farms and others, and they all agree that a sustainable food system is better for the health of our environment and communities. However, they also agree that it is difficult to enter this market because of competition worsened by the effects of the farm bill. The farm bill’s priorities are not sustainable agriculture and farming. Instead they favor large subsidies to crops such as corn, soybeans and cotton. It is not surprising that these crops are having the largest negative impact on our soils, water and overall health. The subsidies for these staples have created a market situation that ignores environmental risks. I am asking that we rethink the farm bill to support organic agriculture and food systems.

To be clear, I support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Congress must:

- Implement a \$25 billion plan to transition to organic food and farming production, to make sure that 75 percent of U.S. farms are U.S.D.A. organic certified by 2025.
- Feed organic food to all children enrolled in public school lunch programs by the year 2020.

- Pass a Beginning Farmer and Rancher Bill to place a million new farmers on the land by 2020.
- Link conservation compliance with government-subsidized insurance programs and create a cutoff so each farm receives government funds for land only up to 1,000 acres.

COMMENT OF ARISTIDES NAKOS

City, State: Providence, RI

Occupation: University Student

Comment: Greeting dear Senator Cicilline,

I am writing to provide my sentiments on the recently passed farm bill. First, of I applaud the revisions made that ultimately limit the amount of direct payments mega farms can receive. Nonetheless, there is an ensuing need for support of smaller, but promising markets, such as Farmers' Markets and the people behind them. Farmers' Markets are on the rise nationwide and they benefit small farmers that cannot compete with multinationals, while they embrace President Obama's *Know your Farmer, Know your Food* initiative. I've volunteered in a Farmers Market and have witnessed the excitement and demand present. With the government's aid of these markets farmers can become autonomous as well as the respective states. What is more, this will promote the wholesome practices that small farms with small gross margins are trying to make mainstream.

Thank you for your time,

ARISTIDES.

COMMENT OF KATHY NANCE

Date Submitted: Sunday, May 13, 2012, 5:29 p.m.

City, State: Rutherfordton, NC

Occupation: Retired Social Work Administrator

Comment: The farm bill must protect our environment from chemicals, unwanted genetic alterations, and other human induced factors that threaten the natural cycle of things (like killing bees). It must also protect and promote the small local farmer and not subsidize huge corporate farms that ship their product everywhere.

COMMENT OF RAVEN NARAMORE

Date Submitted: Friday, May 18, 2012, 8:48 a.m.

City, State: Lawrence, KS

Occupation: Caterer and Educator

Comment: I heard a comment from a republican congressman the other day that said we should not judge success in this country by the number of people receiving food benefits, but by how many people graduate out of support programs. Closing the school does not increase graduation rates, it simply floods our communities with people with real human needs that are not being met by our social welfare programs, taxing the nonprofit communities resources. I would much rather see our country provide people with healthy food, than to see our tax dollars used to destroy homes, communities and disrupt the lives of millions of people through war. Is that how we should be judged, by how much money we put into the military, or by how much we take care of our own people?

COMMENT OF LISA NARDO

City, State: Delray Beach, FL

Occupation: Manager

Comment: Subsidies need to be ended. The impact on our nation's health is huge when our food supply is driven by what the govt. chooses to subsidize for our farmers.

COMMENT OF DIANE NARDONE-MCDONOUGH

Date Submitted: Friday, May 18, 2012, 11:58 a.m.

City, State: Kittery, ME

Occupation: Privacy Association

Comment: The time has come for us to be smarter as a nation in the way that we feed ourselves. We're completely off track from where we should be. Our "agri-

businesses” that are supposed to be producing foods to feed our country need to be re-focused on **Health** and not on profits & subsidies. Family farms must be permitted to flourish with an emphasis on **Local** production. This is the only way I can see that we can become a healthier nation and break away from the obesity (corn syrup loaded foods) now commercially produced for consumption.

COMMENT OF CHARLENE NASH

Date Submitted: Friday, May 18, 2012, 1:57 p.m.

City, State: Chattanooga, TN

Occupation: Horticulturist

Comment: People in congress are not educated in food and agriculture and often depend on lobbyists to inform and make policy it would seem. People do have a right to clean food grown by farmers they know—any congressman who can study the science of GMO crops and still allow it has neither the depth nor intelligence to be in congress. Why money talks and good sense is thrown out these days should concern every congressman who cares about air, water, food that is not harmful. First do no harm—Monsanto, Dow, Syngenta can’t say that—start rewarding good stewardship and not profit from dangerous practices.

COMMENT OF JANET NASH

Date Submitted: Friday, May 18, 2012, 6:54 p.m.

City, State: Springfield, OR

Occupation: Building Service Contractor

Comment: We need a fair and healthy farm bill, and we need to support the smaller farmers who grow sustainably and organically to protect our human health and the environment, which large conventional agriculturalist **Do Not Do**.

I support the local Foods, Farms and Jobs Act (H.R. 3286). Any new insurance subsidies should be tied directly to compliance with conservation programs like the Conservation Stewardship Program. I also support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). It is also imperative that we maintain the EQIP Organic Initiative.

It is obvious that corporate agribusiness has a stranglehold on our regulatory system and our political leaders. It is shameful that the House Ag Committee is considering cutting out \$4 million from organic research funding and cutting funding to support beginning farmers. Going back to smaller farms is the wave of the future and one of the ways we will protect our food systems. These smaller farmers need much more support and that’s where I want my taxes to go. **Not** to large subsidies for large agribusinesses.

The committee should also make sure that it does not create a new subsidized insurance program that is packed with opportunities for fraud and abuse by large agribusiness.

I resent so much that our leaders allow large agribusiness to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk. Our leaders are out of touch with the rest of the country and with what is required for a sustainable future in agriculture. We need “real” reform, not something that perpetuates the conventional systems that are not sustainable and which are harmful to the environment.

Our leaders need to do their job, and that is to serve the American public, and do what’s best for us—not what the large corporate agribusinesses and their lobbyists pay you to do!

COMMENT OF ROBIN NASON

Date Submitted: Friday, May 18, 2012, 3:39 p.m.

City, State: Hartford, CT

Comment: I’ve been homeless time after time and on the weekends there are no places to eat. My food stamps keep me from going hungry. And when I have a chance to be inside I can cook for me. I look for work every day and can’t find work. People and companies are just not looking for a person in my age group. Thanks to SNAP, I can make it through the month and know that I’m not going to go hungry. And are there are soup kitchens and the people that help to look out for us. The American people.

COMMENT OF GRETCHEN BROOKS NASSAR

Date Submitted: Saturday, May 19, 2012, 2:45 p.m.

City, State: Fort Collins, CO
Occupation: Health & Nutrition Coach
Comment: Dear Congressmen,

As someone who talks with clients regularly about health in terms of diet and lifestyle as well as someone who consistently reads about and studies sustainable food issues, as well as someone who teaches about these issues, I know just how important the farm bill is to our communities.

The current farm bill is doing the country and world a huge disservice by subsidizing the crops and farmers who create unhealthy food and engage in farming practices that are unhealthy, unsustainable, and abusive to land and animals. What we need now is a farm bill that supports small, family, local farms, and preferably ones that are organic or biodynamic. We need farmers that do not use GMO seeds or pesticides, and we need our animal foods to be produced on small, real farms, with attention to animal health, welfare, and care for animals and the land. The farming approach needs to be in line with the land, not against it.

Today's huge Industrialized farms are out-of-touch with the land and are hurting the land, workers, nearby residents, are abusive to animals, and ultimately are creating foods that are harming Americans and people abroad.

I hope you will take my comments seriously, and carefully consider how Congress can improve the farm bill by making it support sustainable, humane, healthy practices that do not support using harmful chemicals and harmful practices.

Thank you for this consideration!

Sincerely,

GRETCHEN BROOKS NASSAR.

COMMENT OF CHRISTY NATHER

Date Submitted: Friday, May 18, 2012, 1:47 p.m.

City, State: Colorado Springs, CO

Comment: Please do not stop supporting organic farming or new farmers. Our family only buys organic because we don't want to poison ourselves with all the pesticides and GMOs found in non organic. This needs to be our future.

COMMENT OF CAMILLE NAVA

Date Submitted: Friday, May 18, 2012, 2:55 p.m.

City, State: Santa Cruz, CA

Occupation: Student

Comment: Dear Congressman Farr,

The farm bill is one of the few pieces of our national legislation that touches so many people's lives so personally, in many places in the world. Respectfully, you understand the competing interests represented in the bill, and also you recognize perceived limits of change in any one bill. But I ask you to remember that unless our laws transcend the current limited adaptability to meaningful change, change done at the right time, it will be to our detriment. We can take this farm bill opportunity to be better leaders for our own country: foster diverse types of agriculture and dismantle the choke in our legal system expressed in our patents, laws toward chemical applications on soil. We can do much more—I think you know this. What the farm bill should expressly support right now are the thousands of government programs (state, Federal, local) and the non-government groups work on the public health epidemic of type 2 diabetes and obesity. Our farm bill can achieve many aims at one time, for the people. For the land, the water, the future generations, the biodiversity, the air. We can shift the foolish arguments away from questions of whether organic can feed the world: respectfully, we know that there are ample calories and nutrients to feed the world and still malnourishment and starvation persist. As you know, we have food policies which plan for and include enormous waste. And all this is the case before we even consider our growing trend of using arable land for biofuel production. When working on this farm bill, I hope you use the quiver for the people. We can take poisons, toxins, and an enormous amount of fossil fuels out of our farming systems. As you know, we have nothing to lose in trying. To not attempt to legally support* ways of farming that create less ecosystem and public health havoc is highly irresponsible. (*Remove current laws that serve nothing but corporate profit regarding gene patenting and suffocating Trade Agreements. As you know, these are a distortion of our democracy and should be outlawed.) It is not befitting of our nation.

Sincerely,

CAMILLE NAVA.

COMMENT OF KELSEY NAYLOR

Size: Less than 50 acres

Comment: Our country is at a crossroads economically and socially. In order to create a healthier, more productive nation, we must look to the backbone of civilization; agriculture. Not just any agriculture will do however. We must consider the harmful effects of subsidy-supported, industrial monoculture. If we want to ensure the future of Americans, we must look to more sustainable options. Small farmers across the country are making great sacrifices to do the right thing. They follow methods that increase soil fertility for future generations, provide greater animal welfare and maintain the crop diversity necessary to ensure food security. Most importantly, they provide nourishment for their community. These brave Americans must be encouraged rather than buried under corporate interests.

COMMENT OF KAREN NEAL

Date Submitted: Saturday, May 19, 2012, 7:38 p.m.

City, State: Cherry Log, GA

Occupation: Self-Employed

Comment: I want to see future farm bills focusing on and lending much greater support to locally grown food produced by organic methods and the farmers who produce it. I am definitely against genetically modified food stuff. I am outraged that my choice of whether to knowingly eat genetically altered food has been totally taken away by big corporations & my Government. My Government is suppose to protect my right to choose, **Not Choose For Me!** Since my Government has already shoved this down the consumers throats and allowed my choice to be taken away by non-labeling of GM/GMO ingredients, **I Say Fix This Atrocity So Consumers Can Exercise Choice** between foods that have genetically modified, conventional or organic origins. **I Want A Required Labeling System As Well As A Reliable Separation Of GM And Non-GM Organisms At Production Level And Throughout The Entire Processing Chain!**

COMMENT OF KYLE NEEDHAM

Date Submitted: Friday, May 18, 2012, 1:04 p.m.

Occupation: Self-Employed

Comment: Please create a farm bill that supports our development in a sustainable way without having the interests of industrial lobbyists. We are a nation that needs to look toward the future with our intentions for our citizens and an organic farm bill would do just that.

COMMENT OF TAWNI NEESER

Date Submitted: Friday, May 18, 2012, 12:13 p.m.

City, State: Anchorage, AK

Occupation: Nurse

Comment: America has gone from one of the greatest nations, to one of the worst. We also have one of the highest amounts of obese and sick people on Earth. I believe this is partly due to the fact that people eat what is "quick and easy". However, these "quick and easy" foods are not healthy foods and not good for our bodies. Our bodies don't recognize all these chemicals and hormones. Please make a bill helping small fresh organic farms. America needs to start fixing itself. Starting from the inside out. Thank you.

COMMENT OF MARTIA NEHER

Date Submitted: Saturday, May 19, 2012, 12:58 a.m.

City, State: Elgin, ND

Occupation: Housewife

Comment: I care about what I am feeding my family and big agriculture is not providing clean healthy food to choose from when will we actually get GMO foods labeled so I know which products are contaminated with pesticides and hormones? These things affect both people and the environment aka bees, weeds, and insect pests.

COMMENT OF HELGA NEHL

Date Submitted: Friday, May 18, 2012, 2:46 p.m.

City, State: St. Augustine, FL

Occupation: Therapist

Comment: It angers me that small farmers, health food co-ops are under attack and on the brink of extinction. This is a threat to the well-being of our country in more ways than one. First, this is supposed to be the land of the free and free enterprise. People have the right to pursue an honest livelihood. What can be more ethical than providing people with wholesome foods? Further everyone benefits from competition. Let the people decide what they want to buy! Allow more businesses to compete. We're a nation of sick people. Obesity continues to rise as does diabetes 2 in our children, unheard of in previous generations. If we really want to heal our people we should encourage the production of healthy foods instead of trying to put those farmers out of business. These are very strange times we live in. Corruption, dishonesty, sloth are being rewarded while honesty, initiative, a strong work ethic are being punished. It is my hope that this Congress does the right thing regarding our small farmers.

COMMENT OF JENNA NEHL

Date Submitted: Friday, May 18, 2012, 2:27 p.m.

City, State: Seattle, WA

Occupation: Holistic Health Practitioner, Esthetician

Comment: You must be aware that food without spray, chemicals (yes the ones you see being sprayed over our fruits and veggies with men wearing protective face & body masks), and non-GMO are **Extremely** important for our Health, our environment, our animals, water supply, and our Future. **Please** help to make sure we are all protected. You guys are the ones who were voted on by us, to protect us. Please make sure we have all we need for good, clean, pure food. **You** are eating this too, your children, your families, friends. Our people are getting sick, and chemicals **Should Not** be on/in our food!

Thank you,

JENNA N.,
Seattle, WA.

COMMENT OF TERRI NEIFERT

Date Submitted: Friday, April 27, 2012, 10:12 a.m.

City, State: Bethlehem, PA

Occupation: Disabled

Comment: I am a supporter of Feeding America and my local food bank. Despite the recent improvement of the economy, there are still many people who may not know where their next meal will come from. We need a strong farm bill to help put food on the table for vulnerable children, seniors, and low-income families. Please pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. Cutting these programs is not the way to balance the budget. I urge you make them a priority in the next farm bill.

Also, I am on disability and need food bank every month. I don't qualify for food stamps. I am aware that pregnant women, children under 5 and senior get vouchers for fresh fruits and vegetable. I think since I qualify for medical assistance and Medicare that I should be given access to those food vouchers too. Can't you give them to all low income people on SSDI? Every month, I run out of food.

COMMENT OF CAROL NEIMAN

Date Submitted: Friday, May 18, 2012, 1:40 p.m.

City, State: Junction, TX

Occupation: Freelance Editor, Part-Time Secretary, Semi-Retired

Comment: Dear Rep. Conaway,

I quote:

"The Agriculture Committee put forward a proposal that will make significant reforms to SNAP. Our package contains new measures designed to better catch misuse and abuse in the program and ensure that the folks who actually need SNAP benefits continue receiving them.

SNAP will continue to be an important part of the safety net for many Americans in need, however support must continue to come from the communities we live in and the friends and family that surround us."

I live in a food desert, with only one supermarket that sells overpriced staples and a limited supply of produce, much of which is hybridized for long shelf life and, even at that, looks like the remains of what other stores passed by at least a week ago. When I look around me, I also suspect I live in an epicenter of the American obesity epidemic. There are less than a handful of local restaurants, but an abundance of fast-food chains thanks to Interstate 10 on the edge of town.

Crafting a farm bill that truly begins to address these problems by supporting sustainable farming and healthier food choices for everyone would in fact be of help to my community, friends, and family. Maybe some day, we would even no longer have to drive at least an hour in the direction of I-35 to get a variety of fresh, locally grown produce.

I realize that a thoughtful approach to examine all the toxic side effects—on people’s health and on the health of the land—of our current “big agribusiness” centered policies is not easy. It’s also probably not very good for your campaign coffers. Ordinary folks and real farmers, after all, don’t have that much money to give to politicians or to pay lobbyists to represent their interests. But as I see it, this is your job—not raising money for your next campaign. If you’d like to do the job of representing all of your constituents, and not just those with big money and a vested interest in making even more of it, please consider the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Respectfully,

CAROL NEIMAN.

COMMENT OF ZACHARY NELMS

Date Submitted: Friday, May 18, 2012, 10:57 p.m.

City, State: Portland, OR

Occupation: Physician

Comment: It is important that we remove subsidies for unhealthy farming practices such as meat and corn production and give subsidies to vegetable and fruit producers. This will in effect give the public incentives to consume healthier food leading to a healthier population and lower overall health care costs.

COMMENT OF DAVID NELSON

Date Submitted: Friday, May 18, 2012, 4:49 p.m.

City, State: Madison, WI

Occupation: Ag Researcher

Comment: Food is a policy area which often receives short shrift in deciding priorities. Please ensure a safe food system, and enable any citizen the right to participate in farming and urban agriculture. Many of the agricultural products we sell for consumption are not healthful and in some cases contain little we should consider food.

COMMENT OF GREG NELSON

Date Submitted: Friday, May 18, 2012, 12:36 p.m.

City, State: Ithaca, NY

Occupation: Software Engineer

Comment: I wanted to let you know that I strongly support our small farmers in NY. I would like to see subsidies for huge agribusiness curtailed so that small farmers would have a fair chance. Small farms provide far more jobs than large ones do, and as you know our country needs jobs. You don’t want to be on record as opposing job creation, right?

I strongly support the Local Foods, Farms and Jobs Act (H.R. 3286) and the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). I would also like to see a continuation of the EQIP Organic Initiative.

Thank you for your consideration. We are paying attention to what you stand for.

GREG NELSON,
Ithaca, NY.

COMMENT OF JON NELSON

Date Submitted: Saturday, May 19, 2012, 4:01 p.m.

City, State: Penn Valley, CA

Occupation: Engineer

Comment: I am very troubled to see the corporate lobbying and pressure from the likes of Monsanto so often trumps the will and benefit of citizen/voters, science and the environment. When enough people wake up to this the future of those politicians who have allowed this to happen will suffer, as it should.

COMMENT OF NANCY NESTAVAL

Date Submitted: Tuesday, March 20, 2012, 3:25 p.m.

City, State: Lubbock, TX

Occupation: Retired Communications Manager

Comment: I believe farm subsidies are misguided. If free market conditions prevailed, farmers would diversify their crops according to demand. The country should never have put a subsidy on ethanol. That skewed food supplies around the globe. We don't need to give corporate farmers any more help.

COMMENT OF JUDY NEUGER

Date Submitted: Friday, May 18, 2012, 12:17 p.m.

City, State: Moreland Hills, OH

Occupation: Homemaker

Comment: The saying goes, "We are what we eat". Please consider what you are giving us and the following generations to eat. What goes in the ground today becomes the food on the shelves tomorrow. Hopefully you will not be persuaded by Monsanto money, but by the quality of life you want your constituents to have.

COMMENTS OF MARCY NEVILLE

Date Submitted: Tuesday, March 20, 2012, 9:30 p.m.

City, State: Keene Valley, NY

Producer/Non-producer: Producer

Type: Livestock, Dairy

Size: Less than 50 acres

Comment: Please require labeling of GMO's. I am forced to buy expensive organic feed for my animals to avoid feeding "Round-Up", a known carcinogen, to them. Since the EPA approved "Round-Up ready" alfalfa, corn, and soybeans, my feed supplier has no way of knowing if their feed contains this, thus they lose me as a customer, and I am forced to pay a premium I can't afford.

Date Submitted: Friday, May 18, 2012, 11:58 a.m.

Comment: Labeling of GMO's would really help control my operation's feed costs. I cannot feed "Round-Up Ready" products and so am forced to buy organic grain which is costly and not widely available. **Please Label GMO's!**

COMMENT OF JAMES NEWBERRY

Date Submitted: Friday, May 18, 2012, 5:35 p.m.

City, State: New Haven, CT

Occupation: Lighting Equipment Sales

Comment: This indebted country needs to stop subsidizing Big Oil and Big Ag. We should allow millions of Americans to start farming again through the encouragement of organic family farming, along with the educational, security and economic advantages this could provide.

COMMENT OF ARIANA NEWCOMER

Date Submitted: Saturday, May 19, 2012, 12:02 a.m.

City, State: Los Gatos, CA

Occupation: Voice Teacher & Coach

Comment: Our farm policy needs to be amended to promote the production of fruits and vegetables over grains, and to protect humans and environment from GMO "foods" that are destroying our soil microbiology, creating super-weeds and promoting the overuse of chemicals.

COMMENT OF DAWN NEWCOMER

Date Submitted: Friday, May 18, 2012, 11:51 a.m.

City, State: Spring, TX

Occupation: Marketing Consultant

Comment: Small family farms need support, especially in organic practices. Large industrial agriculture has too much power. Help to level the playing field by supporting small organic farmers trying to compete in the marketplace.

COMMENT OF SHELLIE NEWELL

Date Submitted: Friday, April 20, 2012, 3:31 p.m.

City, State: Graniteville, SC

Occupation: Biomedical and Science Editor

Comment: Thank you for working hard on this Bill. Unfortunately, it continues to reward large agribusinesses and does not support organic farming families. Seed diversity is important, as are: support of local farmers' markets; food programs for needy children and elderly; hormone-free/slime-free/bacteria-free meats and vegetables (don't decrease the number of USDA Inspectors); and public education. Also critically important are developing nontoxic pesticides and fertilizers that preserve/create clean groundwater; collecting animal waste for methane generation; and utilizing systems (*e.g.*, Habitat for Humanity strategies) for efficient farming techniques. Please do not support the underwriting of petroleum-based agri-products. The health of our nation depends on your vote. Thank you for listening.

Ms. SHELLIE NEWELL.

COMMENT OF LEONE NEWMARK

Date Submitted: Friday, May 18, 2012, 3:34 p.m.

City, State: Davie, FL

Comment: Only support local and organic and sustainable farmers, **Not** factory farms **Bad** for animals and humans and the planet. **Stop** large agribusiness support and **No** more Round Up or GMO/GE Monsanto toxic foods!

COMMENT OF CECELIA NEWTON

Date Submitted: Friday, May 18, 2012, 10:51 p.m.

City, State: Minneapolis, MN

Comment: We need a farm bill that provides for healthy food and a healthy environment. Fully fund conservation and make sure new insurance subsidies are directly tied to complying with conservation programs. Support all provisions for beginning farmers.

Thanks,

CECELIA NEWTON.

COMMENT OF HEATHER NEWTON

Date Submitted: Friday, May 18, 2012, 6:26 p.m.

City, State: Portland, OR

Occupation: Writer/Editor

Comment: The megalithic factory farming in this country is unhealthy for people and the environment. We must change the model to focus on health and sustainability instead of huge profits for the few.

COMMENT OF JOE NEWTON

Date Submitted: Friday, May 18, 2012, 12:09 p.m.

City, State: Brooklyn, NY

Occupation: Teacher

Comment: Healthy food is a critical aspect of keeping our families strong and healthy, and thus productive.

I have great concern about the tendency to favor mega-farms over independent producers, primarily because the big agribusiness companies become focused on the bottom line, rather than creating a healthy food supply.

Please ensure the laws are designed with the well being of our citizens in mind, rather than catering to the needs of giant corporations.

If you keep that idea in mind (truly and honestly) then I am sure you will make the right choices. For me that means supporting diversity, organics, local farm movements, and protecting the environment against unnecessary chemicals, *etc.*
My thanks for your time.

COMMENT OF MARILYN NEWTON

Date Submitted: Thursday, May 17, 2012, 2:12 a.m.

City, State: Milwaukee, OR

Occupation: Retired Wallpapering Contractor

Comment: It is essential for the farm bill to increase support for programs that deliver needed nutrition to hungry children and families. The numbers in need are rising yearly, this is no time to reduce support.

Also important is aid to **Family Farms** and rural communities. Factory farms should not receive Federal dollars. There should be a cap on farm aid in order to weed out the factory farms that are well able to pay their own way. \$275,000 per family farm would be a reasonable limit for subsidies.

Look at the real needs of real people, not political posturing. Work for the common good.

COMMENT OF JEANNIE NICHOLS

Date Submitted: Sunday, May 20, 2012, 5:30 p.m.

City, State: Tularosa, NM

Producer/Non-producer: Producer

Type: Dry Beans & Peas, Fruits, Vegetables

Size: Less than 50 acres

Comment: I am in my first year of production at this location after many years of not. I value clean food that has not had chemical exposure.

I abhor what big business is doing to the food widely available to the general public. I endorse organic farming, and hope to produce more of those items. While

I am not a public speaker I urge those in public 'service' to listen to the intent of my words and those of others who choose to address you and produce food. Food that is clean and free of the taint of chemicals. Our bodies were not designed to process chemicals. The state of the general public's state of being is far too often way short of radiant health. Clean food can help change that.

Personally I have eradicated from my intake most additives in food. I have energy and health and perform at the level of half my years. I look forward to being able to find clean food more easily in the future.

Thank you for the opportunity to voice my opinion.

Respectfully,

JEANNIE NICHOLS, *SCCI(e)*.

COMMENT OF JENNY NICHOLS

City, State: Sun Valley, NV

Occupation: Artist

Comment: We need farming policies that protect not just the corporations and producers, but the people who must consume these goods. We need to make good policy that keeps the health and welfare of our citizens in mind. Let's make good policy!

COMMENT OF WILLIAM NICHOLS

Date Submitted: Friday, May 18, 2012, 12:01 p.m.

City, State: West Lebanon, NH

Occupation: Teacher

Comment: We need a farm policy that shifts subsidies from large, wealthy agribusinesses to small, sustainable growers. We need a policy that does not encourage the use of food as biofuels. In this time of unemployment we need a farm policy that doesn't drive people away from rural communities to cities. We need a farm policy that creates jobs and protect soil and water.

COMMENT OF MARGARET "KA'IMI" NICHOLSON

Date Submitted: Saturday, May 19, 2012, 3:19 p.m.

City, State: Honolulu, HI

Occupation: Minister

Comment: My health depends upon eating food that is free of the toxins of pesticides & GMOs. Federal U.S. subsidies of agriculture are supporting toxic means of farming & corporate control by five companies over 95% of our food supply. If we are going to support agriculture, it should be to family farmers growing organic food for their communities, for the health of our land & our people.

Thank you.

Aloha,

MARGARET "KA'IMI" NICHOLSON.

COMMENT OF NORMA NICHOLSON

Date Submitted: Sunday, May 20, 2012, 9:22 a.m.

Occupation: Retired

Comment: I was raised on a farm and know the importance of having **Real** food produced from **Non-GMO** seeds that produce healthy food for all kinds of animals (including humans). The artificial foods produced by the GMO seeds and food industry are literally killing all life form on the planet and causing all kinds of disease.

This kind of treachery must be stopped and commercial farms must be stopped.

We need small farms that get a fair price for their work and the ability to do direct sales to the public without government interference in free commerce. The current terrorism by law enforcement in farm sales is illegal and should be treated as such. The consumer has a right to determine what they eat and where they get it, be it a grocery, home garden or from a farmer or neighbor. This is Unconstitutional restriction of commerce and has to stop.

Give freedom back to the people and stop Big Brother.

COMMENT OF JOHN NICOL

Date Submitted: Thursday, May 10, 2012, 12:25 p.m.

City, State: Portland, OR

Occupation: Residential Architecture

Comment: At age 72, I am still working when I can. My self-employed wife has seen her income shrink by ⅓. Social Security and her income do not support us fully, and we rely heavily on SNAP to sustain us. We are typical of many Americans who have seen bad policy and greed strip them of their incomes. I am in the street with Occupy, and I can tell you that, if you don't keep the people fed, you are looking at a revolution.

COMMENT OF NIKKI NICOLA

Date Submitted: Friday, May 18, 2012, 1:48 p.m.

City, State: Davis, CA

Occupation: Integrated Pest Management Researcher

Comment: With obesity becoming more prevalent in our population, it is more important now than ever to subsidize fruits, nuts, and vegetables, and not the commodities grown to produce cheap sources of meat and corn syrup.

Not only is factory farmed meat a huge source of pollution and greenhouse gasses, it is insidiously inhumane. Smaller, diverse farms require fewer chemical inputs, are safer for the environment, buffer against wide spread crop loss, and employ more people.

I hope you will consider the health of the people and environment over the wealth of giant agro-industry.

Sincerely,

NIKKI NICOLA.

COMMENT OF ANNE NICOLSON

Comment: Whatever you do, don't reduce the amount of food getting to the hungry. We have enough problems as it is. If food starts to go away what do think this is going to mean for people living in food deserts such as this county in southwest New Mexico. We have way too many people without resources to feed them. Don't make it worse.

COMMENT OF ROBERT NIERRERNARD

Date Submitted: Friday, May 18, 2012, 3:47 p.m.
City, State: Hartford, CT
Comment: This will not be fair to those who receive SNAP food. Why tear something from those who need it, such as myself. Things are getting worse and not better and struggling with bills and hard to get food for my household and I need and rely on SNAP to help me get some food for me and my family.

COMMENT OF ALISON NIHART

Date Submitted: Friday, May 18, 2012, 4:39 p.m.
City, State: Burlington, VT
Occupation: Student
Comment: To the members of the House Agriculture Committee:
 I would like to see funding for a program that trains new farmers in low-input methods. This would highlight sun-based systems that utilize human and animal labor in place of fossil fuels and crop rotation and other agroecological methods in place of synthetic chemicals. This is a matter of national security, as future oil price increases and supply shortages will have significant negative impacts on our current food system. We need a fleet of ready-trained farmers who can produce high yields using low-input agricultural methods. This funding could be distributed to programs that are already involved in these efforts in order to increase their capacity and provide scholarships for students.
 I would like to see the conservation program budgets increased and the commodity subsidies decreased. I understand that commodity farmers are struggling to make ends meet, but I would rather see loan forgiveness programs than yearly payments through a system that artificially lowers the cost of commodities. I am tired of having my tax dollars subsidize soft drinks and other unhealthy, highly processed foods made from cheap corn.
 I would like the School Lunch and Breakfast Programs to include more provisions that allow schools to source local and organic ingredients, even if they are not the least expensive option.
 I would like to see continued support for nutrition assistance programs across the board.
 Last, I would like to see funding for programs that help farmers transition to organic and sustainable farming practices, including funding to cover the cost of training and organic certification.
 Thank you very much for your continued work.

COMMENT OF KATHERINE NIKOLAIEV

Occupation: Legal Asst.

Comment: Healthier farming practices translates to healthy citizens. Our future generation depends on it. Do you really want your family, friends and neighbors to suffer from various forms of cancers, tumors and other ailments stemming from the consumption of toxic chemicals?

COMMENT OF DENISE NOBLE

Date Submitted: Friday, May 18, 2012, 8:21 p.m.

City, State: Richmond, VT

Occupation: Stay-at-Home Mom

Comment: I'm writing to let you all know that I support and would like you to support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative

We have got to get our country out of mega-agriculture and back to supporting local and organic farms. We are being poisoned by the genetically altered, pesticide ridden "food" that is being mass produced . . . not to mention the harm that it does to our natural resources. Please take steps in the right direction to give every American affordable, locally grown and organic whole foods. Our country will be a heck of a lot healthier and well off in so many ways.

Thank you!

DENISE NOBLE.

COMMENT OF JUNE NOBLE

Occupation: Disabled Vet

Comment: I personally believe that organic farming is the revitalization of the country and could easily be the end to world hunger. A subject of extreme importance.

COMMENT OF KRISTOF NORDIN

Date Submitted: Saturday, May 19, 2012, 1:53 a.m.

City, State: Holmen, WI

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: The farm bill should be used to ensure the sustainability of agriculture in harmony with the natural systems that allow agricultural production to take place. Subsidies should not be given to huge corporate farming schemes, they should be used to help smaller start-up industries and to encourage new innovations in organics, alternative energies, and sustainable methods. Currently the farm bill seems to be heavily weighted towards large, unsustainable, chemically-laden, industrial approaches to food production . . . it would be nice to see the farm bill reflect policies that ensure a healthy future for people and the Earth that sustains us.

COMMENT OF KATHARINA NORDMANN

Date Submitted: Friday, May 11, 2012, 2:48 p.m.

City, State: Carle Place, NY

Occupation: Mother

Comment: My deepest concern is the humane treatment of farm animals. I know about the cruelty that goes on factory farms and it sickens me that humans are allowed to get away with this kind of treatment of God's creatures. Animals are abused, tortured, babies taken from their mothers. The list goes on. I urge you to view these videos and you will be sickened too, and will be looking for reform. This is all passed on to us in the form of contaminated meat, and dairy products that come from cows that are forced to produce milk in a way that is not natural. We will all pay the price in the long run when the planet is ridden with cancer and disease.

City, State: Sag Harbor, NY

Occupation: Architect

Comment: We need to stop subsidizing mega farms that use harmful practices, too much insecticide, too much fertilized, too much concentrated waste . . . and develop a farm policy that can produce **Good** from healthy farms and animals. I don't need GMOs, antibiotics or growth hormones from my food.

COMMENT OF KALEOPONO NORRIS

Date Submitted: Friday, May 18, 2012, 4:50 p.m.

City, State: Holualoa, HI

Producer/Non-producer: Producer

Type: Fruits, Nuts

Size: Less than 50 acres

Comment: Eliminate subsidies that enable huge agriculture production, processing and marketing corporations to sell product at below small farm costs of production. The playing field truly needs to be leveled! Broad public interest requires policy that guides the population into healthy eating habits, instead of the cheap industrial food lacking many important nutrients, filled with sugar and fat that promotes obesity, a cascade of medical problems . . . all of which costs the taxpayers—not the purveyors of this poison—end up paying for. The system is absolutely insane! *Ho'oponopono* it!

COMMENT OF PATRICIA NORRIS

Date Submitted: Friday, May 18, 2012, 7:55 p.m.

City, State: Willits, CA

Occupation: Associate Professor of Psychology

Comment: It is time to create a farm policy that puts priority on the health and well being of the land, and the citizenry, and all of life. It is important to have a policy that features organic food, sustainability, nutritive value of the land, and that avoids, as much as possible, pesticides and toxins on the land. I trust that you will do what you can to move in this direction with farm policies, for better health and livelihood. Respectfully submitted.

COMMENT OF SCOTT NORRIS

Date Submitted: Saturday, May 19, 2012, 6:45 p.m.

City, State: Broomfield, CO

Occupation: Computer Administrator

Comment: Please do not cut funds for nutrition, conservations and support for organic and sustainable agriculture. Our Nation's health and well-being are at stake! I know many people with horrible food allergies (including my children). I have no doubt whatsoever that pesticides, genetic modified crops and pollutants are major factors in the increasing population of people with food allergies.

COMMENT OF KIM NORTHROP

Date Submitted: Friday, May 18, 2012, 10:20 a.m.

City, State: Sarasota, FL

Occupation: Marketing Consultant

Comment: Hi,

I think fair and sustainable food production is a key defense and economic issue. Dependence on one or two U.S. food producers and key crops, or non-native food resources, puts us unnecessarily at risk or resource disruption.

Thank you,

KIM NORTHROP.

COMMENT OF DEAN NORTON

Date Submitted: Tuesday, March 20, 2012, 8:27 p.m.

City, State: Elba, NY

Occupation: President, State Board of Directors, New York Farm Burea

Producer/Non-producer: Producer

Type: Dairy

Size: 500–999 acres

Comment: On behalf of New York Farm Burea's nearly 30,000 members, thank you for allowing our organization to submit comments for the record of your Farm Bill Field Hearing in Saranac Lake, N.Y. Our farmers were thrilled that the com-

mittee selected New York State as one of four field hearing locations and I hope your time in Upstate New York allowed you to see the great diversity of agriculture that we are fortunate enough to have in the Northeast. I hope you were also able to gain a better understanding of the unique challenges our farmers face and that you could spend time thinking about how these could best be addressed in the next farm bill.

Our farmers know this farm bill will be negotiated during an extremely difficult budget environment and that there will likely be cuts to all titles of the farm bill. Farmers are prepared to do their part, but we don't want to see the core farm programs receive disproportionate cuts and that important safety nets are in place for all commodities. Similarly, we would like to see cuts taken thoughtfully as this bill will set farm and nutrition policy for the coming 5 years. This will be our policy whether the farm and general economy is good or bad, so we must take into consideration both environments, regardless of the prevailing conditions today.

Commodities

Even though many commodities are receiving strong prices now, there is no guarantee they will stay that way and the farm bill must be structured to consider all market scenarios. We cannot make excessive cuts to the core commodity programs that actually help farmers grow food if we expect them to continue feeding a growing world population with healthy, safe food. Cuts that erode the foundation of our safety nets and risk management tools place our agricultural system and our nation's food security at risk.

That said, we are supportive of cutting the direct payment program in favor of more crop insurance-type solutions that meet the needs of a broader range of agricultural producers. Enacting different programs for each commodity is a poor use of our time and Federal resources. Instead, we should focus on a broad-based solution that can be easily tailored to meet the needs of each farmer.

Dairy Policy

New York is the fourth largest dairy producing state and accounts for 1/2 of the agricultural receipts in the state, so the sustainability of dairies of all sizes is of significant importance to New York Farm Bureau.

Dairy policy needs to undergo a major change in the coming farm bill to meet the needs of today's dairy community. Outdated policy has left our farmers with safety nets that just aren't strong enough for the excessive peaks and valleys experienced in dairy and feed prices during the last 1/2 decade. Milk price and input price volatility have made farm profitability difficult to attain. Right now milk prices are projected to decline this year and fuel costs are taking off. The Federal safety net programs must be tweaked in order to help producers survive the next 5 years of uncertain market stability.

The existing safety net programs, like the Milk Income Loss Contract and Dairy Price Support Program, just aren't working. MILC did provide some relief during the 2009 pricing crisis, but was not able to sufficiently bridge the gap. Even though this has been a reasonably good program for our smaller dairies, our farmers recognize that this program is not really meeting the needs. DPSP has lost relevancy with our current economic realities and provided no assistance during the 2009 pricing crisis. Both of these programs should be replaced in the next farm bill.

Our farmers support the tenets of a dairy margin insurance program and a voluntary supply management program as included in Congressman Peterson's Dairy Security Act (H.R. 3062). We would like to see this plan move forward, but it is important to note that should this be adopted it will take time to implement by USDA. In the interim, it is important that dairies, especially smaller farms, not be left without a safety net—this is why we believe MILC must remain in force until a new program is working.

Also, on the topic of crop insurance, dairy farmers in our state are very interested in the Livestock Gross Margin for dairy program since it is the only insurance product currently available that protects the margin between dairy prices and feed costs. However, only a very limited number of producers in the state have been able to take advantage of this program because of its severe underfunding. I understand the last sign-up period closed in 20 minutes and hundreds of dairies in New York alone were shut-out. This is an important program that's working and I hope you will look at better funding this in the next farm bill as it could play an important role as a next-generation risk management tool for our farms.

Crop Insurance And Risk Management

Crop insurance and other risk management tools work well for a number of crops, but not necessarily all of the products we grow in New York, as the severe floods in New York this past fall demonstrated. As direct payments are closely scrutinized,

crop insurance will continue to evolve and become a more important risk management tool. We just need to make sure it is meeting the needs of specialty and livestock producers so they are as protected as traditional row crop farmers.

Many of our specialty crops still suffer from a lack of adequate crop insurance options and don't have the risk management tools they need to protect their farms. Diversified farms manage their risk to a large degree simply by being diversified, but as we saw this past year, these farms can't protect themselves from catastrophic losses that wash away entire farms.

There are very limited crop insurance options for our farmers, especially those growing for the fresh market—apples, potatoes, sweet corn, and in a few counties, onions and cabbage—so all other operations have to rely on the Non-Insurance Assistance Program (NAP).

NAP requires a 50 percent loss before there is any payment to farmers, and then even with a complete crop loss, farmers really only get assistance for 25 percent. This program is part of the eligibility for disaster assistance programs, but doesn't really provide catastrophic loss protection, let alone serving as a substitute for crop insurance.

Our farmers in New York are asking that Congress instruct USDA to look at crop insurance options, run the numbers, and develop crop insurance options that would adequately protect our specialty crop farmers, including multi-crop operations. Our farmers can offer feedback and assistance, but to develop an actuarially sound program that could protect these types of operations, we really need the assistance of USDA's expertise.

In addition, our specialty crop farmers would like to see the next farm bill include a buy-up option for NAP. In the absence of crop insurance options that meet their needs, this would allow farmers to better protect the key crops on their farms. Streamlined record-keeping for multi-crop farms would also help farmers with sometimes 30 or 40 different crops, remain compliant with NAP paperwork more easily.

One of the problems facing all our producers using crop insurance is that when weather events damage crops in several successive years, insurance protection begins to fail exactly when farmers need it the most. Disaster declaration years currently count against producers' production history, meaning they collect lower insurance payments the more they are hit by natural disasters. It does happen that some combination of flooding, hail, frost and severe wind damage can affect Northeast crops more than once in a 5 year period. These farmers shouldn't be penalized because of weather conditions beyond their control. Crop insurance should work to protect our farmers from these kind of losses instead of penalizing them.

In fact, our farmers believe the need for crop insurance payouts in some areas of the state could be significantly mitigated by urging the Army Corp of Engineers to dredge and shape waterways so that widespread—and in some cases, repeated—flooding resulting from sediment deposits does not destroy farms and communities. If Army Corp worked more closely with our communities, we believe everyone would benefit.

Farm savings accounts is a concept that has been around for many years and should be considered in the next farm bill as a useful risk management tool that farmers pay for themselves. Used as part of a comprehensive business strategy, FSAs could be a valuable tool for all farmers to use their own funds to better weather poor production years, poor commodity prices and years of ballooning input costs.

Disaster Assistance Programs

Permanent disaster assistance was approved in the last farm bill for the first time. This was intended to replace Ad Hoc assistance, which was unpredictable and unreliable. NYFB supports permanent disaster assistance because it provides farmers with some certainty in disaster situations. Cuts in disaster assistance programs potentially mean less protection for Northeast farmers if a more useable crop insurance program is not developed.

The Supplemental Revenue Disaster Assistance Program (SURE) was created in the last farm bill and intended to be a whole-farm disaster assistance program for crop production or quality losses. In theory this program is just what Northeast agriculture needs, but SURE's program hasn't lived up to expectations and has proven unsuccessful for farmers.

The other permanent disaster programs, such as the Tree Assistance Program (TAP), Livestock Indemnity Program (LIP) and Emergency Assistance for Livestock, Honey Bees and Farm-raised Fish (ELAP) have worked well for farmers, met an important need, and we hope they will be preserved.

Following the disasters last year, many of our farmers became familiar with the Emergency Conservation Program (ECP), which has been an important recovery tool to help our affected farmers replace conservation practices and get their farms ready

for the next planting season. After experiencing such total disasters, I urge you to maintain this program with adequate funding, along with the Emergency Watershed Protection Program (EWP), which helps our greater communities, so conservation in disaster areas can be quickly addressed.

Conservation

With growing environmental demands on farmers, we have to be careful that the farm bill is written and appropriated in a way that ensures farmers have the tools they need to comply with conservation mandates. These include the TMDL standards for the Chesapeake Bay Watershed that farmers in the Southern Tier of our state are facing and proposed changes to the scope of waters regulated by the EPA.

NYFB supports streamlining and consolidating the many conservation programs administered by USDA. This will hopefully lead to savings, as well as allowing farmers to better understand the options available. However, I caution you on any structural changes to the Environmental Quality Incentives Program (EQIP). This has been widely used in New York and works very well. Without this valuable program, our farmers won't be able to adequately implement the environmental protection work they have already begun and meet the time requirements of the TMDL.

EQIP remains the most essential conservation program for our farmers. Unfortunately, even though the 2008 Farm Bill scheduled increases in funding for this program, it has faced cuts each year since the bill was passed. Despite funding cuts, the need for EQIP has only increased. While 364 EQIP contracts were funded to the tune of \$13.3 million in 2009, more than 1,650 applications and \$39 million went unfunded. This was the last year for which complete data is available. That means for every \$1 allocated in EQIP funding, there was a need for \$2+ to meet the current needs of farmers.

The formula for allocating EQIP funds to states should be reviewed so it more accurately represents the agriculture in each state. For instance, in 2010 Wyoming received slightly more in EQIP funding than New York, but our agricultural production is four times that state's. We also have three times as many farms and 4 ° times as much cropland. I don't mean to pick on Wyoming and we certainly respect their agricultural producers, and while the farms in Wyoming are generally larger than ours, this distribution still seems inequitable and should be reviewed. The formula used to allocate EQIP funds does not, for instance, account for the fact that New York farmers now have to implement the Chesapeake Bay TMDL WIP or that the farms in our water-rich state have to implement practices to prevent run-off and account for weather events to a much greater extent than other, drier states in the West.

EQIP works so well in New York because it helps to leverage state and local funds for environmental conservation, allowing Federal and local officials to really target the most needed projects in the state. Funding for EQIP is very important, but farmers still need the expertise of "boots on the ground" staffing in order to navigate the often complicated world of conservation practices. I urge you to adequately fund conservation technical assistance (TA) so NRCS can continue to deliver farm bill programs in coordination with local conservation districts. This relationship is essential to carry out the goals of the farm bill conservation programs.

NYFB also hopes the Agriculture Committee focuses its resources on the working lands programs of the conservation title, which keep productive land in operation and protect the environment at the same time. We believe a greater emphasis on these programs, rather than the land retirement programs, is the best use of our Federal conservation dollars.

In addition to EQIP, the Farm and Ranchland Protection Program has proven an important and useful tool in New York, where development pressure on farmland can be intense. Again, this program has leveraged state, local and private funds to protect vast acres of farmland in our state.

Horticulture & Specialty Crops

With the addition in the 2008 Farm Bill of a specialty crops title, we must be sure not to lose ground on recognizing specialty crops in the next farm bill and addressing their specific needs. Specialty crops make up a large portion of New York agriculture and research and education programs are essential to ensuring that this sector can compete in the global marketplace.

The Specialty Crop Block Grants have assisted in disease research for specific crops like onions and apples, and even helped our maple producers develop tools to expand their marketing capabilities. State-wide projects led by our Department of Agriculture and Markets let to education for farmer market operators and a state database for buyers and sellers of produce.

Specialty crops often have different needs than other types of agriculture and these grants speak directly to the viability of our diverse array of specialty crop farms here in the Northeast. Specialty crop-targeted research helps with disease and pests, as well meeting changing market and consumer needs.

While included under the Trade title, the Market Access Program (MAP) has proven important to several segments of New York's specialty crop industry, notably apples, grapes and wine. The assistance provided by this program helps our farmers diversify markets and develop new customers. As trade agreements become increasingly complicated, including the sanitary and phytosanitary provisions, the Technical Assistance for Specialty Crops program will become more and more essential to helping farmers comply and eliminate any sanitary or food safety barriers for agricultural exports.

Forestry and Energy

Forestry and energy programs are also used in New York and often intersect. These industries continue to rely on research and development programs. As invasive species become a larger threat to trees and biomass in the state, allowing existing programs to address these concerns would be an important change to the farm bill.

We are supportive of several programs that help maintain healthy, vibrant, productive forests in our state. Many of our farmers maintain forestland, in addition to the state having an important wood products industry. The farm bill programs most important for New York foresters are forest health and condition, conservation and energy programs.

New York forests are currently threatened by several invasive species. Forest health management provides crucial prevention, detection, and suppression of native and non-native insects, disease, and invasive plant outbreaks that are impacting our forest landscapes and the communities that depend on them.

We recommend that funding for forest health management provide the states flexibility in how to utilize these funds to adapt to the rapidly changing conditions these pests present. We need states and private industry to work together to find science-based pragmatic approaches to deal with these problems. Federal and state agencies must work with private landowners through both technical and financial assistance to accomplish these goals. The support for research and development of new approaches is crucial to this effort.

The Community Forestry and Open Space Program, authorized in the last farm bill, is just being finalized. While this program has great intentions of assisting local governments in protecting forests for community benefits, our foresters do have a concern that this effort could lead to acquisitions that do not utilize sustainable management systems and instead the land becomes no more than a park set aside for recreational users. The benefits of this program should also include sustainably managed forests that allow our communities and wood industries to thrive together. We encourage you to limit this program to projects that include sustainable forest management and have local community support and input.

New York foresters value both technical and financial assistance through forest conservation programs such as the Forest Stewardship Program. This helps private landowners develop comprehensive management plans for a variety of goals, including environmental stewardship and sustainable harvesting. Managing small tract of forests within a larger landscape is not often seen as a valuable investment of public funding, but issues such as controlling as invasive species can have devastating consequences without coordinated management plans.

In order to expand potential biomass energy production in New York, a change to the Federal definition of biomass must be made. The present definition excludes fallow or underutilized lands put back into production for biomass feedstock production and only allows currently farmed land. New York has about 2 million acres of fallow land that is perfect for biomass production.

The Biomass Crop Assistance Program (BCAP) has had mixed result in this region. Companies and local communities embraced the start-up of biomass energy facilities as a way to transition to a more diverse energy portfolio. This is an important goal and we encourage the committee to continue to shape this program into one that accomplishes those outcomes without the consequences of subsidizing existing biomass markets at the expense of existing industries.

We encourage the biomass program to focus on efforts such as technical and financial assistance to convert our schools, businesses, government facilities, and homes to the advanced biomass systems that are available today—some being built right here in New York—that improve air quality and meet emissions requirements. We want the future of energy programs in the farm bill to embrace the unique way our country benefits from woody biomass energy development.

Research and Extension

Programs that support applied research and extension education are included in a number of titles of the farm bill. Research and the technical assistance and education offered by Extension are both invaluable on the farm and as communities develop stronger food systems.

In addition, Integrated Pest Management, which involves both continued research and education to farmers, helps everyone use less inputs to save money and protect the environment while producing the same high-quality product. IPM has been targeted for cost-cutting, but provides many layers of benefits to producers and their extended communities throughout the state.

Nutrition

Nutrition programs and farming often work hand in hand and when facing difficult farm bill negotiations, it is important for our policymakers to keep this in mind. Farm and nutrition programs are each important in achieving our overall goals of a healthy population and a healthy economy and we must craft a farm bill that recognizes and takes advantage of the way these programs are interdependent.

The 2008 Farm Bill included a number of provisions to increase the amount of fresh fruits, vegetables and low-fat dairy products that are part of the school meal program and USDA nutrition programs. Even with a shrinking farm bill budget, these provisions need to be preserved so the health of our communities and the health of our farms are integrated and strengthened.

A Farm Bill for the 21st Century will continue to find new ways to more directly link our local farmers with the members of our community who need the fresh, healthy nutritious food they produce.

One such program is the Fresh Fruit and Vegetable Program, which provides free fresh fruits and vegetables to low-income children in schools. The last farm bill significantly expanded this program and when products for this program are sourced locally (which is still a hurdle for some of our schools and farmers) this program helps link farms with the people who really need their food.

Because this program serves children who are at a high-risk for obesity and may have limited access to nutrient-dense fresh fruits and vegetables, it really serves the need of our rural and urban communities at the same time and is an important program to preserve. Because there is no baseline funding for this program going forward, it will be discontinued unless funds are found.

The Senior Farmers Market Nutrition Program is another that pairs farmers and eligible consumers well by providing coupons to eligible low-income seniors to be used at farmers' markets, roadside stands, and other community supported agriculture programs. Like the Fresh Fruit and Vegetable Program, this program targets a population that often has limited access to fresh produce and helps to improve their nutrition and health. This is another great way to link our farmers and the very real needs of our communities.

While not specifically targeting low-income families, several programs in the Horticulture Title help to expand distribution and access to fresh, healthy foods, which in turn helps those who do not qualify for nutrition programs but do face nutrition challenges. These programs help ensure that local foods get to local people.

The Farmers Market Promotion Program provides grants to promote and improve farmers' markets, roadside stands, and other direct producer-to-consumer marketing opportunities. This program helped expand EBT to farmers markets and we need to continue to expand this capability. Because there is no baseline funding for this program going forward, it will be discontinued unless funds are found.

Food-Based Entrepreneurship programs are important to encourage entrepreneurship and help link our agricultural and urban consumers in a mutually beneficial relationship while creating jobs and new opportunities. These beneficial programs include the Rural Development Business and Industry Loan Program, Healthy Urban Food Enterprises Development Centers and funding/loans for urban local food enterprises.

Business and Industry Loan Program provides loans to individuals, cooperatives, businesses, and other entities to establish and facilitate enterprises that process, distribute, aggregate, store, and market locally or regionally produced agricultural food products. This program helps target some of the barriers our food system in New York faces. This is a general loan program, but when funds are dedicated specifically to food-related projects, it has the potential to overcome some of problems of duality we face in New York, a food-rich state with too many food deserts.

Thank you for considering these matters important to New York Farm Bureau members. Our organization and farmers stand ready to help you in any way possible development of the farm bill advances. Please feel free to contact our office at any time if we can provide further information.

COMMENT OF ANJA NOTHDURFT

Date Submitted: Friday, May 11, 2012, 11:37 a.m.

City, State: Greenville, NC

Occupation: College Student

Comment: Our country desperately needs to have our food produced in a more sustainable manner—economically, socially and environmentally. This cannot be done with the conventional, industrial farms that are currently being utilized. We need to support local, fresh food that is grown without pesticides and in a way that conserves our soil and water resources. Please make a Food & Farm Bill that includes protections for programs like the Conservation Stewardship Program, the Organic Agriculture Research and Extension Initiative, and the Value Added Producer Grants Program. We also need to have more young people in the farming profession. By supporting the Beginning Farmer and Rancher Development Program, you can allow younger generations to regain connections with the land and their food.

COMMENT OF DEBBIE NOTKIN

Date Submitted: Friday, May 18, 2012, 8:40 p.m.

City, State: Oakland, CA

Occupation: Publishing

Comment: As a CSA customer, I am—extremely—concerned about the way farm policy favors agricultural farmers who would be (it seems) perfectly happy to completely destroy our food supply and the people who do the work to get our food to us in favor of quick profits.

I want clean soil, farmers who are supported for growing a variety of healthy crops for me to eat, and pressure—against—the primary goal in raising food be to make money. Specific actions include:

- Fully endorsing all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Funding the Conservation Stewardship Program, and making enrollment in new insurance subsidies tied directly to compliance with this program and related programs.
- Implementing all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Putting effort behind the EQIP Organic Initiative.

Thank you for protecting and preserving my food, and yours.

COMMENTS OF PHILLIP NOTZ

Date Submitted: Friday, May 18, 2012, 11:02 a.m.

City, State: Fort Collins, CO

Producer/Non-producer: Producer

Type: Livestock

Size: Less than 50 acres

Comment: The farm bill should not subsidize big farms and big corporations. It should not subsidize crops like corn, sugar and tobacco. To best serve the American People, a farm bill should assist small farmers in getting started. There should be limits per farm and per corporation on any farm aid.

Date Submitted: Friday, May 18, 2012 4:26 p.m.

Comment: The original farm support laws from the Federal government were intended to help individual small farmers. Since that time, large corporations and mega-farms have hijacked the subsidy system by contributions to Congress and cushy jobs to ex-Interior Department managers. This weakens our food system by concentrating production in the hands of a few wealthy interests. America needs to go back to the original aim of government farm support. In any case the amount of support to any individual or corporation should be strictly limited. In addition, our government needs to support sustainable agriculture of healthy food. There should be no subsidies for corn, sugar or tobacco.

Date Submitted: Friday, May 18, 2012, 1:11 p.m.

City, State: Upland, CA

Occupation: Cosmetics Sales, Mother

Comment: I shop at my local farmers market so I can talk to the people growing the food I feed my family. Why do I want an avocado from Chili when I live in California? I don't—I want to support my local farms, as should every citizen. We can

make a huge impact on our country if we get back to basics and choose to buy local. I want to not worry about chemicals in my food.

COMMENT OF RENAE NOVICK

Date Submitted: Friday, May 18, 2012, 5:36 p.m.

City, State: Marina, CA

Occupation: Care Provider/Mother

Comment: Organic Research benefits of the environment are detrimental to maintain and sustain planet health, we need to provide conclusive scientific research concurrent to the benefits and effects on human health. Removing funding is unacceptable unless GMO's, synthetic fertilizers, herbicides, and pesticides are removed from the market as well. Thank you for your time and consideration in resolving this situation, which stands as this district and overall public interests main concern for food and health safety today.

COMMENT OF HELEN NOWLIN

Date Submitted: Tuesday, May 15, 2012, 11:52 a.m.

City, State: Vancouver, WA

Occupation: Attorney

Comment: Food is a basic necessity. Please, restore much needed funding to assist the most vulnerable people, especially children who lack sufficient access to this vital resource.

COMMENT OF MICHAEL NOYCE

Date Submitted: Friday, May 11, 2012, 12:40 p.m.

City, State: Madison, WI

Occupation: Musician

Comment: I want to see a farm bill that shows strong support for local, organic, and sustainable farming. We cannot continue polluting our water supplies with concentrated feedlot operations and chemical fertilizers/insecticides. It's been shown by the Rodale institute that organic yields match with conventional over a 30 year period and outperform conventional in years of drought. Given this information it seems completely irrational to continue doing things the way we have. We need change. Sustainable farming needs to happen, and their needs to be incentive for it to happen, and we need a new generation of young farmers to bring new energy to it.

COMMENT OF ANGELICA NOYOLA

Date Submitted: Friday, March 23, 2012, 3:54 p.m.

City, State: Austin, TX

Occupation: Community Builder

Comment: I work for a nonprofit organization called Southwest Key Programs in Austin Texas, we serve over 354 families every second Friday and have been doing so for the last 15 months. These are not just the unemployed; these are the "working poor" living pay check to paycheck. They depend on the food they get from us to get by.

If people living in the Capitol of Texas (Austin) where business is booming, are waiting in line for hours to get food for their families then the House Committee must act with due diligence to help them. There are children who will go hungry tonight without the help of FOOD STAMPS and supplemental food provided by Food Banks like CAFB whom we partner with.

I implore you as our **Elected Officials** to not cut funding to these programs. I have seen these families stand in the rain for **Hours**, in the **Freezing** cold weather to get food vital to their survival. **So** I can see **No Reason** why this should not be a **Top Priority** for the people who represent this state. Do not allow Hunger to prevail in the political game of Chess. These are our children, our residents, and responsibility of us ALL. Thank you for your time.

COMMENT OF OLGA NUDELMAN

Date Submitted: Sunday, May 20, 2012, 10:22 p.m.

City, State: Seattle, WA

Occupation: Interior Design

Comment:

- America needs a farm bill that creates jobs and spurs economic growth—support programs like the Value Added Producer Grants Program by guaranteeing \$30 million of mandatory funding per year. VAPG provides seed money to help farmers innovate in agriculture and create jobs while securing a sustainable path to market-based farm profitability.
- America needs a farm bill that makes healthy food widely available to all Americans—including schoolchildren! We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers
- America needs a farm bill that protects our natural resources—protect the Conservation Stewardship Program from unfair funding cuts, and improve it by ranking applications solely on their conservation benefits. Farmers count on CSP and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife—all while farming profitably.
- America needs a farm bill that invests in the next generation of farmers and ranchers—guarantee \$25 million per year in mandatory funding for the Beginning Farmer and Rancher Development Program. We need a national strategy and commitment to support beginning farmer and ranchers entering agriculture. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new agriculture start-ups.
- America needs a farm bill that drives innovation for tomorrow's farmers and food entrepreneurs—fund the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.

COMMENT OF KATHRYN NULL

Comment: As an American, I did not sign up to eat science experiments that have not been proven safe for consumption. Organic farming needs to be promoted not only as a safe and healthy product, but also as a way to keep local and small businesses alive. Keep the American spirit going!

COMMENT OF SANDY NUNES

Date Submitted: Friday, May 18, 2012, 11:14 a.m.

City, State: High Bridge, NJ

Occupation: Catering Director at a "Slow Food" Restaurant

Comment: Please eliminate genetically altered food that's being produced and return to more natural, locally sustainable agriculture as quickly as possible. There is money to be made in ways that do not adversely affect our environment. It's just as easy to put one's time, energy and intelligence to promoting safe practices than into unsafe. Thank you!

COMMENT OF GARY NUSCHLER, JR.

Date Submitted: Friday, May 18, 2012, 11:37 a.m.

City, State: Houston, TX

Occupation: Vice President—Oil & Gas Company

Comment: Good morning,

I am writing this morning to comment on the 2012 Food & Farm Bill. For many years my family has been appalled at the spread of industrial agriculture in the United States, fueled by subsidized genetically-modified corn and soybeans. This has unquestionably led to the obesity epidemic spreading across the country, as we produce lots of nutritionally deficient food, and then later figure out how to deal with rising health care costs. As an added bonus, such agricultural policies lead to environmental degradation and a dead zone on the Gulf Coast that is at times the size of New Jersey.

However, as a principled conservative, I am not going to ask you to increase funding directed at family farmers, nutrition programs, or conservation. In fact, in my opinion, the Constitution grants no power to the Federal government to spend money on any agricultural programs.

What I do ask is that Republican committee members, in particular, who give pretty campaign speeches saying they want to reduce government spending and

eliminate burdensome regulations to show the American people that they mean what they say—quit subsidizing large agricultural enterprises and quit harassing family farmers across the country.

- Industrial agriculture exported nearly \$140 billion last year . please quit subsidizing them with taxpayer money.
- Please end the collusion between the USDA, FDA, FBI, IRS and DHS that continuously harass small-scale farmers and retailers all over the country.
- No matter how many lobbyists Monsanto and Sygenta send to your offices, checkbooks in hand, please remember your campaign rhetoric promising to stop favoring well-connected businesses and unleash free markets when you consider the 2012 Food & Farm bill.

Sincerely,

GARY NUSCHLER, JR.;

[Redacted];

[Houston, TX.

City, State: Bronx, NY

Occupation: Retired

Comment: At a period when the U.S. economy faces severe challenges, the last thing you should dream of is to cut programs that will provide ways for people to avoid hunger. I urge you to continue support for those programs, through the farm bill, that maintains these programs.

COMMENT OF JEN O'CONNELL

Date Submitted: Friday, May 18, 2012, 1:49 p.m.

City, State: San Diego, CA

Occupation: CPA

Comment: Please stop subsidizing corn production! It contributes grossly to our nation's health problems & is counterproductive. Corn-fed animals promote unhealthy meat consumption & add large amounts of methane to the environment (polluting air & groundwater). Foods infused with corn products add unnecessary sugar to our diets. Programs to promote healthier grains & vegetables would go a long way in reducing our out-of-control healthcare expenditures.

COMMENT OF JOSEPH O'CONNOR

Comment: It is time to start acting as caretakers of the nation's health. We, the general public are getting disgusted with the inability of our government to do what is best and right for the People. Stop the greed of the agribusinesses!

COMMENT OF COLLEEN O'BRIEN

Date Submitted: Friday, May 18, 2012, 1:45 p.m.

City, State: Eldorado Springs, CO

Occupation: Registered Nurse

Comment: Hello,

As an RN who has worked in Poison Control, I have seen 1st hand the effect of Big Agri business on farm workers through exposures to toxic chemicals, pesticides and fertilizers, to the effects on young children with the contamination of well water. I learned of the dead zones in our oceans, especially in the Gulf of Mexico from farm chemical run off and I've learned about the collapse of Bee Colonies and

likely causes. I directly experienced the frustration of not being able to identify specific chemicals on products which had kept ingredients 'secret', even as an RN requesting information on an exposure of said products which were having direct and harmful effects on my patients. I've made it my goal to understand farming practices and it's impacts not only here, but with U.S. 'free trade' agreements around the world.

We have a very destructive system of farming, both for people and the environment.

We subsidize the worst practices.

We need drastic change to improve our health and give the Earth a chance to heal from overtly over-subsidized practices which destroy environments and harm people.

I call on congress to support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Sincerely,

COLLEEN O'BRIEN.

Comment: Previous farm bills have been giveaways for huge agro-corps. With the organic movement, we have a chance to restore the small family farm and safe food. Please support this bill.

Thank you.

COMMENT OF MAUREEN O'BRIEN

Date Submitted: Sunday, May 20, 2012, 2:04 p.m.

City, State: Portland, OR

Occupation: Farmer Apprentice

Comment: Please include support for small farms and organic operations. It is vital to communities all across the country to have local food and healthy agriculture. Farms can provide jobs. Local farms provide education for young children about the cycle of the food web. Healthy, locally produced, community supporting food is so very important to the future of our economies and our lives. Thank You.

COMMENT OF PATTI O'CALLAGHAN

Date Submitted: Friday, April 27, 2012, 9:13 a.m.

City, State: Lafayette, IN

Occupation: Director of Social Justice

Comment: Lafayette Urban Ministry is an organization of 40 area churches that serves as a social safety net for the poor of Tippecanoe County. But it needs to be a partnership that includes the Federal government! Please do not cut critical nutrition programs for the least among us!

PATTI O'CALLAGHAN

SUBMITTED STATEMENT BY DANIEL O'CONNELL, SAN JOAQUIN VALLEY
REPRESENTATIVE, AMERICAN FARMLAND TRUST

April 28, 2012

Congressman Cardoza, Congressman Costa and Under Secretary Schubert,

Thank you for the opportunity to offer feedback on the 2012 Farm Bill. I am the San Joaquin Valley Representative with American Farmland Trust, a private, non-profit conservation organization dedicated to saving America's farm and ranch land promoting environmentally sound farming practices and supporting a sustainable future for farms.

American Farmland Trust recognizes the importance of the San Joaquin Valley as the nation's most productive agricultural region, with six counties among the top

ten producers in the United States. Its more than 300 crops and livestock products account for almost 60 percent of the state's \$38 billion in annual farm production. Yet, the Valley is also one of the fastest growing regions of the state, with the current population expected to almost double by 2050. In addition, most of the Valley's cities were built on the region's most fertile soils and most secure water supplies. Under these circumstances, this irreplaceable farmland has been converted to non-agricultural uses at the rate of about 10 square miles a year—a trend momentarily slowed by recession but unabated by demographic trend. At this rate, the San Joaquin Valley—and everyone who depends on its agricultural economy and productivity—can expect to lose an additional 600,000 acres of farmland by the middle of this century with an impact on the regional economy and national food security that is incalculable.

The farm bill promotes a broad range of public investments targeting important concerns. For example, the Farm and Ranchland Protection Program funds working lands easements that incentivize the conservation of farm and ranch lands. In the San Joaquin Valley, a region under extraordinary threats from conversion of farmland, FRPP funding has been sparsely allocated and inadequately funded to assist its farmers seeking to conserve their farmland and access the financial benefits of doing so. Another funding priority of the farm bill has been its investments in food assistance, including programs like the Supplemental Nutritional Assistance Program (Cal-Fresh in California), the Commodity Supplement Food Program, The Emergency Food Assistance Program and school lunch programs. In recent years, these nutritional programs have been increasingly aligned to enable local producers to market their products to the most food insecure communities near their farms. With the Valley's high poverty rates, public health concerns and highly diverse range of farm operations, such funding has a multitude of benefits still to be fully realized.

Most importantly, the farm bill's conservation funding should be maintained as part of a compact that our nation has with its farmers. California farmers are among the most regulated in the country, a responsibility that they shoulder, but one that the public should share because it is the beneficiary of their good stewardship of the environment. Programs like the Environmental Quality Incentives Program (EQIP) assist farmers in numerous ways such as promoting water conservation through more efficient irrigation and better air quality by enabling producers to replace older diesel-powered equipment. We understand that all Federal programs must be reduced in size, but funding for vital conservation programs should not be disproportionately targeted for budget cuts. Farmers want to play their part, but we need to help them achieve a cleaner environment in a way that is economically sustainable.

At this particular moment in history in the San Joaquin Valley, through the farm bill, we have an opportunity to secure the richest agricultural region in the world, enable its farmers to meet changing expectations and regulations, and address the economic and health benefits of its residents. We support the ongoing funding, through the farm bill, which invests in these and other outcomes.

Thank you once again for the opportunity to share our views.

Sincerely,

DANIEL O'CONNELL,
San Joaquin Valley Representative,
American Farmland Trust.

COMMENT OF B. O'CONNOR

Date Submitted: Friday, May 18, 2012, 1:58 p.m.

City, State: Santa Fe, NM

Occupation: Office Mgr.

Comment: Dear Congressman:

Please this is the time for reform of the Food and Agricultural policy in the U.S. I support H.R. 3286, fully funding any conservation programs, and H.R. 3236, and maintaining the EQIP Organic Initiative.

What the big **Agri**-Business is doing to our Food System is criminal! Their actions and philosophy is perverted, over-indulgent, and exploitative of Nature! I don't know how these people can live with themselves.

Please fight for us and for this Earth (our nest that we are spoiling so badly). Pretty soon it will be inhabitable. These people are possessed with \$\$\$ dollar signs, that seems to be all they can see. Very sad.

Thanks for all you do for our State and for the Country.

I know many, many people that are just so upset and frustrated by the un-thinking people in government, that will give you support on this issue.

COMMENT OF LAURETTA O'CONNOR

Date Submitted: Friday, May 18, 2012, 2:00 p.m.

City, State: Yelm, WA

Producer/Non-producer: Producer

Type: Field Crops

Size: Less than 50 acres

Comment: I urge you to ensure the health of the nations food supply, for your family and descendants by ensuring organic and sustainable farm practices are protected by law.

COMMENT OF MARGARET O'MALLEY

Date Submitted: Saturday, May 12, 2012, 12:20 p.m.

City, State: Chicago, IL

Occupation: Education

Comment: I volunteer at a local food pantry and also work in a neighborhood elementary school. I recognize the importance that food stamps play for the families on the lower end of the socioeconomic scale. Even families who receive food stamps and f/r lunches still need to come to our food pantry. Cutting SNAP will mean even less food for people already in poverty. Please don't cut SNAP.

COMMENT OF ELIZABETH O'NAN

Date Submitted: Friday, May 18, 2012, 12:33 p.m.

City, State: Marion, NC

Producer/Non-producer: Producer

Type: Forestry

Size: 50-150 acres

Comment: I serve as director for Protect All Children's Environment a support organization for people injured and disabled by chemicals, most often pesticides. The past lack of regulation and promotion of pesticides such as organochlorines, organophosphates and now glyphosates has without doubt caused incalculable harm to generations and millions of Americans. These innocent injured and disabled citizens now require organic food in order to avoid further injury. Organic food that is being discouraged from production through the actions of the House Committee of Agriculture. To contribute to the further injury of Americans by supporting corporate interests amounts to treason against our citizens and should be punished as such. Corporations are not people and money is not speech.

I implore you to do the right thing for America and for those injured by current policies and vote for:

- full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully fund conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- Implement all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintain the EQIP Organic Initiative.

Reports from Washington, D.C., about the farm bill negotiations have not been pretty. According to an editorial in the *San Francisco Chronicle* by Environmental Working Group's Ken Cook and Kari Hamerschlag, Republicans in the House Agricultural Committee have already "voted to slash \$33 billion from the food stamp program while leaving farm subsidies unscathed."

The editorial goes on to report on the latest agribusiness boondoggle that gladly steals food from the mouths of the hungry to create a "\$33 billion new entitlement

program that guarantees the income of profitable farm businesses. That's on top of \$90 billion in subsidies for crop and revenue insurance policies."

If this weren't bad enough, the Senate Agricultural Committee has already voted to cut \$4 million from organic research funding and cut funding to support Beginning Farmers in half. We cannot let this stand!

At the same time, the Senate Ag Committee has voted to get rid of wasteful subsidy payments. It has proposed to replace it with a new subsidized insurance program that leading sustainable agriculture advocates are calling rife with opportunities for fraud and abuse.

While Congress is looking to get rid of direct payments to commodity farmers, the subsidized insurance program it proposes to replace it with will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk.

According to the National Sustainable Agriculture Coalition's Ferd Hoefner, "By failing to place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs, the Committee has failed to do the full reform that is needed."

No subsidies should be available for any GMO crops and use of all glyphosates (Roundup) and roundup ready crops should be overtly discouraged and banned as they are responsible for untold damages to American health and environment.

COMMENT OF JULIA O'NEAL

Date Submitted: Friday, May 18, 2012, 2:14 p.m.

City, State: Ocean Springs, MS

Producer/Non-producer: Producer

Type: Forestry, Livestock

Size: 500–999 acres

Comment: If Thad Cochran wouldn't vote for the current farm bill, it's really bad. I hate the cuts in CRP programs—they save the native flora and fauna. And the emphasis on the big four "whites" (corn, wheat, soybeans, cotton) and subsidizing agribusiness that grows them, that's just stupid. The times they are a'changin.

COMMENT OF RORY O'NEIL

Date Submitted: Friday, May 18, 2012, 6:38 p.m.

City, State: Carlsbad, NM

Occupation: Retired Educator

Comment: When it comes to food, quality is always better than quantity. It is time that we support our small (family) farmers. They have the knowledge and ability to bring good quality (organic) crops to the American public. I would certainly like the opportunity to choose between good quality (organic) food from our local farmers and the mass produce stuff from the corporate farms.

COMMENT OF PATRICE O'NEILL

Date Submitted: Sunday, May 20, 2012, 10:07 a.m.

City, State: Milwaukee, WI

Occupation: Teacher

Comment: I would like to propose a plan that would help solve some of our nation's problems. It would restore the health of our country; lower health care costs, and solve many of our economic, environmental, and ecological problems. It would create jobs and a sustainable life style for many Americans. It would reduce unemployment, and could reduce the population density of our inner cities. It would provide jobs for returning veterans, the unemployed, and it could give new direction and opportunity to the formerly incarcerated, and the homeless. It would also provide a livelihood and new identity for many youth who are searching for a direction and find none in our present educational system.

The too big to fail financial institutions have been bailed out and corporate America is having its way with our government, at the expense of the American people and small independent businesses. Small scale ecological, locally owned and operated organic farms would put our agriculture practices back into a balance with nature allowing the land to recover and replenish its vital nutrients. This would provide healthy food for our nation, a more balance population distribution from urban to rural areas; and eliminate excessive pollution from factory farming operations.

This plan would open up a whole new green agriculture program in education for those who choose to learn organic ecological farming. Currently small organic farms throughout the nation are growing food for people in their nearby communities.

These farms are also taking on interns and training future farmers in ecologically sound organic farming methods. As living organisms, we all eat; the outer environment becomes our inner environment, the state of our health and strength. After World War II recycled chemical weapons were turned into fertilizer and marketed to farmers. The new enemy became the bugs, fungi and weeds that for centuries farmers coexisted with. This marked an end to traditional farming methods in America, and began a new direction in agriculture that has eroded the health of our nation. This form of agriculture is still going on today. This has to stop; we are poisoning our selves.

The United States Department of Agriculture needs a new vision, or someone to create one for them. Too much is at stake to continue agribusiness as usual. The Earth cannot continue to support life if we have agriculture policies that keep taking and not giving back. Soil erosion and the clean-up of contaminated water ways all add to the hidden cost of factory farming. Small scale local organic farms that supply local consumers are the enlightened choice of the people. This phenomenon is going on all over the nation. At some point a critical mass will be achieved and this healthy, restorative "choice of the people" will take over and change will happen. Unless, the government blocks this by continuing to choose the structuring of markets, and manipulation of ideas to secure profit upward, instead of human needs nationally and globally. The government could do so much more.

Doesn't the government want to get on board, help out, and make a difference? Or, is the government too invested in solving our global and national problems with perpetual wars, and servitude to corporations that stand to gain by this destructive addiction? Why does the government need to continue to invest in status quo agribusiness that is no longer sustainable? Can't our government create policies that are life affirming and support the health of the people? What is happening to our democracy? The people's voice is like a voice in the wilderness. Government, give life a chance! Aren't you supposed to be us, the people, for the people? If the government would facilitate a reinstatement of the "family farm", it could speed up this process and rebuild the people's confidence in a true democracy. As stated above this change in U.S agriculture could provide the following.

1. Jobs for the unemployed, returning vets, formerly incarcerated, and homeless who want to farm
2. Cleaner and healthier environment
3. Ecological balance, restoration of top soil
4. Recovery of human health, lowering health care costs
5. Recovery of our Economy, creating sustainable lifestyles
6. Balanced redistribution of population
7. Energy saving agriculture that is Green

Government implementations of these agricultural changes are many and should be given thought and time to evolve and fit our national and global needs. The U.S. government could launch a campaign to awaken Americans to the advantages of embracing this new direction for a green economy and healthier population. They could grant homesteads to those interested in the "back to the farm movement". They could buy foreclosed farms to be reconditioned as new models for American farming in the 21 century. Government could provide educational opportunity and grants for the qualified future farmers. Interns could be assigned to one of the many certified organic farms that already provide this kind of training. The government could facilitate the creation of educational programs to be taught in community colleges and high schools for those who want to learn these skills. It could do a land study to determine which factory farm lands would serve the greater good by elimination, reforestation, or division into smaller farms. For a new approach, the government could ask the small independent farmers what their ideas and needs are. The government could organize our economic system so farming is a sustainable living, rather than a subsistence living; and make it attractive to future organic farmers, farming families, and cooperatives.

Government promotion of independent small businesses in farming would turn the economy around. Currently, government supports advantages to only American corporate farming methods. This new proposed direction would create a healthier environment; therefore, a healthier population who would have the energy and will to make it work. With government assistance in the creation of local economies through this kind of agriculture, local communities could be sustained with lower cost and less energy use by curtailing long distance transport of food. America's "agriculture revolution" could be a model for the world. It would save emerging third world countries from the erroneous practice of industrial, chemical, genetic engineered, globally oil driven agriculture.

Imagine this American dream as a workable solution. Imagine it without the obvious counter argument of the disruption of big business. Oil interests, chemical companies, genetic engendering, and global trade agreements would all have to be changed for the greater good. Government's alliance and allegiances to the current factory farm is a prescription for starvation on planet Earth. Agriculture needs to be diverse, local, and small enough to sustain a local population. Every nation should feed its own people before thinking of exporting any crop. Enough small farms that are far enough apart prevent pollution by allowing the land to naturally break down animal waste. Enough land and forested areas, nature's carbon sequestrers, between farms provide natural filtration, and prevent manure from polluting water ways. If life is going to continue, life affirming changes in harmony with nature will have to happen. With the government's support, this fundamental change can happen sooner rather than maybe too late.

COMMENT OF ARTHUR OADEN

Date Submitted: Friday, May 18, 2012, 12:25 p.m.

City, State: Corpus Christi, TX

Occupation: College Student

Comment: I would support a gradual reduction in subsidies combined with greater protection for family farms and small towns. Agribusiness is a blight, but the working farmer is a benefit to this country and always has been.

Agribusiness is a lifestyle of the suburbs and the city, and does little to buoy up traditional America. The farmer of the small farm of 40 acres or less must labor to extract his crops, and often lives in a community where he is intimately involved with his neighbors and his environment. Additionally, he serves as a bastion of freedom because of his separation from modern industrial society.

These farmers are small in number, but they should be the focus of government agricultural policy. They do not need subsidies, but require protection from government interference and the industrial economy's attempts to force them from their livelihoods.

COMMENT OF JOHN OAKES

Occupation: Administrative in Mental Health Field

Comment: These are important programs that should be continued for the benefit of those who are in real need. If we can afford to send Billions of dollars to Afghanistan, Iraq and other countries; we should be able to make some effort for our own citizens who are in need of our help.

COMMENT OF GRACE OEDEL

Date Submitted: Saturday, May 19, 2012, 11:21 a.m.

City, State: Nevada City, CA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: We need a farm bill that will actually support thriving now and in the future. Heavily subsidizing huge, monocrop farms of corn and soybeans has made our people unhealthy, obliterated our once-glorious topsoil, increased our dependence on fossil fuels, and devastated entire ecosystems. We need to help support small farmers who can help remedy all these problems. We need to build new systems, resilient, local food supplies, that makes healthy food affordable. We need to question whether we truly believe pumping money on huge, monocrop farms (which, as monocrops, are completely susceptible to disease and crop failure, and by design depend on inputs of fuel-made pesticides and fertilizers) will serve our country best in the long term. Wendell Berry and Wes Jackson at The Land Institute wrote a phenomenal *Fifty Year Farm Bill* that I would urge you to read. As they write:

“Long-term food security is our issue. We begin with the knowledge that essentially all of nature’s ecosystems feature perennial plants growing in species mixtures and that they build soil. Agriculture reversed that process nearly everywhere by substituting annual monocultures. As a result, ecosystem services—including soil fertility—have been degraded. Most land available for new production is of marginal quality that declines quickly. The resulting biodiversity loss gets deserved attention, soil erosion less. [. . .] Because the change needed is systemic, we believe that USDA should take the lead.”

A new way is possible—local groups are already trying to change the agriculture system from the grassroots level. But we need USDA support to make meaningful systemic change.

COMMENT OF JENNY OEHLDRICH

Date Submitted: Sunday, May 20, 2012, 6:53 p.m.

City, State: Waukesha, WI

Occupation: Teacher

Comment: I support small local and organic farmers. They should have the right to grow what they choose and use or not use herbicides or pesticides if they choose.

COMMENT OF CLARK OEHLER

Date Submitted: Monday, April 30, 2012, 11:56 a.m.

City, State: Thomasville, NC

Occupation: Student/Researcher

Comment: I'd wish to stand in support of the ethanolrfa.org, Advanced Ethanol Council in thanking the Senate for the restore of about \$800 million to/in funding several renewable-energy programs in The farm bill. I support the needed efforts of the American Coalition for Ethanol [Redacted]. I would be in favor to decrease corn & soybean, soybean oil exports & to use more of that for U.S. domestic biofuels productions. I believe we should cut the 2011/12 U.S. soybean exports by 475 million bushels—use that for U.S. produced bio-fuels and/or ethanol production. We need more than the (present) 29 states with ethanol facilities. I would suggest earmarking a deduction of 1 billion bushels of U.S. grown corn, subtract that out of the 2012 14.3 billion (expected) bushels of U.S. grown corn so as to yield an additional 2.8 billion more gallons of ethanol (on top of)the already established 2012 figure that 14 billion gallons will be produced. So we actually will achieve 16.8 billion gallons. Please fully fund & strengthen the Ethanol Infrastructure Grants & Loan Guarantees-USDA [Redacted]. I do feel that for (increased) Ethanol production, more independent producers are needed with (included) the best working technologies & Value-Added Producer Grants (VAPG) increased funding. [My Input] I believe that due to the real need of seeing or reaching fruition; higher usages of E15 to E85, producers should be able to apply for both planning & working capital grants—at “increased” funding availabilities. This section of my commentary I hope can be faxed to the Appropriations Committee. A point of reference document that I am very fond of & desire to show support thereof is the afdc.energy.gov/afdc/laws/laws/U.S./tech/3252_text. Please try to work to surpass the present 140 million gallons capacity under construction of Ethanol. I firmly believe we do need more U.S. produced & marketed biodiesel and ethanol. The USDA statistics that I have discovered indicate for 2011/12, soybean projections at 15 million bushels imported, U.S. production at 3,056 million bushels and a supply/total of 3,286 million bushels. With these large quantities, I want to advocate for much higher/increased U.S. bio-

diesel production. Would the honorable committee please be so kind to fax a copy of my remarks to my honorable representative Mr. Coble's office. Thank you.

Sincerely,

CLARK OEHLER.

COMMENT OF ALISON OGDEN

Date Submitted: Friday, May 18, 2012, 5:12 p.m.

City, State: New York, NY

Occupation: Health Coach

Comment: Dear Members of the Agriculture Committee,

What you hold in your hands in the farm bill is the health of the citizens of this nation. What we eat determines how our bodies function, and right now, the majority of the foods subsidized under the authority of the farm bill are commodity crops that are making us as a country sick and weak. You are holding the authority to determine what kind of country we want to be—one that supports and upholds the health of its constituents so that we can become again the robust, innovative people that Americans were in the past, or one that supports the profits of mega corporations. I am writing to ask that you support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative

I believe this is the single most important piece of legislation happening this year, and I implore you to do the right thing. Thank you.

Sincerely,

ALISON OGDEN.

COMMENT OF MERLE OHLINGER

Date Submitted: Friday, May 18, 2012, 5:14 p.m.

City, State: New Rochelle, NY

Occupation: Professional Health Care

Comment: It is absolutely necessary to make organic & small family farmers a priority in our production of healthy food for all American citizens. Right now the priority is large agribusiness which by necessity uses antibiotics excessively to maintain animal health in filthy environments & promote animal growth as quickly as possible for profit. This is irresponsible & must end. Please pass a Healthy farm bill. Thank you.

COMMENT OF ALEX OJEDA

Date Submitted: Friday, May 18, 2012, 2:30 p.m.

City, State: Jacksonville, FL

Occupation: Web Developer/Graphic Designer

Comment: Please help us to remove the fine that organic producers have to pay to do the right thing and put a HEAVY FINE on the factory farm and commercial food production industry for all of their pollution, poison and land damage. We need to get the subsidies redirected from those damaging our lives and put them toward those doing the right thing. Thank you.

COMMENT OF LEWIS OKUN

Date Submitted: Friday, May 18, 2012, 12:12 p.m.

City, State: Ann Arbor, MI

Occupation: Psychologist

Comment: I oppose any and all cuts to the SNAP program. The failed government economic policies of this entire millennium (2001 to date) should be paid for by those who have most benefited from those policies and not those who need food assistance.

Further, I oppose subsidies to large agribusinesses. We need more small farms and family farms; they should receive any subsidies, not the mega-farms. Also, no

subsidies at all is a preferable option to little taxpayers like me continuing to support very large food producing enterprises.

Along these lines, I also want to see strong support for small and organic farms. I support: the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286); fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs; the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236); and maintaining the EQIP Organic Initiative.

Thank you for your consideration. Please conduct yourselves as representatives of government of, by, and for the people. Please do not act like government of the money, for the money, and by the money.

COMMENT OF LANCE OLENIK

Date Submitted: Friday, May 18, 2012, 4:34 p.m.

City, State: Caldwell, ID

Occupation: Webmaster

Comment: Please think of the people's health before your checking account. We didn't vote for you so you could get rich, we voted for you to be our voice. The more organic our food gets, the healthier and more vibrant Americans will be. Vote for a strong America!

Comment: Please try to keep things simple for the independent farm people. Don't let Big Agriculture make their life more difficult than it already is. Please label GMO's as such. Thanks.

COMMENT OF DIANE OLIVE

Date Submitted: Friday, May 18, 2012, 2:31 p.m.

City, State: Encinitas, CA

Occupation: Business Owner

Comment: I heard that the White House cafeteria serves only organic food. So why would they let us eat the other food and they only eat organic this does not make any sense. Especially they are suppose to be humble servants of the people.

The first Lady Mrs. Obama putting in a organic garden and saying she feels better eating organic. I am so happy that Mrs. Obama put a organic garden but Ms. Obama wouldn't you want to create a change by making sure we all have organic foods and the government make sure the soil has nutrients in it before we are fed the foods? We must take care of the people and especially the poorest of the poor and make sure their food is not poisoned (GMO, pesticides) and lacking nutrients. In the practice of oneness we want what we want for ourselves for others. The practice of oneness creates abundance of good food and monies for everyone.

COMMENT OF LAUREN OLIVER

Date Submitted: Friday, May 18, 2012, 2:37 p.m.

City, State: Austin, TX

Occupation: Registered Dietitian

Comment: With respect to the 2012 Farm Bill, I support all of the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

We need any and all changes that will encourage increased production of a variety of fresh fruits and vegetables. We need any and all changes that will link people to these local/regional farm products (make them more accessible and affordable). We need any and all changes that will continue to support the most needy/vulner-

able citizens to make not just any processed food-like product, but **Real**, healthy food, a daily part of their diet. Our national health, security, and success depends upon the health and well-being of its individual citizens.

Thank you and please do not hesitate to contact me with any questions.

COMMENT OF LEESA OLIVER

Date Submitted: Friday, May 18, 2012, 12:53 p.m.

City, State: Richmond, TX

Occupation: Social Worker

Comment: It is unsettling to think that the agricultural industry's profits could take precedence over food nutrition and value. The health and well-being of the consumer as well as environmentally sustainable food production should be placed at the forefront of any policies affecting the food we eat. I ask that you please support the Organic Farm Bill and allow our food production to become more sustainable for our environment and healthier for our bodies.

COMMENT OF PAULA OLIVIER

Date Submitted: Tuesday, May 08, 2012, 8:49 p.m.

City, State: Houma, LA

Occupation: Retired Senior Citizen

Comment:

- (1.) (Agree) Crop insurance is a vital part of the farm safety net and has become an integral part of business life for a large majority of American farmers and ranchers. Many lenders now require crop insurance coverage in order to make operating loans to crop and livestock producers, and many producers use crop insurance as collateral for the loans.
- (2.) (Agree) a farm bill that meets the goals of food safety and security, rural prosperity, and nutritional well-being.
- (3.) (Agree) next farm bill is reducing overall spending while maintaining an effective level of support for critical programs.
- (4.) (Agree) continue to monitor progress made to ensure minority farmers receive sufficient and unbiased access to credit.
- (5.) (Agree) need assistance program Supplemental Nutrition Assurance Program (SNAP), formerly known as food stamps,
 - (a.) with caution I am not happy with the easy availability of this program: more needs to be evaluated for abuse.
- (6.) (Agree) provides assistance to eligible producers suffering crop losses during natural disasters.
- (7.) (Disagree) to make most efficient and effective use of the funds available for studies.
 - (a.) Resources should be available for land preservation and proper care of all soils for better cultivation . . . invest in quality not studies . . .
- (8.) (Agree) for producers have a dairy policy to build a strong base so dairies can continue to produce milk.
 - (a.) keep our Milk product without harmful ingredient or additives—keep it natural
- (9.) (Agree) limited Federal dollars—eliminated waste—be conservative but sufficient—it can be done—I run my household that way—it can be done.

COMMENT OF AMY OLLES

Date Submitted: Friday, May 18, 2012, 5:30 p.m.

City, State: Leonardtown, MD

Occupation: Aeronautical Engineer

Comment: I would like to see the farm bill address the issue of longevity—and by that I mean a bill that supports organic farming, small family farms, grass-fed or pastured meat, *etc.*

I understand that the current farm bill promotes and heavily subsidizes a system that grows genetically engineered commodity crops and uses lots of petroleum based fertilizers and toxic chemicals to keep those crops growing. I further know that the current system depends on CAFOs and extremely crowded “grow-em-fast-and-kill-em” farms for poultry and pork. This system does produce lots of food, but it is of inferior quality and can actually be dangerous to public health and the environment (as in top soil erosion, soil depletion, water contamination, *etc.*). Further this system

is probably lucrative to you, the government official, as big ag and the meat industry lobby, pay and bribe the government officials well to keep the system in place.

This year I'd like you to step up to the plate and make changes that, in the long term, will bring some integrity back to the food system of America.

I want to see organically grown food subsidized, not genetically engineered crops.

I want to see the inheritance tax on small family farms waived, so that the vocation of farming can be passed down from generation to generation without a terrible financial strain on the family.

I want to see a marked decrease in or elimination of the subsidizing of genetic and/or commodity crops.

I want to see more subsidizing go to farmers who use less or no chemical fertilizers or toxic chemicals for pest control.

I want Monsanto to stop calling the shots as to what gets patented, grown and sold to and for the people of the USA. It's time for the USDA to put the bridle on them. (The EU has done this to some success, you can use them as an example of where to start)

I want to see CAFOs turned into pastures (analogously, I understand that's probably not physically possible) and other concentrated animal growing facilities go unfunded and unaided by Federal dollars—directly or indirectly through cheap subsidized feed. I want the USDA to pass tougher standards on testing the meat that comes out of those CAFOs in the meantime.

I understand this is a radical departure from 'the norm', and that these changes will drive food prices up. Let me tell you though that I currently **Do** pay more than market price for my food, as I only buy from local farms or organic items. The stuff produced by the farm bill is not healthy food to ingest in my opinion (Please see obesity, diabetes and other disease historical rise in the past few decades and plot it against the rise of processed food and subsidized commodities). Further I believe that though these changes will cause price changes, the market will adjust and people will not starve in the end. I encourage you to make this the year that the farm bill actually supports a more sanity based system that grows quality, healthy food in such a way that doesn't destroy the soil and water ways of this or other nations.

Thank you for reading my comments,

AMY OLLES.

COMMENT OF K. OLSEN

Comment: Agra Business is Not in our best interest! We want good organic choices, not GMO, and processed garbage! Please, work toward a farm bill that supports the health of your constituents, not the bank accounts, and campaign donations of Big Ag!

COMMENT OF KAREN OLSEN

Date Submitted: Saturday, May 19, 2012, 12:02 a.m.

City, State: Myrtle Pt., OR

Occupation: Postmaster Retired

Comment: I encourage you to shift more funds to support smaller farms, sustainable and organic practices, wise use of water resources, and local marketing which facilitates the availability of more varieties (even those that do not travel well) and fresher products.

COMMENT OF LISA OLSEN

Date Submitted: Saturday, May 19, 2012, 8:41 a.m.

City, State: Centennial, CO

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I am an apprentice with an Neighborhood Supported Agriculture program in urban Denver.

As the committee considers the 2012 Food and Farm Bill, I urge you to:

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;

- Provide an even “plowing” field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don’t: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

Additionally, I as a consumer, I would like to see an end to GMO’s, and short of that, I would like to see accurate labeling enforced.

Regarding farm subsidies, the government must stop subsidizing the crops and industries that are contributing to the national health crisis. Hidden calories (corn/soy) will contribute to the death of many Americans in the coming years and we need to break that cycle.

COMMENT OF DIANE OLSON

Date Submitted: Friday, April 27, 2012, 1:40 p.m.

City, State: Santa Monica, CA

Occupation: Retired Librarian

Comment: I don’t want it to contain the money that has been given away to huge factory farms. As far as I can see they are doing all right. I’m tired of seeing them treated as if they are **Family Farms** when for all practical purposes they are not.

I see that today Obama has caved because of the meaningless **Family Farms** argument and will not pursue restrictions on the age that children will be allowed to perform certain tasks. There was an accept ion allowed in the bill so there was no reason not to pursue it. I would like to see those restrictions continue in the bill.

COMMENT OF JUDITH OLSON

Date Submitted: Friday, May 18, 2012, 8:59 p.m.

City, State: Vashon, WA

Occupation: Retired

Comment: Intensive mono-crop agricultural processes that rely heavily on synthetic fertilizers and pesticides are creating myriad problems—big problems. Traces of pesticides are showing up in human breast milk. Our infants are being fed poison. The bees are dying off. Without bees to pollinate crops, we will have very little food. Our once rich farm land is being turned into nothing more than dust. The use of “Round-Up Ready” seed—GMO seed—is threatening the diverse seed bank that is necessary to withstand changes in weather patterns and climate. This is just plain **Stupid!** Our nation must make some smart decisions **Now** to change the way we are growing our food supply—if we want to continue to **Have** a food supply.

JUDITH OLSON.

COMMENT OF K. OLSON

Date Submitted: Friday, May 18, 2012, 3:47 p.m.

City, State: Bodega Bay, CA

Occupation: Mother/Grandmother, Manager for Nonprofit

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and ensuring that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Please listen to scientists without financial gain/motive (ucsusa.org) and support organic, sustainable farming. It is crucial that my children and grandchildren have

access to affordable healthy food. Government funding for corporate farms using pesticides and genetically modified crops (esp. those being banned in other countries) really ticks me off! I do not wish my tax dollars supporting this travesty!

I'm not a scientist but as a gardener I see a bleak future if we support pesticides & GMO's . . . yet if we choose to support organic sustainable farming I see a clean healthy future. It's time is overdue!

COMMENT OF KERWIN OLSON

Date Submitted: Monday, May 14, 2012, 2:24 p.m.

City, State: Indianapolis, IN

Occupation: Consumer Advocate

Comment: I urge Congress to protect against hunger and promote nutrition in the upcoming farm bill by supporting programs like SNAP, TEFAP, CSFP, and FFVP.

COMMENT OF LORI OLSON

Date Submitted: Friday, May 18, 2012, 11:27 a.m.

City, State: Austin, TX

Occupation: Executive Director, Texas Land Trust Council

Comment: On behalf of the Texas land trust community, we would like to make the following comments for the 2012 Farm Bill.

We hope that the House will support the Senate funding levels for Agricultural Land Easements, which advance the proven model of leveraging Federal funds through local partners to secure perpetual conservation easements that help keep farm and ranch lands in production, while conserving important natural resources.

We would like to see the existing FRPP match formula restored to encourage bargain sales and allow waivers of the match requirements for strategic projects.

We also hope that the House will consider restoring language clarifying that the Federal government is not acquiring a real property interest and has only a "contingent right of enforcement," should the cooperating entity fail to enforce its easement.

Thank you for your consideration.

COMMENT OF PAM OLSON

Date Submitted: Friday, May 18, 2012, 12:35 p.m.

City, State: Bruce Twp., MI

Occupation: Customer Service with a Liquor Company

Comment: Please do not cut funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture. It is the future of our food supply. Which is the future of the human race. Instead cut funding totally for Farm Subsidies that pay farmers not to grow a certain crop. This program is a racket. You also have what is called the direct payment program. Those goes to farmers of certain crops regardless of what crop prices are. And then you also have conservation payments, which pay farmers to farm their land or not farm their land for environmental purposes. And you also have crop insurance programs in which basically, the government subsidizes crop insurers that then farmers can buy policies and manage against weather risk. This could be cut, too.

And programs like subsidizing certain crops like corn, ethanol. They should not be subsidized?

COMMENT OF CAROLE ONDERDONK

Date Submitted: Friday, May 18, 2012, 11:27 a.m.

City, State: Gypsum, CO

Occupation: Gardener/Clinical Social Worker

Comment: You must address the destruction caused by GMO crops including super bugs and super weeds. No more subsidies for big ag—support small or large organic farmers and ranchers.

COMMENT OF ELIZABETH ORDONEZ

Date Submitted: Friday, May 18, 2012, 3:44 p.m.

City, State: Golden, CO

Occupation: Retired Professor

Comment: Please support small family farms, especially organic and sustainable farming. End subsidies on commodities that are overused in food production, such as corn, resulting in foods that are contributing to our nation's obesity epidemic.

COMMENT OF PENNY ORDWAY

Date Submitted: Friday, May 18, 2012, 3:32 p.m.

City, State: Ardmore, PA

Occupation: Massage and Skin Therapist

Comment: I want non-GMO, non-polluting, non-toxic food in my cupboard. I want healthy farm workers. I want agribusiness to stop getting subsidies. I want small farmers to thrive. I want food to be fair and just. Please do your best to make food fair and just and safe to consume.

COMMENT OF CHRISTA ORECCHIO, C.N., H.H.C.

Date Submitted: Friday, May 18, 2012, 1:21 p.m.

City, State: Encinitas, CA

Occupation: Clinical Nutritionist

Comment: The U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists. Decentralizing farming is one of the only ways toward solving the public health crisis in this country. Our food can be medicine or it can be poison. Mental illness continues to get worse in this country because there are no longer minerals in our soil and our water. As a nation, we are incredibly nutrient deficient, and masking those symptoms with pharmaceuticals is absolute insanity, which degrades quality and experience of life. Please see how very important the connection is between true health and the quality of our food supply.

CHRISTA ORECCHIO, C.N., H.H.C.;
thewholejourney.com.

COMMENT OF NICK ORFANAKIS

Date Submitted: Saturday, May 19, 2012, 12:29 a.m.

City, State: Lake Oswego, OR

Occupation: Physician

Comment: Support of the corn as a farm product has led to a disaster in our national health with obesity and type 2 diabetes. This needs to be reversed with support of farming with a balanced production of foods that are clean and good for us and produced at fair market values. Corn and corn syrup are not the best for us.

COMMENT OF PAMELA ORIARD

Date Submitted: Sunday, May 20, 2012, 1:02 p.m.

City, State: Lafayette, CA

Occupation: Counselor, Hobby Organic Gardening

Comment: We must look to organic farming for the health of our population; and get away from dangerous chemical and genetically modified type processes. I had to change the way I eat to regain my health, and I think this is becoming true for more and more people.

COMMENT OF DANA J. ORLICH

Date Submitted: Saturday, May 19, 2012, 8:46 a.m.

City, State: Omaha, NE

Occupation: Housekeeper

Comment: Corporate agriculture's refusal to label foods containing GMO and bullying of organic family farmers must stop. America's current assembly line GMO approach to food production is not only dangerous, it is deadly. It is time to put the health of Americans a primary concern. Corporate agriculture profit cannot remain the priority with food production in the United States. organic family farms is a rich American tradition that needs to be revived. Thank you.

DANA J. ORLICH.

COMMENT OF PATRICIA ORLINSKI

Date Submitted: Wednesday, May 09, 2012, 8:28 p.m.

City, State: Sun City, AZ

Occupation: Retired Elementary Teacher

Comment: It is so important not to cut programs from the Agriculture funds. These cover nutrition, basic needs for people who are working (SNAP) and for the elderly (TEFAP & CSFP). Seniors and retired folks like me need these programs for basic needs. You know there are places to trim the fat from the military budget. Do that instead.

COMMENT OF MARK ORLOWSKY

Date Submitted: Friday, May 18, 2012, 1:03 p.m.

City, State: Chicago, IL

Occupation: Food Scientist

Comment: There should be a greater focus on the subsidization of organic farming in an aim to keep it competitive with traditional farming. Organic farming is forced into a position with high entry costs, and then doesn't receive the traditional subsidies that major food producers do. This is an unfair market, and is keeping organic foods out of the hands of many consumers who cannot afford the price hike. In theory organic farming makes use of less pesticides, and chemicals that have become common place. The prices of these foods should be lower, there is less labor and production input. Subsidies should be redistributed, and a focus should be made to make organic prices comparable to non-organic production.

Here typically the argument for increased yields will raise its head, but research continues to show that our traditional methods of farming (heavy use of pesticides and GMO), do not have any major impact on our yields. A study by Doug Shurian exemplifies this finding with rigorous and methodical scientific research and analysis (<http://www.ucsusa.org/assets/documents/food-and-agriculture/failure-to-yield.pdf>).^{*} Supporters of our current farming system also like to ignore the potential for environmental damage from pumping chemicals into our soil and water supplies, and the unresearched impact that pollen from these modified organisms are having on our indigenous plant populations. Today we already have dead zones in the Gulf of Mexico where large concentrations of chemical run off from our farms in the Midwest are having unforeseen consequences (<http://www.thedailygreen.com/environmental-news/latest/dead-zone-fertilizers-47082802>).^{*}

Another major issue related to the use of GMO farming techniques is the burden placed on farmers. They are required to repurchase all of their seeds due to legal manipulation and the patenting of specific code that has been spliced into these plants. Organic farmers can have an entire field repossessed if their neighbors GMO plants happen to cross pollinate his own field. This in almost all situations is absolutely going to happen. Plants spread their seed through the air, and ultimately one or two will land across the street, and suddenly a man who is trying to make a living can lose his livelihood due to technicalities he had no control over. These are unjust practices that are aimed at taking advantage of legal proceedings that most farmers are not capable of defending themselves against. It is bullying by major corporations like Monsanto and DuPont, and it has all been sanctioned by the governmental regulations like this farm bill. Serious changes must be made if we are to preserve our farmers livelihood and the quality of our food supply.

These issues outlined above are at the root of what our farming bills need to address. It is my understanding that the writers of this bill are often eating right out of the pockets of many of the companies who push for regulation that grows GMO production and enforces its evil policies. This makes me want to draw a rule or law that says a person of industry should not have a say in developing the farming plan of America. They are too often driven by ulterior motives, and the success of the food supply from a perspective of wellness is rarely considered. But I hope we can move in a direction where the quality of our food trumps the quantity, and falsely funded studies that are aimed at proving false points of improvement can be identified for what they are, propaganda.

Thank you. Warm regards.

MARK ORLOWSKY.

Comment: I endorse wholeheartedly the concept of locally-produced foods and protection against corporate agriculture's attempts to in any way limit growers' ability to make their own decisions about crops.

COMMENT OF JOAN ORTON

Date Submitted: Sunday, May 20, 2012, 6:37 p.m.

City, State: Nunda, NY

Occupation: Retired Secretary

Comment: **New York Farm Bill** . . . First and foremost I believe we need to clean up our food supply—that is; produce more locally sustainable foods, use fresh-frozen, cut back on importing foods. Maybe the USDA or whatever branch handles inspections and verification of clean food should be given more employees and sites of inspections. Farmers also need to be paid a FAIR price for their food and dairy products. Small farmers are getting edged out by the large farm operators. The large operators are known to use inhumane practices on all kinds of farm animals—this must **Stop**. Also stop injecting anti-biotics into these animals—**Only** when necessary. This nation needs to grown enough food to handle feeding our people—**All** people, not just those who can afford to go to the store, but those living in poverty who cannot afford to buy much of any good food.

Let the farmers hire the Mexicans or Puerto Ricans or whoever, just make them have documents proving that they are paying them a fair wage and that it is not taking away a job from some other capable worker.

COMMENT OF TONY OSBORNE

City, State: San Leandro, CA

Occupation: Artist

Comment: I am 58 years old. I eat 99.9% organic food. I do not even have to take aspirin. My other family members take meds . . . but are starting to change to organics. I am older than they are but feel better and they want to have my en-

ergy and wellness . . . not only is organics more nutritious than conventional and GMO food. Organics just might save the bees so *homo sapiens* can stay around awhile. No bees . . . no food . . . no food . . . no people! **Thank You For Listening . . . Bye The Way, What I Save Not Having Any Medical Bill Or Pharma Bills, Helps Pay For The Organics.**

COMMENT OF MARIE OVERALL

Date Submitted: Saturday, May 19, 2012, 10:46 a.m.

City, State: Salt Lake City, UT

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: As a home gardener and advocate for healthy, locally raised food, I encourage you to vote for a farm bill that will **Support Organic, Responsibly Raised Food, And Local Farmers**. Big agribusiness practices are destroying our soil, air and water; and our food is becoming less healthy. Please add your vote to promote a healthy country.

COMMENT OF ASHLE OVERLOCK

Date Submitted: Wednesday, May 09, 2012, 2:24 p.m.

City, State: Carson City, NV

Occupation: Social Worker

Comment: The farm bill proposed will greatly reduce funding currently allocated to the SNAP program, which is the only source of food for many of my clients. As an Employment Case Manager, I work with many low-income clients, who are trying to get their lives back on track, and need to utilize food stamps until they can find work. These are people that are doing everything they can to become self-sufficient in a tough economy, and this bill would likely leave them hungry.

COMMENT OF ROMY OVERSTREET

Date Submitted: Thursday, May 17, 2012, 10:37 a.m.

City, State: Indianapolis, IN

Occupation: Journalist

Comment: Please keep in mind vital programs which ensure that no one goes hungry especially seniors. Hunger in America is a problem in the same way that obesity also plagues us. American farmers are the backbone of America and any farm bill must ensure they stay strong as economic contributors.

COMMENT OF BARBARA OVERTON

Date Submitted: Thursday, May 10, 2012, 5:07 p.m.

City, State: Atlanta, GA

Occupation: Nonprofit Administrator

Comment: Billions of dollars in cuts to food stamps would be devastating to the vast numbers of Americans who need this assistance to weather the storm of job loss or underemployment.

COMMENT OF SHEILA OWENS

Date Submitted: Friday, May 18, 2012, 7:15 p.m.

City, State: luka, MS

Occupation: Disabled Registered Nurse

Comment: I am sick and tired of our government giving breaks to the rich and taking away from those who desperately need it. What has happened to this country? Millions of children go hungry while big companies like Monsanto get tax breaks. Food stamps to be cut? I guess if you can't find a job, the government will starve you out. Check that one off the list. Small farmers get no help, their farms go under and that's ok. Maybe they'll get so depressed they commit suicide. Check that one off. If I seem cynical and sound disrespectful, I am. I want to see members of our government work for Americans, the Americans who voted for YOU. Do your job and help those who need it, tax big business like you tax us.

COMMENT OF JENNIFER OXBOROUGH

Date Submitted: Monday, April 02, 2012, 5:54 p.m.

City, State: New Prague, MN

Occupation: Social Work

Comment: I strongly urge you to support existing funding levels for the SNAP within the farm bill. One in nine Minnesotans struggle to put food on the table. In Scott County, 8.3% of the population is food insecure. SNAP is critical to maintaining good nutrition and health among our population. Economic studies in MN show that people who lack access to proper nutrition are more often chronically ill; children don't fully develop physically and cognitively and are more prone to fail courses, repeat grades, and drop out of school before graduation. The cost of hunger's impact—largely as uninsured medical care—is conservatively estimated at 1.6 billion annually. Cutting SNAP or limiting access to it will increase charity case-loads for the counties, which will be borne by local property taxes. As a Constituent and as a public servant, I strongly oppose cuts to critical anti-hunger programs SNAP, TEFAP as well as Commodity Food Program for seniors and Women, Infants, and Children.

For our sake and the sake of our neighbors who can't earn enough to get the food they need, it is important to maintain funding programs that provide basic food assistance programs.

COMMENT OF MIRANDA P.

Date Submitted: Friday, May 18, 2012, 1:25 p.m.

City, State: Bellingham, WA

Occupation: Financial Services

Comment: Healthy food leads to healthier, more productive, less sick people, and it also provides jobs. So we get more jobs, less healthcare costs, and a better environment. Organic foods have more nutritional value than non, and it's more sustainable.

COMMENT OF KIMBERLY PACIFICO

Date Submitted: Saturday, May 19, 2012, 8:17 a.m.

City, State: Chesterland, OH

Occupation: Childcare

Comment: I am greatly disheartened that this is happening to us . . . and to our children. Stop messing with the balance of nature! Profit means nothing! Especially when we are dealing with malnourished humans (and insects). We are losing our muscle tone and our brain power as well as our ability to resist illness, there can be no real question that this is directly related to the modified "food" we have been tricked into eating . . . and even planting. No more GMO . . . please. It is not too late to make this right.

COMMENT OF MONICA PADILLA

Date Submitted: Thursday, May 17, 2012, 9:00 p.m.

City, State: La Mesa, CA

Occupation: Medical Technologist

Comment: It is so important to support our family farms because they are the places that truly care about the quality and integrity of the products they distribute to the public. They are invested in their land and the produce they grow. Agribusiness is not the only source for our food supply. Unfortunately, they cannot always be depended upon to be ethical, because of their profit motives. They are not connected to the land in the way that the family farmer is.

COMMENT OF ALICE PAGE

Date Submitted: Friday, May 18, 2012, 9:40 a.m.

City, State: Kingsport, TN

Occupation: Independent Business Owner

Comment: GMO needs to stop—consumers need all packaging on food items to be transparent. I want to know what I am buying always! Do people stop and think? "Why is this nation so rich but is so sick?" Well hello look to Monsanto and thank them.

COMMENT OF C. JAY PAGE

Date Submitted: Friday, May 18, 2012, 7:34 p.m.

City, State: Reedley, CA

Producer/Non-producer: Producer

Type: Livestock, Poultry/poultry products

Size: Less than 50 acres

Comment: Please remember that you serve the local small farmer serving your community with healthy food. Small farms provide more jobs per acre and we therefore need less regulation as we don't have the resources to handle lots of paperwork. We need government's help in rebuilding the local harvest facilities for beef that are USDA. I shouldn't have to drive to Los Banos to butcher my beef to then have it hauled back to Fresno to be cut up and packaged and then hauled back to my farm. Vermont solved this problem by purchasing mobile equipment and then leased it out to the butchers and processors. Even Forbes reported that 20% of the food for cities will be produced locally by 2015. Do we want to be on the front of the movement or trailing behind? Buying locally means more jobs locally. I have a very small farm and I employ 3 people full time and one to two persons part time.

COMMENT OF NICK PAGE

Date Submitted: Saturday, May 12, 2012, 3:45 p.m.

City, State: Ferndale, WA.

Occupation: Teacher.

Comment: We need a strong farm bill—one that protects and strengthens programs like TEFAP, SNAP, and CSFP—to help put food on the table for vulnerable children, seniors, and low-income families.

COMMENT OF KATHERINE PAINTER

Date Submitted: Friday, May 18, 2012, 4:05 p.m.

City, State: West Hartford, CT

Comment: SNAP benefits are really important to me because I have a lot of mental, emotional and other problems that makes it very difficult to live. I'm in the process of trying my social security. If I hadn't gotten help by the state, I'd have nothing. Please don't cut the SNAP funding. It's the only thing keeping my head above water.

COMMENT OF LORNA PAISLEY

Date Submitted: Friday, May 18, 2012, 12:49 p.m.

City, State: Joliet, IL

Occupation: Retired Teacher and Home Gardener

Comment: My son just got back from France where people only eat organic food. They won't even take our antibiotic feed meat. What the hell is wrong with this country? It is time for our congress to catch up with the rest of the world and to protect its citizens.

COMMENT OF JENNIE PAKRADOONI

Date Submitted: Friday, May 18, 2012, 12:43 p.m.

City, State: Jamaica Plain, MA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I have just been made aware that the Senate Agricultural Committee voted to cut \$4 million from organic research funding and has cut funding to support Beginning Farmers in half.

As a small scale grower of fruit and vegetable crops, I am writing today in support of the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286), full funding of conservation programs such as the Conservation Stewardship Program, and ensuring that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

I ask that all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236) be implemented, and that the EQIP Organic Initiative be maintained.

Farmers and consumers require and deserve a fair, healthy, and sound farm bill. I most strongly urge to see that this comes to pass as soon as possible.

COMMENT OF LAURA PALM

Date Submitted: Friday, May 18, 2012, 10:44 a.m.

City, State: Sedona, AZ

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Dear Representative Gosar,

Please support the growth of small organic farms in this year's farm bill. Subsidies for commodity crops, and chemical inputs do not make healthier soil, healthier citizens, or a more secure food supply.

Thank you,

LAURA PALM.

COMMENT OF DEBORAH PALMER

Date Submitted: Friday, May 18, 2012, 2:03 p.m.

City, State: Lakewood, CA

Occupation: Realtor

Comment: As a cancer survivor and vegan, I believe we need to rid our planet of GMO's and invest in organic, sustainable produce instead of subsidizing big agribusiness who do not have the health of the country at heart. California is getting shafted in this bill as well.

COMMENT OF PAULETTE PALMER

Date Submitted: Friday, May 18, 2012, 11:15 p.m.

City, State: Omaha, NE

Occupation: Retired Educator

Comment: I have been following recent changes to farm bills. I am in favor of H.R. 3286.

However, when reading about insurance subsidies in your new proposal, I can see huge problems if limitations are **Not** put on crop insurance subsidized programs. You are opening the door to extreme fraud. For example, make the cutoff (for subsidy) at 1,000 acres. This would even the playing field for all. (When my kids complained about their low subsidy [allowance], I told them if they didn't like it, they could give it back to me. They learned to be economical and self-sufficient. Limitations are not a bad thing!)

Also any new insurance subsidy should be tied to compliance with the Conservation Stewardship Program. Our country is in a lot of financial trouble on many fronts. Let's try to keep agriculture out of that group.

Take care of the soil, take care of the small family farms/ranches, and they will take care of the nation.

COMMENT OF REED PALMER

Date Submitted: Saturday, May 19, 2012, 1:14 p.m.

City, State: Carrboro, NC

Occupation: Environmental Engineer

Comment: I am concerned that our nation's food production system has been hijacked by large corporations whose primary interest (profit) is at odds with the well-being of the vast majority of our citizens. While making a profit is a valid and important motivation for any business, the externalities (*i.e.*, failures of the free market to achieve a competitive and fair system of commerce) that agribusiness place on the rest of our society are too great to continue to ignore. These market failures of our commercial agriculture system are many and include information asymmetry (a lack of information on food nutritional quality, GMO labeling, location of production) and severe pollution. The costs we all bear for this are too high to continue on with business as usual. Some proposed measures that will make incremental improvements in this system include:

1. The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
2. Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
3. The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
4. Maintaining the EQIP Organic Initiative.

Thank you very much for your consideration.

COMMENT OF TIM PALMER

Date Submitted: Friday, May 18, 2012, 9:46 a.m.

City, State: Truro, IA

Producer/Non-producer: Producer

Type: Field Crops, Livestock

Size: 500-999 acres

Comment: I agree with most that a time has come to end the direct payment subsidies for farmers. However, this is taking away the primary way that conservationists have of keeping farmers with bad farming practices from damaging our farmland.

I think all should do our best to protect that farmland and I believe that any entity receiving taxpayer monies in the forms of subsidies and grants should be held to definite levels compliance and use of best management practices.

Even the programs for beginning farmers should be written so that those grants are accompanied by expectations that young producers should be held to at least minimum standards for environmental protection.

I feel that if we are doing the best we can with these grant and loan programs in the ag sector, we can reasonably argue that other departments of Federal government should follow the same high standards.

Thank you,

TIM PALMER.

COMMENT OF NIMAI PALO

Comment: We must take care of our parents and their generation which have laboriously and steadfastly built the great country we now enjoy the fruits of. If we fail to take care of them, I am sure we will not enjoy for long.

COMMENT OF BRITA PALOMINO, R.N.

Date Submitted: Friday, May 18, 2012, 2:06 p.m.

City, State: Irvine, CA

Occupation: Registered Nurse

Comment: As a nurse I have come to the realization that our nation's industrialized food system is making the American people sick. We are not getting the nutrients necessary to maintain a healthy immune system which is the fundamental groundwork to fighting disease. Adding insult to injury, we are consistently asking our bodies to deal with chemicals that further tax our immune system. I've always been of the mindset that prevention is the best medicine, however, the way our present industrialized food system has evolved, our children don't even have a chance. If we are going to subsidize anyone, it should be local organic farmers not multimillion/multibillion dollar agribusinesses. To me it's as simple as that. As representatives of the people, I plead with you not bend to the wills (and pocketbooks) of the corporations who clearly, clearly do not have the best interest of the American people as their priority.

BRITA PALOMINO, R.N.

COMMENT OF PENNI PALTHE

Date Submitted: Saturday, May 19, 2012, 3:53 p.m.

City, State: Grand Junction, CO

Occupation: Grandmother

Comment: There are many ranchers and farmers here in Colorado who have owned and run their own farms for generations. Big AG corporations are the worst possible answer to food shortages, they pollute and destroy land. They foul our water resources with massive amounts of pesticides and bring down the health of our citizens with the overuse of antibiotics because of bad ranching policies. These companies do **Not** care about the land, the people, the communities nor the health of the food they are producing. The bottom line \$\$\$profit\$\$\$ is all that is important to them. If we are to have a sustainable future that insures the best possible food, the best use of land and resources which are sustainable, we very much need to ensure that our local ranchers and farmers are given a priority as far as subsidies and laws which protect **Their** lands and futures. We Coloradans, love our state and the diversity of agriculture and ranching here. We love the beauty of our state and are

thankful for the water in all it's forms that is available to us. We do not want CON-AGRA to take over the land from our farmers or our ranchers, we want clean air, water, land and the food that is grown with these so that our health and the health of generations to come may live healthy, happy lives in beautiful surroundings in our communities.

COMMENT OF SHARON PALTIN

Comment: Time to modernize ecologically, support Organic farming, support family and small farms, support diverse and local food production. End Genetically Engineered crop contamination of conventional/heritage genes/seeds and the breeding of super weeds, and the heavy pesticide burdens those GMOs require. End subsidies to push GMOs. Build the soil, reduce erosion and water waste. Explore cogeneration of fuels from ag waste for running farm machinery. Feed the poor.

COMMENT OF COLLEEN PANCAKE

Date Submitted: Friday, May 18, 2012, 2:45 p.m.

City, State: Fayetteville, AR

Occupation: Video Producer

Comment: It is time to support, local, sustainable, organic agriculture and not time to cut the funding that supports it. It is time that big business was removed from the equation of who controls our food production. The concentration of power is unhealthy for our nation and world. Stop the subsidies of non-organic farming and hold companies that risk the future of our soils health accountable. It is time for the health of the consumer to be first and foremost in the process of food production.

COMMENT OF JEFFREY PANCIERA

Date Submitted: Friday, May 11, 2012, 12:39 p.m.

City, State: Seattle, WA

Occupation: Retired

Comment: We American consumers walk around with over 80 toxic compounds in our blood stream. We need you to reduce that by giving tax credits to small farmers who do not use pesticides, and who do not practice mono-culture (which necessitates pesticides). The reduction of pesticides (especially those used by ordinary homeowners) will also save our bees (and \$90 billion if bees are eliminated).

COMMENT OF DELLA PANGBORN

Date Submitted: Sunday, May 20, 2012, 4:51 p.m.

City, State: Beaverton, PA

Occupation: Clerical

Comment: Being able to access truly organic and healthy food is extremely important to me and everyone in my family. This should be a right and not compromised by big-agribusinesses.

COMMENT OF VICTOR PAPALE

Date Submitted: Friday, May 18, 2012, 12:49 p.m.

City, State: Pittsburgh, PA

Occupation: Social Service Administrator

Comment: Please preserve and strengthen all food assistance programs in the farm bill, especially the SNAP program, which serves hundreds of thousands of adults and children in our region and helps them to maintain a decent standard of living in the face of long-term unemployment and underemployment. Until such time as working families can bring home an income that meets their needs, and until such time as unemployed families can find decent paying jobs, SNAP and other food assistance programs in the farm bill, are literally essential to their health and well-being. A better way to move the Federal budget to balance is to greatly reduce military spending, which far exceeds anything we need to protect our national security.

COMMENT OF JOHN PAPANDREA

Date Submitted: Friday, May 18, 2012, 9:36 a.m.

City, State: New York, NY

Occupation: Electrician

Comment: **We Need To Break** the hold of corporate agriculture and encourage/protect smaller family farms and their diversification. We can't allow GMO's to contaminate our food supply and we can't continue to bathe our crops in toxic chemicals simply to avoid using safer more traditional methods to maximize yields. Farms have become too big to fail when a crop's contamination can affect almost fifty states—we must not allow ourselves to be so vulnerable.

COMMENT OF TOM PAPELL

Date Submitted: Sunday, May 20, 2012, 7:53 a.m.

City, State: Northport, NY

Occupation: Carpenter

Comment: Please stop subsidies to corn and soy so vegetable farming can become more competitive. I am against all genetically-modified crops and if you insist on allowing them they must be accurately labeled so those of us who choose to avoid them are respected. Your policies should be favoring the small farmer who is producing food for local consumption because that is the inevitable future for our country given the growing scarcity and expense of fossil fuels and the climate consequences to burning so much oil. **Please Remember That Government's Job Is To Represent The Many People, Not The Few In Big Business.**

TOM.

COMMENT OF NICHOLAS PAPPAS

City, State: Washington, D.C.

Occupation: Trainer—Global Health

Comment: Please help pass a robust organic farm bill. Please consider the health of the land and the people over the wishes of the corporations. Think of the bigger picture here.

Thank you.

COMMENT OF ELIZABETH PAPSDORF

Date Submitted: Sunday, May 20, 2012, 11:45 p.m.

City, State: Spring Lake Hts., NJ

Occupation: Retired

Comment: I would be happy to pay higher prices for better foods. I want GMO foods labeled, because I would prefer not to buy them.

I want cage free hens to be the norm. Why can't we have Cruelty free animal husbandry—no confinement and better feed.

No BGH in my meats. No antibiotics either.

No hiding the dangers of GMO and roundup ready seeds.

If the U.S. really cares about its farmers and its citizens, then we should Protect organic farmers and Protect small farms from the big agribusiness interests.

COMMENT OF WAYNE M. PAQUETTE

Date Submitted: Friday, May 18, 2012, 11:55 a.m.

City, State: Brooklyn, CT

Occupation: Green Ornamental Nursery Owner

Comment: All of us deserve clean food, water and air. We all must know what it is we are opting for when we shop whether it be honest-to-goodness organic,

chemically induced or GMO. Do what you're there to do for we, the people. Industry is going to do just fine. Get it right or get out of our way.

Sincerely,

WAYNE M. PAQUETTE.

COMMENT OF TERRA PARCHEN

Date Submitted: Friday, May 18, 2012, 1:32 p.m.

City, State: Missoula, MT

Occupation: Retail Associate

Comment: As a citizen of this nation I am writing to urge congress to fully support the Local Foods, Farms and Jobs Act (H.R. 3286), the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), as well as funding for conservation programs like the Conservation Stewardship Program and maintain the EQIP Organic Initiative. As a developed western nation I also believe that Genetically Modified foods need to be **Labeled!** The arguments against labeling are ridiculous and everyone should have the right to know what they're eating and make their own decisions in regards to their food and their health. It's time congress did its **Job**—to maintain the integrity of the constitution for the well-being of the citizens of this nation—not Corporate America. Look deep down inside and find that conscience that still exists in there.

COMMENT OF LAURA PARFREY

Date Submitted: Friday, May 18, 2012, 12:07 p.m.

City, State: Boulder, CO

Occupation: Biologist

Comment: There is a rich agricultural tradition in the United States that built the foundation of our communities and country. However, we are now in danger of losing farming communities and good agricultural jobs across the country because of the rise of agribusiness and the focus on a very small number of commodity crops. Supporting small farmers with diversified operations has myriad benefits to the economy (with the only exception being giant agribusiness and chemical corporations), our communities, and will indirectly promote better policies for the environment and our health. There is every reason to fight hard to reform the farm bill.

COMMENT OF BRUNO PARIS

Date Submitted: Saturday, May 19, 2012, 10:45 a.m.

City, State: Jersey City, NJ

Comment: I like to see more wholesome food available and more support for those that are taking the lead and working hard to achieve this goal for humanity.
BRUNO PARIS.

COMMENT OF DANETTE PARIS

Date Submitted: Friday, May 18, 2012, 12:24 p.m.

City, State: Moon Township, PA

Occupation: Registered Nurse

Comment: Shame on those choosing money over people.

As agribusiness has grown, as GMO's have become more common, as plants are hybridized into something completely different from the original components or donors, as animals pumped with hormones and antibiotics have become the norm, our country's health has plummeted.

The people with all the money are not necessarily looking out for the best interest of the whole. They are looking out for the best interest of their bottom line and their stockholders.

Progress is not a bad thing. In terms of farming and our food supply, progress means returning to nature and a natural way of raising plants and animals. Stop adding chemicals to our food and telling us how good they are.

We are obese because our food is no longer nutritious. We are eating more calories in an attempt to consume the nutrients that are no longer there. We are fat and undernourished. And the people we rely upon for our daily bread fatten their check-books and remain apathetic.

Do the right thing by those who voted you in office, not by those who bought and are keeping you.

COMMENT OF ELEANOR PARISI-SHAW

Date Submitted: Friday, May 18, 2012, 1:36 p.m.

City, State: St. Petersburg, FL

Occupation: Retired

Comment: Our agricultural system is in need of drastic reform. Do not cut food stamps instead of subsidies; support organic farming; factory farms are killing us!

COMMENT OF DEBORA PARISOT

Date Submitted: Friday, May 18, 2012, 12:01 p.m.

City, State: Earlville, IL

Occupation: Teacher

Comment: Please support H.R. 3286. I am very concerned about GMOs in food and my right to organic food. I live in a rural area and have been sprayed with aerial and ground pesticides. They are applied without regard to wind direction or the presence of humans. More and more research is showing the harm in GMO crops and pesticide use. The factory farm lobby should not be allowed to monopolize the debate.

COMMENT OF SOOHYEN PARK

Date Submitted: Sunday, May 20, 2012, 10:55 p.m.

City, State: Brooklyn, NY

Occupation: Gardener

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. My name is Soohyen, and I had my first garden in Williamsburg, Brooklyn about 7 years ago. I have never gardened before, but soon realized that it was a blessing to come home after a tough job in the advertising industry, and be able to enjoy the garden bathed in setting sunlight and watch my tomatoes grow. It was a revelation when I bit into my first home-grown tomato. We've all forgotten what a real tomato should taste like. Now, I am trying to tend a quietly suffering Greenpoint garden back to health. As you may well know, Greenpoint soil is not recommended for growing food—as with many other areas of urban Brooklyn. Still, I feel it my duty to nurse the garden back to health, as much as I can, so that in time it would become a healthier place. This is good for me, for the next tenant, and ultimately it's crucial for our Mother Earth. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely, and with Warmest Regards,
SOOHYEN PARK.

COMMENTS OF DEBORAH PARKER

Date Submitted: Friday, May 18, 2012, 3:04 p.m.

City, State: Peekskill, NY

Occupation: GIS Specialist

Comment: U.S. food and agricultural policy must focus on adopting agricultural practices that best protect the health of American citizens, American farmland, air and waterways, and the livelihood of farmers and farm workers. These must be our top priorities, rather than the short-sighted profiteering and self-interest of industrial agriculture lobbyists and corporate agribusiness. Farmers and families everywhere need a fair and healthy farm bill. Congress also must not cut funding for vital nutrition and conservation programs, and must strengthen support for organic and sustainable agriculture programs and practices. America's health depends on clean, safe, wholesome foods, grown with our grandchildren in mind.

Date Submitted: Saturday, May 19, 2012, 11:55 a.m.

Comment: U.S. food and agricultural policy must implement agricultural practices that protect the health of Americans, our land, water & air, and the livelihood of farmers and farm workers.

Corporate agribusiness must not be allowed to dictate our agricultural policy.

Farmers and families across the U.S. need a farm bill that does continues to fully fund vital nutrition and conservation programs, and supports organic and sustainable agriculture.

COMMENT OF JENNIFER PARKER

Date Submitted: Friday, March 16, 2012, 5:47 p.m.

City, State: Las Vegas, NV

Occupation: Administrative

Comment: We need any help we can possibly get to help people have food & fresh food. Please support any programs or bills to assist in this effort. No one should go hungry especially in our own country.

COMMENT OF MARY JO PARKER

Date Submitted: Friday, May 18, 2012, 2:47 p.m.

City, State: Saint Paul, MN

Occupation: Market Research Analyst

Comment: To House Agriculture Committee Members:

I am an Iowa farm girl who has moved to the city of St. Paul, MN. I am a strong supporter of organic food for health reasons, and I purchase my food from sources I trust, including—my local coop, the local Farmers Market, and a CSA from a local organic farmer. My health has benefited greatly from the support I've found in this area of the country.

I understand that you are considering cutting funds for organic farming, and slashing funding for food stamps (I especially don't understand how slashing support for the most needy among us helps us as a nation). I want to make it clear about the aspects of the bill I do support. They include:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I ask that you support these measures. Food is such an incredibly important aspect to health, and as a nation, we are in need of eating healthier foods. Support for organic farming will move us in the right direction . . . It may even help lower

health costs if you begin now to change farm policies away from “cheap food (unhealthy)” to “sustainable food (healthy)”. We need to move in this direction now.

Sincerely,

MARY JO PARKER.

COMMENT OF RANA PARKER

Date Submitted: Sunday, May 20, 2012, 11:21 p.m.

City, State: Los Angeles, CA

Occupation: Dietitian

Comment: As a registered dietitian, I am concerned about the discrepancy between what crops our government subsidizes and the nutritional recommendations. If all Americans ate the recommended amount of fruits and vegetables, there wouldn't be enough to provide for them. The farm bill should better coincide with the nutritional recommendations to **Save** our country from the ruin of obesity & its consequences.

I also would like to see more support for small, organic farmers.

COMMENT OF RICHARD PARKER

Date Submitted: Saturday, May 19, 2012, 12:22 a.m.

City, State: Fresno, CA

Occupation: Hearing Reporter

Comment: We need a farm bill that supports safe, nutritious food from organic, sustainable agriculture. There is no place for over-medicating animals with antibiotics, sick, downer cows being fed genetically modified and heavily pesticide ridden grains in a sustainable, healthy food supply. This only adds to making an unhealthy population.

COMMENT OF STEVE PARKER

Date Submitted: Wednesday, April 25, 2012, 9:48 p.m.

City, State: Greenfield, NH

Occupation: Student

Comment: In order to understand the need for sustainable concepts being integrated into our lives we need to firstly understand the problem. Climate change, failing supplies of carbon based fuels and food supply to populations are three of the large issues we need consider. A target date of 2050 will be used to illustrate changes to come, though changes will not stop there.

Climate change is a well documented phenomenon. The tipping point for greenhouse gas based extinction is estimated at 350 ppm carbon dioxide. Our planet is presently at 393 ppm carbon dioxide. Here are some estimates of what this one factor will look like in 2050. Temperatures are expected to rise 5.4°. 70% of U.S. counties face water supply risks. World fisheries will have collapsed, both from over-fishing and changes to the ocean circulation and temperature. The ocean is forecast to rise by 20 inches; this will place over \$7 trillion in U.S. assets in jeopardy. More than one million species of plants and animals will be extinct. 50% of the permafrost is estimated to be melted, releasing large amounts of methane further warming the climate and rendering these areas uninhabitable. The ice caps are mostly gone. These factors will all combine to cause a change in the way we will be living.

It is hard to understand how deeply our present civilization relies upon petroleum. Medicine, technology and all economies need it for survival. Oil has allowed our population to grow and flourish. Oil production has been linked to population growth by allowing us to grow food, provide heat and cooling and develop economies based upon it. It in effect determines our carrying capacity as a species. The “Green Revolution” in the 1970's and 1980's allowed us to fend off a global crisis in food supply with oil based fertilizers and pesticides. As oil production decreases so will our population. Oil production will be around 20% of today's numbers by 2050. Depending on which of the variety of scenarios you look at for the year 2050 the carrying capacity of our planet will be between 2 and 3.5 billion. Losing cheap energy from oil will change the way we get our food and produce our products. No longer will we be able to transport our goods long distances.

Economies will become more local because it will no longer be possible or profitable to travel long distances. It is ironic that the discovery of plentiful oil has led to such growth in culture and populations. The same discovery created the pollution levels that will plague our planet for thousands of years and as the supply diminishes the culture and population will also. So though you don't hear about it much global warming, the population boom and oil use are really all the same subject.

Estimating food supply for future generations brings up an area of contention amongst scientists. What will our population be by 2050? Population scientists say it will grow to 9 billion by 2050. Global warming scientists estimate we will lose $\frac{1}{3}$ of our population in that time due to loss of farming land, disease and famine. The scientists that study oil impacts think our population will drop by $\frac{2}{3}$ just from the decline of oil in our society. It is hard to believe this kind of change can occur but somewhere in the future, most estimates locate the big die off around 2030, growing populations, falling energy reserves and food shortages will bring about a change in our population. How many can survive depends on how many people we can feed locally. The Dark ages, the little ice age and the great wars are all examples of population losses. This is the first time we are looking at the implications of this kind of population loss where we can choose to do something about it beforehand.

What kind of change can we expect in economies by 2050? Financial studies show China outgrowing the United States by 2030 and India passing our country by 2050 from an economic viewpoint. These reports are based on limitless resources and cannot be considered accurate representations of a business market. This helps illustrate an issue with business models. They have yet to incorporate factors that involve world issues. If only 20% of fossil fuels remain in 2050 then there must be a similar impact upon manufacturing, transportation and economies but today's future models seem blind to the any facts about changes. If world supply of petroleum products is at 20% of today's levels it is logical to assume most of that product will be used by the world's militaries to control the remaining supplies. Add to this the affects of global warming on our ability to conduct our lives and what do you have? Lessened populations and more local economies will become the trend for our near future. No longer will growth be the norm in future business. Growth will be the adversary. These are some of the reasons we need to start thinking about sustainable lifestyles and now we know what to design our sustainable systems around, the decline of petroleum products.

Roughly $\frac{2}{3}$ of petroleum products in industrialized nations are used for transportation. The bulk of the remainder is used in industrial processes. If the remaining 20% of oil production is used by militaries, governments and law enforcement there is not much left for public use. Transportation in the near future is our first issue whether it is in business or food production. Present trends in local agriculture to help feed people are not going to change. Sustainable food production is one area of our future that shows great promise. Most rural areas will be able to provide their own food. This will in time require towns to produce their own commodities like corn and wheat as well as vegetables and meat. The urban areas present a different problem. There are not enough land areas to feed the numbers of people. Without the ability to transport food into these areas people will need to move to other areas with more available land for producing their food.

Today's sustainable food systems are building local food hubs just outside these urban areas to give local farmers the capability to gather their food products for distribution, however as time progresses these lands will become needed to grow commodities, meat and crops for the people who live there. The urban areas will need to spread out their populations in order to be able to provide for themselves. The carrying capacity of the United States is estimated around 200 million, so right now we have 110 million people who we won't be able to feed. Densely populated nations like China and India face much worse population losses. Third world countries face greater challenges from global warming than oil depletion. Most of these areas are more sensitive to climate change because they are already much closer to water and crop heat stresses than they are dependent on oil for resources.

Transportation issues in the field of businesses become much harder to estimate. Importation of raw materials needed to produce our products becomes expensive in the near future. Indeed even importing manufactured goods soon becomes too costly. It is possible that large ocean going transports will become nuclear but the issue of transportation turns our present business model on its ear. It becomes an issue of what you need to manufacture more than what want to manufacture. The production of electricity relies upon bio-mass, coal and nuclear for the most part. Though the cost of electricity will soon go up we can at least count on a supply to manufacture our needed products. We can grow cotton and raise wool for production of textiles and manufacturing of clothing and blankets, though these businesses will need to be small and local because you will need produce, manufacture and distribute in the same areas. What else can we manufacture without the ability to transport over long distances? If we grow our own food and clothing and have a supply of electricity what else do we need?

Education has evolved along with our population. There have been great adjustments to today's schools as educators try to prepare students for the changing land-

scape. Luckily education can be refocused easily as events unfold in the future. This is another area of our culture that is preparing for our future. Virtual campuses will continue to grow. After all who should best be able to anticipate the upcoming events but our teachers? Schools will remain open and the next thirty years should be an exciting time to teach and learn.

Medical practices are necessary and will need to be redesigned as our lives change. The insurance industry will have collapsed somewhere along the road to 2050 as well as the ability to mass produce medicine for the public. Again we will have to rely on local sources to produce medicinal herbs. The concept of eating and living healthy will become more of a solution to health issues than today's expensive operations and healthcare.

Technology production uses huge amounts of oil and the raw materials are widely scattered on the planet so this field will be restricted to recycling of present materials with most products being used to maintain government and state institutions. Phones and One and two way radio service will likely replace expensive televisions and computers for our means of communication.

Fossil fuel cars will soon become a part of the past. Hydrogen fuel cells are about 30 to 40 years from practical service. Electric cars and trucks will most likely soon dominate the transportation field though in much reduced fashion. Without cheap energy these vehicles will be too expensive to be affordable for general use. Walking, bicycling and horses will be much more practical.

In looking at today's stock market the entire system relies upon trading over long distance. As our world changes so will the stock market. This system will break up and making money this way will be obsolete. It is likely that the industrialized nations will return to much more local stock markets as seen in earlier centuries. Trading of commodities like salt, lime and recycled products is likely to grow while other markets diminish. The trading of seeds, animals and other food products will replace higher tech items.

These types of forced lifestyle changes have huge impacts on economies. The concept of making what we need in local areas will consume most of our efforts. Money starts to become an issue. What do communities as groups produce to sell? Some type of cash crop or local business. We no longer travel out to our jobs. We make our money in areas near home. Do tax systems survive? What happens to the national debt? The huge budgets that operate our present countries will no longer be available. The countries may still exist they just won't exist in the same fashion. The organizations of today all base their design on growth. From town structure to the largest organizations and governments all based on growth. If population declines the revenues decline, the remaining population inherits this debt either in the form of taxes or cost to purchase a product. This can continue for a short time but will eventually lead to collapse of the associated systems. This is what I call, "The Chicken Little hypothesis".

Today's organizations can use organizational thought to streamline the inputs and outputs of the product lines. Conceptual thought will dissolve unions, cut pay and trim insurance packages. As the cost of transportation rises we use conceptual thought to build industry first near the market, then near the raw resource. The same cycle of organizational thought and conceptual thought occurs at each step. Streamline operations then cut pay, insurance and automate industry. It is easy to think there will be some great breakthrough in energy or technology that will allow us to grant future generations access to comforts we have without the pollution costs; however there is not enough nuclear fuel to power the world for very long and Nuclear, Solar, wind, hydrogen and water power cannot scale up before fossil fuels collapse. We will still end up at "The Chicken Little hypothesis".

We need a solution beyond today's concepts of sustainability. Conceptual thought would say, think further outside the box. We are working with a finite resource, so it needs to be conserved enough to scale up replacement energy sources. Here Organizational thought can help us develop these industries. Our first and only priority is to slow the present use of petroleum products until we can replace it with other energy sources. This should be good for economies, new industry, streamlining existing structures, focusing on local agriculture and business when possible to conserve fuels. The world needs to at least agree upon this one issue.

If every human went outside and yelled "stop" we may hear it said worldwide but probably things would not change. To wait for the "burning platform" style of business reform really doesn't work because the sky falls. There may be some galvanizing event similar to a "burning platform" that would galvanize organizations to act in unison. This could also occur with the general population as things get tougher all around the planet. There certainly are a lot of uprisings this year. Conceptual thought demands a quick response while organizational thought is busy streamlining. However it occurs, it will occur.

COMMENT OF SUSAN PARKER

Comment: Without the health of the whole; Earth, people, soil, wildlife and farm animals there will only be death and disease. Put health first then all that is good will follow.

COMMENTS OF TAMMY PARKER

Date Submitted: Wednesday, May 16, 2012 12:10 a.m.
Occupation: Academic/Researcher
City, State: Pullman, WA
Comment: I am a community food security researcher. We must fund small and beginning farmers and SNAP programs if we are to improve food security for all. Big Ag can fund itself; let's put our scarce money where it will do the most good and make the most difference.
Date Submitted: Friday, May 18, 2012, 11:31 a.m.
Comment: The farm bill needs to support more small and local producers, not big ag who has all the money they could ever need to push their nefarious products on farmers and obese Americans. It makes no sense at all to subsidize commodity crops that either don't produce food or is used to produce food-like substances that are the primary cause of the obesity epidemic we face, which has created the health care crisis. The farm bill should allocate money only to organizations that will ultimately make our country more food secure by making healthy, nutritious food available to more people. SNAP programs deserve funding, these are the types of programs that will enhance American food security.

COMMENTS OF ROBERT PARKER STELLATO

Date Submitted: Friday, April 27, 2012, 4:07 p.m.
City, State: Redwood City, CA
Occupation: Unemployed Aircraft Mechanic
Comment: Family Farms are the backbone of this nation and has been since before the U.S. Revolution. Family Farms need the financial support of our nation to continue to put necessary food on our table and keep the U.S. economy healthy and vibrant. This is not so with Corporate, and Big Agra farms. They destroy the land, pollute our waterways, and drive the Family Farmer out of business. If any cuts to our budget in Agriculture must be made, it must be made from the subsidies made to Big Agra and Corporate Farming, not the Family Farmers!
Date Submitted: Wednesday, May 09, 2012, 2:52 p.m.
Comment: Farm subsidies should only be offered to family farm, farmed by their owner farmers, not agricultural corporations! Family farms must be preserved even at the expense of corporate farms!
Date Submitted: Friday, May 18, 2012, 3:04 p.m.
Comment: Subsidies for family farmer only, not for corporate agriculture!

COMMENT OF EMMY PARKES

Date Submitted: Thursday, April 26, 2012, 12:05 p.m.
City, State: Oxford, MS
Occupation: Registered Dietitian
Comment: Dear Congressmen,
 I am greatly concerned about your recent proposal for the farm bill, particular the cuts to SNAP and NSLP. These are programs that help millions of people every day. They are not free "handouts". Many of these people work and work very hard, long hours, but because of the types of jobs, medical problems, or other family situations are unable to afford good, healthy food without SNAP.
 I am also concerned about the cuts to the conservation programs. I think these programs are important in order to preserve our future food supply.
 Yes, I realize there is a deficit and I do support efforts to cut costs. I would like to see the amount of money given to corn, wheat, and soy growers decreased or possibly even cut completely. If a farm is consistently making >\$150,000 a year, it should not need to rely on Federal support. Furthermore, Federal support of corn, wheat, and soy are one reason that "junk foods" can be sold so cheaply but fresh fruits and vegetables often cost much more. We are also facing a health crisis in this nation and if people don't have access to inexpensive, healthy foods, we will

only increase the number of people who are obese, have high blood pressure, type 2 diabetes, and other health problems.

I believe that Federal money should go to those who need it the most—people on SNAP, small farmers, and farmers of what is usually termed “specialty crops”. Please consider improving the quality of life for millions of Americans instead of rewarding large corporations that contribute to the making of cheap junk food and thus decrease the quality of life for millions of Americans.

Sincerely,

EMMY PARKES.

COMMENT OF NANCY PARMAN

City, State: Oak Park, IL

Occupation: Spanish Teacher and Food Shelter Volunteer

Comment: I've served a lot in many food pantries. There are so many people in need. There are so many people who can barely feed their families and themselves. Please **Don't Cut SNAP!** Many people need food shelters **On Top Of** what they get in food stamps. Please don't cut SNAP!

COMMENT OF PINITO PARRA

Date Submitted: Friday, May 18, 2012, 10:13 p.m.

City, State: Torrance, CA

Occupation: Medical Student

Comment: We don't need or want artificial foods! We want what is grown naturally and are organic! You people in the house committee are our watch dogs to make sure we are not only getting food that are safe, but are best in quality. You know perfectly well that foods that have been altered in some way are not healthy. So foods that are slimed, made with preservatives, food coloring, emulsifiers, or bleached need not be sold to us. The bottom line is: nature's organic made products will lead to a healthy nation.

COMMENT OF JOE PARRETTE

Date Submitted: Friday, May 18, 2012, 12:31 p.m.

City, State: Saco, ME

Occupation: Engineer

Comment: Please add a tax to GMO producer products so we can know what foods contain GMO's. I call this the Bailey tax. This tax will require all foods that contain GMO products to have a tax stamp. Ms. Pingree, I know you work hard for your constituents.

JOE.

COMMENT OF JACK PARRIS

Date Submitted: Monday, May 07, 2012, 8:32 p.m.

City, State: Tucson, AZ

Occupation: Public Relations Manager

Comment: Please support the farm bill—I see families in need every day and we cannot afford to abandon these people who no fault of their own need help.

COMMENT OF MICHAEL PARRY

Date Submitted: Friday, May 18, 2012, 2:19 p.m.

City, State: Holland, PA

Occupation: Retired Teacher

Comment: Please restore funding for sustainable agriculture and end subsidies for factory farms. America needs organically farmed foods for its survival.

COMMENT OF PATRICIA PARSONS

Date Submitted: Saturday, April 28, 2012, 9:17 a.m.

City, State: Chicago, IL

Occupation: Unemployed Accountant

Comment: I encourage the House Committee on Agriculture to strengthen funding for TEFAP, a critical source of emergency food for the most vulnerable, and sup-

port SNAP in the farm bill. Please oppose proposals that would change SNAP's structure or reduce funding, restrict eligibility or reduce benefits.
Thank You.

COMMENT OF DEENA PARTY

Date Submitted: Friday, May 18, 2012, 3:19 p.m.
City, State: Oak Park, CA
Comment: Please Do not cut money from organic farming or from nutrition. Cut it from big agricultural companies who could stop wasting their excessive lobbying money and invest in their companies so us tax payers can put the money where it is truly needed.

COMMENT OF DORENE PASEKOFF

Date Submitted: Wednesday, May 16, 2012, 9:05 a.m.
City, State: Phoenixville, PA
Producer/Non-producer: Producer
Type: Specialty Crops
Size: Less than 50 acres
Comment: As a new farmer, I have really benefited from the Outreach and Technical Assistance for Socially Disadvantaged Farmers and Ranchers Program—please increase the funding of this program so that new farmers such as myself can get the help we need to be successful in farming and help feed our communities.
Speaking of feeding our communities, the following programs should be supported as follows:

- Community Food Projects Program—\$10 million per year to help communities build food self-reliance.
- Farmers Market and Local Food Promotion Program—\$20 million per year to develop farmers market capacity and create food hubs to connect farmers with schools, hospitals, grocery stores and other markets.(This would help farmers such as myself gain access to institutional markets)
- Hunger-Free Community Incentive Grants—An average of \$20 million per year for a new SNAP local fruit and vegetable incentive grant program at farmers markets and other healthy food retailers.

Meanwhile, please do not cut SNAP funding—there are too many hungry people in Southeastern PA who depend on this funding.

COMMENT OF RICHARD PASICHNYK

Date Submitted: Friday, May 11, 2012, 8:35 p.m.
City, State: Eugene, OR
Occupation: President of Nonprofit
Comment: Organic farmers need to be protected from GMO contamination. There should be a focus on organic farming as it requires less energy expenditure than chemical agriculture, and therefore, it has less of a carbon footprint. Also it requires less resources, such as those used to produce chemicals (*i.e.*, minerals, petroleum, *etc.*). Therefore, the farm bill should include funding for organic farming.

COMMENT OF DAWN PASKOWICZ

Date Submitted: Saturday, May 19, 2012, 3:45 p.m.
City, State: Watton, MI
Occupation: Retired Teacher, Social Worker
Comment: The replacing of family farms with agribusiness has turned out to be a nightmare. The business has lowered the quality and safety of food. The farming chemicals used and the loss of fertile top soil is diminishing rapidly under this system. Family farmers are trustworthy and willing to work with consumer's preferences. Agribusiness is neither.
DAWN PASKOWICZ.

COMMENT OF JAMES PASQUARIELLO

Date Submitted: Monday, April 30, 2012, 10:57 a.m.
City, State: Boston, MA
Occupation: Executive Director
Comment: Please protect SNAP. Children's HealthWatch (childrenshealthwatch.org) research demonstrates that continuing to fund SNAP at

the ARRA-stimulus level increases the rate of children being well. Heat/eat provisions also make an important difference in cash-strapped states that would give people more needed heating assistance funding if more were available. Categorical eligibility brings SNAP benefits to many populations with high need, while reducing administrative costs. SNAP and other family food assistance programs are critical investments in our nation's future.

COMMENT OF JOANNE PASSMORE

Date Submitted: Sunday, May 20, 2012, 12:40 p.m.

City, State: Allegan, MI

Occupation: Retired Nurse Aide

Comment: Please stop with all the genetically made foods and stop the pesticides. You are letting other **Kill** all of us. I try to grow my own vegetables and I buy locally from farmers, but **Only** if they aren't using poison on the crops. Organic and true organic foods, nothing with pesticides on them . . . Please, you are letting big farms damage us and our children, to say nothing of our soil and air.

COMMENT OF JOANN W. PASTERNAK

Date Submitted: Sunday, May 20, 2012, 4:10 p.m.

City, State: Mendota Heights, MN

Occupation: Veterinarian

Comment: Provide sound and robust funding for voluntary conservation programs. An investment in farm bill conservation delivers positive outcomes that benefit everyone. Protecting soil and enhancing water quality are long-term investments in food security and health that ultimately act as cost-saving measures as well as an economic stimulus. Prioritize the Conservation Title by funding it at the current baseline average of \$6 billion a year.

Re-establish the stewardship compact that ensures basic soil and water conservation on American farmland receiving farm bill subsidies. The Federal crop insurance program has evolved to become the largest farm bill subsidy provided to agricultural producers. Subsidizing risk can create an incentive for taking serious risks with our natural resources. Re-attach the same basic stewardship obligations that apply to other farm bill subsidies (provisions known as "Conservation Compliance") to combat unintended destructive consequences of taxpayer-subsidized crop insurance.

Please also consider sourcing our food donations to needy countries in the same geographic area, instead of shipping American grains, *etc.* half-way across the world, which is wasteful and inefficient.

Thank you,

JOANN W. PASTERNAK.

COMMENT OF SUSAN S. PASTIN

Date Submitted: Saturday, May 19, 2012, 4:45 p.m.

City, State: Chicago, IL

Occupation: Knowledge Worker

Comment: Will You Please Stop Undermining Our Nation? We need a farm bill that promotes organic and sustainable agriculture. We need enough Food Stamps funding that no child goes hungry. What we do **Not** need is subsidies to huge agribusiness interests! Do that and you'll prove any talk about fiscal responsibility is fraudulent on your part!

COMMENT OF GREG PATENT

Date Submitted: Friday, May 18, 2012, 10:53 a.m.

City, State: Missoula, MT

Occupation: Writer

Comment: The food farm bill should have as its top priority a system to produce healthful, organically grown food for the entire U.S. population. End the corn subsidy which drains enormous funds for a crop of dubious value.

COMMENT OF ANGELA PATNODE

Date Submitted: Monday, May 14, 2012, 10:37 a.m.

City, State: Madison, WI

Occupation: Engineer

Comment: I support organic farming, local, small-scale, and start-up farming, and land, air, and water conservation. I want a farm bill that includes financial and policy support for chemical-free agriculture and environmental stewardship. Thank you.

COMMENT OF CYNTHIA PATRICK

Date Submitted: Friday, April 13, 2012, 5:29 p.m.

City, State: Albuquerque, NM

Occupation: Special Education Teacher

Comment: I am a Special Education Teacher in a Title I school. 100% of our students receive free breakfast and lunch at our school. Many of my students do not have enough food in their homes.

As a staff we donate food for food baskets to some of our more hungry students for holiday breaks. My take-home pay has decreased so much in the last 5 years, that I couldn't afford to help this year.

Before Winter Break, I called CYFD about a family because I was concerned that the kids would not eat during that 17 days.

It is really hard in these economic times for more and more families. Please give as much money as you can to these programs that help our most needy children.

We don't want other world leading countries to start sending money to our starving children right here in the United States of America!

Thank you,

CYNTHIA PATRICK.

COMMENT OF DONNYL PATTERSON

Date Submitted: Saturday, May 19, 2012, 12:33 p.m.

City, State: Augusta, GA

Occupation: Retired

Comment: Do not cut funding for the vital programs such as nutrition, conservation and support for organic and sustainable agriculture. This is vital for all people including yourselves. You have been elected to represent the people!

COMMENT OF JONA PATTERSON

Date Submitted: Friday, May 18, 2012, 10:53 p.m.

City, State: Washougal, WA

Occupation: Teacher and Clean Food Advocate

Comment: The time has come to level the playing field for Big Ag and the regular farmers who started this industry.

It's time to get rid of the subsidies that are no longer needed. Big Ag is doing just fine on its own. If anyone needs subsidies, it's small community-based farmers who are trying to eke out a living by tending the land, the crops that grow in it and the animals that graze on it. These farmers are the true heroes of our times. The ones who are still in this business even when their rights are being infringed upon through corporate bureaucracy and unfair rules, designed to make them fail or become so infuriated or fed up that they want to quit. We need these farmers who are committed to providing healthy, clean food to the growing population that is demanding that farming "get back to its roots."

There is a very large contingent of people who are beyond frustrated with the direction our food system is going. We need a turn-around. Much has been said about Americans becoming some of the most overweight, most unhealthy and most sick people on Earth. Is that really how we want to represent our country? Weight and health are influenced by many factors, but the most important factors involve food and activity. It is common sense to understand that healthy food choices and an active lifestyle lead to healthy people who do not require medications for an array of weight-induced issues or medical services that are already strained. Small, community-based farmers need to be given the opportunity and support to grow organic, healthy food, keeping money in the local community, keeping the environment cleaner, keeping food options sustainable, and keeping people healthier. They can't do that the way the system is set up now.

