PROCEEDINGS AND DEBATES OF THE 115th CONGRESS, SECOND SESSION

Vol. 164

WASHINGTON, WEDNESDAY, JULY 25, 2018

No. 125

House of Representatives

The House met at 10 a.m. and was called to order by the Speaker pro tempore (Mr. LAMBORN).

DESIGNATION OF SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
July 25, 2018.

I hereby appoint the Honorable DOUG LAMBORN to act as Speaker pro tempore on this day.

PAUL D. RYAN,
Speaker of the House of Representatives.

MORNING-HOUR DEBATE

The SPEAKER pro tempore. Pursuant to the order of the House of January 8, 2018, the Chair will now recognize Members from lists submitted by the majority and minority leaders for morning-hour debate.

The Chair will alternate recognition between the parties. All time shall be equally allocated between the parties, and in no event shall debate continue beyond 11:50 a.m. Each Member, other than the majority and minority leaders and the minority whip, shall be limited to 5 minutes.

RECOGNIZING THANET NATISRI

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. BOST) for 5 minutes.

Mr. BOST. Mr. Speaker, I rise today to recognize Thanet Natisri of Marion, Illinois, for his role in rescuing 12 young soccer players and their coach from a flooded cave in Thailand earlier this month.

Thanet, a groundwater expert educated at SIU Carbondale, began doing charity work in his native country of Thailand 3 years ago. He was in Thailand assisting rural residents in fixing

their water problems when he got the call from the Thai military. Within 3 hours, he was on a plane to go help divert rising water levels in the cave.

The rescue operation used his expertise to divert water and allow divers to reach the soccer team. After 18 grueling days, which captivated the world, the boys and their soccer coach were safely rescued.

Thanet, you played a vitally important role in saving 13 lives. Southern Illinois is proud.

RECOGNIZING OFFICER JAMES HOLDER

Mr. BOST. Mr. Speaker, I rise today to recognize Officer James Holder of Pinckneyville Police Department for receiving the Illinois State Bar Association's Law Enforcement Award. The Law Enforcement Award recognizes officer conduct that promotes justice and brings honor and respect to the entire criminal justice system.

Officer Holder was acknowledged for his involvement in a search and rescue operation during a major fire in an apartment building next to the Perry County Jail. He forcibly entered the building, notifying residents to immediately evacuate and clearing housing units to ensure no one was present.

He proceeded to identify the source of the fire and work with other first responders as traffic and crowd control.

Thank you, Officer Holder, for your brave service, and thank you to all of our first responders who are out there risking their lives every day to keep our communities safe.

TIME TO CORRECT OUR FISCAL COURSE

The SPEAKER pro tempore. The Chair recognizes the gentleman from Oregon (Mr. BLUMENAUER) for 5 minutes.

Mr. BLUMENAUER. Mr. Speaker, every day there is a head-spinning moment with someone who is willing to push the Presidential powers to the point of abuse.

Trump is undermining freedom of the press with unprecedented attacks.

He cast doubt on the integrity and competence of United States intelligence services.

He has an administration that is manipulating the data of a dishonest agency evaluation of the impact of monuments status that protects hundreds of thousands of acres and endangered species like the magnificent sage-grouse.

Today's outrage is a plan to use the Commodity Credit Corporation to funnel another \$12 billion for a bailout of American farmers. You know, most farmers and ranchers don't want a government bailout. They would like to be able to farm. They would like to be able to market. They would like to be able to sell their products without the threat of Trump's trade war.

Soon after Obama took office, inheriting the worst economy since the Great Depression, we have seen steady private sector employment growth for 9 consecutive years. Now, after inheriting a strong and growing economy, Trump and his enablers in the Republican Party are threatening this progress with a trade war that increases prices for American consumers, for American businesses, and is raising their costs.

It is hard to keep track of everything. Trump is involved with an all-out war on the Affordable Care Act. After utterly failing in his promise—remember, he was going to provide better healthcare for more people at lower cost. Who knew healthcare was complicated. Instead, his administration is raising insurance costs for millions in the individual market while destabilizing insurance for the rest of us.

There were promises of tax reform, making it simpler and fairer. Instead, we have hopelessly complicated the Tax Code. We have given massive tax cuts for many people who didn't need them. We are going to be watching for

taxes being raised on homeowners across the country over the next 10 years.

And, as a result of these actions for the budget and the taxes, we have doubled the budget deficit this year, with the prospect of deficits every year of a trillion dollars or more as far as the eye can see.

After Republicans have cut over \$2 trillion in taxes since 2001 for just the top 1 percent, what is the solution our Republican friends are offering to deal with the consequences? Look at the budget they just passed. Mr. Speaker, \$2 trillion of cuts in programs for everybody else: Social Security, Medicare, Medicaid, the Affordable Care Act.

At some point, the public is going to catch on to what is happening to them. In fact, maybe they already are. Maybe that is the reason that the Republican tax cuts are less popular than Bill Clinton's tax increase.

It is time that we take a step back, while we still can, and get back on the appropriate fiscal course. It does not mean trade wars and providing money for people who don't need it.

Let's allow the economy to function without gimmicks and bailouts.

CTE BILL A WIN FOR ALL AMERICANS

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. THOMPSON) for 5 minutes.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I rise today to speak about the Strengthening Career and Technical Education for the 21st Century Act, which has seen unanimous support in both Chambers of Congress, something I hope continues today. I proudly championed this bill because I truly believe that passing it will be a win for students, for workers, and for every person in America.

Mr. Speaker, America is ready for a win.

In June 2017, the House unanimously passed this bill to strengthen career and technical education. On Monday, the Senate also approved it unanimously, and we are now just steps away from getting this critical legislation to the President's desk to be signed into law.

This bill has been supported by House Education and the Workforce Committee Chairwoman VIRGINIA FOXX and Ranking Member BOBBY SCOTT. I thank them both. I want to thank the Democratic lead, Representative RAJA KRISHNAMOORTHY, and my CTE Caucus co-chairman, Representative JIM LAN-GEVIN.

House and Senate leaders have brought this legislation to their respective floors because they know it is an important bill.

Mr. Speaker, this legislation aims to restore rungs on the ladder of opportunity, because all Americans deserve a good-paying, family-sustaining job.

Too often, we see students pushed down the college-for-all pathway that just doesn't work for some people.

But CTE has established itself as a path that many high-achieving students choose in pursuit of industry certifications and hands-on skills that they can use right out of high school in a skills-based education program or in college.

By modernizing the Federal investment in CTE programs, we will be able to connect more educators with industry stakeholders and close the skills gap in this country.

Mr. Speaker, 6.7 million jobs, good jobs, are currently available because people need to be qualified to get them.

In fact, today, right here in Washington, CTE will be highlighted. The House Education and the Workforce Committee has invited 24 innovators from across the country for the bipartisan Innovation Forum and Showcase. Dedicated professionals will share with Congress and the public how they are addressing the Nation's education and workforce development changes.

I am proud to count among these professionals Mr. Joe Luther from my district. Mr. Luther is the horticulture and landscaping instructor at the Central Pennsylvania Institute of Science and Technology, located in Pleasant Gap, Centre County, Pennsylvania.

Mr. Luther uses hands-on instruction to inspire students to reach great heights and achieve success in life. He brings real-life scenarios into his classroom at every opportunity to show students what their future can be like in the workforce.

I know every Member of this House wants to give every American, regardless of where they come from, the best opportunity to succeed. That is why I urge my colleagues to support the Strengthening Career and Technical Education for the 21st Century Act when it comes back to the floor today with the Senate amendment.

This bill and the amendment will modernize the Federal role in our Nation's CTE program, which is long overdue; but, most importantly, it will restore rungs on the ladder of opportunity. It will inspire a new generation of builders and thinkers and makers and creators, and it will give every American a shot at the American Dream, which is opportunity and success in life.

RECOGNIZING UPCOMING CENTENARIANS

The SPEAKER pro tempore. The Chair recognizes the gentleman from North Carolina (Mr. BUTTERFIELD) for 5 minutes.

Mr. BUTTERFIELD. Mr. Speaker, I rise this morning to recognize three of my constituents who are all celebrating birthday 100 very, very soon. Mrs. Cora Jones "Boot" McLeod, Mrs. Christine Johnson Umstead, and Mrs. Annie Belle Gilmore Rogers are all members of historic Mount Vernon

Baptist Church located in Durham, North Carolina, pastored by my friend Dr. Jerome J. Washington.

These centenarians, Mr. Speaker, will soon celebrate their birthdays, surrounded by family and friends. These women have committed much of their lives to the development of their family and community. They are devout Christians of the missionary baptist faith who love their church.

Mrs. Cora Jones Boot McLeod was born on August 8, 1918, in Raleigh, North Carolina, and attended Rosenswald Schools. She started her own business in Durham as a professional beautician. Mrs. McLeod has spent all of her life encouraging her family and community to be independent and faithful in their pursuits. Her leadership is reflected in the business community and at her beloved Mount Vernon Baptist Church, where she served as church usher.

Mrs. Christine Johnson Umstead was born on August 16, 1918, in Roxboro, North Carolina, located in Person County, just north of Durham. She came to Durham as a food service professional. In retirement, she has encouraged others to become active senior citizens by setting an example and providing motivation to all. Mrs. Umstead joined Mount Vernon in 1948 and has remained an active church member.

Over the years, she has provided faithful leadership and fellowship as a Christian missionary, a member of the senior citizens organization, and the J.E. Best Bible Class.

Finally, yet importantly, is Mrs. Annie Belle Gilmore Rogers. Mrs. Rogers was born on October 20, 1918, in Durham, and her ancestors were founding members of Mount Vernon Baptist Church. Over the past 100 years, she has exemplified the value of faith, education, and resourcefulness.

She attended what was then Hillside Park School, which we now know as Hillside High School, in Durham. She went on to become a teacher's assistant at C.C. Spaulding Elementary School, where she helped educate young minds who would go on to become future leaders.

Mrs. Rogers recognized the value of managing her resources and teaching her family to do the same. She was among the first members and leaders of the Mount Vernon Baptist Church Credit Union, at a time when African Americans had few opportunities for investing their limited resources or borrowing money to develop individual wealth. The credit union stands today as the last functioning church credit union in the State, with members of Mrs. Rogers' family serving on its board.

□ 1015

Mr. Speaker, it is with great pride this morning that I speak these words today from the floor of the House of Representatives. These three strong and powerful African American women

have worked and labored to empower their families and Mount Vernon Baptist Church into a spiritual force serving the Durham community.

I am grateful to these remarkable women for their love of humanity and contributions to their community. I ask my colleagues to join me in wishing these three great Americans our very best wishes as they each celebrate 100 years of life.

SUSTAINABLE CONTROL OF THE HIV/AIDS EPIDEMIC

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Florida (Ms. ROS-LEHTINEN) for 5 minutes.

Ms. ROS-LEHTINEN. Mr. Speaker, I rise today to call attention to one very remarkable young woman. Earlier this year, I had the honor of meeting Masedi while visiting Botswana as part of a delegation trip.

Sadly, Botswana is still struggling with HIV/AIDS. Every year, there are 14,000 new infections, and 1 in 5 adults in the country has HIV/AIDS. Masedi is one of these adults.

Born with HIV/AIDS 23 years ago, she lost both of her parents and many other family members to this disease. But when my husband, Dexter, and I visited with her in Botswana, she was full of optimism and determination.

Masedi's story is remarkable, and what she has had to overcome is truly inspiring. She has made it her mission to educate the people of Botswana on HIV/AIDS to dispel any rumors or stigmas related to this disease and to one day see a Botswana free of this terrible ordeal.

We were so inspired with this visit, and she is truly a shining role model for the entire country.

That is why our PEPFAR program is so vitally important, Mr. Speaker. In just over 15 years, PEPFAR has saved and improved millions of lives while preventing millions more in HIV infections. Thanks to American leadership, PEPFAR, and remarkable individuals like Masedi, we can achieve the goal of sustainable control and eradication of the HIV/AIDS epidemic.

CONGRATULATING BOB ROSASCO'S EFFORTS WITH MINTS INTERNATIONAL SEMINARY

Ms. ROS-LEHTINEN. Mr. Speaker, I rise today to congratulate and thank my dear friend Bob Rosasco for his efforts with MINTS International Seminary and its seminary-in-prison degree program.

Since 2010, this organization has been teaching theology in Florida's prisons in order to educate, to train, and to equip members of the prison population, so they can teach others about religion and the word of God.

This program provides inmates with the necessary tools and training that prepare them to reenter society and become productive members of the community after their release. Studies have shown that those who participate in education programs, including reli-

gious programs, while incarcerated are much less likely to reoffend.

Because of Bob Rosasco and the efforts of so many like him, this program now has more than 200 students participating, with plans to keep expanding beyond Florida and across the United States.

We are blessed to have Bob Rosasco as a member of our south Florida community, and I commend him for continuously giving back to others by sharing his time, his knowledge, and his passion.

RECOGNIZING RYAN DOOLEY

Ms. ROS-LEHTINEN. Mr. Speaker, I rise today to recognize Ryan Dooley, a dedicated Federal employee, a public servant, and my friend who lives in my congressional district in beautiful south Florida.

I first met Ryan 14 years ago, shortly after he arrived in Miami as Assistant Director of the State Department's Miami Passport Agency. Ryan's commitment to service is unparalleled, and because of his efforts, he was soon promoted to Director of the Miami Passport Agency.

When the San Juan Passport Agency opened its doors to the public in 2014, Ryan was chosen to lead that office as well. For the first time, our fellow Americans living in Puerto Rico and the U.S. Virgin Islands gained direct access to much needed-passport services, and that was truly a historic milestone.

Today, Ryan is responsible for helping countless citizens across a huge geographic area. Ryan and his staff are consummate professionals dedicated to serving their communities efficiently and accurately. Under Ryan's leadership, they have met and overcome numerous passport workload challenges.

I have had the opportunity to work with Ryan on multiple occasions, both in Miami and here in D.C., and I can say that he is respected and admired by his colleagues at local, State, and Federal levels.

I also know numerous State Department employees who got their start in Miami and were mentored by Ryan and encouraged to excel in their public service paths.

In his career that has taken him around the world, Ryan has always promoted the ideals of freedom, of democracy, and of being responsible to the citizens of our great Nation.

I would like to say, on behalf of my constituents: Ryan Dooley, thank you so much for all of your tireless work. I commend you for a job well done. I hope that you continue to serve the people of south Florida, Puerto Rico, and the U.S. Virgin Islands faithfully. I wish you and your partner, Gerald Darby, the best in the years to come. Gracias, amigo.

MINORITY MENTAL HEALTH AWARENESS MONTH

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Illinois (Ms. KELLY) for 5 minutes.

Ms. KELLY of Illinois. Mr. Speaker, I rise today to mark Minority Mental Health Awareness Month.

Mental health challenges do not discriminate. They affect Americans of all ages, races, backgrounds, and genders. It doesn't matter if you are from a blue State, a red State, or a swing State. Mental illness is in your community. It affects your family and exists in your friend group and with your coworkers.

Tragically, while mental health challenges impact so many people across the board, too many never see or get treatment because of the stigma associated with mental healthcare. It shames them into silence.

So it is fitting that this year's theme is "CureStigma." While stigma keeps far too many from seeking and receiving the care that they need, the silence of stigma plagues African American populations and other ethnic groups.

It is a sad and staggering statistic that African Americans are 20 percent more likely to report serious psychological distress than their White counterparts but just 25 percent will seek care. There is a tragic inequity in that figure, given that 40 percent of their White counterparts will seek care.

Is this a matter of stigma? Of access to care, culturally competent care, and associated resources? Or perhaps a combination of them all.

Mr. Speaker, it is past time that we tackle the stigma associated with mental health that keeps too many trapped without hope, recourse, or recovery.

As for access to care, thanks to the Affordable Care Act, all health insurance plans are required to cover mental health services, just as they would cover cancer screenings and tetanus shots. Still, this administration, either through cruelty or willful ignorance, has actively attacked the mental health requirement and sought to push bad or, as I call them, junk insurance plans that neglect mental health services.

We must do better. Congress must be better. Too many, especially in vulnerable populations, are still in desperate need of this care.

That is why I am proud to be cosponsoring the Mental Health in Schools Act offered by my good friend, Congresswoman GRACE NAPOLITANO. This bill will provide comprehensive mental health programs to students in schools, with a special focus on dealing with trauma and violence. Congress can make a world of difference today, if we pass this bill.

I am also proud to be cosponsoring the Veterans Mental Health Accessibility Act introduced by my colleague from Pennsylvania, Congressman MATT CARTWRIGHT. His bill would make veterans who serve in combat zones eligible for more mental health services through the VA.

This is really commonsense legislation. With more than 20 of our brave veterans committing suicide daily, it is of critical importance that we pass this bill.

In closing, I want to remind everyone, my colleagues, and those watching at home on C-SPAN that mental health is something that we can all work on. Simple, small, everyday things can make a huge difference. Here is my personal top five.

First, take care of your body. It is all connected. Even a little bit of exercise or even a little more sleep can improve mood, reduce stress, and improve your health all around.

Second, find a stress management strategy that works for you. For some, it is reading or running, while for others, it is coffee with friends or takeout and a movie. Do whatever works for you.

Third, surround yourself with good people, be it family, friends, or someone you can trust in your community.

Fourth, volunteerism is a great way to get out of your own head and give back to your community. It is good for you and great for your community.

Finally, if you or someone you love needs help, please get it. Don't let stigma hold you back.

Mr. Speaker, as Minority Mental Health Awareness Month comes to a close, let's cure stigma.

HONORING THE BURLE FAMILY

The SPEAKER pro tempore. The Chair recognizes the gentleman from Georgia (Mr. COLLINS) for 5 minutes.

Mr. COLLINS of Georgia. Mr. Speaker, I rise today to recognize Ryan and Abby Burle of Gainesville for creating a book drive for families with newborns who are receiving lifesaving medical treatment.

The couple was inspired to establish the Mighty Three neonatal intensive care unit book drive after their triplets, Maggie, Max, and Miller, underwent medical treatment in Northeast Georgia Medical Center following their births. For months, Ryan and Abby could not hold their babies while they received crucial medical attention.

As teachers, the young couple decided that they could leverage reading to communicate with the triplets using the sound of their voice to develop a bond with the three tiny patients. The Burles designed the Mighty Three NICU book drive to give families two books for each baby receiving treatment at Northeast Georgia Medical Center's Gainesville hospital.

Initially, the couple set out to collect 850 books but quickly surpassed that goal. Through their tireless work, the Mighty Three NICU book drive has provided more than 2,000 books to the hospital on Spring Street.

Mr. Speaker, I commend Ryan and Abby for their dedication to encouraging families during times of need, and I wish the two of them much joy as they raise their three healthy children.

CELEBRATING THE 20TH ANNIVERSARY OF THE TY COBB MUSEUM

Mr. COLLINS of Georgia. Mr. Speaker, I rise today to join northeast Georgia in celebrating the 20th anniversary of the Ty Cobb Museum.

The museum opened its doors on July 17, 1998, to highlight the legacy of Ty Cobb, a Banks County native and Baseball Hall of Fame member.

Cobb was a Major League Baseball outfielder who set 90 MLB records during his career, some of which stand today. He played for the Detroit Tigers for 22 years, and, later, for the Philadelphia Athletics for two seasons.

Cobb's remarkable achievements include 4,065 runs scored and batted in, 897 total stolen bases, and a batting average of .366 at the close of his career. Additionally, Cobb was the first player ever inducted into the National Baseball Hall of Fame.

In the community of Royston, The Georgia Peach is remembered for his philanthropic kindness. He was responsible for the Cobb Memorial Hospital and the Cobb Educational Fund, which have left a lasting legacy of love for his hometown.

Mr. Speaker, the Ty Cobb Museum captures significant moments throughout Cobb's life, from his roots in Royston to this success as part of American's pastime. I congratulate the staff of the museum for two decades of service to their Georgia community and wish them well in their endeavors.

CONGRATULATING CAROLINE LEWALLEN

Mr. COLLINS of Georgia. Mr. Speaker, I rise today to recognize Caroline Lewallen of Jaemor Farms in Alto.

As a member of the Hall County Farm Bureau and Georgia Farm Bureau's Young Farmers and Ranchers program, Caroline's commitment to our State's agricultural industry earned her the program's Excellence in Agriculture award.

Caroline holds degrees in agricultural education and leadership from the University of Georgia and Texas A&M University, respectively. She began her career as a student teacher and later became an agricultural fellow in the office of one of my former colleagues, Congressman Jack Kingston.

Today, Caroline serves as the agritourism and marketing coordinator for Jaemor Farms. At Jaemor Farms, Caroline manages all events, like the festival honoring my favorite peach, the annual Georgia Belle Peach Festival. She also runs Jaemor Farms' marketing and social media presence, regularly attracting attention from across the State and the country.

Mr. Speaker, Caroline has played an important role in promoting the work of the northeast Georgia farmers by communicating the importance of locally grown produce for communities, and I want to congratulate her on this award and wish her well throughout her career.

HONORING KIT DUNLAP

Mr. COLLINS of Georgia. Mr. Speaker, I rise today in recognition of Kit Dunlap, president and CEO of the Greater Hall Chamber of Commerce, who recently received the Georgia Association of Chamber of Commerce Executives' Legacy Award.

The Georgia Association of Chamber of Commerce Executives' Legacy

Award is the association's highest honor, recognizing executives who have dedicated many years to successfully improving their local chambers of commerce.

Kit has served as the Greater Hall Chamber's top official for more than 20 years. Her ambition and compassion for others has allowed her to excel as a leader. Throughout her involvement in the local chamber of commerce, she has transformed the Greater Hall Chamber by bringing together a well-connected economic development team. This team has helped increase capital investment, job availability, and job retention in the Hall County area.

Additionally, Kit has managed multi-million dollar initiatives, including the HALLmark campaign and Vision 2030, which helped fund community-based education and economic development programs.

I congratulate my friend Kit Dunlap on this award and thank her for her service to the Hall County business community.

Mr. Speaker, as Kit's representative, I must end this speech by answering the question she asks at the end of each chamber meeting: What is the water level of Lake Lanier? Well, today, it is 1,071.89.

TRIBUTE TO A LOCAL HERO, ROBERT VON DRASEK

The SPEAKER pro tempore. The Chair recognizes the gentleman from Illinois (Mr. DANNY K. DAVIS) for 5 minutes.

Mr. DANNY K. DAVIS of Illinois. Mr. Speaker, I rise to pay tribute to Mr. Robert "Bob" Von Drasek, as he is better known. Bob was the most dedicated, committed, and loyal Saul-Alinsky-trained organizer who I have ever known.

Bob came to the south Austin community during a time of great turbulence.

□ 1030

The community was in the throes of a great transition from being 80 percent White to becoming 80 percent Black within a 10-year period of time. Blockbusting, panic peddling, redlining, disinvestment, and all manner of malfeasance were taking place. Police brutality and other forms of law enforcement misconduct were rampant.

I met Bob during this period. It was also during this time that the Organization for a Better Austin, under the leadership of Gail Cincotta, was organized; the South Austin Coalition Community Council, SACCC, was formed with Bob as a lead organizer; and I decided to run for the city council.

Over the years, I have followed Bob's work without exception. South Austin is practically an all African American community, except for a few merchants who never left the area, a few White citizens, school teachers, and policemen. Of course, Bob is White or Caucasian, and yet he won the hearts of the

community and the trust of the people. He has developed intimate relationships with many of the residents and, to many, he is like a member of their family.

Through Bob's leadership, SACCC became known as the top grassroots community organization in the Chicagoland area. Bob was always a great strategist, but the members, like Mr. Ed Bailey, Mrs. Irene Norwood, Mrs. Lillian Drummond, and Mr. George Lawson, were the voices.

Many people don't know it, but it was SACCC who led community reinvestment. It was SACCC who organized senior citizens. It was SACCC who led the fight for LIHEAP. It was SACCC who kept the Austin Bank on its toes. It was SACCC who united block clubs. It was SACCC who got people to join local school councils. And it was SACCC who got churches to open their doors for community meetings.

I have been in buildings with Bob where there was no heat. I have been in homes where there was no food. I have been on streets where there were no lights. I have been with Bob in allies where there was no hope. I have been with Bob and families after their relatives were shot.

Bob has worked to bring help to the helpless and hope to the hopeless. Bob VonDrasek, you are a good man, and I thank you and your family, your wife and children, for what you have meant to our community and to our world.

True soldiers are always reluctant to come off the battlefield, but there comes a time when we must put away our swords and shields to practice war no more. When that time comes, Bob, just know that you have made a difference. When you came to south Austin, newspapers were writing that it would be the next big slum. They did not know you and they did not know the people of south Austin. South Austin is not a slum. It is a vibrant, forward-thinking, and forward-moving community.

Bob, you have done the Master's work. You have fed the hungry, clothed the naked, brought hope to the hopeless, and help to the helpless. You have lifted spirits and you have taught people how to love, how to live, and how to work together.

I close, Bob, by leaving these words with, and for, you.

If when you give the best of your service, telling the world that the Savior is come, be not dismayed when men don't believe you, He understands, and will say, "Well done."

Oh, when I come to the end of my journey, weary of life and the battle is won, carrying the staff and the cross of redemption, He'll understand, and say, "Well done."

