Mike/Jeff --

Relatedly, the attached slidedeck was evidently worked up by JSOC, replete with a code name and an exfiltration plan. Though it was perhaps meant only for internal use at DOD, it has now circulated widely enough that it has made its way to other agencies (including ours) through non-SRAP channels. Needless to say, we need to get all this back in the box as quickly and effectively as possible.

Dan

Jeff, Mike, as you can see from the emails below, someone informed USAFE that Bergdahl might arrive at Landshtul in the next ten days, at which point USAFE asked our Embassy in Berlin to coordinate with the Germans, which we will spike if it has not already occurred. Let's try to get his under control. Jim

Jarrett,

Are you able to confirm any of this, or "not deny" it? Embassy Berlin's interest here is making sure the Ramstein angle is covered - the email below references possible DoS outreach already. Any truth to that?