I fully endorse all of the provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

I fully support funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

I fully back the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

And I demand maintenance of the EQIP Organic Initiative.

Profits and personal gain, which is what our current food system is based on, do not buy health or longevity. Nor do they equal a clear conscience. Get rid of Big Ag subsidies, support the programs which seek to do good in this country, and get America back on track, for the sake of our future.

Thank you.

COMMENT OF SKYE PATTERSON

Date Submitted: Friday, May 18, 2012, 11:55 a.m.

City, State: Lovettsville, VA

Occupation: Retired

Comment: Healthy, organic, **Non-GMO** foods are very important to me. We cannot sustain the practices of commercial farms. And our world cannot survive GMO crops . . . they are poisoning our Earth and our bodies. Congress needs to step up and educate themselves—they are too deep in the “pockets” of commercial farming and all their propaganda.

COMMENT OF ERIK PATTISON

Date Submitted: Friday, May 18, 2012, 7:39 p.m.

City, State: Portland, OR

Occupation: Information and Referral

Comment: I support the movement to local food providers and believe it is of the utmost importance that we support these vital local community resources. Not only does this movement provide the community with jobs and relationships but it feels like the real American way! This farm bill needs to support the sustainable future and not the massive agribusiness that has dominated our food policy for so long. As a young man thinking (and very doubtful/worried) about the future and starting a family I hope that my FDA, USDA and government can stop regurgitating our tax money into the hands of massive companies and begin supporting the little people.

I would like to ask for:

- The full edorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I would like to ask for this in solidarity with the many groups that consistently fight for the rights our grandparents had and we have lost.

COMMENT OF CHRIS PATTON

Date Submitted: Friday, May 18, 2012, 8:16 a.m.

City, State: Minneapolis, MN

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: At 62 I cannot retire, so I have borrowed money to start a new business in farming specialty berries and marketing products produced from them. My grandfather lost his farm in 1929, and I am trying to get one back into the family, though much smaller. Capital assistance at start-up is crucial and creates many more jobs than unemployment extensions. Pleas support the new farmer and organic farming initiatives—especially those through NRCS.

COMMENT OF MARLENE PATTON

Date Submitted: Friday, May 18, 2012, 1:07 p.m.

City, State: Woodbridge, VA

Occupation: Trainer of Property Software Systems

Comment: Locally grown organic foods are so important to me and my family. I am a young professional and I lost both of my parents too early to cardiac disease

and cancer. We decided as a family to try to reduce the amount of toxicity in the foods we eat. Local farms allow us to do that. We don't just want healthier food for us. We want it for the whole community! Please use your congressional power to help us keep farmers markets and local farms alive. Thank you so much for your help.

COMMENT OF ROBERT PATTON

Date Submitted: Friday, May 18, 2012, 11:18 p.m.

City, State: Louisville, KY

Comment: It would be so refreshing to see our elected officials to start voting on issues that are **Good** for the country and stop voting on what is best for the party.

Are you listening John Yarmuth?

What Is At Stake? In 1985, American taxpayers and farmers entered into a compact to provide a safety net for the country's food producers in return for protection of critical natural resources. Known as "conservation compliance," this policy requires farmers to follow conservation plans that limit soil erosion on highly erodible land as well as preventing destruction of wetlands and native grasslands. Farmers who willfully violate their conservation plans risk losing taxpayer funded benefits.

Today, this important connection is at risk. Taxpayer-funded subsidies for crop insurance are not currently linked to conservation compliance as they once were. In the current farm bill debate, Congress is considering eliminating Direct Payments, the major subsidy program that is linked to conservation compliance, and move some of those funds to support increased subsidies for crop insurance, which currently lacks compliance requirements. Unless Congress connects crop insurance subsidies to conservation compliance, a significant part of farmers' incentive to follow conservation plans will disappear this year.

In order to ensure that the agricultural safety net works in harmony with conservation programs and responsible land uses, conservation compliance provisions must be strengthened and enforced.

COMMENT OF MORGAINA PAUKER

Date Submitted: Friday, May 18, 2012, 5:37 p.m.

City, State: Westport, CT

Occupation: Parent

Comment: In order to meet the serious challenges of the 21st century, U.S. agricultural policy the farm bill must shift its focus from creating cheap commodities and artificially propping up income for farmers, toward implementing the best agricultural practices for sustainable and organic production methods.

Too much of mainstream agriculture has focused on an increasing reliance on chemicals and biotech engineered seeds. The people don't want this laboratory food evidenced by the majority of the public who want GMO food labeled.

If Congress and the current Administration are serious about the health of America's citizens, our environment and the economic viability of independently owned family farms, they will support organic farming and sustainable agriculture not big business because of their lobbying power.

Let's implement a \$25 billion plan to transition to organic food and farming production, to make sure that 75 percent of U.S. farms are U.S.D.A. organic certified by 2025.

- Create school farms and feed organic food to all children enrolled in public school lunch programs by the year 2020.
- Pass a Beginning Farmer and Rancher Bill to place a million new farmers on the land by 2020.
- Link conservation compliance with government-subsidized insurance programs and create a cutoff so each farm receives government funds for land only up to 1,000 acres.

The implementation of these proposals will ensure that our nation's children are fed the healthiest meals, our environment is preserved for future generations and farmers make a sustainable living.

COMMENT OF DIANA PAUKSTA

Date Submitted: Sunday, May 20, 2012, 8:34 p.m.

City, State: Warner Robins, GA

Occupation: USAF Program Manager

Comment: I fully support and urge you to support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

This is supposed to be a capitalist democratic society, is it not? Only by allowing citizens to know and have a part in where their food comes from, as well as giving them their God-given right to choose what they eat and thus put in their bodies, will we ever move past the hypocrisy that plagues our Government now. Congress has no approval now, and it's because the electorate feels that you have all sold out to the highest bidder. Please do the right thing and support food quality and public health. Thank you.

COMMENT OF BRITTANY PAUL

Date Submitted: Friday, March 30, 2012, 7:27 p.m.

City, State: Fayetteville, AR

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I'm a small farmer getting an online degree in environmental law and policy and am concerned about the privatization of our food systems. In order to ensure that we have a diversified food market and maintain our local economies, we must take measures to do so through this bill. You need to be supporting the Local Farms, Food, and Jobs Act, the Beginning Farmer and Rancher Opportunity Act and conservation programs (especially research for seed-saving/heirloom/climate-change resistant crops!).

- Farmers depend on quality, cutting-edge research to stay successful—how will the farm bill invest in this crucial work?
- Working lands conservation programs help farmers maintain productivity while protecting our air, water, and soil. Will you protect these programs from unfair funding cuts?

COMMENT OF CHERIE PAUL

Date Submitted: Friday, May 18, 2012, 2:06 p.m.

City, State: Houston, TX

Occupation: Clothing Designer

Comment: Please:

- Don't let Congress cut \$4 million from organic research funding and cut in half funding to support Beginning Farmers.
- Support in every way possible true **Organic** farming practices, farmers and labeling
- **The Labeling Of All GMO content foods—All!** We know Monsanto is buying everyone off in their global domination efforts—don't let them! It's BAD for business, people and the economy long-term.

Thank you!

CHERIE PAUL.

COMMENT OF ROSALIE PAUL

Date Submitted: Friday, May 18, 2012, 12:17 p.m.

City, State: Georgetown, ME

Occupation: Retired Teacher

Comment: We need to focus on sustainable practices around food production and marketing. We need to stop GMO's, promote organics and permaculture, and avoid all chemicals that pollute the soil, the water table, the air and the food itself.

COMMENT OF STEPHEN PAULEY

Date Submitted: Friday, May 11, 2012, 2:21 p.m.

City, State: Ketchum, ID

Occupation: Retired

Comment: I oppose CAFO's—beef and poultry industries. Manure is entering the water tables. Hormones and antibiotics are in the water that becomes drinking water for humans. I oppose fracking that allows chemicals into water tables. I oppose the massive subsidies that go to corn growers who grow corn to make high fructose corn syrup that is the primary cause of obesity. Why subsidize illnesses like diabetes and heart disease? We're killing Americans with farm subsidies like these. I favor aggressive testing of water supplies for cities. We must test for **All** chemicals in the water. I think that autism and birth defects can be traced to such contamination, but only if we test for **All** chemicals—drugs, hormones, *etc.* The public's health is more important than the farm vote. I oppose all big AG PAC contributions to politicians. Please work for the public, not for your re-election.

COMMENT OF DEBORAH PAULS

Date Submitted: Friday, May 18, 2012, 1:57 p.m.

City, State: Stamford, CT

Occupation: Social Worker

Comment: There are two aspects of the farm bill that I am concerned about. I want support for the poor and unemployed to continue in the form of Food Stamps, school lunches and the various programs that support the well being of the most vulnerable among us. I also want to support programs that encourage eating locally such as CSA's and small farmers. I am very concerned for the poor quality food that is being produced by agribusiness and typically the beginning of over-processed foods that are expensive and unhealthy.

COMMENT OF JERRY PAULSON

Date Submitted: Friday, May 18, 2012, 11:54 a.m.

City, State: Caledonia, IL

Producer/Non-producer: Producer

Type: Field Crops, Greenhouse/nursery

Size: Less than 50 acres

Comment: Please support the funding levels for Agricultural land easements in the Senate bill, and restore the existing match formula for the FRPP to encourage bargain sales and allow waivers of the match requirements for strategic projects.

COMMENT OF LAURA PAWLACYK

Date Submitted: Sunday, May 20, 2012, 9:51 a.m.

City, State: Minneapolis, MN

Occupation: Professional Fire Fighter/EMT

Comment: I am a full believer in organic, sustainable, local agriculture. I harvest wild rice in the state of MN, I also have been making real maple syrup from real maple trees every spring for the past 18 years. I grow some of my own food in my own garden. I shop at local farmers markets all summer. I want to buy healthy, non-GMO food **Every** time I shop.

I fully endorse all provisions of the Local Foods, Farms and Jobs Act (H.R.3286). I believe in small farmers, small farms, producing healthy food without the use of environmentally damaging chemicals. I am asking you to maintain the EQIP Organic Initiative and fully fund conservation programs and make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. I ask you to implement all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

This land that we live on is a gift to us and it needs to be respected. We need to honor and protect the Earth for future generations. We also need to allow small farmers the opportunity to grow and earn a living from their produce and animals.

Respectfully submitted,

LAURA PAWLACYK.

COMMENT OF DR. JACK PAXTON

Date Submitted: Thursday, May 17, 2012, 1:40 p.m.

City, State: Urbana, IL

Occupation: Professor University of Illinois

Comment: I did research in Agriculture for 32 years at the University of Illinois. During that time I was dismayed that no progress was made in creating a sustainable agriculture system for our vulnerable food system. It is now time to revive

LISA and create a truly sustainable food production system that addresses the multiple problems created by our present Ag system. I am aware of the intensive lobbying by Agribusiness that works against this effort. Our survival, in my humble opinion, depends on weaning Congress from the corrosive effects of special interests guiding important policy decisions.

Sincerely,

DR. JACK PAXTON.

COMMENT OF LARAMIE PAXTON

Date Submitted: Sunday, May 20, 2012, 2:22 a.m.

City, State: Trinidad, CA

Occupation: Educator

Comment: As an organic, local, and sustainable agriculture supporter, I am writing to voice my concern regarding the influence of large-scale, corporate agriculture to the detriment of healthy food, land, air, and waterways and independent local farms. Therefore, please ensure that this year's farm bill includes the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286) and requires conservation program fulfillment and compliance for any insurance subsidies programs. There can be no such thing as free money for irresponsible agricultural practices.

Furthermore, it is essential that America feed its people and not turn away starving citizens in exchange for protected profits through generous subsidies to large corporate agriculture. Please investigate splitting the necessary spending reductions equally between crop/insurance subsidies and safety net programs like WIC/food stamps.

Please support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236) as well, and perhaps most importantly, maintain the EQIP Organic Initiative in order to provide long term research and sustainable alternatives in agricultural practices that replenish and nurture the land, people and waterways, as opposed to damaging and poisoning them with reckless soil management and dangerous chemicals.

COMMENT OF CAROL PAYNE

Date Submitted: Friday, May 18, 2012, 2:13 p.m.

City, State: Hot Springs Village, AR

Occupation: Artist

Comment: Please, please vote for everything that protects our food supply and our choices of food—even as far as choosing raw milk. Let us keep our freedoms and quit telling us that you know best. This also includes marking GMO products and choosing not to have our children stuck 35 or so times with what are really untested vaccines.

Think about your own children ingesting all those chemicals and pesticides.

Sincerely,

CAROL PAYNE.

COMMENT OF LIA PAYNE

Date Submitted: Friday, May 18, 2012, 3:31 p.m.

City, State: Missoula, MT

Occupation: Elementary Teacher

Comment: Dear Representatives of the people of the United States,

In your crafting of the farm bill, please maintain the EQIP Organic Initiative and endorse all provisions of the local Foods, Farms, and Jobs Act (H.R. 3236). In addition, please fully fund conservation programs such as the Conservation Stewardship Program, making sure that enrollment in any new insurance subsidies is directly tied to compliance with such conservation programs. Additionally, please implement all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

We want the farm bill to represent the well-being of the people of this nation, assuring healthy food, the ability of small and new farmers to make a living by farming, the preservation of our nation's soil, its waters, its wildlife, and the genetic diversity of its agricultural and natural resources.

Thank you,

LIA PAYNE.

COMMENT OF COLLEEN PEA

Date Submitted: Friday, May 18, 2012, 1:31 p.m.

City, State: Indianapolis, IN

Occupation: Legal Secretary

Comment: It is past time that the government stop using taxpayers hard earned money to subsidize GMOs. The scientific evidence concerning GMOs clearly demonstrates the health concerns presented by these “innovative” and irresponsible means of production. Organic farming is better for the consumer **And** better for the environment. It is unethical that real, pesticide free, organic produce suffer such a mark-up at the market and is hardly available. People are realizing that organic goods are what they need and want but, often times, cannot afford. Provide farmers an incentive to go organic; to lower greenhouse gases; to stop killing bees and butterflies; to stop assisting in creating super bacteria and pesticide-immune insects and so on. Stop poisoning the population by injecting inexpensive foods with subsidized, GMO corn. Take responsibility for the obesity epidemic in America. Exercise some foresight in crop production so that the longevity of the Earth's fertility can span beyond just the end of your lifespan. Get out of bed with big agricultural business. Stop heading the FDA and USDA with former Monsanto lobbyists and affiliates. Encourage food producers to practice ecologically responsible and ethical farming. Growth hormones and antibiotics are **Huge** contributors to disease in the United States. There truly is a simple solution to so many health and environmental issues in this nation: **Organic Farming**. Make this farm bill reform part of your legacy. Regain worldwide respect. I plead with you insistently, please support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF SUE PEACHEY

Date Submitted: Monday, April 23, 2012, 2:32 p.m.

City, State: Pratt, KS

Producer/Non-producer: Producer

Type: Field Crops

Size: 1,000+ acres

Comment: A good argument can be made that since the crop insurance program will serve as the foundation for the 2012 Farm Bill and beyond, that foundation should be strengthened, not weakened. As we have heard over and over from bankers, producers, agents, and also every Ag related business, do no further harm to the crop insurance program. After the devastating year that we just lived through, it is evident that crop insurance works and works well. The Congress did not hear thousands of calls for a disaster assistance program because their crop policy is working well for the farmer and with the banker for the operating loan collateral today for the producer to stay in business again this year.

We as agents and as companies have given over \$12 billion in cuts to our program since the 2008 farm bill and thru the SRA agreement last year. We have given our fair share from the Ag business community. We also believe in being fiscally sound and under the magnitude of the budget crisis in this country, we are not the big ticket item in the farm bill. SNAP are food stamps program makes up the largest part of the budget and everyone should be giving at the table. We do believe in helping the children and families in our country that truly need the assistance. Why should farmers and the rural communities always be the only place that Congress is looking to cut? We know a lot of urban people do not find the farm bill discussions important but this country has always had an abundance of food and farmers and ranchers are the reason that it is possible in our country.

As a person who has always been involved in farming as a child growing up on a farm, to being a landowner and wife of a farmer today and also as a crop insurance agent since 1988, we do understand we are in difficult times but don't ruin what works. We work hard as insurance agents and are 24/7 to our producers to help with all aspects of their risk management decisions. We are their trusted choice and the 2012 farm bill should continue to utilize the experience and expertise of independent insurance agents that are the small businesses in all the small rural communities in Kansas and across the United States. FSA (Nascoe union) had the

program in the past and it did not work and at a higher price than what we were paid to take over the public-private government program. This past year we had the largest amount of acres ever covered with the MPCl programs. Waiting until 2013 will only increase pressure to slash spending and lower our baseline for the farm bill. Please take action this session and remember the Ag community is not the only group at the table.

Thank you for the consideration.

SUE PEACHEY,
Insurance Agent and Farmer,
Pratt KS.

COMMENT OF HANNAH PEALSTROM

Date Submitted: Friday, May 18, 2012, 11:13 a.m.

City, State: Bellingham, WA

Occupation: Student

Comment: Subsidies are promoting large commodity crops when the government needs to be promoting grass roots, organic, small and local farming. I frequent my city's farmers market to avoid buying into this government run system that is obviously flawed, as millions go hungry each day. More resources should be going towards those making sustainable efforts in farming, who will keep our ecosystem from failing and reduce pollution and pesticide runoff. I feel that the FDA and the government are still looking for the cheapest and most convenient way of feeding people. With how important food and nutrition is to very person's health, this economic way of handling food and food sources is grossly elementary and needs to evolve. A lack of promotion by the government towards big-agriculture alternatives is hurting local farmers who could do so much more with a small amount of government help. Stop subsidizing and start caring about making the people in United States healthy for many many years.

COMMENT OF PATRICIA PEARLMAN

Comment: Please cut subsidies to **Big-Ag** . . . they don't need them! Consider compulsory humane practices and non toxic methods of agriculture with lots of oversight! And label all products of GMO origin.

COMMENT OF ROBYN PEARSON

Date Submitted: Friday, May 18, 2012, 1:22 p.m.
City, State: Santa Cruz, CA
Occupation: Website Programmer
Comment: My father has worked in the farming industry my whole life. First running a cotton gin for 35 years then in almonds. I've seen small farmers go under. I've seen corporations take over and run people off their farms. I've seen excuses for why pesticides are OK and then years later backpedaling for poisoning water supplies.

We need to think of the people involved and all the families who are trying to put good food and healthy products onto the tables and into the homes of Americans. We need to stop subsidizing factory farms which are poisoning our land, water and citizens.

Make a thoughtful choice.

COMMENT OF ANGELA PECK

Date Submitted: Sunday, May 20, 2012, 7:17 p.m.
City, State: Felton, CA
Occupation: Skin Care Specialist
Comment: Food is Medicine—it must be protected with everything in our power. Without access to healthy food, we fail as a nation. Most Americans don't realize, but are starting to, that we are more than what we eat; but more importantly, we are what we eat—what the animals eat and what the soil is fed. This is what organic is—animals are fed their natural diets and are out in the sunshine and are treated humanely; vegetables & fruit are full of nutrition because the soil in which they are grown is nourished rather than stripped with toxic pesticides & many other dangerous chemicals.

COMMENT OF GLORIA PECK

Date Submitted: Sunday, May 20, 2012, 8:02 a.m.
City, State: Golden Valley, MN
Producer/Non-producer: Producer
Type: Field Crops

Size: Less than 50 acres

Comment: We as a people and country need a real farm bill that is fair and healthy in it's support of organics, local foods and small family farms. Organic research funding and funding to support beginning farmers is where the future of sustainable agriculture lies. Sustainability is the legacy we should be leaving for the generations to come. It is imperative that the House Agricultural Committee and members of congress recognize that it is time for real reform. As an American citizen, organic farmer, mother and wife, I am extremely concerned about our country's present and future agricultural practices. I fully support maintaining the EQIP Organic Initiative; the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236); full funding of conservation programs, such as the Conservation Stewardship Program, and insure that all insurance subsidies are tied directly to compliance with conservation programs; and lastly the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). Now is the time for Congress to truly represent their constituents and fellow Americans.

Thank you,

VICTORIA PECORARO,
10th congressional district,
Wellfleet, MA.

COMMENT OF DONNA PEEL

Date Submitted: Thursday, May 10, 2012, 3:18 p.m.

City, State: Oak Park, IL

Occupation: Attorney

Comment: I work at our food bank once a month and, to my surprise, have seen two people I know (one of whom works as a lunch room supervisor at my son's school) and meet many veterans. I leave so humbled and embarrassed that even the working poor and vets need food. And try to be callous when children pick out their pasta. Please continue to support the poorest among us.

COMMENT OF RANDY PEELE

Date Submitted: Friday, May 18, 2012, 9:53 p.m.

City, State: Seneca, SC

Occupation: Horticulturist Retired

Comment: I have been involved with agriculture/horticulture all my life of almost 65 years, and I've witnessed all of the various farm bills and USDA programs come and go, but now it seems you in government are so caught up in trying to keep the players in big agribusiness happy that you are oblivious to what's actually happening back home on what little farm land is left. Your USDA programs are designed to fit the needs and desires of agribusiness, and the rapid dismantling of the Extension Service and Land Grant Universities' support of small farmers in our communities, has resulted in the loss of much of our local "real food" producers, and left us with these artificial, chemically-processed foods which totally dominate our American food supply. Even those of us who are trying to eat natural foods and maintain a healthy lifestyle must search locally for producers or grow our own, because you in Washington will not require proper labeling of genetically or chemically-modified foods, so that we can know what we're buying at our supermarkets. Many of my friends and family here in South Carolina and throughout the country would challenge all lawmakers, politicians and government officials to remember that you work for the taxpaying citizens of this country and not for the corporate giants who seem to always have loopholes or subsidies so that they pay little to no taxes, and in some cases, actually get refunds, even in years where they show substantial profits. We would hope that all of you would take a long look at what independent and very credible research shows what the on-going agricultural system is destroying our topsoil, polluting our air and water supplies, disrupting our weather and climatic patterns and last, but certainly not least, completely jeopardizing our good health and democratic lifestyle guaranteed us by the U.S. Constitution, just so these corporations can add to their already bulging profit portfolios. There has always come a time in American history when the people have realized that their democratic way of life was being threatened, and they responded appropriately to keep what those generations before us have died to defend. We would like to let all of you in Washington know that we are very aware of the threat, and a time for appropriate response is now upon us. We're depending on you to work for "us," not

for “them.” We will be watching to see how you respond, and In November, we get our chance to respond to you.

Sincerely,

RANDY PEELE.

COMMENT OF PATRICIA PEELER

Occupation: Nurse

Comment: Please support the “healthy farm bill”. It’s past time we support good ag practices & healthy non-modified, poison-free foods for our families & children. Thank you.

COMMENT OF JOAN PEET

Date Submitted: Friday, May 18, 2012, 6:57 p.m.

City, State: The Villages, FL

Occupation: Retired Registered Nurse

Comment: Please focus on healthy foods—organics and farmers who produce foods using soil nurturing methods. We do not need to subsidize big agriculture which emphasize GMOs and soy and corn. Including these foods in almost everything processed has led to an increase in obesity and is not good for our health.

I am very distressed that President Obama is sending Monsanto to help undeveloped countries. It is like sending the fox to the chicken coop.

COMMENT OF ROBERT PEHLKE

Date Submitted: Friday, May 18, 2012, 11:52 a.m.

City, State: Brookline, MA

Occupation: Artist

Comment: Support for organic food is essential for our nation’s food supply quality and long-term sustainability. The more we learn about the use of chemicals in farming, the more it is apparent that we need to support organic farming. Please do so!

COMMENT OF CLARE PELKEY

Date Submitted: Friday, May 18, 2012, 3:07 p.m.

City, State: Windsor, NY

Occupation: Sister of St. Joseph

Comment: Agribusiness is not a personal entity. **People** are in need of safe food. It is your responsibility not only to ensure people have safe food, but that agribusiness does not corrupt our government.

COMMENT OF JOHN PELLETIER

Date Submitted: Friday, May 18, 2012, 9:22 p.m.

City, State: Dover, NH

Producer/Non-producer: Producer

Type: Fruits, Vegetables

Size: Less than 50 acres

Comment: The U.S. Government must support small local agriculture that respects the Earth and our health. We must stop the subsidies to factory farms and chemical fertilizers. We need a farm bill that creates incentives for small farms to start up and continue. We need a farm bill that supports local markets and local distribution. I should not have to buy a tomato from México when they can be grown in greenhouses in the U.S. We need to break up the giant farms which are harming this country and bring our food production back to a human scale. Congress must act.

Thank you,

JOHN.

COMMENT OF JONI PENNINGTON

Date Submitted: Friday, May 18, 2012, 1:07 p.m.

City, State: Traverse City, MI

Occupation: Business Manager

Comment: It is imperative that you protect our small farmers at all costs. No more subsidies for big agriculture, especially those using GMO seeds destroying land and killing people. Small farmers will save our country one day, mark my words. The farm bill **Must** support the family farms!

COMMENT OF SHARLA PENNINGTON

Date Submitted: Tuesday, May 15, 2012, 9:09 p.m.

City, State: Columbia, PA

Occupation: Speech-Language Pathologist

Comment: I think farmers should be encouraged to use organic methods of sustainable farming through the use of subsidies and/or tax deductions. People deserve to eat healthy, non-toxic food at an affordable price. Educate farmers on organic farming methods by learning from other farmers who have been successful. Pesticides and herbicides are ruining our soil, polluting our water and who knows what else! It needs to change now.

Thank you,

SHARLA PENNINGTON.

COMMENT OF LEAH PEREZ

Date Submitted: Friday, May 18, 2012, 1:25 p.m.

City, State: Brighton, MA

Occupation: Student

Comment: As a social work student, I work with urban, low-income families who struggle to put food on their tables, and who often suffer from both food insecurity and from obesity and food-related illness. Too many Americans are suffering from illnesses relating to poor nutrition. It is time for us to take serious steps towards making healthy food more accessible to low-income families, and to stop using tax dollars to subsidize the production of junk food.

COMMENT OF LILIA PEREZ

Date Submitted: Thursday, May 17, 2012, 3:22 p.m.

City, State: Laredo, TX

Occupation: Food Pantry Coordinator

Comment:

May 14, 2012

House Committee on Agriculture
Washington, D.C.

Dear Chairman Lucas, Ranking Member Peterson, and members of the Committee:

Thank you for the opportunity to provide input on the upcoming farm bill reauthorization. Given the increasing need for food assistance in our state and the declining supply of Federal commodity support, I strongly urge you protect and strengthen nutrition programs in the 2012 Farm Bill.

At the South Texas Food Bank, we see every day how important Federal nutrition programs are in our community and how effectively they are working to ensure that struggling South Texans can provide enough food for their families. Currently, the South Texas Food Bank serves 700,000 people annually.

Nationally, the Feeding America network of more than 200 food banks has seen a 46 percent increase in food bank clients from 2006 to 2010, and we are struggling to keep up with increased demand. Without strong farm bill nutrition programs like The Emergency Food Assistance Program (TEFAP), the Supplemental Nutrition Assistance Program (SNAP), and the Commodity Supplemental Food Program (CFSP), food banks across the country would be struggling even more to meet the increased need.

We recognize the challenge you face drafting a farm bill in a time of deficit reduction, but we are also sensitive to the tremendous, ongoing need in our state. As such, we have two key priorities for the farm bill.

First, we urge you to strengthen TEFAP to help us keep up with increased demand. TEFAP supplies about 25 percent of the food moving through Feeding America's national network of food banks. But because of strong commodity prices, TEFAP food declined 30 percent last year, and our food bank is struggling to make up the difference. We urge you to make TEFAP more responsive during times of high need by tying increases in mandatory funding to a trigger based on unemployment levels. We also propose to enhance the Secretary of Agriculture's authority to

make TEFAP bonus purchases at times when the need for emergency food assistance is high—for example high unemployment—in addition to times of weak agriculture markets so that the program can respond to both excess supply and excess demand.

Second, we also strongly urge you to protect SNAP from harmful funding cuts or policy proposals that would restrict eligibility or reduce benefits. SNAP has responded effectively to growing need in the recession with benefits that are timely, targeted, and temporary. The average SNAP household has an income of only 57 percent of the Federal poverty guideline, and 84 percent of benefits go to households with a child, senior, or disabled person. The program is working to support vulnerable Texas families, and our food bank or local agency partners would not be able to meet the increased need for food assistance if SNAP were cut.

These programs have a real impact on your constituents, many of whom must rely on the food bank and Federal nutrition programs to meet their basic food needs. I would encourage you to visit the food banks serving your district before the Committee marks up a farm bill so you can meet our clients and see firsthand how Federal nutrition programs are working to protect vulnerable Americans from hunger.

The South Texas Food Bank believes that feeding our neighbors is a shared responsibility, and food banks like ours rely on a variety of food streams to support our communities, including generous support from partners in retail, manufacturing, and agriculture. However, the Federal government is an equally critical partner through programs like TEFAP, SNAP, and CSFP, and with tremendous, ongoing need in our state, ongoing Federal support is more important than ever.

As the House Agriculture Committee moves forward with farm bill reauthorization, our food bank urges you to protect the nutrition safety net and offers the specific recommendations below.

Sincerely,

LILIA PEREZ, *Coordinator*,
Holy Redeemer Food Pantry.

Feeding America Farm Bill Priorities

The Emergency Food Assistance Program (TEFAP): TEFAP is a means-tested Federal program that provides food commodities at no cost to Americans in need of short-term hunger relief through organizations like food banks, pantries, soup kitchens, and emergency shelters. Nutritious food commodities provided through TEFAP are an essential resource for Feeding America food banks. As the demand for food remains high at food banks across the country, a continuous stream of TEFAP is necessary for the provision of a steady emergency food supply.

- TEFAP commodities account for approximately 25% of the food moving through Feeding America food banks. Food banks combine TEFAP with private donations to maximize TEFAP benefits far beyond the budgeted amount for the program. In this way, food banks exemplify an optimum model of public-private partnership.
- TEFAP has a strong impact on the farm economy. According to USDA's Economic Research Service, producers of commodities provided as bonus TEFAP (those purchased by USDA to intervene in weak agricultural markets) receive an estimated 85¢ per dollar of Federal expenditure. Producers of other commodities provided through TEFAP receive about 27¢ per dollar. By contrast, only about 16¢ of every retail food dollar goes back to the farmer.
- Declines in Section 32 funding and strong agriculture markets resulted in a 30% decline in TEFAP purchases during FY 2011. This decline is expected to continue in FY2012 as food banks continue struggling to meet increased need. The shortfall between supply and demand will only worsen when the SNAP ARRA benefit boost expires, as many participants turn to food banks to make up for the reduction in benefit levels.

Farm Bill Priorities for TEFAP:

- Make mandatory funding for TEFAP food more responsive to changes in need by providing a trigger that ties funding to unemployment levels
- Enhance Secretary of Agriculture's authority to purchase bonus commodities in times of high need for emergency food relief in addition to times of low commodity prices so the program is responsive both to excess supply and excess demand
- Reauthorize funding for TEFAP Storage and Distribution Funds at \$100 million per year
- Reauthorize funding for TEFAP Infrastructure Grants at \$15 million per year

Supplemental Nutrition Assistance Program (SNAP): SNAP is the cornerstone of the nutrition safety net, providing over 46 million low-income participants with monthly benefits via a grocery debit card. Eligibility is based on household income and assets and is subject to work and citizenship requirements. SNAP is one of the most responsive safety net programs, expanding quickly to meet rising need during the recession. The program is targeted at our most vulnerable; 76% of SNAP households contain a child, senior, or disabled member, and 84% of all benefits go to these households.

- As the number of people unemployed grew 110% from 2007 to 2010, SNAP responded with a 53% increase in participation over the same period. As the economy slowly recovers and unemployment begins to fall, SNAP participation and costs too can be expected to decline.
- The SNAP accuracy rate of 96.19% (FY10) is an all-time program high. SNAP error rates declined by 61% from FY 1999 to FY2010, from 9.86% to a record low of 3.81%.
- SNAP benefits supplement a household's food budget but are insufficient to last most participants through the month, causing many participants to rely regularly on food banks. Among Feeding America food pantry clients receiving SNAP benefits, over ½ (58%) reported having visited a food pantry at least 6 months or more during the prior year.
- The average SNAP household has a gross monthly income of \$731 and countable resources of \$333, consists of 2.2 persons, and participates in the program for 9 months. The average household receives a monthly benefit of \$287, or about \$1.49 per person per meal.

Farm Bill Priorities for SNAP:

- Protect SNAP by opposing proposals to cap or reduce funding, restrict eligibility, reduce benefits, or otherwise impede access or benefit adequacy. Recent proposals to block grant the program would prevent it from responding effectively to fluctuations in need, and efforts to limit broad based categorical eligibility would increase administrative costs and access barriers.
- Restore the cut to the SNAP ARRA benefit boost used to pay for the 2010 child nutrition bill and phase out the boost in a way that protects families from a cliff in benefit levels.
- Encourage better nutrition by maintaining nutrition education, incentivizing the purchase of healthy foods, and ensuring that retailer standards balance adequate access to stores with access to a range of healthy foods and moderate prices.
- Build on SNAP's strong record of integrity and payment accuracy by issuing guidance to states on the eligibility of lottery winners and college students and upgrading resources and technology for trafficking prevention.

Commodity Supplemental Food Program (CSFP): CSFP leverages government buying power to provide nutritious food packages to approximately 599,000 low income people each month. Nearly 97 percent of program participants are seniors with incomes of less than 130% of the poverty line (approximately \$14,000 for a senior living alone). Currently, 39 states and the District of Columbia participate in CSFP. Another 6 states (CT, HI, ID, MD, MA, & RI) have USDA-approved plans, but have not yet received appropriations to begin service.

- CSFP is an efficient and effective program. While the cost to USDA to purchase commodities for this package of food is about \$20 per month, the average retail value of the foods in the package is \$50.
- CSFP helps to combat the poor health conditions often found in seniors who are experiencing food insecurity and at risk of hunger. CSFP food packages, specifically designed to supplement nutrients typically lacking in participants' diets like protein, iron, and zinc, can play an important role in addressing the nutrition needs of low-income seniors.
- Many seniors participating in CSFP are able to have their food boxes delivered directly to their homes or to seniors' centers nearby, an important benefit for those who are homebound, have limited mobility or do not have convenient access to a grocery store.

Farm Bill Priorities for CSFP:

- Transition CSFP to a seniors-only program by phasing out eligibility of women, infants, and children while grandfathering in current participants.

COMMENTS OF MARTHA PEREZ

Date Submitted: Friday, April 27, 2012, 2:06 p.m.

City, State: Portland, OR

Occupation: General Political Activist

Comment: I am concerned that food banks are running out of resources, due to a growing demand by economically displaced families with children, homeless veterans, and other vulnerable groups. Second, I am concerned that certain organizations or groups that help to feed the poor & hungry, are being harshly penalized for doing so. These small community groups are reporting that some people have not eaten in as many as 4 days, or more. Third, it is unfair to charge Monsanto corporation with the huge responsibility of growing and providing food resources for over 1/2 of the planet's population. It is too taxing, and this huge task, needs to be broken down into smaller, localized, organic cooperatives, and a restoration of family owned & operated farms. I refer to Kraft foods, for doing the right thing, and creating subsidiaries, in the way they run business, in order to be more sustainable. Fourth, I advocate for more humane methods of raising and slaughtering meat products (chicken, beef, fish, *etc.*) and refer to Burger King, for choosing to switch to cage free eggs in their menu items. Cage free eggs are far from perfect, but it is a great improvement to start with. Fifth, I would like to see CAFO's transitioned into smaller units that are more manageable, and green friendlier. Sixth, I am concerned that as the price of food increases, more people will be susceptible to becoming addicted to pills, supplements, and pharmacy O-T-C medications/illegal drugs (when you don't eat, you will eat anything). Seventh, I receive SNAP food stamps, and want to thank USDA for continuing to provide these amazing programs. Take care.

Date Submitted: Wednesday, May 02, 2012, 7:16 p.m.

Comment: I worry that as the price of food increases, the drug addiction rates will skyrocket, if not already the case. If children do not have access to healthy food, they will resort to energy drinks or supplements, which is unsafe in my mind. I appreciate your timely response to my concerns. Thank you.

COMMENT OF VERONICA PEREZ

Date Submitted: Wednesday, April 11, 2012, 11:22 a.m.

City, State: Albuquerque, NM

Occupation: Counselor

Comment: Our monthly Roadrunner Food Bank budget is \$40.00. Our staff members stock up our vehicles with expired produce and dairy and free grains to help feed 100 women and their families. Sometimes, this is the only food they have. Please keep Roadrunner stocked fully as it directly affects the lives of our disempowered downtown community. Thank you.

COMMENT OF JOSEPH PERKINS

Date Submitted: Friday, May 18, 2012, 2:02 p.m.

City, State: Indianapolis, IN

Occupation: Carpenter

Comment: How can anyone not see the blatant corruption here. Cutting money for natural food production to force mutant foods on America. Supporting companies like a Monsanto to pad the pockets of the %1. It's shameful the way this country is fueled by greed and excess. It's disgusting. Cutting money to honest people trying to make an honest living while give breaks and high status positions in government to those who don't want people to know what they're putting in their mouth. All for more money to support their campaign of lies and empty promises. Support organic. Support natural foods. Make a difference for the better. Do something for the country not yourself or your fellow congress. You're there for us not for yourselves.

COMMENT OF KAREN PERKINS

Date Submitted: Sunday, April 22, 2012, 7:03 p.m.

City, State: Aspinwall, PA

Occupation: Graphic Design, Marketing Communications

Comment: I hope government will do its part to make sure all our citizens have access to nutritious and healthy foods. Hunger is a problem for ALL of us. Failing to support hunger programs will not only increase the economic costs of food insecurity and poor nutrition, but it will also undercut efforts to reduce poverty and health care inequity. Families in our communities are struggling. Please strengthen anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization.

COMMENT OF MARIE PERKINS

Date Submitted: Thursday, May 17, 2012, 9:36 p.m.

Occupation: Security
Comment: I would like to see the Federal government stop subsidizing ranchers and dairy farms. I think eating meat and consuming dairy products are cruel and inhumane and are destroying our environment.

COMMENT OF JOE PERNYESZI

Date Submitted: Friday, May 18, 2012, 2:33 p.m.
City, State: Gardnerville, NV
Occupation: Retired
Comment: I don't want to eat all the insecticides and herbicides so we must have an organic farm bill supporting the organic farmers so that their fields could remain free of all the harmful chemicals.

COMMENT OF JOSEPH PERO

Date Submitted: Friday, May 18, 2012, 9:58 a.m.
City, State: Asheville, NC
Occupation: EMT
Comment: Please encourage food production on a local level. It creates jobs and stimulates local economies. Local food production also builds communities, which we have gotten out of the habit of associating with food. Thank you for your effort to write a bill that is fair to all growers, big and small.

COMMENT OF JULIEN YANNICK PERRETTE

Date Submitted: Saturday, May 19, 2012, 11:54 p.m.
City, State: Cambridge, MA
Occupation: Mental Health Specialist
Comment: We would like to promote sustainable and organic farms in the United States that feed our population with as much regionally grown food as possible and continue to grow the number of small and medium sized farms. Agriculture in this country should be focused on the new generation of young farmers who are looking to farm in an ecologically sound way and money needs to be spent on organic research as well.

COMMENT OF CLAIRE PERRICELLI

Date Submitted: Friday, May 18, 2012, 8:31 p.m.
City, State: Eureka, CA
Occupation: Homemaker
Comment: We need to be supporting small and smaller family farmers, especially favoring those who adopt or use sustainable and organic methods. We need to eliminate subsidies of agribusiness and corporate ag.

COMMENT OF ANNE PERRIN

Date Submitted: Friday, May 18, 2012, 12:44 p.m.
City, State: Salem, VA
Occupation: Retired Teacher
Comment: The U.S. farm bill has to include organic farming. Organic farming is at the heart of the health of Americans. If the United States government is truly interested in the well-being of its citizens, it will require the elimination of pesticides and chemicals in our foods.

COMMENT OF NANCY PERRINE

Date Submitted: Friday, May 11, 2012, 11:59 a.m.
City, State: Doylestown, PA
Occupation: Administrative Assistant
Comment: Good Morning,
 I come from a long line of home gardeners, ever since my ancestors came in the 1600's. I am used to homegrown produce that wasn't manipulated with chemicals and big companies.

I practice organics in both my garden and purchases. It is better for all things, health, soil and water runoff, *etc.* Well maybe the Big Chemical companies don't think it's better!

The problem is that it is very expensive and it is hard to maintain this lifestyle. I can pay \$2.99 for non organic berries but have to pay \$4.99 for organic?

What I want is organic farming, with benefits to the farmers who go organic and not to the big farms that pollute all things with chemicals. The chemical farms get enough benefits from Big Chemical and they don't need the governments help.

More affordable organic fruits and vegetables and organic farming being the norm not the exception.

Thank you for your time.

NANCY PERRINE.

COMMENT OF HEATH PERRY

Date Submitted: Sunday, May 20, 2012, 9:29 p.m.

City, State: Los Angeles, CA

Occupation: Dietitian, Health Educator

Comment: Dear House Agriculture Committee,

I believe we are in a sad state where the burden of proof is put on the people showing that the chemicals and genetic modification of our foods are harmful, when the burden of proof for safety should be put on the corporations that profit from these chemicals and genetic modifications. The potential human health and environmental impact of patenting seeds that can cross pollinate with natural species and then owned by said company is very disheartening. The very sanctity of people being able to grow their own food is at risk here. There are plenty of scientists, including Dr. Don Huber, who have evidence of clear warning signs for major environmental impact of the GMO crops, but the current policy is introducing these new engineered 'plants' into our ecosystem with only the research given from the companies with vested interest in these plants as burden of proof. We've seen it many times before, when these companies make huge profits from the sale of poorly researched chemically/genetically altered foods only later to be proven to be cancer causing agents, at which point they just switch to the next in a long list of additives or alterations that are great for production, price and shelf life, but poor on health. Water and food policy needs to be get back to the basics. There is nothing more important for our survival than, clean, wholesome organic food. Organic farmers should be receiving government subsidies and the industrial chemical "food producers should be paying fees to support independent research to prove their efficacy and safety", not the other way around. There are amazing new simple systems that use environmentally-friendly technology and good old fashioned nature that can compete in production with these energy and chemical dominant industrial food systems we have now. Aquaponics is just one such example. Please help bring back our farm policies to represent what is best for the health of our people and the planet. This is one of the most critical issues we are facing for our future. Please go forth with the gravity of your decision's affect in mind.

Thank you.

COMMENT OF LINDA PERRY

Date Submitted: Saturday, May 19, 2012, 10:13 a.m.

City, State: Randolph, MN

Occupation: Retired

Comment: It's time to cut subsidies (and Insurance) to the big corporation farmers—they are doing just fine. We do need stronger conservation policies, help or at least not harm for new/small farmers and organic *versus* chemical food producers.

COMMENT OF NANCY PETERS

Date Submitted: Friday, May 18, 2012, 11:19 a.m.

City, State: Yellow Springs, OH

Occupation: Massage Therapy

Comment: Please support the Slow Food USA farm bill principles. Those principles support clean air and water, and fair farm practices for all—so that we may be healthy, happy and free!

COMMENT OF HALEY PETERSEN

Date Submitted: Friday, May 18, 2012, 2:17 p.m.

City, State: New York, NY

Occupation: Musician

Comment: I think it is imperative that this country start taking responsibility for the health of this country. Corporations need to stop taking advantage of the way that this country is run but we all know they won't, it's not in their interest. So, it's time for the country, which has mostly been left in the dark, to stand up for itself. We are going to destroy what our forefathers built for us simply because we're too ill or obese to do anything about it.

We want healthy food. We don't want to be poisoned by the lettuce we buy at the grocery store.

This seems like a no-brainer to me. Why not everyone else?

COMMENT OF KELLY PETERSEN

Date Submitted: Wednesday, May 09, 2012, 8:38 p.m.

City, State: Stoughton, WI

Comment: Please pass a strong farm bill that protects programs like SNAP, TEFAP, and CSFP. We need to make sure that our senior citizens (and all people) have enough to eat. Have you ever skipped a meal? Imagine if you didn't know where your next meal was coming from. We need to take better care of our friends, family, and neighbors.

COMMENT OF SARAH PETERSEN

Date Submitted: Friday, May 18, 2012, 1:35 p.m.

City, State: Los Angeles, CA

Occupation: Multi-Media Environmental Education Producer, Artist, Cook

Comment: As someone whose work has been directly tied to the farming and food industry for many years (and whose life ISN'T tied to these concerns, I'd like to know!), I support, and urge you to support, the following provisions of this year's farm bill:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

The farm bill is one of the major legislative levers for sound judgment and stewardship to rule over industry money. Please use it for its highest purposes, rather than its lowest.

Thank you.

COMMENT OF ANDREW PETERSON

Date Submitted: Sunday, May 20, 2012, 1:05 a.m.

City, State: Malibu, CA

Occupation: Student

Comment: Organic agriculture is one of the fastest growing sectors in America. It's responsible for creating jobs, and providing healthy options for consumers. I already eat organic, and as America becomes more health conscious the demand will rise. Organic is a buzz term in cities and I've already convinced 10 of my friends and several of my neighbors to start buying organic produce. A healthy economy is one where money flows in an ecosystem between consumer and producer. Keep money in Organic Research, give farmers the opportunity to grow their business, and I guarantee that the consumers will respond.

COMMENT OF ELIZABETH PETERSON

Date Submitted: Thursday, May 17, 2012, 2:28 p.m.

City, State: Huntsville, AL

Occupation: Retired

Comment: We need an agriculture bill that will support the increasing use of organic agriculture, give state and local agencies flexibility to choose local, healthy foods for their school lunchrooms, encourage innovation in farming, protect the environment while promoting sustainable farming practices, and encourage a new gen-

eration to enter farming. Programs to be supported include the Organic Agriculture Research and Extension Program, the Conservation Stewardship Program, the Value Added Producer Grant Program, and the Beginning Farmer and Rancher Development Program. As a consumer and home gardener, I appreciate the availability of good, organically grown foods and want to see their availability increased.

COMMENT OF HEATHER PETERSON

Date Submitted: Friday, May 18, 2012, 12:48 p.m.

City, State: Downers Grove, IL

Occupation: Homemaker

Comment: It is increasingly hard to find healthy choices for my family. I refuse to buy GMO foods as we are the lab rats on that. Organic is the best choice and government is getting too involved and sticking their nose where it doesn't belong. Organic farming is the way of the future.

COMMENT OF KELLY PETERSON

Date Submitted: Sunday, May 20, 2012, 9:50 a.m.

City, State: Pacific Palisades, CA

Occupation: Stay-at-Home Mom

Comment: Please stop subsidizing food that makes people unhealthy and start shifting to more generous subsidies of organic food.

Please stop creating a system that overproduces corn and start subsidizing more healthful, green veggies.

COMMENT OF LAURI PETERSON

Date Submitted: Saturday, May 19, 2012, 8:22 a.m.

City, State: Church Hill, TN

Occupation: Cook (Small Home Garden)

Comment: So, you want to cut our deficit? How about going department by department and slice the programs that are no longer in the best interest of the people. Let's start with "A". "A" is for Agriculture. For many years I've been saying that this is one, if not **The**, biggest waste of taxpayers' dollars. Why can't people just farm? Why does the Government need to stomp it's big feet in the soil? Let the people drive the market. If you can't produce what the people want, then find a career other than farming! Agribusiness' don't need tax breaks to make ends meet. If they do not like not receiving the breaks, then do something else. I, like **Many** others, am getting so tired of the Government interfering In **Everything** I say or do.

COMMENT OF LINDA PETERSON

Date Submitted: Friday, May 18, 2012, 1:30 p.m.

City, State: Sebastopol, CA

Occupation: Coordinator of Beginning Farmer/Rancher Training Program

Comment: We need more money to grow more farmers (200,000 new farmers needed per Secretary Vilsack). We need support for small farms and ranches farming sustainably, including environmentally safe, regulatory & permitting processes that are not onerous and expensive for small operators, and more funding for regional food system efforts (like the efforts currently underway in CA on a state level).

COMMENT OF LINDA PETERSON

Date Submitted: Friday, May 18, 2012, 6:11 p.m.

City, State: Greenville, OH

Producer/Non-producer: Producer

Type: Field Crops, Livestock, Poultry/poultry products, Vegetables

Size: Less than 50 acres

Comment: We need true agriculture needs met. Not mega farmers and those ag companies trying to make big money and ruining the environment with their costly products. It's time the congress become for us the producers and not the big name companies. Organic not only will keep our kids healthy but will help with a lot of medical costs and problems for others as well. Get government out of where it shouldn't be and let the American people do what they know do to keep us healthy.

COMMENT OF MARK PETERSON

Date Submitted: Friday, May 18, 2012, 10:05 a.m.

City, State: Clementon, NJ

Occupation: Engineer

Comment: Promote/incentivize:

- Development of digesters on farms/CFOs to produce methane from animal excrement to burn on the farm for heat or power generation.
- Re-establishment of family organic or non-organic farms and more farmer's markets.
- Healthy food for school lunch and breakfast programs
- Healthier and more humane CFOs and reduction of prophylactic use of antibiotics.

Outlaw suits by Monsanto/Cargill and other GM seed producers against farmers whose crops are contaminated with the GM seed/pollen, and instead: Promote, through law, the ability of farmers to sue the GM seed manufacturers when their crops are contaminated with GM seed/pollen.

COMMENT OF RONALD PETERSON

Date Submitted: Wednesday, May 09, 2012, 7:11 p.m.

City, State: Carmichael, CA

Occupation: Part-Time Retail Employee

Comment: If it was not for the food that I receive from the SNAP program, I would be hurting. For the amount of income from my part-time retail job just covers the cost of my health insurance and my monthly pension income just covers the my housing cost. If it was not for the SNAP program, I would not be eating because I don't have the money to buy food.

COMMENT OF ALEXANDER PETRUSZAK

Date Submitted: Sunday, May 20, 2012, 10:12 p.m.

City, State: Olympia, WA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. My name is Alexander Petruszak and I am a young farmer in the state of Washington. Originally coming to Washington from the Midwest, I grew up on the south side of Chicago—a food desert. There and in much of Illinois, the only available produce is conventional produce grown out of state and many-a-times out of this country. It was in my freshmen year of college that I realized the dire need for local food production in the city that raised me. From then until now, I have been working on small Community Supported Agriculture (CSA) vegetable farms. Maple Rock Farm, where I currently work, feeds 60 families alone through its CSA program which is now in its tenth ongoing year. Farms like this one are needed and demanded all over the country but the farm bill often leaves them overlooked, neglecting funding for research on and the practice of small-scale organic agriculture. Furthermore, the loss of agricultural land in the face of urban sprawl has always appeared a major threat to farmers. The cost of ½ an acre in Manhattan, IL (45 minutes from Chicago) is now easily upwards of \$100,000. All of my family is from rural northern Illinois, my father grew up across the road from a grain farm in Monee, IL. When my father was young, Monee was a town of under 3,000 people and the sun could be seen setting on the western horizon. In my grandmother's words, "heaven is where that sun reaches the horizon." In 2004, the same year my grandmother died, the grain farm was bought, torn up, and a model home community was built on the property. I can no longer see my grandmother's heaven from her house. This story is not a singular occurrence, despite the conservation of 800,000 acres of farmland a year, more than that is lost every year to urban sprawl and unsafe farming practices. An area the size of Indiana is lost in American topsoil each year. I have relocated to Washington so that I could have some opportunity to learn about small scale integrated farming, an ideology commonly underrepresented—and ridiculed—in highly subsidized Midwest commercial agriculture. What the farm bill needs is more attention, support, and funding for programs like ATTRA (the National Sustainable Agriculture Information Service), Sustainable Ag-

riculture Research and Education (SARE), and the Farm and Ranch Lands Protection Program (FRPP). Not only should these programs receive heavier support, but it should be acknowledged that farming is not merely a commercial interest! The ideal farmer is driven by honesty and respect for health, that of the planet, their customers and their workers. A farmer **Is** a civil servant and also highly dependent on self funding their business ventures. The farm bill should look to forgive student debt of farmers as a means of spreading small scale agriculture and ultimately allowing better resource management and homeland security across this country. For myself, it was the realization that I would be able to farm the day I had as much savings as I currently have in school loan debt that forced me to leave the classroom. I hope that doesn't continue to be the case. I hope I can one day see Illinois vegetables in stores without them being hyper processed as food additives. I hope someone in Chicago will have the access to agricultural education and nutrition that I nor any of my family members ever did. I hope the fact that our food is one of our largest political decisions becomes more respected in the years to come.

Sincerely,

ALEXANDER PETRUSZAK.

COMMENT OF CARLENE PETTY

Date Submitted: Thursday, May 17, 2012, 2:52 p.m.

City, State: Shepherdsville, KY

Occupation: Executive Secretary

Comment: This year I would like to see a better Food and Farm Bill that addresses our agricultural needs. **First:** we need **Healthy** food to nourish us, which means continuing the VAPGP at \$30 million funding but designating it **Only For Organic Farming Operations**—not Agribusiness! which means providing school-children with actual food like organic fruits, vegetables, and nuts in meals and snacks and eliminating “pink slime,” and GMO-tainted products from consumption by children! Which means continuing the Organic Agriculture Research and Extension Initiative at \$30 million funding! Which means eliminating subsidies for Agribusiness and transferring subsidies to small operations and family farms! **Second:** We need to promote the preservation of nature in our agricultural activities, which means full funding for the Conservation Stewardship Program! **Third:***

COMMENT OF IRENE PHAM

Date Submitted: Friday, May 18, 2012, 2:18 p.m.

City, State: Santa Ana, CA

Occupation: Teacher

Comment: I want you to align farm policy with our nutrition standards and our environmental policies.

If subsidies and regulations are going to be the business of the Federal government, which I am not sure they should, at least they should be supporting, not countering, the known science of health and disease prevention. And, the long-term productivity of the land and water resources should not be endangered by those subsidies and regulations. This overall principle, not the welfare of farmers, should govern our farm policy.

COMMENT OF WILLIAM PHELAN

Date Submitted: Wednesday, May 09, 2012, 9:02 p.m.

City, State: Tallahassee, FL

Occupation: Physician Assistant

Comment: Please protect food stamps (SNAP), TEFAP and CSFP in the farm bill. People need to eat. Seniors, especially. Don't sell out to the ethanol people or the megaproducers. Keep America fed. Protect food stamps.

COMMENT OF BENNETH PHELPS

Date Submitted: Thursday, May 03, 2012, 4:50 p.m.

City, State: Easthampton, MA

Producer/Non-producer: Producer

Type: Fruits, Poultry/poultry products, Specialty Crops, Vegetables

Size: Less than 50 acres

* Editor's note: the comment was incomplete as submitted.

Comment: Please maintain existing conservation agriculture programs and funding towards beginning farmer programs.

The food stamp dollar matching trial programs (3 to 1 match) at farmer's markets in our area in our are simple and work well. I would love to see food stamp value everywhere matched 3 to 1 at the farmer's market.

COMMENT OF LUELLEN PHELPS

Date Submitted: Sunday, May 20, 2012, 4:19 p.m.

City, State: Peterson, IA

Occupation: Assistant Manager Health Food Store

Comment: Organic farming is very important to me. We must stop poisoning the Earth because by doing so we are harming ourselves as well as other living things. We must conserve and enrich the soil as much like Mother Nature as possible. Present farming methods are not sustainable.

COMMENT OF JAMES PHILLIPS

Date Submitted: Wednesday, April 18, 2012, 11:13 a.m.

City, State: Crocketts Bluff, AR

Producer/Non-producer: Producer

Type: Field Crops

Size: 301-500 acres

Comment: We urge you to re-instate the Outreach and Assistance for our Socially Disadvantaged Farmers and Ranchers Program (2501 program) back into the 2012 Farm Bill. This educational program has been very helpful to many farmers in our operations with all the USDA Programs.

Thanks you for your time.

God Bless,

JAMES PHILLIPS.

COMMENT OF SUSAN PHILLIPS

City, State: Cottage Grove, WI

Occupation: Retired

Comment: We need a healthy farm bill. We need to support the organic farms in our country. We need to stop supporting big agriculture. Con-Agra and Monsanto do not need our tax dollars. Small farmers do!

COMMENT OF CYNTHIA PHINNEY

Date Submitted: Saturday, May 19, 2012, 2:59 p.m.

City, State: Livermore Falls, ME

Occupation: Electric Utility Meter Reader

Comment: I hope that you will support a farm bill that supports family farms, supports organic farming, supports nutritious whole food, and encourages the health of the soil, the people, and the environment. Increasing evidence ties health issues including obesity, food allergies, heart disease and cancer to things like food additives, genetically engineered plants, animals raised in feedlots, and processed foods. I want my tax dollars to support farmers who are caring for the land in a sustainable way and bringing nutritious food to the market. I understand that we can't make this change all at once, but we need to be steadily moving toward it on many fronts. What the Ag Bill supports or doesn't support makes a tremendous difference in what people eat, and in whether family farmers can survive. It also makes a huge difference in what kinds of foods are available to school children and lower income citizens. All of this affects the health of our country on many levels.

COMMENT OF HOLLY PHIPPS

Date Submitted: Friday, March 16, 2012, 4:15 p.m.

City, State: Lake Oswego, OR

Occupation: Property Management

Comment: Our food source is in real danger, mostly because the independent farmer has been pushed out, bought out by corporations and subsidized. Just look at where we are today, it isn't going to get any better. Please make this issue a priority.

COMMENT OF JOANNA M. PHIPPS

Date Submitted: Friday, May 18, 2012, 1:18 p.m.
City, State: Grand Rapids, MI
Occupation: Freelance Proofreader
Comment: Dear Mr. Amash,

As a Republican myself and having grown up in rural Michigan on a small farm, I have grave concerns over the current system of farm subsidies. This system clearly favors huge industrial agricultural companies over smaller family farms and produces nothing but inferior, perhaps even dangerous, food and fewer job opportunities. Stability and safety in the food supply and local economies is best accomplished by smaller, and more numerous, local farms. I am not interested in a cheap food supply or lining the pockets of huge ag companies. I want to ensure access to safe, nutrient dense foods and to support local farmers and future farmers to grow them. Therefore I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- And Maintaining the EQIP Organic Initiative.

I ask you to support these initiatives as well. I believe that true and good reform in the agricultural system will carry our country a long way toward safety, stability, and economic growth for its citizens.

Sincerely,

JOANNA M. PHIPPS.

COMMENT OF LEANA PHIPPS

Comment: I want to see the FDA get rid of pesticides. There are more than enough facts and studies showing extreme negative effects on unborn babies. How much is too much when it comes to the future of our world and children.

COMMENT OF SEBASTIANO PICCIUCA

Date Submitted: Friday, May 18, 2012, 12:08 p.m.
City, State: Holland, MI
Occupation: Retired
Comment: We have been subsidizing corn & sugar for over 40 years. Now we are an obese diabetic nation. Corporate industrial mono-crop agriculture has depleted the soil and perhaps been responsible for the disappearance of the bees. Remember you can't eat money!

COMMENT OF JANA PICKARD-RICHARDSON

Date Submitted: Friday, May 18, 2012, 12:57 p.m.
City, State: Boston, MA
Occupation: Teacher
Comment: It is unconscionable to continue to subsidize corn and soy leading to underpriced junk food, while fresh, organic fruits and vegetables are out of reach for most working families. This has dire health and economic consequences for our nation.
I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF REBECCA PICTON

Date Submitted: Saturday, May 19, 2012, 1:55 a.m.

City, State: Corvallis, OR

Occupation: Retail Sales

Comment: Industrial agriculture is destroying our soils, our water, and our small farms and communities. It is time for a different paradigm. Subsidies to large agricultural corporations must stop. If they are such great businesses, why do they need welfare? Smaller, localized producers will also contribute to food security, which is a huge issue when only a few corporations control all the seed and production.

There are better ways to guide agriculture than has been done in the past decades. Now is the time to create a long-term plan that will truly benefit the planet and the people who rely on it.

Thank you.

COMMENT OF CHRISTINE PIEPER

Date Submitted: Friday, May 11, 2012, 10:17 a.m.

City, State: Vienna, VA

Occupation: Nonprofit Executive

Comment: America needs a farm bill that invests in the next generation of farmers and ranchers. I grew up on a family farm, and both of my brothers remain in the dairy business. Please help young men and women like them, who want to farm our nation's food, to get a successful start in farming.

I believe that we need \$25 million per year in mandatory funding for the Beginning Farmer and Rancher Development Program. We need a national strategy and commitment to support beginning farmer and ranchers entering agriculture. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new agriculture start-ups.

Thank you.

COMMENT OF MEGAN PIERCE

Date Submitted: Friday, May 18, 2012, 9:54 p.m.

City, State: Gays Mills, WI

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: As a small farmer producing medicinal and culinary herbs, a farm bill that promotes the viability of small farms is very important to me. I ask that you fully endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286), fully fund the conservation programs, such as the Conservation Stewardship Program, and make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. Please implement all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236) and maintain the EQIP Organic Initiative.

Before the industrial revolution, small farmers were the backbone of America, providing nourishing, organically grown food for U.S. citizens. They are what is needed to bring this country away from the health crisis that it is now in, with raising rates of obesity, diabetes, and cancers.

The health of this nation is tied to the health of its' citizens. And the health of the citizens rely on their access to healthful food grown by farmers of all sizes.

COMMENT OF DOROTHY PIERRET

Comment: It is unacceptable for children to not get good healthy food. Either is it for seniors or low income people. Please don't make cuts to SNAP or the Farm bill.

COMMENT OF ANNA MARIE PIERSIMONI

Date Submitted: Saturday, May 19, 2012, 2:38 p.m.

City, State: Los Angeles, CA

Occupation: Web Development

Comment: We want to know that the food we are buying is good for our families, our communities, and our local farmers and ranchers. Strong, fair farm and food policies help make this possible. Now is the time to put these new rules into practice.

COMMENT OF SUZANNA PIESLAK

Date Submitted: Friday, May 18, 2012, 8:30 p.m.

City, State: Laurel, MD

Occupation: Architect and Mom

Comment: We get weekly deliveries from a CSA and have an Organic Farm share all summer. Besides education, I believe that access to healthy non-GMO and organic food is the most important issue for our children's future. The obesity and type 2 diabetes problem in our country is out of control and we need to make healthy food a priority again.

COMMENT OF CHERYL PIETRO

Date Submitted: Friday, May 18, 2012, 2:45 p.m.

City, State: Seattle, WA

Occupation: Efficiency Consultant

Comment: We need government that is looking out for our best interests. We need to have protection for organic farmers, for grass fed, free range and organic farming. We also need protection and informed consumption where GMO's are concerned. We want the right to eat what is healthy. It is up to everyone, including the representatives of this country, to make sure we are all protected.

COMMENT OF EDWARD PILE

Date Submitted: Friday, April 27, 2012, 7:36 p.m.

City, State: Abingdon, VA

Occupation: Private Industry

Comment: Southwestern Virginia is afflicted not only by the pain of drug abuse, child abuse and neglect, malnutrition, and poor health, it is an area where hunger is of pandemic proportions. We need the farm bill to bring funds into these communities to buy basic sustenance for residents. Please help!

COMMENT OF KILLEEN PILON

Date Submitted: Friday, May 18, 2012, 3:07 p.m.

City, State: Santa Monica, CA

Occupation: Retired Social Services Director

Comment: I have been involved in slow foods and small farms for the last 15 years. I am concerned about the direction agriculture in the U.S. has taken—GMO, pesticides, eroding of farm land, overplanting, abuse of animals raised for food, and subsidies to agri-industry. I want my food to be clean, healthy, and tasty.

COMMENT OF LUCILLE PINCINCE

Date Submitted: Saturday, May 19, 2012, 11:54 a.m.

City, State: Lincolnville, ME

Occupation: Office Work

Comment: I fully endorse all provisions of the Local Foods, Farms and Jobs Act and support conservation programs that will preserve and make farmland affordable, particularly for beginning farmers and ranchers.

I abhor big business's control and destructive use of our soils and seeds.

COMMENT OF MELISA PINEDA

Date Submitted: Friday, May 18, 2012, 11:03 p.m.

City, State: Fremont, CA

Occupation: Mom

Comment: The quality of the food we put into our bodies should not be so hard to get. We need to get back to basics and nourish our bodies without pesticides, toxins, sugars and other substitutes for what we can get naturally from our Earth . . . and let's not start on that subject, our Earth . . . the green lush lands that are getting covered with concrete.

COMMENT OF DAMARIS PINEDO

Date Submitted: Friday, May 18, 2012, 1:48 p.m.

City, State: Rochester, NY

Occupation: Cytotechnologist and Owner of Organic Juicing Business

Comment: We need to go back to the basics in what we eat and how we farm. Let's work together to regain our land and grow food the way God intended.

COMMENT OF MARTHA PINGS

Date Submitted: Friday, May 18, 2012, 1:25 p.m.

City, State: Madison, WI

Occupation: Social Services and Parent

Comment: The farm bill is our 1-in-5 year chance to aid "real" farmers—not soy and corn agribusiness. What about promoting farmers who raise broccoli, tomatoes, pears, and the rest of our necessary diet? It impacts our nation's obesity epidemic, health care costs, and quality of life. Agribusiness doesn't need support. Healthful, varied, fresh food does.

COMMENT OF CAROLYN PINKHAM

Date Submitted: Friday, May 18, 2012, 2:42 p.m.

City, State: Portland, OR

Occupation: Retired Social Worker, Homemaker, Volunteer

Comment: We need to save our country from being victimized by politics as usual. We need to dig deep and undo the damaging legislative acts that have been done and create new ones that will rebalance our system for the benefit of all. This means producing food in a way that is most healthful even if it costs more as it will benefit health costs . . . invest in new energies to offset future oil and gas shortages . . . support our vulnerable peoples so that we create a more stable population . . . pay a living wage to all so that people don't have to rely on welfare . . . on and on. Bring sensibility back into the equation.

COMMENT OF CHARLOTTE PINSKY

Date Submitted: Friday, May 18, 2012, 8:02 p.m.

City, State: New Port Richey, FL

Occupation: Retired

Comment: Too many lawmakers are depending on Monsanto and corporate farms for their information. Go to scientists and real farmers to understand nutrition and healthy farming. My grandfather was a dairy farmer and lived to be one hundred and 2 years old. I wonder how long Monsanto executives and corporate farmer will live. Of course they may secretly be eating organic food.

COMMENT OF MATTHEW PINTAR

Date Submitted: Monday, March 19, 2012, 9:14 p.m.

City, State: Lubbock, TX

Occupation: Biologist

Comment: Our current food system is broken, and it didn't happen by accident. It's time for a new farm bill that creates a healthy food system. Please support these actions in the next farm bill:

- Level the playing field for farmers
- Make markets fair for farmers and consumers
- Ensure food security by restoring the grain reserve
- Make healthy food accessible for all people
- Rebuild local infrastructure for regional food systems
- Make smart government food purchases
- Support new sustainable farming programs

- Promote environmental stewardship
- Require full safety reviews and labeling of GE foods
- Stop subsidizing factory farms and dangerous technologies

Thank you for your consideration.

COMMENT OF REYNOLDS PIP

Date Submitted: Thursday, May 10, 2012, 2:13 a.m.

Occupation: Caretaker/Homemaker
Comment: What will seniors do if they no longer have access to these vital programs? We support SNAP, TEFAP, and CSFP and want them protected!

COMMENT OF AMANDA PIPER-McCLURE

Date Submitted: Sunday, May 20, 2012, 8:11 p.m.
City, State: Idaho Falls, ID
Occupation: Bookseller
Comment: I work both in and out of my home. I am a wife and mother who cares about local organic farming. Due to the fact that I live in Idaho, I have made use of national co-ops such as Bountiful Baskets, in order to get better variety and pricing on organic food. Please do not make it harder on the local smaller farmers to grow food that is healthier for us and sustainable.

COMMENT OF TONY PISANO

Date Submitted: Friday, May 18, 2012, 1:26 p.m.
City, State: North Adams, MA
Producer/Non-producer: Producer
Type: Other
Size: Less than 50 acres
Comment: I believe our food is our future, which means the source of our food, the land, must be nurtured and protected. We are finally seeing a rise in new young farmers using age old, tried and true practices of sustainable agriculture. Big AG practices are not sustainable. Now is not the time to cut funding for start-up young farmers using organic and naturally grown processes. Please don't let the money of big Agriculture lobbyists influence decisions made that will affect the lives of your children, grand children and generations to come. There is a growing movement to produce healthy food using best practices for the welfare of the animals and consumers. This movement is the small CSAs, market farms, and local food production and consumption.

COMMENT OF PATTI PITCHER

Date Submitted: Friday, May 18, 2012, 10:11 a.m.
City, State: Snoqualmie, WA
Producer/Non-producer: Producer
Type: Fruits
Size: Less than 50 acres
Comment: We need the farm bill to support small farmers and stop subsidies on commodities to level the playing field. Consumers need **Real** food, not GMO enhanced crops that hurt the Earth and its inhabitants.

COMMENT OF CATHIE PITTS

Date Submitted: Sunday, May 20, 2012, 1:16 p.m.
City, State: Buckeye, AZ
Occupation: Retired
Comment: Please help regulate our food production. Many diseases have been linked to human consumption of harmful chemicals. I try to buy organic products when possible, but they are expensive and sometimes hard to find (have to drive further, using more gas, etc.). Please support organic farmers.

COMMENT OF JUDY PIZARRO

Date Submitted: Friday, May 11, 2012, 1:52 p.m.
City, State: Maple Shade, NJ
Occupation: Laboratory Worker

Comment: I would like to see more financial help directed to farmers who raise organic foods, and raise animals with humane treatment rather than favoring agri-business giants who run CAFO's and factory farming.

COMMENT OF HOPE PYESKY

Date Submitted: Sunday, April 22, 2012, 11:56 p.m.

City, State: Goltry, OK

Producer/Non-producer: Producer

Type: Field Crops, Livestock

Size: 1,000+ acres

Comment: My name is Hope Pjesky. My husband Ryan and I are average sized full-time farmers/ranchers in northern Oklahoma. We produce wheat and beef cattle. We are also fiscal conservatives. Here are my views on the next farm bill:

- Government farm programs should focus on providing farmers with downside risk protection.
- Direct Payments, Counter-cyclical payments, the Marketing Loan Program, ACRE and SURE should be eliminated.
- In the future we should rely less on government and increasingly more on free markets.
- The best way to spend government dollars is crop insurance and a deep revenue loss safety net program.
- Crop insurance coverage should be improved, made less expensive to producers and expanded to include revenue based crop insurance options for all crops.
- A catastrophic or "deep" revenue loss program such as the one proposed by the American Farm Bureau Federation is the best way to go with future farm programs. This is much better than any of the shallow loss proposals.
- All crops should be treated equally in government farm programs.
- Planting flexibility should be a priority. A target price program will distort planting decisions and should be opposed.
- Farmer Savings Accounts should be created, allowing farmers to create tax free saving accounts on good years for use in later bad years.
- Market Access and Foreign Market Development Programs are important trade tools and should receive strong funding.
- Agricultural research is vitally important and should receive strong levels of funding.

HOPE PYESKY,

[Redacted],

Goltry, OK,

[Redacted].

COMMENT OF MICHELLE PLAIN

Date Submitted: Friday, May 18, 2012, 10:17 a.m.

City, State: Duncan, WA

Occupation: Server, Caterer

Comment: We need to go back to the old way of doing things as clearly our chemical world is killing us. GMO and pesticides are killing us. That saying don't fix what ain't broke is what are crops are today. We have dressed things up and our bodies don't recognize the dress! How can you not see this. Is money and drugs that much more important? Soon there won't be enough people to feed these horrible things to and then all your money won't matter anyway! Please think about how simple this can all be and just go back to the basics. Thank you.

COMMENT OF DESIREE PLAISANCE

Date Submitted: Friday, May 18, 2012, 2:54 p.m.

City, State: New Orleans, LA

Occupation: Public Records Researcher, Licensed Massage Therapist

Comment: I am writing in support of organic farming and animal husbandry, labeling of GMOs and their exclusion from anything labeled organic or all-natural, and the development and maintenance of ethically and environmentally sound food practices. This includes:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF MONICA PLOURDE

Date Submitted: Wednesday, May 16, 2012, 5:53 p.m.

City, State: Biddeford, ME

Occupation: Homemaker

Comment: Citizens want and need locally grown—preferably organic—produce. There should be no such thing as a “food desert” and big grocery chains aren’t the solution to this problem. Urban farms, small farms and farmers markets are a real solution to the serious issue of malnutrition and hunger in the United States.

Focusing support on smaller, more diverse, especially organic farms, reduces pollution by using less petroleum for pesticides, fertilizer, and fuel for transportation. Local farms also let produce have a chance to become more nutritious instead of being shipped unripe to prevent spoiling over long distances.

The financial security of smaller farms would create new jobs and bring healthier food to everyone’s table for an affordable price. The problems with obesity and health and the healthcare cost they bring with them would be dramatically reduced once it’s cheaper to buy vegetables than a double cheeseburger.

Please keep smaller farms, public health and pollution in mind while you contemplate the Farm bill.

COMMENT OF KATE PLUMB

Date Submitted: Friday, May 18, 2012, 3:15 p.m.

City, State: Sag Harbor, NY

Occupation: Consultant

Comment: Please take the first step and get on board with a better food program for the country—let go of the subsidies for the food that is making us sick and start subsidizing the food that makes and keeps us healthy.

COMMENT OF DONNA PLUMMER

Date Submitted: Saturday, May 19, 2012, 7:33 a.m.

City, State: Harrisburg, PA

Occupation: Educator

Comment: I am writing to ask you for full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

Also, I am asking that the farm bill supports funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

Also, include the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

And most importantly maintaining the EQIP Organic Initiative. Organics don’t make people sick. Organics help students with ADD and ADHD to calm their hyperactivity.

As you well know, I have been an advocate of nutrition, since I teach this, and want the best for our children and Americans alike. Please make fresh produce initiatives in schools mandatory and pizza is not a vegetable. It is actually a junk food.

I am also asking Congress to go a step further by regulating government subsidies that enter schools. The food is processed and laden with chemicals which affect people. Every time I eat the ice cream, I start to cough. I stopped getting it. It also has salicylates which are known to affect ADD children. Clean up the foods that are given to our students in schools and you will change the behavior problems as well as increase test scores.

Thanks for your time. We’ll miss you in Harrisburg office come Nov.

COMMENT OF FELICIA POCIUS

Date Submitted: Friday, May 18, 2012, 10:57 p.m.

City, State: McHenry, IL

Occupation: Administration

Comment: The world is beginning the shift to truly organic, non-chemical, non-franken-farmed produce and meat products. Either we are on the bandwagon or we get left behind. Let's choose to be ahead of the wave rather than washed up.

COMMENT OF THERESA PODOLL

Date Submitted: Thursday, May 17, 2012, 11:57 p.m.

City, State: Fullerton, ND

Producer/Non-producer: Producer

Type: Specialty Crops

Size: 500–999 acres

Comment: I am an organic farmer and a strong supporter of organic farming, I ask that you . . .

- Fully fund the Organic Research and Extension Initiative (OREI) at the 2008 level.
- Endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Support all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintain the EQIP Organic Initiative
- And do **Not** cut the Conservation Stewardship Program.

Organic farming, food production, and food distribution systems produce multiple benefits ecologically, socially, and economically. These multiple benefits provide services to our local communities and our state much beyond production agriculture, including increasing agricultural biodiversity, enhancing soil and water quality, reducing pesticide exposure, and increasing native pollinators and beneficial insects.

COMMENT OF MARGIE POHLSCHNEIDER

Date Submitted: Sunday, May 20, 2012, 9:35 a.m.

City, State: Piqua, OH

Occupation: Retired

Comment: I urge you to support the EQIP organic initiative so we may have access to healthy food without more damage to our agricultural land. The increasing use of GMO crops and pesticides are damaging to us and the land.

Thank you.

COMMENT OF JEFF POKORNY

Date Submitted: Friday, May 18, 2012, 1:40 p.m.

City, State: Bend, OR

Occupation: Reseller of Non-Perishable Goods

Comment: Please support a farm bill that takes the consideration of a healthy people and environment in mind. This is critical to sustain a high quality of life from now to well into the future.

Please remember that the primary reason for the scarcity of food is the ignorance of how to produce sustainably and efficiently, without the use of corporate agriculture and pesticides. It is only through ignorance, greed and blatant disregard for the environment that we continue to utilize these methods. Let the independent farmer feed Americas bodies and souls . . . not Big Ag!

COMMENT OF MARTHA POLIQUIN

Date Submitted: Thursday, April 12, 2012, 5:31 p.m.

City, State: Lisbon Falls, ME

Occupation: School Food Service Director

Comment: The small farm and food producer are the cornerstone of Maine's local food movement. Local food and farms are important assets here. Schools desperately want access to more local farm food to provide healthy nutritious meals to our students. Current commodity funds support large farms that are far away from Maine and don't support our local economy. Please allow schools to use some commodity money to buy locally.

COMMENT OF LISA POLLARD

Date Submitted: Friday, May 18, 2012, 3:07 p.m.

City, State: Mokena, IL

Occupation: Teacher

Comment: As a teacher and a mother, I stand beside our farmers. Farmers are the backbone of our nation—and all civilization. Think about where we will be without farmers or with a greatly reduced/unsupported farming community! I am also a huge supporter of any initiative that supports organic farming. We are paying known and yet to be known costs for the chemicals we are putting into our food—our children deserve a healthy chance.

I support H.R. 3286 and H.R. 3236. I also support the full funding of conservation programs and the EQIP Organic Initiative.

What we spend in pennies today will save us many, many dollars down the road with health care issues, insurance costs, and educational reforms to deal with the consequences of substandard food supplies.

We are a nation of plenty . . . let's stand by the farmers who helped us be that way.

COMMENT OF ALAINA POMEROY

Date Submitted: Friday, May 18, 2012, 6:57 p.m.

City, State: Portland, OR

Occupation: Program Associate, Policy, Klamath & Rangelands, Sustainable Northwest

Comment: These comments are submitted on behalf of the Rural Voices for Conservation Coalition (RVCC). RVCC is comprised of rural, western, regional and national organizations, landowners and businesses that have joined together to promote balanced conservation-based approaches to the ecological and economic problems facing the West.

Rural Voices for Conservation Coalition Recommendations for Increasing Community Capacity to Deliver Farm Bill Conservation Programs

Congress must do more than allocate financial assistance to each program in the Conservation Title of the farm bill; it must provide sufficient technical assistance or 'boots on the ground' to help farmers, ranchers and forest landowners implement conservation practices. Effective delivery of farm bill programs depends on partnerships among the USDA Natural Resources Conservation Service (NRCS), other Federal agencies, and strong community-based, local and regional organizations to provide landowner outreach and education, collaboration assistance and landscape scale strategic planning, landowner and community skill building, on the ground technical assistance, and connection to larger support networks. We refer to this as a community's capacity to deliver farm bill and other conservation programs.

In a tight budget environment, it is essential that limited dollars are well spent to achieve multiple benefits. NRCS and community-based, local and regional organizations must work in coordination to provide access to and delivery of programs that help conserve and steward farms, ranches and forestlands, ensure long-term ecological health, build local economic stability, and enhance productivity and delivery of products to market.

As participants in the Rural Voices for Conservation Coalition (RVCC) and partnering land owners, organizations and businesses, we strongly support the work of the NRCS and other Federal agencies, and stand willing and able to work in partnership with the Department to achieve strong and lasting program outcomes.

Key Recommendations to Support and Maintain Capacity for Effective Conservation

1. Designate collaboration and capacity building outcomes as priority preference criteria for allocation of grants, loans and cost share for partnership programs.
2. Direct the agencies to increase their use of cooperative, contribution and technical service provider agreements to achieve farm bill program outcomes.
3. Formalize the role of community-based, local and regional organizations as strategic agency partners in farm bill program delivery.
4. Direct NRCS to develop and report on performance measures that would allow Congress and the public to fully understand the impact of technical assistance and partnership investments.
5. Expand NRCS's ability to use Conservation Technical Assistance (CTA) funding to support partnerships between NRCS staff and community-based and regional organizations and other non-Federal conservation partners and specialists, and continue to increase CTA funding annual appropriations.
6. Encourage a higher percentage of program funding be directed to Technical Assistance (TA) and expand its range of use for outreach, collaborative planning, skill building, and increased partnership with community-based, local and regional organizations.

7. Prioritize funding to programs that support landscape-scale conservation and dedicate funding to the community-based, local and regional organizations that spearhead planning efforts.
8. Direct a percentage of Regional Conservation Partnership Program funds to capacity building and technical assistance for program implementation partners and organizations.
9. Establish reimbursements for the transaction costs and services provided by community-based, local and regional organizations that enable landowners to participate in working lands easement programs.
10. Expand funding for Technical Service Providers (TSPs) and encourage NRCS to simplify the application process, increasing the ability of non-Federal partners, especially community-based, locally-led and regional organizations to become a TSP.

Strong Intermediaries Can Provide Essential Functions for Effective Conservation:

Congress and the agencies can increase the effectiveness of the Farm Bill Conservation Title by partnering, engaging and supporting community-based, local and regional organizations to fulfill the following roles and activities:

- Improve outreach, marketing and access to farm bill conservation programs.
Landowner education is the first step to providing access to farm bill conservation programs. Before a landowner is willing to participate in a voluntary program, he or she must be fully aware of all requirements and incentives, as well as the impact program participation will have on the management of their own property and possibly their neighbor's property. Community-based, local and regional organizations and networks are well suited to provide outreach and marketing services to landowners. In fact, there are many organizations across the country already doing this. To improve outreach and marketing, Congress should formalize the roles of community-based, local and regional organizations and increase partnership with and funding to these entities to ensure their success. Congress should direct the agencies to develop performance measures and require reporting on accomplishments related to the use of community-based, local and regional organizations to improve program outreach, marketing and access.
- Provide on the ground project-specific technical assistance, including planning, to ensure delivery of conservation programs at the landowner level.
We need more 'boots on the ground' and rural communities have boots to offer. Often, the landowner demand for project-specific technical assistance is far greater than the ability to provide such assistance. Congress and the agency must prioritize funding for technical assistance to implement effective conservation and restoration activities (*e.g.*, wetland or riparian restoration project design, change in irrigation delivery, conservation planning, *etc.*) ensuring the enhancement and protection of our natural resources. To increase 'boots on the ground' Congress should encourage the Executive branch to allocate enough funding to support the staff needed to provide technical assistance. This includes technical assistance provided by on the ground agency personnel as well as non-Federal conservation partners and specialists (including biologists, ecologists, foresters and rangeland specialists) who can work with agency staff to assist landowners and managers.
- Implement strategic and collaborative conservation planning at a landscape-scale.
Landscape-scale conservation planning and implementation is an efficient and comprehensive means to protect the productivity of multiple natural resources, recognize relationships between ecological processes within a landscape, and incorporate multiple stakeholders into decision-making processes. Community-based, local and regional groups are critical to building agreement among stakeholders around land management and economic development goals. They reach agreement through community and landowner engagement, collaborative planning processes, and the use of pilot projects and facilitated dialogue to build trust before scaling up efforts. Congress should prioritize and fund programs that support landscape-scale conservation and dedicate funding to the community-based, local and regional organizations that spearhead these planning efforts.
- Build and strengthen networks of landowners and community-based, local and regional organizations to advance effective program outreach, planning and implementation.

Networks promote the use and effectiveness of conservation programs by catalyzing landowner outreach and education and providing access to 'boots on the ground' technical assistance. They help advance the learning and problem solving needed for effective program design and implementation. It is through these networks that many landowners learn about the mechanics of farm bill programs, get connected with technical assistance providers and resources, and share their experiences. Congress should support existing networks of community-based, local and regional organizations (including general operations and staffing) that undertake many of the activities listed above.

- Provide the organizational infrastructure needed to staff and organize collaboration, community and landowner engagement, and conservation project planning and implementation.

Strong and stable community-based, local and regional organizations are essential to farm bill program delivery. Supporting organizational infrastructure means building strong foundations for community-based organizations, intermediary groups and networks by providing small amounts of tailored financial and technical assistance to promote 'back of office' systems and processes that lead to effective, efficient, and lasting organizations. These are essential functions such as financial management systems, strategic planning, human resources, communications tools and other elements that underpin effective organizations. Congress should support the organizational infrastructure needs of these community-based organizations, as they relate to farm bill conservation programs.

- Provide educational and skill building opportunities for technical assistance providers and recipients.

Community-based, local and regional organizations provide trainings and workshops to improve the skills and knowledge of local landowners and groups. Farm bill conservation programs will reach more landowners and produce better long-term results if Congress allocates funding for education and skill building opportunities in areas such as sustainable grazing systems, ecological function and monitoring, effective conflict resolution, financial management and grant-writing. Congress can also provide funding for peer to peer learning among community leaders, organizations and practitioners to facilitate the transfer of successful models between communities in different regions of the country.

Farm Bill Conservation Program Delivery is Provided by a Wide Array of Entities

Many different types of organizations and individuals work with Federal agencies to support delivery of farm bill conservation programs. The farm bill should allocate funding to grow and maintain the capacity of these entities. They vary by region and type of landowner, but may include:

- Community-based locally-led or regional organizations,
- Landowner organizations,
- Local and regional networks,
- Soil and water conservation districts,
- Watershed councils,
- Land trusts,
- Contractors,
- State foresters,
- Rangeland specialists, and
- Other local conservation professionals.

Expanded Recommendations to Support and Maintain Capacity for Effective Conservation

Congress and/or the agencies should:

1. Designate collaboration and capacity building outcomes as priority preference criteria for allocation of grants, loans, and cost share for partnership programs in the Conservation Title.

Collaboration and partnerships create a strong new model for doing business in rural America. To support this model Congress should draft and approve a farm bill that will prioritize funding for projects and activities that strengthen community capacity by supporting strong community-based, local and regional organizations and networks and the array of entities that support farm bill program delivery. This can be accomplished by improving criteria to reward and support projects that can show evidence of collaboration and partnerships and that focus on capacity building.

2. Direct the agencies to increase their use of cooperative, contribution and technical service provider agreements to achieve farm bill conservation program outcomes.

Congress and the Secretaries of USDA and USDI should provide direction and training to increase the use of cooperative and contribution agreements for conservation and capacity building. These tools are an effective means by which NRCS can partner with intermediaries to provide technical assistance to landowners. The NRCS Chief should direct staff to use agreements to support community-based, local and regional partners in providing technical assistance, outreach and community engagement for conservation programs.

3. Formalize the role of community-based, local and regional organizations as strategic agency partners in farm bill program delivery.

All partnership programs within the farm bill must provide formal funding for non-Federal partners that contribute staff, organizational infrastructure, knowledge and training to support the delivery of conservation programs. This may include the explicit provision of reimbursements for administrative costs of partners or a stand-alone provision establishing an education and outreach program within the farm bill. Congress must work with NRCS and partners to determine the most appropriate method for formalizing the role of community, local and regional partners.

4. Direct NRCS to develop and report on performance measures that would allow Congress and the public to more fully understand the impact of technical assistance and partnership investments.

There must be more accountability for farm bill conservation program outcomes resulting from the outlay of technical assistance funding. The responsibility for reporting on technical assistance funding spent and outcomes achieved can and should be shared by both the NRCS and community-based, local and regional organizations. NRCS should develop performance measures that would allow Congress and the public to more fully understand the impact of technical assistance and partnership investments.

5. Expand NRCS's ability to use Conservation Technical Assistance (CTA) funding to support partnerships between NRCS staff and community-based and regional organizations and other non-Federal conservation partners and specialists, and continue to increase CTA funding in the annual appropriations process for this purpose.

Conservation Technical Assistance (CTA) funding is necessary for effective outreach, delivery, and implementation of conservation programs. CTA funding supports NRCS representatives in the field, but it also supports the ability of the agency to partner with community-based and regional organizations through cooperative, contribution, and technical service provider agreements and contracts. The use of partnerships through these agreements can build delivery capacity, create local benefit, and leverage private resources for greater impact. There is a need for additional CTA funding to support existing conservation programs. If additional funds are unavailable, we recommend increasing the percentage of total conservation program allocations that go to TA, to grow the effectiveness of Financial Assistance cost-share dollars.

6. Encourage a higher percentage of program funding be directed to Technical Assistance (TA) and expand its range of use for outreach, collaborative planning, and skill building activities, and increased partnership with community-based, local and regional organizations.

Technical Assistance (TA) is the essential vehicle for delivery of farm bill conservation programs. However, TA is consistently underfunded. Even in the years when Congress allocates additional funding for on the ground conservation, the Executive branch neglects to provide the TA funding necessary to get the project dollars on the ground. Further, TA funding is only permitted for a limited category of activities performed in furthering the delivery of farm bill conservation programs. We strongly support the expanded use of TA funding for essential capacity building activities such as: (a) community engagement and collaborative watershed planning; (b) program marketing and outreach; (c) support of community-based, local and regional organizations serving as intermediaries between Federal staff and landowners; and (d) skill building and education exercises for landowners and community members. This will ensure that there are TA funds available for functions that are currently being ignored due to lack of money.

7. Prioritize funding to programs that support landscape-scale conservation and dedicate funding to the community-based, local and regional organizations that spearhead these planning efforts.

Conservation practices are most effective and provide the most significant results when implemented on a landscape scale. Further, meaningful partnerships among government agencies and community-based, local and regional organizations can produce long-lasting conservation projects that transform local thinking and practice around land management. These two elements—landscape-scale and local leadership—are necessary to achieve the ultimate goals of the Farm Bill Conservation Title. Congress should direct NRCS to prioritize funding for programs and projects that incorporate these essential characteristics.

8. Direct a percentage of the Regional Conservation Partnership Program (CCPI and AWEP merged program) funds to capacity building and technical assistance for program implementation partners and organizations.

The Regional Conservation Partnership Program (RCP) depends on 'boots on the ground' delivery by third party partners and organizations. While this program supports partnerships and collaborative efforts in the design stages, there is a lack of funding to support other crucial activities such as outreach. The impact of RCP to local communities would be amplified if the farm bill directed a portion of program funding to be used to increase the organizational capacity of community-based organizations that contribute to program delivery. Often, the small local entities best suited to engage in the outreach and education of landowners cannot cover their own administrative costs or other costs of providing these services. These entities should be eligible to use a portion of RCP TA to cover these costs, especially in the first year of the program, when they are building their accomplishments and track record to apply for additional private sources of funding.

9. Establish reimbursements for the transaction costs and services provided by community-based, local and regional groups that enable landowners to participate in working lands easement programs.

For easement programs like the Farm and Ranchlands Protection Program (FRPP) and the Grasslands Reserve Program (GRP), Congress should allow reimbursement of transaction costs incurred by cooperating entities. This would include costs for appraisals, surveys, environmental assessments, title searches, geologist reports, and legal fees, and should be covered for up to 5% of the appraised value of the conservation easement. There is also an ongoing need for funds to ensure long-term monitoring and compliance with terms of conservation easements. By providing funding for these transaction costs and services, Congress will encourage participation and increase the capacity of locally-led community-based organizations that provide the coordination of these services, thereby ensuring their continued participation.

10. Expand funding for Technical Service Providers (TSP) and encourage NRCS to simplify the application process, thereby increasing the ability of a larger subset of non-Federal partners, especially community-based, local and regional organizations to become a TSP.

Technical service providers—third parties that are hired to provide technical assistance—are an important component of the conservation program delivery system. Currently, the TSP program is used to develop conservation plans and perform limited compliance duties, and to plan, design and outline conservation practices. The TSP program should be expanded beyond these roles to help meet the significant workload needed to deliver and implement farm bill conservation programs. This is particularly important in states lacking sufficient NRCS personnel to fully apply the conservation program resources available to them. Another method to expand the TSP program is to enhance accessibility for applicants. Many potential applicants find the application process burdensome; streamlining the process would increase the number of applicants able to successfully enter the TSP program, thereby increasing the pool of intermediaries providing farm bill conservation program delivery.

Importance and Role of Community-Based Organizations in the West

Community-based organizations (CBOs) are community-focused and locally-led groups uniquely positioned to play a significant role in the delivery of farm bill programs in the West. These groups are strategically situated and capable of aligning the goals, objectives and resources of 'outside' entities—including the Federal government—with the activities of local conservation-oriented landowners and businesses. Over the past 15 years, we have witnessed the success of these groups that occupy the space between agencies and landowners and leverage public and private dollars for conservation, both at the local and regional scales.

Although there is no set formula for effective CBOs, there are a number of general commonalities:

- A locally-focused mission that includes an integrated approach to ecological conservation and restoration, natural resource-based economic development, and retention and promotion of local cultures;
- A commitment to the use of collaborative processes to define, implement and monitor conservation and sustainability goals and activities on the landscape;
- Governance and advisory structures that include significant local leadership, complemented by diverse expertise and representation that often includes conservation organizations, Federal and state agencies, recreationists, and out-of-area interests;
- A business and markets orientation—driven by local and regional expertise—that finds a role for Federal conservation investments inside broader business models or economic development plans that leverage public and private capital and “sweat equity,” for lowest cost, highest value conservation outcomes that retain jobs and wealth in the local economy; and
- The ability to leverage small amounts of funding to accomplish significant conservation goals by utilizing multiple funding streams and capitalizing on local knowledge and labor.

Developing and funding CBOs is an investment that pays dividends in the medium and long-term. In the short-term, building the capacity of organizations, training staff, engaging in collaborative planning and fostering relationships between landowners and Federal agencies utilizes resources that may not immediately lead to restoration activities. However, once these initial investments have been made, conservation implementation accelerates greatly and the ratio of funding for capacity building vs. funding for on the ground programs becomes very small. On the other hand, failing to support adequate CBO capacity can condemn an area to “creeping” restoration and conservation implementation, with large amounts of funding going underutilized or unused.

Rural Voices for Conservation Coalition Recommendations for Increasing Community Capacity to Deliver Farm Bill Conservation Programs

Congress must do more than allocate financial assistance to each program in the Conservation Title of the Farm Bill; it must provide sufficient technical assistance or 'boots on the ground' to help farmers, ranchers and forest landowners implement conservation practices. Effective delivery of Farm Bill programs depends on partnerships among the USDA Natural Resources Conservation Service (NRCS), other Federal agencies, and strong community-based, local and regional organizations to provide landowner outreach and education, collaboration assistance and landscape-scale strategic planning, landowner and community skill building, on the ground technical

assistance, and connection to larger support networks. We refer to this as a community's *capacity* to deliver Farm Bill and other conservation programs.

In a tight budget environment, it is essential that limited dollars are well spent to achieve multiple benefits. NRCS and community-based, local and regional organizations must work in coordination to provide access to and delivery of programs that help conserve and steward farms, ranches and forestlands, ensure long-term ecological health, build local economic stability, and enhance productivity and delivery of products to market.

Key Recommendations to Support and Maintain Capacity for Effective Conservation

1. Designate collaboration and capacity building outcomes as priority preference criteria for allocation of grants, loans and cost share for partnership programs.
2. Direct the agencies to increase their use of cooperative, contribution and technical service provider agreements to achieve Farm Bill program outcomes.
3. Formalize the role of community-based, local and regional organizations as strategic agency partners in Farm Bill program delivery.
4. Direct NRCS to develop and report on performance measures that would allow Congress and the public to fully understand the impact of technical assistance and partnership investments.
5. Expand NRCS's ability to use Conservation Technical Assistance (CTA) funding to support partnerships between NRCS staff and community-based and regional organizations and other non-federal conservation partners and specialists, and continue to increase CTA funding in annual appropriations.
6. Encourage a higher percentage of program funding be directed to Technical Assistance (TA) and expand its range of use for outreach, collaborative planning, skill building, and increased partnership with community-based, local and regional organizations.
7. Prioritize funding to programs that support landscape-scale conservation and dedicate funding to the community-based, local and regional organizations that spearhead planning efforts.
8. Direct a percentage of Regional Conservation Partnership Program funds to capacity building and technical assistance for program implementation partners and organizations.
9. Establish reimbursements for the transaction costs and services provided by community-based, local and regional organizations that enable landowners to participate in working lands easement programs.
10. Expand funding for Technical Service Providers (TSPs) and encourage NRCS to simplify the application process, increasing the ability of non-federal partners, especially community-based, local and regional organizations to become a TSP.

Working together to find policy solutions to the ecological and economic challenges of the rural West

RVCC is comprised of rural western, regional, and national organizations that have joined together to promote balanced conservation-based approaches to the ecological and economic problems facing the West. We are committed to finding and promoting solutions through collaborative, place-based work that recognizes the inextricable link between the long-term health of the land and well-being of rural communities. We come from Alaska, Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon and Washington.

As participants in the Rural Voices for Conservation Coalition (RVCC) and partnering landowners, organizations and businesses, we strongly support the work of the NRCS and other Federal agencies, and stand willing and able to work in partnership with the Department to achieve strong and lasting program outcomes.

Strong Intermediaries Can Provide Essential Functions for Effective Conservation:

Congress and the agencies can increase the effectiveness of the Farm Bill Conservation Title by partnering, engaging and supporting community-based, local and regional organizations to fulfill the following roles and activities:

• **Improve outreach, marketing and access to Farm Bill conservation programs.**

Landowner education is the first step to providing access to Farm Bill conservation programs. Before a landowner is willing to participate in a voluntary program, he or she must be fully aware of all requirements and incentives, as well as the impact program participation will have on the management of their own property and possibly their neighbor's property. Community-based, local and regional organizations and networks are well suited to provide outreach and marketing services to landowners. In fact, there are many organizations across the country already doing this. To improve outreach and marketing, Congress should formalize the roles of community-based, local and regional organizations and increase partnership with and funding to these entities to ensure their success. Congress should direct the agencies to develop performance measures and require reporting on accomplishments related to the use of community-based, local and regional organizations to improve program outreach, marketing and access.

• **Provide on the ground project-specific technical assistance, including planning, to ensure delivery of conservation programs at the landowner level.**

We need more 'boots on the ground' and rural communities have boots to offer. Often, the landowner demand for project-specific technical assistance is far greater than the ability to provide such assistance. Congress and the agency must prioritize funding for technical assistance to implement effective conservation and restoration

activities (e.g., wetland or riparian restoration project design, change in irrigation delivery, conservation planning, etc.) ensuring the enhancement and protection of our natural resources. To increase 'boots on the ground' Congress should encourage the Executive branch to allocate enough funding to support the staff needed to provide technical assistance. This includes technical assistance provided by on the ground agency personnel as well as non-federal conservation partners and specialists (including biologists, ecologists, foresters and rangeland specialists) who can work with agency staff to assist landowners and managers.

• **Implement strategic and collaborative conservation planning at a landscape-scale.**

Landscape-scale conservation planning and implementation is an efficient and comprehensive means to protect the productivity of multiple natural resources, recognize relationships between ecological processes within a landscape, and incorporate multiple stakeholders into decision-making processes. Community-based, local and regional groups are critical to building agreement among stakeholders around land management and economic development goals. They reach agreement through community and landowner engagement, collaborative planning processes, and the use of pilot projects and facilitated dialogue to build trust before scaling up efforts. Congress should prioritize and fund programs that support landscape-scale conservation and dedicate funding to the community-based, local and regional organizations that spearhead these planning efforts.

• **Build and strengthen networks of landowners and community-based, local and regional organizations to advance effective program outreach, planning and implementation.**

Networks promote the use and effectiveness of conservation programs by catalyzing landowner outreach and education and providing access to 'boots on the ground' technical assistance. They help advance the learning and problem solving needed for effective program design and implementation. It is through these networks that many landowners learn about the mechanics of Farm Bill programs, get connected with technical assistance providers and resources, and share their experiences. Congress should support existing networks of landowners

and community-based, local and regional organizations (including general operations and staffing) that undertake many of the activities listed above.

• **Provide the organizational infrastructure needed to staff and organize collaboration, community and landowner engagement, and conservation project planning and implementation.**

Strong and stable community-based, local and regional organizations are essential to Farm Bill program delivery. Supporting organizational infrastructure means building strong foundations for community-based organizations, intermediary groups and networks by providing small amounts of tailored financial and technical assistance to promote 'back of office' systems and processes that lead to effective, efficient, and lasting organizations. These are essential functions such as financial management systems, strategic planning, human resources, communications tools and other elements that underpin effective organizations. Congress should support the organizational infrastructure needs of these community-based organizations, as they relate to Farm Bill conservation programs.

Farm Bill Conservation Program Delivery is Provided by a Wide Array of Entities

Many different types of organizations and individuals work with Federal agencies to support delivery of Farm Bill conservation programs. The Farm Bill should allocate funding to grow and maintain the capacity of these entities. They vary by region and type of landowner, but may include:

- Community-based, local and regional organizations,
- Landowner organizations,
- Local and regional networks,
- Soil and water conservation districts,
- Watershed councils,
- Land trusts,
- Contractors,
- State foresters,
- Rangeland specialists, and
- Other local conservation professionals.

• **Provide educational and skill building opportunities for technical assistance providers and recipients.**

Community-based, local and regional organizations provide trainings and workshops to improve the skills and knowledge of local landowners and groups. Farm Bill conservation programs will reach more landowners and produce better long-term results if Congress allocates funding for education and skill building opportunities in areas such as sustainable grazing systems, ecological function and monitoring, effective conflict resolution, financial management and grant-writing. Congress can also provide funding for peer-to-peer learning among community leaders, organizations and practitioners to facilitate the transfer of successful models between communities in different regions of the country.

Expanded Recommendations to Support and Maintain Capacity for Effective Conservation

Congress and/or the agencies should:

1. Designate collaboration and capacity building outcomes as priority preference criteria for allocation of grants, loans, and cost share for partnership programs in the Conservation Title.

Collaboration and partnerships create a strong new model for doing business in rural America. To support this model Congress should draft and approve a Farm Bill that will prioritize funding for projects and activities that strengthen community capacity by supporting strong community-based, local and regional organizations and networks and the array of entities that support Farm Bill program delivery. This can be accomplished by improving criteria to reward and support projects that can show evidence of collaboration and partnerships and that focus on capacity building.

2. Direct the agencies to increase their use of cooperative, contribution and technical service provider agreements to achieve Farm Bill conservation program outcomes.

Congress and the Secretaries of USDA and USDI should provide direction and training to increase the use of cooperative and contribution agreements for conservation and capacity building. These tools are an effective means by which NRCS can partner with intermediaries to provide technical assistance to landowners. The NRCS Chief should

direct staff to use agreements to support community-based, local and regional organizations in providing technical assistance, outreach and community engagement for conservation programs.

3. Formalize the role of community-based, local and regional organizations as strategic agency partners in Farm Bill program delivery.

All partnership programs within the Farm Bill must provide

formal funding for non-federal partners that contribute staff, organizational infrastructure, knowledge and training to support the delivery of conservation programs. This may include the explicit provision of reimbursements for administrative costs of partners or a stand-alone provision establishing an education and outreach program within the Farm Bill. Congress must work with NRCS and partners to determine the most appropriate method for formalizing the role of community-based, local and regional organizations.

Importance and Role of Community-Based Organizations in the West

Community-based organizations (CBOs) are community-focused and/or locally-led groups uniquely positioned to play a significant role in the delivery of Farm Bill programs in the West.

These groups are strategically situated and capable of aligning the goals and resources of 'outside' entities – including the federal government – with the activities of conservation-oriented landowners and businesses.

Over the past 15 years, we have witnessed the success of these groups that occupy the space between agencies and landowners and leverage public and private dollars for conservation, both at the local and regional scales.

Although there is no set formula for effective CBOs, there are a number of general commonalities:

- A locally-focused mission that includes an integrated approach to ecological conservation and restoration, natural resource-based economic development, and retention and promotion of local cultures;
- A commitment to the use of collaborative processes to define, implement and monitor conservation and sustainability goals and activities on the landscape;
- Governance and advisory structures that include significant local leadership, complemented by diverse expertise and representation that often includes conservation organizations, federal and state agencies, recreationists, and out-of-area interests;

- A business and markets orientation – driven by local and regional expertise – that finds a role for federal conservation investments inside broader business models or economic development plans that leverage public and private capital and “sweat equity,” for lowest cost, highest value conservation outcomes that retain jobs and wealth in the local economy; and

- The ability to leverage small amounts of funding to accomplish significant conservation goals by utilizing multiple funding streams and capitalizing on local knowledge and labor.

Developing and funding CBOs is an investment that pays dividends in the medium and long-term. In the short-term, building the capacity of organizations, training staff, engaging in collaborative planning and fostering relationships between landowners and federal agencies utilizes resources that may not immediately lead to restoration activities.

However, once these initial investments have been made, conservation implementation accelerates greatly and the ratio of funding for capacity building vs. funding for on the ground programs becomes very small. On the other hand, failing to support adequate CBO capacity can condemn an area to “creeping” restoration and conservation implementation, with large amounts of funding going underutilized or unused.

4. Direct NRCS to develop and report on performance measures that would allow Congress and the public to more fully understand the impact of technical assistance and partnership investments.

There must be more accountability for Farm Bill conservation program outcomes resulting from the outlay of technical assistance funding. The responsibility for reporting on technical assistance funding spent and outcomes achieved can and should be shared by both the NRCS and community-based, local and regional organizations. NRCS should develop performance measures that would allow Congress and the public to more fully understand the impact of technical assistance and partnership investments.

5. Expand NRCS's ability to use Conservation Technical Assistance (CTA) funding to support partnerships between NRCS staff and community-based and regional organizations and other non-federal conservation partners and specialists, and continue to increase CTA funding in the annual appropriations process for this purpose.

Conservation Technical Assistance (CTA) funding is necessary for effective outreach, delivery, and implementation of conservation programs. CTA funding supports NRCS representatives in the field, but it also supports the ability of the agency to partner with community-based and regional organizations through cooperative, contribution, and technical service provider agreements and contracts. The use of partnerships through these agreements can build delivery capacity, create local benefit, and leverage private resources for greater impact. There is a need for additional CTA funding to support existing conservation programs. If additional funds are unavailable, we recommend increasing the percentage of total conservation program allocations that go to TA, to grow the effectiveness of Financial Assistance cost-share dollars.

6. Encourage a higher percentage of program funding be directed to Technical Assistance (TA) and expand its range of use for outreach, collaborative planning, and skill building activities, and increased partnership with community-based, local and regional organizations.

Technical Assistance (TA) is the essential vehicle for delivery of Farm Bill conservation programs. However, TA is consistently underfunded. Even in the years when Congress allocates additional funding for on the ground

conservation, the Executive branch neglects to provide the TA funding necessary to get the project dollars on the ground. Further, TA funding is only permitted for a limited category of activities performed in furthering the delivery of Farm Bill conservation programs. We strongly support the expanded use of TA funding for essential capacity building activities such as: (a) community engagement and collaborative watershed planning; (b) program marketing and outreach; (c) support of community-based, local and regional organizations serving as intermediaries between federal staff and landowners; and (d) skill building and educational activities for landowners and community members. This will ensure that there are TA funds available for functions that are currently being ignored due to lack of money.

7. Prioritize funding to programs that support landscape-scale conservation and dedicate funding to the community-based, local and regional organizations that spearhead these planning efforts.

Conservation practices are most effective and provide the most significant results when implemented on a landscape-scale. Further, meaningful partnerships among government agencies and community-based, local and regional organizations can produce long-lasting conservation projects that transform local thinking and practice around land management. These two elements – landscape-scale and local leadership – are necessary to achieve the ultimate goals of the Farm Bill Conservation Title. Congress should direct NRCS to prioritize funding for programs and projects that incorporate these essential characteristics.

8. Direct a percentage of the Regional Conservation Partnership Program (CCPI and AWEP merged program) funds to capacity building and technical assistance for program implementation partners and organizations.

The Regional Conservation Partnership Program (RCPP) depends on 'boots on the ground' delivery by third party partners and organizations. While this program supports partnerships and collaborative efforts in the design stages, there is a lack of funding to support other crucial activities such as outreach. The impact of RCPP to local communities would be amplified if the Farm Bill directed a portion of program funding to be used to increase the organizational capacity of community-based organizations

that contribute to program delivery. Often, the small local entities best suited to engage in the outreach and education of landowners cannot cover their own administrative costs or other costs of providing these services. These entities should be eligible to use a portion of RCPP TA to cover these costs, especially in the first year of the program, when they are building their accomplishments and track record to apply for additional private sources of funding.

9. Establish reimbursements for the transaction costs and services provided by community-based, local and regional groups that enable landowners to participate in working lands easement programs.

For easement programs like the Farm and Ranchlands Protection Program (FRPP) and the Grasslands Reserve Program (GRP), Congress should allow reimbursement of transaction costs incurred by cooperating entities. This would include costs for appraisals, surveys, environmental assessments, title searches, geologist reports, and legal fees, and should be covered for up to 5% of the appraised value of the conservation easement. There is also an ongoing need for funds to ensure long-term monitoring and compliance with terms of conservation easements. By providing funding for these transaction costs and services, Congress will encourage participation and increase the capacity of community-based organizations that provide the coordination of these services, thereby ensuring their continued participation.

10. Expand funding for Technical Service Providers (TSP) and encourage NRCS to simplify the application process, thereby increasing the ability of a larger subset of non-federal partners, especially community-based, local and regional organizations to become a TSP.

Technical service providers – third parties that are hired to provide technical assistance – are an important component of the conservation program delivery system. Currently, the TSP program is used to develop conservation plans and perform limited compliance duties, and to plan, design and outline conservation practices. The TSP program should be expanded beyond these roles to help meet the significant workload needed to deliver and implement Farm Bill conservation programs. This is particularly important in states lacking sufficient NRCS personnel to fully apply the conservation program resources available to them. Another method to expand the TSP program is to enhance

accessibility for applicants. Many potential applicants find the application process burdensome; streamlining the process would increase the number of applicants able to successfully enter the TSP program, thereby increasing the pool of intermediaries providing Farm Bill conservation program delivery.

COMMENT OF STEFAN POMRENKE, M.D., M.P.H., M.A.T.S.

Date Submitted: Sunday, May 20, 2012, 9:12 p.m.
City, State: Saint Paul, MN
Occupation: Family Physician
Comment: As a family physician I am deeply concerned with the direction of the U.S. farm bill. All efforts need to be exhausted to create a **Healthy** farm bill that has fresh fruits and vegetables at its cornerstone. The reliance of corn and soy as the chief commodity has made my patients sick. Create a local, decentralized food system that Minnesotans remember from their grandparent's era.

COMMENT OF LOUIS PONTILLO

Date Submitted: Friday, May 18, 2012, 11:10 a.m.
City, State: Montville, ME
Occupation: Acupuncturist/Instructor
Comment: Our farm bill should embrace small farms and encourage organic farming. We need to place a leash and muzzle on Monsanto and other companies that engage in "industrial" farming. Humanity must start acting their part as stewards of The Earth.

COMMENT OF CAROL POOLE

Date Submitted: Saturday, May 19, 2012, 10:08 a.m.
City, State: Napa, CA
Producer/Non-producer: Producer
Type: Fruits
Size: Less than 50 acres
Comment: Cut the subsidies to corn producers and help the people of the United States get healthy vegetables, fruit and whole grains into their diets! Stop undercutting prices of produce from small family farmers within their own countries.

COMMENT OF ANNE POPE

Date Submitted: Friday, May 18, 2012, 2:17 p.m.
City, State: Friday Harbor, WA
Occupation: Retired
Comment: I am the daughter of a farmer and farmed myself for years. Locally I have been heavily involved in a growers coop and mobile slaughter unit. We need to support small farms and organic practices if we are to save agriculture and insure that future generations have access to healthy, affordable food.

COMMENT OF ROBERT POPOLOW

Date Submitted: Saturday, May 19, 2012, 9:47 p.m.
City, State: New York, NY
Occupation: IT Manager, Fitness Trainer
Comment: I am developing a nonprofit www.worldwideconcerns.org. As time goes on more and more people are realizing how important it is to eat healthy & protect the Earth from harm so we can have a bright future for ourselves and our children. We can't just live in the moment we must pay attention to what is healthy and what is right for us and the Earth for the future. In the end there will be no choice why not start now before it becomes a problem which may not be reversible?

COMMENT OF DONALD J. PORTER

Date Submitted: Friday, May 18, 2012, 11:50 a.m.
City, State: Sarasota, FL
Occupation: Retired Investment Banker
Comment: Organic is **Critical** in this Sick country **Due To Chemicals** & Payoff to politicians. **Stop** overuse of **All** chemicals Promote small organic farms.

COMMENT OF KAREN PORTER

Date Submitted: Monday, May 14, 2012, 3:25 p.m.
City, State: Lubbock, TX
Occupation: Homemaker

Comment: No cuts to food stamps. Improve crop insurance plans. Stop subsidizing cheap, unhealthy crops/food. Replace cotton crops with hemp, which is profitable, versatile and sustainable.

COMMENT OF MAYA PORTER

Date Submitted: Friday, May 18, 2012, 11:59 a.m.

City, State: Fayetteville, AR

Occupation: Retired Editor and Gardener

Comment: Please stop giving big subsidies to big industrial agriculture and put more into small, especially organic, farming. We need to make our food nutritious again and help the small farmer make a living.

Thank you.

MAYA.

COMMENT OF ANNE PORTMAN

Date Submitted: Thursday, April 12, 2012, 6:12 p.m.

City, State: Albuquerque, NM

Occupation: Professional Elementary School Counselor

Comment: The elementary school I work in has a very high population of economically-disadvantaged children and families. Many of them can only sustain themselves through benefits such as TEFAP, WIC, and SNAP. The Roadrunner Food Bank (RRFB) has provided many of these families with an Emergency Family Food Box this year. Other New Mexico schools with low SES populations participate in the RRFB Food Backpack program, which supports them in getting adequate food supplies. Please authorize appropriate funding to continue and to increase these necessary resources for New Mexico children and families.

COMMENT OF NATALIE POSEVER

Date Submitted: Thursday, May 03, 2012, 12:35 p.m.

City, State: Amherst, MA

Occupation: Student

Comment: To Whom This May Concern,

I hope this finds you doing well. I am writing to express my opinion regarding the future of our nation's farmers. The newly proposed Farm Bill of 2012 has many exciting and necessary provisions in it, such as directing food production away from calorically dense foods to nutritionally rich foods and restructuring crop insurance programs. However, I would like to suggest that all of these progressive reforms will not be possible without the people necessary to implement them. The average age of farmers in our country is well over 50, and each year more farmers leave the profession than enter it. Because of this, it is absolutely crucial that we incentivize young, educated people to enter the farming profession. This could be achieved through subsidized agricultural education and loans to beginning farmers so that they can afford to start a new farm, or transition a family farm into organic production. Additionally, incentives for new farmers should not be directed at just any means of production, but specifically for biointensive and organic production. By creating more, ecologically and socially responsible farmers, we can build the infrastructure necessary to implement the new farm bill. Thank you for your time.

Sincerely,

NATALIE POSEVER.

COMMENT OF EDYE POSEY

Date Submitted: Saturday, May 19, 2012, 8:59 a.m.

City, State: Meeker, CO

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: This country has to get the control of the farming industry back in the hands of the true American citizen and out of the hands of greedy politicians, corporate agribusiness, Monsanto, and others whose only goal is money. Government entities have to start truly caring about those whom they are working for, the American citizen. Please put into action a farm bill that is healthy for the land and the health of We the People.

COMMENT OF KATHERINE POTAMITES

Date Submitted: Thursday, May 10, 2012, 8:36 p.m.
City, State: Chicago, IL
Occupation: Teacher Aide
Comment: Please adopt the Bowles-Simpson and increase TEFAP as well as SNAP. It is important and necessary to protect the disadvantaged. Please avoid measures that would increase hunger, poverty and hardship in a nation as abundant as ours.

COMMENT OF ERIN POTTER

Date Submitted: Friday, May 18, 2012, 10:25 a.m.
City, State: Virginia Beach, VA
Occupation: Beekeeper, Gardener and USCG Reservist
Comment: America deserves healthy choices in our Constitutional right to freedom in the pursuit of happiness. In order to keep healthy, Americans should have plenty of fruit and vegetables affordable for purchase. Corn should not be subsidized as it is very difficult to digest. High fructose corn syrup is more chemical than natural sweetener which means it should not be subsidized either. Our future depends on smart land use which means thinking in terms of life cycles and water cycles. Pesticides and genetically modified agriculture are killing honeybees which are necessary to pollination. Americans are not free to pursue happiness if their land is polluted and honeybees are all dead because we rely on the majority of our fruits and vegetables being pollinated by honeybees. Please subsidize fruit and vegetable farmers who do not use pesticides or GMOs.

COMMENT OF NANCY POTTER

Date Submitted: Friday, May 18, 2012, 9:17 a.m.
City, State: Traverse City, MI
Occupation: Educator
Comment: In the next farm bill, please stop subsidizing the large corporate farm companies that don't need help. Give all subsidies to the small farmer, organic farms, local growers, and support and help feed those who are going hungry in America.

COMMENT OF CLIFTON POTTS

Date Submitted: Friday, May 18, 2012, 3:03 p.m.
City, State: Topanga, CA
Occupation: Consultant in Computer Technology
Comment: It time to change our agriculture from one that is vulnerable to one that is robust. There is enough scientific literature proving that local agriculture is on that benefits the society as a whole and not just corporations. Please make your policies benefit the greatest number of people and the community at large.

COMMENT OF REBECCA POULSEN

Date Submitted: Saturday, May 19, 2012, 4:01 a.m.
City, State: Layton, UT
Occupation: CDL/Office Manager
Comment: Seriously? Is this not the most important issue? The health, safety and proper development of our legacy? Our hearts? our loves? Our children **Are** our future . . . How the heck could we not place the utmost importance on them and their welfare, on all levels.

COMMENT OF MICHAEL POWELL

Date Submitted: Friday, May 18, 2012, 6:22 p.m.
City, State: Sacramento, CA
Occupation: Medical Doctor
Comment: I am a medical professional. Organic farming produces better food which means healthier patients. Lets empower organic farms to help feed people food with fewer toxins and higher nutrient content.

COMMENT OF WILLIAM POWELL

Date Submitted: Friday, May 11, 2012, 3:11 p.m.

City, State: Port Orange, FL
Occupation: Hospitality Sales Management

Comment: I support the movement to attach TEFAP funding to the rate of national, state and local unemployment. As a family of five with three young children, I have been one of the many victims of economic downturn of the past few years, and the SNAP program was vital in helping me feed my children when they would have otherwise gone hungry. Please don't allow congress to cut the SNAP program; this is a vital lifeline for honest, taxpaying and registered voting Americans.

COMMENT OF ANN POWERS

Date Submitted: Friday, May 18, 2012, 5:23 p.m.

City, State: Chino Valley, AZ

Occupation: Housewife

Comment: Please do not allow any cuts on SNAP program. My husband works part time and I am unable to work if it wasn't for our food stamps every month we would have nothing to spend on food. What little we do get I make stretch as best I can. I am not the only one in this area. This could cause a drastic problem in this country with unemployment being up and cuts in other programs. It will become a third world nation where other nations will be sending us food to help stop starvation **In This Country.**

COMMENT OF BRUCE POWERS

Date Submitted: Friday, May 18, 2012, 5:11 p.m.

City, State: Chelan, WA

Occupation: Retired

Comment: I am concerned that manufacturers are pushing legislature to grant approvals to products that may have dangerous attributes.

They seem in such a hurry to legalize their creations of seeds or chemicals, perhaps before the potential consequences of the product or practice are thoroughly tested in real world circumstances.

The reasons they present to justify quick action seem more aligned with competition, grabbing market share, and gaining dominance, including reducing options for the grower.

We know about canaries in the coal mines, but maybe the bee is the messenger in our fields. There is some evidence, that bee colonies are being decimated by minute quantities of pesticide ingredients in corn syrup fed to bees to facilitate overwintering.

These kinds of things take time to resolve. We should not rush the legislative process to appease the lobbyists.

If **Bees** could vote, they might survive.

COMMENT OF HEATHER POWERS

Date Submitted: Friday, May 18, 2012, 2:09 p.m.

City, State: Charleston, SC

Occupation: Professional Organizer

Comment: Dear Mr. Scott,

I'm writing to tell you about my concerns to pending changes to the farm policy. Below are some of the issues I support and hope to hear that you do as well. I am a new constituent to your district and feel that it is vitally important to national security, our local and national economy and health of American's to be able to eat healthy, sustainable foods from locally produced farms.

- Full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Full funding of conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

As a supporter of local farms in several states over the last 10 years I have learned first hand about local food production. It can bring communities together,

forge economic opportunities and create healthier citizens. I hope you will keep my concerns in mind as you cast your vote.

Sincerely,

HEATHER.

COMMENT OF JANET POWERS

Date Submitted: Saturday, May 19, 2012, 10:39 p.m.

City, State: Gettysburg, PA

Occupation: College Professor

Comment: I live in an agricultural area, where all types of fruit are grown on family farms or by small producers. Thus everyone in our area has a stake in a better farm bill that will support organic farming as well as healthy nutrition for those on the SNAP program. Cutting funding for those programs at such a crucial time would be a terrible mistake! I urge you to pass a farm bill that is sensitive to the needs of the American people and not to the demands of agribusiness.

COMMENT OF ROBIN POWIS

Date Submitted: Sunday, May 20, 2012, 5:00 p.m.

City, State: Alachua, FL

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: Please support sustainable agricultural policy that encourages small farms and the preservation of natural resources.

ROBIN POWIS.

COMMENT OF ANDREW POYANT

Date Submitted: Sunday, May 20, 2012, 5:33 p.m.

City, State: Cambridge, MA

Occupation: Environmental Scientist

Comment: As a soil scientist and biologist it is important that we change the way that government funds agriculture. Funding should only be provided to organic, sustainable practices. The farm bill is a way that if written correctly can increase the health of our environment including water and soil, and increase the health of Americans by subsidizing fruits and vegetables instead of higher caloric foods such as meats and grains.

COMMENT OF JIM PRADO

Date Submitted: Friday, May 18, 2012, 9:40 p.m.

City, State: Roxbury, CT

Occupation: Chiropractor

Comment: I see firsthand on a daily basis the damage done to the health of American's which takes the form of diseases related to chronic inflammation. Chronic inflammation is initiated and exacerbated by a diet high in corn and grain. If you are serious about making people healthy then try subsidizing organic vegetable farmers and not corn and grain growers!

COMMENT OF BETH PRATHER

Date Submitted: Friday, May 18, 2012, 12:38 p.m.

City, State: Robert Lee, TX

Occupation: Librarian

Comment: Please, as a first priority, consider the environment and the 99% who actually purchase super market food to feed to their families. The lobbying by corporations is never in the interest of the 99% . . . nor the environment.

COMMENT OF CHRISTINE PRATT

Date Submitted: Friday, May 18, 2012, 1:52 p.m.

City, State: Spokane Valley, WA

Occupation: Esthetician

Comment: Please, support organics more now than ever. We need good healthy whole food for our families. I choose No genetically modified food. We need labeling for the genetically modified food so consumers have a choice.

COMMENT OF SHANNAH PRAUS

Date Submitted: Wednesday, May 09, 2012, 4:54 p.m.
City, State: Portland, OR
Occupation: Unemployed
Comment: Please protect any all nutritional programs for seniors. Many need all the assistance afforded them. They deserve this much for all they have contributed. Thank you.

COMMENT OF STEWART PRAVDA

Date Submitted: Friday, May 18, 2012, 9:41 a.m.
City, State: Brooklyn, NY
Comment: We try to buy local and organic as often as possible from the Park Slope Food Co-op and the Farmers Market at Prospect Park (GreenMarket). These are important issues for us and society. Please consider supporting it.

COMMENT OF DONNA PRECOPIO

Date Submitted: Sunday, May 20, 2012, 2:55 p.m.
City, State: Novato, CA
Producer/Non-producer: Producer
Type: Vegetables
Size: Less than 50 acres
Comment: Please protect our small farms. It is from local small farms that most of the people of California get their produce.
DONNA PRECOPIO.

COMMENT OF WILL PRESTON

Date Submitted: Friday, May 11, 2012, 3:59 p.m.
City, State: Seattle, WA
Occupation: Network Administrator
Comment: Please align the farm subsidies more closely with encouraging healthy fruits and vegetables, and discouraging unhealthy foods such as meat, dairy, corn and soybeans. Thank you.

COMMENT OF CAITLIN PRICE

Date Submitted: Friday, May 18, 2012, 3:13 p.m.
City, State: Mount Vernon, WA
Occupation: Agriculture Research
Comment: We need a farm bill that supports diverse crops, small and medium sized farms, and access to fresh, nutritious food for those on food assistance programs.

The following is needed:

- Place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs.
- A strong Beginning Farmer and Rancher Development program to ensure we continue to have farms producing food.
- Strong support of research into new and innovative production practices that reduce chemical inputs, protect soil and water resources, and promote biologically diverse farms.
- Use the farm bill to support job creation in rural areas!
- Significantly reduce subsidies for commodity growers. This system promotes over-use of fertilizers, contamination of ground water, soil loss, and over reliance on GMOS, chemicals, and fossil fuels. The funds would be much better spent promoting rural development, small to medium sized farms, and diverse crops.

COMMENT OF JENNIFER PRICE

Date Submitted: Friday, May 18, 2012, 11:07 a.m.
City, State: Louisville, KY
Occupation: Administrative
Comment: Dear representative,
Any reform that can be made to aid farmers who produce various crops instead of one singular crop should be made. Also I would like to see the bill to include re-

quirements of farmers to preserve natural wetlands and use proper techniques to prevent soil erosion to protect our waterways!

Thank you,

JENNIFER PRICE.

COMMENT OF JOHN PRICE, PH.D.

Date Submitted: Saturday, May 19, 2012, 2:54 p.m.

City, State: Vero Beach, FL

Occupation: Retired Scientist—Organic Chemistry, Ph.D.

Comment: Dear Members of House Committee on Agriculture;

I am in favor of scrapping the current drafts of the House Agriculture farm bill and replacing those drafts with legislation which would benefit the real producers of safe organically grown produce,—the small, family-owned farm workers who grow organic foods and who are in need of rules and laws which would help sustain these healthy food practices. An organic, and healthy food bill would, hopefully, provide the impetus to these beneficial actions—not the currently drafted bill currently before the House AG Committee.

Thank you kindly for considering the welfare of ordinary citizens and family owned farms.

COMMENT OF JUDY PRICE

Date Submitted: Sunday, May 20, 2012, 3:21 p.m.

City, State: Tulalip, WA

Occupation: Writer, Artist, Musician

Comment: We have to pay attention to our future needs.

Now is the time to begin labeling our foods and stopping the control a few have over us. GMOs are completely taking over our land. The organic farmers are stopped from growing what they want by law suits from Monsanto suing because their seeds blew over into neighboring farm land.

This is **Not** a complex request. It is essential to our health, our families health and the health of our land. If you like peeing Round-up, as you are now, than ignore this and make your money voting against a clean healthy world.

The numbers are startling. 70% of our food is already GMO and up to 90% corn and soy are GMO. This is frightening.

It may be too late for you and your children to be healthy already.

Sincerely,

JUDY PRICE.

COMMENT OF KENT PRICE

Date Submitted: Saturday, May 19, 2012, 4:07 p.m.

City, State: Orland, ME

Occupation: Retired

Comment: As a former staff member of the National Center for Food and Agricultural Policy and a hobby farmer in retirement, I am familiar with both the promise and the problems of the nation's productive lands and waters. Chief among the set of problems is the malign influence of industrial agriculture. In ag, too, small can be beautiful.

COMMENT OF LAURIE PRICE

Date Submitted: Friday, May 18, 2012, 2:10 p.m.

City, State: New York, NY

Occupation: Editor, Translator

Comment: Conservation, organic farming and sustainable agriculture (non-GMO) are **So** important if we're to preserve our health and the livelihoods of our farmers. This is absolutely **Not** the moment to cut funding to these programs. It's already hard enough out there without losing basic rights to eat healthy, nutritious food that supports the livelihood of farmers and sustainable agricultural practices.

COMMENT OF TRAEER PRICE

Date Submitted: Friday, March 16, 2012, 8:35 a.m.

City, State: St. Petersburg, FL

Occupation: Freelance Designer

Comment: An article was published in the *St. Petersburg Times* not long ago detailing the need for food assistance in our community (<http://www.tampabay.com/news/humaninterest/huge-food-giveaway-in-st-petersburg-underscores-new-face-of-the-poor/1205247>,* now the *Tampa Bay Times*). The restaurants in our more affluent areas are full of tourists and yet 1,900 people (4 times the number expected) stood in line for free food—a revelation to many of us that so many of our neighbors are living with hunger.

Please pass a farm bill that provides ample support to all of the programs that assist folks in need of nutrition—SNAP, TEFAP, and CSFP. These difficult times require a lean, organized and effective approach to any assistance the government provides America's citizens, but it is in the worst of times that we must make sure those hit hardest have help. Families who have never had to contend with hunger are standing alongside people who have struggled with homelessness for years—there are many and varied needs, but America knows who to produce and supply food and even in the midst of this stubborn recession we can and should continue to provide assistance to people facing this most basic need.

COMMENT OF WAYNE PRICE

Date Submitted: Saturday, May 19, 2012, 6:57 a.m.

City, State: Kansas City, MO

Occupation: Factory Worker

Comment: We want our God given rights to make our own choices about unadulterated foods. We need protection from the overzealous FDA and Big Agribusiness, not organic farmers and raw milk.

COMMENT OF ELIZABETH PRIEBE

Date Submitted: Friday, May 18, 2012, 5:58 p.m.

City, State: Mansfield, TX

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: We only make a small amount from raising our angora and do not intend to be living on our farming. We just enjoy our land and this is what we want for America, to know that they come from the land. Our very life is dependent on what the land brings forth. Please support local farmers, sustainable practices and healthy standards that will not rape our land.

COMMENT OF WANDA PRIEST

Date Submitted: Friday, May 18, 2012, 9:53 a.m.

City, State: Estill Springs, TN

Occupation: Retail

Comment: I am 46, a mom of 3, cancer patient concerned about the health of future generations. We understand more today about how nutrition plays a role in health and studies have **Proven** GMO's, pesticides and monocultures based on singular species are detrimental to our environment and cause diseases such cancer, diabetes and heart disease. The farm bill can sway the future of American health and lower the epic cost of health care by steering our food production on a new course. Providing funding for closed loop agriculture whereby farmers use livestock to return nutrients to the land on which they produce crops would be the incentive to put nutrition back into the foods we eat. Additionally, this type of agriculture would increase rural jobs while allowing our lands to heal and reducing toxins in our water system. These are just a few of the positive aspects of returning food production to the people as opposed to corporate farming. Won't you consider how you can lessen the suffering of your grandchildren by acting now on the main source of disease? Please contact me with questions or ideas.

WANDA,

[Redacted].

COMMENT OF ERIC PRILESON

Date Submitted: Friday, May 18, 2012, 12:27 p.m.

City, State: Tucson, AZ

Occupation: Policy Writer

*The information referred to is included in Committee file.

Comment: Please consider the immediate and far reaching benefits of vital nutrition programs. While maintaining a current healthy fiscal balance may seem more important, the future ability to rise up economically will sustain our economy and workforce better with an investment in our future. Thank you.

COMMENT OF H. BRUCE PRILLAMAN

Date Submitted: Monday, May 14, 2012, 4:18 p.m.

City, State: Roanoke, VA

Occupation: Retired

Comment: From USDA statistics this presents a huge tax saving opportunity. Large Farm companies should be able to do business like any other. Provide or not provide their own insurance, Hedge or not hedge crop prices with futures, *etc.* Since 1932 or earlier we have subsidized this activity. Will they ever grow or stand on their own?—Not as long as we provide support! If this is to protect the small farm then **Make It For Small Farms.**

Note—according to USDA.

- 62% percent of farms in United States did not collect subsidy payments
- 10% percent collected 74% percent of all subsidies. Amounting to \$261.9 billion over 16 years.

COMMENT OF PAMELA PRINDLE

Date Submitted: Friday, May 18, 2012, 2:43 p.m.

City, State: Albany, CA

Occupation: Student

Comment: Dear Committee Members,

I'm a concerned Citizen and member of the Organic Consumer Assn. I'm writing to ask that the Committee Please do not cut \$4 million from the organic research funding or cut in half funding to support Beginning Farmers.

I come from a long line of small farmers from the CA Central Valley. The food my family grew and continues to grow feeds Americans healthy, nourishing food.

I have worked at the local farmer's market in my community for my friend's who are small farmers and have an organic farm in Santa Cruz, CA. I know the value of small farmer's to the health and wellness of our communities across America.

Please cut funding to support large Agri-Business instead of America's small farmers. Small farmers create jobs and bring truly high quality food to our fellow Citizens.

Thank you.

COMMENT OF BRUCE PRINGLE

Date Submitted: Friday, May 18, 2012, 5:01 p.m.

City, State: Normandy Park, WA

Occupation: Sociologist

Comment: Please cut out subsidies for large corporations and help small farmers. Label genetically altered foods. Protect the public from toxic substances.

COMMENT OF STACY PRINGLE

Date Submitted: Thursday, May 10, 2012, 10:43 a.m.

City, State: Springfield, MA

Occupation: Graduate Student/Administrative Assistant

Comment: Congress protect Hungry Families!

“The King will reply, ‘Truly I tell you, whatever you did for one of the least of these brothers and sisters of mine, you did for me.’” Matthew 25:40 (NIV)

Please protect funding for critical Federal nutrition programs, including the Supplemental Nutrition Assistance Program (SNAP) as you work to re-authorize the farm bill.

My vote counts!

COMMENT OF JOHN PRINZ

Date Submitted: Friday, May 18, 2012, 8:18 p.m.

City, State: Ocean Shores, WA

Occupation: Disabled

Comment: Cutting funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture is not helpful. As a once middle class woman, I am now 63, poor and nutrition is in the forefront of my needs. After all, who can afford health care? Certainly not me. So allow me to take care of myself.

COMMENT OF GRALIN PRITCHARD

Date Submitted: Friday, May 18, 2012, 7:52 p.m.

City, State: Houston, TX

Occupation: Healthcare

Comment: Do not facilitate the monopolization of the agriculture industry via this NDAA, it's like regulating oxygen. Industrialized farming, especially GMO farming, is the worst idea since the concentration camp, but actually does more damage in the long run. Anything that subsidizes it in the form of regulations against its competition is **Not** good for a person who eats food to stay alive. The question is, do you consider yourself an "eater"?

COMMENT OF BRENDA P. PROBASCO

Date Submitted: Friday, May 18, 2012, 12:45 p.m.

City, State: Kill Devil Hills, NC

Occupation: Restaurant Server

Comment: Our healthcare crisis will only be ameliorated when people have access to healthy foods . . . not the GMO, oil-based pesticide and fertilized processed garbage that subsidized agribusinesses sell to supermarkets. Stop the wrong subsidies and give us safe, healthy food.

COMMENT OF KELLY PROBST

Date Submitted: Friday, May 18, 2012, 11:28 p.m.

City, State: Sequim, WA

Occupation: Ranch Animal Care-Giver

Comment: Dear House Agriculture Committee,

As a resident of Washington State, I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

I request that you Fully fund conservation programs, such as the Conservation Stewardship Program, and make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

I also support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). You must maintain the EQIP Organic Initiative.

I ask that you put forth special consideration for organic food research and support all funding for America's organic farmers. Our food is becoming poisoned through big Ag's over use of pesticides, insecticides, antibiotics, hormones and genetically modified foods. Enough is enough. I want healthy food from healthy soil free of big ag's corporate special interests.

COMMENT OF TOM PROCHASKA

Date Submitted: Friday, May 18, 2012, 2:41 p.m.

City, State: Cleveland Heights, OH

Occupation: Writer

Comment: Please stop trying to slash the budget for the SNAP program and instead use money from the excessive grain subsidies that no longer make sense for our nation. We should still support our farmers, but we should stop incentivizing the overproduction of corn and other grains. Instead we should be subsidizing the foods our nations needs, like fruits and vegetables.

COMMENT OF CHRIS PROCTOR

Date Submitted: Sunday, May 20, 2012, 4:54 p.m.

City, State: St. Louis, MO

Occupation: Sales Rep.

Comment: It is well past time for the farm bill to actually focus mainly on **Food**, not food ingredients. Very few of us eat soybeans directly, and no one eats field corn which both get the lion's share of the funding. We need to be supporting our farmers that provide **Fresh** fruits and vegetables, especially our small farmers. Processed

food is killing our citizens, and low income Americans can't afford as much fresh, unprocessed food as they need.

COMMENT OF GERALDINE PROCTOR

Date Submitted: Wednesday, May 09, 2012, 3:32 p.m.

City, State: St. Louis, MO

Occupation: Ordained Minister

Comment: Please protect funding for critical Federal nutrition programs, including the Supplemental Nutrition Assistance Program (SNAP) as you work to re-authorize the farm bill. Cutting here is not the way to balance the budget. Please cut corporate entitlements instead. There is no way hard-pressed churches can feed all the hungry if the nutrition programs are cut.

COMMENT OF JOHN PROCTOR

Date Submitted: Friday, May 18, 2012, 6:33 p.m.

City, State: Eugene, OR

Occupation: Retired

Comment: Give us a farm bill with real reform that encourages the best, most healthful practices like organic, non-GMO farming. End subsidies for large absentee owner chemical using farms.

Thank you,

JOHN PROCTOR.

COMMENT OF DENNIS PROFFITT

Date Submitted: Friday, May 18, 2012, 1:44 p.m.

City, State: Ann Arbor, MI

Occupation: Retired

Comment: I think that the organic farmers of this country need more support as it is the best food while poisons and GMOS are funded and protected under rogue laws for debatable controversial reasons! I demand as a citizen and a taxpayer that my taxes go to Organic farmers not death dealers in poisons and mutated foods! No to Frankenfoods yes to natural organic foods! Thank you.

COMMENT OF ROBIN PROFFITT

Date Submitted: Friday, May 11, 2012, 4:38 p.m.

City, State: Ellinwood, KS

Producer/Non-producer: Producer

Type: Livestock, Other

Size: 1,000+ acres

Comment: Our main concern is it appears to be a mirror image of the 1980's Country's when land values skyrocketed and landowners were encouraged to borrow more to operate under low interest rates. Many lost farms & ranches when land values dropped and interest rates rose. Our own government encouraged spend, spend, spend. Don't let this happen again please.

COMMENT OF DIANE PROPSTER

Date Submitted: Wednesday, May 09, 2012, 5:00 p.m.

City, State: Los Angeles, CA

Occupation: Retired Teacher

Comment: I have seen too many friends and acquaintances who after retirement have lost their condos, have very little to live on, and in three cases were homeless or have had to go to live with relatives. These are people with college degrees and professions. On the streets of West Los Angeles, an affluent area there are often seniors who are homeless. It is horrifying to see so many people unable to have a decent standard of living who have been professional. This does not even touch on the working and poor. It is even more tragic. These people need food and shelter. They are not alcoholics or drug addicts. Their sin is that often they have changed professions mid-life. For women it is often a divorce that leaves them financially vulnerable.

COMMENT OF JEAN PUBLIC

Date Submitted: Friday, May 18, 2012, 7:11 p.m.

City, State: Flemington, NJ

Occupation: Retired

Comment: No extra money to corn. No use of corn for fuel at any time—ethanol is a terrible waste of tax dollars. No subsidies to big corporations. Help produce safe and healthy plants. Shut down abuse of animals with the beatings, the tail dockings, the pulling out of their teeth, the dehorning, the drowning in antibiotics.

COMMENT OF DEBBIE PUCH

Date Submitted: Saturday, May 19, 2012, 12:05 a.m.

City, State: Key Largo, FL

Occupation: Aesthetician

Comment: Please protect our small organic farmers in this country.

Protect us from the toxic GMO seeds. I use only organic skin care products in my business. In eat only

Organic fresh foods, grass fed beef, free roaming chicken and eggs. Please think of the family farmers instead of companies like Monsanto & Dow.

COMMENT OF SUSAN LANG PUCKETT

Date Submitted: Friday, May 18, 2012, 3:06 p.m.

City, State: Nashville, TN

Occupation: Author, Health Coach

Comment: I support organic farming. I am against Monsanto and the genetic modification of foods. Monsanto is killing Americans with unhealthy foods, ruining the soils and tampering with nature. Stop Monsanto and support the organic farmers. Fire Michael Taylor as FDA Food Safety Czar. He is a Monsanto guy—that is a conflict of interest. Do something to save the organic farmer!

COMMENT OF MARTHA PUENTE

Date Submitted: Wednesday, May 16, 2012, 8:33 p.m.

City, State: Santa Rosa, CA

Occupation: Planner/Land Acquisition Specialist

Comment: I work for the Sonoma County Agricultural Preservation and Open Space District. In 2005, we received a \$500,000 grant from the Farm and Ranchland Protection Program for an 875 acre livestock grazing operation which now has a perpetual agricultural conservation easement over the land. Development rights were extinguished, total price of the easement \$3,150,000, so the \$500,000 FRPP grant was essential. Sonoma County farmland is at high risk for conversion to non-agricultural uses. Sonoma County is adjacent to Napa & Marin counties, two very wealthy counties, and development of farmland in Sonoma is on the rise. These grants are essential if we want to produce safe and locally grown and raised food. I urge you to continue these very important Federal grant programs.

With sincere thanks,

MARTHA PUENTE.

COMMENT OF RENE PUGH

Date Submitted: Sunday, May 20, 2012, 7:41 p.m.

City, State: Downingtown, PA

Comment: Factory Farms are the bane of agriculture . . . huge operations that are inhumane, abusive, unfriendly and hurtful to animals and humans . . . these FF's breed filth, contamination in despicable conditions that any of the animals need hefty doses of antibiotics. It is a sick, unhealthy, gross way to operate. The focus should be on supporting sustainable agriculture . . . local farms/farmers; organic production and organic farms . . . these are the farms that the Dept of Ag. should be supporting vs. the greedy arrogance of Factory Farms who are too big and who do not give a crap about raising healthy uncontaminated animals or plants. These ag corporations only care about themselves and their bottom line.

COMMENT OF DEBBIE PUHL

Date Submitted: Saturday, May 19, 2012, 8:42 p.m.

City, State: Portland, OR

Occupation: Housewife

Comment: Please give us real farm bill reform. Crop insurance of some kind, but not huge and constant subsidies of the commodity crops, to agribusiness corpora-

tions. Promote sustainable and organic practices in farming, and family farms. Label GMO foods. Aid the transfer of family farms from the baby boomer generation to this new generation of farmer-want-to-be's—I know there are lots of young people in Oregon who would like to farm—I've met plenty while helping out at a local CSA. Encourage the poor to buy fresh food and cook it. Encourage regional self-sufficiency of food production.

COMMENT OF ANDREA PURDON

Date Submitted: Saturday, May 19, 2012, 1:26 p.m.

City, State: Grand Island, FL

Occupation: Artist/Semi-Retired

Comment: I have multiple chemical sensitivities and have reached the point that about 95% of what I eat has to be organic, non-GMO, and hormone/antibiotic free. I have to drive an hour to get to a decent selection of organic food. I am the proverbial canary in the coal mine and I am meeting more and more people like me that are displaying the symptoms I had 15 years ago.

I am now growing as much vegetable and fruit as I can and I now realize that we are handicapping our population by not teaching the basics of farming to future generations. If we ever have a national disaster that disrupts our ability to access food we will have public uproar. WE know who they will blame. Money needs to be spent on the organic farmer, not the big corporation. Our health and the health of our nation is at stake.

COMMENT OF BARBARA PUTNAM

Date Submitted: Tuesday, May 15, 2012, 7:17 a.m.

City, State: Litchfield, CT

Producer/Non-producer: Producer

Type: Forestry, Fruits, Greenhouse/nursery, Vegetables

Size: Less than 50 acres

Comment: As a small organic farmer, I want to see a farm bill that helps us produce healthy food and protect the fertility of the soil and the purity of our water. As a 64 year old farmer, I want to see a younger generation of farmers ready to build on what I have worked hard to create. As a Master Gardener trained by the Cooperative Extension, I want a farm bill that supports ongoing research. Please keep these principles in mind when creating a farm bill.

COMMENTS OF HERBERT PUTZ, PH.D.

Date Submitted: Friday, March 23, 2012, 2:48 p.m.

City, State: Orange, VA

Producer/Non-producer: Producer

Type: Field Crops

Size: 1,000+ acres

Comment: The most important issue for the new farm bill is crop insurance. The present mandated deductible is way too large as multiple weather related crop losses will amount to losing one full crop. That is financially difficult for farmers to digest. Second, the RMA regulations/handbooks are favoring the AIP to the detriment of the insured.

Most of the crop insurance regulations issued by USDA RMA are very difficult to understand for a non bureaucrat. Matter of fact a Circuit Judge in VA ask who was dreaming up these terms they are crazy! Reduce the insurance terms to more farmer friendly terms and not the AIP and RMS.

Respectfully,

DR. H. PUTZ.

Date Submitted: Friday, April 20, 2012, 12:44 p.m.

Comment:

- (1) crop insurance is imperative
- (2) a 30 to 35% deductible is not a "safety net" as multiple disaster season can amount out one or more total crops
- (3) forget ACRE Sure are any new gimmicks—they are expensive to administer and complicated—it is simpler to reduce the deductible
- (4) RMA handbook regulations favor insurance providers to the detriment of the insured. AIP use the handbooks to find loopholes to cheat insured of their claims

(5) move the crop insurance program to FSA which will save \$1.7 b in administrative contributions to the AIP.

(6) provide legal support that insured can find and hire an adjuster who represents the insured interests and is no longer subject to a unilateral AIP hired adjuster

(7) if you want to hear more of our experience and expertise as farmers please invite me to your next hearing

Respectfully,

DR. H. PUTZ.

COMMENT OF PENNIE PYLE

Date Submitted: Saturday, May 19, 2012, 8:41 p.m.

City, State: Conway, SC

Occupation: Eldercare Worker

Comment: I urge congress, in the strongest terms possible to pass a bill to protect the Organic Farmers and the American public from The Ag-Business bullies like Monsanto. The Ag-Business has put profits above lives for too long and we need to return to natural farming and antique seed and safe, farm raised food animals instead of factory raised livestock now before the medical costs of the GMO foods skyrocket. There is enough clinical evidence to prove that the GMOs cause medical problems to make this issue a "no-brainer". If you care at all about what you put in your own bodies and what you feed your own children, to stop the rape and poisoning of our food supply.

Please, please protect our food from the Ag-Business now!

COMMENT OF CHARLIE QU Aid

Date Submitted: Friday, May 18, 2012, 10:00 a.m.

City, State: Richmond, CA

Occupation: CFO

Comment: The farm bill should support sustainable agriculture, especially small, family operated, non-monoculture, non-petroleum based, clean, and fair farming. The benefactors of the farm bill should be the consuming public as well as the producing farmers and it should not support large agribusiness concerns.

COMMENT OF SUSANNE QUATTRO

Date Submitted: Friday, May 18, 2012, 2:58 p.m.

City, State: Saint James City, FL

Occupation: CPA

Comment: I would like the health of each end user, with the Earth included as an end user, to be considered by promotion of organic natural practices and disregarding the impact of big AG and big money. I need to be able to choose what goes into my body with my food purchases and that means no GMO and no pesticides and humane treatment for farm animals. With the mass media and internet research available, the end user is becoming more of an educated consumer. As such, the choice of what to purchase will ultimately be the determinant in all of these issues. This includes who to vote as a representative of those issues.

COMMENT OF GINA QUATTROCHI

Date Submitted: Tuesday, May 15, 2012, 1:24 p.m.

City, State: Los Angeles, CA

City, State: Ekalaka, MT

Occupation: Proofreader/Graphic Artist

Comment: It is time to consider **All** Americans who eat food from producers. We have the **Right** to whole food, unadulterated by chemicals and genetically modified materials of who knows what creature/bug. Consider your children and grandchildren's future when making your decisions that affect all of us.

Thank you.

COMMENT OF JAMES QUICK

Date Submitted: Saturday, May 19, 2012, 9:23 a.m.

City, State: Green Lake, WI

Producer/Non-producer: Producer

Type: Livestock, Vegetables

Size: 50-150 acres

Comment: My biggest concern is the need for protection for the food producer of non GMO plant and animal products. Currently, most of the power lies with the large chemical producers and their patents to the detriment of the anyone wishing to produce or propagate food not influenced by GMO plants or the chemicals these plants were designed to work with.

The integrity of our food supply is at stake and we cannot allow large commercial interests to dictate our future for the sake of their profits.

COMMENT OF SUSAN QUILLIO

Date Submitted: Friday, May 18, 2012, 9:06 a.m.

City, State: Greenwich, NY

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: We prepare foods sourced from local and regional vegetable, meat, dairy and grain farms for our catering company. Helping to create stronger regional economic viability and good quality clean food is our focus. Please help us in this fundamental effort.

Yours,

SUSAN QUILLIO.

COMMENT OF JENNIFER QUINN

Date Submitted: Sunday, May 20, 2012, 8:59 p.m.

City, State: Allentown, PA

Occupation: Retired

Comment: I understand that budget cuts are needed at this time, but it is unfair to cut programs that provide vital support to sustainable, consumer-friendly farming, while retaining subsidies that benefit corporate agriculture at the expense of the small farmer and our natural resources. Any farm subsidies should be tied to responsible stewardship of the land.

COMMENT OF LAURIE QUINTAL

Date Submitted: Friday, May 18, 2012, 11:54 a.m.

City, State: New Bedford, MA

Occupation: Psychotherapist

Comment: I have 2 sons with autism. Their brains have continually progressed due in large part by good nutrition. Organic foods (non-GMO!) Are imperative to their development and health.

COMMENT OF NINU-ALEXANDRI QUIRK, M.D.

Date Submitted: Friday, May 18, 2012, 6:44 p.m.

City, State: Pahoa, HI

Producer/Non-producer: Producer

Type: Fruits

Size: Less than 50 acres

Comment: Farm subsidy should stop supporting grain and start promoting the healthy fruits and vegetables that Americans need to eat to improve their health.

Additionally, a movement away from subsidizing agribusiness and towards supporting small farmers would be good for our country. I'm a farmer and a medical doctor and very aware of the connections between farm policy, food, nutrition and health.

COMMENT OF YVONNE R. DE MIRANDA, PH.D.

Date Submitted: Friday, May 18, 2012 8:29 p.m.

City, State: Deadwood, OR

Comment: I am desolate at again finding that agribusiness is rewarded for its poor practices and that small farmers who produce the best and healthiest of nourishment are punished. It is shocking.

I strongly support the following:

- full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

It is high time to place the priorities of food consumers at the top. Agribusiness is literally killing people and abusing animals and the land.

There must be a way stop an ongoing inequity. Please listen to those who are negatively impacted. It is time to **Wake Up!**

COMMENT OF SETH RAABE

Date Submitted: Friday, May 18, 2012, 1:55 p.m.

City, State: Hana, HI

Producer/Non-producer: Producer

Type: Field Crops, Forestry, Fruits, Greenhouse/nursery, Specialty Crops, Vegetables

Size: 151–300 acres

Comment:

- Small-scale sustainable and diverse farming **Must Be Top Priority!**
- Support **Localized** agriculture.
- End subsidies for factory farming.
- End subsidies for herbicides, insecticides, and all other poisons.
- End subsidies for fuel.
- End subsidies for biotechnology products.

Listen to the weather reports! Read the science articles about global warming. Ag is the #1 contributor to climate change! Use your conscience!

This is my comment.

Thank You.

COMMENT OF JOHN RABEY

City, State: Wesley Chapel, FL

Occupation: Retired

Comment: Being a senior myself I find it difficult to obtain housing, medications, and food. At least I receive my social security if nothing else. Please provide a safety net for those less fortunate than I.

COMMENT OF SARAH RABKIN

Date Submitted: Friday, May 18, 2012, 10:50 p.m.

City, State: Soquel, CA

Occupation: Teacher, Writer

Comment: As an oral-history interviewer and editor involved in documenting the past 40 years of agriculture in my ag-rich region—and as an informed consumer of agricultural products—I have come to know all too well how much damage has been done to the health of people and land by ag that emphasizes heavy applications of chemical pesticides and fertilizers. Organic farmers proffer solutions we've barely begun to tap in this country. We need a healthy farm bill.

1214

COMMENT OF ADAM RACE

Date Submitted: Tuesday, May 15, 2012, 10:46 p.m.

City, State: Portland, OR

Occupation: Student

Comment: A \$36 million cut to SNAP is not the way to go. The Committee should focus on writing a farm bill that creates economic opportunity and improves access to healthy, affordable food for all Americans.

COMMENT OF RAYMUR RACHELS

Date Submitted: Friday, May 18, 2012, 9:43 p.m.

City, State: Jacksonville, FL

Occupation: Homemaker

Comment: I am a mother of four and am extremely conscientious when it comes to trying to feed my family truly healthy food. Please don't allow any watering down of the organic standards, and absolutely don't allow any genetically modified ingredients to somehow creep into the organic label. Farm subsidies should go to the small farmers practicing sustainable agriculture. The major conventional agricultural producers are causing untold damage to our soil, our minds and what should be healthy bodies.

COMMENT OF SEAN RACKLEY

Date Submitted: Saturday, May 19, 2012, 12:40 p.m.

City, State: Martindale, TX

Occupation: Teacher

Comment: It is currently required that food be labeled appropriately for nutrition. Why is its source, natural or genetically grown, not also labeled legal requirement? It is imperative that people know where their food comes from. Please support a bill to require the labeling of GMO or GME foods by the FDA and manufacturers. Thank you!

COMMENT OF ESTHER RACOOSIN

Date Submitted: Friday, May 18, 2012, 2:49 p.m.

City, State: Ithaca, NY

Comment: The farm bill must continue to help smaller farmers who can provide food to consumers in their areas. Organic farms and sustainability in farming must be encouraged! I want to purchase produce from my local farmers!

COMMENT OF ALISON RADEI

Date Submitted: Saturday, May 19, 2012, 12:56 p.m.

City, State: Tucson, AZ

Occupation: Volunteer

Comment: Our food system is broken! The Tucson Community as do many others, need a system that makes everyone healthy. Let our local farmers (and small farmers all over) make good food for us to eat! Stop consolidating! Let farmers in our hometowns work to bring down prices, have a fair marketplace. It would greatly reduce traffic and gas expenses. Letting small farmers back into the equation means good/healthy/diverse food for everyone, lowering prices by enforcing things like agricultural reserves, stronger infrastructure, stronger communities, reducing pollution and improving biodiversity and conservation.

I am a supporter of the Community Food Bank of Southern Arizona. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs. Please make some good decisions to help the people of America. Set an example for the rest of the world. Our community needs you to make the right decisions and make food healthy and affordable again. There are so many benefits to letting the independent farmers back into the system, but at least keep the programs SNAP, TEFAP, and CSFP. Thank you for your consideration.

COMMENT OF CAROL RAHBARI

Date Submitted: Friday, May 18, 2012, 11:56 a.m.
City, State: Ypsilanti, MI
Occupation: Small Business Owner
Comment: It's very important to me that our food be free of pesticides, hormones, and GMO's. This does not fit with big ag whose main focus is mass production and their bottom line. This has been horribly detrimental to our food supply.