If when this life of labor is ended, and the reward of the race you have run, oh, the sweet rest prepared for faithful, will be His blest and final, "Well done."

But if you try and fail in your trying, hands sore and scarred from the work you've begun, take up your cross, run quickly to meet Him, He'll understand, He'll say, "Well done."

SERBIA AND AMERICA—100 YEARS

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas (Mr. POE) for 5 minutes.

Mr. POE of Texas. Mr. Speaker, 100 years ago, in 1918, President Woodrow Wilson declared July 28 as a National Day of Prayer for the Serbian people.

This was during World War I, the war to end all wars. American doughboys and leathernecks had arrived on the western front, holding the line against Germany's last offensive before it collapsed.

Meanwhile, the Serbian people were suffering under occupation by the central powers, who had launched a brutal invasion of Serbia.

Mr. Speaker, during World War I, one in four Serbian people were killed during that war. But the Serbian army had survived the invasion and was fighting alongside our allies to liberate their home. They were reinforced by many Serbian-Americans, who had returned to Europe to help their brothers.

President Wilson wanted America to honor the sacrifices of the Serbian people. In a speech marking the invasion of Serbia by the central powers, he said of the Serbians:

Nobly did they respond. So valiantly and courageous did they oppose the forces of a country ten times greater in population and resources. . . . While their territory has been devastated and their homes despoiled, the spirit of the Serbian people has not been broken.

As a Texan, I admire such defiance against overwhelming odds.

On that special day, President Wilson ordered a rare recognition to a foreign ally, by having the Serbian flag raised over the White House. That recognition had only occurred one other time in American history.

The spirit of brotherhood between the Americans and the Serbians, fighting shoulder to shoulder against tyranny, did not end there.

One of the most meaningful stories for Americans is the Halyard Mission during the dark days of the Second World War. Despite being under Nazi occupation, the Serbian people demonstrated their remarkable bravery once again, saving the lives of hundreds of Americans in the largest rescue operation of American airmen in history.

In 1944, American bombers were flying frequent missions to strike Germany's vital oil supplies in Romania as a part of the allied advance into Europe. The 15th Air Force led this effort by launching 20,000 sorties into Eastern Europe, with many of the missions flying over Nazi-occupied Yugoslavia. As many as 1,500 pilots and airmen were shot down during these air raids.

Serbians, who had been resisting Nazi forces since 1941, risked their own lives to rescue American aircrews in Yugoslavia and hide them from patrolling Nazis. These brave and noble Serbians cared for and protected Americans and allied pilots.

In August of 1944, the allied forces, including the 15th Air Force and the

Office of Strategic Services, devised a daring operation to evacuate hundreds of allied pilots being sheltered by the Serbian resistance in Nazi-occupied Yugoslavia. American aircraft flew into enemy territory and evacuated 500 airmen from the airfield built and protected by local Serbians near the village of Pranjani.

For over 60 years, this operation was kept secret from the American people. But now we can remember the courage of our Serbian friends and their stand against the Nazis.

Here, Mr. Speaker, is a photograph taken by the Serbian resistance, taking Americans who had been shot down in Serbia and taking them to the airfield, where they would be returned back to the American lines.

George Dudich, the father of my chief of staff, Elaine Dudich Stolze, when I was a judge in Texas, rescued many Americans who had been shot down in occupied Yugoslavia.

All these years later, we remain committed to the cause of freedom for both nations. We should work together to preserve each other's security.

The United States is now working with Serbia to improve its democracy, an independent judiciary, and fight corruption. A democratic Serbia with a strong rule of law is in America's interests and Serbia's.

We are united in keeping the hungry Russian bear from interfering in domestic affairs in Serbia. Russian disinformation efforts are designed to keep Serbia in its sphere of influence and poison our relationship. Nevertheless, Serbia's integration to the west has continued to move forward.

In 2006, Serbia joined NATO's Partnership for Peace program and, in 2015, signed an Individual Partnership Action Plan with the alliance to strengthen cooperation. And recently, the European Union has announced that Serbia would join the EU as early as 2025.

The prime minister and foreign minister of Serbia and numerous Serbs are in the Capitol today to promote U.S. Serbian relations.

So on this 100th anniversary of President Wilson's speech about the courageous Serbs of World War I, we reaffirm our joint partnership and friendship and a quest for liberty.

And that is just the way it is.

HONORING THE VICTIMS OF THE OCTOBER 1 SHOOTING IN LAS VEGAS

The SPEAKER pro tempore. The Chair recognizes the gentleman from Nevada (Mr. KIHUEN) for 5 minutes.

Mr. KIHUEN. Mr. Speaker, it has been 297 days since the worst mass shooting in U.S. history.

On October 1, 2017, 58 people were senselessly murdered at the Harvest Music Festival in Las Vegas, in my hometown, and more than 500 people were injured.

I still remember that day like it was yesterday. I remember going to Sunrise

Hospital and seeing 194 victims who had been shot or injured.

Since October 1, I have come to the House floor 58 times to honor each of the victims and to share their stories. For the last 9 months, my colleagues have listened to 58 separate speeches, and have looked at the pictures of the 58 victims. These stories have been met with silence by the majority.

Since October 1, members of the Nevada delegation have asked to, at least, hold a hearing on bump stocks, the device that contributed to the massive carnage in Las Vegas. Our letters have been met with silence by the majority.

Since October 1, Democrats, and a few Republicans, have introduced no less than 30 bills to combat gun violence in our country, yet these bills have been met with silence by the majority.

Since October 1, there have been more mass shootings in the U.S., including at the First Baptist Church in Sutherland Springs, Texas; at Marjory Stoneman Douglas High School in Parkland, Florida; and at the Capital Gazette in Annapolis, Maryland. These mass shootings have been met with silence by the majority.

At what point are my colleagues in Congress going to stop being silent?

At what point are they going to say: We have to do something; we have to take action?

The United States is in the middle of a gun epidemic. Every day, 96 Americans, Mr. Speaker, are killed by gun violence. Americans are 25 times more likely to be murdered with a gun than people in other developed countries.

Americans can no longer feel safe at churches, concerts, movie theaters, work, military bases, nightclubs, restaurants, shopping malls, grocery stores, baseball fields, congressional baseball fields, and, even worse, our children are no longer safe at school.

Since 2009, there have been 288 school shootings in the U.S. Today, little kids are afraid to wear light-up shoes to school because a gunman could see them when they have to hide for their life.

From the time of the mass shooting at Sandy Hook to the mass shooting at Parkland, the House of Representatives has held more than 40 moments of silence related to gun violence. However, in that same time, the majority refuses to consider any real piece of legislation, hold any hearings, or take any action that could reduce this gun violence epidemic.

□ 1045

And despite bipartisan support in this body to ban bump stocks, implement universal background checks, limit high-capacity magazines, or ban assault weapons, my colleagues say that nothing can be done to prevent gun violence in America. If that is true, why is the United States the only developed country that has this problem?

The truth is we can do something. We can take action. My Republican col-

leagues can put the American gun lobby first and the NRA and gun manufacturers, but the American people come first. We have to listen to the American people. We can pass bipartisan and commonsense solutions to prevent more shootings and to save more lives.

To my fellow Nevadans and Americans, I want you to know that, despite these roadblocks, we will keep fighting. Every day there are people here in Congress working tirelessly to make our country safer. Every day we are moved by your rallying cries and your stories; and every day, we will fight to end the gun violence epidemic in the United States.

MEMORIALIZING THE HISTORY OF THE FIRST BAPTIST CHURCH, BLACKSBURG, SOUTH CAROLINA

The SPEAKER pro tempore. The Chair recognizes the gentleman from South Carolina (Mr. NORMAN) for 5 minutes.

Mr. NORMAN. Mr. Speaker, I rise today, July 25, 2018, in our Nation's Capitol to formally memorialize the history of the First Baptist Church located in Blacksburg, South Carolina.

First Baptist Church of Blacksburg was originally called the Berea Baptist Church, organized over 146 years ago, on December 4, 1876. The original structure was located near the corner of Highway 29 and Mountain Street, near the old Berea cemetery. This building was used as a church, schoolhouse, and community meeting hall. The first people to be baptized in the original building were Mrs. Sally Little and Mattie Bridges.

The first mention of building a new church facility was the years 1906 through 1909, under the pastorate of the Reverend B.L. Hoke. A committee was formed to search for land to build the new church.

During the pastorate of Reverend C.W. Payseur, property located on the corner of Cherokee and Rutherford Streets was purchased from Mr. D.D. Gaston for \$500; and in the spring of 1912, construction began on the new building. The records indicate that W.A. Blalock and A.M. Bridges broke the first dirt, and D.A. Gold placed the first brick, with Miss Emma Cornwell placing the first mortar for the bricks.

The first service in the new church facility was held over 105 years ago in June 1913, and the name of the church was officially changed from the Berea Baptist Church to the First Baptist Church of Blacksburg. The first person to be baptized in the new building was Mr. Ben Ramseur.

In 1922, over 96 years ago, a house and 6 acres of land owned by Mr. Tracy Hardin was donated for the purposes of building a church parsonage, and in June of 1929, the church began construction on the first Sunday school rooms at a cost of \$2,300.

The property behind the existing educational building as it sits today was

purchased during the years between 1941 and 1950, and a new building fund was started. The church broke ground on the new building at a cost of \$87,500; and on Sunday, June 24, 1956, which was over 62 years ago, the church celebrated homecoming, with "Dinner on the Grounds" in the new social hall downstairs.

On June 11, 1961, all debt was paid off and a note burning service was held to celebrate this accomplishment.

On July 5, 1962, the church voted to begin construction on the present sanctuary to replace the old one which, at the time, had been destroyed. The committee overseeing the construction was comprised of 10 members representing each of the resident families.

The new sanctuary was completed in 1963 at a total cost of \$74,735, and the debt was paid off on May 2, 1979.

The building of the new parsonage located at 108 Lenzer Circle began in the 1970s and was completed in February of 1972. The debt was paid off, and the official burning service was held on February 23, 1975, to celebrate this accomplishment of paying off the debt.

In October of 1976, the church voted to sell the old parsonage and purchase the entire land located inside Lenzer Circle for a future recreational facility.

On December 1, 1993, the church purchased the property and buildings immediately next to the existing church sanctuary at a cost of \$35,000, with the debt paid in full on January 16, 1998.

The next major renovation and building came in 1995, where the church reaffirmed the idea of seeking to build a recreational facility beside the existing church sanctuary; and in June of 1996, the old grocery store known as the Sara Wilkins property was demolished to make way for the new construction.

In 1997, renovations and repairs were made to the existing educational building and exterior of the sanctuary, along with a new Allen organ for the sanctuary.

The construction of the new Family Life Center began in August of 1999, for a total cost of \$520,000, with the church only borrowing \$60,000. The building was completed and the dedication held in May of 2000, and the remaining debt was paid off in 2001.

In July of 2001, the church purchased the old library building located behind the existing sanctuary and education building where the church offices exist today.

The last renovations to the present sanctuary were renovated in 2014.

Mr. Speaker, it is my distinct honor to memorialize the 142-year history of the First Baptist Church of Blacksburg, which was organized on December 4, 1876, as we worship today in 2018, with the core mission being, then and now, service to Jesus Christ and the faithful teachings of the Christian Gospel.

WITHOUT THE RUSSIANS, TRUMP
WOULDN'T HAVE WON

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from

New Hampshire (Ms. SHEA-PORTER) for 5 minutes.

Ms. SHEA-PORTER. Mr. Speaker, I would like to read a column by Max Boot, conservative, and very well known. I am quoting completely.

“President Trump is willing, under duress, to briefly and begrudgingly admit that Russian meddling took place in 2016 before reverting to calling it a ‘big hoax.’ But he always maintains that the plot against America had no impact; he describes it as a ‘Democrat excuse for losing the ‘16 election.’ Faithfully echoing the President, other Republicans, such as House Speaker PAUL RYAN, say it’s ‘clear’ that Russian interference ‘didn’t have a material effect on our elections.’ White House Press Secretary Sarah Huckabee Sanders even claims that the U.S. intelligence community reached that conclusion.

“Not quite. Here is the intelligence community’s assessment, partially declassified in 2017: ‘We did not make an assessment of the impact that Russian activities had on the outcome of the 2016 election. The U.S. intelligence community is charged with monitoring and assessing the intentions, capabilities, and actions of foreign actors; it does not analyze U.S. political processes or U.S. public opinion.’”

To continue the story that Max wrote: “When then-CIA Director Mike Pompeo claimed last fall that the ‘intelligence community’s assessment is that the Russian meddling that took place did not affect the outcome of the election,’ his own agency rebuked him.

“While the intelligence agencies are silent on the impact of Russia’s attack, outside experts who have examined the Kremlin campaign, which included stealing and sharing Democratic Party emails, spreading propaganda online, and hacking State voter rolls, have concluded that it did affect an extremely close election decided by fewer than 80,000 votes in three States. Clint Watts, a former FBI agent, writes in his recent book ‘Messing with the Enemy,’ that ‘Russia absolutely influenced the U.S. Presidential election,’ especially in Michigan and Wisconsin, where Trump’s winning margin was less than 1 percent in each State.

“We still don’t know the full extent of the Russian interference, but we know its propaganda reached 126 million people via Facebook alone. A BuzzFeed analysis found that fake news stories on Facebook generated more social engagement in the last 3 months of the campaign than did legitimate articles: The ‘20 top-performing false election stories from hoax sites and hyperpartisan blogs generated 8,711,000 shares, reactions, and comments on Facebook.’ Almost all of this ‘fake news’ was either started or spread by Russian bots, including claims that the Pope had endorsed Trump and that Hillary Clinton had sold weapons to the Islamic State.

“Elsewhere on social media, tens of thousands of Russian bots spread pro-

Trump messages on Twitter, which has already notified 1.4 million users that they interacted with Russian accounts. The Russian disinformation, propagating hashtags such as #Hillary4Prison and #MAGA, reflected what the Trump campaign was saying. The Russian bots even claimed after every Presidential debate that Trump had won; whereas, objective viewers gave each one to Clinton.

“Russia also hacked voting systems in at least 39 States; and while there is no evidence that vote tallies were changed, Russians may have used that stolen data to target their social media or shared the results with the Trump campaign. The Senate Intelligence Committee found that ‘in a small number of States,’ the Russians may have been able to ‘alter or delete voter registration data,’ potentially disenfranchising Clinton voters.

“And then there was the crucial impact of the Russian hacks of Democratic documents disseminated primarily by WikiLeaks. The first tranche of stolen documents, more than 19,000 emails and 8,000 attachments, was strategically released on July 22, 2016, 3 days before the Democratic Convention. The resulting news coverage disrupted the Clinton campaign’s plans by creating the impression that the Democratic National Committee was biased against BERNIE SANDERS and forcing DNC Chairwoman DEBBIE WASSERMAN SCHULTZ to resign.

“The second tranche of stolen documents was released on October 7, just 29 minutes after The Post reported on the ‘Access Hollywood’ videotape in which Trump is heard boasting about grabbing women by the genitals. These emails, stolen from Clinton campaign chairman John Podesta, distracted voter attention by revealing the transcripts of lucrative speeches Clinton had given to Goldman Sachs, a populist boogeyman.

“A third release of stolen emails, on October 11, revealed that Democratic operative Donna Brazile, while working at CNN, had provided debate questions to Clinton during the primaries and that senior Democratic operatives, who were themselves Catholics, had exchanged emails disparaging Republicans who cherry-picked their faith for political gain. This fueled Trump’s narrative that the election was ‘rigged’ and that the ‘Clinton team’ was, as he said, ‘viciously attacking Catholics and Evangelicals.’ The latter charge, unfair as it was, proved especially important in Michigan, Wisconsin, and Pennsylvania, swing States with lots of Catholic voters.

“Little wonder that Trump said ‘I love WikiLeaks’ and mentioned its revelations 164 times in the last month of the campaign. ‘This WikiLeaks stuff is unbelievable,’ Trump said on October 12. Eight days later, he marveled, ‘Boy, that WikiLeaks has done a job on her, hasn’t it?’

“Now, by contrast, Trump and his apologists pretend Russian interven-

tion, including WikiLeaks, was no big deal. That beggars belief.”

The end of this is—and I am sorry I have to skip over some of it—is:

“That is the inconvenient truth that Putin Republicans won’t admit.”

THE IMPACT OF FOSTA

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Missouri (Mrs. WAGNER) for 5 minutes.

Mrs. WAGNER. Mr. Speaker, in April, my bill, the Fight Online Sex Trafficking Act, or FOSTA, became law. FOSTA allows Federal, State, and local prosecutors to go after the online businesses that are trafficking our children.

Signing FOSTA into law has decimated the online sex trade that fuels human trafficking in America. Scores of major websites that promoted sex trafficking and prostitution have shut down, and countless lives have been saved.

Our communities are better off now because of FOSTA: fewer victims are being trafficked; buyers are no longer able to easily purchase women and children; and fewer pimps are getting their payday.

The online slave trade has never been more fragile than today.

After passage of FOSTA, global ad volume declined 87 percent from the daily average. Websites that dominated the illegal sex trade shut down for fear of being prosecuted. Websites like Massage Tolls, The Erotic Review, and Escorts in College are gone.

Household names like Reddit, Google, PayPal, and Microsoft updated their terms of service to ensure that platforms aren’t being abused by traffickers.

Additionally, the Department of Justice shut down backpage.com, and its owners were arrested.

Right now, we have this criminal enterprise on its heels. Buyers and pimps don’t know where to turn, and traffickers are getting 90 percent fewer responses than they got on Backpage and the other leading trafficking sites that shut down.

The bottom line is websites are doing everything they can to avoid criminal liability, while trying to keep their criminal enterprise alive. But the loopholes that they were utilizing no longer exist.

Financial institutions are also cracking down on accounts used by trafficking. CC Bill, the payment processor of these porn and trafficking hubs stopped processing credit cards for websites that facilitate prostitution.

□ 1100

CC Bill was the domestic credit card processor of last resort, and websites are now struggling to find a viable alternative.

Together, we are putting the online slave trade out of business. As trafficking becomes less profitable, fewer victims will ever be sold and raped.

FOSTA is striking fear in the hearts of America's pimps and online predators.

Law enforcement is seeing real results, and that is why FOSTA is being called the most significant anti-trafficking law in nearly 20 years. Experts have repeatedly said that sex trafficking will flourish until market force of risk is increased and we create a real criminal deterrent. FOSTA establishes that deterrent, and as a result, fewer businesses will ever, ever enter the sex trade.

Sex advertising is at a new low for this decade. And this Congress has demonstrated that we can and will hold accountable the businesses that profit from the sale of our most vulnerable.

It is because of the massive bipartisan majorities of both the House and the Senate that FOSTA is law today. The results we are seeing in our communities are proof that Congress can, and does, work together to achieve real results for the American people.

Lives have been saved, fewer children and women are being sold into slavery, and trafficking and prostitution websites are being shut down. We are delivering real results for real people and our country is better off now because of it.

SECRETARY OF STATE POMPEO'S SENATE TESTIMONY

The SPEAKER pro tempore. The Chair recognizes the gentleman from New York (Mr. ENGEL) for 5 minutes.

Mr. ENGEL. Mr. Speaker, a few hundred feet north of here in the Senate, Secretary of State Pompeo will soon testify about President Trump's disastrous performance at the recent NATO summit and, worse, at his meeting in Helsinki with Russia's dictator, Vladimir Putin.

Now, if you are a Member of this body and you are interested in what Mr. Pompeo has to say on these topics, you had better turn on your television, because he isn't coming over here.

Secretary Pompeo is ignoring the House, despite our request that he come testify or brief our Members. He is blowing off half of the legislative branch. This is outrageous, and I bet if Secretary Pompeo were still a Member of this House, he would think so too.

We have too many unanswered questions, Mr. Speaker. What happened in President Trump's secret meeting with Putin? They sat together for 2 hours with no one else aside from interpreters.

What deals were made? What agreements were reached? The Russians are claiming that a great deal was discussed, but so far, we have heard nothing from this administration.

President Trump's actions in Helsinki were a betrayal of his duties. He had already insulted our closest friends and allies, and with the world watching, he sided with Putin over our own intelligence and law enforcement communities about Russia's attack on our democracy.

So we need to see Secretary Pompeo and Secretary Mattis and Director Coats. I recently joined with my fellow ranking members, Mr. SMITH on the Armed Services Committee and Mr. SCHIFF on the Intelligence Committee, demanding that these senior officials come to the Hill and shed light on what took place. We don't know, and the Secretary of State is not coming to the House to tell us.

We have gotten no response to our requests. With Secretary Pompeo set to appear in the Senate, that is really a slap in the face to this body. Every Member of this body should object to the fact that this administration won't give us the time of day. I object, and I will keep pushing until we get the answers we need.

MUELLER RESOLUTION

The SPEAKER pro tempore (Mr. REED). The Chair recognizes the gentleman from Indiana (Mr. ROKITA) for 5 minutes.

Mr. ROKITA. Mr. Speaker, I stand here today ultimately seeking justice for the American people and to end what our President has rightfully described as a witch hunt.

For too long, our resources have been wasted on Robert Mueller's probe into Russian collusion in our 2016 elections. Not only has this probe dragged on for over a year, but it has undermined our entire system of justice at this point while giving Washington elites and their biased counsel a pass to work above the law, exempt from any boundaries.

Through my Mueller Resolution, I am calling for us to call for the termination of the probe if no evidence of Russian collusion can be provided. And, again, after over a year, no evidence has been provided. It is time for the restoration of the rule of law back into our Justice Department, and that is why I am imploring my colleagues to fight alongside me by signing on to this resolution. Let's work together to end the clear manipulation of power against our President.

The President has the American people's prosperity and security at the top of his priorities.

Let's look at the results so far. Let's look at his track record. The economy is booming, regulations have been cut, and we are leading the world again.

This witch hunt against our President is unprecedented and it is uncalled for.

The Democrats have become the party of obstruct and resist, obstruct and resist, obstruct and resist.

The Dems call Trump's tax cuts crumbs, even though it benefits millions of Americans. Those \$1,000 bonuses that are the result of the tax cuts and the economy booming are putting more food on the table, more security in the home, help with childcare, and everything else. They are anything, but crumbs.

The Democrats are calling for the abolishment of ICE, even though they

protect millions of Americans, even though they protect us. Since when has this body, since when has a party become so resistant, become so obstructionist against law and order, against law enforcement, against our fellow citizens who are protecting us.

The Democrats are out of touch with the American people.

It is time to throw our full support behind the President.

Just look at this week in the Senate. Senator COREY BOOKER said that anyone who supports Judge Kavanaugh, President Trump's next nominee for the Supreme Court, is "complicit in evil."

Mr. Speaker, how far have we gone? How out of touch is one political party in this Nation?

Let's support the President when he wants to put America First, and all that means. We saw that with NATO, he is calling on the other nations to finally pay their fair share, to do what is right, to do what they agreed to. If we have to be the world's police force, at least we should have some help paying for it.

And the same with what is going on at the U.N. We pay, we pay, we pay, the taxpayers pay and pay and pay, yet we don't get the services we deserve or the leadership that we also deserve. It is time to put America First. Other countries have to help support.

Let's support the President in leading again. Let's support the President in making America First again.

IMPEACHMENT IS NOT DEAD

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas (Mr. AL GREEN) for 5 minutes.

Mr. AL GREEN of Texas. Mr. Speaker, and still I rise.

I am proud, once again, Mr. Speaker, to stand in the well of the House. I am proud to do so today, Mr. Speaker, in defense of liberty and justice for all. Mr. Speaker, if we know the truth, it can set us free.

A truth: A Quinnipiac Poll, Mr. Speaker, as of July 3, this month, this year, a poll indicates that 49 percent of Americans believe that the President of the United States is a racist, 49 percent, nearly 50 percent of the country. Wonder why? Could it be because of Charlottesville? Could it be because of a Muslim ban? Could it be because of the way this President has instituted policies, such as the one that has impacted Latinos at the border, taking babies from their mothers, segregating them such that babies don't have contact with their parents? Forty-nine percent of the people believe that the President is a racist.

Mr. Speaker, in the same poll, 55 percent believe that he has emboldened people who hold racist beliefs to express those beliefs publicly. The President of the United States is having an adverse impact on society. He is causing people to do ugly things.

Mr. Speaker, the polls also show, this is a Harris Poll, that 42 percent believe

that the President of the United States of America should be impeached. That number would be higher, by the way, if, not but for, the effort to suppress impeachment. And I must compliment the people who are engaged in that effort. They have done exceedingly well. Some people dare not say the word "impeachment."

I am so glad, however, so thankful, so grateful that Dr. King was not guided by polls, because there are some polls that would cause persons to do what they should not.

If you are waiting on the polls to tell you that the President ought to be impeached, you may be waiting a long time. If you are waiting on the polls to get to 60, 70, 80 percent, you may be waiting a long time.

I am so glad that Dr. King did not wait for the polls to tell him to protest segregation and discrimination. The bus boycott probably wouldn't have taken place in Montgomery if there had been a wait for the polls. They probably wouldn't have crossed the Edmund Pettus Bridge if there had been a wait for the polls.

