Attn: Stephen A. Brumagin, Project Manager

RE: P/N SAC-2008-01333 REVISED

Interstate 73 is an important project to me as a resident of the 7th District of South Carolina. If Interstate 73 is constructed, it will alleviate congestion, allow more volume on our roads, and provide a new evacuation route. The areas which I-73 would traverse meet the official federal definition of economically distressed. Currently, the Grand Strand is only accessible by state highways. I understand that interstate construction has environmental impacts and I am also aware of the mitigation plan submitted by the S.C. Department of Transportation to the U.S. Army Corps of Engineers for approval.

For these reasons, I _____ the I-73 project and its permit application.