COMMENT OF PAT RAINS

Date Submitted: Friday, May 18, 2012, 11:48 p.m.
City, State: Trenton, MO
Occupation: Landowner/Homemaker
Comment: Attention needs to be given to cleaning up food production, by giving more assistance and less harassment to organic farming. Big Ag and Monsanto are jeopardizing our health to line their own pockets, and it needs to stop!

COMMENT OF A. LYNN RAISER

Date Submitted: Friday, May 18, 2012, 10:14 a.m.
City, State: Saint Johns, FL
Occupation: Senior Information Developer
Comment: I want **Healthy** food for my family that is grown using sustainable, eco-friendly methods. The farm bill should be supporting local farmers using these methods, not helping Big Ag and their Frankenfoods!

COMMENT OF KELLY RAISOR

Date Submitted: Friday, May 18, 2012, 5:14 p.m.
City, State: Clarksville, IN
Occupation: Unemployed
Comment: Please consider the impact of not labeling GMO foods. Please indicate that all foods be labeled as organic or non organic, GMO or non GMO in the next farm bill. Please keep in mind that every man, woman & child has a birthright to choose what they consume, regardless of any law put into place regarding food safety. It is imperative that the people be allowed to decide for themselves if GMO or non organic foods will be a part of their diet. It is equally important that you each remember that you have the power to allow or deny the people of their voice in this matter. The people have trusted upon you to carry their voices to the farthest extent so that they may be heard & the people have spoken: label all GMO & non-organic foods. Thank you for your kind consideration.

COMMENT OF RAVI RAJAGOPALAN

Date Submitted: Friday, May 18, 2012, 1:29 p.m.
City, State: San Francisco, CA
Occupation: Software Sales Engineering
Comment: It is ridiculous that the farm bill continues to subsidize corporate mega-farms that make huge profits for unsustainable crop production. More money should be directed to small farmers and organic, local farming. This is an issue that is critical to the health of America. Do not let big farm lobbyists control the farm bill.

COMMENT OF SUZANNA RAKER

Date Submitted: Friday, May 18, 2012, 11:59 a.m.
City, State: Calumet, MI
Producer/Non-producer: Producer
Type: Field Crops
Size: 151-300 acres
Comment: As a (certified) organic farmer, I believe strongly that healthy, accessible, affordable food should be available to all citizens. Most packaged products in our grocery and "convenience" stores have packaging worth more than the contents and are full of additives and other chemical components. Worse yet, toxic pesticides are allowed in increasing amounts in food products such as high fructose corn syrup and meats. Time to wake up and stop serving industrial agriculture.

COMMENT OF KATHERINE RAKOWSKI

Date Submitted: Friday, May 18, 2012, 6:33 p.m.

City, State: Dousman, WI

Occupation: Student

Comment: It is absolutely crucial to protect our small farms and farmers. We need to protect families, children, elderly, and people of low-incomes. No more subsidies and loop-holes for the largest companies in this country and around the world.

COMMENT OF LISA RAMACI

Date Submitted: Friday, May 18, 2012, 5:28 p.m.

City, State: New York, NY

Occupation: Self-Employed

Comment: I have watched in dismay as over the years corporate agribusiness has gotten more and more of a stranglehold on our regulatory system and our political leaders, while receiving billions in subsidies for crop and revenue insurance policies. I have watched a corporate thug entity like Monsanto genetically engineer seed into growing Frankenfoods, and then pursue in court hundreds of lawsuits against farmers to force them to stop saving seeds (a common practice used for thousands of years, but Monsanto forbids it, requiring farmers to buy new seed from the company every year). I have read the ever-growing list of chemicals added to the "foods" we ate expected to eat. And I realize that for those of us who do not want to ingest these poisons, a stronger stance on organic farming must be taken.

Therefore, I am asking you to please vote to support the following:

- (1) the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286);
- (2) Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs;
- (3) The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236);
- (4) Maintaining the EQIP Organic Initiative.

While organic farming will never have the clout or power of corporate agribusiness, the playing field should at least be a bit more level. Thank you.

COMMENT OF JULIANNE RAMAKER

Date Submitted: Friday, May 18, 2012, 2:37 p.m.

City, State: Bend, OR

Occupation: Office Manager

Comment: I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286)

For Congress to consider cutting funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture is absolutely wrong and totally out of touch with what the American people want. I'm also certain that it is right in step with the desires of the commercial agribusinesses.

I'm asking that you stand for the American people, sustainable organic farming and that you fund conservation programs, such as the Conservation Stewardship Program, while making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

COMMENT OF MAJA RAMIREZ

Date Submitted: Friday, May 18, 2012, 9:14 a.m.

City, State: Chicago, IL

Occupation: Master Food Preserver Intern

Comment: I was a Master Gardener for 14 years, and a Master Food Preserver intern. I happen to know of the research showing that more densely planted corn and soybeans has contributed to changing the climate, making our area more humid. I loathe the runoff of agricultural fertilizers into the Gulf, and the leaching of pesticides into groundwater everywhere. Agribusiness and CAFOs have to be stopped, and small and new farmers helped. We deserve safe food!

COMMENT OF PATRICIA RAMOS

Date Submitted: Friday, May 18, 2012 12:33 p.m.

City, State: Ware, MA

Occupation: EMT

Comment: Please help us U.S. citizens and hear our voices. We need our agricultural laws to have our health held first and foremost before anything else is considered.

COMMENT OF SYLVIA RAMSAY

Date Submitted: Friday, May 18, 2012, 12:39 p.m.

City, State: Chicago, IL

Occupation: Retired

Comment: Please act in the interest of the taxpayer and the smaller farms. Do not just give money away needlessly as it is not your money. Scrutinize every subsidy and insurance payment to ensure it is appropriate and necessary.

COMMENT OF JOHN RAMSBURGH

Date Submitted: Friday, May 18, 2012, 12:38 p.m.

City, State: Ann Arbor, MI

Occupation: Teacher

Comment: First, consumers should have the right to know whether the ingredients in their foods have been genetically modified. If the agriculture industry is confident in the safety of genetically modified products, they should have no qualms sharing that information.

Second, farmers who do not use patented or genetically modified seeds in their production should not face lawsuits or intimidation from the big ag industries. On the contrary, it is the big ag companies that should face penalties for the indiscriminate dispersal of their seeds.

Finally, more needs to be done to develop local food economies, since this is clearly where customers increasingly want to go. Without the infrastructure (processing plants, delivery mechanisms, distribution and consumer information), these local job creators will not be able to grow their businesses. The USDA and our Federal agencies are missing a great opportunity to spur investments, and create jobs, in our local economies.

COMMENT OF BRANDON RANAURO

Date Submitted: Friday, May 18, 2012, 6:12 p.m.

City, State: Lakeland, FL

Comment: Hi there. I believe that small and local farmers who bring us truly healthy food are the ones that should be supported with the farm bill. I believe money should be put into sustainable farming practices that will make America thrive and improve our health. Many other Americans want this. The small scale and sustainable farmers are the ones that need this program. Not big agriculture practices who don't need the money and that's practices harm our health and the environment. It really alarms me to see that they get all the help when the small scale and family farmers are the ones that need it the most. It doesn't make sense to continue on with practices that are doing us any good. Congress needs to get in touch with the values of the American people. The real farmers of the country who want to provide us with good and healthy foods. It's about time to support what should be supported.

COMMENT OF KATHERINE RAND

Date Submitted: Thursday, May 03, 2012, 5:44 p.m.

City, State: Providence, RI

Occupation: Student, Research Assistant

Comment: To whom this may concern,

I am writing to express my interest in your involvement in the 2012 Farm Bill. I believe your support of certain decisions in the creation of this bill is critical. First, there needs to be a focus on de-incentivizing the large, economically and environmentally unsustainable industrial farming practices. There needs to be a greater focus on regional and local farming development and better connecting farmers with their community. We need to incentivize younger people to become farmers and/or become more involved with how their food is produced, otherwise the profession will give way to machine dominated plantation production.

I also believe it is very important to improve the School Lunch system, emphasizing nutrition. The families who largely participate in this program are those that

are on food stamps and thus only have access to cheap food. With our current agricultural system in which cheap food is often least nutritional, these children are already usually exposed to less healthy food. Currently, with the School Lunch program as a dumping group for food, children lack access to the nutrition that they need to experience proper development and lead healthy lives.

I hope that you will support these parts of the farm bill that I find to be most critical. Thank you.

KATIE RAND.

COMMENT OF ELIZA RANDALL

Date Submitted: Friday, May 18, 2012, 2:22 p.m.

City, State: Los Angeles, CA

Occupation: VFX Supervisor

Comment: I maintain a small organic farm for my own food in mid-city Los Angeles. I am strongly in support of fostering more small and mid scale farmers who provide organic and non-agronomy scale food as this is the cleaner and healthier route as well as a more sustainable food model for the health of both people and our economy. Make farming a livable wage for the common person, not only a corporate scale farm model which compromises health and safety of all.

COMMENT OF CRYSTAL RANDALLO

Date Submitted: Tuesday, April 03, 2012, 8:56 a.m.

City, State: Cloquet, MN

Occupation: Eligibility Specialist

Comment: The SNAP program does not currently have an asset test/limit. I determine eligibility for this program and I taken many applications for single adults who are not employed and have over \$75,000.00 in the bank. They either live with their parents for free or a significant other. Most are eligible for \$200 in benefits. While someone trying to make a living on minimum wage may be lucky if they are eligible for \$16 a month. If you make any changes to the program, please address this issue. Thanks!

COMMENT OF EARL RANNEY

Date Submitted: Saturday, May 12, 2012, 3:20 a.m.

City, State: Upland, CA

Occupation: Retired Steel Worker

Comment: I've lost all hope that this will sway any member of Congress, but I like to have my say, so I want help for the little farmer, and no help for the big farmer. They are rich and do not need any help.

Thanks,

E.R.

COMMENT OF NEVILLE RAPP

Date Submitted: Thursday, May 17, 2012, 11:25 a.m.

City, State: St. Louis, MO

Occupation: Biochemist

Comment: Dear House Agriculture Committee:

We want a safety net for farmers, **But** we want to restore the link between taxpayer-supported subsidies for crop insurance and conservation compliance protections. This is what we want you to do:

- Require Conservation Compliance for Taxpayer Subsidized Crop Insurance Programs in the 2012 Farm Bill to restore the link between soil and water conservation and taxpayer benefits to farmers. This would ensure that all new crop and revenue insurance or other risk management programs that make up a safety-net for farmers do not incentivize environmental destruction and it helps protect America's investment in our farmland and farmers.
- Set reasonable limits on taxpayer-funded crop insurance subsidies to help keep costs from continuing their upward spiral.
- Help grow jobs by retaining programs like the Value-Added Producer Grants Program. Guarantee \$30 million of mandatory funding per year. VAPG provides seed money to help farmers innovate in agriculture and create jobs while securing a sustainable path to market-based farm profitability.

- Help grow local farm economies and support healthy food in schools by providing flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.
- Retain effective conservation programs in the farm bill that deliver clean water and wildlife benefits.
- Grow farmers through mandatory funding for the Beginning Farmer and Rancher Development Program. The National Sustainable Agriculture Campaign recommends \$30 million in mandatory funding. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new agriculture start-ups.
- Secure our food future and fund the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.

Sincerely yours,

NEVILLE RAPP.

COMMENT OF LISA RASCHKE

Date Submitted: Friday, May 18, 2012, 11:31 a.m.

City, State: Raleigh, NC

Occupation: Mother, Wife, and Writer

Comment: Please, please stop the subsidies for corn. This is just like tobacco. Yes, it does cause serious health and environmental problems. Please stop making it about money, and choose the welfare of the American people. Thank you.

COMMENT OF JUDITH RASKIN ROSENTHAL

Date Submitted: Friday, May 18, 2012, 8:54 p.m.

City, State: New York, NY

Occupation: Art Director/Art Therapist

Comment: 100 years ago my father became an organic farmer. He and my mother designed a house with coal heating. My mother and father designed an organic compost can. I admire farmers.

COMMENT OF SARAH RATHER

Date Submitted: Thursday, May 10, 2012, 3:31 a.m.

City, State: Capitola, CA

Occupation: Disabled

Comment: Support small farm and family farming. Local farming too. Please spread the money around—we need to get back to healthy farming and allowing programs such as food stamps to help our struggling Americans.

Farm bills should not support industrialized corporate farming, but rather the local farmers whom help keep our planet healthy by using methods that are Earth friendly.

COMMENT OF DONNA RATLIFF

Date Submitted: Sunday, March 18, 2012, 9:13 p.m.

City, State: Lithia, FL

Comment: I have grown my own food. That is the best way to live. I believe in organic natural foods even milk products. People since the beginning of time have survived on this forever. I oppose the use of additives in all foods. This is unhealthy and causes illness. I think you should leave Amish people alone! They are living like humans should! I support Amish and whole natural foods even dairy! The human race has survived on these foods forever!

COMMENT OF TERESA RAULERSON

Date Submitted: Friday, May 18, 2012, 3:05 p.m.

City, State: Canton, NC

Producer/Non-producer: Producer

Type: Fruits, Poultry/poultry products, Vegetables

Size: Less than 50 acres

Comment: Please keep the small farmer in mind when drafting this bill. The huge ag companies may produce much of the food in this country, but the smaller farms produce the best quality food.

COMMENT OF MAUREEN RAWLINGS

Date Submitted: Friday, May 18, 2012, 3:12 p.m.

City, State: Olympia, WA

Occupation: Retired Teacher

Comment: I want to eat organic. I want everyone to be able to feed their children organic food at reasonable cost. I support sustainable, organic agriculture where farmers are safe as they work and consumers have the right and opportunity to eat healthy food. I support family farms. Produce from non-organic farms does not even have a taste, not to mention little food value nutritionally and big health risks. Please support organic, sustainable healthy farming practices.

COMMENT OF CINDY RAY

Date Submitted: Friday, May 18, 2012, 7:48 p.m.

City, State: Soap Lake, WA

Producer/Non-producer: Producer

Type: Field Crops

Size: 151–300 acres

Comment: Please redo the farm bill. I am a mid to small farmer in Central Washington. We see our neighbors with thousands of acres buying up the smaller farms. They were able to build wealth with the current farm subsidy programs. We need to change those programs to benefit small producers to stay in business. The food supply will be much safer with smaller producers.

COMMENT OF DARRYL RAY

Date Submitted: Sunday, May 20, 2012, 10:22 a.m.

City, State: Castro Valley, CA

Producer/Non-producer: Producer

Type: Poultry/poultry products, Vegetables

Size: Less than 50 acres

Comment: Phase out subsidies especially for large factory farms and for corn and ethanol. Be more supportive of small farms and organic farms. Support permaculture, biodiversity and conservation practices.

COMMENT OF HILARY RAY

Date Submitted: Friday, May 18, 2012, 2:18 p.m.

City, State: Klondike, TX

Occupation: Homemaker

Comment: Don't cut \$4 million from organic research funding or funding to support Beginning Farmers. I support **Organics** and expect you to as well! We are poisoning ourselves and our environment which will lead to unsustainable lifestyles. Please make a positive impact and urge an increase in organic productions!

COMMENT OF KATRINA RAY

Date Submitted: Saturday, May 19, 2012, 9:53 p.m.

City, State: Austin, TX

Occupation: Stay-at-Home Mom

Comment: Our food source is vital to the well-being of all of us and the world we all share. Without our health and our planets health we are nothing. It is crucial to take the actions necessary to use organic, sustainable farming. For ourselves and our children and the generations to follow.

COMMENT OF LINDA RAY

Date Submitted: Friday, May 18, 2012, 9:15 p.m.

City, State: Gresham, OR

Occupation: Retired School Employee

Comment: This country needs its family owned and operated farms across America. These farms take pride in the job they do and in their contribution to the nation's food supply. My uncle became an Idaho potato farmer after he returned from World War II. He spent his entire life providing a quality product for America's tables. Too many of the big agribusiness conglomerates are only interested in the bottom line and are willing to cut corners in order to increase profits. Their bottom line is money and **Not Food Safety**. Consumers have a **Right** to know that the food products they put on their tables **Will Not Harm** their family's health!

If large agribusinesses are allowed to be run with no expectations of safe practices and quality, our food supply will be in great peril! Large companies do **Not Mean Quality**, it means more room for error in pursuing "cheap production!" **Be Sure To Keep** our smaller, independent farmers an important part of our local food supply!

COMMENT OF SUSAN RAY

Date Submitted: Friday, May 18, 2012, 12:30 p.m.

City, State: Saugerties, NY

Occupation: Writer/Film Director

Comment: In the best of all worlds we'd be aiming towards 100% organic farming. We need small local farms to be supported, for the quality of the produce, for the savings in avoiding fuel-consuming long-distance transport, in order to help nurture a strong middle class and strong local communities.

COMMENT OF TURNER RAY

Date Submitted: Friday, May 18, 2012, 1:39 p.m.

City, State: Pueblo, CO

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Please listen to these folks. They really know what they're talking about. Corporate health can no longer be at the expense of the land, water and the people's health. **Now** is the time to create meaningful legislation. Please bless America with a sound set of policies.

Thank you,

TURNER.

COMMENT OF CARL RAZZA

Date Submitted: Friday, May 18, 2012, 10:47 a.m.

City, State: Flemington, NJ

Occupation: Regional Sales Manager

Comment: It's time to end subsidies on mega farms growing commodities. No more support for corn ethanol and soybean biodiesel. More support is needed for the small family farm. More support is needed for fresh locally produced foods in inner cities.

COMMENT OF PATRICIA REARDIB

Date Submitted: Tuesday, May 01, 2012, 6:28 p.m.

City, State: Worcester, MA

Occupation: Retired

Comment: As the manager of an inner city food pantry I see the number of people seeking help increasing each month. We will make the trips to the food bank, store it, distribute it to those who come to us for help, and complete all the necessary paper work, but we need you to make the food available. Sad to say, there is hunger in Central Massachusetts.

COMMENT OF SANDY REAVEY

Date Submitted: Sunday, May 20, 2012, 1:52 p.m.

City, State: Denver, CO

Occupation: Unemployed

Comment: To protect our future health, we need to stop GMO's in our food production! We need cleaner air, water, and land. Stop fracking as well and do not put the pipeline across our precious farmlands.

COMMENT OF LAURA RECORD

Date Submitted: Saturday, May 19, 2012, 5:29 a.m.

City, State: Sacramento, CA

Occupation: Student

Comment: I am 28 yrs. old, and I am a dancer, a marathon runner, a Montessori preschool teacher and art student at UC Davis. I cannot express the importance to me of this bill and the future investment in and sustainment of the local, organic

agriculture in my area of No. CA. As a conscious consumer and educated individual I care about not only what I eat but how it was grown and the impact of it's production on the soil and environment. Support for a farm bill that protects our natural resources while investing in the local economies and providing quality, untreated (organic) foods will in the long run prove most beneficial to the general health and well being of our nation's people and our natural resources. Please allow for these small but monumental strides in western agriculture to take place by granting funding and freedom to local, organic, and sustainable agricultural movements. This is the hope for our future, and as a young American, I speak from my heart when I say I care about the future of the natural environment and the health of our people. Good health comes from good nutrition, which cannot be grown through monocropping. Please consider these logical and meaningful points when writing the new bill. The future generations of young Americans, and myself, thank you.

Sincerely,
LAURA RECORD,
Student, UCD.

COMMENT OF CARMEN REDDING

Date Submitted: Friday, April 27, 2012, 12:53 p.m.
City, State: Baltimore, MD
Occupation: Lab Manager/Research Assistant in a University Neuroscience Lab
Comment: Our planet is slowly being poisoned by agribusiness. We need more organic and sustainable farming. Corporate farming is destroying our world, slowly, bit by bit.
Profit without considering consequences is destructive ultimately.

COMMENT OF ANN REDIG

Date Submitted: Friday, May 18, 2012, 1:44 p.m.
City, State: Rochester, MN
Occupation: Religious Ministry
Comment: Support, subsidize the family farmer, beginning farmers and rural communities. Support, subsidize organic farming and use of local grown in school and other institutions. Put a limit on subsidies and subsidies for crop insurance to corn, soybean and other cash crop farmers who don't need it. Find ways to help small and beginning farmers to have genuine assistance (not just dollars) to succeed. Do not cut school food or other food programs in order that every child continues to have good nutrition to grow into productive contributing citizens who are the future of our country.

JOINT COMMENT OF ROBERT & KATHY REDIG

Date Submitted: Saturday, May 19, 2012, 9:28 a.m.
City, State: Winona, MN
Producer/Non-producer: Producer
Type: Field Crops, Forestry
Size: 50-150 acres
Comment: Don't allow insurance to be used as guaranteed profit for corn, soybean, and cotton. Extend it to other crops. Concentrate on food for needy and conservation. No insurance for farmers not following best conservation practices or destroying those already in place.

COMMENT OF MONIQUE REDMAN

Date Submitted: Friday, May 18, 2012, 12:23 p.m.
City, State: McDonough, GA
Occupation: Independent Contractor
Comment: It is time for **Real Reform:**

- We need incentives to preserve and increase regional healthy food production;
- Fund education and provide financial support to generate growth and employment in the healthy food retail sector that enables store owners to stock stores with better choices;
- Also funding for pilot programs that bring together community groups, schools, non-profits and health care providers that focus on reducing childhood obesity and hospitalization related to diabetes.

This is one of America's biggest environmental issues and this now upside down food system needs reformation. Help our farmers improve the environmental condition of their farms so they can sustain our future.

COMMENT OF MARILYN REDWINE

Date Submitted: Friday, May 18, 2012, 3:16 p.m.

City, State: Portland, OR

Occupation: Retired

Comment: Agribusiness is big business and needs no more assistance from the American public. The American public needs assistance to purchase their food. This is a disgrace.

COMMENT OF NANCY REECK

Date Submitted: Friday, May 18, 2012, 12:30 p.m.

City, State: St. Paul, MN

Occupation: Farmer's Daughter

Comment: The majority of my concerns with taxpayer funded programs like the farm bill is that so much of the public money is given to giant corporations instead of benefiting individuals on the ground. Crop insurance companies should not benefit from taxpayer subsidies while at the same time influencing laws that protect them from paying settlements. Likewise energy/utilities conglomerates ought to pay for their investments instead of getting tax credits and tax windfalls that zap public revenue. In short, consider serving the actual farmers and don't give money to multinational corporations.

COMMENT OF ANITA REED

Date Submitted: Friday, May 18, 2012, 11:52 a.m.

City, State: Clear Lake Shores, TX

Occupation: Business Owner

Comment: We must change the direction of food and health now. I eat primarily organic food because of my great distrust of corporate products in our food supply.

COMMENT OF GEOFFREY REED

Date Submitted: Friday, May 18, 2012, 12:08 p.m.

City, State: Bridgeport, CT

Occupation: Electronic Tech

Comment: The health and Welfare of the United States,(and the world) rely on a healthy small farms, and family farming sector in the United States and an end to the abuses of Huge Agribusinesses (especially multinationals that insist on developing unsafe GMOs and controlling world markets!

COMMENT OF JANE REED

Date Submitted: Friday, May 18, 2012, 6:03 p.m.

City, State: Hotchkiss, CO

Producer/Non-producer: Producer

Type: Livestock

Size: 1,000+ acres

Comment: The health of the people should be put before that of corporations, which were originally formed to protect the people. Have you ever seen anyone up close die of cancer? I have, from benzene poisoning due to fracking polluting the person's drinking water. We need environmental regulations big time. Genetic engineering has no long term studies, therefore should at least be labeled so we have a choice of whether to eat something we know nothing about or not. Please at least label, if not get rid of it.

COMMENT OF LOIS REED

Date Submitted: Tuesday, May 08, 2012, 8:17 a.m.

City, State: Haskell, OK

Occupation: Retired—Full-Time Volunteer with Ezra House

Comment: I grew up on a farm in eastern OK. We had cattle, hogs, a broiler house, strawberries, a hay crop, *etc.* I know the hard work and dedication it takes to grow food for America. I also worked in a grocery store for 15 years and wit-

nessed firsthand families struggling to budget their food dollars. The elderly broke my heart. Some would pick up food and look at it and then put it back over and over. As a Christian I did everything I could to help them make wise choices pointing out sales and helping mothers with recipes for inexpensive cuts of meat. I also saw the waste that every grocery store produces. This inspired my husband and I to open More than Bread pantry in Haskell, OK. We serve approximately 150 needy families each month in our area. Without the USDA commodities we would not be able to continue with our mission to make sure everyone has food in our area. We have seen the need double and the available food decrease. Please help however you can to continue providing support for farmers and for the USDA food program. These food items are just filling basic needs of real Americans. We have been an agency with the Food Bank of Eastern Oklahoma for 20 years and have never seen as much need as we have now. With your help pantries all over eastern OK will have something to give those who ask for our help. God Bless.

COMMENT OF REBECCA REED

Date Submitted: Saturday, May 19, 2012, 7:02 p.m.
City, State: Wellesley, MA
Occupation: Nurse Practitioner
Comment: I am a family nurse practitioner who sees the consequences of poor nutritional practices daily. We need to support organic and sustainable farmers, and **Not** support industrial agriculture as usual with the farm bill.
 Thank you.

COMMENT OF ROBIN REED

Date Submitted: Friday, May 18, 2012, 7:18 a.m.
City, State: Irvine, KY
Producer/Non-producer: Producer
Type: Bioenergy, Field Crops, Specialty Crops, Vegetables, Other
Size: 50–150 acres
Comment: I have been selected for a grant to build a greenhouse this year to extend the growing season in KY and will build it when the time allows this season. What I really need is an upgrade to the internet or high speed broadband in my area. BELK and Altius are supposedly bringing high speed to my area but I have not seen any improvements or notifications lately. High speed Internet is necessary for my farming business and multi-farm CSA to succeed in this day of information. And I would surely like to see it for myself and other farmers in my area. I have always been on dial up (it is affordable) and at 24 KB/second download speed it is not possible to access some sites for my farming operation in real time. Informational video and streaming clips are impossible to access.
 Thank you for your time.
 ROBIN REED.

COMMENT OF MICHELLE REERS

Date Submitted: Friday, May 18, 2012, 9:51 p.m.
City, State: Tigard, OR
Occupation: Student—Botany/Horticulture
Comment: I share the concerns of many of the people of this nation. Our concerns are over the safety of our food. They are around how the land is managed and the continued availability of fresh healthy food being available to everyone.
 As representatives of our nation I ask you to support safe sustainable farming. Please do not allow pressures from large corporations who have only profit in mind to make choices that are vital to the health of every person in our nation.
 Your decision will have long lasting consequences. Consequences that eventually will affect us all, you, me, and our neighbors.
 Please support farmers; please support the people of this nation.
 Thank you.

COMMENT OF REBECCA REHORN

Date Submitted: Friday, May 18, 2012, 4:59 p.m.
City, State: Port Jervis, NY
Occupation: Health Practitioner
Comment: The people of this nation want **Real** food with **Real** nutrients (organic) and we want farmers to be able to make a fair living wage for growing it!

COMMENT OF CHRISTINE REICHERT

Date Submitted: Saturday, May 19, 2012, 5:32 p.m.

City, State: Milwaukee, WI

Occupation: Wellness Coach

Comment: Absolute protections of conservation measures and organic farming must happen. Which means subsidies to large scale chemical agriculture, commodities distribution to schools, food pantries, *etc.* must stop. National security depends on clean water, air, soil and real food. CSA family farms are the way to go! Aldo Leopolds' land ethic must be internalized and taught to everyone!

COMMENT OF DEBRA REID

Date Submitted: Friday, May 18, 2012, 11:24 p.m.

City, State: San Diego, CA

Occupation: Social Work

Comment: Stop farm subsidies; protect small farmers; protect the environment by banning harmful pesticides, only using ones that have been thoroughly tested; support organic farming; eliminate genetically engineered foods.

COMMENT OF AUDREY REIDA

Date Submitted: Wednesday, May 09, 2012, 7:35 p.m.

City, State: Arivaca, AZ

Occupation: Teacher

Comment: Working with children in a Title I school allows me to see first-hand how hunger is managed by low-income families and much of our school community depends on the local food bank. These are good programs helping good people. They should not be cut.

COMMENT OF THOMAS REIDY

Date Submitted: Friday, May 18, 2012, 5:19 p.m.

City, State: Seattle, WA

Occupation: Disabled

Comment: With the world hunger crisis and overpopulation out of control, isn't it time we started paying more attention to the distant future, the fertile lands at our disposal, and management of the longevity of these processes?

COMMENT OF CHERYL REIFF

Date Submitted: Friday, May 18, 2012, 2:40 p.m.

City, State: Jamul, CA

Producer/Non-producer: Producer

Type: Poultry/poultry products

Size: Less than 50 acres

Comment: Protect the people, not corporate greed. It's your job. People elected you. If you keep destroying us in favor of your pockets there won't be any economy. Subsidies to oil and other mega wealthy corporations are the ones that need to be cut. It is nothing short of evil to cut things that protect our health while subsidizing things that hurt or health.

COMMENT OF JEANNE REILAND

Date Submitted: Friday, May 18, 2012, 12:54 p.m.

City, State: Eden Prairie, MN

Occupation: Sales

Comment: I had the privilege of growing up on a small family farm. My father followed best practices of rotating his crops, leaving one or two fields to rest, using composting and other natural resources to give back to the fields. We grew up with fresh eggs, grass fed beef, pastured pork, fresh vegetables and fruits in season—exactly what we want people to eat now. My father was an honest man and at that time in his life would talk about larger farmers taking monies that weren't due them, because it is there when you need it.

Our government needs to support the small farmer, the farmer that is nurturing the soil, protecting the environment, and growing food that will improve the health of our residents, not fill them with chemicals. And, we need to stop wasting money on subsidies for those who do not need nor deserve that money. Please, pass this farm bill, and do not take away food stamps for the needy.

COMMENT OF NICK REILINGH

Date Submitted: Friday, May 18, 2012, 5:11 p.m.

City, State: Kingston, NY

Occupation: Box Office Manager

Comment: As a concerned citizen with interest in promoting healthy and sustainable agricultural practices, I fully endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286), The Conservation Stewardship Program, The Beginning Farmer and Rancher Opportunity Act (H.R. 3236), and the EQIP Organic Initiative.

The last few farm bills, I believe, have been detrimental to the health and prosperity of our country. By subsidizing corn and other industrial crops, we are helping to support gigantic industrial farms and chemical corporations who litigate against the small family farms our farm bill should be supporting.

There's more. The immense corn surplus drives down the cost of high fructose corn syrup which makes sweeteners **Much** less expensive than natural cane sugar. The surplus of sugars in our food supply contributes to the obesity epidemic. Many other unhealthy surpluses exist similarly. When comparing our food supply with those of more healthy countries overseas, surpluses of unhealthy food is a key differentiating factor.

COMMENT OF DONNA SEGRETI REILLY

Date Submitted: Friday, May 18, 2012, 12:53 p.m.

City, State: Winthrop, MA

Occupation: Retired Social Worker

Comment: I'm sick about worrying about GMO's and processed foods. In Europe they keep the GMO's out of the country. There is far less cancer, obesity, diabetes. Big Agriculture is **Killing** us with their Round Up and all the other things they put in our soil.

DONNA SEGRETI REILLY,
Winthrop, MA.

COMMENT OF ERICA REILLY

Date Submitted: Friday, May 18, 2012, 12:53 p.m.

City, State: Medfield, MA

Occupation: Mother

Comment: Please keep our food safe for our families. Keep chemicals and genetic modification away from our food. It is imperative for our families well-being!

COMMENT OF JOANNE REILLY

Date Submitted: Saturday, May 19, 2012, 2:44 p.m.

City, State: New Smyrna Beach, FL

Occupation: Teacher

Comment: There is a great need for this country to return to smaller farms run by families using healthy practices to insure that the products grown have the necessary natural nutrients needed to sustain healthy populations and to use practices that do not destroy the environment and all the natural species that are required for a healthy ecosystem. Using organic methods of farming would reduce the costs of chemical fertilizers & insecticides as well as herbicides. Long term use of chemicals have a negative impact on the environment and on the humans in contact with them. The health benefits of eating organically grown produce is of great importance. Thank you for hearing my suggestions. Now make it happen.

COMMENT OF JACKIE REIS

Date Submitted: Tuesday, April 24, 2012, 10:57 a.m.

City, State: White Bear Lake, MN

Occupation: Philanthropy Consultant

Comment: We **Must** have a strong nutrition title in the farm bill—**Please** protect the SNAP and TEFAP programs! Our local food shelf and people in our community rely on these programs!

COMMENT OF MATTHEW REIS

Date Submitted: Thursday, April 19, 2012, 3:11 p.m.

City, State: Los Angeles, CA

Occupation: Office Manager

Comment: The benefits of Organic farming, including better human health, better planet health, and better economic health, far outweigh the need to support industrial farming. I want my tax dollars going toward clean, sustainable, Organic agriculture.

COMMENT OF SHIRLEY REISCHMAN

Date Submitted: Friday, May 18, 2012, 5:35 p.m.

City, State: Cincinnati, OH

Occupation: Homeopath

Comment: It's time the government put the health and freedom needs ahead of those of agribusiness. The student lunch program needs a drastic overall so our children grow up healthy, and farm subsidies need to go to the small family farms that struggle to keep going rather than the largest and wealthiest land holders. Factory farms and mono cultures are ruining our land and ruining our health. It's time for a major change.

COMMENT OF AMY REMPAS

Date Submitted: Friday, May 18, 2012, 11:56 a.m.

City, State: Chicago, IL

Occupation: Office Manager

Comment: You are what you eat. Would you rather be a product of an assembly line manipulated by machinery or would you rather be from the Earth as nature intended. Genetically modified = mutant. What happened to all of the bees? How's that genetically modified corn and soybeans working out for humans? When does greed take a back seat to doing what is right in this country? All the money in the world can't save your ass from dying a horrible death from poisonous food.

COMMENT OF STEPHANIE RENEA

Date Submitted: Friday, May 18, 2012, 3:08 p.m.

City, State: Austin, TX

Occupation: Real Estate Investor

Comment: It is time for real reform that puts consumers instead of big business interest first. Our government was not formed by our forefathers to represent big business. But that is what it has turned into. You as a representative can be the change to fulfill that intention of those great beings that started our country and offered service to government. Like George Washington, Benjamin Franklin. It is your duty to change the course for future generation may never exist if big business continues to move toward the demise of freedom of simple things in life like clean air and water and food that isn't augmented to serve Monsanto and other careless organizations. Do the right thing and forget about chasing money. Otherwise Freedom will no longer be an option. This country will be owned and run by dictators. Thank you for taking your time to hear my cry and my greatest wish.

COMMENT OF ANN RENNACKER

Date Submitted: Friday, May 18, 2012, 1:58 p.m.

City, State: Ft. Bragg, CA

Occupation: Library Tech

Comment: We need more local food security, and less big agribusiness that puts local food at risk. No GMOs and fewer pesticides. More organics, and better food labeling.

COMMENT OF SHARON REPP

Date Submitted: Friday, May 18, 2012, 3:19 p.m.

City, State: Novato, CA

Occupation: Entrepreneur

Comment: It's about the health of our nation. Period.

Let us know! Period.

We are allowing our universe to be completely polluted. Watch the icky trickle down for your fellow man. Manipulated crops . . . poor food . . . poor health . . . sky rocketing health cost . . . *We Are Not On This Earth To Be A Science Project For Greed*. There is enough for need . . . but not enough for greed in this precious world of ours.

COMMENT OF TERRI RESPALJE

Date Submitted: Thursday, May 03, 2012, 4:33 p.m.

City, State: Waupun, WI

Occupation: Food Pantry Manager

Comment: I manage a food pantry and we are indebted to the people who decided or were born into the wonderful and hard work of farming. I see the need every day as to why we need to support and keep programs up and running that help feed those who are struggling, many will fall by the wayside if pressed between food or rent, the goal is to keep people from having to make this choice. The ones who come to food pantries are not evil monsters looking for any excuse to abuse the system they are people in a time of confusion and sadness that need more encouragement and help than ever.

COMMENT OF LINDA REX

Date Submitted: Friday, May 18, 2012, 11:41 a.m.

City, State: Boynton Beach, MI

Occupation: Retired

Comment: You must stop giving my money to the filthy industrial, so called, food companies. They are giving us food with zero nutrition, covered in chemicals and processed to death. You are killing us and must be stopped. We want to help organic, clean, healthy farms. Only. Stop taking money from the industrial farms for your campaigns and do the right thing for once.

COMMENT OF DAVID REYHER

Date Submitted: Friday, May 18, 2012, 12:03 p.m.

City, State: Delavan, WI

Occupation: Retail Sales and Support

Comment: We need support for small organic farmers, not the massive farms using biotech seeds and chemicals. These large biotech farms are destroying our land with chemicals and our crops are being contaminated with genetically engineered seed. This is not sustainable farming.

COMMENT OF PILAR REYNALDO

Date Submitted: Friday, May 18, 2012, 11:20 a.m.

City, State: Los Angeles, CA

Occupation: Decorator

Comment: I feel strongly we must support our organic farmers, food is the main component to our health. Too much money is spend on items which are labeled food but are really just fillers, they are contributing to the decline to this countries health.

COMMENT OF GARY REYNOLDS

Date Submitted: Sunday, April 29, 2012, 8:56 a.m.

City, State: Edmond, WV

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: Big Ag does not need taxpayer support. Small farms give people a way to purchase locally grown and healthier food. In food "deserts"—Detroit being the biggest example—for many consumers, local produce is the **Only** choice, as the big-box food retailers are pulling out. This means that it's either locally-grown, or what's available in liquor & convenience stores. When will you people decide that the people's welfare is paramount, that the small farm provides a vital service? And stop throwing money where it is not needed? By all appearances, Big Ag has Congress in its back pocket. Your institution is creating a nation of cynics. Please, do the right thing, stop acting like hostages to those that can afford to throw the most money at you, and support locally grown food and the family farms that provide it. Thank you.

COMMENT OF LISA REYNOLDS

Date Submitted: Friday, May 18, 2012, 2:02 p.m.

City, State: Pahoa, HI

Occupation: EMT

Comment: We're long overdue to returning to the kind of food my grandparents and their parents used to eat. Real food. The kind of food that actually nourishes the body and maintains health, and is the best preventative against sickness and disease. Lets go organic **Now**.

COMMENT OF PETER REYNOLDS

Date Submitted: Friday, May 18, 2012, 12:22 p.m.

City, State: Durham, NC

Occupation: Scientist

Comment: Subsidies are no longer necessary, especially for crops like corn and soy. The original motivation is gone, and now all they do is support already thriving areas of agriculture, that are in fact over-represented in production over areas that are more important for the economy and consumer's health.

COMMENT OF ABAGAIL RHEA

Date Submitted: Saturday, May 19, 2012, 5:12 p.m.

City, State: Mt. Carmel, TN

Occupation: Grocery Store Worker

Comment: Please reform the farm bill to **include** organic growing methods and protection for organic farmers. In the future I hope to have my own organic farm, but the big corporations that continually get their way don't want that happening—it's pretty obvious they only care about money and **Not** the health and safety of the plants and creatures under their "care".

COMMENT OF JENNIFER RHOADS

Date Submitted: Thursday, May 10, 2012, 1:32 p.m.

City, State: Chicago, IL

Occupation: Office Administrator

Comment: Older Americans' struggles with hunger are often invisible. It's too easy for most people to overlook how many seniors have serious trouble accessing the food and nutrition they need to survive and thrive. Often, they are forced to make difficult decisions between food, medicine, or paying their utilities or rent.

We simply cannot allow one of our most vulnerable populations to suffer in silence any longer! Therefore, I urge you to pass a strong farm bill that protects programs like SNAP, TEFAP, and CSFP, which help provide food for millions of America's most vulnerable seniors.

COMMENT OF KEVIN RHOADS

Date Submitted: Friday, May 18, 2012, 12:22 p.m.

City, State: Lyme, NH

Occupation: Engineer

Comment: Factory farming is killing us. Poor nutritional value, antibiotic resistant germ breeding, toxic waste concentrations—**Why Are We Subsidizing This Crazyness.** I grew up in a farming area. With a real County Fair, chickens, pigs, corn, & more—where is the encouragement of that? Nowhere in your last few bills—enough with the Tyson, Archer Daniels Midland, Monsanto farm bills—we don't want that cruff.

Support real farming, especially organic farming, and leave the toxic crap in the laboratories where it belongs.

COMMENT OF HARRY RHODES

Date Submitted: Tuesday, March 20, 2012, 11:45 a.m.

City, State: Chicago, IL

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Growing Home operates 3 USDA certified organic urban farms on the south side of Chicago (1.5 acres total), and 1 certified organic farm in Marseilles, IL (10 acres).

We use these farms as a vehicle for job training, employment and community and economic development. Local and regional food systems help create jobs and spur economic growth in rural and urban communities. Please support investment in this growing sector by including the Local Farms, Food, and Jobs Act in the next farm bill.

While we have found some USDA programs that support our work, most focus on rural development, and thus exclude urban farming. This is a growing field, one that creates job opportunities in an urban setting, and makes more good, fresh produce available in food deserts. I urge the USDA to create new programs that support urban agriculture.

The future of family farming and ranching in America depends upon ensuring that would-be new farmers have access to land, capital, and markets. Please support beginning farmers and ranchers by including Beginning Farmer and Rancher Opportunity Act in the next farm bill.

COMMENT OF DALIA RHULE

Date Submitted: Friday, May 18, 2012, 11:20 a.m.
City, State: Long Beach, CA
Occupation: Program Manager
Comment: Dear Government,

Please take consideration of the people you don't give subsidies. These organic and disadvantage farmers are not out on their own while government supports slaughter houses treat animals in horrible ways. Please support something that gives lives. Don't just give our tax dollars to companies like Tyson who are sooo sooo cruel to so many animals. My prayer is that you have the power to encourage a more humane America and that you take action towards a more humane future to our children.

Take Care,

DALIA.

COMMENT OF FRANK RICCIO

Date Submitted: Friday, May 18, 2012, 1:34 p.m.
City, State: Charlottesville, VA
Occupation: Commercial Artist
Comment: Legislation should shift subsidies away from giant agribusiness, and toward the small family farm. Particular emphasis should be placed on supporting organic practices.

COMMENT OF DAVID RICE

Date Submitted: Sunday, May 20, 2012, 5:38 p.m.
City, State: Lynnwood, WA
Occupation: Natural Foods Grocery Employee
Comment: Please enact the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

As a citizen, a taxpayer and an eater I implore the Congress to put the health of the American people in front of the health of corporate profits. If taxpayer dollars are going to be spent on food, then this money should go toward making our domestic food supply as safe, profitable and local as possible. Put taxpayer money back into the hands of family farmers, young farmers and sustainable food producers. Do your research like real adults and get off our bed with the corporate lobbyists. Please do what is best for America, not simply what gets you the most kick-backs.

DAVID RICE,
 Lynnwood, WA.

COMMENT OF RONDA RICE

Date Submitted: Friday, May 18, 2012, 2:49 p.m.
City, State: Santa Cruz, CA
Occupation: Caregiver, Natural Birth Consultant, Home Gardener, Environmentalist
Comment: As long as we are dictated by ignorance and the destructive farming techniques perpetuated by corporate bottom lines, we will continue to destroy our

home Earth and our own bodies. The wisdom is not be found in the realms of corporation but in the realms of those who are truly connected with Earth intelligence. You are invited to join us.

COMMENT OF ANDRUS RICHARD

Date Submitted: Friday, May 11, 2012, 3:28 p.m.

City, State: Binghamton, NY

Occupation: College Professor

Comment: Recent farm bills have almost exclusively supported large scale agriculture and provided less than acceptable funds for conservation. American industrial ag is eroding soil at least 10 times the rate it is forming. We desperately need the government to help beginning, organic and small farmers while not subsidizing big agribusiness. Our future actually depends more on this than on energy and chemical intensive farms.

COMMENT OF LESTER RICHARD

Date Submitted: Wednesday, May 09, 2012, 3:17 p.m.

City, State: Springfield, MA

Comment: Each day we see the lines getting long and the food get less. It hard to understand why you want to keep food out of anyone mouth and you never had a problem eating. So why is it so easy for you to cut fund?

COMMENT OF VANESSA RICHARDS

Date Submitted: Friday, May 18, 2012, 1:51 p.m.

City, State: Rockland, ME

Occupation: Adult Education Instructor (Biology and Mathematics)

Comment: Please do whatever you can to undo the damage the new laws have done to small farms and producers—particularly organic. Corporate farms are destroying our precious resources, our health, **And** taking away the traditional roles farmers have played since the invention of agriculture. Quality food that will improve the health of our nation's citizens should obviously be the primary mission of the agriculture industry: **Profits Should Be The Least Important. Please**, do whatever you can to change our broken system.

COMMENT OF DEBRA RICHARDSON

Date Submitted: Saturday, May 19, 2012, 9:37 p.m.

City, State: Utica, NY

Occupation: Program Director

Comment: I find it most interesting that this Comment Form offers "Producer" and "Non Producer". There is **No Such** thing as a Non Producer. We are either Producers or Co-Producers. When I buy food, I am co-producing through my demand. I support with my dollar thus becoming co-producer . . . and I choose to co-produce good, clean, fair food.

For the last 4 years I have taken time to learn quite a bit about the farm bill. And now I spend much of my time working with the healthcare community, local government and universities sharing the importance of the farm bill. And we share a common concern: The farm bill does not fairly support the sectors of Agriculture that produce what the USDA recommends and requires of their Federal Feeding programs: a diet of 50% 'Specialty Crop' Fruits and Vegetables.

Our farm bill structure of subsidizing Commodity Crops is nutritionally irresponsible.

As a nation facing pandemics of diet related disease and the resulting healthcare costs that will break our nation faster than Wall Street, I ask that you take this into consideration from the standpoint of common sense: something not so common today.

It's time to climb out of the sandbox in Washington, vote the issue, not the party line.

Warmest Regards,

DEBRA RICHARDSON,
Mohawk Valley, New York.

COMMENT OF JOHN RICHARDSON

Date Submitted: Saturday, May 19, 2012, 11:30 p.m.

City, State: West Bloomfield, MI
Occupation: Engineer
Comment: Organic farming must be protected. Factory farming must be better examined for violations. Monsanto must be investigated and prosecuted to the full extent of the law.

COMMENT OF KEVIN RICHARDSON

Date Submitted: Friday, May 18, 2012, 11:47 a.m.
City, State: Marshfield, MA
Occupation: Managing Member, Organic Plant Magic LLC
Comment: This is critical to support the diversity of scale and types of farming. Diversification strengthens our country, food supply and health. I welcome an opportunity to discuss further.
 KEVIN,
 [Redacted].

COMMENT OF TAMARA RICHEL

Date Submitted: Friday, May 18, 2012, 5:21 p.m.
City, State: Rangeley, ME
Occupation: Self-Employed Artist
Comment: Organic farms and farming need to be subsidized so they can grow enough organic produce and meats to feed the people who want it. Right now it is too expensive and that makes it hard for everyone who wants it to be able to afford it.

COMMENTS OF SUSAN RICHISON

Date Submitted: Friday, May 11, 2012 4:04 p.m.
City, State: Point, TX
Occupation: Landscaper/Greenhouse Worker
Comment: The new farm bill needs to have funding for:

1. Beginning Farmer Programs (who is going to feed my grandchildren?)
2. Conservation Programs
3. Keep the SNAP program and don't cut the budget for Defense Spending.
4. Cut monies to **Big** Agriculture Businesses.
5. **No** GMO's. Good Healthy Food.
6. Support and give funding to Organic Farmers.
7. Support and give funding to **Sustainable Agriculture Practices**.
8. Put agriculture back in the hands of non-gmo farmers.
9. End Monsanto and others reign in American Agriculture.
10. Label GMO's that are already being used in our food supply at this time.

Date Submitted: Friday, May 18, 2012, 12:18 p.m.
Comment: We need all provisions set forth in H.R. 3286 and H.R. 3236. We need all funding for EQIP.

Why would you even think about cutting in ½ monies for the beginning farmer programs? I do not want to have all my food in the future coming from foreign lands. And the \$33 billion you are cutting from the (SNAP) food stamp program is unbelievable even for you people. The number one thing all of us here on Earth has to have daily is food and water. And to cut low income, disabled, out-of-work **Americans** out of food is very cruel. Do something smart like cutting farm subsidies.

Date Submitted: Friday, May 18, 2012 12:34 p.m.
Comment: As is stated above, I live in Point (Rains County) Texas. For all of those that do not know—this is the birthplace of the National Farmers Union. All states are represented here at the monument. By taking away our Beginning Farmers funding and others topics on the chopping block, how many of those states will be represented in the future? Farmers have to have a safety net that works for them. They need insurance and price regulations that help them. We need local foods, Farms and the Job Act (H.R. 3286). We need monies going towards healthy foods—no GMO's. No large corporations—like Monsanto and others. We (the people you represent) need fresh, healthy foods—meaning **Organic**.

COMMENT OF SHEA RICHLAND

Date Submitted: Friday, May 18, 2012, 5:57 p.m.

City, State: Prescott, AZ

Occupation: Retired

Comment: I am concerned that the health of American citizens, American soil, American farms and all life that supports American's healthy nutrition is in grave jeopardy and that current practices are not only not sustainable, but ineffective and dangerous. We need to move to non-monoculture, organic, non-GMO farm practices immediately if we are going to see an improvement in our citizen's health and if we are going to protect our future food supply.

COMMENT OF EILEEN RICHMOND

Date Submitted: Friday, May 18, 2012, 9:19 p.m.

City, State: Medford, MA

Occupation: Retail Sales Clerk

Comment: The health of the citizens of the USA is highly dependent on quality food production. You're probably already aware that certain farming practices have undermined the safety of our food as well as water supply. Please express concern during the Committee's farm bill field hearing. Please work to insure that this generation and future generations have access to healthy foods. Thank You!

COMMENT OF SALLY RIDDELL

Date Submitted: Thursday, May 17, 2012, 9:09 p.m.

City, State: Glastonbury, CT

Occupation: Nurse

Comment: I have served as a volunteer for the Foodshare mobile food distribution truck over the past 3 years. The truck brings fresh produce to families, adults, seniors in need in the surrounding Glastonbury community. We started with 36 clients and are now seeing over 100 every 2 weeks. There are new faces each time, all in need of food. Most of these folks receive SNAP support as well. Those I have talked to are newly unemployed, single mothers or seniors trying to feed themselves and their families. They depend on these programs to supplement whatever salary they have. I urge you NOT to cut funding for these programs.

SALLY RIDDELL.

COMMENT OF ANDREA RIDGARD

Date Submitted: Wednesday, May 16, 2012, 1:32 p.m.

City, State: Ann Arbor, MI

Occupation: Nonprofit Farm Business Incubator Manager

Comment: Dear Members of Congress,

I agree that America needs a farm bill that makes healthy food widely available to all Americans—including, and perhaps especially, schoolchildren! We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers. These children are our future. Instilling in them ideas and beliefs about healthy food is not enough, they must experience its goodness and find it personally enjoyable in order to form long lasting healthy decisions about what they put into their bodies to remain healthy and become strong and effective leaders for our country's future and for their personal future as leaders of their own families and communities.

Likewise, America needs a farm bill that invests in the next generation of farmers and ranchers—guarantee \$25 million per year in mandatory funding for the Beginning Farmer and Rancher Development Program. We need a national strategy and commitment to support beginning farmer and ranchers entering agriculture. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new agriculture start-ups. The biggest hurdle or barrier to entry for new farm business owners is land and infrastructure. A bill that supports emerging localized farm businesses will provide more ways for new farmers to become successful and feed their communities. It will promote farm business development, education, and provide access to need resources such as land, hoop houses, electricity, storage, and large tools and equipment as well.

These new farmers are creative entrepreneurs! America needs a farm bill that drives innovation for tomorrow's farmers and food entrepreneurs—fund the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture. A farm bill like this will show farmers that we value their work, and

value our own lives by investing in the food we grow, consume and feed to our loved one.

In great appreciation of your work and commitment to growing a healthy nation,
ANDREA RIDGARD.

COMMENT OF LOUISE RIERSEN

Date Submitted: Friday, May 18, 2012, 1:36 p.m.

City, State: Anacortes, WA

Occupation: Cashier for Food Co-Op

Comment: We need a fair and healthy organic farm bill that focuses on the best agricultural practices for the health of its citizens, as well as, protecting the land and the livelihood of farms and farm workers. We need reform. Please pass an Organic Farm Bill.

COMMENT OF DANIEL RIES

Date Submitted: Friday, May 18, 2012, 12:56 p.m.

City, State: Mason City, IA

Occupation: Public Health

Comment: Strict conservation practices must be at the heart of any farm bill. Not only is it important from an environmental and public health standpoint, it makes sense financially considering the cost of cleaning up as a result of bad conservation practices. What has it cost the Mississippi Delta area? What does it cost water supplies to clean-up contaminated waters? How does it affect the recreation and tourism industry? Please vote for strong conservation protections in the upcoming farm bill. Thank you!

COMMENT OF SHELLEY RIES

Date Submitted: Friday, May 18, 2012, 6:13 p.m.

City, State: Corvallis, OR

Occupation: Registered Nurse

Comment: We need to support independent farmers and producers. Our soil is depleted, our oceans are toxic waste zones from ag run-off. We need to get Americans eating healthy food, not cram produced meats and corn-fed corn. Stop polluting our waters and air, and wasting resources. We can do far more to improve life on this planet with an organic based farm culture, so please stop the waste and ruin today.

COMMENT OF MARIE RIETMANN

Date Submitted: Wednesday, May 02, 2012, 6:13 p.m.

City, State: Condon, OR

Producer/Non-producer: Producer

Type: Field Crops

Size: 1,000+ acres

Comment: I believe the conservation compact between farmers and taxpayers should be maintained. All income support programs should be brought under its umbrella, including eligibility for crop and revenue insurance premium subsidies. Richard Riger Wednesday, May 09, 2012 2:50 p.m. Albuquerque NM Retired We need to end *2All* farm subsidies to Agribusinesses. All ethanol subsidies need to end also. We are unbalancing supply and demand markets with these and the result is killing small farms that **Care** for the Land, not *2Rape* it.

COMMENT OF PATRICIA RIGGINS

Comment: Please make it your priority to maintain critical nutrition programs. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system. Help provide for our future!

COMMENT OF DAVID RILEY

Date Submitted: Friday, May 18, 2012, 12:19 p.m.

City, State: Bronson, FL

Occupation: Registered Nurse

Comment: Please do not allow corporations such as Monsanto to monopolize and corrupt our food supplies, and at the very least if they win their battle to do so, make them label these products so those of us who find their foods a threat to the health of our children can avoid eating them.

The most logical decision our government can make should protect our citizens and local farmers above corporate greed and profit.

COMMENT OF DIANE RILEY

Date Submitted: Friday, May 11, 2012, 3:33 p.m.

City, State: Hillside, NJ

Occupation: Director of Advocacy, Community FoodBank of New Jersey

Comment:

House Committee on Agriculture,
Washington, D.C.

Dear Chairman Lucas, Ranking Member Peterson, and members of the Committee:

Thank you for the opportunity to provide input on the upcoming farm bill reauthorization. Given the increasing need for food assistance in our state and the declining supply of Federal commodity support, I strongly urge you protect and strengthen nutrition programs in the 2012 Farm Bill.

At the Community FoodBank of New Jersey, we see every day how important Federal nutrition programs are in our community and how effectively they are working to ensure that struggling New Jerseyans can provide enough food for their families. Currently, the Community FoodBank of New Jersey serves 830,000 people annually.

Nationally, the Feeding America network of more than 200 food banks has seen a 46 percent increase in food bank clients from 2006 to 2010, and we are struggling to keep up with increased demand. Without strong farm bill nutrition programs like The Emergency Food Assistance Program (TEFAP), the Supplemental Nutrition Assistance Program (SNAP), and the Commodity Supplemental Food Program (CFSP), food banks across the country would be struggling even more to meet the increased need.

We recognize the challenge you face drafting a farm bill in a time of deficit reduction, but we are also sensitive to the tremendous, ongoing need in our state. As such, we have two key priorities for the farm bill.

First, we urge you to strengthen TEFAP to help us keep up with increased demand. TEFAP supplies about 25 percent of the food moving through Feeding America's national network of food banks and at times during the last few years TEFAP has provided the food banks throughout the State of New Jersey between 35%—55% of the food we are able to distribute. But because of strong commodity prices, TEFAP food declined 30 percent last year, and our food bank is struggling to make up the difference. We urge you to make TEFAP more responsive during times of high need by tying increases in mandatory funding to a trigger based on unemployment levels. We also propose to enhance the Secretary of Agriculture's authority to make TEFAP bonus purchases at times when the need for emergency food assistance is high—for example high unemployment—in addition to times of weak agriculture markets so that the program can respond to both excess supply and excess demand.

Second, we also strongly urge you to protect SNAP from harmful funding cuts or policy proposals that would restrict eligibility or reduce benefits. SNAP has responded effectively to growing need in the recession with benefits that are timely, targeted, and temporary. The average SNAP household has an income of only 57 percent of the Federal poverty guideline, and 84 percent of benefits go to households with a child, senior, or disabled person. The program is working to support vulnerable New Jersey families, and our food bank or local agency partners would not be able to meet the increased need for food assistance if SNAP were cut.

These programs have a real impact on your constituents, many of whom must rely on the food bank and Federal nutrition programs to meet their basic food needs. I would encourage you to visit the food banks serving your district before the Committee marks up a farm bill so you can meet our clients and see firsthand how Federal nutrition programs are working to protect vulnerable Americans from hunger.

The Community FoodBank of New Jersey believes that feeding our neighbors is a shared responsibility, and food banks like ours rely on a variety of food streams to support our communities, including generous support from partners in retail, manufacturing, and agriculture. However, the Federal government is an equally

critical partner through programs like TEFAP, SNAP, and CSFP, and with tremendous, ongoing need in our state, ongoing Federal support is more important than ever.

As the House Agriculture Committee moves forward with farm bill reauthorization, our food bank urges you to protect the nutrition safety net and offers the specific recommendations below.

Sincerely,

DIANE RILEY,
Director of Advocacy.

Feeding America Farm Bill Priorities

The Emergency Food Assistance Program (TEFAP): TEFAP is a means-tested Federal program that provides food commodities at no cost to Americans in need of short-term hunger relief through organizations like food banks, pantries, soup kitchens, and emergency shelters. Nutritious food commodities provided through TEFAP are an essential resource for Feeding America food banks. As the demand for food remains high at food banks across the country, a continuous stream of TEFAP is necessary for the provision of a steady emergency food supply.

- TEFAP commodities account for approximately 25% of the food moving through Feeding America food banks. Food banks combine TEFAP with private donations to maximize TEFAP benefits far beyond the budgeted amount for the program. In this way, food banks exemplify an optimum model of public-private partnership.
- TEFAP has a strong impact on the farm economy. According to USDA's Economic Research Service, producers of commodities provided as bonus TEFAP (those purchased by USDA to intervene in weak agricultural markets) receive an estimated 85¢ per dollar of Federal expenditure. Producers of other commodities provided through TEFAP receive about 27¢ per dollar. By contrast, only about 16¢ of every retail food dollar goes back to the farmer.
- Declines in Section 32 funding and strong agriculture markets resulted in a 30% decline in TEFAP purchases during FY2011. This decline is expected to continue in FY2012 as food banks continue struggling to meet increased need. The shortfall between supply and demand will only worsen when the SNAP ARRA benefit boost expires, as many participants turn to food banks to make up for the reduction in benefit levels.

Farm Bill Priorities for TEFAP:

- Make mandatory funding for TEFAP food more responsive to changes in need by providing a trigger that ties funding to unemployment levels
- Enhance Secretary of Agriculture's authority to purchase bonus commodities in times of high need for emergency food relief in addition to times of low commodity prices so the program is responsive both to excess supply and excess demand
- Reauthorize funding for TEFAP Storage and Distribution Funds at \$100 million per year
- Reauthorize funding for TEFAP Infrastructure Grants at \$15 million per year

Supplemental Nutrition Assistance Program (SNAP): SNAP is the cornerstone of the nutrition safety net, providing over 46 million low-income participants with monthly benefits via a grocery debit card. Eligibility is based on household income and assets and is subject to work and citizenship requirements. SNAP is one of the most responsive safety net programs, expanding quickly to meet rising need during the recession. The program is targeted at our most vulnerable; 76% of SNAP households contain a child, senior, or disabled member, and 84% of all benefits go to these households.

- As the number of people unemployed grew 110% from 2007 to 2010, SNAP responded with a 53% increase in participation over the same period. As the economy slowly recovers and unemployment begins to fall, SNAP participation and costs too can be expected to decline.
- The SNAP accuracy rate of 96.19% (FY10) is an all-time program high. SNAP error rates declined by 61% from FY 1999 to FY 2010, from 9.86% to a record low of 3.81%.
- SNAP benefits supplement a household's food budget but are insufficient to last most participants through the month, causing many participants to rely regularly on food banks. Among Feeding America food pantry clients receiving SNAP benefits, over ½ (58%) reported having visited a food pantry at least 6 months or more during the prior year.

- The average SNAP household has a gross monthly income of \$731 and countable resources of \$333, consists of 2.2 persons, and participates in the program for 9 months. The average household receives a monthly benefit of \$287, or about \$1.49 per person per meal.

Farm Bill Priorities for SNAP:

- Protect SNAP by opposing proposals to cap or reduce funding, restrict eligibility, reduce benefits, or otherwise impede access or benefit adequacy. Recent proposals to block grant the program would prevent it from responding effectively to fluctuations in need, and efforts to limit broad based categorical eligibility would increase administrative costs and access barriers.
- Restore the cut to the SNAP ARRA benefit boost used to pay for the 2010 child nutrition bill and phase out the boost in a way that protects families from a cliff in benefit levels.
- Encourage better nutrition by maintaining nutrition education, incentivizing the purchase of healthy foods, and ensuring that retailer standards balance adequate access to stores with access to a range of healthy foods and moderate prices.
- Build on SNAP's strong record of integrity and payment accuracy by issuing guidance to states on the eligibility of lottery winners and college students and upgrading resources and technology for trafficking prevention.

Commodity Supplemental Food Program (CSFP): CSFP leverages government buying power to provide nutritious food packages to approximately 599,000 low income people each month. Nearly 97 percent of program participants are seniors with incomes of less than 130% of the poverty line (approximately \$14,000 for a senior living alone). Currently, 39 states and the District of Columbia participate in CSFP. Another 6 states (CT, HI, ID, MD, MA, & RI) have USDA-approved plans, but have not yet received appropriations to begin service.

- CSFP is an efficient and effective program. While the cost to USDA to purchase commodities for this package of food is about \$20 per month, the average retail value of the foods in the package is \$50.
- CSFP helps to combat the poor health conditions often found in seniors who are experiencing food insecurity and at risk of hunger. CSFP food packages, specifically designed to supplement nutrients typically lacking in participants' diets like protein, iron, and zinc, can play an important role in addressing the nutrition needs of low-income seniors.
- Many seniors participating in CSFP are able to have their food boxes delivered directly to their homes or to seniors' centers nearby, an important benefit for those who are homebound, have limited mobility or do not have convenient access to a grocery store.

Farm Bill Priorities for CSFP:

- Transition CSFP to a seniors-only program by phasing out eligibility of women, infants, and children while grandfathering in current participants.

COMMENT OF MICHELLE RILEY

Date Submitted: Monday, May 07, 2012, 3:15 p.m.

City, State: Dayton, OH

Occupation: Chief Executive Officer, The Foodbank, Dayton

Comment: On behalf of The Foodbank Dayton, Inc., the 87 nonprofits we serve and hungry citizens, we ask the House Agriculture Committee to protect hunger relief programs. The Foodbank does not consider politics, conservative or liberal, when addressing the very real issue of hunger. According to the Census Bureau, 17.8% of Montgomery Co. and 14.4% of Greene Co. residents have incomes below the poverty line. For a family of four, with two children under the age of 18, the annual household income is less than \$21,970 at the poverty line. These individuals qualify for food assistance. For those served by our member agencies—pantries, prepared meal sites and shelters—hunger is a stark and painful reality. We ask that you preserve the current funding levels so we can continue to do this vital work.

MICHELLE RILEY,

CEO,

The Foodbank Dayton, Inc.

COMMENT OF RUSSELL RILEY

Date Submitted: Friday, May 18, 2012, 10:46 p.m.

City, State: Pensacola, FL

Occupation: Retired Military—U.S. Army

Comment: Lets go back to the time when American farms were great; they used natural fertilizers not this junk/poison from Monsanto or Dow Chemicals. The fed Americans and Americans should be fed first, forget all “good aid” to developing countries. Stop buying from NAFTA, used American food products first, then IF there is an shortage used NAFTA. American farmers are hurting and POTUS and Congress is behind this, why? Aren’t American food products good enough for you so-called “elite”. Americans are wondering why Congress and the President has turned their back on us. Please House Ag Committee, **Support** American farmers, do not cut their money or turn your backs on them!

COMMENT OF INGER K. RILEY, PYS. D.

Date Submitted: Friday, May 18, 2012, 2:30 p.m.

City, State: Acton, MA

Occupation: Clinician

Comment: Dear House Committee Members,

I am writing to urgently request you to consider full funding for the programs you have already decided are for the betterment of our nation! This means the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). Also to fully fund conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236) you already adopted is needed to help the survival of our local farms. Also I hope that you will maintain the EQIP Organic Initiative, as the more we as communities eat healthy, locally grown foods, the better your electorate will be and the cheaper it will be in the long run for the nation.

I also implore you not to cut the food stamp program, as those with the least in this country should be the first that are helped by our government. You will make already hungry children in our country starve. This can’t be what the United States of America is doing to our people. Let other committees figure out budgetary cuts, this is one of the most important places where funding needs to be maintained and supported for all that you’ve already tried to do.

Thank you for your time in considering these enormously important issue.

Sincerely,

INGER K. RILEY, PYS. D.

COMMENT OF MICHAEL RION

Date Submitted: Thursday, May 17, 2012, 7:03 p.m.

City, State: West Hartford, CT

Occupation: Retired Business Ethics Consultant

Comment: I volunteer in Hartford helping people apply for SNAP. These are good people of all ages who face hard times and SNAP is frankly the least we can do to support a basic need in the midst of our still sluggish economy. It also, by the way, helps the economy as folks spend the money locally for food. Please do **Not** cut this vital program, thank you.

COMMENT OF JULIE RIST

Date Submitted: Saturday, May 19, 2012, 7:08 p.m.

City, State: Phoenix, AZ

Occupation: Full-Time Working Artist

Comment: While it may be SOP these days to ignore the deafening preferences of the people, surely congress would be expected to heed commerce. And, clearly, there is a robust—and ever growing—market for locally grown, unadulterated, nutritious, organic foods throughout the country.

Hasn’t Big Ag taken enough? Polluted enough? Eroded enough? Poisoned us enough? Crushed enough independent farmers? Taken enough of our jobs? Skewed food prices enough? Caused enough obesity and diabetes?

It is time for real reform—not more lip service, winks and nods.

COMMENT OF STEVEN RITCHIE

Date Submitted: Friday, May 18, 2012, 2:35 p.m.

City, State: Tampa, FL

Occupation: Retired

Comment: We need an organic farm bill and need to encourage sustainable agriculture. We do not need to promote giant agribusiness. GMOs need to be labeled! Give consumers a choice! Research is showing some disturbing facts about GMOs. Beginning farmer program should be fully funded.

COMMENT OF JESSICA RITLAND

Date Submitted: Saturday, May 19, 2012, 3:24 a.m.

City, State: Albany, CA

Occupation: Research Technician

Comment: I would like to see less aide to mega-farms, and for fair livestock marketing rules to be implemented. Food should not be a business that puts profit over quality. We need healthy, whole foods to survive, not corn and high-fructose corn syrup. More healthy food in our country would help children grow and learn better. We need healthy people if this country is going to survive.

COMMENT OF CATHY RITTER

Date Submitted: Friday, May 18, 2012, 3:42 p.m.

City, State: Denver, CO

Occupation: Customer Service, Denver Botanic Gardens

Comment: I grow my own food, buy at farmer's markets, a member of a CSA and have a son who is self-sufficient by growing his own food and raising farm animals. I could not imagine not being able to feel safe with the food/produce I choose to buy/raise without the farm bill being passed. Please do what is right by your constituents and their grandchildren and great-grandchildren of tomorrow.

COMMENT OF WENDY RITTMAYER

Date Submitted: Friday, May 18, 2012, 11:34 a.m.

City, State: Pittsburgh, PA

Occupation: Massage Therapist

Comment: I want to be able to buy reasonably priced, in season, local produce including raw milk, fresh, cage free and organic eggs, raw milk and other small farm made/produced dairy products, and local, hormone and antibiotic free, grass fed beef and other meats including pork and chicken at either the farms themselves or at local farmers markets.

COMMENT OF KRISTIN RITZAU

Date Submitted: Friday, May 18, 2012, 2:32 p.m.

City, State: Monrovia, CA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: My husband and I have committed to living off of our small homestead in order to protect our health and future. We are doing this because we have given up hope in a government that believes it is for the people and by the people. Instead it would appear, at least where food and farming is concerned, that sustainability in ways that are healthy is of the least concern.

We understand there are many "issues" on the table you must contend with every day. But we are not necessarily concerned with today. We want to provide a healthy world for our great great grandkids. Progress without responsibility, accountability and research of other possible organic ways is scary.

My husband and I grow 500 lbs of produce a year on 1/5 of an acre. This country survived wars by doing the same. We need to remember what home is and bring back the soil of this rich land by using its natural resources instead of toxic chemicals.

Please congressperson, be a representative of a valley that used to be one of the richest citrus valleys in the world. Look to the heritage of this land and the legacy you want to leave. Check out what your neighbors are doing in Altadena and in the growing farmer's markets in South Pasadena and Monrovia.

Supporting small farmers put people back to work. Additionally, incentivizing suburban neighborhoods to plant local plants, vegetables, and to shop at farmer's markets greatly helps improve communities as well.

The subsidies of corn and soybean and other one crop farms are not sustainable—please turn to farmers and educators instead of money and Monsanto.

COMMENT OF CONSTANCE RIZOLI

Date Submitted: Tuesday, May 15, 2012, 9:47 a.m.

City, State: Westwood, MA

Occupation: Public Policy

Comment: Working for the state's largest anti-hunger organization, I see firsthand the daily benefits of SNAP for children, families, the elderly and so many others. Please do not cut this program. It helps people in times of their greatest need. It is flexible, helping people when they need it. It is an economic stimulus. SNAP funds are quickly put to use in the economy. Its incidence of fraud is noticeably small. SNAP keeps families out of poverty and directly impacts their health in positive ways.

COMMENT OF CAROL ROBBEN

Date Submitted: Saturday, May 19, 2012, 1:56 p.m.

City, State: Belleville, IL

Occupation: Retired

Comment: I am asking that you not cut funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture. We can't keep putting the land, soil, environment, and our health at risk. U.S. Food and agricultural policy must focus on adopting the best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture. Farmers and eaters across the U.S. benefit from a fair and healthy farm bill. I have found that it's getting harder and harder to find healthy food in the U.S. and that just doesn't make sense. We need foods that nourish our bodies, not foods that cause disease.

Thank you.

COMMENT OF BOZ ROBBINS

Type: Dairy

Size: 1,000+ acres

Comment: Please support the Bennett amendment to the dairy bill, we also need a tool to control how MPC's come into this country, we are the balancer for the world.

COMMENT OF RUTH ROBERSON

Date Submitted: Sunday, May 20, 2012, 8:06 p.m.

City, State: Sonoma, CA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: We need food that is safe. We need to know if it is genetically modified or not. Local organic farms are the answer to this problem. Subsidized agriculture to Monsanto, Cargill, *etc.* must stop. Local farms should be supported because they provide fresh food with less travel time and use less fossil fuels. We also need to improve school food. We need more fresh fruits and vegetables in school lunches. This can be provided locally in many communities. Instead of subsidizing corn, soy beans, *etc.* we can help local farmers with grants to States to support local agriculture supplying food to school districts.

RUTH ROBERSON.

COMMENT OF WILLIAM ROBERSON

Date Submitted: Friday, May 11, 2012, 4:21 p.m.

City, State: Brooklyn, NY

Occupation: Retired

Comment: My family, friends and I would like to see a farm bill that supports present and future farmers, particularly those smaller-scale farmers who grow organic, sustainably and responsibly. We are concerned about the health risks, lower nutritional content, environmental damage and susceptibility to failure from superpests of large-scale, mono-agriculture that increasingly depends on stronger pesticides and genetically modified crops. We would support tax breaks, incentives and

development restrictions to encourage keeping and expanding local farmers. We urge you to end subsidies for ethanol and high-fructose corn syrup as it uses much valuable farmland to grow crops harmful to the environment and human health.

COMMENT OF LISA ROBERT

Date Submitted: Friday, May 18, 2012, 12:10 p.m.

City, State: Coral Springs, FL

Occupation: Teacher

Comment: We need to give all families a **True** choice between healthy food and junk. The current subsidies make junk food less expensive to families. I am in favor of **No** subsidies for farmers OR subsidies for small, organic farms, only.

COMMENT OF DAWN ROBERTS

Date Submitted: Friday, May 18, 2012, 8:00 p.m.

City, State: York, SC

Occupation: Personal Trainer

Comment: As the government it is your job to watch out for the safety & health of the people. You are all failing! You are the reasons that America is unhealthy and has developed the diseases Americans are developing. Now it is time to stop what you are doing, redirect your focus, and start making decisions to help Americans to be healthy. Nutrition is 90%!

COMMENT OF DIANNE ROBERTS

Date Submitted: Friday, May 18, 2012, 8:08 p.m.

City, State: Seattle, WA

Occupation: Unemployed

Comment: I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

I support fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

I support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236,) as well as maintaining the EQIP Organic Initiative.

Getting rid of the direct payments to commodity farmers, while replacing it with the subsidized insurance program will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk.

I agree with leading sustainable agriculture advocates which are this calling rife with opportunities for fraud and abuse.

It's bad enough that Republicans in the House Agriculture Committee have already "voted to slash \$33 billion from the food stamp program while leaving farm subsidies unscathed."

COMMENT OF KATHERINE ROBERTS

Date Submitted: Thursday, May 17, 2012, 5:36 p.m.

City, State: San Francisco, CA

Occupation: Educator

Comment: Please stop subsidies to big ag that are wrecking the planet and support small local sustainable farming practices so everyone has access to a decent healthy food supply, and small farmers who are doing the right thing are able to survive. The current system is sheer madness! It's high time for a change—not just meaningless incremental changes but a real radical overhaul of the whole bloated system.

COMMENT OF MASON ROBERTS

Date Submitted: Friday, May 18, 2012, 3:35 p.m.

City, State: Walnut Creek, CA

Occupation: Workplace Occupancy Planner

Comment: Hello—please keep in mind that there are many Americans (myself included) that want the American government to support incorporating safe, organic and non GMO foods and do not support the current farm policy. We want food grown without pesticides that is safe for the dirt it is grown in as well as the wild-

life and humans that eat it. Your current farm policy is not what mainstream Americans want. Please take a good hard look at which policy's you are supporting and who is benefiting.

Thank you,
MASON ROBERTS.

COMMENT OF RACHEL ROBERTS

Date Submitted: Sunday, May 20, 2012, 1:37 p.m.

City, State: Fort Worth, TX

Occupation: City Planner

Comment: As a Conservative, I am opposed to farm subsidies, specifically subsidies to large-scale agricultural operations. I support assistance to small, local producers. As a Conservative, I prefer support for local farmers and am opposed to big government spending on Big Ag. My representative, Mr. Burgess, is supposedly a Conservative, and I would like to see him practice what he says he believes.

Further, I support the following:

- the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286);
- fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs;
- the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236); and
- maintaining the EQIP Organic Initiative.

COMMENT OF TERESA ROBERTS

Date Submitted: Saturday, March 17, 2012, 9:46 a.m.

City, State: Mansfield, MA

Occupation: Author

Comment:

(1) I support my local food bank, and I know they are struggling right now to meet the needs of my community. I ask that you pass a strong farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the millions of Americans struggling with hunger, and I urge you make them a priority in the next farm bill.

(2) I also support small-scale, localized agriculture and urge a farm bill that supports small family farms that market their products through farmers' markets, CSAs and/or direct sales. The farmers of America are aging. We need new farmers—and need to encourage young people to venture into small-scale farming!

COMMENT OF PATRICIA ROBERTSON

Date Submitted: Sunday, May 20, 2012, 1:45 p.m.

City, State: Plymouth, MI

Occupation: Retired

Comment: Congress needs to start considering the health of our nation above the special interests of those who can donate big money. The people want healthy, local food available for their families. I am appalled at some of the decisions made by our Representatives who are supposed to protect the people. It is time for a change.

COMMENTS OF VICKI ROBIN

Date Submitted: Friday, May 18, 2012, 11:05 a.m.

City, State: Langley, WA

Occupation: Writer, Speaker, Author

Comment: Strong regional food systems insure national security, local prosperity, decreased obesity and other diet related illnesses and increased community self reliance. As a member of a semi rural island with small farmers and many professionals and retirees—and as the author of an upcoming book on local food—I understand that we urgently need to make the farm bill regional food system friendly. We need to support young people and disadvantaged people in choosing to farm, and succeeding. They need the barriers removed and supports put in place: support for education, land acquisition, first 5 year support to offset differential between the highly subsidized cost of industrial food and the honest price of local food. They

need to be excluded from some of the regulations that protect the public from the toxicity of industrial farming and be unleashed from the licensing and inspection fees that make local meats, milks and cheeses expensive. They need to be free to sell milk and meat in small quantities to neighbors without risk of fines or jail. I am not asking for huge subsidies—simply small supports and freedoms that will allow local and regional producers to feed their neighbors. I am not asking for any policies that endanger the fertility of the soil, the purity of water or the integrity of forests. Indeed, small local producers embedded in strong communities are natural stewards of our shared resources. Also, while you are eloquent, I am a writer and am willing to help frame these issues with language that touches the heart and satisfies the mind.

I concur with these words from Slow Food, of which I am a member:

As the committee considers the 2012 Food and Farm Bill, I urge you to:

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;
- Provide an even “plowing” field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don’t: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

Date Submitted: Sunday, May 20, 2012, 7:22 p.m.

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I have lived on Whidbey Island in Washington for 7 years and have eaten the fresh healthy food our farmers produce—even though the price is higher than the industrial farming outlets called grocery stores. Now I am writing a book about it called, *Blessing The Hands That Feed Us* and, as a *NY Times* and *Business Week* best selling author of, *Your Money Or Your Life*, I have high hopes of my message going far and wide. One part of my message is that we need a “Marshall Plan for Young Farmers”—meaning less than 2% of our population farms, the average age of farmers is nearly 60 and our national security and food safety depends on domestic food production. Young farmers face huge obstacles—I know because I feature some in my book. They need training, land and financial support:

- training in growing regionally appropriate crops and marketing them successfully . . . and this needs to be free or low cost.
- land, either that they own or have secure tenure on for enough years to merit their dedication.
- Mechanisms to level the \$\$ playing field between industrial and local/organic food; price supports, rebates, tax credits . . . And those who choose to start small farms, sell at local markets, feed their regions fresh, affordable, accessible, organic and yummy food need to be our heroes and heroines.

So . . . As it’s estimated that 125,000 farmers will retire in the next 5 years, it’s absolutely critical that farm bill programs help citizens get started in this challenging field. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.

- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

VICKI ROBIN.

COMMENT OF RICK ROBINS

Date Submitted: Friday, May 18, 2012, 4:36 p.m.

City, State: Grass Valley, CA

Occupation: Manager

Comment: The farm bill should not subsidize large scale farming at the expense of small farmers. It should not subsidize environmentally damaging crops and practices, rather the opposite. That includes corn for ethanol. It should encourage and subsidize the reduction of pesticide use and pharmacological additives to animal feed.

COMMENT OF ALLIE ROBINSON

Date Submitted: Saturday, May 19, 2012, 2:12 p.m.

City, State: Toronto, CA

Comment: Please support natural and organic farming. We do **Not** want Genetically Modified Organisms, Radiation, Pesticides, Fungicides, Herbicides, Sewage Sludge. We want pesticide free, GMO free, radiation free food that is safe for the Earth and our families!

COMMENT OF CAROL ROBINSON

Date Submitted: Thursday, April 19, 2012, 11:54 a.m.

City, State: Pittsburgh, PA

Occupation: Business Management

Comment: Please do not put low asset limits into the SNAP program as they will further limit the usage. The nonprofit sector addressing hunger cannot possibly fill the void when many families have no other gov't. assistance. SNAP and most other food programs benefit children who suffer in school when not receiving adequate nutrition.

COMMENT OF D. ROBINSON

Date Submitted: Friday, May 18, 2012, 5:00 p.m.

City, State: Curlew, WA

Producer/Non-producer: Producer

Type: Livestock

Size: 50-150 acres

Comment: Organic farming should be a priority. Eliminate farm subsidies except for crop insurance. Eliminate the corn ethanol subsidy and its practice. Recognize that climate change will and is an emergency that needs to be addressed. I also want to stress these points as well:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you for accepting my comments.

COMMENT OF FRANCES ROBINSON

Date Submitted: Friday, May 18, 2012, 2:06 p.m.

City, State: Tacoma, WA

Occupation: Self-Employed

Comment: The Federal government has done a terrible job overseeing this country's food system. Quit supporting profits for big ag and help Americans eat healthy again by supporting small, non-CAFO farms.

COMMENT OF GAIL ROBINSON

Date Submitted: Friday, March 16, 2012, 2:01 p.m.

City, State: Fort Mill, SC

Occupation: Licensed Therapist

Comment: I support the farm bill.

We as a "civilized" society need to drop the politics and be sure **No One** in this country goes hungry, especially since we throw away enough food to make this happen.

Thank you for doing the **Right** thing.

GAIL ROBINSON.

COMMENT OF JEREMIAH ROBINSON

Date Submitted: Friday, May 11, 2012, 2:29 p.m.

City, State: Madison, WI

Occupation: Engineer

Comment: I'm e-mailing on behalf of a number of farmer and large animal veterinarian friends of mine who don't have time to e-mail themselves.

They don't receive subsidies because they don't want to use Round-Up and RBGH because it kills their soil and makes their cows sick. One in particular almost died from overexposure to Round-Up. With milk prices where they are, my friends can't compete with large CAFOs who both receive subsidies and let their soil run off into the river, or with international milk imports who are even worse.

This is also a national security and economic issue, because of Food and Mouth and Mad Cow diseases, which only ever happen on large CAFO farms. Small farms don't have this issue.

Please change the farm bill this year to remove requirements for herbicide/pesticide use and RBGH to get subsidies. We need provisions that encourage small farmers. Small farmers need a break, not big companies.

Another issue they care about is labeling. Customers want RBGH-free milk. My friends don't use RBGH, but they're not allowed to test their cows and label their products RBGH-free.

Please change the labeling rules to allow labels for farms which don't use hormones.

Thank you for your consideration.

Sincerely,

JEREMIAH ROBINSON.

COMMENT OF KATHLEEN ROBINSON

Date Submitted: Sunday, May 20, 2012, 9:48 a.m.

City, State: Smyrna, GA

Occupation: Retired

Comment: Mr. David Scott: Please support the Organic Farm Bill so GMO products, pesticides, and other chemicals are not allowed to further harm the health of American citizens through the food we eat. Thank you.

COMMENT OF LUETTA ROBINSON

Date Submitted: Sunday, May 20, 2012, 8:50 p.m.

City, State: Anchorage, AK
Occupation: Material Handler

Comment: I feel one of the biggest threats to our food is misleading labels and Monsanto. Genetically Modified Food is dangerous and we should have a right to know what we are eating. Organic Food is food grown without chemicals and should not take a small fortune to verify.

COMMENT OF LYNN ROBINSON

Date Submitted: Friday, May 18, 2012, 9:39 p.m.

City, State: Merrimack, NH

Occupation: Work in Health Insurance Industry

Comment: It really is about time that our elected officials do what is right. Americans will never get healthy if government does not change some of these policies. We need policies that will help produce high quality food not the low to no quality food currently being produced; not to mention the huge environmental impact. Things need to change!

COMMENT OF SEAN ROBINSON

Date Submitted: Sunday, May 20, 2012, 7:13 a.m.

City, State: Claremore, OK

Producer/Non-producer: Producer

Type: Dry Beans & Peas, Fruits, Greenhouse/nursery, Specialty Crops, Vegetables, Other

Size: Less than 50 acres

Comment: I am a beginning farmer who is trying to get a new way of growing crops started in our great state of Oklahoma. I am also part of a larger organization which will take this idea across the USA, but we need your help. We grow food aquaponically, meaning we raise fish, such as Tilapia, Freshwater Prawns, Perch, catfish, *etc.* which provides the nutrients to our greenhouse crops. The water is recirculated and not wasted like it is in field grown crops. Did you know that 60% of the water used in the world is used by agriculture? We grow our crops locally so that we can provide the freshest produce to our citizens, year round, without the need to import from long distances (*i.e.*, Mexico, California, Florida, China, Japan, *etc.* "Two hours from Harvest to table." We also help support our local schools by providing funding, from our profits, in the form of grants and scholarships. We are not greedy like most business owners, we want to help! But we need your help too!

Please consider us and the following with regards to the 2012 Food and Farm Bill:

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled.
- Provide an even "plowing" field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system.
- Support family farmers that really need help, not the biggest farms that don't: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies.
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

Thank you for all you have done for us in the past and please continue to do the same for us in the future. Though my voice may not be heard in congress directly, I hope that you will be my voice for me and help me to give to our community the fresh food that it so badly deserves. Let's keep Oklahoman's healthy and our students educated.

Thank you for your time!

SEAN ROBINSON,
 Greenhouse 4 The Arts & Education, LLC,
 Claremore, OK,

[Redacted].

 COMMENT OF KENDRA ROCAP

City, State: Durham, NC
Occupation: Artist
Comment: Not only should we be supporting organic, we should be figuring out how to transition everything to organic. Chemicals are killing us and our soil!

 COMMENT OF ABBY ROCHE

Date Submitted: Friday, May 18, 2012, 12:51 p.m.
City, State: Chico, CA
Occupation: Student
Comment: What is America miss? Better non-commodity food in our schools, protection of funding for farmers' markets, local foods, beginning farmers & ranchers, organic farming, and food safety. Please subsidize local small scale farmers! Don't be afraid to use other countries formula for sustainable foods as a protocol. We need this!

 COMMENT OF KEN ROCHE

Date Submitted: Friday, May 18, 2012, 5:59 p.m.
City, State: Lincoln, NE
Producer/Non-producer: Producer
Type: Specialty Crops
Size: Less than 50 acres
Comment: High input fossil fuel based conventional agriculture is not sustainable. Please support organic beginner farmers searching for sustainable alternatives.

 COMMENT OF GREG RODEN

Date Submitted: Friday, May 18, 2012, 3:00 a.m.
City, State: Berkeley, CA
Occupation: TV Producer—*www.foodforward.tv*
Comment: Most Americans have no idea what the farm bill is or how it works. We are hoping to change that with an episode titled 'The farm bill'. Small family farmers have all but ceased to exist yet Farmers Markets have increased 50% in the past 4 years. Still, just 2% of Americans shop at Farmer's markets.
 Please help us maintain and grow support for family farmers and for younger generations of Americans to continue in the tradition that built this country by:

- Fully fund the Organic Research and Extension Initiative (OREI) at the 2008 level.
- Endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Support all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintain EQIP Organic Initiative and do **Not** cut the Conservation Stewardship Program.

Local organic produce is a huge economic development opportunity and matters to me!

Sincerely,

GREG RODEN.

 COMMENT OF LAURA RODGERS

Date Submitted: Saturday, May 19, 2012, 7:00 p.m.
City, State: Hot Springs, AR
Occupation: Unemployed
Comment: Farm subsidies are part of the problem. We need lots of small farms, growing a wide variety of food crops—not a handful of huge companies scamming the system for subsidy dollars. The crop insurance bill is too similar to the old game to be a help to the public.
 Conservation of our soil and safe water must be tied to any money farmers receive from the government, so we will continue to have enough food and safe water in the future.

Growing crops with organic methods has been proven to protect the soil and water more effectively than conventional farming. With organic farming research programs, we can probably still equal, or even surpass the amount of food produced by chemical farming methods.

COMMENT OF MARTHA RODGERS

Date Submitted: Tuesday, March 27, 2012, 4:31 p.m.
City, State: Buchanan, VA
Occupation: U.S. Navy Retired/Mom/Food Pantry Coordinator
Comment: We live in a rural area and the number of people we help in our pantry has tripled in the past 4 years. Our local farmers give excess food to our pantry to help offset our costs to feed our neighbors.

COMMENT OF BETHANY RODGERS-CLARK

Date Submitted: Wednesday, May 16, 2012, 11:56 a.m.
City, State: Mt. Vernon, WA
Occupation: Operation Assistant for WSFFN
Comment: America needs a farm bill that:

1. creates jobs and stimulates economic growth,
2. makes healthy food widely available to all Americans (I have personal experience with this as my husband is unemployed and we are on food stamps and it is hard to get healthy food with \$136 per month for a family of 3)
3. protects our natural resources,
4. invests in the next generation of farmers and ranchers by making it economically viable for young people to go into these professions,
5. supports creativity for tomorrow's farmers and food entrepreneurs.

COMMENT OF HEATHER RODMAN

Date Submitted: Friday, May 18, 2012, 1:35 p.m.
City, State: Boise, ID
Occupation: Administrative Assistant
Comment: I would like to see the farm bill supporting more of a diversity of farming types—family-owned farming needs more support, and ConAgra and other mega-farming corporations do not need the financial help that they receive. We need to be supporting more sustainable farming. Thank you for your consideration in this matter.

COMMENT OF MICHAEL RODRIGUEZ

Date Submitted: Friday, May 18, 2012, 12:00 p.m.
City, State: Washington, D.C.
Occupation: Teacher
Comment: Especially for non-producers, it is detrimental that farms, farmers and the food that they produce be funded without concessions to big corporations. Food needs to remain food.

COMMENT OF IDERAH ROECK-AKARKARASU

Date Submitted: Friday, May 18, 2012, 2:19 p.m.
City, State: Glen Allen, VA
Occupation: Yoga Teacher
Comment: Please really think about where your food is coming from. Take the time to learn about food and your body and how they work together. Think about your children.

COMMENT OF CLARISSA ROEWE

Date Submitted: Wednesday, May 09, 2012, 3:05 p.m.
City, State: San Benito, TX
Occupation: Manager San Benito Food Pantry
Comment: Food Security! In a small town of 25,000 over 16,000 people have presented themselves to receive free food. Their avg. income is \$690.00 average snap benefit \$120.00. Last week there was a break in at the food pantry, though unsuccessful. They were stealing wieners. Retail 100 lbs of wieners is about \$82.00. We need to do more, not less. As one client said, "Forget about healthcare, Dying is an

option as I cannot afford to live.” Think about who you really represent. Poor people may now be so beat up they no longer care to vote, but when they really don’t have any food they are going to steal it from you and your compadrs.

COMMENT OF BRIANNA ROGERS

Date Submitted: Wednesday, May 02, 2012, 10:45 a.m.

City, State: Vineyard Haven, MA

Occupation: Student—Brown University 2012

Comment: Dear Mr. Keating,

I live in Vineyard Haven, and I am a member of your district. I am a senior at Brown University, and I had some concerns regarding the upcoming farm bill. Two specific areas that I would like to see addressed are Title IV and Title X. Title IV is especially important for the residents of Martha’s Vineyard, many of which are heavily reliant on food assistance and nutrition programs. Also, Title X will aid in addressing the health needs of many individuals on the island. Though food assistance programs are beneficial, if the food is not healthy and nutritious then the point of the program is missed. I believe an increase in funding for Title X to increase specialty crops along with continued support for Title IV is the best way to create a farm bill that will have the most benefit for the people of Martha’s Vineyard. Good luck in the upcoming negotiations, and I hope you will take my comments into consideration.

Sincerely,

BRIANNA ROGERS.

COMMENT OF TERRY ROGERS

Date Submitted: Friday, May 18, 2012, 11:57 a.m.

City, State: East Alton, IL

Occupation: Professional Musician

Comment: I **Only** buy organically grown food . . . vegetables, fruit, nuts . . . free range, organically fed chickens . . . yogurt and cheese made from farm animals that are **Not** given numerous additives and chemicals. This is the movement of the entire country. Do **Not** ignore us! Make sure organic farms are protected and subsidized!

COMMENT OF THOMAS ROGERS

Date Submitted: Friday, May 18, 2012, 5:16 p.m.

City, State: Eagle, ID

Occupation: Teacher and Legal Researcher

Comment: Dear Agriculture Committee,

Agriculture policy needs to accommodate and support small scale and sustainable family agriculture as well as the corporate mode that has come too much to dominate American agriculture.

There needs to be concern about the land and its care and preservation as well as just production of commodities.

COMMENT OF NINA ROGOWSKY

Date Submitted: Friday, May 18, 2012, 5:22 p.m.

City, State: Watertown, MA

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: I am an intern on a 27 acre community farm in Natick, MA. Many of the agricultural laws do not apply to a small, organic, integrated farm like the one I work on, yet it is clear to me that the way we farm uses best practice agricultural methods. I want to see the law support more farms like the one I work on.

COMMENT OF KWANHO ROH

Date Submitted: Sunday, May 20, 2012, 11:26 a.m.

City, State: Gaithersburg, MD

Occupation: Researcher

Comment: Small local organic farms are precious for people. They produce healthy fresh foods to local people so they should be protected.

COMMENT OF CHERYL ROHRER

City, State: Pittsford, NY
Occupation: Stay-at-Home Mom
Comment: It sucks that our generation and future generations' health is risk because of money, power and greed. Politicians, Lobbyists, Monsanto . . . you suck!

COMMENT OF CARMEN ROJACK

Date Submitted: Sunday, May 20, 2012, 2:05 p.m.
City, State: Hamburg, NJ
Occupation: Dental Hygienist
Comment: I want ethical organic standards I want to see genetically engineered foods labeled and mandatory testing by outside agencies required for GMOs. God created our seeds and their blueprint should be held as sacred, not subject to change . . . **Amen**

COMMENT OF TANYA ROLAND

Date Submitted: Friday, May 18, 2012, 9:53 a.m.
City, State: Falls Church, VA
Occupation: Teacher
Comment: Since our ecology is suffering greatly from toxification, much of which is originated on farms, use of chemicals needs to be greatly reduced in farming and agriculture by law. In the meantime, those who protect our land, water and air by strident organic practices should be benefitted by subsidies and tax breaks, those of which huge agribusiness have materially benefitted for so long and at huge ecological cost. Anyone in any industry who continues to put all of us, all of life at risk need to be punished. Our priorities as a nation need to be put in order. Life itself, protecting and purifying nature as we know it has to be at the top of the list. Anything else is suicide.

COMMENT OF SHERYL ROLLER

Date Submitted: Tuesday, March 20, 2012, 4:09 p.m.
City, State: Albuquerque, NM
Occupation: Caring For Elderly Parent
Comment: I want to support parts of the farm bill that help to feed hungry people, that have fallen on hard times, *etc.* Programs such as: SNAP, TEFAP, *etc.*
 Thank you,
 SHERYL ROLLER.

COMMENT OF NORA ROMAN

Date Submitted: Friday, May 18, 2012, 2:33 p.m.
City, State: San Francisco, CA
Occupation: Registered Nurse
Comment: I want a farm bill that supports non toxic, organic sustainable food. **Close All Factory Farms And Especially Factory Animal Farms. Outlaw All Poisons In Agriculture And All Food Additives. No More Preservatives That Kill Us Later. No More Lab Made Colors That Kill Us Later. No More Processed Foods That Kill Us Sooner . . .**
 Our food policies are destroying our planet and pretty soon you won't be able to eat all that cheap crap . . . **Wake Up . . .**

COMMENT OF JULIET ROMANO

Date Submitted: Friday, May 18, 2012, 3:34 p.m.
City, State: Seattle, WA
Producer/Non-producer: Producer
Type: Field Crops
Size: 1,000+ acres
Comment: I am part of a family that owns/manages 15,000+ acres in NE Arkansas. Currently, we still practice conventional farming methods because the laws that are currently in place overwhelmingly support these practices. It would be much easier to becoming more 'green' and healthful if the government subsidized crops that are grown in such a way that encourages good health and environmental sustainability—farming for the future and not just today.

COMMENT OF LYNNE ROMANS

Date Submitted: Friday, May 18, 2012, 10:14 p.m.

City, State: Eugene, OR

Occupation: Education and Home Gardening

Comment: I support the independent family farmer, not for-profit agribusiness. Farmers overwhelmingly steward the land. Agribusiness, unhappily and overwhelmingly, poison the land and the resources.

Support the farmer!

Do it now.

COMMENT OF JONATHAN ROME

Date Submitted: Friday, May 18, 2012, 3:55 p.m.

City, State: Hartford, CT

Comment: I am just getting clean and it helps my girlfriend and I to concentrate on saving money so we can build a better life for ourselves. Please understand just the little many things that may seem insignificant actually help many lives so much! The little things that people take for granted happen to be the SNAP program. Thanks a lot!

COMMENT OF CHRISTINA ROMERO

Date Submitted: Saturday, April 14, 2012, 3:59 a.m.

City, State: Montebello, CA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Local, sustainable, and organic farming and food production are essential to the future of this country. Small farmers and potential farmers should be given adequate funding and resources to maintain their business and to grow the agriculture business. I think the farm bill should be taken as serious as any other legislation that is vital to this country.

COMMENT OF ANNA RONK

Date Submitted: Saturday, May 19, 2012, 1:49 p.m.

City, State: Paw Paw, MI

Occupation: Health Care Worker/Educator

Comment: Please don't allow cuts in the farm bill that promote safe food production. This statement applies to many facets in the farm bill GMO crops are not safe for us to eat. Many other countries have banned GMO's.

COMMENT OF HOWARD RONTAL

Date Submitted: Friday, May 18, 2012, 11:57 a.m.

City, State: Potomac, MD

Occupation: Massage Therapist and Teacher

Comment: Really, this is very important. I believe that big business has an important role to play in the national economy, including agribusiness but I do want food stamp money, research on organic farming, and other such programs sacrificed so that they can make a another dime a share in profits.

COMMENT OF THOMAS ROTH

Date Submitted: Sunday, May 20, 2012, 11:38 a.m.

City, State: Hollister, CA

Occupation: High School Teacher

Comment: Dear Mr. Farr,

It is imperative to support the Local Food, Farms, and Jobs Act (H.R. 3286), the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), and the Conservation Stewardship Program, as well as provisions to protect organic farmers, for clear and present reasons: local food has more nutrients, fewer additives, better flavor, and contributes to local economies; beginning agricultural businesses need subsidies far more than large, established agribusinesses; and the quality of food must be promoted to battle the ever-growing problems of American reliance on processed foods and its inevitable result, obesity, which is becoming so prevalent that it threatens to squish quality health care as well as quality life styles with its increasing weight

on our society. Do the right thing and hold Republican fat cats' feet to the fire. Settle for no less than to ensure better quality food, and thus a better life, for everyone.

COMMENT OF AMMATHYST ROSE

Date Submitted: Friday, May 18, 2012, 1:45 p.m.

City, State: Austin, TX

Occupation: Massage Therapist

Comment: There should be greater limits to crop insurance subsidies. There also needs to be top priority consideration for land, soil, and our environment. Please re-attach the soil erosion and wetland conservation requirements to crop insurance programs.

Thank you.

COMMENT OF GAIL ROSE

Date Submitted: Friday, May 18, 2012, 3:49 p.m.

City, State: North Hills, CA

Occupation: Retired Elementary Teacher

Comment: Be sure to treat all animals humanely, none in cages, feed their natural types of food, no chemicals. Give fair wages to farm workers, provide housing and healthy living conditions for all who work on farms. Get off this money addiction; treat others as you would want your family to be treated.

All this persecution will only come back to haunt you; you get what you give, Karma or the law of physics tell us that.

Wake up! You're not fooling anyone but **Yourselves!**

COMMENT OF HOLLIS ROSE

Date Submitted: Friday, May 18, 2012, 4:35 p.m.

City, State: Portland, OR

Occupation: Retired

Comment: In this time of obesity and out of imagination medical costs to individuals and government, I believe one of our highest priorities should be to support individual health (including nutrition, education and poverty). With this in mind the Farm bill should support local, small farmer's, organic farmers, limit control and takeover by the large corporations. Support of organic and pesticide free foods supports the environment and general health. The administrators, designers/planners of programs need to be qualified in the most up to date organic and pesticide free farming, on local community growth and development and on ways to support and create revitalized environment and land development. Our soil damage is huge and growing in rotation on farms, preserving our land for future generations is imperative.

It is no longer feasible to live short sighted. We must think and develop, planning for many future generations.

Sincerely,

HOLLIS ROSE.

COMMENT OF SARAH ROSE

Date Submitted: Thursday, April 05, 2012, 9:49 p.m.

City, State: Durham, NC

Occupation: Nutritionist

Comment: I am writing to express my concerns for the 2012 Farm Bill. As a future Registered Dietitian I see the farm bill as an important part of the United States health in many ways.

The farm bill helps to protect the job of farming and insure that a farmer can make a fair wage. The farm bill also allows farmers to grow fresh fruits and vegetables for our citizens to eat. With healthcare reform in limbo and budget cuts continually debated I feel it is important to fund health in the most basic sense, through the access to healthy foods like fruits, vegetables, and whole grains. The farm bill allows crops to be sold at a fair price to farmers and consumers thus allowing disease prevention to be affordable. Additionally the farm bill helps to fund nutrition assistance programs such as SNAP (formerly Food Stamps). This and other programs provide access to healthy foods to prevent food insecurity which ultimately promotes health and well-being and the economic security of families.

As we move toward times of excelling population growth and increasing food costs I would like to take the time to express the importance of adequate funding of the

farm bill. This provides job security to farmers, allows them to pass their land on to their families while practicing sustainable conservation methods, and provides food and food assistance to needy families. Please make sure that the farm bill is adequately funded for future generations.

COMMENT OF SHERYL ROSE

Date Submitted: Friday, May 18, 2012, 1:31 p.m.

City, State: Berkeley, CA

Occupation: Freelance Editor

Comment: I would like the House Agriculture Committee to fully fund conservation programs and to maintain strong reliance on organic, local food production. I would also like the committee to defund corporate agribusiness completely and to take a strong stand against the use of toxins and poisons in farming in our country. Thank you for considering my views.

COMMENT OF VICTORIA ROSE

Date Submitted: Friday, May 18, 2012, 10:08 p.m.

City, State: Snohomish, WA

Comment: We support H.R. 3286 & H.R. 3236 vehemently! People have the inalienable right to good, healthy food and totally oppose **Any** more funding for BigAg, just to line their greedy pockets knowing that they do not care at all about healthy, good nutrition for our nation's population. We are sick of the dishonest, immoral people in this administration and in BigAg. Do you think that Monsanto's executives families eat food that is saturated with chemicals? I think not—they probably have their own special gardens bought with taxpayer monies. We will not allow this, we will stand up and fight and do whatever it takes to bring them down to the dirt that they pollute, period!

COMMENT OF LAWRENCE ROSE, M.D.

Date Submitted: Friday, May 18, 2012, 8:29 p.m.

City, State: Mill Valley, CA

Occupation: Public Health Physician

Comment: Supporting Organic food production is a very important public health issue. The high prices of organic fruit and vegetables and the lack of availability to most of our low income population is contributing to the mortality and morbidity disease rates nationally. Obesity, diabetes, cardiovascular events, and strokes are caused by national dietary and nutritional patterns.

COMMENT OF ADELE ROSEN

Date Submitted: Friday, May 18, 2012, 3:42 p.m.

City, State: Tesuque, NM

Occupation: Wrangler

Comment: I depend on the farmers' market to buy my food. It is the greatest gift when you don't grow your own. I believe that small farms are at the core of true American values and certainly the most healthy lifestyle. It is of great benefit to this whole country to support organic farming. I don't support chemical pesticides which have proven to be detrimental to humans and to the Earth.

COMMENT OF ANDREA ROSEN

Date Submitted: Friday, May 11, 2012, 9:18 p.m.

City, State: Washington, D.C.

Occupation: Retired Fundraiser

Comment: First and foremost, I urge you to pass a farm bill that reduces (on the way to eliminating) subsidies for corn and soy. They are overproduced to the detriment of other healthful crops, and in the case of corn, to the detriment of the health of Americans, overweight and obese on corn sweeteners and corn-fattened beef. A farm bill should invest in innovation around organic farming. It should invest in future farmers. Those are my priorities.

COMMENT OF BARBARA ROSEN

Date Submitted: Friday, May 18, 2012, 11:50 a.m.

City, State: Brooklyn, NY

Occupation: Retired Teacher

Comment: I am dismayed that so much of our food supply is in the hands of big business and that the result is the steady degradation of our water, soil and diet. And that so much cruelty to animals is condoned. It must stop.

COMMENT OF DIANE ROSENBERG

Date Submitted: Friday, May 18, 2012, 12:47 p.m.

City, State: Fairfield, IA

Occupation: Writer and Event Organizer

Comment: I support a farm bill that supports the development and expansion of organic food production. I support:

1. The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
2. Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
3. The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
4. Maintaining the EQIP Organic Initiative.

I do not support the \$4 million in cuts to the organic research development nor cuts the Beginning Farmers Program.

I absolutely do not support cuts to the Farm Stamp program or any other nutrition program. That is purely immoral. Do not take food out of the mouths of hungry people to hand it over to profitable industrial agribusiness. That is just wrong. Do you know how many people are hungry in our country? Would you like to experience that yourself? I don't think so.

Please do the right thing and design a farm bill that makes the health of Americans and our environment and the livelihood of farmers and farmer workers come first over the interests of corporate agriculture lobbyists.

Thank you.

DIANE ROSENBERG.

COMMENT OF JEFF ROSENBERG

Date Submitted: Saturday, May 19, 2012, 9:23 p.m.

City, State: Arlington, VA

Occupation: Psychologist

Comment: Dear Madame or Sir:

My comments are twofold:

- (1) The cost of a product should reflect all of its costs (*i.e.*, externalities). If there are runoffs that affect water quality, that should be reflected in cost for example. My strong hunch (*e.g.*, sugar with all its health implications) is that often not only is the full cost of an item not reflected in its price but that it is the reverse—it is subsidized.
- (2) There should be full disclosure for consumers regarding the products they buy. This should include how products are produced and prepared. "Conventional" production does not necessarily equate with no need for disclosure. Let consumers make decisions with at least the opportunity to have knowledge of what they are buying and at a price that fully reflects its costs and health implications.

Best,

JEFF ROSENBERG,
Arlington, VA.

COMMENT OF LISA ROSENBERG

Date Submitted: Friday, May 18, 2012, 11:50 p.m.

City, State: Orangeburg, NY

Occupation: Registered Nurse

Comment: Please help the farmers and stop genetically modifying food. All the processed foods are increasing the cost of health care because they are very bad for the body after years of ingesting these poisons we are seeing increased diabetics and heart disease. Promote the natural farmers.

COMMENT OF ELEANOR ROSENTHAL

Date Submitted: Friday, May 18, 2012, 6:29 p.m.

City, State: San Francisco, CA

Occupation: Alexander Teacher

Comment: Please stop subsidizing big, corporate agriculture and encourage growers of fruits, vegetables, *etc.*, instead. The farm bill is very important to the nation's health and economy, and it's been slanted all wrong for many years.

COMMENT OF GREGORY ROSENTHAL

Date Submitted: Friday, May 18, 2012, 3:40 p.m.

City, State: Schenectady, NY

Occupation: University Instructor/Doctoral Student

Comment: Dear House Agriculture Committee members,

I am a consumer with great worries about the health and safety of our food supply. One of the big problems is the role of huge agricultural corporations, like Monsanto, for example, setting state policy; instead, we should be focused on supporting local and small-scale organic farmers, not giving away perks to huge corporations.

Specifically, I call on you to fully endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). I call on you to fully fund conservation programs, such as the Conservation Stewardship Program, and to make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. I call on you to implement all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). And I call on you to maintain the EQIP Organic Initiative.

Thank you for your consideration on this important matter.

COMMENT OF CARLA ROSIN

Date Submitted: Sunday, May 20, 2012, 12:25 a.m.

City, State: Santa Barbara, CA

Occupation: Board of Trustees, SB Food Bank

Comment: I just spoke with Wes Roe regarding a project I am working on through the new food bank Grow Your Own Way program. We both thought you would be interested in this. I have included a brief outline of the program below. I am also working on an extension of the program to include an Eco Village project with the support of the FoodBank, Fairview Gardens, SBCC Sustainability Program and ultimately UCSB to have an alternative ag and building site to research the possibilities of a working urban agricultural model on the Bishop Ranch property. The idea being that if we have a model in place. Santa Barbara County has more control of what happens with future development.

I would be very grateful to be able to speak with you in depth about the potentials of a project like this and to get your feedback and insight into the logistics of implementing a project like this as an extension to UCSB. very much like what is happening at UC Santa Cruz and UC Davis.

I look forward to hearing from you. Thank you for your consideration.

All the Best,

CARLA ROSIN,

Board of Trustees,

FoodBank of Santa Barbara,

[Redacted].

I got together with the Santa Barbara Permaculture Network to put on a benefit for an exciting new program for the FoodBank of Santa Barbara, Grow Your Own Way. The program's mission is to teach underserved individuals how to grow some of their own food. Currently, as a member of the Board of Trustees for the FoodBank of Santa Barbara, I have been working with Fairview Gardens to fund an organic farming internship program to allow those individuals who would like to grow food for a living the opportunity to learn the skills needed to farm for profit. The guide lines of the internship and the monitoring of the interns will be as determined by Mark Tolefson, Director of Fairview Gardens. This program will be working in cooperation with local farmers. With grant money, we hope to take the burden off the farmers participating in the program. With the completion of the internship, the beginning farmer has the opportunity to then lease some land from the farmer and with guidance and as prescribed by a list of guaranteed cash crops to be grown for Farmer Direct and the FoodBank for a fair market value. This program will be a flagship program for food banks across the country. I think it is very important for everyone to realize the importance of the local food banks and that

there is an effort, here in Santa Barbara to make changes in the way the local food systems operate. After all, is it not more sustainable for an organization to be able to offer the individuals it serves not just a hand out but a hand up, therefore empowering them to become a contributing member of their community.

What the program will provide to the community:

- a resurgence of farmers in the work force . . . currently the average age of farmers across the country is 50.
- in doing so, we increase the chance of saving local farms from developers.
- job training and job opportunities for the underserved
- it will create a stronger awareness as to how important sustainable agriculture is to the survival of this community.
- it will create a stronger relationship between the food bank and local farmers therefore making local produce more accessible.
- it will create an opportunity for farm research projects to increase the productivity of farms in the area.
- it will provide educational programs for the interns as well as the public to introduce sustainable growing methods.
- it will provide access to locally grown organic seed for the program and the local seed bank.
- it will host a weekly farmers market with farmers participating in the internship program.

COMMENT OF ANGELA ROSS

Date Submitted: Thursday, May 03, 2012, 10:35 a.m.

City, State: Riverside, CA

Occupation: Sales Associate

Comment: We must protect those in hunger—people needing SNAP, TEFAP, CSFP and other aid programs.

Corporations will always find their footing—they pay millions of dollars every year to economists, lawyers, CPAs and lobbyists to make sure they do.

The hungry only have citizens and the programs citizens have created to protect widows, orphans, the homeless, the stranger—those in need.

Please do the job we need done to protect the least protected. Let corporations do their own job of protecting themselves.

Thank you for your patient attention to this vital need.

COMMENT OF CHRISTY ROSS

Date Submitted: Friday, May 18, 2012, 2:14 p.m.

City, State: Washington, D.C.

Occupation: Educator

Comment: I want healthier, more nutritious food. I want more organic food. I want the government to be subsidizing real vegetables and fruits, and not just corn, dairy, and factory farming. This is critical to our personal health, and to our nation's health, and to our environment. Please listen!

Thank you,

CHRISTY ROSS.

COMMENT OF DOUGLAS ROSS

Date Submitted: Friday, May 18, 2012, 12:31 p.m.

City, State: Locke, NY

Producer/Non-producer: Producer

Type: Dry Beans & Peas, Livestock, Poultry/poultry products, Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: To cut funding for organic and sustainable farming and nutrition education at a time when America faces an obesity epidemic and a cancer rate of 1-in-4 seems totally absurd. Consider that no universal health care coverage exists in our country and Medicare and Medicaid are both facing cuts as well, and it appears we may well be setting the stage for a future nation-wide health crisis the likes of which we cannot fathom. Please educate yourselves and the public at large as to the importance of sustainable, organic foods in a nutritionally balanced diet.

COMMENT OF JODI ROSS

Date Submitted: Friday, May 18, 2012, 12:07 p.m.

City, State: New Salem, MA

Occupation: Retired

Comment: We need to support organic methods and small farms. The economy and ecosystem health depend on it! With the bees dying off, where will we be? Hand-pollinating every single plant? With superweeds being created by Round up, we'll wind up worse off than we started. It's time to adopt a sensible farm policy that doesn't create more problems than it solves.

COMMENT OF OLLIE ROSS

Date Submitted: Friday, April 13, 2012, 8:30 a.m.

City, State: Millican, TX

Producer/Non-producer: Producer

Type: Livestock, Vegetables

Size: 151-300 acres

Comment: I am a member of the Texas Small Farmers and Ranchers/Community Based Organization.

We would like the Committee to assist us in outreach to minority youth in ways to get them to consider agriculture and ag-related fields and industries a life-pathway choices. We would also like help/suggestions on how we can better partner with others (retail/wholesale, *etc.*) to market our livestock and good.

COMMENT OF ROBERT ROSS

Date Submitted: Friday, May 18, 2012, 12:23 p.m.

City, State: Staten Island, NY

Occupation: Musician/Educator

Comment: Industrial agriculture and toxic chemicals are killing the soil and the organisms that live in it that make it fertile. Monoculture is also killing the soil. These practices are not found anywhere in nature and simply do not work. Monoculture requires larger and larger doses of toxic chemicals an ever escalating war on pests. The soil gets weaker and the crops get more fragile and makes them vulnerable to pesticide resistant pests. We **Must** adopt a national campaign of organic agricultural practices for the benefit of the soil, crops, our own health, and the health of the planet.

COMMENT OF KAREN ROSSI

Date Submitted: Friday, May 18, 2012, 5:06 p.m.

City, State: Richmond, KY

Occupation: Recently Graduated Disabled Student

Comment: I support these things:

- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.
- No cuts to the food stamp program.
 - more intelligent qualifications for the food stamp program food-wise. I should not be able to buy Easter candy/full-sugar soda with them while I cannot buy an infinitely more nutritious meal replacement. It's one thing if I try to buy a bottle of vitamin pills (not covered for good reason), while it's another if I buy something with macronutrients (protein powder, meal replacements, *etc.*) that is in either liquid or powder form.
 - In addition, the standards for what "supplements" qualify should be clearer, and readily available to **All** grocery store managers.

COMMENTS OF J. RONALD ROTH

Date Submitted: Friday, May 18, 2012, 9:24 a.m.

City, State: Towson, MD

Occupation: Retired

Comment: We must clean up the food we are feeding our citizens! No

Date Submitted: Friday, May 18, 2012, 5:50 p.m.

Comment: I cannot believe you would cut funding for Organic farming, which is so much better for the land and citizens of the U.S. It is time to cut funding to big Ag which does little more than to feed us unhealthy foods. 90% of what I eat is Organic, free range and grass fed and I will not be spending many Medicare dollars. We need healthy food to have healthy citizens!

COMMENT OF STAN ROTH

Date Submitted: Friday, May 18, 2012, 9:55 p.m.

City, State: Jenison, MI

Occupation: Community Organizer for Older Americans

Comment: Monsanto is not a food company. It is a chemical company ruining the land and now going abroad to spread their toxicity. This is not sustainable agriculture. Sustainable agriculture is done by real farmers growing real food. End the stranglehold they have on our bad food policy. Ever wonder why we have such a high rate of cancer?

COMMENT OF JANICE ROTHROCK

Date Submitted: Tuesday, May 15, 2012, 12:51 p.m.

City, State: Arcata, CA

Occupation: Retired Farm Owner

Comment: We do not need to be subsidizing GMO crops and corporate farming with their high use of herbicide, insecticide, and chemical fertilizers . . . crops which often are used for fuel for machines without concern for human food. We do not need to be subsidizing Texas brain surgeons who build second homes and call them farms—**We Do Need** safe, pesticide-free (or the choice) of food grown closer to 'home' and the economic benefits that accompany.

COMMENT OF JENNIFER ROTHSTEIN

Date Submitted: Sunday, May 20, 2012, 11:21 p.m.

City, State: Mequon, WI

Occupation: Ozaukee County Board Supervisor, District 26, Chair Land Preservation Board of Ozaukee County

Comment: Dear House Agriculture Committee,

I respectfully request that you fund the PACE program for the preservation of the future of Agricultural soils. Once the soils are lost to residential or commercial development, they are gone forever. Our citizens spoke when they chose a cow, an ear of corn and a wheel of cheese to represent our state on the Wisconsin quarter. By purchasing agricultural conservation easements, we ensure the future of agriculture and farming in our state. May this coin never become historic for lack of forethought in preserving our farming soils.

Please consider ways to support and assist young people who would become our future farmers.

It would be a real move forward if a way could be found to allow farm fresh foods in our schools and senior centers.

Finally, please look carefully at any legislation that would possibly compromise our waters, whether they be surface or ground waters. As we have discovered from the sad situation regarding the Fox River, remediation costs are astronomical. Precious, potable water is lost, people's health are adversely affected and the quality of life is tremendously diminished when water is not safe to drink. We are blessed in this state with a precious resource—water. It is important now and will continue to grow in importance in the decades to come. Let us lead the way in setting standards for this resource. Our financial future and our health will depend greatly on how we treat this resource.

Thank you for your consideration.

Sincerely,

JENNIFER ROTHSTEIN,
Ozaukee County Board Supervisor.

COMMENT OF PAT ROUGEAU

Date Submitted: Saturday, May 19, 2012, 9:01 p.m.

City, State: Oakland, CA

Occupation: Retired

Comment: We need a fair and smart bill—that promotes the health of the nation, that encourages organic produce, that doesn't pick winners and losers, that doesn't

continue legacy of entrenched subsidies and barriers to entry for new producers, that prevents fraud and abuse. We need a bill worthy of our nation and the idealism of the coming generation.

Thank you,

PAT ROUGEAU.

COMMENT OF CATHY ROWAN

Date Submitted: Friday, May 18, 2012, 4:46 p.m.

City, State: Bronx, NY

Occupation: Director, Socially Responsible Investments

Comment: Strengthen food aid programs by purchasing food on local and regional levels. This would get food to those in need more quickly and would be a more efficient use of taxpayers' dollars. It would also improve the capacity of local, small farmers in the countries most needing to improve their food production.

COMMENT OF THOMAS ROWAN

Date Submitted: Friday, May 18, 2012, 1:05 p.m.

City, State: Bronx, NY

Occupation: Chaplain

Comment: I am also a member of a CSA in the Bronx where we got organic vegetables every week starting in June. It is also a way to assist the farmer to remain an independent farmer.

COMMENT OF SOPHIA ROWIN

Date Submitted: Friday, May 18, 2012, 1:46 p.m.

City, State: Castaic, CA

Occupation: Self-Employed

Comment: Please do not cut the funding for organics. We need our food to be clean, simple and healthy. Organics can be a start to educating people on how to eat healthy, has the potential to reduce obesity and can bring medical costs down, so our government would not have to subsidize medical care.

COMMENT OF KAREN ROWLAND

Date Submitted: Friday, May 18, 2012, 4:53 p.m.

City, State: Papaalooa, HI

Occupation: Business Consultant

Comment: Our country needs to bring back small farms as a means to earn a living—our health and economy are depending on it. We need to take the government out of food regulation so people can buy what they want from local farms and get the quality they deserve and demand. Until stop using chemicals to grow our food cancer and other illnesses will continue to rise unlike many other nations. Corporate profits in the production of toxic chemicals and GMO seeds have no place in our food supply and are causing most of the current problems we have—when will we come together and do the right thing for our land, health and economy of our country?

COMMENT OF KIMBERLY ROWLETT

Date Submitted: Friday, May 18, 2012, 11:52 a.m.

City, State: Cleveland, TN

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: We badly need to preserve rural, quiet, backwoods, historic and natural America for future growth in the farming industry! We do not need more ex/sub/urbanization or (spot) rezoning, or metro annexation of any kind that is oppressing environmental needs of farmers and their families. The biggest thing is to give long-term preservation and protection for all rural areas, to preserve independent (identities and Gov) cities/townships, and counties everywhere! Preserve the rural, natural landscape of rural America everywhere so farmers can concentrate while working with livestock, managing their farms, its resources, and more.

COMMENT OF GENNY ROWLEY

Date Submitted: Friday, May 18, 2012, 10:39 a.m.

City, State: Dallas, TX

Occupation: Operations Personnel, Urban Acres Market

Comment: I work as a part-time employee at Urban Acres, a small business in the southern part of Dallas. There is very little access to fresh, local produce in our neighborhood, and our store works with small-scale family farms to bring beautiful, fresh food into our neighborhood. There is more demand than we can supply—in part because there are not enough organic farms in our area to help meet the nutritional needs of our community. I support the initiatives of Slow Food USA listed below, and am asking for policies that benefit the members of my community, and our family farmers, who work hard all year at a job that is financially very challenging. They need our support, far more than large-scale agriculture. Thanks for listening the issues raised below.

As the committee considers the 2012 Food and Farm Bill, I urge you to:

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;
- Provide an even “plowing” field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don’t: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

COMMENT OF MARJORIE ROWLEY

Date Submitted: Saturday, May 19, 2012, 2:30 a.m.

City, State: San Diego, CA

Occupation: Retired Educator

Comment: Please support organic research. Also, I am greatly concerned about genetically modified foods. Please support all legislation to require labeling and especially stop this harmful modification of foods.

COMMENT OF MONIKA ROY

Date Submitted: Friday, May 18, 2012, 9:32 p.m.

City, State: Sacramento, CA

Occupation: Program Assistant, Ecological Sanitation Organization

Comment: As someone not directly farming commercially, but working in the Ecological Sanitation (EcoSan) field producing compost derived from human feces, I am linked to the farming world and help produce a product that farmers are buying. Our values are based on small-scale and organic agriculture, and the compost that we produce is meant to be reintegrated into the land. I would like to see a farm bill that supports the practices of small-scale agriculture in particular, and as organic as possible.

I would like to see more funding that increases the learning opportunities and exchanges between students of all academic levels with small-scale farmers. I want to see cultural gatherings with communities around the country, sharing knowledge and promoting healthy eating habits and lifestyles.

I want to see less agro-business in control of the food supply and less food subsidies sent to countries outside of the U.S. Thank you.

COMMENT OF PAM ROY

Date Submitted: Tuesday, May 15, 2012, 1:35 p.m.

City, State: Santa Fe, NM

Occupation: Executive Director of Farm to Table, NM

Comment: Dear Congressman,

We look forward to your support of the following programs:

- Specialty Crop Grant Program increases.
- Community Food Projects Program—\$10 million per year to help communities build food self-reliance.
- Senior Farmers Market Nutrition Program level funding at \$20 million.
- Farmers Market and Local Food Promotion Program—\$20 million per year to develop farmers market capacity and create food hubs to connect farmers with schools, hospitals, grocery stores and other markets.
- Hunger-Free Community Incentive Grants—An average of \$20 million per year for a new SNAP local fruit and vegetable incentive grant program at farmers markets and other healthy food retailers.
- Outreach and Technical Assistance for Socially Disadvantaged Farmers and Ranchers Program (Section 2501).

Thank you very much for your continued support of these programs.

Sincerely,

PAM ROY,
Farm to Table and the NM Food & Ag Policy Council,
[Redacted],
Santa Fe, NM.
[Redacted].

COMMENT OF SHARON ROYAL

Date Submitted: Friday, May 18, 2012, 1:53 p.m.

City, State: Seattle, WA

Occupation: Psychotherapist/Mom

Comment: This is one of the very most important movements today.

Well-considered legislation regarding all aspects of the nation's food supply is essential for everyone, including the life of our planet. We need more, rather than less, education about the well researched ways in which the foods we eat impact human and other animal health, growth and IQ. We need immediate laws governing decisions made in the food industry with the sole goal of producing healthy, real, nutritional food free of altered genes and toxins. Laws that hold the industry accountable by exacting extreme penalties for ignoring evidence and producing toxic food. Laws that well-reward companies who do produce clean and healthy products in sustainable ways. It astounds me how we can let the ignorant and powerful remain so. Thank you for all that you do on our behalf!

COMMENT OF ROXANNE ROYSE-FLORA

Date Submitted: Tuesday, May 15, 2012, 7:51 p.m.

City, State: Albany, OR

Occupation: Student

Comment: Hi,

Please do not reduce or cut the Snap or any programs that help feed the poor, I am one of those people unfortunately who rely on this. I am a student at OSU and am working hard to make good money to help support me and my family and these programs make it so we do not have to go hungry.

Thank you for your time!

ROXANNE ROYSE-FLORA.

COMMENT OF DEBORAH RUBIN

Date Submitted: Sunday, May 20, 2012, 12:25 a.m.

City, State: Tampa, FL

Occupation: Parent

Comment: Please support family farms, organic methods, integrated pest management over GMO' and increasing pesticide usage. Give us real, wholesome food, revamp school lunches, ban color dyes in food and carcinogenic ingredients. Support a diet of whole foods. Support local eating where possible. Don't attach a bunch of riders that have nothing to do with healthy food. Stop funding GMO's and their pesticide dependent and laden crops. We should not be eating Roundup—we all know it is an endocrine disruptor. Definitely ban the new Bayer corn. And stop using steroids and unnecessary antibiotics in farm animals. Look around—see the

unhealthy Americans the most recent farm bills are producing—we are more like bulky farm animals than humans. Can't you figure out why—can't you see the connection. Please do the right thing.

COMMENT OF MARY-BETH RUBIN

Date Submitted: Friday, May 18, 2012, 2:02 p.m.

City, State: Joshua Tree, CA

Occupation: Professional Cook, Nutritional Coach

Comment: It is important to me that any farm bill support environmental sustainability of agriculture, natural resources, and rural communities. In short, I do not want to see my tax dollars subsidize corporate agriculture industry that produce contaminated foods in dead soil for big profits. I want family farmers, organic farmers, who are better stewards of the environment be better subsidized.

COMMENT OF MELISSA RUBIN

Date Submitted: Friday, May 18, 2012, 8:25 p.m.

City, State: Santa Rosa, CA

Occupation: Holistic Cook and Food Educator

Comment: Organic! Sustainable! Hemp! Get rid of factory Animal Farms! No GMO! Label GMO! Get rid of unfair subsidies! Plant other vegetables in Iowa besides corn! Diversity in growing! Get rid of Mono crops, Go back to the land cows and other animals eating grass as they should be!

Listen to Joel Salatin!

COMMENT OF GAIL RUBIO

Date Submitted: Friday, May 11, 2012, 11:51 a.m.

City, State: Springville, CA

Occupation: Retired

Comment: I don't want to see the Federal government's fingerprints anywhere on agricultural grain, row crops, sugar cane, silage, dairy, cattle/swine/poultry raising, viticulture or orchards; I want the Federal government out of farming, dairy and all other means identified as "rural/farming occupations"!

COMMENT OF RUBY RUBLEY

Date Submitted: Saturday, May 19, 2012, 3:34 p.m.

City, State: Bellevue, MI

Producer/Non-producer: Producer

Type: Greenhouse/nursery, Nuts, Specialty Crops, Other

Size: Less than 50 acres

Comment: I simply ask that as you are considering revisions to the farm bill that you remember the small farms, families, and conservation districts struggling not only to make ends meet, but to do so in ecologically conscious ways. Everything we do, or allow to be done to our land, affects not only our health, but that of our children and grandchildren. Please do not vote for financial reasons alone. Please do not cut our conservation programs and organic farming incentives. The land is what we and our neighbors survive on. Big agribusinesses are not the backbone of our nation; we, the people with calloused hands and muddy boots, are—and we are depending on you. Thank you.

COMMENT OF CLAUDIA RUCK

Date Submitted: Saturday, May 19, 2012, 6:57 a.m.

City, State: Canaan, CT

Comment: Families have a right to a healthy food supply. Organic foods that are cost efficient and readily available to consumers is imperative. The health of our nations children is at risk.

COMMENT OF DONNA RUDIGER

Date Submitted: Friday, May 18, 2012, 4:18 p.m.

City, State: Arlington, WA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: This legislation is important to the very survival of every food grower in the U.S. And, if the immigration laws continue to be pressed, there won't be harvesters available for getting the product to market. This is a crisis and it is time for someone in government to **Think** about all the cross-functional ramifications of NOT passing this bill? What are you gonna eat?

COMMENT OF LUAN RUDNICK

Date Submitted: Friday, May 18, 2012, 3:56 p.m.

City, State: Anamoose, ND

Producer/Non-producer: Producer

Type: Livestock

Size: 500-999 acres

Comment: We are not willing to eat GMO products or do we want to plant these products. Please get them off of the American food chain. Other Countries have recognized the dangers of these products and we want our government not the Chemical Industry to run our farm bill and get these foods off the market.

COMMENT OF SUSAN RUDNICKI

Date Submitted: Friday, May 18, 2012, 3:02 p.m.

City, State: Manhattan Beach, CA

Occupation: Home Gardener, Botanist, Beekeeper, Dental Hygienist, Mother

Comment: Commodity crops **Must** be stricken from the privileged status they have enjoyed with regard to price supports and subsidization! Vegetable and fruit and directly consumed crops have struggled with uneven competition from corporate Ag and Big Business, in a way the program from the 1930's Depression Era **Was Never Meant To Work**. Taxpayers are sick of giving money to big business Ag while our food supply is dominated by these players and the health and obesity problem of our country mushrooms with junk food made from cheapened commodity productions.

COMMENT OF JOHN RUEB

Date Submitted: Thursday, May 10, 2012, 10:39 a.m.

City, State: Amado, AZ

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Please support local hunger/food programs such as SNAP, TEFAP, and CSFP. Also support small, local producers such as myself. If you need to save money, cut subsidies to commodities.

COMMENT OF JONATHAN RUF

Date Submitted: Friday, May 18, 2012, 4:44 p.m.

City, State: Decorah, IA

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: With the upcoming farm bill, politicians in Washington (both democratic and republican) are about to again give away massive amounts of subsidies, mostly to go to big agribusinesses.

This needs to stop. Large scale industrialized Agriculture has greatly contributed to the loss of soil, air and water pollution, as well as causing problems for the utter important honey bee.

I want a new way forward for the planet's future. Please level the playing field so that small farmers can succeed. Local food systems are of utmost importance at a time when there are billions of humans scampering for the last oil reserves.

Thank you for considering my comments.

JONATHAN RUF.

COMMENT OF VICTORIA RUFF

Date Submitted: Saturday, May 19, 2012, 7:51 a.m.

City, State: Cambridge, MA

Occupation: Office Manager

Comment: I watched a horrible, horrible video this a.m. about how the animals are being treated at a farm that Tyson Foods get their animals from. Something needs to happen to those individuals who are torturing those animals as I type this. Please send someone to investigate—here is the link to the video—see for yourself the horrible conditions they are “living” in: <http://youtube/bNY4Fjsdft4>.

COMMENT OF LISA RUFO

Date Submitted: Sunday, May 20, 2012, 10:48 a.m.

City, State: Sarasota, FL

Occupation: Artist

Comment: We need to foster a better agricultural policy in this country. We need to rethink how we grow our food and how we raise our livestock. Local diverse farming is cheaper and more healthy. In our own community we have one small local market and it is packed with people who want local and healthy tasty food. People want the changes to a healthier way of life.

COMMENT OF CHRIS RUIZ

Date Submitted: Saturday, May 19, 2012, 4:24 p.m.

City, State: Austin, TX

Occupation: Bartender

Comment: We need to encourage local urban farmers to continue to produce high quality products that can be used in local establishments and discourage subsidizing huge factory farms.

COMMENT OF COLTER RULE

Date Submitted: Friday, May 18, 2012, 12:19 p.m.

City, State: Falls Village, MA

Occupation: Actor

Comment: We were once an Honest Agrarian Democracy built on Truth and Hard Work. Don't let me say that those Values and Qualities are a Thing of The Past. Pass a sensible Bill that supports Independent Organic Farmers and Rids us of these Insane Subsidies that promote Abuse and Unfair market dominance by Large Corporations. Tell The Truth and Vote Fairly!

COMMENT OF RACHEL LYN RUMSON

Date Submitted: Sunday, May 20, 2012, 11:28 p.m.

City, State: South Portland, ME

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. Rep. Pingree's work on this is appreciated by a lot of Maine People for sustainable food system. I am a mother, and occupier, a trainer and a discerning farm product consumer. I'd like to share my support for programs that help the next generation of growers build strong farm businesses. **It Is Essential That The Food Supply Chain Get Shorter.** As it's estimated that 125,000 farmers will retire in the next 5 years, it's absolutely critical that farm bill programs help citizens get started in this challenging field. The only hope I can imagine for our youth facing staggering unemployment and economic depression is that they become engines in their own local economies. That means producing. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is

tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.

- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

RACHEL LYN RUMSON.

COMMENT OF MARYE RUNNELS

Date Submitted: Friday, May 18, 2012, 5:07 p.m.

City, State: Petal, MS

Occupation: Homemaker and Homeschooler

Comment: I support Local Foods and Farmers and Jobs Act (H.R. 3286).

I support the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

I support maintaining the EQIP Organic Initiative.

We need organic research! Companies like Monsanto are not only putting farmers out of business, they are feeding poison to our children. We have to stop money making companies from destroying organic farmers. What good does it do to put food on the plates of Americans when that food is causing allergies and cancers. Show us that you hear the informed voters cry for change by not placing limitations on crop insurance subsidies. We need to plan for our futures and re-attach the soil erosion and wetland conservation requirements to crop insurance programs. This committee has failed to do the full reform that is needed. This is your chance to show us that you care about the American and stop lining your pockets with big businesses money.

COMMENT OF SHELLY RUNNING

Date Submitted: Friday, May 18, 2012, 8:39 p.m.

City, State: Okarche, OK

Occupation: Retired

Comment: Its wrong to cave in to the corporate agricultural business that thrive on what amounts to the destruction of our environment, our health, and the well-being of those farm families who prefer to grow food and feed the people in a more sustainable way. There are several countries who ban what **You**, our politicians are allowing. You are a politician in office because people voted for you with the understanding that you would do what is in the best interest of the people you represent. It's time to put the money, the lobbyists, the power and the greed aside and do what needs to be done for the people, and for the farmers who want to grow non-GMO foods. **Stop** funding big agriculture and instead fund the family farmer who wants to grow organic. **Stop** allowing toxic chemicals into our food chain. **Stop** the practices that have led to the need to petition **You**. You already know what the people want.

JOINT COMMENT OF SHANNON & KIM RUNYAN

Date Submitted: Wednesday, April 18, 2012, 11:28 a.m.

City, State: McAlister NM
Producer/Non-producer: Producer
Type: Field Crops
Size: 500–999 acres

Comment: First, we want to say thank you for taking input on the new farm bill. Our comments are minute but we appreciate your consideration on the matter. We would like to see the food stamp program (SNAP) removed from the Agriculture Department and put into another agency. It needs to be in the Health & Human Services Department. The amount of money spent in the SNAP program makes average Joe American think farmers are over compensated. We are less than 2% of the population and we feed all of America and part of the world. We are **Not** rich and our job is **Not** easy. We are not asking for a hand out. This agency needs to be moved out of the Department of Ag.

Second, it would be better for farmers to have more realistic insurance dates. A farmer must insure Milo by March 15. On March 15 we do not know if we are going to have enough rain to plant Milo (in June) or not. Another example of this type of absurdity is on January 30 you have to insure your hay grazer (not planted until June). Once again how do you know if it is going to rain in June? These are small common sense things that truly would help farmers.

Thank you for your time,

SHANNON & KIM RUNYAN.

COMMENT OF JOHN RUPRECHT

Date Submitted: Tuesday, May 15, 2012, 2:09 p.m.
City, State: Avon, MN
Producer/Non-producer: Producer
Type: Livestock
Size: 50–150 acres

Comment: I have been committed to sustainable ag long before the recent flair in popularity. Please ensure that sustainable ag is incorporated into the new version of the farm bill.

COMMENT OF MACKENZIE RUSH

Date Submitted: Friday, May 18, 2012, 11:42 a.m.
City, State: Louisville, KY
Occupation: Chef

Comment: Please keep traditional foods available to patrons who wish to consume these products, *i.e.*, raw milk and limit regulations on small scale farmers who are selling to a loyal local market. These people are keeping our agrarian culture alive and our food safe. They need to be protected and cherished, not regulated and screwed around with. They are good people doing the noblest work on Earth, not to mention back breaking. These farmers don't get paid big money for their products but they do the work because they love it and we love them for it, truly. The founders of our country would be appalled if they knew our government was trying to keep one neighbor from selling **Food** to another neighbor, think about it that way! Thank you for your time and consideration.

COMMENT OF JEREMY RUSS

Date Submitted: Saturday, May 12, 2012, 2:15 p.m.
City, State: Tempe, AZ
Occupation: Handyman

Comment: Please think in a larger picture. Our land is over used and we need to move back toward more sustainable agriculture which does not have such strong negative impacts to our environment. The dead zones in the ocean at the mouths of the rivers are caused by fertilizer runoff and manure. We need to solve this and other crisis. Animal agriculture is ruining our planet at its current scale. Most of our farmland is producing food for animals. This should not be subsidized. We need to move the subsidies away from animal agriculture and toward organic and more sustainable types of agriculture. As a tax payer, I have no interest in having my tax money support the deaths of animals so that they can be food for someone. I am certain that you and your fellow lawmakers can see the big picture and start to remove subsidies from programs which are detrimental to our environment. The subsidies need to be moved away from standard farms to certified organic farms. Please stop subsidizing animal agriculture altogether. If we had an even subsidy for all organic farms per pound of produce of any sort, the market would dictate what

foods need to be produced in a more fair way. As it is now it is more costly for a person to eat a healthier diet. The subsidies which are set up for corn, cotton, wheat, rice, soybeans, and others are unfair and detrimental to our land. These subsidies are also helping cause unhealthy lifestyles. We need to be good stewards of our land and help others be good stewards of their land. Please consider my statements and help to ensure all people can live healthier in a healthy environment.

COMMENT OF MARK RUSS

Date Submitted: Monday, May 14, 2012, 12:37 p.m.

City, State: Orlando, FL

Occupation: Nonprofit Organization

Comment: As a leading representative of The TBS Goodwill Center in cooperation with Children's Agriculture and Science Adventures, we would like to make a request.

We need to pass a farm bill that takes into consideration the current needs of the people in our communities. Many of the families and individuals that we assist are in a position of need because the monies they get on a weekly, biweekly or monthly basis just doesn't quite go far enough to carry them without the need for some help. We unfortunately do to the slow economy are seeing new recipients sign up every week for food assistance. With TEFAP being one of the integral parts of us getting out needed food, it certainly doesn't need to be cut or reduced. We hate having to turn people away, and that happens even now because of the growing demand. If we were too loose the TEFAP that we are currently receiving if would greatly reduce our ability to continue distributing needed nutritious food. Many of our recipients are seniors who are on fixed incomes and working mothers with children. Some of families receive food stamps (SNAP) but let us know that it just isn't enough to make it through the month.

Do pass a farm bill that will help us to help strengthen our communities, which makes for a stronger, safer environment for all. We are doing our part to give something back, we need you in congress to do it as well.

COMMENT OF JAMES RUSSELL

Date Submitted: Friday, May 18, 2012, 2:19 p.m.

City, State: Signal Mountain, TN

Occupation: Retired College Professor

Comment: I am a volunteer at a local farmers' market and buy almost all my food (meat, vegetables, *etc.*) there. It tastes better and is better for the environment. No long distance trucking. An article I saw in a reliable source stated the only 1.8% of American food came such local sources. That is disgraceful. We can do better.

COMMENT OF JULIA RUSSELL

Date Submitted: Friday, May 18, 2012, 4:30 p.m.

City, State: Meridian, ID

Occupation: Retired

Comment: We are living in freedom country where we can voice and do what we want to support local farms, have our own vegetable and fruit gardening, can access to buy organic seeds and even save our own seeds for planting next year, *etc.* We must obtain our freedom. We do not live in socialism country! Thanks!

COMMENT OF TREVOR RUSSELL

Date Submitted: Friday, May 18, 2012, 11:02 a.m.

City, State: Minneapolis, MN

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Please honor the stewardship compact and tie access to crop insurance to basic conservation stewardship. Farm bill conservation compliance is essential to protecting our land and water and should be a prerequisite for access to publicly subsidized insurance programs.

Thank you.

TREVOR.

COMMENT OF ANNE RYAN

Comment: No bill should be more carefully conceived that a farm bill, as everybody should be conscious of the importance of safe policies on the products of an industry which feeds millions of people.

COMMENT OF KIMBERLY SAARIKOSKI

Date Submitted: Friday, May 18, 2012, 11:40 p.m.

City, State: Huntersville, NC

Occupation: Technical Writer

Comment: I support and want to see my political representatives also support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.
- Support small local farming—legalize the production, sale, purchase, distribution, and consumption of raw milk and raw milk products.

- Support the individual's right (Here in the state of North Carolina and the rest of the country) to decide for themselves and their children, whether or not to produce, purchase, sell, and/or consume Raw Milk and raw milk products, and whole, locally grown foods.
- Support the existence of local organic farming practices as prescribed by local organic farmers.
- Support the development and creation of intelligent and common-sense laws & regulations, which are designed to work with and support the existence of farms of various sizes.
- the abolishment of regulatory practices that create one-size-fits-all laws and regulations, which apply to various sized farms.

I support the idea that I would like to see politicians remind themselves and one another that they are elected to **Serve** the public, and **Not** to Dictate laws to the public. Politicians and government workers are public servants paid by taxpayer money.

COMMENT OF THERESA SABATINI

Date Submitted: Saturday, May 19, 2012, 8:02 a.m.

City, State: Cheswick, PA

Occupation: Professor

Comment: The farm bill as it stands supports mega agribusiness and not small and medium farmers. And by supporting commodity crops and not freshly consumable vegetables and fruits, it damages the health of Americans by making processed foods cheaper than fresh. Use some common sense. Get your hands out of the corporate tills and back to work for the people!

COMMENT OF PAUL SABOL

Date Submitted: Friday, May 18, 2012, 12:36 p.m.

City, State: New Hampton, NH

Occupation: Retired Telecommunications Technician

Comment:

1. Shut down Monsanto—close all GMO controlling activities and producing facilities.
2. Shut down round-up/collect and destroy all stockpiles.
3. Fine Monsanto for all damages caused to small farmers for destroying seed stocks and family farms.
4. Require FDA/USDA/CDC/other Gov't entities divest themselves of all employees with Monsanto/Big Pharma based work experience.
5. Restrict all State Agencies that control farm production in the same manner.
6. Tell gov't to take their head out of where the sun don't shine and learn common sense!

COMMENT OF LAURIE SACKLER

Date Submitted: Friday, May 18, 2012, 11:59 a.m.

City, State: Brooklyn, NY

Occupation: Homemaker

Comment: Nothing could be more important to the health of our families than a consistent source of quality food, raised by farmers who use non-GMO seeds and practice sustainable and preferably organic farming methods. The large agribusinesses and chemical companies such as Monsanto, which have been supported by government programs, have tried their best to drive out small family farms where sustainable farming is possible. They have repeatedly and successfully been able to obscure the fact that a large profit is their only goal and that healthy and humane practices are neither necessary or profitable. I support the labeling of all GMO foods because I heartily wish to avoid consuming them. Please think carefully about what the majority of the country is deeply concerned about—the health of our families and a source of uncontaminated food which has been raised humanely and sustainably.

COMMENT OF JIM SADLER

Date Submitted: Friday, May 18, 2012, 12:33 p.m.

City, State: Granby, MA

Occupation: Designer

Comment: 20th century agricultural practices focused on quantity over quality using petroleum and chemistry in an attempt to cheat nature. We've succeeded in producing a lot of food and making a few people very wealthy, but we are destroying our natural resources and the health of our people as a result. It's time to change direction. Organic growers are proving that there is a better way feeding our nation. A farm bill should slam the door on our arrogant, greedy agribusiness instead favoring anyone from home gardeners to small and large farmers who are willing to commit to healthy, chemical-free soil and food products rich in nutrition.

COMMENT OF JESSE SADOWSKY

Date Submitted: Friday, May 18, 2012, 6:42 p.m.

City, State: Dickinson, ND

Occupation: Graduate Student/Research Assistant

Comment: Creating an environment to foster growth of organic farming is crucial to ensure food security and economic sustainability of agriculture. Continued investment in research will aid organic farmers to overcome production problems, improve production efficiency, and adapt lessons learned from successful organic and low-input farming operations for use by a broader cohort of producers.

These provisions to the farm bill will help achieve the above-listed objectives:

- Fully fund the Organic Research and Extension Initiative (OREI) at the 2008 level.
- Endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Support all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintain EQIP Organic Initiative and do NOT cut the Conservation Stewardship Program.

Thank you for seriously considering these suggestions.

Sincerely,

JESSE SADOWSKY.

COMMENT OF THOMAS SAGER

Date Submitted: Saturday, May 19, 2012, 12:35 a.m.

City, State: Rolla, MO

Occupation: Retired

Comment: Please:

1. Require Conservation Compliance for Taxpayer Subsidized Crop Insurance Programs in the 2012 Farm Bill.
2. Set reasonable limits on taxpayer-funded crop insurance subsidies to help keep costs from continuing their upward spiral.
3. Help grow jobs by retaining programs like the Value Added Producer Grants Program.
4. Help grow local farm economies and support healthy food in schools by providing flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.
5. Retain effective conservation programs in the farm bill that deliver clean water and wildlife benefits.
6. Grow farmers through mandatory funding for the Beginning Farmer and Rancher Development Program.

COMMENT OF DON SAITO

Date Submitted: Friday, May 18, 2012, 1:58 p.m.

City, State: Oakland, CA

Occupation: Unemployed

Comment: Organic farming is essential to the future health of everyone, everywhere. Please put greed in check, and do what's best for people, and the environment.

COMMENT OF STEVE SAKALA

Date Submitted: Saturday, May 19, 2012, 1:09 a.m.

City, State: Kona, HI

Producer/Non-producer: Producer

Type: Dairy

Size: Less than 50 acres

Comment: As a small scale agriculture producer I feel it urgent to convey the need for a healthy and just farm bill. I, as well as most small scale producers I know, are just making it by barely covering our basic costs and needs. We can not compete against the subsidies of corporate agriculture nor compare to the political influence. As an independent family farmer I suggest the following;

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

These are but a small step to maintaining our nations family farming roots.

COMMENT OF MARK SALAMON

Date Submitted: Wednesday, May 09, 2012, 6:28 p.m.

City, State: San Mateo, CA

Occupation: Library Technician

Comment: Stop subsidizing unhealthy and injurious corporate agribusiness producing wheat, corn, and factory farmed animals that are all sustained with pesticides, genetic modification, growth hormones, and antibiotics. Switch government funding support to small family owned farms, organic agriculture, and the production of fruits and vegetables.

COMMENT OF JOSH SALANS

Date Submitted: Friday, May 18, 2012, 1:36 p.m.

City, State: San Jose, CA

Comment: Dear Zoe,

You need to know GMO Corn effects my health directly upon consumption. DO not allow the shills of Monsanto money tell you that GMO's are safe. My butt takes on hemorrhoids the size of golf balls for up to 24 hours after consuming a product with non-organic **American Corn**. This is because 90% of American non organic corn is grown with Monsanto's GMO seed which contains the Cauliflower Mosaic Virus which is implicated in Irritable Bowel Syndrome—just in case you did not know these facts. The Virus manufactures or turns on the pesticide gene in every cell of the corn plant, and every cell in each corn seed of the ear of corn. This virus and pesticide remains viable through the life cycle of the corn as it makes it's way into the thousands of corn based products that fill our grocery shelves, you know ALL soda pop, all candy from American suppliers, all processed food of any kind all contain some form of corn starch, corn sugar, corn syrup, baking powder! All cause my symptoms and therefore 2/3 of American food I cannot eat—it also effects my restaurant choices and food there. I am being threatened in my homeland with poisoning by Monsanto and those who support the growing of poisonous American corn. Please do something to stop this. An Organic farm Bill, that outlaws Genetically Modified Organisms in our soil and our food products. Its poison Zoe—that means the perpetrators of this food stuff should be arrested and convicted of poisoning the American people. My bloody bowels not withstanding there are a whole slew of other GMO products that contain man made virus and such or are impervious to Roundup. And FYI all of these are being increased in strength as the bugs get used to the poison. And don't get me started on the deterioration of American soils. We are so bloody destructive in our farm policy today. Tear it up and rebuild without the poison makers having a word edgewise.

Thank you Zoe for all you can do!

COMMENT OF RAYANN SALAZAT

Date Submitted: Friday, May 18, 2012, 2:06 p.m.

City, State: Houston, TX

Occupation: IT Specialist

Comment: I am a mother of 3 children and I have had to learn that the foods on the shelf are not good food, the hard way. It is discouraging that I have to start at ground zero to teach my children, what is **Good For Your Body** (healthy) food and what is not. I have a child with Autism, that is so limited in his food selection

due to food sensitivities. For our future, please provide the *Best—Good For Our Body Foods*. Thanks.

COMMENT OF TERESA SALEEM

Date Submitted: Thursday, May 17, 2012, 5:57 p.m.

City, State: Austin, TX

Occupation: Computer Technician

Comment: Food is a basic necessity for all people. Some people are not able to provide for themselves (children and the elderly). Therefore, there is a need for programs like SNAP, TEFAP, and CSFP. The food programs listed help protect many children and elderly American from starvation. Please ensure food programs such as SNAP, TEFAP, and CSFP receive substantial funding.

COMMENT OF MARY SALOMON

Date Submitted: Friday, May 18, 2012, 8:18 p.m.

City, State: Ballston Spa, NY

Occupation: Speech Language Pathologist

Comment: Dear Members of the House Committee on Agriculture,

It is time to even the playing field. Support small organic farms. The people of the United States of America have the right to non-GMO, chemical free, locally grown food. Supporting our local organic farmers is good for our communities, our personal health, and the health of our planet. Pesticides and GMOs are scientifically linked to the death of our important bees, and to the development of superweeds and super bugs.

COMMENT OF PENNY SALUS

Date Submitted: Saturday, May 19, 2012, 11:46 p.m.

City, State: Eugene, OR

Occupation: LMT, Hearing Impaired Interpreter, Mom

Comment: I buy only organic. When and if we eat, we pay very close attention to how the animal was treated, what kind of life it lived and what kind of food it ate. I feel this is personal politics at its best. Where we choose to spend our money and the kind of agriculture we choose to support with that money is the best way to proclaim what is important to us. Food is so central to our being and to our long term health as people and as a race. We are so short sighted in so many ways. Food is a way that gives us sustenance in the present and affects our well being for our whole lives.

COMMENT OF DR. JOYCE SALVAGE

Date Submitted: Friday, May 18, 2012, 4:04 p.m.

City, State: St. Petersburg, FL

Occupation: Retired Teacher & Adjunct Professor

Comment: The way animal food products is produced in this country is disgusting and immoral. Beyond that, it is not natural to add all kinds of hormones, antibiotics to unsanitary conditions.

Re: plant products, it's almost impossible to avoid genetically modified foods, like high fructose corn syrup and pesticides, since they seem to be in almost everything. Not everyone can afford to buy their food at health food stores or Whole foods type stores. This farm bill will help to rectify the situation and ensure healthier foods for Americans to eat. We need to prevent disease, which will end up reducing costs to taxpayers, as well. This is supposed to be a "developed" country! Use science and medicine to inform agriculture!

Dr. JOYCE SALVAGE,
St. Petersburg, FL.

COMMENT OF DEBORAH SALZ

Date Submitted: Saturday, May 19, 2012, 1:13 p.m.

City, State: Boynton Beach, FL

Occupation: Licensed Physical Therapist

Comment: I am part of a growing number of people who feel that protecting our health and having the freedom to make sensible choices for our health is our most important right. We cannot do that if our choices (*i.e.*, organic food choices) are restricted or limited in anyway. Please protect this **Most** important freedom and do

not cave to the special interests (\$\$\$\$) of agribusiness *i.e.*, Monsanto. We are counting on **You** to protect our families (and yours) with regards to the decisions you make today, impacting many generations to come!

The one area of healthcare reform that appears not to be addressed enough is personal responsibility and healthy lifestyle choices. You can help promote that by supporting Americans' rights to watch what they put into their bodies. We need **You** in this battle of health interests of individuals *versus* agribusiness/chemical behemoths. Please support us and we will not forget you at the polls! Thank you for your assistance.

COMMENT OF DANIEL SAMBOR

Date Submitted: Wednesday, May 02, 2012, 7:47 p.m.

City, State: Providence, RI

Occupation: Student

Comment: I would like the farm bill to support farmers' markets, community gardens, urban farms, and organic agriculture. A healthy, sustainable food system should include these because they produce food without harming our environment. The farm bill should also have less subsidies for large corn farms. These large corn farms severely diminish the soil quality and thus must use synthetic fertilizers and pesticides that run off fields and contaminate our waterways.

COMMENT OF CHRISTINE SAMPLE

Date Submitted: Thursday, May 17, 2012, 6:46 p.m.

City, State: Muscatine, IA

Occupation: Retired

Comment: America needs a farm bill that makes healthy food widely available to all Americans—including schoolchildren! We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers. We need to help the small organic farmers who are trying to provide healthy food to us, so we can lead a healthy life.

COMMENT OF KRISTINA SAMPSON

Date Submitted: Friday, May 18, 2012, 1:27 p.m.

City, State: Vail, CO

Occupation: Consultant

Comment: Dear House Agriculture Committee,

As a breast cancer survivor, what I put into my body is of the utmost importance to me. Please do not let companies like Monsanto determine what we will eat for the rest of eternity.

A recent local newspaper article discussed the increase in cancer rates among dogs, and one of the reasons stated is their exposure to chemicals in the environment, including fertilizer. Do you folks not realize that the smallest of us are the proverbial "canary in the coal mine". Don't just dismiss this because it is dogs and not humans. It is only a matter of time before it catches up with every single one of us. There is a reason the breast cancer rate has risen from 1 in 30 women in the 1970s to 1 in 8 now, and environmental toxins play a large part in that. As an MD on the *CBS Sunday Morning* show stated last week, the breast is like a sponge that soaks up everything in its environment, including toxins. **Wake Up!** You **Must** protect organic farmers and not let Monsanto and its ilk do everything in their power to destroy the organic farmer. And please do **Not** let them release genetically-modified salmon into the wild.

KRISTINA SAMPSON.

Occupation: Forrester

Comment: The industrialization of our food supply has resulted in unhealthy practices, at the farm and at the dinner table. Return the power of food production to families and stop the industrialization of our farms.

COMMENT OF DIANE SAMUELSON

Date Submitted: Friday, May 18, 2012, 5:17 p.m.