I am so glad that people of goodwill will stand up to bigotry, will take a stand. They don't let political expediency trump the moral imperative to speak out and speak up. I am so glad that there are people who put the moral imperative above political expediency.

And finally, this: For those of you who worship at the altar of polls, when President Clinton was impeached, 29 percent of the people thought that he should be impeached, 29 percent.

There are some people who are not guided by polls. I am one of them. Bigotry emanating from the Presidency is impeachable because of the harm that it is doing to society. Impeachment is not dead.

The SPEAKER pro tempore. Members are reminded to refrain from engaging in personalities toward the President.

AMERICA IS WINNING AGAIN

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. KELLY) for 5 minutes.

Mr. KELLY of Pennsylvania. Mr. Speaker, obviously we live in alternative universes.

Mr. Speaker, America is winning again, and before we embark on the August recess, let's take into account what just 18 months of unified Republican government has meant for the American people.

According to the IMD World Competitive Center's 2018 rankings, the United States of America has overtaken Hong Kong as the world's number one most competitive economy thanks to faster economic growth and a supportive atmosphere for scientific and technological innovation. Our entire stock market is hovering around all-time highs.

Our national unemployment rate has reached its lowest level in 18 years. Female unemployment has reached its lowest levels since 1953. That is over 65 years ago. Black and Hispanic unemployment have reached their lowest levels ever.

More than 3.7 million new jobs have been created since President Trump took office, including 358,000 new jobs in manufacturing. In contrast, more than 16,000 manufacturing jobs nationwide were lost in 2016, the year before President Trump took office.

□ 1115

In 2017, an average of 16,333 manufacturing jobs were created per month; and last month, 26,000 new manufacturing jobs were created, bringing it to a total of 358,000 new jobs in manufacturing since President Trump's inauguration in January of 2017. And it continues to grow today.

The U.S. currently has 6.6 million job openings. It is at an all-time high. There are now more job openings than there are job seekers in the United States for the third straight month. In May, new hires rose to 5.75 million. That is the highest level in 17 years and the second highest level on record. An all-time high of 155.6 million Americans now have jobs.

Now, back home in Pennsylvania's Third Congressional District, which is soon to be its 16th Congressional District, the unemployment rate has dropped significantly in all seven counties. In Erie County, unemployment is now at an 18-year low, and in Crawford County, it is at a 42-year low. Wages for workers in Pennsylvania and across America have grown steadily by almost 3 percent over the past year and are continuing to climb.

Jobless claims, which are also known as unemployment benefit filings, have reached a 48-year low. That is half a century. Customer confidence has reached its highest level since 2001. Job market confidence and small business confidence are at their highest levels ever.

Since President Trump signed the Tax Cuts and Jobs Act in December of last year, businesses have created more than 1.3 million new jobs for American workers. And thanks to the tax cuts, more than 650 companies and counting are reinvesting billions of dollars into their businesses and have given more than 4.5 million American workers and counting major bonuses or pay raises or benefit increases.

In my home district, this has included employees for NexTier Bank, Erie Insurance, PNC Bank, Walmart, Starbucks, McDonald's, Chipotle, Home Depot, the National Fuel Gas Distribution Corporation, and many more. Nationally, more than 100 United States utility companies have lowered bills for customers in 48 States. Since February of this year, 90 percent of American wage earners have been opening bigger, less taxed paychecks with more take-home pay.

In my home district, the average tax cuts for individuals is \$1,230. For families of four, it is \$2,427. Those are hardly crumbs. In over 10 years, households will enjoy an average of more than \$18,000 in take-home pay, and these are dollars that they have earned and now they get to spend it the way they want to as opposed to sending it to the government for the government to spend it the way the government would like to.

The Tax Cuts and Jobs Act has also established the brand-new opportunity zones, a program to incentivize private investors to make long-term investments in communities that have faced economic hardships, which means even more jobs are on the way. The New York Times has called this provision the first substantial Federal attempt to aid those communities in more than a decade.

Mr. Speaker, in every measurable way, all Americans are better off now than we were just 2 short years ago. In every measurable way, America is winning again.

SCHOOL SAFETY

The SPEAKER pro tempore. The Chair recognizes the gentleman from Ohio (Mr. WENSTRUP) for 5 minutes.

Mr. WENSTRUP. Mr. Speaker, I rise today to talk about school safety. I present as a doctor, a healthcare professional, as a father, and as a Representative that is open to new ideas from people who are really attempting to do something to try to make our schools safer and better for our children.

As a doctor, I see violence as a public health crisis which is multifaceted, with different contributing factors to consider and with preventive strategies to implement. That is why I want to share with you what a couple of organizations in my district are doing in an attempt to tackle some of the lesser explored potential factors contributing to violence within our schools, among our students, and growing in our society.

It begins with an organization called Screen Education. Screen Education is a Cincinnati-based organization that seeks to understand, scientifically, how technology and social media impacts kids.

Screen Education and EMI Research Solutions, which is an online market research supplier, also from Cincinnati, partnered with Stark Statistical Consulting of Albuquerque, New Mexico, to conduct a survey of students. While their full analysis contains much insight, I would like to share three statistics that I found particularly shocking:

Sixty-eight percent of students said they witnessed someone being bullied online at least several times a year;

Thirty-one percent of students said they had seen online bullying result in physical violence; and

When asked if they felt that using social media will contribute to conditions that can result in school shootings, 73 percent of the students said “yes.”

Now, to be clear, I am not saying that social media is the sole cause of shootings or suicides, but these statistics are statistics that should shock everyone. Recent findings say revenge is a strong motivation for school shootings and that among students, homicide perpetrators were more than twice as likely as their victims to have been bullied by peers.

These are more than just statistics. They are the reported experiences of our Nation’s children on a daily basis, both in and outside of school. So this is an example of a problem that clearly could and should be addressed and that our society surely has the means to deal with.

Some organizations are stepping up to do just that. Bully Bully is a Cincinnati-based firm that was created out of a disconnect that the founder noticed between widespread bullying in our schools and the often reactive, largely ineffective ways of addressing that harassment.

Bully Bully is developing an anonymous reporting app that not only allows students to provide information regarding antagonistic situations, but also assists school administrators in analyzing and addressing these incidents and supporting victims of harassment.

Bully Bully’s stated goal is to never allow another incident of intimidation or harassment lead to a school fatality or suicide. What they are saying is: Here is a problem. It might be a factor in violence, and I think we have the means to stop it. So here is a solution. Let’s try it.

In my experience, Mr. Speaker, there is rarely a simple solution to a public health crisis. You need to try multiple solutions across multiple fronts. Physical or verbal intimidation may be a facet of this public health crisis that we haven’t paid enough attention to but ought to.

I am glad we have Americans like those in my Ohio district who are willing to try and solve part of a large problem. Evidence has suggested that students who get harassed by their peers tend to grow up more socially anxious with less self-esteem and require more mental health services. Hundreds of thousands of students skip school each day out of fear and anxiety.

It may be a more pervasive problem than we think, actually. Recent research by Screen Education on 12- to 16-year-olds at Camp Livingston in Bennington, Indiana, found that students were largely happier by being deprived of their smartphones. They were more engaged and connected to one another as people when removed from the cyber world of drama, gossip, and aggression.

Instead of being forced to react to student violence when tragically nec-

essary, perhaps we should focus on equipping the adult who spends all day with these students with the means to support and guide them.

Let’s keep looking for ways to make schools safer for our children and maybe, just maybe, we can make the school experience better and safer for our children as a result.

WORKFORCE TRAINING AND DEVELOPMENT

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. SMUCKER) for 5 minutes.

Mr. SMUCKER. Mr. Speaker, I rise today to speak on a topic that should continue to be in the forefront of our agenda here in Congress: workforce training and development.

Before coming to Congress, I owned and operated a small construction company in Lancaster County, and when we worked to expand our footprint in central Pennsylvania and sought out new markets to expand the business, we faced a serious problem: Many times, there just simply were not workers available to fill the jobs that we needed to fill in order to expand. Qualified or trained workers were just simply unavailable.

Just recently, I met with half a dozen of the Nation’s largest staffing agencies. They told me today that this has reached crisis proportions. They are seeing companies all across the country being faced with the same problem that I was faced with as a business owner, and companies now are making decisions on where to locate new facilities, where to expand based on the available workforce in that area. Sometimes, that is offshore rather than right here in America.

I have seen the skills gap firsthand. I have managed through it, understood the impacts of it, and so now, in Congress, I am working to try to fix it. One of the best ways that we can lift people up, improve their standard of living, and create more opportunity is to connect them with a good-paying, family-sustaining job. Let’s be honest: the best antipoverty program is a job.

Right now, our economy is booming, consumer optimism is rising, and American manufacturing has risen in each of the last three quarters. We have sustained economic growth, and jobs are being created all across the country. In fact, there are roughly 6 million jobs available right now.

Ways and Means Chairman KEVIN BRADY said it best when he said, recently: “We have gone from a nation that asks, ‘Where are the jobs?’ to one that asks, ‘Where are the workers?’”

One of my priorities in Congress has been to work to expand opportunities for work-based learning, where individuals get real experience from real professionals as they are learning.

I was very happy to see the Strengthening Career and Technical Education for the 21st Century Act just came

back from the Senate. We will be, hopefully, passing that onto the President’s desk this afternoon.

There is additional work that we can do; therefore, I have introduced additional legislation that will continue this effort. H.R. 5153, the USA Workforce Tax Credit Act, would address the urgent need to ensure that current and future American workers are prepared for the jobs available in today’s 21st century economy.

By establishing a new Federal tax credit, this legislation would encourage donations for community-based apprenticeship programs, career and technical education, workforce development, and educational preparedness, and it would encourage partnerships with companies looking to sponsor these programs.

Encouraging investments in organizations and programs that are preparing our workforce for the jobs of today means that more people will be connected with a job. It means more families will be improving their standard of living. It means that people will thrive off the dignity that jobs provide.

But it is really more than just an investment in workforce training programs. It is an investment in the American people.

There are so many different paths to obtaining a good-paying job. I have my own experience of running my construction company during the day while I was taking college courses at night. I never did quite obtain that bachelor’s degree, but I gained the skills necessary for my industry.

My experience isn’t that different from so many people in this country. I know firsthand that there is no one-size-fits-all solution to finding a good job or helping others get connected with one. We have to ensure that our educational system is preparing workers to succeed in the 21st century. We have to invest in our people. I believe that this legislation makes a down payment and puts us on the right path.

It is my hope that Congress advances this legislation to change lives, support families, lift people up, and support our growing economy.

ENERGY DIVERSIFICATION FOR EUROPE

The SPEAKER pro tempore (Mr. FITZPATRICK). The Chair recognizes the gentleman from Arkansas (Mr. HILL) for 5 minutes.

Mr. HILL. Mr. Speaker, America is better off. America is better off because U.S. crude exports have more than doubled since January 2017, and production is up 12 percent so far this year alone.

Since Congress lifted the 40-year ban on oil exports in 2015, U.S. producers now export between 1.5 and 2 million barrels of crude every day. Lifting the ban has filled pipelines and sparked a surge of investment in new technology and shipping infrastructure around the United States.

□ 1130

Today, U.S. crude imports have dropped 7.5 million barrels per day, as we rely on that increased domestic production and our friends in Canada.

Lifting the ban has allowed us to be in competition with the two highest producing crude oil countries in the world, Saudi Arabia and Russia. According to the International Energy Agency, this year, the United States is expected to surpass Saudi Arabia and rival Russia as the world's leading producer of crude oil.

This comes as Germany is working with Russia on a pipeline that will deliver more than 50 billion cubic meters of natural gas from Russia to Germany. During the recent NATO summit in Brussels, President Trump was right to strategically question Germany's further reliance on Russia's natural gas.

Our liquefied natural gas and oil delivered to the Adriatic, North Sea, and Baltic seaports offer our allies in Europe strategic diversification both from OPEC and from Russian dominance for our friends in Western and Central Europe, their consumers, and their industries.

Mr. Speaker, America is better off. I commend President Trump for raising this important issue on his recent trip to Europe, and I am proud of our work in Congress to enhance America's global energy leadership.

RECOGNIZING DR. DAN TULLOS

Mr. HILL. Mr. Speaker, I rise today to recognize a good friend and a key figure in education and communication sciences in Arkansas, Dr. Dan Tullos.

Dr. Tullos recently retired from Harding University, where he served since 1979 as a professor, program director, and chair of the Communication Sciences and Disorders Department. Under his guidance, the communication sciences and disorders program has grown from a major offered under the oversight of the Department of Communication to a separate department with two undergraduate majors and a graduate program.

Throughout his career, Dan has been honored by his colleagues, students, and industry leaders with well-deserved recognition and awards. Most notably, he was the 2015 recipient of the Frank R. Kleffner award, which recognizes an individual's outstanding contributions to communications.

For his devotion to youth development, education, scouting, and a better world that has improved the lives of countless individuals across Arkansas and the globe, I congratulate Dr. Tullos on his great career and his retirement.

HONORING PAT DOWNS

Mr. HILL. Mr. Speaker, I rise today to honor an outstanding leader who has transformed the realm of nonprofits in Arkansas, Pat Downs of the United Way of White County.

Pat retired earlier this year as the executive director of the organization

after 29 years of service. Her selflessness, passion, and work ethic inspire all who collaborate with her in White County, around the community, and in the workplace.

Helping raise more than \$11 million for associated agencies, Pat's decades of leadership had an indelible impact on central Arkansas. I thank Pat for her outstanding service to the United Way and send best wishes for her future endeavors.

SOCIALIST POLICIES SABOTAGE VENEZUELA

The SPEAKER pro tempore. The Chair recognizes the gentlewoman from Washington (Mrs. McMORRIS RODGERS) for 3 minutes.

Mrs. McMORRIS RODGERS. Mr. Speaker, the United States was founded on the fundamental principles of individual liberty and that all are created equal. As the late President Reagan once said: "Freedom is never more than one generation away from extinction."

We see this sad truth in nations around the world. So many live under the dark shadow of oppression. They are called captive nations.

I was recently introduced to a young man with big dreams named Tito. He is from Venezuela, and he is currently pursuing his master's at Washington State University. Life is tough in Venezuela, and it became very difficult for him when he was going through a routine checkup and found that his white cell blood count was too high. Unfortunately, he wasn't properly diagnosed because the healthcare system is woefully inadequate. Even help had been denied.

It wasn't until he was able to fly to Houston to have a bone marrow test and was diagnosed with leukemia that he got the help that he needed.

Once, Venezuela was not only the richest country in South America, it was one of the top 20 richest countries in the world. Today, it is one of the most economically oppressed. The IMF is reporting that inflation could top 1 million percent by year's end.

Chavez and Maduro have managed to sabotage this once vibrant and prosperous democracy with socialist policies, corruption, and authoritarian rule. Chavez once said that he was "convinced that the path to a new, better, and possible world is not capitalism. The path is socialism."

Today, in that new world, the government is telling its citizens to eat their own pets, lest they starve to death. What was once a vibrant cultural center and top tourist destination is the crime capital of the world. The average citizen has lost 20 pounds. Instead of a better world, there is a refugee crisis, and millions are fleeing to neighboring countries.

The promises never materialized, and the people are suffering, people like Tito.

Maduro's stubborn pursuit of socialism is hurting millions. Of course,

Maduro would not be able to cling to power were it not for Cuban support. And then you have other countries like Nicaragua ruled by the tyrant Daniel Ortega, where we have seen the elimination of the freedom of press and suppression of habeas corpus rights.

We, as Americans, must stand in solidarity with people who long to be free. We must support legislation like the Venezuelan Humanitarian Assistance and Defense of Democratic Governance Act that passed the House overwhelmingly last year.

We must have a strategy to help the people of Venezuela. We must do more to ensure that authoritarian regimes do not have the financial capacity to keep oppressing their people.

This story has been repeated throughout history where socialist leaders rise to power, offering promises that are never kept. The people suffer.

It is a reminder of why America is so unique. The fruits of our labor belong to us, we the people, not the government. That is why freedom is so important.

MESSAGE FROM THE SENATE

A message from the Senate by Ms. Lasky, one of its clerks, announced that the Senate has passed bills of the following titles in which the concurrence of the House is requested:

S. 2278. An act to amend the Public Health Service Act to provide grants to improve health care in rural areas.

S. 2779. An act to amend the Zimbabwe Democracy and Economic Recovery Act of 2001.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until noon today.

Accordingly (at 11 o'clock and 36 minutes a.m.), the House stood in recess.

□ 1200

AFTER RECESS

The recess having expired, the House was called to order by the Speaker pro tempore (Mr. CURTIS) at noon.

PRAYER

Right Reverend Bishop Irinej Dobrijevic, Serbian Orthodox Diocese of Eastern America, New Rochelle, New York, offered the following prayer:

Lord God Almighty, God of justice, we offer You our sincere thanksgiving and heartfelt prayer for and with those whom You have graciously vested in governance of these United States of America.

Enable the Members of the House of Representatives, elected by the people and for the people, to present equitably the diverse interests of our citizens and those from the expanse of the world who reside, labor, and study here.

Guide those who deliberate and legislate on our collective behalf in the spirit of unity, openness, and understanding. Allow their hearts ever to be open to the resounding cry of those who earnestly pledge indivisible liberty and justice for all.

May they be enlightened by Your precepts and motivated in their altruistic service to our Nation and its people. Bless and preserve them and us, Lord. This we pray in Christ Jesus, through the holy spirit.

Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentleman from Michigan (Mr. BISHOP) come forward and lead the House in the Pledge of Allegiance.

Mr. BISHOP of Michigan led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

WELCOMING BISHOP IRINEJ DOBRIJEVIC

The SPEAKER pro tempore. Without objection, the gentleman from Texas (Mr. POE) is recognized for 1 minute.

There was no objection.

Mr. POE of Texas. Mr. Speaker, I want to express my appreciation to Bishop Irinej of the Serbian Orthodox Church for coming to lead the opening prayer on this special day.

Mr. Speaker, 100 years ago, July 28, President Wilson declared a national day of prayer for the Serbian people and their fight during World War I.

Bishop Irinej has a long career of service, both to God and the church, as well as the Serbian American community. His work has taken him around the world. Formerly, he was a bishop of Australia and New Zealand, and before that, he spent years serving the church in Serbia.

For most of his career, he has been a dedicated educator, teaching at Loyola University in Chicago and as a member of the orthodox church's theological faculty in Belgrade.

Perhaps most notably today is his work to improve the ties between the Serbian diaspora and the Serbian state.

Bishop Irinej plays an important role in bringing us all together with God's love. It was my honor to invite him to share his faith with us today.

Thank you, Bishop Irinej, for that prayer, and may God bless Serbia and the United States of America.

And that is just the way it is.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will entertain up to 15 further requests for 1-minute speeches on each side of the aisle.

THANKING MATT BLACKWELL

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, it is with sincere gratitude and appreciation that I have the opportunity to recognize Matt Blackwell, former senior legislative assistant for South Carolina's Second Congressional District. I will always appreciate Matt for his years of service on behalf of the people of South Carolina.

A native of Aiken, South Carolina, and a USC graduate, Matt worked on a wide variety of issues, including energy, tax, financial services, transportation and infrastructure, and budget and appropriations. Beginning as an intern in the office in 2013, it has been an honor to work with such a dedicated public servant.

It is with mixed feelings, but great happiness, that the office bids Matt farewell. He will be doing amazing work in his new role as legislative director for Congressman NEAL DUNN of Florida, a distinguished graduate of Washington and Lee University of Lexington, Virginia.

I know his parents, State Representative Bart and Paula Blackwell, and family members join me in recognizing his achievements.

In conclusion, God bless our troops, and we will never forget September the 11th in the global war on terrorism.

THE UNDERREPRESENTATION OF AFRICAN AMERICANS IN AVIATION

(Mr. PAYNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PAYNE. Mr. Speaker, since 1987, the number of pilots in the United States has decreased by 30 percent. Demand for pilots is up and the supply of trained pilots is down. Throughout the aviation industry, there is a desperate need for trained aviation employees.

One way we can help end the shortage is to create paths for minority training. African Americans are significantly underrepresented in the aviation industry. They represent only 9 percent of airline mechanics and service technicians, 2 percent of aircraft pilots and flight engineers, and 12 percent of air traffic controllers. Creating opportunities to diversify the aviation field will help the critical shortage of pilots and aviation employees.

Soon, I will be introducing a bill to establish an African American advisory board within the FAA. The advisory

board will engage African American students through aviation training, mentorship, education, and outreach programs.

I urge my colleagues to join me in my effort to decrease our Nation's pilot shortage by tapping into an underutilized population and creating a more inclusive aviation industry.

HONORING ROSARIA MARTINICO

(Mr. BISHOP of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BISHOP of Michigan. Mr. Speaker, I rise today to honor a remarkable constituent from Rochester Hills, Michigan, Rosaria "Sara" Martinico.

She joined so many other brave women to help the war efforts during World War II as one of the original Rosie the Riveters. She served the country by working on B-17 bombers for a good portion of the war.

Last Sunday, Mrs. Martinico reached a milestone. Born in 1910, during the William Howard Taft Presidency, she celebrated her 108th birthday in Rochester Hills alongside her 2 daughters, 8 grandkids, 18 great-grandkids, and 12 great-great-grandchildren. That is five generations of family.

Mr. Speaker, I am privileged to represent such an outstanding and honorable person, and I would like to wish Mrs. Martinico a very happy 108th birthday and thank her for her outstanding service as the original Rosie the Riveter.

AFRICAN AMERICAN VETERANS MONUMENT

(Mr. HIGGINS of New York asked and was given permission to address the House for 1 minute.)

Mr. HIGGINS of New York. Mr. Speaker, I rise today to recognize the work of a committee in western New York dedicated to constructing the only monument in the Nation honoring African Americans who served in the United States military during times of war. This long-overdue tribute acknowledges the selfless sacrifice of our veterans, many of whom served our Nation while being denied equal rights at home.

The African American Veterans Monument, to be located in the Buffalo and Erie County Military Park, will feature 12 illuminated black pillars, representing U.S. military conflicts, and is designed to give visitors an experience that is reflective, educational, and inspirational.

The monument is being designed by a local, young, talented artist, Jonathan Casey. I have asked the Smithsonian National Museum of African American History and Culture to collaborate with local project leaders on this first-in-the-Nation African American Veterans Memorial.

Mr. Speaker, I commend the veterans, the artist, and New York State

Assemblywoman Crystal Peoples-Stokes, who have dedicated themselves to making this monument a reality. It is a long-overdue recognition of those who served proudly and courageously.

AMERICANS ARE BETTER OFF

(Mr. WALBERG asked and was given permission to address the House for 1 minute.)

Mr. WALBERG. Mr. Speaker, as I travel Michigan's Seventh District, from neighborhood stores to the factory floor, there is a renewed sense of optimism. Folks I hear from feel safer and more secure about the future.

The economy is thriving thanks to progrowth policies like tax cuts and regulatory reform. Businesses are hiring, and there are more job openings than job seekers, and workers and families are seeing bigger paychecks and more take-home pay.

It is not just our economy that is getting stronger; our military is as well. We are taking care of our troops, raising their pay, and reforming the VA to help our veterans. We have also taken significant steps to combat the opioid epidemic, crack down on human trafficking, and make our communities safer.

Is there more work to do? Absolutely. Our focus will remain on helping to improve people's lives and making it easier for them to get ahead. The results so far are clear: Americans are better off now.

HONORING JOHN A. PALUMBO

(Mr. BARR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BARR. Mr. Speaker, I rise today to honor the life of a special man, Mr. John A. Palumbo, from Lexington, Kentucky, who passed away earlier this month at the age of 97.

Mr. Palumbo was born in 1921 in Schenectady, New York. As a youth, he was a boxer, winning a Golden Glove, and then moved to Lexington to attend the University of Kentucky.

During his time as a student, World War II was raging, and Mr. Palumbo volunteered for the United States Army Infantry 1st Division.

Following basic training, he was sent to England to train for the D-day invasion. He landed on Omaha Beach at H-hour plus 58 minutes, actually swimming ashore when his landing boat received a direct hit and sank.

He fought across Europe and received many citations for his brave service, including the World War II Victory Medal and the Bronze Star.

After the war, Mr. Palumbo returned to Lexington, finished his education, married Nancyetta, and earned a law degree from the University of Kentucky. He worked for years in the lumber business and, as a Lexington developer, contributed greatly to the city of Lexington. He was well respected in

the business community and was active in several civic organizations.

Mr. Palumbo and his fellow veterans are true heroes. As members of the Greatest Generation, they willingly served to protect the freedoms we enjoy today.

I am humbled to honor the life of an American hero, Mr. John A. Palumbo, before the United States Congress, and I extend my deepest condolences to his family during this time.

SERBIA-U.S. RELATIONS

(Mr. STIVERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STIVERS. Mr. Speaker, I want to thank Bishop Irinej, from the Serbian Orthodox Church, for offering today's prayer.

We are at the 100-year anniversary of when President Woodrow Wilson raised the Serbian flag in a show of support for the Serbian people. That symbolic act of solidarity is remembered today, and I think it is really important.

Since 2006, my home State of Ohio has worked closely with the Serbian Armed Forces through the Ohio National Guard State Partnership Program. Soldiers from the Ohio National Guard and the Serbian Defense Forces have worked together on deployments and training. We have also worked together to construct schools, carry out humanitarian missions, and provide healthcare.

