LAWRENCE J. BRADY
STAFF DIRECTOR

November 12, 2014

Wayne T. Smith
Chairman of the Board, President and Chief Executive Officer
Community Health Systems, Inc.
4000 Meridian Blvd.
Franklin, TN 37067

Dear Mr. Smith:

I am writing to request information about a significant data breach recently reported by Community Health Systems.

Community Health Systems, which operates 206 hospitals across the United States, announced that hackers had broken into its computers and stolen data on 4.5 million patients.¹ This represents the second largest health information breach in history and the largest hacking-related health information breach ever reported.² A hacking group known as APT 18 operating from China reportedly gained access to patient names, Social Security numbers, physical addresses, birthdays, and telephone numbers, putting these individuals “at heightened risk of identity fraud.”³

The increasing number of cyber-attacks and data breaches is unprecedented and poses a clear and present danger to our nation’s economic security. Each successive cyber-attack and data breach not only results in hefty costs and liabilities for businesses, but exposes consumers to identity theft and other fraud, as well as a host of other cyber-crimes. Your ability to protect consumers and safeguard their personal information is central to earning and maintaining consumer confidence in our healthcare system.

¹ *Hack of Community Health Systems Affects 4.5 Million Patients*, New York Times (Aug. 18, 2014) (online at <http://bits.blogs.nytimes.com/2014/08/18/hack-of-community-health-systems-affects-4-5-million-patients>).

² *Hackers Directly Targeting Health Care Organizations, FBI Warns*, iHealthBeat (Aug. 21, 2014) (online at www.ihealthbeat.org/articles/2014/8/21/hackers-directly-targeting-health-care-organizations-fbi-warns).

³ *Community Health says data stolen in cyber attack from China*, Reuters (Aug. 18, 2014) (www.reuters.com/article/2014/08/18/us-community-health-cybersecurity-idUSKBN0GI16N20140818).

The increased frequency and sophistication of cyber-attacks on both public and private entities highlights the need for greater collaboration to improve data security. Your company's knowledge, information, and experience with this recent data breach will be helpful as Congress examines federal cybersecurity laws and any necessary improvements to protect sensitive consumer and government financial information. To aid in this oversight, I request that Community Health Systems provides the following information:

- (1) a description of the manner and method by which your company first discovered that its health information data systems were under cyber-attack in 2014;
- (2) the approximate number of patients that may have been affected by the breach;
- (3) the findings from forensic investigation analyses or reports concerning the breach, including findings about vulnerabilities to malware, the use of data segmentation to protect personally identifiable information, and why the breach went undetected for the length of time it did;
- (4) the individuals or entities suspected or believed to have caused the data breach, and whether they have been reported to the appropriate law enforcement agencies;
- (5) a description of data protection improvement measures your company has undertaken since discovering that its payment data systems had been breached in 2014;
- (6) a description of the data security policies and procedures that govern your company's relationships with vendors, third-party service providers, and subcontractors, including the manner by which your company ensures that entities performing work on your behalf have reasonable data security controls in place to thwart cyber-attacks; and
- (7) any recommendations for improvements in cybersecurity laws or the coordination of efforts to identify and respond to emerging trends in cybersecurity risks to help prevent future data breaches.

Please provide the requested information by December 19, 2014. We also request a briefing from your Chief Information Security Officer or similar chief IT security professional by November 25, 2014. If you have any questions about this request, please contact Timothy D. Lynch at (202) 225-0312. Thank you for your cooperation in this matter.

Sincerely,

Elijah E. Cummings
Ranking Member