City, State: Hilton Head Island, SC

Occupation: Shaklee Sales Leader

Comment: I fear for the health of our food supply with the nonsense that is going. What are people thinking? We are one of the unhealthiest nations in the world and it is about time we stood up for the people and companies that are doing the right thing producing organic products and procedures that are safe and beneficial to all of us. Monsanto is the worst of the lot trying to not allow labeling of GMO's. This is so irresponsible and abhorrent.

COMMENT OF JENNIFER SANBORN

Date Submitted: Friday, May 18, 2012, 10:26 a.m.

City, State: Winona, MN

Occupation: Software Engineer

Comment: Please consider incentives for farmers to grow **Organically**, and to move farmers away from GMO and Monsanto-driven crops. A safer food system is **Essential** for us as a country and as a member of the world. Please increase the number of inspectors of large operations.

COMMENT OF MARTA SANCHEZ

Date Submitted: Sunday, May 20, 2012, 2:35 p.m.

City, State: Seattle, WA

Occupation: Secretary

Comment: Please recognize that seeds spread via wind, water, *etc.*, and GMOs are therefore ruining our organic crops. There is a large percentage of our country trying to live an organic lifestyle to make sure the nutrients for our families—both biological and logical are not contaminated. Let alone the mindset of a good life for animals prior to their sacrifice reaching our plates. Please ensure labeling lets me—the public, your constituents know when food is actually organic or kosher or altered with hormones. Thank you.

COMMENT OF JUDITH SANDEEN

Date Submitted: Tuesday, May 08, 2012, 2:39 p.m.

City, State: Hastings, NE

Occupation: Retired Registered Nurse

Comment: Please protect funding for critical Federal nutrition programs, including the Supplemental Nutrition Assistance Program (SNAP) as you work to re-authorize the farm bill. I keep hearing that churches and other charitable organizations should feed the poor. While many of those organizations do just that, they do not have sufficient means to care for all the hungry in our country. In addition, those efforts are, by necessity, piecemeal. We are not, or at least, have not been, a country that neglects its poor and hungry. Please do not go back to the time of poor farms.

COMMENT OF MORRIS SANDEL

Date Submitted: Friday, May 18, 2012, 2:25 p.m.

City, State: Austin, TX

Occupation: Retired Graphic Design/Computer Tech

Comment: Ban genetically modified produce. Ban toxic fertilizers, pesticides and all other additives from our food. Support small farms, those who produce organically grown products and limit power of “big agriculture” money-driven manipulations.

MO SANDEL.

COMMENT OF JENNIFER SANDERS

Date Submitted: Friday, May 18, 2012, 7:06 p.m.

City, State: Jacksonville, FL

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Difficult as it is to believe, hardly a century ago we were able to feed ourselves, as a country, and even help others. Backyard gardens and nearby farms became unfashionable to city planners. Now, almost full circle, we eat Frankenfoods, then pop pills at alarming rates attempting to manage effects of our malnutrition:

diabetes, heart failure & obesity. The correction is elementary; return to what worked. Synthetic inputs (GMOs) don't work in animals or humans without grave (literally), consequences. Take the moment to consider the unhealthy future for your own family, if we continue on what is an unsustainable and un-natural system of agriculture. Real food is good food, make the farm bill support real food and real farms. Thank you.

JENNIFER SANDERS,
[Redacted]

COMMENT OF JULIE SANDERS

Date Submitted: Friday, May 18, 2012, 12:45 p.m.

City, State: Fishers, IN

Occupation: Stay-at-Home Mom

Comment: As the main supplier of food to my family—I shop, store, and cook for those I love—I want to let you know how important H.R. 3286 is to the health and well-being of my family.

Please know that I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

I support the full funding of conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

I support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

And I support maintaining the EQIP Organic Initiative.

Please do not put the interests of agribusiness and insurance companies ahead of the health and well-being of our nations families.

Thank you for considering all the perspectives and making a decision based on the interests of health, small farmers, and the future of agriculture in our country.

COMMENT OF KENDALL SANDERS

Date Submitted: Saturday, May 19, 2012, 2:55 a.m.

City, State: Everett, WA

Producer/Non-producer: Producer

Type: Dry Beans & Peas, Greenhouse/nursery, Nuts, Poultry/poultry products, Vegetables

Size: Less than 50 acres

Comment: The love of money is the root of many evils. We need to consider the consequences of our actions and not be motivated purely by the desire to profit. We must take care of our resources especially our food and water supplies. Organic and natural farming is one way of caring for these resources that we all need. Please consider what is at stake here. We need to create a healthy food bill to replace the farm bill. Large corporations are monopolizing this field and we need to realize this is not healthy for us or our posterity. Please research how we can do this better before it is too late!

COMMENT OF WAYNE SANGSTER

Date Submitted: Wednesday, March 14, 2012, 9:22 a.m.

City, State: Pineview, GA

Producer/Non-producer: Producer

Type: Field Crops

Size: 301–500 acres

Comment: As a producer and Agricultural Banker I feel the current farm bill offers a sufficient safety net. I would like to see the FSA Loans Programs be sufficiently funded. Currently this is a huge problem I have notice as producers are eligible for FSA Loan Programs however there is too little funding available to cover the dire need of these producers.

COMMENT OF DAGNY SANMIGUEL

Date Submitted: Friday, May 18, 2012, 5:59 p.m.

City, State: Sacramento, CA

Occupation: Medical Transcriptionist

Comment: Wholesome, unadulterated food is a fundamental need for good health. It is the proper function of government to ensure its adequacy and avail-

ability to all citizens, and supporting small farmers rather than corporate monsters is basic to this mandate.

COMMENT OF SARAH SANTORA

Date Submitted: Thursday, May 17, 2012, 12:50 p.m.
City, State: Salem, CT
Occupation: Food Bank Employee
Comment: Dear Committee:

A strong nutrition title in the farm bill is the only thing keeping Americans from starving on the streets. When the economy is down, at least there is still food—that is why cutting it is short sighted and dangerous. Block granting it will cause millions of voters to lose the ability to eat. That will cause an increase in theft and violent crime. Those on the committee who care about small government generally also care about avoiding a police state, but if you take away desperate people's access to food that is just what you get—increased spending in law enforcement and incarceration. It is a smart investment to keep SNAP (food stamps) and other assistance like TEFAP (temp emergency food) available in a time of need. It's even Biblical, for those who say it's not. "Whatsoever you do to the least of my brothers, that you do unto Me".

SARAH SANTORA,
 Salem, CT.

COMMENT OF JANICE SANTOS

Date Submitted: Friday, May 18, 2012, 7:33 p.m.
City, State: Caribou, ME
Occupation: Secretary—Department of Defense

Comment: The past practices of Agribusiness have decimated our bees, our land, the food has no nutritional value and I am certain we will find out soon that it has also caused the fungus that is killing our bats.

We need natural, accountable farming practices if we want to survive.

COMMENT OF OMAR SANTOS

Date Submitted: Tuesday, March 20, 2012, 12:20 p.m.
City, State: Elgin, IL
Occupation: Engineering

Comment: Local and regional food systems help create jobs and spur economic growth in rural and urban communities. Please support investment in this growing sector by including the Local Farms, Food, and Jobs Act in the next farm bill.

The future of family farming and ranching in America depends upon ensuring that would-be new farmers have access to land, capital, and markets. Please support beginning farmers and ranchers by including Beginning Farmer and Rancher Opportunity Act in the next farm bill.

Farmers depend on quality, cutting-edge research to stay successful—please make sure the next farm bill invests in this crucial work.

Working lands conservation programs help farmers maintain productivity while protecting our air, water, and soil, protect these programs from unfair funding cuts!

COMMENT OF JIMENA SARAVIA

Date Submitted: Friday, April 06, 2012, 2:46 p.m.
City, State: San Francisco, CA
Occupation: Digital Artist

Comment: Title I—Stop with the Genetically Engineered commodity crops. They are not safe for the public to be eating! We've lost 30% of the micro-nutrients in our soil due to pesticide use causing severe malnutrition.

Title IV—Only organic fruits and veggies and whole grains for SNAP, since animal proteins are so detrimental to the lining of your arteries, we will eventually have to pay for their open heart surgery or cancer treatments (watch Forks Over Knives)

Title VII—needs major funding. Trees are what keep us alive, they clean our air thus reducing the amount of asthmatics and provide quality of life. Humans are animals after all, we need nature!

You need a new title to help fund a more local way of sourcing food. If you have grass you should be growing your own food and trying to be more sustainable.

COMMENT OF STEPHEN SARBIEWSKI

Date Submitted: Friday, May 11, 2012, 8:57 p.m.

City, State: Redmond, WA

Occupation: Retired

Comment: No more sugar subsidies for growers. We are disgusted that private growers receiving Federal subsidies have locked out union workers refusing to pay them a fair wage. Please stop giving private growers Federal funds for growing sugar.

COMMENT OF MARLENE SARNAT

Date Submitted: Friday, May 18, 2012, 1:54 p.m.

City, State: Rio Vista, CA

Occupation: Retired

Comment: The use of GMO crops leads to higher levels of pesticides and weeds and insect mutations which keep the cycle going higher and higher. This must be stopped to allow natural and organic farming to maintain the balance and provide safe, sustainable, and healthy food production.

COMMENT OF MARLJEANNE SARRAILLE

Date Submitted: Sunday, April 29, 2012, 5:25 p.m.

City, State: Pittsburg, CA

Occupation: Disabled

Comment: I support the strengthening and protecting programs like TEFAP and SNAP in the farm bill. Stop helping the big corporate farmers and assist the small family farms.

COMMENT OF TARA SARRAZIN

Date Submitted: Friday, May 18, 2012, 11:56 a.m.

City, State: Eagan, MN

Occupation: Accounting

Comment: The farm bill is important to so many people across this country, including a growing number that are very concerned about how their food is grown and what is used to grow them. While companies, like Monsanto, seem to have many in government in their back pockets, it is time for politicians to understand that people want to eat chemical-free grown food and know that their foods are free of GMO. As a mother, wife, and person concerned about what goes into my body and that of my family I want to show my full support for all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). I support the full funding of conservation programs like the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). I also support maintaining the EQIP Organic Initiative. I buy organic foods for a reason. I don't want GMO foods in my house and I don't want to support farmers or businesses that grow or sell them.

Please look around at the growing organic industry and the outcry of people tired of the government listening and making decisions in favor of big businesses. This bill can help support quality programs and initiatives if the House Committee takes a stand to back them.

COMMENT OF MICHELLE SARTOR

Date Submitted: Friday, May 18, 2012, 9:30 a.m.

City, State: Maitland, FL

Occupation: Wellness Coach

Comment: As a wellness coach, I know how important local, preferably organic, produce and meat are to good health. I encourage you to support measures to stimulate small, family farms. At the same time discourage large-scale industrial farming that typically requires pesticides, herbicides, fungicides, hormones and antibiotics which limit variety and deplete our soil.

Fully fund programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system.

Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

COMMENT OF SAN MALO SASHA

Date Submitted: Friday, May 18, 2012, 6:55 p.m.

City, State: Pahoa, HI

Producer/Non-producer: Producer

Type: Fruits

Size: Less than 50 acres

Comment: We need to support small farmers. We need to support organic farmers. There is too much subsidy for huge corporation farms that already control the market. It's the small farmers who need help.

COMMENT OF BRIAN SATTERWHITE

Date Submitted: Friday, May 18, 2012, 1:50 p.m.

City, State: Portland, OR

Occupation: Manager

Comment: End subsidies to large corporate farms. They don't need them. Foster the creation and viability of small family farms. End all subsidies for corn and soybeans. These can stand on their own in the market. Cheap corn is a key contributor to our America weight problem. The farm bill is driving the cost of Medicare/Medicaid up.

COMMENT OF BRIAN SAUER

Date Submitted: Friday, May 18, 2012, 12:41 p.m.

City, State: Kansas City, MO

Occupation: Scientist

Comment: As one who grew up on a small dairy farm and have spent my entire adult life as a molecular biochemist I strongly urge you to support:

- (1) full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- (2) Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- (3) The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- (4) Maintaining the EQIP Organic Initiative.

Corporate interests may well try to convince you otherwise. Of course they will not be picking up the tab for the dead zone in the Gulf of Mexico, the rise of antibiotic resistance in bacterial pathogens, or for the rise in obesity/diabetes in this country—all of which can in part be reasonably attributed to unsound agricultural policies.

COMMENT OF ERIC SAUERHAGEN

Date Submitted: Wednesday, April 18, 2012, 9:24 p.m.

City, State: Bend, OR

Producer/Non-producer: Producer

Type: Field Crops

Size: 151–300 acres

Comment: As a young rancher I am interested in congress investing in the future of America's farmers. We need support in the Beginning Farmer and Rancher Development Program.

COMMENT OF LOIS SAUNDERS

Date Submitted: Friday, May 18, 2012, 12:49 p.m.

City, State: Nixa, MO

Occupation: Retired

Comment: I buy from local farmers 95 percent of the time. They produce food without chemicals, antibiotics or hormones. The food I eat tastes good and is

healthy. Food from CAFO's is terrible tasting as is most processed food. I also shop in health food markets all year long.

COMMENT OF CHRISTINE SAVARESE

Date Submitted: Tuesday, May 15, 2012, 11:35 a.m.

City, State: Ft. Pierce, FL

Occupation: Holistic Health and Nutrition Counselor

Comment: We elect our Congressional Reps to represent the People, not the Corporations who feed us pesticide infested, factory farmed, unhealthy foods. I want **My** money to support Nutrition, not be cut by your outrageous Austerity measures. You say America is broke, well you are lying, you just want to enrich your donors. Congress must represent the people, not the crooks who purchase your loyalty.

COMMENT OF ROSEMARIE SAWDON

Date Submitted: Friday, May 18, 2012, 12:43 p.m.

City, State: Blacksburg, VA

Occupation: Retired

Comment: I realize that sustainable farming practices do not add to profits for the big agricultural conglomerates as our soil, water and air become more polluted, and that they support your political campaign. However, sustainable farming is necessary for a healthy, livable plant. Do you have children, grandchildren?

COMMENT OF CYNTHIA SAWTELL

Date Submitted: Friday, May 18, 2012, 1:42 p.m.

City, State: San Anselmo, CA

Occupation: Retired

Comment: It is time to put the interests of a health-seeking public ahead of the special interests of Big Ag. Stop subsidizing and favoring the interests of large, global agribusinesses and start developing policies with the best interests of public health in mind. Small, local farmers provide **Much** healthier food options than these huge corporations do . . . and they are not causing the diabetes epidemic!

COMMENT OF CARYL SAWYER

Date Submitted: Saturday, May 19, 2012, 7:02 p.m.

City, State: Sandston, VA

Occupation: College Instructor

Comment: Please note: The public is fed up with Big Agriculture running roughshod over everyone, especially the organic farmers. And just what is a giant chemical company doing in agriculture? Maybe financing campaigns?

COMMENT OF MARTHA SAXTON

Date Submitted: Friday, May 18, 2012, 12:05 p.m.

City, State: New York, NY

Occupation: Professor

Comment: We should stop subsidizing huge agribusinesses to produce enormous quantities of corn and use huge amounts of lethal pesticides which end up in our food and water. We need support for sustainable practices that are good for our soil, water and air.

COMMENT OF JONI SAYLOR

Date Submitted: Sunday, May 20, 2012, 12:24 p.m.

City, State: Phoenix, AZ

Occupation: Industrial Designer

Comment: Please maintain critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled.

COMMENT OF LINDSEY SCALERA

Date Submitted: Saturday, May 19, 2012, 10:29 a.m.

City, State: Ypsilanti, MI

Occupation: Community-Based Educator/Organizer

Comment: Dear Members of the House Committee on Agriculture,

Thank you so much for this opportunity to share with you my concerns and ideas for the next farm bill. Investments in sustainable food and farming practices have multiple positive effects on our nation's health, wellness, and wallets.

First, I must express that it is imperative that we pass the bill this year, in 2012. As the farmers, emergency food providers, and food advocates I interact with in Michigan are planning for the future while providing for the present, they need to know what food and farm policies and programs they can expect as we move into 2013 and beyond.

In addition to passing the bill in 2012, there are several other points I urge you to consider in your process.

1. America needs a farm bill that creates jobs and spurs economic growth. Where I live in Ypsilanti, Michigan, food and farming businesses are part of a thriving revitalization of our local and regional economy. More and more, people want to understand and take part in our food system. Lots of small to medium food and farming enterprises have sprouted up in Southeast Michigan, collectively contributing to our communities by providing healthy, affordable food along with jobs. By supporting programs like the Value-Added Producer Grants Program and guaranteeing \$30 million of mandatory funding per year, you can help VAPG provide seed money to help farmers innovate in agriculture and create jobs while securing a sustainable path to market-based farm profitability.

2. America needs a farm bill that makes healthy food widely available to all Americans—including schoolchildren! I have personally seen sixth graders in Wayne, Michigan light up as they learned how to plant potatoes in their school garden. Even as they learned about the importance of making healthy food choices, the snacks and lunch they are provided with do not help reinforce that lesson. We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.

3. America needs a farm bill that protects the ecosystems of which we are a part and on which we rely. I am 28 years old, and I am concerned about the soil, air, water, and wildlife not only in the United States, but around the world. Growing up in Michigan and visiting family all over the country, natural landscapes are an active part of our daily lives. The health and regenerative ability of ecosystems are deeply connected to the future of our ability to farm and provide food for this country. As you write this bill, please protect the Conservation Stewardship Program from unfair funding cuts, and improve it by ranking applications solely on their conservation benefits. So many farmers count on CSP and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife—all while farming profitably!

4. America needs a farm bill that invests in the next generation of farmers and ranchers. As a co-founder of the Michigan Young Farmer Coalition, a grassroots organization networking young farmers and food advocates in our state, I can tell you with certainty that there are many young people in this country who are ready and willing to take on the responsibility of farming to feed our country now and through the next generation. As with any business, it takes a lot to break into farming and earn a livelihood. Over the past few years alone, I have seen young farmers who are well educated in both business and agriculture practices, both succeed and struggle as they work to establish food and farming operations. These young people, along with the others who are new to farming, are undeniable assets in this country. I urge you to please guarantee \$25 million per year in mandatory funding for the Beginning Farmer and Rancher Development Program. We are not alone in our efforts here in Michigan. Grassroots organizations like ours have sprung up around the nation, and in response, young farmers have started a national coalition as well, highlighting the need for a national strategy and commitment to support beginning farmer and ranchers entering agriculture. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new agriculture start-ups. I cannot urge you enough to please consider the next generation of food and farm business owners & operators as you write this bill.

5. America needs a farm bill that drives innovation for tomorrow's farmers and food entrepreneurs. Research, education and extension go hand-in-hand with supporting American farmers and ranchers. For every \$1 invested in publicly funded agricultural research, \$20 in economic activity is generated. Please fund the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investment in agricultural research is vital to con-

tinued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.

6. America needs a farm bill that provides protection for Americans who are struggling to feed their families. I urge you to refrain from cuts in Nutrition spending. All of the policies and programs I have advocated for above can only serve to help bolster economies which can provide pathways for many people in this nation to earn a livelihood in food and farming businesses, and all of the other economic activity that is generated from thriving local and regional food systems. However, as our Nation's churches and food banks struggle to keep up with the growing demand from many diverse Americans who are now in need of emergency food and longer-term assistance, we cannot consider any cuts to spending in this area. Emergency food providers have expressed the very real concern that they do not have the capacity to absorb the already proposed \$4.5 Billion in cuts to nutrition spending, let alone any more. Weakening SNAP and other nutrition spending would lead to more hunger and food insecurity as well as higher health care costs. I urge you to maintain SNAP funding and flexible structure, which has had decades of bipartisan support, and to continue to expand and improve on those innovative programs that help SNAP recipients and others gain access to healthy, fresh, affordable food.

Thank you so much for your consideration and for your dedication to securing our Nation's food and farming future.

Best wishes,

LINDSEY SCALERA,
Ypsilanti, Michigan.

COMMENT OF DEIRDRA SCANLON

Date Submitted: Sunday, May 20, 2012, 1:25 a.m.

City, State: Lewisburg, WV

Occupation: Nurse

Comment: The farm bill is **The** most pivotal piece in getting our citizens out of the disastrous obesity, heart disease, and diabetes down spiral we are on. Unhealthy food is cheap and available and healthy food is not. Please change the farm bill to subsidize healthy organic local foods. Please!

COMMENT OF MICHAEL SCHAD

Date Submitted: Friday, May 18, 2012, 4:31 p.m.

City, State: Fort Myers, FL

Occupation: HVAC

Comment: Keep the public's safety (your safety) in mind when considering GMO and Pesticide operations.

No one system should be subsidized or backed as America's system. No one system is fault proof, and in time it will become painfully obvious the effects of all these potentially dangerous chemicals have on the human body.

I fear that by then it will be too late.

COMMENT OF CYNTHIA SCHANTZ

Date Submitted: Saturday, March 17, 2012, 10:44 a.m.

City, State: Long Beach, CA

Occupation: Unemployed Archaeologist/Anthropologist

Comment: I support my local food bank, and I know they are struggling right now to meet the needs of my community. I ask that you pass a strong farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the millions of Americans struggling with hunger, and I urge you make them a priority in the next farm bill.

This is not about people being lazy, this is about hard-working people some with educational loans to pay off who had been working and living paycheck to paycheck. When the economy tanked and we lost our jobs and couldn't get new inferior jobs right away, we too became food (and utility and rent) insecure. This is not the USA of the 1950's the middle class is collapsing and we need a little help at this moment. Please keep American tax-paying citizens when passing the next farm bill.

Thank you.

COMMENT OF ALEA SCHECHTER

Date Submitted: Saturday, May 19, 2012, 1:37 p.m.

City, State: Paauilo, HI
Producer/Non-producer: Producer
Type: Specialty Crops
Size: Less than 50 acres

Comment: I am a coffee and organic vegetable farmer in Hawaii. I chose to change my lifestyle so that I could include farming to not just want a difference in my own life, but to be the change I wish to see in the world. It has been difficult and rewarding at the same time, yet I believe that the American government has a responsibility to small farmers and the economy to ensure a strong, sustainable, healthy food future for all of it's citizens.

There needs to be better access and resources for small farmers to learn about and receive grants and funding. It takes a lot to just be a farmer, getting the help we need, quickly and easily is essential and should not be a whole other "job" in itself for us to undertake.

Farms and farmers are the foundation of why America is a rich and prosperous country. If we want to remain this way, please give the support that this vital industry needs to produce the best possible products for American people to be healthy and happy.

Mahalo!

COMMENT OF BRUNO SCHEFFLER

Date Submitted: Friday, May 18, 2012, 9:12 p.m.

City, State: Houston, TX

Occupation: Construction Worker/Pipefitter

Comment: Please do not make cut to the food banks. You people have given our money to countries who want to kills us. You have helped Detroit the car manufacturers with our tax dollars. You give billions to the rich oil companies. You give yourselves pay increase and benefits that the rest of us working people do without. And now you want to cut money to our food bank. No! These people need it and then some. I know this won't make a difference because you will justify whatever you do. But if you do make a cut into the food bank program it will be shameful. Help them like you've help yourselves.

Thank you,

BRUNO SCHEFFLER.

COMMENT OF KEN SCHEFTER

Date Submitted: Friday, May 18, 2012, 7:07 p.m.

City, State: Olathe, KS

Occupation: Operations Manager/Homeowner

Comment: We must move money away from direct subsidies and support sustainable/organic agriculture if we have any chance of maintaining a level of food production capable of meeting our future needs. Increase funding for the NOP and conservation programs!

COMMENT OF JACOB SCHEIDLER

Date Submitted: Saturday, May 19, 2012, 1:00 a.m.

City, State: San Francisco, CA

Occupation: Gardener

Comment: Hello,

I am writing in support of a farm bill that actively supports small scale, organic farmers, while cutting back on subsidies to industrial agribusiness. Current legislation makes it nearly impossible for farmers to diversify their crops, grow open pollinated varieties, or participate in small scale meat production. I urge you pass a farm bill that encourages farmers to move forward into a food system that is no longer dependent on patented seeds, petroleum, and synthetic chemicals, and is instead founded on smaller, local, organic, and sustainable practices.

Thank you.

COMMENT OF DONNA SCHEIN

Date Submitted: Tuesday, May 15, 2012, 11:23 a.m.

City, State: Annapolis, MD

Occupation: Food Service Executive

Comment: FNS and Nutrition education programs for K–12 are detrimental to the future health of our citizens. Please continue to fund programs at the necessary levels.

Thank you.

COMMENT OF SUE SCHELL

Date Submitted: Friday, May 18, 2012, 12:54 p.m.

City, State: Evanston, IL

Occupation: Author

Comment: Please consider sustainable agricultural means for farming. The pesticides not only are hurting us by the residue on our fruits & vegetables, but also is polluting our fresh water supply, which with global warming, is becoming more and more of a problem for many of the world's people.

Please think carefully about what we are doing to our future, if not for us, our progeny.

COMMENT OF DOUG SCHENKELBERG

Date Submitted: Friday, May 11, 2012, 9:44 a.m.

City, State: Chicago, IL

Occupation: Vice President of Advocacy and Outreach, Greater Chicago Food Depository

Comment: Dear House Agriculture Committee Members,

The Greater Chicago Food Depository appreciates the opportunity to provide comments on the farm bill. As the food bank for Cook County, the Food Depository distributes food through a network of 650 pantries, soup kitchens and shelters to 678,000 adults and children every year. Currently, 807,690 people in Cook County—one in six—are struggling to access food. Nearly one in four children doesn't know where their next meal is coming from. The Food Depository has served 58 percent more people at our pantries in the last fiscal year than the previous 3 years, and we could not provide current levels of food assistance without significant support from TEFAP, nor could we meet increased demand if current funding levels and structure of SNAP and other Federal nutrition programs were eroded.

We urge the House Committee on Agriculture to protect and strengthen SNAP in the farm bill, and keep in mind the following priorities:

- Oppose proposals to cap or reduce funding for SNAP, restrict eligibility, reduce benefits, or otherwise reduce access or participation in SNAP.
- Protect the adequacy of the SNAP benefit by restoring the cut to the ARRA SNAP benefit increase.
- Adjust the benefit amounts in a timely manner so it reflects current food prices at the time of purchase.
- Increase the minimum benefit so that elderly households receive at the least an amount equivalent to the floor set in the 1970s.
- Fully allow SNAP benefits to be adjusted when high housing costs consume more of a family's income.
- Improve earnings disregards and other benefit computation rules.
- Extend the program to needy people now excluded from benefits by arbitrary eligibility rules.
- Allow all states to operate Supplemental Security Income (SSI) CAP model that seamlessly enrolls SSI recipients into SNAP, and encourage other data matching initiatives.
- Provide adequate resources to states and community partners for administration of SNAP and outreach and nutrition education by restoring a greater Federal share in administrative expenses and enhanced Federal matches for state investments in operational improvement.
- Encourage better nutrition by maintaining nutrition education provisions and ensuring that retailer standards balance adequate access to stores with a range of healthy foods and moderate prices, as well as equipping all farmers' markets with EBT capability.

We also urge you to strengthen TEFAP and CSFP in the farm bill. Please include an increase in mandatory funding for TEFAP foods by providing a trigger that increases the funding level available for commodity purchases in times of high unemployment, and make TEFAP Storage and Distribution funds mandatory. In addition, we ask that the Secretary of Agriculture is given the authority to make bonus commodities available in times when unemployment rates are high. We also encourage

the Committee to transition CSFP to a seniors-only program, while grandfathering in current participants, and expand eligibility for the program from 130% to 185% of the Federal Poverty Line.

Once again, thank you for this opportunity to provide comments on the importance of Federal nutrition programs like SNAP, TEFAP and CSFP in the farm bill.

Sincerely,

DOUG SCHENKELBERG,
Vice President of Advocacy and Outreach,
Greater Chicago Food Depository.

COMMENT OF AMY SCHERER

Date Submitted: Saturday, May 19, 2012, 1:12 a.m.

City, State: Menlo Park, CA

Occupation: Sales

Comment: Don't want to see subsidies going to growers of wheat, corn and soy! Would like to see support to increase small farms again which are critical to production of healthier animals and produce that isn't laden with pesticides and hormones.

I just want to see quality vegetables available to all for great prices.

COMMENT OF CAROL SCHERICK

Date Submitted: Sunday, May 20, 2012, 7:05 p.m.

City, State: Jamaica, NY

Occupation: Retired

Comment: It is absolutely imperative that we begin to support the independent farmer and the healthy way he produces our food, and stop supporting Big Ag which is not only destroying our environment and land, but it making us a nation of sick people with the adulterated, chemical-laden food that it presents to the people.

COMMENT OF ROBERT SCHERMER

Date Submitted: Monday, May 07, 2012, 5:54 p.m.

City, State: Jericho, VT

Occupation: Retired Teacher

Comment: Our people are starving! Please support strong SNAP, TEFAP, and CSFP programs as for 1 in 7 Vermonters, many of them children, these programs are their only hope to avoid hunger and malnutrition. Unemployment and under-employment are endemic in the U.S. Now is not the time to cut back on these programs.

COMMENT OF PATRICIA SCHIEWE

Date Submitted: Saturday, May 19, 2012, 6:10 a.m.

City, State: Lake Oswego, OR

Occupation: Therapist

Comment: I just read an article about how the farmers are prospering and that now they are producing 3 times as much corn per acre but it did not mention the cost of the seed, chemicals, and fertilizers that it took to do that. Also did not mention the fact that that corn was laced with GMO toxins and had little nutritional value and that the people eating it were probably unhealthy and fat and the cost of keeping them healthy was skyrocketing adding billions to our nation's health bill.

COMMENT OF VALERIE SCHILK

Date Submitted: Saturday, May 19, 2012, 2:20 p.m.

City, State: Pahoa, HI

Occupation: Horticulture Crew at Wellness Center

Comment: Living in Hawaii, or anywhere really, it is critical to show local support to our farmers and friends. After reading the book, *Everything I want to do is Illegal*, my respect grew tenfold for all farmers across the world. Farmers market are the main source of our food intake here. Visiting at least 2 a week, we show our support and have even attending city meeting to help one of them stay alive after being threatened to be shut down due to permitting and whatnot. Aiding small farms and ending subsidies. I have come to learn a lot of farming is a game and pretty much entails how you can scoot your way out of loop holes. I support the Food and farm bill, along with all local farmers.

COMMENT OF LISA SCHILLER

Date Submitted: Friday, May 18, 2012, 2:20 p.m.

City, State: North Las Vegas, NV

Occupation: Administrative Assistant

Comment: Please do the right thing. Consider you grandchildren's grandchildren when adopting a new farm bill. Please don't forget that you are accountable for your choices.

Sincerely,

LISA SCHILLER.

COMMENT OF FRANCIS SCHILLING

Date Submitted: Friday, May 18, 2012, 5:43 p.m.

City, State: Vail, AZ

Occupation: Retired

Comment: I firmly believe that the continued weakening of the American family farmers' economic base via the stifling of competition in favor of corporate food monopolies is a critical issue to address if food production in the U.S. is to remain vital. Furthermore, it is placing an onerous burden on small farm operations which is in direct opposition to the direction this country needs to move if we are to return to having the safest food supply in the world. Giving agri-biz even more disproportionate benefits relative to small family farms than they already enjoy is the **Last** thing that that my government should be about!

COMMENT OF JARRET SCHLAFF

Date Submitted: Friday, May 18, 2012, 12:16 p.m.

City, State: Detroit, MI

Occupation: Nonprofit Case Worker

Comment: Please listen to the voice of the people and have an emphasis on organics and locally grown food. We need to plan for the future and make it easier for our communities to have access to fresh, local, healthful produce. Thank you for your service and consideration.

Best regards,

JARRET.

COMMENT OF ALVIN SCHLANGEN

Date Submitted: Friday, May 18, 2012, 9:22 a.m.

City, State: Freeport, MN

Producer/Non-producer: Producer

Type: Poultry/poultry products

Size: 50-150 acres

Comment: Get out of subsidies altogether. Consumers ultimately end up paying for your involvement in the food supply as well as for the mediocre food itself. Teach the basics of cooking & nutrition and let demand shape production. Allow only raw materials for welfare and school food and keep Monsanto, Cargill and the drug companies out of the kitchen.

COMMENT OF ERIC SCHMALL

Date Submitted: Friday, May 18, 2012, 3:41 p.m.

City, State: San Diego, CA

Comment: If there is anything that is important to me, it's knowing my food is going to supply me with the vitamins and minerals I need while not being a burden to my immune system. Please make that happen.

COMMENT OF LINDA A. SCHMALSTIEG

Date Submitted: Saturday, May 19, 2012, 2:20 p.m.

City, State: Houston, TX

Occupation: Physician

Comment: Our health, economy, and way of life all depend on safe and accessible food. We cannot continue on the current path of corporation-controlled nutrition—it will not keep up, has decreasing nutritional value, and will only continue to skew what is available. Skills necessary for building and maintaining adequate and safe

food supply must be retained and nurtured in our general population before those skills are totally lost. Please consider these points in your deliberations.

Thanks,

LAS.

COMMENT OF DONALD SCHMIDT

Date Submitted: Friday, May 18, 2012, 4:44 p.m.

City, State: Fargo, ND

Occupation: Retired

Comment: The next farm bill should recognize and support organic and family farms. Multi-national agribusiness should not be the focus. They can take care of themselves.

COMMENT OF MEGAN SCHMIDT

Date Submitted: Sunday, May 20, 2012, 10:29 a.m.

City, State: Sag Harbor, NY

Occupation: Design Consultant

Comment: My family supports local food production and anything that will turn the tide away from the vicious cycle of industrial food production such as subsidies to farms producing absurd amounts of corn and soybeans; assistance to farmers who choose to improve the quality of their soil and food by rotating crops and utilizing organic farming practices; support for new farmers and those who encourage raising grass-fed animals; new USDA standards that encourage small-scale meat processing operations; and perhaps even tax incentives for individuals who support local agriculture through participation in local food co-ops or CSA programs. Thank you!

COMMENT OF BETH SCHMITT

Date Submitted: Tuesday, May 15, 2012, 8:15 p.m.

City, State: Muskego, WI

Occupation: Holistic Health

Comment: The farm bill **Needs** to support local and sustainable food. We have the right to know our farmer and where our food comes from. But this can only spread to more people with more money allocated towards the organic growing community. We need to support this movement for people to get healthy and live longer. Thank you for your time.

COMMENT OF JAMES SCHMITT

Date Submitted: Saturday, May 19, 2012, 8:28 a.m.

City, State: Forest Grove, PA

Occupation: Retired Pilot, Organic Farmer

Comment: Lets stop feeding C.R.A.P. to America. Richest country in the world, with positively FOUL eating habits because of our concentration on **Perceived** cost of food rather than **Actual** cost.

COMMENT OF KRISTEN SCHMITZ

Date Submitted: Friday, May 18, 2012, 12:41 p.m.

City, State: Vieira, FL

Occupation: Education

Comment: Please increase subsidies for small scale organic sustainable producers and remove them for large agribusiness. Agriculture needs to switch a locally based model and our funding needs to represent that priority.

Thank you.

COMMENT OF DAVID SCHNEIDER

Date Submitted: Saturday, May 19, 2012, 11:38 p.m.

City, State: Tolland, CT

Occupation: Retired

Comment: **Safety** for farm workers and consumers through organically grown produce on non-factory farms, especially local produce to reduce fuel waste, price rises and increase food quality.

COMMENT OF RICHARD SCHNEIDER

Date Submitted: Friday, May 18, 2012, 1:39 p.m.

City, State: Carmel Valley, CA

Occupation: Language Translation Services

Comment: Dear leaders:

In considering a farm bill please take time to reflect on the well being of human beings first and not on monetary considerations exclusively. May you be guided by reliable information and the true awareness you all are.

Blessings are sent to all.

COMMENT OF KELLY SCHNEIDERHAN

Date Submitted: Friday, May 18, 2012, 5:13 p.m.

Occupation: Physical Therapist

Comment: Accurate labeling of organic and GMO products allows citizens to make informed choices. Please protect our freedom to be conscientious consumers by including accurate and meaningful labeling in farm legislation. Many thanks for helping us to speak for ourselves with our consumer dollars.

COMMENT OF DICK SCHOECH

Date Submitted: Friday, May 18, 2012, 12:03 p.m.

City, State: Arlington, TX

Occupation: Retired

Comment: I was raised on a small dairy farm and have watched small farms suffer as large agribusinesses hog most of the agriculture subsidies. It is time to kick the K street lobbyists out of your office and listen to family farmers who are struggling. We need water & soil conservation programs in Texas, local food growers, organic farming, farmers markets, programs to combat invasive species, *etc.* Please ignore all the donations that large agribusinesses give Congress and address our farm problems.

COMMENT OF JOHN SCHOENFELD

Date Submitted: Thursday, May 17, 2012, 12:35 p.m.

City, State: Leander, TX

Occupation: Skilled Trades

Comment: I'm not fully versed in all that's going on in this matter, but with this opportunity I would like to say that I would like to see more organic, and sustainable practices in place with all farmers, with more of an eye on the bigger producers, meaning, no pesticides, and all waste composted and reused on site. Considering the hungry in this country I would appreciate all that isn't viewed as a waste, but also not marketable, be donated, not destroyed. Thank you for your time, and this opportunity.

COMMENT OF MEG SCHOFIELD

Date Submitted: Friday, May 18, 2012, 4:25 p.m.

City, State: Kapaa, HI

Occupation: Educator

Comment: Consumers want **Healthy**, sustainably and **Ethically** produced food. Significant reform is needed to level the playing field for small family farms *versus* giant agribusiness, with their environmentally and morally destructive practices.

COMMENT OF STEPHEN SCHOFIELD

Date Submitted: Friday, May 18, 2012, 4:01 p.m.

City, State: Wyoming, MI

Occupation: Law Student

Comment: Stop playing politics with our food. We need clean, safe and inexpensive food that is produced in this country. Our farms need support not multinational corporations. Let's get this done!

COMMENT OF AARON SCHOLES

Date Submitted: Friday, May 18, 2012, 3:05 p.m.

City, State: Salt Lake City, UT

Occupation: Soldier

Comment: Wealthy interest groups and their lobbyists are destroying our country, among other things. Just do what's the best for the people. Sadly we have come to expect less of our politicians.

COMMENTS OF MARK SCHONBECK

Date Submitted: Sunday, May 20, 2012, 1:31 p.m.

City, State: Floyd, VA

Occupation: Newsletter Editor, Virginia Association for Biological Farming

Comment: Thank you for the opportunity to offer comments on the 2012 Federal Farm Bill. I am writing as a U.S. citizen, and as an advocate and service provider for family farms engaged in sustainable agricultural production, to advocate for a farm bill that is truly an Agriculture Reform, Food, and Jobs Act.

I am a consultant in sustainable agriculture, with experience in organic and low-input soil, crop, and weed management for vegetables, fruits, and row crops in Virginia and adjacent states in the Mid-Atlantic and Southeast. In this capacity, I often work with aspiring and beginning producers who are highly motivated to help meet the soaring demand for fresh, healthful, locally-grown fruits, vegetables, and other foods; and to protect and improve the land for future generations. Through my interactions with both beginning and more experienced producers and other service providers, I have come to understand the vital importance of Federal farm policy and programs in several areas:

1. Beginning Farmer and Rancher training, technical assistance, and access to land, capital, and credit
2. Rural Development
3. Local and Regional Food Systems, and related essential infrastructure.
4. Conservation
5. Research, Education and Extension in organic and sustainable systems, specialty crop production, and best practices for long term resource conservation and soil improvement
6. Classical breeding programs leading to the release of farm-ready public varieties and livestock breeds.

Following are some specific recommendations for the 2012 Farm Bill:

Provide mandatory funding for the Beginning Farmer and Rancher Development Program (BFRDP) at \$25 million per year. The average age of farmers in the U.S. is near 58 years and rising, and some 75% of the nation's farmland is expected to change hands in the next 15 years. Meanwhile, a growing number of young people would like to enter the farming profession, yet encounter some tough hurdles: acquiring the land, capital, credit, and markets to launch a farming enterprise, as well as essential production, conservation, marketing, and business management skills. When new or transitioning farms fail because any of these is lacking, our food system and land base suffer, and the future becomes less secure. Thus it is vital at this time for the U.S. agricultural system to recruit, train, and successfully establish a new generation of farmers and land stewards to provide sufficient healthful food for tomorrow.

I have had the privilege of serving on the Curriculum Committee of the Virginia Beginning Farmer and Rancher Coalition Project, a BFRDP-funded project that is developing vital resources for aspiring and beginning producers in Virginia. Coordinated through Virginia Tech with a diverse network of 25 partner organizations, the Virginia Beginning Farmer and Rancher Coalition has drafted a comprehensive training curriculum for beginning producers, covering whole farm planning, land acquisition and tenure, sustainable production practices, marketing, and business management. Several coalition partners are utilizing this curriculum in their beginning farmer training and technical assistance programs. One of these is SustainFloyd, a community development non-profit in Floyd, VA that is planning a Working Model Farm and Land-Based Learning Center at which new farmers will receive practical hands-on training and experience that enables them to launch their own farm enterprises.

The Virginia Beginning Farmer and Rancher Coalition is also developing a state-wide Farm Mentor Network to connect new and experienced farmers with one another and other resources in the region. In my consulting work, I provide beginning farmers with science-based technical assistance in production; however they often need additional assistance in areas in which I am not trained, such as business management or gaining access to land. I refer clients to the Coalition and its Farm Mentor Network for these needs, as well as for the kind of hands-on training that only a farmer mentor can provide. Without the BFRDP, this Coalition Project would

not have been possible, and my capacity to effectively assist aspiring new farmers in Virginia would remain more limited.

With a budget of \$19 million per year under the 2008 Farm Bill, the BFRDP has supported many projects like this across the U.S., but has also had to turn down numerous other equally worthy and innovative project proposals. Given today's urgent need to help new farmers get established, and given the job creation potential of these endeavors, the \$10 million/year level of BFRDP funding recently proposed by the Senate Agriculture Committee is wholly inadequate, and a minimum of \$25 million/year is needed to meet the challenges and opportunities presented by the aging of the current farmer population and the surge of interest in farming among the younger generation.

The 2012 Farm Bill should also adopt other key provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including \$5 million annual funding for the Beginning Farmer and Rancher Individual Development Accounts, conservation program set-asides for beginning producers, priorities for projects benefiting beginning farmers within the Value Added Producer Grants, and a research priority for beginning producers in the Agriculture and Food Research Initiative (AFRI) and other USDA research programs. One especially important element of this Act is increased funding for Conservation Reserve Program Transition Incentive Program (CRP-TIP), which provides an incentive to land owners with land coming out of the CRP to lease or sell that land to beginning farmers who implement resource-conserving production systems such as management intensive grazing, or organic crop production.

The 2012 Farm Bill must support innovative research in organic and sustainable agriculture, and provide extension, education, information, and other vital support for organic and sustainable producers. In a series of reports from 2008 to present, based on the experience of millions of small-scale producers in Africa and other developing regions of the world, the United Nations Environment Program (UNEP) showed that organic and agro-ecological farming systems have the greatest potential to improve yields, protect and improve soil and other resources, and enhance poor communities' capacity to feed themselves and meet basic living, health, educational, and social needs. As fossil fuels become scarcer, soil and water quality come under increasing stress, and climate change brings unpredictable consequences, organic and sustainable farming practices will become increasingly important to the future security and adequacy of the U.S. food system as well.

Specifically, I urge the House Agriculture committee to adopt the following measures in drafting the farm bill: Organic Research and Extension Initiative (OREI) mandatory funding at \$30 million per year; permanent authorization for the Sustainable Agriculture Research and Education (SARE) program and the National Sustainable Agriculture Information Service (aka ATTRA); the Organic Certification Cost Share at \$11.5 million per year (as proposed by the Senate Ag Committee in its recent draft farm bill); the Organic Data Initiative at \$5 million (Senate level) and \$5 million for National Organic Program technology upgrades (Senate level). In addition, the new farm bill should eliminate discrimination against organic producers in crop insurance (currently, organic producers are charged higher premiums); and also make the per-contract cap for the Environmental Quality Incentive Program the same for the Organic Initiative (currently \$80,000) and for the regular EQIP (currently \$300,000).

The SARE and ATTRA programs provide vital informational and technical services for producers at the incredibly low annual cost of just 20¢ per U.S. taxpayer. In my consulting practice, I utilize SARE manuals and publications as primary information resources, and refer clients to ATTRA for in-depth information bulletins and one-on-one technical assistance with questions for which I do not have the experience to provide complete answers. The loss of either of these programs because of a lack of funding would severely limit my ability to provide the quality of service I want to offer to farmers.

On a similar note, the 2012 Farm Bill should maintain adequate funding levels for specialty crop research, including the Specialty Crop Research Initiative (SCRI—at the Senate Ag Committee's level of \$50 million per year), and the Specialty Crop Block Grant program (SCBG—again, the Senate proposed level—\$70 million). With public health professionals urging Americans to consume more fresh fruits and vegetables to address the national epidemic of obesity, type II diabetes and other degenerative diseases, it is vital to ensure that our school children, elders, and lower-income communities have sufficient access to these foods. Continued robust funding for SCRI and SCBG will help farmers meet this need through domestic production.

The 2012 Farm Bill can also improve access to healthful, fresh food for all Americans by adopting key provisions of the Local Farms, Food, and Jobs Act (HR 3286), such as provisions to allow use of SNAP and Electronic Benefits Transfer (EBT) to

purchase fruits and vegetables, funding the Community Foods Projects Program at the Senate-recommended level of \$10 million per year, allowing school lunch programs to use some of the commodity funds to purchase fresh local farm products, and conservation technical and financial assistance to farmers serving local markets. In addition to enhancing food quality, all of these measures would create jobs and entrepreneurial opportunities, and strengthen rural economies.

One other urgent need in our agricultural system is to restore the genetic diversity and regional adaptability of our crops and livestock through a revitalized public breeding program. To address these needs, the 2012 Farm Bill should set aside 5% of Agriculture and Food Research Initiative (AFRI) funding for classical breeding leading to the release of farmer-ready public crop varieties and livestock breeds, to make classical breeding a priority in ARS research efforts, and to provide coordination among ARS, extramural, and non-governmental public breeding endeavors. With the ongoing erosion of crop and livestock genetic diversity; the need for new varieties adapted to different regions, shifting climate patterns, and production systems less dependent on intensive fossil fuel inputs; and the emerging agronomic, ecological, socioeconomic, and possible animal and human health drawbacks of genetically engineered crops and patented seeds, the need for a vigorous classical public breeding program has never been more important to U.S. agriculture. Farmers need varieties and livestock breeds that are responsive to lower input, resource conserving production systems such as organic, and whose on-farm use and reproduction (e.g., seed saving) is not restricted by utility patents.

The 2012 Farm Bill should maintain funding for the Conservation Stewardship Program (CSP) and other Title II Conservation programs. Conservation has already taken more than its share of funding cuts in the past few years. Meanwhile, in an alarming trend caused by a combination of intensified production due to high demand and prices for commodities, and weather extremes (floods and droughts), our nation's soils are eroding and our water resources are degrading at increased rates. This is the time to strengthen our Conservation programs, not gut them through excessive funding cuts.

Finally, the 2012 Farm Bill must do all it can to ensure adequate funding and staffing for NRCS, Extension, FSA, and other USDA agencies to provide the services they are mandated to do. Part of my work in recent years has included giving presentations at training workshops in organic horticulture and conservation for agricultural professionals, through the SARE Professional Development Program and the NRCS Conservation Innovation Grant program. During these events, I have talked with many dedicated NRCS and Extension personnel who want to spend more time in the field helping farmers enhance their triple bottom line—profit, land stewardship, and quality of life—through conservation planning and other vital technical assistance. However, with continual staffing and funding cuts, these hard working individuals find themselves being asked to do more and more with less and less, and having to spend more time at the desk dealing with the paperwork. This has given me a different perspective on the frustrations of farmers who sometimes receive inadequate service from NRCS or other USDA personnel. Our Extension and Conservation programs can do so much for our farmers and our farmland—provided that they have the funding and staffing support they need. I was shocked to learn that part of the budget cutting proposals in 2011 included slashes of well over \$100 million from each of several key USDA branches, including Extension, FSA, and NRCS. This does not save tax dollars in the end—it only makes it harder for our nation to realize the full benefits of programs like the CSP because the agency does not have the resources it needs to deliver the program effectively.

I am aware of the budget constraints under which the Agriculture Committees must develop the 2012 Farm Bill, and am also aware that the above recommendations, taken together, entail a significant sum. Therefore, I would like to recommend the following measures to offset the added spending:

Adopt the Senate Ag Committee's recommended reform to Title I, which would close the loophole that allows a single large farm to receive commodity payments for several farms. This is a loophole that has needed closing for many years, and I welcome the Senate Agriculture Committee's historic step in proposing this measure.

Adopt payment limits, one-payment-per-farm, and conservation compliance criteria for Crop Insurance commensurate with those that would be implemented for the Commodity Title under the Senate proposal. With crop insurance programs having no per-farm cap nor conservation requirements, and now consuming somewhat larger annual sums of taxpayer dollars than the Commodity Title, setting the same criteria for both could save a billion dollars or more per year. This would be enough to maintain level funding for the Conservation Title and cover the several funding

requests in the above recommendations for beginning farmers, local foods, organic, and research programs.

Set a firm per-farm cap of \$150,000 or \$200,000 on Environmental Quality Incentives Program (EQIP) contracts, applicable to all operations without exception. Currently, Confined Animal Feeding Operations (CAFOs) can receive larger contracts (up to \$450,000) through a special waiver provision. Farmers who seek EQIP assistance to adopt major resource protection measures at more moderate cost (through practices such as fencing for management intensive grazing systems, terracing for horticultural production on sloping land, or improved crop rotations, riparian buffers, etc for cropland) should rank higher priority than agribusinesses who continue to endanger water and other resources through the inherently unsustainable CAFO system. In fact, subsidies for CAFO's to mitigate their pollution should be gradually phased out, and firm regulations adopted to require that they clean up their environmental impacts at their own expense. If such stringent measures result in the CAFOs gradually going out of business and being replaced by smaller, family-operated, ecologically-friendly, pasture-based livestock production and integrated crop-livestock systems, this will mean safer, more healthful meat for the consumer, cleaner water, and more balanced nutrient cycles. It will also create several wholesome jobs or entrepreneurial opportunities for each dangerous CAFO job eliminated.

Prioritize USDA research to address vital research tasks and topics that private industry cannot or will not address on its own. For example, industry will be highly motivated to develop new fertilizers, pesticides, and other inputs (whether conventional or organic), but not to research management practices by which farmers can sustain soil fertility and crop health while reducing the need for purchased inputs. Likewise, today's seed-biotech companies will continue to research patented crop varieties whose production they can control tightly, not offer public varieties from which producers can save seed or select land races adapted to their particular soil and microclimate. Thus, if USDA ARS, as well as AFRI and other extramural programs focus on classical breeding efforts (which cost about \$1 million per variety released) rather than high-budget genomics and biotech research (supporting industry development of GMO varieties at a total cost of about \$50 million per variety), USDA can accomplish a lot more research vital to the nation's food and agricultural system while keeping the total research budget level. Similarly, USDA-funded research into sustainable production and resource conservation systems that rely mainly on on-farm and local resources, and less on expensive purchased inputs, will yield greater public benefit per tax dollar invested.

Thank you for taking my recommendations and comments into account in your work on the 2012 Farm Bill.

Date Submitted: Sunday, May 20, 2012, 4:24 p.m.

Comment: Thank you for the opportunity to provide input on the 2012 Farm Bill. In this communication, I speak on behalf of the Virginia Association for Biological Farming (VABF), for which I serve as the newsletter editor and farm policy liaison. VABF is Virginia's primary nonprofit membership organization for organic and sustainable farmers and gardeners. In addition to co-sponsoring with Virginia Cooperative Extension the annual Virginia Biological Farming Conference, VABF conducts on-farm research, offers field days and farm tours, and participates in the Virginia Food Systems Council and the Virginia Beginning Farmer and Rancher Coalition Project.

We would like to submit the following recommendations for the 2012 Farm Bill to make it truly an Agriculture Reform, Food, and Jobs Act:

1. Renew mandatory funding for the Beginning Farmer and Rancher Development Program (BFRDP) at \$25 million per year. With the average age of farmers in the U.S. near 58 years and still rising, it is vital to recruit, train, and successfully establish a new generation of farmers to secure an adequate, safe, and healthful food supply for America's future.

The BFRDP, funded at \$19 million per year under the 2008 Farm Bill, has supported many excellent projects across the U.S. One of these is the Virginia Beginning Farmer and Rancher Coalition Project, coordinated through Virginia Tech, which has created a diverse coalition of some 25 partners including VABF, has developed a comprehensive training curriculum for beginning farmers, and is establishing a state wide farm mentoring network linking beginning and experienced producers. Working with this BFRDP-funded coalition multiplies VABF's capacity to help new farmers acquire vital skills, adopt resource-conserving practices, and meet the growing public demand for healthful local food. The beginning farmer training and support offered through this Coalition and other BFRDP projects across the nation can create jobs, expand entrepreneurial opportunities, and thereby strengthen rural economies.

One of the most hopeful recent trends in America's food and agricultural system has been the upsurge of interest in the farming profession among young people and among others seeking a career change. Assisting and empowering these aspiring farmers to get off to a successful start should be a top priority of Federal farm policy and programs, as so clearly stated by Agriculture Secretary Tom Vilsack when he challenged the USDA to help recruit and train 100,000 additional farmers under the 2008 Farm Bill.

At its current funding level, the BFRDP has received many more top-notch proposals than it could fund. The \$10 million per year proposed by the Senate Agriculture Committee for the 2012 Farm Bill is clearly inadequate. Thus, we urge the House Agriculture Committee to include at least \$25 million annual mandatory funds for BFRDP to meet the need of today's aspiring farmers and ranchers, and to take full advantage of the opportunity they represent.

2. Adopt other key provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236, introduced by Reps. Tim Walz and Jeff Fortenberry), including \$5 million annual funding for the Beginning Farmer and Rancher Individual Development Accounts, increased funding for the Conservation Reserve Program Transition Incentive Program (CRP-TIP), conservation program set-asides for beginning producers, and priorities for projects benefiting beginning farmers within the Value Added Producer Grants.

3. Maintain a strong set of programs for organic agriculture. Innovative organic and ecological production systems show the greatest long-term potential to provide adequate, nourishing food for all in a time of increasingly scarce fossil fuels, critical soil erosion and water quality concerns, climate instability, and large human populations. We recommend that the 2012 Farm Bill support organic producers in several ways: fund the Organic Certification Cost Share at \$11.5 million per year, the Organic Data Initiative at \$5 million, and \$5 million for National Organic Program technology upgrades (levels proposed for these three programs by the Senate Ag Committee); and eliminate crop insurance penalties (higher premiums) against organic producers.

4. Fund the Organic Agriculture Research and Extension Initiative (OREI) at \$30 million per year, and provide permanent authorization for Sustainable Agriculture Research and Education (SARE—at \$60 million per year), and the National Sustainable Agriculture Information Service (aka ATTRA—at \$5 million per year). Producer members of VABF and other farmers and ranchers in our region and across the U.S. make extensive use of the invaluable technical information and support provided by SARE and ATTRA. In addition to publishing several excellent manuals on soil improvement, pest management, and other key aspects of production, SARE has upgraded its website to make the results of over 5,000 SARE-funded research projects easily accessible to the public. In providing these vital services for less than 20¢ per U.S. taxpayer, SARE and ATTRA represent one of the Federal government's most effective use of tax dollars.

One example of vital OREI-funded research is a planning grant and pending proposal for a full research grant to develop organic management strategies for the Brown Marmorated Stink Bug. This invasive exotic pest causes severe damage to a wide range of horticultural crops, and threatens the livelihoods of organic and conventional producers alike. The planning grant assembled a diverse, top-notch project team with VABF participation; however our vital work, and that of many other teams of innovators who are developing proposals on equally important questions, depends on sufficient funding for the OREI.

5. Maintain adequate funding levels for specialty crop research, including the Specialty Crop Research Initiative (SCRI—we advocate the Senate Ag Committee's level of \$50 million per year), and the Specialty Crop Block Grant program (SCBG—again, we support the Senate proposal of \$70 million). Between 2009 and 2012, the SCBG program has funded VABF to conduct on-farm demonstration trials and farm field days on organic production and pest management in summer and winter squash.

With public health professional urging Americans to consume more fresh fruits and vegetables to quell the national epidemic of obesity, type II diabetes and other degenerative diseases, it is essential to ensure that our school children, elders, and lower-income communities have sufficient access to these foods. Toward this end, the U.S. must enhance local and regional supplies of these perishable items; thus, research and extension activities that help farmers produce top quality "specialty crops" is an important investment within the farm bill.

6. Set aside 5% of Agriculture and Food Research Initiative (AFRI) funding for classical breeding leading to the release of farmer-ready public crop varieties and livestock breeds. With the ongoing erosion of crop and livestock genetic diversity; the need for new varieties adapted to different regions, shifting climate patterns, and production systems less dependent on intensive fossil fuel inputs; and the emerging agronomic, ecological, socioeconomic, and possible animal and human health drawbacks of genetically engineered crops and patented seeds, the need for a vigorous classical public breeding program has never been more important in the history of U.S. agriculture. Although the 2008 Farm Bill included language that made classical breeding an AFRI priority, only one project with the potential to lead to new, farmer-ready public varieties has been funded thus far. We strongly recommend additional language in the 2012 Farm Bill to devote at least 5% of AFRI funding to this vital priority.

7. Provide mandatory funding for key rural development programs, including \$30 million per year for the Value Added Producer Grants Program. In addition to helping innovative farmers and farmer groups to meet the soaring public demand for healthful fresh foods, these programs support rural community economies and job creation. The Senate Ag Committee farm bill fails to provide mandatory funding for any rural development programs, an omission that must be corrected in the final farm bill that goes to the President for signature.

8. Support the growth of local food systems by adopting other key provisions of the Local Farms, Food, and Jobs Act (H.R. 3286) introduced by Rep. Chellie Pingree. These include enhanced access to fresh fruits and vegetables for low-income Americans through Electronic Benefits Transfer (EBT) and SNAP, funding for the Community Foods Projects Program at \$10 million per year (as recommended by the Senate), enhanced Conservation technical and financial assistance to producers serving local and regional markets, a provision to allow school lunch programs to use 15% of their commodity funds to purchase locally grown food, a new Extension initiative (Local and Regional Food System Enterprise Facilitation) to help the neediest parts of rural America develop vibrant local food systems, and much more. All of these provisions will create jobs and restore our economy, as well as contributing to the public health—and many do not entail additional Federal spending.

9. Protect the Conservation Stewardship Program (CSP) and other Title II Conservation programs from additional funding cuts. With intensified production driven by high demand and commodity prices, and unusually severe erosive rains putting added stress on our nation's soils, farm conservation programs are as necessary now as they were during the devastating Dust Bowl of the 1930s. Our nation's farmers want to take good care of their land, and they need and deserve the support Natural Resources Conservation Service can provide—if Title II programs are adequately funded. Conservation took more than its fair share of past budget cuts, and must not be cut further in the 2012 Farm Bill.

10. Offset the costs of all of the above recommendations through effective reforms to commodity subsidy and crop insurance programs. We commend the Senate Ag Committee for taking the historic step of closing the loophole that has allowed large farms to receive commodity subsidies for several farms, as well as affirming per-farm payment caps and conservation compliance requirements for participation in Title I programs. However, Federal Crop Insurance programs have grown tremendously, and now pay out slightly more tax dollars annually than does Title I. Crop insurance payments are not currently capped, nor subject to sobduster or other conservation compliance requirements. If the final farm bill adopts the Senate-proposed reform to Title I, applies it also to crop insurance, and adopts a reasonable payment cap and conservation criteria for crop insurance, annual savings could exceed \$1 billion, sufficient to cover vital beginning farmer, research and extension, local food system, and rural development programs, and to allow level funding for the Conservation Title.

Thank you for taking our recommendations into consideration in developing the 2012 Farm Bill.

COMMENT OF AMY SCHONEMAN

Date Submitted: Friday, May 18, 2012, 3:20 p.m.

City, State: Oakland, CA

Occupation: Educator/Business Owner

Comment: Please start making decisions that favor health for children, farmers, and regular folks. We have the chance to make lasting changes to our nation's farm-

ing and food system that will be looked upon as a legacy of American ingenuity and foresight.

We are such a wealthy nation but we are sicker and fatter than most. We have to do better.

Please support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

And think of my two daughters when you do!

Thank you.

COMMENT OF MEAGAN SCHORR

Date Submitted: Sunday, May 20, 2012, 10:46 p.m.

City, State: Iowa City, IA

Occupation: Student

Comment: Dear House Agriculture Committee,

Safety nets for farmers have been in place for almost 30 years that ensure that subsidized farmers adhere to conservation practices in their fields. Conservation efforts are vital to crops, wetlands, and environmental health as a whole. The productivity of our farmlands and future resources heavily rely on conservation efforts. Due to the possibility of direct commodities being eliminated and conservation compliance not being enacted elsewhere our crops, wetlands, highly erodible lands, and future resources will be at stake. Steps must be taken to ensure that this does not happen.

During this time, when the farm bill is being prepared by the House Agriculture Committee, I urge you to protect our nations land and resources. Make sure that conservation complication protections are linked with subsidies for crop insurance. Our Nations future economic and environmental sustainability rely on conservation efforts.

Please take all of this into consideration.

Sincerely,

MEAGAN SCHORR.

COMMENT OF DIANE SCHRACK

Date Submitted: Monday, May 14, 2012, 10:51 p.m.

City, State: Highlands Ranch, CO

Comment: Dear Members of the House Committee on Agriculture,

The farm bill is one of the most important pieces of legislation that you work on because we all need to eat. And we all deserve to eat safe and healthy food—from the farms to the grocery stores to our children's school lunch programs.

I ask that you fulfill your responsibility to the citizen's of this country by funding the Organic Agriculture Extension Initiative and supporting the CSP and the Beginning Farm and Rancher Development Program.

Your job is important. Please legislate like you understand the importance of safe and healthy food.

Thank you,

DIANE SCHRACK.

COMMENT OF HENDRIKUS SCHRAVEN

Date Submitted: Saturday, May 19, 2012, 12:03 p.m.

City, State: Issaquah, WA

Occupation: Landscape Designer Contractor/Organics

Comment: Please allow us to eat healthy organic food ! in a world laden with pesticides and poisons with 75% of our tap water in the U.S. Not fit for human consumption! Children diseases like leukemia increase 40% in a few decades! And so on and on! My question **Is:** how far **Are You** willing to let this go?

COMMENT OF JUDY SCHRIEBMAN

Date Submitted: Friday, May 11, 2012, 12:06 p.m.

City, State: San Rafael, CA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I grow for my family but need to buy from others to fill in. This farm bill supports my family's health when it allows direct farmer to consumer; when it supports healthy livestock and organic and diverse growing practices. We no longer need to subsidize high calorie crops—we need to subsidize nutrient dense crops, like fruits and vegetables, to make sure our children have the best possible start. We also need to support creek setbacks and windrows to support the natural bug and bird predators that keep the system healthy.

COMMENT OF JACK SCHROEDER

Date Submitted: Sunday, May 20, 2012, 8:48 p.m.

City, State: New York, NY

Occupation: Lawyer

Comment: It is absolutely imperative that GMO infected agricultural produce be labeled as such.

It is imperative that farms infected with GMO pollen from neighboring farms against their wishes have full legal recourse against those neighboring farms.

It is absolutely imperative that consumers not be restricted from purchasing any agricultural products they wish, including raw milk and raw milk products, *etc.*

COMMENT OF THERESA SCHROEDER

Date Submitted: Friday, May 18, 2012, 11:11 p.m.

City, State: Knoxville, TN

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Many farmers, especially small family owned farms, cannot afford the fees and time for paperwork to be certified as "organic," or even qualify for any available aid for farmers. Young people can't afford to go into sustainable farming. Consumers are confused. Developers continue to gobble up land which was farmland. GMOs spread and huge companies monopolize seed production, *etc.* The list goes on. This is not the time to endanger the future of farmers, agricultural land and the health of our nation by cutting even more funds from programs.

- I urge the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you.

COMMENT OF ANDREW SCHUCH

Date Submitted: Sunday, May 20, 2012, 5:54 a.m.

City, State: Marshall, NC

Occupation: Advocate

Comment: As a former producer, avid gardener, and concerned citizen I urge you not to cut any of the needed funds for the promotion and/or further study of appropriate (Organic) agricultural methods.

COMMENT OF JENNIFER SCHULTZ

Date Submitted: Thursday, May 10, 2012, 1:25 a.m.

City, State: Cheektowaga, NY

Occupation: Retired Disabled RN/BSN

Comment: We should not endanger the lives of seniors by cutting such important programs. These programs are not just for single mothers and the working poor;

they are also in place for senior citizens. There are many seniors that are taking care of spouses who may have dementia and Alzheimer's.

COMMENT OF CINDY SCHWALB

Date Submitted: Friday, May 18, 2012, 1:36 p.m.

City, State: Aiken, SC

Occupation: Health Coach

Comment: Please stop subsidizing corporations and support healthy, non-GMO, organic food. The studies of organic *versus* non-organic are quite solid. The pesticides detected in blood, the difference in minerals and nutrients. We know how we need to eat, and it is time to make this affordable for all. Thank you for very much for your service and commitment to real food for families.

COMMENT OF AMY SCHWARTZ

Date Submitted: Friday, May 18, 2012, 10:01 a.m.

City, State: Dowelltown, TN

Occupation: Artist and Teacher

Comment: I would like our government to protect the birthright of all people on this planet. Clean air, clean water, food supply that is not poisoned should be our birthright. It should be a gift from the last generation to us, and it should be a gift from us to the next generation.

COMMENT OF BURTON SCHWARTZ

Date Submitted: Friday, May 18, 2012, 12:44 p.m.

City, State: Port Jefferson Station, NY

Occupation: Retired

Comment: In order to have a healthy citizenry, you must provide support for those who grow food organically. Industrial farming has led to food that is not providing the nutrition Americans need.

COMMENT OF ELIZABETH SCHWARTZ

Date Submitted: Tuesday, May 15, 2012, 11:43 a.m.

City, State: Portland, OR

Occupation: Writer/Community Organizer

Comment:

(1) A \$36 million cut to SNAP is not the way to go. The Committee should focus on writing a farm bill that creates economic opportunity and improves access to healthy, affordable food for all Americans.

(2) How can you even consider cutting vital funds to feed hungry people in this country before you cut farm subsidies to the mega-farms that produce unneeded amounts of commodity crops that no one can eat? Where are your priorities?

You have the power to make the farm bill something that will give food-producing small farmers the means to start new farms and thrive on their existing farms. Through the farm bill, you can also provide safe, healthy, high quality produce to all Americans. Stop subsidizing multinational megacorporations and start feeding our nation healthy, safe, high-quality, nutritious and affordable food.

Do the right thing here. Stop allowing the Farm Lobby and the Monsanto, ADMs, Cargills and Dean Foods of the world hijack the farm bill yet again.

COMMENT OF JEFF SCHWARTZ

Date Submitted: Saturday, May 19, 2012, 9:29 p.m.

City, State: West Harwich, MA

Occupation: Solar Installer

Comment: Please support local, organic, sustainable agriculture, **Not** agribusiness. We need a farm bill that will protect small family farms and take us away from non-sustainable agribusiness approaches.

COMMENT OF JULIE SCHWARTZ

Date Submitted: Friday, May 18, 2012, 1:51 p.m.

City, State: Chestnut Ridge, NY

Occupation: Camp Director

Comment: I am not a producer, but I depend on those who are, for most of my food needs. Most of the products available on grocery store shelves really shouldn't be eaten. Organic farming is good for the planet, good for people, the food is more nutrient-rich and, frankly, tastes better. Don't cut this funding.

COMMENT OF ROBBIN SCHWARTZENHAUER

Date Submitted: Saturday, May 19, 2012, 6:29 a.m.

City, State: Manzanita, OR

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: Hello House Agriculture Committee,

I am writing to inform you that I fully support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

I support fully funding conservation programs, such as the Conservation Stewardship Program.

I support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

I support maintaining the EQIP Organic Initiative.

I think that producers using genetically modified varieties need to have their crops quarantined to prevent GMO pollution of non GMO crops through pollen.

I support the labeling of all genetically modified producers and the labeling of where your produce came from.

Thank you!

COMMENT OF TAMSEN SCHWARTZMAN

Date Submitted: Saturday, May 19, 2012, 9:36 a.m.

City, State: Brooklyn, NY

Occupation: Museum Media Manager

Comment: It is ever so important to support our local and organic farmers to be able to continue to provide safe and healthy food alternatives to those of the big agricultural businesses that persist in using pesticides, antibiotics, and GMOs to sustain mono crops. We must support local food systems that will continue to flourish even after oil prices rise, which they inevitably will.

I most sincerely request:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF PENNY SCHWARZ

Date Submitted: Friday, May 18, 2012, 1:17 p.m.

City, State: Broken Arrow, OK

Occupation: Disabled

Comment: One of this country's greatest assets has **Always** been the individual farmer and the crops they grow! I was raised by and with hardworking farmers. I trust that what they produce is not only healthier for consumption, but also better for mother Earth and her future. She will provide all we need as long as we don't abuse and pollute her. I do not want to buy government controlled, chemically treated, altered or "enhanced" produce.

COMMENT OF PATRICIA SCHWARZLANDER

Date Submitted: Friday, May 18, 2012, 2:13 p.m.

City, State: Syracuse, NY

Occupation: Clinical RN Specialist in Public Health

Comment: I support local farms especially ones which grow food organically . . . I think large factory farms are giving us products which are detrimental to our health under horrendous conditions. They should be regulated in growing GMO foods, their use of tainted feed, water pollution, soil erosion, energy consumption,

contamination of the land by the waste products (especially waste that produces methane gas which is a detrimental factor in climate change . . .) animal/poultry cruelty, and they should not **Not** receive the huge subsidies which they currently get.

COMMENT OF RAPHAEL SCHWEIZER

Size: Less than 50 acres
Comment: Please preserve funding for SNAP, TEFAP, CSFP programs.
 Thanks,
 DEED.

COMMENT OF EMILY SCOTT

Date Submitted: Saturday, May 19, 2012, 7:36 p.m.
City, State: Leawood, KS
Occupation: Semi-Retired
Comment: I am in the 6th district, but it isn't listed. I want honest farming in the hands of real farmers, not corporate slaves. I want organic farming. No more games!

COMMENT OF K. SCOTT

Date Submitted: Friday, May 18, 2012, 1:07 p.m.

City, State: Bel Air, MD

Occupation: Mother

Comment: As a mother of three, the health, safety, and nutritive value of the foods I feed to my family are of the utmost importance to me. I go to great expense to source locally grown organic foods and grass-fed meats from local farms for my family whenever possible. I am greatly concerned about the nation's reliance on overly processed foods created with heavily subsidized corn and soy products. The health of our citizens is clearly suffering, due in large part to the extremely unhealthy food options abounding on every corner. Even the public schools fill our students with "meals" that are heavily processed and loaded with unhealthy additives. Revising the farm bill in 2012 is a great opportunity for us to address some of these issues. As your constituent, I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you for your consideration of these matters.

COMMENT OF SHERRI SCOTT

Date Submitted: Sunday, May 20, 2012, 11:04 a.m.

City, State: Chico, CA

Producer/Non-producer: Producer

Type: Greenhouse/nursery, Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: Please think hard about the variety and needs of all of your constituents here in the 2nd district. Yes there is big ag around here and they are doing fine. Please support the small farmers who feed our community directly and are stewards of the land and take care of the soil as if it were food itself. Please support the farmers' markets and all of the co-ops and grocery stores and community kitchens that offer a market for these local growers. Please support community gardens and garden and nutrition education so that everyone can have access to and information on healthy food. This is all stuff that is happening here in you community right now and is making such an impact. Imagine if it were supported by you and on the national level.

I also would like you to support **Real** food. It is time to put up a wall towards corporate interests and it is time to think of the people. Pink Slime? High Fructose Corn Syrup? GMO Food? These are the things that are killing us and causing outrageous health problems and health costs. Don't allow them. Just because you can put them in your mouth should not mean that they can be called food! Not only am I a farmer but I am a garden teacher at preschool and elementary school and kids love and need vegetables and whole foods; they know it but often time only have access to McD's. Please ensure that this Food and farm bill takes into account the interests of the **Real** people that live here in your community, not corporations.

If you ever want to hear the stories and successes happening here in Chico with such groups as GRUB (Growing Resourcefully Uniting Bellies), Cultivating Communities, Let's Move Chico, CARD (Chico Area Rec. District has garden and nutrition programs) and others please contact me @ [Redacted]. If you want to hear the struggles that many of these groups have encountered trying to assist the schools to feed our kids real food, maybe even locally produced food, then I can direct you to those folks. I gave up because the system is too entrenched in politics and corporation stronghold and again not in our kids or our community's interest.

I keep trying to end this letter, but there is so much you can do to change this for the good of the people. And it is so frustrating because no matter what I say or what we could show you, you are still going to vote along the party line.

What's the use in trying.

COMMENT OF JAMES SCOTTO

Date Submitted: Saturday, May 19, 2012, 4:42 p.m.

City, State: New York, NY

Occupation: Teacher

Comment: As it is, our system of farming is beyond horrific. I specifically refer to the treatment of animals, but there are all kinds of other horrors (GMOs, pesticides, pollution, destruction of environment, neglected workers . . . Did I mention how truly unbelievable it is that animals are mass produced and tortured, as if we are no more evolved than barbarians?) Now I hear that there will be cuts to funding for nutrition, conservation and support for organic and sustainable agriculture—mind boggling.

COMMENT OF DAVID SCRIMENTI

Date Submitted: Friday, May 18, 2012, 2:07 p.m.

City, State: Ansonia, CT

Occupation: Musician

Comment: Some of the many things we need are: mandatory labeling of all GMO foods; decentralized food production for nutritional benefits, food safety, and national security; fewer regulations for small farms; more investment in organic farming; breaking up of giant agribusinesses that have a virtual monopoly on our food production; and reduction, or elimination of subsidies to large farms that don't need any taxpayer money.

JOINT COMMENT OF MARLA L. & MORRIS D. SCRIPTER

Date Submitted: Saturday, May 19, 2012, 10:37 p.m.

City, State: Granada Hills, CA

Comment: The poor quality of our food, the toxicity, the imbalance of grains *in lieu of* vegetables and fruit, the pesticides have created a demand for medical that is totally unnecessary. The vast majority of our medical care needs are driven by poor nutrition. It is time to focus on healthy food and environment and **Not** legislating medical bureaucracy.

COMMENT OF T. SCUDDER

Date Submitted: Saturday, May 19, 2012, 12:52 a.m.

City, State: Springfield, OR

Occupation: Student

Comment:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I also am against any company controlling all of the food in this country and find it unconstitutional for Monsanto in particular to be allowed to manipulate the system to best suit their interest. Please change these laws and make them label their food. I find it disturbing that they are bullying their way through these practices. This must be changed and outlawed immediately!

COMMENT OF JESSICA SEALES

Date Submitted: Thursday, May 10, 2012, 1:31 p.m.

City, State: Atlanta, GA

Comment: Good Afternoon Congressman Lewis,

Please do not cut food stamps for working families in need. Billions of families are still in need. I trust you to stand by the working people of Georgia and this nation.

Best,

JESSICA SEALES.

COMMENTS OF NEWELL SEARLE

Date Submitted: Thursday, March 22, 2012, 4:38 p.m.

City, State: Maplewood, MN

Occupation: Food Bank Executive

Comment:

Comment: The Supplemental Nutrition Assistance Program (SNAP) is essential to maintaining the fabric of our rural communities. The following three stories from our SNAP outreach workers illustrate the kind of determined people—in hard circumstances—who need SNAP:

Three SNAP Stories from Minnesota

(1) I met a client today whose story truly touched me. He was laid off in 2010 and has been homeless for 2 years. His biggest concern was food. He slept at the bus shelter because he thought that no one would judge him and just think that he was trying to catch a bus from one place to another. He didn't know he could apply for food support, cash assistance, or healthcare. Poverty was new to him. He had worked his whole life. He told me that to him food was the most important thing to keep him going every day. He walks everywhere and without food he didn't have the energy to keep looking for jobs and keep living . . . He told me also told me that there was a time in his life where he was so hungry that drinking water helped satisfy his hunger pains. He was unaware of free hot community meals, homeless shelters, or even public assistance. He has been coming to the workforce center for 2 years to look and apply for jobs . . . He had no income and no money in a bank account. His only assets were a bag of clothes he had stored somewhere for safety. After I assisted him with the SNAP application, I printed off additional resources to homeless shelters, community hot meals, and local food shelves. He was so thankful and had a few words of encouragement. He told me that last night he prayed to God that God would send someone his way to help him with all the struggles he's encountered and today he met me. It is stories and people like him that help me do my job to the best of my ability and continue to do my job day in and day out.

(2) I first met Bob when he was volunteering at the ECHO Food Shelf. During slow times at times at the food shelf there are opportunities to visit with volunteers. Bob sat at my desk and wanted to know more about what I do. In the process of our conversation I found out that Bob was not on Food Support and definitely qualified. Bob had heard that if you have ever been in trouble with the law, you would not qualify for any benefits. Bob was a volunteer at ECHO through the Sentence to Serve program. (STS) He had never even thought of trying to apply because of what he had heard from others. I read him the regulations. He had a drug felony charge but that doesn't eliminate him from benefits. We filled out the application and Bob was approved for the maximum benefit of \$200. By the way, Bob is a Vietnam War Veteran and a senior citizen who lives on \$769 per month. As he volunteered at the Food Shelf he would also get his food there from time to time. Now he eats his noon meal at the Salvation Army because he enjoys the community there and not because it would be his main meal of the day. By the way, he's Bob the Builder because any repairs or building the food shelf needs, Bob is there to take care of it for them.

(3) Having an office at the Food Shelf allows me the privilege of getting to know the volunteers. Many of them are clients of the food shelf and of mine. Dave stopped by my desk one day with a question about his food support. The question was a simple fix but the story he shared was very moving for me. He talked about the courage it took for him to even walk through the doors of the food shelf. "I'm a self-sufficient man," he says. "I don't take freebees from anyone. I earn my own way." He shared his thoughts on what he used to think of people who came to the food shelf or are 'on the system.'" Low life's, lazy, scrounges, drunks, druggies, were all some of the names he used to use to describe people in need. That day he told me how his experience that first day left him feeling humble and grateful. He and his wife were broke. All savings was gone and his business was non-existent. He commented on how the volunteers treated him respect. They would listen to his story as they walked through the shelf. He talked about how cheery everyone was and how welcome they made him feel. This former business owner slumped in the chair and wiped tears from his eyes as he shared his thoughts. He told me how, now that he volunteers for the food shelf, his wife has commented on how different he acts when he comes home at night. She told him that she notices that he's smiling, he doesn't talk negative about others, he volunteers to help others in the community, and she's happy to have him around the house again. He talked about his experiences in working with clients. He now understands the life of those in need. I saw a quote the other day that said: "To work for justice is to work for dignity. Dignity is a person's ability to give, in whatever way possible for them."

Date Submitted: Monday, May 07, 2012, 12:32 p.m.

Comment: Cuts to SNAP are counter-productive. SNAP cuts are a job killer. Here's why: Each dollar of SNAP purchases generates \$1.73 in economic activity. The funds pass through communities and support jobs in groceries and Main Street. An example:

Blue Earth City, MN: average living wage for one adult: \$23,000.

2010 SNAP payments = \$4,715,700.

2010 SNAP impact (x \$1.73) = \$8,158,200.

SNAP and its impact supports 354 living wage jobs.

Proposed cuts to SNAP (4%) will reduce SNAP payments, reduce the economic impact and result in the loss of 14 current living wage jobs.

SNAP is not a cost, SNAP prevents people from becoming poorer and thus, prevents communities from becoming poorer. It sustains jobs and communities along with the people who need temporary assistance meeting their basic needs.

Cutting SNAP will undermine existing jobs when the economy needs to grow them, not cut them.

In the State of Minnesota, there are more than 32,000 living wage jobs that can be traced to the impact of SNAP. The proposed cuts would eliminate more than 12,000 current jobs in Minnesota.

COMMENT OF CINDY SEARS

Date Submitted: Friday, May 18, 2012, 12:10 p.m.

City, State: Lawrence, KS

Occupation: Retired Teacher

Comment: I buy only organic produce and dairy products. My daughter wishes that she could afford to do the same for my grandchildren. Please work to help producers provide chemical free real food for ALL the families of America.

COMMENT OF ANTON SEATON

Date Submitted: Saturday, May 19, 2012, 3:06 p.m.

City, State: Castro Valley, CA

Occupation: Student

Comment: Big agriculture has hurt our agricultural supply and farm land. This has further led to an increase in cancer and chronic diseases attributed to chemical introduction as pesticides and hormones growth. Big agriculture favors loose of regulation to keep this going but we as a government and citizens need to put this to an end. I welcome your support.

COMMENT OF LINDA SEAVER

Date Submitted: Friday, May 18, 2012, 5:15 p.m.

City, State: Rhinebeck, NY

Occupation: Office Manager

Comment: My children and grandchildren trust me to feed them healthy food. I want to be able to go grocery shopping and not worry about pesticides, herbicides, fungicides, antibiotics, and genetically modified foods being in or on everything in the store! These chemicals are designed to kill and to interfere with reproduction. Why am I being forced to buy them? Why are my law makers supporting the companies that are profiting from damaging the health of my children and even future generations of children? It makes me too angry to articulate.

COMMENT OF LANCE SECRETAN

Date Submitted: Friday, May 18, 2012, 1:27 p.m.

City, State: Frisco, CO

Occupation: Author

Comment: Let's get current with healthy thinking, which will dramatically improve individual wellness and slash the nation's healthcare bill. It's time to end lobbyist-induced practices all the way through the food chain from producer, to manufacturer/processor to consumer.

COMMENT OF SARAH SEDGWICK

Date Submitted: Friday, May 18, 2012, 8:20 p.m.

City, State: San Diego, CA

Occupation: Laid Off

Comment: What is happening to this country and the food supply, it is a disgrace, and I am well-read on the issues at hand, Monsanto and all. It is all greed and nothing for the good of people or thought of future generation. Only the people of substance are standing up for the people, the government is supposed to be protecting us but something has gone terrible bad in this agricultural molded environment of greed and special interests. I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF KARL SEIDEL

Date Submitted: Saturday, May 19, 2012, 10:31 a.m.

City, State: Oskaloosa, IA

Occupation: Marketing Manager

Comment: Labeling, so I know what I'm consuming, seems to be my basic right as a consumer. Yet there's no mandate so I can't know whether my food is grown organically or with GMO. Traceability of food origin is a standard business needs to work towards. Are you for or against this?

COMMENT OF MICHELLE SEIM

Date Submitted: Friday, May 18, 2012, 8:11 p.m.

City, State: Seattle, WA

Occupation: Software Developer

Comment: Please don't cut \$4 million from organic research funding. Please don't cut in half funding to support Beginning Farmers. Please support organic food and organic farming. Thanks.

COMMENT OF BRECK SEINIGER

Date Submitted: Friday, May 18, 2012, 2:12 p.m.

City, State: Boise, ID

Occupation: Attorney

Comment: Regardless of one's position on "Obama Care," it is becoming increasingly clear that the food that American's are eating are the primary cause of runaway health costs. If you doubt this, watch *Forks Over Knives* (available via streaming on Netflix). We cannot control health costs without controlling the quality of the American diet. Please consider this in reviewing all legislation.

COMMENT OF DEBRA SEIZ

Date Submitted: Friday, May 18, 2012, 12:17 p.m.

City, State: Wenonah, NJ

Occupation: X-Ray Technologist

Comment: I **Support** any farm bill requiring **Labeling** on GMO's, **Stopping** bastards like Monsanto **Abusing** the U.S. justice system by filing **Frivolous Lawsuits** against organic farmers and promoting **Organic Farming**.

The public has the right to know and to choose from natural foods and GMO's saturated with **Poisons** such as Round-up that is also decimating the **Bee Population**.

I completely **Resent** congress' complicity in Big Agribusiness' **Bull Crap**.

COMMENT OF JOY SELBY

Date Submitted: Friday, May 18, 2012, 2:17 p.m.

City, State: Pasadena, CA

Occupation: Retired Teacher

Comment: I would like food produced without pesticides hormones artificial fertilizers or additives or GMO's. So that I can go to the grocery store and buy groceries as my grandparents did. I believe the additives in food both in the field and in the box are killing us.

COMMENT OF STEFANIE SELLARS

Date Submitted: Friday, May 18, 2012, 1:55 p.m.

City, State: Simi Valley, CA

Occupation: Composer

Comment: I want Organic produce. You know, the kind we ate when we were kids. They called it food then, not organic food. Now 70% of what is available at the grocery store is GMO—Genetically Modified Organisms. They do a number on my colon and I'm allergic to the pesticides sprayed on the conventionally grown produce. So, consequently, I have taken it upon myself to grow much of my own produce as well as shopping organic where I can get it and organic at farmer's markets. I can't always get everything I need and conversely, when I have surplus I share and can it later. I know I am not alone as I have many friends and family that trade produce with me and well there is a huge market for organically grown produce.

I also cannot tell in stores in this country what products contain GMO produce. I just learned that all Kashi products are made with GMO's. Some stores have removed it altogether and put a notice to that effect in it's place and I am grateful for this policy. I find this whole unlabeled GMO food situation to be ridiculous and frankly, un-American. I can go into any grocery store in Europe and read the labels and they will tell me whether or not the products are produced with GMOs. Their governments look out for their people's food supply. But here in the "good old USA" Monsanto and all the commercial seed companies rules the country, they have bought the government through lobbyists so that we the people are **Not Allowed** to know what is our food. A nation of over 300,000,000 people are not allowed to know what is in their food? Why? Because Monsanto funded science says it is OK? That is like the fox's lawyer saying he will guard the henhouse and won't interfere with the hens. You know we can't trust fox!

It is time to serve the people of what is left of this Nation and stop lining the pockets of congress. Just label our food. Disclose whether or not there are GMOs in it. I'm tired of playing russian roulette with hives, diarrhea and a burning colon. I'm so tired of it in fact that I grow most of my own food.

It takes a lot of time and energy each day for me to prepare, mulch, manure, grow, fertilize, tend, remove bugs manually, trim, pick harvest, compost and rototill my garden, not to mention search out organic **Non-GMO** seeds. I understand the work of our nation's organic farmers, I spend part of each of my days doing it, because I am committed to being healthy by eating healthy organic food. But it is mind boggling to me that even in communist China GMO's are labeled, in Russia and Canada they are labeled all over Europe you know what you are putting into your body, but here? **No!** Monsanto et al., wants to poison us and keep us from knowing what we are eating. (not to mention GMO genetic pollen drift that no one can control) Please, support Organic farming and labeling of GMOs. If this happens, then people will naturally buy non GMO and there will be a larger market for organic traditionally grown produce. I for one am willing to pay more for healthy organic food, heck,

I grow it myself!

COMMENT OF GABRIELLE SERRA

Date Submitted: Sunday, May 20, 2012, 6:59 p.m.

City, State: Washington, D.C.

Occupation: Public Health Program Administration

Comment: As the Committee works to develop the 2012 Farm Bill package, the Public Health Institute (PHI) strongly urges Chairman Lucas, Ranking Member Petersen, and members of the Committee to develop a farm bill that will protect against hunger, improve nutrition and health outcomes among vulnerable populations, and strengthen community-based initiatives that link farmers with consumers and increase access to healthy foods.

Together, hunger and obesity represent two of the greatest and costliest health challenges of our time. Nearly 50 million people live in households that lack adequate resources to put healthy food on the table for their family. Further, approximately 1/3 of all children are overweight or obese. While 7 in 10 of the leading causes of death in this country are associated with preventable diet-related diseases, poor diets result in more immediate consequences as well, including negative effects on children's ability to learn, the productivity of our workforce, and sky-rocketing health care costs.

The farm bill nutrition programs are fundamental to protecting public health and improving nutrition among the most vulnerable individuals in our country. Cuts to

benefits and services, including nutrition education, would increase economic hardship and seriously compromise the food security and nutritional well-being of the 46 million individuals, including children, the hungry, and the elderly who rely on these programs to put food on the table. With record high rates of overweight and obesity, along with skyrocketing health care costs, now is not the time to cut programs that have proven to be effective in improving nutrition and reducing risk of diet-related chronic disease.

Sufficient resources, knowledge, skills, and access to healthy, safe, affordable foods can help to prevent both the short and long-term consequences of poor nutrition. While PHI recognizes that the nation faces significant fiscal challenges that require sobering budgetary decisions, we urge Chairman Lucas and the Committee to take a balanced approach to finding savings for deficit reduction in this farm bill legislation that will protect vulnerable populations from further economic hardship.

To this end, in April of this year, PHI joined with 93 other national and regional organizations to put forward balanced recommendations to protect and support the farm bill nutrition programs. PHI is pleased to have the opportunity to provide the following recommendations for the 2012 farm bill:

- Protect against hunger by ensuring adequate resources for Federal nutrition assistance programs and emergency food providers.
- Protect eligibility, benefit levels, and program integrity of the Supplemental Nutrition Assistance Program (SNAP) to ensure that low-income Americans have the resources necessary to afford a nutritious diet and prevent hunger.
- Ensure adequate supply of nutritious commodities for distribution through emergency food providers by increasing mandatory commodities provided by The Emergency Food Assistance Program (TEFAP) and maintaining authorized funding levels for TEFAP storage and distribution.
- Maintain Commodity Supplemental Food Program (CSFP) authorization at current levels and focus program on improving nutrition for low-income seniors by transitioning CSFP to a seniors only program, with grandfathered protection for women, infants, and children currently enrolled.
- Provide a tax credit to farmers to incentivize earlier donation of high quality produce to food banks for distribution through the charitable food system.
- Improve nutrition and health outcomes for vulnerable populations by increasing consumption of fruits, vegetables and other healthy foods.
- Maintain current funding for SNAP Nutrition Education to help low-income Americans make healthy choices on a limited budget, reduce their risk of chronic disease and obesity, and optimize the SNAP benefit.
- Maintain current funding for the Fresh Fruit and Vegetable Program and protect the integrity of the program to ensure that low-income elementary students have a fresh fruit or vegetable snack at school every day.
- Provide grants for SNAP incentive programs to increase the purchase and consumption of fruits and vegetables at farmers markets and other healthy food retailers.
- Strengthen SNAP national vendor standards to improve availability of healthy foods while balancing adequate access to retailer outlets.
- Maintain funding for the National Institute of Food and Agriculture for vital research on nutrition, hunger and food security, and obesity prevention.
- Strengthen community-based nutrition initiatives that link farmers with consumers and increase access to healthy food to reduce food insecurity, improve nutrition, and promote self-reliance, economic development and job creation.
- Ensure funding for existing farmers' market, community food, and agriculture marketing and food hub development programs to improve outcomes and efficiency, meet demand, and maximize impact.
- Increase mandatory funding for Community Food Projects to improve nutrition and food security among low-income individuals and communities.
- Provide SNAP EBT point of sale devices to farmers markets, farm stands, green carts and other non-traditional healthy food retailers to improve access and increase consumption of fruits and vegetables.

Thank you for the opportunity to submit these comments and recommendations for the 2012 Farm Bill. PHI looks forward to opportunities to work with you to protect and support the farm bill nutrition programs.

Respectfully,

GABRIELLE SERRA,
Public Health Institute
[Redacted],

Washington, D.C.,
[Redacted].

COMMENT OF SUSAN SERVESON

Date Submitted: Sunday, May 20, 2012, 8:22 a.m.

City, State: San Diego, CA

Occupation: Retired

Comment: Please make sure the farm bill includes taking care of smaller independent farmers, organic farmers and all local farmers so that our foods are healthier. Stop subsidies to the corporate farms. Farms should produce healthy edible food and rotate land to promote good food growth. I support and ask you to support the Slow Food movement in the USA and to listen to their suggestions. We need better food for better life and health of the American people. You represent the people so I truly hope you take all suggestions as serious when they come from Slow Foods organization and the people who support them, such as myself. The effort and supportive vote from you will make a tremendous difference.

COMMENT OF ROBERT SESSIONS

Date Submitted: Friday, May 18, 2012, 11:56 a.m.

City, State: Iowa City, IA

Occupation: Professor

Comment: I urge you to include monies for programs supporting organic farming and small farms, conservation and food support for the poor. On the other hand I urge you to end subsidies to corn and bean farmers—the markets are rich now and cutting these subsidies alone would allow you to reduce dramatically the cost of the farm bill.

COMMENT OF SHARON SESSIONS

Date Submitted: Friday, May 18, 2012, 11:15 a.m.

City, State: Socorro, NM

Occupation: Professor of Physics

Comment: Please:

- Support small family farms.
- Reduce or eliminate subsidies for ethanol and corn intended for processing into high fructose corn syrup.
- Support organic and sustainable farm practices.

Thank you for your consideration.

COMMENT OF SAVITA SETHI

Date Submitted: Friday, May 18, 2012, 1:10 p.m.

City, State: Potomac, MD

Occupation: Social Worker (Retired)

Comment: We owe it to ourselves, our children and grandchildren to live in a clean or at the very least less polluted environment. Putting money where our mouth is will eventually save money in health care costs!

COMMENT OF ANKUR SETHI

Date Submitted: Friday, May 18, 2012, 11:57 a.m.

City, State: Herndon, VA

Occupation: Engineer

Comment: wish to voice my concern over farm subsidies which benefit larger farms. I believe farms can be used to employ more individuals and local farms without support from mass agricultural companies like Monsanto is the way of the future. We need to consider the long term health of farms over short term profit mongering. Long term we should have smaller farms and not mega-farms.

COMMENT OF MIKE SEXTON

Date Submitted: Friday, May 18, 2012, 12:31 p.m.

City, State: Junction City, KS

Comment: It's time that farmers get rewarded for keeping food more natural and not designed like it's coming off a conveyor belt or something. I've noticed over the years that even fresh produce has gotten bigger but with much less flavor and less

healthier and the practices of agribusiness are completely destroying the land, our own health and the environment in general because they're treating agriculture less like real food and more about how much they can get out of their growers.

COMMENT OF HELEN SEYFERLICH

Date Submitted: Friday, May 18, 2012, 3:59 p.m.
City, State: Elma, WA
Producer/Non-producer: Producer
Type: Livestock
Size: Less than 50 acres
Comment: Support for the small farmer provides important information to the farmer. The Farmer provides local fresh food and a more sustainable local economy.

COMMENT OF ANNE SHABER

Date Submitted: Monday, May 07, 2012, 4:00 p.m.
City, State: West Milton, OH
Occupation: Homemaker
Comment: Please stop subsidizing factory farms and mega farms. Subsidizing should be for small and or struggling farms that working hard to provide high quality nutritious food.

COMMENT OF JOEL SHABER

Date Submitted: Saturday, May 19, 2012, 9:24 a.m.
City, State: Boise, ID
Occupation: Waiter
Comment: We must implement sustainable, organic farming methods if we expect to become a healthy population. It is obvious that the factory farming of animals and industrial agricultural methods, which rely so heavily upon the petroleum industry, cannot work for the long haul. We are killing ourselves and destroying our children's future with our current course. Please implement the organic farm bill, and end subsidies for commodity crops. It is the only right thing to do.

COMMENT OF CONRAD SHAD

Date Submitted: Friday, May 18, 2012, 10:18 p.m.
City, State: Port Orange, FL
Occupation: Retired
Comment: I don't trust anyone in government to tell the truth. I don't believe they should be on their own type of health insurance as the rest of us. What's good for us should be good for them. President included.

COMMENT OF WILLIAM SHAFFER

Date Submitted: Tuesday, May 01, 2012, 11:15 a.m.
City, State: New Smyrna Beach, FL
Occupation: Retired
Comment: Anyone with an iota of compassion would pass a farm bill that fed those who are hungry, **And** would not complicate the bill with proposals that have nothing to do with feeding the hungry.

COMMENT OF KENDRA SHAMLEY

Date Submitted: Friday, May 18, 2012, 11:45 a.m.
City, State: Laramie, WY
Occupation: Cook
Comment: I believe that my rights entitle me to choose what food I can or cannot eat, without the government telling me if it's safe or not. Since most officials in Washington, D.C., are not around farms, livestock or raw foods on a regular basis how then can they make an accurate decision about their place in the food system, let along the "hazard" to the public.

COMMENT OF LINDA SHANKS

Date Submitted: Friday, May 18, 2012, 10:30 p.m.
City, State: Bloomington, IN
Occupation: Retired

Comment: SNAP is the cornerstone of the nutrition safety net, providing 46 million low-income people with monthly benefits that are timely, targeted, and temporary.

SNAP proved to be one of the most responsive safety net programs, growing quickly to meet rising need resulting from high unemployment in the recession. 84% of benefits go to households with a child, senior, or disabled person, and new participants spend an average of 10 months on the program. Funding cuts and harmful policy changes would require reductions in benefits or eligibility and impede SNAP's responsiveness when our economy falters or unemployment rises.

The FY 2013 Agriculture Appropriations bill should:

- Oppose funding cuts and harmful policy proposals to SNAP, including efforts to block grant, cap, or cut funding;
- impose restrictive work requirements; or
- otherwise reduce benefits or restrict participation.

The 2012 Farm Bill should:

- Maintain funding to support current eligibility and benefit levels and oppose harmful policy changes.

COMMENT OF SARA SHAPIRO

Date Submitted: Friday, May 18, 2012, 9:12 p.m.

City, State: Chicago, IL

Occupation: Social Worker

Comment: I work for a nonprofit organization and many of our clients cannot afford "good" food free of pesticides and genetic engineering. I fully support anything that will change food production to be more simplified and free of GMOs.

COMMENT OF CYNTHIA SHARP

Date Submitted: Friday, April 27, 2012, 10:19 p.m.

City, State: Huntington Beach, CA

Occupation: Surgical Nurse (Disabled)

Comment: I feel that it is vitally important to make sure, there is not one single hungry American Person in our Country! If we can help all these other Countries "By God" we should never ever see a hungry person in the United States Of America!

Sincerely,

CYNTHIA SHARP.

COMMENT OF DORA SHARPE

Date Submitted: Friday, May 18, 2012, 12:54 p.m.

City, State: Naples, FL

Occupation: Consultant

Comment: Our food system is out of control. It is embarrassing and completely out of touch with nature. Money and greed control our food system and it will be killing our children.

COMMENT OF MICHAEL SHARPE

Date Submitted: Thursday, May 17, 2012, 3:12 p.m.

City, State: Eagle, AK

Occupation: Tribal Workforce Development Specialist for Tanana Chiefs Conference, Alaska

Comment: To get to the point, the bottom line is "Farmers Feed Us". (Could be taken as "Farmers Feed [the] U.S." also . . .) * Unless we live on meat 24/7 with no other source of nutrition, everything else that "we" as people consume, comes from fruits or vegetables. Even our starchy, artificial, over-processed, commercial boxed and canned foods completely devoid of nutrition in some cases, is full of products (and byproducts) made/derived from vegetables and fruit.

Nearly every soft drink contains corn syrup. That syrup was provided by a corn farmer, who often does not get completely compensated for his work or is squelched to smithereens by a farm bill that needs revision. Even more-so than ever, people are turning to vegetarian and vegan diets, organic diets or just eating more vegetable and fruits. Even people who depend on soy diets are dependent on soy farmers

*If that phrase get's used I would like some credit.

being able to provide them with them with soy that is grown properly. Squelching the farm industry “forces” farmers to sacrifice quality over quantity at some point or another. Whether it is not being able to afford a better quality fertilizer that is more beneficial for the consumer on a number of levels, or being able to put as much care into the finished product or their land before and after a grow season. I have known several people who have worked on and even owned farms. They may not have admitted it, but it is truly a “thankless” job. The consumers depend on it, the farmer depends on it. When the taxes go higher on farm land and the grip gets tighter on the farmers nationwide, all you hear are sighs in the produce aisle in the grocery store when the price of corn went up by 10–20%; or when any other fresh foods have as well.

When you keep shortening the string, you cannot make ends meet; because the string is the string that holds the nation together. The “Farmers are **Our** string”. If “we” keep “letting” the grip get tighter on the farmers, we’re all taking part in shortening our ‘string’. If we shorten the thing that holds our nation together, we fall apart. Our food supply is something that cannot be taken lightly. Supply and demand are unique. Demand for food will **Always** be there, but “supply” will not. Don’t let our supply be squelched nor squandered. Once we let it slip through the cracks, it’s a lot harder to get it back rather than to just make the changes before hand. I don’t feel like elaborating anymore. If I need to say more than this, it defeats what I have already said and the purpose behind it. Please consider this. Take the “nuggets” of truth and wisdom out of this rather than writing it “all” off as rubble. I don’t want to live in a country without affordable and **Good** fruits and vegetables. “Don’t bite the hand that feeds, and don’t let it get bit either. Hold the hand that feeds, and see it through the harvest.” Only then can we **All** benefit. Revise and **Fix** the Farm Bill. This is the “Bottom Line”.

MICHAEL SHARPE,
Eagle, Alaska.

COMMENT OF JEAN SHARRY

Date Submitted: Saturday, May 19, 2012, 6:32 p.m.

City, State: Westwood, MA

Occupation: Instructional Assistant—High School Special Ed

Comment: It is crucial that we find a way to produce nutritious food that keeps us healthy and doesn’t sacrifice the environment or our health. Support small organic farmers!

COMMENT OF GEORGE SHAUB

Date Submitted: Friday, May 18, 2012, 10:35 p.m.

City, State: Ewing, NJ

Occupation: Insurance Claims Supervisor

Comment: In reviewing farm policy, please keep in mind that subsidies given to large agricultural interests put the health of our citizens, our land, the soil and the environment at risk, as well as risking the livelihood of small farmers and farm workers. We need a better farm bill than those of the past, one that focuses policy on organic farming and sustainable agriculture.

I support—and hope you do also—the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286), the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), maintaining the EQIP Organic Initiative, and fully funding conservation programs such as the Conservation Stewardship Program. Please ensure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

Thank you.

COMMENT OF KIMBERLY SHAUB

Date Submitted: Friday, May 18, 2012, 2:37 p.m.

City, State: Ewing, NJ

Occupation: Secretary

Comment: Please produce a bill that actually helps the real family farmers in my state of New Jersey and the country. The Big Ag corporations do not need any more subsidies. The small & organic farmers deserve first consideration, always. They are the ones that actually feed us our **Fresh** food. **Do Not** give more money to producing genetically modified food. It is not needed.

COMMENT OF MEL SHAVER

Date Submitted: Sunday, March 25, 2012, 9:19 p.m.

City, State: Sterling, IL

Occupation: Retired & Self-Employed

Comment: Farmers do not pay taxes on the purchase of equipment or supplies—thus, their land tax is way below what the rest of us pay—the playing field is not level—let the farmer pay his fair share—then the state won't have a money problem

Please reply—I am very concerned.

MEL SHAVER.

Look at the web-site (EWG) This is farm aide . . .

This has been going on for several years—we both know why . . .

Help me please.

COMMENT OF JUSTIN SHAW

Date Submitted: Friday, May 18, 2012, 5:43 p.m.

City, State: Oneonta, NY

Occupation: Lecturer

Comment: Please support local producers and please modify farm bill so that organic, vegetable, fruit and any local dairy are not alternative but receive equal funding as giant corn and wheat CAFOs in the Midwest. Please ensure tough standards on GMOs and give rights to organic farmers fighting drift from toxic pesticide laden giant industrial farming operations.

COMMENT OF NORMAN SHAW

Date Submitted: Friday, May 18, 2012, 5:46 p.m.

City, State: Ryde, CA

Producer/Non-producer: Producer

Type: Field Crops, Livestock

Size: 50–150 acres

Comment: We need to look for a sustainable local food driven market where both farmers and consumers profit. Farmers would get a better price. Consumers would get **Much** better quality food. We should be supporting local little farmers instead of huge corporate and many times not even American owned mega-business's. The little guy is getting killed! Thank you.

COMMENT OF S. SHAW

Date Submitted: Friday, May 18, 2012, 6:57 p.m.

City, State: Fargo, ND

Occupation: Assembly

Comment: I have soy allergies. Soybean oil being classified as a refined oil and not as a soy product has caused problems in my day-to-day living. The belief that **Only** the protein causes a reaction could prove deadly. I react to soybean oil and to a very long list of products made from it (including things like vitamin E) that are **Not** required by the government to carry the Soy Allergen warning. I have the right to know what is in the products that I buy, but the current labeling of ingredients allows for soy products to be included in “natural flavors” and the company does not have to disclose any use of soy due to “following Federal regulations”. Most soy/soybean products are made from GMO Soy, And I believe it would be easier to track soy/soy products if GMO ingredients must be stated as such. Thank you for your time.

COMMENT OF SHANNON SHEA

Date Submitted: Sunday, May 20, 2012, 11:07 p.m.

City, State: Rockville, MD

Occupation: Communications Manager

Comment: Developing a sustainable, local food system nationwide is essential to maintaining our country's health, economic prosperity, and environment. As a country, we must support the creation of this system through the farm bill, the most influential law on our overall food policy in this country. A fully functional food policy would provide healthy, good, sustainable food for all people, especially the most vulnerable like children and seniors, which is why we should continue to support the SNAP program. To support the development of this system, I fully endorse all

provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). To reduce our impact on the watersheds of this country, I also support fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. To help develop and train the next generation of farmers, I support including the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). Last, I support continuing to develop the organic sector by maintaining the EQIP Organic Initiative.

COMMENT OF N. LILLIAN SHEARER

Date Submitted: Sunday, May 20, 2012, 10:10 a.m.

City, State: Orange, VA

Occupation: Chef

Comment: I am currently located in the agriculture center of Virginia trying to source local food for my customers. I have a history in the farm and Ag communities. I was an Ag agent in Chautauqua County, N.Y. in the mid 1960's before the large subsidy system turned to profit for large leased farms in the Midwest. Small farms are going under daily, while the large land holders in the West are pocketing the money. The system needs to be rewritten so those small farms can become viable again and we all can eat safer more healthy local foods.

COMMENT OF LYNN SHEARON

Date Submitted: Friday, May 18, 2012, 1:26 p.m.

City, State: Richmond, KY

Occupation: Retired Speech Pathologist

Comment: We must do all that we can do to both support farmers and care for the environment. The almighty dollar should not be the only consideration or voice.

COMMENT OF HARRIET SHEELEY

Date Submitted: Wednesday, May 09, 2012, 11:06 p.m.

City, State: Skokie, IL

Occupation: Retired School Social Worker and Volunteer

Comment: Protect feeding programs for older Americans. We do not have a strong lobby, and programs like SNAP, TEFAP and CSFP are important for the survival of many. Thank you.

SUBMITTED STATEMENT BY TED SHEELY, UPLAND AND PIMA COTTON, ONION, CANNING TOMATO, PISTACHIO, LETTUCE, AND SEED WHEAT PRODUCER, LEMOORE, CA

I am Ted Sheely from Lemoore, California. I operate a diversified farming operation along with my family raising upland and pima cotton, onions, canning tomatoes, pistachios, lettuce, and seed wheat. I want to thank Chairman Lucas and Ranking Member Peterson for seeking input from producers in their recent field hearings on the next farm bill. I also appreciate the opportunity to discuss the views of the California cotton industry with you here today. I would also like to offer a special thanks to Representative Jim Costa, my Congressman, for your work on this Committee and for your dedicated representation of 20th District of California. Representative Dennis Cardoza, I commend your service to California agriculture.

Agriculture is one of the most important industries in California and the United States. California was the number one state in cash farm receipts in 2010, with \$37.5 billion in revenue. The state accounted for 16 percent of national receipts for crops, and seven percent of the U.S. revenue for livestock and livestock products. Numerous businesses, financial institutions and individuals provide supplies, financing and services to the farmers and ranchers that produce our nation's food and fiber. As a result, an effective farm bill that supports production agriculture is also an effective jobs bill for the general economy.

Overall, U.S. farmers are benefitting from relatively high commodity prices when compared to historical averages. However, it is important to remember that costs of essential inputs such as water, seed, fuel and fertilizer are also at historically high levels. As a result, profit margins remain thin, and higher prices have also brought increased volatility.

As an irrigated producer in the San Joaquin Valley, I have first-hand experience of the risks farmers face. The fluctuation of water supplies from 10% to 80% the last 3 years have added huge uncertainty and directly impacts my planting decisions and is a large component of any overall cost of production.

As this Committee works to reauthorize farm bill legislation, I appreciate the challenges posed by the difficult budget climate in Congress and by those in Congress that continually question the need for farm programs. While agriculture is willing to make a proportionate contribution to deficit reduction, it is vitally important that budget constraints and farm program critics not be allowed to undermine the effectiveness of our farm safety net.

With respect to production agriculture, I strongly encourage this Committee to take into consideration the diversity of production practices, cost structures and risk profiles. What works for my operation isn't going to be the same as farmers in Texas, North Dakota or Iowa. A one-size-fits-all farm program cannot address this diversity, and I hope that the eventual farm bill will offer a range of programs structured to address the needs of the different commodities and production regions.

I also urge the Committee to complete the farm bill this year—in advance of the expiration of the current legislation. We need some certainty regarding farm programs as we look at the long-term investments necessary to keep our farming operations economically viable; and to assure our bankers that there is an adequate safety net.

While most producers in this Valley are highly diversified, upland and pima cotton production remains an important crop in our operations. The 2008 Farm Bill has served cotton farmers extraordinarily well and, in recent years, has required minimal Federal outlays. However, deficit reduction efforts are placing unprecedented pressure on the existing structure of farm programs. The cotton industry also faces the unique challenge of resolving the longstanding Brazil WTO case.

In order to respond to the challenge of designing the most effective safety net with reduced funding and to make modifications that will lead to the resolution of the Brazil case, it is very important that the new farm legislation includes the cotton industry's proposal of a new revenue-based crop insurance program for upland cotton which will result in strengthening growers' ability to manage risk. By complementing existing products, the Stacked Income Protection Plan, or STAX for short, will provide a tool for growers to manage that portion of their risks for which affordable options are not currently available. This revenue-based crop insurance safety net would be combined with a modified marketing loan that is adjusted to satisfy the Brazil WTO case. Even with modifications, the marketing loan will remain an important source of cash flow from merchandisers and producers.

I also strongly support the continuation of current loan provisions for Extra Long Staple cotton and the special competitiveness program. With essentially all ELS production moving into export markets, the ELS competitiveness program is especially critical in order to keep U.S. pima cotton competitively priced in world markets. The program is critically important in a world market that is subjected to abrupt changes in trade policy such as last year's decision by Egypt to temporarily ban cotton imports. The balance between the upland and Pima programs is important to ensure that acreage is planted in response to market signals and not program benefits.

Given the diversity of weather and production practices, the menu of crop insurance choices should be diverse and customizable, allowing for maximum participation and effective coverage. In the 2008 Farm Bill, the introduction of enterprise unit pricing gave producers one more option for insuring against those risks that are beyond their control.

I encourage this Committee to resist efforts to further tighten existing payment limits and income means tests on support programs. I also strongly oppose any attempts to impose payment limits on any crop insurance products and any further eligibility tests for crop insurance purchasers. Artificially limiting benefits is a disincentive to economic efficiency and undermines the ability to compete with heavily subsidized foreign agricultural products. Artificially limited benefits are also incompatible with a market-oriented farm policy.

In recent years, conservation programs have become increasingly important and I hope those programs will remain useful options. Specifically, California producers have made good use of Conservation Innovation Grants through the NRCS EQIP provisions. These grants have been invaluable in helping our growers meet California's air quality regulations. In California alone, NRCS partnered with more than 1,100 agricultural producers to implement projects that significantly reduce emissions. I would urge Congress to continue this program as a priority matter in the next farm bill.

As a final point, cotton farmers understand that our ability to produce a crop is directly tied to there being a strong and stable demand from the textile manufacturers that produce yarn, fabric and a wide variety of textile and apparel products. We

are fortunate to sell our cotton to mills in the United States, as well as several countries in the international market.

For U.S. mills, the 2008 Farm Bill introduced an economic assistance program, and I am pleased to say that the program has been a resounding success. We have seen a revitalization of the U.S. textile manufacturing sector, as evidenced by new investments and additional jobs. I urge this Committee to continue this program in the new farm bill.

With the majority of our cotton sold in global market, the continuation of adequately funded export promotion programs such as the Market Access Program and Foreign Market Development Program is especially critical to the California cotton industry. Individual farmers and exporters do not have the necessary resources to operate effective promotion programs which maintain and expand markets—but the public-private partnerships, using a cost-share approach, have proven highly effective and have the added advantage of being WTO-compliant.

I very much appreciate the opportunity to provide these comments and look forward to answering your questions at the appropriate time.

COMMENT OF STEPHEN SHEER

Date Submitted: Friday, May 18, 2012, 10:56 a.m.

City, State: Hudson, OH

Comment: Let's give healthy natural food a chance and stop using chemicals and pesticide to neuter our land and poison the very people that are taxed to give the giant Agra Business tax breaks.

JOINT COMMENT OF JOHN & JANE SHEFFIELD

Date Submitted: Saturday, May 19, 2012, 6:35 p.m.

City, State: Austin, TX

Occupation: Retired

Comment: We desperately need better food safety in our country. We need to support small farmers in their endeavors to produce healthier safer food. We need serious monitoring and oversight of big industrial farming. The bottom line is the United States needs **Healthy And Safe Food**.

Thank you for listening.

COMMENT OF MICHAEL SHELDREW

Date Submitted: Thursday, May 10, 2012, 10:48 p.m.

City, State: Carson City, NV

Occupation: Student

Comment: It is my understanding that the SNAP/Food stamp program is supporting $\frac{1}{3}$ of Nevadans.

This is a great program aside from its sustainability. I noticed that you can't acquire food stamps and go to school more than half-time. This is counter-intuitive, you are essentially telling people you will support them forever. Meaning that without a set of guidelines or programs to help individuals in need of food stamps progress in our working infrastructure and become self sufficient; they will continually be on food stamps. You should have a program that puts struggling Americans in a cycle type process that would train and assist in a job placement. The programs we have now are a joke, training includes Microsoft suite and is limited to office and clerical type work. Why not have training in industries that are hurting and that could be used to stabilize the economy; such as, manufacturing or alternative energy. Yes these are "skilled" trades and training might be relatively expensive. However, with a long-term employment mentality in place persons in these programs would be able to contribute back into society and the very programs they took advantage of. You could even fund the training by taking .02¢ an hour from the newly trained individual for the next x number of years. But, quite frankly education and training are two very different things. And people tend to get them mixed-up, a good incentive for companies to hire someone would be to place them temporarily in the workplace for training without pay. The pay would initially come from the government, and just pay them $\frac{1}{2}$ in food stamps and $\frac{1}{2}$ in cash. Cash is important because of things that are not food, like cleaning supplies, toilet paper, paper towels, coffee filters, *etc.* If you hired them as temporary governmental employees you could drug test them, and accurately test the training programs. As well as being able to handle the insurance side of placing the persons in companies. Furthermore you could post the statistics to appease skeptics. Or you could just teach people how to grow their own food too.

COMMENT OF KATHLEEN SHELLEY

Date Submitted: Sunday, May 20, 2012, 10:50 p.m.

Occupation: Retired

Comment: The era of chemical ag and genetically engineered crops has brought us to a very dangerous place, and we have to change course if we expect to be able to feed our population in the future.

Genetic engineering has proved to be a colossal failure, as pests and disease organisms adapt to the genetic crop modifications. Further, GM crops have not, as promised, produced more, but less, and have contaminated standard crops through cross pollination. Cross pollinated crops have been used as grounds for patent infringement lawsuits from Monsanto and others against those whose crops were contaminated. This is absolutely outrageous, and must be aggressively addressed and corrected. Monsanto, et al, have had their way for far too long, and we can now clearly see that it is leading us to disaster. The tragedy that they caused in India should be evidence enough of their failure. I am referring to the crop failures that led to numerous suicides among Indian farmers. Please do what you can to address these issues in this bill.

High chemical input monocropping has produced inferior, toxic crops, and has ruined the land with excessive chemicals. It has also given rise to We need a fundamental change in our approach to agriculture, wherein we work with nature and not against it. I am for any efforts that move us toward that goal.

For further evidence of the damage done to our environment and farmlands, see following link to video by Dr. Don Huber: <http://vimeo.com/22997532>.

I further support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you.

Comment: I will allow our wise founding fathers to speak for me . . .

Its time to end the corporate rule on food and allow people to make their choice on where they would like to purchase food items.

Monocropping and GMO are destroying not only our ecosystems but our bodies as well.

I Please keep the small farmer, the communities that built America strong.

“The nation that destroys it’s soil . . . destroys itself”—Franklin Delano Roosevelt

“If people let the government decide what foods to eat and what medicines to take, their bodies will soon be in as sorry a state as the souls who live under tyranny.”—Thomas Jefferson

COMMENT OF MARLENE SHEPARD

Date Submitted: Thursday, May 17, 2012, 2:33 p.m.

City, State: Hartford, CT

Comment: Without the help of SNAP benefits, I would not have money to feed myself or my disabled son. We are both disabled, pending SSI, and cannot work, so we depend greatly on these benefits. Please do not cut. It's hard to stretch \$200.00 as it is. Less funds would make it impossible to budget and we would go hungry.

COMMENT OF RICHARD SHERESH

Date Submitted: Friday, May 18, 2012, 2:20 p.m.

City, State: Chula Vista, CA

Occupation: Consultant—Data Analysis

Comment: It is a shame that subsidies continue for those mega-farmers who have no need for them, only greed. Congress should be involved with good foods, not political contributions. Congress should continue to emphasize continued use of tax dollars that benefit the country through nutrition and conservation benefits that are long term and obvious. Continued give-aways to those who are in positions of political power through contributions only continues to degrade the nation's ability to provide local and sustainable agriculture. I urge you to support Local Foods, Farms and Jobs Act (H.R. 3286, fund conservation programs, such as the Conservation Stewardship Program and make sure any programs or insurances are tied to good conservation practices. Nutritional programs should be promoted and not slashed. Subsidies should be slashed not promoted.

COMMENT OF DOROTHY SHERMAN

Date Submitted: Friday, May 18, 2012, 4:20 p.m.

City, State: Greendale, WI

Occupation: Retired

Comment: I want to see more support for non GMO and organic foods—the factory farms and major food producers are killing Americans with their chemicals and GMO's. Support nutrition in our schools and provide healthier food to the poor. Stop subsidizing corn and factory farms.

COMMENT OF VALERIE SHERMAN

Date Submitted: Wednesday, May 09, 2012, 3:15 p.m.

City, State: Cayce, SC

Occupation: Director of Outreach Ministry

Comment: Greetings! I am unsure if you know the importance of the SNAP and other food programs. These and other subsidies or programs such as pantries and ministries are imperative to the survival of our elders. They depend on these services on a monthly basis because they help bridge the gap the seniors experience. Not only our seniors but, our children as well. We speak so negatively regarding our children but, don't reach out to help them. You must understand that in order to help them better themselves we must have their attention and we can't do that when all they hear are their empty stomachs. Keep these things in place and help Ministries such as ours that try to educate people on helping themselves. Thank you.

COMMENT OF INGA SHERRILL

City, State: Ellenville, NY

Occupation: Teacher

Comment: Local organic food is important to me and my family. One of the reasons I live in the Hudson Valley is because so many brave people are farming small and safe. Please don't let agribusiness giants ruin this growing grass roots movement.

COMMENT OF ALICE SHIELDS

Date Submitted: Friday, May 18, 2012, 12:19 p.m.

City, State: New York, NY

Occupation: Classical Musician

Comment: I want healthy organic food supplied by my farmers locally when possible. I want small farmers to receive all the support they need from all forms of government. I want all subsidies to non-organic farms and large agribusinesses terminated.

COMMENT OF DOORAE SHIN

Date Submitted: Friday, May 18, 2012, 3:47 p.m.

City, State: Honolulu, HI

Occupation: Teacher's Aide, Host, Activist

Comment: *Aloha,*

Please consider my support of a healthy farm bill. The current farm bill allows big agribusiness to collect subsidies and benefits for an unsustainable and unjust system of farming. Though it is advertised to be a way to solve hunger problems around the world, it has only concentrated food (unhealthy food) into few areas of the world, while hurting the soil and land and causing long-term damage to the environment.

We must adopt a sustainable, responsible way of producing our foods through the policies of the next farm bill.

I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286) and funding of conservation programs, such as the Conservation Stewardship Program. Any insurance subsidies should be in compliance with the conservation programs.

We must also implement all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236) and also maintain the EQIP Organic Initiative.

Please understand your responsibility of protecting our health as well as the health of the environment and the importance of sustainable agriculture. We must protect the future generations by implementing policies that allow local and organic farmers to grow, and that hold irresponsible agribusinesses accountable for detriments to the environment and health of its consumers.

Mahalo for your consideration,

DOORAE SHIN.

COMMENT OF MARCI SHINDEL

Occupation: Retired, Waitress, Psy. Aide, Bookkeeper, Electrician

Comment: I grew up on N.D. Diversified farm, learned work ethic, how to meet challenges and deadlines, observation skills and analytical problem solving and observation skills, time management, self confidence to succeed in life. you will be de-

priving kids of very necessary life skills if you restrict their experiences . . . Farming is best learned hands on with later training to teach more scientific improvement of methods.

COMMENT OF DIANE SHOEMAKER

Date Submitted: Friday, May 18, 2012, 3:01 p.m.

City, State: Waimea, HI

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I live on Kauai, known as the “Garden Island” where we import 85–90% of our food that travels anywhere between 5–10,000 miles and by the time it reaches us our fresh food is not fresh, it’s at least 8–10 days old, rendering it lost with vital nutrition. On the west side of Kauai we have no “organic” farming, just thousands of acres sprayed with very toxic pesticides from 5 out of the 6 major grocery GMO companies. Since moving here from the mainland I have developed all sorts of health issues from breathing in airborne pesticides. The school that I live literally next door to, Waimea Canyon Middle, has sent students home sick after the fields that are adjacent to the school and neighborhood have been sprayed with toxins. Pioneer, a Dupont Company, is currently in a lawsuit with the town of Waimea due their negligence and harm to public health with all their spraying.

A small group of residents and myself started an organic community garden (www.kekahacommunitygarden.org) so that we could have access to fresh, locally grown food that is affordable and support our health. As I said, we have **No Organic** food and very little locally grown food; it’s not available here on the west side of the “Garden Island”. There is simply not enough support to encourage organic local food production.

We have a very high percentage of Native Hawaiians compared to the state of HI. Native Hawaiians have the highest rates of diabetes, hypertension, obesity, *etc.* because they cannot afford the expensive shipped-in old” produce in our local grocery stores. The major farmers, GMO companies, are **Not** producing locally grown food, but rather conducting research while our people are dying of diseases that are directly related to food consumption. What choice do our people have but to buy cheap processed foods while we fight extremely high rates of cancer in this area?

We need a farm bill that is going to support local and organic food production, not research companies poisoning us. We have so much land (most is privately owned by good folks that are land rich, cash poor)and it could be put to good use feeding our people. Yes, feeding our people is what the farm bill is really about and I want a farm bill that supports that. It’s not rocket science although I do appreciate the complexities of law making. Do what’s *pono* (right, correct, responsible). This is what I want you, my representatives to support. I pay my taxes, vote in **All** local and national, primary and general elections and take time out of my day to be involved in the democracy I live in.

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

We believe our Kekaha community garden is a start in the right direction, but our population needs more than just our community garden, we need our representatives to support a quality farm bill so that all people are fed fresh, nutrient rich food that is grown locally without harming the ‘aina (land), other species, ourselves, our climate. We need a farm bill that embodies the concept that we can have good paying jobs that are “green” and not toxic. Please help me keep Kauai a true “Garden Island”. I’m not from here, but I care deeply about this place and the people from here. I care deeply about all the other towns and cities where people live and grow food. This is basic life stuff—feeding our people. This is what deserves your utmost support and attention to do what’s *pono*. Why else are we all here? It’s incredible that this farm bill is even an issue, that it is threatened. Always follow the path of what is right and make all your decisions from there. Thank you for taking the time to read this—I know many of my friends, family, neighbors.

COMMENT OF DOREA SHOEMAKER

Date Submitted: Thursday, May 17, 2012, 11:40 p.m.
City, State: Incline Village, NV
Occupation: Healthcare
Comment: We must support sustainable farming that does not rely on pesticide sprays, GMO seeds and other hazardous non sustainable farming. When we support the local family farm, then we are supporting sustainable farming.

COMMENT OF LORI SHOLLENBERGER

Date Submitted: Friday, May 18, 2012, 1:06 p.m.
City, State: Easthampton, MA
Occupation: Self-Employed/Piano Teacher
Comment: Massachusetts and Hampshire City in particular is leading the way in organizing land and resource to produce local, organic food. The rest of the country is so far behind—and this can and will become a real crisis in the near future. We MUST reorganize how we produce food as a nation. Thanks as always for your work! We appreciate you!

COMMENT OF CINDY SHOOK

Date Submitted: Friday, May 18, 2012, 7:39 p.m.
City, State: Golden, CO
Occupation: Retired, Retail Clerk
Comment: The nutritional value in our food is going down. Tomatoes grown hydroponically taste like wimpy cucumbers, farmers are receiving feed that has no nutritional value. Pesticides that are poisonous for us. Companies that produce these detrimental products not only poison crops in neighboring organic farms but seek to drive them out of business. This is morally wrong! Needs to be stopped.

COMMENT OF BILLY SHORE

Date Submitted: Wednesday, May 16, 2012, 5:42 p.m.
City, State: Washington, D.C.
Occupation: CEO and Founder, Share Our Strength
Comment: Share Our Strength is a national nonprofit organization dedicated to ending childhood hunger in the United States by connecting children with the nutritious food they need to lead healthy, active lives. Through our No Kid Hungry campaign, Share Our Strength ensures children in need are enrolled in effective Federal nutrition programs; invests in community organizations that fight hunger; teaches at-risk families how to cook healthy, affordable meals; and builds public-private partnerships to end childhood hunger at the state and city level. This approach allows Share Our Strength to leverage Federal investments in Federal nutrition programs to ensure these programs are used effectively and efficiently. We are pleased to submit testimony for the record to the House Agriculture Committee, Subcommittee on Nutrition and Horticulture for your hearing on the farm bill reauthorization.

The reauthorization of the farm bill offers a unique opportunity to ensure children in this country receive the food they need to grow and thrive. The Supplemental Nutrition Assistance Program (SNAP) is a critical lifeline for millions of families struggling to make ends meet, helping them to put food on the table and to maximize nutrition on a limited budget. More than 16 million children are living in poverty in the United States and one in five children are at risk of hunger. Over 46 million Americans rely on SNAP benefits to buy the food they need to feed their families, and 76 percent of SNAP households include a child, elderly person, or disabled person. Ensuring our children have enough to eat must be a priority for our nation.

At Share Our Strength, we have long seen firsthand how important SNAP is to families. Recently, individuals from across the country have written us to share the important role SNAP played during difficult times in their lives, and, most importantly, how the program allowed them to get back on their feet to a place where they no longer needed to rely on the program.

Tracy, from the Chairwoman's home state of Ohio, told us about how food stamps served as a safety net to provide for her children when her family fell on hard financial times. She wrote to us: "I am now 61 years old but when I was a teen my parents died and I became pregnant. My daughter and I used food stamps as I finished school and then became employed. She is now raising our grandchildren after she attained her college degree with high honors and I am happily married for many

years. I am forever grateful that we had that help when it was so necessary if I were to succeed and she was to thrive in preschool.”

L. in Mr. Baca’s home state of California shared with us: “Like so many other people, I was the eldest of two siblings being raised by a single mother. The struggle for our family to stay fed was aided by school lunches and by my grandmother who often supplied our evening meal and most meals on weekends. It wasn’t until I was much older that I came to realize that she fed us so frequently because there was often little to eat at home by the end of the month. As an adult with a professional job and a college education, I sometimes run into people that make negative comments about people on public assistance. They could never have guessed that I had been one of those people . . . It is tempting to vilify people that have fallen on hard times because then you can comfort yourself with the idea that if you do everything right, this won’t happen to your family. Sometimes life just doesn’t turn out the way you planned it—not because you failed, were lazy or didn’t try hard enough . . . but because that is life.”

SNAP recipients are often our nation’s heroes. Kimberly in Indiana told us: “My experience with food stamps began in May of 1994, and it should have begun much earlier. I have five sons, and my husband was in the U.S.M.C. He was in the military drawdown after the Gulf War, so our civilian life began March 08, 1992. We went through a lot of hardship trying to be self-reliant, and in the end it did not work. I was desperate, and applied for food stamps. My family began to eat well. Their health increased. They became carefree, not having to be hungry. I am grateful to my government for helping us when we needed it.”

Lack of an adequate, nutritious diet during childhood hinders educational achievement, and has long-term consequences for future workforce competitiveness. Hungry children cannot learn as much or as fast because chronic under-nutrition impairs cognitive development. They are also more likely to be sick often, resulting in absence or tardiness from school. Hungry children are 1.4 times as likely to repeat a school grade. As we compete with a global workforce, hunger saddles our youth with lower educational and technical skills and our nation with a less capable group of workers. Funding cuts to SNAP would be detrimental to these families and would place children who rely on food provided by SNAP at an unfair disadvantage compared with their peers.

Proposals have been discussed in Congress this year to turn SNAP into a block grant program. The estimated effect of such a policy is severe: cuts of as much as \$134 billion to states that rely on Federal funding for SNAP to ensure families have access to food. These funding cuts would be devastating to the families who rely on SNAP to feed their children.

In addition to the health and education benefits SNAP provides to children and families, the program also provides crucial economic stimulus activity for communities across the country. Every \$5.00 in new SNAP benefits generates \$9.00 in total community spending. Additionally, SNAP has proven itself a program that is responsive to the economic climate, especially in recent years. As unemployment numbers grew during the recession, SNAP responded quickly and provided benefits to families facing job loss, often due to layoffs or budget cuts. Now, as the economy slowly begins to recover, SNAP participation is expected to decline to nearly pre-recession levels. According to the U.S. Department of Agriculture, new SNAP recipients stay on the program an average of 8 to 10 months, demonstrating the program’s effectiveness as transitional assistance for those falling on hard times.

As important as ensuring families have access to the SNAP benefits they need is giving them the tools to prepare healthy meals with the ingredients they purchase with SNAP dollars. Share Our Strength partners with community non-profit organizations to run Cooking Matters, a 6 week nutrition education program that has taught more than 88,000 low-income families how to stretch their food dollars in a healthy way since 1993. Many of our community partners depend on funding from the SNAP Nutrition Education program to run Cooking Matters courses. Participants in the program learn how to select nutritious and low-cost ingredients, prepare them in healthy ways and maximize their food resources.

We’ve seen proven results from Cooking Matters, demonstrating additional support for the SNAP Nutrition Education program. One such example is a woman named Lareese from Graysonville, Maryland. Lareese is a single mother of two, relying on SNAP and WIC to feed her family. She recently graduated from a dental assistant program and is looking for work. Lareese is active in her community center, and signed up to take a 6 week Cooking Matters course offered there. Before participating in Cooking Matters, Lareese would sometimes run short on groceries before her benefits renewed. Six weeks after graduating from the course, she was able to stretch her food money an additional 2 weeks. Before the program, she would buy about two food items with a \$6 WIC check for fruit and vegetables. Now,

after having learned to compare the unit price of groceries and consider frozen and canned fruit as an alternative to fresh, she's able to stretch that \$6 to buy two packages of frozen fruit, two canned fruits and some applesauce. As a result of Cooking Matters and SNAP Nutrition Education, Lareese is providing healthier, more nutritious foods for her family.

Myths about the ways in which SNAP recipients spend their benefits continue to exist, including that the program's participants spend their money on unhealthy fast-food options. A recent study by Share Our Strength supports our first-hand experience with SNAP recipients who are eager to provide their families with healthy foods. We surveyed 1,500 low to middle income families—the majority of whom are SNAP or WIC recipients—about their cooking habits. In the study, which was supported by the ConAgra Foods Foundation, 85 percent of families rated eating healthy meals as important, and eight in 10 families reported they cook dinner at home at least five times a week. In a typical week, a low-income family eats fast food for dinner one night a week. As income decreases, the frequency of eating dinner made at home increases. But for all the cooking low income families are doing, they're struggling to make healthy meals because their food budgets are limited.

The study found that three in four families agree that cooking healthy meals at home is realistic, but only about ½ of those we surveyed are able to make healthy meals most nights of the week. That is far too many families whose healthy eating aspirations aren't matching up to their daily realities. When asked what was keeping them from eating healthy meals, cost was the most commonly cited barrier. Healthy options like fresh produce, lean protein and seafood are commonly passed over at the store because of their price. These findings demonstrate strong support for the continued Federal investment in Federal nutrition programs, including SNAP and SNAP Nutrition Education.

We recognize the challenges presented by the current fiscal environment, and that the Committee is under pressure to find savings this year. However, cutting funding for SNAP—either through policy changes that limit eligibility for the program for millions of Americans who need these benefits, or by lowering benefit levels—would be devastating to the economic and health well-being of our country. Efforts to fight against childhood hunger and promote child nutrition have long enjoyed bipartisan support, and there is a longstanding, bipartisan commitment to protecting SNAP, child nutrition programs, and other nutrition assistance programs in past deficit reduction plans. Congressional committees and the President's bipartisan National Commission on Fiscal Responsibility and Reform have sought ways to find cost-savings in Federal programs without cutting funding for anti-hunger programs. We urge you to take the same tack when negotiating the farm bill legislation.

We appreciate the opportunity to submit testimony on this important issue, and look forward to the Committee's actions moving forward on the Nutrition title of the farm bill.

COMMENT OF MICHAEL SHORE

Date Submitted: Friday, May 18, 2012, 4:49 p.m.

City, State: Ashland, AK

Occupation: Retired

Comment: Nutrition is the only basic reason for food. Filling bellies not packages, shelves or bank accounts. We eat so we can live. We have been trained to accept eating junk as fun and easy. Education by advertisers is effective. What good do you do the nation if you poison the citizens and the farmland? Best Practices means food for the coming generations. Stop GMO Stop Mono cropping Stop poisoning the land and sea. Educate the people to be healthy; to make healthy choices and jail the producers and users of poison who lay waste to our very landscape in the name of profit. Do that now or just wait for Mother Nature to call time out for humans . . . she can do it. Either way bad practices will be ended.

COMMENT OF ERNIE SHORTNESS

Date Submitted: Monday, March 26, 2012, 9:04 p.m.

City, State: London Mills, IL

Producer/Non-producer: Producer

Type: Field Crops

Size: 1,000+ acres

Comment: Dear Congressmen:

If I could allocate resources for the next 5 years in U.S. agriculture, I would eliminate crop insurance and direct payments to farmers. Each farmer should have to

make good business decisions about the crops he plants and how aggressively to expand his operation without being bailed out by tax dollars.

I would take the savings from these cuts and upgrade and repair our lock and dam system on the Mississippi river and its tributaries. That will help the U.S. keep pace with increasing foreign competition, and benefit all U.S. farmers and consumers alike.

I thank you for this opportunity to comment.

Sincerely,

ERNIE SHORTNESS.

Comment: I voted for you Dan Lundgren now it's your turn to act and protect the farmers and our food. Please do your part in protecting us and our future generations. Don't let big business rule our lives by bad decisions. Help protect America and Americans.

COMMENT OF CASSANDRA SHOUP

Date Submitted: Saturday, May 19, 2012, 12:35 a.m.

City, State: Downingtown, PA

Occupation: Engineer

Comment: Having local food available from farmers in our neighborhoods is very important. It promotes healthy seasonal eating of fresh food which contains more nutritional value than produce which is transported for long distances. I am a first year work share member of a local CSA and having that opportunity allows me the choice to eat the foods I want to put in my body. I do not believe that processed foods, no matter how inexpensive, are the right direction for our society and will limit our ability to continue providing a higher quality of life for all people. Agribusiness does more harm to our economy and environment than it does good. Please cast your vote for what benefits increased food freedom and consider supporting the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

Maintaining the EQIP Organic Initiative.

COMMENT OF LEE SHROPSHIRE

Date Submitted: Sunday, May 20, 2012, 10:28 p.m.

City, State: Nashville, TN

Occupation: Voice-Over Talent for Medical Continuing Ed Online Programs

Comment: I want to eat organic, fair trade, locally produced food, made without pesticides, and non GMO. I want farms to be subsidized to produce the above, and not to be forced to dump their product when quotas are met, while people in this country are starving, and while we can help developing countries. I want congress to stop [Redacted] around and messing with the environment. Stop it. We don't need more gas and oil development, you idiots. We need renewable and sustainable energy sources which will create sustainable jobs. What's the matter with all of you? Get your shit together, and address my largely shared concerns.

Sincerely,

LEE SHROPSHIRE.

Comment: We need to have the Govt. support and encourage small farms. They are the only ones that can supply nutrient rich and clean disease free food. The research is there.

COMMENT OF ANITA SHUMAKER

Date Submitted: Friday, April 27, 2012, 5:12 p.m.

City, State: West Unity, OH

Occupation: College Professor

Comment: It has been said that “America has the best dressed hungry people in the world”. They are our neighbors and members of our communities, as well as your constituents. I support the local food pantry, but we really need your support for a strong farm bill to preserve programs such as SNAP, TEFAP, and CSFP. Cutting food programs to the most vulnerable is not the way to balance the budget.

Thank you for your consideration.

ANITA SHUMAKER.

COMMENT OF SHERYL SHUMSKY

Date Submitted: Friday, May 18, 2012, 6:31 p.m.

City, State: Seattle, WA

Occupation: Musician

Comment: Industrialized farming is destructive in so many ways. Please make strong measures now to insure family farms can coexist with larger agribusiness. Also environmental protections insure humane treatment of livestock and Mother Earth. The bottom line is human health balanced with plentiful harvests. I am against GMO because the cat is out of the bag—we have evidence it’s a dubious tactic (super weeds, lack of flavor) yet corporations like Monsanto want to control this market so all tactics become fair game and they can’t foretell the future side effects these GMO’s have likely unleashed. Human health is at stake and a way of life—family owned ranches and farms. Keep this in mind with all dealings with farm policy. Don’t give in to the lobbyists! Listen to the people!

COMMENT OF BRENDA SHUNN

Date Submitted: Friday, May 18, 2012, 1:06 p.m.

City, State: Austin, TX

Occupation: Physical Therapist, Massage Therapist

Comment: I think it’s high time that we do what is morally correct towards our fellow man, fellow beings, land and environment. Our health care costs would not be the highest in the world if the food source was not so unhealthy! I do not support genetic modification at all—unless those plants which are to be genetically modified are in a carefully controlled **Closed** environment—and those foods labeled—it is bad enough that it is a challenge to find food sources that are not affected by thoughtless greed, inhumane environments—even our vegetables now carry products thanks to use of hormones and antibiotics and the likes on defenseless animals—support safe and healthy agriculture!

COMMENT OF ANNE SHUSTER

Date Submitted: Monday, May 14, 2012, 3:24 p.m.

City, State: Pittsburgh, PA

City, State: Rock Island, TN

Producer/Non-producer: Producer

Type: Livestock

Size: 301–500 acres

Comment: I am an American Farmer. I want real people, not big corporate ag, back to raising food the way nature intended. Grass fed and pasture raised. With heirloom varieties—not GMO, hormone, pesticide, and antibiotic ridden products.

Real food for real people—not by science and profit driven entities who care only for the bottom line and have no soul nor conscience!

COMMENT OF HELEN SHUSTER

Date Submitted: Wednesday, May 09, 2012, 2:55 p.m.

City, State: Rochdale, MA

Occupation: Retired

Comment: I work with a group of intergenerational college students from Worcester State University in Massachusetts. We do SNAP outreach to seniors and others in need of assistance. As we help applicants submit their SNAP applications we hear their stories and know that they are truly in need of assistance to buy food. Many lower income seniors often have to choose whether to buy their medications or food and they are often hungry. Food prices are up and this is particularly hard on seniors with fixed incomes. SNAP is one of the best safety net programs with only a 3% level of inappropriate expenditure and is much more efficient than many other wasteful government programs such as military expenditures. SNAP is also a vitally important program for working families who even with two or three jobs find it hard to feed their children. Childhood hunger is a disgrace in this country. If you cut the SNAP budget you will be doing great harm to innocent children and needy families. Cutting SNAP is shortsighted because hungry children and seniors get sick more often and need expensive medical care which is more of a drain on the economy than SNAP. Make the correct and courageous vote to continue to fund in this time of need in the U.S. Do not reduce the deficit on the backs of those who can least afford it and will be most hurt.

COMMENT OF JANET M. SHUTE

Date Submitted: Sunday, May 20, 2012, 10:57 p.m.

City, State: New York, NY

Occupation: Retired

Comment: Dear Chairman Lucas,

I understand that tomorrow, May 19th, is the final opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this letter. I am a senior citizen who is appalled by the lack of attention to the needs and issues that dedicated young farmers are facing. I was also distressed to hear that only one beginning farmer was invited to testify on the challenges and critical needs of the next generation. Monsanto's monopoly is terrifying to those of us who want our children and grandchildren to grow up in a healthy fashion. Even more discouraging is the short sighted lack of planning and support for hard working young people who are turning up in large numbers to reclaim our land—many using organic practices—**When It Would Cost So Little!** I want to share my support for programs that help the next generation of growers build strong farm. It is estimated that 125,000 farmers will retire in the next 5 years. It is absolutely critical that farm bill programs help support young farmers to get started in this challenging field. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorization of a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revision of FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirmation of the existing cost share differential for BFRs within EQIP. Also, reaffirmation of the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amending the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements

with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill. Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill.

Sincerely,

JANET M. SHUTE.

COMMENT OF MARY SHYSHKA

Date Submitted: Friday, May 18, 2012, 1:28 p.m.

Occupation: Hospital Administration

Comment: Agree with everything in the e-mail—support small farms without pressure from big ag, dismantle CAFO'S, label GMO's, give us a right to organic foods and raw milk, etc.

COMMENT OF AISHA SIAL

Date Submitted: Saturday, May 19, 2012, 12:57 a.m.

City, State: Seattle, WA

Occupation: Gardener

Comment: Science guided by righteousness shows us a way out of the destructive practices used by as such producers as Monsanto. To attract the Mercy of Our Master and Creator more of us growers should to be using methods such as permaculture and grass fed livestock.

30:31 “So set thy face to the service of religion as one devoted to God. And follow the nature made by Allah—the nature in which He has created mankind. There is no altering the creation of Allah. That is the right religion. But most men know not.”—*Holy Quran*.

COMMENT OF KATHRYN SIBLEY

Date Submitted: Friday, May 18, 2012, 1:58 p.m.

City, State: Richmond, CA

Occupation: Office Worker

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative. Maintaining a strong food stamp program that will feed the millions who have lost jobs or are working with subsistence pay, thanks to our Federal government's bad management.

Please do not make bad farm policy even worse. It's time to take a different approach and start over with real reform. As a resident of Richmond, California, I am watching the development of solid urban farming opportunities that can be part of a citizenry-oriented farm bill.

COMMENT OF KEVIN GERSHOM SICARD

Date Submitted: Friday, May 18, 2012, 10:38 p.m.

City, State: Independence, OR

Occupation: English Teacher

Comment: U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

Unfortunately, we as a nation are not there yet. Not only are some politicians out of touch with the values of the American people, but corporate agribusiness has a stranglehold on our regulatory system and our political leaders.

But with your help Rep. Schader, we can change that.

Farmers and eaters across the U.S. benefit from a fair and healthy farm bill. We need your help today. Right now the House Agriculture Committee is accepting public comments on this critical piece of legislation.

I request that you do the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

COMMENT OF SARAH SIEBACH

Date Submitted: Sunday, May 20, 2012, 10:18 p.m.

City, State: Madison, WI

Occupation: Student

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I am a young farmer and I'd like to share my support for programs that help the next generation of growers build strong farm businesses. As it's estimated that 125,000 farmers will retire in the next 5 years, it's absolutely critical that farm bill programs help citizens get started in this challenging field. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill. As a college student, I've seen the tremendous good that SARE grants and others generate both providing opportunities to start/continue agricultural studies here at school and outreach with the community. We couldn't progress without them! I also hope that when I finish studying, I can begin work on my own orchard; I know this will be impossible to achieve without the blessing and backing of the government to get started. Please continue to encourage and enable hopeful farmers!

Sincerely,

SARAH SIEBACH.

Comment:

- Funding for farmland acquisition
- Subsidies for new farmers
- Funding for RBOG and RBEG programs
- New farmer program funding
- Farm to school initiatives

COMMENT OF ANJA SIEGER

Date Submitted: Friday, May 18, 2012, 11:57 a.m.

City, State: Franklin, WI

Occupation: Writer

Comment: At the age of 25 my health has already been compromised from exposure to pesticides, genetically modified wheat, corn and soy. Many of my friends in my generation have suffered similarly. This takes a toll on our ability to perform and function in a job in an already blighted economy. I urge you to consider the incredible illness so many Americans currently suffer from large scale farming.

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you.

COMMENT OF DAN SIGMANS

Date Submitted: Friday, May 18, 2012, 12:17 p.m.

City, State: Perkasio, PA

Occupation: Student

Comment: Agricultural subsidies in the U.S. severely distort the world commodities market and drive the cost of certain unhealthier foods lower than other foods within the U.S. Therefore, reform the agricultural subsidies so that the only ones that remain are those that encourage conservation and sustainable agricultural practices.

COMMENT OF LING SIGSTEDT

Date Submitted: Saturday, May 19, 2012, 9:56 a.m.

City, State: Denver, CO

Occupation: Art Director

Comment: The people have a basic right to be protected from monopolistic organizations like Monsanto, who are trying to control our food source for their own profit. A union of truly free and unassociated individuals needs to hold them accountable. What good is any other legislation if greed and unbridled science dominates farming? Protect the bees, limit Monsanto, legalize raw milk and protect farmers from frivolous patent law suits. If the FDA won't rise to the occasion, the state must do it. I wish America would ban GM crops.

COMMENT OF SUSAN SILBER

Date Submitted: Friday, May 18, 2012, 1:19 p.m.

City, State: Berkeley, CA

Occupation: Environmental Educator

Comment: We need more organic produce, and to support local farmers! Our farm bill needs to reflect our need to provide nutritious organic produce to our children!

COMMENT OF AMY SILBERSCHMIDT

Date Submitted: Friday, May 18, 2012, 3:13 p.m.

City, State: St. Paul, MN

Occupation: Medical Student

Comment: We need a farm bill that promotes healthy eating. It no longer makes sense to subsidize corn and not apples (or other healthy foods). I would love to see incentives for organic farms that keep our environment and our farm workers healthy. Subsidizing corn to make unhealthy food cheap is one major factor driving obesity and related health complications in our country. As a future physician, I can rail all I want at patients to lose weight. I can "raise awareness" about health disparities and poor access to healthy food. But to really help people be healthy, we need to make it accessible and affordable. And that means changing the farm bill.

COMMENT OF THOMAS SILLIMAN

Date Submitted: Wednesday, May 16, 2012, 10:24 a.m.

City, State: Enumclaw, WA

Producer/Non-producer: Producer

Type: Dairy

Size: Less than 50 acres

Comment: Dear Sirs,

I would like to see a farm bill that limits the payout to absentee farm owners and corporations. The current system seems to benefit corporations with lobbyist power. I think it is important to provide help for small family farms. Organic and traditional farms need support. Help with loans, insurance, and marketing are key areas. The reduction of subsidies for crops and industry that really need no assistance should be considered.

THOMAS SILLIMAN.

COMMENT OF PATRICIA SILVA

Date Submitted: Friday, April 13, 2012, 12:13 p.m.

City, State: Albuquerque, NM

Occupation: Service Coordinator for Low Income Elderly

Comment: I service 225 residents that are low income elderly and disabled who are in such great need of food. I run a food pantry once a month but with the need today it is not as much as is needed. Also most of these people are now seeing their food stamps cut right in half! Help us fight hunger in America—this is not an American standard to see people go hungry!

COMMENTS OF SANDRA SILVA

Date Submitted:

City, State: Chicago, IL

Occupation: Senior Healthcare Consultant

Comment: We need to encourage localized farming not factory farms, such that we are eating seasonal, locally grown, sustainable food. We need not emphasize export crops to the detriment of our own population. Keeping farming localized means less transportation from farm to plate, our population gets fed healthier food and we do not need to import basic food for our population. Also less petrol products and less antibiotics used in localized farming allowing farm animals to grow as nature intended. Also more people are employed on smaller local farms than on factory farms. More sustainable, healthier for everyone concerned.

Date Submitted: Monday, May 14, 2012, 10:38 a.m.

Comment: We need to fix our food distribution system such that we produce real food locally, in a affordable, sustainable, humane and environmentally safe for the Earth and all species of the Earth. If we were to produce food closer to the population that consumes it we would not overuse petroleum products in transport. We need to stop overemphasizing export crops, so we do not have to import basic food for our own population. Every one of our population is worthy of respect and to have his/her basic needs met.

Date Submitted: Saturday, May 19, 2012, 11:34 a.m.

Comment: I see the effects of questionable food stuffs on seniors, *i.e.*, high blood pressure, high cholesterol, heart disease, diabetes, if we were to stop subsidizing the corn and soy bean growers to grow GMO corn or soy and those growers would grow their crops as they did before massive petroleum fertilizers and GMO technology became pervasive, we could save our topsoil, grow more nutritious corn and soybeans and have a healthier population.

COMMENT OF LOUISE SILVERMAN

Date Submitted: Friday, May 18, 2012, 3:12 p.m.

City, State: North Myrtle Beach, SC

Occupation: Retired/Part-Time Health Consultant

Comment: As someone interested in helping people achieve and maintain optimal health I understand the importance of nutrition and the importance of organic farming and sustainable practices.

COMMENT OF DOROTHY SIMKANIN

Date Submitted: Friday, May 18, 2012, 9:34 p.m.

City, State: Lackawanna, NY

Occupation: Quality Control Inspector

Comment: You Are What You Eat. Genetically altered, growth hormones, and massive doses of antibiotics have been introduced into our food. I personally would prefer organically grown food. Farmers who grow organic produce and cattle should be rewarded and supported by us and our government. It is a fact that we are what we eat, how much of this altered food will we eat before we become genetically altered also?

COMMENT OF CONNIE SIMMONS

Date Submitted: Friday, May 18, 2012, 12:45 p.m.

City, State: North Port, FL

Occupation: Retired

Comment: Please support organic and family farmers. We need to stop subsidizing huge mega farms that are destroying America and our farmland. Stand up for all Americans. Thank you.

COMMENT OF KATRINA SIMMONS

Date Submitted: Sunday, May 20, 2012, 12:30 a.m.

City, State: Sarasota, FL

Occupation: Executive Assistant

Comment: Locally grown produce is critical to our survival. Both as a community and as a healthy country.

COMMENT OF KERI J. SIMMONS

Date Submitted: Friday, May 18, 2012, 2:35 p.m.

City, State: San Jose, CA

Occupation: Graduate Student, Master of Public Health Program, San Jose State University

Comment: Dear Congress,

I am a graduate student of the Master of Public Health program at San Jose State University. I am writing because I believe all Americans should have equitable access to healthy, organic, and affordable foods produced in a sustainable manner. As a young adult looking to have a future and family, I am discouraged due to America's current food system. American people have spoken—we demand food reform. We must feed our children only the most nourishing foods to expect America to continue as a powerful global contributor. For these reasons, I ask you to please join me and millions of Americans in supporting the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you,

KERI J. SIMMONS.

COMMENT OF LIZ SIMMONS

Date Submitted: Tuesday, May 15, 2012, 12:23 p.m.

City, State: Denver, CO

Occupation: Editor

Comment: I'd like to urge you to use the 2012 Farm Bill to expand access to healthy, affordable foods, rather than reduce access to those who need it the most. Cutting \$36 billion in SNAP is the exact opposite of what we should be doing. Low income people already have a tough enough time trying to stay healthy in this economy; are you trying to make it even worse?

COMMENT OF JEFF SIMMS

Date Submitted: Friday, April 27, 2012, 2:46 p.m.

City, State: Chicago, IL

Occupation: Human Services

Comment: I have seen firsthand how vital a support food pantries and SNAP can be for working families during recessions. Please support funding for the Emergency Food Assistance Program (TEFAP) and the Supplemental Nutrition Assistance Program (SNAP) in the upcoming farm bill.

COMMENT OF LOIS SIMONEAUX

Date Submitted: Saturday, May 19, 2012, 8:31 p.m.

City, State: Hernando Beach, FL

Occupation: Teacher

Comment: Please keep food supply safe and protect small producers. Stop subsidies to corporations and to those not growing crops.

Tax dollar waste starts here. Make crop insurance affordable and cap payouts.

Support American family farmers, not unidentifiable, tax loophole using faceless corporations.

COMMENT OF AUDREY SIMONSON

Date Submitted: Friday, May 18, 2012, 6:20 p.m.

City, State: Rolfe, IA

Producer/Non-producer: Producer

Type: Field Crops

Size: 301–500 acres

Comment: Please, please keep the funding for school lunches and breakfasts for those kids who don't get enough food at home. Keep the agricultural businesses honest and let us know what their products will do to our general health.

COMMENT OF MICHELLE SIMONSON

Date Submitted: Friday, May 18, 2012, 2:26 p.m.

City, State: Fairfax, CA

Occupation: Education

Comment: I know that you know the right thing to do that will support the best quality of food and I trust you will do it. Thank you, it means so much to all of us.

COMMENT OF DULCEY SIMPKINS

Date Submitted: Friday, May 18, 2012, 6:22 p.m.

City, State: Westminster, CO

Occupation: Research Manager

Comment: I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

Rather than funding entitlements for agribusiness, our nation would benefit far more by fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

Our agricultural sector would also benefit from the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), and most of all from maintaining the EQIP Organic Initiative.

COMMENT OF JAMES SIMPLICIANO

Date Submitted: Friday, May 18, 2012, 12:25 p.m.

Producer/Non-producer: Producer

Type: Field Crops, Specialty Crops, Vegetables, Other

Size: 50–150 acres

Comment: Here on Hawaii we have all our food imported, and it should be grown all here. We need to support our local farmers in growing healthy fresh food. Our soil is rich and our future farmers such as Mao organic farm is pioneering towards training young leaders, and future farmers. I too am a socially disadvantaged farmer, and need your support.

COMMENT OF HEATHER SIMPSON

Date Submitted: Saturday, May 19, 2012, 11:18 a.m.

City, State: Belen, NM

Occupation: Teacher

Comment: As a teacher, one of my objectives is to encourage my students to be responsible citizens. I believe our government should lead the way on supporting a farm bill that encourages and demonstrates what responsibility looks like in agriculture.

Please fully fund conservation programs and make sure subsidies are tied directly to compliance with the conservation programs.

Please maintain the EQIP Organic Initiative.

Please fully endorse all of the provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

Thank you for your hard work and considering making the right example for our children.

Sincerely,

HEATHER SIMPSON.

COMMENT OF MEAGHAN SIMPSON

Date Submitted: Friday, May 18, 2012, 11:57 p.m.