On this anniversary of the U.S.-Serbia cooperation, I look forward to another 100 years of friendship with Serbia, and Ohio stands ready to lead the way.

SUPPORTING THE BLADENSBURG WORLD WAR I MEMORIAL

(Mr. LAMALFA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LAMALFA. Mr. Speaker, I rise today in support of an amicus brief filed by our majority whip, STEVE SCALISE, in defense of the Bladensburg World War I Memorial in Prince George's County.

The 93-year-old memorial honoring fallen soldiers has recently come under attack simply for being shaped like a cross. The Fourth Circuit Court of Appeals ruled the memorial unconstitutional because of the inherent meaning of the cross as a religious symbol.

What kind of world do we live in where a monument to honor fallen soldiers of World War I—93 years old—is being threatened because of its shape or religious meaning?

What is more, this is a clear violation of the Establishment Clause, which has been litigated. It could only be described as hostility towards religion, not neutrality.

What is next, Arlington National Cemetery? the U.S. Capitol? or count-

less other national monuments, historic sites, or traditions?

The Supreme Court has a chance to reverse this decision. I urge them to set precedent that will protect America's historic monuments in perpetuity.

NEW MEXICO UNEMPLOYMENT RATE DOWN

(Mr. PEARCE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEARCE. Mr. Speaker, in June, New Mexico's unemployment rate ticked down to 4.9 percent. This is the first time the State's unemployment rate has gone below 5 percent since September of 2008. And just for perspective, one year ago, in 2017, the unemployment was at 6.1 percent.

When we passed the Tax Cuts and Jobs bill, New Mexico didn't immediately feel the results, but now people are being filled with confidence, businesses are hiring, they are expanding, and people are going back to work.

But an even more remarkable development was the right to export our oil. Two counties in New Mexico are driving a surplus that is causing America to extend above and beyond where Saudi Arabia is currently producing. We are on track to become number one. That is after decades of saying that we had reached peak oil in the country.

When we release the ingenuity of the American worker, America can compete with anyone. These things are happening. America is better off today because of what we have done here in Congress as the Republicans.

CONDEMNING VIOLENCE BY THE GOVERNMENT OF NICARAGUA

(Mr. BUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BUDD. Mr. Speaker, I rise today in strong support of the resolution we are voting on this afternoon, condemning the violence committed by the government of Nicaragua against its own citizens.

I met with Brenda Lancaster and her husband last week in my office. She is a constituent of mine who started an organization called ZMI Family Ministries International, and they have planted ministries in five different countries, one of those countries being Nicaragua.

Mr. Speaker, Brenda has received hundreds of calls and messages from people affiliated with her ministry down there confirming the severity of the situation. She has seen pictures and videos that she wishes no one would ever have to see.

Luke 9:57 in the Scriptures recounts a man speaking to Jesus saying: "I will follow you wherever you go." Brenda

didn't think that she would start a ministry in Nicaragua, but that is where God led her. And now people who work and volunteer fear for their lives down there.

America has always been at the forefront of fighting human rights abuses around the world. Mr. Speaker, I will continue to do everything in my power to bring awareness to this pressing issue.

CONGRATULATING TEACH FOR AMERICA FELLOWS

(Mr. THOMPSON of Pennsylvania asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I rise today to recognize the participants of the 2017 Teach for America Capitol Hill Fellows Program. Soon, many fellows will conclude their year-long placement with committees and Member offices throughout the House and the Senate.

The fellowship offers insights into the legislative process with a focus on professional development, mentorship, and networking opportunities. I have had the pleasure of hosting Paul Camacho, an educator from Philadelphia, Pennsylvania, as a part of my staff. Prior to his fellowship, Paul taught for 6 years in Philadelphia and 2 years in Chula Vista, California. Before becoming a teacher, Paul spent 8 years in the Marine Corps where he traveled extensively and learned important leadership skills.

Paul has been a valuable member of my team, and I am grateful for his service. I wish Paul and his family the best as they start their next chapter.

Mr. Speaker, I commend all of the 2017 Teach for America Capitol Hill Fellows for taking a year to immerse themselves in public policy and the workings of the legislative branch. I encourage my colleagues to explore what this tremendous program has to offer to their offices.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, the Chair will postpone further proceedings today on motions to suspend the rules on which a recorded vote or the yeas and nays are ordered, or votes objected to under clause 6 of rule XX.

The House will resume proceedings on postponed questions at a later time.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from Tennessee (Mr. ROE) and the gentleman from California (Mr. TAKANO) each will control 20 minutes.

The Chair recognizes the gentleman from Tennessee.

GENERAL LEAVE

Mr. ROE of Tennessee. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to revise and extend their remarks and insert extraneous material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Tennessee?

There was no objection.

Mr. ROE of Tennessee. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of my bill, H.R. 5693, as amended, the Long-Term Care Veterans Choice Act. This bill would expand long-term care opportunities for veterans by allowing the Department of Veterans Affairs, VA, to cover the cost of a medical foster home for certain veterans.

Medical foster homes are private homes in which a trained caregiver provides round-the-clock care to a small group of individuals. Medical foster homes have proven to be a popular, safe, and cost-effective alternative to traditional nursing homes, particularly for veterans who prefer a more familial, less institutional care setting.

However, VA is unable to cover the cost of care for a veteran residing in a medical foster home. That is true even for veterans who VA would otherwise be required to pay for in a more expensive nursing home.

As a result, VA estimates the department pays more than twice as much for nursing home care than it otherwise would. The Long-Term Care Veterans Choice Act would help address that issue, and, in doing so, ensure that veterans have the flexibility to choose the long-term care setting that feels most comfortable for them.

The bill would also create a Veterans Economic Opportunity and Transition Administration to be led by an under secretary for Veterans Economic Opportunity and Transition. Investing in

education and employment opportunities for our Nation’s veterans is one of VA’s most important but least recognized missions.

Today, programs concerning education and employment are embedded within the Veterans Benefit Administration, which, understandably, devotes most of its time, attention, and resources on disability compensation-related issues and backlogs that rise and fall with time.

Creating a new administration within VA to house education and employment programs will ensure that those programs receive the focused leadership, time and attention that they deserve.

To offset the medical foster home and Veterans Economic Opportunity and Transition Administration provisions of the bill, it would also authorize a temporary increase in the VA home loan funding fee for interest reduction loans when refinancing homes. This bill is sponsored by Congressman CLAY HIGGINS from Louisiana. As an engaged member of the Subcommittee on Health, CLAY is a champion for his

fellow veterans, and I thank him for his leadership on this legislation.

I am also grateful to my good friend and former senior committee member, Dr. BRAD WENSTRUP from Ohio, who has sponsored the Veterans Economic Opportunity and Transition Administration provisions of this bill. As a veteran and physician, Brad has championed veteran employment and education issues because he knows better than most how important it is that veterans transitioning from combat zones come home to meaningful education and employment opportunities.

I thank him for his efforts and urge all of my colleagues to join me in supporting this bill today.

Mr. Speaker, I reserve the balance of my time.

Mr. TAKANO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, to begin, I thank Representative HIGGINS for his hard work on this legislation, and I support H.R. 5693, as amended.

This bipartisan legislation is a forward-thinking first step toward better aligning VA's long-term care options with veteran preferences.

Medical foster homes are a solution for veterans that may not be comfortable in a traditional institutional setting, such as a nursing home, yet still need some form of daily assistance and care. These homes provide caregiving services in a group setting for veterans that lack access to caregiving services at home.

By allowing VA to cover the cost of medical foster homes, VA will be able to ensure veterans are achieving the most appropriate level of care in the most appropriate setting.

The care delivered at medical foster homes is less intensive; therefore, less expensive. Additionally, the sense of community and the familiar home-like setting can promote a veteran's physical and mental health.

Again, I appreciate my colleague's hard work on this legislation and look forward to voting in favor of the bill. I congratulate the gentleman from Louisiana's hard work.

Mr. Speaker, I reserve the balance of my time.

Mr. ROE of Tennessee. Mr. Speaker, I yield 5 minutes to the gentleman from Louisiana (Mr. HIGGINS), an active member of the VA committee and one of the primary sponsors of this, an Army veteran, and reserve police officer.

Mr. HIGGINS of Louisiana. Mr. Speaker, I rise today in support of H.R. 5693, the Long-Term Care Veterans Choice Act. My bill would authorize the Department of Veterans Affairs for 3 years to cover the cost of long-term care at medical foster homes for up to 900 veterans at a time who are otherwise eligible for nursing home care through the VA.

Medical foster homes are private homes in which a caregiver provides services to a smaller group of individuals who are unable to live without

day-to-day assistance. Medical foster homes are an alternative to nursing homes for those who require care but prefer a noninstitutional setting with fewer residents.

For many younger veterans in need of round-the-clock care, medical foster homes can provide a more age-appropriate independent setting than traditional nursing homes. The VA has operated its medical foster home initiative for nearly 20 years, and currently oversees more than 700 licensed caregivers assisting nearly 1,000 veterans across 42 States.

Unfortunately, Mr. Speaker, while the VA will cover the cost of home-based primary care for eligible veterans living in medical foster homes, the VA does not cover the cost of medical foster home living arrangements for veterans eligible for nursing home care through the VA. The reforms in my bill increase access to medical foster homes and represent a significant cost savings for the Department of Veterans Affairs.

There should be no one-size-fits-all standard of care for veterans. Veterans should be afforded flexibility to use the benefits they rightfully earned in a manner that best suits their individual needs, which is why the VA, American Legion, and many other veteran service organizations have offered their support for this language.

Further, the bill refocuses the administrative bodies of the VA to better prioritize programs like the GI bill, vocational rehabilitation, home loan benefits, and transition assistance programs that create economic opportunities for veterans.

This allows existing veterans' health benefits and National Cemetery Administration to better focus on providing healthcare and cemetery services. This critical refocus will improve oversight and veterans access to important services like the medical foster home program that give much needed choice and personal dignity back to the brave men and women who have sacrificed so much for our Nation.

Mr. Speaker, this bill reflects the compassion of the American citizenry in our dedication to serve the veterans who have served us. Please join me in supporting our servicemen and women by voting in support of H.R. 5693, the Long-Term Care Veterans Choice Act.

Mr. TAKANO. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. CORREA), a member of the House Committee on Veterans' Affairs, and let it also be known that prior to his coming to Congress, he chaired a veterans committee in the California State Legislature.

Mr. CORREA. Mr. Speaker, I rise in strong support of H.R. 5693, the Long-Term Care Veterans Choice Act. This bipartisan legislation will expand veterans' access to medical foster homes, an alternative to nursing home care, by allowing the Department of Veterans Affairs to cover such care for up to 900 veterans every year.

□ 1230

The Medical Foster Homes program allows eligible veterans who require day-to-day assistance to live in private homes with trained caregivers who provide around-the-clock care and the services needed to help these veterans with their daily tasks, such as getting dressed. The program requires that caregivers be licensed and involved in frequent inspections by the VA.

Most importantly, the Medical Foster Homes program provides aging veterans the option to live in a private setting that may feel more like a home than a nursing institution.

Additionally, the amended bill creates a fourth administration within the VA, headed by a new Under Secretary, to administer the educational and employment benefits currently managed by the Veterans Benefits Administration.

Mr. Speaker, I urge passage of H.R. 5693.

Mr. ROE of Tennessee. Mr. Speaker, I yield 2 minutes to the gentleman from Ohio (Mr. WENSTRUP), my good friend, who has been an active member of the Veterans' Affairs Committee and chairs the Subcommittee on Health. I appreciate his leadership on this bill.

Mr. WENSTRUP. Mr. Speaker, I rise to support the Long-Term Care Veterans Choice Act, legislation that contains the text of my bill, the VET OPP Act. The VET OPP Act continues our effort to invest in our troops from the day they take their oath of service to when they begin their civilian careers.

Part of our commitment to our men and women in uniform is helping them reintegrate back into civilian life. We can ease this transition by prioritizing programs that help them find meaningful employment or educational opportunities when they return home.

For too long, the outdated structure of the VA has allowed economic opportunity and transition programs for our veterans to fall by the wayside. H.R. 5693 will change that. With the inclusion of the VET OPP Act, it prioritizes veteran employment and education programs at the VA by utilizing existing resources to place educational, employment, and transition programs together in a fourth administration within the VA. This will promote transparency and oversight, while placing greater priority on opportunity-based programs within the VA.

Mr. Speaker, I urge my colleagues to support H.R. 5693.

Mr. TAKANO. Mr. Speaker, I ask my colleagues to join me in passing H.R. 5693, as amended, and I yield back the balance of my time.

Mr. ROE of Tennessee. Mr. Speaker, this is commonsense legislation that will allow veterans in certain circumstances to stay in a less intense nursing home facility. We hear this all the time: "I don't want to go to a nursing home." This will allow veterans who have earned these benefits to reside outside there. It is much less expensive for the VA, and it is also much

better for the veteran if they can do this.

A second part of this bill, which is to create the fourth administration, is not more bureaucracy, but to focus on the education benefits and transition as Active-Duty military leave and enter civilian life again. I think it is one of the most critical things we do. A seamless transition from Active Duty to an active job, I think, will help reduce veteran depression, suicide, dependence, and other things. That is why we wanted to do this.

Mr. Speaker, I urge my colleagues to support H.R. 5693, as amended, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. EMMER). The question is on the motion offered by the gentleman from Tennessee (Mr. ROE) that the House suspend the rules and pass the bill, H.R. 5693, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on the Senate amendment to H.R. 2353.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of the Strengthening Career and Technical Education for the 21st Century Act.

Mr. Speaker, I am pleased to yield such time as she may consume to the gentlewoman from North Carolina (Ms. FOXX), the chairwoman of the House Education and the Workforce Committee.

Ms. FOXX. Mr. Speaker, I thank Mr. THOMPSON for yielding me time.

Mr. Speaker, today has been a long time coming, so I will be brief.

The legislation we are here to send to the President's desk is a true difference maker. Every one of us knows someone God has blessed with skills, talents, and ideas that do not fit the mold of traditional postsecondary education. Because of that, they may not believe they have much to offer or much to gain by joining the workforce without the "right" degree or diploma. But there really isn't a right degree or diploma.

By updating and strengthening the career and technical education law, which H.R. 2353 does, we are making significant progress in changing those misguided perceptions and giving workforce development the recognition and credit it deserves.

We have more than 6 million unfilled jobs in this country, due in large part

to the skills gap. The skills gap is partly the result of an outdated approach to workforce development. H.R. 2353 supports innovative learning opportunities and strong community partnerships, addressing the problem of vacant jobs and workforce development needs where they exist: at the local level.

I want to recognize the bipartisan effort that has gotten us here today. Congressman GLENN THOMPSON and Congressman RAJA KRISHNAMOORTHY, along with a great staff, delivered a great bill for us to work on at the Education and the Workforce Committee.

Since we marked it up, reported it, and the House passed the bill last year, I have been pleased and I have been proud to work with Ranking Member BOBBY SCOTT in urging Senate consideration of this legislation. I thank House leaders for bringing this bill back to the floor as soon as we could after the Senate passed it on Monday night.

On behalf of every member and staff person of the Education and the Workforce Committee, I am grateful this bill is before the House today, and I am proud of all of their hard work.

Mr. Speaker, I urge Members to support this legislation.

Mr. KRISHNAMOORTHY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I thank Congressman THOMPSON for his partnership on this legislation, and Chairwoman FOXX and Ranking Member SCOTT for their leadership. Lastly, I thank our colleagues in the Senate for working hard to pass H.R. 2353 earlier this week. It has now been 12 years since Congress acted to update this critical program.

The Bureau of Labor Statistics recently reported a skills gap of 6.5 million unfilled jobs. Compared to this time last year, there are now an additional 1 million job openings where employers can't find applicants with the adequate skills or training to fill them. For the health of our economy, the prosperity of our workers, and the strength of our businesses, we must reverse this trend, and we must reverse it now.

Our bipartisan legislation, the Strengthening Career and Technical Education for the 21st Century Act, implements critical reforms to ensure American technical education and training programs prepare students for high-wage, in-demand jobs in their communities.

This legislation aligns CTE programs to meet the needs of local labor markets, gives business and workforce experts a seat at the table when CTE curricula are crafted, and preserves robust accountability standards to protect American students.

This legislation also increases funding to Perkins CTE programs to record levels, ensuring that each State across the country receives sufficient Federal resources to build a dynamic, growing workforce and a thriving economy.

Congress hasn't made substantive reforms to career and technical edu-

cation since 2006, before the invention of the iPhone and long before the current technological revolution. American students, workers, and businesses are depending on us today to reform and reauthorize Perkins CTE.

Mr. Speaker, I urge all of my colleagues to support H.R. 2353, as amended, and I reserve the balance of my time.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as co-chair of the Career and Technical Education Caucus, I am happy to say that this legislation, the Strengthening Career and Technical Education for the 21st Century Act, will help move us in the right direction.

This bill has been the result of a long, bipartisan effort that I have been proud to lead with my CTE Caucus co-chair, Mr. LANGEVIN from Rhode Island, and now with my cosponsor from the Education and Workforce Committee, Representative RAJA KRISHNAMOORTHY.

It has been more than a decade since our Federal role in our Nation's CTE programs has been modernized, and so much of our society has changed since then. Right now, there are more than 6.5 million unfilled jobs in this country, and we are finally recognizing the impact of the skills gap.

A study concluded by the Brookings Institute found that, in the next decade, 3 million workers will be needed in the infrastructure industry alone. This includes careers in transportation, housing, and telecommunications.

As a father, I know there is nothing parents want more for their kids than a life that is better than their own, but only half of all Americans today expect their children to have a brighter future than they did. The Strengthening Career and Technical Education for the 21st Century Act aims to help more Americans, particularly younger Americans, obtain the knowledge and skills they need to break the cycle of poverty and achieve a lifetime of success.

A big part of that goal is ensuring Federal policies take meaningful steps to address the challenges and realities facing today's students, workers, and employers.

We want State and local leaders to be able to focus their time and resources on preparing students for successful careers. H.R. 2353 helps with this goal by simplifying the application process for receiving Federal funds and providing States and local leaders with the flexibility needed to design CTE programs that best meet the needs of their local communities.

Perhaps most importantly, this bill makes improvements on alignment with in-demand jobs by supporting innovative learning opportunities and encouraging stronger engagement with employers. The bill promotes work-based learning, a technique that allows potential employers to give students hands-on experience.

The best thing about this bill is that it is going to be a game-changer for American students. The second best thing about this bill is that it has enjoyed not just bipartisan support, but unanimous support in both the House and the Senate so far.

We are here today to take the last step before sending this vitally important legislation to the President for his signature.

I would be remiss not to personally take a moment to thank the many staffers who have made this bill possible: Matthew Brennan, Paul Camacho, and Michelle Rakebrand from my office; former staffer Katie Brown; Education and the Workforce Committee staffers James Redstone, Brad Thomas, Alex Ricci, Mandy Schaumburg, and Amy Jones; and the Senate HELP Committee staff, who have worked behind the scenes to get us to where we are today.

This legislation is supported by a unified coalition of education, business, and industry organizations. And a specific thank you to Boeing, IBM, and the Chamber of Commerce for their leadership.

Mr. Speaker, I am pleased to be joined by other members of the Education and the Workforce Committee to talk about what this bill means to our constituents.

I reserve the balance of my time.

Mr. KRISHNAMOORTHY. Mr. Speaker, I yield 2 minutes to the gentleman from Virginia (Mr. SCOTT).

Mr. SCOTT of Virginia. Mr. Speaker, I rise as ranking member of the Committee on Education and the Workforce in support of H.R. 2353, the Strengthening CTE for the 21st Century Act, which will reauthorize the Perkins Career and Technical Education Program, the CTE program.

Mr. Speaker, the House passed the CTE reauthorization in the last Congress and again last year. The Senate made minor changes to the bill, and now we are on the verge of final passage today. In passing the bill, we will be updating the Federal investment in CTE to provide increased State flexibility, while ensuring greater accountability for program quality.

H.R. 2353 will also require a more inclusive collaboration between educational institutions, industry, employers, and community partners.

Today's CTE will not be the vocational education of the past. Workers rarely hold the same job for 40 years. Workers often have several jobs throughout their careers, which is why modern CTE programs must help ensure that students receive a foundational education that will help students switch in their career or academic tracks at any time.

I thank the gentleman from Illinois (Mr. KRISHNAMOORTHY) and the gentleman from Pennsylvania (Mr. THOMPSON) for their bipartisan leadership, and, of course, the chair of the Com-

mittee on Education and the Workforce, Dr. FOXX. Because of their work, the House was able to produce a comprehensive reauthorization of Perkins CTE, which will improve program quality and services for students, and support educational programming that engages all students by linking core academic content with real-world, work-based skills development.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I would also like to say thank you to the ranking member for his help and leadership with marshaling this through the process that we have.

Mr. Speaker, I yield 1 minute to the gentleman from Tennessee (Mr. ROE), a colleague and classmate of mine.

Mr. ROE of Tennessee. Mr. Speaker, I rise today in support of H.R. 2353.

The number one thing I hear from employers back home is that they have good-paying jobs available, but they can't find workers who have the necessary training or soft skills. I have also heard that employers are not engaged early enough in the process, and the reforms in today's bill should help address these concerns.

This bill helps encourage community partnerships and engages employers to help ensure employment opportunities for future generations. Most importantly, by Congress acting today, we show our commitment to help those for whom college may not be the right fit by offering them better, skills-based learning opportunities that will ultimately result in jobs to support themselves and their families.

I am also pleased to see the inclusion of provisions from the American Dream Accounts Act, which I introduced last week with Representative MOULTON. This will allow community partnerships to help engage kids to plan and save for technical education programs. A program in Elizabethton, Tennessee, is doing just this, with promising results.

With these important reforms, we can help ensure that the labor force of tomorrow has the skills it needs today. I urge support.

Mr. KRISHNAMOORTHY. Mr. Speaker, I yield 2 minutes to the gentleman from Rhode Island (Mr. LANGEVIN).

Mr. LANGEVIN. Mr. Speaker, as co-chair of the bipartisan Career and Technical Education Caucus, I am proud to rise in strong support of the Senate amendment to H.R. 2353, the Strengthening Career and Technical Education for the 21st Century Act.

This important bill is long overdue. The Carl D. Perkins CTE Act hasn't been reauthorized in more than a decade, and updating it is a vital step toward supporting students and businesses across the country.

In particular, I would like to thank my CTE Caucus co-chair, Representative GLENN "GT" THOMPSON, for his leadership on this bill and partnership in Congress on this issue over the last many years.

I also want to recognize my House and Senate colleagues on both sides of

the aisle, including Chairwoman FOXX, Ranking Member SCOTT, and Congressman KRISHNAMOORTHY, who have demonstrated great bipartisanship in crafting this legislation.

I also thank the many partners from across the country from education and the business community for their work on this important bill, and also the many staffers who worked so hard on this, particularly Kerry McKittrick from my staff, and former staffers Sam Morgante and Kirtley Fisher over the years as well.

For the past 10 years, I have heard the same concern from employers in Rhode Island, that they are unable to find skilled workers to fill open jobs in manufacturing, IT, and other skilled trades, and it is hurting their businesses. I know that other Members have heard this from their businesses across the country as well.

Mr. Speaker, we need to ensure our workforce is equipped with the tools that they need to meet these demands in order to close the skills gap, especially skills for our young people entering the workforce.

By aligning CTE programs with industry needs, we will ensure students are learning the academic, technical, and employability skills to succeed in growing economic sectors.

I am proud that the Strengthening CTE for the 21st Century Act does just this, while making other important reforms that I have long championed, including expanding access to apprenticeships to give students valuable, hands-on learning experiences and supporting career counselors to guide students down appropriate academic and career paths.

With these components, I am proud to support the Senate amendment to H.R. 2353, and I urge my colleagues to join me in supporting this important bill.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, first of all, my thanks to Mr. LANGEVIN for his longtime friendship and leadership on career and technical education.

I yield 1 minute to the gentleman from Minnesota (Mr. LEWIS).

Mr. LEWIS of Minnesota. Mr. Speaker, I thank Mr. THOMPSON for his leadership on this legislation, as well as Chairman FOXX, Ranking Member SCOTT, and my colleagues on the Education and the Workforce Committee.

This great bipartisan effort could not come at a more critical time. As our economy continues to boom, employers across the Nation are struggling to find the skilled workers needed to fill well-paying jobs and grow their businesses. The legislation here strengthens the Perkins Act to ensure students gain the necessary skills to compete in the modern economy.

I am particularly pleased that the final legislation includes my provisions to encourage and expand dual enrollment opportunities, putting more students on the fast track to a great career.

Minnesota's Second District is home to some great technical colleges, and dual enrollment allows high school students to access these programs and to begin working toward an in-demand credential or degree.

I am proud to support this bill to close the skills gap and help our students succeed.

Mr. KRISHNAMOORTHY. Mr. Speaker, I yield 2 minutes to the gentleman from Minnesota (Mr. NOLAN).

Mr. NOLAN. Mr. Speaker, I rise in support of this critically important bipartisan reauthorization of the Career and Technical Education Act.