City, State: Fortuna, CA

Producer/Non-producer: Producer

Type: Greenhouse/nursery, Vegetables

Size: Less than 50 acres

Comment: We want USA farm policies to rise up to the best in the world. The best is very safe and healthy and rooted in our strict certified organic farms standards such as California Certified Organic and Oregon Good Tilth certified organic farm standards. These standards include everything from the organic heirloom natural fertile seeds, the certified organic fertilizers, herbicides, pesticides, insecticides. USDA organic standards are phony as USDA has been cheating and perverting real certified organic standards ever since mid 1990s when millions of USA citizens told USDA we want certified organic foods in our super markets everywhere . . . And we must revoke USDA's right to even use "organic" on labels until they conform to

C.C.O.F. standards. USDA must be mandated to tell the truth and give full disclosures of the commercial poison chemical products and genetically modified plant strains now! We need the very best quality regulations for inspections provided by fully reformed and trained gov agencies . . . do not put our safety and health inspections in the hands of private big ag-biz business! This has proven to be an awful bad grim policy as USDA foods are banned in other countries due to the ag poisons, the antibiotics and hormones, the very sick mad-cow-diseases and way over the top bacteria! USDA standards have been getting worse and worse and worse ever since Ronald Reagan imprudently approved private industry over=sight inspections over gov USDA. USDA has been negligent and lives are on the line. Technology is available for great testing and must be used. Like in the Gulf of Mexico which is very much still very polluted. The sea foods industry in gulf is using inspections where they smell the sea food sniff test for any smell of petroleum!?

This is bad awful stupid because the poisons that are the most killer do not have smell or visibility.

The green wave in USA consumers has been stating for decades that we want the world's best standards. We want these standards for our foods, and for the bees must recover from pesticides and herbicides and GMOs. Also ag farmers and laborers are at great risks and harms working in chemically polluted farms and this is why soo many people do not want to work in chem farms!

COMMENTS OF GINA SIMS

Date Submitted: Wednesday, May 16, 2012, 12:57 a.m.

City, State: Chico, CA

Occupation: Educator

Comment: Please include these priorities:

- support local, sustainable food producers
- continue to fund farmers' market, farm to school, and beginning farmer rancher programs
- stand up to big businesses and **Stop** allowing high sugar, high salt, highly processed foods to our children via school meals!
- support school gardens
- Fund organic agriculture and research

Date Submitted: Saturday, May 19, 2012 2:06 a.m.

Comment: Please:

- do **Not** cut SNAP funds! Do not take food from hungry American families.
- fund more fresh, local, seasonal, organic foods in schools! Many children eat 3 meals a day at school now, and family farmers are struggling. Help create sustainable food systems so communities can feed themselves.
- fund farmers' markets, organic research, and beginning farmer rancher programs.

COMMENT OF SANDRA SIMS

Date Submitted: Wednesday, May 09, 2012, 9:31 p.m.

City, State: Brentwood, MD

Occupation: Nonprofit

Comment: I urge you not to cut funding for SNAP, WIC and other vital programs that ensure the health of our citizens.

Do not balance the budget on the backs of working people and our country's most vulnerable citizens—children and the elderly.

By repealing the Social Services Block Grant, it would be cutting home care and meals programs in many states and ending the only consistent source of state funding to help victims of elder abuse or neglect.

Repealing the Prevention and Public Health Fund, means eliminating funding for evidence-based health promotion and disease prevention programs.

Vote **No** on the current House budget package.

COMMENT OF SASCHA SIMS

Date Submitted: Friday, May 18, 2012, 11:32 p.m.

City, State: Atlanta, GA

Occupation: Fitness Instruction

Comment: It would be possible to produce food sustainably if more people financially supported the cause, the same way we spend so much money on convenience

food and fast food. Urge people to vote with their dollar, and support local and sustainable farming . . . and give farmers the support they need to do so.

COMMENT OF ANDREW SINGER

Date Submitted: Saturday, May 19, 2012, 3:18 a.m.

City, State: Saint Paul, MN

Occupation: Illustrator

Comment: The farm bill needs to reward better land conservation and stewardship and those who produce food organically and/or with fewer pesticides, herbicides, chemical fertilizers and GMOs. The pesticides, herbicides and fertilizers are ending up in our drinking water (both wells and town systems) or in the Mississippi River and Gulf of Mexico, where they're contributing to algae blooms and marine "dead zones" where no sea life can survive. GMOs are proving to be toxic to beneficial insects (like butterflies and bees) and little research has been done to look at long term toxicity to humans (of things like corn that creates its own BT, a neurotoxin). Also, organic producers are experiencing "genetic drift" where pollen from GM corn is contaminating organic corn (or other crops) and preventing it from getting organic certification, particularly when it comes to exports. These chemical/GMO intensive agribusiness forms of agriculture are also much more energy/petroleum intensive.

It's time that congress looked at more sustainable forms of farming. They should:

1. Fully endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
2. Fully fund conservation programs, such as the Conservation Stewardship Program, and make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
3. They should implement all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
4. And they should Maintain the EQIP Organic Initiative.

COMMENT OF KRISTY SINGLESTAD

Date Submitted: Thursday, March 22, 2012, 10:37 a.m.

City, State: Waseca, MN

Occupation: Food and Nutrition Student

Comment: As future Registered Dietitian, I understand the importance of improving the diet of American's through increased consumption of healthy foods such as fruits and vegetables. And, as an individual who grew up on a family-owned farm, I understand the challenges farmers face and hard labor that goes into crop production. That is why I strongly support programs that bringing together these two shared interests. As the details of the 2012 Farm Bill are discussed, I hope you, too, support the assistance of programs that expand and promote farmers markets and the purchasing of fresh fruits and vegetables in schools. These programs will ultimately benefit both the farmer and improve the health of the nation.

COMMENT OF JOY SIPE

Date Submitted: Tuesday, April 24, 2012, 12:26 p.m.

City, State: Bethel Park, PA

Occupation: Software Engineer

Comment: I would like to see Congress implement the proposals made by the National Sustainable Agriculture Coalition in their publication *Farming for the Future: A Sustainable Agriculture Agenda for the 2012 Farm Bill*,* a copy of which can be found at the following website: <http://sustainableagriculture.net/publications/>. Thank you.

COMMENT OF CHERYL SITTLE

Date Submitted: Friday, May 18, 2012, 9:56 a.m.

City, State: White River Junction, VT

Occupation: Senior Citizen

Comment: Food quality and the freedom to have access to it is of utmost importance for quality of life and economic reasons. Bad health is much more expensive

*The information referred to is retained in Committee file.

then high quality foods. Citizens are happier and more productive when they have their health and vitality.

COMMENT OF SUSAN SIVELY

Date Submitted: Friday, May 18, 2012, 12:25 p.m.

City, State: Brooklyn, NY

Occupation: Attorney

Comment: Organic family farms are the future I want to see in this country, not the inhumane, environment-hostile, public health-threatening agribusiness I don't want to buy from.

COMMENT OF NELS SIVERSON

Date Submitted: Saturday, May 19, 2012, 3:34 p.m.

City, State: Summerfield, FL

Producer/Non-producer: Producer

Type: Poultry/poultry products

Size: 301-500 acres

Comment: The food industry is holding the American public hostage, selling us least cost products with least nutritional value at the cost of the environment and our national health. High fructose corn syrup, trans-fats, highly processed foods resulting in a population that finds itself on the brink of diabetes, obesity, & heart disease. How about subsidizing fruits, vegetables, rather than corn, soy and wheat?

COMMENT OF MARY SKETCH

Date Submitted: Wednesday, May 02, 2012, 2:46 p.m.

City, State: Durham, NC

Occupation: Student

Comment: It seems to me that to use a singular farm bill as a means to legislate all aspects of agriculture in the United States. After taking a course this year at Brown University on Sustenance and Sustainability, I have learned that the entire realm of agriculture and production cannot be encased in one definition and set of guidelines. Environmentally, conditions vary from region to region along with cultural and economic factors. This is where the issue of generalization across the board in the form of the farm bill comes in. On a more specific note, I feel that several sources of funding that are outlined in the farm bill do not necessarily reflect its ideologies and goals. For instance, it is important throughout the country to reinvigorate farming. Most farmers are above the age of 65 and we need to encourage and support the entrance of young farmers into the field. There is not adequate funding to support this goal and I propose that funding is increased for the 2012 Farm Bill.

COMMENT OF JENNIFER SKINNER

Date Submitted: Saturday, May 19, 2012, 5:18 p.m.

City, State: Fairfield, ID

Occupation: Caregiver, Holistic Therapist

Comment: We live in time where the protection of the knowledge of how to produce healthy food and live in respect with the land is absolutely critical. Our modern farming methods may have produced food faster than ever before but at a huge cost to the quality of life and our environment. Cutting funding to such important programs as organic food research, food stamp availability, *etc.* only puts a nail in the coffin labeled "concern for the American people", with the nails driven in by corporate interests controlling our house and senate and the coffin being carried out for viewing by the representatives and senators themselves. I urge you, Mike Simpson, coming from a state that prides its agricultural products and family built ranches, to do everything to protect organic, small producers, and the choice of the American people to eat healthy.

COMMENT OF SU SKJERSAA

Date Submitted: Friday, May 18, 2012, 7:24 p.m.

City, State: Bend, OR

Occupation: Registered Nurse, Retired, Artist, Doc. Ministry

Comment: Please support sustainable farming and also the small independent farmers.

The overtake of Monsanto and other seed and chemical companies are poisoning our food, waters, air and land with polluting chemicals that will take centuries to correct. Let's start now, save our children, wild life and everything that grows on the land and sea. Farm with good health in mind.

COMMENT OF DAVID SKLAR

Date Submitted: Monday, May 14, 2012, 3:27 p.m.

City, State: Greenwood, IN

Occupation: Nonprofit

Comment: Many people in this country are struggling to make ends meet at no fault of their own. Now is not the time to cut back the SNAP program that is keeping millions of Americans, especially children, from going hungry every day. Do not cut the SNAP program.

COMMENT OF JUDY SKOG

Date Submitted: Friday, May 11, 2012, 11:35 a.m.

City, State: Madison, WI

Occupation: Retired Physical Therapist

Comment: I want to eat fresh organic vegetables, fruit and cheese, and to eat meat and eggs from animals raised organically, with access to pasture every day. I want dairy products from organically produced milk.

I support SARE and ATTRA and the Beginning Farmers and Ranchers programs. I support all the programs that support sustainable agriculture.

I **Do Not** support subsidies for corn and cotton and wool (whatever the 5 were from WWII). Nor do I support subsidies for oil or fracking, if that plays a part in this bill.

I strongly believe in capping the farm payments at income levels of \$250,000. That money should go to small farmers, **Not** to agribusiness. Close those loopholes now, please. No one should get rich from farming, but everyone should be able to make a living at it.

Thank you for listening. I hope you take action on the comments, also.

COMMENT OF LINDSEY SKRDLANT

Date Submitted: Friday, May 18, 2012, 3:09 p.m.

City, State: Monrovia, CA

Occupation: Graduate Student in Biomedical Sciences

Comment: As a child of a NE 3rd District family farmer, I stay up to date on the latest Farm Regulations. I am troubled by many of the attempts to damage family farms and our arable land to cater to industrial agribusiness. I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286); the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236); and the full funding of conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

COMMENT OF COURTNEY SKYBAK

Date Submitted: Saturday, May 19, 2012, 1:53 a.m.

City, State: Portland, OR

Occupation: Landscape Designer

Comment: It is imperative that our new farm bill support small-scale farms, and those using organic and sustainable methods. The bill should absolutely not support the production of GMO crops.

COMMENT OF RUTH SLABACH

Date Submitted: Saturday, May 19, 2012, 7:29 a.m.

City, State: Brownsburg, IN

Occupation: Registered Nurse

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Please do not allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk. It's time for real reform and a healthy organic future! Please pass a **Healthy** farm bill and support our local organic farmers!

Sincerely,

RUTH SLABACH.

COMMENT OF MARIANNE SLADEK

Date Submitted: Sunday, May 20, 2012, 11:03 a.m.

City, State: Denver, CO

Occupation: Logistics

Comment: I presume you are referring to a non-producer of ag products. I do work, and travel for a living and view ag all the time!

Please tie soil erosion and wetland conservation to insurance subsidies.

Also please continue to help farmers who are just starting out and small farmers.

Please do not allow large company lobbyists to corrupt our food supply with greed before care. The policy of supporting greed is destroying our country.

COMMENT OF DEBORAH SLAYTON

Date Submitted: Friday, May 18, 2012, 5:06 p.m.

City, State: Kingsland, AR

Occupation: Small Business Development

Comment: The Delta is continuing to lose population. In 12 Arkansas counties the population declined by more than 25,000. These rural communities cannot attract businesses. They have to have the resources to build new businesses, grow existing businesses and train entrepreneurs and employees.

Rural development is critical. I ask that you please consider this as you consider the farm bill. Please continue to support the development and growth of small rural businesses. Give them the tools and resources they need to grow profitably and successfully. Thank you.

COMMENT OF PAM SLOANE

Date Submitted: Friday, May 18, 2012, 5:23 p.m.

City, State: Old Greenwich, CT

Occupation: Retired Teacher, Gardening Activist

Comment: Who benefits from current practices? Change is needed to insure the safety and health of our soil, of the produce that comes from that soil to our home tables and ultimately into our bodies. We may need to take a step backwards to a simpler time when smaller farms produced more nutritious food with no pesticides or herbicides or GMOs. We need to consider the exploding health costs created by our poor farm practices. Best practices in other countries like France and Italy need to be studied. We can do it. We can restore health to our food production if we get our priorities in order. People first, profits will follow.

COMMENT OF ANN SLOBOD

Date Submitted: Friday, May 18, 2012, 1:14 p.m.

City, State: Berkeley, CA

Occupation: Business Manager (Architecture)

Comment: In the next farm bill, please think about long-range future of our country. We need clean, healthy food & agricultural practices to ensure our physical and economic health. The health consequences of standard/chemical-based and subsidy-based farming are detrimental to the health of all U.S. citizens.

COMMENT OF CECILEY SLOCUM

Date Submitted: Friday, May 18, 2012, 12:29 p.m.

City, State: Providence, RI

Occupation: Medical Field

Comment: This is such important legislature for the health of our country, our land, and our children's future. Nutrition, & what we put in our bodies & soil, is

the basis for our wellbeing or our illness as a society. Please understand that everyone suffers if we do not promote healthy living.

COMMENT OF HELEN SLOMOVITS

Date Submitted: Friday, May 18, 2012, 12:13 p.m.

City, State: Ann Arbor, MI

Occupation: Musician

Comment: Organic and smaller farms need full support rather than all the money going to industrial farming. Regulations should take into account size—*e.g.*, the same safety regulations for factory farms should not apply to small farms. If requirements and regulations will put small farms out of business—there's something that is wrong and needs to change!

COMMENT OF QUINN SLOTNICK

Date Submitted: Wednesday, May 02, 2012, 4:56 p.m.

City, State: Missoula, MT

Producer/Non-producer: Producer

Type: Field Crops

Size: Less than 50 acres

Comment: The current structure of commodity payments has caused overproduction, and helped large farmers put their neighbors out of business while costing taxpayers billions of dollars in emergency assistance. The newest farm bill ignores these issues. The current assistance of commodity farming is causing difficulties. Supporting diversification is important. Additionally wetland protection is being removed. It is essential to preserve these areas for their beauty and ability to provide habitat to so many species. There also needs to be a revamped school lunch program that includes more fresh vegetables. Keep up the good work.

COMMENT OF WILLIAM SLOUTHWORTH

Date Submitted: Friday, May 18, 2012, 1:54 p.m.

City, State: Cortez, CO

Producer/Non-producer: Producer

Type: Field Crops, Fruits, Poultry/poultry products

Size: Less than 50 acres

Comment: I've been an organic gardening and farmer since 1951 and recognize the clear benefits to the health of my family, our customers, our livestock, our soil and our water. Protect our rights as small, organic farmers in the face of big agricultural interests that continue to buy opposition in Congress to our rights.

COMMENT OF ROGER SLUGG

Date Submitted: Wednesday, May 09, 2012, 7:46 p.m.

City, State: Sparks, NV

Occupation: Retired Pharmacist

Comment: I would hope that congress would at least continue food aid in its current form during this time of economic distress. The last thing we need to do right now is try to balance the budget on the backs of needy senior citizens and children who are nutritionally challenged. There is time to balance the budget later when the economy has recovered.

COMMENT OF SALLY SMALL

Date Submitted: Friday, May 18, 2012, 12:19 p.m.

City, State: Delaware, OH

Occupation: Library Circulation Associate

Comment: We really need a farm bill that puts the long-term health and wellbeing of All American consumer first. We must stop subsidizing junky stuff like high fructose corn syrup and other over-processed corn-based ingredients. We also need to move away from chemical-based agriculture to a more natural and balanced approach, that works with nature rather than against it. Over-dependence on pesticides is killing off honey bees (which are needed for proper pollination of many food crops), and is causing the development of chemical-resistant "super weeds" as well as dangerous soil pathogens and spontaneous abortions in livestock. The long-term effects of GMO products have not been adequately studied for safety.

Instead the farm bill should be more supportive of small, family farms and organic agriculture. Policies should help increase the production (and variety) of fruits

and vegetables, and to make these more affordable. Healthy food should be more affordable than the unhealthy often sugary, over-processed corn and soy-laced products that are contributing to American obesity and other costly health issues.

COMMENT OF MARYA SMALL, R.N.

Date Submitted: Friday, May 18, 2012, 12:10 p.m.

City, State: Tuckahoe, NJ

Producer/Non-producer: Producer

Type: Fruits, Greenhouse/nursery, Vegetables, Other

Size: Less than 50 acres

Comment: As an RN and cofounder of a local organic farm called It's About Community, I am outraged by our government's ongoing subsidizing of giant agricultural corporations which are ravaging the planet as well as the health of our citizens. We have a major obesity problem in our country, yet we subsidize the very food items which are contributing to that problem. We are threatened by the devastating effects of global warming, yet our food system is set up to release even more greenhouse gases into the air. We need a farm bill which works for people rather than the profits of the corporate elite.

COMMENT OF AL SMITH

Date Submitted: Monday, April 16, 2012, 6:41 p.m.

City, State: Galesburg, IL

Comment: These comments were hand delivered to a representative at the hearing. I wish to be assured that this issue is discussed and that I am made aware of the committee's decision.

Hon. FRANK D. LUCAS,

Sir

I understand that you will be conducting a fact-finding session in Galesburg Illinois, one of Ronald Regan's boyhood homes, on March 23, 2012.

First, Welcome!

Second, in the words of our beloved Carl Sandburg;

"I see America, not in the setting sun of a black night of despair ahead of us, I see America in the crimson light of a rising sun fresh from the burning, creative hand of God. I see great days ahead, great days possible to men and women of will and vision."

Third, I also see great days ahead. Fourth, would you please address the following facts with your committee and/or congress as a whole and what your committee's recommendations are going to be to correct them?

High sugar prices harm manufacturers of candies, chocolates, and breakfast cereal.

A 2006 study by the Commerce Department found that for each sugar industry job saved by the sugar program; nearly three food-manufacturing jobs are lost.

The study found that:

- Employment in food companies that use substantial amounts of sugar is declining.
- Imports of food products that contain sugar are growing because it is not competitive to make those products in the U.S.
- Numerous companies have relocated to Canada and Mexico, where sugar prices are much lower.
- Chicago, once the nation's candy manufacturing capital, has lost thousands of jobs.
- In 2004, candy maker Fannie May closed its Chicago factory and Brach has moved its Chicago candy production to Mexico.
- Michigan took a hit in 2002, when Kraft moved its 600-worker LifeSavers factory to Canada in search of low-cost sugar.
- Hershey Foods closed plants in Pennsylvania, Colorado, and California and relocated them to Canada as well.

In my opinion, the entire program should be dismantled over time. I think 10 years would give those affected enough time to adjust to the new-old idea of a free market.

Thank you,

Al Smith, C.M.S.,
[Redacted],

Galesburg, Illinois,
[Redacted].

COMMENT OF BARTON SMITH

Date Submitted: Friday, May 18, 2012, 4:14 p.m.

City, State: Boulder CO

Occupation: Health Professional

Comment: The health and wealth of our American economy is **Directly Connected** to the health of our agriculture, soil, and the quality of our food. Imagine Americans robust and healthy, able to work long hours. Contrast that to American workers with depleted soil, pesticide-sprayed produce, calling in sick to work, and ultimately a dwindling economy.

Please consider the direct, positive economic impact of supporting organic and local agriculture. If our workers become healthier and more intelligent, we ALL make money.

Please **Support** the following initiatives, which directly effects our bottom line in terms of the energy and resourcefulness of our workers:

- The **Full** endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Throwing your **Full** support into these initiatives are creating momentum which will see a very economically rich America by working on the most basic level, the farms and the plates of Americans. Organic food takes a distracted worker doing the bare minimum for 4-6 hours, to a **Fully** competent, inspired person who is willing to work **Very** hard (even for less money) because when workers **Feel** good, they are much more likely to work harder and for longer hours and produce quality products and contribute to a rich economy.

Studies have also shown that the better we **Feel**, the more likely we are to **Spend** and participate in a flowing economy.

This all comes down to the quality of our food. At the farm level, at the kitchen table level, the higher the **Quality** of our food, the higher **Quality** of the work and the workplace. Please support local farms and organic food initiatives! We will see results 100-Fold what we are experiencing right now. Thank you for your support.

COMMENT OF BRUCE SMITH

Date Submitted: Friday, May 18, 2012, 2:32 p.m.

City, State: Detroit, MI

Occupation: Hospitality

Comment: I am deeply concerned about the damage caused by the use of Round-Up both on the environment and health of humans exposed to it extremely toxic side effects.

I also strongly believe we have a right to know if the products we are buying are derived from genetically engineered and genetically modified organisms.

Stop supporting corporate farming over family farms.

COMMENT OF CAROLYN SMITH

Date Submitted: Wednesday, April 11, 2012, 6:06 p.m.

City, State: Silver City, NM

Occupation: Co-op Outreach Coordinator and Food Pantry Manager

Comment: I urge you to increase the funding for the Federal nutrition programs: TEFAP, SNAP, WIC, CSFP and others in this year's farm bill. As manager of the Grant County Community Food Pantry, I have witnessed simultaneously an increase in the numbers of residents in need of food, most of them seniors and a decrease in the amount of TEFAP food available for those who qualify. No one should go hungry in the United States. Thank you!

COMMENT OF CECILY SMITH

Date Submitted: Sunday, May 20, 2012, 12:31 p.m.

City, State: Champaign, IL

Occupation: Water Resources Specialist, Prairie Rivers Network

Comment: To the House Committee on Agriculture:

Thank you for your efforts on the farm bill reauthorization. It's well past the time for the farm bill to make sense for producers, taxpayers, and the environment.

I fully support the Senate's adoption of sodsaver provisions for grassland conversions in their farm bill, and urge the Committee to maintain this important soil protection measure in the House version. In addition I hope the House will choose to step up and include a couple of other measures the Senate failed to include in their version:

(1) Incorporate producer compliance with soil protection measures/other conservation program practices as a requirement for participation in the crop insurance program. It doesn't make sense for farmers to receive insurance payments for losses they could have prevented by acting as good stewards of their land and soil;

(2) I understand funding cuts are inevitable for farm bill programs. At the same time, the conservation programs the farm bill has funded have saved thousands of acres of productive soils and wetland and wildlife habitats that provide a number of benefits to producers and taxpayers. I would request that when considering where to cut funds in the farm bill, that cuts in conservation programs not be disproportionate to cuts in other farm bill programs.

Thank you for this opportunity to comment.

Sincerely,

CECILY SMITH.

COMMENT OF CHRISTINE SMITH

Date Submitted: Saturday, May 19, 2012, 3:58 p.m.

City, State: Bridgehampton, NY

Occupation: Artist, Landlord, Environmentalist

Comment: Our food is so essential to our and our regions and country's well being, for any politician to cave in to huge food money interests such as Monsanto and big CAFO's and vote against it will bring more bad health and even hormone etc disruption to everyone. We are a country founded on decency which means . . . listen to the good science of what is healthy and what we informed consumers want! That will be good for the country and all of you in Congress.

Thank you,

CC SMITH.

COMMENT OF HEATHER SMITH

Date Submitted: Saturday, May 19, 2012, 2:43 p.m.

City, State: Bridgewater, MA

Occupation: Homemaker

Comment: Please stop subsidizing foods like corn and soy. Those subsidies are making us the most unhealthy country in the world.

You say you want us to eat fruits and veggies. Put your money where your mouth is.

You say you want new farmers, support them.

You say you want people off food stamps, teach them to cook with basic healthy ingredients.

You say you want a thriving economy, stop feeding the huge corporations more money to make us more unhealthy.

You say you want clean food, stop attacking small farmers who are doing it right and start going after the big corporations who are causing outbreaks of deadly diseases.

Stop bowing down to Monsanto, ADM, Tyson and all the rest. Let us buy what we want from whomever we want. Food freedom is a basic human right, not something to be governed.

COMMENT OF JAN SMITH

Date Submitted: Friday, May 18, 2012, 2:21 p.m.

Comment: The lame fencing after storm funding was useless! Why not fund small farms, milk and cheesehouses, free loans with no interest and other problems

farmers are facing, like lack of workers or being able to pay workers. Rebuild barns that were destroyed in the storm.

COMMENT OF JEREMY SMITH

Date Submitted: Sunday, May 20, 2012, 10:09 p.m.

City, State: Spearfish, SD

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. My partner and I are first year farmers in western SD. We are growing mixed vegetables for our community and trying to help develop a healthy and resilient food system. Neither of us grew up involved in agriculture so we are getting first hand experience with how difficult it is to start up a farm. As a young farmer and I'd like to share my support for programs that help the next generation of growers build strong farm businesses. As it's estimated that 125,000 farmers will retire in the next 5 years, it's absolutely critical that farm bill programs help citizens get started in this challenging field. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

JEREMY SMITH.

COMMENT OF JULIANNE SMITH

Date Submitted: Friday, May 18, 2012, 3:20 p.m.

City, State: Bountiful, UT

Occupation: Arts Marketing

Comment: As a mom, political science scholar, and environmentally concerned citizen, I know that the farm bill is one of the largest and probably one of THE most impactful pieces of legislation. Its effects have long reach in to many of our economies participating entities.

I write today about mainly two concerns: that this bill be reviewed carefully and amended appropriately to eliminate special subsidies for agricultural entities whose processes contribute to the growing emissions of harmful chemicals in their production methods into the environment and into the food we consume itself.

I am aware and concerned also about companies like Monsanto, who receives subsidies, whose practices stifle natural organic farming and small farmers from competing fairly in the marketplace.

I ask you to **Carefully** consider the over and far-reaching impacts of your decision in this bill, for our Earth and our future generations.

Thank you,

JULIANNE SMITH.

COMMENT OF JULIE SMITH

Date Submitted: Friday, May 18, 2012, 12:00 p.m.

City, State: Alderson, WV

Producer/Non-producer: Producer

Type: Livestock

Size: Less than 50 acres

Comment: As a resident of WV and beginning farmer, I think we need to stop subsidizing huge industrial agribusiness and start supporting smaller farms, especially in our state. WV's economy could be vastly improved if the smaller producers were given a fair shot. Let's revitalize our local state economies and keep the money inside WV! Stop bowing to the powers of the big corps! They are not the one's who elected you, we are, and you are supposed to represent our interests, not theirs!

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Give our beautiful state a chance to shine and thrive. There are so many people here who are willing to do this if you just help to remove the barriers, or at the very least, don't set up new barriers.

Quality local food can help West Virginia! Our economy, our health and our communities!

COMMENT OF JULIE SMITH

Date Submitted: Friday, May 18, 2012, 2:10 p.m.

City, State: Lehi, UT

Occupation: Homemaker

Comment: I am a former college student, I supported my husband through dental school and now I am a stay-at-home mother raising our family! I feel very strongly about the food bill! I am a supporter of smaller farms, which are run humanely, especially in sanitary conditions! I want to do all I can to help us have better quality, and cleaner food and conditions in our country for us and our future children!

Sincerely,

JULIE SMITH.

COMMENT OF KATHY SMITH

Date Submitted: Friday, May 18, 2012, 12:04 p.m.

City, State: Cleveland, OH

Occupation: Web Designer and Gardener

Comment: It is good to subsidize more fruits and vegetables, and less meat, soy and corn. It is good also to work on reducing monoculture crop farming and move towards farms with a variety of foods. Also, supporting local beekeepers is good so that bees do not have to be trucked across the country. Thank you!

COMMENT OF KRISTINE SMITH

Date Submitted: Sunday, May 20, 2012, 1:34 p.m.

City, State: Conneautville, PA

Occupation: Homemaker

Comment: Please remember the consumers and small farmers who hold not only a proud history in this state but are a vital part of its future. Please protect our

ability to choose for ourselves the foods and products grown locally, healthfully, and sustainably.

COMMENT OF LAURA SMITH

Date Submitted: Saturday, May 19, 2012, 9:31 a.m.

City, State: Willsboro, NY

Occupation: Home Grower

Comment: My vision for the future of farming in our country is one that grows closer to sustainable permaculture & away from damaging monoculture corporate factory farms that exploit the land & create desertification. It includes farms that do not rob the soil of its nutrients & replace them w/toxic chemical fertilizers, pesticides & herbicides. I want to be able to grow food for my family w/o fear that my land is being poisoned by nearby farms that sow GMO herbicide resistant crops. There are new studies coming out daily on the damage done by using the above substances. If we continue on the path of status quo, our land will not be able to sustain us much longer. Every effort should be made to promote local, sustainable farming & subsidies should be diverted from factory farms to the small sustainable farm. Studies have further shown that we can feed our nation on sustainable farms. Monoculture factory farming is yesterday's technology & not sustainable. It is deeply concerning that the corporate factory farms have obtained a stranglehold on Congress causing actions that have been damaging to the small farms. Case in point, is the plight of small family hog farmers in Michigan who have been having their pigs destroyed for fear they could escape & become feral hogs. Any breed of pig could escape & become a feral hog. This is a push by corporate factory farms to eliminate the small pig farmer. These pigs posed no more threat to the environment than a factory farm pig. It is imperative to write strong protections into any proposed legislation for the small family sustainable farm to be able to survive & compete with the corporate factory farms. The knowledge is there to create a sustainable future for the U.S. farm. Thank you for allowing us to voice our concerns!

COMMENT OF LEE SMITH

City, State: Hot Springs, CA

Occupation: Unemployed

Comment: For far too long you have supported five ag producers and now our food supply is limited. I want to see more small farms, more organic farms, more farmers' markets. You have given the biggest food suppliers the right to patent food, it is a slippery slope to ownership of our food supply. There needs to be more diversity in our farm bill.

COMMENT OF LEILANI SMITH

Date Submitted: Friday, May 18, 2012, 9:26 a.m.

City, State: Davenport, IA

Occupation: Registered Nurse

Comment: We live in this great, food producing state. Please help the small, local farmers be productive in so many ways to contribute economically to our great nation and more importantly our local economy! In our school we have started a Farm to School program to help teach kids the importance of where their food comes from. We are very proud and students have written letters to Michelle Obama in hopes she will come during campaign time so that she may speak on our behalf of this great program . . . start small!

COMMENT OF LEVAR SMITH

Date Submitted: Friday, May 18, 2012, 11:54 a.m.

City, State: Forestville, MD

Occupation: Mover/Driver

Comment: Our government has continuously shown us that they have no desire to keep our best interest at heart. They have not fulfilled their duties to the people to give them life liberty and the pursuit of happiness but instead given us death, disease, war, and depression. If we are to become a stronger nation we must first be willing to deliver the basics. Healthy food and water to build healthy minds, body, and spirits.

COMMENT OF LORI SMITH

Date Submitted: Friday, May 18, 2012, 12:06 p.m.
City, State: Blue Springs, MO
Occupation: Transition Specialist in Special Education
Comment: Local organic farmers are more deserving of any subsidies than large farming operations that are abusing animals and poisoning our water supply with their waste and pesticide runoff. **Please** revise the farm bill to reflect and support a healthier America.

COMMENT OF LUCY SMITH

Date Submitted: Friday, May 18, 2012, 3:37 p.m.
City, State: Tulsa, OK
Occupation: Shelver—Artist—Waitress
Comment: It is my belief that bad food and bad food practice are ruining our country. Please vote to support local foods and organic foods that can help our country get healthy and independent. Less dependence on foreign foods and less costs, both fiscal and environmental, on the transport.

COMMENT OF MADLEINE SMITH

Date Submitted: Friday, May 18, 2012, 4:41 p.m.
City, State: Crestview, FL
Occupation: Student/Mother/Wife
Comment: Dear Sir or Madam,
 I have been informed that you are considering slashing enormous amounts of money towards programs that should stay intact. I understand the government is in a very tight spot right now, but you cannot make the American people vulnerable to more hardships. The slashing of funds from nutrition programs is mind boggling. Most families cannot provide for their children and rely heavily on those programs. Also, if you even care about this nation or your children, you should not get rid of direct payments to commodity farmers. Big agricultural farms are just no good. There are many reasons why and since you are part of the Agricultural Committee, I will half assume that you know the risks.
 I fully support and endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). I also support fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
 The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
 Maintaining the EQIP Organic Initiative.

Comment: I am **Against** any cuts to organic farming, organic farming research, and cuts to beginning farmers. Make the cuts in the segments that Monsanto and other companies like them that support poisoning our food stuffs.

COMMENT OF POLLY SMITH

Date Submitted: Wednesday, May 16, 2012, 10:11 p.m.
City, State: Novato, CA
Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I ask that the Committee follow their consciences, not the 'dollar'. Our system is corrupt, and we see the discrepancies. As our representatives, it is your responsibility to change this.

Sincerely,

POLLY SMITH.

SUBMITTED STATEMENT BY ROBERT A. SMITH, SENIOR VICE PRESIDENT, FARM CREDIT EAST

Farm Credit East is pleased to submit testimony to the House Committee on Agriculture in regard to the 2012 Farm Bill.

Farm Credit East serves approximately 12,500 customers in the six state region including New York, New Jersey, Massachusetts, Connecticut, New Hampshire and Rhode Island. In total we extend \$4.4 billion in credit and provide a number of financial services to help farm businesses be successful including consulting, payroll and accounting assistance, tax preparation and crop insurance. We are the largest lender to agriculture in the Northeast with a market share of farm debt in excess of 60% in the states that we serve. As a farmer-owned cooperative and part of the national Farm Credit System, we serve all types and sizes of farms in our service area. The largest sector of our portfolio is dairy at about 25%, but we also have extensive lending to forest products businesses, greenhouse, nursery, fruit, vegetable, livestock, aquatic (commercial fishing) and farm service businesses.

Farm Credit East has made a strong commitment to supporting young, beginning and small farms with special program incentives to assist these customers. Our Generation NeXt program is working with young women and men on the issues and challenges involved in transferring the farm from one generation to the next.

Farm Credit East finances many operations that are involved in "local foods" through direct marketing channels including community support agriculture (CSA), green markets and at direct farmer markets. We have also financed a number of renewable energy projects and work closely with farm businesses on value-added and renewable energy grants.

Farm Credit Lending in Good and Bad Times

Farm Credit East and the Farm Credit System continued lending throughout the financial turmoil of 2007–2010. We did not change our underwriting standards and when producers faced difficult times in 2008 and 2009 and we stayed with them as they worked their way through the down-cycle.

With this hearing in the Northeast, it is important to recognize that while national net farm income reached record levels in 2011, there are many businesses in the nursery, sod and timber industries which continue to be hurt as a result of the sluggish national economy and the problems in the housing sector, especially low levels of new housing construction.

As the Agriculture Committee considers the credit title, we urge that no new additional regulatory requirements be placed on the Farm Credit System. The reality is that our lending practices are sound and our industry expertise, cooperative structure and strong capital levels (in excess of 16% risk funds) ensure that we are serving our customers in an effective manner focused on their long-term success and meeting our mission as provided in the Farm Credit Act.

While the Farm Credit System is not seeking expanded authorities in 2012 Farm Bill, it is important to understand that there are situations in which food marketing and processing businesses including some involved in "local foods" are not eligible for Farm Credit financing. There are also commercial fishing infrastructure businesses such as docking and ice providers that are essential to commercial fishing, but are not eligible for Farm Credit financing in the same manner that businesses that serve farms are eligible.

Farm Service Agency—Loan Guarantees

Farm Credit East and other commercial lenders work with farmers to use Farm Service Agency (FSA) loan guarantees in situations where the loan may have a weakness, but the long-term prospects for the business are good. With FSA loan guarantees, many farm families are able to obtain credit that might not otherwise be able to do so.

In using FSA loan guarantees, we have found that some farm business structures prevent the farm from obtaining FSA loan guarantee even though the farm involved is a family business. For example, some farms are organized with an operating LLC and an ownership LLC. In these cases, the ownership LLC is not eligible for a FSA guarantee. Ironically, one of the reasons for the operating LLC and ownership LLC

structure is to facilitate generational transfer. We also see a similar disqualification with farm businesses that are owned by a family trust. These FSA limitations are addressed in the Agricultural Credit Expansion Act of 2011 (H.R. 874 and S. 1592) and we encourage these provisions to be included in the 2012 Farm Bill.

Risk Management—Importance of Crop Insurance

The Farm Credit System supports a strong crop insurance program as an important part of the necessary risk management tools that today's farm businesses need. Farm Credit East in conjunction with four other Farm Credit institutions owns *Crop Growers LLP*, a crop insurance agency. We entered the crop insurance business to ensure that more growers throughout our region had access to crop insurance.

Although we have been able to increase crop insurance availability and usage, the reality is that the Northeast remains an under-served area for crop insurance. The diversity of crops grown in this area has meant that some producers do not have workable crop insurance products or in some cases funds have been inadequate for some pilot program efforts. RMA needs to aggressively work with the Northeast farm community and insurance companies on products that will work for a greater variety of Northeast farm products and farm businesses.

Over the past 18 months there has been considerable interest in the LGM-Dairy (Livestock Gross Margin crop insurance for dairy farmers). For some farmers this has been a good tool to manage price and input cost risk by locking in margins. Unfortunately many producers who tried to sign up for LGM-Dairy program were denied because funding levels were not available.

Crop insurance is important in the Northeast for many specialty crops including apples, grapes and vegetables as well as corn, corn silage, and soybeans. The recently agreed to Standard Reinsurance Agreement (SRA) developed by USDA included a provision that if unaddressed will have a very negative impact on crop insurance for specialty crops. For the first time, this SRA included a cap on commissions paid to agents. While we understand the intent, the application of this cap has had a disastrous impact on crop insurance agencies that serve specialty crops—following the establishment of the cap, the price of field crops increased dramatically while price of specialty crops remained level. The net effect of the commission cap with increasing row crop prices has been to shift agent commissions from those that serve specialty crops to those that serve row crops without regard for the effort made to serve producers. Congressional action in the farm bill to address this situation is necessary to ensure continuation of crop insurance for specialty crop growers.

Investments in Rural America and FarmStart

Under the Farm Credit Act of 1971, Farm Credit System institutions are authorized to make mission-related investments, subject to the approval of the Systems' regulator, the Farm Credit Administration (FCA). Farm Credit has been making mission-related investments since 1972 when FCA approved the System investing in farmers notes. Since then FCA has authorized mission related investments in USDA-guaranteed obligations and other rural investments approved on a case by case basis. As of March 2011, the Farm Credit System had approximately \$631 million in rural community investments.

As a result of the Investments in Rural America program, Farm Credit East in conjunction with CoBank established **FarmStart** in 2006. Yankee Farm Credit became part of this program in 2011. The **FarmStart** program allows for us to serve start-up farm businesses that would otherwise not be able to obtain commercial credit. Through **FarmStart** we make investments for working capital of up to \$50,000 in these businesses for a 5 year period. Our specially trained **FarmStart** Advisors work with each **FarmStart** customer on their financial planning to help these young farmers stay on track toward to achieve their business objectives and to establish a positive business and credit history. Since inception of this program in 2006, we have nearly 90 **FarmStart** farms.

Another rural investment made by Farm Credit East was for the establishment of the Genesee Valley Agri-Business Park in Batavia, New York—a shovel ready facility for agriculturally related businesses. The park recently attracted two new dairy processing (yogurt) businesses creating jobs and economic activity in western New York.

It is anticipated that FCA may take action this year on a 2008 proposed rule to provide specific criteria and portfolio limits for Farm Credit System "Investments in Rural America". We encourage the House Agriculture Committee to be supportive of the Investments in Rural America program and not do anything that would limit the Farm Credit System's efforts in this area.

Final Note

Northeast agriculture has both unique opportunities and challenges. We are seeing location of new milk processing facilities to meet consumer demands, good mar-

kets for fresh fruits and vegetables and a growing interest in buying and producing “local foods.” With strong earnings and capital, Farm Credit East is well positioned to serve Northeast agriculture as producers grow to serve customer needs.

It is important to note that Northeast agriculture is not without significant challenges including the negative impact to many industry sectors from the sluggish housing market and the lack of a workable agricultural guest worker program. Our country’s failure to establish an effective agricultural guest worker program threatens the future of labor intensive agriculture and tens of thousands of jobs for American citizens in the Northeast. If as a country we fail to find a workable solution to enable labor-intensive agriculture to maintain the necessary workforce, we will see another part of our economy (dairy, fruit, vegetable and other specialty crops) move offshore where barriers to entry for new agricultural enterprises are minimal.

Farm Credit East and other Farm Credit institution share a strong commitment to serving agriculture and in making the right decisions to serve our customer-members for generations to come. We thank the Agriculture Committee for the decision to hold a hearing in Northeast.

ROBERT A. SMITH,
Senior Vice President,
Farm Credit East,
Cobleskill, NY.

COMMENT OF SANDY SMITH

Date Submitted: Monday, May 14, 2012, 10:34 p.m.

City, State: Kannapolis, NC

Occupation: Housekeeper

Comment: We need to support our farmer s in growing healthy food that has not been genetic modified. This putting farmers out of business is crazy they have valuable knowledge that is important to our future. No company should own a patent on a seed. I feel I should have food that I feel was grown with no pesticides and animals that were raised eating what God created them to eat.

COMMENT OF SHEILA SMITH

Date Submitted: Friday, May 18, 2012, 3:21 p.m.

City, State: Salinas, CA

Occupation: Psychotherapist

Comment: We need agricultural policy that is good for the Earth and good for the majority of the people. This means supporting small and organic production of crops and food animals. We need to stop subsidizing corn and tobacco and mega-farms.

COMMENT OF SHELBY SMITH

Date Submitted: Friday, May 18, 2012, 9:42 a.m.

City, State: Decatur, GA

Occupation: Medical School Staff

Comment: I work in Atlanta, GA at Emory School of Medicine, which trains young doctors who will be the future caretakers of this nation. One of my big concerns is the amount of preventable diseases that today’s doctors are not able to treat due to a broken food system.

Author Chris Sayer says that our food system isn’t actually broken—it’s working as it has been designed. He writes:

“Our system of subsidies and incentives in food production evolved over decades, but it did so with a very clear primary goal: More calories, less cost. It is hard to find a better example of a system that has evolved so successfully to fulfill its original purpose. But like Mickey Mouse’s broomstick in *The Sorcerer’s Apprentice*, our food system seems to have taken on a life of its own. An interesting historical irony: One of the incentives for the cheap calories policy was the discovery at the dawn of World War Two that a large number of applicants for military service were underweight. Oh, how things have changed. One of the leading reasons for disqualification among modern recruits: obesity. The system has done all that we asked and more. Too much more.

Why has this system been so persistent? Often the blame is placed on large agribusiness. They play a role to be sure, but they are as much a byproduct as a cause. They didn’t create the system; the system created them. By rewarding high volume and low price, our current food system is built to favor economies of scale above all else. The more centralized and homogenized a producer be-

comes, the better they compete. They grow more successful, and in turn they encourage the system to cater to their strengths. And so the cycle continues.

But the resiliency of this system isn't derived from its multi-billion dollar benefactors. It is the simplicity of its mandate. More calories, less cost. Just try to find a more concise mission statement."

This system has spawned new health crises, and as the committee considers the 2012 Food and Farm Bill, I urge you to:

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;
- Provide an even "plowing" field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don't: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

COMMENT OF STACIE SMITH

Date Submitted: Saturday, May 19, 2012, 12:20 p.m.

City, State: Medford, OR

Occupation: Self-Employed Artist

Comment: My son operates a small organic farm in southern Oregon. This has opened my eyes to the importance of the House Agriculture Committee. I encourage the Committee members to be in alliance with small organic farming operations by supporting the full finding of conservation stewardship programs and by fully endorsing all provisions of HR 3286. I urge this Committee to **Stop** cutting funding for organic research. Small organic farms are our future.

COMMENT OF STEFANIE SMITH

Date Submitted: Saturday, May 19, 2012, 8:39 a.m.

City, State: Toms River, NJ

Producer/Non-producer: Producer

Type: Dairy

Size: Less than 50 acres

Comment: As a small producer of food products, I strongly urge you to consider that family farms are the backbone of the food supply. There are less cases of disease and if there is a problem it's much more easily traced to the source. We need to continue to fund beginning farmers and we need to fund organic research. Soil management and ecology are two things that will create sustainable agriculture.

I would also like to see you fully support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I would also like see place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs. Without this the program is just a giveaway to wealthy corporate farms that don't need more taxpayer money.

Thank you.

STEFANIE SMITH.

COMMENT OF TERRA SMITH

Date Submitted: Friday, May 18, 2012, 9:58 a.m.

City, State: Fort Collins, CO

Occupation: Student

Comment: The next farm bill should incorporate more benefits for small, local farms and also provide subsidies for farms that are transitioning to organic/bio-dynamic agricultural practices. Subsidies to huge farms using GMOs and environmentally degrading practices should no longer receive subsidies.

COMMENT OF THERESA SMITH

Date Submitted: Sunday, May 20, 2012, 12:39 a.m.

City, State: Aptos, CA

Occupation: Dietitian

Comment: I care about what I eat and the ones I love eat more than the bottom line of big agra corps. Please, if your going to subsidize anything let it be real foods—fruits, veggies non GMO grains *etc.* . . .

I will be watching the arguments and outcomes of this farm bill closely and vote accordingly. Food and health are my issues!

Thank you,

THERESA SMITH.

COMMENT OF TRACI SMITH

Date Submitted: Friday, May 18, 2012, 2:42 p.m.

City, State: Long Beach, CA

Comment: We cannot sustain ourselves on wheat, corn and soy alone. Please come up with programs that help non-corporate farmers grow diverse crops that would bring down the overall cost of the fruits and vegetables that our country so desperately needs.

Don't line your pockets with corporate Ag dollars. Please think about that this country really needs. Monsanto doesn't need more corporate tax breaks and incentives to produce more poisonous genetically modified corn and soy.

Thank you.

COMMENT OF TRACY SMITH

Date Submitted: Thursday, April 19, 2012, 7:24 p.m.

City, State: Chicago, IL

Occupation: Attorney

Comment: It is critical that we not cut nutrition funding. The entitlement aspect of SNAP has allowed the program to expand during this long and deep recession, lifting millions of people out of poverty. TEFAP funding should be tied to unemployment numbers as well as market prices so that it can provide emergency food assistance during times of economic downturn. Congress should clarify that the Secretary of Agriculture has the discretion to purchase bonus commodity product in order to respond to nutritional needs. Hunger is a problem that is not acceptable in our country. Private giving is inadequate to meet this pressing need.

COMMENT OF VICTOR SMITH

Date Submitted: Friday, April 27, 2012, 1:38 p.m.

City, State: Pleasant Hill, CA

Occupation: Disabled

Comment: The U.S. needs to move toward increasing support for organic farming. Pesticides are becoming increasingly ineffective, are killing bees, polluting streams, rivers, groundwater.

Support for GMO's should be eliminated. They are dangerous to humans and wildlife. They have produced no increase in crop production.

COMMENT OF PATRYCE A. SMITH, PH.D.

Date Submitted: Friday, May 18, 2012, 12:43 p.m.

City, State: Collinsville, OK

Occupation: Holistic Natural Health Consultant

Comment: Enough . . . really?

It is **Past** time to **Stop** assisting the over sized conglomerates that pretend to be **Farmers** . . .

Help the Organic farmers . . . those that are starving in this country of ours . . . due to the horrible chemicals that are allowed to be put on what "they" refer to as food! Really enough . . . What do you think you all are going to eat when there are no other choices for you & your families but the chemical filled soils you are allowing & assisting out there in farm lands?

Sad, sad, sad for sure. Shame on you . . .

COMMENT OF MOLLY SMOLLETT

Date Submitted: Saturday, May 19, 2012, 11:43 p.m.

City, State: Las Vegas, NV

Occupation: Indep. Filmmaker

Comment: We need a long awaited organic farm bill. Our country has a history of small farms. We must support the small family farmer. This is what made our country strong. To go against this tradition, will hurt us terribly.

COMMENT OF GREGORY SNADER

Date Submitted: Friday, May 18, 2012, 12:54 p.m.

City, State: Kalamazoo, MI

Occupation: Graphic Designer

Comment: I feel that the U.S. farm bill policy should focus on providing subsidies that encourage the production of healthy food that is easily accessible by people of all income levels and for diversity of crops. I feel that the support for small-scale, diverse agriculture is the most stable and sustainable course for American agriculture. Additionally I feel that the most prudent course of action would be to give additional support to farmers who farm diversely, particularly in the use of open-pollinated seed varieties as opposed to genetically modified varieties. I do not feel that genetically modified seed varieties offer any additional benefit in production of food and do more harm by limiting the supply of seeds to several large companies, thereby encouraging a lack of diversity which creates profit now in exchange for an untenable future.

COMMENT OF RUTH SNEDIC

Date Submitted: Saturday, May 19, 2012, 8:20 a.m.

City, State: West Allis, WI

Occupation: Retired

Comment: I want to see small farmers and organic farmers receive the help they need to give us good food. Take the subsidies away from the large corporate farms and use those monies for the small farms.

COMMENT OF WILLIAM SNIDER

Date Submitted: Friday, May 18, 2012, 7:51 p.m.

City, State: San Diego, CA

Occupation: Retired

Comment: The highest quality, most nutritious food available in San Diego comes from local small farms. Many of these farmers are working with schools to improve lunches. Please do everything you can to support their efforts.

COMMENT OF SUSAN SNIPES-WELLS

Date Submitted: Friday, May 18, 2012, 12:24 p.m.

City, State: Morrisville, PA

Producer/Non-producer: Producer

Type: Vegetables

Size: 50-150 acres

Comment: As a small producer, the EQIP program and the Conservation Stewardship Program have been helpful to our farm in increasing revenue and providing jobs. We are an oasis in our community as a farm that is open to the public and provides locally grown food. Government support of the programs we provide has huge benefit to the local community as a food source, an oxygen source, a stream water filtering source, and to the local economy. Our farm bill should support small local agriculture. Locally supported business keeps local dollars spent within the local economy. This is government money well spent!

COMMENT OF JAMES SNIVELY

Date Submitted: Friday, May 18, 2012, 5:38 p.m.

Size: 500-999 acres

Occupation: Executive Board, North Central Region, National Association of Conservation Districts

Comment:

National Association Of Conservation Districts Statement

March 23, 2010

House Agriculture Committee

Farm Bill Hearing

My name is Jerry Snodgrass. I am a corn and soybean farmer from Congressman Schillings Congressional District. I live near Geneseo, IL about sixty miles northeast of here. Today I am representing the thoughts and ideas of the National Association of Conservation Districts. 3,500 Conservation districts cover every county in the U.S. and its Territories including all major metropolitan areas. We have 117,000 district directors in these counties. These Soil and Water Conservation Districts were formed in the 1930's as the result of the Dust Bowl. I have been a local district director for 23 years and am currently Chairman of my district in Henry County. I serve on the Executive Board of the Illinois Association. I presently serve on the National Association of Conservation Districts Executive Board representing the eight Midwest states and I am on the NACD Farm Bill Task Force.

Soil and Water Conservation Districts are the local authority to set work priorities and help producers implement practices with accountability. We are the local link between producers and the Natural Resource Conservation Service to implement conservation throughout America. We work not only with farmers and ranchers but with Urban people as well. In my district we worked with NRCS staff as part of an airport expansion plan to help with erosion control during construction and with water retention and drainage after the project was completed. The conservation districts in the Chicago Illinois area did the same only on a much larger scale when O'Hare Airport recently expanded in that city.

NACD appreciates the House and Senate Ag Committees using common sense and working together for a farm bill for the Super Committee. Any additional cuts to conservation programs above the \$23 million that were recommended will put the viability of conservation programs at risk.

We can see that conservation practices have worked for decades. They have kept soil in place and nutrients out of our drinking water and we must continue these practices. We cannot possibly think that we can let conservation take a vacation and then come back in another farm bill in the future and try to play catch up. The cost of conservation projects today maybe much less than what future costs could be, plus the loss of soil and nutrients can never be replaced at any cost. My district has encouraged many local producers to put in waterways and buffer strips using the Continuous CRP and also to seed very highly erodible ground into the 10 year CRP program. Our conservation district has encouraged livestock producers to use EQIP money for waste handling projects. Everyone understands the current financial crises in this country but we must also look at the long-term investment in conservation and the good it will do.

NACD supports the consolidation of programs in Title II of the next farm bill. Individuals and private landowners will benefit from consolidation when programs are easier to access, manage, and understand. With most producers having access to electronic communications more farm programs could possible have pre approval applications online. This would ease the amount of time NRCS staff would need to put a practice on the ground. These programs provide a strong risk management tool for all producers to mitigate risk for everyone. What is protected out in the country may very well benefit those in the non rural areas as well by slowing flooding and

keeping their drinking water safe. Keep in mind that as consolidation occurs, funding levels **Must** be maintained to put conservation on the ground.

Locally-led, incentive based conservation practices are the key to protecting all of our natural resources across our much diversified country.

Conservation is a **Long-Term** investment that we must make today to avoid escalating costs of making repairs in the future.

Thank you, for your time.

JERRY SNODGRASS,
[Redacted],
Geneseo, IL,
NACD Executive Board Member.

COMMENT OF JANET R. SNOW

Date Submitted: Friday, May 18, 2012, 7:20 p.m.

City, State: Presque Isle, ME

Occupation: Retired

Comment: Please stop subsidizing the corporate agribusinesses and support organic research and organic farming that is being destroyed by Monsanto, et al. For the health of all of us limitations and reforms must be placed upon corporate agribusiness. Protect the hungry children and poor people by NOT allowing the Food Stamp program to be defunded. I fully support Bills H.R. 3286 and H.R. 3236. I am a vegan because of health issues and I try to buy organic food. Not only is it difficult to find where I live but the cost is prohibitive. Please subsidize the organic farmers who really need it and not those who make billions in profits. Thank you.

JANET SNOW.

COMMENT OF ANN SNYDER

Date Submitted: Friday, May 18, 2012, 2:10 p.m.

City, State: Ashwood, OR

Producer/Non-producer: Producer

Type: Livestock

Size: 301–500 acres

Comment: Dear Ag Committee,

Please maintain, and if possible increase the support for, for family farms, sustainable agriculture and nutrition programs. If you make cuts anywhere, please do it in big agribusiness and big commodity food subsidies.

This year there has already been a noticeable increase in the use of nutritional assistance card at farmers markets. This is a win-win situation for all parties. Please keep funding these types of programs and cut the big Ag ones that are eventually a lose-lose situation.

COMMENT OF DENISE SNYDER

Date Submitted: Friday, May 18, 2012, 2:08 p.m.

City, State: Honolulu, HI

Occupation: Retired

Comment: Please phase out our government subsidies to GMO foods and replace them with subsidies for organic fruits, vegetables, grains, legumes.

These GMO foods and the chemicals produced in them and used on them are polluting our air, water, and land. These corn and soy crops take up almost ½ our ag land that is in production in the USA and these foods are used in over 85 percent of the processed foods which are also fueling our obesity epidemic. These foods are also fed to factory-farmed animals which are also causing tremendous amounts of pollution, animal suffering, and health problems in humans.

Time to subsidize what is good for us and tax what is making us, and our land, sick.

Thank you for reading this. Please do the right thing.

COMMENT OF PATRICK SNYDER

Date Submitted: Friday, April 27, 2012, 2:49 p.m.

City, State: Phoenix, AZ

Occupation: HR Director

Comment: My parents were raised on small farms in Illinois so I spent most summers helping on my grandparent's farms. The farmers in my family always took pride in producing food to feed this country. America is the richest country in the

world and one of the largest growers of food so how can hunger be so prevalent in the U.S.? When 1 in 4 children go to bed hungry at night in this country, we have a real problem and as an American with farm roots I am embarrassed by this fact. Congress needs to get their priorities straight and ensure that the citizens primary needs are met before focusing on anything else. Hunger in America needs to be addressed realistically at all levels and programs tied to the farm bill need to be properly funded. Thank you.

COMMENT OF PATRICIA SOBczyk

Date Submitted: Saturday, May 19, 2012, 2:38 a.m.

City, State: Oak Creek, WI

Occupation: Retired Clerical Worker

Comment: I prefer clean food, locally grown, non-GMO. I would like to be able to choose the food I eat. The farmers need to be free to grow their crops and raise their animals as they see fit. If we need a farm bill it would be to order the government out of our farms and leave people in peace that choose to live off the land. It would also allow me to choose raw milk and other products that are being confiscated by our government.

COMMENT OF STEPHANIE SOK

Date Submitted: Friday, May 18, 2012, 9:49 p.m.

City, State: Duluth, GA

Occupation: Student

Comment: The bottom line is we need to work towards more sustainable agricultural practices. I fully endorse all provisions of the Local Foods, Farm and Jobs Act.

COMMENT OF LINDA SOLOMON

Date Submitted: Sunday, May 20, 2012, 7:46 p.m.

City, State: Emporia, VA

Occupation: Retired Teacher

Comment: I believe we need to support small, and organic farming with an emphasis on good nutritional value, safety and local production as much as possible. Emphasizing genetically modified foods with all of the ensuing problems and cutting out small, longtime farmers is wrong and heading in the wrong direction. We do not need chemical companies in charge of our food.

COMMENT OF SAMANTHA SOMMERS

Date Submitted: Saturday, May 19, 2012, 1:43 p.m.

City, State: Los Angeles, CA

Occupation: Graduate Student

Comment: I would like the farm bill to prioritize local, organic farming. I would particularly like there to be an emphasis on supporting young farmers purchase their own land and learn the skills necessary to run a successful farm and business.

COMMENT OF JOANNA SOREN

Date Submitted: Friday, May 18, 2012, 3:49 p.m.

City, State: North Bend, WA

Occupation: Homemaker

Comment: Kill the subsidies for commodities and level the playing field for food. Fresh fruit and vegetables should be readily available and cheaper than processed food.

COMMENT OF MARY SOSSONG

Date Submitted: Saturday, May 19, 2012, 3:47 p.m.

City, State: Princeton, ME

Occupation: Teacher

Comment: I want this bill to support family farms, food co-ops, farmers' markets—especially providing an easy access using Maine Food Stamps (EBT), organic methods, and nutritious food programs.

COMMENT OF ROXANNE SOTELO

Date Submitted: Tuesday, May 15, 2012, 6:15 p.m.

City, State: Whittier, CA

Occupation: Food Server

Comment: Please subsidize organic food production to the same extent as conventional agriculture. Doing so would bring down the cost of organic produce while promoting a safer method of growing food. Growing organic benefits the planter, grower and consumer.

COMMENT OF MICHAEL SOUTHARD

Date Submitted: Friday, May 18, 2012, 7:38 p.m.

City, State: Springfield, OR

Occupation: Retired

Comment: The U.S.A. needs sustainable agriculture with less dependence on pesticides, herbicides and no use of genetically modified crops or livestock. We as a nation must maintain a place for the small independent producer, particularly those who farm organically. There will always be a role for "Big Agriculture" when it comes to feeding America but that role must not rely on the excessive use of pesticides or herbicides and should not include any use genetically modified plants or animals. In addition "Big Agriculture" should not threaten to sue independent producers or scientific investigators who speak against the use of genetically modified crops or livestock.

COMMENT OF DAVID SOUZA

Date Submitted: Saturday, May 19, 2012, 1:09 p.m.

City, State: Belington, WI

Occupation: Retired

Comment: I support the increased emphasis on organic provisions in the farm bill. The utilization of organic agricultural practices not only harks back to our country's heritage but is better for our environment, health, and food security. The current focus on subsidizing failing agricultural methods only encourages the destruction of our environment, contributes to ever increasing health problems, and endangers the security of our food supply.

COMMENT OF LYN SPANGLER

Date Submitted: Friday, May 18, 2012, 9:30 a.m.

City, State: Bellingham WA

Occupation: Healthcare Provider

Comment: I have long been ashamed of our country's proclivity to subsidize large corporate and **Family Owned, Privately Held** agribusinesses that use huge amounts of natural resources producing, harvesting, and shipping our food and commodity crops (like GM corn) instead of helping true family owned farms that allow for greater food security by keeping production of real food closer to consumers.

COMMENT OF SUANNE SPARKS

Date Submitted: Friday, May 18, 2012, 3:39 p.m.

City, State: Laguna Woods, CA

Occupation: Retired/Fitness

Comment: I am appalled at the priorities set in Congress that do not serve the best interests of The People, whom you are elected to represent. Food is a basic requirement and must be protected from motives of greed that corrupt the market and threaten human health.

SUBMITTED LETTER BY R. SCOTT SPEAR, BOARD PRESIDENT, SEQUOIA RIVERLANDS TRUST

May 2, 2012

Hon. DENNIS CARDOZA and JIM COSTA,
United States House of Representatives,
Washington, D.C.

Dear Congressman Cardoza and Congressman Costa:

Sequoia Riverlands Trust recognizes and thanks you for your tireless work on the farm bill.

Sequoia Riverlands Trust (SRT) is a regional, nonprofit **Central California Land Trust** dedicated to conserving the natural and agricultural legacy of the

Southern Sierra Nevada and San Joaquin Valley. The wealth, productivity and beauty of this land inspire our work to conserve it for future generations.

SRT believes it is beneficial to share our “boots on the ground” perspective and how the FRPP ranking criteria affects Fresno, Kings and Tulare Counties.

- The criteria places small family farms at a disadvantage in the southern San Joaquin Valley
- That ranking criteria also ignores the realities of the southern San Joaquin Valley. The West side of the Valley has 5 to 25 thousand acre farms; the East side has smaller family farms ranging from 20 to 200 acres. The large size farms skew the average based on the criteria putting small family farms at a disadvantage for FRPP funding
- An easement application ranks higher if it is located near existing conservation land. Tulare County has no Federal or state funded ag conservation land, placing the County at a disadvantage in the current ranking system

For these reasons, Sequoia Riverlands Trust supports American Farmland President John Scholl’s statement below.

- **Evaluation and Ranking of Applications (page 199; line 16):** *In establishing criteria to evaluate and rank applications, the language requires the Secretary to emphasize, in part, support for “maximizing the protection of contiguous acres devoted to agricultural use” (page 200, line 3). We have long believed that the most effective programs to protect the long-term viability of agricultural lands are those that focus on assembling blocks of protected land. However, there are vast differences in agricultural landscapes and farm parcel sizes around the country, and we are concerned that a single standard for what constitutes “contiguous acres” may result in applications that favor one region of the country over another. We would encourage a clarification of this language to make clear that the criteria take into account the variation around the country in agricultural land use patterns.*

Current language in the Farm Bill’s Grassland Reserve Program (GRP) requires NRCS to hold the conservation easement funded by GRP.

Sequoia Riverlands Trust lost two conservation easement opportunities involving a 7 thousand acre ranch and another 14 thousand acre ranch. The ranchers did not want the Federal Government involved in their ranching operations. They refused to participate in the GRP program.

If there was language in the farm bill that allowed an option for a nonprofit organization to hold GRP Funded Easements there would have been 21 thousand acres of grassland conservation in Eastern Tulare County.

Sincerely,

R. SCOTT SPEAR,
Board President,
Sequoia Riverlands Trust.

COMMENT OF LAURA SPEERS

Date Submitted: Thursday, May 10, 2012, 11:40 a.m.

City, State: Saugerties, NY

Occupation: Student

Comment: I am writing this comment to urge congress to please protect SNAP, TEFAP, and CSFP programs under the upcoming farm bill. These programs are essential in the fight against hunger which is plaguing our country. In a country that boasts to be the most powerful in the world, it is unacceptable that 1 in 6 people are hungry. Please protect these programs. They are so important.

COMMENT OF JUANITA SPEIRS

Date Submitted: Friday, May 18, 2012, 2:56 p.m.

City, State: Bend, OR

Occupation: Retired

Comment: We need a farm bill that supports first and foremost the health of our citizens, and the sustainability of our products and small, local farmers. All you have to do is look around you to be aware that the health of the average citizen is rapidly eroding (consider the diabetes stats, for one) in large part because of diet. We need real, unaltered food, grown by farmers who practice sustainable farming techniques, decent food for those who are struggling financially, and enforced rules

and regs, along with inspections that provide true supervision of this industry. To cut funds to any of these programs means an even unsafer food supply and far larger health bills down the line. I think the reports on the number of young people not fit to serve in the military due to diet-related matters ought to be enough to tell you this is not just a fringe group of sprout eaters who want and expect change. This is a national disgrace and significant security issue.

COMMENT OF MARTHA SPENCE

Date Submitted: Sunday, May 20, 2012, 11:39 a.m.

City, State: Middletown, CA

Occupation: Teacher

Comment: I have cancer. I eat only organic non-GMO vegetables. I juice them every day to support my health. I would like to see a bill that would support these farmers and lower the cost of organic vegetables. I am on a fixed income and I spend \$100 a week on vegetables.

COMMENT OF BRENDA SPENCER

Date Submitted: Friday, May 18, 2012, 12:17 p.m.

City, State: Dallas, TX

Occupation: Holistic Health Counselor

Comment: We need an organic farm bill. Please also do not allow GMO foods without labeling. The future of our children and our own health and prosperity is at stake. Thank you.

COMMENT OF MELISSA SPENCER

Date Submitted: Friday, May 18, 2012, 9:31 a.m.

City, State: Harrisville, NH

Occupation: Spice Retailer

Comment: I would love to see the next farm bill support local farms/farmers through programs that allow for collaboration and financial support. End subsidies for large-scale farming that destroys the environment and provides a less quality product than a small local farm could provide. Also, the national food program in the schools needs to take is teaching children about nutrition and healthy choices and where real food comes from . . . the ground not a can!
Thank you.

COMMENT OF SARAH SPICA

Date Submitted: Friday, May 18, 2012, 9:55 p.m.

City, State: Denver, CO

Occupation: Household Manager

Comment: Please put organic farms and practices at the top of funding for the new farm bill. Organic farming practices are vital for the health of our land and people and need encouragement on every level. Thank you.

COMMENT OF PATRICIA SPICER

Date Submitted: Saturday, May 19, 2012, 12:06 p.m.

City, State: Eugene, OR

Occupation: Retired Educator

Comment: The current wide-spread epidemic of obesity is only one evidence that there is something wrong with excessive factory farming. More localized and healthier methods of production are available and should be supported by Congress to reduce medical costs to the nation.

PATRICIA SPICER

COMMENT OF CAROLYN SPIER

Date Submitted: Thursday, May 10, 2012, 2:31 a.m.

City, State: Weimar, CA

Comment: Protect SNAP, TEFAP, and CSFP: 30 percent of client households with seniors indicated that they have had to choose between food and medical care and 35 percent have had to choose between food and paying for heat/utilities. We must ensure hunger-relief programs remain protected so that seniors who worked their entire lives continue to have access to these vital programs.

COMMENTS OF MELANIE SPILLANE

Date Submitted: Monday, April 23, 2012, 4:36 a.m.

City, State: Gainesville, FL

Occupation: International Food Security Sector

Comment: It would be great if the 2012 Farm Bill would encourage not just domestic LRP programs, but continue its pilot program with USDA on an international level. It saves millions of lives, decreases fuel consumption and promotes local employment possibilities, in addition to giving participants a sense of pride in what they grow and eat. No

Date Submitted: Thursday, April 26, 2012, 5:17 a.m.

Comment: It would be great if the Farm Bill 2012 allotted more funding to domestic and international LRP programs as well as raised awareness of the benefits of local food purchases such as reduced food miles, spurring local economy, and overall healthier eating.

COMMENT OF LINDA SPINAZZOLA

Date Submitted: Friday, May 18, 2012, 12:42 p.m.

City, State: Hamilton, NJ

Occupation: Retired

Comment: Save our farms! When you import foods from outside the USA there are no government oversight to make sure the pesticides and chemicals they use are safe for our consumption! By importing our fruits & veggies, you are not only allowing these countries to poison us but, bankrupting our farmers into extinction! Did you stop for one moment and wonder why the cancer rates are rising? Protect our people!

COMMENT OF GAYLE SPINKS

Date Submitted: Friday, May 18, 2012, 1:34 p.m.

City, State: Costa Mesa, CA

Occupation: President of Family Owned Health Business

Comment: Being born and raised into a California family with a Dad who was raised on a farm in Kansas and a family business that encompasses health, I would like to think that we can do better when it comes to our food supply. Our family has been growing as much of our food as possible for the last decade as we have seen the decline in farming that has actually made fresh vegetables and fruit unhealthy to eat. Time for change!

COMMENT OF ALODIE SPIRES

Date Submitted: Sunday, May 20, 2012, 1:37 p.m.

City, State: Portland, OR

Occupation: Bookkeeper

Comment: As a citizen my desire is to put environmental and social welfare issues above corporate advancement. Our lands must be cared for. Genetic diversity in livestock and agriculture **Must** be preserved to grow healthy, sustainable food stocks. Small farming operations offer the best stewardship for our farmlands and food supply. Healthy lands produce healthy foods and are directly related to the health of our citizens. If the main motivation is to make food cheap (and using corporate advertising to promote cheap food), people will consume that food more & more and our nation's health will continue to dwindle as is evidenced by our growing lifestyle diseases. Corporate control of our food stocks, farmlands & farmers is dangerous and in the worst form of capitalism—disregard for integrity, diversity and human welfare to benefit the few with profits. We need to end corporate food subsidies and give support to our nation's family farmers & small food producers.

COMMENT OF KATIE SPITALETTO

Date Submitted: Friday, May 18, 2012, 3:17 p.m.

City, State: Boca Raton, FL

Occupation: Part-Time Teacher/Small Business Owner/Mother

Comment: I'd like to feel as if I had a choice in the food I feed my family. I'd like to know that the food I'm choosing is safe. I want GMOs labeled. I want cancer causing food dyes removed from the shelves, not used until supplies are deleted. I'd like tax breaks for local farmers who belong to farmer's markets. I don't believe that one corporation should be the driving force behind one sort of seed—monopolies are

dangerous. America is a place of diversity, and I believe that should apply to our food sources as well.

COMMENT OF MEREDITH SPITALNIK

Date Submitted: Friday, May 18, 2012, 10:17 a.m.

City, State: Newport, RI

Occupation: IT Professional

Comment: The structure of the farm bill over the last 4 years has directly contributed to the poor health of our people and to the near-death of the family farm. The farm bill was supposed to stabilize prices, not depress them.

Please! Restore the price stabilization system and end the direct subsidies. Keep the conservation titles but make the spending mandatory instead of discretionary. Support small family farms that sell in their local communities. Support organic vegetables instead of conventional corn. And while I'm dreaming—make CAFOs illegal—don't subsidize them.

COMMENT OF SARAH SPITZ

Date Submitted: Friday, May 18, 2012, 10:12 a.m.

City, State: Santa Monica, CA

Occupation: Retired Public Radio Producer/Publicity Director

Comment: I agree with Slow Food and all the other nonprofits whose interests are those of the people, not the big agricultural forces that are infecting this bill.

Small farmers, just like small business in America, drive the economy; their interests are in our welfare and making an honest dollar.

I do **Not** want my tax payer money funding Monsanto, 3M, Kellogg's, monocroppers who are destroying us through their use of pesticides, fertilizers, bad soil stewardship, all to pay themselves more while starving the people.

I am not a wild eyed liberal anarchist 99 percenter. I am a middle class retiree concerned with the fate of the planet and the people on it, whose very existence is being threatened by the practices of Big Ag.

Make room in the bill to support veterans returning from war and learning to farm—too many small farms are falling by the wayside and into the hands of big ag.

COMMENT OF LINNIE SPOR

Date Submitted: Friday, March 16, 2012, 2:13 p.m.

City, State: South Jordan, UT

Occupation: Coordinator

Comment: I work at a Community College. So many students go without meals because they have no funds for food. Hunger in college is common. This hurts student's studies and testing. We need these students to do well in college so they can give back to the community. I would like to support a strong farm bill created to help struggling students.

COMMENT OF CATHY SPOTO

Date Submitted: Friday, May 18, 2012, 2:14 p.m.

City, State: Irvine, CA

Occupation: Homemaker

Comment: I am in support of a healthy food bill. The people deserve to know how our foods are coming to the table, and we deserve to know what foods are being genetically modified.

COMMENT OF MICHAEL SPOTTISWOODE

Date Submitted: Friday, May 18, 2012, 2:40 p.m.

City, State: Albuquerque, NM

Occupation: Health Care Provider

Comment: Grow non-GMO foods **Only!**

Grow corn as a food, not as a bio-fuel that brings no net gain to the environment when soil depletion, pesticide pollution, and water utilization are all factored in.

Stop subsidies on low quality "staples" at the expense of nutritionally beneficial fruits and vegetables.

Promote sustainable agriculture. Subsidize sustainable practices if any at all.

COMMENT OF SARAH SPRAGUE

Date Submitted: Sunday, May 20, 2012, 10:10 a.m.
City, State: Sarasota, FL
Occupation: Speech Pathologist
Comment: Organic is important. Small farms are important. Non-GMO farming is important. Regulations for safe humane animal husbandry is important. Local supply is important. No antibiotics is important And allowing undercover reporting is important.

COMMENT OF TAI SPRING

Date Submitted: Saturday, May 19, 2012, 5:46 p.m.
City, State: Driftwood, TX
Occupation: Restaurant Food Service
Comment: Healthy food is probably the most important resource besides for water. We must support organic farming to keep Americans healthy with a strong immune system. Especially with the rise in cancers, obesity, diabetes, and low immune systems, we need to spend money on things that really matter to the human race. Non GMO organic food is important to the health of our nation. Science will support this claim, even though many industrial agriculture lobbyists will try to convince you otherwise. I hope you can see my point. Thank you.

COMMENT OF JUDY SPRINKLE

Date Submitted: Friday, March 16, 2012, 10:46 a.m.
City, State: San Diego, CA
Occupation: Caregiver
Comment: I believe this merits thoughtful and responsible attention. Without a healthy and robust food source and supply, all else is nearly irrelevant. Thank you.

COMMENT OF KUNUTHUR SRINIVASA

Date Submitted: Friday, May 18, 2012, 5:12 a.m.
Producer/Non-producer: Producer
Type: Field Crops
Size: Less than 50 acres
Comment: Organic farming is not only essential for humans on Earth but also for all other forms of life of plant and animal origin in order to improve their quality of life holistically. Nobody has an exclusive right over others to decide how their living style should be with special reference to health.

COMMENT OF ERIC ST. CLAIR

Date Submitted: Friday, April 27, 2012, 8:54 a.m.
City, State: Waterloo, IA
Occupation: Graduate Student
Comment: In this economy, it is wrong to leave hungry Americans behind in order to preserve military spending or chase illusive budget goals. Do NOT cut funding for Food Stamps in the next farm bill. In Iowa alone 382,000 people are food insecure. They need our support, not a cold shoulder.

COMMENT OF JANICE ST. CLAIR

Date Submitted: Friday, May 18, 2012, 12:21 p.m.
City, State: Cambridge, MA
Occupation: Childcare Provider
Comment: Please reform farm policy to support small, organic, and independent farmers. This is the only way to return our country to a sustainable form of food production. Big business is ruining our soil and environment while producing less nutritious and often disease-and-chemical-ridden food, and is using its clout to ruin independent farmers who use better alternatives to chemical pesticide and fertilizer overuse and to animal cruelty.
I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
 - Maintaining the EQIP Organic Initiative.
- Thank you.

COMMENT OF MARGUERITE ST. PIERRE

Date Submitted: Friday, May 18, 2012, 1:40 p.m.

City, State: Chelsea, MI

Occupation: Homemaker

Comment: Stop big business from taking down the regular farmers. GMO's should be banned/stopped. I do not want to eat any of this junk. Protect the farmers, not big business. I want natural whole milk straight from a cow, not adulterated by big business and the FDA!

COMMENT OF BONITA STAAS

Date Submitted: Thursday, May 17, 2012, 7:04 p.m.

City, State: Orangeville, IL

Occupation: Sales

Comment: Stop giving subsidies to corporate "farmers"—some who don't even live on their land. I would like to see **Small** farmers make a come-back. Help people eat **Real** food, not chemically enhanced garbage.

COMMENT OF MATTHEW STALTER

Date Submitted: Friday, May 18, 2012, 5:38 p.m.

City, State: Albany, OR

Occupation: Teacher

Comment: We need a better farm bill—one that supports sustainable, long-term farming practices, not short-term practices that ruin the land for future generations and produce the lowest quality products that slowly poison this generation. Subsidize organic foods. Nearly anyone, if given the option between organic and non-organic foods at the same price will take organic. Level the playing field between the two. Give the people what they want, not what oversized, corporate agribusinesses can make the most ill-gotten dollars from.

COMMENT OF JUDITH STAMPS

Date Submitted: Thursday, May 10, 2012, 8:23 a.m.

City, State: Atlanta, GA

Occupation: Nonprofit

Comment: If you have never had to go without 3 meals per day, I am sure you don't have to worry about subsidies. Please don't forsake the neediest members of our society. There are children who will be directly impacted if you diminish the farm bill.

COMMENT OF JEANNE STANCIL

Date Submitted: Saturday, May 19, 2012, 11:02 a.m.

City, State: Raleigh, NC

Occupation: Retired

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Reports from Washington, D.C., say Republicans in the House Agricultural Committee have already "voted to slash \$33 billion from the food stamp program while leaving farm subsidies unscathed."

Also, the latest agribusiness boondoggle gladly steals food from the mouths of the hungry to create a "\$33 billion new entitlement program that guarantees the income

of profitable farm businesses. That's on top of \$90 billion in subsidies for crop and revenue insurance policies."

If this weren't bad enough, the Senate Agricultural Committee has already voted to cut \$4 million from organic research funding and cut funding to support Beginning Farmers in half. We cannot let this stand!

At the same time, the Senate Ag Committee has voted to get rid of wasteful subsidy payments. It has proposed to replace it with a new subsidized insurance program that leading sustainable agriculture advocates are calling rife with opportunities for fraud and abuse.

While Congress is looking to get rid of direct payments to commodity farmers, the subsidized insurance program it proposes to replace it with will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk.

According to the National Sustainable Agriculture Coalition's Ferd Hoefner, "By failing to place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs, the Committee has failed to do the full reform that is needed."

We can't allow this to happen. Join us today in creating real reform and a healthy, organic future!

COMMENT OF ALAN STANLEY

Date Submitted: Friday, May 18, 2012, 3:48 p.m.

City, State: Anza, CA

Occupation: Retired

Comment: A true farm bill would serve all farmers not just agribusiness. I live in an area where agribusiness comes to town, plows the land, creates a mess, uses the precious ground water, and does little to interact with the local economy. That is in contrast to local farmers who raise Alpacas and cattle, shop locally and are part of the community. Support the local farmer, don't fight them. We need a farm bill that supports organic, and is not just a bill to promote GM crops and agricultural subsidies to big corporations that are more chemical companies than farmers.

COMMENT OF SHARON STANLEY

Date Submitted: Monday, May 14, 2012, 6:12 p.m.

City, State: Rochester, NY

Occupation: Unemployed

Comment: I do not want cuts to snap food distribution. The program does too much good to keep people eating good foods and not going without due to cost. Many people are on limited incomes and count on these programs to get by.

COMMENT OF SUZANNE STAPLER

Date Submitted: Friday, May 18, 2012, 9:11 a.m.

City, State: St. Davids, PA

Occupation: Nutrition Coach

Comment: Stop listening to Big Food and Big Agri. Organics will keep us all healthy. We need to help the small, organic farmers who are struggling. Stop listening to Monsanto and the like who only want to poison us and don't keep our food safe.

COMMENT OF KAREN STARK

Date Submitted: Tuesday, May 15, 2012, 10:49 a.m.

City, State: Burlington, NJ

Occupation: Retired Banking Industry

Comment: I understand that you are considering cutting food stamps to help with budget cuts. This is unthinkable. Really? Of all the things you have to consider reducing I can't believe food stamps even make the list. In this economy people need this support. Please do not let this happen.

COMMENT OF DAWN STARKE

Date Submitted: Friday, May 18, 2012, 1:45 p.m.

City, State: Austin, TX

Occupation: Office Administration

Comment: Americans have the right to know what we are eating. GMOs are unknowns and thus must be labeled. Farmers should not be put out of business by

Big Ag. Life should be available to all, not only those who profit from holding patents on food and medicine. End the madness and do something for the future of our species now.

City, State: Point Reyes, CA

Occupation: TV Film Producer

Comment: Please fight for healthy farms and healthy food practices. Stop subsidizing Big Ag that uses pesticides that are harmful to living things! No to GMO's. Round UP ready crops and Round Up pesticides are the corporations choices, not the peoples. Hear us!

COMMENT OF RALPH STEGER

Date Submitted: Friday, April 27, 2012, 8:28 p.m.

City, State: Staunton, VA

Occupation: Volunteer

Comment: As a weekly volunteer at a food pantry in the Shenandoah Valley providing food to 2,400 families each month, I have seen the awful results of current cuts to the USDA food availability. Only 1,000 lbs. of USDA was available last month. Divide that by 2,400 families and you can see the problem we face. You may like to think the recession as ebbed, but we at the food pantries have seen no sign of it yet. Please draw a Circle of Protection around the SNAP and TEFAP programs. Please help us feed the hungry women, children, fathers, and elders.

COMMENT OF FLORENCE STEICHEN

Date Submitted: Sunday, May 20, 2012, 6:24 p.m.

City, State: St. Paul, MN

Occupation: Retired Educator

Comment: Title I: Have an annual cap of \$250,000/farm, and close loopholes that allow large operations to receive additional payments.

Title IV: Keep SNAP so that it meets needs in times of economic crises.

Title VII: support organic and sustainable agriculture systems and sustainable economic and community development.

Title X: Create programs that fully recognize the inherent value of Sustainable and organic farming systems, especially in addressing climate change. **Thank You!**

COMMENT OF DR. KAREN STEIN

Date Submitted: Sunday, May 20, 2012, 3:41 p.m.

City, State: Woodway, WA

Occupation: Educator

Comment: We must return to sustainable organic food production. Eating food today is accompanied with a layer of fear and apprehension about the source, composition, cleanliness and overall healthfulness of our foods. As an Elder at 71 . . . many of us fear that we will succumb at earlier ages than past generations to effects of pollution, chemicals, fall out that we cannot see, taste or comprehend the effects of . . . but we do see the rising numbers of affects in an increasing number of children born with ADHD, Autism, Asbergers, Prenatal Alcohol, Nicotine, and other drugs and chemicals ingested through our food, air, water . . . and sick spirits . . . As a Nation that touts freedom and human rights it is time to heal our spirits and return to Nature and natural sustainable ways. We must begin by freeing Leonard Peltier from Prison—an innocent Lakota Man that has served over 36 years—a statistically longer period than most murderers such as The Lockerbee Bomber who

killed hundreds have served . . . Then, lets look at where we can begin to grow food locally. Churches and schools often have large lots of land. These can all be turned into productive places to raise food . . . U.S. of America used to **Grow Things** as well as **Make Things**. It is important for children to learn how food is grown or raised and how it moves to the table . . . We Elders that remember how to do this must be cultivated, respected and allowed to teach . . . Our Education **System** has become a Ponzi Scheme of more and more expensive courses, degrees, and certifications that produce nothing more than over emphasis on compliance and little on how to survive sustainably. Thank you for listening. Sincerely from one with BA, MBA, MA ED, and ED D degrees and who cannot seem to obtain a job without more course work . . .

Please! Let's change course!

DR. KAREN STEIN.

COMMENT OF ANNE STEINBERG

Date Submitted: Tuesday, May 15, 2012, 9:01 p.m.

City, State: Milwaukee, WI

Occupation: Retired Teacher and Volunteer

Comment: I support a farm bill that supports local family farmers, strengthens the local food systems and makes healthy food more available to everyone.

I live in Milwaukee, WI where I help to connect small local farmers and producers with consumers who want to buy directly from them. For example, we hold a Local Farmer Open House each spring where over a thousand visitors come to meet farmers and sign up for CSA memberships.

This is what I've learned in doing this work:

We need a farm bill that helps beginning farmers get started—with credit and with technical assistance. There aren't enough farmers now growing local food to serve our metro area and many young and disadvantaged would-be farmers—and veterans—can't afford to buy land and equipment. Now is the time to invest in the future.

We need a farm bill that funds agricultural research, especially the Organic Agriculture Research and Extension Initiative. This research is necessary to help young and established farmers be more successful in the growing organic sector of U.S. agriculture.

We need a farm bill that helps build our local food infrastructure. For example, we need food hubs, more money going into marketing for small family farmers and producers, and investment in value added production for small farmers.

We need a farm bill that protects our future by protecting our soil and water resources. So I believe there should be conservation requirements for any farmer who receives Federal aid—especially crop subsidies or insurance. I know that many Milwaukee residents are looking to buy from farmers use good conservation practices.

We need a farm bill that provides a food safety net for struggling Americans in these difficult times. It should prioritize programs that improve access to healthy food in low-income communities and our school. I do not support cutting the SNAP program in order to prevent cuts in military spending. Instead, I believe in tax equity—raising taxes on the richest U.S. citizens and ending tax breaks and subsidies for large corporations (like the oil companies).

COMMENT OF JILLIAN STEINBERGER

Date Submitted: Friday, May 18, 2012, 4:13 p.m.

City, State: Oakland, CA

Occupation: Landscape Gardener (Kitchen Gardens)

Comment: Hi. I've covered the topic, writing for magazines, newspapers and blogs. This includes interviews with many organic farmers. From my research, I've found that food produced by these Americans follow stronger safety BMPs. They are in closer touch with their market that typical consumers buying at large grocery chains—and so they are more accountable. Chinese milk and beef, coming here, for example, is more dangerous than organic local strawberries, which are also safer than soft drinks, sugary cereals, and many packaged food.

I see that the Federal Government is trying to pass a farm bill which is anti-capitalist, in favor of unfair subsidies and less regulation to big corporations. Many of these have been fined and cited as polluters, as practicing cruelty to production animals and laborers (even spraying them with dangerous chemicals).

This is total BS. Let's admit it. It is support for corporate wealth because of how our system works.

Let's support organic farmers, who are the true small capitalists and who offer better lifestyles (including food safety) to consumers, laborers, animals, *etc.*

I will refrain from voting if a bad farm bill is passed, and I will lose **more** faith in my government's justice for all.

JILLIAN STEINBERGER.

COMMENT OF STEVE STEINER

Date Submitted: Friday, May 18, 2012, 11:49 a.m.

City, State: Lexington, VA

Producer/Non-producer: Producer

Type: Greenhouse/nursery, Poultry/poultry products, Specialty Crops

Size: Less than 50 acres

Comment: We are a sustainable small farm and need support for our model which is in direct contrast to the industrial agriculture currently supported by the government.

Quit subsidizing unsustainable agriculture and the rest will take care of itself.

And **Require Labeling Of GMO Food Now!**

Thanks,

STEVE STEINER

COMMENT OF CAROLINE STEINFELD

Date Submitted: Wednesday, May 02, 2012, 7:44 p.m.

City, State: Providence, RI

Occupation: Student

Comment: I think you should support organic agriculture **Much More**, and **Most Of All**, small farms with a high crop variety. **Please**, stop subsidizing corn because they will be detrimental for the country in the long run. These subsidies support a model of agriculture that depletes the soil and pollutes. This is not about nature. This is about our children's welfare and a healthy future economy!

COMMENT OF SUZANNE STEINKAMP

Date Submitted: Saturday, March 17, 2012, 9:27 a.m.

City, State: Saratoga Springs, NY

Occupation: Retired

Comment: I buy almost all my produce from local farmers, small farmers who do a wonderful job of bringing us healthy, mostly organic foods.

I'm writing in support of my local, upstate NY farmers—and in support of small farmers throughout the country. Please be sure you provide the support they need in the farm bill under consideration. Thank you.

COMMENT OF VAL STELSE

Date Submitted: Friday, May 18, 2012, 5:22 p.m.

City, State: Milwaukee, WI

Occupation: Homemaker

Comment: Yes, I am a mother and we are currently looking for land to purchase so we can grow our own food. Because I have been lied to by the producers for GMO corn. We were told that this corn would **Never** be allowed in our food sources, but here we are in 2012 with GMO/GE food being served to us without our consent. It was all done behind closed doors, even though there were scientist that were trying to get the word out. Big corporations used their greed to silence them and with hold this information from the public. It is good to know that not all countries on this planet are like **Ours**. There are countries that believe in the rights of their countrymen to produce and eat food that Mother Nature created and not a test tube. These corporations have lied and were given taxpayer dollars to keep up their research, which outside scientist proved over and over were dangerous.

But **Greed** is the foundation of everything in our government today. Without greed we would not be having these statements, we would have a farming bill that supports sustainable crops and the family farmer. Hell we would even have food that actually would **Prevent** diseases. But no instead we have a system that causes diseases. I do believe poison was invented to **Kill!**

So what do we do now? We fight for our right to grow and consume food that improve our bodies and minds. We work towards the common **Good**. We eliminate **Greed** from our farm bill. The farm bill was put in place to help the family farmers/

ranchers to survive on their land. To put food on every Americans table with reasonable cost. It has turned into a farce, a way for the greedy to become more greedy.

It is time to put **People** first. Food is our life. It is what can keep us healthy or what can destroy us. With all the new disease from the past 20 years it is no wonder that GMOs are under fire. All I ask is to have food that has been around since the beginning of time. The food that God created (if you are Christian) or Mother Nature (if you are not). The food that we know is healthy. That is the food this farm bill should be looking at and the family farmers/ranches that work the land every single day to bring that food to our tables.

And one last thing, no longer should factory farms or GMOs be funded by taxpayer dollars. No way, no how!

Thank you.

COMMENT OF DEEANN STENLUND

Date Submitted: Friday, May 18, 2012, 11:08 a.m.

City, State: Roseville, MN

Occupation: Medical Laboratory Scientist

Comment: I would like to see a farm bill that support the growing and distribution of healthy and varied foods, such as fruits and vegetables. It should also protect our natural resources. The Conservation Stewardship Program should not be cut! The new farm bill should also invest in beginning farmer and rancher programs. Our farmers are aging and we need to encourage and support young people who are interested in farming. Guarantee \$25 million for Beginning Farmer and Rancher Development Program. We should also be supporting innovation by funding the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Finally, support programs like the Value-Added Producer Grants Program by guaranteeing \$30 million of mandatory funding per year.

COMMENT OF CHRIS STEPHAN

Date Submitted: Friday, May 11, 2012, 11:24 a.m.

City, State: Seattle, WA

Occupation: Accountant

Comment: I am writing to urge the House Agriculture Committee to support small organic and environmentally responsible farms and end subsidies for agribusiness. In addition please push for better treatment of animals and support the farms that make this a priority. I would like to see encouraged biodiversity as well and an effort to end the destructive reign of Monsanto. Thanks!

COMMENT OF DAVID STEPHEN

Date Submitted: Thursday, May 17, 2012, 3:04 p.m.

City, State: St. James, NY

Producer/Non-producer: Producer

Type: Livestock

Size: Less than 50 acres

Comment: Please stop giving subsidies to large corporate unsustainable agricultural companies, instead give subsidies to small family operated and sustainable farms that supply to local markets and employ local people. Small family farms are the backbone of our national food security.

COMMENT OF GAIL STEPHENS

Date Submitted: Friday, May 18, 2012, 11:10 a.m.

City, State: Truckee, CA

Occupation: Retired Psychologist

Comment: With the economic, social, and dietary needs of this nation we can no longer tolerate playing political games with our food source. Do the right thing now!

COMMENT OF GREG STEPHENS

Date Submitted: Friday, April 20, 2012, 1:37 p.m.

City, State: Salina, KS

Producer/Non-producer: Producer

Type: Field Crops, Livestock

Size: 1,000+ acres

Comment: Here are my suggestions:

- Keep these programs at current level—Rural Development, Sustainable Agriculture, Food Aid, Nutrition and Food Stamps, Crop Insurance and Estate (death tax) limits.
- Enforce and improve these programs—COOL (Country-of-Origin Labeling), GIPSA (Grain Inspection and Producer Stockyards Act), and Research.
- Reduce these programs—Crop subsidies. Need to place limits on them based on size.

Thank You.

COMMENT OF LAURA STEPHENSON

Date Submitted: Sunday, May 20, 2012, 6:59 p.m.

City, State: Durham, NC

Occupation: Farm Hand

Comment: As an aspiring young small farmer, I hope for a future where I can make a living for myself doing something that I believe in (local and sustainable agriculture) and providing high-quality food to not only middle and upper-class citizens of this country, but low-income too. How we produce and subsidize food as a nation has been incredibly unequal—with large, multinational corporations receiving the largest subsidies. My hope for the future of the United States is to have a wide-range of diverse crops that can keep our country healthy. It appalls me that obesity has become so widespread, and that the connection between obesity and what our nation chooses to subsidize hasn't been teased out by the public. Please support aspects of the farm bill that would help beginning farmers (there are many that need help in the Piedmont of North Carolina), farmers transitioning to a more sustainable crop/diversification of crops, and please don't continue to subsidize large multinational corporations.

Thanks,

LAURA.

COMMENT OF SHARON STERGIS

Date Submitted: Wednesday, May 09, 2012, 2:47 p.m.

City, State: New York, NY

Occupation: Writer

Comment: There is a very serious hunger issue going on in our country. Obesity, illnesses, are **Not** evidence of over indulgence and excessive per Se. It's about misinformation, emotional problems, ignorance, and most importantly **Poverty!** Our First Lady has started the education on food and exercise. It needs to be a State of Emergency in my humble opinion.

Please for the Love of God, pass a farm Bill with the strength of steel to dedicate Americans back to good food, good eating, good health, good well being.

Thank you.

COMMENT OF JAN STEVENSON

Date Submitted: Friday, May 11, 2012, 10:45 a.m.

City, State: Stillwater, OK

Occupation: Unemployed, Recent Graduate

Comment: Family farms promote the best employment situation and economic situation, as well as the healthiest, most sustainable food stuffs for the world. Please bring actual reform to the farm bill.

COMMENT OF JANE STEVENSON

Date Submitted: Friday, May 18, 2012, 2:06 p.m.

City, State: Colorado Springs, CO

Comment: I am in favor of safe and thoroughly labeled food and opposed to factory farms which sacrifice safety and health for humans or animals in the name of profits. I am not against profits, but I do want to know exactly what I'm eating.

JANE STEVENSON.

COMMENT OF SCOTT STEWARD

Date Submitted: Friday, May 18, 2012, 1:33 p.m.

City, State: Erie, CO

Occupation: Realtor—Self-Employed

Comment: The United States should be leading, creating and doing everything better than the next one. Time to step it up!

COMMENT OF BARBARA STEWART

Date Submitted: Friday, May 18, 2012, 12:15 p.m.

City, State: Marietta, OH

Occupation: Retail Business Owner

Comment: I am a 56 year old business woman. My husband and I have a retail mattress business, and we do approximately \$½ million a year in business. Because of the nature of the business, I spend at least an hour with every customer. I am appalled by the health of the people in our country. **People Are Poisoning Themselves By What They Eat.** The health of a nation is directly proportional to the health of its people. And if you want to find the cause of this ill health, look no further than the food. The corporate food giants, made possible by our government, are directly to blame, and the government is directly to blame by subsidizing this type of agriculture. We **Must** start addressing these agricultural problems. The medical costs of diabetes, even among young Americans, is driving health care costs. As a hard-working citizen of this society, I urge you to do the hard things that will have to be done on a large structural level to solve the problem. That means defunding big agriculture and passing legislation that will allow small farmers (especially organic farmers, who care about the health of the land), to once again become the dominant players in providing food. Will we pay more for our food? Yes. But we will pay less for medical expenses, we will feel better, we will have the health to keep our country strong.

COMMENT OF CYNTHIA STEWART

Date Submitted: Friday, May 18, 2012, 2:54 p.m.

City, State: Marianna, FL

Occupation: Land Manager

Comment: Please do all you can to help our farmers provide healthy food for America. Many neighborhoods have difficulty even finding reasonably priced produce in local stores. Our farmers must contend with soaring fertilizer, herbicide and gas prices. In our area they also must deal with drought conditions.
Thank you.

COMMENT OF DONNA STEWART

Date Submitted: Friday, May 18, 2012, 12:04 p.m.

City, State:

Producer/Non-producer: Producer

Type: Escondido, CA

Size: Specialty Crops

Comment: Less than 50 acres My husband and I own a couple of small family farms. We currently employ around 100 people and don't believe in subsidized farming for the big corporations. The government fees, insurance and regulations are what is killing us in the state of CA. Wish we could move our farms elsewhere.

COMMENT OF LISA STEWART

Date Submitted: Saturday, May 19, 2012, 3:49 p.m.

City, State: Wharton, NJ

Occupation: Librarian

Comment: One of our country's precious resources is the individual farmer. So often the farmer is short shifted and marginalized, if not driven out of business by global agribusiness. Legislation to be far sighted needs to protect and help the farmer prosper. It will also help our country prosper, which is crucial now more than ever.

COMMENT OF DONNA STIEGMEIER

Date Submitted: Friday, May 18, 2012, 7:40 p.m.

City, State: Nevada City, CA

Occupation: Artist/Teacher

Comment: The most basic of ideals we are having to beg our Government for. Good Food. Ridiculous in such an advanced and powerful country to pretend that

people can eat toxic food without the resulting catastrophic health problems. Only because people are starving for nutrition do they pump themselves full in excessive quantities of bad food. Yes, people need to know what is in their food **And** in their soil **And** in their water. Thank you House committee but what is this, a joke that you want to know if we consider quality of food important?

COMMENT OF ANN STILLMAN

Date Submitted: Thursday, May 17, 2012, 11:22 p.m.

City, State: Grinnell, IA

Occupation: Psychologist (Retired)

Comment: I am most concerned that we continue to build into the next farm bill, the commitment and requirement for conservation practices to be part of any support plan for farmers. We must preserve our top soil.

Thank you for bringing this into the discussions that are taking place.

COMMENT OF MICHAEL STIMAC

Date Submitted: Friday, May 18, 2012, 3:02 p.m.

City, State: Lombard, IL

Occupation: Millwright

Comment: Please take a stand for the people not for big business. It seems that of our representatives are more concerned with corporations than for the people for which they represent. Please help change this growing view. Stand for the people.

COMMENT OF ALISHA STIREMAN-BEYER

Date Submitted: Friday, May 18, 2012, 3:07 p.m.

City, State: Xenia, OH

Occupation: Teacher/Homesteader

Comment: We need to push for a more sustainable policy. We need to do whatever we can to encourage small farming outfits, community & co-farms, urban & suburban homesteading, farmer's markets, and localization. We need to reduce the subsidies given to big agriculture and wean ourselves from our dependence on corporate agriculture. If we don't and soon, we face mass hunger, inflated prices, big businesses raking in big profits while the people starve, environmental damage, *etc.* The government is supposed to protect and serve the people, the majority . . . not just the wealthy.

COMMENT OF JENNY STIRLING

Date Submitted: Saturday, May 19, 2012, 9:04 a.m.

City, State: Arlington, MA

Occupation: Teacher/Musician

Comment: For years I have been watching, with great alarm, the demise of our food systems in this country.

I urgently request you to support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

I want my children and their children to have access to locally, sustainably, organically grown foods that are **Affordable** for **All** people.

I want safe foods, un-tampered by genetic experimentations, grown in healthy soils.

I want farmers to be able to work in non-toxic environments for a decent, livable pay scale, and I want folks in my community to sell the local foods produced, not have it shipped or driven from 3,000 miles away.

I want to see my local community healthy and thriving, rather than seeing government protect and (horrifically) subsidize agribusiness corporations that cause epidemics of diabetes, unknown cancers, and other illnesses.

Please support the above policies. Our future depends on this.

COMMENT OF SHIRLEY STITH

Date Submitted: Sunday, May 20, 2012, 6:19 p.m.

City, State: Hidden Valley Lake, CA

Occupation: Retired

Comment: I am interested in protecting our food supply from GMO and Monsanto greed & effects on small farms and crops and local economy. WE need local grown foods and grapes protected for our health and protection for small farms and small business with highest standards.

Not dirty trick manipulations for greed and unknown potential dangerous health hazards by big business only interested in profit.

COMMENT OF ANN STOCKDALE

Date Submitted: Friday, May 18, 2012, 5:19 p.m.

City, State: Gig Harbor, WA

Occupation: Artist

Comment: Please put labels on GMO crops. I completely avoid corn now because I don't want GMO's. Please sever ties with Monsanto and look seriously into their stranglehold on our produce. This is a National Security issue, to let one company own most of our food supply . . . so what's up with that. Sterile Seeds are an abomination.

COMMENT OF DR. SARAH STOCKWELL

Date Submitted: Friday, May 18, 2012, 5:49 p.m.

City, State: San Diego, CA

Occupation: Biologist

Comment: As one of the vast majority of Americans who consume food rather than producing it, my priorities lie with healthy, affordable food rather than continued subsidies to big agricultural businesses producing commodity crops. Please allow the new farm bill to reflect what is best for, and valued by, the citizens and taxpayers rather than what the lobbyists want. I value healthy land and healthy food that is accessible to all.

To this end, I am asking you for:

- Full funding of food stamp programs.
- Full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- Implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you.

Dr. SARAH STOCKWELL,
University of California, San Diego.

COMMENT OF MARILYN STOKES

Date Submitted: Friday, May 18, 2012, 3:29 p.m.

City, State: Lanett, AL

Occupation: Retired Missionary Teacher

Comment: I have grown some of my food in the past, but am limited in what I can grow now. I would like to be able to buy organic food and food that has not been genetically modified. I do hope that you will consider the consumers and the local farmers rather than favoring large corporations when you submit the farm bill. It shouldn't be so difficult to find safe food for our children and grandchildren.

I would like to see results of scientific studies done on genetically modified foods that are not paid for by Monsanto and others who profit from GMO food.

Thank you for anything you can do to make our food safe.

MARILYN STOKES.

COMMENT OF SARAH STOLAR

Date Submitted: Saturday, May 19, 2012, 11:53 a.m.

City, State: Seattle, WA

Occupation: Homemaker

Comment: End all crop subsidies. Make regulations to encourage the move from industrial agriculture and CAFOs to small, local, and organic farms. Heavily regulate the planting of GMOs and help make non-GMO organic seeds more available.

COMMENT OF JANET STOLEY

Date Submitted: Friday, May 18, 2012, 1:56 p.m.

City, State: Edwards, CA

Occupation: Homemaker

Comment: As a concerned citizen of the U.S. and mother of three healthy, beautiful children who have not been sick much since we switched to mostly organic foods, I am requesting your full support on the full endorsement of all provisions of the Local Foods, Farms and Jobs Act. (H.R. 3286) We desperately need these farmers to continue farming so that we can eat good quality, healthy food; and since unemployment is at an all-time low, we also need these workers to keep their jobs. It would be a mistake to depend on other countries for jobs and food. Furthermore, it is also a mistake to depend on the government for jobs and food. History has already clearly demonstrated that the government electives cannot handle that priority adequately. And now we're faced with universal health care, something all other countries in similar situations detest. At least if we had good, healthy food, we wouldn't have to pay much for health care. The need would still be there, but the majority of the bills wouldn't. I am also in full support of fully funding conservation programs and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs, the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act(H.R. 3236), and maintaining the EQUIP Organic Initiative. I was just notified that funding for organic research and beginning farmers was cut significantly. This is a mistake and will cost us dearly, because we will end up paying the doctors rather than the farmers. I personally would rather pay the farmers to avoid health problems than the doctors to fix them. By cutting funding to these programs, you are showing people where your allegiance and values lie: with money and big business. This country is no longer run by the people or for the people, but by the government for big business. Do not make the mistake of letting money drown out the voice of the people. I can assure you that there are at least thousands of other citizens who feel the same as I do. We need to start fixing problems at the roots rather than start from the top, or else we won't need terrorists to destroy our country. We will be destroying ourselves from the inside out. I hope and pray that you will make the right decision regarding our food.

Sincerely,

JANET STOLEY.

COMMENT OF JANORA STOMBOCK

Date Submitted: Friday, May 18, 2012, 3:13 p.m.

City, State: Boulder, CO

Occupation: Retired Building Trades

Comment: The farm bill must be written in a way that fosters healthy farms and regenerative practices. Please stop sending our taxpayer dollars to agribusiness, which includes GMO's, pesticides that are killing us and this land, and commodity subsidies. Please strengthen incentives for organic agriculture and programs for new organic farmers. A farm bill should benefit the people, and not business. Our children's future is in your hands. Please choose wisely, instead of from a place of greed and corruption. Thank you.

COMMENT OF BEVERLY STONE

Date Submitted: Thursday, May 17, 2012, 12:54 p.m.

City, State: Minneapolis, MN

Occupation: Office Administrator Environmental Agency

Comment: Please work to provide a farm bill which encourages the production of local foods and does not harass organic and family farms with paperwork designed to make them fail so that huge conglomerates control our food sources.

Protect organic and family farms from Monsanto and any other possible GMO originators, rather than allowing them to dictate the law with their egregiousness. Thank you.

COMMENT OF KAREN STONE

Date Submitted: Monday, May 07, 2012, 6:07 p.m.

City, State: East Chicago, IN

Occupation: Researcher

Comment: Please do not cut funding for hunger relief programs! The need for food in many communities is tremendous; and often hidden from public view. No one in this affluent nation should be allowed to go hungry. There is no more important priority for our nation than the well-being of its residents—hungry people are not productive people; and we need the combined energy of all of our residents to keep our nation strong and prosperous. We all have paid taxes for decades and entrust our representatives with fighting to help meet our needs—to allow any American to go hungry would cast a shameful shadow upon the ideals by which this nation was founded.

COMMENT OF MARY STONE

Date Submitted: Friday, May 18, 2012, 2:10 p.m.

City, State: Oriental, NC

Occupation: Retired Teacher

Comment: I buy grass fed beef and organic produce. I support the small farmer that promotes being humane to animals and protecting our environment from pesticides.

Please support our small famers, not the corporations that are only concerned with making more money, and dumping consumers and animals at the bottom of the pile.

We depend on you to keep us safe from those who would harm our children and environment just to attain the next dollar!

COMMENT OF MICHELLE STONE

Date Submitted: Saturday, May 19, 2012, 7:37 p.m.

City, State: Pine, AK

Comment: Please outlaw GMO food. Stop subsidizing corn used for high fructose corn syrup (which is contributing to this country's obesity crisis). Subsidize the farmers who really need it, the organic and smaller family farms. Big corporations do not need government money. Stop the waste and get back to supporting healthy crops. Stop the abuse of farm animals. If you want to reform health care do it at the food level. Give people healthy, cheap choices!

COMMENT OF CAROL STONEBURNER

Date Submitted: Friday, May 18, 2012, 2:05 p.m.

City, State: Minneapolis, MN

Occupation: Administrative Assistant, University of Minnesota

Comment: We need a farm bill that starts paving the way for real reform. It needs support shifts in agricultural practice in ways that promote conservation of soil and water quality, that reduce the use petrochemical products both for fertilizers and for pesticides, that diversify crop variety by individual farmers, that expand the availability of crop insurance to non-commodity corps, and that that penalize use crops genetically modified to resist herbicides.

Also, you need to keep strong support for the nutritional aspects of the bill; SNAP has an incredibly high rate of return on investment both in terms in direct economic benefits and in a healthier society. To that end there should also be increased funding for use of SNAP benefits in farmers markets.

Failure to do these things undermines the health, economic and biological security of our country, both in the immediate future and for years to come, for the short-term benefit of a small number of corporate giants.

SUBMITTED LETTER BY CHUCK STONES, PRESIDENT/CHIEF EXECUTIVE OFFICER,
KANSAS BANKERS ASSOCIATION

Date: April 11, 2012

To: The Honorable FRANK D. LUCAS, *Chairman*, U.S. House Agriculture Committee
The Honorable COLLIN C. PETERSON, *Ranking Minority Member*, U.S. House Agriculture Committee

The Honorable TIM HUELSKAMP, Congressman—Kansas 1st District

The Honorable LYNN JENKINS, Congresswoman—Kansas 2nd District

The Honorable KEVIN YODER, Congressman—Kansas 3rd District
 The Honorable MIKE POMPEO, Congressman—Kansas 4th District
 From: Chuck Stones, President/CEO—Kansas Bankers Association
 Re: U.S. House Agriculture Committee Farm Bill Field Hearing, April 20, 2012—
 Dodge City, Kansas

On behalf of the 300 banks that comprise the Kansas Bankers Association and the nearly 14,000 Kansans employed by those community-based organizations, we welcome Members of the U.S. House Agriculture Committee to the Sunflower State. We commend the Committee for taking time to seek input directly from agricultural producers, as well as other stakeholders that will be impacted by the next farm bill. We also appreciate this opportunity to highlight two very important items that we hope this Committee will consider as deliberations on the next farm bill continue.

Item #1: Removing Participation Limits from USDA FSA Loan Guarantee Programs

KBA supports removing the current 15 year participation limit applied to loan guarantee programs administered by USDA's Farm Service Agency (FSA). The current 15 year participation limit has created uncertainty for many farmers and ranchers in Kansas and across the nation that borrow money from banks through FSA loan guarantee programs. In Kansas, there are currently 1,104 agricultural borrowers that are utilizing the FSA loan guarantee program. *Because of the participation limit imposed by Congress in 1992, 212 Kansas borrowers have already been term-limited out of the program and an additional 93 Kansas borrowers will be forced to exit the loan guarantee program within the next 2 years.* Given the cyclical nature of the agricultural economy, it seems short-sighted to place a simple 15 year limitation on program participation when the relationship between the agricultural producer and the agricultural lender often spans many decades. Furthermore, KBA is not aware of comparable term limits for other Federal loan guaranty programs and we question the merits of term limits given the volatile nature of the agricultural economy. KBA urges Members of the House Agriculture Committee to remove this restriction.

Item #2: Maintaining a Strong and Vibrant Federal Crop Insurance Program

KBA supports maintaining a strong Federal Crop Insurance Program as a vital risk management tool for farmers and ranchers. Agriculture is an inherently risky business, both in terms of weather and markets. Federal crop insurance provides producers with an effective tool to manage their risk, and it provides agricultural lenders with greater certainty that loans made to producers will be repaid. Federal crop insurance serves as an incentive for agricultural lenders when lending to young and beginning farmers that have less collateral and equity and it is instrumental in assuring that American agriculture remains solid, solvent and globally competitive. Without the risk protection provided by Federal crop insurance, agricultural lenders would be forced to increase underwriting standards, increase costs to offset risk and likely be forced to reduce credit availability to some producers for their production, equipment and land purchase needs. KBA strongly urges Members of the House Agriculture Committee to maintain the effectiveness of the Federal Crop Insurance Program as you consider the next farm bill.

Once again, thank you for holding this important forum in Kansas and thank you for the opportunity to provide comments on the two important items referenced above. Kansas banks and Kansas bankers will continue to serve the needs of the Kansas agricultural community and we look forward to enactment of a strong Federal farm program that will ensure the vitality of agricultural producers and the entire agricultural industry.

For additional information, please contact Chuck Stones at [Redacted] or by calling [Redacted].

COMMENT OF SARA STOPEK

Date Submitted: Monday, May 14, 2012, 11:35 p.m.

City, State: Brooklyn, NY

Occupation: Gardener, Teacher, Writer

Comment: Our CSA makes a big difference in our neighborhood—please support small farmers, and food for the needy. These things make our local economies thrive.

COMMENT OF MARINA STOPLER

Date Submitted: Friday, May 18, 2012, 12:33 p.m.

City, State: Pleasantville, NY

Occupation: Nutritionist

Comment: People are told, year after year, how important it is to eat whole foods from real farmers—at farmers markets, greenmarkets—these are the people that can take care of our land and water. Can the government **Please** take note.

People are no longer buying supermarket meat, poultry, or produce if is from the hands of mass market producers—CAFO's, chickens that can't walk because of the way they have been bred, produce that comes from thousands of miles away. America has woken up—let us know that you are listening and make the farm bill truly for farmers **Not** industry.

COMMENT OF SUSAN STORLAZZI TORPEY

Date Submitted: Sunday, May 20, 2012, 9:44 a.m.

City, State: Lake Grove, NY

Occupation: Consultant

Comment: I implore you to reform the farm policies now so that people's health is put before the special interests of business. Organic farms need more support not less. We need to start caring more about health and protecting our environment thereby our future, before it is too late!

COMMENT OF MICHAEL STORM

Date Submitted: Saturday, May 19, 2012, 11:03 p.m.

City, State: Louisville, KY

Occupation: Electrician/Urban Gardener/Bee Keeper

Comment: I am shocked to hear that you would even consider not to tie conservation practices with the legislation before you as had been in the past! Soil, water and air are important to everyone and need protection forever.

COMMENT OF KAYLA STORMONT

Date Submitted: Wednesday, May 02, 2012, 10:55 a.m.

City, State: Providence, RI

Occupation: Student

Comment: A friend and I are working on a project for a class about sustainable agriculture and we're examining the farm bill, specifically proposals for changes to the crop insurance programs in the 2008 Farm Bill. We support the efforts that are being made to extend crop insurance to organic and specialty crops, but are skeptical about the use of a private-public partnership in order to provide this insurance. We think that a better solution would be to put the government in charge of collecting crop insurance payments and distributing monetary aid in the event of a natural or market-based disaster. We think using private companies is inefficient and might lead to wasted money. Private companies are more likely to double-count farmers, doling out multiple payments to farm owners as well as farm managers. A federally led program would facilitate enforcement of single payments to operations and would allow for more wide scale regulation which would ensure equality for all farmers.

COMMENT OF MARY JO STOUT

Date Submitted: Friday, May 18, 2012, 8:36 p.m.

City, State: San Jose, CA

Comment: It is time to have a just farm bill—subsidy support for farms, all the agriculture business, dairy's—is a giant welfare program stop all this become fair just in your rulings of new farm bills.

Thank you.

COMMENT OF KAREN STOUTE

Date Submitted: Friday, May 18, 2012, 4:49 p.m.

City, State: Brooklyn, NY

Occupation: Rental Agent

Comment: It is sad to see the state of our food supply. What is sadder is that this is allowed because of the policies that the government put in place. The FDA and USDA have been influence by the big food companies. They have stopped looking out for the wealth fare of the public.

The land is being destroyed by the pesticides and the GMO crops. Unfortunately, profit is the driving force behind all the policies relating to the food industry, the

health of the citizens are secondary. Well, perhaps things will change with the new farm bill.

Sincerely

KAREN.

COMMENT OF CHRISTINE STRALEY

Date Submitted: Friday, May 18, 2012, 11:35 a.m.

City, State: Denver, CO

Occupation: Nutritionist

Comment: Please remove Monsanto affiliates and other big ag business from government positions. Please put the American people's health and vitality first not the almighty dollar.

COMMENT OF SALLY STRAND

Date Submitted: Friday, May 18, 2012, 12:34 p.m.

City, State: Aurora, IL

Occupation: Holistic Health Counselor

Comment: I work with people to improve their health, and one of my most powerful tools is food. And the quality of our food is being depleted by Big Ag, please support these aspects of the farm bill (I hope I've stated that correctly). By continuing to support factory farming, and not the smaller farmers, you are also supporting the growing number of health problems that seems to stem from "cheap" low-quality food, that will cost us all much more in the long run.

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you for your service.

SALLY STRAND.

COMMENT OF LINDA STRANGIO

Date Submitted: Friday, May 18, 2012, 3:32 p.m.

City, State: Glens Falls, NY

Occupation: Retired Homeowner/Gardener

Comment: Food is so very important. I am very concerned that GMO foods have taken over agriculture. It is devastating and will forever alter our world in a negative way, if it has not already become too late. I implore my representatives to see the light on this subject for the future generations of our nation and the world.

COMMENT OF LINDSAY M. STRAUB VORSE

Date Submitted: Tuesday, May 15, 2012, 6:33 p.m.

City, State: Roseburg, OR

Occupation: Unemployed

Comment: Please support those who struggle with food security by supporting the continued funding to SNAP and other food programs. Vote against cutting the food stamps that many families need. Thank you for your time.

LINDSAY M. STRAUB VORSE.

COMMENT OF DIANE STREDNY

Date Submitted: Friday, May 18, 2012, 10:51 p.m.

City, State: Albany, NY

Occupation: Registered Nurse

Comment: I teach my healthcare clients to eat only organic foods. I grew up on a farm and know we need to help organic farmers. Please support organic farming efforts.

COMMENT OF JAN STREITBURGER

Date Submitted: Friday, May 18, 2012, 12:28 p.m.

City, State: Arlington, MA

Occupation: Graphic Designer/Art Director

Comment: I want purity of vegetables and fruits, no GMO's present, and if they are the public needs to know. Just label it and folks can decide if that's what they want to consume. Fair practice with farmers and consumers is all I'm asking. Thank you!

COMMENT OF ANDREA STRLE

Date Submitted: Friday, May 18, 2012, 3:20 p.m.

City, State: Lewis Center, OH

Occupation: Mom, Writer/Editor, Fitness Instructor

Comment: Please considering forbidding genetically modified foods until research has proven with certainty there are no health benefits. Consider supporting and subsidizing organic farming methods. Please forbid the maltreatment of animals. Please require processors to identify what is in their food whether it was raised with chemicals and hormones and where it came from. Please support the local farmer. Please scrutinize the activities of factory farmers who do not always have the health of consumers in mind but rather the bottom line. Make good responsible organic farming affordable.

COMMENT OF AMANDA STROMBOM

Date Submitted: Friday, May 11, 2012, 2:33 p.m.

City, State: Issaquah, WA

Occupation: Nonprofit Manager

Comment: The most important change is to stop subsidizing foods which make us unhealthy and contribute to the huge obesity problem—especially meat, dairy, and corn and soybeans which are mostly used to feed animals. Corn is also a big problem—because it is so cheap, it is used to make all kinds of artificial food products including corn syrup. Removing these subsidies would at least level the playing field and make unhealthy foods cost a more realistic price. Farm subsidies, if any, should be focused only on healthy fruits and vegetables.

COMMENT OF CHRISTINA STROTHER

Date Submitted: Sunday, May 20, 2012, 1:23 a.m.

City, State: Manteno, IL

Occupation: Social Worker

Comment: We need to support the local farmers! Take the big business out of our food. Clean up the farmed food from harmful pesticides and **Stop** factory farming. Pay fair, livable wages to migrant farm workers.

COMMENT OF FRIEDA STUBBE

Date Submitted: Saturday, April 28, 2012, 9:40 a.m.

City, State: Guaynabo, PR

Occupation: Singer

Comment: If we do not prioritize, if we lose sight of what being **Human** is, if we cannot empathize, not even with our own, we are not worthy of being called Americans! **Let's Feed Our Hungry First!**

FRIEDA STUBBE, PR.

COMMENT OF MELISSA STUCKEY

Date Submitted: Friday, May 18, 2012, 11:47 a.m.

City, State: Lancaster, PA

Occupation: Medical Lab Scientist

Comment: Choosing what I eat is important and having safe, healthy, sustainable options available is to the benefit of all citizens. As someone who has access to the locally grown Amish crops and a large farmers market, I appreciate knowing where my food comes from, that it is produced by small local farmers, that they are organic and not genetically manufactured, and that I can trust it to be eaten. Everyone deserves the chance to eat fresh foods that aren't modified or covered in harmful pesticides. I wish people in congress and government would put the concerns and

health of their constituents over the lure of big money from agricultural firms and lobbyists. Please consider the health and **Future** of Americans, our farmers, and our future. We just want to be healthy and keep harmful chemicals out of our bodies and keep corruption out of the agricultural business. Thank you.

COMMENT OF JASON STURDEVANT

Date Submitted: Friday, May 11, 2012, 10:37 a.m.

City, State: Raleigh, NC

Occupation: College Professor

Comment: I urge you to consider the following elements in crafting a farm bill:

First, we need a bill that encourages the growth of sustainable, local agriculture. While we owe a great deal to large-scale agriculture, this needs balance with support of small-scale farmers that can produce local, nutritious vegetables and fruit, relying upon sustainable growing practices (such as those encouraged by USDA Organic certification).

Second, we need a farm bill that protects our natural resources. Our forests and prairies, lakes and rivers, and everything in between deserve to be protected, not only for the ecological benefits that extend beyond those ecosystems, but also for the enjoyment and benefit of future generations.

Third (and last), we need a farm bill that supports investment in the next generation of farmers and producers. Encouraging young people to enter a career of tending to some of our most precious resources, our land and our food, should be an utmost priority. Such encouragement should not, however, come at the expense of the two concerns above!

Thank you for your commitment to providing a farm bill that will help both our farmers and the rest of us, now and in the future.

COMMENT OF JORDAN STURM

Date Submitted: Friday, May 18, 2012, 9:28 a.m.

City, State: Hilton Head Island, SC

Occupation: Worship Leader

Comment: This is so important! Please cut back on corn funding; level the playing field. Help to make healthy fruits and vegetables competitive price-wise with the junk food made from cheap corn and corn syrup, *etc.* You can help with our obesity and diabetes problem a lot with this legislation!

Thank you,

JORDAN STURM.

COMMENT OF KATHLEEN STYRCULA

Date Submitted: Sunday, May 20, 2012, 12:40 p.m.

City, State: Tucson, AZ

Occupation: Retail General Manager

Comment: Quality nutrition will build strong Americans. Back to basics always works.

Less Agri-Company interests is truly good for America. Grow Local, Eat Local should be the norm not a radical idea. You will also grow local economies and put people to work through local sustainable family owned small business farming all across this great nation. Why not? It's better for everyone. We must do what is better for the majority not the minority. Today can be a new day if you choose it.

COMMENT OF SUZANNE SUDDUTH

Date Submitted: Friday, May 18, 2012, 3:06 p.m.

City, State: Dallas, TX

Occupation: Accountant

Comment: Please reform our food supply now. Big Agra now rules our food supply. We must stop this! Write a **Law** that GMO foods **Must** be labeled. As a consumer I demand to know what I am feeding my children, I want to make an informed decision. Thank You.

SUBMITTED LETTER BY MIKE SUEVER, SENIOR VICE PRESIDENT OF R&D,
ENGINEERING AND MILK PROCUREMENT, HP HOOD LLC

March 8, 2012

Hon. WILLIAM L. OWENS,

U.S. House of Representatives,
Washington, D.C.

Dear Congressman Owens,

Thank you for the opportunity to submit this statement for the record at the House Committee on Agriculture's field hearing in Saranac Lake, New York on Friday, March 9, 2012.

HP Hood LLC is a family owned business which operates five dairy plants in the State of New York and procures milk from several hundred New York dairy farmers who supply those operations through dairy cooperatives. Hood operates another eight dairy operations within the Northeast and Mid-Atlantic region. Today the company employs approximately 3,000 people (more than 800 in the State of New York).

Our business is directly regulated by the United States Department of Agriculture, with programs that were initiated during the Great Depression. Today, this 75 year old system of milk price regulations keeps our fluid milk products priced higher than all other dairy products, not because of consumer demand, but because of government set pricing formulas. The system is called "Federal Milk Marketing Orders."

Dairy farmers and fluid milk processors cannot use risk management tools like the futures market due to an anomaly in the fluid milk pricing system under the Federal Milk Marketing Order program. Other agricultural commodities, even other dairy items, can go to the Chicago Mercantile Exchange and hedge the cost of their products. **A simple amendment to the existing Federal Milk Marketing Order pricing system could correct this injustice.**

For example, when a restaurant chain is preparing its menu, it can (if it chooses to) lock-in the cost of almost every item on the menu and feel confident when setting menu prices. The restaurant has the ability to set menu prices for all other dairy products excluding fluid milk. We continue to see restaurant chains drop nutritious fluid milk items from their menus because they can't be sure the price listed in their menu will allow them to even cover their cost. Furthermore, fluid milk sales continue to decline (between 2-3% just this past year alone) within the Northeast.

Second, it is our understanding that the House Agriculture Committee may consider Rep. Collin Peterson's (D-MN) bill, H.R. 3062, that includes the "Dairy Market Stabilization Program" (DMSP), and we respectfully ask that you oppose it.

The DMSP will be a gross and unnecessary intrusion of government into dairy markets. It will decrease milk supply by periodically requiring HP Hood to reduce milk payments to our suppliers and submit the difference of those payments to USDA. The DMSP would also impose a new, complex, and costly regulatory burden on dairy manufacturers. In order to withhold payments from dairy farmers, our company will need to track which farmers are participating in the program. We will no doubt be subjected to periodic audits and reviews to assure that we are following the letter of this new program.

In closing, we urge you to support an amendment to the Federal Order provision commonly referred to as the "higher of cost setting" to eliminate the anomaly that exists in the fluid milk pricing system today. Second, we urge you to oppose the Dairy Market Stabilization Program or any similar programs, and instead support safety net programs for dairy farmers that do not interfere in the marketplace or directly regulate our business.

Thank you for your time and consideration.

Best regards,

MIKE SUEVER,
Senior Vice President of R&D, Engineering and Milk Procurement,
HP Hood LLC.

COMMENT OF LOR SUGARMAN

Date Submitted: Friday, May 18, 2012, 12:06 p.m.

City, State: Naples, FL

Occupation: Fiscal Technician

Comment: I am in Connie Mack's district, and I want him to represent the great majority of his constituents in labeling food with GMO status before it's too late. I promise that I will not vote for him again unless he takes that step!

COMMENT OF LAURA SUGARWALA

Date Submitted: Tuesday, May 15, 2012, 8:22 a.m.
City, State: Rochester, NY
Occupation: Food Bank Nutrition Resource Manager
Comment: As part of the emergency food network, working everyday with people who are just trying to make ends meet, I oppose cuts to SNAP and all nutrition programs.

COMMENT OF GRETCHEN SUKOW

Date Submitted: Friday, May 18, 2012, 2:08 p.m.
City, State: Lexington, VA
Occupation: Preschool Teacher
Comment: I want a farm bill that supports family farms, environmentally sound farming practices, and safe food for my family. I do not want to put more tax free dollars in the pockets of huge agribusinesses which do none of this!

COMMENT OF B. SULLIVAN

Date Submitted: Friday, May 18, 2012, 3:11 p.m.
City, State: Louisville, CO
Occupation: Self-Employed
Comment: Farming should not be big business. It should be local, fair and humane. Organic and additive free meat, dairy and produce should be the norm. I want the right to raw dairy and to honest food labeling that lets me know every single ingredient in my food and whether or not it's GMO. Big Agra stinks and I don't want them in my elected officials' back pockets. Thank you.

COMMENT OF CAROL SULLIVAN

Date Submitted: Wednesday, March 21, 2012, 1:36 p.m.
City, State: Lackawaxen, PA
Occupation: Nonprofit
Comment: Please incorporate S. 1640, the Federal Milk Marketing Improvement Act, sponsored by Senator Casey (D-PA), into the farm bill. Dairy farmers need to have their cost of production covered. We are losing too many dairy farmers, and the rural way of life and the rural economy is suffering. Please help the dairy farmers by eliminating property taxes on dairy farms with less than 200 cows.

COMMENT OF COLLEEN SULLIVAN

Date Submitted: Friday, May 18, 2012, 6:44 p.m.
City, State: Santa Cruz, CA
Occupation: Education
Comment: Sustainable farming and food production is one of the most important issues facing our country today. It impacts our health, our environment and our economy. Please show leadership in the world by supporting healthy, sustainable farming practices in opposition to farming practices dictated by agribusiness with deep pockets.

COMMENT OF DR. PATRICK SULLIVAN

Date Submitted: Friday, May 18, 2012, 9:15 a.m.
City, State: Chapel Hill, NC
Occupation: Professor of Medicine, Duke University
Comment: Subsidies for corn based products need to be significantly reduced. Support for locally grown fruits and vegetables need to increase substantially. If we don't change our food/farm policy our health care costs will place an unsustainable burden on the economic health of our country.

COMMENT OF EILEEN SULLIVAN

Date Submitted: Friday, May 18, 2012, 2:59 p.m.
City, State: Charlotte, NC
Occupation: Self-Employed
Comment: U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of our citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists. I

support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). I ask that you fully fund conservation programs, such as the Conservation Stewardship Program, and make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. I also support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), and I ask that you maintain the EQIP Organic Initiative. All of these items are vitally important to me and my family. My family buys locally whenever possible, and we only eat organic food. It's a big expense, but I have two young adult daughters and I don't want my future grandchildren to be negatively affected by pesticides, GMOs and poor nutrition. I also want to be a good steward of our resources and insure clean air, clean water, and a healthy environment for my children and grandchildren.

COMMENT OF ELAINE SULLIVAN

Date Submitted: Friday, May 18, 2012, 12:41 p.m.

City, State: Sharon, MA

Occupation: Nurse Educator

Comment: Its time we take our farms and food production seriously in terms of the health of the nation. We need to support the small farmers and not force them out of jobs and their land, make it possible for them to sell their products and make a living.

COMMENT OF TERRY SULLIVAN

Date Submitted: Friday, May 18, 2012, 1:56 p.m.

City, State: Vashon, WA

Producer/Non-producer: Producer

Type: Poultry/poultry products

Size: Less than 50 acres

Comment: We are a very small producer. We feel that the future will best be served by small local producers rather than large fossil fuel dependent producers far from their markets. To continue to put "all our eggs in one basket" is a foolhardy strategy. If you really believe in people being accountable for themselves, taking care of themselves, then you would encourage them to do that by continuing to nurture small farmers.

COMMENT OF THOMAS SULLIVAN

Date Submitted: Friday, May 18, 2012, 4:07 p.m.

City, State: Turners Falls, MA

Occupation: Landscape Designer

Comment: Please help us revive our local economies and preserve soils and bee habitat by favoring small scale farmers and their local markets. Also, please be sure to include hefty funding for native bee monitoring and support for farmers to increase pollinator habitat on the edges of their fields and around their farms. Help us revive our lives and lessen the dominance of corporate control of agriculture and free our markets to increase the stocks of healthy foods by supporting new farmers and farmers markets. The health of our nation depends on it.

Thanks so much,

TOM

COMMENT OF ROBERT SULLIVAN, M.D.

Date Submitted: Friday, May 18, 2012, 6:48 p.m.

City, State: Sacramento, CA

Occupation: Medical Doctor

Comment: I oppose most of the subsidies handed over to Big Ag and the Energy Industry. I'm embarrassed and angered by the corruption this strongly suggests. These are fat cats, not struggling farmers. The latter don't have the time and money to hire lobbyists, etc.

COMMENT OF ROBERT SUMMERFELT

Date Submitted: Thursday, May 17, 2012, 8:07 p.m.

City, State: Ames, IA

Occupation: Retired

Comment: Please do not cut funding for conservation programs in the 2012 farm bill. The farm bill should have a substantial component for protection of soil, preventing water pollution, and maintaining healthy environments for wildlife. After all, most taxpayers are non-producers and deserve benefits from their taxes that go to paying for the benefits to producers.

COMMENT OF DAKOTA SUMMERS

Date Submitted: Friday, May 18, 2012, 4:54 p.m.

City, State: Summertown, TN

Occupation: Life Coach

Comment: Senators and Representatives, Please enact a farm bill that will provide:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

We need to keep tax money and land in the hands of private citizen farmers and small farm businesses that are investing their lives and energies in keeping the land healthy and providing quality, fresh, local farm products to our food stream. Please do your job by representing voter citizens rather than large corporations. Many of us are beginning to read the fine print and watch your job performance.

COMMENT OF JENNIFER SUMNER

Date Submitted: Saturday, May 19, 2012, 11:52 a.m.

City, State: Sutton, MA

Occupation: Stay-at-Home Mother, Former Software Engineer

Comment: It is critical that we financially and politically support full cycle, healthy, sustainable food production in this country. There is no argument that the current mass-produced agriculture is not only polluting, but it isn't sustainable. We are destroying the very soil we need and pumping non-organic fertilizers into it is not the right answer. Is sustainable food production more expensive, yes, but that is where the subsidies should go. We know we need to alter the "American" diet of burgers, soda and fries, yet where does the majority of subsidies go, corn and soy, which are then overly processed into HCFS and oils and grain which is then converted into feed for the cattle farms, which are extremely polluting. All of this is done in the name of "cheap" food. Great chips are cheap, but they are only cheap in nutrition and dollars to buy, they are costly in the later diseases (diabetes and heart diseases specifically) and pollution. This cycle isn't working. Go back to the research that George Washington did to make Mount Vernon self-sufficient so they wouldn't have to buy from England. Rotating crops, natural fertilizers, soil restoration. That is where the support in the farm bill should go.

COMMENT OF JUNIPER SUNDANCE

Date Submitted: Sunday, May 20, 2012, 10:31 a.m.

City, State: Abrams, WI

Occupation: In-home Health Care

Comment: I am a constituent of Rep Ribble.

I believe America needs a farm bill that drives innovation for tomorrow's farmers and food entrepreneurs—fund the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding.

I believe America needs a farm bill that makes healthy food widely available to all Americans—including schoolchildren! We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.

I believe America needs a farm bill that protects our natural resources—protect the Conservation Stewardship Program from unfair funding cuts, and improve it by ranking applications solely on their conservation benefits. Farmers count on CSP and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife—all while farming profitably.

I believe America needs a farm bill that invests in the next generation of farmers and ranchers—guarantee \$25 million per year in mandatory funding for the Beginning Farmer and Rancher Development Program. We need a national strategy and commitment to support beginning farmer and ranchers entering agriculture. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new agriculture start-ups.

I believe America needs a farm bill that creates jobs and spurs economic growth but not at the expense of our environment and health. I oppose subsidies for tobacco. I oppose subsidies for multinational corporations who remove profits from the local area. I support programs like the Value-Added Producer Grants Program by guaranteeing \$30 million of mandatory funding per year. VAPG provides seed money to help farmers innovate in agriculture and create jobs while securing a sustainable path to market-based farm profitability.

COMMENT OF CINDY SUNDELL-GUY

Date Submitted: Friday, May 18, 2012, 12:07 p.m.

City, State: Wichita, KS

Occupation: Zija Distributor and Realtor

Comment: We are coming to a time of food crisis. Help protect our food supply and health by making fruits and vegetables more affordable and keeping our food non-genetically modified. They are already beginning to ruin our health and that of the animals we eat.

COMMENT OF VIOLET SUNDERLAND

Date Submitted: Friday, May 18, 2012, 7:24 p.m.

City, State: Dallas, OR

Occupation: Homemaker/Retired

Comment: One by one, our states are going to take Monsanto and other GMO producers down before their pesticides kill all the bees which will bring on worldwide hunger. You need to get their lobbyists out of the equation and start listening to we, the people.

COMMENT OF JUDY SUPLEE

Date Submitted: Friday, May 18, 2012, 1:00 p.m.

City, State: Tallahassee, FL

Occupation: Paralegal

Comment: As someone who eats healthy, please don't let the big Ag farmers dictate how you write the farm bill. Support organic farming and the small and local farmers. I am deeply disturbed about the food that people are consuming, contributing to illness/sickness.

COMMENT OF TERRI SUPOWITZ

Date Submitted: Sunday, May 20, 2012, 11:13 a.m.

City, State: Pittsburgh, PA

Occupation: Teacher

Comment: My biggest concern is the GM crops. Monsanto cannot be allowed to run the agriculture in the USA. Monsanto needs to be told **No**. Farmers should be allowed to get seeds from their crops and not have to buy new ones every year. We need more diversity with fruits & vegetables not less. The more diverse the less likely the crop will be loss. No more farms that only grow one crop—not good for anyone. Tell farmers to use less pesticides and fertilizers & more natural organic choices.

COMMENT OF KNOSE SUSAN

Date Submitted: Sunday, May 20, 2012, 2:52 p.m.

City, State: Indianapolis, IN

Occupation: Acquisition

Comment: I support subsidizing organic and grass-fed, pasture-raised farming and meat and dairy production. Not only would I support eliminating **All** subsidies for the production of genetically modified crops or livestock, I in fact support legislation **Banning All** genetically modified organisms from U.S. agriculture. My health has improved dramatically after switching from CAFO meat, which is all that is available in U.S. groceries, to pasture-raised meat and dairy and organic produce. Please feel free to contact me for further information.

COMMENT OF NANCY SUTER

Date Submitted: Friday, May 18, 2012, 11:41 a.m.

City, State: Sequim, WA

Occupation: Retired

Comment: We have a Congress in this country to represent the people who vote them into office . . . **Not** the lobbyists and big corporate mongrels and their greed. It would be a blessing if Congress would remember this!

COMMENT OF BEVERLEY SUTTON

Date Submitted: Saturday, May 19, 2012, 10:18 a.m.

City, State: Tucson, AZ

Occupation: Teacher

Comment: Can we please support actual farmers and not giant mega-corporations? I would like to see funding go toward those producing healthy food with no (or at least significantly fewer) pesticides, herbicides, and fungicides. Also to those hiring farm workers who get a decent wage and health benefits.

COMMENT OF CHELSEA SUTTON

Date Submitted: Friday, May 18, 2012, 10:29 a.m.

City, State: Indianapolis, IN

Occupation: Freelance Editor, Graduate Student

Comment: Remember that Monsanto and other giant agri-corps does not have the U.S. citizens' best interests at heart. All they are interested in is profit—profit that never seems to trickle down to the people who need it most. If there is anything that this House can do, this Congress can do, it is to pass a farm bill that is fair and clean. For once in this session be the stand-up men and women that you ran as in your campaigns.

Specifically:

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;
- Provide an even “plowing” field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don't: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

COMMENT OF ELLYN SUTTON

Date Submitted: Saturday, May 19, 2012, 3:36 a.m.

City, State: Spokane, WA

Occupation: Teacher

Comment: Do not use genetically modified products. Recent studies have shown that we are becoming human pesticide factories and that our health is being deeply endangered.

COMMENT OF JANET SVIRSKY, PH.D.

Date Submitted: Friday, May 18, 2012, 1:45 p.m.

City, State: Potomac, MD

Occupation: Teacher/Artist/Mom

Comment: As someone with a Ph.D. in Math and work in biochemistry before changing careers to be a parent, I have been following the science and paying attention to the economics. Agribusiness as a purveyor of monoculture and genetically

based pesticide use is unsustainable, as evidenced by the request to use more dangerous pesticides as resistance builds to their current products, and biodiversity declines, jeopardizing ecosystems and putting future food production at risk. Companies like Monsanto and Nausea know the impact of their products as do other parts of the world, so once again, the future of people is being bought and political expediency appears to be winning yet again. Please take a stand for people, good science, and our future as a country and a species!

COMMENT OF LIN SVITKO

Date Submitted: Saturday, May 19, 2012, 12:55 p.m.

City, State: Whiting, IN

Occupation: Legal Secretary

Comment: Senator Lugar lost his position in the senate because he is out of touch with the current will of the people, who are now much more informed and less willing to put up with abuses by big business and big agriculture. I urge you to re-evaluate your position as well if you are not inclined to support a more progressive farm bill that benefits the people and farmers more than the big interests of the corporate monster before it's too late. Our food supply is systematically being poisoned by corporations who only have their profit margins at heart. This is changing fast. Please be on board to support what will be for the greater good of the human beings who live in this country and produce the healthy food we need.

COMMENT OF EDWARD SWAIN

Date Submitted: Monday, May 07, 2012, 6:40 p.m.

City, State: Waldorf, MD

Occupation: Retired Government and Wal-Mart Employee

Comment: I volunteer at Community Support Systems, Brandywine, MD, and we have 30 food pantries. One in Accokeek at my church and one is Baden. On the third Tuesday of every month we give out free food at Gwyen Park H.S. in Brandywine, MD. On a bitter cold day in November over 400 families came out for free food. At Accokeek we average about 4 families a week coming in needing emergency food. At Baden it's almost double that. Baden food pantry get government commodity food and without it we could not serve the 100 or so families that come on Wednesdays and Fridays. Please do not cut the farm bill. Due to the last cuts that were made to the SNAP Program one of our clients went from \$170 in food stamps down to \$60. He is disabled senior citizen. He depends on us for additional food and medical supplies.

COMMENT OF ELAINE SWANSON

Date Submitted: Thursday, May 17, 2012, 10:57 p.m.

City, State: Pickett, WI

Occupation: Natural Landscape Designer

Comment: I would like to see the huge factory farms abolished. Give incentives and economic support to farming that is organic, demonstrates respect and care for this planet, fosters small farms where families can live in close connection to the Earth. The farm bill should rigorously support humane methods of raising animals for human consumption. Exceptional people like Temple Grandin should be solicited when drafting policy on how animals are treated from birth to slaughter. Our farm bill should put the protection of our natural resources at the top of the priority list. Finite resources need to be protected from wastefulness and excess consumption.

COMMENT OF JOE SWANSON

Date Submitted: Friday, May 18, 2012, 3:23 p.m.

City, State: La Farge, WI

Producer/Non-producer: Producer

Type: Livestock

Size: 50-150 acres

Comment: Everyone is concerned with our national safety but little attention is given to the food security issues that are becoming more dangerous daily. The old saying putting all our eggs in one basket should resonate with the corporate farming community as they are presently the only ones with a basket. Given the probability of climate change and erratic weather, droughts, floods, *etc.* diversification is the only course of action that makes sense. Turning forty percent of a food source into fuel is not only holding consumers hostage but is setting a precedent to con-

tinue to specialize which in turn leads to fewer producers who are going to control the food sources for future generations.

COMMENT OF ELIZABETH SWARTHOUT

Date Submitted: Sunday, May 20, 2012, 2:45 a.m.

City, State: Richmond, CA

Occupation: Music Teacher

Comment: Please ignore the food industry and help the average citizen find the healthiest food choices by supporting the organic food production and removing farm subsidies that are from another era.

COMMENT OF MARGARET SWEARINGEN

Date Submitted: Thursday, March 29, 2012, 4:35 p.m.

City, State: Pike Road, AL

Producer/Non-producer: Producer

Type: Field Crops

Size: 1,000+ acres

Comment: We are a large farming operation—growing cotton, corn and soybeans—This farm has been in the family since 1900's—I am a widow—whose husband was raised on this farm. He is deceased and we have 2 children and their families also live here. My concern—they be able to continue to farm and our grandchildren. Do away with the Family Farm Estate taxes. Martha Roby is doing a superlative job of representing her district here in AL. I only wish Mike Rogers would do the same/we are barely in his district and I truly stay concerned.

Thank you,

MARGARET SWEARINGEN.

COMMENT OF SHELLY SWEENEY

City, State: San Antonio, TX

Occupation: Paralegal

Comment: We must do something for our American farmers. They all seem to be under the thumb of Monsanto. This amazes me, that in America, this can happen. It pits farmer against farmer. We need our American farmers to farm & not be scared of huge corporations.

COMMENT OF PETER SWEENEY

Date Submitted: Wednesday, May 09, 2012, 8:00 p.m.

City, State: Pleasantville, NY

Occupation: Real Estate Sales

Comment: I want to be sure that you understand how vital and important SNAP, TEFAP, and CSFP are to older Americans and they must be protected. Support and strengthen programs that put food on the table for hungry Americans! Subsidies for profitable industries should be cut well before food assistance. People's lives and security should come before unfairly subsidized profits for private companies. Wake up and see the hungry people.

COMMENT OF JANICE SWEGAN

Date Submitted: Friday, May 18, 2012, 2:33 p.m.

City, State: Garrettsville, OH

Occupation: Homeschooling Mom

Comment: Please help in any way possible to support small family farms using permaculture, organic, and localized farming methods for growing, producing and distributing of untampered with seeds, soil, and produce to become more commonplace, supported and profitable. We need to ensure a strong food base through diversity and integrity in food production. I'm pretty sure that you support this, but sending out my thoughts nevertheless. Thanks for your time and work on this and other issues important to our transformation to healthier citizens and families.

COMMENT OF JANE SWICEGOOD

Date Submitted: Wednesday, May 09, 2012, 7:32 p.m.

City, State: Tucson, AZ

Occupation: Retired Agricultural Journalist

Comment: As a retiree who majored in agriculture at the U of AZ, I am more interested than most people in feeding the hungry in our rich country. I ask that the poor and needy not be forgotten and that our government passes legislation to provide food programs necessary to sustain our population.

COMMENT OF LAWRENCE SWIDLER

Date Submitted: Friday, May 18, 2012, 12:44 p.m.

City, State: Accra, NY

Occupation: Business Manager

Comment: Hello . . . as a senior, I've watched our country come more and more under the control of agribusiness; and seen practices and decisions that are short-sighted. The time is now to examine all practices in terms of the best interests of our people, ahead of best profits for Monsanto and others. Could you possibly be comfortable seeing your grandchildren eating food containing known toxins? I'm not. Please widen your perspectives!

COMMENT OF JOAN SWIFT

Date Submitted: Friday, May 18, 2012, 2:24 p.m.

City, State: Eugene, OR

Occupation: Retired

Comment: Taking care of the soil through organic methods and taking care the seeds in non-GMO ways will foster our truly sustainable and economical health and well-being.

COMMENT OF SHEILA SWINFORD

Date Submitted: Saturday, May 19, 2012, 8:54 a.m.

City, State: Toledo, OR

Producer/Non-producer: Producer

Type: Forestry, Livestock, Poultry/poultry products

Size: Less than 50 acres

Comment: The U.S. government needs to support owner operated local sustainable organic farm operations. The current direction and level of taxpayer support of corporate agriculture and unsustainable practice does not bode well for the future of our people. Toxic farming is harming our people and devastating our environment.

Thank you for your work in assessing the situation and implementing new directions for our agricultural support.

COMMENT OF SHARON SWITZER

Date Submitted: Saturday, May 19, 2012, 1:38 p.m.

City, State: Boulder, CO

Occupation: Physical Therapist

Comment: Everyone needs to eat. I choose to eat only healthy, organic foods. Food production should be clean, safe and produce food that everyone would be proud to eat or serve. Subsidizing the oil industry is unnecessary and wasteful. Food is a different matter. Think before you act.

COMMENT OF CAROL SWORD

Date Submitted: Saturday, May 19, 2012, 7:52 p.m.

City, State: Pt. Townsend, WA

Occupation: Librarian

Comment: Respectfully,

Three of my immediate family members lost their small dairy farms in the 1980's from being unable to compete with agribusiness. It's time we stopped subsidizing **Any** corporate farming. Whatever happened to self sufficiency and the American way? Provide grants to local small farms and decrease the carbon waste of agricultural transport.

Thank you,

CAROL SWORD.

COMMENT OF EMILY SYTSMA

Date Submitted: Friday, May 18, 2012, 12:34 p.m.

City, State: Viroqua, WI

Occupation: Artist

Comment: Please consider more support for **Sustainable Organic** farming! I am a cancer survivor & do not want to expose myself to all of the chemicals/pesticides/herbicides found in “traditionally farmed” crops. I also **Do Not** want to consume genetically modified organisms—please require labeling so we know what we are consuming. I try to buy local/sustainable/organic food as much as possible for my health & to place a lighter carbon footprint on the planet. These issues are very important to me & my family.

COMMENT OF RENEE SYTWU

Date Submitted: Saturday, May 19, 2012, 1:17 a.m.

City, State: Morristown, NJ

Occupation: Retired

Comment: Encourage sustainable agriculture operation by providing subsidies to farmers/ranchers transition to Organic Plant Farming.

OPF can stop the abuses of chemical fertilizers, pesticides and antibiotics. Thus to restore a healthy environment where can produce nutrient foods to keep Americans healthy.

OPF has the least carbon footprint, is the most efficient way to use the limited resources on Earth.

The safety net of U.S. food security is OPF, not insurance. For more details, <http://www.concernedcitizensnetwork.org/category/take-action/>.

COMMENT OF ANNA SZAMOSI

Date Submitted: Saturday, April 07, 2012, 6:55 p.m.

City, State: Winston-Salem, NC

Occupation: Student

Comment: Please considerably cut agricultural subsidies to American producers in this year's farm bill. I recently took a trip to Nicaragua with the law school I attend and saw the harsh effects of our low costs subsidized food products and DR-CAFTA. We are pushing millions of Latin Americans into poverty by flooding their markets with artificially low priced food, capturing their market, and then subjecting them to the high variability of international markets. Farmers cannot compete with our prices, so they have to sell their land and move into the crowded, dirty streets of Managua or into trash dumps where they are exposed to an unimaginable amount of hazards. Our policies have hurt Nicaraguans and other lesser developed countries for decades. Please consider the global impact of your decisions and promote humanity, not farm lobbies.

COMMENT OF SHANNON SZYMKOWIAK

Date Submitted: Friday, May 18, 2012, 10:00 a.m.

City, State: Duluth, MN

Producer/Non-producer: Producer

Type: Livestock

Size: Less than 50 acres

Comment: I am an urban beekeeper and gardener who supports sustainable and local food security efforts. It is imperative that our farm bill committees do not include those with a solid conflict of interest. Big Ag is driving our farmers out of business and poisoning our food supply. Please support sustainable efforts. Our children depend on us to do the right thing.

COMMENT OF RAYMOND SZYMKOWICZ

Date Submitted: Friday, May 18, 2012, 11:05 p.m.

City, State: Hillsdale, NY

Occupation: Artist

Comment: The health of the people and our country, it's waters and lands, warrant our turn towards agricultural practices and nutritional sources to be of the best quality produce able. I grew up loving Twinkies and all the other crap industrial food providers have been allowed to market. It is time to turn around, admit the error of our ways and provide truly healthy foods. Plus, by restoring our surface waters and lands, we will have all the water needed for our population to thrive.

COMMENT OF PAUL TABILI

Date Submitted: Friday, May 18, 2012, 11:33 p.m.
City, State: Racine, WI
Occupation: Copy Editor
Comment: Promote organic, GMO-free, and small, local family farms. De-emphasize or eliminate large agribusiness conglomerates, pesticides and herbicides, GMOs, and factory farms. We want clean, natural, safe, local, healthy food. Period.

COMMENT OF BENJAMIN TACKETT

Date Submitted: Friday, May 18, 2012, 11:11 a.m.
City, State: Denver, CO
Occupation: Sales
Comment: Current food production subsidies and overall food policy are extremely poorly designed. Demand labeling of GMO foods. Roadmap for transition away from Corn subsidies. Additional support for small, local producers.

COMMENT OF PAULA TACKETT

Date Submitted: Friday, May 18, 2012, 1:41 p.m.
City, State: Santa Fe, NM
Occupation: Retired/Lawyer/Administrator
Comment: Please support agricultural practices that put the health of our citizens over corporate profits. Family farming has been one of the great backbones of this nation. Healthy organic foods are critical and nutrition programs and programs supporting organic and sustainable should be continued. We need a fair and "healthy" farm bill. Thank you.

COMMENT OF JULIETTE TACON

Date Submitted: Friday, April 27, 2012, 3:07 p.m.
City, State: Mobile, AL
Occupation: Caregiver of Senior with Alzheimer's
Comment: Nutrition programs like the Emergency Food Assistance Program (TEFAP), SNAP, the Commodity Supplemental Food Program (CSFP), and WIC work together, in conjunction with local food banks and other local charities, to ensure: Working parents can put food on the table; Children don't have to go to bed hungry; Seniors don't have to choose between filling a prescription and filling their pantries.

When I was younger, I had temporary custody of a friend's child. I was working, taking care of myself and a toddler, paying my bills and in general being a responsible citizen. During that time I used WIC. All the WIC funds went to food. I could not have adequately fed him without the help WIC gave me. I know there are people who abuse this and other such programs. However, I am sure the majority of people use them because they need the help to feed themselves and their children. These programs should be adequately funded and fairly administered. No child should ever go hungry, especially here in the USA

I am a supporter of Feeding America and my local food bank. Despite the recent improvement of the economy, there are still many people who may not know where they will get their next meal. We need a strong farm bill to help put food on the table for vulnerable children, seniors, and low-income families. Please pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. Cutting these programs is not the way to balance the budget. I urge you make them a priority in the next farm bill.

COMMENT OF ELIZAABETH TAKAKJIAN

Date Submitted: Friday, May 18, 2012, 10:08 a.m.
City, State: Port Jefferson, NY
Occupation: Educator
Comment:

- Stop subsidies for large scale production.
- Support organic growers . . . and small scale farmers.
- Stricter sanctions on imported veg/fruit . . . do not accept use of chems that are banned in U.S.
- No GMOs.

COMMENT OF KAI TAKAYAMA

Date Submitted: Friday, May 18, 2012, 2:04 p.m.

City, State: Kaneohe, HI

Occupation: Customer Service

Comment: As a consumer who is very attentive and wary of the foods that I ingest into my body as well as the effects that the foods I consume have on the environment due to production techniques, I would like to see the following things supported in a better farm bill:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.
- Immediately ceasing all crop subsidies from the U.S. government since America is supposed to be a free-market economy and not a socialist state.
- Institute reforms that prevent the revolving door between government and large agro-corporations from influencing the process food goes through from farm to table.

Failure by the government and elected/un-elected officials to provide for the safety and sustainability of our food supply is tantamount to negligent attempted homicide and they should be prosecuted as such.

COMMENT OF VIVIANE TALLMAN

Date Submitted: Saturday, May 19, 2012, 11:01 a.m.

City, State: Nehalem, OR

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: As a small farmer (organic culinary and medicinal herbs), a consumer, a mother and grandmother, and a retired milk producer in Tillamook County, Oregon, I strongly support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

Conservation is a necessary companion to good farming practices. I support full funding for conservation programs, such as the Conservation Stewardship Program. Please ensure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

The Beginning Farmer and Rancher Opportunity Act (H.R. 3236) is crucial to long term health of our farming communities. I support the implementation of all provisions of HR 3236.

And as a small organic farmer, I strongly support Maintaining the EQIP Organic Initiative.

COMMENT OF LISA TAM

Date Submitted: Saturday, May 19, 2012, 9:49 a.m.

City, State: Amarillo, TX

Occupation: Homemaker

Comment: I am writing to express my concern about actions being discussed by our Congress in reference to agriculture. This country needs to have Farm legislation that will support local food production, organic food production and conservation initiatives. Genuine reform needs to be taken in the area of food production. Cutting funding for programs that support that reform, such as organic and sustainable agriculture, nutrition and conservation seems to belie a greater commitment to agribusiness and its lobbies than to the American people and their need for healthy, nutritious food. Vitamin-infused Styrofoam might meet an individual's "nutritional" needs but is not a healthy alternative. The science clearly confirms that quick and cheap production of food does not result in an excellent product. Let's vote for excellence and the health of our nation.

COMMENT OF NICOLE TANATA

Date Submitted: Friday, April 27, 2012, 2:46 p.m.

City, State: Fargo, ND
Occupation: Domestic Engineer/Chief Grocery Buyer
Comment: With the cost of food going up . . . especially now with the oil boom . . . this cannot just go away. Not sure what the solution is but economy is slowly getting better but the price to feed people isn't.

COMMENT OF SCOTT TANKERSLEY

Date Submitted: Friday, May 18, 2012, 2:09 p.m.
City, State: Richmond, VA
Occupation: Software Engineer
Comment: Agricultural policy must represent citizens, not lobbyists. Giant monopolistic big-ag corporations do not need assistance or subsidies of taxpayer money, but instead must be regulated. GMO products must be labeled to put consumers in control of their food choices. They should only be approved based on real third-party unbiased and extensive scientific study. Any tax payer funded assistance should go toward the support of small, sustainable, and organic farms.

COMMENT OF CHRISTINA TANT

Date Submitted: Friday, May 18, 2012, 10:35 a.m.
City, State: Charleston, SC
Occupation: Yoga Teacher
Comment: Farms should be able to function without the fear of Monsanto & other GMO crops contaminating and leading to legal litigation from the "owners" of cross seed pollination.
 Subsidies should only be in favor of diversity in crops, and availability of healthy food to the public. I only buy organic and the toxicity of chemicals, and dead soil is a huge international problem. We must build healthy soil to build a healthy planet.

COMMENT OF YVETTE TAPP

Date Submitted: Friday, May 18, 2012, 2:27 p.m.
City, State: Santa Fe, NM
Occupation: Film Office Manager
Comment: I am a vegan for 30 years, and I do my best to find organic foods to purchase for myself and my son. It is unethical to allow Monsanto, Bayer, et al to label GMO and pesticide infused plant foods as "Natural", as this is clearly misleading to the consumer. We must restore respect for Nature and grow organic crops, stop eating sentient beings, stop polluting, wasting water and grains, return stolen lands to indigenous Buffalo, wolf, prairie dog, people. We need an end now to subsidizing the cattle ranchers and big polluters, allowing tax loopholes for the wealthiest and the corporations, ban Monsanto, Bayer Neonicotinoids, and bring indigenous wisdom into the school system. Greed has taken over where sacred once prevailed, and this must be reversed immediately. Nature has balanced Life quite well, and human beings must realize that interfering with Nature while revering money is taking all Life and Planet Earth into a downward spiral. Human health in body, mind and spirit depends upon the organic vegan diet, honesty, and generosity.

COMMENT OF MARGARET TARBOX

Date Submitted: Friday, May 18, 2012, 5:13 p.m.
City, State: Boxford, MA
Occupation: Retired
Comment: Hello Members of the House Committee on Agriculture,
 Please give us a bill that will allow for a fair chance for organic farms large or small.
 I am a member of a small Garden Club organization NGC. We would greatly appreciate your help.
 Thank you,
 MARGARET E. TARBOX.

COMMENT OF BIANCA TARLTON

Date Submitted: Friday, May 18, 2012, 9:42 p.m.
City, State: Midlothian, VA

Occupation: Teacher

Comment: Dear Members of the House,

I implore you to please listen to your citizens and change America's food system. Frankly, I am irritated by the fact that most of you listen to big agricultural companies that put money in your campaign pockets more than the people who vote you in office. I work hard for my money, and I do not appreciate my tax dollars being spent subsidizing "Big Ag." I have 3 children, and I have taught many more over my teaching career, and I want them to actually be able to live in a world that produces real food that is produced using sustainable methods without chemicals and/or hormones. The current farm bill makes it difficult for this to ever be possible. Many of us Americans believe in eating real food, and if it's not real, we have the right to know it before we buy it. If all of us don't speak up, it is only out of ignorance—since our government does not require labeling of GMOs and the like, many people are oblivious to what they are eating. This is definitely not a coincidence. It definitely benefits "Big Ag" when no one knows what they are eating. If all of our food was produced using sustainable and organic methods, there would be no need to label anything. Please listen to the people you represent and support smaller farms who do produce their food in this manner. The following is what I request of you:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you,

BIANCA TARLTON.

COMMENT OF BARBARA TARTAGLIA

Date Submitted: Friday, May 18, 2012, 7:43 p.m.

City, State: Brick, NJ

Occupation: Business Owner

Comment: Please help and support the smaller farms and organic farms so they can continue their business to grow fruits, vegetables and raise beef, chicken and produce eggs, milk, cheese, *etc.* There are so many people that choose to or need to eat organic foods for their health. To get into the studies of how pesticides and chemically altered foods are affecting our health in this small space would take up too much time and space but they are fact and the results are astounding.

COMMENT OF BONNIE TARTTIER

Date Submitted: Friday, May 18, 2012, 12:00 p.m.

City, State: Germantown, NY

Occupation: Nutritionist

Comment: It is an urgent matter before us as a nation. When big agricultural "farming dictates to the small farmer and small farmers are harassed by the agents of the FDA, then we are in big trouble. I urge you to vote for the small farmers, the organic farmers, those who are concerned about the health of the soil and the People of this nation. Do not be so blind as to think that big ag is doing anything in the best interest of the People.

Best regards,

BONNIE TARTTIER

COMMENT OF BEVERLY TATE

City, State: Kapolei, HI

Occupation: Student

Comment: Stop GMO's! Promote organic farming practices! Stop pesticide poisoning of America! Stop companies like Monsanto! Stop patents on seeds! If you feed America healthy food at a reasonable price health care reform will be much easier as less people will be sick!

COMMENT OF MELINDRIA TAVOULARIS

Date Submitted: Friday, May 18, 2012, 5:43 p.m.

City, State: Lincoln, ME

Occupation: Fine Artist

Comment: It is tantamount to the health and well being of Americans that all the provisions of the Local Foods, Farms and Jobs Act be endorsed. I believe strongly in the EQIP Organic Initiative, and the Beginner Farmer and Rancher Opportunity Act. The Conservation Stewardship Program to preserve the health of the land we farm is essential to our future. Please do not be swayed by the pressures imposed on our government by the giant corporations in the agricultural field. They are basically focusing on their profits in the field of agriculture, and not on the health and well being of our farming land. The small farms scattered throughout our country are truly the stewards of our land.

COMMENT OF CONSTANCE TAYLOR

Date Submitted: Saturday, May 19, 2012, 1:27 p.m.

City, State: Phoenix, AZ

Occupation: Professional Manager & Student

Comment: Please consider increasing funds for emerging food producing and distributing enterprises such as small-scale agricultural and production, community gardens, farmers' markets, CSA programs, school agricultural projects, and the protection of rural and peri-urban agricultural land. Also, increase funding for research project directed toward these initiatives.

Thank you,

CONSTANCE TAYLOR.

COMMENT OF DAVID TAYLOR

Date Submitted: Thursday, April 26, 2012, 12:55 p.m.

City, State: Purllear, NC

Occupation: Customer Service

Comment: The problem with hunger in this country is going to get out of hand if something isn't done now. We have been through a struggle recently but things are definitely turning around. Each of us should remember that no matter what your status is the food we eat all comes from someone who grew it or raised it. Farming in the United States is beginning to make a comeback. Why would anyone want to undermine this? Farmers need our support and encouragement to continue to grow. Furthermore, more and more people are turning to organic, healthy, traditional foods. So there will be a need for more farms and a bonus is that more farms means more jobs. I encourage all members of this committee to do all that is in their power to create a path for farmers and agriculture in our country that will ensure their ease in feeding us.

Thank you,

DAVID.

COMMENT OF DEAN TAYLOR

Date Submitted: Friday, May 18, 2012, 5:19 p.m.

City, State: Lyman, ME

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: We need to be supporting small people powered farms that are not involved in using toxic chemicals, pesticides, and genetically modified seeds. The only reason there is a market for these crops is the lack of labeling (choice). WE need to help the farmers who are taking care of this fragile planet we live on. Stop subsidizing the richest farmers and support the farmers growing the healthiest food. Thank You in advance. Have a good day. P.S. You don't even have a way to express in this form the type of farms we need. You can only pick one crop. Our farm fits seven categories and is very small. Our customers can enjoy a variety of foods from one farm. One part of the farm benefits the other parts just like in nature.

COMMENT OF DEREK TAYLOR

Date Submitted: Friday, May 18, 2012, 12:30 p.m.

City, State: Seattle, WA

Occupation: Social Worker

Comment: Subsidies to farmers seem to focus on soy beans, corn and wheat. I am not convinced this is the best use of my tax dollars. I am particularly concerned about government subsidies to corn producers. In addition to having little nutritional value, the production and consumption of corn carries serious negative externalities. Obesity, increased *E. coli* in cattle, dead zones in the oceans near coastal areas and the general decline in top soil quality are just a few. These externalities disproportionately affect the poor (*e.g.*, if I can buy 2 Whoppers for \$2, why eat oranges or broccoli?) As a nation we currently pay much less of a portion of our income for food than we did 60 years ago. However, these savings are illusory as healthcare costs have spiraled out of control due to negative consumption externalities associated with products made from corn. I would very much like my tax dollars to support organic sustainable farming that produces inexpensive nutritional food. Thank you.

DEREK TAYLOR.

City, State: St. Louis, MO

Occupation: Public Relations

Comment: Let's get the conservation and eco-friendly back into our ag. regulations. There is no time to waste. When considering each and every one of the world's children and grandchildren, we need to assure them a comfortable supply of our precious natural environment.

COMMENT OF KAREN TAYLOR

Date Submitted: Friday, May 18, 2012, 9:26 a.m.

City, State: Burbank, CA

Occupation: Educator/Filmmaker/Director of Nonprofit

Comment: The U.S. should label GMO's and have a 100% organic requirement in the food supply. Americans should have complete and honest information on what their food is. Farmers should **Not** have to live in fear of actions taken by large agribusiness and/or companies like Monsanto.

COMMENT OF KIRK TAYLOR

Date Submitted: Friday, May 18, 2012, 2:03 p.m.

City, State: Yelm, WA

Occupation: Retired

Comment: Giant agricultural concerns are, apparently, concerned only with profits . . . doesn't sound too bad, until one sees what this has done to the soil itself. Monoculture is un-sustainable, anathema to continued life.

I never dreamed that the dust bowls of the 1930's could be forgotten, but it seems the case . . . The "Superweeds" and "Super pests" won't save us . . . The giant Cor-

porations are trying to drag us down for the money. Only a Government who cares and listens to the people can stop this mess.

COMMENT OF MELVIN TAYLOR

Date Submitted: Thursday, May 10, 2012, 12:25 a.m.

City, State: Sacramento, CA

Comment: Food safety is very important to everyone and cuts would deeply hurt that safety and place all of us in danger. Millions depend on food programs for eat and limiting the bill would increase hunger.

COMMENT OF PATRICIA TAYLOR

Date Submitted: Friday, May 18, 2012, 8:40 p.m.

City, State: Vancouver, WA

Occupation: Retail Manager

Comment: I owned a farm in Nebraska during the 1970's. Things have changed a lot since then. Hormones in the milk, I had a grade A Dairy, to get more production from the cows. I eat organic food including meats. There comes a time when money is not the bottom line. Our health, including our children, is far more important. We need to have more respect for nature.

COMMENT OF RONNI TAYLOR

Date Submitted: Saturday, May 19, 2012, 9:41 a.m.

City, State: Tiffin, OH

Occupation: Teacher

Comment: Please support organic and sustainable agriculture. Your grandchildren and great grandchildren deserve healthy food to allow them to grow, thrive, and succeed in their lives. Rich or poor, if we allow big business to take over food production, no amount of money will buy healthy food if we wipe out its source.

COMMENT OF MARTHA TEETER

Date Submitted: Saturday, May 19, 2012, 10:54 p.m.

City, State: Bradenton, FL

Occupation: Acupuncture Physician—Health care

Comment: It is vital for the health of humans to have good, clean and fair food to eat. Industrial agriculture depletes the soils, adds toxic chemicals to the food supply.

Support small local family farms. Create systems to allow local food producers to sell to their neighbors . . . More secure to have a networks and variety rather than monoculture crops and centralized food.

SUBMITTED STATEMENT BY JOHN TEIXIERA, LONE WILLOW FARM, FIREBAUGH, CA

1. Organic Is An Important and Growing Part of U.S. Agriculture

The overall U.S. organic market in 2011 surpassed \$31 billion for the first time. Organic fruit and vegetables have made up a significant amount of this growth. A new report from the Organic Trade Association finds the organic food industry generated more than 500,000 American jobs in 2010. Organic food sales now represent 4.2 percent of all U.S. food sales.

2. California Leads the Way in Organic Farming

California leads the nation in terms of number of organic farms, land in organic production and organic sales. Organic agriculture is a significant economic driver in California and nationally.

More importantly, organic agriculture represents a significant and growing sector of our Valley's farm economy, with an increase number of my neighbors adopting organic farming practices because of the economic, health and environmental benefits it provides.

3. Organic Farmers Have Historically Not Benefited From Farm Bill Programs

Some progress has been made to support the sector in the last two farm bills, but we cannot slide backwards in the 2012 Farm Bill.

Organic farmers still need access to conservation programs, technical assistance, research, and marketing support. Let me give you some specific examples:

- **Organic Certification Cost-share Program:** The cost-share program provides absolutely critical assistance to farmers so they can participate in the

USDA National Organic Program. This is a relatively small program in terms of total dollars, but provides significant economic stimulus to the agricultural sector since without this program, many farmers, particularly new and beginning farmers, would not be able to afford to certify as organic. The Senate Committee bill funds this program and we will be looking to you to ensure the House does the same.

- **Development of locally adapted cultivars:** This is another absolutely critical need of organic and conventional farmers alike. Seed is the backbone of agriculture and without the varieties that are best suited to our local climate, soil, disease, and pests we cannot be competitive. The Senate bill failed to include language to make this a priority of USDA competitive grant programs. Again, we need you as Members of the House Agriculture Committee to stand up for farmers and make sure this priority is included.
- **Organic Production and Market Data Initiative:** This farm bill initiative is essential to understanding the dynamics of the organic marketplace and ensuring organic farmers are appropriately covered by crop insurance.
- **Research:** We need a research title that sufficiently meets the needs of the organic farming community so we have the information to address our production issues and continue improving our systems. The Organic Agriculture and Research Extension Initiative needs to be sufficiently funded to address some emerging research needs.
- **Crop Insurance:** We need a farm bill that will address the inequities we face in risk management, specifically to eliminate the unfair 5% premium surcharge on organic crop insurance and ensure that when organic farmers incur a loss, we are reimbursed at organic prices—not conventional prices, which are often below our cost of production.
- **Conservation:** Finally, farm bill conservation programs are critically important to many of us in the Valley. The land stewardship issues we face are more complex than ever. We cannot cut programs like the Conservation Stewardship Program. It is a program that has worked for me on my farm. We also need bill language to strengthen the Environmental Quality Incentives Program (EQIP) Organic Initiative to make the payment cap equal to what other EQIP users have.

Thank you Congressmen Cardoza and Costa for support of organic farmers.

JOHN TEIXIERA,
Lone Willow Farm,
Firebaugh, CA.

COMMENT OF AMY TELLER

Date Submitted: Wednesday, May 16, 2012, 5:08 p.m.

City, State: Toms River, NJ

Occupation: Student

Comment: As a 23 year old, I want the 2012 Farm Bill to help young people get started as farmers—whether they live in suburban, urban, or rural areas. This means access to land, capital, training/extension, and conservation programs. These steps will lead to job creation for young people, veterans, *etc.*, and ensures that we will still have Americans producing our food in 20 years. Please see the Beginning Farmer and Rancher Opportunity Act for the important provisions to young farmers, and put these provisions in the 2012 Farm Bill. Also, I want these new, young farmers to be organic farmers, because it is a more profitable business, safer for the farmers and their workers, and builds healthier soil over time. Productive, innovative organic practices do not pollute the environment or harm non-target plants, animals, and pollinators like pesticide application does. Therefore, programs like OREI (Organic Research and Extension Initiative) and ODI (Organic Data Initiative) must be given full funding equal to 2008 levels. In addition, conservation compliance must be tied to crop insurance. In return for subsidizing crop insurance to save farmers from a year of crop failure, taxpayers deserve care for our soil, water, and air quality. The price of treating water with excess farm run-off over time (which will happen if we eliminate the conservation requirements that have been tied to subsidies since 1985) will be a much greater cost than the implementation of a few conservation practices on the farm.

COMMENT OF FRANK TELLEZ

Date Submitted: Tuesday, May 08, 2012, 2:53 p.m.

City, State: Tucson, AZ

Occupation: Unemployed

Comment: Stop funding Monsanto and quadruple funding for **Organic** farmers please. I have my own backyard garden because Monsanto is destroying the food chain. Nothing good, not even jobs, can come from this. It's a disaster in the making. Please stop funding Monsanto. By funding organic farmers you create more jobs than you do by giving Monsanto millions of dollars it doesn't need and you don't destroy all life on Earth including humans, bees, or other insects. Nothing, absolutely nothing, good come from helping Monsanto destroy the ecosystem. Please stop funding Monsanto. Please.

COMMENT OF ROBERT TENAGLIO

Date Submitted: Friday, May 18, 2012, 12:36 p.m.

City, State: Upper Darby, PA

Occupation: Unemployed

Comment: Stop corn subsidies. Allow independent farmers easier access to USDA approved slaughterhouses by making more available, especially mobile ones. Change legislation that puts big corporate agricultural companies and their processed food ahead of independent farmers.

COMMENT OF MYRTLE TENGEMBER

City, State: Pine Hill, NJ

Occupation: Retired School Secretary

Comment: I support the food bank and donate whenever they have food drives in my area. I worked at a school district and saw how many families were needy. With all the waste in government, I think hungry children should be the last thing on the list to be cut! By the way, I didn't understand the occupation choices.

COMMENT OF SASHA TENINTY

Date Submitted: Thursday, May 03, 2012, 11:52 a.m.

City, State: Eugene, OR

Occupation: Student

Comment: I think that a focus of the farm bill should be an improvement of working conditions and rights. While we argue for "sustainable" and "organic" foods, the rights of the workers who produce our food are cast to the wayside. Why is it that there is no minimum wage or substantial representation for agricultural workers? If the goal of the farm bill is the encourage healthy, sustainable eating practices, why do we not encourage these same values in our labor rights? I think that it is extremely skewed that we do not put the appropriate significant focus on treatment and rights of workers.

COMMENT OF TIM TERHAAR

Date Submitted: Friday, May 18, 2012, 12:26 p.m.

City, State: Brooklyn, NY

Occupation: Freelance (Copyediting, Word Game Content Development)

Comment: I strongly oppose CAFOs and monoculture farming. We desperately need a farm bill that will reverse deregulation, break up agricultural monopolies, and support small-scale family farms. I believe we should also reinstate commodity reserves for grains. The government needs to support sustainable farming practices and begin to rebuild regional food systems. Please consider policies that would make it easier for low-income communities to access high-quality whole foods. Thank you.

COMMENT OF CLARA TERRY

Date Submitted: Friday, May 18, 2012, 12:51 p.m.

City, State: Wooster, OH

Occupation: Retired

Comment: I am a consumer of the food that our farmers produce and I am SICK and tired of eating genetically altered food. It's unhealthy and dangerous. We need **Organic** farming to promote healthy living and for the **Health And Welfare Of Future Generations To Survive.**

COMMENT OF JOHN TERRY

Date Submitted: Friday, May 18, 2012, 1:57 p.m.

City, State: Eureka, CA

Occupation: Construction

Comment: The current process used to grow food in the U.S. is not sustainable. The amount of fossil fuels used is enormous, with fuel prices rising and continuing to rise it only means food prices will do the same. Use of such large equipment and petroleum based fertilizers should be stopped. These processes are unnecessary in the production of food. Companies should be diversifying our food production industry to provide food more on a local level to also cut back on fuel consumption. People talk about loosening our dependence on foreign oil, better farming practices would help. Furthermore, I don't want to eat anything artificial. This means anything added to the food at any point in time that wouldn't happen naturally. Including pesticides, fortifications, preservatives, and genetic modifications. If people claim we are helping fight world hunger the correct answer is no we aren't. Not with these practices. We are promoting world dependence (talk about living off the system). There are numerous better ways to grow food ecologically and sustainably. Thank you for your time and considerations.

COMMENT OF ANNETTE TERZIOTTI

Date Submitted: Friday, May 18, 2012, 3:03 p.m.

City, State: Orange, VA

Occupation: Structural Engineer

Comment: Let us have exactly the food we want. Leave the raw milk farmers alone. Stop trying to destroy everything that isn't Monsanto. Stop using the food system to poison the population so those invested in it can profit on our illnesses. All disease is manmade. This is the dirtiest food system in the world and of course we have the most sickness. The sicker we get the more money they make and it's wrong! The FDA, USDA, & EPA ought to be shut down., They work for the chemical companies. We should have every right to farm and sell to anyone we wish! I'm so sick of the FDA's gangsters & thieves trying to destroy and ruining wholesome decent farmers while the factory farms produce products that are unfit for **Any** kind of consumption. **Shut Down The Factory Farms Every Last One Of Them And Leave The Clean Farmers Alone!**

COMMENT OF ANNA TESCH

Date Submitted: Friday, May 18, 2012, 5:47 p.m.

City, State: Oak Harbor, WA

Occupation: Stay-at-Home Mother

Comment: As a mother of children with food additive allergies and an individual who cares about her local community, I urge you to please understand the importance of the future of farm policy. Local farming has the unique opportunity of not only improving our health as Americans, but also employment rates. Please consider this as you make your decisions.

Thank you.

COMMENT OF JOSEPH TESTA

Date Submitted: Friday, May 18, 2012, 2:25 p.m.

City, State: Thousand Oaks, CA

Occupation: Computer Programmer

Comment: Hello,

I would like to submit my comments for consideration of the House Agriculture Committee. As a voter and taxpayer, I think it's critically important to be informed of these matters and to voice our concerns.

I support and encourage:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

The subsidized insurance program as currently proposed will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dol-

lars while putting the land, soil and environment at greater risk. We cannot allow this to happen.

Thank you for your consideration.

COMMENT OF CARLA TEVELOW

Date Submitted: Saturday, May 19, 2012, 8:56 p.m.

City, State: Dayton, MD

Occupation: Consultant

Comment: Several of my thoughts are:

Please consider the full endorsement of:

All provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.

The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

Maintaining the EQIP Organic Initiative.

Also, the \$33 million you would like to take away from the Food Stamp Program (or SNAP) is inhumane. Please reconsider this as i don't like to think our country wants to promote hungry children and hungry citizens.

And last, please enact and promote more organic farming in this country. The pesticides are killing bees and GMOs are changing the health of our society.

Thank you for consideration and please take steps to alter the way our country produces its food and deals with farmers, it's time to get back to nature and leave the petrochemicals off of our food.

COMMENT OF MICHAEL TEVLIN

Date Submitted: Sunday, May 20, 2012, 11:17 p.m.

City, State: Portland, CA

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: Dear Chairman Lucas,

Please do everything you can to support small farmers. No joke, the fabric of America is falling apart. Farming is the most honest job in America, and good food made by local producers is the solution to a lot of our problems. Think of a world of small family farms and an agricultural revolution in the U.S. where people know their food, their farmers, their neighbors, and where all their food and goods come from. It'd be a beautiful world. Politicians don't usually do things that make sense and our system of government delays the things that really need to be done ASAP, but you should consider it. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

MICHAEL TEVLIN,
[Redacted],
Portland, OR.

SUBMITTED LETTER BY ARDEN TEWKSBURY, MANAGER, PROGRESSIVE AGRICULTURE ORGANIZATION

March 9, 2012

To: *Chairman* FRANK D. LUCAS and the Members of the United States House of Representatives Agriculture Committee

From: Arden Tewksbury, Manager of Pro-Ag

I want to thank Chairman Lucas and the House Agriculture Committee for allowing me to present the Progressive Agriculture Organization's (Pro-Ag's) views and recommendations to the Committee regarding the dairy farmers' crisis.

It is imperative that all Members of the Agriculture Committee (and all Members of Congress) fully understand the serious financial crisis that the majority of dairy farmers are facing all across the United States.

During 2009 the dairy farmers across the United States lost approximately \$17.7 billion. This figure is derived by using the national average cost of producing milk of \$22.28 per hundredweight (cwt). This figure is released by the Economic Research Service, a division of the USDA.

The USDA also released figures that indicated the All Milk Price in 2009 was \$12.80 per cwt.

These figures indicate the \$17.7 billion loss to dairy farmers. While prices paid to dairy farmers did recover somewhat in 2011; however, these pay prices are now plummeting again.

It is unthinkable that these prices are allowed to continue to de-escalate this year.

Pro-Ag, along with at least 23 other organizations, is urging the U.S. Congress to legislate a floor price of \$20.00 per cwt. under all milk used to manufacture dairy products. This would be a temporary solution to the dairy farmers' plight until a permanent dairy bill is passed by Congress.

During the middle of February, officials of the National Family Farm Coalition delivered a letter to all Members of Congress urging the \$20.00 per cwt. floor price be implemented.*

Herd Termination Act, and the Milk Diversion Act. Both programs were short-lived as well as being costly to taxpayers and the dairy farmers. Neither programs solved the dairy farmer's problems.

On January 1, 2000 the USDA implemented "Order Reform". We strongly opposed it, as did many other dairy farmers. We pointed out many pitfalls of Order Reform during various hearings. Presently many organizations are clamoring for changes contained in Order Reform.

However, we strongly feel that S. 1640 contains the changes that are needed in order to develop a pricing formula that will assure our American dairy farmers a chance to produce milk at a profit. Dairy farmers must have an opportunity to recover their extreme high cost of production. Certainly everyone must be aware of the high cost of corn, hay, and other feed used by dairy farmers. It is our belief that the conversion of corn to produce ethanol shares some of the responsibility for higher feed costs. Dairy farmers must have a chance to recover these costs.

1. Dairy farmers must have a cost of production formula.
2. A milk supply management program is needed at the farm level. This program must not cost the government any money.
3. Imports of unneeded dairy products such as milk protein concentrate (MPC) and casein must be brought under control.

S. 1640 (The Federal Milk Marketing Improvement Act) addresses all three of the above-mentioned items.

In conclusion, we believe that S. 1640 is the way to solve the dairy farmers' dilemma.

Proposed insurance programs will continue to be costly to the USDA and the dairy farmers.

* **Editor's note:** the statement was incomplete as submitted.

Everyone must remember that in addition to feed costs there are other substantial costs that must be covered on a dairy farm.

The only way dairy farmers have a chance to cover their costs is by Congress implementing a dairy bill like S. 1640.

Thank you very much.

ARDEN TEWKSBURY, life-long dairy farmer of Meshoppen, Pennsylvania, and *Manager*, Progressive Agriculture Organization.

112TH CONGRESS
1ST SESSION

S. 1640

To amend the Agricultural Adjustment Act to require the Secretary of Agriculture to determine the price of all milk used for manufactured purposes, which shall be classified as Class II milk, by using the national average cost of production, and for other purposes.

IN THE SENATE OF THE UNITED STATES

OCTOBER 3, 2011

Mr. CASEY introduced the following bill; which was read twice and referred to the Committee on Agriculture, Nutrition, and Forestry

A BILL

To amend the Agricultural Adjustment Act to require the Secretary of Agriculture to determine the price of all milk used for manufactured purposes, which shall be classified as Class II milk, by using the national average cost of production, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Federal Milk Mar-
5 keting Improvement Act of 2011”.

1 **SEC. 2. PRICES RECEIVED FOR MILK UNDER MILK MAR-**
2 **KETING ORDERS.**

3 Section 8e(5)(B) of the Agricultural Adjustment Act
4 (7 U.S.C. 608e(5)(B)), reenacted with amendments by the
5 Agricultural Marketing Agreement Act of 1937, is amend-
6 ed—

7 (1) in the first clauses (i) and (ii), by inserting
8 “(based on the blended price of all milk covered by
9 the order)” after “uniform prices” each place it ap-
10 pears; and

11 (2) in clause (b) of the matter following the
12 first clause (ii), by inserting “and the component
13 value” after “quality”.

14 **SEC. 3. CLASS II MILK PRICING.**

15 Section 8e(5) of the Agricultural Adjustment Act (7
16 U.S.C. 608e(5)), reenacted with amendments by the Agri-
17 cultural Marketing Agreement Act of 1937, is amended
18 by adding at the end the following:

19 “(P) CLASS II MILK PRICING.—

20 “(i) DEFINITION OF NATIONAL AVER-
21 AGE COST OF PRODUCTION.—In this sub-
22 paragraph, the term ‘national average cost
23 of production’ means the amount, as deter-
24 mined by the Economic Research Service
25 of the Department of Agriculture, equal to
26 the difference between—

1 “(I) the national average of the
2 operating cost and the allocated over-
3 head cost of producing all milk in the
4 48 contiguous States; and

5 “(II) the opportunity cost for un-
6 paid labor of producing all milk in the
7 48 contiguous States.

8 “(ii) MINIMUM PRICE.—The Secretary
9 shall base the minimum price for Class II
10 milk on the national average cost of pro-
11 duction.

12 “(iii) SURVEY.—For purposes of de-
13 termining the national average cost of pro-
14 duction under clause (i), the Secretary
15 shall survey dairy producers and associa-
16 tions of dairy producers subject to Federal
17 and State milk marketing orders and in all
18 unregulated areas applicable to all milk.

19 “(iv) PRICE ANNOUNCEMENT.—

20 “(I) IN GENERAL.—Not later
21 than November 1 of each calendar
22 year, the Secretary shall announce the
23 minimum price for Class II milk for
24 the next calendar year, as determined
25 in accordance with clause (ii).

4

1 “(II) ADJUSTMENTS.—Using the
2 most currently available national aver-
3 age cost of production, the Secretary
4 shall adjust the price announced
5 under subclause (I) for a calendar
6 year on April 1, July 1, and October
7 1 of the calendar year.

8 “(III) NOTIFICATION.—Not later
9 than 15 days prior to the effective
10 date of a price adjustment under this
11 clause, the Secretary shall submit no-
12 tification of the adjusted price to—

13 “(aa) the Committee on Ag-
14 riculture of the House of Rep-
15 resentatives;

16 “(bb) the Committee on Ag-
17 riculture, Nutrition, and Forestry
18 of the Senate;

19 “(cc) each administrator of
20 a Federal milk marketing order;

21 “(dd) each State agency
22 that oversees the pricing of milk
23 paid to dairy producers; and

24 “(ee) other applicable Fed-
25 eral and State agencies.

5

1 “(IV) PUBLICATION.—After re-
2 ceiving notification under subclause
3 (III)(cc), each administrator of a Fed-
4 eral milk marketing order shall pub-
5 lish the decision of the Secretary in all
6 bulletins and publications of the Fed-
7 eral milk marketing order.

8 “(v) BASIC FORMULA PRICE.—

9 “(I) IN GENERAL.—The Sec-
10 retary shall use the Class II milk
11 price announced under clause (iv) as
12 the basic formula price for all Federal
13 and State milk marketing orders and
14 all unregulated milk production areas.

15 “(II) CLASS I MILK.—

16 “(aa) IN GENERAL.—The
17 price of Class I milk in all Fed-
18 eral and State milk marketing
19 orders and all unregulated milk
20 production areas shall be equal
21 to—

22 “(AA) the basic for-
23 mula price under subclause
24 (I); plus

6

1 “(BB) the applicable
2 Class I milk differential
3 under Federal and State
4 milk marketing orders.

5 “(bb) UNREGULATED
6 AREAS.—For purposes of item
7 (aa)(BB), the Secretary shall as-
8 sign comparable Class I milk dif-
9 ferentials to each unregulated
10 area.”.

11 **SEC. 4. INVENTORY MANAGEMENT PROGRAM.**

12 Section 8c(5) of the Agricultural Adjustment Act (7
13 U.S.C. 608c(5)), reenacted with amendments by the Agri-
14 cultural Marketing Agreement Act of 1937, as amended
15 by section 3, is amended by adding at the end the fol-
16 lowing:

17 “(Q) INVENTORY MANAGEMENT PRO-
18 GRAM.—

19 “(i) MILK PRODUCTION TOTALS.—Not
20 later than February 1 of each calendar
21 year, the Secretary shall determine the
22 total quantity of all milk produced by each
23 dairy producer or farming operation during
24 the 3 preceding calendar years.

25 “(ii) PRODUCTION BASE.—

7

1 “(I) IN GENERAL.—The starting
2 production base of a dairy producer
3 shall be the average quantity of milk
4 produced by the dairy producer during
5 the 3 calendar years immediately pre-
6 ceding the date of enactment of this
7 subparagraph.

8 “(II) ADJUSTMENT.—The pro-
9 duction base of a dairy producer shall
10 be adjusted on January 1st of each
11 year.

12 “(III) LIMITATION.—The produc-
13 tion base of a dairy producer shall be
14 based on the dairy producer, not the
15 farming operation, and may not be
16 sold, transferred, bartered, or do-
17 nated.

18 “(IV) NEW DAIRY PRODUCER EX-
19 CEPTION.—A new dairy producer, as
20 defined by the Secretary, shall—

21 “(aa) during the 1-year pe-
22 riod beginning on the date on
23 which the new dairy producer
24 commences operation, be exempt
25 from any applicable price reduce-

8

1 tion relating to the first
2 3,000,000 pounds of milk pro-
3 duced by the new dairy producer;

4 “(bb) in the case of any
5 milk produced in excess of
6 3,000,000 pounds during that 1-
7 year period, be subject to each
8 price reduction described in
9 clauses (vi) and (vii); and

10 “(cc) after that 1-year pe-
11 riod, be subject to each price re-
12 duction that applies to existing
13 dairy producers.

14 “(iii) ESTIMATION OF ANNUAL MILK
15 PRODUCTION AND DOMESTIC CONSUMP-
16 TION.—Not later than November 1 of each
17 calendar year and taking into consideration
18 the import projections and export projec-
19 tions for all milk products, the Secretary
20 shall estimate the quantity of all milk to be
21 produced in the 48 contiguous States and
22 marketed by dairy producers for commer-
23 cial use during the next 12 months.

24 “(iv) IDENTIFICATION AND DETER-
25 MINATION OF DAIRY PRODUCTS.—

9

1 “(I) IN GENERAL.—Not less fre-
2 quently than once each quarter, the
3 Secretary shall—

4 “(aa) identify all dairy prod-
5 ucts (including cheeses, curds,
6 butter, butterfat, butter oil, but-
7 termilk, anhydrous milk fat,
8 dairy spreads, milk, cream, con-
9 centrated milk, condensed milk,
10 nonfat dry milk powder, whole
11 milk powder, skim milk powder,
12 all other forms of powdered milk,
13 yogurt, ice cream, whey, whey
14 powder, dried whey, whey protein
15 concentrate, all other forms of
16 whey products, milk protein con-
17 centrate, milk protein isolate, ca-
18 sein, caseinates, lactose, food
19 preps containing milk, and milk
20 chocolate) imported into, or ex-
21 ported from, the United States;
22 and

23 “(bb) determine the quantity
24 of raw milk contained in each
25 such product.

1 “(II) INCLUSIONS.—In identi-
2 fying dairy products under subclause
3 (I)(aa), the Secretary shall include
4 any current or projected future im-
5 ports or exports of a product used for
6 dairy, a dairy substitute, or ingre-
7 dient, including any product that does
8 not have the status of ‘generally rec-
9 ognized as safe’, as determined by the
10 Commissioner of Food and Drugs.

11 “(v) EXCESS PRODUCTION DETER-
12 MINATION.—Not more than once every 2
13 months, if the Secretary, acting through
14 the Commodity Credit Corporation, has
15 purchased the maximum quantity of milk
16 and milk products as required by law to
17 administer programs including child nutri-
18 tion programs (as defined in section 25(b)
19 of the Richard B. Russell National School
20 Lunch Act (42 U.S.C. 1769f(b)), feeding
21 programs administered by the Secretary of
22 Defense, institutional programs, and any
23 other mandated Federal food or feeding
24 programs, the Secretary shall determine
25 whether an excess quantity of milk and

1 milk products is being produced for the na-
2 tional domestic market.

3 “(vi) REDUCTION IN PRICE RE-
4 CEIVED.—

5 “(I) IN GENERAL.—Subject to
6 subclauses (II), (IV), and (V), if the
7 Secretary determines under clause (v)
8 that there is excess production, the
9 Secretary shall provide for a reduction
10 in the price received by all dairy pro-
11 ducers for not more than 5 percent of
12 all milk produced in the 48 contiguous
13 States and marketed by dairy pro-
14 ducers for commercial use.

15 “(II) NOTIFICATION.—Not later
16 than 15 days prior to the implementa-
17 tion of a reduction in price in accord-
18 ance with subclause (I), the Secretary
19 shall submit notification of, and jus-
20 tification for, the reduction in price
21 to—

22 “(aa) the Committee on Ag-
23 riculture of the House of Rep-
24 resentatives;

12

1 “(bb) the Committee on Ag-
2 riculture, Nutrition, and Forestry
3 of the Senate;

4 “(cc) each administrator of
5 a Federal milk marketing order;

6 “(dd) each State agency
7 that oversees the pricing of milk
8 paid to dairy producers; and

9 “(ee) other applicable Fed-
10 eral and State agencies.

11 “(III) PUBLICATION.—After re-
12 ceiving notification under subclause
13 (II)(cc), each administrator of a Fed-
14 eral milk marketing order shall pub-
15 lish the decision of the Secretary in all
16 bulletins and publications of the Fed-
17 eral milk marketing order.

18 “(IV) LIMITATION.—The Sec-
19 retary shall not provide for a reduc-
20 tion in the price received by a dairy
21 producer under subclause (I) unless
22 the Secretary determines under this
23 subparagraph that there exists a posi-
24 tive trade balance in dairy products

1 that are imported into, or exported
2 from, the United States, based on—

3 “(aa) dollar value; and

4 “(bb) the quantity of milk
5 represented by imports and ex-
6 ports, as determined under this
7 subparagraph.

8 “(V) AMOUNT.—The amount of
9 the reduction under subclause (I) in
10 the price received by dairy producers
11 shall not exceed $\frac{1}{2}$ the minimum price
12 of Class II milk.

13 “(vii) ADDITIONAL REDUCTION.—

14 “(I) IN GENERAL.—If the Sec-
15 retary determines that the reduction
16 described in clause (vi) is insufficient
17 to reduce excess production, subject to
18 subclauses (II) and (III) and clause
19 (ii)(IV), the Secretary shall reduce the
20 price received by any dairy producer
21 or farming operation that has in-
22 creased the production of all milk in a
23 calendar quarter, as compared to the
24 average quantity of milk produced in

1 the corresponding calendar quarter in
2 the previous 3 years.

3 “(II) APPLICATION.—A reduction
4 in price under subclause (I) shall
5 apply only to the quantity of milk pro-
6 duced in excess of the average quan-
7 tity of milk produced in the cor-
8 responding calendar quarters in the
9 previous 3 years.

10 “(III) NOTIFICATION.—Not later
11 than 15 days prior to the implementa-
12 tion of a reduction in price in accord-
13 ance with subclause (I), the Secretary
14 shall submit notification of, and jus-
15 tification for, the reduction in price
16 to—

17 “(aa) the Committee on Ag-
18 riculture of the House of Rep-
19 resentatives;

20 “(bb) the Committee on Ag-
21 riculture, Nutrition, and Forestry
22 of the Senate;

23 “(cc) each administrator of
24 a Federal milk marketing order;

15

1 “(dd) each State agency
2 that oversees the pricing of milk
3 paid to dairy producers; and

4 “(ee) other applicable Fed-
5 eral and State agencies.

6 “(IV) PUBLICATION.—After re-
7 ceiving notification under subclause
8 (III)(cc), each administrator of a Fed-
9 eral milk marketing order shall pub-
10 lish the decision of the Secretary in all
11 bulletins and publications of the Fed-
12 eral milk marketing order.

13 “(viii) AMOUNTS DERIVED FROM RE-
14 DUCTION IN PRICES PAID TO DAIRY PRO-
15 DUCERS.—

16 “(I) IN GENERAL.—Not later
17 than 30 days after the end of each
18 quarter, the Secretary shall pay to the
19 special dairy producer account estab-
20 lished under subclause (II) any
21 amounts derived from a reduction in
22 milk prices paid to dairy producers
23 under clauses (vi) and (vii).

24 “(II) SPECIAL DAIRY PRODUCER
25 ACCOUNT.—The Commodity Credit

1 Corporation shall establish a special
2 dairy producer account in which
3 amounts described in subclause (I)
4 shall be credited.

5 “(ix) APPEALS.—

6 “(I) IN GENERAL.—A dairy pro-
7 ducer subject to an additional reduc-
8 tion under clause (vii) may appeal to
9 the Federal or State milk marketing
10 administrator to provide evidence that
11 the dairy producer did not increase
12 production in the calendar year that
13 the reduction was in effect when com-
14 pared to the average quantity of milk
15 produced during the 3 previous years.

16 “(II) RETURN OF AMOUNTS.—If
17 a dairy producer proves that the dairy
18 producer did not increase total pro-
19 duction for the effective calendar year,
20 the Secretary shall return to the dairy
21 producer any amounts collected for
22 any overproduction of any quarter of
23 the affected year.

24 “(III) SUBMISSION OF APPEAL.—
25 A dairy producer that ships to an un-

1 regulated milk handler may submit
2 any appeal of the dairy producer to
3 the Secretary or to the designated
4 representative of the Secretary.

5 “(x) EXTRAORDINARY CIR-
6 CUMSTANCES.—In deciding an appeal sub-
7 mitted by a dairy producer under clause
8 (ix), a Federal or State milk marketing ad-
9 ministrator (or, in the case of an appeal
10 under clause (ix)(III), the Secretary or the
11 designated representative of the Secretary)
12 shall take into consideration production
13 losses due to, at a minimum, fire, severe
14 weather conditions, or severe disease out-
15 breaks.

16 “(xi) COLLECTION.—Except as pro-
17 vided in clause (xii), reductions in price re-
18 quired under clause (vi) or (vii) shall be
19 collected by Federal and State milk mar-
20 keting administrators and timely remitted
21 to the Commodity Credit Corporation to
22 offset the cost of purchasing excess milk
23 products.

24 “(xii) COLLECTION IN UNREGULATED
25 AREAS.—Reductions in price required for

1 unregulated areas under subclause (IV) or
2 (VI) shall be collected by the Secretary and
3 timely remitted to the Commodity Credit
4 Corporation to offset the cost of pur-
5 chasing excess milk products.

6 “(R) PROHIBITION ON CERTAIN
7 CHARGES.—In carrying out this Act, the Sec-
8 retary shall not impose charges on dairy pro-
9 ducers for the cost of the conversion of raw
10 milk to manufactured products.

11 “(S) RESPONSIBILITIES OF MILK PUR-
12 CHASING HANDLERS.—A milk handler that pur-
13 chases milk from a dairy producer shall assume
14 title for the milk at the time at which the milk
15 is pumped into a milk truck provided by or oth-
16 erwise delivered to the milk handler.

17 “(T) APPLICABILITY.—Subparagraphs (P)
18 through (S) apply to all dairy producers and
19 handlers of milk in the 48 contiguous States.”.

20 **SEC. 5. AMENDMENTS TO FEDERAL MILK MARKETING OR-**
21 **DERS.**

22 Section 8c(17) of the Agricultural Adjustment Act (7
23 U.S.C. 608c(17)), reenacted with amendments by the Ag-
24 ricultural Marketing Agreement Act of 1937, is amended
25 by adding at the end the following:

1 “(H) ORDERS COVERING MILK AND MILK
 2 PRODUCTS.—In the case of an order covering
 3 milk or milk products, disapproval of an amend-
 4 ment to the order shall not be considered to be
 5 disapproval of—

6 “(i) the order; or

7 “(ii) other terms of the order.”.

ATTACHMENT 2

Estimated Pay Price to Dairy Farmers Under the Federal Milk Marketing Improvement Act of 2011 (S. 1640)

| Federal Order | Class II Basic Formula | Class I Differential | Class I | Price Paid to Dairymen | Class I Utilization |
|------------------------|------------------------|----------------------|---------|------------------------|---------------------|
| 1—Boston | \$22.00 | \$3.25 | \$25.25 | \$23.51 | 46.5% |
| 5—Appalachian | \$22.00 | \$3.10 | \$25.10 | \$24.05 | 66.3% |
| 6—Florida | \$22.00 | \$4.00 | \$26.00 | \$25.36 | 84.0% |
| 7—Southeast; Atlanta | \$22.00 | \$3.10 | \$25.10 | \$23.83 | 59.3% |
| 30—Midwest/Chicago | \$22.00 | \$1.80 | \$23.80 | \$22.28 | 16.0% |
| 32—Central/Kansas City | \$22.00 | \$2.00 | \$24.00 | \$22.36 | 31.4% |
| 33—Mideast/Cleveland | \$22.00 | \$2.00 | \$24.00 | \$22.77 | 38.4% |
| 124—Pacific NW/Seattle | \$22.00 | \$1.90 | \$23.90 | \$22.56 | 29.5% |
| 126—Southwest/Dallas | \$22.00 | \$3.00 | \$25.00 | \$23.09 | 36.4% |
| 131—Arizona | \$22.00 | \$2.35 | \$24.35 | \$23.09 | 37.5% |
| California | \$22.00 | \$1.90 | \$23.90 | \$22.34 | 18.0% |

This pricing formula was compiled by Arden Tewksbury, Manager, Progressive Agriculture Organization, to more effectively equalize the prices paid to dairy farmers in the United States.

These figures approximately represent current economic conditions. **“Price Paid to Dairymen” reflects the price dairy farmers would receive under S. 1640.**

These pay prices will be readjusted four (4) times per year.

ATTACHMENT 3

September 26, 2011

The Following Is a Summary of “The Federal Milk Marketing Improvement Act of 2011”

- (1.) *ALL* milk produced in the United States will be priced on the national average cost of producing milk on the dairy farms.
- (2.) *ALL* milk used for fluid purposes will be classified as Class I.
- (3.) *ALL* milk used for manufacturing purposes will be classified as Class II.
- (4.) The Class II price will be the national average cost of production. This price will be uniform in all Federal and state Orders as well as unregulated areas. The Class I price will be determined by using the Class II price *plus* the existing Class I differentials that are currently in place in each Federal Order. The State of California and other unregulated areas will be assigned a Class I differential by the U.S. Secretary of Agriculture.

(5.) *ALL* Federal and State Milk Marketing Orders will remain intact. Each Milk Marketing Order will be responsible for determining the component value of milk.

(6.) This Proposal prohibits any cost of operating milk manufacturing plants (commonly called "Make Allowance") to be levied on dairy farmers.

(7.) The U.S. Secretary of Agriculture will adjust the value of milk four times a year.

(8.) This Proposal calls for an inventory supply management program. The program is aimed at preventing a buildup of domestic milk products and prevents foreign milk products from destroying dairy farmer prices.

(9.) The inventory management program cannot be implemented unless the exports of dairy products exceed the imports of dairy products.

(10.) *ALL* dairy farmers will fund the inventory management program. *If* and only *if* the program is necessary, then all dairy farmers will receive a lower price on up to 5% of their production. This price will be ½ of the value of manufactured milk. However, the dairy farmers will receive the correct price on 95% of their milk. *Please remember* if the inventory management program *is not implemented*, then the dairy farmers will receive the full price. *Also*, the U.S. Secretary of Agriculture may decide that only a reduction of one or two percent of total production may be sufficient.

March 2012

Explaining the Profit Margin in the Casey Bill; S. 1640*By Arden Tewksbury, Manager of Pro-Ag*

The proper way to determine the profit (in my opinion) in S. 1640 is the following: I'm still using the \$22.00 per hundredweight (cwt.) as the National Average Cost of Producing milk in the United States. As S. 1640 states, the \$22.00 per cwt. becomes the Class II price for all milk used for manufacture dairy products all across the United States. (Currently the majority of milk used to manufacture dairy products carries the same value. Many times this value has been way too low).

In Order number I (the Boston Market) the pay price to dairy farmers would have been \$23.51 per cwt., therefore the profit to the average Dairy Producers in Order I would have been \$23.51 per cwt. price less the National Average Cost of Production (also the Class II price.) This figure comes to \$1.51 per cwt. But, to figure the profit accurately we must take the National Average Cost of Production and subtract the average cost of production in a particular State. In Pennsylvania the Economic Research Service (ERS) calculates the current cost of production to be \$20.83. Therefore when you subtract \$20.83 (the average cost of producing milk in Pennsylvania) from \$22.00, which we are using as the National Average Cost of Production, we find the average dairy farmers in Pennsylvania is receiving a margin of \$1.17 per cwt. By adding the margin of \$1.17 per cwt. on his cost of production advantage to his profit on the value of his milk leaves the average profit to a Pennsylvania dairy farmer of \$2.68 per cwt. A dairy farmer in Pennsylvania producing 100,000 pounds of milk per month would generate a profit of \$2,680 on his production. For 12 months his profit would be \$32,160. Of*

Urgent: Dairy Farmers Need Your Help

February 14, 2012 (Updated March 5, 2012)

Dear Honorable Members of the Senate and House of Representatives,

We are requesting that the United States Congress take immediate action to prevent a financial crisis from impacting the majority of American dairy farmers that may mirror the devastation that all dairy farmers experienced in 2009.

We are urging Congress to intercede and establish a minimum floor price of \$20.00 per hundredweight (cwt.) under all milk used to manufacture dairy products produced in the United States. The existing Class I differentials will be added to the floor price and will establish the Class I price.

Butter and cheese prices at the Chicago Mercantile Exchange (CME) have plummeted from \$2.10-\$2.15 per lb. since August of 2011, down to the present level of \$1.45 per lb. These prices will soon work their way into the National Agriculture Statistics Service (NASS) survey, which is used by the USDA to establish milk prices in all Federal Milk Marketing Orders.

* **Editor's note:** the attachment was incomplete as submitted.

It is conceivable that prices paid to dairy farmers could decrease by \$7.00 per hundredweight unless immediate action is taken by Congress. One thing we know for certain is that operating costs on American dairy farms continue to escalate. If raw milk prices fall drastically, it will be dairy farmers who will be placed in an unbearable situation.

During 2009 dairy farmers lost more than \$17.7 billion based on a review of USDA's Economic Research Service (ERS) data, being forced to sell their milk for at least \$9.00 per hundredweight under their operating costs. Many have not recovered these losses and cannot sustain another financial bloodbath similar to 2009.

These low, unstable milk prices paid to dairy farmers are the main reason that thousands of dairy farmers have been forced out of business. Unfortunately, as dairy farmers exit their farms, we continually see a further deterioration of the rural economy all across the United States. A fair, stable price paid to our dairy farmers would also be beneficial to the manufacturers of dairy products and the bottlers of fresh milk. Consumers are also clamoring for fair prices for dairy farmers. Thus, a realistic, fair price paid to dairy farmers would be beneficial to everyone.

Many of our organizations and individual dairy farmers have made worthwhile suggestions to Congress and the USDA as to how these pricing inequities could be corrected. And yet, nothing has been done.

COMMENT OF CHERYL THACKER

Date Submitted: Sunday, May 20, 2012, 11:06 a.m.

City, State: Pound Ridge, NY

Occupation: Lighting Designer

Comment: Farm policy should make fruits and vegetables cheaper and more available to consumers and stop subsidizing the corn that is making us obese.

COMMENT OF KAREN THAW

Date Submitted: Saturday, May 19, 2012, 6:08 p.m.

City, State: Boston, MA

Occupation: Retired

Comment: Support sustainable and nutritious food by allowing local farmers to grow fruits and vegetables with no penalties.

Stop subsidizing corn production for the purpose of increasing supply of high fructose corn syrup.

By subsidizing other nutritious foods—fruits and vegetables, our local farmers will be able to supply the public with healthy food.

We need to maximize affordable healthy food to control dietary diseases (*i.e.*, high sugar content in processed foods) such as diabetes and hypertension.

Our society's well being starts with a healthy diet. And this starts with a rational and well thought out farm bill.

Thank you for your attention.

COMMENT OF GARY THAYER

Date Submitted: Friday, May 18, 2012, 3:31 p.m.

City, State: San Diego, CA

Occupation: Editor and Program Director

Comment: Please keep funding for small farmers! We need to change our current farm system from one that favors giant agricultural monopolies to one that supports smaller farming operations and individual farming families who want to grow organic and sustainable agriculture without the use of GMO seeds and pesticides. I now support organic farmers whenever possible, but I am lucky; many Americans have no access to organic produce. Our current agricultural system will only continue this imbalance, and Americans will continue to eat unhealthy corn-syrup laden, highly processed foods that make Americans fatter and cost the healthcare system (and taxpayers) more money. Let's reverse this trend now!

COMMENT OF LINDA THEMA

Date Submitted: Friday, May 18, 2012, 4:52 p.m.

City, State: Nokomis, FL

Occupation: Psychotherapist

Comment: Our national health makes this a critical issue. Obesity and related healthcare consequences are killing us and our country. Our food is "empty" of nutrition and loaded with toxins. We must take action, now.

COMMENT OF GEORGE THEODORU

Date Submitted: Friday, May 18, 2012, 3:47 p.m.

City, State: Portage, MI

Occupation: Service Sector

Comment: It is time to stop subsidizing the big Ag farms and start thinking about the smaller self-sustaining farmers. Large CAFOs, Monsanto's GMO products only pollute the environment without solving the hunger problem. Subsidizing corn only hides the actual cost of ethyl fuels. Time for change!

COMMENT OF MICHELE THEOHARRIS

Date Submitted: Friday, May 18, 2012, 1:36 p.m.

City, State: Arvada, CO

Occupation: Mother

Comment: I want to serve my family wholesome food and this means we need more farmers growing food not commodities. It is a shame we do not grow enough fruits and veg in this country for everyone to eat the USDA recommended amount. I will not feed my family GM crops.

COMMENT OF DALEY THERESA

Date Submitted: Saturday, May 19, 2012, 7:52 a.m.

City, State: New Canaan, CT

Occupation: Artist/Businesswoman

Comment: I am ashamed that America is one of the only countries in the western world that does not safeguard organic farming or put proper controls on what biotech corporation can promote and sell to farmers, while hiding the truth of any negative effects or potential dangers to the environment and human's, from consumers. It's absolutely unethical and not worthy of America's ideals. Common America, you are not leading the way so far, you are tail-end Charlie!

COMMENT OF JANET THEW

Date Submitted: Wednesday, May 16, 2012, 11:53 p.m.

City, State: Loomis, CA

Occupation: Planning Commissioner

Comment: I support retention of funds for conservation easements, but not for crop supports and funds going to wealthy landowners. Small family farms should be the priority, but farming is a business like any other, and success should not be guaranteed by the taxpayer.

I strongly support eliminating the Wildlife Services Dept., which wastes millions of dollars and millions of lives solely for the benefit of ranchers. Ranchers should not be given such total control of USDA. Please read the recent investigative series on this issue in the *Sacramento Bee*.

COMMENT OF RANDY THILL

Date Submitted: Friday, May 18, 2012, 6:04 p.m.

City, State: Bisbee, AZ

Occupation: Artist

Comment: Pretty soon we won't need wars to keep the population down, cause everyone will die of the food they buy in the stores. Please assure future generations that our country cares about them, the planet they live on, and the sanity of our government. Support organic agriculture, force large food producers to be liable for healthy practices, and cut funding to those who care more about the bottom line than the nutrition of the food they are producing. Now is the best time . . . before there is nothing to work with. We are already at a point that I fear eating about 90% of the foods offered in most grocery stores. Please do your best to get us back on the right track agriculturally!

COMMENT OF REBECCA THISTLETHWAITE

Date Submitted: Thursday, May 17, 2012, 12:08 p.m.

City, State: Mosier, OR

Occupation: Director of Nonprofit Organization

Comment: We must limit commodity payments and insurance subsidies. Use that saved money to fully fund conservation programs that work, rural development, be-

ginning farmer programs especially expanded loans, community food security projects, farm-to-school, and full funding for SNAP.

COMMENT OF BARBARA W. THOMAS

Date Submitted: Thursday, April 12, 2012, 11:02 p.m.

City, State: Las Cruces, NM

Occupation: Retired Bookkeeper

Comment: My home church, Trinity Lutheran (ELCA) operates a food pantry and receives our food almost exclusively through the New Mexico Roadrunner Food Bank. Aside from the TEFAP food that we receive for this project, all other food must be paid for. Our congregation has less than 100 active family units, and yet has been able to provide food for roughly 100+ needy families as often as twice a week.

Our congregation members have been donating funds to purchase the food that we cannot get from TEFAP.

However, the number of families that have come to us for food assistance is steadily increasing, but our congregation's membership has not increased, which means that we have only a finite amount of money donated each month with which to purchase food to give away that we do not receive for "free".

If TEFAP funding is reduced nationwide, then there are fewer pounds of "free" food available for each food bank to give away, and thus for our church to give away. Therefore to feed everyone who comes then will mean that each family will receive less food than they have been receiving currently, since we have only a finite amount of donations with which to purchase food each month.

I help bagging produce for this project which means that I am ready to leave just as families start to be processed to receive an allotted portion. In our lobby I see old people, multi-generation families, and young families—often with two or more little children—waiting their turn to receive help.

It makes me sad to know there are so many people with food insecurity; it affects me personally because my daughter and her husband attend college, and often they are feeding friends of theirs in addition to their own three young sons because there are few jobs available, and so their family's food runs out, and so I am buying food so my grandchildren can eat. The 9 year and 11 year olds have even told me, "we are very poor", and are so excited to get to drink milk at my house.

I have written in detail so that you who help determine food policy for the next fiscal year will not forget that the folks who need food help the most are the ones at the bottom of the economic ladder. Please be generous in funding food stamps, TEFAP, and other food assistance programs so that "for the least of these" there will be enough to eat.

Thank you.

Respectfully,

BARBARA W. THOMAS.

COMMENT OF ELLA THOMAS

Date Submitted: Friday, May 11, 2012, 9:25 a.m.

City, State: Kansas City, MO

Occupation: Disabled Senior

Comment: I am one of those Senior Americans that need the assistance of the SNAP program. Please, don't cut this program, it is very important for us and the children in need. The poor are in the churches too, so their funds are down. Our country helps everyone else **Help Us Too.**

COMMENT OF MARGARET THOMAS

Date Submitted: Friday, May 18, 2012, 12:22 p.m.

City, State: Rock Island, IL

Occupation: Teacher

Comment: We need to develop policy that encourages the organic production of fruits and vegetables, and discourages production of sweeteners, and meat raised in confined factory-like settings. Please keep our health in mind as you discuss agriculture policy.

COMMENT OF MARY THOMAS

Date Submitted: Friday, May 18, 2012, 3:24 p.m.

City, State: Weed, CA

Occupation: Educator, Gardener and Beekeeper

Comment: I support maintaining the EQIP Organic Initiative, the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286) and Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. Please **Do Not** cut the Food Stamp program. Do you know how many people depend on them to thwart hunger among their children? Please support small farmers. Open your eyes and see that Big Ag is the cause of so many of our woes. Thank you.

JOINT COMMENT OF ROBERT AND LILLIAN THOMAS

Date Submitted: Friday, May 18, 2012, 9:42 p.m.

City, State: Mount Jackson, VA

Occupation: Retired

Comment: As the committee considers the 2012 Food and Farm Bill, I urge you to support the small farms that really need help, not the huge corporate farms.

- Fully fund programs that support organic farmers and rural development.
- Limit or do not fund CAFO's.
- Support critical nutrition programs.

COMMENT OF MARY THOMASON

Date Submitted: Friday, May 18, 2012, 12:38 p.m.

City, State: Boerne, TX

Occupation: Teacher

Comment: Please protect our farmers, our organic food, and our markets from genetically modified food products! Let us eat healthy and keep the chemicals at bay!

COMMENT OF BEN THOMPSON

Date Submitted: Friday, May 18, 2012, 7:00 p.m.

City, State: Mt. Vernon, IA

Occupation: Student

Comment: Agricultural production is one of the largest contributors to climate change. It doesn't have to be that way though. Current farm policy also promotes junk food for children. The obesity epidemic will prove to be a significant drain on the country's resources in the future, and it will cost many their lives. Government debt is also out of control, we need remove all unnecessary subsidies, especially those that hurt Americans. Though smart policy we can reduce our carbon footprint, save American lives, and reduce frivolous spending. (I would be in support of subsidies if they got healthier food to kids or reduced our carbon footprint—that does not include biofuel subsidies).

COMMENT OF CINDY THOMPSON

Date Submitted: Saturday, May 19, 2012, 7:41 a.m.

City, State: Pebble Beach, CA

Occupation: Medical Technician

Comment: It is time the citizens of the USA are given an informed choice about they eat. At the present moment we are being used as guinea pigs in a huge experiment for profit by big agro that we are supporting with our own tax dollars!

And as is apparent by the increase in obesity, chronic disease, cancer and birth defects it is not working.

We need to label our foods and stop supporting big agro with our tax dollars at a minimum. Supporting small organic farms would be the best and healthiest future for all of us.

COMMENT OF COLLEEN THOMPSON

Date Submitted: Friday, May 18, 2012, 1:24 p.m.

City, State: Jackson, WY

Comment: Agribusiness has a stranglehold on our food supply. The growing diabetes epidemic is one consequence of the prevalence of over-processed, unhealthy food in our culture, since subsidized foods are less expensive to the consumer. While I don't want the government to be a Big Brother and tell us what we can and can't

eat, I also don't believe that incentivizing awful food choices is a desirable governmental role, either, especially when it's making us sick and adding to the health care burden everybody is complaining about.

COMMENT OF GAYLE THOMPSON

Date Submitted: Friday, May 18, 2012, 4:39 p.m.

City, State: Ionia, MI

Occupation: Literacy Director

Comment: Once upon a time healthy farming was a way of life. Many, many, many Americans want it to be that way again, whether you are hearing from them or not. We need to go back to small farmers who are not controlled by corporations. All the antibiotics feed to farm animals have produced a generation of people unaffected by antibiotics given by their doctors. Corporate farms care about profits only—every single person in the United States knows this even though the government keeps pretending we don't know. Bring back small, local farmers who can make a living and contribute to their communities. Who live in their communities and want to give the best product they can to their neighbors. We cannot continue the practice of ignoring healthy food and continuing to support outlaws like Monsanto. It's time for healthy food. Please see that that change happens.

COMMENT OF HEATHER THOMPSON

Date Submitted: Saturday, May 19, 2012, 10:26 p.m.

City, State: Carol Stream, IL

Occupation: Homemaker

Comment: I vote everyday with my food dollars, organic food just makes good common sense, We Need an Organic Farm Bill. People are waking up, local, organic, sustainable agriculture is critical to our economy and the planet.

COMMENT OF JAMES THOMPSON

Date Submitted: Friday, May 18, 2012, 11:58 p.m.

City, State: Ogden, UT

Occupation: Registered Nurse

Comment: I don't know how the SNAP funding got tucked into the farm bill but by gawd it isn't as important to keep corporate farmers funded as it is to keep young children, through no fault of their own, with enough calories to support their mental faculties enough to make it through school on an even playing field you greedy b.

COMMENT OF LINDA THOMPSON

Date Submitted: Saturday, May 19, 2012, 10:41 a.m.

City, State: Montrose, CO

Occupation: Office Manager

Comment: Organic food is the future of the world, so we can avoid pesticides and herbicides, as well as GMOs in our food supply and in our environment. Also, organic farming sequesters more carbon than non-organic farming, and can help us turn around global warming.

COMMENT OF SCOTT THOMPSON

Date Submitted: Sunday, May 20, 2012, 5:41 p.m.

City, State: Fairfield, CT

Occupation: Engineer

Comment: I support:

- local farms and legislation that will make it easier for local and small farmers to be competitive;
- protection of public health by requiring labeling of GMOs;
- agricultural land and farmland conservation.

COMMENT OF TARA THOMPSON

Date Submitted: Thursday, May 10, 2012, 7:11 a.m.

City, State: Oviedo, FL

Occupation: Claims Adjuster

Comment: We need to continue to have Second Harvest Food Bank as a source to help feed the homeless and hungry people we have in our area. Please do not stop these types of programs. I feel we will begin to see situations worsen and family members begin to perish because of lack of food. Here in America? I pray God will touch the hearts of those that can help the poor and needy. *Proverbs 21:13* says "Whoso stopped his ears at the cry of the poor, he also shall cry himself, but shall not be heard". Thanks so much.

COMMENT OF MYRA THOMPSON-BULL

Date Submitted: Friday, May 18, 2012, 5:22 p.m.

City, State: Alpine, CA

Occupation: Acupuncturist/Health Care Provider

Comment: We need an organic, safe food, farm bill. Do you want to feed your family toxic food? This is a no brainer. Why would anyone want to feed their precious family genetically modified (as in not real) toxic food? There is only one reason I can imagine, Corporate Greed and manipulation of the food supply for huge profits. Please don't let that insanity happen.

Thank you very much,

MYRA THOMPSON-BULL.

COMMENT OF MICHELLE THOMS

Date Submitted: Saturday, May 19, 2012, 9:15 a.m.

City, State: Frisco, TX

Occupation: Recruiter

Comment: Please keep the best interest of our farmers in mind. We need good farmers in order to have good quality food to eat that will not cause us problems later on in life.

Regards,

MICHELLE and family.

COMMENT OF D. IRIS THOR

Date Submitted: Friday, May 18, 2012, 7:21 a.m.

City, State: Vestal, NY

Occupation: Retired

Comment: America needs healthy organically raised food sources and sustainable programs that protect our environment and our agricultural workers. It's time for a better farm bill.

COMMENT OF TESS THORMAN

Date Submitted: Tuesday, May 15, 2012, 10:34 a.m.

City, State: Philadelphia, PA

Occupation: AmeriCorps Member

Comment: Please focus on writing a farm bill that creates economic opportunity and improves access to healthy, affordable food for all Americans! I am a nutrition educator in a low-income neighborhood, and I use SNAP benefits, myself. I know where to look for fresh, healthy, sustainably grown food for myself, but most people in my neighborhood do not—or there are other things stopping them from accessing healthy food. Please make it easier for us. Everyone deserves to be healthy.

In the 2012 Farm Bill, include the Community Food Projects Program, Farmers Market and Local Food Promotion Program, and Hunger-Free Community Incentive Grants.

COMMENT OF MELANIE THORNBURG

Date Submitted: Friday, May 18, 2012, 2:41 p.m.

City, State: Marion, KY

Occupation: Housewife

Comment: Mr. Whitfield this may be your only chance to take a stand on what the people demand and need. Morgellons IS found in all syndromes of unknown origin, despite the CDC latest report of refuting the DNA of what it is or where it comes from. They lie. We know that the prion protein spirochetes carry cannot be killed by any means known to man. And we also know they know they have been giving it to us in vaccines for over 30 years. The criminals who have ruled the MSMedical in this country have been killing us on purpose, just as surely as they

allowed the Anthrax vaccine for our military without testing in the spirochetes proteins that is massively infecting the population.

http://www.youtube.com/watch?feature=player_embedded&v=yOno_2m_8LY

Yet we already know it is causing **All Syndromes** of unknown origin including the 1 in 29 kids who now suffer **No** treatment to cure them of their **Autism** that is caused by those same seronegative infections hidden in prion protein. Adding even **One** more GMO or vaccine to this mix may be mans last. We demand relief of GMO and a farm bill that sustains man. Not kills us faster. By letting them use waste on food crops that will and have washed out to sea they are not only destroying us they are destroying the world. Because our bee's are the mirror to mans existence and they are dying too in colony collapse disorder for which **Monsanto** has taken over that research too. This is the most critical time in the history of man for U.S. to get it right. Because when the 1 in 29 Autism kids added to all the other syndromes gets to be 1 in every 1—they will have won WWII and we helped them destroy man.

COMMENT OF SARA THORNTON

Date Submitted: Friday, May 18, 2012, 2:17 p.m.

City, State: Eastover, SC

Occupation: Teacher

Comment: It is time for a real organic farm bill. Americans want to know what is in their food and need food labeling and help to small producers. Agribusiness should not get any subsidies and should not be in control of American farming. More and more Americans are buying organic and shopping in stores like Whole Foods, Earthfare and even Wal-Mart is now offering organic food. Monsanto has got to go. Please think about the future welfare of Americans, the planet and our food chain. Bees are dying, Roundup Ready crops are creating super bugs and we need to go back to local, sustainable and organic agriculture from heritage and non GMO seeds.

COMMENT OF DEBORAH THRASH

Date Submitted: Friday, May 18, 2012, 5:53 p.m.

City, State: Fredericksburg, VA

Occupation: Retired/Disabled

Comment: In the real world some people learn how to abuse the programs that offer the most help to those in need. Please do not make cuts to SNAP, TEFAP or CSFP. These programs are a vital link for millions of Americans in securing that almighty commodity **Food**.

If you must cut something, then look to cut the loopholes and ambiguous laws that allow a few ne're do wells to profit.

These programs work, can they be made better, absolutely, but in making them better must we sacrifice the many for the evils of the few or the one?

There's a very simple, cost effective way to stop the fraud/abuse especially of SNAP.

COMMENT OF LYNN THURSTON

Date Submitted: Friday, May 18, 2012, 12:58 p.m.

City, State: Phillips, ME

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: We need a food policy—not just an ag policy. We need the gov't to support small producers and legislate regulations according to scale of operations. Don't sell out our food production and distribution to the big ag and chemical companies.

COMMENT OF CLARK TIBBITS

Date Submitted: Friday, May 18, 2012, 1:35 p.m.

City, State: Columbiaville, MI

Occupation: Retired Farmer and Sustainable Agriculture Consultant

Comment: Small scale organic farming and gardening is increasing in the 10th district of Michigan, but we need fair ground rules for the sake of those producers and consumers. Please pass the Organic Farming Bill.

COMMENT OF JACKIE TIDWELL

Date Submitted: Friday, May 18, 2012, 2:47 p.m.

City, State: Lafayette, LA

Occupation: Administrative Assistant

Comment: I currently work to promote water quality and sustainability is key to that mission. As a graduate in the college of environmental sciences, the information I received was clear—organic farming will keep our soil and water in usable form for future generations. There are places where water is unsafe to drink, our gulf is depleted of oxygen. We need a bill that protects the overall health of our resources and the people who rely on them for food, water, and shelter.

COMMENT OF SARAH TIERS

Date Submitted: Saturday, May 19, 2012, 12:08 a.m.

City, State: Crestone, CO

Occupation: Nanny/Healer

Comment: Farm Policy needs to be free from GMO's and free to grow organic produce, the best for our health. In no way should anyone be able to coerce farmers to accept GMO's. They are free agents who need to be free to do what they feel best in their agribusiness.

COMMENT OF DAVID TIGER

Date Submitted: Friday, May 18, 2012, 6:23 p.m.

City, State: Austin, TX

Occupation: Business Owner

Comment: I wish to have the freedom to chose what I eat and drink pure organics is I all want. I want labeling of GMO food so that I can chose not to eat it. Thanks.

JOINT COMMENT OF KARLA AND BRENT TILDAHL

Date Submitted: Friday, May 18, 2012, 1:40 p.m.

City, State: Fontana, WI

Occupation: Retired Health Care Professional

Comment: We try to hard to eat healthy to keep our old retired bodies going and we feel strongly that the farm bill is unfair to local farmers and organic producers. Please consider these producers when you finalize the bill. Isn't it time to stop subsidizing big corporate farmers.

COMMENT OF TERRY TILLMAN

Date Submitted: Friday, May 18, 2012, 10:26 p.m.

City, State: Santa Monica, CA

Occupation: Business Consultant/Seminar Leader

Comment: An increasing number of us want to eat **Real Food**, not factory farmed phood. Please do the right thing, not caving into the best funded lobby and business, and support our free choice, and those producers who want the same! Please listen to those who are putting people/humans in their decisions as a higher value than dollars.

COMMENT OF AARON TIMBO

Date Submitted: Friday, May 11, 2012, 4:26 p.m.

City, State: Minneapolis, MN

Occupation: IT Professional

Comment: I believe the farm bill should lay out a framework for conservation while ensuring food security for future generations. To this end, the main goal should be supporting small-scale, organic food producers rather than subsidizing large-scale, industrial, commodity producers. No

COMMENT OF HEIDI TIMER

Date Submitted: Saturday, May 19, 2012, 7:35 p.m.

City, State: Austin, TX

Occupation: Massage Therapist

Comment: I would like to see a Farm bill that supports small organic farmers and reductions in use of GMO crops for consumption. I feel there has not been

enough research into the digestibility of GMO foods. It is also unfair that Monsanto can sue farmers whose crops have been tainted from cross pollination with Monsanto's genetically modified crops. I really feel it is unethical to patent seeds and it has put some farmers into horrible financial situations that were not their own fault.

My hope is that a Farm bill would help small farmers and support agriculture that produces healthier, cleaner foods being produced in a way that is more sustainable. Thank you for the opportunity to express my concerns.

HEIDI TIMER.

COMMENT OF SAMUEL TING

Date Submitted: Saturday, May 19, 2012, 9:21 a.m.

City, State: Brooklyn, NY

Occupation: Student

Comment: Healthy, organic and unaltered, locally grown food are necessary for a healthy society. It will also help to reduce the huge healthcare burden on the government or its taxpayers. Besides, politicians need to start doing their actual jobs and help **All** the citizens of this country.

COMMENT OF NICOLE TINKHAM

Date Submitted: Friday, May 18, 2012, 12:52 p.m.

City, State: Los Angeles, CA

Occupation: Law

Comment: I would like a bill that supports smaller farms growing fruits and vegetables, not corn or soy. This support could come in several ways: (1) complete removal or 50% reduction in subsidies to corn and soy production, or (2) equal distribution of farm subsidies to all crops so that the price of non-corn and soy fruits and vegetables decrease and production of them increases. I would also like to see additional support for small farms raising cattle, pigs, chickens, and goats that use non-corn and soy feeds and promote natural food and grazing options for the animals.

COMMENT OF REBECCA TIPPENS

Date Submitted: Friday, May 18, 2012, 11:52 a.m.

City, State: Colerain, MA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I have a garden that serves my cultural center, live in a rural farm time where folks have been subsistence farmers for centuries **And** I am a member of various farm and garden related groups. It is essential that support be given to real food, organic, sustainably grown, and that food be helped into the schools and neighborhoods, that forces (GMO's that would harm those endeavors **Not** be given support. Wake up. Do what is right to save the world . . . quality is important!

COMMENT OF HELEN TIRBEN

Date Submitted: Friday, May 18, 2012, 1:27 p.m.

City, State: Fairfield, CA

Occupation: Self-Employed

Comment: I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

The Senate Ag Committee has voted to get rid of wasteful subsidy payments. It has proposed to replace it with a new subsidized insurance program that leading sustainable agriculture advocates are calling rife with opportunities for fraud and abuse. Please do not allow this! As it stands now, I produce my own vegetables because I cannot trust what is sold in the stores!

COMMENT OF ANN TITUS

Date Submitted: Thursday, April 19, 2012, 11:24 a.m.
City, State: Pittsburgh, PA
Occupation: Purchasing Manager
Comment: Please strengthen and support anti-hunger programs such as SNAP, TEFAP, and CSFP. The disparity between rich and poor has never been greater in this country. It is imperative that government does it's part in helping feed its most vulnerable citizens.

COMMENT OF KATHRYN TITUS

Date Submitted: Saturday, May 19, 2012, 6:35 p.m.
City, State: Athens, GA
Occupation: Retired
Comment: Those who should be controlling our food supply should be small farmers, not huge conglomerations. Let's get this nation back to some form of agricultural sanity. Cruelty to livestock, poisoning of seeds and crops is wrong. **Fix It!**

COMMENT OF JANET TOBIAS

Date Submitted: Thursday, May 10, 2012, 8:57 a.m.
City, State: Tucson, AZ
Occupation: Registered Nurse
Comment: Hello, As a nurse caring for kidney failure clients, I see firsthand the damage wrong foods do and the damage no food does. To reiterate the state of my nation's economy would be wasting precious time. To rehash the cause of this economy, well, you all know why. Now you will diminish a vital program to "balance a budget" while continuing to pour hundreds of thousands of dollars into **Illegal Alien** support programs. I live in Arizona. I support my food bank because I see how much it helps. Will you support the food banks, help them help others? I elected people I hoped would support America more than "any other country!"

COMMENT OF JOHN TOBIAS

Date Submitted: Friday, May 18, 2012, 12:55 p.m.
City, State: DeKalb, IL
Occupation: Retired
Comment: Please protect our food supply and help expand Organic Food production and small farms. Mega Farms are destroying our soil and processed foods are ruining our health. Greedy large corporations only care about money. Our health should be the most important concern, not maximum profits. Thank You.

COMMENT OF CYNTHIA TOBIN

Date Submitted: Saturday, May 19, 2012, 12:18 a.m.
City, State: Burbank, CA
Occupation: Office Manager
Comment: I am not in favor of huge agribusiness wiping out our local farmers especially the organic farmers. I do not want GMO food grown, animals treated cruelly, or poisons spread.

COMMENT OF ALICE TODD

Date Submitted: Friday, May 18, 2012, 1:29 p.m.
City, State: Carlsbad, CA
Occupation: Retired
Comment: Please support organic and sustainable farming. We must put the health of the American people **First**, before the interests of lobbyists and the greed of corporate agribusiness. Put the people first! You are there to represent our best interests! The costs in terms of health, suffering and healthcare are too big to ignore. Support healthy organic and sustainable farming now!

COMMENT OF JASMINE TOKUDA

Date Submitted: Friday, May 18, 2012, 4:26 p.m.
City, State: Alameda, CA
Occupation: Business Owner

Comment: Please don't cut meat and poultry inspectors. Please encourage the use of organic techniques and heritage seeds, No GMO's. Please end farm subsidies to large mono-crop growers.

COMMENT OF DIANE TOLLEY

Date Submitted: Sunday, May 20, 2012, 10:50 p.m.

City, State: Brookside, NJ

Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. My son and his fiancé are young farmers and I'd like to share my support for programs that help the next generation of growers build strong farm businesses. As it's estimated that 125,000 farmers will retire in the next 5 years, it's absolutely critical that farm bill programs help citizens get started in this challenging field. They have worked endless hours—up to 14 a day for someone else. They can not afford to buy any land, especially in NJ because of the prices and taxes. They have had to give up farming and babysit and paint houses to make ends meet. You need to do something to help these young people who are willing to work long hard hours to supply us with dependable, local, all natural foods. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

DIANE TOLLEY.

COMMENT OF JULIE TOMAN

Date Submitted: Thursday, May 17, 2012, 10:59 a.m.

City, State: Waukesha, WI

Occupation: Teacher

Comment: My preference is for tax dollars to be used in a way that promotes health. Healthy workforce is more employable and productive and less expensive for business and society. Subsidies to food producers would be better spent on making fruits and vegetables available at a lower cost, for schools and families. Grains currently subsidized often go to make food high in sugar and highly processed. This is a large factor in obesity/diabetes/heart disease issues plaguing our country. Help feed us well. Don't use my tax dollars to provide money for grain farmers/conglomerates that are providing an abundance of foods of which we may actually need less.

COMMENT OF MICHAEL TOMCZYSZYN

Date Submitted: Wednesday, May 09, 2012, 3:41 p.m.

City, State: San Francisco, CA

Occupation: Teacher

Comment: It is shameful in a country of such affluence to speak of allowing anyone to go hungry, and the criminality is amplified when we deliberately choose to fail to protect the most vulnerable, the "least among us," including our elderly. If we must be harder-nosed about it, let us think then in the big picture—the economic instability that is the inevitable outcome of poverty as well as the lost social capital in a society that rewards it most greedy while sacrificing its most helpless, which undermines trust and security and a common national identity.

COMMENT OF BARBARA TOMEI

Date Submitted: Friday, May 18, 2012, 12:53 p.m.

City, State: New York, NY

Occupation: Sales

Comment: Stop subsidizing the production of food that makes us and our planet sick. When will our representatives stand up to the corporations? What year?

COMMENT OF DAVID TONN

Date Submitted: Saturday, May 19, 2012, 8:47 p.m.

City, State: Tualatin, OR

Comment: We need to focus on sustainable farming methods. These include strong organic standards, meaningful and productive trade standards (the world is

not a balanced market and shouldn't be thought of as one—tariffs are the way to manage this, not subsidies of particular products that are poorly defined and often counterproductive), and an interest and understanding of the consequences that will result from the farming procedures that we set up. Centralized large farms result in general destitution and poor quality of food, inherently. Organic standards promote care for food quality and economic and environmental stability within the farming base of the United States.

COMMENT OF PATRICIA TOOLAN

Date Submitted: Friday, May 18, 2012, 10:59 p.m.

City, State: Severna Park, MD

Occupation: Counselor, Retired

Comment: Please support small farmers, especially organic ones, and try to stop the harassment and attempts by FDA to put organic and Amish farmers out of business.

We need some nutritious food alternatives, especially local ones, as alternatives to the foods produced by big agricultural super companies, often offering only genetically engineered cancerous food and/or refined food that causes obesity and diabetes. Thank you.

COMMENT OF SANDRA TORMOEN

Date Submitted: Saturday, May 19, 2012, 6:44 a.m.

City, State: Richmond, VA

Occupation: Executive

Comment: I am not a farmer but I am well of my dependence on American farmers. In the farm bill you are considering, please include measures to reduce unnecessary regulations on farmers, increase funds for farmer education, and protect America's farmland. In particular, more money needs to be spent funding SARE, Cooperative Extension services, and general education. In addition, The Local Farms, Food, and Jobs Act (H.R. 3286) should be fully funded. Please do not cut these programs! Thank you very much for considering my views.

COMMENT OF STACEY TOSADO

Date Submitted: Friday, May 18, 2012, 10:52 p.m.

City, State: Dorchester, MA

Occupation: Registered Nurse

Comment: A bill emphasizing the importance in preserving traditional organic farming is an absolute necessity in protecting the health of consumers. The way that livestock are handled place consumers at great risk in contracting disease, and is simply and utterly despicable. The fact that the chickens we ingest and given hormones that speed up the growth of their bodies without any effect on their organ systems leaves their bodies in a state where they are less capable to metabolize and excrete properly to be deemed healthy organisms. These animals are kept in a den with no sunlight or access to open air were they are residing with their own waste products. This is not something that would seem appetizing to any individual and I do not think anyone would disagree that being aware of this reality is disturbing. This is only one of the many reasons why protecting and implementing organic farming, allowing these animals to graze in appropriate settings and circumstance necessary for their species to thrive is essential. This will enable better health outcomes, prevent the outbreaks of *E. coli* and other pathogenic organisms to invade our bodies that we cherish. We have a right to be granted with this opportunity.

COMMENT OF BARBARA TOSHALIS

Date Submitted: Saturday, May 19, 2012, 8:06 a.m.

City, State: Middleville, MI

Occupation: Organic Gardener

Comment: We need to support conservation and sustainable farming practices as well as support for small farms, rather than continuing huge subsidies for corporate farming.

COMMENT OF KATHLEEN TOVEY

Date Submitted: Saturday, May 19, 2012, 8:20 a.m.

City, State: Peotone, IL

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: I am a very small producer. I use **No** chemicals. Even the farmers have lost touch with the land. They are in too much of a hurry because they have thousands of acres to run their gigantic machinery over. It may take more time, but we need to get back to the small farms, even if big Ag just lets us little guys do our thing America would greatly benefit. If people want raw milk, organic vegetables, *etc.* . . . let them have it. Stop making us criminals and America can be great again!

COMMENT OF MARJORIE TOWNSEND

Date Submitted: Saturday, May 19, 2012, 5:59 p.m.

City, State: Windsor, OH

Producer/Non-producer: Producer

Type: Livestock

Size: 151–300 acres

Comment: This is not the time for austerity. The U.S. must support conservation and small and beginning and disadvantaged farmers. Insurance is not the answer—it is only lining the pockets of insurance companies. I only had to buy insurance once, and I will never buy it again.

COMMENT OF SCOTT TOWNSEND

Date Submitted: Friday, May 18, 2012, 1:46 p.m.

City, State: Derry, NH

Occupation: Electrical Engineer

Comment: My family and I believe that organic farming is the best path to a healthy future. We buy eggs, chicken, and pork from a local organic farm, and we buy local organic produce where we can. We urge you **Not** to cut funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture. These are important programs for the future health of American youth.

COMMENT OF ALARIC TOY

Date Submitted: Friday, May 18, 2012, 6:21 p.m.

City, State: Pleasant Hill, CA

Occupation: Acupuncturist

Comment: I want **All** my food labeled according: GMO, non-GMO, hormone added, no-hormones added, *etc.* I have the right know everything that was added or altered to the food I buy. We need to **Stop** Federal subsidies of corn and high fructose corn syrup. Scientific study after study keeps showing that one of the main culprits in our declining health and quality of life is due to our lack of good, clean, nutritionally dense food. The farm bill needs to promote the health and wellness of the nation and our family farms. Our subsidies should also not impact international relief efforts where local farmers cannot compete with international foodstuffs. It doesn't make sense and isn't fair to the people or the world.

COMMENT OF CARMEN TRACEY

Date Submitted: Thursday, May 17, 2012, 9:39 a.m.

City, State: Wauwatosa, WI

Occupation: Holistic Health Care

Comment: In the 2012 Farm Bill, please make sure that we protect the Conservation Stewardship Program from unfair funding cuts, and improve it by ranking applications solely on their conservation benefits. Farmers count on CSP and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife—all while farming profitably. I would also like to see us fund the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture. Thank you for taking the time to listen to my input.

Sincerely,

CARMEN TRACEY.

COMMENT OF ELLEN TRACY

Date Submitted: Friday, May 18, 2012, 7:30 p.m.
City, State: Ellsworth, ME
Occupation: Administrator
Comment: Healthy, untainted food does not originate from mass produced bid ag, using chemicals that are bad for the land, bad for animals, and bad for humans.

COMMENT OF SUSAN TRAFFORD

Date Submitted: Thursday, May 17, 2012, 11:34 a.m.
City, State: Jeannette, PA
Occupation: Educational Consultant
Comment: How oblivious are those who want to cut funds. Now, more than ever, food banks and such are saviors to thousands upon thousands of people here in our small corner of the country. Poor and jobless and now starving?

COMMENT OF SHARON TRAGESSE

Date Submitted: Friday, May 18, 2012, 11:26 a.m.
City, State: N. Huntingdon, PA
Occupation: Human Resource Director
Comment: I would like to point out that feeding our neighbors is a public-private partnership, and encourage you to do your part I want and we need our government to do its part.
 Cutting anti-hunger programs will increase hunger in America, as well as the associated health care, educational, and economic costs of food insecurity and poor nutrition.
 Please remember the families who are struggling in our community, and I urge you to protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization.
 Our country needs these programs now more than ever!

COMMENT OF RABIA TREDEAU

Date Submitted: Saturday, May 19, 2012, 2:08 p.m.
City, State: Prescott, AZ
Occupation: Teacher
Comment: Please, please do the right thing for those of us in the middle. Farms are important; we need more farmers and more good food for children, adults, the disabled and the elderly.

COMMENT OF GINA TRENKAMP

Date Submitted: Friday, May 18, 2012, 2:04 p.m.
City, State: Maple Valley, WA
Occupation: IT
Comment: Reviewing the Farm Bill:
 It is my understanding that "While Congress is looking to get rid of direct payments to commodity farmers, the subsidized insurance program it proposes to replace it with will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk."
Get Corporations Out Of Our Food!
The very nature of a corporation is to pay back monies to their stock holders . . . why should we risk our future with corporations?
 If the statement above is true, then you need to be our public servant and protect our future, our food and our families. **Get Corporations Out Of Congress and Out Of America!**
 Step Up ladies and gentlemen! Our Country was founded by an agronomy society. **Why** would we ever **Allow** a corporation to **Own** our food?
 America is getting tired of **Corp Greed!**

COMMENT OF PATRICIA TRICE

Date Submitted: Friday, May 18, 2012, 3:30 p.m.
City, State: Fresno, TX
Comment: As a consumer of produce and other farm products, and one who values a healthy lifestyle that is linked in large part to what we eat, I ask that you

please do all that is humanly possible in and out of Congress to promote organic farming in the United States of America/United States and pass bills that favor organic farming and oppose bills that promote farming which alters the genetics of the seed and uses dangerous chemical pesticides.

COMMENT OF DANIEL TRICK

Date Submitted: Saturday, May 19, 2012, 10:41 p.m.

City, State: Erlanger, KY

Occupation: Logistical Support

Comment: I imagine it would be difficult to think of another developed country with the same level of health problems that the U.S. has. This is due, at least in part, to our farm policy.

Subsidies for massive monocrop farms have led to an abundance of unhealthy filler ingredients that find their way into nearly everything we eat. One trip to a typical supermarket can verify the unnecessary presence of corn based sweeteners in almost all of the products on the shelf. For example, nearly every brand of sliced bread contains corn syrup. Is there a legitimate reason for this? The introduction of sweeteners into even our supposedly savory foods has shifted the American palate to expect these filler ingredients in our foods, creating a dangerous cycle of unhealthy food choices. I would argue that this has something to do with the rate of diabetes in our country.

As our representatives, I ask you to take the responsibility of creating a better farm bill seriously. I am no expert on matters of agriculture, but I sincerely hope that members of the house will consider the research of doctors, dieticians, and the American Diabetes Association over the interests of agribusinesses that are not concerned with the health of Americans. Our country is quickly mounting a medical bill that we can no longer afford to pay and it is time for a change in the agricultural policies that influence our diets. Thank you for your time.

Sincerely,

DANIEL TRICK.

COMMENT OF KRISTY TRIONE

Date Submitted: Friday, May 18, 2012, 2:15 p.m.

City, State: Redmond, WA

Occupation: Nonprofit Organizational Consultant

Comment: A farm bill should recognize that soil health is our health. Growing food on clean, organic, healthy soil is key to our health and economic vitality. Supporting small family farms, encouraging organic, diverse, and permaculture principles should be at the core of any policy on farming and agriculture for our nation.

COMMENT OF JOHN TRIPI

Date Submitted: Friday, May 18, 2012, 1:10 p.m.

City, State: Howell, MI

Occupation: Retired Engineer

Comment: I am requesting your support to maintain a healthy food supply, protect organic product production and reduce the influence of large agricultural corporations.

COMMENT OF MELISSA TROIANO

Date Submitted: Friday, May 18, 2012, 12:24 p.m.

City, State: Hamden, CT

Occupation: Financial Counselor for Yale Fertility Center

Comment: How about we knock out the big factory farming funding, instead of the important work that is going on with the local green movement of food sourcing? I want to know when there are GMO's in my food. These corporations are happy to drive down the cost of production at the expense of mine and everyone else's health. Please put a stop to that.

Thank you,

MELISSA.

COMMENT OF MARCIA TROTCHIE

Date Submitted: Friday, May 18, 2012, 2:40 p.m.

City, State: Port Washington, WI

Producer/Non-producer: Producer
Type: Fruits, Nuts, Vegetables, Other
Size: Less than 50 acres

Comment: As a small scale farmer, it is extremely difficult competing against the big farmers that keep buying up all of the land because they can afford it and can outbid any of the small farmers. Also, they can produce so much more at a lower price and it is an unfair advantage for the smaller farmer to have a chance. We do not belong to the Earth . . . we are the caretakers of the Earth and any of the decisions we make, we should look at how it will impact the next 7 generations . . . this is the only unselfish way to live in balance with the land. We must do this in order to heal the land, the water and the people.

COMMENT OF CONNOR TROTT

Date Submitted: Sunday, May 20, 2012, 10:36 p.m.
City, State: Sylva, NC
Occupation: Student
Comment: Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I am a young farmer and I'd like to share my support for programs that help the next generation of growers build strong farm businesses. As it's estimated that 125,000 farmers will retire in the next 5 years, it's absolutely critical that farm bill programs help citizens get started in this challenging field. I depend heavily on locally produced agriculture here in Western North Carolina. It is a choice I actively make as easy as it is to walk into Walmart and buy veggies from Chile and chicken eggs from Indiana. Many of these small farms are first generation farmers and people my age. Young adults who made the choice to grow foods for their community. Please help make their job easier and not harder. I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

CONNOR TROTT, BS Horticulture,
 Auburn University 2007.

COMMENT OF DAVID WESLEY TROTTER

Date Submitted: Friday, May 18, 2012, 5:03 p.m.
City, State: Seattle, WA
Occupation: Writer, Artist, Activist Retailer/Wholesaler

Comment: It is absolutely imperative that the health and well-being of all citizens and sojourners in the USA must come before all else, especially before corporate profits and controls. Our food must be healthy, and that requires Healthy and Fair farming practices that put natural and organic foods, livestock and land first.

It is Congress's absolute responsibility to protect the well-being of all the citizens who elected them, not just the ones who line their pockets and grease their personal wheels.

We must have:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Full funding for conservation programs, such as the Conservation Stewardship Program,
- Enrollment in any new insurance subsidies being tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintenance of the EQIP Organic Initiative.

Sincerely,

DAVID W. TROTTER,
Washing State,
7th Congressional District.

COMMENT OF KATHLEEN TROTTER

Date Submitted: Friday, May 18, 2012, 12:27 p.m.

City, State: Lowell, AR

Producer/Non-producer: Producer

Type: Field Crops

Size: 151–300 acres

Comment: Even as owners of farmland that produces field crops, we acknowledge that corn and soybeans don't need subsidies. And multi-national corporations don't need subsidies. But small farmers creating and using sustainable methods to produce healthy food for our neighbors **Do Need Subsidies**. Update the farm bill to 21st century needs and potential!

COMMENT OF THOMAS TROTTER, JR.

Date Submitted: Friday, May 18, 2012, 1:19 p.m.

City, State: San Francisco, CA

Producer/Non-producer: Producer

Type: Dairy, Dry Beans & Peas, Field Crops, Poultry/poultry products, Vegetables

Size: Less than 50 acres

Comment: For the last 2 years I have farmed small-scale, diverse operations. I have seen what neighboring conventional, industrial-scale growers have done to the quality of soil, air, water and the lives of their workers, and I have worked to reverse those practices in my own operation. As you work on the farm bill, please keep in place funding for research into organic, sustainable practices and maintain (if not increase) funding for EQIP and Beginning Farmer/Rancher programs—both of which are essential to helping young, small-scale growers like myself improve our systems and feed our communities in a healthy way. And as you assess the topic of subsidies, please consider the importance of attaching requirements around conservation of soil, air, and wildlands to these funds. They provide important motivations to prompt even the largest monocroppers to incorporate a modicum of sustainability into their practice.

Thank you,

Thomas Trotter, Jr.

COMMENT OF MOLLY TRUEBLOOD

Date Submitted: Friday, April 13, 2012, 1:23 p.m.

City, State: Indianapolis, IN

Occupation: Market Manager

Comment: Thank you for accepting comments on this year's farm bill. I am the market manager for the Indy Winter Farmers Market in Indianapolis. In an urban area, we are one of the few organizations providing fresh, local, clean food to Indianapolis residents. We bring in small farmers to downtown and help bring more fruits,

vegetables, and produce into the diets of our community. We continue to find it difficult to meet the needs of our community, despite the improvement of the economy. Our market has had the goal of accepting food stamps for the past 3 years, and we were finally able to design and implement a program this season. We have seen a huge return and increased interest in using food stamps at our market. This is beneficial not only to our community, but also to our farmers. Fresh, nutritious food is now available to folks in our community who wouldn't normally be able to shop at a farmers market. We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the people struggling with hunger in Marion County, and I urge you make them a priority in the next farm bill. Thank you for your consideration.

Sincerely,

MOLLY TRUEBLOOD.

COMMENT OF THOMAS TRUEMPY

Date Submitted: Friday, May 18, 2012, 2:29 p.m.

City, State: Phoenix, AZ

Occupation: Engineer

Comment: The most important thing we consider in terms of healthcare and future well being is that of farming and sustainability. Good quality food is critical to good health. We are just now seeing the affects of factory farming on health. Vegetables with inferior nutritional value from genetic modification. Beef with poor nutritional value from cows being forced to eat contrary to their nature (grains and corn). Feedlot operations spoil the environment with manure overflows. These practices are not sustainable. I would like to see subsidies go to furthering organic, sustainable farming and no subsidies going to growing more corn. It is increasingly clear that companies like Monsanto are not concerned with the public's well being. They are only concerned with consolidating power.

COMMENT OF DARLA TRUITT

Date Submitted: Friday, May 18, 2012, 4:53 p.m.

City, State: Aloha, OR

Occupation: Programmer

Comment: The money we put into the food supply matters. With childhood obesity on the rise and the huge medical costs resulting from diseases associated with obesity, we cannot ignore the impact food subsidies have on our health. Do subsidize organic and sustainable farming. Do not subsidize corn and big ag.

COMMENT OF LEON TRUMPP

Date Submitted: Saturday, May 19, 2012, 9:55 a.m.

City, State: Sedalia, MO

Occupation: Water Softener Dealer—Kineticco

Comment: End subsidies to the farmers (especially tobacco) and tighten controls on big producers to ensure animals are treated humanely. Allow hemp to be grown so that farmers can compete with foreign producers.

COMMENT OF JOEL TRUPIN

Date Submitted: Friday, April 27, 2012, 10:41 a.m.

City, State: Marshfield, VT

Occupation: Retired

Comment: Strengthen and protect programs like TEFAP and SNAP in the farm bill—which funds programs like TEFAP and SNAP that help vulnerable children, seniors, and low-income families.

COMMENT OF CAMILLE TSCHAGGENY

Date Submitted: Friday, May 11, 2012, 10:06 p.m.

City, State: Beaverton, OR

Occupation: Banking

Comment: No more big-agri subsidies, Monsanto, Dow, Bayer, ConAgri, ADM, they need to be removed from public funding! Our agriculture policies and financial support must be focused on **Real Food** that is sustainably grown and environmentally safe.

COMMENT OF ANN TUBBS

Date Submitted: Friday, May 18, 2012, 4:44 p.m.

City, State: San Francisco, CA

Occupation: Retired Healthcare Administrator

Comment: There are hundreds of reasons why the agricultural policy of the U.S. should be drastically changed. Our growing obesity problem is one, a big one, so to speak. The disappearance of species of fruit and vegetables—and of family farmers—is another. The gross unfairness of huge subsidies to agribusiness is another. And then there is the horrible way farm animals are treated in many of the huge factory farms.

COMMENT OF CHRISTINA TUCCILLO

Date Submitted: Thursday, May 17, 2012, 12:37 p.m.

City, State: Berkeley, CA

Occupation: Recruiter

Comment: I want a farm bill that supports small and organic farmers, not huge corporate farms that cut corners and produce food that makes us sick. I want healthy food for children, at home and at school—no pink slime! I want to make sure we protect the environment for the future.

COMMENT OF FREDERICK TUCK

Date Submitted: Sunday, May 20, 2012, 10:21 p.m.

City, State: Stanardsville, VA

Occupation: Retired Geologist

Comment: The Agriculture Department has been giving away tax dollars in subsidies to landowners for not farming certain crops, in an effort to 'manage' production for decades. This wasteful, welfare practice must end. If it was intended to help preserve small family farms, it has failed miserably. It rewards laziness, undermines capitalism, and ultimately tends to contract the supply of America's food to a few large corporations, specializing in chemical-intensive, monoculture production. The market must be allowed to determine production via price discovery.

Small family farmers, especially those who use sustainable, organic growing methods must be encouraged. Food labeling helps consumers make informed choices and should include information about genetically engineered products as well as any drugs, hormones, or other chemicals involved in food's production.

Tax dollar welfare for mega-corporations must end, now. We need a new agriculture policy that promotes increased local production, grows the number of independent farms and rewards sustainable farming practices.

COMMENT OF JEFFREY TUCKER

Date Submitted: Friday, May 18, 2012, 2:32 p.m.

City, State: Miami, FL

Occupation: Nonprofit Manager

Comment: The farm bill needs to support the citizens and a sustainable, practical ag economy based on wise land use, diversity and family farms, the backbone of successful agriculture.

COMMENT OF DENISE TUGADI

Date Submitted: Saturday, May 19, 2012, 8:05 a.m.

City, State: Nashville, TN

Occupation: Cook

Comment: Organic farmers should be allowed to grow food liked they have done for centuries without restrictions and bullying from agri-farming. It's a basic human right to be able to feed ourselves, let it be.

COMMENT OF VICTORIA TUGGEY

Date Submitted: Friday, May 18, 2012, 2:25 p.m.

City, State: Madison, AL

Occupation: Artisan

Comment: Start fresh. Start by throwing out all the old subsidies for corn and grain and offer subsidies for non-CAFO and clean food farmers. Promote wellness and sustainability by putting small farmers back in the game and to promote locavorism. Make organic certification affordable for the small farmers who more

than abide by its rules and philosophy. Subsidize vegetables. And offer those surplus veggies to school lunch programs. It will decrease health care costs and elevate the nation mentally, physically and financially. That's doing the right thing.

COMMENT OF LAURA TUMAK

Date Submitted: Saturday, May 19, 2012, 8:05 a.m.

City, State: Clarinda, IA

Occupation: Homemaker

Comment: Family Farms are disappearing in America, while the big companies that monopolize food supply are getting bigger.

Meanwhile, conventional farming has shifted from one with natural pest control to one where more and more pesticides are used. Farmers who choose not to use genetically modified corn or soy have a difficult time finding seeds to plant or an elevator to sell their crops to. The big companies specializing in seed sales, genetically modified crops and pesticides are getting bigger and bigger.

Farm subsidies should be for family farms, and to help those who choose to farm with environmentally sustainable methods.

COMMENT OF SUSAN TURNBULL

Date Submitted: Friday, May 18, 2012, 12:09 p.m.

City, State: Frederick, MD

Occupation: Retired

Comment: Please stand up to the big agro-businesses to help us save family farmers and our own health from dangerous (and tasteless) practices. Let us have our old-fashioned produce again!

COMMENT OF CHRISTIANE TURNER

Date Submitted: Friday, May 18, 2012, 11:17 a.m.

City, State: Ketchum, ID

Occupation: Board Member of Idaho's Bounty Co-op in Ketchum, Idaho

Comment: As the each of you considers the upcoming 2012 Food and Farm Bill, I insist that you carefully and copiously:

- Consider the job-producing, environmentally sound, healthful and the long-term community strengthening benefits of financially supporting this rapidly growing local, organic and sustainable farming movement.
- Reconsider and prevent the irreversible and long-term damaging effects that have occurred and continue to transpire from decades of financial supporting toxic industrial farming linked to politically-driven commodity programs.
- Consider the now well-documented and widespread economic, health and environmental damage caused by subsidizing these large, industrial, toxic farms.
- Consider that each of your influence today will be historically documented and recorded so that our children and grandchildren will have the ability to look back at these critical times and to judge knowing that each of you had the opportunity to intelligently change the course of history and to redirect financial support in favor of truthful, healthful, fair and sustainable farming.

I urge you to consider all the above in a personal and ethical manner and not a political one.

Thank you and sincerely,

CHRISTIANE TURNER.

COMMENT OF JOAN TURNER

Date Submitted: Friday, May 18, 2012, 11:54 a.m.

City, State: Strasburg, CO

Occupation: Retired Childcare

Comment: Please find a way to stop subsidizing the farm crops that are making us sick and to help out the (small, organic) farmer raising fruits and vegetables.

COMMENT OF WARREN TURNER

Date Submitted: Friday, May 18, 2012, 1:42 a.m.

City, State: Columbia, MD

Producer/Non-producer: Producer

Type: Bioenergy, Fruits, Specialty Crops, Vegetables

Size: Less than 50 acres

Comment: Please afford organic growers the same considerations that are granted conventional growers. As you know, there is a local and organic movement that has been in place for many years. It lessens our carbon footprint and strengthens our local economy and provides the freshest and most wholesome and nourishing food. As an organic grower, may I add that two avenues of assistance are vital for our existence: both **Drip Irrigation** and **Fencing**—that is, fencing that excludes deer from our food plots, are prerequisites for small growers.

Both of these are expenses that are difficult to bear for small growers, but are necessary for successful operations. Every other consideration that can be identified and afforded small growers is beneficial for them and for local economies.

(From a 40 year organic and commercial grower).

WARREN TURNER.

COMMENT OF LAURA TURZO

Date Submitted: Friday, May 18, 2012, 12:42 p.m.

City, State: Brooklyn, NY

Occupation: Graphic Artist

Comment: So much of our lives a is tainted by the control of big business, whose policies are most often against health and safety.

We need to assure that farmers are supported in producing healthy food that will not increase the epidemic of “idiopathic” illnesses. Especially farmers that do not use toxic methods.

Please protect farmers from the bullying of Monsanto, I would like to have my grandson (and your grandchildren too) live in the possibility of being disease free.

COMMENT OF ROB TWO-HAWKS

Date Submitted: Friday, May 18, 2012, 12:34 p.m.

Type: Specialty Crops

Size: Less than 50 acres

Comment: Agricultural reform is long past due. And, as demand increases along with the deficit . . . the need for more sustainable methods will make itself known loudly and clearly. Industrial agriculture is straining the economy as well as the carrying capacity & health of the land. Without viable and affordable forms of agriculture America is far from secure. I would hope that more congresspersons would get out of their offices and into the fields for awhile to appreciate this situation more directly. Thanks for your consideration & time.

COMMENT OF MALIN TYBAHL

Date Submitted: Friday, May 18, 2012, 10:11 p.m.

City, State: Brooklyn, NY

Occupation: Actor/Teacher

Comment: The state of Agriculture is appalling right now. The way agriculture is conducted today waste more of our water resources than anything else, and are the biggest polluters of our ground water and destroys our oceans at a terrifying rate, with the heavy pesticide use. Not to mention it erodes the soil leaving it unable to nurture anything to grow. Big farmed food is so toxic, due to all pesticides, it may be more harmful to eat than the nutrition's it contains. The over production of certain grains, like soy and corn, has led them to being ingredients in almost everything as well as feed to cows, who can't break down corn naturally but get sick by it, leading to higher use of antibiotics. Consequently the population is getting fatter and fatter, and sicker and sicker, but with less and less chances to actually cure a simple infection. It's a downward spiral of destruction, of not just our own species but many. As Einstein said, when the bi is gone we have about 4 more years to live.

Healthy and sustainable farming practices reduces the environmental costs, the carbon imprint and health care costs. Want to save money? Want a healthier population? Then stop giving tax dollars to Big Agribusiness.

All subsidies to big polluting agribusiness need to stop and they should instead have environmental fines when cultivating the land in a way that is destructive to the planet. Subsidies should instead go to small sustainable organic farms, so the crap food actually cost its true value with all the pesticides and carbon pollution on top. Healthy foods should be inexpensive and more available so even people mak-

ing minimum income can choose to buy it. And the truth is, organic food is not more expensive than crap food if it wasn't for the government supporting crap food. And all GMO should be labeled, as well as where a product comes from. The future of our planet is dependent on what choices we make, and how we choose to cultivate our land is a big part of that. Our options are to do it in a sustainable respectful way in balance with nature, or wasteful and poisonous for a short period of time and then have a shortage of food and water in a few years. What do you choose for our children and coming generations?

COMMENT OF JULIA TYLER

Date Submitted: Tuesday, May 15, 2012, 1:29 p.m.
City, State: Ventura, CA
Occupation: Director of Religious Education
Comment: Hello,

I am concerned about the health of our American people. I would like to see a farm bill that increases access to healthy affordable food. I work with Latino youth in Oxnard, and I fear the toll the gas station food they consume has taken on their bodies.

My boyfriend works as a technician for heart surgery, and believes it is not a coincidence that diabetes and heart failure are more common among poor people and their nutrient-poor diets.

I would also like the bill to cut subsidies to corn and soy bean growers, and offer these subsidies to small, organic farmers who prioritize our Earth's sustainability. I care that my grandchildren's children live on a planet that is still healthy to walk on and breathe in. On my commute to work, I am not happy to see strawberry growers spraying pesticides into the soil. These toxic chemicals will be there for many years, and will harm many people and animals. I am not happy that the people spraying these chemicals have to wear big white suits and protective face masks. There are other, better ways to grow and produce food, and, in great seriousness, I hope writing to the House Committee on Agriculture can help make a positive difference for our people and country.

Warmly,

JULIA TYLER.

COMMENT OF LORRAYNE TYLER

Date Submitted: Friday, May 18, 2012, 10:43 a.m.
City, State: Hamilton, MT
Comment: We need real food in the USA, and we need it to be available everywhere, to everyone, especially those in need and those who can't afford quality, so they squander money on cheap junk food & fast food.

COMMENT OF LAURA TYLL

Date Submitted: Thursday, April 19, 2012, 2:29 p.m.
City, State: Ubly, MI
Occupation: Economic Development
Comment: My father and brother are running the family farm as third and fourth generation farmers. I also do the bookwork for the farm and see how it's struggling financially please support the farm bill and let's get those milk prices back up! I would love to see my son and grandchildren someday involved in the family farm.

COMMENT OF S. TYROLER

Date Submitted: Friday, May 18, 2012, 2:12 p.m.
City, State: Watsonville, CA
Occupation: Therapist
Comment: Supporting High standards for organic farming practices is a health crisis. We are killing our bees and other pollinators with toxins and pesticides which will lead to our demise.

COMMENT OF LINDA TYSON

Date Submitted: Sunday, May 20, 2012, 11:28 p.m.
City, State: Flossmoor, IL
Occupation: Garden Designer

Comment: We need a fair and healthy farm bill! It's time for real reform of the bill. Small, organic, sustainable farmers producing healthy food, including fruits, vegetables, and sustainably-raised, pastured livestock should more supported

Subsidies paid to large industrial, and corporate-owned farms should be phased out.

We need a farm bill that protects our nation's small farmers and supports local food security.

COMMENT OF JIM UFKIN

Date Submitted: Monday, March 19, 2012, 9:52 p.m.

City, State: Geneseo, IL

Producer/Non-producer: Producer

Type: Field Crops

Size: 301-500 acres

Comment: It is time to get rid of the direct payment and put in a financial safety net to help in times of low yields or very low prices. Based on a strong crop insurance program.

COMMENT OF SHAWN UHE

Date Submitted: Friday, May 18, 2012, 1:45 p.m.

City, State: Edwardsville, IL

Occupation: Mom

Comment: I am surrounded by farm land and although it is a beautiful setting, my children and I are also surrounded by dangerous pesticides and herbicides that are damaging to the water, the air and the land. I am very concerned about the negative effects these chemicals will have on my family. Please write and support legislation that eliminates the need for chemicals on crops.

Thank you,

SHAWN UHE.

COMMENT OF SUSAN UJCIC

Date Submitted: Friday, May 18, 2012, 11:01 p.m.

City, State: Rochester, WA

Producer/Non-producer: Producer

Type: Dry Beans & Peas, Fruits, Vegetables

Size: 50-150 acres

Comment: It is time to subsidize vegetable, fruit and legume farms and support the recommendation to consume 6-9 a day. If we all wanted to adopt the diet recommended by the USDA, we would run out of fruits and vegetables in 3 days. With the childhood obesity and diabetes epidemic alone, one would think that would be enough to motivate a fundamental change in at least our children's food landscape. Please use good judgment and support a new agricultural vision which will invigorate rural communities.

SUBMITTED STATEMENT BY UNILEVER NORTH AMERICA

This testimony is submitted on behalf of Unilever, North America, one of the world's leading suppliers of fast moving consumer goods. We work to create a better future every day and help people feel good, look good and get more out of life with brands and services that are good for them and good for others. In the United States, the portfolio includes food brand icons such as: Ben & Jerry's, Bertolli, Breyers, Country Crock, Good Humor, Hellmann's, I Can't Believe It's Not Butter!, Klondike, Knorr, Lipton, Popsicle, Promise, Ragu, Skippy, Slim-Fast, Wish-Bone, and a number of personal care products. Unilever employs over 10,000 people in the United States with manufacturing sites in 19 states and 2010 sales of over \$9 billion.

As one of the largest manufacturers of ice cream and peanut butter in the U.S., an adequate supply of sugar is imperative to our success and ability to grow our business. The 160 employees at our plant in Little Rock, Arkansas, work at the sole production site for Skippy peanut butter for the United States and for export to over 50 countries. In Jonesboro, Arkansas, 400 Unilever employees manufacture our line of personal care products. Our 100 person sales team in Rogers, Arkansas also works to ensure Unilever products are stocked at Wal-Mart stores across the country.

Unilever is dedicated to producing quality products close to their point of sale, reducing miles traveled and our carbon footprint. In keeping with our strategy of producing near where we sell, Unilever recently invested \$230 million into expanding an existing plant in Covington, Tennessee which will employ over 200 people and manufacture ice cream brands like Breyers, Good Humor, Klondike and Popsicle. Our ability to grow, however, is severely impacted by commodity prices and with U.S. sugar prices at nearly twice the world market rate, sugar-containing products Unilever manufactures in the United States are at a competitive disadvantage to products made where sugar can be purchased at world prices.

Sugar is found in a wide variety of foods and beverages. It is not only a sweetener, but has other important functional properties for baking and as a natural preservative. Sugar is an ingredient in ice cream, frozen vegetables, pasta sauce, peanut butter, canned fruit and many other products.

Many more Americans work in these sugar-using industries than in sugar production and processing. According to the U.S. Census Bureau's Annual Survey of Manufactures for 2010, total employment in cane sugar milling and refining, and beet sugar manufacturing, was only 13,009. In addition, according to the Census of Agriculture, there are 4,022 sugar beet farms and 692 sugar cane farms in the entire United States.

By contrast, in 2010 employment in those segments of the food and beverage industry that use significant amounts of sugar was 592,176. Yet current sugar policy is designed to favor sugar producers and processors by penalizing businesses like Unilever that purchase sugar.

Current sugar policies represent an antiquated program that needs to be reformed. These policies raise consumer prices, distort markets, create enormous additional costs for businesses and encourage the movement of jobs to other countries, where world market prices can be accessed.

The U.S. sugar program has three basic features. Price supports keep U.S. sugar prices above world price levels. Marketing allotments are designed to restrict supplies in the domestic market. Import quotas also restrict how much sugar can be purchased from international markets.

None of these policies normally involves direct Federal spending, but all raise input costs for the manufacturing sector and create economic inefficiencies. The negative impact of the sugar program has been even greater since passage of the 2008 Farm Bill. In that farm bill, Congress: (1) placed new limitations on the Secretary of Agriculture's ability to increase sugar import quotas, (2) created a new "Feedstock Flexibility Program" to buy surplus sugar and re-sell it to ethanol plants at a loss to taxpayers (fortunately, this program has not yet been used), and (3) raised sugar price supports and took other measures that further distorted markets.

In the period covered since the passage of the 2008 Farm Bill, both wholesale and retail U.S. sugar prices set all-time records. Annual consumer costs of sugar rose by \$4 billion, by some estimates. Ending stocks of sugar fell below USDA's traditional target every single year, with the Secretary of Agriculture having less flexibility to allow additional sugar imports when needed by the market.

As an example of how bad things have been under the new policies, in 2009/10, the United States imported 200,000 tons of "high-tier" or "over-quota" sugar. This is sugar that had to be imported outside the limits set by import quotas to meet domestic market needs, even though such imports are subject to a very high, normally-prohibitive tariff.

Prices were so distorted in 2009/10, and supplies so short that importers actually paid the prohibitive tariff because they had to have the sugar. Sugar users paid the extra tariff of over 15¢ per pound because they simply could not obtain the sugar at equal or lower cost from domestic production, from normal import quota sources or from Mexico (which is not subject to import quotas). Obviously, these supply sources were either out of sugar, or domestic prices were so artificially high that the transaction actually made economic sense, even after factoring in the "prohibitive" tariff.

A recent study by Iowa State University economists estimated that U.S. consumers could save \$3.5 billion a year, and our economy could add up to 20,000 jobs each year, if Congress reformed the sugar program. The 2012 Farm Bill is the time for this much-needed reform. Congress should take a hard look at the whole panoply of sugar policy, but especially at the counterproductive subsidies that were added in 2008. Getting rid of these would be a good start to a more thorough reform to eliminate unnecessary and unwarranted government-directed distortions of the marketplace.

Our company is proud of its history as a producer of products that help people feel good, look good and get more out of life and we are proud of our 10,000 employees in the United States. We want to continue to generate both jobs and economic

activity. Unfortunately, the current sugar program works against our ability to do that. Congress can help consumers, workers and businesses alike by reforming an outdated, regressive sugar program in the 2012 Farm Bill.

COMMENT OF NATHAN UNSWORTH

Date Submitted: Friday, May 18, 2012, 10:06 a.m.

City, State: Newton, IA

Occupation: City Parks-Administrative Superintendent

Comment: I was born and raised in a small farming town in Illinois called Alexis, went to Iowa State University and majored in Animal Ecology (wildlife) and minored Agronomy, and continue to live in Iowa today. As a young professional that stands up for conservation and rural development, I hope this next farm bill includes three very important things:

1. Increased funding for water quality issues associated with agriculture
2. Continued funding for the CRP Program
3. Funding to help attract and retain young professionals in rural areas.

My hope is that the new farm bill will address these three things. The first two are very similar and comes from my conservation background. Water quality is not improving in Iowa and elsewhere around the Midwest. We need to do everything we can to protect clean water for our citizens. This is truly an economic development issue because despite what some people seem to think, we all need clean water to live. Clean water is not only important to humans, but the livestock and crops we grow in the Midwest, too. I would like to see congress continue to fund water quality projects like the buffer program, giving money to improve water quality on recreational lakes and rivers around the Midwest, and enact stricter polices that ensure producers are following their farm plans.

CRP is another huge portion of the farm bill that I support. When CRP was at it is highest levels our pheasant population were up, too. If you have come to Iowa you know our pheasant population is down along with countless other species. In my eyes every species is worth trying to help. However, I know we can't protect and save everything. However, I know the more CRP we have on the ground the better our game birds numbers will be, which will help bring back our hunting/tourism business. Plus, the CRP program also has other benefits—promotes cleaner water, reduces soil loss, take CO₂ out of the atmosphere, *etc.*

Finally, my last important piece is the impact the farm bill has on rural life. As someone that grew up in a small town and still resides in a rural county, I promote rural development. We need polices in the farm bill that promotes rural areas abilities to retain and recruit young professionals. The number one reason why young professionals are leaving areas is lack of jobs. However, I feel that if we can build up the rural areas around the larger cities, we would see young people willing to live farther out of the cities and in the smaller towns. The way this can happen is by ensuring rural areas are ascetically attractive, provide recreational opportunities, potentially provide mass transit opportunities to the cities, *etc.* I just think more can be done to promote young professionals recruitment in the rural areas. I also think high speed rail going through out the midsection of the country would be a positive aspect of rural development, but admit that might pertain more closely with other legislation.

Thank you for taking the time to read my comments. As a proud voter, I hope you will listen to “real rural people” and enact policies we want, not the policies of large corporations that only help them profit. We are the ones that live in the rural areas, we care about their future, and depend on their prosperity to live.

COMMENT OF STEPHANIE URBAN

Date Submitted: Sunday, May 20, 2012 3:17 p.m.

City, State: Bethesda, MD

Occupation: Artist/Designer

Comment: As time goes on, we have more and more evidence that the food we eat affects our health. People who buy organic food should be totally secure in the knowledge that what they are purchasing is the purest, cleanest food grown with no genetic modification or added substances.

COMMENT OF SHARON USHER

Date Submitted: Saturday, May 19, 2012, 9:11 p.m.

City, State: Northport, MI

Occupation: Counselor/Psychology

Comment: I am concerned about the violence that big agriculture (like Monsanto) is doing to the people all over the planet (in countries where their produce is permitted) and to the land that they are using to farm their toxic products.

COMMENT OF ADA USTJANAUSKAS

Date Submitted: Friday, May 18, 2012, 5:00 p.m.

City, State: Old Greenwich, CT

Occupation: Consultant

Comment: America is fast becoming the bane of the civilized world as our food production becomes more commercialized—and less how food is meant to be grown.

COMMENT OF KELLY UUSITALO

Date Submitted: Friday, May 18, 2012, 11:34 p.m.

City, State: Everson, WA

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: More financial investment needs to be given to small producers providing sustainably produced products for local communities. Local producers provide food security and local jobs that create strong healthy communities. It is imperative that we invest in our future and small scale local farmers; we are the ones on the front lines offering healthy food choices to our local communities and diverse populations. Unfortunately too much money and preference has been given to large agriculture businesses, lobbyist and corporate interest. We in this nation need to redirect our financial investment away from commodity subsidies into a food system that is based on healthy food that is affordable and available to everyone. We will never achieve this if we continue to funnel all our investments into and industrial agriculture system that produces industrial byproducts rather than food. Support local, invest in the future and promote sustainable agriculture by directing a large portion of this year's farm bill to small scale farmers, farmers markets, healthy school lunch programs and extensions. Invest in our future not corporate futures!

Thank you,

KELLY UUSITALO,
Organic Farmer.

COMMENT OF IMENA VALDES

Comment: We as a people need a government that works in favor of our best interests, such as our health and well-being. Not a government that caters to corporations and profits.

COMMENT OF ABEL VALENZUELA

Date Submitted: Friday, April 20, 2012, 9:54 a.m.

City, State: Milford, UT

Producer/Non-producer: Producer

Type: Livestock

Size: Less than 50 acres

Comment: Farm Takeover Bill legislation, would not improve the well being of the animals neither food safety or quality, it would increase cost of production and we are going to reduce production like it happened in Germany when in 2010 they regulated the cage of hens. This bill is not based in science but rather in Feelings.

Thanks.

Sincerely,

ABEL VALENZUELA.

COMMENT OF JACQUELINE VALENZUELA

Date Submitted: Friday, April 20, 2012, 2:14 p.m.

City, State: Mesa, AZ

Occupation: Stay-at-Home Mom

Comment: I am tired of having poison ridden fruit and vegetables. The health of my family is important to me and I feel like the system that we have for our agriculture is broken. The pesticides that are used are so horribly dangerous to our health I can't even understand why they were allowed to be put to use in the first place. We need changes to this broken system. Please support changes to the upcoming farm bill that will help reform the system we have now. Support BFROA and LFFJA. Thank you for your help.

COMMENT OF ENA VALIKOV

Date Submitted: Friday, May 18, 2012, 3:20 p.m.

City, State: Long Beach, CA

Occupation: Veterinarian

Comment: I believe it is crucial to support organic farmers utilizing sustainable techniques with minimal use of herbicides and insecticides which have significant cumulative effects on public health. It is vital to our health to get away from genetically modified commodity crops and create a future of farming in which the livestock is treated humanely and the Earth's bounty is harvested in harmony with nature.

COMMENT OF ALEXANDRA VAN DE KAMP

Date Submitted: Friday, May 18, 2012, 12:19 p.m.

City, State: Stony Brook, NY

Occupation: University Lecturer

Comment: How can the health of a country's citizens be less important than corporate profit? Healthy food is also practical as it prevents and fights against other health issues that come from consuming foods affected by pesticides, hormones and anti-biotic usage. A healthy nation physically, is just that, a healthy nation! How else can we move forward as a nation, compete with other rising global countries, and be at our best intellectually and physically if we are not truly "healthy"?

COMMENT OF MICHELE VAN DERRICK

Date Submitted: Friday, May 18, 2012, 2:43 p.m.

City, State: West Newbury, MA

Occupation: Mother

Comment: Please stop letting Monsanto walk all over the government. The people deserve better. Let's get the chemicals out of our food supply. Please make organics much easier to access and afford.

Thank you.

COMMENT OF ANNELIES VAN DOMMELEN

Date Submitted: Saturday, May 19, 2012, 8:08 a.m.

City, State: Lambertville, NJ

Occupation: Artist, House Painter, Bartender, Etc., Self-Employed

Comment: I live a simple life, but the money that I spend is on quality, organic, when I can, locally produced food. Funding should be put forward to encourage healthy food, especially for the poor and young. There is no reason to keep feeding people food that will tax our health system. Do not subsidize bad food!

COMMENT OF TRACEY VAN HOOSER

Date Submitted: Friday, May 18, 2012, 2:14 p.m.

City, State: Tiburon, CA

Occupation: Mom, Marketer

Comment: Farm subsidies are currently a joke. Millions of taxpayer dollars are going directly into the pocket of giant agricultural firms that don't need it and don't benefit the public. I want my tax dollars to support sustainable organic farming that doesn't destroy the environment (our soil and water and air are a public resource that needs to be protected for the good of everyone) with poisons, treats animals with kindness and provides healthy food at a good price. It is ridiculous that overly processed junk foods are so much cheaper to eat than non-processed vegetables. The epidemic of obesity is a direct outcome of our farm subsidies and we must stop making the same disastrous policy decisions because of the electoral map. Have a spine and stand up for the average American, not factory farms.

COMMENT OF LESLEY VAN LEEUWEN-VEGA

Date Submitted: Friday, May 18, 2012, 12:24 p.m.

City, State: Spring Lake, MI

Occupation: Business Owner—Graphic Designer/Writer

Comment: History will judge us by the important decisions we are making today. This is one of them. The health of our citizens is directly affected by the food grown and consumed. Environmentally-sensitive and sustainable agricultural practices with respect and viable reward for the farmer and farm workers are the hallmark of a truly civilized (and, indeed, sustainable) society.

COMMENT OF GINNY VAN LOO

Date Submitted: Thursday, May 17, 2012, 12:27 p.m.

City, State: Milwaukie, OR

Occupation: Program Manager

Comment: The farm bill should help fund the RC&D's across the country. Pulling their funding was a big mistake in that they are able to leverage Federal dollars from \$6.00 to \$12.00 to one. They are the on the ground face to face organizations that have been helping farmer's for over 5 decades. To unfund them is just wrong. \$51,000,000 would fund them all nationally and continue help provide the technical assistance needed for Conservation and Development nationwide. Please include this in the farm bill.

COMMENT OF ISABEL VAN SICKLEN

Date Submitted: Friday, May 18, 2012, 1:58 p.m.

City, State: Modesto, CA

Occupation: Psychotherapist

Comment: Please keep our food clean and pure. Do we really need to continue adding toxins and carcinogens to our daily lives in something as basic as the food we eat?

COMMENT OF EILEEN VAN SOELEN

Date Submitted: Sunday, May 20, 2012, 9:33 a.m.

City, State: Berkeley, CA

Occupation: Painter Fine Art

Comment: I worked in the healthcare "industry" for several years. What I learned is that 70¢ of **Every** dollar spent on healthcare is spent on health problems we human beings have **Created** and caused for ourselves "unintentionally". Organic food, fresh water, clean air, are the **Backbones** of good health. Watch at www.topdocumentaryfilms.com, the *World According to Monsanto* under environment, film #65. **Owning** seeds? **Owning** water? **Owning** air? What, are (some)men creating **Hell** on Earth for money and power? Intentionally? Are they that angry and miserable, greedy and vile? I hope not.

COMMENT OF PATRICIA VAN TWYVER

Date Submitted: Friday, May 18, 2012, 2:09 p.m.

City, State: Lake Helen, FL

Occupation: Retired

Comment: It is time that we take back our farms. Big agra is not doing the job. Too many pesticides *etc.* Small farmers can do so much better and the food is better for you. Mass production is not the answer. Keep Monsanto off the farm.

COMMENT OF MARY VAN VALIN

Date Submitted: Friday, May 18, 2012, 11:16 p.m.

City, State: Traverse City, MI

Occupation: Retired Teacher

Comment: I request the Agriculture Committee consider the big picture of health for our people and our land and waters. Small organic farmers are transforming our agricultural practices so that we can eat healthier food and take care of our natural resources at the same time. These local producers are helping create more resilient communities, as well. It is time to do the right thing for our collective future. Write a farm bill that supports and encourages farming practices that bring health to our ecosystems as well as our bodies. It's really just one more test of our government. Is it possible any more to do the right thing, that is what supports the well-being

of our people and ecosystems, or is it still just another sell out to the corporations? As a citizen, I request a farm bill that supports health on all levels, not just the profits of the large corporations. Thank you for considering that possibility.

COMMENT OF NIKE VANARSDALE

Date Submitted: Friday, May 18, 2012, 12:47 p.m.

City, State: Longmont, CO

Occupation: Sales Manager

Comment: I work in the food industry selling quality food. It's time that the farm bill supports food that is healthy and nutritious. It has become clear in the last couple of years that corn and soybeans are no longer being used for nourishing the people in this country. The farm bill is supporting farming that has become outdated and out of touch with what the people want and need.

COMMENT OF PATRICIAN VANBUSKIRK

Date Submitted: Thursday, May 10, 2012, 7:04 p.m.

City, State: Oak Park, IL

Occupation: Day Care Provider/Volunteer at Food Pantry

Comment: It would be a real shame to see SNAP cut from the budget as every week we use that food to feed the hundreds of hungry families who come to the pantry don't cut SNAP!

COMMENT OF PATRICIA VANCE

Date Submitted: Friday, May 18, 2012, 8:10 p.m.

City, State: Tucson, AZ

Occupation: Elementary School Safety Monitor (P/T)

Comment: You want to cut \$33 billion for Food Stamps and give it to rich people to sit on their rears? I am at least **Trying** to make an honest living. Please stop cutting money from education so I can get a job that would actually allow me to **Live**, pay my bills and buy my own food. I fully support H.R. 3286, H.R. 3236, Conservation programs and Maintaining EQIP Organic Initiative.

COMMENT OF PAULETTE VANDEGRIFF

Date Submitted: Friday, May 18, 2012, 4:33 p.m.

City, State: Greenfield, IN

Occupation: Retired

Comment: The **Supplemental Nutrition Assistance Program** (SNAP) is the cornerstone of the nutrition safety net, providing 46 million low-income people with monthly benefits that are timely, targeted, and temporary.

SNAP proved to be one of the most responsive safety net programs, growing quickly to meet rising need resulting from high unemployment in the recession. 84% of benefits go to households with a child, senior, or disabled person, and new participants spend an average of 10 months on the program. Funding cuts and other policy changes would require reductions in benefits or eligibility and impede SNAP's responsiveness when our economy falters or unemployment rises.

The FY 2013 Agriculture Appropriations bill should oppose funding cuts and harmful policy proposals to SNAP, including efforts to block grant, cap, or cut funding; impose restrictive work requirements; or otherwise reduce benefits or restrict participation. The 2012 Farm Bill should maintain funding to support current eligibility and benefit levels and oppose harmful policy changes.

Thank you for your consideration.

PAULETTE VANDEGRIFF,

[Redacted],

Greenfield, IN.

COMMENT OF GREG VANDEN

Date Submitted: Friday, May 18, 2012, 1:16 p.m.

City, State: Niles, MI

Occupation: Sales

Comment: Agricultural subsidies are entitlement programs that need to be shut down. We no longer have the financial capability of paying for these electoral gifts. Take the ethanol program for example, what a total money pit! It is time to face this country's debt and cut all the pork no matter how long it has been in play!

COMMENT OF NOELLE VANDENBERG

Date Submitted: Sunday, May 20, 2012, 4:47 p.m.
City, State: Delray Beach, FL

Comment: hanks for this opportunity to comment.

I am not a producer myself, but I am a very interested observer, and serve on the board of an organization that works to protect and preserve small, family-run farms in the state of Washington. In that capacity, I have had the opportunity just in the last week to visit five farm properties (three in eastern Washington, two in the Puyallup River Valley). I have also had a chance to meet a number of farmers over the course of these visits. I have been involved in farmland preservation for 4 years, and these most recent conversations mirror what I have heard time and again.

A couple of important points:

1. The true innovation in American agriculture—innovation that is geared less to short-term profits and bizarre distortions of IP laws and more to true long-term sustainability—is happening on small farms. This is the innovation that tackles truly important questions: How will we care for the long-term health of our soils, the safety of our foods, the viability of farming as a profession? I have met farmers in my state who are tackling these issues in incredibly resourceful ways, and generally without the assistance of the Federal government (and against the commodity pressures of big-time ag).
2. Our farmer population is aging and is not being replaced. That is largely because large-scale commodity farming is geared to benefit everyone at the expense of the individual farmer. Commodity pressures do not make farming an attractive career. On the other hand, I see young people lining up to learn farming from mentors on smaller, organic or biodynamic farms. At this scale, farming can be a fulfilling career, and one that benefits society at large. The Federal government should divert at least some of the many millions/billions of dollars it pours into big ag into program that encourage young farmers to enter the profession and helps them secure the land to do it.

I'll stop there but I hope you have the chance to personally visit small-scale sustainable farms and experience the passion and entrepreneurship that drives this part of our economy.

Specific recommendations (and, full disclosure, these are verbatim from the National Sustainable Agriculture Coalition, but I support these points wholeheartedly):

- America needs a farm bill that makes healthy food widely available to all Americans—including schoolchildren! I urge you to vote for a bill that provides flexi-

bility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.

- And maybe most importantly of all, for the future of our state and all who live here, pass a farm bill that protects our natural resources—protect the Conservation Stewardship Program from unfair funding cuts, and improve it by ranking applications solely on their conservation benefits. Farmers count on CSP and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife—all while farming profitably.
- I also want to see legislation that invests in the next generation of farmers and ranchers—guarantee \$25 million per year in mandatory funding for the Beginning Farmer and Rancher Development Program. We need a national strategy and commitment to support beginning farmer and ranchers entering agriculture. Our farm population is aging and now is the time to nurture new agriculture start-ups.
- I also urge you to support a farm bill that funds the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.

I thank you for your important work in shaping this bill.

RICK VANDERKNYFF,
Woodinville, WA.

COMMENT OF SUSAN VANDERZEE

Date Submitted: Friday, May 18, 2012, 5:44 p.m.

City, State: Durham, CT

Occupation: Retired Newspaper Editor and Home Producer

Comment: I believe our country is best served by encouraging family farms and not big-corporation agriculture which destroys the land. We must encourage healthy, sustainable practices and not make feeding people into an agribusiness. Food should not be a commodity on the stock exchange. It is a basic human need.

COMMENT OF NAOMI VANN

Date Submitted: Friday, May 18, 2012, 4:47 p.m.

City, State: Duluth, GA

Occupation: Retired

Comment: It seems the government is trying to kill us off slowly by destroying our beautiful Earth with deadly toxins. What's more important in life than our food, along with our freedom and worshipping our God without fear. Let us fight to stop this take-over of our agriculture just for the sake of money.

COMMENT OF BARB VARELLAS

Date Submitted: Thursday, May 17, 2012, 2:49 p.m.

City, State: San Dimas, CA

Occupation: Teacher

Comment: The farm bill must contain sustainable agriculture that protects our water, air and soil. Get rid of subsidies to Big Agribusiness and help the small family farmer. Clean up the criteria for organic.

COMMENT OF VERONICA VARNER

Date Submitted: Friday, May 18, 2012, 12:53 p.m.

City, State: Millersville, MD

Occupation: Construction Estimator

Comment: Its time our elected representatives begin to care about the health and welfare of the people they are supposed to serve instead of the big agribusiness that doesn't care about **Our** health, just about getting approval for unsafe products—by hook **And** by crook—all in the name of the almighty dollar.

COMMENT OF CARMELA VARVARO

Date Submitted: Friday, May 11, 2012, 2:37 p.m.

City, State: Akron, OH

Occupation: Secretary

Comment: Please consider inclusion into the farm bill, the need for organic farming. Monsanto continues to use GMO seed to crop our nation's farmlands. Most of Europe, Canada and other nations have outlawed GMO and the use of dangerous herbicides produced by Monsanto & BASF. Germany has run BASF basically out of their country, only to have them building a facility now in Raleigh. This country will sacrifice the health and well-being of its citizens to allow big business to control our food crops. If you are at all knowledgeable about the dangers of these super herbicides, the contamination of our food and milk supplies, I implore you to designate monies to the organic farmers who have not succumbed and continue to try and produce good, healthy food crops so our children and their children can grow up healthy.

Sincerely,

CARMELA VARVARO.

COMMENT OF JENNIFER VASQUEZ

Date Submitted: Friday, May 18, 2012, 2:36 p.m.

City, State: Fort Belvoir, VA

Occupation: Homemaker

Comment: I would like to take the time to ask, no . . . **Beg** you to please support organic products . . . it is all my family and I eat. Because we have cut down on our intake of process foods I have lost weight, the kids have more energy and it makes me happy to know that I am cooking **Healthy** foods for them that are free of pesticides and other harmful chemicals. I understand that not everyone feels like this, that some people don't care where their foods come from, but my family cares . . . my husband serves in the military to protect this country, my job as a homemaker is to secure the health of the future generation . . . please, give us the option of being able to buy **Organic!**

Thank you for taking the time to read this.

COMMENT OF CAREY VAUGHAN

Date Submitted: Saturday, May 19, 2012, 6:59 a.m.

City, State: Jefferson City, MO

Occupation: Physician

Comment: This is much about local economics and jobs at the **Local** level as it is about creating healthy and sustainable farming practices that are in line with securing and repairing damage that has occurred by way of corporate farming and agriculture. Our health and the health of our environment demand that we find environmentally sustainable and people friendly (*i.e.*, non-toxic) ways of producing our country's food supply.

COMMENT OF LAURA VAUGHAN

Date Submitted: Friday, May 18, 2012, 4:24 p.m.

City, State: Rosemount, MN

Occupation: Director of Real Estate

Comment: I urge you to work on a better farm bill that leads to healthier organic foods for everyone. Please support our good nutritional programs, organic farmers and sustainable farming practices.

COMMENT OF SUSAN VAUGHAN

Date Submitted: Friday, March 16, 2012, 8:56 a.m.

City, State: Winston Salem, NC

Occupation: Administrative Assistant

Comment: Please support a significant increase to the TEFAP program. Many people in our community—unemployed and working poor—need food assistance on a regular basis. This program provides needed food in a direct way. Don't cut it! Increase it!

COMMENT OF Z. VAUGHN

Date Submitted: Saturday, May 19, 2012, 5:34 p.m.

City, State: Houston, TX

Occupation: Stay-at-Home Mom

Comment: With the rise in cancer rates, diabetes, and other diseases, the citizens of the United States have become aware that much of it is related to the toxic

produce and meat that have been approved for the consumption of the public to the benefit of the companies producing it. Please place humanity before the “bottom line” when writing the farm bill. Thank you.

COMMENT OF JENNIFER VEAL

Date Submitted: Friday, May 18, 2012, 4:01 p.m.

City, State: Marietta, GA

Occupation: Business Administrator

Comment: I would like to see more focus on educating people on the value of naked **Real** food (*i.e.*, fruits and vegetables!) Emphasis on sustainable farming practices. And to expose how livestock is raised in our country and how it could be raised.

COMMENT OF GEORGE ARTHUR VEGHTE

Date Submitted: Saturday, May 19, 2012, 4:35 a.m.

City, State: Whiting, NJ

Occupation: Retired

Comment: Good Day, I have seen so many issues with the small family farmers in our country directly caused by big AGRA, Our food supply is being threatened by GMO, The small farmer that tries to produce natural food and raise livestock, who stands up to these big Agra Corporate farms, are being targeted, If we do not keep our food production safe from this corporate foreign bank run globalist take over then we will lose our country we must protect the small farmer and stop these bogus regulations, that have been in use for hundreds of years, We must keep control of the destiny and future of all of our free United States.

COMMENT OF MARIE VENNER

Date Submitted: Friday, May 18, 2012, 1:37 p.m.

City, State: Lakewood, CO

Occupation: Mom, Self-Employed Researcher/Report Writer

Comment: Subsidies should be eliminated for large corporate farms (over \$100K or \$200K net profit per year?). All farms should have to comply with environmental laws, which protect all of us. Regular administration of antibiotics should also be outlawed, as this is harming public health, reducing abilities' to fight infection. We are relying on you to attend to the public interest, not the interests of large corporate contributors. We need your help and responsibility!

COMMENT OF AVA VENTURELLI

Date Submitted: Saturday, May 19, 2012, 10:00 a.m.

City, State: Burbank, CA

Occupation: Retired Credit Union CEO and Gardener Extraordinaire

Comment: It is time to stop subsidizing big industrial food producers. They will never “feed the world” they will only torture animals, genetically modify what nature has made perfectly and kill the nutrients in the soil with the poison they must use to grow their crops. Instead, help small organic farmers on a local level to thrive and thus heal our out of control and poisonous food supply. No more 99¢ burgers made of pink slime. Quit giving them money and that burger will cost \$300. Time for bold moves so get with the game people!

COMMENT OF VASAN VENUGOPALAN

Date Submitted: Friday, May 18, 2012, 2:01 p.m.

City, State: Irvine, CA

Occupation: Professor

Comment: Dear Honorable Members of the House Agriculture Committee,

I am writing you as an ordinary citizen concerned about the health of our nation. As you know there is a health crisis in our country as heart disease, hypertension, diabetes, and obesity have reached epidemic proportion. Many health experts believe this is due to our poor food supply which, while generally safe, is over industrialized and processed. All of you have great influence to greatly improve this situation with the farm bill. I encourage you to consider the following points:

Between 2008 and 2010, the farm bill spent \$39.4 billion of taxpayer money subsidizing commodity crops. These do little to improve the health of our nation and is more than eight times what has been spent on perennially underfunded programs

to support research, promotion and purchasing of fruits and vegetables. These include an array of programs that buy fruit and vegetable snacks for low-income schools, and invest in research and marketing to help organic, local and sustainable farmers.

As a result I support:

1. The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
2. Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
3. The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
4. Maintaining the EQIP Organic Initiative.

Thank you,

VASAN VENUGOPALAN,
[Redacted],
Irvine, CA.

COMMENT OF JOELLE VERBEKE

Date Submitted: Friday, May 18, 2012, 12:33 p.m.

City, State: Austin, TX

Occupation: Real Estate Investments

Comment: We must protect organic farms big and small and not let the big agricultural corporations dictate what they want to feed us which is mostly unhealthy and depleted of vitamins and minerals not to mention the indigestible protein that derives from GMO crops per the ongoing research. We have over 7 billion people on Earth and GMO seeds are only good for 1 season and cannot reproduce. We are putting our food in the hands of profiteering practices, we must become wiser.

Thanks.

COMMENT OF BOBBIE VERGO

Date Submitted: Saturday, May 19, 2012, 12:48 p.m.

City, State: Indianapolis, IN

Occupation: Occupational Therapist

Comment: I am constantly dumbfounded at the decisions made by the leaders of our country to choose to not only allow but encourage the genetic modification of our food—and the slow and steady destruction one of the foundations of our nation that is agriculture. That anyone would turn a blind eye to the impact the industrialization of the food industry has on the health of our nations citizens makes me question the integrity of our nation's leaders. I hope that you will consider putting **People** and **Not** money first and that you will make the decision to support legislation that backs initiatives to support sustainable, responsible, and organic means of producing food and protecting those dear, hard working citizens who engage in methods to produce food in those ways. That said, I support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). I support fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. I support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), and lastly maintaining the EQIP Organic Initiative. I hope you will support these as well!

JOINT COMMENT OF PAM, ROB, MIKO, AND ISAAC VERGUN

Date Submitted: Friday, May 18, 2012, 1:36 p.m.

City, State: Beaverton, OR

Occupation: Sociologist/Public Policy Analyst/Homemaker and Mom; Economist; School children

Comment: It is extremely important to me that you ensure:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).

- Maintaining the EQIP Organic Initiative.

My family does everything we can to buy organic and from local family farms, to eat healthy food so that we will have good lives which also means low medical costs. We resent corporations that are promoting toxic practices including the use of GMOs and their encroachment on other crops. And the additional cost that we bear in buying higher quality food and through taxes because of anti-environment/anti-social responsibility subsidies.

Agriculture needs to be again about these core values of health, happiness, and seeing that the environment is well cared for, not about propping up wealthy corporations and promoting unsustainable practices.

We also ask that each member of the committee look at what organizations are supporting your election campaigns and do not take money from groups that do not respect the above principals.

Thank you.

COMMENT OF MARY VERMEULEN

Date Submitted: Friday, May 18, 2012, 3:48 p.m.

City, State: Waynesboro, VA

Occupation: Retired Educator

Comment: As the daughter and sister of small farmers, I know the benefits of receiving the products of small farms. Now as an adult, I abhor the practices of Big Agriculture and believe we must be careful and move slowly with genetic engineering. The quality of farm products must be protected. As a believer in quality, I chose to purchase locally grown, organic produce, eggs, and dairy products. I enjoy the same quality and taste of these products that I had as a child. A great deal of quality is lost through the practices of Big Agriculture. Yes, we must feed the world, however, we must do so with careful attention to quality and safety.

COMMENT OF EMILY VIDRINE

Date Submitted: Friday, May 18, 2012, 1:47 p.m.

City, State: Lowell, MA

Occupation: Researcher

Comment: It is absolutely urgent that we support sustainable and healthy farm practices and discontinue the use of chemical pesticides and fertilizers which are literally killing the ecosystems we rely on heavily for our sustenance.

COMMENT OF DANIEL VIELE

Date Submitted: Sunday, May 20, 2012, 3:54 p.m.

City, State: Santa Rosa, CA

Occupation: Property Management, General Contractor

Comment: Support true cost of goods pricing, no fixing by government or other entities. Milk products, meat, eggs, *etc.* should be sold by it's cost to produce, not manipulated pricing. All products must reflect their true cost.

End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies.

Support family farmers that really need help, not the biggest farms that don't.

COMMENT OF DAWN VIERRA

Date Submitted: Friday, May 18, 2012, 1:42 p.m.

City, State: Salt Lake City, UT

Occupation: Administrative Assistant

Comment: We desire **Real** reform. We look to our farmers that have integrity to produce an organic, healthy, non GMO product. We no longer will put up with our health & welfare being sold down the river to big agra corporations & our representatives.

COMMENT OF ALYSE VIGGIANO

Date Submitted: Friday, May 18, 2012, 10:29 p.m.

City, State: Pittsburgh, PA

Occupation: Student

Comment: Regardless if my food is considered organic, what matters more is whether or not I am paying the farmer enough to produce it. What stimulates and

improves the local economy is buying local. The problem that arises here is that many do not have the opportunity or understand what local really is and that is where Slow Food is making a real change.

COMMENT OF JOHN VIGNOCCHI

Date Submitted: Sunday, May 20, 2012, 7:05 p.m.

City, State: San Francisco, CA

Occupation: Corporate Development

Comment: Stop subsidizing big agriculture! And end tariffs on imported sugar. No wonder American's have high fructose corn syrup in so many foods . . . buying sugar in the U.S. is 2x more expensive than other nations (because of America's ridiculous tariffs). Sugar tariffs increase manufacturing costs and reduces American food manufacturers global competitiveness, increases prices for American consumers, and increases the use of high fructose corn syrup (another benefactor from the Federal government's crony approach to agriculture).

COMMENT OF RICHARD VILLADONIGA

Date Submitted: Thursday, May 17, 2012, 2:36 p.m.

City, State: St. Augustine, FL

Occupation: Teacher/Founder of Slow Food First Coast

Comment: On behalf of Slow Food First Coast, a nonprofit organization promoting a food system based on quality and pleasure, environmental sustainability, and social justice, I encourage Congress to pass a farm bill that funds local food systems, organic farmers, small family farms, an more fairness for all involved in our food system, including small producers, farmworkers, and children. Please stop subsidizing industrial agriculture giants only, and begin to fund in greater amounts those that will strengthen our local and regional food systems.

COMMENT OF MIRTHA L. VILLAMIL, R.N.

Date Submitted: Saturday, May 19, 2012, 5:42 p.m.

City, State: West Palm Beach, FL

Occupation: Registered Nurse

Comment: Dear Mr. West:

As a Registered Nurse, I know the importance of a good and balance nutrition. Mr. West please advocate for maintaining and strengthening low income children, single mothers and the elderly critical nutrition programs. Please support the good, clean, and fair food and farm bill.

Thank you,

M.L. VILLAMIL, R.N.

COMMENT OF TERESITA VILLASENOR

Date Submitted: Sunday, May 20, 2012, 2:24 p.m.

City, State: Carlsbad, CA

Occupation: Nutrition Counselor and Body Alignment

Comment: I have been eating organic since 1971 and am in better health because of it. Parents very ill with diabetes, cancer and arthritis.

We need an organic health bill.

Keep the USA strong and healthy, buy organic, support organic farmers.

Thank you,

SITA PALOMA.

COMMENT OF LARA VILLAVICENCIO

Comment: Please keep the funding for organic farming and beginning farmers intact. We need a healthier. Action, not a genetically modified future. Thank you.

COMMENT OF BEN VITALE

Date Submitted: Friday, May 18, 2012, 3:09 p.m.

City, State: South Orange, NJ

Occupation: Computer Software Developer

Comment: Please pass a reformed farm bill. Here are some of the ideas that I think need attention:

- end distorting subsidies for corn, soy, *etc.* that lead to the obesity epidemic. encourage farmers to grow green vegetables.
- include the ideas from the Local Foods, Farms and Jobs Act (H.R. 3286)
- make policy that encourages small new farmers, and lessens support for Cargill, ADM, *etc.* Agribusiness doesn't need any government help.
- include environmental protections that preserve farms in densely populated areas, don't overuse pesticide, herbicide, and fertilizer
- GMO labeling

Thanks.

COMMENT OF ELLYSE ADELE VITIELLO

Date Submitted: Saturday, May 12, 2012, 8:58 p.m.

City, State: Los Angeles, CA

Occupation: Retired Civil Service: New York State Department of Labor

Comment: I would hate to be hungry when I'm old. Please help our senior citizens in this time of serious challenges to economic survival. There are headlines in the news of suicides in Italy and Greece, when older folks cannot manage to get by in the current crisis. Let's not have this problem in the USA. Thank you for your consideration to this problem.

COMMENT OF ANN VITOVITCH

Date Submitted: Friday, May 18, 2012, 2:42 p.m.

City, State: Northampton, PA

Occupation: Homemaker

Comment: Please remember in making your decisions when voting on the next farm bill that the outcome will not only affect us but also all of our congressional leaders and their families. The farmer is the most "vital" part of our culture; one we will never be able to do without! Supporting them in any way possible is the key element to our very existence.

COMMENT OF T. VIZZARD

Date Submitted: Friday, May 18, 2012, 9:58 p.m.

City, State: Tucson, AZ

Occupation: Retired

Comment: I support the following:

1. The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
2. Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
3. The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
4. Maintaining the EQIP Organic Initiative.

“By failing to place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs, the Committee has failed to do the full reform that is needed.”

While Congress is looking to get rid of direct payments to commodity farmers, the subsidized insurance program it proposes to replace it with will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk.

Please listen to the people of this country and stop listening to Big Ag, Big Insurance and other corporate entities.

Congress is ruining sustainable farming and organic farming all in the interest of election funding and other selfish interests of congress and Big Business.

I am disgusted and will do everything in my power to fight and defeat this attitude and the perpetrators.

COMMENT OF SUSAN VOGT

Date Submitted: Friday, May 18, 2012, 12:54 p.m.

City, State: Fairbanks, AK

Occupation: Environmental Consultant

Comment: I would hope this farm bill actually does something to help the real small family farmers and stop the huge subsidies to mass corporate farms that promote antibiotics, cause massive polluted runoff of fertilizer and animal waste. Make the corporate farmers pay for cleaning up their own farms! Not the American taxpayers!

COMMENT OF KEVIN VOLK

Occupation: Teacher and Business Consultant

Comment: Cancer, severe allergies, autism, extreme asthma, and many many more. The links are many to our food system. Fear not that we will not be able to feed the world. Fear that we are poisoning ourselves . . . we are. Heavily subsidize organic, sustainable practices and you will see the spending in Medicaid and Medicare go down. Please do it for our children and the future. This path we are on is hurting us. So Stop!

COMMENT OF PAMELA ROSE VOLLINGER

Date Submitted: Saturday, May 19, 2012, 10:06 p.m.

City, State: East Hartford, CT
Occupation: Clergy
Comment: Dear Elected Officials,

I am writing to express my deep concern for the quality of food that is produced here in the United States and how the land, a critical natural resource is used. I firmly believe that we need to have food that is grown locally with heritage seeds not contaminated by chemicals or non-genetically modified crops. I have seen so much evidence to support small local farmers using sustainable farming practices produce the healthiest food and are protecting our land and water resources for future generations. I feel it is my right as a citizen of this country to have the freedom to buy food which I feel is healthiest for my family and for the land. In order to protect my rights as a citizen and a consumer and the rights and health and future generations of citizens and consumers, I strongly recommend and give full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286). I think it is in the best interest of the common good and future generations that you fully fund conservation programs such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. I also feel it is the right and best thing to implement all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). It is essential for our freedom to choose what we feel is the healthiest food for our families and our right as consumers to have a choice that you maintain the EQIP Organic Initiative.

PAMELA ROSE VOLLINGER,

COMMENT OF MAX VOLLMER

Date Submitted: Friday, May 18, 2012, 2:21 p.m.
City, State: Baker City, OR
Occupation: Retired Banker

Comment: American corporate agribusiness is a bloated pig on needless and excessive farm subsidies, and it is putting unhealthy, adulterated food on American tables that is responsible for the obesity, diabetes, and heart disease plaguing this country.

COMMENT OF CAROL VON BORSTEL

Date Submitted: Friday, May 18, 2012, 5:54 p.m.
City, State: Sequim, WA
Occupation: Retired Teacher

Comment: A farm bill needs to represent the needs of the people of this country, not the desires of corporate agriculture. We want food and land use policies that promote our health and the health of our environment. Small and organic farms need the support to grow the food we choose to eat.

COMMENT OF REBECCA VON DUERING

Date Submitted: Friday, May 18, 2012, 4:44 p.m.
City, State: Seattle, WA
Occupation: Speech Pathologist

Comment: I believe that non-GMO agricultural products are crucial to the health of our nation and the health of our economy. Europe does not want GMO's and because nature is nature (and can't be contained) we have no way to protect our non-GMO crops from being pollinated by GMO crop. We must not let GMO's infiltrate our foods.

COMMENT OF MELANY VORASS

Date Submitted: Saturday, May 19, 2012, 10:56 a.m.
City, State: Seattle, WA
Occupation: Writer/Urban Farmer
Comment: Dear Representative McDermott,

Our children need access to healthy, affordable food. The current farm bill is heavily weighted toward subsidizing large, conventional (*versus* organic) farms.

Providing cheap, unhealthy food (such as GMO corn and soy) grown in pesticides and nutrition depleted soils are creating a nation of sick, obese, dysfunctional, lower IQ people.

If we are serious about improving our health care system and lowering health care cost, we need to start at the root cause of our problems: unhealthy food.

Farm subsidies should be weighted toward producers that are producing healthy foods, not just empty calories that can be manipulated in a lab. Currently, very little assistance goes to small, organic farms. We should be providing incentives for large, industrial farms to carry out organic growing principles.

Please consider this carefully as Congress recrafts the farm bill.

Sincerely,

MELANY VORASS.

COMMENT OF LASZLO VOROSMARTY

Date Submitted: Saturday, May 19, 2012, 1:36 p.m.

City, State: Glens Falls, NY

Occupation: Congressional Advocate

Comment: It is unfortunate to see that the government has again failed to utilize its urban and rural resources and schools for developing agricultural related job programs that would feed, educated and employ its people. The tax money would be better well spent if it were utilized on behalf of supporting the people's consumption of fresh, healthy and nutritious fruits and vegetables within a 100 mile radius of any school where ever they live. Whereupon, throughout the year, a number of sustainable urban and rural agricultural jobs could be supported within every 100 mile radius of this endeavor. Visualizing the schools of every community as base of operations. In observing the need for this in my community I am "Doing Business As American Resources Recovery Congress" in an attempt to enjoin the schools, government, enterprise and labor of my community to this purpose.

However, for lack of funding, this program has not become available to my community: Even though so much needs to be done.

COMMENT OF CAROL VOSS

Date Submitted: Sunday, May 20, 2012, 8:47 a.m.

City, State: Hibbing, MN

Occupation: Executive Director for Hibbing Food Shelf

Comment: I am an Executive Director for the Hibbing Food Shelf. I don't need SNAP program to go down, or any other program for low income families.