I want to especially commend Chairwoman FOXX; Ranking Member SCOTT; and, of course, the real hard workers on this deal, Mr. KRISHNAMOORTHY and Mr. THOMPSON; and all the original co-sponsors, staff, and people who support this legislation.

Time and again, when I visit with owners and managers of manufacturing facilities in my northern Minnesota district, I am told two things. The first is that the employees they have hired who participated in the Career and Technical Education Act are among the very best that they have in their employment. The second point that they make is that they need more CTE-trained employees. All up and down the line, from healthcare, to construction, information technology, aviation, transportation, you name it, the list goes on, and the jobs are waiting.

This bill adds important new provisions to expand and update CTE, so that they can be filled. It gives States more flexibility to focus on the jobs and careers in high demand in their regions. Employers and communities get the tools that they need to develop stronger partnerships and to engage students and grow our local economies. And students get the tools that they need to compete and succeed in 21st century jobs and the economy.

That is what this is all about, Mr. Speaker. It is about more good-paying jobs. It is about great opportunities for students to learn and develop valuable skills, to develop more dynamic growth for an economy in need of the best, most-skilled workers that America can provide.

I urge all of my colleagues to support this critical and important legislation.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I yield 1 minute to the gentleman from Georgia (Mr. ALLEN).

Mr. ALLEN. Mr. Speaker, it is very refreshing here and a historic day in Congress when we are working together to do something big, and I am just proud to be a part of it.

During my time in Congress, I have traveled the 12th District, visiting many schools, and I have spoken to numerous groups of young students. One question I always ask is why they are getting an education.

Typically, students will respond with a wide variety of reasons, but the answer is to prepare for a job, to build a successful career, to live the American

Dream. Oftentimes, a 4-year degree isn't the right fit.

Work is a God-given right, and I believe that young people today have the greatest opportunity to live the American Dream than at any time in my lifetime. I am proud to say that I helped create legislation that prioritizes these in-demand job skills and education.

H.R. 2353, the Strengthening Career and Technical Education for the 21st Century Act, does a lot of great things. But as a small-business owner, I made sure, during the drafting process, that this legislation would bridge the gap between the business and education community by finally bringing business leaders to the table to create CTE programs for in-demand jobs in our hometowns.

Thanks to tax reform and deregulation, our economy is booming; 6.7 million jobs are open and available, and the American Dream is right there for the taking.

Mr. KRISHNAMOORTHY. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mrs. DAVIS).

Mrs. DAVIS of California. Mr. Speaker, I am pleased that our colleagues in the Senate have joined the House in passing career and technical education legislation. I want to thank Chairwoman FOXX and Ranking Member SCOTT, along with our authors of the bill, for your leadership in moving the House version of this bill through committee.

Also, today, we gathered experts from across the country to participate in the committee's first Workforce Innovation Forum. We just had an opportunity to hear from these innovators from cities around the country about the importance of investments and workforce development programs, and they shared how Federal investments can spur private investments in students, raise public awareness—very, very critical—of these programs, and connect workers to jobs in their communities.

CTE provides a crucial link between the K-12 system and the workforce, and allows promising students to prepare for fields where high-paying jobs are available.

Mr. Speaker, every day, families across America gather around the kitchen table to discuss college and career options, and we need to make sure that high-need job development programs are a bigger part of that conversation. Students and parents need good, current information to make these critical decisions.

The flexibility in many of these programs offers our students less time in the classroom and more time in the workplace. And the hands-on education model keeps people engaged while teaching necessary soft skills before graduation.

Every person deserves a quality education, and every community deserves a thriving local economy with highly skilled workers. I am proud to support

career and technical education, and look forward to working with our community partners to implement this very important legislation.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. WALBERG), a subcommittee chairman of the Education and the Workforce Committee for the Health, Employment, Labor, and Pensions Subcommittee.

□ 1300

Mr. WALBERG. Mr. Speaker, I rise in strong support of H.R. 2353, the Strengthening Career and Technical Education for the 21st Century Act. I also thank my colleagues and sponsors of this legislation, Representative THOMPSON from Pennsylvania and my good friend from Illinois, Representative KRISHNAMOORTHY.

As I have met with students, teachers, and employers in my district, I have consistently heard the need to expand CTE opportunities and invest in a skilled workforce.

In today's economy, we need to celebrate the fact that not everyone follows the same path. While many students pursue 4-year degrees, many others know their sweet spots lie somewhere else.

Career and technical education provides students with hands-on experience that can lead to a good paying job and a rewarding career.

I am also pleased this bipartisan legislation includes my provisions to address unnecessary and duplicative licensing requirements that act as a barrier for workers trying to get their foot in the door.

I commend my colleagues on the Education and the Workforce Committee for making it a priority to modernize and strengthen CTE programs.

Coming from a manufacturing hub like Michigan, this bill will make a big difference for the hardworking men and women of our State.

Let's pass it today and help every American pursue their personal paths to the American Dream.

Mr. KRISHNAMOORTHY. Mr. Speaker, I yield 2 minutes to the gentleman from Connecticut (Mr. COURTNEY).

Mr. COURTNEY. Mr. Speaker, I rise today as a member of the Education and the Workforce Committee in strong support of the Strengthening Career and Technical Education for the 21st Century Act.

This bill will reauthorize the Perkins Career and Technical Education Act for the first time since 2006.

Mr. Speaker, I congratulate Chairwoman FOXX, Ranking Member SCOTT, Congressman THOMPSON, and Congressman KRISHNAMOORTHY for their hard work getting this measure through both chambers for the first time in 12 years.

This bill is about preparing secondary and post-secondary students with the academic, technical, and employability skills required to be successful in the workforce at a critical time for our economy.

For example, according to the National Association of Manufacturers, there will be more than 3.5 million open manufacturing jobs through 2025, and unless we can better prepare that future workforce, 2 million of these jobs will go unfilled.

This reauthorization will incentivize technical schools to boost performance by providing schools with more flexibility that will allow schools to use Federal grant money to align casework and training with the workforce needs in their region.

In eastern Connecticut and Rhode Island, as we ramp up submarine production that will require 14,000 new workers over the next 8 years, an updated Perkins law will be an asset to the Electric Boat shipyard and submarine suppliers for years to come.

My district is home to four technical high schools: Norwich, Windham, Grasso, and Ellis Technical High School. In May, I had the opportunity to visit Ellis Tech in Danielson and saw firsthand the impressive programs offered to their 600-plus students from 20 towns in the region.

In addition to the programming at the school, Ellis partners with local community colleges to offer juniors and seniors the opportunity to receive college credits and reduce the cost of higher education.

This bill will take programs like Ellis to a higher and better place just in the nick of time for our economy.

Mr. Speaker, I strongly urge my colleagues to support final passage of this important measure to build a stronger American workforce.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I yield 2 minutes to the gentleman from Alabama (Mr. BYRNE), another of our subcommittee chairmen in the House Education and the Workforce Committee, and the chairman of the Workforce Protections Subcommittee.

Mr. BYRNE. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, we have a skills crisis in our country. We actually have more job openings than we have unemployed Americans. This is keeping our economy from reaching full potential.

So how do we solve this problem? Well, a big way is through expanding career and technical education programs. As the demands of the workforce continue to change and become more complex, these programs are critical to building the workforce of the 21st century.

I have seen these programs firsthand back in Alabama in our high schools, when I was the chancellor of post-secondary education, and I saw it at work in our 2-year colleges.

They benefit the local economy by helping fill open jobs, but they make the lives of our students intrinsically better by connecting them with the skills they need to thrive.

Mr. Speaker, I urge my colleagues to support this bill and show the strong bipartisan support that we showed

when it passed the House the first time.

Career and technical education is for everybody in America, and America's House needs to stand up and support it.

Mr. KRISHNAMOORTHY. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon (Ms. BONAMICI).

Ms. BONAMICI. Mr. Speaker, I thank my colleague for yielding.

As a member of the Education and the Workforce Committee, I rise today in strong support of H.R. 2353, the bipartisan Strengthening Career and Technical Education for the 21st Century Act, a bill to support students and prepare them for the future.

Mr. Speaker, I thank my colleagues on both sides of the aisle for their work on this important legislation.

In Oregon, current technical education classes, like Beaverton's Aloha High School's Auto Tech program and Newberg High School's CAD Lab, engage more students, boost graduation rates, and give students the opportunity to learn real world skills.

Federal CTE funding provides critical equipment that schools need to make these hands-on classes meaningful experiences for students in Oregon and across the country.

I am proud that this bill includes the amendment I worked on with Representative ELISE STEFANIK, my co-chair of the STEAM Caucus, to encourage the integration of arts and design skills into STEM CTE programs. Our provision will help make sure that the next generation of students are creative and innovative by fully engaging and educating both halves of the brain through art and design.

Mr. Speaker, I want to, again, thank my colleagues, and especially Ranking Member SCOTT and Chairwoman FOXX for their leadership on this issue. We have been waiting for a long time for this bipartisan bill, and I am proud to stand in strong support today.

Mr. Speaker, I urge all of my colleagues to support this legislation.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I yield 1 minute to the gentleman from Wisconsin (Mr. GROTHMAN).

Mr. GROTHMAN. Mr. Speaker, I am pleased to speak on this bill.

As anybody who talks to the average person knows, in this country today, we have a huge labor shortage of people ready to do the type of jobs that industry needs.

I have more manufacturing jobs in my district than any other congressman around the country, and the number one problem we have is we can't find people to do those jobs. We all have medical facilities around this country, and again and again, nurses or other skilled people are not available for the huge number of job openings that are out there.

Meanwhile, we have hundreds of thousands, maybe millions of people getting 4-year degrees or part of 4-year degrees and not finding jobs that pay anywhere near as good as some of the jobs you can get at a technical school.

Earlier this morning I looked at a local technical school here in town that had a demonstration project on some of the robotics training that they are doing, and we had people who are starting at \$25, \$30, \$35 an hour, and that is before overtime. And these people, because the degrees take only 2 years to get and frequently allow you to live at home, are graduating without debt, unlike many people who have been foolishly told to go to a 4-year college and are not getting a lot out of it.

So I am pleased today to vote for the Career and Technical Education for the 21st Century Act, which will also reduce, to a degree, paperwork required by the Federal Government.

The SPEAKER pro tempore (Mr. EMMER). The time of the gentleman has expired.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I yield an additional 30 seconds to the gentleman from Wisconsin.

Mr. GROTHMAN. Mr. Speaker, I would also just like to thank those businesses out there that are training people out there without the benefit of government education at all, because those are also sometimes frequently very good jobs.

Mr. KRISHNAMOORTHY. Mr. Speaker, I reserve the balance of my time.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I yield 1 minute to the gentleman from Georgia (Mr. FERGUSON), a fellow colleague from the Education and the Workforce Committee.

Mr. FERGUSON. Mr. Speaker, I rise today in favor of H.R. 2353. It has been a year since this House passed reauthorization, and I am thrilled the Senate finally took action to pass the bill earlier this week.

This legislation is vital to supporting career and technical education, such as apprenticeship programs, all across my district.

As I have spoken with folks back home, I have heard time and time again from businessowners the importance of training a new generation of skilled workers. Many of the current employees are nearing retirement age, and these businessowners are facing an ever-shrinking pool of skilled labor.

I also see students seeking more opportunities other than a 4-year degree.

CTE programs are a solution for both of these groups, and I am proud that there are so many examples of this in the Third District of Georgia.

In fact, today, Kathy Carlisle from the THINC Academy in LaGrange, Georgia, testified in front of the Education and the Workforce Committee. Dr. Carlisle shared how THINC has contributed to a community revitalization success story and what happens when the local leaders of the business community and innovative educators come together.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, I yield an additional 30

seconds to the gentleman from Georgia.

Mr. FERGUSON. This bill will continue these opportunities, increasing funding, and giving States more flexibility to implement innovative programs.

Most importantly, a diverse group of members from our community from all socioeconomic backgrounds stand on the edge of success, and this will help get them there.

Mr. Speaker, I look forward to seeing this bill pass, and I urge everyone to support it.

Mr. KRISHNAMOORTHY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to say thank you, again, to Congressman G.T. THOMPSON, Chairwoman FOXX, Ranking Member SCOTT, all the members of the Education and the Workforce Committee, all the staff on the Education and the Workforce Committee, and a point of personal privilege, Sam Morgante and Brian Kaissi for their yeoman's work on my staff.

The CTE bill will begin a career and technical education revolution in this country. It will allow us to equip millions of young people and those in career transition with the skills to take the jobs of the future.

There are 6.7 million unfilled jobs that are waiting to be filled by motivated, enterprising, hardworking people who seek a middle class lifestyle, which is the American Dream.

Mr. Speaker, I urge strong support of this landmark legislation, and I yield back the balance of my time.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, may I inquire how much time remains on my side of the aisle?

The SPEAKER pro tempore. The gentleman from Pennsylvania has 5 minutes remaining.

Mr. THOMPSON of Pennsylvania. Mr. Speaker, today what we are talking about is restoring rungs in the ladder of opportunity. This is about providing better access to more effective skills-based education for all Americans.

A lot of people listening sometimes think about career and technical education, and appropriately, they think about our kids who we are trying to equip and prepare them to be successful in life, to have better lives than what we have had as their parents, and we certainly are here to do that. This legislation does serve those kids.

But this legislation serves Americans at any age, at every point in their life, to be able to tap back into a system, to get a little bit more training, a certification, a specialization, to be able to get a promotion, to get a better job. And it really is about upward mobility, Mr. Speaker.

I would say on every school day somewhere around this country, there is a student, maybe a young lady, that is not really motivated to get out of bed to go off to school, because she is someone that doesn't learn perhaps as

well as others in a conventional education setting where people are lecturing and, you know, just being in the classroom setting. And she is reluctant. When she does go to school, my guess is she is probably in that classroom, and many times you find her with her head down on her desk.

But if you put the tools, Mr. Speaker, of career and technical education in her hands, she becomes inspired. Now, that could be a welder, it could be wrenches, it could be a hammer, it could be a keyboard, it could be a paintbrush, it could be a stethoscope, it could be the tools of agriculture. There are just so many tools. You put one of those tools in her hands, she is inspired. You have lit her life on fire of what is possible.

I would say this morning, when we all got up and we are having our breakfast, somewhere in America, many places in America, there were young families sitting around the table, maybe a husband and wife that have maybe young children, who, because of unemployment or underemployment, they are just wondering how they are going to pay the bills. This is a piece of legislation that serves that man and that woman to be able to get back into the workforce. Perhaps, Mr. Speaker, to get back into the workforce for the first time in a generation.

□ 1315

For those folks who are living in intergenerational poverty, they have been in poverty so long that they don't recall what happened in generations past that placed their family in that situation. But this is a rung on the ladder of opportunity to climb out of those circumstances.

Mr. Speaker, there are many places in this country today where employers are waking up faced with a difficult decision. They have had a business that has been very, very successful. They have done well in life, and they have got a great product or a great service. They have got a great location. They have got a great marketing plan. They have got a great compliance plan to deal with overregulation. But what they don't have is a qualified and trained workforce.

They have two decisions to make that morning. All of it involves shuttering that business, closing it, putting plywood on the doors and the windows, and just walking away and enjoying what they have earned and accumulated; or moving that business overseas where, perhaps, there are more warm bodies to be able to fill those jobs.

This bill serves those employers as well.

And so, once again, I want to thank Representative KRISHNAMOORTHY as well as all of the Members of the House Committee on Education and the Workforce.

Mr. Speaker, I urge all Members to support the Senate amendment to H.R. 2353, and I yield back the balance of my time.

Mr. ESTES of Kansas. Mr. Speaker, as a member of the Education and the Workforce Committee, and representative of Kansas' manufacturing hub known as the Air Capital of the World . . . I have heard repeatedly about the skills gap facing employers and today's labor force.

For a generation . . . many have stressed the importance of a 4-year degree over that of a technical skill.

While a 4-year degree remains vitally important . . . we must not forget the equal need for career and technical education . . . especially when our economy now has more job openings than qualified applicants.

That's why I'm proud to support H.R. 2353.

This bipartisan bill helps more Americans enter the workforce with skills they need to succeed.

The bill provides local leaders more resources and flexibility to adapt to changing education and economic needs; supports more collaboration between employers and educators to close the skills gap; streamlines performance measures for CTE programs; and reigns in Washington's control over individual curriculums and performance.

I urge my colleagues to support this bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Pennsylvania (Mr. THOMPSON) that the House suspend the rules and concur in the Senate amendment to the bill, H.R. 2353.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the Senate amendment was concurred in.

A motion to reconsider was laid on the table.

CONDEMNING THE VIOLENCE, PERSECUTION, INTIMIDATION, AND MURDERS COMMITTED BY THE GOVERNMENT OF NICARAGUA AGAINST ITS CITIZENS

Mr. ROYCE of California. Mr. Speaker, I move to suspend the rules and agree to the resolution (H. Res. 981) condemning the violence, persecution, intimidation, and murders committed by the Government of Nicaragua against its citizens, as amended.

The Clerk read the title of the resolution.

The text of the resolution is as follows:

H. RES. 981

Whereas Daniel Ortega has taken systematic steps to weaken democratic institutions in Nicaragua since 2006, including by manipulating the Nicaraguan Constitution through actions such as eliminating presidential term limits;

Whereas Daniel Ortega selected his wife, Rosario Murillo, as his vice-presidential candidate in 2016;

Whereas domestic and international observers have repeatedly documented and criticized irregularities in the 2011 and 2016 presidential elections as well as the 2012 and 2017 municipal elections in Nicaragua;

Whereas, on April 18, 2018, students in Nicaragua began to protest the unilateral decision of the Government of Nicaragua to impose reforms on the Nicaraguan Social Security Institute;

people for freedom, democracy, electoral reforms, and respect for human rights;

Whereas to block the dissemination of reports of violence and repression committed against peaceful protesters, the Nicaraguan government shut down the signal of media stations throughout Nicaragua;

Whereas according to press reports, the Nicaraguan government has denied basic medical care to and attempted to poison the food and water of those protesting oppression under the Ortega administration;

Resolved, That the House of Representatives—

(1) condemns the violence, persecution, intimidation, and murders of peaceful protesters by the Government of Nicaragua;

(2) supports the people of Nicaragua in their pursuit for democracy, including their call for free and fair elections overseen by credible domestic and international observers;

(3) urges the international community to stand in solidarity with the people of Nicaragua;

(4) calls on the United States to continue to condemn the atrocities in Nicaragua, demand the release of individuals wrongfully detained, and identify those individuals whose involvement in this violence qualifies for the imposition of sanctions under the Global Magnitsky Human Rights Accountability Act (subtitle F of title XII of the National Defense Authorization Act for Fiscal Year 2016; 22 U.S.C. 2656 note); and

(5) affirms that—
(A) the rights to freedom of assembly, association, and expression, the freedom of the press, and freedom from extrajudicial detention and violence, are universal human rights that apply to all persons; and

(B) countries that fail to respect these rights jeopardize the security and prosperity of all of their citizens.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. ROYCE) and the gentleman from New Jersey (Mr. SIRES) each will control 20 minutes.

The Chair recognizes the gentleman from California.

GENERAL LEAVE

Mr. ROYCE of California. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days to revise and extend their remarks and to include extraneous material in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.
Mr. ROYCE of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would really like to begin by thanking our Foreign Affairs chairman emeritus, ILEANA ROS-LEHTINEN, and I do also want to thank my other colleagues on the committee. I also thank ALBIO SIRES for his work on this measure, along with Colonel Cook. I think it is very timely. It is very important.

I think, for those whose families have experienced what it is like under a totalitarian system, there is a special identification with what the victims are going through right now as a result of the authoritarian bent, right now, of President Daniel Ortega, the same Daniel Ortega we remember from 1979. But he lost an election, I think it was, in 1990. He has had five terms.

But in consolidating his power, he has moved to an authoritarian approach in tightening that grip where he has now resorted to using brutal force against the students on their campuses if they protest; brutal force against the people who seek refuge in the churches, shooting up the churches, something that Congressman JUAN VARGAS was talking to me about the other day; brutal force in the villages against those who protest, creating a situation with hundreds and hundreds of deaths and thousands of injuries.

I can just tell you personally, I have a constituent and friend in the district, and she is from one of those villages. She saw me and gave me a little letter the other day about the fate of some of her neighbors who died at the hands of one of these attacks in the villages. They were murdered there on the streets of her small village.

I think the reason that this resolution represents such a broad, bipartisan consensus in this condemnation of Ortega’s regime is because of the nature of that violence. What this resolution does is support the people of Nicaragua in their pursuit of freedom.

Nicaraguans, understandably, want self-determination. They want an end to corruption. They are asking for free and fair elections. The international community—in particular, the Organization of American States regional leaders—must continue to stand with these brave students and church leaders and villagers who are being targeted and being assassinated by thugs working on behalf of and at the behest of Daniel Ortega.

When we think about this circumstance and other authoritarian leaders, one of the allies of Daniel Ortega is Nicolas Maduro. He uses these same tactics against the Venezuelan people, and the people deserve better than this.

This resolution shows this body’s commitment to standing shoulder to shoulder with those without a voice, seeking freedom from those authoritarians who are becoming dictators.

The administration was correct earlier this month in sanctioning three senior Nicaraguan officials for human rights abuses and corruption under the U.S. Global Magnitsky Act, a measure that we passed out of our committee, and that is something that this resolution affirms. But more can still be done.

This resolution encourages the administration to continue to pressure Ortega to stop the violence and to move forward with free and fair elections.

Mr. Speaker, I urge my colleagues to support this measure, and I reserve the balance of my time.

Mr. SIREs. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of this measure.

In response to Ortega's brutal crackdown on peaceful protests and human rights violations, I urge my colleagues to support H. Res. 981, condemning the violence, persecution, and intimidation committed by the Government of Nicaragua against its citizens.

As we know, the Nicaraguan people are suffering as the Ortega government continues to punish citizens for pursuing greater democratic rights. Since Ortega came into power, he has worked hard to consolidate power in the hands of his family and party loyalists at the expense of Nicaraguan citizens.

The peaceful protests that began in April initially opposed the proposed government reform to social security. However, as Ortega ordered violent crackdowns by government security forces, the demonstrations gradually became a call for a more democratic Nicaragua.

The Catholic Church has attempted numerous times to mediate dialogue between Ortega and opposition groups, but the Ortega regime has repeatedly failed to uphold its end of the agreement. We are seeing new reports every week on how Ortega's paramilitary forces are opening fire against sanctuaries and shooting and injuring people seeking refuge in churches across the country. It is shameful. As negotiations over dialogue have devolved, hundreds of Nicaraguan citizens are estimated to have been killed, with thousands more injured.

Recently, international observers from the Inter-American Commission on Human Rights, the United Nations Commission on Human Rights, and the European Union have arrived in Nicaragua to begin investigating the violence. Now, many Nicaraguans are demanding political reform and the resignation of Ortega and his wife before the scheduled elections in 2021.

Mr. Speaker, the United States cannot stand idly by and ignore the demands of the Nicaraguan people while the Ortegas and his confidants push the country towards authoritarianism. That is why my colleagues, Congresswoman ROS-LEHTINEN, Ranking Member ENGEL, Chairman COOK, and I have introduced this bipartisan resolution condemning the ongoing violence in Nicaragua. We are urging the administration to impose sanctions on individuals who qualify under the Global Magnitsky Human Rights Accountability Act.

I have also worked with my friend ILEANA ROS-LEHTINEN to pass the Nicaragua Investment Conditionality Act, to hold the regime accountable for its misuse of international loans. This bill would direct the U.S. to not support international loans to Nicaragua until the government increases transparency and has free and fair elections.

Unified pushback from the international community shows the courageous Nicaraguans on the ground that the world stands shoulder to shoulder with them. It is the only way for Ortega to see the writing on the wall. He has to give up his grip and enact long overdue and meaningful political reform that people are yearning for.

Mr. Speaker, I would like to thank Chairman ROYCE and Ranking Member ENGEL for their continued bipartisanship on these important issues. I urge my colleagues to support the resolution, and I reserve the balance of my time.

Mr. ROYCE of California. Mr. Speaker, I yield 4 minutes to the gentlewoman from Florida (Ms. ROS-LEHTINEN), the chairman emeritus of the Foreign Affairs Committee and the author of this resolution.

Ms. ROS-LEHTINEN. Mr. Speaker, I want to thank Chairman ROYCE for his amazing leadership and also Ranking Member ENGEL. They brought this important and timely resolution to the floor, and I am so grateful to have worked not only with Chairman ROYCE and Ranking Member ENGEL, but also with Chairman COOK and Ranking Member SIREs of the Western Hemisphere Subcommittee.

All of us introduced H. Res. 981, and this resolution, as Mr. SIREs and Mr. ROYCE have pointed out, condemns the persecution; it condemns the intimidation, the violence, and the murders that are being committed by the Government of Nicaragua against its citizens under the orders of Daniel Ortega.

Mr. Speaker, 450, that is how many Nicaraguans have been killed by Ortega's regime and its thugs just since April of this year. Heaven knows how many today or how many just these past days. The death toll is rising every day. And as the regime has now authorized a shoot-to-kill policy in cities like Masaya and Jinotega, shoot to kill against dissidents, against protesters, and add that to the thousands who have been injured, arrested, and forced disappearances, we are talking about a massive and severe repression by a regime that will do anything to stay in power. That is what this is all about. Ortega and his wife want to stay in power at all costs.

On Monday, Daniel Ortega had the nerve, the audacity, to go on our news channel, FOX News, American TV, to say that everything was under control in Nicaragua and that it was, in fact, the Nicaraguan people who were committing the acts of violence, that the Nicaraguan people are the ones responsible for the bloodshed. It is a desperate attempt by a desperate but dangerous fool.

Mr. Speaker, it is a dire situation, and it is getting worse by the day. That is why we need to hold Ortega accountable for his evil and violent acts and put additional pressure on his regime.

The administration has shown great leadership in condemning Ortega and in sanctioning some of his regime's top

officials under the Global Magnitsky Act.

□ 1330

My resolution urges the administration to do more, to target more of Ortega's goons for sanctions, and to urge this very body to do more, because time is of the essence.

The measure before us is simple and straightforward. It rightfully identifies Ortega, not the Nicaraguan people, as the orchestrator of the violence. It urges the administration to take more action against the regime. It also demonstrates our unwavering support for the people of Nicaragua in their support for democracy and their pursuit of justice. It includes the call for early, free, fair, and transparent elections overseen by domestic and international observers.

This resolution also calls upon responsible nations to stand in solidarity with the people of Nicaragua, because their silence has been deafening.

Today, this body is standing up for some of the most cherished values and ideals that we hold true to our hearts, and we are unequivocally rejecting the Ortega regime's abuses and its corruption. Today, we can send a strong, unified, and clear message that we are watching; we are acting; and we are supporting the aspirations of all freedom-loving Nicaraguans.

The SPEAKER pro tempore. The time of the gentlewoman has expired.

Mr. ROYCE of California. Mr. Speaker, I yield the gentlewoman from Florida an additional 1 minute.

Ms. ROS-LEHTINEN. Mr. Speaker, in my congressional district, I am so blessed to have so many Nicaraguan Americans. In fact, one of them is right here behind me, Gaby Boffelli, who is very proud of her Nicaraguan heritage, and she keeps me abreast of what is happening in Nicaragua every day.

My constituents tell me they are heartbroken about the situation. They are heartbroken because people don't seem to be paying attention. But they know that the United States Congress is standing with them. Today, with this vote, we will stand ever so strongly with them.

Ortega is receiving help, as the chairman pointed out, from Venezuela's Maduro, from Castro in Cuba, and from Diaz-Canel in Cuba. These thugs know how to repress and kill dissidents.

Let's do the right thing. Let's not stand with the oppressors. Let's stand with the people of Nicaragua.

Mr. SIREs. Mr. Speaker, I yield myself such time as I may consume for the purpose of closing.

Mr. Speaker, I rise in support of this measure.

In response to Ortega's brutal crackdown on peaceful protests and human rights violations, H. Res. 981 condemns the violence, persecution, and intimidation committed by the Government of Nicaragua against its citizens.

The Nicaragua National Police, or militias, controlled by the Nicaraguan

Government have murdered, detained, and tortured innocent people peacefully standing up for their rights. Stories of Nicaraguan protesters being electrocuted and waterboarded by gangs aligned with the Ortega regime continue to horrify the international community.

While the Ortegas may condemn foreign interference in their affairs, let us be clear: The United States condemns the violence, the persecution, the intimidation, and the murders of peaceful protesters by the Ortega security forces and his henchmen.

We support the people of Nicaragua in their pursuit for democracy, including their call for free and fair elections overseen by credible domestic and international observers, and we demand that Nicaragua release those individuals wrongfully detained by the government.

Again, I want to thank the chairman and ranking member of the Foreign Affairs Committee, ED ROYCE and ELIOT ENGEL. I want to take this opportunity to thank ED ROYCE for his last 3 years of bipartisan work. I want to tell the gentleman that I really appreciate being on his committee and serving with him on this committee. I thank the gentleman for his service.

I also want to thank both my good friend ELIOT ENGEL as well, who is my counterpart on the Western Hemisphere Subcommittee, and Chairman PAUL COOK for their strong bipartisan leadership.

I also want to thank my good friend from Florida, ILEANA ROS-LEHTINEN, whom I have worked with and admired for many, many years, for her decades of unwavering dedication to promoting democracy and human rights around the world.

Mr. Speaker, I support this bill, and I urge all Members to do the same.

Mr. Speaker, I yield back the balance of my time.

Mr. ROYCE of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I shared with this body the letter from my constituent and neighbor outlining what had happened to her village where she had grown up and how she had lost friends at the hands of a gang allied with Daniel Ortega quite recently who attacked the village. So I want to thank ALBIO SIRE, Chairman Emeritus ROS-LEHTINEN, and others who worked on this resolution for bringing this bipartisan measure forward.

I want to thank them for their continued leadership. Because of the continued attacks on demonstrators in Nicaragua, the shooting up of churches, and the threatening of priests there, hundreds of protesters have been murdered, and thousands more have been injured. This is unacceptable.

Mr. Speaker, in closing, it is imperative that this body, and our friends and allies across the region, continue to call on Daniel Ortega to end the violence and to allow free and fair elections in Nicaragua.

Mr. Speaker, I urge my colleagues to support this measure, and I yield back the balance of my time.

Mr. GENE GREEN of Texas. Mr. Speaker, I rise today in support of H. Res. 981, and to condemn the Ortega regime's escalating, brutal campaign against its own people.

Ortega has now been in charge of Nicaragua for 22 of the last 39 years. After years of consolidating power by installing his wife as vice president, and gradually chipping away at the power of the judiciary and congress, Ortega has now dropped all pretense of being anything other than an authoritarian leader.

More than 300 people have now died in Nicaragua for having the courage to speak out against his and his wife's dictatorial rule. Ortega has now shown himself willing to target members of the clergy for fulfilling their sacred duty to recognize the value of human life, and for putting themselves in harm's way to try to protect their people.

This should be unacceptable to the U.S. and to the international community. I commend my colleague Rep. ROS-LEHTINEN for taking a stand, and I encourage the executive branch to use all non-military means available to hold Ortega accountable for these deaths and to stop the carnage in Nicaragua.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. ROYCE) that the House suspend the rules and agree to the resolution, H. Res. 981, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the resolution, as amended, was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore. Pursuant to the rule, the gentleman from California (Mr. ROYCE) and the gentleman from New Jersey (Mr. SIRE) each will control 20 minutes.

The Chair recognizes the gentleman from California.

GENERAL LEAVE

Mr. ROYCE of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to revise and extend their remarks and to include any extraneous material on this measure.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. ROYCE of California. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as America's energy production has increased, and as Chairman MIKE MCCAUL, the author of the measure, can tell you, our Nation's influence in global energy policy has grown.

The U.S. is now the world's top producer of petroleum. It is also the top producer of natural gas for the fifth straight year. I will add to that: The United States has become more energy efficient.

Our abundant supply of energy resources is not only good for our economy, it is also good for our national security. It offers American allies a critical alternative to countries like Russia, which use their energy resources to bully their neighbors, in the case of Vladimir Putin, and, in the case of the global oil cartel OPEC, enrich its member states at the expense of U.S. consumers.

In this moment of heightened American energy leadership, it is critical that the State Department have the leadership and direction needed to fulfill its statutory responsibilities governing international energy diplomacy.

This bill, the Energy Diplomacy Act, will elevate America's energy security and diplomacy priorities. It authorizes an Assistant Secretary for Energy Resources at the State Department. This Assistant Secretary will replace the Coordinator for International Energy Affairs, demonstrating the importance of energy issues to our foreign policy and our national interests.

The Assistant Secretary will be responsible for developing and implementing policies to advance U.S. energy interests abroad by managing our relations in petroleum, in natural gas, in biofuels, in renewable energy, and in nuclear and other energy resources.

This bill also requires the State Department to use diplomacy to support the development of U.S. energy resources to bolster our energy security, grow our economy, and support our allies.

Mr. Speaker, for years, the world's leading petroleum producers have been rigging the world market by cutting production to drive up gasoline prices, and this hurts families in places like our home States. It is in our interests to promote the availability of diversified energy supplies in a functioning global market for energy resources, technologies, and expertise. That is exactly what this bill requires.

Energy policy expertise must be more deeply integrated in our foreign policy. As a major energy producing nation, it is time we elevate this important issue within our diplomatic ranks, which is what this bill will do.

Mr. Speaker, I thank Chairman MCCAUL for his work on this important measure with us today.

Mr. Speaker, I urge support, and I reserve the balance of my time.

Mr. SIRES. Mr. Speaker, I yield myself such time I may consume.

Mr. Speaker, I rise in support of H.R. 5535.

I would like to thank Congressman MCCAUL, Chairman ROYCE, and Ranking Member ENGEL for their bipartisan work on this timely issue.

As it has for decades, energy will continue to play a key role in shaping United States foreign policy. But the international landscape is changing, and so are the players.

Global energy demand is set to rise 30 percent by the year 2030. This reflects an expanding global economy, rapid industrialization, population growth, urbanization, and improved energy access among developing countries.

For the United States to maintain a leading role on the global stage, the State Department must be positioned to protect and promote favorable energy policies abroad. The Energy Diplomacy Act of 2018 helps this effort by creating an Assistant Secretary of State for Energy Resources and requiring the State Department to employ sufficient personnel dedicated to international energy matters.

By passing this legislation, we can prepare the State Department to engage in robust energy diplomacy and encourage strong international partnerships that promote our own political, economic, environmental, and national security concerns.

Mr. Speaker, I urge my colleagues to support this measure, and I reserve the balance of my time.

Mr. ROYCE of California. Mr. Speaker, I yield 4 minutes to the gentleman from Texas (Mr. MCCAUL), who is the chairman of the Committee on Homeland Security and a senior member of the Committee on Foreign Affairs. The gentleman is the author of this measure.

Mr. MCCAUL. Mr. Speaker, I rise in support of my legislation, the Energy Diplomacy Act. Across the globe, our friends and allies want a stable and reliable supply of American energy. America, in turn, must actively engage our friends and allies to provide alternatives to energy from rogue regimes.

Look what is happening in Europe. For over a decade, Russia has used their natural gas pipelines flowing into Eastern and Central Europe as a point of leverage over these countries. Ukraine has been most affected, with Russia turning off their natural gas supply in the winter of 2008 and during the annexation of Crimea in 2014. By twisting a knob and turning off Ukrainian heat, they were able to exert an outsized amount of influence on Ukraine.

Now, Russia's proposed Nord Stream II pipeline with Germany further threatens to expand Russia's energy influence throughout Eastern and Central Europe.

Make no mistake: Russia is a destabilizing regime that constantly exploits the vulnerabilities posed by Europe's reliance on their natural gas.

The United States must be involved to curb this influence.

Over the past decade, the United States has reduced our reliance on foreign sources of energy in order to achieve energy independence. As a result, we are now exporting energy abroad, including from my home State of Texas. In fact, in 2015, I helped champion the repeal of the outdated crude oil export ban. Now, U.S. producers are finding new customers in both Asia and Europe.

That is why I authored the Energy Diplomacy Act. It elevates the Bureau of Energy Resources at the State Department. It replaces the International Energy Affairs Coordinator with an Assistant Secretary. This Assistant Secretary will carry out the State Department's functions on behalf of the United States.

It also ensures the State Department is staffed with sufficient personnel to support this mission. This will empower the State Department to promote and advance a bold U.S. energy diplomacy policy.

As energy-rich adversaries expand their malign influence and our allies continue to purchase from such states, the United States must project strong energy diplomacy now more than ever.

It is not just Russia with whom we are contending. One of Iran's main goals in negotiating their nuclear deal was to open up their energy markets to more foreign investment and to expand their oil exports globally.

Since the U.S. departed from the JCPOA, our European allies and our strategic partner India are deciding between complying with United States sanctions or ignoring them and buying Iranian oil.

□ 1345

We also need our diplomats on the front lines promoting reliable American energy.

These two circumstances underscore the need for an Assistant Secretary for Energy Resources to project U.S. energy diplomacy throughout the world.

I want to thank Chairman ROYCE for his leadership, as well as Ranking Member ENGEL, an original cosponsor of my bill.

Mr. SIRES. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, the United States has long recognized that global energy security and cooperation are necessary to advance our economic, foreign policy, and national security interests. We must work with our established friends and allies to seize the opportunities and address the challenges we face. We must also work with the emerging economies that account for an ever-increasing amount of energy consumption and production.

H.R. 5535, the Energy Diplomacy Act, takes an important step toward ensuring that the State Department has the leadership and the capacity it needs to appropriately advance this critical aspect of U.S. foreign policy.

Mr. Speaker, I urge my colleagues to support this measure, and I yield back the balance of my time.

Mr. ROYCE of California. Mr. Speaker, I yield myself the balance of my time.

In closing, Mr. Speaker, I would like to thank my colleagues, Chairman MCCAUL, Ranking Member ENGEL, and Mr. SIREs, for crafting bipartisan legislation to ensure that the State Department has the leadership and the direction to support America's energy diplomacy priorities.

Working with our allies and partners in the private sector, we can counter Putin's weaponization of his energy resources and provide our allies with a stable alternative to unreliable energy suppliers whose priorities are self-enrichment and geopolitical self-interest at the expense of a functioning market.

Mr. Speaker, I urge passage of this bipartisan bill, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. ROYCE) that the House suspend the rules and pass the bill, H.R. 5535, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

CONDEMNING HATE CRIME AND ANY OTHER FORM OF RACISM, RELIGIOUS OR ETHNIC BIAS, DISCRIMINATION, INCITEMENT TO VIOLENCE, OR ANIMUS TARGETING A MINORITY IN THE UNITED STATES

Mrs. HANDEL. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of H. Res. 257, and ask for its immediate consideration in the House.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Georgia?

There was no objection.

The text of the resolution is as follows:

H. RES. 257

Whereas, in the past several years, violent crimes, threats of violence, and other incidents of hate-motivated targeting of religious, racial, and ethnic minorities have increased across the United States;

Whereas, in 2015, hate crimes targeting Muslims in the United States increased by 67 percent, reaching a level of violence targeting Muslim Americans that the United States had not experienced since the aftermath of the September 11, 2001, attacks, according to the Federal Bureau of Investigation;

Whereas, in 2015, anti-Semitic incidents increased in the United States for the second straight year, according to the Anti-Defamation League's 2015 Audit of Anti-Semitic Incidents, which describes trends such as the tripling of assaults targeting Jews since 2012 and the rise of online harassment and hate speech directed at Jewish journalists and individuals through social media;

Whereas, in 2015, anti-Semitic incidents at institutions of higher education nearly doubled compared to the number of those incidents in 2014, and during the 2016–2017 school year there has been an increase in White supremacist activity on college campuses across the United States, according to the Anti-Defamation League;

Whereas, in 2015, among single-bias hate crime incidents in the United States, 59.2 percent of victims were targeted due to racial, ethnic, or ancestry bias, and among those victims, 52.2 percent were victims of crimes motivated by their offenders' anti-Black or anti-African-American bias, according to the Federal Bureau of Investigation;

Whereas, in 2017, there have been more than 100 reported bomb threats against Jewish community centers, Jewish day schools, and other Jewish organizations and institutions in more than 38 States;

Whereas, in 2017, Islamic centers and mosques have been burned in the States of

Texas, Washington, and Florida, and Jewish cemeteries have been desecrated in the States of Missouri and Pennsylvania;

Whereas, in 2017, there has been harassment and hate-based violence against individuals who are perceived to be Muslim, including members of South Asian communities in the United States, and Hindu and Sikh Americans have been the target of hate-based violence targeting religious minorities; and

Whereas, on February 28, 2017, President Donald Trump, before a joint session of Congress, acknowledged threats targeting Jewish community centers and the vandalism of Jewish cemeteries, and stated that “we are a country that stands united in condemning hate and evil in all of its very ugly forms”: Now, therefore, be it

Resolved, That the House of Representatives—

(1) affirms that the United States stands united in condemning hate and evil in all forms;

(2) rejects hate-motivated crime as an attack on the fabric of the society of the United States and the ideals of pluralism and respect;

(3) condemns hate crime and any other form of racism, religious or ethnic bias, discrimination, incitement to violence, or animus targeting a minority in the United States;

(4) calls on Federal law enforcement officials, working with State and local officials—

(A) to expeditiously investigate all credible reports of hate crimes and incidents and threats against minorities in the United States; and

(B) to hold the perpetrators of those crimes, incidents, or threats accountable and bring the perpetrators to justice;

(5) encourages the Department of Justice and other Federal agencies—

(A) to work to improve the reporting of hate crimes; and

(B) to emphasize the importance of the agencies’ collection and reporting of data pursuant to Federal law;

(6) encourages the development of an interagency task force led by the Attorney General and bringing together the Department of Justice, the Department of Homeland Security, the Department of Education, the Department of State, the Federal Bureau of Investigation, and the Office of the Director of National Intelligence to collaborate on the development of effective strategies and efforts to detect and deter hate crime in order to protect minority communities; and

(7) calls on the executive branch—

(A) to offer Federal assistance that may be available for victims of hate crimes; and

(B) to enhance security measures and improve preparedness for religious institutions, places of worship, and other institutions that have been targeted because of the affiliation of the institutions with any particular religious, racial, or ethnic minority in the United States.

The resolution was agreed to.

A motion to reconsider was laid on the table.

SEC. 317. DEPARTMENT OF DEFENSE ENVIRONMENTAL RESTORATION PROGRAMS.

(a) **FINDINGS.**—Congress makes the following findings:

(1) The Department of Defense has identified nearly 39,500 sites that fall under the installation restoration program sites and munitions response sites.

(2) The installation response program addresses contamination from hazardous substances, pollutants, or contaminants and active military installations, formerly used defense site properties, and base realignment and closure locations in the United States.

(3) Munitions response sites are known or suspected to contain unexploded ordnance, discarded military munitions, or munitions constituents are addressed through the military munitions response program.

(4) The installation restoration program sites and munitions response sites have had significant impacts on state and local governments that have had to bear the increased costs of environmental degradation, notably groundwater contamination, and local populations that have had to live with the consequences of contaminated drinking, including increased health concerns and decreasing property values.

(5) Through the end of fiscal year 2017, the Department of Defense had achieved response complete at 86 percent of installation restoration program sites and munitions response sites, but projects that it will fall short of meeting its goal of 90 percent by the end of fiscal year 2018.

(6) The fiscal year 2019 budget request for environmental restoration and base realignment and closure amounted to nearly \$1,318,320,000, a decrease of \$53,429,000 from the amount authorized in the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115–91).

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that—

(1) the environmental restoration and base realignment and closure programs are important for the protection of the environment, the health of the military and civilian personnel and their families who live and work on military installations, to ensure that current and legacy military

operations do not adversely affect the health or environments of surrounding communities;

(2) the Department of Defense and the Armed Forces should seek to reduce the financial burden on state and local government who are bearing significant costs of cleanup stemming from defense related activities;

(3) the Department of Defense and the Armed Forces should expedite and streamline cleanup at locations where contamination is having a direct impact on civilian access to clean drinking water;

(4) the Department of Defense and the Armed Forces should continue to engage with and help allay local community concerns about the safety of the drinking water due to environmental degradation caused by defense related activities; and

(5) the Department of Defense should seek opportunities to accelerate environmental restoration efforts where feasible, to include programming additional resources for response actions, investing in technology solutions that may expedite response actions, improving contracting procedures, increasing contracting capacity, and seeking opportunities for partnerships and other cooperative approaches.

(5) The cumulative impacts of multiple wind farms near a single radar on the ability of the National Oceanic and Atmospheric Administration and the National Weather Service to warn or forecast hazardous weather.

(6) An analysis of whether certain wind turbine projects, based on project layout, turbine orientation, number of turbines, density of turbines, proximity to radar, or turbine height result in greater impacts to the missions of Department of Defense, the National Oceanic and Atmospheric Administration, and the National Weather Service, and if so, how can those projects be better cited to reduce or eliminate NEXRAD impacts.

(7) Case studies where the Department of Defense, the National Weather Service, and industry have worked together to implement solutions.

(1) In 2017, there were three collisions and one grounding involving United States Navy ships in the Western Pacific. The two most recent mishaps involved separate incidents of a Japan-based United States Navy destroyer colliding with a commercial merchant vessel, resulting in the combined loss of 17 sailors.

(2) The causal factors in these four mishaps are linked directly to a failure to take sufficient action in accordance with the rules of good seamanship.

(3) Because risks are high in the maritime environment, there are widely accepted standards for safe seamanship and navigation. In the United States, the International Convention on Standards of Training, Certification and Watchkeeping (hereinafter in this section referred to as the “STCW”) for Seafarers, standardizes the skills and foundational knowledge a maritime professional must have in seamanship and navigation.

(4) Section 568 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114–328; 130 Stat. 2139) endorsed the STCW process and required the Secretary of Defense to maximize the extent to which Armed Forces

service, training, and qualifications are credible toward meeting merchant mariner licenses and certifications.

(5) The Surface Warfare Officer Course Curriculum is being modified to include ten individual Go/No Go Mariner Assessments/Competency Check Milestones to ensure standardization and quality of the surface warfare community.

(6) The Military-to-Mariner Transition report of September 2017 notes the Army maintains an extensive STCW qualifications program and that a similar Navy program does not exist.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that—

(1) the Secretary of the Navy should establish a comprehensive individual proficiency assessment process and include such an assessment prior to all operational surface warfare officer tour assignments; and

(2) the Secretary of the Navy should significantly expand the STCW qualifications process to improve seamanship and navigation individual skills training for surface warfare candidates, surface warfare officers, quartermasters and operations specialists to include an increased set of courses that directly correspond to STCW standards.

(c) **REPORT.**—Not later than March 1, 2019, the Secretary of the Navy shall submit to the congressional defense committees a report that includes each of the following:

commodity group by percentage and actual numbers in terms of dollars and direct labor hours;

(2) within each category of depot level maintenance and repair for each entities, the amount of the subset of depot maintenance workload that meets the description under section 2464 of title 10, United States Code, that is performed in the public and private sectors by direct labor hours and by dollars;

(3) of the subset referred to in paragraph (2), the amount of depot maintenance workload performed in the public and private sector by direct labor hour and by dollars for each entity that would otherwise be considered core workload under such section 2464, but is not considered core because a weapon system or equipment has not been declared a program of record; and

(B) such long-lead components have successfully completed knowledge points, technical milestones, and production readiness reviews; and

Subtitle A—Committee on Foreign Investment in the United States

SEC. 1701. SHORT TITLE: FOREIGN INVESTMENT RISK REVIEW MODERNIZATION ACT OF 2018.

This subtitle may be cited as the “Foreign Investment Risk Review Modernization Act of 2018”.

SEC. 1702. FINDINGS; SENSE OF CONGRESS.

(a) FINDINGS.—Congress makes the following findings:

(1) According to a February 2016 report by the International Trade Administration of the Department of Commerce, 12,000,000 United States workers, equivalent to 8.5 percent of the labor force, have jobs resulting from foreign investment, including 3,500,000 jobs in the manufacturing sector alone.

(2) In 2016, new foreign direct investment in United States manufacturing totaled \$129,400,000,000.

(3) The Bureau of Economic Analysis of the Department of Commerce concluded that, in 2015—

(A) foreign-owned affiliates in the United States—

(i) contributed \$894,500,000,000 in value added to the United States economy;

(ii) exported goods valued at \$352,800,000,000, accounting for nearly a quarter of total exports of goods from the United States; and

(iii) undertook \$56,700,000,000 in research and development; and

(B) the 7 countries investing the most in the United States, all of which are United States allies (the United Kingdom, Japan, Germany, France, Canada, Switzerland, and the Netherlands) accounted for 72.1 percent of the value added by foreign-owned affiliates in the United States and more than 80 percent of research and development expenditures by such entities.

(4) According to the Government Accountability Office, from 2011 to 2016, the number of transactions reviewed by the Committee on Foreign Investment in the United States (commonly referred to as “CFIUS”) grew by 55 percent, while the staff of the Committees assigned to the reviews increased by 11 percent.

(5) According to a February 2018 report of the Government Accountability Office on the Committee on Foreign Investment in the United States (GAO-18-249): “Officials from Treasury and other member agencies are aware of pressures on their CFIUS staff given the current workload and have expressed concerns about possible workload increases.” The Government Accountability Office concluded: “Without attaining an understanding of the staffing levels needed to address the current and future CFIUS workload, particularly if legislative changes to CFIUS’s authorities further expand its workload, CFIUS may be limited in its ability to fulfill its objectives and address threats to the national security of the United States.”

(6) On March 30, 1954, Dwight David Eisenhower—five-star general, Supreme Allied Commander, and 34th President of the United States—in his “Special Message to the Congress on Foreign Economic Policy”, counseled: “Great mutual advantages to buyer and seller, to producer and consumer, to investor and to the community where investment is made, accrue from high levels of trade and investment.” President Eisenhower continued: “The internal strength of the American economy has evolved from such a system of mutual advantage. In the press of other problems and in the haste to meet emergencies, this nation—and many other nations of the free world—have all too often lost sight of this central fact.” President Eisenhower concluded: “If we fail in our trade policy, we may fail in all. Our domestic employment, our standard of living, our security, and the solidarity of the free world—all are involved.”