COMMENT OF ADRIANA VOSS-ANDREAE, M.D., PH.D.

Date Submitted: Tuesday, May 15, 2012, 8:48 p.m.

City, State: Portland, OR

Occupation: Healthy Foods Access for Low-Income Families

Comment: The drastic cut of nearly \$36 billion from Federal nutrition programs, at a time where a growing population of low-income families heavily rely on these programs to feed their families while attempting to find living wage jobs, is simply outrageous and unacceptable. Additionally, with global energy prices continuing to rise and looming climate change, we urgently need to invest in community food security through funding of our local food systems, such as funding of Farmers Market and Local Food Promotion Program, Hunger-Free Community Incentive Grants, and Community Food Projects Programs.

For these and other reasons, I urge the House Agriculture Committee to eliminate the Federal nutrition program cuts and add the Food and Jobs Act to their bill.

Sincerely,

ADRIANA VOSS-ANDREAE, M.D., PH.D.

COMMENT OF JANICE VRANKA

Date Submitted: Friday, May 11, 2012, 5:32 p.m.

City, State: Portland, OR

Occupation: Research Scientist

Comment: American needs a farm bill that makes healthy food widely available to all Americans. This is especially important for our school children! Studies have shown that the obesity epidemic may be directly tied to malnutrition and the inability of many Americans to find nutritional foods.

Please take a strong stand on this issue. We need a better 2012 Food and farm bill!

Thank you for your consideration,
JANICE VRANKA.

COMMENT OF CAROLINE VRAZEL

Date Submitted: Thursday, April 26, 2012, 12:26 p.m.

City, State: Wisconsin Rapids, WI

Occupation: Homemaker

Comment: Please consider what this will do to our hardworking farming families. We need to consider legislation that will support them not squash their ability to make a living and support their families. We are trusting you to represent **Every** American, not corporate greed.

COMMENT OF KELLY VRESILOVIC

Date Submitted: Sunday, May 20, 2012, 11:24 a.m.

City, State: Ardmore, PA

Occupation: Architect

Comment: I buy organic food and believe it is better for our environment. I want to make sure that we have clean air and water for everyone not just the wealthy. Clean strong farms are the backbone of a clean strong America.

Thank you for all you do.

COMMENT OF MARILYN W.

Date Submitted: Friday, April 20, 2012, 1:09 a.m.

City, State: Dumas, AR

Occupation: Bank Teller

Comment: While I am not currently working in agriculture our family has been farming. I am **Very Concerned** about the current methods of constant usage of chemicals applied to our crops. It is slowly and steadily and stealthily killing our environment and us. Cancer is rampant. Bees are dying. Rivers and lands are polluted. **All Organic farming is Desperately Needed!**

Farmers need to be kept in the fields. What will it take? Fuel prices are eating the profits. Chemicals are sickening and killing whatever they come into contact with.

You are in a position to change the scene. Please take action **Now!**

COMMENT OF TRISHA W.

Date Submitted: Friday, May 18, 2012, 2:04 p.m.

City, State: Kankakee, IL

Occupation: Homemaker

Comment: I would like the farm bill to support small local farmers, not big agriculture. I want the farm bill to focus on encouraging and supporting organic and sustainable farming practices. I want it to encourage labeling of genetically modified foods, antibiotic usage, feeding practices, pesticides used, and other unhealthy additives, so that people can finally know what they are truly buying at the store. I want the farm bill to encourage good nutrition for school children and poor families using WIC and food stamps. There needs to be healthy food provided to these people. Not pink slime beef, pesticide covered fruits and vegetables, or worse yet, lack of fruits and vegetables. Let's start focusing on supporting family farms, creating healthy foods and animals, healthy farms and land, transparency in labeling, and good nutrition for all.

COMMENT OF FRANCES WADE

Date Submitted: Saturday, May 19, 2012, 2:45 p.m.

City, State: Bigfork, MT

Occupation: P/T Desk Clerk/Disabled

Comment: I belong to a CSA where I am able to access organic fruits and vegetables in season. I am not willing to eat the toxic products supplied by the majority of the corporate agribusiness and sold in most commercial groceries.

Most Americans would prefer to have access to wholesome foods that are neither GMO's nor contaminated by toxic chemical fertilizers or pesticides. Why do you

refuse to protect the people from the corporations who put profit above public safety?

COMMENT OF NANCY WADE

Date Submitted: Saturday, May 19, 2012, 8:01 p.m.

City, State: Chicago, IL

Occupation: Educator

Comment: Our agricultural system must be reformed to put consumer and environmental safety at the top of the list of priorities. GMO food and the ownership of genes should not be allowed. There are no benefits to the consumer, only to the corporate owners of food supply.

COMMENT OF TERRY WADKINS

Date Submitted: Saturday, May 19, 2012, 2:49 p.m.

City, State: Jacksonville, FL

Occupation: Self-Employed

Comment: The people you represent don't want huge monoculture agribusinesses to be our source of food, as much as we want you to support and encourage smaller sustainable farmers. Better quality produce. Better for the environment.

COMMENT OF JAMES WAGGLE

Date Submitted: Monday, May 07, 2012, 6:01 p.m.

City, State: Ward, AR

Occupation: Nurse

Comment: I strongly suggest to eliminate **All** subsidies. Farmers don't need entitlements from the U.S. Government to be productive these days. Let them bear the burden like all other Americans, if you pick that career field than you learn how to be productive in it and be financial responsible for your choices. All other career fields don't get government hand outs we just had to work longer hours. I suggest let **Farmers** become more responsible for their choices and stop handing out **Free** money to them. I mean if I know I can plant a crop knowing it's going to fail but I'm going to get paid for it twice the price it's worth who wouldn't care about being responsible. The farmers collect insurance off the failed crop then collect anywhere between \$50,000 to \$1 million every year in March/April in government subsidies.

COMMENT OF DEBORAH WAGNER

Date Submitted: Saturday, May 19, 2012, 6:57 a.m.

City, State: Brookeville, MD

Producer/Non-producer: Producer

Type: Fruits, Livestock, Poultry/poultry products, Vegetables, Other

Size: Less than 50 acres

Comment: Dear Committee Members: Please consider eliminating all subsidies to corporate farms, which are one of the leading causes of the loss of small family farms and a leading cause of soil erosion and loss of diversity through huge unsustainable monocropping. We need to improve subsidies to forest retention and other conservation programs, and encourage more young people to go into farming. Only consider government programs and payments to farms on which the owner does at least 51% of the actual physical work of the farm.

COMMENT OF MARK WAGNER

Date Submitted: Friday, May 18, 2012, 11:37 p.m.

City, State: Royal Oak, MI

Occupation: Engineer

Comment: End genetically modified organisms or at least inform consumers of all haphazard and require proper labeling of products containing GMOs.

Define what is considered "natural" and it should not include corn syrup, canola oil, GMO products, trans fats or other synthetic products. Foods should be labeled accordingly.

Tariffs on imported sugar should be eliminated so that it is no longer more expensive than corn syrup. This would provide tremendous improvement to our diabetes and obesity epidemics.

Outlaw trans fats.

Outlaw addictive food additives and additives that make consumers feel hungrier.

COMMENT OF MICHAEL WAGNER

Date Submitted: Saturday, May 12, 2012, 3:18 p.m.

City, State: Carbondale, IL

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: I urge you to pass a strong farm bill that;

- (1) protects programs like SNAP, TEFAP, and CSFP.
- (2) Promotes local food production, processing and marketing.
- (3) Promotes local bio-energy production from waste streams.
- (4) Victory (community) gardens where everyone has an opportunity and responsibility to get their hands dirty.

COMMENT OF ROBYN WAGONER

Date Submitted: Friday, May 18, 2012, 1:39 p.m.

City, State: Olympia, WA

Occupation: Business Owner

Comment: Only **Sustainable Healthy** processes should be used to grow food: *i.e.*, **Organic**. Safe food and water for children and adults require a halt to the use of chemical fertilizers, genetic modification, pesticides, herbicides and fungicides in our food chain. Cancer, DNA mutations, pollution, as-yet-unknown-side-effects, none of these are acceptable risks, even in 1:1,000,000 cases. Food is meant to nourish us, not poison us. If it is poisoning people, and ecosystems, it is not food, it is poison. We cannot continue to sicken our children, families, and environment.

Factory farms produce too much methane and are destroying the ozone layer creating global warming. We have known about this since the 1970's. End factory farms.

Livestock take up 50% of our country's landmass and use 50% of our drinkable water. This is unacceptable. We must limit the amount of resources allotted to raising nitrogen polluting livestock, starting with removing government subsidized and privately owned grazing animals from **All** public lands. The wild animals that live there need that area to nest and forage. Tell ranchers to keep their cows on their own property like everyone else must do with their animals in this country.

If genetically modified substances continue to be marketed as "food" they **Must** be labeled as such, preferably with a warning that the long-term side effects of consuming such substances are unknown!

We seriously need more stringent screenings for Mad Cow Disease.

Thank you for your time.

COMMENT OF DAVID WAHLER

Date Submitted: Friday, May 18, 2012, 12:23 p.m.

City, State: Wolcott, VT

Occupation: Retired

Comment: I live in a small dynamic state with inventive young farmers who are actively growing for their neighbors and in some cases as they grow they are able to hire people, providing jobs and food and shipping healthy food to nearby states. Funding should be provided for these farms over the support of the huge agro growers who have little regard in for our environment, they are bottom line big business in many cases.

COMMENT OF DIANE WALAS

Date Submitted: Thursday, May 10, 2012, 6:18 p.m.

City, State: Tucson, AZ

Occupation: Retired

Comment: I support the Community Food Bank of Southern AZ by volunteering and making food and cash donations. Arizona has been very hard hit with persons losing homes to foreclosure and the number of persons seeking food assistance has greatly increased, making our food bank have more and more difficulty meeting the increased needs. I would like a strong farm bill to help these needy families. It is difficult to watch parents struggling to keep themselves and their children healthy on smaller and smaller incomes. I hope and pray that you pass a farm bill that will protect and strengthen programs like SNAP, TEFAP and CSFP. Our community and many communities throughout America cannot afford cuts to these programs. It is hard to watch heads of corporations live in multiple dwellings and earn more

and more perks when young families cannot afford basic nutrition and have lost their homes.

COMMENT OF KAREN WALDECKER

Date Submitted: Tuesday, April 24, 2012, 11:01 a.m.

City, State: Kirkwood, MO

Occupation: Disabled

Comment: As a person of a very low income, I pray you don't cut funding for hungry people. I am a diabetic and I can't afford to eat properly so my blood sugar is always a rollercoaster. I'm a widow who had to move in with my son to save enough money to get an apartment. That's just not right!

COMMENT OF MATTHEW WALDORF

Date Submitted: Saturday, May 19, 2012, 6:43 a.m.

City, State: Darien, IL

Occupation: Sales Executive

Comment: It is time that the truth is being told. We must label GMO'S and be very clear with the public how horrible high fructose corn syrup is to our children and how it is a main cause of our obesity problem in this country. No more government corn subsidies!

COMMENT OF CHARLOTTE WALES

Date Submitted: Friday, May 18, 2012, 1:35 p.m.

City, State: Monticello, AR

Occupation: Community Development

Comment: As a gardener myself, I urge you to focus on **Clean, Fresh Foods Instead Of Corporate Agri** which is laden with toxic chemicals and fertilizers. **We The People** do **Not** want the dangers to our health and the environment caused by agri chemicals and pesticides; they are a danger to us and especially to our children. I wish **All Of You On The House Committee On Agriculture To Focus On Clean Food Instead Of Listening To The Corporate Agri Giants Whose Only Concern Is Their Obscene Profits, Not The Health Of Our Families Or Our Planet.**

COMMENT OF JAMIE WALKER

Date Submitted: Sunday, May 20, 2012, 10:16 a.m.

City, State: Garden City, MI

Occupation: Disabled

Comment: My disability is directly related to the corporate, pharmaceutical foods this country forces upon us, that is nutrient and vitamin lacking, and an assault on our bodies.

We need natural, pesticide/herbicide, and GMO-free foods that nourish our bodies instead.

COMMENT OF JENNY WALKER

Date Submitted: Saturday, May 19, 2012, 11:16 p.m.

City, State: New York, NY

Occupation: Physician/Educator

Comment: As a Family Physician, I am very aware of the importance of access to healthy food to preserve health and prevent illness. The model Big Agriculture with tons of pesticides, excessive use of antibiotics, untested genetically engineered products and factory-farmed animals has not proven in the best interests of our health or environment. New Farm legislation needs to emphasize small, sustainable farming, especially local and organic. It needs to limit use of antibiotics to only the amount needed to treat infected animals (to slow down antibiotic resistance) and pesticides to reduce destruction of the environment (remember bumble bees?) It also needs to acknowledge the importance and value of diversified gene lines and to ban additional genetically modified organisms until their safety can be established and they can be shown to grow without contaminating traditional plants, especially organic.

COMMENT OF JOAN WALKER

Date Submitted: Sunday, May 20, 2012, 9:45 p.m.

City, State: Lincoln, MA

Occupation: Educator

Comment: I am interested in supporting small, local, organic farms. I do my best to avoid eating anything that is not organic and when possible try to buy local or grow my own.

COMMENT OF LEE WALKER

Date Submitted: Friday, May 18, 2012, 3:13 p.m.

City, State: Salt Lake City, UT

Occupation: Lawyer

Comment: I support the Food Democracy positions. For the sake of individual farmers and the wholesomeness of the food we all get, Big Ag has gone too far. End the corn supports, the policies that lead to monopoly, massive overcrowding, filth, cruelty and need to over-use antibiotics. I am also alarmed at the over use of chemicals in agriculture and genetic modification of our food.

COMMENT OF MARGARET WALKER

Date Submitted: Saturday, May 19, 2012, 10:33 p.m.

City, State: Panama City, FL

Occupation: Retired Editor

Comment: I want a farm bill that provides opportunities to small farmers, especially organic farmers. I want the corporate farmers to be curtailed. I want genetic modification to be stopped. I want herbicides and pesticides to be curtailed, in some cases outlawed (*e.g.*, Roundup). I want provisions for bees to be allowed to eat their own products and not be fed sugar water instead. I want an end to monocrop mania. I could go on.

COMMENT OF MEDOH WALKER

Date Submitted: Friday, May 18, 2012, 2:31 p.m.

City, State: Free Union, VA

Occupation: Community Organizer

Comment: The safety of the nutritional quality and healthfulness of the food made available to Americans is an inalienable right just as life itself. Our health and our lives depend on it. This is no place for corporate greed and control sacrificing our nutrition.

COMMENT OF MAUREEN WALL

Date Submitted: Friday, May 18, 2012, 12:15 p.m.

City, State: Port Angeles, WA

Producer/Non-producer: Producer

Type: Other

Size: Less than 50 acres

Comment: I am convinced that you all know nothing about plants, animals, soil or how they interact. Please keep the biodiversity of our planet strong. Leave farming to people who know how to do it. Keep your multinational food companies out of small farms. Try, one time, to not have big agriculture as your primary focus.

COMMENT OF BOB WALLACE

Date Submitted: Friday, May 18, 2012, 11:06 p.m.

City, State: Fort Worth, TX

Occupation: Retired

Comment: A Fair farm bill for the consumer (everyone) means:

- Better choices from a more vibrant marketplace and stable prices. Restoring common-sense practices like agricultural reserves can prevent speculation from driving up food prices.
- Increased access to healthy food: More families will have easy access to healthy foods they can afford.
- Stronger local infrastructure: Reversing the consolidation in the food system would allow for more local businesses.

JOINT COMMENT OF BRIGITTE AND JOHN WALLACE

Date Submitted: Saturday, May 19, 2012, 7:36 a.m.

1465

City, State: Gulfport, FL
Occupation: Self-Employed
Comment: For the health of Americans, for the welfare of the animals, for the economic viability of the small farms, for the environment and because we must stand against big Agra, we want sustainable organic and humane farming.

COMMENT OF GARRY WALLACE

Date Submitted: Friday, May 18, 2012, 12:06 p.m.
City, State: Charlottesville, VA
Producer/Non-producer: Producer
Type: Vegetables
Size: Less than 50 acres
Comment: Our current big business ag system is broken. Local producers offer the best chance for healthy food. Big ag \$\$\$\$ should not be your driving interest in our health decisions.

COMMENT OF JAMES WALLACE

Date Submitted: Friday, May 18, 2012, 9:26 p.m.
City, State: Benicia, CA
Producer/Non-producer: Producer
Type: Livestock, Field Crops
Size: 1,000+ acres
Comment: I am very concerned that the Food and Agricultural bills that favor farmers in crop production, distribution and support family farms are those that my representative and other representatives support. It is critical not to allow these bills to languish in committee or be killed by inaction. Thank you.

COMMENT OF MARGARET WALLACE

Date Submitted: Friday, May 18, 2012, 1:25 p.m.
City, State: Watsonville, CA
Occupation: Retired
Comment: Still need subsidies for small farmers; protect organic growers from GMO's, pesticides and other like dangers from Monsanto, Dow Chemical, Bayer and other chemical companies. Stop Monsanto from 'owning' all seed crops and ruining food crops with their genetic modifications.

COMMENT OF RYAN WALLACE

Date Submitted: Friday, May 18, 2012, 1:23 p.m.
City, State: Denver, CO
Occupation: Business Manager
Comment: Subsidize Real Food! Lower the National Debt by Subsidizing food that makes us healthier and lowers the burdens our health problems put on the healthcare system. Create jobs and Subsidize Family Farmers that grow real food.

COMMENT OF SONDRAL WALLACE

Date Submitted: Friday, May 11, 2012, 10:42 a.m.
City, State: Ogden, UT
Occupation: Retired
Comment: In addition, support for organic food is necessary to provide healthy food in order to lower disease. Support is needed to reduce the price of decent food, *i.e.*, organic, so everyone can afford it.

COMMENT OF ANNIE WALLACK

Date Submitted: Friday, May 18, 2012, 1:27 p.m.
City, State: Rosamond, CA
Occupation: Retired Teacher
Comment: Please! Let's be sensible here. We are asking for the betterment of humanity's health In the name of an improved nation of healthy individuals. We ask that you advocate on **Our** behalf and not that of greedy corporations who do not have the best interests of humanity at heart.

COMMENT OF KATHY WALLER

Date Submitted: Friday, May 18, 2012, 10:07 p.m.

City, State: Austin, TX

Occupation: Writer

Comment: My father was a small farmer and rancher. He produced clean food, and he loved the land. He would be appalled to see what corporate agribusiness is doing to our food supply and our farmland.

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you for your attention.

COMMENT OF NICHOLAS WALLIN

Date Submitted: Friday, May 18, 2012, 12:40 p.m.

City, State: Minneapolis, MN

Occupation: Architect

Comment: Stop contributing to big Agriculture companies, and find better ways to provide healthy, safe foods for everyone at every income level. Currently, eating healthy is luxury.

COMMENT OF HUNTER WALLOF

Date Submitted: Friday, May 11, 2012, 10:47 a.m.

City, State: Pt. Reyes, CA

Occupation: Artist/Ecologist

Comment: We want corporations out of the production of the produce we feed our families. Move the cows off the land and the people back onto it as land-stewards and providers of the food we eat.

COMMENT OF JUDY WALLS

Date Submitted: Friday, May 18, 2012, 10:30 a.m.

City, State: Fairfield, IA

Occupation: Accounting Assistant

Comment: I am really tired of supporting **Huge** corporate AG businesses who (much to some peoples thinking) **Do Not Do The Right Thing**. But, I guess they have the money to lobby Congress into **Not Doing The Right Thing Either**. Can you please try to think about all the rest of us, we need to have a voice and I am hoping it is thru you, the person I voted for.

COMMENT OF KAREN WALLS

Date Submitted: Friday, May 18, 2012, 3:04 p.m.

City, State: Novato, CA

Occupation: Business Manager at Independent School

Comment: I hope that the farm bill finally stops subsidizing the huge agri-business farms and instead supports small organic farms. Subsidizing corn and soy to the point where they are put into everything and animals are fed corn when they should be fed grasses is wreaking havoc on people and animals alike.

COMMENT OF DORA WALMSLEY

Date Submitted: Thursday, April 19, 2012, 10:40 a.m.

City, State: Pittsburgh, PA

Occupation: Volunteer Coordinator

Comment: As an employee for a private not-for-profit organization, I see, every day, the impact programs like CSFP, SNAP and TEFAP have on the lives of western Pennsylvanians. I'm doing my part in helping those in need in my community. I need my government to do the same by keeping these critical feeding programs.

COMMENT OF CAITILIN WALSH

Date Submitted: Friday, May 18, 2012, 1:59 p.m.

City, State: Redmond, WA

Occupation: Translator

Comment: I would like to add my name to the many citizens who would like to see the playing field for real food producers (otherwise known as farmers) leveled, by ending subsidies for commodity crops. We don't eat commodities: they are profit instruments for the powerful corporations that control them. If you (or rather we the taxpayers) are going to subsidize anything, Let it be those who are doing the right things in terms of healing the planet with sustainable farming practices, reducing carbon emissions and dependence on foreign oil (thus working toward national security) by growing and selling locally.

COMMENT OF SISTER JULIA WALSH, F.S.P.A.

Date Submitted: Friday, May 18, 2012, 12:04 p.m.

City, State: Chicago, IL

Occupation: Teacher

Comment: Hello!

Thanks for your desire to represent us as you decide how to craft the Food Bill.

It is really important to me that the final version you come up with is very supportive of independent, organic, local and sustainable farms who are caring for the natural resources (of soil, air, water, *etc.*) and workers properly. It is also very important to me that you create systems to support new sustainable agriculture, especially in areas where food is scarce in the U.S. and abroad. Food Aid needs to be sustainable and encourage development of communities. Give a boost to those who need it, please, but try not to give hand-outs in a larger system where it is too difficult to compete with corporate agriculture!

In particular, I support the following:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you!

Peace and All Good,

SISTER JULIA WALSH, F.S.P.A.

COMMENT OF MARY WALSH

Date Submitted: Friday, May 18, 2012, 12:49 p.m.

City, State: Lakewood, OH

Occupation: Media Producer/Director

Comment: Please stop listening to lobbyists. The state of food production in this country is profitable and bountiful—now. What it isn't is sustainable or healthy. Put the needs of the people first, and make sure family farms and sustainable agriculture are supported. The Big Ag companies have enough money—they don't need government money too.

COMMENT OF BETTY LOU WALSMAN

Date Submitted: Saturday, May 19, 2012, 7:51 a.m.

City, State: Indianapolis, IN

Occupation: Retired

Comment: Need support for small farmers, organic farmers, non-GMO producers. Stop subsidies for huge farming agribusinesses and crop insurance for marginal lands.

We Need Reform that benefits the people of the U.S. and not the large corporations with their lobbyists.

COMMENT OF MARIE WALTERS

Date Submitted: Saturday, May 19, 2012, 2:39 a.m.

City, State: Oak Grove, OR

Occupation: Financial Services

Comment: Do not cut funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture. These are too vital to the health of our population!

COMMENT OF PAT WALTKE

Date Submitted: Monday, March 19, 2012, 4:09 p.m.

City, State: Fort Wayne, IN

Occupation: Retired Homemaker

Comment: Something has to be done to prevent hunger in our nation. If children & adults do not have food to live, what else is there for them? Their children cannot study in school and parents are unable to give their family proper nutrition. I don't know what the answer is, but there is a lot of money wasted in our government. Thank you.

COMMENT OF JON WALTON

Date Submitted: Tuesday, March 20, 2012, 11:02 p.m.

City, State: Friendsville, TN

Producer/Non-producer: Producer

Type: Field Crops, Livestock, Other

Size: 151–300 acres

Comment: Crop insurance needs to be changed to address the issue of yield switching fraud between farm numbers. Producers participating in this type of fraud are using the names of multiple family members on leases from different farm numbers to show losses and receive indemnities while building yield history on other farm numbers. This fraud creates a distinct disadvantage for producers who report yields accurately.

COMMENT OF GARY WALVATNE

Date Submitted: Wednesday, May 16, 2012, 1:11 a.m.

City, State: West Linn, OR

Occupation: Hydrogeologist

Comment: I support the Supplemental Nutrition Assistance Program (SNAP) and The Emergency Food Assistance Program (TEFAP). Please continue to include SNAP and TEFAP in future farm policy and the next farm bill.

Thank you,

GARY WALVATNE.

COMMENT OF LISA WALZEM

Date Submitted: Friday, May 18, 2012, 5:14 p.m.

City, State: Fresno, CA

Occupation: Office Manager

Comment: As a mother, wife and longtime citizen of Central California, one of the most fertile and productive farming areas in the country, I believe we have to change the way we are doing things. We have to make a stand against the large corporate farms and companies that supply them. Large scale farming operations based on chemicals and genetically modified crops are not sustainable and in the long run are doing more harm than good to our environment and economy. We need to follow the lead of the majority of developed nations and ban GMOs and embrace organic farming methods. I endorse the following:

1. The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
2. Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
3. The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
4. Maintaining the EQIP Organic Initiative.

COMMENTS OF RUBY WANG

Date Submitted: Friday, May 18, 2012, 6:56 p.m.

City, State: Ellicott City, MD

Occupation: Teacher

Comment: We need to support organic farming, which is more friendly to our environment, consequently better for our health. While the current bill is always in favor of factory farming, which is number one cause of pollution and global warming, we should limit its practice, should not support it.

Date Submitted: Sunday, May 20, 2012, 1:49 p.m.

Comment: Please help organic farming, not factory farming. Organic farming can absorb 40% of green house gas, whereas factory farming is one of the major contributor to global warming. Please help!

COMMENT OF ALBERT WARD

Date Submitted: Thursday, May 17, 2012, 12:47 p.m.

City, State: Las Vegas, NV

Occupation: Graphic Designer/Gardener

Comment: Please allow more subsidies for local and organic farmers. We do not want more monopolies on our food (seed). Less money spent on chemicals will also help the environment and our health.

COMMENT OF LINDA WARD

Date Submitted: Friday, May 18, 2012, 2:02 p.m.

City, State: Cottonwood, AZ

Occupation: Medical

Comment: I have an autoimmune disease and many food allergies and chemical sensitivities. I only eat organic vegetables. It is important that I know what I am eating so I don't suffer reactions. So many commercialized produce have chemical pesticides, so I stay away from the produce area of regular grocery stores.

COMMENT OF TERRI WARD

Date Submitted: Friday, May 18, 2012, 3:43 p.m.

City, State: Tualatin, OR

Occupation: CPA

Comment: I am writing to let you know that I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.
- GMO Labeling

I do not support farm subsidies for any GMO crops and the new proposed subsidized insurance program is full of opportunities for fraud and abuse. These wasteful entitlement programs need to stop.

Our system is broken and the first thing that should happen to fix it is to stop the revolving door between industry and the USDA. No former industry executives should be hired in official positions. Officials need to be objective and independent. The Iron Triangle and the revolving door are rife with corruption. You need only look at other industries such as finance and accounting to understand that objectivity and independence can and should be the standard.

The health of U.S. citizens is at risk and giant agri-corps contribute significantly to the problem. We need to fund organic research and support organic farmers as well as educate the public about the risks chemicals and pesticides pose to our health and the environment. There is plenty of good science out there to prove my point if you look outside the studies funded by industry.

Please act to save our health, soil and environment.

COMMENT OF GERARD WARDELL

Date Submitted: Friday, May 18, 2012, 2:14 p.m.

City, State: Great Falls, VA

Occupation: Regulatory Consultant

Comment: As a regular consumer of Organic Produce, I think it is about time the USA got serious about protecting organic farmers and their families. Factory farms feed a lot more people but that does not mean they should determine **All** Agricultural Policies of the U.S. I urge you to seriously consider re-writing the next farm bill to make it more friendly to the organic industry so all citizens of the U.S. have a choice.

COMMENT OF NICHOLAS WARE

Date Submitted: Friday, May 18, 2012, 3:50 p.m.

City, State: Los Angeles, CA

Occupation: Materials Engineering Student

Comment: We are, literally, what we eat and I want my country to represent the value of true food and upward mobility. We each as an individual have the responsibility to step toward this goal or ignore it. Please, help this country grow in a way that will sustain us as a people.

Thank you.

COMMENT OF JASON WARFIELD

Date Submitted: Tuesday, March 20, 2012, 10:11 a.m.

City, State: Abilene, TX

Occupation: Researcher

Comment: Anything which deals with carbon credits should be struck from the bill. Also all GMO needs to be labeled and all side effects listed. GMO has been proven very dangerous and should not even be in the market. Also, raw milk and real organic farms, and individual gardens should be highlighted and re-enforced as legal for producing, sale to the public, and consumption.

COMMENT OF DR. CAROLE A. WARNER

Date Submitted: Friday, May 18, 2012, 2:46 p.m.

City, State: Portland, OR

Occupation: Physician

Comment: As a Naturopathic physician, I see the people who are the dietary and nutritional “canaries in the coal mine;” those who have strong negative impacts to their health as a consequence of their exposure to GMO produce and the resultant high levels of pesticides and herbicides used on them. In addition, these foods have inferior levels of nutrition because the soils have been so seriously depleted of minerals and the microflora that works with plants roots synergistically to extract nutrients from the soil have been wiped out and pathological strains have replaced them. I see patients with obesity and the range of serious chronic illnesses that result from consuming food that is truly toxic to health yet is the vast majority of “food” being produced by our farming practices in this country. This is making ill and killing literally millions of Americans every year, yet we have yet to reform our nation’s agricultural practices to address this incredibly serious issue. We have probably spent trillions of dollars and been at war for 10 years as a result of an attack that destroyed two buildings and killed a few thousand people, yet we sit back and so nothing of substance to address the horrible state of health and deaths of millions of Americans every year! This is either a tragic oversight on the part of our elected officials or an unethical and outright treasonous derelict of duty on their part. Addressing this travesty rapidly and with real reform will better this nation on so many fronts. It will dramatically improve our nation’s health, dramatically improve our land’s health by implementing practices that don’t degrade and pollute our soil and water, and as a byproduct be a huge financial boon to the country in the form of dramatically decreased healthcare costs, *etc.* Please, urgently take on real reform of our agricultural practices this year. Our nation’s health depends on it.

Sincerely,

DR. CAROLE A. WARNER.

COMMENT OF SARA WARNER

Date Submitted: Friday, May 18, 2012, 5:00 p.m.

City, State: Grand Ridge, FL

Producer/Non-producer: Producer

Type: Livestock

Size: 50–150 acres

Comment: We need to promote health in our farms and products, not cater to lobbyists. If we don’t pay more attention to a healthy environment and healthy production of food, we can never get the country out of the health care crisis.

COMMENT OF TIM WARNER

Date Submitted: Friday, May 18, 2012, 10:41 a.m.

City, State: Los Angeles, CA

Occupation: TV Editor

Comment: Americans want safe, healthy, whole foods. Agribusiness giants like Monsanto are using humans as guinea pigs in their genetically modified food experiment and I want no part of it. Please protect small farmers and consumers and stop cozying up to corruption and lies.

COMMENT OF SHEREE WARNER NYREN

Date Submitted: Friday, May 18, 2012, 10:57 p.m.

City, State: Fairbanks, AK

Occupation: Body Worker

Comment: The health of America health of Americans, physically and mentally. Processed foods and modified food produced by big AG and corporations **Do Not** make healthy bodies or minds. An over-burdened health care system does not support a strong economic America and is bringing it down.

COMMENT OF BESS WARREN

Date Submitted: Friday, May 18, 2012, 2:48 p.m.

City, State: Germantown, TN

Occupation: Mother

Comment: I am very concerned about the direction farming is moving in the United States. I think we need to protect small farmers and support organic, traditional farming methods over chemically mass producing foods that make us ill.

COMMENTS OF BRANDI WARREN

Date Submitted: Friday, March 16, 2012, 10:44 a.m.

City, State: Brooks, KY

Producer/Non-producer: Producer

Type: Poultry/poultry products, Vegetables

Size: Less than 50 acres

Comment: No more genetically modified foods without decades of research and data. No more factory farms! No more growth hormones and overused antibiotics.

The people are demanding food that won't kill us! Farming methods that are sustainable. The world can be fed without buying one new seed every year. Cut ties with Monsanto and stop cow-toeing to them!

Date Submitted: Thursday, May 17, 2012, 2:35 p.m.

Comment: We need a better farm bill to put the future of our food into the hands of the people, not biotechnology labs. There are a plethora of fixes from guaranteeing funds for beginning farmer and rancher programs, ensuring the safety of our food—No GMO, and protecting the environment while feeding the world. These things can be done, but we must farm in a different way, not in factory barns and feedplots.

COMMENT OF PENNY WARREN

Date Submitted: Friday, May 18, 2012, 12:38 p.m.

City, State: Annapolis, MD

Occupation: Acupuncturist

Comment: Our health is our most important resource, and it depends on the quality of our food. More research shows organically grown food provides far more nutritive value without the harmful toxic chemicals. We, as a nation, depend on the dedication of our organic farmers.

COMMENT OF PETER WARREN

Date Submitted: Friday, May 18, 2012, 2:20 p.m.

City, State: Ashland, OR

Occupation: Software Developer

Comment: As a voter, a sustainable, healthy, environmentally responsible food system is of foremost concern to me. We need to eliminate subsidies for farming practices that ultimately do more harm than good, and we need to encourage practices that invigorate and vitalize the planet, rather than deplete it.

COMMENT OF RUBY WARREN

Date Submitted: Friday, May 18, 2012, 7:35 p.m.

City, State: Asheville, NC
Occupation: Grower of Perennial Food Crops
Comment: We must change our way of growing food as it is making us ill, polluting our water, air and Earth. Remember Rachel Carson and take her message to heart!

COMMENT OF TOMI WARREN

Date Submitted: Friday, May 18, 2012, 2:22 p.m.
City, State: Ridgecrest, CA
Occupation: Registered Nurse
Comment: I find eating food that is organic or grown without pesticides make me feel better and increases my health. Please support this bill as it makes me a healthier person.

COMMENT OF NANCY WARSHAWER

Date Submitted: Saturday, May 19, 2012, 9:31 a.m.
City, State: Tucson, AZ
Occupation: Clinical Laboratory Scientist
Comment: Healthy Farm Bill, Now!
 Want to save the U.S. billions (trillions?) of dollars? Fix the food system that subsidizes our current diet of "foods" (manufactured food-like substances!), that are making us fatter and increasing a host of diseases, **And Our Health Care Costs!** If we're going to subsidize, how about fresh fruits and vegetables?! Thanks for listening!

COMMENT OF THOMAS WASHBURN

Date Submitted: Friday, May 18, 2012, 3:40 p.m.
City, State: Fernandina Beach, FL
Occupation: Public Health Physician
Comment: As your constituent, I write to urge your votes for strong overhaul of the farm bill.
 We must preserve the SNAP program at the present level to protect the hunger needs of so many people in our nation who are living in poverty.
 We must stop the subsidy program for agribusinesses. They absolutely have no need of government support.
 Please support the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
 I think we must fully fund conservation programs, such as the Conservation Stewardship Program, and make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
 Please support the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
 Please vote to maintain the EQIP Organic Initiative.

COMMENTS OF KELLY WASSELL

Date Submitted: Friday, May 18, 2012, 2:46 p.m.
City, State: Kapa'a, HI
Producer/Non-producer: Producer
Type: Vegetables
Size: Less than 50 acres
Comment: *Aloha!*
 Please take a moment to think about where you last meal came from. Know that we could have an entirely sustainable and local food system if we put our money where our mouth is! There are tons of young people raring to farm and create the local food economy, but they need encouragement and help! It is a risky and expensive business to start up no matter how you look at it, but small, sustainable farmers are willing to take that risk to build food security for the communities that they love!
 I am one of them, but money is the main thing that holds me back! Access to land that I can count on being in my possession for 25 years or more is very hard to find. Especially in Hawai'i, there is a huge need to create local, small scale, sustainable agriculture so that everyone can continue to eat in the next 50 years. I believe in that amount of time regular shipping from the mainland will end, so Hawai'i

needs to start now building that local food network so we can care for our *ohana* and *'aina*.

Please support beginning and sustainable farmers in the next farm bill!

Mahalo!

KELLY WASSELL,
Beginning organic farmer in Kaua'i.

Date Submitted: Sunday, May 20, 2012 9:50 p.m.

Comment: *Aloha* Chairman Lucas, *Mahalo* for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I work as a farm hand on an organic vegetable farm and live in Kaua'i, Hawaii, one of the most expensive rural counties in the U.S. So trying to save up for starting my own venture is virtually impossible on \$10 per hour. I am going to need help from somewhere, and considering that the government used billions to bail out large banking institutions, I think we can spend a refreshing amount on the people that are and will supply us with fresh, healthy food in the future! Small and sustainable farmers need help especially in counties where the land prices are sky high because incredibly rich people buy land here and have driven up prices! Kaua'i imports 90% of its food, so food security is very low, and there is an amazing amount of open, flat land that would be great for agriculture, but only partially being used for cattle or GMOs so that rich people can get a tax break! There are so many challenges to farming on an island like this, but I want to do it, and I want to make sure all the hard work I do to improve the land is not squandered by some irrational owner. It is extremely hard to get long term land leases here and I have seen master farmers that have poured their sweat into land be kicked off without due regard to the amazing work they do. Lots of reasons for farmers to own their own land, but so many things stand in the way of that, especially money! So please consider where that next mouthful comes from! Small and sustainable farmers need all the support they can get! I ask that the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

KELLY WASSELL.

COMMENT OF BRENT WASSER

Date Submitted: Friday, May 18, 2012, 9:20 a.m.

City, State: Williamstown, MA

Occupation: Higher Education Programming

Comment: With the new farm bill, please support:

- alternative agricultural systems such as organic and biodynamic production

- the production of whole foods, and provide less money to commodity crop production destined for processed foods
- SNAP outreach programs and nutrition education programs
- beginning farmer initiatives and support programs

COMMENT OF PAULA SQUIRE WATERMAN

Date Submitted: Friday, May 18, 2012, 2:45 p.m.

City, State: Rockville, MD

Comment: I am a consumer who watches very closely what I put in my body. Big agribusiness could care less about me and my needs. Their focus is on the bottom line and **Not** my health.

COMMENT OF JULIA WATERS

Date Submitted: Friday, May 18, 2012, 1:30 p.m.

City, State: Oakland, CA

Occupation: Nutrition Student

Comment: I would like to see increased subsidies for small farmers and organic farmers in order to encourage the production of healthier foods near urban areas. In light of the obesity crisis, subsidizing big corn for cattle feed and HFCS doesn't make sense. We need to lose weight, and that starts with switching our financial support to the kinds of food commodities that are health promoting. Please take a stand before the poor health of our nation determines our future. Prevention is **Always** cheaper than interventions later on. Thank you.

COMMENT OF KRISTINE WATERS

Date Submitted: Friday, May 11, 2012, 10:31 a.m.

City, State: Indian Wells, CA

Occupation: Teacher, Environmental Advocate

Comment: Support individual farmers who farm sustainably and organically with zero or minimal pesticide use. Do not support Monsanto or any organization that farms using monoculture or GMO's.

COMMENT OF CARL WATKINS

Date Submitted: Friday, May 18, 2012, 1:57 p.m.

City, State: Eugene, OR

Occupation: EV Battery Distribution

Comment: Protect Organic Farms, keep organic regulations strict and strong. Label all GMO products. Stop banking harassment. End subsidies for wealthy farmers.

COMMENT OF PAUL WATKINS

Date Submitted: Friday, May 18, 2012, 3:03 p.m.

City, State: Longview, TX

Occupation: Home Health

Comment: The USDA has destroyed family farms in this country. support self sustaining family farming, not monolithic corporate agribusiness, if a single family owns a massive one crop corporate farm with excessive use of petroleum based fertilizers, that does not make it a family farm. **Stop Destroying Agriculture In America.** If you need clarification, e-mail me. If you are paid lackeys of corporate masters, ignore this. Americans are not stupid, and we vote.

COMMENT OF BRUCE WATSON

Date Submitted: Friday, May 18, 2012, 12:19 p.m.

City, State: Raleigh, NC

Occupation: Film Colorist/Finisher

Comment: The future of agriculture comes down to sustainability. And our current status quo is anything but sustainable. So, shift away from big ag. Shift instead toward little ag and support small organic farms.

Redirect the current unnecessary subsidies of "big ag" toward small farms that practice sustainable agriculture. In particular, establish farm policy that establishes organic practices, teaches these practices, and subsidizes small farmers who shift to these practices.

We have to do this. It's not a choice. The cost of fossil fuel is only going to rise. And as fossil fuels go, so go the fertilizers, pesticides, and herbicides.

But this is also a public health issue. The more we learn about the fertilizers, pesticides, and herbicides in the food supply, the more we learn that even very low levels have bad public health outcomes, especially for the farmers and field workers.

COMMENT OF JAN WATSON

Date Submitted: Friday, May 18, 2012, 3:06 p.m.

City, State: Hakalau, HI

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: Please consider and encourage small sustainable no spray farming. The food we eat is essential to our bodies and mind. The land that gives us our food is needing the same attention. Do not give into money and mass production of food, that is lacking in nutrition and diminishes the land. This is not rocket science but it is the survival of our planet and the health of all that inhabit her. *Mahalo*.

COMMENT OF JERI WATSON

Date Submitted: Friday, May 18, 2012, 2:25 p.m.

City, State: La Grande, OR

Occupation: Teacher

Comment: It is time to support sustainable practices that are healthy for people and the Earth. People are clamoring for safer food. Let Oregon be a leader in this regard. Keep supporting positive change, not large corporate food and damn the consequences. Portlandia is a laughable extreme, but people are caring more and more about good local food.

Please help support it. Fund positive change!

COMMENT OF JULIE WATSON

Date Submitted: Sunday, May 20, 2012, 10:20 p.m.

City, State: Greensboro, NC

Occupation: Small Business Owner

Comment: As a small business owner, I rely on the organic products that I can find locally. Please take new measure to help grow the local organic markets, instead of hinder them. Big Ag is the cause of many of the issues in this country. Please focus the farm bill away from Big Ag and towards a more sustainable way to farm.

COMMENT OF MARILYN WATSON

Date Submitted: Thursday, May 17, 2012, 2:21 p.m.

City, State: Hartford, CT

Occupation: Retired

Comment: First of all, this country is already in the ground; people in Congress do not care about people in the country. This is where God steps in and will allow the people to take over this country—watch and see! I don't receive SNAP benefits because they messed up on my paperwork I sent them. But if you take them away there will be people standing outside of the White House angry! Do not take away the SNAP for the people that need it!

COMMENT OF PAUL WATSON

Date Submitted: Wednesday, May 16, 2012, 2:13 p.m.

City, State: Anchorage, AK

Occupation: Food Stamp Outreach Coordinator—AFC

Comment: In 2 years of visiting villages and rural communities in Alaska, I've witnessed no let up in "food anxiety" due to rising fuel prices, housing and medical costs, and lack of jobs and income. I urge Don Young and members of the House Agriculture Committee to reject cuts in these programs for Alaska's poor!

COMMENT OF PHIL WATSON

Date Submitted: Friday, May 18, 2012, 8:25 p.m.

City, State: Langley, WA

Occupation: Retired Advertising Exec.

Comment: My wife I buy organic products as much as possible even though we pay more for it. We are voting with our dollars to support sustainable and ecologically friendly agriculture. Large commercial mono-culture farming is raping the land, polluting our waterways and turning farmland into desert by killing the soil. We are also buying organic to maintain our health to reduce our contribution to healthcare costs. We urge to protect the viability of organic farming in this country.

COMMENT OF ANN WATTERS

Date Submitted: Friday, May 18, 2012, 3:29 p.m.

City, State: Salem, OR

Occupation: Health Care

Comment: End food subsidies. Label GMO food. Do not allow **Monsanto** to run agriculture. Decisions. We will have a nation of sick people and dead people. No ethanol subsidies.

COMMENT OF NANCY WATTS

Date Submitted: Friday, May 18, 2012, 10:09 p.m.

City, State: San Luis Obispo, CA

Occupation: Retired English Teacher, Raised on Farms

Comment: Bad ideas that Congress is considering: cutting funding to vital programs such as nutrition, conservation and cutting support for organic and sustainable agriculture . . .

COMMENT OF ANN WAUGH

Date Submitted: Friday, May 18, 2012, 2:31 p.m.

City, State: Boring, OR

Occupation: Self-Employed

Comment: The old farm bill is unfair to the smaller farms. Please level the field and stop giving all the selling and marketing power to the big agricultural communities. We need to sustain all local and small farms to ensure free access to fresh, healthy, unprocessed junk foods.

COMMENT OF NATHAN WAY

Date Submitted: Friday, May 18, 2012, 11:07 p.m.

City, State: Knoxville, TN

Occupation: Doctor

Comment: I see a need to increase utilization of local produce and reduce subsidies to transportation of commodity produce farmed by large corporations.

COMMENT OF CATHY WAYMIRE ROOKS

Date Submitted: Saturday, May 19, 2012, 11:10 p.m.

City, State: Langley, WA

Occupation: Garden Designer and Landscape Contractor

Comment: We are going the wrong direction with huge agribusiness farms. Our food isn't healthy or sustainable, current farming practices are ruining the soil, and GMOs threatens the very livelihood of much of the world's population. Please put the health of the planet ahead of big business' quest for profit and instead help support our small local producers.

COMMENT OF LYNN WEATHERSBY

Date Submitted: Saturday, May 19, 2012, 6:17 a.m.

City, State: Azle, AR

Occupation: Stay-at-Home Housewife and Mother

Comment: I am very concerned about what my children are ingesting. I understand that your action to improve and make safe the country's food supply may result in higher prices. This is a trade-off I'm willing to make to ensure the food my children eat is healthy, safe and nutritious.

Sincerely,

LYNN WEATHERSBY.

COMMENT OF CAT WEATHERUP

Date Submitted: Friday, May 18, 2012, 8:28 p.m.

City, State: Berkeley, CA

Occupation: Art Director

Comment: With Autism 1,000-fold more prevalent than it was only decades ago, we need to **Stop** poisoning our food supply with pesticides. Many of us would rather have an insect in our veggies over poison. If we continue to poison our land, water, and food we can only expect illness to worsen. Please stop using Americans as unwitting lab rats for genetically modified foods and pesticides, so that big business can profit. Label them! Better yet, stop using them until long-term studies prove them innocuous. I don't care what Monsanto wants. We are not guinea pigs and it is unconscionable for this country to treat us as such!

COMMENT OF ANDREW WEAVER

Date Submitted: Friday, March 16, 2012, 2:57 p.m.

City, State: Castaic, CA

Occupation: Unemployed

Comment: You have an obligation to insure that all families and individuals receive the proper healthy meals that are required in order to survive. Excluding chemical based foods with heavy chemicals that will end up killing millions of Americans.

COMMENT OF BECCA WEAVER

Date Submitted: Monday, May 14, 2012, 9:22 a.m.

City, State: Somerville, MA

Occupation: Farm Service Provider

Comment: Dear Committee on Agriculture,

I work with beginning and established farmers every day through my work on Farmland Matching and Beginning Farmer Support in MA. I have noticed firsthand the difference that Federal programs have made in the lives and businesses of local farmers, as well as the regional food system in which we operate. In this light, I urge you to create a farm bill which:

- (1) invests in the next generation of farmers and ranchers—guarantee \$25 million per year in mandatory funding for the Beginning Farmer and Rancher Development Program. We need a national strategy and commitment to support beginning farmer and ranchers entering agriculture. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new agriculture start-ups.
- (2) protects our natural resources—protect the Conservation Stewardship Program from unfair funding cuts, and improve it by ranking applications solely on their conservation benefits. Farmers count on CSP and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife—all while farming profitably.
- (3) drives innovation for tomorrow's farmers and food entrepreneurs—fund the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture. And
- (4) creates jobs and spurs economic growth—support programs like the Value-Added Producer Grants Program by guaranteeing \$30 million of mandatory funding per year. VAPG provides seed money to help farmers innovate in agriculture and create jobs while securing a sustainable path to market-based farm profitability.

Thank you for doing your best to make this happen in order to create a vibrant agricultural and food system for every Farmer and consumer in America.

Sincerely,

BECCA WEAVER.

COMMENT OF DAVID WEAVER

Date Submitted: Tuesday, May 08, 2012, 12:11 p.m.

City, State: Lubbock, TX

Occupation: CEO, South Plains Food Bank

Comment: I work with the South Plains Food Bank. Since 2008, we have seen a dramatic increase the number of families receiving food assistance from us. Last year's drought made the situation worse for citizens of our rural communities.

Local donors have stepped up to help us meet the increased needs of our community. But even with increased support we are being overwhelmed. As the economy improves, I expect to see a decrease in the number of families we assist. However, in the meantime, families throughout the South Plains are looking to the food bank and our network of churches and non-profits for food assistance.

We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

COMMENT OF GENE WEBB

Date Submitted: Friday, May 18, 2012, 3:59 p.m.

City, State: San Rafael, CA

Comment: I'm informed enough to be a vegan who buys only organic. U.S.D.A. F.D.A. Congress, Supreme Court, President, have the credibility of starving devils. Wish you luck Lynn. *Forks over Knives*.

COMMENT OF PATRICIA WEBB

Date Submitted: Friday, May 18, 2012, 11:53 a.m.

City, State: State College, PA

Occupation: Health Educator

Comment: I am a nurse—farming practices are public health issues. Human health depends fundamentally on the safety and quality of what we eat. Mass produced, engineered, and heavily processed foods shipped between countries and across oceans is not only unhealthy for people, it is not sustainable for economies or habitats.

Please educate yourself about local/regional farming and its benefits for human & environmental health. Smaller scale regional farming is the most responsible and sustainable path for benefiting quality of life & health on the planet.

COMMENT OF JEFF WEBSTER

Date Submitted: Friday, May 18, 2012, 11:57 a.m.

City, State: Harmony, MN

Comment: Hi,

It is high time to clean up USDA, FDA and our ag schools all who work for Ag Industry. Not at all protecting the very people that pay their salary. Yours too. The present system is corrupt and awful to say the least.

I want my tax dollars helping out farmers who produce food for people not wasting limited natural resources on crap like ethanol.

JEFF WEBSTER,
Harmony, MN.

COMMENT OF KEVIN WEBSTER

Date Submitted: Saturday, May 19, 2012, 11:59 a.m.

City, State: Abilene, TX

Occupation: Self-Employed

Comment: Dear Sir,

While I understand that the lion's share of your focus in addressing the farm bill is to lookout for the many large agricultural interests of our district, I ask that you please not forget the citizenry, whom you are actually supposed to be representing. Please do not continue to fall for the erroneous logic of bigger is better, especially in this category of our life sustaining food supply. Contrary to other types of mass production, "Better" in this case, must instead be determined by the health supporting quality of the food, rather than the volume. We can eat less if it is rich in nutrients, but no amount of eating cardboard will ever serve the intended purpose adequately. The higher the quality of the food, the greater the health of the eater, and less that individual will need to depend on the government for helping them deal with poor health. If you point the tax dollars the correct direction, you won't need more tax dollars elsewhere to deal with the consequences of not doing so, as is the case with the current subsidization. Small farmers are the ones that need the subsidies, and particularly those committing to the higher standards of producing

nutrient rich, high quality foods, *i.e.*, Organic Farming that is actually self-sustaining as it contributes back to nature what it takes, rather than depleting it of all that is truly given by nature. Man made artificial substitutes will always come with consequences, and more often than not, they are grave and far more expensive, leaving ruin in their wake, and ultimately hurrying us to our graves. Please consider your own life and that of your loved ones, and the quality of life you desire to provide for them, and then offer the same opportunity to your constituents. Support increasing our access to nutritious whole foods, free from contamination by man made products and thus free from the devastating consequences to our health and quality of life. Food shortage is not the genuine concern, rather it is food quality. Please open your eyes to the true science and future, rather than the for-profit driven manipulations of facts you are no doubt perpetually bombarded with by the larger business interests. Please quit helping them maim and kill us for the sake of their profits. Don't forget who you are really accountable to, in this life and the next.

Sincerely, one of your supporters to date,

KEVIN WEBSTER.

COMMENT OF SHANNON WECKMAN

Date Submitted: Sunday, May 20, 2012, 7:51 p.m.

City, State: Felton, CA

Occupation: Retired/Disabled

Comment: We need wholesome organic food, **Not** government subsidized unhealthy food such as high fructose corn syrup and GMO foods. Our health depends on good quality food and who would not want that.

COMMENT OF JENNIFER WEEDEN

Date Submitted: Friday, May 18, 2012, 12:34 p.m.

City, State: Upton, MA

Occupation: Mom, Wife, Elementary School Administrator

Comment: I can't think of any more important issue right now than the support for healthy, sustainable agricultural practices and support for the viability of small-scale (family!) farming. Allowing big agribusiness to not only destroy our planet with carcinogenic and otherwise harmful chemicals but also to actively work to destroy small-scale farming is to allow the destruction of our planet and of a very American way of life. Now is the time to support organic farming, small-scale farming, and broad policies that protect the health of our people and of our planet.

COMMENT OF DARRELL WEEMS

Date Submitted: Thursday, May 17, 2012, 7:55 p.m.

City, State: Adel, IA

Producer/Non-producer: Producer

Type: Field Crops, Livestock

Size: 151-300 acres

Comment: In regard to the 2012 Farm Bill:

- (1) Imperative to pass a new farm bill before elections
- (2) Must contain strong conservation title even while reducing budget exposure to stop uncontrolled U.S. Gov't spending and debt. Must think long term to protect our Ag. production resources far into the future.
- (3) Needs to maintain a conservation compliance strategy with in a strong crop insurance program, and that can be done without jeopardizing all farmer access to crop insurance. *i.e.*,: amount of subsidization based on conservation practiced (\$'s or %) or similar
- (4) Needs a strong new or young farmer component. Extremely hard, almost impossible for a new young farmer to gain land access, to compete with the big guys.

COMMENT OF PATRICIA WEEMS

Date Submitted: Wednesday, May 09, 2012, 4:38 p.m.

City, State: Chatsworth, CA

Occupation: Sales Marketing

Comment: I'm in the same situation as other seniors, but wound up destitute due to a personal injury when hit by an uninsured driver, lost job had to sell car and possessions to survive since I was an independent contractor . . . still looking for

work, trying to set up internet consulting business in addition . . . really difficult . . . I'd like to be able get a small loan to start my business Chores-on Call . . . highly in demand in my area . . . would like to be able to hire seniors only to help get them out of destitution . . . it's a horrible place to be. What the government needs to do is to allot small business start up loans for seniors and let us start a network of seniors who are capable of working and want to . . . we can help each other. I will be homeless if something doesn't click soon. The private sector could get involved, especially wealthy corporations who could get tax breaks and let us pay the loans back with reasonable monthly payments . . . there is a wealth of knowledge and capability among many seniors . . . [Redacted] Google voice if responses are required.

COMMENT OF TYSON WEEMS

Date Submitted: Saturday, May 19, 2012, 4:57 p.m.

City, State: Portland, ME

Occupation: Registered Dietitian/Public Health Educator

Comment: The farm bill can promote public health better by reducing subsidies for corn and soy and increasing them for other vegetables. In general, it should reflect public health interest rather than the interests of large agricultural and chemical companies, many of which run counter to improving Americans' diets and associated health.

COMMENT OF MELANIE WEHMEYER

Date Submitted: Saturday, May 19, 2012, 12:58 a.m.

City, State: Boerne, TX

Comment: Organic farming is the **Only** way **Anyone** should be farming. There must not even be an alternate way. The health of the people of this United States depends on it! GMO's must be stopped!

COMMENT OF EDNA WEIGEL

Date Submitted: Saturday, May 19, 2012, 9:08 a.m.

City, State: Bisbee, AZ

Occupation: Writer

Comment: Please make sure the farm bill emphasizes sustainability rather than subsidizing industrial ag. Food stamps to serve as a safety net for those most in need and nutrition programs to fight the health-care costs of obesity are important.

COMMENT OF DONNA WEILER

Date Submitted: Friday, May 18, 2012, 11:47 a.m.

City, State: Huntingdon Valley, PA

Occupation: Homemaker

Comment: Please stop the support for meat, dairy, eggs, poultry, soy and corn. We need to support those farmers growing healthful foods: fruits & vegetables.

COMMENT OF LARRY WEINBERG

Date Submitted: Sunday, May 20, 2012, 9:50 a.m.

City, State: East Meadow, NY

Occupation: Massage Therapist/Yoga Instructor/Colon Hydrotherapist

Comment: Please don't cut spending on research for organic farming or support for beginning Farmers. We need to keep organics alive in order to keep this planet alive. The chemicals are destroying our bodies, our health and the health of the entire planet. Please help.

COMMENT OF LESLIE WEINBERG

Date Submitted: Friday, April 27, 2012, 8:49 a.m.

City, State: Stamford, CT

Occupation: Unemployed Advocate

Comment: We must continue to properly budget the nutrition programs, such as SNAP, WIC, and TEFAP. In these difficult times, more people now depend on Food Banks, Pantries, and Soup Kitchens. I thank you for your support of these programs, and other aspects of the Safety Net as well.

LESLIE WEINBERG.

COMMENT OF MARGARET WEINER

Date Submitted: Wednesday, May 16, 2012, 3:19 p.m.

City, State: Urbandale, IA

Occupation: Retired

Comment:

- America needs a farm bill that makes healthy food widely available to all Americans—including schoolchildren! I urge you to vote for a bill that provides flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.
- And maybe most importantly of all, for the future of our state and all who live here, pass a farm bill that protects our natural resources—protect the Conservation Stewardship Program from unfair funding cuts, and improve it by ranking applications solely on their conservation benefits. Farmers count on CSP and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife—all while farming profitably.
- I also want to see legislation that invests in the next generation of farmers and ranchers—guarantee \$25 million per year in mandatory funding for the Beginning Farmer and Rancher Development Program. We need a national strategy and commitment to support beginning farmer and ranchers entering agriculture. Our farm population is aging and now is the time to nurture new agriculture start-ups.
- I also urge you to support a farm bill that funds the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.

COMMENT OF CAROL WEINGEIST

Date Submitted: Friday, March 16, 2012, 8:40 a.m.

City, State: Hanover, NH

Occupation: Retired

Comment: Please label all food that are GMO. Please subsidize food for the hungry; and make it healthy food that has labels to identify content. Do not give the hungry junk food.

COMMENT OF SHARYL WEINSHILBOUM

Date Submitted: Friday, May 18, 2012, 11:37 p.m.

City, State: Pacifica, CA

Occupation: Preschool Teacher

Comment: I am a single mother with three children, a preschool teacher, who is trying to live on a salary of less than \$2,000.00 a month in the San Francisco peninsula. The children's father has paid no child support in 2012. Without the help of SNAP benefits, only about \$350.00 a month, and Second Harvest food bank I would not be able to afford to feed my family. Please help people like me by keeping funding strong for food programs.

COMMENT OF CHRIS WEINTROB

Date Submitted: Friday, May 18, 2012, 9:56 a.m.

City, State: Bethesda, MD

Occupation: Nutrition Counselor

Comment: The healthcare crisis in America, which includes rising cases of obesity, type 2 diabetes, heart disease, Alzheimer's, and certain cancers, could be resolved with one simple solution: meaningful subsidies to fruit and vegetable growers. It's no coincidence that the most unhealthy, cheap foods that are causing these modern diseases are made with products that are heavily subsidized by the government. Countless times I hear people say, "I can't afford to eat healthy . . ." What kind of country are we where our policies make our citizens sick and keep them sick. Please do the right thing by looking out for the interests of the consumer rather than the interests of big food companies. It really is a simple solution and it's the right, decent, humane thing to do.

As the committee considers the 2012 Food and Farm Bill, I urge you to:

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our

budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;

- Provide an even “plowing” field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don’t: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

COMMENT OF ANNA WEISBERG

Date Submitted: Thursday, May 17, 2012, 2:50 p.m.

City, State: Philadelphia, PA

Occupation: Teacher

Comment: We need a farm bill that encourages new farmers to enter the industry, small family farmers to stay in the industry. Stop subsidies to the largest producers, and instead provide grants and seed money to new and small growers.

We need a farm bill that makes healthy food available to all people by allowing those with benefits to use them at farmers markets, among other programs.

The farm bill should support farms that conserve resources and do not degrade the surrounding environment or soil. Please protect the Conservation Stewardship Program from funding cuts.

Last, we need a farm bill that invests in research and innovation. Please fund the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding.

Thank you.

COMMENT OF JEAN WEISMAN

Date Submitted: Friday, May 18, 2012, 10:52 a.m.

City, State: Brooklyn, NY

Occupation: Retired

Comment: I urge you to stop subsidizing big farms that are making huge profits. You should support small farms that are providing organic fruits and vegetables to school children. We need more food stamps and farmers’ markets.

JEAN WEISMAN

COMMENT OF CHARLIE WEISS

Date Submitted: Friday, May 18, 2012, 5:12 p.m.

City, State: Portland, OR

Occupation: Research Consultant

Comment: The farm policy of this country is based on a reality between 50 and 100 years old. It would seem worthwhile to update that policy, which now seems to enrich a few at the expense of . . . everyone else. Thanks.

COMMENT OF GABRIEL WEISS

Date Submitted: Saturday, May 19, 2012, 8:09 a.m.

City, State: East Orland, ME

Producer/Non-producer: Producer

Type: Greenhouse/nursery, Vegetables

Size: Less than 50 acres

Comment: We have to invest in the future. Environmental protection and consumer protection are indivisible with long term economic sustainability. We need to encourage alternative methods of farming and empower localized food systems or we risk unacceptable vulnerability to our food security and national security. Please give us a farm bill that is for the people and the planet. Thank you.

COMMENT OF GREGG WEISS

Date Submitted: Friday, May 18, 2012, 5:51 p.m.

City, State: Savannah, GA

Occupation: Musician

Comment: It's a very simple thing really. Just like we always knew about smoking, even before the facts were printed, it has been clear from the very beginning that gross agricultural concerns and all sorts of additive based food products are intrinsically unhealthy.

As a person reliant on the commercial agricultural business I find it imperative to search out foods grown with quality **And Care.**

It is time we start taking account of almost lost practices and encourage local supply and production chains, and how to exploit them in our current state of development.

Please help keep people above profits. As legislators you are our only hope.

COMMENT OF RIKE WEISS

Date Submitted: Friday, May 18, 2012, 3:22 p.m.

City, State: Honolulu, HI

Occupation: Healthcare Professional

Comment: Hawai'i imports 90 percent of its food. A policy that favors small farmers (over Monsanto and other agribusiness) would contribute to healthier foods for all. Haven't we learned that mono-crops don't work (only for stockholders, only for so long).

COMMENT OF NANCY WEISS-FRIED

Date Submitted: Friday, May 18, 2012, 4:54 p.m.

City, State: Cranston, RI

Occupation: Landscape Designer

Comment: As a consumer with children and grandchildren I am concerned about the health of our food supply and also about the future of agriculture in the U.S. Nowhere does it seem that agribusiness is concerned about good nutrition and good, sustainable farming practices. Congress should be encouraging small farmers more than the mega farm businesses.

COMMENT OF KERRI WELCH

Date Submitted: Friday, May 18, 2012, 4:47 p.m.

City, State: White Plains, NY

Occupation: Early Childhood Adjunct

Comment: Please make the needed changes on the farm bill to help the little organic farmers, have safer, healthier food and less illnesses and deaths because of contaminated food. Please also realize that the majority of Americans want to know and need to know exactly what is in their food, even if it is a GMO or ingredients from another country such as China. My beloved miniature dachshund almost died in 2007 because of the unlisted Chinese ingredient melamine in her USA made dog food. Her and I survived 9/11 together living in downtown Manhattan, so she is my therapy dog and I do not know what I would do without her. Too many other pets did die in 2007 because of the unlisted ingredient above so you must do something now to make sure that never happens again. I am also a mother of two young boys (one a baby) and I feed them mostly organic food because of all the crap allowed in non-organic food. GMO's were allowed into our food in the 1990's and since then there has been a rise in food allergies, autism and cancer. Makes you think?

COMMENT OF P. WELLAND

Date Submitted: Friday, May 18, 2012, 5:47 p.m.

City, State: Florence, MA

Occupation: Musician

Comment: Please don't give everything away to big AG. That is neither sustainable, fair, nor democratic. Giant corporations do not need further handouts or a leg up, family farmers do . . . so level the playing field.

Support organic, sustainable production that does not ruin the environment, the water systems, or the soil, as so many industrial farms do.

Don't give the store away to Monsanto, with their unsustainable, pesticide-based products that create super weeds, water, air, and soil pollution nightmares. This is very bad for our children's developing bodies and brains.

- Please do fund programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don't: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

COMMENT OF CARLY WELLINGTON

Date Submitted: Wednesday, May 02, 2012, 10:47 a.m.

City, State: Portland, OR

Occupation: Student

Comment: One comment that I would like to bring to your attention is the percentage of farmers that are being represented by their districts; only 1/3 of U.S. House of Representatives members represent fewer than 1,500 farmer in their districts so I would like to see this number improved.

I would also like to see younger farmers involved in agriculture; so increased education would be necessary.

COMMENT OF BARBARA WELLS

Date Submitted: Wednesday, April 18, 2012, 11:19 a.m.

City, State: Claremore, OK

Occupation: Social Worker

Comment: With the cost of fuel and food increasing rapidly, many of our clients are unable to feed their families without assistance. Please support the farm bill and protect the TEFAP and SNAP programs. We may not be able to control the cost of gasoline and other energy sources, but, we should try to make sure, no person in this country goes hungry.

COMMENT OF COLLIN WELLS

Date Submitted: Friday, May 18, 2012, 1:21 p.m.

City, State: Richardson, TX

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: Things need to change in America and fast. Cancers, mental and behavior related illnesses, obesity, and other serious health issues are on the rise because of the way Americans eat and are fed. Unfortunately many believe that the government has their best interests in mind when it comes to food and no one would intentionally be poisoning the population. That is obviously not true with the continuous intrusions into what's "right *versus* wrong" by big agricultural firms who genetically modify and treat our food without any long-term research on the health risks.

Please help us change things.

Regards,

COLLIN WELLS.

COMMENT OF DAWN ANNE WELLS

Date Submitted: Friday, May 18, 2012, 2:59 p.m.

City, State: Union Mills, IN

Occupation: Retired

Comment: Please consider your decisions in light of the fact that every single person **Needs** healthful food. Anything you do to encourage food produced with GMO and/or non-sustainable agricultural practices is a blow to the health of people everywhere (not just in the U.S.A.). It affect not only the food produced, but also the environment. Please think before you act.

COMMENT OF JIM WELLS

Date Submitted: Saturday, May 19, 2012, 2:59 a.m.

City, State: Medford, OR

Producer/Non-producer: Producer

Type: Fruits

Size: 50–150 acres

Comment: As I prepared to figure out how to compose the most poignant, eloquent, comprehensive, and entrenched barrier-piercing essay that might even stand a chance of my comments getting even a semblance of your serious attention despite the incredibly thick insulation that your agricultural paradigm covers you with, the following link appeared in my inbox. Its timeliness and spot-on reflection of the basis of my advocacy for fundamental reform of Federal agricultural policy begs for it to be my choice of comment at this time. For, if you don't understand and appreciate it, there is not a snowball's chance in hell that you would understand nor appreciate any of thousands of specific comments I could have made. And if you somehow miraculously DO understand or appreciate it, then you don't need my specific comments, because you will be capable yourself of designing new legislative direction and language that could not help but be vast improvements many orders of magnitude over past and currently in force farm bills.

The link to the essay I incorporate into this comment as its core now follows: http://www.tomdispatch.com/post/175538/tomgram/#37;3A_ernest_callen_bach%2C_last_words_to_an_america_in_decline/.*

COMMENT OF RACHEL WELLS

Date Submitted: Saturday, May 19, 2012, 5:09 a.m.

City, State: Brooklyn, NY

Occupation: Artist, Art Teacher and Child Care Specialist

Comment: Family farms are as American as apple pie, the Declaration of Independence, our right to vote and public education. I want to eat food that is grown in my country and if possible in my state. Stop the loss of family farms to development. Help our farmers.

COMMENT OF RUTH WELLS

Date Submitted: Friday, May 18, 2012, 1:28 p.m.

City, State: San Francisco, CA

Occupation: Administrative Professional

Comment: I strongly urge the Committee to use this opportunity to direct the nation's farm policy toward organic and sustainable farming methods. It is critical that small family farms be supported and that subsidies to industrial producers end.

COMMENT OF SHANNON WELLS

Date Submitted: Saturday, May 19, 2012, 12:13 p.m.

City, State: Florence, AL

Occupation: Photographer

Comment: I support organic farming and the elimination of harmful chemicals to our land and foods, needed funding for farmers growing organic and healthy alternatives in foods, improving the lives of the citizens of Alabama through a healthier organic choice in our food products.

SHANNON WELLS.

COMMENT OF MARK WELSH

Date Submitted: Friday, May 18, 2012, 2:56 p.m.

City, State: Newark, OH

Occupation: Educator

Comment: We need a realistic farm bill that will help provide safe and wholesome foods for the American Public and for those around the world who benefit from America's production. Don't forget about our organic farmers. Thank you for your consideration.

*The information referred to is retained in Committee file.

COMMENT OF SJON WELTERS

Date Submitted: Saturday, May 19, 2012, 8:47 p.m.

City, State: Cabot, VT

Occupation: General Manager of an Organic Food Processor

Comment: We need fairness and a level playing field when it comes to agriculture. Corporations and large farms have for too long determined policy at the expense of small family farms. We also need to wean ourselves off chemical farming and stimulate organic farming to save our environment for those who will farm the fields when we've passed on.

Thank you for considering these thoughts.

COMMENT OF SILVIA WEND

Date Submitted: Friday, May 18, 2012, 2:31 p.m.

City, State: Chestnut Ridge, NY

Occupation: Teacher

Comment: Please ban Monsanto's GMO's and immoral ways to deal with farmers, plants and animals. Treat the land and animals in natural ways. No toxic substances to fertilize or kill plagues, research better ways to do that! They certainly exist already (see biodynamic agriculture). Don't poison nature, water and man in any way.

COMMENT OF EDWIN WENSMAN

Date Submitted: Friday, May 18, 2012, 10:30 a.m.

City, State: White Bear Lake, MN

Occupation: Retired Teacher

Comment: Please insure that the new farm bill advances what should be the goal of such legislation: to nutritionally improve the American diet, to aid owners of individually owned and operated farms rather than corporate farms, and to insure that our export policy does not undermine the ability of receiving nations to sustain their own agricultural infrastructure and diet.

COMMENT OF REBECCA WENTWORTH

Date Submitted: Saturday, May 19, 2012, 8:14 p.m.

City, State: Blue Hill, ME

Occupation: Retired

Comment: If you really want to improve the economy and the political system get speculation out of agriculture. Remember the only thing that produces real money from nothing is a seed. Every other transaction is a zero sum game.

COMMENT OF FREDERICK WENZLAFF

Date Submitted: Friday, May 18, 2012, 1:45 p.m.

City, State: Los Angeles, CA

Occupation: Sales

Comment: I want an Organic Farm Bill! GMO's are dangerous and Monsanto does not have anyone's best interest in mind except their own. Don't be fooled. See the studies that document the destructive nature of Monsanto's GMO vegetable seeds. Please help!

Thanks,

FRED.

COMMENT OF SYLVIA WERMES

Date Submitted: Friday, May 18, 2012, 10:55 a.m.

City, State: Scottsdale, AZ

Occupation: Retired BSN

Comment: Let's get back to America growing and providing food for our people. There is so much waste in government that not providing for families in need because they don't have a job is not what our country is about—let's take care of each other and help provide for those less fortunate.

COMMENT OF ANGELA WERNEKE

Date Submitted: Thursday, May 17, 2012, 1:15 p.m.

City, State: Santa Fe, NM

Occupation: Design Consultant

Comment: The farm bill is an opportunity to support healthy, local, sustainable economy, which is the foundation of any true economic recovery. Next to water, food is the most basic element of life. Let's support life by supporting local farm economies, thereby providing a healthy, natural, abundant food supply for their local communities.

COMMENT OF CHARLES WESLEY

Date Submitted: Sunday, May 20, 2012, 8:24 p.m.

City, State: New York, NY

Occupation: Legal Clerk

Comment: Just looking at Americans, one can see that there is something wrong with our agriculture system and our priorities. Please make some meaningful change by supporting an Organic Farm Bill.

COMMENT OF JANETTE WESLEY

Date Submitted: Saturday, May 19, 2012, 7:24 a.m.

City, State: Greenville, SC

Occupation: Nonprofit Farmer's Market Manager, Earth Market Greenville

Comment: As the committee considers the 2012 Food and Farm Bill, I urge you to:

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;
- Provide an even “plowing” field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don't: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.
- Encourage sustainable farming methods and breeds of animals that are sustainable.

Please review the future of the “Cornish Cross” chicken, as to it's breeding methods will be extinct in 50 years and will provide a very large hole in poultry needs of the consumer. Please encourage other breeds of poultry rather than this one.

COMMENT OF ERIC WEST

Date Submitted: Friday, May 18, 2012, 1:34 p.m.

City, State: Port Orange, FL

Occupation: Captain

Comment: With the population of the world doubling in only a few decades, we need every bit of farmland taken care of and not poisoned and depleted. We need to make sure we have enough to feed our population without destroying the planet and we need to stop subsidizing Big Agriculture.

COMMENT OF HEIDI WEST

Date Submitted: Friday, May 18, 2012, 2:02 p.m.

City, State: Elkton, KY

Occupation: Nurse Aide

Comment: As it always has been, farmers have been the core to every aspect of our food supply. I do not agree with cutting funds from the organic farmers because of the quality of the food, farmers should not have to be forced and/or coerced into their farms being turned into farms where it is sprayed with chemicals that can and

has harmed individuals. It is vital that the funds not be cut or reduced because families and individuals long for organic foods and cannot stand the fact the food supply is limited due to the fact the majority of the foods are tainted with deadly sprays. Please really consider this . . . It is a matter of health for everyone. Thank you.

COMMENT OF NORMAN WEST

Date Submitted: Friday, May 18, 2012, 10:00 p.m.

City, State: Lake Ronkonkoma, NY

Occupation: Professor of History

Comment: It is vitally important that the Farm bill provide support for organic farming and local farmers' markets for the sake of a sustainable farm economy.

The farm bill should not subsidize farm practices that are ecologically unsustainable or that do not need to be subsidized.

COMMENT OF PENNY WEST

Date Submitted: Friday, May 18, 2012, 1:35 p.m.

City, State: Belfast, ME

Occupation: Clerk/Writer

Comment: If we cannot feed our people with good, healthy food that won't cause cancer, heart disease, diabetes, obesity, *etc.*, we are failing in our first duty to our citizens, which is to safeguard our natural resources and keep our country strong.

Please do everything you can to encourage organic farmers, and stay away from GMO's.

Until each of us knows who our farmers are and eat responsibly we will just be weakening ourselves.

COMMENT OF SYBIL WEST

Date Submitted: Friday, May 18, 2012, 4:52 p.m.

City, State: Wrightsville Beach, NC

Occupation: Potter

Comment: We desperately need to support small farmers, organic production, conservation, and nutrition. Huge agribusinesses are driving small family farms totally out of business and GMO's sometimes alter and contaminate other fields. Monsanto is one of the worst offenders. Please know you make laws and regulations which have consequences for years and years!

COMMENT OF VIRGINIA WEST

Date Submitted: Friday, May 18, 2012, 10:33 p.m.

City, State: Las Vegas, NV

Occupation: Retired

Comment: I would appreciate an agriculture system in the United States that gave more support to the small, independent farmer. Also to the organic growers. I do not want our land to be continually poisoned and destroyed by large companies like Monsanto, who uses Round-Up on the ground and also in their seeds. Round-Up is contaminating our land and waterways.

COMMENT OF SERENA WESTBERRY

Date Submitted: Saturday, May 19, 2012, 8:57 a.m.

City, State: Covington, LA

Occupation: Human Resources

Comment: Now, more than ever, with obesity advancing at alarming rates . . . rates that will increase health costs **Ten**-fold, it is essential that we promote **Healthy** foods and **Stop** subsidizing the large manufacturers, the big boxes, that are producing unhealthy, nutritionally poor foods, the empty calories. I am asking you to do the right thing and **Support** the health and, by extension, the future financial health of our nation.

COMMENT OF TARA WESTMAN

Date Submitted: Friday, May 18, 2012, 11:12 p.m.

City, State: Altadena, CA

Occupation: Philanthropy Program Manager

Comment: It is very important to maintain food insecurity programs and increase access to healthy food. Please support local family farmers and opportunities to reduce hunger among all people.

COMMENT OF CATHLEEN WESTON

Date Submitted: Friday, May 18, 2012, 2:12 p.m.

City, State: Post Falls, ID

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: More support and financial assist for small **Local** producers More concern and interest in organic production and **Major** decrease in the overall use of pesticides. Please get corporate interests out of the production of food. Eating is a right, and health of the Earth and the people who consume the food produced should be a higher priority than profits.

COMMENT OF LES WETMORE

Date Submitted: Saturday, May 19, 2012, 8:49 a.m.

City, State: Cambridge, VT

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: For far too long American agriculture has been moving in the wrong direction. Short term gains have been held in high regard with no concern for the long view. The evidence now piling up showing this is the wrong take. Years and even decades of potential development in sustainable agriculture have been lost due to the persistence of big chemical-Ag. It is truly vile that our leaders have allowed this to happen. Farmers and consumers alike have a right to chose safe and healthy practices over the fields of poison.

The proof is in the pudding. The bees are dying, cancer rates are sky rocketing, and the super weeds we said would eventually replace the weeds that 'Round-up' kills are here. (just to name a few things going very wrong)

It is time to stop this madness. When history looks back at this time as the age of stupidity, will you be able to say the you fought to change it, or fought to keep it?

COMMENT OF KIM WHATCOTT

Date Submitted: Friday, May 18, 2012, 3:48 p.m.

City, State: San Tan Valley, AZ

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: How much harm needs to be done before genetically modified foods are banned or at least labeled. Farmers are being sued by the likes of Monsanto and Dow because they don't kow tow to their robber baron tactics. We need a farm bill now, or what we really need is an impeached president, and his cronies removed from office and sanity restored to the country.

COMMENT OF WILMA WHEELER

Date Submitted: Saturday, May 19, 2012, 12:48 a.m.

City, State: Mammoth Lakes, CA

Occupation: Retired

Comment: I think large commercial farms should not receive agricultural subsidies. The farm bill must have provisions to feed the millions of people in the U.S who do not have sufficient food to have a healthy life. The farms produce enough food to have everyone well fed.

COMMENT OF WILLIAM WHITAKER

Date Submitted: Saturday, May 19, 2012, 1:18 p.m.

City, State: Charlottesville, VA

Occupation: Landscape Architect

Comment: The farm bill should dismantle the waste of traditional subsidies and use the money that is freed up to fund small regional farming initiatives. Local,

small farms and distribution networks such as CSAs and farmers markets are critical to meet the food needs of the future. The type of food they offer is also better for the economy, consumers and the environment. It is a win, win, win undertaking and Washington needs to get behind it and push. This a non-partisan agenda with roots that reach back to the country's beginning. The America people are ready for a change.

COMMENT OF BILLIE WHITE

Date Submitted: Saturday, May 19, 2012, 10:27 a.m.

City, State: Scottsdale, AZ

Occupation: Medical Librarian

Comment: Keep Americans' healthy—Support organic food growers. No GMO food growers. It's is time to listen to your constituents. More organic food farmers. My family's health is important to me, and I seek out clean/organic food for my family. Your family is the **American People**, help us to be healthier. It is past time to support this initiative.

COMMENT OF CHRISTINE WHITE

Date Submitted: Friday, May 18, 2012, 4:17 p.m.

City, State: Madison, WI

Occupation: Legal Advocate

Comment: I just don't understand why **Everyone** does not wish to eat healthy. What we eat has nothing to do with political parties and everything to do with what is right for all of us.

COMMENT OF DENISE WHITE

Date Submitted: Saturday, May 19, 2012, 8:52 a.m.

City, State: Southport, FL

Occupation: Unemployed

Comment: It is **Critical** to the health of this nation's people, land, wild and aquatic life that we **Support** healthy and organic food. Please **Do The Right Thing!**

Thank you.

COMMENT OF JAN WHITE

Date Submitted: Saturday, May 19, 2012, 11:35 a.m.

City, State: Ochlocknee, GA

Occupation: Retired

Comment: Please consider real reform! We do need an organic farm bill and please **Do Not** allow giant commodity farmers and insurance companies to walk away with subsidized insurance programs while ignoring the small farmers—we need to support funding for Beginning Farmers—our food quality is at risk.

COMMENT OF JENNIFER WHITE

Date Submitted: Friday, May 18, 2012, 4:51 p.m.

City, State: Chapel Hill, NC

Occupation: Network Technologies

Comment: I would like to see more support for organic and sustainable agriculture and less for petroleum-dependent methods of agriculture. I do not think taxpayers should have to subsidize large industrial operations year after year, especially for monocultural crops of questionable nutritional value. If the large industrial operations can't make ends meet, they're doing something wrong and throwing more taxpayer money at them won't fix the problem. If taxpayers are expected to support agriculture, it should be for sustainable agriculture that won't need more funding once it gets a head start.

COMMENT OF JOHN WHITE

Date Submitted: Saturday, May 19, 2012, 4:55 p.m.

City, State: Bailey, CO

Occupation: Transportation

Comment: I used to be a producer, I was fortunate to move to the city. There I worked at the most polluting steel mill in the U.S. I have not developed cancer

however. My farming cousins have all developed cancer. Lung, testicular, brain, prostate, all cancers my farming cousins have hadona has died of brain cancer.

I no longer fear the producing. I fear what's being produced. All the poisons, antibiotics, hormones. **It Needs To Stop!**

JOHN WHITE.

COMMENT OF KAREN WHITE

Date Submitted: Friday, May 18, 2012, 2:03 p.m.

City, State: Los Angeles, CA

Occupation: Audiobook Narrator

Comment: It is **Very** important that this bill support small family farms that are working hard to grow fruits and vegetables sustainably. Stop supporting the soy and corn grown by big businesses that is turned into processed food like substances that are contributing to our obesity epidemic.

COMMENT OF KATHLEEN WHITE

Date Submitted: Friday, May 18, 2012, 2:00 p.m.

City, State: High Rolls, NM

Producer/Non-producer: Producer

Type: Dairy

Size: Less than 50 acres

Comment: We have a very small dairy operation, but I feel fortunate that at least I live in a state where raw dairy is legal. If you truly care about America's health issues, let us have choices as to what we eat and let us know **What** we are eating (GMOs).

COMMENT OF LEIGH WHITE

Date Submitted: Friday, May 18, 2012, 4:58 p.m.

City, State: Orlando, FL

Occupation: Physician and Mother

Comment: As both a physician and mother, I feel strongly about the increased nutrition and safety of organic produce for me and my family. I am a lifetime member in Homegrown Co-op, a group that sells locally grown organic produce and products here in Orlando. I believe that our representatives should support and enable this grass roots movement for greater nutrition and health. If you do, our future generations, of all socioeconomic strata, will have the opportunity to eat healthier, better tasting fruits and vegetables, and as a result will be on whole healthier people!

COMMENT OF LISA WHITE

Date Submitted: Sunday, May 20, 2012, 10:57 p.m.

City, State: Doylestown, PA

Comment: I want to know exactly where my food comes from and how it was produced. I need clear, honest, complete information and I am increasingly committed to eating organically produced food.

COMMENT OF MARCIA WHITE

Date Submitted: Wednesday, March 28, 2012, 2:25 p.m.

City, State: Monmouth, IL

Occupation: Retired

Comment: I grew up on a farm. I plowed the fields, mowed fence rows, hauled grain to the elevator, cleaned feed lots, spread manure, and am a girl. I was driving when I was 12 years old. Tractors, mowers with sickles. I raised my own cattle. So, I am familiar with the workings of a farm. I am now a city girl, but the major problem I see with the area farmers in our "Warren County", is you are giving anyone with 5 acres our tax dollars to **Not** do anything with that property. There are people here taking a huge advantage of these government programs and making a great deal of money off the backs of the tax payer. If you look at only "Warren County" as far as the money the government "**Gives**" to the so-called farmers in this county it amounts to millions of dollars. Check it out! Subsidies, or we, non-farmers, call it the "farmers welfare", is paid to people who should not be getting anything. Also, there are farmers who set their land aside, or claim they didn't get the yield, so here we go, and pay them for their loss. Well . . . these same farmers have the big-

gest equipment, hired hands, newest trucks, huge semi's, Cadillac's in the garage, and go on two or three cruises per year. Now, I'm only pointing this out because these people are busting the system. Please look at the subsidy program for Warren County only, and then figure all of the other counties in this country that gives out even more . . . This just doesn't make sense. The government farmers welfare has got to either stop or cut back. These area farmers need to go back to "if you only get 150 bushels per acre instead of 250 bushels per acre . . . live within your means and don't expect the tax payers to make up the difference". Yes, our agriculture is very important, but not to the tune of millions of dollars per county. There needs to be some checks & balances here. I'm would hope that you will, at least, check out our county and see how many people are on the government roll. I'm sure you will be amazed. Our county is pretty small, so just have one person check all of the farms, and anyone who received a subsidy check them out. Should only take 3 or 4 days. Now that would be money well spent. This has been going on for years, and needs an overhaul. So, please check out the Warren County government subsidy listing and then do a little research and maybe, you can find some reasons to stop some of these programs which are a burden on the average taxpayer.

Thank you for your time.

COMMENT OF SHAWN WHITE

Date Submitted: Friday, May 18, 2012, 12:53 p.m.

City, State: Montpelier, VT

Occupation: College Professor/Math Tutor

Comment: Thank you for allowing me the opportunity to give comments on the farm bill. I support funding that promotes sustainable agriculture, conservation programs, and nutrition programs. I believe this is important to the future of the country as well as the health of its citizens. Sustainable agriculture and conservation will help fight global warming, topsoil erosion and loss, and maintain (sometimes finite) water resources. Finding solutions to these problems is vital to preserving the economic future of this country.

I support the Local Foods, Farms and Jobs Act (H.R. 3286), would like to see full funding conservation programs, and legislation to ensure that compliance with conservation programs is linked to enrollment in any new insurance subsidies.

I also support full implementation the Beginning Farmer and Rancher Opportunity Act (H.R. 3236) and maintaining the EQIP Organic Initiative.

COMMENT OF VALERIE WHITE

Date Submitted: Friday, May 18, 2012, 7:29 p.m.

City, State: Everett, WA

Occupation: Sales

Comment: I am so frustrated by the reports I read of cuts to food stamps program yet the subsidies continue. The system now in place is damaging our land, reducing the availability of healthy foods, and limiting more and more what options the future generations may have, if any.

Please, please vote against subsidies and for the health of our nation.

COMMENT OF VICTORY WHITE

Date Submitted: Friday, May 18, 2012, 12:46 p.m.

City, State: Brooklyn Center, MN

Occupation: Writer and IT Support Specialist

Comment: I feel that the continued support of subsidies for big agribusiness, while cutting funding for small, local farms, and new start-up farms is not in the best interest of the American people. Small farms that work with sustainable, conservationist, organic methods are needed in our country. The American public has the right to make their own choices in the market on what foods they want.

For too long big Agribusiness has been the only voice heard in Washington, D.C., as well as many state capitals on what foods will be grown, and during that time, diseases of every kind have risen. It is time to examine more closely the cause and effect of the foods we eat and it is more than time to look at viable alternatives to the chemically grown, nutritionally low grade food offered by the largest food producers in the world.

Anytime you have only one or two companies producing any product it becomes a dangerous situation. It is even more dangerous when it is the food we depend on for life.

I urge congress to do it's true duty and think of the American people, not the corporations which have been telling us all how and why to live for far too long.

COMMENT OF TAMARA WHITED

Date Submitted: Friday, May 18, 2012, 1:04 p.m.

City, State: Indiana, PA

Occupation: Professor

Comment: As a private citizen I am in agreement with all of the organizations lobbying for generous measures toward organic and other sustainable agricultural practices to be included in the agriculture bill. We need and deserve a better food supply, soils that will continue to produce for generations ahead, and an agricultural system less dependent on fossil fuels and less polluting to waterways. If you are going to subsidize in any form, subsidize **Organic** and **Sustainable** practices.

COMMENT OF ALTON WHITEHOUSE

Date Submitted: Friday, May 18, 2012, 11:13 a.m.

City, State: Cleveland, OH

Occupation: Student

Comment: I am particularly interested in seeing the government increase their support of small scale, local or family owned meat producers. As it stands, legislation and regulation make it extremely difficult for small meat producers to have their goods processed, mostly because Federal regulations make operating a processing facility equipped to handle small scale intake prohibitively costly.

Support local meat by adjusting your policy to take into account the importance, for health, food safety and local economies, by fostering rather than stifling the establishment of smaller processing facilities.

COMMENT OF JUDY WHITEHOUSE

Date Submitted: Friday, May 18, 2012, 5:33 p.m.

City, State: Phoenix, AZ

Occupation: Retired LPGA Golf Teacher

Comment: Nothing is more important to our future than the integrity of our food, air, and water. That requires transparency in production methods, chemical use, genetic modification, and crop diversity and rotation. The best way to achieve this globally is to removed seed patents and monopolies, subsidies for huge agribusiness, and restore local control of food production and processing.

COMMENT OF NIKKI WHITELEY

Date Submitted: Friday, May 18, 2012, 7:51 p.m.

City, State: Colorado Springs, CO

Occupation: Graduate Student and Research Assistant

Comment: When forming agriculture policy, our country needs to support sustainable non-GMO organic farming, living soils, and a clean environment. Policies should also support biodiverse agriculture free of chemicals that destroy beneficial insects.

COMMENT OF PAULINE WHITEMAN

Date Submitted: Friday, May 18, 2012, 8:13 p.m.

City, State: Aromas, CA

Occupation: Retired Postal Clerk

Comment: So many citizens are experiencing side effects to GMO foods including myself. We need organic farming in order to protect the health of our people. Please be aware of how many your bill will effect if it does not provide for natural farming.

COMMENT OF ERIN WHITFORD

Date Submitted: Friday, May 18, 2012, 2:41 p.m.

City, State: San Diego, CA

Occupation: Self-Employed

Comment: Freedom of food choice is becoming a big issue for a growing number of people in America. As more people wake up to the inherent dangers of processed foods, GM crops and overuse of antibiotics, hormones and pesticides in our food supplies I believe it is imperative that we answer the call of Manifest Destiny by improving and expanding our viable farming options.

COMMENT OF PAMELA WHITING-BROEDER

Date Submitted: Friday, May 18, 2012, 2:22 p.m.

City, State: Encinitas, CA

Occupation: Retired

Comment: Our family is really angry that U.S. Agriculture Policies are lazily influenced by the very corporations that need reform. We're angry that GMO's are not labeled! We're very angry that **Big Ag** controls policy. We don't want pesticides and cancerous fertilizers and GMO's in our food supply. Smaller Organic Farms are bullied. Factory farming is ruining the food supply. Monsanto is way too involved in the AG Department; a huge, huge conflict of interest. It's got to stop. We don't want to eat Monsanto's Roundup which is in just about everything. It's unbelievable that **You** would allow this. Disgusting. It's no wonder we're all dying of cancer. It's **Your** fault! Dammit, Label it!

U.S. food and agricultural policy must focus on adopting best agricultural practices that put the **Health** of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

COMMENT OF GLENN WHITLOW

Date Submitted: Friday, May 18, 2012, 6:54 p.m.

City, State: Truckee, CA

Occupation: HVAC/R Technician

Comment: GMO products need to be labeled—**Period!** The consumers are asking for it, it is the seed producers that are fight it. I say label it and let the free market say which one consumers will buy. If they buy the GMO food, then the market has spoken. The seed producers (namely Monsanto) fear that if the non-GMO grains, fruits, and vegetables win, then no one will buy their seed. That is a valid outcome in a market economy—there are winners and losers. The government should require the labeling so the public is informed and can decide for themselves. An informed public should be what America is all about.

SUBMITTED STATEMENT BY ART WHITMAN, PRESIDENT, NORTHEAST AG AND FEED ALLIANCE

Thank you for the opportunity to provide input into development of the 2012 Farm Bill. The Northeast Ag and Feed Alliance is an association of nearly 300 individual livestock feed manufacturers and distributors located throughout the Northeast including New York and including New England. Our members manufacture feed for livestock and pets throughout the Northeast and include family owned businesses with single mills as well as publicly traded companies conducting business across several continents.

Dairy farming directly supports nearly 150,000 jobs in the Northeast through milk production and processing. Federal policy needs to be sensitive to the varied scale of commercial milk production in the Northeast (from six cows to several thousand cows per farm), the diverse production practices employed by farmers as well as regional variation in dairy processing infrastructure. Dairy pricing reform is of utmost importance to reduce the volatility experienced by the dairy industry for the past several years. The hard work conducted by many producer groups to develop outlines for various margin insurance programs coupled with a market stabilization structure is commendable and has provided several options for meaningful reform. To meet budgetary criteria for Federal backing any new developments for dairy pricing will need to address the highly sensitive issue of market supply.

Many programs developed as part of the 1996, 2002 and 2008 Farm Bills and administered through USDA Rural Development have provided significant resources to the dairy industry to develop new products and markets and to provide producer technical assistance. Rural Business Enterprise Grants, Value-Added Producer Grants and Agricultural Innovation Centers have proven their value through educational programs for improved business and production practices and support for fledging dairy based businesses. Federal support of innovative producers through these programs has created increased processing infrastructure and expanded markets for agricultural products. As university extension systems have been reduced the technical assistance available through USDA RD funded projects is essential to producers facing the challenges of intergenerational transfer, business expansion or diversification.

Farms have significant energy demands for production and processing of food. The Rural Energy for America Program and the Biomass Crop Assistance Program provide funding to assist farms in the development of dispersed electricity generation, conservation plantings that provide biomass, and electricity generation as a means

for diversified farm income. The benefit of farm based power generation extends far beyond the farm community as these projects create jobs in rural areas and reduce dependence on non-renewable energy sources. Often the funding provided by USDA RD is the final component that allows the project to go forward in an economically feasible manner.

In the heavily populated Northeast with abundant rainfall, Federal land conservation and water quality programs are especially important. Funding provided through the Farm and Ranch Land Protection Program assures access to quality land for future generations of farmers. The Environmental Quality Incentives Program is essential in assisting farmers with land management practices to minimize water quality impacts. Federal provisions to provide conservation funding to 15 historically under-served states (many in the Northeast) is vital as the basis for programs that routinely experience demand that far outstrips capacity. These programs are increasingly important with continued developments in water quality regulatory criteria.

Crop insurance programs have made substantial headway over the past twenty years to be useful to a wide variety of farmers across diverse geographical and climatic conditions. Continued improvements to crop insurance programs should address ease of application, value of policies, and worth to farmers with varied markets for their crops. For example, the impact of the loss of even as little as 20% of a forage crop has a much more significant impact on income for a dairy farmer who must maintain a continuous pipeline of animals in all stages of maturity and production than for a farmer selling forages.

The Northeast Ag and Feed Alliance recognizes the importance of our land-grant university system for the education of future producers and research for new practices and products. Funds provided through the Sustainable Agriculture Research and Education program, the Agricultural and Food Research Initiative and the National Institute of Food and Agriculture are critical to the on-going development of new techniques and technology for use by producers and processors of food.

The support of Northeast farmers through a myriad of federally supported programs, many carried out in partnership with states and private entities, plays a vital role in the on-going production of food across the country to meet the needs of a wide range of consumers. We are proud of the creativity and productivity of Northeast farmers and appreciate the support provided through many Federal programs. Expansion of some programs, and changes to others will further increase the ability of Northeast farmers to continue their role as producers of wholesome and nutritious food consumed across the United States.

Respectfully,

ART WHITMAN.

COMMENT OF ANDREA WHITSON

Date Submitted: Friday, March 16, 2012, 10:39 a.m.

City, State: San Jose, CA

Occupation: Faculty for Hunger and Environmental Nutrition SJSU

Comment: I am urging for proper funding for our organizations that are fighting hunger (SNAP, WIC, and others). Our communities have people with the need for these services greatly especially with this economy.

I would also like to bring up the fact that we need more funding for organic farming techniques and sustainable farming methods. Our environment should be kept intact with these alternative practices.

COMMENT OF MICHAEL WHITT

Date Submitted: Saturday, May 19, 2012, 8:20 p.m.

City, State: Inverness, CA

Occupation: Physician

Comment: Please discontinue support for: ethanol (no product that has food value should be used for fuel), corn syrup and other unhealthy products, agribusiness (esp. cash crops like cotton and soy beans & mega-dairies. Support sustainable farms producing healthy food, organic milk *etc.* Thank you for considering my opinions.

COMMENT OF DIANE WHITTEN

Date Submitted: Friday, March 16, 2012, 4:28 p.m.

City, State: Schuylerville, NY

Occupation: Community Nutrition Educator

Comment: As a professional that educates community members at farmers' markets, I've seen the enormous growth over the past 10 years in the interest of consumers to eat locally produced foods. In the Washington/Saratoga county area, that means purchasing foods from small scale farmers. The farm bill needs to support small scale farms. I truly believe that ensuring the viability of diversified agriculture is a matter of national security as well.

As a nutritionist, I also believe that the farm bill should include subsidies to fruit and vegetable farmers, especially those who sell to schools. The USDA wants schools to serve more fruits and vegetables, but the cost can be prohibitive. The farm bill could help keep producers in business while at the same time encouraging a connection between farms and schools to help our children eat healthier.

COMMENT OF LINDA WHITTINGTON

Date Submitted: Friday, May 18, 2012, 1:30 p.m.

City, State: Chula Vista, CA

Occupation: Small Business

Comment: Allowing all Americans access to better quality food products results in a healthier population which in turn brings down the cost of health care costs . . .

COMMENT OF KAREN WHITTREDGE

Date Submitted: Friday, May 18, 2012, 12:21 p.m.

City, State: Arlington, MA

Occupation: Retired Teacher

Comment: Please support organic farmers, especially the smaller ones, who are trying to provide us with healthy food. Also please be sure to require all foods to be labeled correctly included GMO. Monsanto has a stranglehold on independent, organic farmers. Its bullying ways should not be tolerated in a democracy. Please listen to us, the consumers who are looking to the health of future generations. I am not some radical—just an intelligent American who wants the best for our society. Thank you for your consideration.

COMMENT OF LOUISE WHOLEY

Date Submitted: Friday, May 18, 2012, 12:54 p.m.

City, State: Saratoga, CA

Occupation: Retired Home Food Gardener

Comment: We have to reduce Big Ag subsidies. It is ridiculous to continue to support the bad food that creates high medical expenses. Incentives to get more small farms growing food in the plains states might help keep the economy there from collapsing. We have to start somewhere! Please help!

COMMENT OF JEAN WIA NT

Date Submitted: Friday, May 18, 2012, 4:09 p.m.

City, State: Philipsburg, PA

Occupation: Director of Religious Education

Comment: I grew up on a family farm in PA and am appalled at the state of animal misery on factory farms. Animals have a right to a life where they can breathe fresh air, enjoy the outdoors, ruminant or eat grass, and be treated humanely. I am very disappointed that the corporate farms have taken over this country and mistreated animals to the extent that they are. Please vote to stop this awful state.

COMMENT OF DANIEL WIBERG

Date Submitted: Friday, May 18, 2012, 1:01 p.m.

City, State: Goose Creek, SC

Occupation: Retired Military

Comment: How about some common sense when it comes to farm bills. The closest most politician have come to farms is during "photo" opportunities. The ISO, Invasive Species Order is one where common sense has totally been forgotten and stupidity reigns supreme. If you would care to talk about it just e-mail me.

COMMENT OF VOLINDA WICK

Date Submitted: Sunday, May 20, 2012, 11:01 a.m.

City, State: St. Cloud, MN

Occupation: Student

Comment: I am concerned with the new wave of ignorance and lack of foresight I am witnessing in our governmental handling of the production and funding of food sources in the U.S. and other countries as well. The future of ourselves and the critical future of our children and grandchildren is at the mercy of greed.

The organic research funding and the support for Beginning Farmers are important, we do not want these to be cut from the budget. The subsidized insurance program will allow giant "commodity farmers and insurance companies" tax money while destroying the land, soil, water and environment! Stop this insanity. These subsidies to agribusiness is a landslide of poison from large chemical and will eventually be the demise of us all in the pursuit of money, which will not buy health.

The least you could do is place limitations on crop insurance subsidies and re-attach soil erosion and wetland conservation requirements to these insurance programs.

I am disgusted with the difficulty of obtaining truly healthy food for me and my family. I would think as legislatures you would be concerned for your own future and that of your own family and the society as a whole. I and many, many others are watching how the voting goes and who will stand up for health rather than greed.

VOLINDA WICK.

COMMENT OF ALLEN WICKHAM

Date Submitted: Sunday, May 20, 2012, 12:28 a.m.

City, State: Molalla, OR

Occupation: Software Developer/Gardener

Comment: I urge you all to think about sustainability, about giving our children quality healthy food by fostering organic farms and practices, about supporting the small farmers and all the people they support in kind, and by supporting the conservation of our precious land and water resources. In an era of trying to wean ourselves of petroleum, let's try to wean ourselves off of petroleum-based pesticides, herbicides, and fertilizers. Let's feed ourselves good food!

COMMENT OF DEBRA WICKS

Date Submitted: Sunday, May 20, 2012, 8:04 a.m.

City, State: Jersey City, NJ

Occupation: Civil Servant

Comment: There should be transparency showing where all the food products on the grocery shelves that are not purchased ends up. And remedy that situation to a public food stock that is accessible. An example being healthy reduced priced products. Why are there far more stocked goods than package or non-packaged produce. I would like to see farms that are owned by non-Caucasians increase. The schools lunch program is a fine example of good legislation.

COMMENT OF MEG WICKWIRE

Date Submitted: Friday, May 18, 2012, 4:17 p.m.

City, State: Concord, MA

Occupation: Teacher

Comment: Please fight as hard as you can to protect children and adults from the ill effects of massive food companies. Small and organic farmers serve us all so much better! I am a mother and a breast cancer survivor. I am done pretending chemically grown and processed food doesn't matter!

Thank you for any help you can legislate.

COMMENT OF EVELYN WIDHALM

Date Submitted: Friday, May 18, 2012, 2:17 p.m.

City, State: Missoula, MT

Occupation: School Counselor

Comment: It's time for agriculture subsidy reform. The corporate conglomerate ag businesses 'farm' the government programs and make millions off the tax payers. This must stop.

COMMENT OF JOHN WIERCIOCH

Date Submitted: Sunday, May 20, 2012, 5:32 p.m.

City, State: Roanoke, VA

Occupation: House Painter

Comment: It would be inspiring to see a bill not based upon the power of Big Ag lobbyists whose agenda is to promote their employers profits. I challenge you to show your integrity and support small local farms in this bill. An industry that creates pink slime, GMO's laced with insecticides (that are not safe when objectively independently tested), and Factory farms full of antibiotic pumped, tortured animals that are treated as if they are not living beings—these are not the ways I want my tax monies spent.

COMMENT OF CHRISTINE WIGHT

Date Submitted: Friday, May 18, 2012, 7:56 p.m.

City, State: Rockport, MA

Occupation: Educator

Comment: Government let go of controlling our food sources. Banish Monsanto's underhanded efforts to take over the planet's food production as though they invented it and are responsible for what is on my plate! It is unreasonable for me to need to defend my right to healthy choices! I fire Monsanto from feeding me! I choose to go elsewhere for my food!

COMMENT OF KEN WILBUR

Date Submitted: Monday, March 19, 2012, 7:15 p.m.

City, State: Abilene, TX

Occupation: Owner of Dog Kennel

Comment: It is time to stop the assistance programs, subsidies are just another form of assistance.

Grain prices are high, as is food for humans and animals

If you do go against the people and give these people checks for not producing, at least so not allow them to lease the land out for hunting . . . the taxpayer has paid for this land, it should be made available to the public free for hunting . . .

You want to hear a cry from rich land owners, make that happen . . . the small family farmer will go along with it . . .

COMMENT OF MAYA WILCHER

Date Submitted: Saturday, May 19, 2012, 4:55 p.m.

City, State: Sadsbury, PA

Occupation: Student

Comment: Please write a fair farm bill! For far too long, corporate monopolies have dominated the food system. It is unjust for the consumers and unjust for small traditional farms. Now is the time to redefine our agriculture industry, and stop catering to the greed and money of big business.

COMMENT OF DOROTHY WILCOX

Date Submitted: Friday, May 18, 2012, 9:53 p.m.

City, State: Youngstown, OH

Occupation: Retired

Comment: I grew up on a family farm. We had chickens, a pig, a milk cow, cattle, a big garden; most of our food came from this farm—good organic food! As a result we were healthy, and enjoyed the hard-work ethic that comes from all the chores and farm life.

Corporate farms do not provide such things. Rather the land is forced to produce as much and as fast as it can without little thought of resorting what was taken from the soil. The produce and crops aren't **Real** food; it's genetically engineered or modified food with many health consequences from consuming it. And there is no seed; therefore, it creates a total dependency upon a company to provide seed to farmers. If there was ever any farming system that could create **World Famine**; in my estimation, it would be Genetically Engineered Food, if one could even identify it as "food."

COMMENT OF LYNN WILDE

Date Submitted: Friday, May 18, 2012, 2:41 p.m.

City, State: Salinas, CA

Occupation: Retired Teacher

Comment: Living in Salinas, I see how important agriculture is to the economy and how poor the workers are who bring food to the world. I've seen how laws have protected the safety of food and workers. We must protect safety gains, help organic farms, end subsidies for food crops being used for fuel, feed the poor who work in our fields. Farm policies that encourage family farms, enrich the land, cut fertilizer and pesticide costs, protect bees, restore wind brakes, bring down the cost of organics and grow our quality food supply will make the U.S.A. strong. People first, not profits.

COMMENT OF FLO WILDER

Date Submitted: Friday, May 18, 2012, 11:56 a.m.

City, State: Hancock, ME

Occupation: Bookkeeper

Comment: Please stop the subsidies to corporations which produce the so-called food which is slowly killing us. Allocate the USDA resources toward producing safe, organic healthy food.

Thank you.

COMMENT OF ERIC WILDS

Date Submitted: Friday, May 18, 2012, 2:55 p.m.

City, State: Palmetto, FL

Occupation: Fitness Trainer

Comment: Small family farms are our best option for good nutrition. Good nutrition is a key component needed for a healthy populace. A health populace is necessary for a strong America. Be a patriot and protect small farmers.

COMMENT OF ALAN WILHITE

Date Submitted: Friday, May 18, 2012, 1:13 p.m.

City, State: Austin, TX

Occupation: Performer

Comment: I urge you to support truth and quality instead of corporate profits. Big agribusiness is making our citizens sicker earlier than ever, filling our hospitals and creating a massive economic drain on our country. We must grow our food organically, with well cared for soil, not synthetic fertilizers and pesticides. Do what is right for all our citizens, not just big business and your own pocket. Serve the public.

COMMENT OF GAIL WILKE

Date Submitted: Sunday, May 20, 2012, 6:57 p.m.

City, State: Sunland, CA

Occupation: Retired Teacher

Comment: Any subsidies should go to fruit and vegetable growers, not to large commercial growers. I believe many of your subsidies even go to land owners, who live nowhere near their farmland.

COMMENT OF CHALICE WILKERSON

Date Submitted: Friday, May 18, 2012, 3:32 p.m.

City, State: Chicago, IL

Occupation: House Painter and Organic Gardener

Comment: Please consider an organic bill so that producers and consumers are both able to assess their products in a way that is healthy for farmers and Americans. I am quite leery about the continuing influence of Big Ag on our policy makers. The track record of some of these corporations shows they will cheat, lie, fudge scientific reports, leave out certain data, and go to court to keep consumers from knowing what they are buying to eat. If we are so free-market, we need a free-market in labeling too.

COMMENT OF SAMUEL WILKES

Date Submitted: Saturday, May 19, 2012, 12:47 a.m.

City, State: Little Rock, AR

Occupation: Political Campaign Supporter

Comment: To whom it may concern,

The new farm Bill must be written with extreme consideration for human consumers and Organic Farmers here in the United States. We can no longer cater to the interests of Industrial Farming and the likes of Monsanto, who seem to want to get rid of Organic Farming altogether.

Whereas I understand the need to Industrial Farming, as it is a tariffed export, I also know that we as Citizens, unaffiliated with Industrial Farming, desire reasonably price, extremely healthy Organically Grown (by USDA Standards) Foods. They are healthier for us, for our progeny, and at this point are far too expensive for the average Citizen. We should have a right to foods grown without toxic pesticides and herbicides, to foods that draw nutrients from nutrient rich soil and not depleted soil that has to be fertilized every year with outside elements like Nitrogen, Calcium, and Potassium.

Organic Farmers need to be protected in this farm bill. They need to be protected from companies like Monsanto who have been successfully suing them for the better part of 15 years, and whose money and power has been used to destroy them. And, we need protection for these farmers from Genetically Modified Pollen, Herbicide, and Pesticide drift and pollution of the very Aquifers that Organic Farmers rely upon, because, after all, once this water is used, and pollen drift occurs, these farmers can no longer call their products Organic or GMO-Free.

Please stand up for the people and not Agri-Business and the Money and Power they have to influence your decisions. Be Politicians of Integrity and Please do not sell out for your own personal gain.

And, do this please, look up on Google, "The World's Worst Company" . . . the result will be St. Louis based Monsanto. Monsanto is even taking advantage of your very own constituents by genetically modifying their patented seeds, such that the seed is not viable for planting the next year, costing industrial-sized farms much more per year, taxing our already subsidized Agricultural system even further.

Finally, Organic Farmers should also receive subsidies, since after all, not only are they attempting to feed us, but they are doing so in very healthy ways.

Thank you sincerely.

COMMENT OF JOANNE WILKINS

Date Submitted: Friday, May 18, 2012, 12:21 p.m.

City, State: Fairfield, IA

Occupation: Programmer

Comment: The farm bill should highly support agriculture that is sustainable, healthy for humans and the land. The farm bill should support organic, sustainable practices.

COMMENT OF SHANNON WILKINS

Date Submitted: Friday, May 18, 2012, 12:57 p.m.

City, State: Heathsville, VA

Occupation: Commercial Fishing

Comment: Local organic and **Non-GMO** foods are important to me. Local farm food producers need to be supported not crushed by industry (*i.e.*, Monsanto).

COMMENT OF CAROL WILKINSON

Date Submitted: Monday, April 16, 2012, 11:04 p.m.

City, State: Winchester, MA

Occupation: Self-Employed Legal Assistant

Comment: I am concerned with genetically modified food and would like all produce sold in the U.S. to be labeled as "genetically modified" if there has been **Any** modification at all.

I also believe all produce sold in U.S. should state its country-of-origin.

We label organic food now so I and other family members would request these two items be labeled as well.

Thank you.

COMMENT OF JAMES WILKINSON

Date Submitted: Saturday, May 19, 2012, 7:56 p.m.

City, State: North Bennington, VT

Occupation: Writer

Comment: It is long since time to end the public subsidies for food whose production is destroying soils, waterways, aquifers, and species integrity (via GMOs) and whose consumption has led to an epidemic of obesity and diabetes which will bankrupt the entire country.

COMMENT OF JULIANNE WILL

Date Submitted: Friday, May 18, 2012, 3:38 p.m.

City, State: Fort Wayne, IN

Occupation: Marketing Consultant, Writer

Comment: Please be sure that any legislation provides for small, organic farms where non-GMO food is raised, animals are without cages and hormones, and the food produced will not cause the inflammation that is becoming epidemic in our country.

COMMENT OF CHRIS WILLEY

Date Submitted: Saturday, May 19, 2012, 8:46 a.m.

City, State: Warrensburg, MO

Occupation: Retired

Comment: Please support healthy food, which translates to a healthy population and environment. Support small farmers and sustainable agriculture. If you are considering farm subsidies, either healthy food should be subsidized to make them more competitive, or the subsidies for mega crops like corn, soy, and wheat should be cut back or eliminated. Thank you.

COMMENT OF ALICE WILLIAMS

Date Submitted: Friday, May 18, 2012, 2:57 p.m.

City, State: Georgetown, SC

Occupation: Retired Teacher, Small Farmer

Comment: Please don't weaken the help for new small farmer entry. The corporations seem to get all the "welfare" they need in the name of farm subsidy. People shame the poor for their use of food stamps, but with this depression they are calling "the Great Recession" folks without living wage jobs need help.

In the great depression many folks went back to small farms to work and survive and we need to make sure this is still an option for the current generation.

COMMENT OF AMANDA WILLIAMS

Date Submitted: Friday, May 18, 2012, 11:44 p.m.

City, State: Midvale, UT

Occupation: Food Blogger/Garden & General Horticultural Consultant

Comment: It is time for us to recognize and accept accountability for the far-reaching effect of corn and soy subsidies on our health and the obesity epidemic in America. We need to somehow loosen the stranglehold of corporate farming and special interest food lobbies—the dairy, meat, corn and soy industries, we could see that so many of the problems our children and families are facing today are the direct result of those lobbyists efforts. We are fat because we are being fed cheap corn, soy, dairy and meat, and farmers trying to produce vegetables, fruits, and whole grains in a manner consistent with long-term ecosystem health cannot compete with the price of processed food and soda.

The security and safety of our nation are at risk when healthy and local food are unavailable and small farmers are pushed out of the market. The health of our land, the ability to grow food in perpetuity, is increasingly more difficult as greater numbers of chemicals become necessary to combat superbugs and to subsidize fertility from drastically depleted soils. The farm bill should support real farms, farms that care not only for their livelihood, but for the Earth and the crops that provide it, farms using sustainable practices providing food that brings health and not sickness to its consumers.

Please encourage and support changes to the farm bill that will eliminate subsidies to the big lobbyists—corn, soy, Monsanto, meat and dairy industries, Cargill, ADM, Smithfield. Even the playing field. Support organic, biodynamic, and local farm subsidies and supports.

COMMENT OF BERNADETTE WILLIAMS

Date Submitted: Friday, May 11, 2012, 11:46 p.m.

City, State: Alexandria, VA
Occupation: Software Engineer
Comment:

- America needs more local farming efforts.
- Focus legislation on developing the nation's network of small and organic farms.
- Instead of farm subsidies going toward very large farming "factories", grants and tax incentives should be made available to cities and communities to implement local, sustainable urban agriculture frameworks.
- Encourage seed saving programs and provide subsidies to farmers who plant heritage crops in order to promote biological diversity.
- Provide training and subsidies to farmers who substantially decrease the amount of pesticides used on our nation's crops.

Thank you so much for your time.

Sincerely,

BERNADETTE WILLIAMS,
 Alexandria, Virginia.

COMMENT OF BEVERLY WILLIAMS

Date Submitted: Friday, May 18, 2012, 12:03 p.m.

City, State: Arlington, MA

Occupation: Retired English as a Second Language Teacher

Comment: In this technological society, we should be able to have our food properly labeled and safe for us elders and our grandchildren. Please keep the consumers, and not agribusiness, as your priority. Thank you.

COMMENT OF CAROL WILLIAMS

Date Submitted: Sunday, May 20, 2012, 11:30 a.m.

City, State: Roan Mountain, TN

Occupation: Artist

Comment: Our genetically altered pesticide laced agribusiness myopic profit-only orientation is killing Americans—obesity, diabetes, cancer, dumbing down of intelligence. It is imperative we support measures that enhance our local and organic farms and the life force and nutritional value of our food. Why are all my grocery store garlic cloves from China when they can be grown right here in TN? Support our local farmers trying to grow organic plants and humanely raised pasture animals. We are what we eat.

COMMENT OF CYNDY WILLIAMS

Date Submitted: Friday, May 18, 2012, 9:21 a.m.

City, State: Crozet, VA

Occupation: Accountant

Comment: It is most important to support our farmers & protect a clean food supply. The small farmer is the back bone of our country, we need more access to small farm produce that is healthy & local.

Thank you.

COMMENT OF D. WILLIAMS

Date Submitted: Sunday, May 20, 2012, 3:22 p.m.

City, State: Asheville, NC

Occupation: Land Sales and Development

Comment: Could we protect small family farmers, organic growers and responsible farm practices instead of lining the pockets of all connected to big "agribusiness" please?

The corporatocracy that rules us for only their benefit has done enough damage without continuing to influence our food supply in the irresponsible and greedy, malicious way they do now. **Enough** of this nonsense.

COMMENT OF D. WILLIAMS

Date Submitted: Saturday, May 19, 2012, 3:45 p.m.

City, State: Westminster, CA

Occupation: Educator

Comment: Dear Lawmakers: You must support Organic farmers and eaters. Our patience, as taxpaying voters, has run out. Encourage real food and our access to it, now.

Sincerely,
D. WILLIAMS.

COMMENT OF DEBORA WILLIAMS

Date Submitted: Friday, May 18, 2012, 5:45 p.m.

City, State: Drain, OR

Occupation: Unemployed

Comment: Please stop the Frankenstein food with toxic chemicals. The chemical soaked fruits and vegetables are poisoning humans and animals. They are destroying the soil and poisoning the animal life and livestock. Did you know that the GMO corn and wheat are making livestock sterile? And the saturation of Roundup is killing all the beneficial bugs, (including honeybees). Please give the American people back their vote and jobs and health! Please give us back our country! Please.

Sincerely,
DEBORA WILLIAMS.

COMMENT OF ELSIE WILLIAMS

Date Submitted: Wednesday, May 09, 2012, 3:44 p.m.

City, State: Houston, TX

Occupation: Food Pantry Director

Comment: SNAP should raise the amount of food stamps seniors receives because many have special diets and need to buy food that is not available through at food pantries.

COMMENT OF EMELE WILLIAMS

Date Submitted: Tuesday, May 08, 2012, 11:40 p.m.

City, State: Reno, NV

Occupation: Communications and Marketing Coordinator

Comment: I urge you to vote for a fully-funded farm bill complete with feeding programs that help those who need food. This group of people are the last to recover from the 2008 recession and these programs ensure that they have nutritious food sources in their and their families lives. We are the greatest nation on Earth and no one in it should ever go hungry. Thank you.

COMMENT OF JACKI WILLIAMS

Date Submitted: Saturday, May 19, 2012, 11:35 p.m.

City, State: San Luis Obispo, CA

Occupation: Garden Designer

Comment: No GMOs, support small farmers, quit subsidizing agribusiness and corporations.

COMMENT OF JENNA WILLIAMS

Date Submitted: Friday, May 18, 2012, 12:22 p.m.

City, State: Saint Paul, MN

Occupation: Communications

Comment: Please put money into agriculture that creates healthier diets, limits the use of antibiotics on livestock, and helps support our environment. This is such an important bill for the future of America!

Thank you,
JENNA.

COMMENT OF KELLY WILLIAMS

Date Submitted: Saturday, May 19, 2012 12:14 a.m.

City, State: Apache Junction, AZ

Occupation: Composite Materials Technician

Comment: While I am not a current producer, I once was. I was a dairy farmer. I still have friends who farm. So I have insight into both sides of the issue. Honestly, corporations do not, and never will have any interest beyond profit.

To wit, I believe that the following would be a very good start.

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
 - Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
 - The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
 - Maintaining the EQIP Organic Initiative.
- Please understand that once America loses it's family farmers, America will not stand.

COMMENT OF PENELOPE WILLIAMS

Date Submitted: Friday, March 16, 2012, 9:00 a.m.

City, State: Rockledge, FL

Occupation: Retired Graphic Artist

Comment: The U.S. government needs to encourage our small farmers especially organic farmers because now the corporations which control our food system are destroying our health with their toxic pesticides & herbicides and GMO foods. We as consumers need to know what is in our food and how it is grown.

Corporations don't want us to know because they know we wouldn't buy it. The future of our country depends first on the fuel we give it to run it. The most important fuel we give ourselves is the food we eat. Let's stop fueling the wallets of corporations which are robbing us of our health wealth and awakening. Have the courage to stand up for what is right rather than caving into corporate greed at our expense. Thank you!

COMMENT OF PRECIOUS WILLIAMS

Date Submitted: Thursday, March 29, 2012, 5:16 p.m.

City, State: Texarkana, AR

Occupation: Community Based Education Program Director

Comment: I encourage you to re-instate the Outreach and Assistance for Socially Disadvantaged Farmers and Ranchers (2501 Program) back into the 2012 Farm Bill and maintain its funding at \$25 million annually. This education program has been very helpful to farmers and communities of Southwest Arkansas. SDF's are made aware of all USDA programs, receiving assistance in planning and production and we feel that it is one of the best program available to small and limited resource farmers. We really need this program. Therefore, I encourage our congressional leaders to support this program and socially disadvantaged farmers in Arkansas.

COMMENT OF SARA WILLIAMS

Date Submitted: Saturday, May 19, 2012, 11:00 a.m.

City, State: Cherry Valley, CA

Occupation: Laboratory Technician

Comment: This country needs a better farming industry. Corn needs to stop being subsidized so its various products end up in foods that are unhealthy and are making this country obese. Small farmers need to be able to support themselves, not have to go into debt because large companies take control over every process of farming. The food grown needs to be more organic, not modified. Smarter farming practices need to be done like planting trees around fields for wind and soil protection, *etc.* So much needs to be improved.

COMMENT OF VICTORIA WILLIAMS

Date Submitted: Friday, May 18, 2012, 2:03 p.m.

City, State: Joshua Tree, CA

Occupation: Songwriter

Comment: I have MS and Hep. C and must eat organically and even if I wasn't sick I would still want to eat organically grown food. There is no reason for a man to put his body thru the trouble of pesticides.

COMMENT OF ANDREA WILLIAMSON

Date Submitted: Friday, May 18, 2012, 10:57 p.m.

City, State: Snoqualmie, WA

Occupation: Landscape Designer

Comment: I respectfully request that the government eliminate all agricultural subsidies, but especially for corn. I work hard to feed my family only local organic foods (when I can afford it) and I truly believe that processed food is the root of our country's health problems. By stopping the subsidies on corn, junk food will reflect its true cost and even the playing field for all food growers. Perhaps it will begin to improve the overall health of our nation. Thank you for your consideration.

Respectfully,

ANDREA WILLIAMSON.

COMMENT OF THERESA WILLIAMSON

Date Submitted: Sunday, May 20, 2012, 7:22 p.m.

City, State: Cleburne, TX

Occupation: Home Gardener/Homemaker

Comment: I prefer to buy non-GMO food. That is why I grow heirloom seed. Presently, I have Rutgers tomatoes, Golden Bantam corn, lettuce, pattypan squash, pumpkins, watermelon, green peas, purple-hull peas, and potatoes growing so far.

My assorted cross-bred chickens and white Chinese geese free range all over the backyard. I would like to get some goats or a cow, in the future, for milk and meat products and grass mowing. Also, I would like to get fruit and nut trees growing. We live on 1 acre. Just think about what other people could grow on an acre if they really thought about it.

I think it is a waste to see huge lawns of just green St. Augustine grass. They could be growing their groceries instead all over our country.

COMMENT OF DIANE WILLIS

Date Submitted: Saturday, May 19, 2012, 12:34 a.m.

City, State: Nehalem, OR

Occupation: Research

Comment: I want my tax dollars to be used to subsidize food that is good for me and my community rather than subsidizing non sustainable food production.

COMMENT OF JUDITH WILLIS

Date Submitted: Thursday, May 10, 2012, 5:29 p.m.

City, State: Gladstone, MO

Occupation: Retired Administrative Assistant

Comment: Cutting SNAP is so irresponsible! This is a terrible time for individuals and families who need assistance to survive. What are you thinking?! I know these are difficult times for all of us, but cutting the very life blood of the poor is unacceptable!

COMMENT OF PAUL WILLIS

Date Submitted: Friday, May 18, 2012, 2:31 p.m.

City, State: Comanche, IA

Occupation: Pastor

Comment: It is time to stop caring for only Big Ag and consider and start helping the little producer. The poisons being used by Industrial Farming are detrimental to the health and survival of our planet.

COMMENT OF PENNY WILLIS

Date Submitted: Tuesday, May 08, 2012, 4:01 p.m.

City, State: Orlando, FL

Occupation: Retired

Comment: How can you and I throw away the seniors who are in such dire need. A group (150+) of doctors decided rather than hospitalizing seniors who were in trouble with nutrition, they would try getting them 20 lbs. of food within 24 hours and find out if they needed more before 30 days. Of 73 individuals so far, not one has had to go to the hospital! Be smart and **Help** these seniors the way **You Can**.

COMMENT OF WALT WILLIS

Date Submitted: Tuesday, May 08, 2012, 3:51 p.m.

City, State: Orlando, FL

Comment: There are 130,000 seniors in Orange and Seminole counties in desperate need of food. How did you and I let this happen? Don't let it get worse. In these economic times it could even be your family or the ones next door. With all the food available let's get it to the ones already in trouble. You can do it, if you wish!

COMMENT OF MARGARET WILLITS

Date Submitted: Friday, May 18, 2012, 10:17 p.m.

City, State: Sonora, CA

Occupation: Botanist

Comment: Soil is a very important resource. It can be quickly lost and takes a lot of time to build. Please ensure that anyone that benefits financially from this bill is caring for the soil. Soil loss pollutes streams and reduces the water holding capacity.

Also, in the long term it is important to find ways to grow crops more sustainably and with fewer oil-based inputs. Support research in organic farming and other methods that conserve and build soil.

Support those with diverse crops. Just as we know not to put all our investments into a single item, with the more variable climate, it is important to diversify. Offering crop insurance without attention to what farmers are doing allows them to take risks with taxpayer dollars. Single crops and genetically uniform crops offer little resilience to perform in times of variable and more extreme weather.

Agriculture is a very important base for this country. Consider the long-term well being of all citizens when making your decisions.

Thank you.

MARGARET WILLITS.

COMMENT OF YOLANDA WILLMORE

Date Submitted: Sunday, May 20, 2012, 8:33 a.m.

City, State: Sleepy Hollow, NY

Occupation: Housewife

Comment: I would like Congress to support organic/sustainable farming. Eliminate the use of harmful pesticides and genetically modified products and support practices that protect animal well-being. It would also be beneficial to make organic products accessible to families at the lower end of the economic spectrum and better educate as to the benefits of a healthy diet.

COMMENT OF RACHEL WILLS

Date Submitted: Friday, May 18, 2012, 7:38 p.m.

City, State: Norcross, GA

Occupation: Information Technology

Comment: As an American consumer, I am concerned about my health, the reduced quality of the food available for purchase, and the sustainability of the environment and food production for generations to come. I am writing to voice my support for organic farming, local farming, and the family farms that the country was built on. Allowing large agribusiness to thrive on large subsidies, while family farms suffer and the breadbasket of our country is slowly poisoned for our grandchildren to have to deal with, is not the way to manage the nation's food supply. Please vote in the interest of families, individual citizens, and future generations; rather than in the interest of large agribusiness that profits at our expense.

I support:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs . . .
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Thank you.

RACHEL WILLS.

COMMENT OF SEAN WILLSON

Date Submitted: Friday, May 18, 2012, 2:45 p.m.
City, State: North Hollywood, CA
Occupation: Musician
Comment: We need safer farming practices, and a focus on organic. Please get rid of Monsanto, we all know they are evil and the biggest threat to real farming, and farmers.

COMMENT OF ARIEL WILSON

Date Submitted: Tuesday, May 15, 2012, 5:14 p.m.
City, State: Bakersville, NC
Producer/Non-producer: Producer
Type: Livestock
Size: 50-150 acres
Comment: A \$36 million cut to SNAP is not the way to go. The Committee should focus on writing a farm bill that creates economic opportunity and improves access to healthy, affordable food for all Americans.

COMMENT OF CONNIE WILSON

Date Submitted: Friday, May 18, 2012, 3:52 p.m.
City, State: Cabot, AR
Occupation: Retired
Comment:

- The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

We can not allow organic research funding to be cut. We need full funding to support Beginning Farmers. Please do not let the cuts stand!

Let us instead go to work on good investigative work and preventive measures against fraud and abuses that hurt everyone.

Real reform towards healthy organic farming is the way we should be heading and getting rid of GMO foods. The public do not want these food products. Work for us please!

I support my local farmers. Our farmers are still the backbone of this country. Thank you

COMMENT OF DAVID WILSON

Date Submitted: Thursday, May 17, 2012, 10:36 a.m.
City, State: Leasburg, MO
Comment: U.S. Govt. should hold any recipient of Federal farm aid to high standards for land management. Most farmers want to do the right thing, but when someone does not, it harms us all. I don't want upstream farmers' actions damaging my bottomlands, especially when he is getting Federal farm aid.
 Every farmer should be able to describe his conservation management plan in order to qualify for farm assistance.

COMMENT OF DEBORAH WILSON

Date Submitted: Friday, May 18, 2012, 3:25 p.m.
City, State: Springfield, MO
Occupation: Artist/Teacher
Comment: Please protect small, family farms, especially organic growers and farmers. Allow the people to make our own choices as to whether we want to buy raw milk, *etc.* Please stop groups like Monsanto, who are destroying the seeds and feeding our people foods that are shown to be harmful. These foods need to be labeled, and actually banned (like they are in other countries). The USA needs to raise it's standards and stop allowing big corporations to push them around.

COMMENT OF DELILAH WILSON

Date Submitted: Tuesday, May 15, 2012, 10:01 a.m.

City, State: Pasadena, CA

Occupation: Student

Comment: As one of the richest countries in the world, we should be able to feed seniors and people who need help. Politicians got free health care and salary beyond the normal person. I think politicians should work in homeless shelters 20 hours a week and see how it really is out there for people. I think they should roll up their sleeves and pitch in instead of seating behind their desks.

COMMENT OF DEVIN WILSON

Date Submitted: Friday, May 18, 2012, 10:26 a.m.

City, State: Baltimore, MD

Occupation: IT

Comment: Esteemed members of Congress,

It is time to radically re-think our outdated, ineffective, and damaging farm bill. We can no longer stand by while subsidies are given to ecologically damaging, pesticide intensive monocultures like soy and corn. The previous farm bills have twisted what little farmland we have left into what is now basically a wasteland, requiring so much artificial additives to grow anything that the soil will likely not recover for generations. We need to start healing our farmlands now. By not subsidizing corn and soy, we can go back to a food system that is based on diversity, health, sustainability, and nature. Please remove corn and soy subsidies from the bill.

Additionally, as the committee considers the 2012 Food and Farm Bill, I urge you to:

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;
- Provide an even “plowing” field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don’t: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

Thank you,

DEVIN WILSON.

COMMENT OF DORIS WILSON

Date Submitted: Friday, May 18, 2012, 5:58 p.m.

City, State: Lyman, SC

Occupation: Substitute Teacher

Comment: Like most Americans, I am deeply concerned about the direction agriculture is going in this country. There is too much “corn sugar” and not enough healthy fresh produce. I want to be able to buy local, to know whether a food has GMOs, and to have farm animals reasonably well treated, with water supplies *etc.* protected from animal run off. Support family farms, not just huge agribusiness.

COMMENT OF DOROTHY WILSON

Date Submitted: Friday, May 18, 2012, 5:08 p.m.

City, State: Bloomington, IN

Occupation: Retired Teacher

Comment: Small farmers must be given every possible advantage to be successful because they can’t compete with agribusiness. The future of a healthy kind of agri-

culture depends on attracting young interested men and women to get involved right away. We face tremendous challenges in the future as world population increases and our soil is depleted and poisoned. Please act responsibly for future generations.

COMMENT OF JAN WILSON

Date Submitted: Friday, May 18, 2012, 3:47 p.m.
City, State: Shoreline, WA
Occupation: Retired Registered Nurse
Comment: Please strive to reduce the use of pesticides and chemicals. We need to work for an organic, healthy environment for the safety of our children, grandchildren and ourselves.

COMMENT OF JANE WILSON

Date Submitted: Friday, May 18, 2012, 4:24 p.m.
City, State: Oregon City, OR
Occupation: Homemaker
Comment: I hope that instead of supporting corporate farms that you will seek to encourage small sustainable family farms in their effort to go organic.

COMMENT OF JOAN WILSON

Date Submitted: Friday, May 18, 2012, 11:57 a.m.
City, State: St. Genevieve, MO
Occupation: Retired Teacher
Comment: Small farmers need subsidies; big business farms can do quite well without the subsidies. Americans need more fresh fruits and vegetables from local farmers' markets; we need fewer processed foods that factory farms provide.

COMMENT OF JOHN WILSON

Date Submitted: Sunday, May 20, 2012, 7:39 a.m.
City, State: Virginia Beach, VA
Producer/Non-producer: Producer
Type: Fruits
Size: Less than 50 acres
Comment: As a grower and eater, I know the importance of fresh organic food in our diet. We now have an obesity epidemic. Please change the farm to support local small organic farmers. Giving money to large polluters and growers of low nutrition, chemical laden food is dangerous to us all.

COMMENT OF LINDSAY WILSON

Size: Less than 50 acres
Comment: We need a farm bill that supports and protects small farms. Let's promptly move away from big ag and petro-chemicals and move forward into farming with nature. Please watch this 45 min. film to watch a woman in the UK narrate **Exactly** how I feel about the situation regarding food production and farming—<http://video.google.com/videoplay?docid=2750012006939737230>.

COMMENT OF MARC WILSON

Date Submitted: Friday, May 18, 2012, 2:09 p.m.
City, State: Clinton, WA
Producer/Non-producer: Producer
Type: Forestry, Fruits, Greenhouse/nursery, Specialty Crops, Vegetables
Size: Less than 50 acres
Comment: The current farm bill continues to support farms that are reducing our ability to produce food in the future. We need to eliminate all support for the unsustainable farms and expand support activities for farms that build the fertility of the soil that is the basis of all food.

COMMENT OF MARTHA WILSON

Date Submitted: Sunday, May 06, 2012, 7:42 p.m.
City, State: Bryan, TX
Occupation: Writer
Comment: Please support continued funding for all Federal nutrition programs, including TEFAP, SNAP (food stamps), WIC, CSFP and others.
 The federally funded nutrition programs listed above provide a desperately needed safety net for hungry Americans throughout our country.

COMMENT OF ROBERT WILSON

Date Submitted: Friday, May 18, 2012, 3:55 p.m.
City, State: Jacksonville, FL
Occupation: Retired
Comment: Please do everything you can to protect our increasingly poisoned food supply. The health of our citizens—and particularly our children—is relying on you and other representatives and senators to stand up to the agriculture lobby by denying their financial support (bribery) and passing laws preventing these poisons from reaching our food!

COMMENT OF STACIE WILSON

Date Submitted: Saturday, May 19, 2012, 11:23 a.m.
City, State: Jacksonville, FL
Occupation: Stay-at-Home Mom and Military Wife
Comment: I think it is important to educate people on what is in their food. We are spending so much time raising awareness obesity and much is left unsaid about the foods that are “considered” healthy—but **How** healthy? It does no good for us to eat “healthy” if what we are eating is just as bad as eating anything at all and not caring about being overweight. I would like to get rid of GMO’s all together, but if that takes time, at **Least** have our genetically altered foods made aware to us so those who cannot afford to eat organic, as it is more costly, can choose which foods are within their budget that are altered. I believe the more we know, the more empowered we are to take action!

COMMENT OF WARD WILSON

Date Submitted: Saturday, May 19, 2012, 12:29 p.m.
City, State: Louisville, KY
Occupation: Engineer
Comment: Please insist on keeping conservation requirements in the farm bill. We can, we must, preserve the land and water as we produce our crops. It is a false economy to damage the foundation of our crop production for short-term gain. It is also critical to improving our environment—from biodiversity to Gulf of Mexico sea-food, there are real costs to uncontrolled agriculture.

COMMENT OF REGINA WILSON-SEPPA

Date Submitted: Friday, April 27, 2012, 11:20 a.m.
City, State: Pennngrove, CA
Producer/Non-producer: Producer
Type: Specialty Crops
Size: Less than 50 acres
Comment: It is very important to me that feeding families who are having great difficulty financially, is included in the farm bill. The economy is improving though slowly and many poor, elderly, children and families are still having a hard time securing regular meals.

COMMENT OF ANN WINEGAR

Date Submitted: Wednesday, May 09, 2012, 10:55 a.m.
City, State: Excelsior, MN

Comment: It is important to me that we take care of the needs of our own citizens before sending funds to foreign countries. It is important that our poor children, families and elders have enough food to live and be healthy. Thank you.

COMMENT OF SALLY WINGATE

Date Submitted: Thursday, May 17, 2012, 10:16 p.m.
City, State: Nashville, TN
Occupation: Retired
Comment: Please fund the Organic Agriculture Research and Extension Initiative at \$30 million/year in mandatory funding. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.

COMMENT OF BETTY WINHOLTZ

Date Submitted: Saturday, May 19, 2012, 2:55 a.m.
City, State: Morro Bay, CA
Occupation: Tutor
Comment: Food is basic. I came to CA from Iowa. From one farm state to another, I know the importance of small farms. Please let the farmer not mega ag-business corporations grow our food.

COMMENT OF GEOFF WINN

Date Submitted: Friday, May 18, 2012, 5:58 p.m.
City, State: Redmond, OR
Occupation: Retired
Comment: Please keep voting in favor of Monsanto and other ag giants as we need corporate control of our food. We the people can't be trusted. I also love it when GMO crops pollinate nearby fields and the big corporations sue the blameless farmer, and they win. You must be so proud of yourselves.

COMMENT OF TRISHA WINN

Date Submitted: Friday, May 18, 2012, 10:38 a.m.
City, State: Beaverton, MI
Producer/Non-producer: Producer
Type: Livestock, Poultry/poultry products, Vegetables
Size: Less than 50 acres
Comment: Please, stop subsidizing corn and soy! Help small family and organic farms, not the giant corporate farms. I work at this full time, as a single mom raising four children, one with a disability. I have to be home, so I choke this life to make sure my children have clean food. My **Right** to feed my kids clean food is being destroyed due to GMOs cross-pollinating my organic heirloom crops. I raise my livestock on grass and hay, and with GMO alfalfa, all hay in the U.S. will be contaminated within 5 years according to scientists. This is unacceptable!
Support family farmers! That means doing away with corn and soy subsidies! The U.S. should not have to import its vegetables and fruit, but now we do, because we use corn for everything, most of it terribly unhealthy and not necessary! Feed lots are an abomination—animals should graze or browse. HFCS is everything is a travesty—new research is linking HFCS to inability to excrete heavy metals (read: *Autism and Alzheimer's*)
 Locally grown, nutrient rich food is what Americans and this economy needs. Please support **Farmers**, not corporations!

COMMENT OF SANDRA WINTER

Date Submitted: Friday, April 27, 2012, 10:13 a.m.
City, State: Marblehead, MA
Occupation: Retired Educator
Comment: I urge my elected officials to protect the programs in the farm bill that fund food for children and low income families—like SNAP. We as a nation cannot balance a budget by taking food from those less fortunate. Providing for our needy is our first responsibility—there are other options. Please use them. And while you are at it, how about supporting all the small organic farms that serve to protect us from the harmful pesticides and fertilizers that big ag uses to produce food that is actually harmful to our health. The U.S. has much to do to restore our national food supply to health.
 Thank you very much for your service to this country. Do you best!
 SANDRA WINTER, Marblehead, MA.

COMMENT OF FRANCIS WINZIG

Date Submitted: Friday, May 18, 2012, 1:17 p.m.

City, State: Orlando, FL

Occupation: Retired

Comment: All subsidies for corporation farms should be stopped. Support for food stamps, and local farm co-ops should be increased! Obesity and Diabetes should not be a “win-win” for Corn growers, McDonalds and the Pharma companies.

COMMENT OF RANDY WIRTH

Date Submitted: Friday, May 18, 2012, 10:33 a.m.

City, State: Millville, UT

Occupation: Business Owner

Comment: Hi,

I have been involved in the organic industry since 1974 as both a businessman and a consumer. It is crucial to me, my family, and my business that certified organic products continue to be a viable alternative to industrial agribusiness.

COMMENT OF NORMAN WIRZBA

Date Submitted: Friday, May 18, 2012, 12:27 p.m.

City, State: Hillsborough, NC

Occupation: Professor

Comment: It is vitally important to me and to my family that we have a farm bill that promotes the health of eaters and the health of the land and its creatures. Today's conventional agriculture is ruinous of soil and water and highly abusive of animals and farm workers. This needs to change. The farm bill can help by supporting healthy food, grown in a sustainable way, with just agricultural working policies.

COMMENT OF KEN WISE

Date Submitted: Thursday, May 17, 2012, 2:51 p.m.

City, State: New Paltz, NY

Occupation: Agricultural Extension Specialist

Comment: Keep in mind that sustainable agriculture, soil and water conservation, and the reduction of pesticide and fossil fuels as fertilizers are very important. Policy should increase the willingness and incentive to make changes to farming operations to meet the needs of our current and future food needs. While this sounds easy . . . I can tell you it is not. Social change takes a lot of work . . . meaning changing farming practices to make it more sustainable specific to each farm and farm producer. Providing a means for more education that gets directly to farmers is the number one priority. We have the technology to make sustainability happen—farm policy need to embrace this and make it happen. Money needs to be provided to states in a non-competitive manner (meaning stop the grants give the money that is needed to do the work) so we all can help teach producers how to be more sustainable for future generation of farms.

Sincerely,

KEN WISE.

COMMENT OF JOWANDA WISEMAN

Date Submitted: Friday, May 18, 2012, 2:26 p.m.

City, State: Jeffersonville, OH

Occupation: Librarian/Hobby Farmer

Comment: I think more monies and consideration should be given to small, organic/natural farmers and fewer bills/monies in favor of the ag giants. Make sure the bill provides access to small farmers, schools, FFA, 4-H and doesn't put undue hardship on those who struggle the hardest to provide good, wholesome food for their tables and those of their neighbors.

While you're at it, make the ag giants accountable for the harm they are doing to the soil, the air and the people.

COMMENT OF JEANETTE WISNIEWSKI

Comment: I volunteer at the Food Pantry run by my church and see the increase in numbers of people needing our services. I hope you'll consider voting for the farm bill coming up shortly. Thank you for your time.

COMMENT OF WALTER WISZOWATY

Date Submitted: Saturday, May 19, 2012, 8:33 p.m.

City, State: San Diego, CA

Occupation: Trainer

Comment: Agribusiness is polluting our food, water and land for the sake of more profit and thereby contaminating our food and water supply unchecked. This needs to be regulated just like any other large business that causes reckless endangerment to the citizens of this country. Former members of agribusiness and the pesticide industry cannot be allowed to be members of our regulatory structure because of their vested interests and biases.

COMMENT OF LON WITHERS

Date Submitted: Friday, May 18, 2012, 2:24 p.m.

City, State: Chicago, IL

Occupation: Entertainment Industry

Comment: Three words: **Organic, Organic, Organic.** Stop the poisons, stop the GMOs. There's only one direction to a healthy food supply, and the direction leads away from pouring billions of gallons of poison into our lands and waters, and laboratory created plants with toxic side effects. Mother Nature truly does know better than Monsanto. Stand up for what's right!

COMMENT OF HELEN WITOWSKI

Date Submitted: Friday, May 18, 2012, 1:24 p.m.

City, State: Bridgeport, CT

Occupation: Cashier

Comment: Big business needs to keep their greed mentality out of the American food chain! All they care about are profits, not people! Have you all learned nothing from all the oil spills and mine accidents? Please don't continue being blind to what big companies are doing to our country!

COMMENT OF JOHN WITTE

Date Submitted: Tuesday, May 15, 2012, 6:44 p.m.

City, State: Portland, OR

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: Much better to "subsidize" *i.e.*, increase funding for such programs as SNAP than to throw \$\$\$\$ at commodity production (think soy beans, corn, and wheat) The commodities do very little nutrition-wise other than lead to obesity!

COMMENT OF MOLLY WOEHLIN

Date Submitted: Friday, May 18, 2012, 7:09 p.m.

City, State: Northfield, MN

Occupation: Retired

Comment: I am interested in maintaining a safe food supply and very good inspections and monitoring—as well as support for small and sustainable farmers who are providing an alternative to factory farming which are hard on the environment. We need to make a big shift to supporting farmers who are heavily into conservation rather than encouraging more of the commodities. Thank you for looking to the future needs of our population.

COMMENT OF NIKKI WOELK

Date Submitted: Friday, May 18, 2012, 1:24 p.m.

City, State: Oakland, CA

Occupation: Nonprofit Manager

Comment: Please subsidize nutritional foods for all Americans (fruits, vegetables) and end subsidies which falsely lower the price and reinforce the purchase of

unhealthy foods (soy, corn, meat). Do not cut funding for vital programs such as nutrition, conservation and support for organic and sustainable agriculture. Our health depends on it.

COMMENT OF PATRICIA WOJCIECHOWSKI

Date Submitted: Friday, May 18, 2012, 12:17 a.m.

City, State: West Allis, WI

Occupation: Teacher

Comment: School food programs should contribute to the daily educational curriculum of students. Nutritional information should be displayed with the food choices and data could be compiled for each student to be shared with parents and staff. Take advantage of this educational opportunity.

COMMENT OF NANCY WOLBACH

Date Submitted: Sunday, May 20, 2012, 8:30 a.m.

City, State: Tiverton, RI

Occupation: Unemployed

Comment: Hello, Representative Cicilline,

I am a volunteer worker at a small certified organic farm, Skinny Dip Farm, in Little Compton, RI and Westport, MA. The owners are a part of a strong and healthy, if small, sector of the farm population in America dedicated to farming without pesticides, herbicides, *etc.* in order to produce safe and nutritious vegetables, meats and poultry.

They have taken on the monumental task of educating the public to the health benefits of eating locally and organically grown food.

It is however not surprising that American agribusiness continues to forge on in its quest for power to the extreme that it refuses even to label genetically modified food, thereby denying the public its right to know what they are buying. It is equally unsurprising that our government would allow this.

Please, Mr. Cicilline, do all you can to fight against the enormous force that would take from us the right to choose.

Thank you,

NANCY WOLBACH.

COMMENT OF JILLIAN WOLF

Date Submitted: Friday, May 18, 2012, 5:42 p.m.

City, State: Leicester, NC

Occupation: Subsidized Housing

Comment: Please consider small, local farmers as the only way to a sustainable future for all of us. It's time to recognize the mass destruction that agribusiness has wrought upon us . . . to take responsibility for cleaning ourselves up. It's now . . . or never.

COMMENT OF TODD WOLF

Date Submitted: Thursday, May 17, 2012, 12:09 p.m.

City, State: Parsippany, NJ

Occupation: Veterinarian

Comment: Surrendering all U.S. agriculture to corporate control is dangerous, unhealthy (to individuals & the environment), and will put accessibility to one of the most basic human needs, food, at risk of being used as a tool of control against American citizens. The current loss of control to the big ag. corporations must cease or the consequences will be severe on many levels.

COMMENT OF ALISSA WOLFE

Date Submitted: Thursday, April 12, 2012, 10:02 a.m.

City, State: Rio Rancho, NM

Occupation: Food Banking

Comment: Nearly 50 million Americans are living in food insecurity. While food banks, churches, and pantries are doing great work in our community, charity alone cannot meet the need for food assistance. Feeding our neighbors is a public-private partnership. I try to do my part by helping at a local hunger relief program in my community.

COMMENT OF ASHLEY WOLFE

Date Submitted: Sunday, May 20, 2012, 9:37 a.m.**City, State:** Fort Worth, TX**Occupation:** Teacher**Comment:** When I buy produce at the store or farmer's market, I look for items grown in the USA. This is pretty difficult since most produce I find is grown in Mexico, Costa Rica, Chile, *etc.*

I would like to see more produce from the USA in our large chain grocery stores. We have capable farmers who can provide all the produce our country needs in a sustainable and organic way, without genetic modifications.

I would also like a farm bill that requires genetically modified foods to be labeled accordingly.

 SUBMITTED STATEMENT BY DENNIS C. WOLFF, OWNER, PEN-COL FARMS; PARTNER, VERSANT STRATEGIES
Introduction

I am presenting written testimony today on suggested changes to dairy policy as part of the 2012 Farm Bill. I am both a dairy farmer, owner of Pen-Col Farms, Millville, Pennsylvania, a purebred Holstein dairy farm, and also as a partner in a public affairs firm, Versant Strategies, of Harrisburg, PA that represents DPAC, a group of dairy farmers focusing on dairy policy reform. I have condensed my testimony into four bullet points to remove the burden of reading a lengthy document. My recommendations were formulated from my experience as someone who both worked in state government as the former Secretary of Agriculture for Pennsylvania as well as spending my entire life as an active dairy producer. I have great hope that the 2012 Farm Bill will bring some much needed changes to Federal dairy policy. The United States has finally realized that the future growth of the dairy industry will come from expanding exports. Our policy needs to reflect this reality. Thank you for this opportunity.

- Global Markets will drive the growth of the U.S. dairy industry going forward. We need Federal Dairy Policy that complements this by eliminating the DPPSP (Dairy Product Price Support Program) and makes sure supply management is not part of future policy. This will send a clear signal to our trading partners that we will be a dependable supplier going forward.
- Simplify our existing complex policy by going to a two-class system with competitive price discovery based on component values. The competition will improve producer revenue while simplifying the complexity of current pricing.
- Take electronic reporting to the next level by requiring it daily and including more products to increase marketplace accountability and dilute the effects of the thinly traded CME.
- Give dairy producers the option to custom fit their risk management by moving LGM-Dairy forward and removing it from pilot status. As a pilot program, it has proven itself as a great tool for our industry. Many feel that this program should replace MILC.

 COMMENT OF LEE WOLKOWITZ
Date Submitted: Friday, May 18, 2012, 12:58 p.m.**City, State:** Culver City, CA**Occupation:** Sustainable Urban Agriculture Advocate**Comment:** It is imperative that we move from the megafarm and cheap processed food era that we have created and move back to smaller family owned and operated farms. The reason people are as obese and unhealthy as they are is directly proportional to the availability of cheap processed food and the lack of access to fresh pesticide free produce. It would be more economical to move back to pre-green revolution farming methods, without all the petro-chemical fertilizers, pesticides and giant machinery which. We must also begin to ban GMO crops because we have no idea what they are doing to us.

 SUBMITTED STATEMENT BY TOMMY WOLLENMAN, BOARD CHAIR, CALIFORNIA CITRUS MUTUAL

Good morning, my name is Tommy Wollenman and I am here today representing California Citrus Mutual. I serve as Board Chairman for that organization and have had the pleasure of doing so for almost 2 years. I am also a citrus producer farming 120 acres and my family farms an additional 1,600 acres. I also serve as General

Manager of LoBue Citrus, one of the industry's oldest shipper and marketer of fine California Citrus. We're proud of our history and look forward to our future.

As you know, Citrus Mutual is active in public policy as a voluntary trade association representing citrus producers from as far as Imperial County and North up to Sacramento. We represent well over 2,000 producers and over 65% of the tree crop produced in our state. California is the nation's number one fresh citrus producer. In terms of tonnage, we rank second to Florida, but in terms of value our \$2 billion industry is second to none. We ship to all 50 states and export around the world. Some 3,900 farmers employ 12,000 people with another 10,000 individuals dependent upon our industry for their jobs. The economic value of our entire effort exceeds \$4B.

The farm bill, as far as we are concerned, provides the economic environment in which we can compete and hopefully continue to provide a nutritious commodity to millions of people around the world in a sustainable fashion that also provides the economic conclusion desired.

Last September Citrus Mutual and our industry colleague, Sunkist, provided a letter that outlined our priorities relative to farm bill deliberations. Our priorities are still intact, and we were pleased to see a draft document promulgated by Congressional committees last Fall in anticipation of budget reconciliation. While that compromise never materialized between Houses of Congress the language developed by this Committee we deemed positive. Our concern is that it may unravel to our detriment.

The budget for and programs within the Animal Plant Health Inspection Service are vitally important to our industry. APHIS trains our border inspectors, they help overcome trade barriers with their technical team of negotiators and they establish procedures for finding, treating and communicating about pests and diseases. Their work is to assist producers overcome pest and disease issues that are created by those who innocently or maliciously ignore our laws regarding the importation of foreign material. The APHIS budget has been cut, and this has created hardships on multiple industries. The farm bill must recognize the return on the dollar this agency brings to agriculture and the economy.

Concurrent with that is the Citrus Health Response Program or CHRP and the 10201 program. CHRP is a national effort to do what no other nation has been able to do; allow their citrus industry to survive against the spread of Huanglongbing. Florida has it and has lost 200,000 acres. Brazil has it and they have pulled over 12 million trees. It has been discovered in Texas groves and now in a small city in LA County. We believe this can be defeated and a full partnership with industry money and the Federal Government must be sustained.

The 10201 program is a pest detection program that partners with state and local government to prevent the development of endemic populations of pests and diseases. Whether it is medflies, emerald ash borer or diseases; we cannot let this program become diminished because it places our nation's environment at great peril.

A second agency within USDA must be supported by the farm bill. The Foreign Agricultural Service is a valuable tool to address trade opportunities from a policy perspective. Our President, Joel Nelsen, is presently Chair of the Fruit & Vegetable Trade Advisory Committee, for example. FAS occupies offices in foreign countries and Washington that works with industry stakeholders to create viable solutions for reducing tariff barriers, closing ports such as Jakarta, Indonesia and opening lucrative markets such as Korea, in our case. Without FAS, export opportunities would be greatly hampered.

A third Agency has been spotlighted for review and that is the Risk Management Agency. Our industry is the second largest user of crop insurance in California. Over 80% of producers use it and Committee Members from California are all too familiar with our freezes of 1990 and 1998. We don't mind other commodities seeking to copy our success in developing viable programs that are demanded by growers. But we are very concerned that new efforts would increase the cost of RMA to the nation's budget thereby increase our costs as an offset. That simply cannot be condoned and we would ask the Committee to be mindful of what looks good and what the unintended consequences may be.

Citrus Mutual and our industry have found Market Access Program (MAP) and the Technical Assistance for Specialty Crops (TASC)—to be quite valuable. Neither program is a free ride for a commodity. Both create vehicles that allow industry to develop solution paths that expand exports. MAP and TASC have been used by this industry to create a market in Korea, one of our largest export destinations. MAP and TASC have allowed us to penetrate Australia and keep it as a viable market. Qatar, Dubai, Vietnam and Thailand are examples of small developing areas of commerce for the citrus industry that would not be materializing if it weren't for MAP.

1517

We certainly understand the need for fiscal responsibility. But when the effort to reduce costs creates unintended consequences such as the ability to market one's product, then is Congress really achieving the goal. Our industry's ability to maintain its economic viability insures over \$500m of income tax support, 20,000+ jobs, \$4b in economic activity. The strength of the programs and agencies above directly correlates with the strength of our industry. That partnership cannot be sacrificed. The unintended consequences would be dramatic.

Thank you for this opportunity and I look forward to answering any questions you may have.

COMMENT OF BARBARA WOLLMAN

Date Submitted: Friday, May 18, 2012, 9:20 p.m.

City, State: Friday Harbor, WA

Occupation: Retired Librarian

Comment: More support in legislation and tax breaks for small (50 acres and under) farms, especially those who do not use hormones, antibiotics and other damaging products or practices. Prefer those with free range animals. The agribusiness mega farms do not need your help.

COMMENT OF SUSAN WOLVERTON

Date Submitted: Friday, May 18, 2012, 11:43 a.m.