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) foreign investment provides substantial economic benefits to the United States, including the promotion of economic growth, productivity, competitiveness, and job creation, thereby enhancing national security;

(2) maintaining the commitment of the United States to an open investment policy encourages other countries to reciprocate and helps open new foreign markets for United States businesses;

(3) it should continue to be the policy of the United States to enthusiastically welcome and support foreign investment, consistent with the protection of national security;

(4) at the same time, the national security landscape has shifted in recent years, and so has the nature of the investments that pose the greatest potential risk to national security, which warrants an appropriate modernization of the processes and authorities of the Committee on Foreign Investment in the United States and of the United States export control system;

(5) the Committee on Foreign Investment in the United States plays a critical role in protecting the national security of the United States, and, therefore, it is essential that the member agencies of the Committee are adequately resourced and able to hire appropriately qualified individuals in a timely manner, and that those individuals’ security clearances are processed as a high priority;

(6) the President should conduct a more robust international outreach effort to urge and help allies and partners of the United States to establish processes that are similar to the Committee on Foreign Investment in the United States to screen foreign investments for national security risks and to facilitate coordination;

(7) the President should lead a collaborative effort with allies and partners of the United States to strengthen the multilateral export control regime;

(8) any penalties imposed by the United States Government with respect to an individual or entity pursuant to a determination that the individual or entity has violated sanctions imposed by the United States or the export control laws of the United States should not be reversed for reasons unrelated to the national security of the United States; and

(9) the Committee on Foreign Investment in the United States should continue to review transactions for the purpose of protecting national security and should not consider issues of national interest absent a national security nexus.

(c) SENSE OF CONGRESS ON CONSIDERATION OF COVERED TRANSACTIONS.—It is the sense of Congress that, when considering national security risks, the Committee on Foreign Investment in the United States may consider—

(1) whether a covered transaction involves a country of special concern that has a demonstrated or declared strategic goal of acquiring a type of critical technology or critical infrastructure that would affect United States leadership in areas related to national security;

(2) the potential national security-related effects of the cumulative control of, or pattern of recent transactions involving, any one type of critical infrastructure, energy asset, critical material, or critical technology by a foreign government or foreign person;

(3) whether any foreign person engaging in a covered transaction with a United States business has a history of complying with United States laws and regulations;

(4) the control of United States industries and commercial activity by foreign persons as it affects the capability and capacity of the United States to meet the requirements of national security, including the availability of human resources, products, technology, materials, and other supplies and services, and in considering “the availability of human resources”, should construe that term to include potential losses of such availability resulting from reductions in the employment of United States persons whose knowledge or skills are critical to national security, including the continued production in the United States of items that are likely to be acquired by the Department of Defense or other Federal departments or agencies for the advancement of the national security of the United States;

(5) the extent to which a covered transaction is likely to expose, either directly or indirectly, personally identifiable information, genetic information, or other sensitive data of United States citizens to access by a foreign government or foreign person that may exploit that information in a manner that threatens national security; and

(6) whether a covered transaction is likely to have the effect of exacerbating or creating new cybersecurity vulnerabilities in the United States or is likely to result in a foreign government gaining a significant new capability to engage in malicious cyber-enabled activities

against the United States, including such activities designed to affect the outcome of any election for Federal office.

PART I—AUTHORITY AND ADMINISTRATION OF CONTROLS

SEC. 1751. SHORT TITLE.

This part may be cited as the “Export Controls Act of 2018”.

SEC. 1752. STATEMENT OF POLICY.

The following is the policy of the United States:

(1) To use export controls only after full consideration of the impact on the economy of the United States and only to the extent necessary—

(A) to restrict the export of items which would make a significant contribution to the military potential of any other country or combination of countries which would prove detrimental to the national security of the United States; and

(B) to restrict the export of items if necessary to further significantly the foreign policy of the United States or to fulfill its declared international obligations.

(2) The national security and foreign policy of the United States require that the export, reexport, and in-country transfer of items, and specific activities of United States persons, wherever located, be controlled for the following purposes:

(A) To control the release of items for use in—

(i) the proliferation of weapons of mass destruction or of conventional weapons;

(ii) the acquisition of destabilizing numbers or types of conventional weapons;

(iii) acts of terrorism;

(iv) military programs that could pose a threat to the security of the United States or its allies; or

(v) activities undertaken specifically to cause significant interference with or disruption of critical infrastructure.

(B) To preserve the qualitative military superiority of the United States.

(C) To strengthen the United States defense industrial base.

(D) To carry out the foreign policy of the United States, including the protection of human rights and the promotion of democracy.

(E) To carry out obligations and commitments under international agreements and arrangements, including multilateral export control regimes.

(F) To facilitate military interoperability between the United States and its North Atlantic Treaty Organization (NATO) and other close allies.

(G) To ensure national security controls are tailored to focus on those core technologies and other items that are capable of being used to pose a serious national security threat to the United States.

(3) The national security of the United States requires that the United States maintain its leadership in the science, technology, engineering, and manufacturing sectors, including foundational technology that is essential to innovation. Such leadership requires that United States persons are competitive in global markets. The impact of the implementation of this part on such leadership and competitiveness must be evaluated on an ongoing basis and applied in imposing controls under sections 1753 and 1754 to avoid negatively affecting such leadership.

(4) The national security and foreign policy of the United States require that the United States

participate in multilateral organizations and agreements regarding export controls on items that are consistent with the policy of the United States, and take all the necessary steps to secure the adoption and consistent enforcement, by the governments of such countries, of export controls on items that are consistent with such policy.

(5) Export controls should be coordinated with the multilateral export control regimes. Export controls that are multilateral are most effective, and should be tailored to focus on those core technologies and other items that are capable of being used to pose a serious national security threat to the United States and its allies.

(6) Export controls applied unilaterally to items widely available from foreign sources generally are less effective in preventing end-users from acquiring those items. Application of unilateral export controls should be limited for purposes of protecting specific United States national security and foreign policy interests.

(7) The effective administration of export controls requires a clear understanding both inside and outside the United States Government of which items are controlled and an efficient process should be created to regularly update the controls, such as by adding or removing such items.

(8) The export control system must ensure that it is transparent, predictable, and timely, has the flexibility to be adapted to address new threats in the future, and allows seamless access to and sharing of export control information among all relevant United States national security and foreign policy agencies.

(9) Implementation and enforcement of United States export controls require robust capabilities in monitoring, intelligence, and investigation, appropriate penalties for violations, and the ability to swiftly interdict unapproved transfers.

(10) Export controls complement and are a critical element of the national security policies underlying the laws and regulations governing foreign direct investment in the United States, including controlling the transfer of critical technologies to certain foreign persons. Thus, the President, in coordination with the Secretary, the Secretary of Defense, the Secretary of State, the Secretary of Energy, and the heads of other Federal agencies, as appropriate, should have a regular and robust process to identify the emerging and other types of critical technologies of concern and regulate their release to foreign persons as warranted regardless of the nature of the underlying transaction. Such identification efforts should draw upon the resources and expertise of all relevant parts of the United States Government, industry, and academia. These efforts should be in addition to traditional efforts to modernize and update the lists of controlled items under the multilateral export control regimes.

(11) The authority under this part may be exercised only in furtherance of all of the objectives set forth in paragraphs (1) through (10).

SEC. 1753. AUTHORITY OF THE PRESIDENT.

(c) **APPLICATION OF CONTROLS.**—The President shall impose controls over the export, reexport, or in-country transfer of items for purposes of the objectives described in subsections (b)(1) or (b)(2) without regard to the nature of the underlying transaction or any circumstances pertaining to the activity, including whether such export, reexport, or in-country transfer occurs pursuant to a purchase order or other contract requirement, voluntary decision, inter-company arrangement, marketing effort, or during a joint venture, joint development agreement, or similar collaborative agreement.

(1) to oppose restrictive trade practices or boycotts fostered or imposed by any foreign country against other countries friendly to the United States or against any United States person;

(2) to encourage and, in specified cases, require United States persons engaged in the export of goods or technology or other information to refuse to take actions, including furnishing information or entering into or implementing agreements, which have the effect of furthering or supporting the restrictive trade practices or boycotts fostered or imposed by any foreign country against a country friendly to the United States or any United States person; and

(3) to foster international cooperation and the development of international rules and institutions to assure reasonable access to world supplies.

SEC. 1773. FOREIGN BOYCOTTS.

(a) PROHIBITIONS AND EXCEPTIONS.—

(1) PROHIBITIONS.—For the purpose of implementing the policies set forth in section 1772, the President shall issue regulations prohibiting any United States person, with respect to that person’s activities in the interstate or foreign commerce of the United States, from taking or knowingly agreeing to take any of the following actions with intent to comply with, further, or support any boycott fostered or imposed by any foreign country, against a country which is friendly to the United States and which is not itself the object of any form of boycott pursuant to United States law or regulation:

The mere absence of a business relationship with or in the boycotted country with any business concern organized under the laws of the boycotted country, with any national or resident of the boycotted country, or with any other person, does not indicate the existence of the intent required to establish a violation of regulations issued to carry out this subparagraph.

Nothing in this subparagraph shall prohibit the furnishing of normal business information in a commercial context as defined by the Secretary.

(E) Furnishing information about whether any person is a member of, has made contributions to, or is otherwise associated with or involved in the activities of any charitable or fraternal organization which supports the boycotted country.

(F) Paying, honoring, confirming, or otherwise implementing a letter of credit which contains any condition or requirement compliance with which is prohibited by regulations issued pursuant to this paragraph, and no United States person shall, as a result of the application of this paragraph, be obligated to pay or otherwise honor or implement such letter of credit.

(C) complying or agreeing to comply in the normal course of business with the unilateral and specific selection by a boycotting country, or national or resident thereof, of carriers, insurers, suppliers of services to be performed within the boycotting country or specific goods which, in the normal course of business, are identifiable by source when imported into the boycotting country;

and such regulations may contain exceptions for such resident complying with the laws or regulations of that foreign country governing imports into such country of trademarked, trade named, or similarly specifically identifiable products, or components of products for his own use, including the performance of contractual services within that country, as may be defined by such regulations.

Any report filed pursuant to this paragraph shall be made available promptly for public inspection and copying, except that information regarding the quantity, description, and value of any goods or technology to which such report relates may be kept confidential if the Secretary determines that disclosure thereof would place the United States person involved at a competitive disadvantage. The Secretary shall periodically transmit summaries of the information contained in such reports to the Secretary of State for such action as the Secretary of State, in consultation with the Secretary, considers appropriate for carrying out the policies set forth in section 1772.

(c) PREEMPTION.—The provisions of this section and the regulations issued pursuant thereto shall preempt any law, rule, or regulation of any of the several States or the District of Columbia, or any of the territories or possessions of the United States, or of any governmental subdivision thereof, which law, rule, or regulation pertains to participation in, compliance with, implementation of, or the furnishing of information regarding restrictive trade practices or boycotts fostered or imposed by foreign countries against other countries friendly to the United States.

have resulted in increased risk of illness and death to workers. That Act established a formal process for the submission of claims for medical expenses and lump sum compensation for former employees and contractors and survivors of those former employees and contractors.

(3) As of the date of the enactment of this Act, more than 150,231 claims have been paid out under the Radiation Exposure Compensation Act and the Energy Employees Occupational Illness Compensation Program Act of 2000, for a total of at least \$17,400,000,000 in lump sum compensation and medical expenses.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5515), to authorize appropriations for fiscal year 2019 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment that is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

Compliance with rules of the House of Representatives and Senate regarding earmarks and congressionally directed spending items

Pursuant to clause 9 of rule XXI of the Rules of the House of Representatives and Rule XLIV(3) of the Standing Rules of the Senate, neither this conference report nor the accompanying joint statement of managers contains any congressional earmarks, congressionally directed spending items, limited tax benefits, or limited tariff benefits, as defined in such rules.

Summary of discretionary authorizations and budget authority implication

The budget request for national defense discretionary programs within the jurisdiction of the Committees on Armed Services of the Senate and the House of Representatives for fiscal year 2019 was \$708.1 billion. Of this amount, \$617.1 billion was requested for base Department of Defense programs, \$69.0 billion was requested for overseas contingency

operations, \$21.8 billion was requested for national security programs in the Department of Energy and the Defense Nuclear Facilities Safety Board, and \$214.0 million for defense-related activities.

The conference agreement would authorize \$708.1 billion in fiscal year 2019, including \$616.9 billion for base Department of Defense programs, \$69.0 billion for overseas contingency operations, \$21.9 billion for national security programs in the Department of Energy and the Defense Nuclear Facilities Safety Board, and \$300.0 million for defense-related activities.

The two tables preceding the detailed program adjustments in Division D of the accompanying joint statement of managers summarize the discretionary authorizations in the agreement and the equivalent budget authority levels for fiscal year 2019 defense programs.

Budgetary effects of this Act (sec. 4)

The Senate amendment contained a provision (sec. 4) that would require that the budgetary effects of this Act be determined in accordance with the procedures established in the Statutory Pay-As-You-Go Act of 2010 (title I of Public Law 111-139).

The House bill contained no similar provision.

The House recedes.

DIVISION A—DEPARTMENT OF DEFENSE
AUTHORIZATIONS

TITLE I—PROCUREMENT

BUDGET ITEMS

Columbia-class submarine advance procurement

The budget request included \$3.0 billion in line item 1 of Shipbuilding and Conversion, Navy for *Columbia*-class submarine advance procurement.

The House bill would authorize an increase of \$82.7 million above the request.

The Senate amendment would authorize the funding level in the request.

The agreement authorizes an increase of \$237.0 million above the request.

The conferees' intent in authorizing additional funds for submarine industrial base expansion is to ensure second- and third-tier contractors are able to meet increased production requirements.

The conferees direct the Secretary of the Navy to notify the congressional defense committees within 30 days of obligating funds provided for submarine industrial base expansion of the: obligation date, contractor name or names, location, description of the shortfall to be addressed, actions to be undertaken, desired end state, usable end items to be procured, period of performance, dollar amount, projected associated savings including business case analysis if applicable, contract name, and contract number.

The conferees believe that expanding the capabilities of the second- and third-tier contractors in the submarine industrial base should lead to greater cost savings and improved efficiency as production increases to meet the *Columbia*-class schedule and higher requirement for *Virginia*-class attack submarines in the Navy's latest Force Structure Assessment.

Subtitle A—Authorization of Appropriations
Authorization of appropriations (sec. 101)

The House bill contained a provision (sec. 101) that would authorize appropriations for procurement at the levels identified in section 4101 of division D of this Act.

The Senate amendment contained a similar provision (sec. 101).

The House recedes.

Subtitle B—Army Programs

National Guard and reserve component equipment report (sec. 111)

The House bill contained a provision (sec. 111) that would require a joint assessment by

the Army and National Guard on efforts to achieve parity among the active component, the Army Reserve, and the Army National Guard with respect to equipment and capabilities.

The Senate amendment contained no similar provision.

The Senate recedes.

Deployment by the Army of an interim cruise missile defense capability (sec. 112)

The Senate amendment contained a provision (sec. 111) that would direct the Army to procure an alternate short-term option to fill its cruise missile defense gap with existing systems and accelerate the Indirect Fire Protection Capability (IFPC) system independently of Integrated Air and Missile Defense Battle Command System (IBCS) deployment, leveraging entities such as the Defense Digital Service or the Defense Innovation Unit Experimental, and to report the determination of that short-term option to the congressional defense committees no later than 90 days after the enactment of this Act.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense to certify the need for the Army to fill the gap in cruise missile defense prior to deployment of such a capability, subject to appropriations. Further, the amendment would urge the Army to consider a range of directed energy solutions for the deployment of the 2023 interim capability deployment date and remove the requirement for locations of deployment for such a capability.

The conferees are deeply concerned about the paucity of land-based cruise missile defense capabilities and the Army's corresponding inability to adequately protect the joint force's fixed site systems, such as airfields and logistical depots. Integrated air and missile defense is critical for joint operations, but assets are not currently ready to counter an adversary's potential complex, integrated attack, thus leaving critical assets vulnerable. As outlined by the National Defense Strategy, cruise missile defense is a critical capability to defend against Russian and Chinese threats. Without this capability, the committee is concerned the U.S. Army will fail to successfully perform its mission to protect the joint force.

For these reasons, the conferees strongly urge the Army to consider deployment of the interim capability be prioritized in locations for deployment of air bases and significant fixed site locations in Europe and Asia for the purpose of the protection of such bases and locations against potential cruise missile threats. The conferees further recommend that the Army consider force structure requirements for the interim capability and plan accordingly in order to ensure full support of such a system once deployed.

Subtitle C—Navy Programs

Procurement authority for Ford-class aircraft carrier program (sec. 121)

The House bill contained a provision (sec. 122) that would authorize the construction of one *Ford*-class aircraft carrier designated CVN-81.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require a certification prior to awarding a contract authorized by this provision.

The conferees note that the Department of Defense has been able to achieve program efficiencies and cost savings by using multiyear and block buy contracting with many weapons programs, to include shipbuilding. If the Department of the Navy in-

tends to pursue a two-ship procurement of CVN-80 and CVN-81 outside the title 10, United States Code, parameters for a multiyear contract, the conferees expect that entering into such contract would be based on rigorous analysis with a sound business case and substantial savings.

Earlier this year, the Navy issued a request for proposal soliciting information on a potential contract to acquire two *Ford*-class aircraft carriers (CVN-80 and CVN-81). The conferees are disappointed that no related information was provided to the congressional defense committees to enable full consideration of the associated required legislative authorities during the development of the National Defense Authorization Act for Fiscal Year 2019.

Nonetheless, the conferees believe a two-ship procurement of CVN-80 and CVN-81 could result in significant cost savings. Accordingly, this provision would provide the necessary authorities for implementing such an approach, if the Secretary of Defense certifies supporting analysis prepared and provided by the milestone decision authority for the carrier replacement program, which is the Department of the Navy Service Acquisition Executive.

It is the conferees' intent that the Secretary of Defense review such analysis and, if the Secretary deems it appropriate, make the certification without performing any separate cost assessments or analyses. The conferees view such a process as consistent with ongoing efforts to reduce the time associated with acquisition decisions, push acquisition authorities and accountability to the Services, and ensure that the Secretary of Defense retains visibility and ultimate authority over acquisition matters in the Department.

Full ship shock trial for Ford-class aircraft carrier (sec. 122)

The House bill contained a provision (sec. 123) that would ensure that full ship shock trials results are incorporated in the construction of the *Ford*-class aircraft carrier designated CVN-81.

The Senate amendment contained no similar provision.

The Senate recedes.

Sense of Congress on accelerated production of aircraft carriers (sec. 123)

The House bill contained a provision (sec. 121) that would express the sense of Congress as to aircraft carrier force structure. Additionally, this section would modify section 5062 of title 10, United States Code, by increasing the required aircraft carrier force structure from 11 to 12 operational aircraft carriers by September 30, 2022.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would express the sense of Congress on accelerated production of aircraft carriers.

Multiyear procurement authority for standard missile-6 (sec. 124)

The House bill contained a provision (sec. 125) that would authorize the Secretary of the Navy to enter into one or more multiyear contracts for 625 Standard Missile-6 missiles beginning in fiscal year 2019, in accordance with section 2306b of title 10, United States Code.

The Senate amendment contained a similar provision (sec. 125) that would authorize the Secretary of the Navy to enter into multiyear contracts beginning in fiscal year 2019 for the procurement of 625 Standard Missile-6 guided missiles pending the Director of Cost Assessment and Program Evaluation confirmation of the Secretary of the Navy's preliminary findings as required in subsection a of section 2306b of title 10, United States Code.

The Senate recesses with a technical amendment.

Multiyear procurement authority for E-2D aircraft (sec. 125)

The House bill contained a provision (sec. 126) that would authorize multiyear procurement for E-2D aircraft.

The Senate amendment contained a similar provision (sec. 122).

The Senate recesses.

Multiyear procurement authority for F/A-18E/F aircraft and EA-18G aircraft (sec. 126)

The House bill contained a provision (sec. 127) that would authorize multiyear procurement for F/A-18E/F and EA-18G aircraft.

The Senate amendment contained a similar provision (sec. 121).

The Senate recesses.

Modifications to F/A-18 aircraft to mitigate physiological episodes (sec. 127)

The House bill contained a provision (sec. 128) that would require the Secretary of the Navy to modify F/A-18 aircraft to reduce the occurrence of, and mitigate the risk posed by, physiological episodes affecting F/A-18 crewmembers.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would eliminate the requirement for the installation of an automatic ground collision avoidance system.

The conferees expect EA-18G aircraft to also receive the modifications required in this provision.

Frigate class ship program (sec. 128)

The House bill contained a provision (sec. 129) that would require, as part of the solicitation for proposals for the procurement of any frigate class ship, that the Secretary of the Navy require offerors to submit proposals that provide for conveying technical data to the government. Additionally, this provision would require the Secretary of the Navy to ensure that the government's technical data rights are sufficient to allow for specified follow-on activities.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would remove the requirement for the Secretary of the Navy to ensure that the government's technical data rights are sufficient to allow for specified follow-on activities and clarify the conditions under which technical data shall be provided to the government.

The conferees' intent is to obtain sufficient technical data to ensure the Navy has the option to compete the winning frigate design in the future for production by at least one additional shipbuilder, if the Navy's inventory objective for FFG(X)-class ships merits such expansion. The conferees note that the benefits of two shipbuilders building the same ship design have been demonstrated in both the DDG-51 and CG-47 classes. The conferees do not intend for the winning frigate offeror to provide technical data beyond what is needed for a single-design, multiple-shipbuilder frigate acquisition strategy or otherwise authorized by law.

Contract requirement for Virginia class submarine program (sec. 129)

The House bill contained a provision (sec. 130) that would modify section 124 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91) to prohibit the Secretary of the Navy from entering into economic order quantity contracts for the Virginia-class submarine program until the Secretary certifies that such funding shall be used to enter into economic order quantities for 12 Virginia-class submarines.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would require the Secretary of the Navy to ensure that an option to procure one additional Virginia-class submarine in each of fiscal years 2022 and 2023 is included in the associated multiyear procurement contract award planned for fiscal year 2019.

Prohibition on availability of funds for Navy port waterborne security barriers (sec. 130)

The Senate contained a provision (sec. 124) that would prohibit funds from being used to procure new Navy port waterborne security barriers unless the Secretary of the Navy submits a waiver to the congressional defense committees.

The House bill contained no similar provision.

The House recesses with an amendment that would apply the prohibition of funds to legacy barriers; exempt the sustainment, refurbishment, and replacement of portions of existing waterborne security barriers; and exempt the procurement of new barriers due to exigent circumstances.

Extension of limitation on use of sole-source shipbuilding contracts for certain vessels (sec. 131)

The Senate amendment contained a provision (sec. 123) that would extend to include fiscal year 2019 in the prohibition on funds from being used to enter into, or prepare to enter into, sole source contracts for one or more Joint High Speed Vessels or Expeditionary Fast Transports, unless the Secretary of the Navy submits to the congressional defense committees a certification and a report.

The House bill contained a provision (sec. 112) that would prohibit the obligation and expenditure of not more than 80 percent of the funds for the Marine Corps M27 Infantry Automatic Rifle program until a report is submitted to the congressional defense committees on the service's assessment of the Army's Small Arms Ammunition Configuration study and the service's near- and long-term small arms modernization strategy.

The Senate amendment contained no similar provision.

The Senate recesses.

Report on degaussing standards for DDG-51 destroyers (sec. 133)

The House bill contained a provision (sec. 131) that would limit expenditures of Shipbuilding and Conversion, Navy, for DDG-51 destroyers until the Secretary of the Navy submits a report as to incorporating degaussing standards into the destroyer program.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would require a report on degaussing standards for *Arleigh Burke*-class destroyers.

Subtitle D—Air Force Programs

Inventory requirement for air refueling tanker aircraft; limitation on retirement of KC-10A aircraft (sec. 141)

The House bill contained a provision (sec. 141) that would require the Department of the Air Force to maintain a total primary assigned aircraft inventory of air refueling tanker aircraft of not less than 479. The provision would also place limitations on the retirement of KC-10A aircraft.

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that would change the inventory requirement to 479 total aircraft.

Multiyear procurement authority for C-130J aircraft program (sec. 142)

The House bill contained a provision (sec. 145) that would provide multiyear procurement authority for C-130J aircraft.

The Senate amendment contained a similar provision (sec. 151).

The House recesses.

Contract for logistics support for VC-25B aircraft (sec. 143)

The House bill contained a provision (sec. 144) that would ensure any contract for logistics support for the VC-25B aircraft adheres to United States Code and the Federal Acquisition Regulation.

The Senate recesses.

Retirement date for VC-25A aircraft (sec. 144)

The House bill contained a provision (sec. 143) that would set the retirement date of the VC-25A aircraft at not later than December 31, 2025.

The Senate amendment contained no similar provision.

The Senate recesses.

Repeal of funding restriction for EC-130H Compass Call Recapitalization Program (sec. 145)

The Senate amendment contained a provision (sec. 143) that would repeal Section 131 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328; 130 Stat. 2037) and require the Secretary of the Air Force to provide to the congressional defense committees periodic reports on the EC-130H Compass Call Recapitalization program and opportunities to accelerate the program.