City, State: Cedar Rapids, IA

Occupation: College Professor

Comment: As a parent, teacher, gardener and food consumer, and citizen of a farm state, **Iowa**, I am deeply concerned that our ability to produce healthy food for the immediate and near future is compromised if the environment used to grow food, managed by the farmers, is not managed responsibly. I urge you to keep support for conservation programs in place so that our food supply is not put in jeopardy. It is our collective responsibility to manage our valuable agricultural lands with sustainable practices. This is a short-term and long term responsibility that should take priority. Without healthy and productive land we cannot have healthy and productive societies.

COMMENT OF LAETITIA WON

Date Submitted: Friday, May 18, 2012, 1:35 p.m.

City, State: Tewksbury, MA

Occupation: Stay-at-Home Mother and Gardener

Comment: Please help small organic farms, stop subsidizing commodity crops, and don't cut the food stamps programs! By making healthy food more affordable, you will help Americans get healthier and thus reduce the cost of health care. Listen to common sense, not special interests.

COMMENT OF CHRISTINE WOOD

Date Submitted: Friday, May 18, 2012, 11:21 a.m.

City, State: South Lake Tahoe, CA

Occupation: Bookkeeper and Mother

Comment: House Committee on Agriculture members,

My husband and I are deeply disappointed in the food market of the United States of today. It seems that the majority of the foods on the supermarket shelves are either laden with genetically modified corn products or heavily pesticide-sprayed soy products. You all have the power to help change this with the 2012 Food and Farm bill.

As the committee considers the 2012 Food and Farm Bill, I urge you to:

Provide an even field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farming, and rural development. We need more organic farmers and ranchers, more sustainable food production, and more economic opportunity in our food system.

Support family farmers that really need help, and not the biggest farms that don't.

I hope you will consider the health of the your constituents akin to my concern for my two children.

Thank you for your time,

CHRISTINE WOOD.

COMMENT OF EMMY WOOD

Date Submitted: Friday, May 18, 2012, 7:01 p.m.

City, State: Wheat Ridge, CO

Occupation: Teacher

Comment: I would like to see the government rewarding farmers who produce healthy foods and use their lands in a sustainable, healthy and environmentally responsible way.

As an educator I see firsthand the effects of our subsidy system. The foods provided for the school lunch program are hideous and inedible—they definitely do not align with the *choosemyplate.gov* standards! Healthy foods need to be more affordable and the unhealthy foods made from corn, soy and white rice need to be more expensive so we are not paying for them later (healthcare, and behavior problems in children and adults—prisons)

Thank you for considering these much needed changes!

EMMY WOOD.

COMMENT OF KRISTINE WOOD

Date Submitted: Monday, May 14, 2012, 2:58 p.m.

City, State: Council Bluffs, IA

Occupation: WIC Coordinator/Dietitian

Comment: I urge Congress to protect against hunger and promote nutrition in the upcoming farm bill by supporting programs like SNAP, TEFAP, CSFP, and FFVP. The children and families we see at the WIC clinics are very vulnerable in this economy!

COMMENT OF STEPHANIE WOOD

Date Submitted: Friday, May 18, 2012, 12:01 p.m.

City, State: Montclair, NJ

Occupation: Secretary

Comment: I eat, and my niece and nephew eat. Please get rid of Monsanto and their toxic GMOs and give our kids **Healthy Organic Food!** Don't you have children in your family? By the way you ought to stop torturing animals. Haven't you heard about mad cow disease, *Salmonella*, etc.? These come from mistreating farm animals. Please do the right thing—you eat, too—do it for your own health! Thanks!

COMMENT OF SARAH WOODARD

Date Submitted: Friday, May 18, 2012, 4:15 p.m.

City, State: Pittsford, NY

Occupation: Asst. Treasurer

Comment: The bill for our country's farms need to be revamped. They need to represent the changing environmental concerns of our citizenry by taking into account organic farming practices and the promotion of family farming that isn't reliant on synthesized chemicals.

COMMENT OF NOLA WOODBURY

Date Submitted: Friday, May 18, 2012, 7:41 p.m.

City, State: Eugene, OR

Occupation: Retired Nurse

Comment: I believe that Americans have been hoodwinked into eating an unhealthy diet. The *China Study* has given us concrete proof that nutrition (or that lack of it) is the cause of most of our illnesses. It definitely is the cause of the epidemic of obesity in our country. It is time to focus on the people's health and not the profits of agribusinesses! The push for "cheap food" is **Not** worth the price we are paying in our health! I now eat a "whole food/plant" based diet and feel healthier than I ever have, without any medications. It is time to support local farms and organic farmers! It is time to label any food that contains GMO ingredients. It is time to re-educate the American people regarding their food choices and stop "hiding" sugars, and oils in most processed foods. It is time for some forward-looking action from our government!

COMMENT OF MARGARET WOODRUFF

Date Submitted: Friday, May 18, 2012, 10:07 a.m.

City, State: Charlotte, VT

Occupation: Librarian

Comment: Good, fair food should be available to all. The economic and environmental models make it clear that we can grow enough food for all by growing close to home in a responsible way. Let's provide the opportunity for our farmers to do this and for the rest of us to benefit from the results.

COMMENT OF KENNETH A. "JACK" WOODS

Date Submitted: Monday, April 23, 2012, 3:16 p.m.

City, State: Minneola, KS

Occupation: Ag Banker

Comment: My main concern is the fact that some are wanting to put a \$40,000 cap on the amount of crop insurance that a producer can receive. That would be much like telling a home owner with a \$500,000 home he can only insure it for \$40,000. Why waste the money for such a small amount of coverage.

COMMENT OF LORA WOODS

Date Submitted: Friday, May 18, 2012, 4:48 p.m.

City, State: Ojai, CA

Occupation: Backyard Gardener

Comment: It's a sick government which takes food stamps away from the poor and continues exorbitant payments to wealthy farmers. It's agribusiness who are purveyors of poison and clearly own congressmen who would even consider such a bill. But then a physically sick citizenry is big business, too! And here you have the chance to start turning that around. We need organic, diverse crops.

COMMENT OF TARA WOODS

Date Submitted: Wednesday, May 09, 2012, 11:59 p.m.

City, State: Springfield, MA

Occupation: Full-Time Student

Comment: Absolutely no cuts can possibly take place right now. You have cut so many people off of unemployment who still have not obtained new employment. Along with all the others that were already dependent on the SNAP program these people now with no income have to go and seek this assistance as well. I understand the State needs to make cuts but for those living in a community that is struggling financially, will just make the less fortunate lives go from bad to worst. The food pantry is losing funding and it is just really terrible. I currently volunteer at the food pantry and we are serving over 2,000 recipients monthly. What will these families do? Please we do not need this type of cut right now. Help Us!

COMMENT OF JILL WOODWARD

Date Submitted: Sunday, May 20, 2012, 11:24 a.m.

City, State: New York, NY

Occupation: Video Editor

Comment: Our current system of subsidizing giant agribusiness is making America sick and obese, poisoning our water supply, and contributing to global warming. A neat way to solve all three problems would be to take those subsidies and give them to small organic farms. Taxes shouldn't go towards such harmful practices. It's time to start righting some wrongs.

COMMENT OF JOEL WOOL

Date Submitted: Friday, May 18, 2012, 11:58 a.m.

City, State: Cambridge, MA

Occupation: Environmental Organizer

Comment: The Local Foods, Farms and Jobs Act (H.R. 3286) is an essential bill that will protect the state of agriculture in the United States, an industry which has great impact on economy, environment and health.

COMMENT OF BARBARA WOOLLEY

Date Submitted: Friday, May 18, 2012, 1:05 p.m.

City, State: Wilmot, NH

Occupation: Medical Social Worker/Author

Comment: Please, please, please listen to the people! Money interests have no business controlling the food supply. We have the right to have access to normal, unadulterated, organic, healthy food that nourishes our bodies and sustains life.

I am deeply distressed that the mega corporations have been allowed to dictate what will/what will not be our food supply. Other nations are saying **No** emphatically to agribusiness. They are demanding truth in labeling. They are demanding food that is meant for humans. They are aware of the dire impact on the environment and every living thing by the chemical concoctions that are agribusiness offerings.

I implore you to stand up against this tide of death that is being unconscionably inflicted upon us.

Please, please, please vote for truth in agriculture, food that sustains health and the maintenance of life.

As the great wise one, Hillel, said:

“If not now, when?”

COMMENT OF CATHY WOOTAN

Date Submitted: Tuesday, May 08, 2012, 9:53 a.m.

City, State: Cleveland, OH

Occupation: Site Coordinator of a Food Pantry

Comment: I am writing, both as a mother and as the coordinator of a Cleveland-area food pantry, to urge you to protect hunger programs, especially those that directly impact children. There is no way we can expect our citizens to be capable and competitive in the future if they don't get proper nourishment today. And in spite of what you may hear from politicians and analysts, the economy has not yet turned around, at least not for the population we serve at our food pantry, so there is still a great need for programs like SNAP and TEFAP. I thank you in advance for doing whatever you can to safeguard this critical assistance.

Sincerely,

CATHY WOOTAN,
Site Coordinator,
Brookside Center.

COMMENTS OF RUTH WOOTTEN

Date Submitted: Friday, April 27, 2012, 12:08 p.m.

City, State: Tempe, AZ

Occupation: Retired Social Worker

Comment: It is imperative that you maintain the SNAP and other nutrition programs as you develop programs and funding for the reauthorization. SNAP has done exactly what it should do in responding promptly to severe unemployment and crisis situations. Do not cut nutrition programs which help meet the needs of low income families: 57% of households receiving SNAP have income at or below the Federal poverty level, and 84% of them have a child, a senior, or a disabled person in the household.

Conservation measures and assistance to small growers should also be continued.

Date Submitted: Thursday, May 03, 2012, 2:02 p.m.

Comment: We would urge you to assure that the farm bill includes strong support for nutrition programs for poor and hungry people, at home and abroad.

SNAP benefits need to be maintained, and incentives should be increased for the purchase of healthy foods.

Farm policies need to help build markets for domestic farmers, linking them to local and regional development of rural areas.

Date Submitted: Wednesday, May 09, 2012, 5:29 p.m.

Comment: It is tremendously important that you include strong provisions for continuing and strengthening nutrition programs, such as SNAP and TEFAP. A circle of protection needs to be placed around programs which meet the needs of poor and vulnerable people at home and around the globe.

COMMENT OF JENNY WORMAN

Date Submitted: Saturday, May 19, 2012, 1:23 p.m.

City, State: West Hollywood, CA

Occupation: Actor

Comment: Please lift onerous red tape for small, and organic farmers. **Stop FDA Harassment Of Raw Milk Producers Now!** Lift ban on hemp farming, so our farmers can grow this extremely profitable cash crop. Ban GMO and sanction Mon-

santo from harassing small, local producers and other farmers. Stop colluding with Monsanto, and giving subsidies to Big Ag. Turn the water back on for all our farmers in California's central valley. People are more important than a 2 inch fish not even indigenous to the area.

Thanks.

COMMENT OF JIM WORSTELL

Date Submitted: Thursday, March 22, 2012, 8:04 a.m.

City, State: Almyra, AR

Producer/Non-producer: Producer

Type: Greenhouse/nursery

Size: 301-500 acres

Comment: Value-added Producer Grant Program and Farmers Market Promotion Program are the two programs which should not be cut and in fact should be increased. We do need to cut government expenditures drastically, but study after study shows that investment in job creating programs such as VAPG and FMPP actually increase government revenues because they increase jobs and income.

COMMENT OF DENISE WRIGHT

Date Submitted: Saturday, May 19, 2012, 11:09 a.m.

City, State: Sebastopol, CA

Producer/Non-producer: Producer

Type: Poultry/poultry products

Size: Less than 50 acres

Comment: I would like to see fair competition for all, large or small. No subsidies for farming, all GMO products labeled, no pesticides used. This would allow equitable local sustainable farming. Thank you for listening.

COMMENT OF JEFF WRIGHT

Date Submitted: Saturday, May 12, 2012, 6:00 a.m.

City, State: Bellville, OH

Occupation: Outreach Center & Food Pantry

Comment: As president and a volunteer at an Outreach Center and hunger program, I am writing to share my deep concern about hunger in Ohio. With unemployment (and underemployment) still high and many Americans still struggling to make ends meet, anti-hunger programs are helping many of our neighbors just put food on the table.

Nearly 50 million Americans are living in food insecurity. While food banks, churches, and pantries are doing great work in our community, charity alone cannot meet the need for food assistance. My program, is the Bellville Neighborhood Outreach Center in Bellville, OH (southern Richland County) which serves about 750 people each month, providing nearly 58,000 meals a year. This is an increase of approx. 50% over the number of people we were serving a year ago!

Congress should do its part by continuing to support anti-hunger programs like the Supplemental Nutrition Assistance Program (SNAP), The Emergency Food Assistance Program (TEFAP), and the Commodity Supplemental Food Program (CSFP), all of which are authorized in the farm bill.

Cutting anti-hunger programs will increase hunger in America. Given the associated health care and educational costs of hunger and poor nutrition, cuts to anti-hunger programs are short-sighted.

I ask you to please remember the families who are struggling in our country, and urge you to protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization.

COMMENT OF JIM WRIGHT

Date Submitted: Friday, May 18, 2012, 11:08 a.m.

City, State: Somerville, MA

Occupation: Art Conservator

Comment: I am planning to start a small production vegetable farm in the Northeast in the next 5 years. Please consider the small, organic family owned farms as well the big producers.

COMMENT OF MIKI WRIGHT

Date Submitted: Friday, May 18, 2012, 12:26 p.m.

City, State: Lexington, KY
Occupation: Graphic Design

Comment: We can't feed the world with non-nutritive mass produced mono-crops. This country and the world needs the nutrition small farms can provide in the form of native vegetables and meats. We have to have more than corn and soy. Look what that diet has done to our own country. We are horribly obese and unhealthy. We can and must do better for ourselves and the people of the world we want to help. They don't need obesity, diabetes, and high blood pressure that comes from eating cheap mono-cropped grains. Imagine a field full of greens, broccoli, tomatoes, yams, beans, and squash instead of soy and more soy and corn and more corn. Yes it is cheap and it fills their bellies, but they need a more balanced diet. We all do. By subsidizing these massive grain crops, you are killing people with cheap calories and junk food, and killing the planet with pesticides and herbicides while depleting the soil for future generations. We are running out of phosphorus from making artificial fertilizers for these massive fields, when we could be using composted manure that would make the soil alive again. This is so very out of balance, and our Government subsidies are the cause. Please be the remedy and support small farms, diverse crops and organic practices.

COMMENT OF NADINE WRIGHT

Date Submitted: Friday, May 11, 2012, 5:33 p.m.
City, State: Madison, WI

Comment: Farming is an act upon the Earth for our own health. Pesticides, factory farms, other harmful chemicals, bad practice techniques and talking responsibility away from the communities for healthy food production are all hurting farmers and consumers.

COMMENT OF NANCY WRIGHT

Date Submitted: Friday, May 18, 2012, 12:29 p.m.
City, State: Orange City, FL
Occupation: Retired

Comment: Having concerns for the quality of our food inasmuch as it has been in steady decline over the past 50 years, I am calling for your support for organic and sustainable agriculture and the full endorsement of all the provisions of the Local Foods, Farms and Jobs Act (H.R. 3286), as well as the implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236). We do not need to cut the food stamp program by billions of dollars in order to leave farm subsidies intact—we need to fully fund conservation programs like the Conservation Stewardship Program to make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs. When you grow good-quality, fully nutritious food, you don't need to eat as much to get your nutrition to keep a healthy body. God made us stewards of the land and animals to keep a viable future going for our next generations, and right now we are failing miserably at His command due to the influence of money and profits at the expense of others. The Native Indians had a better sense of the importance of taking care of Mother Earth than we ever have—we need to take lessons from those that take care of, and weed out the profiteers who are ruining things for everyone else as they have no real concern for anyone but themselves. We need more organic research funding for sustainable agriculture as we can grow more quality organic food in a small space that will properly feed more people than large agribusiness operations do with their nutrition-less crops that cause disasters for all. Please take heed—we all want our grandkids to have something great for their future, and not the illnesses and obesity they have now!

COMMENT OF WYNETTA WRIGHT

Date Submitted: Wednesday, May 09, 2012, 8:14 p.m.
City, State: Jacksonville, FL
Occupation: Nonprofit Org. Community Gardens

Comment: I live in a community that is a food desert I take elders in my organization to the closest store there are so many that don't have this support. Let's feed the elders and everyone.

WYNETTA WRIGHT.

COMMENT OF DWAYNE WRIGHTSMAN

Date Submitted: Friday, May 18, 2012, 12:44 p.m.

City, State: Lee, NH

Occupation: Retired Teacher and Producer

Comment: I favor a farm bill that maximizes nutritious food production without excessive use of chemicals (herbicides and pesticides) in the production process in order to keep the people of our nation healthy throughout their lifetimes.

COMMENT OF CHRIS WRINN

Date Submitted: Thursday, May 17, 2012, 12:25 p.m.

City, State: Milford, CT

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: I produce my own organic food because I have an auto-immune condition. We need to stop dumping tons of Round Up from Monsanto on our land, we need to be able to grow organic food and get support if needed. We need to let our local farmers label GMO foods as a freedom to let the public know what's going into their bodies. We need to stop fracking so the water and land isn't destroyed. We need to stop growing GMO corn as it's killing the bees, Poland has already stopped this practice. We need to get back to the land and away from chemicals that are killing it. We need to support the local farmer. Thank you.

COMMENT OF ROBERT WROBLEWSKI

Date Submitted: Saturday, April 28, 2012, 8:52 p.m.

City, State: Dearborn, MI

Occupation: Retired Teacher

Comment: Dear Members of the House Committee on Agriculture:

As you prepare to write and vote on the farm bill, I ask you emphatically to preserve current funding for the Food Stamp program. Although I recognize the need to balance the budget and reduce the deficit, I implore you not to do so by cutting this most vital program to combat the problem of hunger in the United States. A recent study indicates that the Food Stamp program is preventing millions of Americans from falling below the poverty level. With a record number of Americans currently in poverty, I strongly urge you to protect this vital food assistance for some of our most needy and vulnerable Americans. Thank you for considering my opinion.

COMMENT OF JANE WURM

Date Submitted: Friday, May 18, 2012, 9:54 p.m.

City, State: New Bedford, MA

Occupation: Unemployed USPS Mail Carrier

Comment: I live surrounded by small farms (dairy, produce, cattle and poultry.) Most of them use limited to no chemicals; maintaining and improving the land they occupy. Having a source of nutrient dense **Wholesome** food so close to home benefits me, my family and the community in countless ways. These farmers need all the help they can get to survive against the **Huge** agribusinesses that receive WAY more government help than they need. The **Health** of our citizens is dependent on real food, from real farms that use sustainable agricultural practices. Invest in our small farmers now, save **Billions** on health care costs later. The savings to the environment in carbon terms is incredible. (My food is from a few miles away, not shipped from the other side of the world)

Our local farmers help the community all they can: helping urban farmers grow crops on reclaimed vacant lots, helping volunteers grow tons and tons of food for our low income families, *etc.* Local farmers truly pay it forward. So I ask you to please support our small local farmers through a fair and generous farm bill. The health and future of this country depends on it. Thank you so much for all your hard work!

JANE WURM; Age: 56 on **No** medications, only see my Dr. for yearly check up. Probably due to eating healthy local food.

COMMENT OF JAMES WURSTER

Date Submitted: Sunday, May 20, 2012, 6:36 a.m.

City, State: Springfield, PA

Occupation: Sr. Software Engineer

Comment: Farmers serve an extremely important role in our society—they help feed us. They are sometimes valued much less than what they are worth, much like teachers. We need to help them in every way we can to help them survive and so help us all survive.

COMMENT OF KATHERINE WUTHRICH

Date Submitted: Friday, May 18, 2012, 1:43 p.m.

City, State: Chicago, IL

Occupation: Mother and Grandmother

Comment: We need to cut farm subsidies and keep funding for organic and new beginning farmers. This is the way we can combat obesity and sickness. Many years ago we did not distinguish or food by organic and non-organic. It was all the same and pretty healthy. **Cut The Entitlements To Farm Subsidies!** Why are you against giving seniors and the poor what they are entitled to, yet you have no problem subsidizing the big farmers? **Stop It!**

COMMENT OF JEFFREY WYATT

Date Submitted: Saturday, May 19, 2012, 1:07 a.m.

City, State: Fairfield, CA

Occupation: Food Service

Comment: Organic and non-toxic farming techniques provide the best defense against major disease and pest infestation without considering the potentially harmful effects caused by consumption of pesticides and genetically modified foods. If we forced disclosure of the potentially harmful methods some of the fruits and vegetables are being cultivated with, the market demand for non-toxic fruits and vegetables would take care of the rest, benefiting the economy and the health of those who have been or will be affected by consumption of foods that contain toxic substances.

COMMENT OF BRYAN WYBERG

Date Submitted: Saturday, May 19, 2012, 4:24 p.m.

City, State: Coon Rapids, MN

Occupation: Engineering

Comment: Provide sound and robust funding for voluntary conservation programs. An investment in farm bill conservation delivers positive outcomes that benefit everyone. Protecting soil and enhancing water quality are long-term investments in food security and health that ultimately act as cost-saving measures as well as an economic stimulus. Prioritize the Conservation Title by funding it at the current baseline average of \$6 billion a year.

Re-establish the stewardship compact that ensures basic soil and water conservation on American farmland receiving farm bill subsidies. The Federal crop insurance program has evolved to become the largest farm bill subsidy provided to agricultural producers. Subsidizing risk can create an incentive for taking serious risks with our natural resources. Re-attach the same basic stewardship obligations that apply to other farm bill subsidies (provisions known as “Conservation Compliance”) to combat unintended destructive consequences of taxpayer-subsidized crop insurance.

COMMENT OF NANCY WYLAND

Date Submitted: Friday, May 18, 2012, 10:10 a.m.

City, State: Coralville, IA

Occupation: Environmental Health Research Administration

Comment: It is critical that we maintain incentives for farmers to use conservation practices on Iowa land. If we do not take steps to conserve our most valuable natural resource, our cropland, we are not protecting our economic and environmental health interests. It's as simple as that. Without incentives, some farmers or farming operations may be tempted to forgo best practices in the interest of increasing yields and profits. We cannot afford to exploit the land in ways that lead to environmental degradation: soil erosion, destruction of natural prairies and wetlands that are critical to the survival of native species and the eco-balance in this region. Please protect these elements of the farm bill which look out for the long term sustainability of our land and the life upon it.

COMMENT OF LOIS WYMAN

Date Submitted: Thursday, May 17, 2012, 10:18 a.m.

City, State: Union, MO

Occupation: Land Owner

Comment: We own a farm in Mo. and used a conservation easement to protect the land from future development . . . this would not have been possible without the tax abatement in the farm bill . . . please keep the incentives.

LOIS WYMAN.

JOINT COMMENT OF PHILLIP & HANNAH WYMOLA

Date Submitted: Saturday, March 24, 2012, 8:05 p.m.

City, State: Bryan, TX

Occupation: Stockroom Manager at a State University

Comment: I encourage you to support food programs for people who do not earn enough to feed themselves. Our family has been eligible for reduced price school lunches and probably other programs, but we have not used them. I believe the eligibility requirements should be adjusted, but I want the programs there if we really need them in the future.

May God bless us.

COMMENT OF STEVEANNA WYNN

Date Submitted: Wednesday, May 16, 2012, 8:48 a.m.

City, State: Philadelphia, PA

Occupation: Executive Director

Comment:

1. Feeding our neighbors is a public-private partnership, and that you are doing your part and you want our government to do its part.
2. Cutting anti-hunger programs will increase hunger in America, as well as the associated health care, educational, and economic costs of food insecurity and poor nutrition.
3. Remember the families who are struggling in our community, and urge them to protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization.

COMMENT OF PEEDEE WYRE

Date Submitted: Friday, May 18, 2012, 7:39 p.m.

City, State: Oakland, CA

Occupation: Retired

Comment: As a Vietnam vet with "Agent Orange cancer," I would **Love** to see all herbicides, pesticides. *etc.*, done away with; and for AgriBiz to find ways to work **With** Nature, not against it.

Remember: if it kills earthworms, it's not good for humans. ***Etc., Etc., Etc.***

COMMENT OF MARY XAKELLIS-CHAPMAN

Date Submitted: Friday, May 18, 2012 4:18 p.m.

City, State: Greenbelt, MD

Occupation: Retired

Comment: Factory farming is unsustainable. So is the massive use of chemicals which poison the Earth and the water. It is a legal form of fraud to have large areas untilled land under the guise of working farms and being paid to keep the acreage out of circulation. That this is allowed implies that are legislators are not operating for the common good, but for wealthy constituents.

COMMENT OF ZITA XAVIER

Date Submitted: Friday, May 18, 2012, 1:46 p.m.

City, State: Bayfield, CO

Producer/Non-producer: Producer

Type: Field Crops, Fruits, Vegetables

Size: Less than 50 acres

Comment: It's time for an ag bill that supports sustainable agriculture and small farmers and takes away subsidies for mass chemical soil destroying farming. Please support a progressive farm bill that supports small farms like ours and resilience through local sustainable farms.

COMMENT OF SANGITA YADAV

Date Submitted: Friday, May 18, 2012, 1:00 p.m.

City, State: Germantown, TN

Occupation: Mother and Consultant

Comment: The Ag Committee needs to not only consider the economic interests of big-Ag but also the effects of this industrialized food systems that is costing us more in terms of our health, our environment—polluted air, increased use of water as well as degraded land when the long-term outlook if we are to continue on the same path looks very dire for all these natural resources. I hope the farm policy is based on all our interests, each citizen, and is holistic in its approach as we are in need of sustainable solutions not a stock market short-term approach which has shown to be problematic.

COMMENT OF ARTEMAS YAFFE

Date Submitted: Saturday, May 19, 2012, 2:09 a.m.

City, State: Redwood City, CA

Occupation: Health Educator

Comment: An Agriculture Bill must be passed which protects both the agriculture workers and the public which eats the food or end product. Avoiding dangerous pesticides & practices are foundational. Also, not allowing Monsanto or others control of the food round the world. Be wise, think and decide with wisdom and foresight.

Thank you,

ARTEMAS YAFFE.

COMMENT OF TOM YAHNKE, SR.

Date Submitted: Sunday, May 20, 2012, 2:38 p.m.

City, State: St. Louis, MO

Occupation: Retired Businessman and Educator

Comment: I would like to see fair labor. I would like to see genetic modified food and components identified. I would like to see organic farmers have a better chance. I would like to see all subsidies carefully reevaluated.

COMMENT OF LYDIA YAMAGUCHI

Date Submitted: Wednesday, May 02, 2012, 4:59 p.m.

City, State: Long Beach, CA

Occupation: Student

Comment: As a citizen and student who is concerned about the future of United States Agriculture, I strongly advocate that the House Committee on Agriculture and the United States Congress keep smaller farm operations in consideration during deliberations over the farm bill. Small farming operations are economically, culturally and historically an integral part of our country's agricultural landscape and their needs should not be pushed to the side in the face of large agribusinesses and other interests. I would like to recommend that within the farm bill you have structures and supports to help assure that agricultural policy is not biased against small farming operations, in order to make sure that they are economically viable. In this way we can maintain a diverse agricultural landscape, support the American people, encourage local connections through agriculture, and make our agricultural communities places that people will be proud of in the future.

COMMENT OF KYO YAMASHIRO

Date Submitted: Friday, May 18, 2012, 2:13 p.m.

City, State: Santa Monica, CA

Occupation: Researcher

Comment: First and foremost, the priority of a new farm bill should be the safety and wholesomeness of our foods. We do not know enough about the effects of GMO products on our long-term health and the ecosystem. In the absence of eliminating or limiting the use of GMOs, we should at the very least be transparent about GMO products and label such products so that consumers are aware of what they are purchasing and putting into their children's and families' bodies. We should have the right to choose and we should have adequate information to make such a choice.

COMMENT OF REV. M. YANISH

Date Submitted: Friday, May 18, 2012, 3:01 p.m.

City, State: Katonah, NY

Occupation: Retail Store Owner

Comment: It is time for a return to sanity in our governments' support for healthy farming. Corporate agribusiness clearly does not have the public's health in mind with their practices. Our representatives need to stop giving in to those that are destroying our health, our environment and our humanity. It is time to represent the greater good, not corporate influence. Talk is cheap, action is priceless and our health is at increasingly at risk.

COMMENT OF FINN YARBROUGH

Date Submitted: Friday, May 18, 2012, 12:39 p.m.

City, State: Ferrisburgh, VT

Producer/Non-producer: Producer

Type: Livestock

Size: Less than 50 acres

Comment: Meaningful financial reform in the agricultural sector will mean gradually cutting out the subsidy props that support high-input means of production. Yes, this will mean that the price of some kinds of food on the shelves will appear to rise. But the true burden on the taxpayer remains the same, or even improves over time as our food system becomes more sustainable and a higher number of American farmers have access to reasonable profit margins without the need for government intervention.

COMMENT OF ERIN YARROBINO

Date Submitted: Saturday, May 19, 2012, 5:53 a.m.

City, State: Ozone Park, NY

Occupation: Unemployed

Comment: Farmers should be given protection about the crops they harvest, and should be given fair wages too. Farm policy must protect farmers and the crops and all animals on the farm from pesticides and Toxins.

COMMENT OF SHARON YATES

Date Submitted: Saturday, May 12, 2012, 8:00 a.m.

City, State: Brooklyn, NY

Occupation: Retired

Comment: We need to stop the enormous subsidies to Factory farms that essentially raise animal feed. These are monocultures that are environmentally disastrous and economically unsustainable. Instead, we should be supporting small local farms which grow a greater variety of crops, provide a place for the next generation of farmers to begin their careers, and which ensure that fresh local organic produce will be available nationwide without having to ship it from all over the world.

COMMENT OF VIRGINIA YATES

Date Submitted: Wednesday, May 09, 2012, 5:54 p.m.

City, State: Stafford, VA

Occupation: Sales Associate

Comment: Please don't support this bill that would undermine the stability of the poorest people in our country! So many people have to rely on SNAP programs *etc.* and if you cut down those programs it will affect the community negatively.

COMMENT OF ALEJANDRA YEE

Date Submitted: Friday, May 18, 2012, 2:23 p.m.

City, State: Raeford, NC

Occupation: Homemaker

Comment: Support organic farming! Don't give in to Big Ag (Monsanto) and their bullying. Stop subsidizing wheat and corn which makes processed foods cheaper. Our nation's health is heading into collapse with obesity and diabetes on the rise! Do the right thing for yourself and the nation!

COMMENT OF JEFF YOCHEs

Date Submitted: Friday, May 18, 2012, 12:19 p.m.
City, State: New York, NY
Occupation: Sustainable Designer
Comment: Support small farms! Create jobs by support and nurturing the farm community we need food grown by people, not machines and industrial processes.

COMMENT OF DAVID YODER

Date Submitted: Sunday, May 20, 2012, 1:24 p.m.
City, State: Chattanooga, TN
Occupation: Insurance Sales
Comment: It's time to end agricultural subsidies to industrial farms. These funds should be re-allocated to small farms. Specifically, funds should be used to help modernize equipment/technology, convert to organic, or diversify crops.

COMMENT OF JAC YON

Date Submitted: Friday, May 18, 2012, 2:03 p.m.
City, State: Spring Branch, TX
Occupation: Retired
Comment: If we want to lower the cost of health care in this country, we need to slow its demand. Improving nutrition is a huge step toward this goal. Increasing organic whole foods reduces the stress chemicals fertilizer and pesticides add to our bodies, thus promoting a stronger immune system to naturally battle disease. Our farm bill must help consumers choose better food that's organic. Doing so will lower the cost of health care . . . allowing consumers to increase prosperity . . . while improving their quality of life. If you want to reduce government debt, and improve the quality of citizens' lives, then vote to help make organic whole foods more available. Thank you.

COMMENT OF YUKI YOSHIDA

Date Submitted: Friday, May 18, 2012, 9:59 a.m.
City, State: Urbana, IL
Occupation: Student in Natural Resources
Comment: The evidence is clear that the subsidies for large-scale, mono-culture farming is doing more harm than good. I also hope that you will consider designing a bill that gives farmers a stable security that does not require them to "get big or get out."
 Thank you.

COMMENT OF ANDREA YOUNESS

Date Submitted: Saturday, May 19, 2012, 5:43 a.m.
City, State: Tampa, FL
Occupation: Massage Therapist
Comment: Please help create **Real** reform where the small organic farmer isn't bulldozed over by huge agricultural monopolies and forced to destroy the Earth's delicate balance by using chemicals to prepare the soil. We need to come together for real and sustainable farming. I would **Love** to see a realistic Organic Farm Bill put to work and supported by our government. Believe it or not, some of us aren't governed by the all mighty dollar and actually care about the foods we put into our mouths and how that food was grown.

COMMENT OF ANNE YOUNG

Date Submitted: Friday, May 18, 2012, 8:00 p.m.
City, State: Revere, PA
Occupation: Executive Assistant
Comment: The big problem of child obesity should be proof that we are subsidizing the wrong foods. Please end funding for corn and soybeans and increase funding for fruits and vegetables. I support H.R. 3236 and H.R. 3286.
 Thank you,
 Ms. ANNE YOUNG.

COMMENT OF CAROL YOUNG

Date Submitted: Friday, May 18, 2012, 12:44 p.m.

City, State: Port St. Lucie, FL

Occupation: Nurse

Comment: Our agricultural products must be kept safe for human consumption. We need to be aware of all genetically engineered food by labels. We need to protect family farms from being bullied and overruled by big money corporate farming corps. So many areas of life are affected by corruption and greed, we need to protect our food. We all need to eat to stay alive and we must stand up for safe food supplies.

COMMENT OF CATHERINE YOUNG

Date Submitted: Friday, May 18, 2012, 2:25 p.m.

City, State: Stroudsburg, PA

Occupation: Career Counselor

Comment: I believe that U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of its citizens, the land and the livelihood of farmers and farm workers over the interests of industrial agriculture lobbyists.

I support:

- (1) The full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- (2) Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- (3) The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- (4) Maintaining the EQIP Organic Initiative.

COMMENT OF JENNIFER YOUNG

City, State: Waterloo, IA

Occupation: Social Worker

Comment: Food insecurity should not be part of the literal Land of Plenty. Nourishment should be affordable and easy to find. Not a privilege for only a few. It's really a shame American farmer's farm to feed animals not the American people.

COMMENT OF JULIE YOUNG

Date Submitted: Saturday, May 19, 2012, 9:53 a.m.

City, State: Golden, CO

Occupation: Substance Abuse Counselor

Comment: Please support the programs we need for TANF and SNAP. Many of the families I work with every day cannot survive without them. Large agribusinesses should not be included in any agriculture subsidies. They do not need government subsidies intended to help family farms. Our environment is being polluted with chemicals from pesticides and fertilizers used in farming. Organic farming helps the environment through the safe farming practices in the EQIP Organic Initiative. I support the full funding of the Conservation Stewardship Program and believe that any new farm insurance programs should comply with its guidelines. I also support the Beginning Farmer and Rancher Opportunity Act (H.R. 3236) as an important tool in encouraging new farmers.

We need to reduce the cost of transportation and energy required to move food long distances from where it is grown by encouraging food grown locally. I support the provisions contained in the Local Foods, Farms and Jobs Act (H.R. 3286).

COMMENT OF KRISTOFER YOUNG

Date Submitted: Friday, May 18, 2012, 1:58 p.m.

City, State: Ojai, CA

Occupation: Doctor of Chiropractic

Comment: The farm bill has historically subsidized crops that are now clearly known to cause obesity and chronic illness. We need a big change! We need to support the production of vegetables and fruits that are scientifically proven to improve health, and combat disease.

COMMENT OF MARC YOUNG

City, State: Sealy, TX

Producer/Non-producer: Producer

Type: Livestock

Size: 50–150 acres

Comment: Crop Insurance is an essential.

Must keep Farm Service Agencies in each county that has agriculture. Consolidation must be more than a just a prescriptive “X” number of miles apart. Consolidation reduces a counties say when the number on the Local Committee has to be prated. Bigger area should have a bigger number of representatives. Areas that are being consolidated, if consolidation must happen should be areas of common types of ag production. Rice Farming areas should be consolidated with Rice Farming Areas not with Cattle and Corn, Cotton and Milo areas. (Waller Co. with Harris and Montgomery, not Waller and Austin Co.)

Conservation and Wildlife subsidies while desirable are not as critical as crop subsidies. Low Cost Housing is not Agricultural related. No preference should be given to anyone on the basis of race, age, sex, creed or national origin.

Programs should be moved to the state level and consolidated with state programs to reduce costs. Shift tax collection to the states.

COMMENT OF MATTHEW YOUNG

Date Submitted: Friday, May 18, 2012, 8:08 p.m.

City, State: Lake Forest, CA

Occupation: Student and Teaching

Comment: Please support a farm bill that pushes our country in the direction of encouraging and investing in healthier, higher quality food, with proper funding for organic, local, and sustainable agriculture. **Do Not** cut funding to vital programs such as nutrition, conservation and support for organic and sustainable agriculture. This would be a mistake and would put you on the wrong side of history. Agriculture and food politics is one of the next frontiers in political reform, and the direction in which the world, the nation, and local communities are moving is toward higher sustainability, organic farming, and increased implementation of cutting edge nutritional research into our dietary and agricultural economies. Good farming policy considers environmental, health, and local economy concerns. Thank you.

COMMENT OF S. YOUNG

Date Submitted: Friday, May 18, 2012, 1:35 p.m.

City, State: Gainesville, FL

Occupation: Administrator for Aviation Leasing Company

Comment: Please support local sustainable agriculture and organic agriculture in the farm bill.

We desperately need to support our local farmers and ranchers to help avoid food riots in case the transportation grid goes down, which it could far too easily do should the Middle East erupt in war and the military seizes all sources of fuel.

We also desperately need to support organic agriculture, as scientific studies have shown that all the chemicals and additives in our non-organic food supply have actually decreased its nutritional value to the point of barely offering any nutrition at all.

Good nutrition is the heart of maintaining a healthy happy productive America, which is vital to the short- and long-term success of America.

Big Corporate AgriBusiness does **Not** need any subsidies nor unfair marketing support. The small local farmers and ranchers, however, critically need support.

Local farmers and ranchers are vital to providing food to communities in event of Middle East war, which is beginning to look more and more likely.

Please do your best to help ensure local farmers and ranchers, and organic farmers, are well enabled to stay in business and to succeed, in order to protect America's health and ability to succeed and to grow despite overseas turmoil.

Thank you.

COMMENT OF SHARON YOUNG

Date Submitted: Friday, May 18, 2012, 9:28 p.m.

City, State: Sykesville, MD

Occupation: Retired Federal Employee

Comment: Roscoe,

Due To My Medical Conditions I Have Found That Organically-Grown, Non-GMO Foods Are Better For My Health Than "Big Agri-Business" Produced Foods. These wholesome foods have actually kept me from being one of those **Burdensome** patients for the nation's medical facilities.

It Is Simply Silly To Reduce \$4 million from organic research funding and cut funding to support Beginning Farmers in half. Especially at a time when **Science (Yep, There's That Word Again) Clearly** indicates that organically grown, **Whole** foods are one of the **Keys** to reducing **Obesity** in this nation.

So, **In The Public Interest**, Roscoe, here's what I'd like to see you do:

1. fully endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
2. Fully fund conservation programs, such as the Conservation Stewardship Program, and make sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
3. Implement of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
4. Maintaining the EQIP Organic Initiative.

Roscoe, please remember that as one of your constituents **And** a taxpayer I am also your employer.

Thank You For Your Time.

COMMENT OF THOMAS YOUNG

Date Submitted: Sunday, May 13, 2012, 4:50 p.m.

City, State: Seattle, WA

Producer/Non-producer: Producer

Type: Specialty Crops

Size: Less than 50 acres

Comment: As a small, young organic farmer we have found that it is nearly impossible to earn enough money farming, which is a very low-income profession, to purchase the major input required for farming: land. We would love to see the new farm bill provide support for new farmers to access farmland at affordable prices that are not subject to the vagaries of speculation by the real estate market.

We also are concerned about the general inability of most farmers to afford health insurance, despite the fact that farming is an inherently dangerous profession. Unaffordable costs associated with health care are one of the top reasons that many farmers end up having to sell their land and go out of business. Any provisions which make health care more affordable to farmers would be widely hailed as a tremendous benefit to low-income farmers.

Finally, I would like to see programs that increase the access and affordability of locally grown produce for low-income consumers. Numerous studies have shown that low income families tend to eat less healthy diets high in processed corn and soy ingredients (which are heavily subsidized) rather than whole foods. As a consequence, these families suffer higher rates of obesity, heart disease, and type II diabetes, and they are often uninsured, further taxing our health care system. By increasing the availability of healthy, high nutrient, locally grown produce to low-income families, we will begin to address the myriad health problems associated with poor diets in America and support local agricultural producers, thereby creating stronger, healthier, and more resilient communities.

COMMENT OF CAROL LOU YOUNG-HOLT

Comment: We need to cut back on the number of herbicides and pesticides used on crops. this will keep the farm workers safe and our food healthier. We also need to cut back on the amount of GM Corn/soy/cotton/canola grown.

COMMENT OF CAROLYN ZEZIMA

Date Submitted: Friday, May 18, 2012, 9:50 a.m.

City, State: New York, NY

Occupation: Director of Nonprofit

Comment: Please think about the importance of "real" food, vegetables and fruits, local economies and nutrition programs. Please start abandoning the emphasis on commodities and processed foods. This is our children's future—please don't make it worse. The farming of the last 40 years has got to move on to healthier, sustaining, soil-building methods.

COMMENT OF ADRIENNE ZHANG

Date Submitted: Friday, May 18, 2012, 1:59 p.m.

City, State: Hamel, MN

Occupation: Registered Nurse

Comment: Please help stop the obesity epidemic, as well as many other health problems, by shifting support to non-GMO growers, and more fruit and vegetable production than grain production. I believe we are only beginning to see the adverse affects of high pest control and GMO use and will continue to feel them for decades to come . . . just like we have with DDT use. Help us stop experimenting on the public and take a more conservative approach that food is **Not** safe until proven so, as opposed to the FDA's current approach that it is not dangerous until proven so.

COMMENT OF JACQUELINE ZIEGLER

Date Submitted: Friday, May 18, 2012, 5:27 p.m.

City, State: Plymouth, WI

Occupation: Minister

Comment: It is time to support small family farmers who want to grow food and raise animals in sustainable and organic agriculture methods.

The public has a right to want this; we are saying that it is important to us **And** to the land, water, air—to allow small family farms to provide people with local and healthy food. As we contribute with our taxes to the paying for the subsidies in the farm bill, we have a right to demand our requests be honored.

COMMENT OF BARBARA ZIEK

Date Submitted: Friday, May 18, 2012, 11:57 p.m.**City, State:** Colorado Springs, CO**Producer/Non-producer:** Producer**Type:** Other**Size:** Less than 50 acres

Comment: Grow a spine, congress! Stand up and do what you know is right. Revamp the farm bill so that it works for real food producers—organic farmers and the like—and for the food consumers of this nation. That would be all of us, even you, congress person. Push back against the big chemical/agriculture corporations' lobbyists even if they did give you money. Do something completely different for a change. Support the small farmer who grows diverse species of fruits, veggies and grains. In that way, you will support good health for American food consumers. Sorry, but a diet of Froot Loops, Twinkies, pizza, French fries and Coke does not build good health, and, via their GMO ingredients, these foods are usually subsidized. Subsidize the small farmer who produces real food, wholesome vegetables, fruits and grains, not corporations who contribute genetically modified ingredients to the food-like substances that parade as food in our country today.

Now, I do understand that the FDA, the USDA, Monsanto, Cargill et al., are simply different arms of the same entity and that their interest is in making profits—especially wealth for themselves. And I do realize they push you hard for generous subsidies. However, it is time that the farm subsidies work in favor of consumers and in favor of the small farmers who produce real food—lots of vegetables, fruits and whole grains as well as meat and dairy that is humanely raised on diets natural to their species without the use of routine antibiotics and GMO grain.

Where will the money come from? Immediately drop **All** subsidies for producers of genetically modified food unless genetically modified food is accurately labeled for the consumer. The corporations will whine and whimper and cry foul. But you will not be adding regulations. You will not be adding taxes. You will simply be asking those companies to stand on their own feet instead of riding on the tax payers' backs.

Split the current subsidy pot two ways: farmers who raise organic food and the food consumers. If GMO producers suddenly overcome their aversion to labeling, give those chemical/agricultural corporations that get subsidies now up to 1/3 of the pot, with the stipulation that the subsidies must first go to developing and implementing ways of preventing their crops from spreading uninvited to neighboring fields. Other corporate subsidy money should be spent doing rigorous testing on GMOs by independent researchers.

Why subsidize the small farmers and organic growers? It will help lower the prices of nutritious whole food which will encourage people to buy and eat this good food. Raising these subsidies and lowering GMO ag-corp subsidies will make real whole food more competitively priced with processed food-like substances. People will buy more healthy food. A healthy diet = healthier citizens = potentially lower medical bills, especially bills related to obesity and obesity related diseases such as diabetes and heart disease. Hmmm. I think I heard somewhere that skyrocketing 'health' care bills could bankrupt this country in the few decades . . . Ah, yes, congress person, what one puts in one's body is often related to how much one puts in the local hospital's coffers. By legislating for healthier whole foods, you will at the very same time and at no added expense, legislate for healthier human citizens. Healthier human citizens have fewer medical bills. This could help offset the terrible national medical expense. Healthier human citizens are more productive on the job. Gee, isn't productivity on the job an issue? Isn't the pentagon a bit worried about finding healthy recruits? **Feed The Nation Healthy Food, Real Whole Food, For A Change!** You have the power to do that by restructuring farm subsidies and passing other health promoting legislation, congress person!

I suggested subsidizing food consumers. In the farm bill? Why in the world do that? Almost two generations have grown up with processed food ads as their nutritional 'experts' and guides. Home economics courses were dropped from schools long ago to save the schools money. People, especially young people, need to be retrained about what to eat and how to prepare food. They have been trained by expert corporate marketers to consume disease promoting junk. They know nothing about real nutrition or healthy preparation of food. They don't know that eating a diet of highly processed crap brings them the misery of diabetes, heart attacks and obesity. Who is going to teach them? No one, unless Uncle Sam steps in. Big food corporations are not going to stop spewing their nutritional nonsense on TV. The advertising arms of food interests have shown without a doubt that they cannot be trusted to do that. I started teaching in 1970. I witnessed firsthand the change in my

students' diets over the decades. I watched with great frustration the decreased learning abilities of increasing numbers of kids—kids who eat Twinkies for breakfast and come to school with their Pepsi in hand, then eat pizza and fries for lunch every day. Garbage in; garbage out.

So how would subsidizes to help consumers work? Subsidize supermarkets in food deserts. Subsidize food stamps so that they will pay 2 for 1 when spent on whole grains, vegetables and fruits and organic meat and dairy. Hold classes about fresh food preparation and cooking in the supermarkets and subsidize that. Send those consumers home with food necessary to cook the meal they just learned about. Subsidize that. Use some of that money to advertise fresh veggies and whole grains to kids to help combat the endless promoting of health destroying junk food that they watch on TV. Use some of that GMO subsidy money to teach people, especially kids, to grow community gardens in the cities. Kids who grow food, kids who prepare food, are likely to eat it—even if it's broccoli. Kids who eat lots of carrots and spinach and yes, broccoli, are healthier and learn better than kids who eat lots of processed cake, soda and chips.

This reallocating of subsidies will support small farmers and food businesses as well as food consumers and will send a strong message to big chemical/agricultural corporations that this nation is truly about supporting its farmers and its food consumers (that's us—we all eat). You will be saying that you are not going to be spending our hard earned tax dollars supporting the disgusting health-destroying charade that masquerades as our food supply system today.

In addition to reallocating farm subsidies, support H.R. 3236 and H.R. 3286. Fully fund conservation programs such as the Conservation Stewardship Program. Maintain the EQIP Organic Initiative.

Stand up to your corporate controllers, congress person! Stand up for the **People** of this country! It is actually patriotic to work for the good of the country! Stand up, congress person! Be a human American working for other human Americans, for a change.

If you are that rare Congress Person who does work for the people of this country and their health and well being, thank you! Please pass this along to a congress person who needs a little reminder. If you are a congress person who needs a reminder to work on a farm bill that benefits the producers of real, whole foods and benefits food consumers, **Get Your Ass In Gear And Pass A Farm Bill That Will Help Producers Of Organic Food And Help Americans Get Healthy.**

The farm bill may be the most important bill you pass. Yes, the farm bill affects those who produce the food we eat. It also directly affects the health of our citizens. You have it in your power to do something about that, congress person. Do you have the courage it will take to fly in the face of these corporate citizens who like the status quo and want more?

The farm bill quite directly affects how well students learn. You have it in your power to do something about that. Do you really care about our kids? You either do or you don't.

The farm bill affects the military, and thus, our national security; recruiters say up to ¼ of applicants are too obese and unhealthy to be soldiers. Are you a true patriot? One who will stand up against corporate controllers, one who will stand up for real food reform in this country? They say the army moves on its stomach . . .

A major reason our young population is so unhealthy is the often subsidized GMO-containing food-like substances they do eat—and the real, whole foods they don't eat. You have in your power to do something about that. Are you man enough for the job?

Companies' expenses shoot through the roof with the outrageous cost of employee health benefits and employee absenteeism; a healthy workforce eats good, whole food. Health benefits for healthy employees cost less; healthy employees are more productive. You have it in your power to do something about that, congress person. Don't rubberstamp the farm bill, don't just tweak it and **Don't** give in to your controllers' demands for more subsidies and more unsavory leeway in getting their unhealthy products to market.

Trash the destructive parts of the old farm bill. Be willing to think outside the corporate box; don't be afraid to do something ingenious because it hasn't been done before. Pass a bill that supports good, whole food for America instead of supporting the disease-promoting crap that is so regularly presented to us as food. Use our tax money to support the growing of healthy food for America. Work for the human citizens who voted for you, not the corporate citizens who may have bought you.

COMMENT OF LINDA ZIGICH

Comment: Why not cut subsidies to farmers who do not farm on their land and support the organic and sustainable crops farmers that do? We need product, produce, and progress on this measure not profit for the few. Our food supply needs to be sustainable and abundant.

Please take action that insures us of that need. Thank you.

COMMENT OF ADAM ZIMMERMAN

Date Submitted: Thursday, May 17, 2012, 3:22 p.m.

City, State: Portland, OR

Occupation: Investor

Comment: Thank you for accepting comments on this important piece of legislation. The farm bill is our *de facto* policy for rural development in the U.S. It has long been a grab bag of subsidies and disconnected programs that prefers to funnel money into existing programs, often disregarding their efficacy, or ability to create real economic opportunities. Please consider increasing support to programs that catalyze rural business innovation, that support the development of a diverse small-business base in rural communities. That score proposals that offer living wage employment and small business generation higher than subsidies for factory farms that provide minimum wage jobs with little opportunity for advancement. Thank you.

COMMENT OF AUDREY ZIMMERMAN

Date Submitted: Friday, May 18, 2012, 9:42 a.m.

City, State: Cary, ME

Occupation: Educator

Comment: I think one of the most important jobs you have before you in the 2012 Farm bill is to decentralize the farm industry by moving farm policy toward greater support of small family farms (~100–1,000 acres), and smaller farms in general. This is critical to food security, food safety, and farming/environmental sustainability.

End subsidies for corn, which is fueling more ethanol than food production, and is responsible for the explosion in cheap corn syrup sweetener, which is debilitating the health of our people.

I think the link should be broken between food production and commodities/futures markets, which don't benefit farmers as much as Wall Street financiers.

- Support our fight against hunger by maintaining and strengthening critical nutrition programs in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;
- Provide an even “plowing” field by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- Support family farmers that really need help, not the biggest farms that don't: End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- Ensure that limited conservation funding maximizes lasting environmental benefits: Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

COMMENT OF CINDY ZIMMERMAN

Date Submitted: Friday, May 18, 2012, 8:18 p.m.

City, State: Palatine, IL

Occupation: Engineer

Comment: Stop farm subsidies on large scale farms. Encourage small scale farms which practice sustainable farming. Don't get provisions that help organic farming. Don't encourage CAFO animal production.

COMMENT OF JOAN ZIMMERMAN

Date Submitted: Saturday, May 19, 2012, 1:11 p.m.

City, State: Dearborn, MI

Occupation: Early Childhood Educator

Comment: It's tough for farmers to deal with uncertain weather, as well as big moneyed companies like Monsanto bullying farmers and producing "Frankenfoods" which will undoubtedly mean negative health effects to many consumers. Big industrialists need to know that we are all in this together! Our food safety is their food safety as well. I am old enough to remember the movie *Soylent Green* . . . Who knew at the time that that Charleton Heston film was a glimpse to the future of farming and farmers, and how we what people would have available to eat! How sad for all of us. Please! Stop the madness and save our farms and the farmers who work to feed America. Thank you!

COMMENT OF TRACEY ZINK

Date Submitted: Friday, May 18, 2012, 2:36 p.m.

City, State: Richmond, VA

Occupation: Public Relations Professional

Comment: I cannot stress enough how important it is to support organic farmers and organic farming practices in a time where we are being bombarded with chemicals from every direction. I practice a very healthy lifestyle eating fresh fruits and vegetables and exercising daily. Several years ago in my mid-30s I became ill and started gaining weight, losing muscle tone and contracted skin cancer and some odd muscle inflammations. I'm too young and shouldn't be having these issues so I've done a lot of research to find out what happened. I was predominantly eating kashi and non-organic (aka genetically modified GMO) vegetables and fruits. I believe the symptoms I had were a direct result of all the toxins I was unknowingly ingesting and a lack of nutrients in the food to bolster my immune system. In fact GMOs are polluting our environment as pesticide resistance increases and the runoff is getting into our air, our meat and our water supply. It's not a sustainable method of farming and logical observers should be able to make a common sense judgment that while these are not intentionally ill-meant farming practices, they are having a negative effect on the health of the general population in the United States as a whole. Since switching to completely organic foods, I have not had a recurrence of cancer or any of the other health issues that I was dealing with before. Other than that my lifestyle has not changed much. I don't ask that you make a judgment on GMOs at this time (as we would need to cite many studies and the questionable influence of former Monsanto employees in all the bureaucratic positions), but I do ask that you keep competition in farming practices fair and competitive so all Virginians will still have the opportunity to make their own choice on what they choose to eat. I urge you to support funding aimed towards organic farming and practices that are natural and do not use pesticides and additives. By increasing funding here you will not only help support sustainable practices in agriculture and local businesses that will maintain our agricultural landscape in Va., but also you'll be supporting Virginians right to choose foods that they feel are the best for their family and the environment. Please vote to increase funding to organic farmers and organic farming practices in this session's farm bill. Thank you for your serious consideration in this matter and for serving as the voice for our community.

COMMENT OF JEAN ZIRGER

Date Submitted: Friday, May 18, 2012, 2:34 p.m.

City, State: Mena, AR

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: This new farm bill must level the playing field upon which producers of any size compete in the marketplace. The unfettered free market will then decide how the profits get shared.

COMMENT OF VINCENT ZITO

Date Submitted: Friday, May 18, 2012, 12:43 p.m.

City, State: Concord, NH

Occupation: Electronics Technician

Comment: Our farm policy should promote organic farming, period. We need to remove forever the influence of agribusiness, GMO, and chemical industry special

interests from our agricultural policymaking. This will improve not only the health of our people, but the health of our democracy.

COMMENT OF MARC ZOCHER

Date Submitted: Friday, May 18, 2012, 1:00 p.m.

City, State: Bainbridge Island, WA

Producer/Non-producer: Producer

Type: Vegetables

Size: Less than 50 acres

Comment: As a small producer, I urge you to refocus the farm bill to match the grassroots movement away from factory farming, away from GMO crop support, and away from the corporate control of our food supply. In case you haven't noticed—if you don't fix it, we, the people, will. Please help us while you're still relevant in this discussion!

COMMENT OF CHETANAA ZOELLER

Date Submitted: Friday, May 18, 2012, 3:52 p.m.

City, State: Makawao, HI

Occupation: Realtor

Comment: Organic farming is the only way to really be sustainable and ensure that there will be a livable planet for many future generations . . . so please make sure you take that into account. GMO will create too many imbalances . . . it is not safe and needs to be abandoned now.

COMMENT OF HONZ ZONDORGH

Date Submitted: Friday, May 18, 2012, 5:35 p.m.

City, State: Tucson, AZ

Occupation: Retired Doctor

Comment: Please protect small organic farmers who help improve food quality and sustainable agriculture for benefit of our children and grandchildren. Thank you.

COMMENT OF GRETTA ZORN

Date Submitted: Friday, May 18, 2012, 5:09 p.m.

City, State: North Brunswick, NJ

Occupation: Retired Educator

Comment: Please consider the impact of the bill on the health of the land and of the citizens who consume the products of the land. Big agribusiness has held sway far too long, to the detriment of our health and environment.

COMMENT OF DEMETRIO P. ZOURARAKIS, PH.D., GISP, CMS

Date Submitted: Friday, May 18, 2012, 12:06 p.m.

City, State: Versailles, KY

Occupation: Geographic Information Systems Analyst

Comment: Dear Representative,

As a Fellow of the Soil and Water Conservation Society, and member of the SWCS Kentucky Bluegrass Chapter for the last 25 years, while holding a Ph.D. in Soil Science and Plant Physiology from the University of Kentucky, and living in a rural county such as Woodford, I can truly appreciate the value of the natural resources with which our county, state and country are blessed with. Please make sure you tie any subsidies to compliance with resource conservation programs. Our future and sustainability depends on it. I am not asking for higher taxes or more spending; just spending our dollars wisely to ensure future generations of Americans are able to produce their own food, fiber, feed, fuel, and pharmaceuticals from natural resource production systems.

Sincerely,

DEMETRIO P. ZOURARAKIS, PH.D., GISP, CMS,

[Redacted].

COMMENT OF ANNE ZUBER

Date Submitted: Friday, May 18, 2012, 3:12 p.m.

City, State: Sunnyvale, CA

Occupation: Natural Products Educator

Comment: Do everything you can to lead us to an America that shines among the healthiest countries in the world. There is no excuse for the way we have fallen short of this. Let us shine!

COMMENT OF ROBERT ZUCCHI

Date Submitted: Saturday, March 17, 2012, 12:40 a.m.

City, State: Corvallis, OR

Occupation: Retired

Comment: I'm aware that the majority of the funding in the farm bill goes to nutrition programs like Supplemental Nutritional Assistance and Emergency Food Assistance. These programs put food on the table for hungry kids, seniors and families. At a time of widespread economic hardship in our country, it is imperative that these programs continue to be adequately funded.

COMMENT OF PAM ZUCHOWSKI

Date Submitted: Friday, May 18, 2012, 6:57 p.m.

City, State: Wellsboro, PA

Occupation: Teacher

Comment: Let's end subsidies to corn and start putting our money toward organic initiatives. With a little government backing we can break the Monsanto monopoly!

COMMENT OF ISABEL ZUCKER

Date Submitted: Friday, May 18, 2012, 3:52 p.m.

City, State: Davis, CA

Occupation: Student

Comment: The farm bill needs to **Stop** subsidizing the production of corn. Corn leads to many health problems like diabetes and unequal access to healthy foods. Corn subsidies also contribute to the need for factory meat production to eat the overproduction of corn. The farm bill needs to support healthy produce like broccoli, spinach, carrots, squash, yams, oats, *etc.* to promote equal access to healthy, fresh produce and increase the well being of **The People**.

COMMENT OF RICHARD ZUCKERMAN

Date Submitted: Friday, May 18, 2012, 12:51 p.m.

City, State: New Brunswick, NJ

Occupation: Unemployed Paralegal

Comment:

- [1] Organic food;
- [2] No more Monsanto genetically-modified "food"! I want Genetically-modified food to be labeled for consumer choice. Monsanto can yell and scream about filing lawsuit, but they have no cause of action against anybody for requiring GM food to be labeled! A fully informed consumer is the best consumer.
- [3] Waste no more money on the growth hormone-feces-pus-blood laden pasteurized milk from Big Dairy agribusiness!
- [4] No more dangerous pesticides, including Monsanto's pesticides.
- [5] Supplement the soil with nutritional minerals.
- [6] Support Industrial Hemp farmers, too!

COMMENT OF MICHELE ZURAKOWSKI

Date Submitted: Friday, April 27, 2012, 12:56 p.m.

City, State: Oak Park, IL

Occupation: Food Pantry Executive Director

Comment: Every day at my job, I help provide food for people in our community who cannot afford to feed their families. Clients tell me they have to choose between buying food and paying for heat. Often, parents don't eat so they can feed their children. Please strengthen TEFAP funding so that we may continue to provide needed food for the 17,000 families who came to our Pantry in 2011. I also ask that you fight against any cuts to SNAP funding or eligibility requirements. If you could see what I see every day, you would never dream of cutting food supports.

COMMENT OF CHAD ZUYBER

Date Submitted: Friday, May 18, 2012, 5:24 p.m.**City, State:** Oceanside, CA**Occupation:** Photographer/Model

Comment: I am outraged by the lack of dedication and responsibility of our leaders in protecting our food sources. Many people do not have the resources to grow their own food and thus are unable to acquire quality nutritious foods. Others are simply ignorant and it is this ignorance that agribusiness capitalizes on. We have a growing concern for the future of the health of Americans and the best cure is prevention. Let's feed our people well and then we can grow and flourish as a nation.

Form Letters

CATHOLIC CAMPAIGN FOR HUMAN DEVELOPMENT FORM LETTER

Dear Representative,

As you consider the 2012 Farm Bill, I urge you to support and strengthen programs that provide for poor and hungry people in the United States and around the world, offer effective assistance for those who grow our food, ensure fairness to family farmers and ranchers, and promote stewardship of the land.

I believe the poor and hungry should be given priority as we deal with the Federal budget. Cuts to essential safety net programs will harm the most vulnerable children, seniors, people with disabilities and the unemployed. I also write as a supporter of the Catholics Confront Global Poverty initiative of Catholic Relief Services, United States Conference of Catholic Bishops, Catholic Charities USA, and the National Catholic Rural Life Conference. Those who struggle for food and survival, whether in the U.S. or overseas, have a moral claim on our nation's resources. I believe that in the face of budgetary constraints, the 2012 Farm Bill is an opportunity to address our nation's broken and outdated agricultural policies.

I urge you to strengthen the Senate's 2012 Farm Bill by incorporating the following changes into the House Farm Bill:

- Preserve funding for the Food for Peace development "safe box" at the current \$450 million authorized level rather than potentially slashing it to as little as \$275 million annually. This program assists chronically hungry people overseas to produce more and better food for their families and end hunger.
- Fully fund essential conservation programs such as the Conservation Stewardship Program (CSP), the Environmental Quality Incentives Program (EQIP), the Conservation Reserve Program (CRP), the Wetlands Reserve Program (WRP) and the Grassland Reserve Program (GRP) to promote stewardship of God's creation;
- Maintain funding for the Value-Added Producer grants, the Rural Micro-Entrepreneur Assistance Program (RMAP), and ensure access to broad-band telecommunications services for rural communities; and
- Redirect subsidies to small and medium-sized farms, especially minority-owned farms and ranches that truly need assistance. The Senate proposal to reduce direct payments is a positive step in decreasing unneeded subsidies. Savings from reductions in subsidies and direct payments should be used to fund and support domestic nutrition programs such as SNAP (formerly Food Stamps) and international food assistance programs such as Title II.

I also urge you to ensure that the following provisions in the Senate 2012 Farm Bill are included in the House Farm Bill:

- Adequately fund and oppose cuts and weakening or restructuring of the Supplemental Nutrition Assistance Program (SNAP) that would cut benefits to hungry and vulnerable people. Maintain funding for the Commodity Supplemental Food Program (CSFP) and The Emergency Food Assistance Program (TEFAP) so that people in need in the U.S. can obtain adequate and nutritious food;
- Maintain the \$2.5 billion funding levels for the Food for Peace program that combats chronic hunger, builds resilience against natural disasters and provides nutritious foods to poor and malnourished families overseas; and
- Maintain flexibility in Food for Peace, support the increased cash resources and incorporation of Local and Regional Procurement as proposed in the Senate bill so that more hungry people can be reached.

The moral measure of our nation's agriculture policies is how they serve "the least of these." Thank you for your consideration of these policies and programs that save

lives and improve nutrition, support family farmers and rural communities, and help preserve God's creation.

Sincerely,

Zebulon Bartels

FOOD DEMOCRACY NOW! FORM LETTER

U.S. food and agricultural policy must focus on adopting best agricultural practices that put the health of citizens, land and farmers' livelihoods and farm workers over the interests of industrial agriculture lobbyists. I would like to see:

- the full endorsement of all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).
- Fully funding conservation programs, such as the Conservation Stewardship Program, and making sure that enrollment in any new insurance subsidies are tied directly to compliance with conservation programs.
- The implementation of all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintaining the EQIP Organic Initiative.

Reports from Washington, D.C. about the farm bill negotiations have not been pretty. According to an editorial in the *San Francisco Chronicle* by Environmental Working Group's Ken Cook and Kari Hamerschlag, Republicans in the House Agricultural Committee have already "voted to slash \$33 billion from the food stamp program while leaving farm subsidies unscathed."

The editorial goes on to report on the latest agribusiness boondoggle that gladly steals food from the mouths of the hungry to create a "\$33 billion new entitlement program that guarantees the income of profitable farm businesses. That's on top of \$90 billion in subsidies for crop and revenue insurance policies."

If this weren't bad enough, the Senate Agricultural Committee has already **voted to cut \$4 million from organic research funding and cut funding to support Beginning Farmers in half. We cannot let this stand!**

At the same time, the Senate Ag Committee has voted to get rid of wasteful subsidy payments. It has proposed to replace it with a new subsidized insurance program that **leading sustainable agriculture advocates are calling rife with opportunities for fraud and abuse.**

While Congress is looking to get rid of direct payments to commodity farmers, the subsidized insurance program it proposes to replace it with **will allow giant commodity farmers and insurance companies to walk away with billions in taxpayer dollars while putting the land, soil and environment at greater risk.**

According to the National Sustainable Agriculture Coalition's Ferd Hoefner, "By failing to place limitations on crop insurance subsidies and to re-attach soil erosion and wetland conservation requirements to crop insurance programs, the Committee has failed to do the full reform that is needed."

We can't allow this to happen. Join us today in creating real reform and a healthy, organic future

LAND TRUST ALLIANCE FORM LETTER

- **Please support the Senate funding levels for Agricultural Land Easements**, which advance the proven model of leveraging Federal funds through local partners to secure perpetual conservation easements that help keep farm and ranch lands in production, while conserving important natural resources.
- **Restore the existing FRPP match formula** to encourage bargain sales and allow waivers of the match requirements for strategic projects.
- Restore language clarifying that the Federal Government is not acquiring a real property interest and has only a **“contingent right of enforcement.”**

NATIONAL SUSTAINABLE AGRICULTURE COALITION FORM LETTER

- **America needs a farm bill that creates jobs and spurs economic growth**—support programs like the Value-Added Producer Grants Program by guaranteeing \$30 million of mandatory funding per year. VAPG provides seed money to help farmers innovate in agriculture and create jobs while securing a sustainable path to market-based farm profitability.
- **America needs a farm bill that makes healthy food widely available to all Americans**—including schoolchildren! We must provide flexibility for states to use existing food procurement programs to purchase fresh, healthy food from local farmers and ranchers.
- **America needs a farm bill that protects our natural resources**—protect the Conservation Stewardship Program from unfair funding cuts, and improve it by ranking applications solely on their conservation benefits. Farmers count on CSP and other conservation programs to conserve soil for future generations, keep water and air clean, and create habitat for wildlife—all while farming profitably.
- **America needs a farm bill that invests in the next generation of farmers and ranchers**—guarantee \$25 million per year in mandatory funding for the Beginning Farmer and Rancher Development Program. We need a national strategy and commitment to support beginning farmer and ranchers entering agriculture. With an aging farm population, now is the time to invest in the future of American agriculture by nurturing new agriculture start-ups.
- **America needs a farm bill that drives innovation for tomorrow’s farmers and food entrepreneurs**—fund the Organic Agriculture Research and Extension Initiative at \$30 million per year in mandatory funding. Investment in agricultural research is vital to continued productivity and innovation in growing and diverse sectors of American agriculture, such as organic agriculture.

NATIONAL YOUNG FARMERS' COALITION FORM LETTER

Dear Chairman Lucas,

Thank you for the opportunity to submit testimony to the House Committee on Agriculture on the next farm bill. My district representative is being copied on this testimony. I am a **[fill in the blank]** and I'd like to share my support for programs that help the next generation of growers build strong farm businesses. As it's estimated that 125,000 farmers will retire in the next 5 years, it's absolutely critical that farm bill programs help citizens get started in this challenging field. I ask that

the Committee endorse all of the provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236), including:

- Mandatory funding for Individual Development Accounts at \$5 million per year. This program helps new farmers raise capital to start farm businesses and is tested and proven by organizations like Practical Farmers of Iowa and the California Farmlink.
- Mandatory funding for the Beginning Farmer and Rancher Development Program at \$25 million a year. This program funds essential education for new farmers around the country.
- Authorize a new microloan program, to enable young and beginning farmers to better access FSA loan programs.
- Revise FSA rules to make loan programs more accessible to more young and beginning farmers.
- Reaffirm the existing cost share differential for BFRs within EQIP. Also, reaffirm the advance payment option allowing beginning and socially disadvantaged producers to receive an advance payment for the project's costs for purchasing materials or contracting services, but increase the limit on the advance payment from 30 percent to 50 percent of costs.
- Amend the Farm and Ranch Land Protection Program (FRPP) to make farm viability part of the purpose of the program and to give discretionary authority to the eligible entities that implement the program to give priority to easements with an option to purchase at the agricultural use value, deals that transfer the land to beginning and farmers and ranchers, applicants with farm succession plans, and other similar mechanisms to maintain the affordability of protected land.

These and other provisions within the Beginning Farmer and Rancher Opportunity Act will help new growers succeed and I urge you to include them in the next farm bill.

Sincerely,

| | | |

ORGANIC FARMING RESEARCH FOUNDATION FORM LETTER

As a strong supporter of organic farming, I ask that you . . .

- Fully fund the Organic Research and Extension Initiative (OREI) at the 2008 level.
- Endorse all provisions of the Local Foods, Farms and Jobs Act (H.R. 3286).

- Support all provisions of the Beginning Farmer and Rancher Opportunity Act (H.R. 3236).
- Maintain EQIP Organic Initiative and do NOT cut the Conservation Stewardship Program.

PEACE AND JUSTICE COMMISSION OF THE CATHOLIC DIOCESE OF SALT LAKE CITY

The Peace and Justice Commission of the Catholic Diocese of Salt Lake City urges you to:

- (1) protect funding and structure for SNAP; efforts to block grant this important nutrition program will weaken our nation's response to hunger and increase food insecurity in at risk households, particularly those with young children, the elderly and the disabled;
- (2) create incentives for small farmers who grow fruits, vegetables and other specialty crops; and
- (3) adequately fund The Emergency Food Assistance Program (TEFAP) and make it more responsive to need; this program provides food banks and emergency food pantries with commodities and provides low-income households food.

SLOW FOOD USA FORM LETTER

As the committee considers the 2012 Food and Farm Bill, I urge you to:

- **Support our fight against hunger by maintaining and strengthening critical nutrition programs** in this time of unprecedented need. We must not solve our budget problems on the backs of those experiencing food insecurity, including our most vulnerable—our children, the elderly, and the disabled;
- **Provide an even “plowing” field** by fully funding programs that support beginning and socially disadvantaged farmers and ranchers, organic farming, regional farm and food economies, and rural development. We need more farmers and ranchers, more sustainable food production, and more economic opportunity in our food system;
- **Support family farmers that really need help, not the biggest farms that don't:** End subsidies (aka direct payments and countercyclical commodity programs), and replace them with loophole-free agriculture risk coverage. Additionally, implement a cap on crop insurance premium subsidies;
- **Ensure that limited conservation funding maximizes lasting environmental benefits:** Limit funds to Concentrated Animal Feeding Operations (CAFOs) for animal waste management infrastructure by eliminating the Environmental Quality Incentives Program (EQIP) Livestock Set-aside and protect the Conservation Stewardship Program (CSP) from disproportionate cuts, and improve it by ranking applications solely on their conservation benefits.

To the Members of the House Committee on Agriculture,

This was drafted by ten young farmers from Rhode Island and Massachusetts who met on 5/5/12 to discuss the 2012 Farm Bill and the kind of USDA funding we would like to see in the next 5 years.

I am a [fill in the blank] with hopes of soon becoming a farmer.

In general, I support the recommendations of NSAC and Food And Water Watch to increase funding for provisions and programs that promote sustainable agricultural production, fair and equitable treatment of farmers and farm workers, rural development and family farms, ecological diversity and environmental conservation.

Below are some suggestions that support these values within the 2012 Agriculture Reform, Food and Jobs Act. With scale-appropriate tiered regulation and support for new and beginning farmers, we can grow America towards a healthy and sustainable future.

I support, and want to applaud the Committees continued support of the following changes in the 2012 Farm Bill:

- Sen. Leahy's provision that would make it easier for SNAP to be used at farmers markets and CSAs.
- The \$5 million in research funding allocated for sustainable agriculture. This is a step in the right direction, but more should be allocated for local and sustainable agriculture research and education.

Please consider the following suggestions, which are crucial for America's future:

- Cap subsidy amounts on a per-farm basis and reinstate Microloans and Value-Added Grants, especially for beginning famers.
- Shift funding away from ethanol and commodity production and towards sustainable agriculture and rural development research and training in Title VI (Rural Development) and Title X (Horticulture and Organic Agriculture).
- Please reinstate mandatory funding for 2501 under Title XIV (Miscellaneous) in order to support disadvantaged farmers and continue the standing fund for farm worker disaster relief.
- Reinstate farm-to-school program funding under Title IV (Nutrition) in order to feed a healthy future population of Americans and support America's Family Farms.

- A large portion of funds under Title II (Conservation) supports reducing the environmental harms of CAFOs. We think a better system would be to regulate CAFOs and instate a punitive system that makes polluters pay, and shifts conservation dollars to support more sustainable operations.
- Remove loopholes from the Packers and Stockyards Act under Title XI (Livestock) that allow for abuse of livestock producers. This will help small farmers to get their product to market and receive a fair price that will let them stay in business.
- Although there has been a great deal of positive press regarding the shifts in Title I (Commodities) to reduce direct crop subsidy payments and shift towards crop insurance support, in reality the tax payer resources will be directed to the same large-scale, conventional production, monocrop operations, that have harmful environmental and social consequences. With no conservation requirements within the new Revenue Insurance Scheme we fear production will be pushed onto marginalized land causing adverse affects on our natural resources.

Thank you for considering our voices,

| | | |

Dear House Agriculture Committee:

Because of the important role farmer's play in our food system, taxpayers have supported a safety net for farmers for nearly 30 years, always in return for a guarantee that subsidized farmers will follow basic conservation practices in their fields. This revolved around the basic realization that while Americans needed food, it was critical to utilize conservation practices in order to preserve the economic viability and productivity of our farmlands and resources for the future.

As the House Agriculture Committee prepares its version of the farm bill, I urge you to restore the link between taxpayer-supported subsidies for crop insurance and conservation compliance protections that will protect the nation's water and land.

This action is especially important as Congress considers eliminating direct payments, the major subsidy program that is linked to conservation compliance, and moving some of those funds to support increased subsidies for crop insurance, which lacks compliance requirements. Unless you help to reconnect crop insurance subsidies to conservation compliance, a significant part of farmers' incentive to follow conservation plans will disappear this year.

Farmers need crop insurance as part of their safety net and the public needs basic conservation practices on farms to make sure that quality farm land and water can support future generations as well as the current needs of our country. We cannot accept sacrificing long-term economic and environmental sustainability for short-sighted and short-term economic profits.

Connecting eligibility for crop insurance subsidies to conservation compliance is fiscally responsible and ensures public subsidies for farmer's insurance premium payments align with the public's interest in basic conservation of our soil and water.

Sincerely,

| | | |

The sum of agricultural support from the Federal Government is immensely unbalanced. The current paradigm spends the vast majority of funds on supporting large scale grain based agriculture. The farm model created by these grain subsidies

is destroying the entrepreneurial farm industry, destroying the family farm, and handing the reigns of our food industry to mega corporations. The average age of farmers in this nation is swiftly approaching 60 years old. The next decade will find our food supply outsourced to other countries or taken over by corporate entities resulting in large scale monopolization of one of the three primary necessities for human life.

I urge the House Committee on Agriculture to re-align our nation's food and farming priorities in such a way that the playing field for small farm business is leveled. I urge the House Committee on Agriculture to re-align our nation's food and farming priorities in such a way that grain based food products such as high fructose corn syrup no longer beat healthful foods such as fruits, vegetables, and healthy meats on price point, primarily because they are subsidized by citizen tax dollars.

I urge the House Committee on Agriculture to re-align our nation's food and farming priorities in such a way that young U.S. Citizens find a government environment which encourages and assists them in starting up new farming ventures, rather than an environment filled with land-mine regulations which do nothing for the small farm business owner and everything for the large scale corporate agriculture.

In summation, I urge the House Committee on Agriculture to support the following amendments:

- Family Farms First and Training for Beginning Farmers—put forward by Senators Brown (D–OH) and Nelson (D–NE)
- Affordable Land for Farmers, Forever—put forward by Senator Leahy (D–VT)
- Non-GMO Plant and Animal Breeding—put forward by Senator Gillibrand (D–NY)
- Crop Insurance for Organics—put forward by Senator Casey (D–PA)
- Beginning Farmer and Rancher Opportunity Act—put forward by Congressman Walz (D–MN) and Congressman Fortenberry (R–NE)
- The Local Farms, Food, and Jobs Act—put forward by Congresswoman Pingree (D–ME) and Senator Brown (D–OH)

Thank you sincerely, for your time.

Gwenyth Hallet
Mark Hallet
William Hallet

Joel Hallet
Miriam Hallet
Amanda Piepenhagen

Loralei Hallet
Roger Hallet

We need a farm bill that helps the margins, not re-establishes the *status quo*. We need to create more jobs through agriculture, which involves more diversification and less oil-dependent methods—more real people doing work that they're compensated for fairly.

New policies ought to protect the productivity of agricultural lands by discouraging environmentally harmful practices—particularly when given crop insurance subsidies—and those crop insurance subsidies ought to be available to non-commodity growers too.

The Conservation Title has been making an impact—we've been seeing a reduction in erosion and wetland conversion, and that must be maintained (and not eroded, like current crop insurance encourages—to plant every last inch of acreage, environmentally sensitive or not). Please reform the crop insurance subsidy. Really, it shouldn't be outsourced like it currently is. The government and taxpayers should keep the massive incomes the insurance companies currently receive, and run it more efficiently and reinvest it into our economy.

Farming is a very hard business to get into and survive in, and a new farm bill should include policies that enable beginning and socially disadvantage producers to access land, credit, and crop insurance.

The farm bill can either uphold the *status quo*, or give support to new sustainable growth in our rural economies. Please work for new growth.

Thank you!

Jenifer Angerer

Theresa Carbrey

Laura Engel

Allison Gnade

On behalf of the at-risk families living in lower-income communities that suffer the consequences of poor access to affordable healthy food and nutritional education, we urge you to seize the immediate opportunity to directly impact the health of these residents, while also reducing their long-term cost burden to health care.

The farm bill legislation that will be considered by you for approval in 2012, with appropriate changes or enhancements, has the potential to impact childhood obesity,

diabetes and heart disease in areas identified as having poor access to affordable healthy food (food deserts). Diabetes affects an estimated 25.8 million U.S. adults—over eight percent of the population. Left untreated, diabetes can cause blindness and end stage renal disease. It also increases the risk of cardiovascular disease by two to four fold and is the seventh leading cause of death for Americans. The diabetes hospitalization rates in 2009 were 17.7 per 10,000 residents. Communities with poor to limited access to health care, as well as affordable healthy food and nutritional education are estimated to have three times the hospitalization rate of the entire population. In all of our communities the incidence of childhood obesity has increased, and lack of access to good nutrition have contributed to our national problems. Addressing childhood obesity through education and exposure to good nutrition practices will impact these staggering numbers and costs. Everyone wins—the individuals impacted by these chronic diseases, the communities they live in through the creation of a healthy, educated and productive population, and the cost of health care provided by Federal, state and local governments and employers too!

In addition to supporting the recommendations of your colleagues, I urge your support of an approved 2012 Farm Bill that ensures:

- education and financial support to generate growth and employment in the healthy food retail sector.
- incentives to preserve and increase regional healthy food production.
- funding for pilots that bring together community groups, schools, nonprofits and health care providers that focus on reducing childhood obesity and hospitalization related to diabetes.

Many of us involved in the health care arena are committed to partnering with our communities to improve access to affordable healthy food and the understanding of the role good nutrition plays in one's personal health. In fact, many organizations are already implementing healthy food programs for our patients, residents and staff. In short, we promise live out message we advocate in this letter.

We urge you to support the farm bill with the changes we have outlined.

Thank you for considering this request.

Sincerely,

Janice Burnett

I am writing to request your support for a progressive farm bill that increases access to healthy food for ALL Americans. Given that many of our neighbors are still facing dire economic circumstances, it is essential that Congress maintain SNAP funding.

A \$36 million cut to SNAP is not the way to go. The Committee should focus on writing a farm bill that creates economic opportunity and improves access to healthy, affordable food for all Americans. CFSC members had important wins in the Senate's Agriculture Reform, Food and Jobs Act and the House Agriculture Committee should include them in their bill.

Community Food Projects Program—\$10 million per year to help communities build food self-reliance.

Farmers Market and Local Food Promotion Program—\$20 million per year to develop farmers market capacity and create food hubs to connect farmers with schools, hospitals, grocery stores and other markets.

Hunger-Free Community Incentive Grants—An average of \$20 million per year for a new SNAP local fruit and vegetable incentive grant program at farmers markets and other healthy food retailers.

Cuts to our nation's food safety net have on a serious impact on our most vulnerable citizens. Cuts to SNAP (food stamps)—like the ones currently under consideration in the farm bill—would further limit access to the food and nutrition programs that millions of older Americans rely on. Meanwhile, the Commodity Supplemental Food Program (CSFP), which provides monthly boxes of food to low-income seniors,

faces its own funding threats. These issues matter. What will seniors do if they no longer have access to these vital programs?

2012 Farm Bill has to shift the animal based agribusiness to a sustainable agriculture by encouraging farmers and ranchers transition to Organic Plant Farming (OPF). Only OPF can stop toxin pollution like chemical fertilizers, pesticides, and antibiotics. Healthy foods can be produced only from healthy soil and clean water. We have to make the Earth livable by allowing the cohabitants to maintain the ecological balance on this Planet.

My name is [fill in the blank], and I live in [fill in the blank], AL. I'm concerned about the obesity epidemic in Alabama, and I'm a very strong supporter of local farmers and fresh, healthy food choices for everyone. I see billions of dollars spent on food that is produced outside of Alabama leaking from our economy. We need to keep those dollars here at home. I'm aware of several proposed bills that support local farms and foods including the Local Food Farm and Jobs Act (H.R. 3286); Let's Grow Act (H.R. 4351), Beginning Farmer and Rancher Opportunity Act (H.R. 3236) and H.R. 4284.

As a constituent, I urge Congress to:

(1) Support the Local Farms, Food and Jobs Act (S. 1773, H.R. 3286); Let's Grow Act (H.R. 4351); Beginning Farmer and Rancher Opportunity Act (H.R. 3236) and H.R. 4284.

(2) Refuse further cuts to the SNAP (formerly Food Stamps) and preserve TEFAP (The Emergency Food Assistance Program) that provides food to Food Banks. I can't imagine that church pantries and other feeding programs can handle more demand in this economic downturn. Alabama Food Banks were on the frontlines of disaster response this April—we need to keep this critical network of food distribution intact.

FEEDING ASSISTANCE PROGRAM FORM LETTERS

I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP & CSFP . . . these programs assist in ensuring healthy outcomes in the lives of hungry families and individuals . . . many are seniors, single mothers and kids. "A healthy farm bill is a good farm bill for the future of our country" or "We need a strong farm bill to help put more food on the table for hungry Americans when you talk about working class families, individuals . . . many of the vulnerable are seniors and kids."

I agree with the goal of deficit reduction, but we should not achieve it on the backs of the most vulnerable.

SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM (SNAP) FORM LETTERS

VARIANT 1

Hon. FRANK D. LUCAS,
Chairman,
 House Committee on Agriculture,
 Washington, D.C.

Hon. FRANK D. LUCAS (*Chair*),

I am greatly worried about the future of hunger in America with respect to your recent proposal to cut funding for SNAP (Supplemental Nutrition Assistance Program).

Are you aware that in 2010, approximately one in seven American households was food insecure? Additionally, instances of poverty in this country have been increasing for the past 6 years.

Surely, you can agree that now is not the time to slash funding from important programs that help feed hungry families. I cannot understand why you would suggest that **SNAP take a \$33 billion funding cut**.

We need to continue to support families who need assistance. I hope you will recognize the importance of this goal and **reinstate all funding to SNAP**.

FEEDING AMERICA FORM LETTER

I work for Feeding America, the nation's leading domestic hunger-relief charity. Through my day-to-day work, I know that many families in our country are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food Feeding America's network of food banks distribute—hunger is a serious problem in our country. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our communities cannot afford cuts to these programs.

I support my local food bank, and I know they are struggling right now to meet the needs of my community. I ask that you pass a strong farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the millions of Americans struggling with hunger, and I urge you make them a priority in the next farm bill.

AGAPE FOOD BANK

Name: Michael Oberle, Director.

Comment: I am the Director at the Agape Food Bank in Lakeland, FL. With many traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement in the economy. We need a strong farm bill to make sure we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to thousands of people struggling with hunger in your district, and I urge you to make them a priority in the next farm bill.

AGAPE HOUSE INC. OF MOUNTAIN VIEW

Name: Tressa Pric, Program Development Director.

Comment: I am the Program Development Director for the Agape House Inc. of Mountain View, shelter for victims of domestic violence. The economy has shown some improvement in certain parts of the nation and we are very encouraged. However, rural Missouri hasn't had the same turn around. We are still struggling with the loss of many jobs as factories and mills have been forced to close with no alternatives for the citizens the need has increased by a great margin. Here at the Agape House Inc. of Mountain View we are seeing an increase for need and an increase in the cost for groceries, our budget was cut \$48,000 this year, therefore cutting funding for food in half. We urge you to pass a farm bill that protects and strengthens programs like TEFAP, SNAP and CSFP. These programs are a lifeline to the many victims of domestic violence we serve in a rural 10 county service area, with a population ranging over 100,000. People in the 8th congressional district are suffering to meet the demands at the grocery stores just to feed their families, the shelters also struggle with all the budget cuts to meet the needs of the many victims we serve. Please make the less fortunate population a priority in the next farm bill.

AKRON-CANTON FOODBANK

Name: Colleen Benson.

Comment: I work at the Akron-Canton Regional Foodbank which serves more than 40,500 people per week in Ohio's congressional districts 13, 14, 16, 17 and 18 and I am writing to share my concern about hunger in Ohio and across the nation.

We have seen more than a 50% increase in food distribution since 2007 and our member agencies report no relief at all. Now more than ever, our clients are relying

on anti-hunger programs like the Supplemental Nutrition Assistance Program (SNAP) and The Emergency Food Assistance Program (TEFAP), which are authorized in the 2012 Farm Bill

Congress should do its part by continuing to support hunger-relief programs. Given the associated health care and educational costs of hunger and poor nutrition, cuts to anti-hunger programs will only increase hunger in America.

AL BEECH/WEST SIDE FOOD PANTRY

Name: John Casey, President; William Davis, Board Member and Volunteer.

Comment: I am the [fill in the blank] of the Al Beech West Side Food Pantry in Kingston, Pa. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to make sure that we can put food on the table of those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, AND CSFP. These programs are a lifeline to the people struggling with hunger in your district, and I urge you to make them a priority in the next farm bill.

ALAMEDA COUNTY COMMUNITY FOOD BANK

Name: Ecaterina Burton, Advocacy and Education Associate.

Comment: I work at a Food Bank that feeds 1 in 6 people in my county alone. The \$36 Billion cut to SNAP is the WRONG direction our farm bill is taking. It would take 6 entire Feeding America food bank networks to fill that gap. Food Banks are already operating at maximum capacity. Making these cuts at this time shows a extreme amount of irresponsibility and a calculated decision to ignore the high levels of hunger and poverty we have currently in America. Shame on you for pretending otherwise!

Our farm bill should focus on creating economic opportunity and improving access to healthy, affordable food for all Americans. I recommend that the House Agriculture Committee invest more into SNAP. One such way is to include the Hunger-Free Community Incentive Grants that were in the Senate's version of the farm bill. This would create an average of \$20 million per year for a new SNAP local fruit and vegetable incentive grant program at farmers markets and other healthy food retailers.

Another way to invest in SNAP is to increase the income levels at which people would be eligible. As it stands right now, the U.S. Census has stated that 1 in 3 Americans are near poor, barely above the poverty line and struggling to survive. We are in the worst economic time period since the Great Depression. In the Great Depression, our elected officials on both sides of the aisles worked on programs and solutions that helped people in that time of great need. Let's do the same. This is no time to turn our backs on our fellow Americans.

Sincerely,
ECATERINA BURTON,
Advocacy and Education Associate,
Alameda County Community Food Bank,
Oakland, CA.

ARIZONA FOOD BANKS

Name: Ginny Hildebrand.

Comment: As a constituent and an employee of a food bank association that serves more than 1 million hungry Arizonans a year, I urge you to pass a strong farm bill that protects programs like SNAP, TEFAP, and CSFP, which help provide food for millions of America's most vulnerable: children, low income families, seniors, and those who are disabled. Please make sure the critical safety net we have in our nation stays intact.

Name: Rebecca Smolic.

Comment: I and my family depend on the Food Banks in Tucson, AZ. Without this help to supplement our very tight food budget, we could not eat as healthy as we do. The Food Bank is necessary for us. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food distributed—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families like mine can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

Name: Michael Wahl.

Comment: I am a supporter of the Community Food Bank, often dropping off food in what have become hard times for a lot of low wage workers, elderly and unemployed. I am asking you to support a strong farm bill that will put food on the table for those in need.

ARKANSAS FOODBANK

Name: Shelly Lane.

Comment: I am an employee of the Arkansas Foodbank. Right now, 1 in 5 adults and 1 in 4 children in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Arkansas cannot afford cuts to these programs.

ASH GROVE FOOD PANTRY/THE OZARK FOOD HARVEST

Name: Deanna Monnig, President.

Comment: As President of the Ash Grove Food Pantry, I am very aware of the need just in our area alone. We serve up to 90 families every month. Without the help from The Ozark Food Harvest, we would not be able to purchase food for our families in need. Please keep those who cannot speak for themselves (the children of these families, the elderly and the disabled) in mind when you make your decisions concerning the farm bill. Thank you, Deanna Monnig, Ash Grove Missouri

ASHLEY FOOD PANTRY

Name: Judith Rinker, Coordinator.

Comment: I am the coordinator at Ashley Food Pantry. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the [INSERT LOCAL MMG DATA] people struggling with hunger in your district, and I urge you make them a priority in the next farm bill.

ATLANTA COMMUNITY FOOD BANK

Comments: As an employee for the Atlanta Community Food Bank it is imperative that we offer as much assistance to those in need more than ever! As I continue to see the vast majority of our community become unemployed, and therefore unable to provide food for their families, we need to continue the fight to increase the ability to provide assistance to those in need.

RONALD BURNS.

I urge you to preserve current funding levels for the SNAP program. The cuts that are being proposed in the farm bill and elsewhere to this vital safety net program would have a devastating impact on the nearly 49.1 million Americans who are food insecure. Even while poverty rates nationwide have climbed in recent years, food insecurity rates have remained stable precisely because SNAP has responded as it was designed to do—to supplement families' food budgets when job losses, medical conditions, or low wages make it next to impossible to make ends meet.

GREG SIMS.

Please do not cut funding for the Supplemental Nutrition Assistance Program. As a front line worker that assists Georgia residents on a daily basis with accessing SNAP, I see the continued need for full funding of this program. People are still hungry and need additional help with providing food for their families in order to free up their other resources to pay for other household needs such as their housing and utilities. The number of children, elderly, and unemployed persons that this program assists far exceeds the number of abusers of it.

SKYE THOMPSON, VILMA WALLACE, and CARROLL WILLIAMS.

Please do not cut funding to nutrition programs, during this economy, where nearly 50% of all recent graduates cannot find work, with shrinking wages and enormous challenges facing working poor and unemployed, to cut food programs would be devastating.

MELINDA WOOD.

Billions of dollars in cuts to food stamps would be devastating to the vast numbers of Americans who need this assistance to weather the storm of job loss or

underemployment! Please consider this before making a decision to cut resources for those in need.

Angela Clawson Michael DeCoursey Tabitha Hollaway Phillip Holmes Kim Kurtz Carol Richburg

BALLARD COMMUNITY SERVICES

Name: Eric Myser, Director of Human Services.

Comment: I am the Director of Human Services at Ballard Community Services. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the thousands of people struggling with hunger in your district, and I urge you to make them a priority in the next farm bill. Charitable organizations cannot make up the difference that these government-funded programs make in the lives of the hungry. Thank you for your consideration.

BLUE RIDGE AREA FOOD BANK

Comment: With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to ensure that we can put food on the table for our struggling neighbors. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the 152,000 people struggling with hunger in the Blue Ridge region, and I urge you make them a priority in the next farm bill.

CALIFORNIA

Names: Carl Hansen; Barbara Robertson.

Comment: Please don't cut emergency food services to the poor through SNAP and TEFAP provided through Food Banks. Other sources of food are scarce in this economy, and the farm bill's help through the USDA has been the ultimate safety net. I volunteer at my local food bank and the need has grown significantly over the past few years. It's difficult to succeed with increased need and the significant cuts you are considering. Don't do it. There is a moral bottom line too. Our recipients are either hard working families with low-income jobs and no benefits, or children and seniors with little accessibility to healthy food. Let's invest in our future by providing the basic building block to a successful life—healthy minds and bodies.

CAPITAL AREA FOOD BANK

Name: Brett Weisel.

Comment: I am a supporter of the Capital Area Food Bank. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

CAPITAL AREA FOOD BANK OF AUSTIN

Name: Frank R. Deutsch.

Comment: Please do all possible to see that agencies like the Capital Area food bank of Austin get all the help they can by seeing that TECAP SNAP AND other programs are passed. Our economy is better for a lot of people but the lower income families I see daily looking for help are hurting and the food bank is very limited and stretched beyond their current resources. We cannot in this great country allow our children and their family members continue to go without a meal. Thank you, FRANK R. DEUTSCH.

CAPITAL AREA FOOD BANK OF TEXAS

Comment: With traditional food streams declining, food banks such as Capital Area Food Bank of Texas continue to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to

make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the people struggling with hunger in Central Texas, and I urge you make them a priority in the next farm bill.

James Allen Heidi Baschnagel Hanna Morgan Julie Wickert Kristina Wolter

CENTRAL PENNSYLVANIA FOOD BANK

Name: Joe Arthur.

Comment: I am an employee of Central Pennsylvania Food Bank. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

CENTRAL PRESBYTERIAN CHURCH

Name: Julie Smith, Director of Community Outreach.

Comment: I am the Director of Community outreach for Central Presbyterian Church in Kansas City, MO. With traditional food streams declining we continue to find it difficult to meet the needs of our community for food. We need a strong nutrition title in the farm bill to make sure that we can put food on the table for those who are struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These are some programs that are a lifeline to the thousands of people struggling with hunger in your district, and i urge you to make them a priority in the next farm bill.

CHESTER COUNTY FOOD BANK

Name: Phoebe Kitson.

Comment: Please DO NOT cut our TEFAP, CSFP and other food funding to Chester County and the great Commonwealth of Pennsylvania where 1 in 8 people go without a meal each day simply because they cannot afford to buy healthy food for themselves or their families. We need your help! People are hungry in the 6th district and that is unacceptable. YOU can make a difference. PLEASE help us feed your people.

CHURCH OF THE HOLY SPIRIT FOOD PANTRY

Comment: I am a VOLUNTEER of Church of the Holy Spirit Food Pantry in Schaumburg. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food that is distributed by food pantries, soup kitchens, and shelters—our agency is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

Kathleen M. Drennan

LaVerne Horgan

Jill Wood-Naatz

CITY UNION MISSION

Name: Greg Dahl, Food Service and Food Warehouse Director.

Comment: I am the Food Service and Food Warehouse Director at City Union Mission. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement in the economy. We need a strong nutrition title in the farm bill to make sure that we can put food on the table for those who are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the thousands of people struggling with hunger in your district, and I urge you to make them a priority in the next farm bill.

COLUMBIA PACIFIC FOOD BANK

Name: Jenny Ahlers Rudolph.

Comment: House Agriculture Committee,

I am writing you today to urge you to fully restore funding for farm bill programs that support low-income families. I am currently a volunteer board member for the Columbia Pacific Food Bank in Columbia County Oregon. We are a community that has been hit hard by the recession. The local Boise Cascade mill closed down in early 2009, and losses of Timber Payments, as well as layoffs in other sectors, has greatly increased the number of families who are coming to the food bank. We are seeing many more working families who are struggling to make it on one income alone, and may folks who cannot make ends meet because of rising fuel and utility costs. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens SNAP, SNAP-Ed, TEFAP, and CSFP. Our community cannot afford additional cuts to these programs.

Respectfully,
JENNY AHLERS RUDOLPH

COMMUNITY CHEST NEVADA

Name: Erik Schoen.

Comment: The proposed cuts to the SNAP program would severely impact the lives of many people already living on the edge in Lyon, Mineral, and Storey counties. 50% of the recipients of SNAP Benefits in Nevada are children and these cuts would significantly harm them and their families.

In years past, nonprofit agencies such as ours did what we could to make up the difference. We—and our sister organizations—no longer have the capacity to absorb any further cuts to such funding streams. This means that already hungry people, many of them neighbors, will go hungry and the quality of life for all Nevadans will be detrimentally impacted.

Please do not support these cuts. Instead, we hope that you will have the courage to ask for additional funds with which to increase the funding for SNAP benefits. Thank you.

COMMUNITY FOOD BANK OF EASTERN OKLAHOMA

Comment: I am a [fill in the blank] of the Community Food Bank of Eastern Oklahoma. With traditional food streams declining and a recession still lingering, they continue to find it difficult to meet the demands for food assistance, despite the overwhelming support from our community. We all need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens nutrition programs like TEFAP and SNAP. These programs provide a lifeline to more than 600,000 food insecure Oklahomans, including the 240,740 children at risk of going to bed hungry tonight. I urge you make them a priority in the next farm bill.

COMMUNITY FOOD BANK OF TUCSON

Name: Barbara Arvold.

Comment: I am a volunteer at the Community Food Bank in Tucson two half days a week. I see the numbers of people standing in line, seeking food assistance growing weekly! I see the price of food such as peanut butter double in price.

The CFB cannot depend upon the generosity of Tucsonans to meet the needs of so many. We need a strong farm bill to make sure that these families can put food on their tables.

Help pass the farm bill to help our community.

Peace.

COMMUNITY FOOD PANTRY

Name: Deborah Bluminberg.

Comment: Every month, I serve hungry families at the Community Food Pantry. Many of those families receive food stamps, and still have a need for the food pantry. Cutting SNAP means less help for families who already are struggling to feed themselves and their children. PLEASE DO NOT CUT SNAP.

COMMUNITY FOODBANK OF NEW JERSEY

Comment: As a [fill in the blank] at the Community FoodBank of New Jersey, I'm writing to share my concern about hunger in New Jersey. With unemployment still high and many Americans struggling to make ends meet, anti-hunger programs are helping many put food on the table.

Nearly 50 million Americans live with food insecurity. While food banks, churches, and pantries do great work, charity alone can't meet the need for food assistance. Feeding our neighbors is a public-private partnership. I try to do my part by volunteering at and donating to the CFBNJ in Hillside, NJ.

Congress should do its part by continuing to support anti-hunger programs like the Supplemental Nutrition Assistance Program (SNAP), the Emergency Food Assistance Program (TEFAP), and the Commodity Supplemental Food Program (CSFP), all of which are authorized in the farm bill.

Cutting anti-hunger programs will obviously increase hunger in America. Given the associated health care and educational costs of hunger and poor nutrition, cuts to anti-hunger programs are short-sighted.

Please remember the families who are struggling in our country and urge you to protect and strengthen important anti-hunger programs like SNAP, TEFAP, and CSFP in the 2012 Farm Bill reauthorization.

COMMUNITY HEALTH MINISTRY

Name: Cindy Cassity, Coordinator.

Comment: I am the Food Bank Coordinator at Community Health Ministry in Alma, KS. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement in the economy. We need a strong nutrition title in the farm bill to make sure that we can put food on the table for those who are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the thousands of people struggling with hunger in your district, and I urge you to make them a priority in the next farm bill.

CONTRA COST FOOD BANK

Name: Patricia Ellison.

Comment: I volunteer at the Contra Cost Food Bank and I have seen how important programs like SNAP are for families and seniors.

The number of people who would have to skip a daily meal is increasing. I urge you to not make cuts in any of the food supplement programs in the agriculture bill. Thank you.

DUTCHESS OUTREACH, INC.

Name: Rosemary Fritz Grabowska.

Comment: I work at Dutchess Outreach, Inc. This is a not-for-profit that runs a food pantry and soup kitchen 5 days a week. We serve families in need from all over Dutchess County and the sentiment I hear the most is that families are having a hard time making ends meet WITH the food stamps they're receiving. We serve over 20 families a day in our food pantry, giving them groceries so they make what little they have stretch just a little bit more. If programs like TEFAP and SNAP are decreased we're going to have an increase in demand that we just can't keep up with. Please strengthen programs like TEFAP and SNAP!

EAST TEXAS FOOD BANK

Name: Brandi Lamberth.

Comment: I am a supporter of our local food bank in Tyler. East Texas children and families are in the top states for people living in poverty. We need a strong farm bill to help put food on the table for vulnerable children, seniors, and low-income families. Please pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. Cutting these programs is not the way to balance the budget. I urge you make them a priority in the next farm bill.

EMERGENCY FOOD CUPBOARD

Name: Robert Lauterbach.

Comment: Please do not cut the funds for SNAP, as it would cause great hardships for people in need of food. As a volunteer coordinator for an Emergency Food Cupboard near Downtown Rochester, NY, I see first hand how important SNAP funds are for our clients. Most of them run out of the funds mid-way through the month, and need our services to feed their families.

EMERGENCY INFANT SERVICES

Name: Tom Taylor, Executive Director.

Comment: I am the Executive Director at Emergency Infant Services, which serves infants and kids ages 0 thru their 5th birthday. With traditional food streams declining and a recession still lingering, we continue to find it difficult to meet the demands for food assistance, despite the overwhelming support from our community. We need a strong FARM Bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a FARM Bill that protects and strengthens nutrition programs like TEFAP and SNAP. These programs provide a lifeline to more than 600,000 food insecure Oklahomans, including 240,740 children at risk of going to bed hungry tonight. I urge you to make them a priority in the next FARM Bill.

FAYETTE COUNTY COMMUNITY ACTION FOOD BANK

Name: Jennifer Miller.

Comment: I am a supporter of Fayette County Community Action Food Bank. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

FEEDING AMERICA AND ST. MARY'S FOOD BANK ALLIANCE

Name: Lee Wasko.

Comment: I am a supporter of Feeding America and St. Mary's Food Bank Alliance. Despite the recent improvement of the economy, there are still many people who may not know where they will find their next meal. We need a strong farm bill to help put food on the table for vulnerable children, seniors, and low-income families. Please pass a farm bill that protects and strengthens programs like

TEFAP, SNAP, and CSFP. Cutting these programs is not the way to balance the budget. I urge you make them a priority in the next farm bill.

FEEDING AMERICA SOUTHWEST VIRGINIA

Name: Wayne Johnson.

Comment: Our clients are in dire need of food and we depend heavily on the USDA food provided to us thru Feeding America Southwest Virginia. Please help us as we seek to feed the needy in this area.

Name: James Pearman, Board Chair.

Comment: I am the Board Chair at Feeding America Southwest Virginia. I have been involved as a volunteer Board member for almost 20 years. Our service area is southwestern Virginia (26 counties, 10 cities) and contains some of the poorest areas of the Commonwealth. Food supply has always been a challenge for us as we do not have significant food production or manufacturing in our service area. With continuing decline in traditional food streams, we continue to find it difficult to meet the needs of our communities, despite the improvement of the economy. We need a strong farm bill to make sure we can put food on the table of those individuals still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the thousands of children and older adults struggling with hunger in southwestern Virginia. I urge you to make them a priority in the next farm bill.

FEEDING AMERICA/RI COMMUNITY FOODBANK/GENESIS PROJECT

Name: Ken Stec.

Comment: I am a supporter of Feeding America and my local food bank. Despite the recent improvement of the economy, there are still many people who may not know where their next meal will come from. 1 in 5 children do not know where their next meal will come from in this country—as the richest country in the world, we should be ashamed! We need a strong farm bill to help put food on the table for vulnerable children, seniors, and low-income families. Please pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP—AND supports access to fresh, nutritious food. Cutting these programs is not the way to balance the budget. A thriving economy needs well-nourished citizens at all income-levels, and I urge you make these programs a priority in the next farm bill.

FEEDING OUR NEIGHBORS

Name: Lori Kantor.

Comment: Feeding Our Neighbors is a public-private partnership. I am doing my part and want our government to do its part.

Cutting anti-hunger programs will increase hunger in America, as well as the associated health care, educational, and economic costs of food insecurity and poor nutrition.

Please remember the families who are struggling in our community and protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization.

FOOD BANK AT PRINCE OF PEACE LUTHERAN CHURCH

Name: Sharleen Jespersen.

Comment: I am a supporter and volunteer at the Food Bank at Prince of Peace Lutheran Church. Please keep a strong farm bill and protect the benefits of these people who really need our help right now to feed their families.

FOOD BANK OF CONTRA COSTA AND SOLANO

Comment: As a [fill in the blank] of my local food bank, I am writing to share my concern about hunger in California and the country. With unemployment still high and many Americans still struggling to make ends meet, anti-hunger programs are vital to many of our neighbors just put food on the table.

Nearly 50 million Americans are living in food insecurity. While food banks, churches, and pantries are doing great work in our community, charity alone cannot meet the need for food assistance. Feeding our neighbors is a public-private partnership. I try to do my part by supporting the Food Bank of Contra Costa and Solano.

Congress should do its part by continuing to support anti-hunger programs like the Supplemental Nutrition Assistance Program (SNAP) and The Emergency Food Assistance Program (TEFAP), which are authorized in the farm bill.

Cutting anti-hunger programs will increase hunger in America. Given the associated health care and educational costs of hunger and poor nutrition, cuts to anti-

hunger programs are short-sighted. Don't cut these programs—if you are looking for ways to reduce government spending, then cut the farm subsidies to the growers. A truly wasteful program.

I ask you to please remember the families who are struggling in our country, and urge you to protect and strengthen important anti-hunger programs like TEFAP and SNAP in the 2012 Farm Bill reauthorization.

FOOD BANK OF IOWA

Name: Carey Miller, Executive Director.

Comment: I am Carey Miller, Executive Director of the Food Bank of Iowa. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs. Thank you.

FOOD BANK OF NORTHERN NEVADA

Comment: I am a [fill in the blank] of the Food Bank of Northern Nevada. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

FOOD BANK OF SOUTH CENTRAL MICHIGAN

Comment: I am an [fill in the blank] representing the Food Bank of South Central Michigan. With traditional food streams declining, the Food Bank continues to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the 1,828,060 Michigan residents who struggle with hunger and I urge you make them a priority in the next farm bill. 25% of the 102,600 individuals receiving food through the Food Bank of South Central Michigan are older Americans and senior citizens.

FOOD BANK OF THE SOUTHERN TIER COMMUNITY

Name: Missy Goetschius.

Comment: While we appreciate your recognition of the need for additional TEFAP supplies across the country, more help is needed this year so the Food Bank of the Southern Tier can continue responding to the increasing need for food assistance. Our local Food Bank is currently feeding over 11,000 people each week and the need for food assistance continues to grow.

We appreciate your attention to this request and look forward to hearing from you regarding this issue.

Comment: I am a [fill in the blank] at the [fill in the blank], which is a hunger-relief member agency of the Food Bank of the Southern Tier. Right now, many families in our community are struggling. In fact, the Food Bank of the Southern Tier's hunger-relief network, of more than 160 hunger-relief member agencies including food pantries, soup kitchens, shelters and other nonprofit organizations, provide assistance to over 11,000 individuals each week.

With high and prolonged unemployment and many more families scraping by on one salary or reduced hours and wages, many families in our community are still hurting and the Food Bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table.

I ask that you pass a farm bill that protects and strengthens programs like SNAP and TEFAP. Our community cannot afford cuts to these programs!

FOOD BANK OF WESTERN NEW YORK

Name: Kathleen Mendez.

Comment: I am an employee of the Food Bank of Western New York and am aware of that fact that many families in our community are struggling to put food on the table. There is an increased demand for emergency food assistance, due to increased food costs. A decline in TEFAP commodities—a major source of the food we distribute—results in our food bank having difficulty meeting the needs of our four-county community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. The less fortunate in Western New York cannot afford cuts to these programs.

FOOD CUPBOARD

Name: Fran Jensen.

Comment: I help run a Food Cupboard and assist at several soup kitchens. The situation out here is very difficult for many people. SNAP and TEFAP are essential. It may sound incredible in this nation, but people could starve without some of these benefits. Please preserve these programs!

FOOD FOR FRIENDS PROGRAM

Name: Lauralee Colella.

Comment: I am a volunteer for the Food For Friends program in Plainville Ct. and we benefit from TEFAP and really need this kind of help to make this program possible. We are serving needy people every week and see more need each week. We need a strong farm bill to make sure that struggling families can have the hot meals we provide. Our community cannot afford cuts to these programs.

FOOD ROOTS

Name: Randall Koch.

Comment: I work with Food Roots, a 501(c)3 teaching children to grow food in their schools with the help of FoodCorps and create micro enterprise programs for small farmers to help them fund their food production as well as work regionally to develop a 100 mile regional food system for production and distribution of healthy for all income levels through Farmers Markets and SNAP match programs.

FOOD SHARE IN OXNARD, CA

Name: Fran McNeill, Chief Program Officer.

Comment: I am the Chief Program Officer at FOOD Share in Oxnard, CA. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to one in six people struggling with hunger in your district, and I urge you make them a priority in the next farm bill. These critical programs affect the most vulnerable of our population. One in four of those who are hungry are children, and they are our future.

FOODLINK

Comment: I am an [fill in the blank] of Foodlink, the regional food bank in Rochester, NY. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

FREE LUNCH

Name: Leslie Weinberg.

Comment: I care deeply about the issue of poverty and hunger, here in the U.S. as well as overseas. In these difficult times, many depend on the SNAP program, WIC, or Food Banks and Pantries. I participate in a Free Lunch in Stamford, CT. Please include these nutrition programs, as well as free lunches in public schools for those who qualify. Many Food Banks and Pantries are significantly strained. People who could once make donations are now clients.

GEORGIA FOOD BANK ASSOCIATION

Name: Danah Craft.

Comment: Please protect TEFAP and Federal Nutrition Programs like SNAP. Food Banks in GA distributed more than 95 million pounds of food last year through more than 2,500 partner agencies and pantries. Without these programs, our agencies, including 1,700 churches and congregations, will be on the front lines of trying to help struggling Georgians. Now is not the time to cut food assistance.

GLORIA DEI FOOD DISTRIBUTION CENTER

Name: Joel Weinhardt, Pantry Manager.

Comment: I am a Pantry Manager of Gloria Dei Food Distribution Center in Leesburg. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs. We started from scratch a little over a year ago and are now giving 145 people 1 week of nutritional food 1 time per month. Without the 2nd harvest TEFAP foods we receive we would not be able to feed more than 30–40 people. Joel Weinhardt, Manager Pro Tem Gloria Dei Food Distribution Center

GOOD SHEPHERD FOOD BANK

Comment: I am [fill in the blank] at Good Shepherd Food Bank. With traditional food streams declining, we continue to find it difficult to meet the hunger

needs in Maine, despite the improving economy. We need a strong farm bill to make sure that we can put food on that table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the more than 200,000 Mainers who struggle with hunger. I urge you to make them a priority in the next farm bill. Sincerely,

| | | | |

HANDS ON HARTFORD

Name: Cody Stewart.

Comment: I am an employee of Hands on Hartford, serving the Greater Hartford, CT area. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our organization is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

HARRY CHAPIN FOOD BANK OF SOUTHWEST FLORIDA

Name: Ben Walther.

Comment: I am a SUPPORTER of Harry Chapin Food Bank of Southwest Florida. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

HELPING HANDS FOOD MINISTRY

Name: Tami Hernandez, Director.

Comment: I am the Director at Helping Hands Food Ministry. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement in the economy. We need a strong nutrition title in the farm bill to make sure that we can put food on the table for those who are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the thousands of people struggling with hunger in your district, and I urge you to make them a priority in the next farm bill.

HOT SPRINGS FOOD PANTRY

Name: Deb Meyers, VP of the Board of Directors.

Comment: I am the VP of the Board of Directors of the Hot Springs Food Pantry. I see less and less food coming into our pantry from our Network. Many of our ranches, townfolk, and even relatives from out of state help keep our shelves full, but none of them are wealthy. They will not be able to do this forever. We are seeing increases every month in our roles. This town of about 450 has 180 people who need food each month. As you can see, we are desperate for funding. Many of our clients are elderly and are seeing less money in their social security checks. Many more are either embarrassed to be seen coming in for food or they are disabled and for whatever reason don't ask us to deliver to them, which is something we are eager to do.

Add those to the ones already on the roles and you can see our position. Please, please, please, if you won't help get the funding back, which was already cut, at least stop any further cuts.

HOUSE OF HOPE FOOD PANTRY

Name: Everett Bass.

Comment: I am a Volunteer employee of House of Hope Food Pantry. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

Leesburg First Assembly of God,
Fruitland Park, FL

HOUSING OPPORTUNITIES

Name: Caroline Shook.

Comment: I am an employee of Housing Opportunities. We run a food pantry which relays on TEFAP commodities for our pantry. Our pantry serves over 1500 families a month. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

HOUSTON FOOD BANK

Name: Timothy Williams.

Comment: I urge you to oppose proposals to cap or reduce funding, restrict eligibility, or reduce nutrition program benefits

Please support increased benefits to ensure American families have resources to purchase a nutritionally adequate diet;

I am a supporter of Feeding America and the Houston Food Bank. In spite of recent economic improvements, there are too many families who do not know where their next meal will come from. We need a strong farm bill to help put food on the table for children, the elderly and low-income families. Cutting these programs is not the way to balance the budget.

I urge you to prioritize full funding of farm bill nutrition programs.

I am a Constituent, and I vote.

HUNGER-FREE PENNSYLVANIA

Name: Sheila Christopher, Executive Director.

Comment: I am the Executive Director of Hunger-Free Pennsylvania. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. Of particular interest to us is the reauthorization of the Commodity Supplemental Food Program [CSFP]. In Pennsylvania we provide a vital nutritious food package to 34,533 each month. We were blessed in 2002 to be awarded the program with a caseload of 5,000. We are celebrating 10 years of administering this program for the Pennsylvania Department of Agriculture, with over 300,000 seniors eligible for this program our work is far from done

CSFP, along with the other food/nutrition programs are a lifeline to the people struggling with hunger in your district, and I urge you make them a priority in the next farm bill.

ILLINOIS FOOD BANKS

Comment: As a volunteer for our local food pantry, I know many of our clients rely on food stamps as well as on the pantry for their food. Please don't cut SNAP! I am writing to encourage strong support of nutritional programs nationwide. Members of my family currently depend on food subsidies to make ends meet. As a food pantry volunteer, I see the face of needy people regularly. We feed hundreds of people each week through our community food pantry. Please do not cut SNAP funding. Our neighbors are hungry and need our support and care.

INDIANA FOOD BANK

Name: Mallie Gwathney.

Comment: I serve as a food pantry director and I see the need in our community for the food that is supplied by the services that are provided through the USDA food distributions. If these services are cut it will cause hardships for many families.

JEWISH FAMILY & CHILDREN'S SERVICE OF PITTSBURGH/SQUIRREL HILL FOOD PANTRY

Name: Rebecca Abrams, Director.

Comment: I urge Congress to protect against hunger and promote nutrition in the upcoming farm bill by supporting programs like SNAP, TEFAP, CSFP, and FFVP.

As the director of the Squirrel Hill Food Pantry in Pittsburgh, PA I serve over 1,200 people each year with supplemental food assistance. Please don't cut these vital programs to provide healthy foods to people in need. If these cuts go forward, I worry that my program will not be able to keep pace with the number of people who will turn to my food pantry program for help.

Thank you,

REBECCA ABRAMS, M.S.W.,

Director, Squirrel Hill Community Food Pantry,

A program of Jewish Family & Children's Service of Pittsburgh.

JONNYCAKE FOOD BANK

Name: Gene Corl.

Comment: I am a supporter of the Jonnycake Food Bank in our community. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

The kids are the ones who are adversely affected the most, and that is a sad state of affairs for America.

LADY LAKE CHURCH OF GOD FOOD PANTRY

Name: James Newton.

Comment: I am an EMPLOYEE of Lady Lake Church of GOD Food Pantry. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

MARILLAC SOCIAL CENTER

Name: Whitney Allen, Director of Family Services.

Comment: I am the Director of Family Services at Marillac Social Center. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food that is distributed by food pantries, soup kitchens, and shelters—our agency is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

MARYLAND

Name: Antje Krueger.

Comment: I support my local food bank, and I know they are struggling right now to meet the needs of my community. I ask that you pass a strong farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the millions of Americans struggling with hunger, and I urge you make them a priority in the next farm bill.

MID-SOUTH FOOD BANK

Name: Barbara Southwell.

Comment: Do Not pass Any bill which weakens our ability to provide food for those who are children, elderly, underemployed, disabled, etc. My husband and I are volunteers in our community and so far we have raised 1,969 pounds of food and \$1,261.25 for the Mid-South Food Bank and that's not a dent in what is needed in this area! Don't make it any more difficult than it already is for us to help feed those in need! I swear I think our elected officials are so clueless!

Name: Marcia Wells.

Comment: Food insecurity in our area is more than 20% of the population. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities, our food bank is struggling to feed the need in our community. We need a strong farm bill to make sure that individuals and families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Memphis and the Mid-South cannot afford cuts to these programs.

MINNESOTA

Name: Maryann Bartos.

Comment: I work with the homeless. The drop of farm surplus to the local food banks is not good. The need has increased in these hard economic times. The pro-

gram needs to continue. It looks like a win/win situation for our citizens producer or not.

Name: Deb Aries

Comment: PLEASE continue to protect & strengthen the food programs for the hungry. Our numbers are up & there is no end in sight for the continued use of our facilities. We serve 13 counties in SE Minnesota & though we are blessed with wonderful donors, we do have shortages at certain times of the year.

Comment: Dear Representative McCollum:

I work as a Social Worker in [fill in the blank] and strongly urge you to support existing funding levels for the Supplemental Nutrition Assistance Program (SNAP) within the farm bill.

One in 9 Minnesota citizens struggles to put food on the table. In Ramsey County, at least 12.6 percent of the population is food insecure. SNAP is critical to maintaining good nutrition and health among our population.

Economic studies in Minnesota show that people who lack access to adequate nutrition are more often chronically ill; children don't fully develop physically and cognitively and are more prone to fail courses, repeat grades and drop out of school before graduation. The cost of hunger's impact—largely as uninsured medical care—is conservatively estimated at \$1.6 billion annually. Cutting SNAP or limiting access to it will increase charity care caseloads for the counties, which will be borne by local property taxes.

Last but not least, every dollar of SNAP purchases goes into the local economy and generates \$1.73 in economic activity. This is not a net expense; it is a net gain of 73% that supports jobs on Main Street. In a time of high unemployment, we cannot afford to add to the unemployed by reducing community economic assets of which SNAP is one.

As a constituent and as a public servant, I strongly oppose cuts to critical anti-hunger programs SNAP, TEFAP as well as the Commodity Supplemental Food Program (CSFP) for seniors and Women, Infants and Children (WIC)

For the sake of our neighbors who can't earn enough to get the food they need, it is important to maintain funding for programs that provide basic food assistance programs.

Sincerely,

| | | | |

|-------------------------|---------------|----------------------|-------------------|

MISSOURI

Name: Amanda Winschel.

Comment: With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the 70,000 people struggling with hunger in your district, and I urge you make them a priority in the next farm bill.

Name: Jan Wright.

Comment: Running the local food pantry keeps me constantly aware of how much we need the gov't. commodities program for our seniors CSFP, reg commodities. and our SNAP programs. Food pantries alone cannot handle this. Last month alone this little food pantry fed 206 people. The economy is improving but not to the point you can do away with these programs.

MONTGOMERY AREA FOOD BANK

Name: Teresa Vigneault.

Comment: Dear House Committee Members:

It is critical that we not make the suggested cuts to TEFAP, SNAP, USDA. These programs ensure that food banks and others are able to assist those that need it most with simple nutrition and having access to much needed food. No one should have to go hungry, Children should be able to grow mentally, physically and spiritually.

NEW HAMPSHIRE FOOD BANK

Name: Mel Gosselin.

Comment: Although we are seeing slight improvements in the economy, we are seeing greater demand for food assistance. A strong farm bill is imperative to assist-

ing with the needs of our most vulnerable. These assistance programs are critical; please make them a priority. Thank you.

NEW MEXICO

Comment: As a supporter of my local food bank, I am writing to share my concern about hunger in New Mexico. With unemployment still high and many Americans still struggling to make ends meet, anti-hunger programs are helping many of our neighbors just put food on the table.

Nearly 50 million Americans are living in food insecurity. While food banks, churches, and pantries are doing great work in our community, charity alone cannot meet the need for food assistance. Feeding our neighbors is a public-private partnership. I try to do my part by supporting local hunger relief programs in my community.

Congress should do its part by continuing to support anti-hunger programs like the Supplemental Nutrition Assistance Program (SNAP), The Emergency Food Assistance Program (TEFAP), and the Commodity Supplemental Food Program (CSFP), all of which are authorized in the farm bill.

Cutting anti-hunger programs will increase hunger in America. Given the associated health care and educational costs of hunger and poor nutrition, cuts to anti-hunger programs are short-sighted.

I ask you to please remember the families who are struggling in our country, and urge you to protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization. Cutting anti-hunger programs will increase hunger in America. Given the associated health care and educational costs of hunger and poor nutrition, cuts to anti-hunger programs are short-sighted.

I ask you to please remember the families who are struggling in our country, and urge you to protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization.

NORTH PARK FRIENDSHIP CENTER

Name: John Potamites.

Comment: I do volunteer work at the North Park Friendship Center. Whenever asked, I tell people that to learn how the people who need us are affected by present American economics that they should come and work with me for a week. I could list all the various hardships I see, but more would be learned if “you see for yourself.” Please don’t help them less.

NORTH TEXAS FOOD BANK

Name: Damaris Lawson, Agency Relations Specialist.

Comment: I am an Agency Relations Specialist at North Texas Food Bank. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to people struggling with hunger in your district, and I urge you to make them a priority in the next farm bill.

NORTHBOROUGH MASSACHUSETTS

Name: Sarah Rothery, Director.

Comment: As a director of my local food bank in Northborough Massachusetts, I am writing to share my concern about hunger in Massachusetts. With unemployment still high and many Americans still struggling to make ends meet, anti-hunger programs are helping many of our neighbors put food on the table.

Nearly 50 million Americans are living at-risk of hunger. While food banks and food pantries are doing great work in our community, charity alone cannot meet the need for food assistance. Feeding our neighbors is a public-private partnership. I do my part by contributing resources such as food, funds and volunteer time to the Worcester County Food Bank in Shrewsbury, MA.

Congress can do its part by continuing to support anti-hunger programs like the Supplemental Nutrition Assistance Program (SNAP Food Stamps) and The Emergency Food Assistance Program (TEFAP), all of which are authorized in the farm bill. These programs complement the hunger-relief efforts of the Food Bank and the food donations they receive.

Please remember the families who are struggling in Massachusetts and in our country by protecting and strengthening important programs like SNAP and TEFAP in the 2012 Farm Bill.

NORTHERN NECK FOOD BANK

Name: Marilyn McGlamary.

Comment: I am volunteer coordinator at the Northern Neck Food Bank & see every day the need for fresh, nutritious food. Our food bank is working to draw local farmers into our system by agreeing to grow crops for our customers.

NORTHWEST HARVEST

Name: Christina Wong.

Comment: I work for Northwest Harvest—we are a private, nonprofit hunger relief organization providing nutritious food to food banks, meal programs and high need schools. Please use the farm bill to strengthen and protect SNAP, TEFAP, and CSFP. In our current economic climate, we must work to ensure that basic needs, like hunger, are met first. SNAP is working exactly as it was intended: it expands in times of high economic need and works towards its own shrinking of its rolls by being an economic stimulus, generating jobs and revenue in our food system while helping to feed hungry families who need a little assistance to help make it through until our economy improves. We need to extend the ARRA boost, and keep state options like Categorical Eligibility and Heat and Eat. These programs create efficiencies, saving administrative costs in eligibility and benefits determination and even the boost that they provide in benefits is not enough to meet all of a family’s nutritional needs, *i.e.*, is NOT keeping them comfortably fed so as to act as a disincentive from self-sufficiency. Otherwise, the loss of SNAP benefits will shift the burden of feeding families to the charitable hunger relief system which is already overburdened from serving record numbers of clients. Strengthen SNAP and strengthen TEFAP, the funds that help food banks with commodities and with operational costs—that is the partnership that is essential for eliminating hunger. Thank you.

NWI FOOD BANK

Comment: I am a [fill in the blank] of NWI Food Bank. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

OAK PARK FOOD PANTRY

Names: Dede Berdelle; Kerry Buhmann; Julie Duff.

Comment: I volunteer every month at the Oak Park Food Pantry serving very hungry people. Cutting SNAP will mean more hungry people will be even more hungry. Please don't cut SNAP.

OAK PARK RIVER FOREST FOOD PANTRY

Comment: I am a [fill in the blank] at the OPRF Food Pantry. Weekly, I hear how the combination of our efforts and the resources most of our clients currently receive from SNAP allow them to eat regularly. Notice I said “a combination”. By reducing SNAP benefits in the latest rendition of the “**Farm bill**” you will ensure many of our clients will no longer have that privilege. Think about it—the “privilege to eat regularly”. In this country. Really?

Please do **Not** cut SNAP benefits. Hunger is **Not** a pretty sight.

OREGON FOOD BANK NETWORK

Comment: All Americans deserve to be healthy and have the opportunity to prosper. At a time of record need for emergency food assistance, two programs in the farm bill, the Supplemental Nutrition Assistance Program (SNAP) and The Emergency Food Assistance Program (TEFAP), must be strengthened and enhanced. I am a [fill in the blank] of the Oregon Food Bank Network, and its resources are stretched thin as they work to keep up with the high level of food insecurity in Oregon and Southwest Washington. The charitable sector simply cannot make up for cuts to critical nutrition programs like SNAP and TEFAP.

OUR LADY OF MT. CARMEL ST. VINCENT DEPAUL SOCIETY

Name: Frances Tereszczuk.

Comment: Food programs that help to feed the growing number of hungry Americans should not be cut. It would be harmful to the people we serve if cuts are made in the farm bill. The biggest concern for low-income families is having enough food to feed their family. Our agency, Our Lady of Mt. Carmel St. Vincent dePaul Society, provides a food pantry and a weekly hot-meal program for members of our community. These families need these programs to sustain a quality lifestyle.

OXFORD AREA NEIGHBORHOOD SERVICES CENTER

Name: Carla Brown.

Comment: I work at the Oxford Area Neighborhood Services Center in Oxford, PA, in southwestern Chester County. One of the services we provide for our community is a food pantry. We receive food provided by state grants and TEFAP (The Emergency Food Assistance Program). Our food needs have increased 37% over the last 3 years but our funding has remained the same, and the TEFAP items have decreased dramatically over the last year. Our food pantry is not alone in this problem . . . We need increases in our funds and in the TEFAP items we desperately need. Please continue the farm bill and if possible increase it so that we can better meet the demands in our community. Thank you.

OZARKS FOOD HARVEST

Comment: I am a [fill in the blank] of Ozarks Food Harvest in Springfield, MO. With traditional food streams declining, I know it is difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to make sure we can help put food on the table for those that are struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are critical to the thousands of people with hunger issues in southwest Missouri. Please help these people in need in the next farm bill.

Thank you,

| | | | |

PALM BAY CHRISTIAN CHURCH

Name: Shauna Whisman, Coordinator.

Comment: I am a coordinator of the food pantry at Palm Bay Christian Church in Palm Bay, Florida. Over the years my family has had to rely on the efforts and dedication of others to sustain our family. It has always been a welcome relief during a very difficult situation. Palm Bay Christian Church utilizes the donations and financial assistance that is given to the Second Harvest Food Bank of Central Florida to help fight hunger in our community. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these pro-

grams. Please do not let the families and especially the children within our community go hungry.

PENNSYLVANIA

Comment: I am a [fill in the blank] of the [fill in the blank] Food [Bank/Pantry] in [fill in the blank]. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food that is distributed by food pantries, soup kitchens, and shelters—our agency is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

Thank you.

PHOENIXVILLE, PA FOOD PANTRY

Name: Lisa Scott.

Comment: Please do not cut the farm bill. I am involved with a food pantry in Phoenixville, PA and we are already noticing a drop in food from the Federal government. Providing food to community members is important. Please do not cut this program. We need your help as well. Looking at the big picture, cutting this program could cause an increase in hunger in American, which could cause an increase in poor nutrition and health care costs.

PITTSBURGH FOOD BANK

Name: Suzanne Smith.

Comment: I want you to protect the SNAP, TEFAP and CSFP programs. These are front line programs to protect against food insecurity and hunger in PA. I have met many families that are struggling to put food on the table and meet all of their other living expenses—especially not having medical care. Protecting food programs helps families stay whole. Additionally going back to the asset test for SNAP will only be an additional cost to the program and will deter families from applying. It also so against what we encourage families to do to bring themselves out of poverty saving money and working.

PLAINVILLE' FOOD FOR FRIENDS

Name: Ruth Bernadt.

Comment: I am a supporter and volunteer of Plainville' Food for Friends organization serving the Greater Hartford, CT area. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our organization is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

PRINCE OF PEACE LUTHERAN CHURCH FOOD PANTRY

Name: Janet Vokovich, Co-Team Leader.

Comment: I am a co-team leader of the Prince of Peace Lutheran Church Food Pantry in Orlando, FL. This past month we served 250 families (over 1,000 people) with food. The need has grown over 50% in the past year. We are asking that you support a strong farm bill that strengthens the TEFAP, SNAP and EBT programs. Our pantry depends on the TEFAP food we obtain from Second Harvest Food Bank to provide good nutrition to our clients. We see all segments of the the population, young families and senior citizens. Please vote to help us continue our work with no cuts. Thank you.

PUTNEY FOODSHELF

Name: Susan Kochinkas.

Comment: I am a volunteer at the Putney Foodshelf in Putney Vermont. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement of the economy. (the number of families needing our help with supplemental food is going up.) We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the many people struggling with hunger in your district, and I urge you make them a priority in the next farm bill.

RI COMMUNITY FOOD BANK AND THE GENESIS PROJECT

Name: Ann Brassard.

Comment: I am a supporter of Feeding America and my local food banks—RI Community Food Bank and The Genesis Project. Despite the recent improvement of the economy in some parts of the country, there are still many people who may not know where their next meal will come from. We need a strong farm bill to help put food on the table for vulnerable children, seniors, and low-income families. Please pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. Cutting these programs is not the way to balance the budget. I urge you make them a priority in the next farm bill.

ROADRUNNER FOOD BANK/LAS CRUCES

Name: Donna Kuehn.

Comment: As a supporter of my local Roadrunner Food Bank and a volunteer at one of the Las Cruces food pantry sites, I am writing to share my concern about hunger in New Mexico. With unemployment still high and many Americans still struggling to make ends meet, anti-hunger programs are helping many of our neighbors just put food on the table.

Nearly 50 million Americans are living in food insecurity. While food banks, churches, and pantries are doing great work in our community, charity alone cannot meet the need for food assistance. Feeding our neighbors is a public-private partnership. I try to do my part by helping at one of the food pantry sites in Las Cruces twice a week. We would not be able to help the participating families without the current government-supported programs.

I urge Congress to continue supporting anti-hunger programs like the Supplemental Nutrition Assistance Program (SNAP), The Emergency Food Assistance Program (TEFAP), and the Commodity Supplemental Food Program (CSFP), all of which are authorized in the farm bill.

Cutting anti-hunger programs will increase hunger in America. Given the associated health care and educational costs of hunger and poor nutrition, cuts to anti-hunger programs are short-sighted.

I ask you to please remember the families who are struggling in our country, and urge you to protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization.

SAFE NET MINISTRIES, INC.

Name: Joanne Graves.

Comment: I am a volunteer at Safe Net Ministries, Inc., serving the Greater Hartford, CT area. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our organization is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

SAINT VINCENT DEPAUL FOOD PANTRY

Name: Janet Stoffel.

Comment: I am a supporter and volunteer for our local Saint Vincent DePaul food pantry. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food pantry is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

SECOND HARVEST FOOD BANK

Comment: I am a [fill in the blank] of Second Harvest Food Bank. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

SECOND HARVEST FOOD BANK-DAYTONA BEACH

Name: Myrtis Rimassa.

Comment: I am a supporter of Second Harvest Food Bank-Daytona Beach area. Right now, many families in our community are struggling and unemployment is extremely high. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

SECOND HARVEST FOOD BANKS

Name: Cynthia Flatt.

Comment: I am a SUPPORTER of Second Harvest Food Banks. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

SECOND HARVEST FOODBANK OF SOUTHERN WISCONSIN

Name: Lisa Gundlach.

Comment: I am an employee of Second Harvest Foodbank of Southern Wisconsin. We serve nearly 141,000 individuals facing hunger every year and are serving 83% more than we were in 2006. With increased demand for emergency food assistance and high food and gas prices, we need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

Thank you for your time.

SECOND HARVEST NORTH CENTRAL FOOD BANK

Comment: I am a supporter of Second Harvest North Central Food Bank in north central Minnesota. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the 29,600 people struggling with hunger in your district, and I urge you make them a priority in the next farm bill.

SHARED HARVEST FOODBANK

Name: Tina Osso, Executive Director.

Comment: I am the Executive Director at Shared Harvest Foodbank. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the 64,000 people struggling with hunger in your district, and I urge you make them a priority in the next farm bill.

SHEFFIELD FOOD PANTRY

Name: Norma Williams, Treasurer.

Comment: I am the Treasurer of the Sheffield Food Pantry in Sheffield Vermont. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the many people struggling with hunger here in Sheffield VT, I urge you make them a priority in the next farm bill.

SOUTH JERSEY FOOD BANK

Name: John Eskate.

Comment: I am a supporter of Feeding America, the South Jersey Food Bank, and Philabundance. Despite the recent improvement of the economy, there are still many people who may not know where their next meal will come from. We need a strong farm bill to help put food on the table for vulnerable children, seniors, and low-income families. Please pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. Cutting these programs is not the way to balance the budget. I urge you make them a priority in the next farm bill.

SOUTH TEXAS FOOD BANK LETTER

Comment:

May 14, 2012
 House Committee on Agriculture
 1301 Longworth Building
 Washington, D.C.

Dear Chairman Lucas, Ranking Member Peterson, and members of the Committee:

Thank you for the opportunity to provide input on the upcoming farm bill reauthorization. Given the increasing need for food assistance in our state and the declining supply of Federal commodity support, I strongly urge you protect and strengthen nutrition programs in the 2012 Farm Bill.

At the South Texas Food Bank, we see every day how important Federal nutrition programs are in our community and how effectively they are working to ensure that struggling South Texans can provide enough food for their families. Currently, the South Texas Food Bank serves 700,000 people annually.

Nationally, the Feeding America network of more than 200 food banks has seen a 46 percent increase in food bank clients from 2006 to 2010, and we are struggling to keep up with increased demand. Without strong farm bill nutrition programs like The Emergency Food Assistance Program (TEFAP), the Supplemental Nutrition Assistance Program (SNAP), and the Commodity Supplemental Food Program (CSFP), food banks across the country would be struggling even more to meet the increased need.

We recognize the challenge you face drafting a farm bill in a time of deficit reduction, but we are also sensitive to the tremendous, ongoing need in our state. As such, we have two key priorities for the farm bill.

First, we urge you to strengthen TEFAP to help us keep up with increased demand. TEFAP supplies about 25 percent of the food moving through Feeding America's national network of food banks. But because of strong commodity prices, TEFAP food declined 30 percent last year, and our food bank is struggling to make up the difference. We urge you to make TEFAP more responsive during times of high need by tying increases in mandatory funding to a trigger based on unemployment levels. We also propose to enhance the Secretary of Agriculture's authority to make TEFAP bonus purchases at times when the need for emergency food assistance is high—for example high unemployment—in addition to times of weak agriculture markets so that the program can respond to both excess supply and excess demand.

Second, we also strongly urge you to protect SNAP from harmful funding cuts or policy proposals that would restrict eligibility or reduce benefits. SNAP has responded effectively to growing need in the recession with benefits that are timely, targeted, and temporary. The average SNAP household has an income of only 57 percent of the Federal poverty guideline, and 84 percent of benefits go to households with a child, senior, or disabled person. The program is working to support vulnerable Texas families, and our food bank or local agency partners would not be able to meet the increased need for food assistance if SNAP were cut.

These programs have a real impact on your constituents, many of whom must rely on the food bank and Federal nutrition programs to meet their basic food needs. I would encourage you to visit the food banks serving your district before the Committee marks up a farm bill so you can meet our clients and see firsthand how Federal nutrition programs are working to protect vulnerable Americans from hunger.

The South Texas Food Bank believes that feeding our neighbors is a shared responsibility, and food banks like ours rely on a variety of food streams to support our communities, including generous support from partners in retail, manufacturing, and agriculture. However, the Federal Government is an equally critical partner through programs like TEFAP, SNAP, and CSFP, and with tremendous, ongoing need in our state, ongoing Federal support is more important than ever.

As the House Agriculture Committee moves forward with farm bill reauthorization, our food bank urges you to protect the nutrition safety net and offers the specific recommendations below.

Sincerely,

Rev. Jose Angel
Elia Solis

Carla Gonzalez
Sandra Vela

Brenda Pardue

Feeding America Farm Bill Priorities

The Emergency Food Assistance Program (TEFAP): TEFAP is a means-tested Federal program that provides food commodities at no cost to Americans in need of short-term hunger relief through organizations like food banks, pantries, soup kitchens, and emergency shelters. Nutritious food commodities provided through TEFAP are an essential resource for Feeding America food banks. As the demand for food remains high at food banks across the country, a continuous stream of TEFAP is necessary for the provision of a steady emergency food supply.

- TEFAP commodities account for approximately 25% of the food moving through Feeding America food banks. Food banks combine TEFAP with private donations to maximize TEFAP benefits far beyond the budgeted amount for the pro-

gram. In this way, food banks exemplify an optimum model of public-private partnership.

- TEFAP has a strong impact on the farm economy. According to USDA's Economic Research Service, producers of commodities provided as bonus TEFAP (those purchased by USDA to intervene in weak agricultural markets) receive an estimated 85¢ per dollar of Federal expenditure. Producers of other commodities provided through TEFAP receive about 27¢ per dollar. By contrast, only about 16¢ of every retail food dollar goes back to the farmer.
- Declines in Section 32 funding and strong agriculture markets resulted in a 30% decline in TEFAP purchases during FY 2011. This decline is expected to continue in FY 2012 as food banks continue struggling to meet increased need. The shortfall between supply and demand will only worsen when the SNAP ARRA benefit boost expires, as many participants turn to food banks to make up for the reduction in benefit levels.

Farm Bill Priorities for TEFAP:

- Make mandatory funding for TEFAP food more responsive to changes in need by providing a trigger that ties funding to unemployment levels
- Enhance Secretary of Agriculture's authority to purchase bonus commodities in times of high need for emergency food relief in addition to times of low commodity prices so the program is responsive both to excess supply and excess demand
- Reauthorize funding for TEFAP Storage and Distribution Funds at \$100 million per year
- Reauthorize funding for TEFAP Infrastructure Grants at \$15 million per year

Supplemental Nutrition Assistance Program (SNAP): SNAP is the cornerstone of the nutrition safety net, providing over 46 million low-income participants with monthly benefits via a grocery debit card. Eligibility is based on household income and assets and is subject to work and citizenship requirements. SNAP is one of the most responsive safety net programs, expanding quickly to meet rising need during the recession. The program is targeted at our most vulnerable; 76% of SNAP households contain a child, senior, or disabled member, and 84% of all benefits go to these households.

- As the number of people unemployed grew 110% from 2007 to 2010, SNAP responded with a 53% increase in participation over the same period. As the economy slowly recovers and unemployment begins to fall, SNAP participation and costs too can be expected to decline.
- The SNAP accuracy rate of 96.19% (FY10) is an all-time program high. SNAP error rates declined by 61% from FY 1999 to FY 2010, from 9.86% to a record low of 3.81%.
- SNAP benefits supplement a household's food budget but are insufficient to last most participants through the month, causing many participants to rely regularly on food banks. Among Feeding America food pantry clients receiving SNAP benefits, over ½ (58%) reported having visited a food pantry at least 6 months or more during the prior year.
- The average SNAP household has a gross monthly income of \$731 and countable resources of \$333, consists of 2.2 persons, and participates in the program for 9 months. The average household receives a monthly benefit of \$287, or about \$1.49 per person per meal.

Farm Bill Priorities for SNAP:

- Protect SNAP by opposing proposals to cap or reduce funding, restrict eligibility, reduce benefits, or otherwise impede access or benefit adequacy. Recent proposals to block grant the program would prevent it from responding effectively to fluctuations in need, and efforts to limit broad based categorical eligibility would increase administrative costs and access barriers.
- Restore the cut to the SNAP ARRA benefit boost used to pay for the 2010 child nutrition bill and phase out the boost in a way that protects families from a cliff in benefit levels.
- Encourage better nutrition by maintaining nutrition education, incentivizing the purchase of healthy foods, and ensuring that retailer standards balance adequate access to stores with access to a range of healthy foods and moderate prices.
- Build on SNAP's strong record of integrity and payment accuracy by issuing guidance to states on the eligibility of lottery winners and college students and upgrading resources and technology for trafficking prevention.

Commodity Supplemental Food Program (CSFP): CSFP leverages government buying power to provide nutritious food packages to approximately 599,000 low income people each month. Nearly 97 percent of program participants are seniors with incomes of less than 130% of the poverty line (approximately \$14,000 for a senior living alone). Currently, 39 states and the District of Columbia participate in CSFP. Another six states (CT, HI, ID, MD, MA, & RI) have USDA-approved plans, but have not yet received appropriations to begin service.

- CSFP is an efficient and effective program. While the cost to USDA to purchase commodities for this package of food is about \$20 per month, the average retail value of the foods in the package is \$50.
- CSFP helps to combat the poor health conditions often found in seniors who are experiencing food insecurity and at risk of hunger. CSFP food packages, specifically designed to supplement nutrients typically lacking in participants' diets like protein, iron, and zinc, can play an important role in addressing the nutrition needs of low-income seniors.
- Many seniors participating in CSFP are able to have their food boxes delivered directly to their homes or to seniors' centers nearby, an important benefit for those who are homebound, have limited mobility or do not have convenient access to a grocery store.

Farm Bill Priorities for CSFP:

- Transition CSFP to a seniors-only program by phasing out eligibility of women, infants, and children while grandfathering in current participants.

SOUTHERN ARIZONA FOOD BANK LETTER

I am a [fill in the blank] of the Community Food Bank of Southern Arizona. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs. If you are looking for a source of funding to offset the cost of these programs I suggest you stop playing politics and start earning your pay. The best way to pay for essential services is through taxation. Stop cutting taxes and start raising the revenue needed to fund essential services before it is too late . . .

SPRINGFIELD FAMILY CENTER

Name: Stephanie Gibson, Executive Director.

Comment: My name is Stephanie Gibson and I am the Executive Director at the Springfield Family Center in Springfield, Vermont.

I want to make a point to share with you support of the farm bill.

With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the slow but continued improvement of the economy.

We need a strong farm bill to make sure that we can put food on the table for those that are still struggling.

At a time when we need to be able to offer the safety-net emergency services the most, that is when it seems we get the least support.

I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the many people struggling with hunger in my community and your State, and I urge you make them a priority in the next farm bill.

I invite you to visit our organization, talk with our clients and see first hand the real struggles we are facing every day.

Best,
STEPHANIE GIBSON,
Executive Director,
Springfield Family Center,
[Redacted],
Springfield, VT 05156.

[Redacted].

ST. EDWARD FOOD PANTRY

Name: Anita Fein.

Comment: Please do not cut or touch items like SNAP or TEFAP! These are very important to help us with our struggles to feed families in need. These are not frivolous items and are very important as we try our best to help the hungry. In large cities, such as NYC, we need this. With the economy still not what it used to be, our numbers have surged to record levels. Wages are not keeping up with surging prices for housing, medical, utilities and transportation expenses. Please help us and do not make the cuts that will hurt more people than you realize!

ST. LOUIS AREA FOODBANK

Name: Ryan Farmer.

Comment: Hunger is a national problem. Please protect programs like TEFAP and SNAP.

ST. MARTIN'S FOOD PANTRY

Name: Charlaine McAnany.

Comment: Please leave SNAP money alone. We still have so many people hungry as seen by St. Martin's Food Pantry and the Oak Park, River Forest Food Pantry's increased clientele.

ST. PETER'S FOOD PANTRY

Name: Julie Scott.

Comment: I am the Overall Pantry Coordinator for St. Peter's Food Pantry in Phoenixville, PA. Our pantry is run 100% on assistance from our government as well as donations of food and money from our community. Our pantry continues to see new clients every week who need our assistance to feed themselves and their families. Feeding our neighbors is a public-private partnership, and my team of volunteers are doing our part and we want our government to do its part. Cutting anti-hunger programs will increase hunger in America, as well as the associated health care, educational, and economic costs of food insecurity and poor nutrition. Please remember the families who are struggling in our community, and we urge you to protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill reauthorization. Thank you for your consideration.

ST. VINCENT DE PAUL—OUR LADY QUEEN OF PEACE CHURCH

Name: Sheila M. Rust.

Comment: Please pass the agriculture bill to feed more Americans and helping the needy. I am one of them. I work at St. Vincent De Paul at Our Lady Queen Of Peace Church in New Port Richey Florida and also help with Feeding America. There are many, many hungry and needy people in Pasco county that need our help. There are many who are still unemployed and have used all the unemployment available to them that aren't counted in the amount of people on unemployment so it looks like there are less on unemployment but it is because they can no longer get it and are still not working. Many people are homeless or living in a home they bought and it is in foreclosure. We the people need help! Please help us!

Sincerely,
SHEILA M. RUST

ST. VINCENT DE PAUL SOCIETY FOOD PANTRY

Name: Alejandro Concha.

Comment: St. Vincent de Paul Society has a Food Pantry in Homestead, Fl. Each week, on Saturdays, from 8 to 10 a.m. or until we ran out of food, we provide food directly to more than 250 families. I would like to invite you to come and visit us when we are distributing food for the hungry. I am an older American and a volunteer to fight hunger in America.

STEVENS COUNTY

Name: Ruth Vetsch, Director.

Comment: I am the director of a small food bank in Stevens County. Even though we are small the food is drastically needed. The assistance for energy is vital to folks in this area. We earn our own funding however we really need whatever comes down the line from the State and other sources. If you close this avenue of

assistance you will see an increase in the crime rates. People will feed their kids one way or another. Think about this very carefully, please.

TEXAS

Comment: I am a [fill in the blank] of Feeding America and our local food bank in [fill in the blank]. We need to have a strong farm bill to help put food on the table for America's vulnerable population, such as children, the elderly, and low income families. Feeding and nourishing our needy population should be a number 1 priority, I feel success starts there for a person and a community. Please put together and pass a farm bill that will preserve and strengthen programs like TEFAP, SNAP, and CSFP. Feeding programs are absolutely vital to our foundation of our country.

Thank you,

| | | | |

THE FOOD BANK OF WESTERN MASSACHUSETTS

Name: Andrew Morehouse, Executive Director.

Comment: I am the executive director at The Food Bank of Western Massachusetts. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, EFSP and WIC. These programs are a lifeline to the 112,000 people struggling with hunger in your district, and I urge you to make them a priority in the next farm bill.

THE FOODBANK, INC.

Name: Deborah Combs.

Comment: I am an employee of The Foodbank, Inc. in Dayton, Ohio. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

THE GREATER PITTSBURGH COMMUNITY FOOD BANK

Name: Robert Bilas.

Comment: I am actively involved in the public/private partnership of solving the hunger problem in the U.S. and do my part by donating money and food to local and national food banks (Feeding America and The Greater Pittsburgh Community Food Bank). I would also like the Federal Government to do its part by reauthorizing and strengthening the SNAP, TEFAP and CSFP/Senior Boxes programs.

The Federal Government will make the problem of hunger worse if it cuts programs like these. There are millions of Americans who depend upon these programs for basic food needs. These are NOT luxury items; they are necessities in many cases to the millions of families struggling in today's bad economic conditions. Cuts to these programs will increase hunger and cause additional problems in health, education and other areas.

I urge the House Agriculture Committee to renew and strengthen these programs when it considers the 2012 Farm Bill.

THE MIGRANT FARMWORKERS PROJECT

Name: Paul Snyder, Food Pantry Supervisor.

Comment: I am the Food Pantry Supervisor at The Migrant Farmworkers Project. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement in the economy. We need a strong nutrition title in the farm bill to make sure that we can put food on the table for those who are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the thousands of people struggling with hunger in your district, and I urge you to make them a priority in the next farm bill.

THE MILTON FAMILY COMMUNITY CENTER

Name: Cheryl Alwine, Food Shelf Manager.

Comment: I am the Food Shelf Manager at The Milton Family Community Center in Milton Vermont. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the improvement of the economy. We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the many people struggling with hunger in your district, and I urge you make them a priority in the next farm bill.

THE SALVATION ARMY

Name: Janet Charleston, Food Pantry Manager.

Comment: I manage a food pantry at The Salvation Army and I see the demand growing all the time. I feel that because of the prices of other items such as gas and housing and utility and not getting enough or any food stamps and other government programs they have increased their use of pantries in their area. This is not going to change unless the cost of living improves. So programs such as SNAP CSFP and TEFAP need to be stronger programs not diminished programs. I hope your committee will really look at the amount of need around all our communities. I am only speaking for the issues in Lake County, In but I am sure it is the same in any city, county or state in this country. Please do the right thing and strengthen these programs and give our Food Bank as well as our at risk families better programs.

THE SALVATION ARMY EAST CHICAGO CORPS

Name: Capt. Daniel Paredes.

Comment: I am a Captain Daniel Paredes of The Salvation Army East Chicago Corps in East Chicago. We run a Food Pantry and a Feeding Program. As our Congress District Representative you may know that our families in our community are struggling. The income level in East Chicago is lower than the U.S. poverty income level. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

THE SHARING CENTER

Name: Tonia Vogel.

Comment: I am an EMPLOYEE of The Sharing Center. Right now, many families in our community are struggling. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—our food bank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

TREASURE COAST FOOD BANK

Comment: As an [fill in the blank] of Treasure Coast Food Bank, I am writing to share my concern about hunger in Florida. With unemployment still high and many Americans still struggling to make ends meet, anti-hunger programs are helping many of our neighbors just put food on the table.

Nearly 50 million Americans are living in food insecurity. While food banks, churches, and pantries are doing great work in our community, charity alone cannot meet the need for food assistance. Feeding our neighbors is a public-private partnership.

Congress should do its part by continuing to support anti-hunger programs like the Supplemental Nutrition Assistance Program (SNAP), The Emergency Food Assistance Program (TEFAP), and the Commodity Supplemental Food Program (CSFP), all of which are authorized in the farm bill.

Cutting anti-hunger programs will increase hunger in America. Given the associated health care and educational costs of hunger and poor nutrition, cuts to anti-hunger programs are short-sighted.

I ask you to please remember the families who are struggling in our country, and urge you to protect and strengthen important anti-hunger programs like TEFAP, SNAP, and CSFP in the 2012 Farm Bill re-authorization. Thank you.

VENTURA COUNTY FOOD BANK

Name: Fran McNeill, Program Officer.

Comment: As a resident of Camarillo, one of your constituents, and the Program Officer at Ventura County's Food Bank, I urge you to support a strong farm bill that protects vital food programs like TEFAP, SNAP, and CSFP. Many of our children, families, and seniors are hungry and forced to choose between food and medicine, rent, transportation to look for or keep their jobs. Food is the most basic need and cutting these programs when hunger is at an all time high is not the way to balance the budget. I urge you to make these programs a priority in the next farm bill.

VERMONT FOODBANK

Comment: In Vermont, we struggle with hunger—14% of our residents are at risk of not having enough food to meet basic needs. One-third of people seeking charitable food assistance have children in their household—it adds up to 21% of our children living in food insecure households. To purchase the food needed to close the meal gap each year would cost over \$41 million dollars. We are trying many innovative solutions to address our hunger issues, from improving charitable food systems to combating root causes of hunger.

I am a [fill in the blank] of the Vermont Foodbank, in helping organize their largest fundraiser. While our event is successful, it is not enough for the demand in the state. Right now, 1 in 7 Vermonters is struggling with hunger. With increased demand for emergency food assistance, high food and gas prices, and declines in TEFAP commodities—a major source of the food we distribute—the Vermont Foodbank is having difficulty meeting the needs of our community. We need a strong farm bill to make sure that struggling families can put food on the table. I ask that you pass a farm bill that protects and strengthens programs like SNAP, TEFAP, and CSFP. Our community cannot afford cuts to these programs.

Thank you!

WILLING PARTNERS, INC.

Comment: I am the [fill in the blank] in Galax. We operate a thrift store and a food bank for residents of Carroll and Grayson Counties and the City of Galax. With traditional food streams declining, we continue to find it difficult to meet the needs of our community, despite the publicized improvement of the economy. We need a strong farm bill to make sure that we can put food on the table for those that are still struggling. I ask that you pass a farm bill that protects and strengthens programs like TEFAP, SNAP, and CSFP. These programs are a lifeline to the southwest Virginia people struggling with hunger in your district, and I urge you to make them a priority in the next farm bill.

Comment: In North Carolina, 1 in 6 citizens do not know where their next meal is coming. Programs like SNAP, TEFAP, and CSFP play an important role in keeping our Nation strong and healthy. Every day I see families, children, and seniors struggling to put food on their table. I urge you to pass a strong farm bill to protect SNAP, TEFAP, and CSFP Programs so the citizens in our well-developed country will not go hungry.