The House bill contained no similar provision.

The House recesses with an amendment that would eliminate the required reports.

The conferees expect to be regularly updated on the status and progress of the Compass Call Recapitalization program. The conferees expect such updates to include, at a minimum: 1) a program status update; 2) a description of potential opportunities to accelerate the program and their associated funding requirements; and 3) a current assessment of the aircraft's operational effectiveness.

Limitation on use of funds for KC-46A aircraft pending submittal of certification (sec. 146)

The House bill contained a provision (sec. 142) that would limit the funds available for three KC-46A aircraft.

The Senate amendment contained no similar provision.

The Senate recesses.

Limitation on availability of funds for retirement of E-8 JSTARS Aircraft (sec. 147)

The House bill contained a provision (sec. 214) that would restrict the obligation of funding for the Advanced Battle Management System (ABMS) of systems initiative of the Air Force, as well as a portion of the proposed divestment of legacy E-8C Joint Surveillance Target Attack Radar System (JSTARS) aircraft contained in the fiscal year 2019 budget request. The restriction would remain in effect until the Secretary of the Air Force certifies that the JSTARS Recapitalization (Recap) program is proceeding as previously planned. The provision would also require the Comptroller General of the United States and the Secretary of the Air Force to provide reports to the congressional defense committees on ABMS, JSTARS Recap, and the legacy JSTARS fleet.

The Senate amendment contained a similar provision (sec. 141) that would prohibit the availability of funds to retire, or prepare to retire, any E-8 JSTARS aircraft.

The House recesses with an amendment that would limit retirement of legacy E-8C

until Increment 2 of the Advanced Battle-Management System of the Air Force declares Initial Operational Capability. The amendment would also require the Secretary of Defense to certify that the Secretary of the Air Force is: taking all reasonable steps to ensure the legacy E-8C continues to meet all safety of flight requirements and that the Air Force is taking steps to increase the legacy JSTARS fleet's aircraft availability and capacity provided to combatant commanders. The amendment would also require reports be submitted to the congressional defense committees by the Secretary of the Air Force on the legacy E-8C fleet and by the Comptroller General of the United States on ABMS.

Finally, the conferees direct the Director, Cost Assessment and Program Evaluation, Office of the Secretary of Defense, to provide the congressional defense committees a report no later than February 5, 2019, on a cost, schedule, and implementation plan for restarting the dormant legacy E-8C re-engining program that the Air Force originally initiated in 2007. The conferees understand the Secretary of the Air Force procured three ship-sets of engines, after investing \$450.0 million, and the engines remain unused. The conferees note that the legacy E-8C engines are the number one issue driving excessive non-mission capable maintenance metrics for the E-8C fleet.

Report on modernization of B-52H aircraft systems (sec. 148)

The Senate amendment contained a provision (sec. 142) that would require the Secretary of the Air Force to submit a report on the long-term modernization of the B-52H aircraft.

The House bill contained no similar provision.

The House recedes.

The conferees note that the Air Force submitted a report on B-52 modernization in February 2018. However, that report did not include elements that the conferees believe to be important considerations, particularly in light of the Air Force's decision to continue operating the B-52 for the long-term. Such considerations include secure, jam-resistant communications, future weapons and targeting capabilities, and mission planning systems.

Subtitle E—Defense-Wide, Joint, and Multiservice Matters

Procurement authority for additional icebreaker vessels (sec. 151)

The Senate amendment contained a provision (sec. 153) that would amend section 122 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91) by striking subsections (a) and (b), as well as providing authority to enter into a contract or contracts for up to six polar-class icebreakers.

The House bill contained no similar provision.

The House recedes with an amendment that would provide the secretary of the department in which the Coast Guard is operating the authority to enter into a contract or contracts for the procurement of up to five additional polar-class icebreakers and express the sense of Congress regarding polar-class icebreakers.

The conferees note that section 207 of the Coast Guard Authorization Act of 2015 (Public Law 114-120) provided authority for the Commandant of the Coast Guard to enter into a contract or contracts for the acquisition of polar icebreakers and associated equipment using incremental funding. The conferees further note the Fiscal Years 2019 through 2023 Future Years Homeland Security Program includes \$1.8 billion to fully

fund 3 icebreakers. The conferees understand that additional Department of Defense funds are not required to procure icebreakers for the foreseeable future. The conferees support the Coast Guard's stated goal of building six icebreakers and believe achieving this objective should be accomplished as expeditiously as possible.

Buy-to-budget acquisition of F-35 aircraft (sec. 152)

The House bill contained a provision (sec. 151) that would permit the Department of Defense to exercise buy-to-budget authority for the F-35 Joint Strike Fighter.

The Senate amendment contained another provision (sec. 5103) that would add an element addressing F-35 sustainment to the quarterly briefings.

The House bill contained no similar provision.

The House recedes with an amendment that would bring forward the sunset of the provision from October 1, 2024 to October 1, 2022.

LEGISLATIVE PROVISIONS NOT ADOPTED

Multiyear procurement authority for amphibious vessels

The House bill contained a provision (sec. 124) that would authorize the Secretary of the Navy to enter into a multiyear procurement for up to five *San Antonio*-class amphibious transport dock ships with a Flight II configuration.

The Senate amendment contained no similar provision.

The House recedes.

The conferees urge the Secretary of the Navy to utilize a multiyear procurement strategy for *San Antonio*-class amphibious transport ships with a Flight II configura-

tion in the President's budget request for fiscal year 2020.

Limitation on availability of funds for the Littoral Combat Ship

The Senate amendment contained a provision (sec. 126) that would prohibit funds from being used to exceed the total procurement quantity listed in revision five of the Littoral Combat Ship acquisition strategy unless the Under Secretary of Defense for Acquisition and Sustainment submits to the congressional defense committees a certification.

The House bill contained no similar provision.

The Senate recedes.

Removal of waiting period for limitation on availability of funds for EC-130H Compass Call recapitalization program

The House bill contained a provision (sec. 146) that would remove the waiting period for the limitation on availability of funds for EC-130H Compass Call recapitalization that was put in place in section 135(a) of the National Defense Authorization Act for Fiscal Year 2018 (Public Law-91).

The Senate amendment contained no similar provision.

The House recedes.

Findings and sense of Congress regarding KC-46 aerial refueling tankers

The House bill contained a provision (sec. 147) that would express the sense of Congress on the KC-46A aircraft.

The Senate amendment contained no similar provision.

The House recedes.

The conferees support, once KC-46A aircraft deliveries begin, the acceptance of aircraft by the Air Force as quickly as practicable. Therefore, the conferees direct the Secretary of the Air Force to provide a report to the congressional defense committees, not more than 90 days after the enactment of this Act, describing potential courses of action to enable the Air Force to accept KC-46A aircraft at a rate higher than the planned 3 aircraft per month.

Sense of Congress on conversion of F-22 aircraft

The House bill contained a provision (sec. 148) that would express the sense of Congress regarding the conversion of F-22 Block 20 aircraft.

The Senate amendment contained no similar provision.

The conferees agree that, should future Air Force budgets be sufficient to permit, the Secretary of the Air Force should accelerate modernization of the F-22 Block 20 training and test aircraft as quickly as possible.

TITLE II—RESEARCH, DEVELOPMENT, TEST,
AND EVALUATION

Subtitle A—Authorization of Appropriations
Authorization of appropriations (sec. 201)

The House bill contained a provision (sec. 201) that would authorize appropriations for research, development, test, and evaluation at the levels identified in section 4201 of division D of this Act.

The Senate amendment contained a similar provision (sec. 201).

The House recedes.

Restrictions, and Limitations
*Modification of authority to carry out certain
prototype projects (sec. 211)*

The Senate amendment contained a provision (sec. 871) that would clarify the congressional notification requirements for the use of other transactions.

The House recedes with an amendment that would clarify that the follow-on production of a prototype or subproject within a consortium may occur as the Department of Defense determines that each individual prototype or subproject is complete and does not require that all projects associated with the consortium be complete before moving on to follow-on production.

Extension of directed energy prototype authority (sec. 212)

The House bill contained a provision (sec. 212) that would extend the directed energy prototype authority provided for in section 219(c)(4) of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) through fiscal year 2019.

The Senate amendment contained no similar provision.

The Senate recedes.

Limitation on availability of funds pending report on agile software development and software operations (sec. 215)

The House bill contained a provision (sec. 216) that would limit funds for the Air Force pending a report on how agile software development and software operations methods are being used to modernize Air and Space Operations Centers.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment modifying and adding certain elements to the report.

The conferees note this program is a pathfinder for the Air Force and the Department

of Defense with respect to realigning a major program to incorporate certain agile and incremental development methods, which the conferees support. As such the conferees are keenly interested in how the Department implements such methods, to ensure good principles of management and oversight are incorporated. In particular, given how frequently the program is delivering features, it is important to maintain transparency into costs and capability delivered to ensure that risks and overall return on investment are fully understood.

Limitation on availability of funds for certain high energy laser advanced technology (sec. 216)

The House bill contained a provision (sec. 217) that would limit the availability of 50 percent of the funds authorized to be appropriated by this Act, or otherwise made available for fiscal year 2019, until the Secretary of Defense provides the High Energy Laser roadmap and assessment to the congressional defense committees.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would limit the scope of the deliverables to the roadmap.

The Senate recedes with an amendment that would direct the Secretary of Defense to submit a plan to eliminate, transfer the functions of, or retain the Strategic Capabilities Office of the Department of Defense.

National Defense Science and Technology Strategy (sec. 218)

The House bill contained a provision (sec. 219) that would direct the Secretary of Defense to develop a National Security Science and Technology Strategy to prioritize Department of Defense science and technology efforts and investments.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would add further elements to the report.

Modification of CVN-73 to support fielding of MQ-25 unmanned aerial vehicle (sec. 219)

The House bill contained a provision (sec. 220) that would require the Navy to modify CVN-73 during its Refueling and Complex Overhaul (RCOH) to support the fielding of the MQ-25 unmanned aerial vehicle.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Navy to complete the necessary modifications to CVN-73's compartments and infrastructure for MQ-25 alterations during the ship's RCOH in order to allow completion of MQ-25 modifications and receipt of MQ-25 equipment in a single follow-on ship maintenance period.

The conferees believe that once fielded, the Navy should prioritize deploying the MQ-25 to the Pacific area of operations. In order to enable such deployments, the conferees believe that it is imperative that CVN-73, as

the potential next forward deployed aircraft carrier, undergo the necessary modifications and alterations during its RCOH to enable MQ-25 operations as soon as practicable. However, the conferees are aware that completing all of the necessary modifications during the RCOH might put its timely completion at risk.

Therefore, the conferees direct the Navy to complete the necessary MQ-25 modifications during CVN-73's RCOH that would enable the completion of modifications and receipt of equipment during a single follow-on maintenance availability. Nothing in this language should be interpreted as prohibiting the full installation of MQ-25 alterations and equipment during RCOH should developments allow it.

Additionally, the conferees expect future Navy budgets will support this plan.

The Senate recedes.

The conferees believe that Department of Defense (DOD) civil affairs and military information support activities are complementary and reinforcing and are an important tool to support the military objectives of the combatant commands. Furthermore, especially in an Embassy-based environment, such activities by DOD personnel can be further complemented and reinforced by public diplomacy activities of the State Department and stabilization or development activities by the U.S. Agency for International Development (USAID). The conferees believe these efforts can be better leveraged to provide whole of government solutions to a rapidly evolving global security environment.

The conferees also note that the process for funding the execution of military information support and civil affairs activities often does not align with operational timelines or involves fiscal authorities that are misaligned to the purpose of the activity. Furthermore, the conferees believe that reserve component military information support and civil affairs personnel could be better utilized to augment special operations forces. The conferees note the valuable contributions to morale and public relations made by

the Department of Defense's fixed-wing aviation demonstration teams, including the Blue Angels and Thunderbirds. The Senate amendment contained no similar provision.

The House recedes.

The conferees are supportive of recent Department of Defense initiatives to redesign or streamline processes to save taxpayer dollars. However, while major department-wide savings are important, frequently military and civilian personnel identify smaller cost-saving opportunities in the course of performing their normal duties. These cost-saving ideas are frequently unnoticed or ignored by the chains of command, resulting in lost opportunities to address needless waste and inefficiency. The conferees encourage service secretaries to take demonstrable steps to empower their personnel to identify and implement cost-saving ideas whenever possible, and widely publicize successes to achieve greater savings at scale.

The provision would require the Secretary to submit an initial report describing the pilot program to the Committees on Armed Services of the Senate and the House of Representatives within 6 months after the date of the enactment of this Act. The Senate amendment contained no similar provision.

The House recedes.

Garnishment to satisfy judgment rendered for physically, sexually, or emotionally abusing a child

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that sections 8345 and 8467 of title 5, United States Code, currently provide for the garnishment of federal civilian retirement payments, without limitation on the amount of disposable retired pay subject to garnishment, in accordance with the terms of a court order or similar process in the nature of garnishment for the enforcement of a judgment against the annuitant for physically, sexually, or emotionally abusing a child. However, section 1408 of title 10, United States Code, limits the amount of disposable military retired pay subject to garnishment for such judgments to 25 percent. The conferees therefore direct the Secretary of Defense, no later than February 1, 2019, to provide a briefing to the Committees on Armed Services of the Senate and the House of Representatives on the advisability and feasibility of removing the 25 percent cap on garnishment of disposable military retired pay.

The House recedes.

The conferees are aware of ongoing Department of Defense efforts to transition various manuals and other documents to electronic formats. These efforts are critical to increase the effectiveness of information transfer and better align the Department of Defense with private sector best practices. The conferees urge the Secretary of Defense to continue transitioning all hard-copy manuals, publications, and other documents into electronic format suitable for viewing on mobile devices.

The conferees are concerned with how the Services evaluate the effectiveness and efficiency of their marketing efforts. This Act contains a provision requiring the Army to provide a comprehensive evaluation of the Army Marketing and Advertising Program. However, the conferees are concerned that the other Services may also lack sufficient data to properly evaluate the effectiveness and efficiency of their marketing efforts. Therefore, the conferees direct the Secretary of Defense to provide a briefing, no later than February 1, 2019, on the feasibility and advisability of standardizing the methods for collecting marketing data in support of effectiveness and efficiency evaluations.

The Senate amendment contained a similar provision (sec. 631) that would require the Secretary of Defense to submit a report to the Committees on Armed Services of the Senate and the House of Representatives by no later than 120 days after enactment of this Act providing a cost-benefit analysis of the long-term per diem policy rate change that became effective on November 1, 2014, consistent with the principles and requirements of Office of Management and Budget Circular A-94. The Senate provision would further provide that should the Secretary fail to deliver this analysis within 120 days after enactment of this Act, or if the analysis demonstrates that the costs of this policy change outweigh the benefits, then the policy would revert to the policy in effect as of October 31, 2014.

The Senate amendment contained another similar provision (sec. 632) that would amend section 474(d)(3) of title 37, United States Code, to prohibit the Department of Defense from reducing per diem rates based on the duration of a temporary duty assignment or civilian travel.

The committee remains concerned about the reduction in BAH and its effect on the recapitalization of these housing units. The committee believes that military families must be provided with on-base housing that is safe and periodically modernized. Additionally, this section would require the Secretary of Defense to present a plan to the Committees on Armed Services of the Senate and the House of Representatives by December 1, 2018, to provide for a permanent financial solution to the long term MHPI recapitalization problem.

The Senate amendment contained a similar provision (sec. 604) that would authorize the Secretary of Defense to pay up to 2 percent of the calculated Basic Allowance for Housing (BAH) rate to specific lessors who provide on-base housing as part of the Military Housing Privatization Initiative (MHPI).

States Code, by the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181). Additionally, this section would extend the authority of the Secretary of Defense to prescribe a temporary increase in the rates of basic allowance for housing otherwise prescribed for a military housing area or a portion of a military housing area or portion thereof located in an area covered by a declaration by the President of major natural disaster.

The Senate amendment contained a provision (sec. 611) that would extend for 1 year the general bonus authority for enlisted members, the general bonus authority for officers, special aviation incentive pay and bonus authorities for officers, special bonus and incentive pay authorities for officers in health professions, and contracting bonus for cadets and midshipmen enrolled in the Senior Reserve Officers' Training Corps.

The House bill contained a provision (sec. 629) that would amend Chapter 54 of title 10, United States Code, to extend eligibility for commissary and morale, welfare, and recreation (MWR) privileges to certain veterans and veterans' caregivers. This provision would authorize the Secretary to impose a user fee on eligible individuals to purchase merchandise at a commissary or MWR resale facility that would offset any increase in expenses arising from this provision. Additionally, this provision would authorize an appropriation for updating EPACS for military commissaries. This provision would take effect at the end of the 90-day period beginning on the date of the enactment of this Act.

The Senate amendment contained no similar provision.

The committee notes that this provision would also ensure the primary purpose of space-available travel remains transporting servicemembers and their dependents.

The conferees note with disappointment that the report on this topic mandated by the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) is over one year late and reiterate their interest in the results of the requested analysis.

LEGISLATIVE PROVISIONS NOT ADOPTED

Prompt review of request for imminent danger pay

The House bill contained a provision (sec. 601) that would amend section 310 of title 37, United States Code, to require the Secretary of Defense to issue a determination, within 90 days, when a geographic combatant commander submits a request to add a location to the Imminent Danger Pay eligibility list.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that Imminent Danger Pay (IDP) is designed to provide additional compensation to servicemembers on duty in an area in which the member was in imminent danger of being exposed to hostile fire. Despite this statutory language, the Department of Defense has been slow in amending the list of geographic areas where deployed servicemembers would be eligible for IDP. This is particularly troubling given the global nature and geographic unpredictability of today's conflicts.

In 2017, the Department's delays in modifying its IDP policy resulted in servicemembers deployed to Niger, Mali, and northern Cameroon being ineligible for IDP payments despite suffering several casualties and being routinely exposed to hostile fire. The Department of Defense took nearly 9 months to rectify its error after four servicemembers were killed while deployed to Africa.

These delays in updating the Department's IDP policy caused unnecessary financial frustration and hardship for servicemembers deployed to Africa to include the families of four servicemembers who were tragically killed while deployed to Niger. Therefore the

committee strongly encourages the Secretary of Defense to make determinations on requests for IDP within ninety days of receiving such requests.

Fiscal year 2019 increase in military basic pay

The Senate amendment contained a similar provision (sec. 6006) that would strengthen SBA loan programs to support employee-owned small businesses.

The Senate recedes with clarifying and technical amendments.

Subtitle G—Provisions Related to Software and Technical Data Matters

Validation of proprietary and technical data (sec. 865)

The Senate amendment contained a provision (sec. 881) that would amend section 2321(f) of title 10, United States Code, to clarify the application of rights in technical data relating to major weapons systems. This provision would also amend section 2320 of title 10, United States Code, to clarify the application of licensing of appropriate intellectual property to support major weapons systems with regard to preferences for specially negotiated licenses.

The House bill contained no similar provision.

The House recedes with an amendment that would amend only section 2321(f) of title 10, United States Code. The conferees note that Specially Negotiated Licenses are a new concept in government technical data rights and are being interpreted in many different ways by industry and government alike. Therefore, the conferees direct the Under Secretary of Defense for Acquisition and Sustainment, in conjunction with the Service Acquisition Executives, to develop guidelines, training, and policy for the usage and application of specially negotiated licenses

to clarify the terms under which such licenses should be used when considering a product support strategy of a major weapon system or subsystem of a major weapon system. The Under Secretary of Defense for Acquisition and Sustainment is directed to brief the resulting guidelines and other actions to the congressional defense committees no later than 180 days after the date of enactment of this Act.

Continuation of technical data rights during challenges (sec. 866)

The Senate amendment contained a provision (sec. 812) that would amend section 2321(i) of title 10, United States Code, to clarify that the government may continue to exercise rights in technical data and non-commercial computer software during the course of a challenge with an incumbent contractor under section 2321(d) of title 10, United States Code, or under procedures established by the Department of Defense, to meet Department of Defense mission requirements and readiness needs during the course of the challenge.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify the circumstances in which the Secretary of Defense or a service secretary, for programs for which milestone decision authority has been delegated, may authorize use of technical data in dispute by issuing notice and a written determination that compelling mission readiness requirements will not permit awaiting the final decision.

Requirement for negotiation of technical data price before sustainment of major weapon systems (sec. 867)

The House bill contained a provision (sec. 827) that would provide the Department of Defense with additional flexibility on negotiations for appropriate technical data.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify that this provision also applies to the sustainment of major weapon systems.

Implementation of recommendations of the final report of the Defense Science Board Task Force on the Design and Acquisition of Software for Defense Systems (sec. 868)

The Senate amendment contained a provision (sec. 882) that would direct the Secretary of Defense to implement certain recommendations of the Defense Science Board Task Force in their report on the Design and Acquisition of Software for Defense Systems. The House bill contained no similar provision.

The House recedes.

The conferees agree with the report's emphasis on shifting the Department of Defense's treatment of software as solely a development activity to understanding that it is enduring and that, therefore, traditional models of hardware sustainment are not suited to the treatment of software in the acquisition process. As the Department considers how each recommendation would be implemented, the conferees also encourage the Department to continue to engage the private sector for their best practices and views regarding sustainable software acquisition approaches.

Implementation of pilot program to use agile or iterative development methods required under section 873 of the National Defense Authorization Act for Fiscal Year 2018 (sec. 869)

The Senate amendment contained a provision (sec. 883) that would provide additional direction to the Secretary of Defense in implementing the pilot program established

under section 873 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115–91).

The House bill contained no similar provision.

The House recedes with an amendment to the list of participating systems; an amendment to make criteria for selecting program participation more permissive; an amendment that directs the Under Secretary of Defense for Acquisition and Sustainment to establish a Community of Practice on agile or iterative methods and identifies programs that should contribute; and an amendment that directs the Secretary to report certain information on the progress of programs participating in the pilot.

The conferees expect the Department to attend to compliance with Section 873 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115–91). The conferees note that the adoption of agile or iterative methods remains a challenge for the Department of Defense, despite the fact that delivery of increments of useful capability no less frequently than every six months is not only a best practice for software-intensive systems but is also a government-wide requirement for such systems. Further, as the Department implements such methods, it is important to ensure good principles of management and oversight are incorporated. In particular, given how frequently programs should be delivering features, having insight to costs and capability delivered is critical to understanding risk and overall return on investment.

Report on requiring access to digital technical data in future acquisitions of combat, combat service, and combat support systems (sec. 870)

The Senate amendment contained a provision (sec. 240) that would require the Secretary of Defense to prepare and submit a report regarding access to digital technical data, to include that which is necessary to support the production of three-dimensional printed parts.

The House bill contained no similar provision.

The House recedes.

The conferees direct that the study also address the potential impact upon data rights of providers, to include impacts on National Technology and Industrial Base manufacturers developing products for the Department of Defense, including contractors providing data with limited and restricted data rights.

Subtitle H—Other Matters

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees encourage the Office of Management and Budget to extend by two years submission of the reports specified in section

841(i) of the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year 2015 (Public Law 113–291) on the use of the authorities in this section in the preceding calendar year, to match the extended sunset date.

Data, policy, and reporting on the use of other transactions (sec. 873)

The House bill contained a provision (sec. 878) that would direct the Secretary of Defense to submit an annual report on the use of transactions other than contracts, cooperative agreements, and grants, known as other transaction authority, to perform projects, and to include certain information.

The Senate amendment contained a similar provision (sec. 872) that would direct the Under Secretary of Defense for Research and Engineering, the Under Secretary of Defense for Acquisition and Sustainment, and the Service Acquisition Executives of the military departments to collect and internally share data on the use of other transactions, and use it to update policies and procedures.

The House recedes with an amendment that would combine the data collection and reporting elements of both provisions.

Standardization of formatting and public accessibility of Department of Defense reports to Congress (sec. 874)

The House bill contained a provision (sec. 879) that would direct the Secretary of Defense to provide a briefing to the House Committee on Armed Services on a plan for standardizing formatting and public accessibility of unclassified Department of Defense reports to Congress, to ensure they are usable.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would continue to require the disclosure to offerors of the importance of all evaluation factors other than cost or price.

Individual acquisition for commercial leasing services (sec. 877)

The House bill contained a provision (sec. 884) that would direct the Administrator for Federal Procurement Policy to develop,

make available for public comment, and finalize a definition of the term “procurement administrative lead time” (PALT) and produce a plan for measuring and publicly reporting data on PALT for Federal Government contracts and task orders in amounts greater than the simplified acquisition threshold.

The Senate amendment contained no similar provision.

The Senate recedes.

Briefing on funding of product support strategies (sec. 879)

The House bill contained a provision (sec. 885) that would require a report on funding of product support strategies.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require an annotated briefing regarding the funding for product support strategies for major weapon systems, and a summary of improvements made to data collection and analysis capabilities of the Department, including in the Military Services, to improve the analysis and cost estimation of lifecycle costs, analysis and identification of cost drivers, reduce lifecycle cost variance, identify common and shared costs for multiple weapons systems, and isolate the lifecycle costs attributable to specific individual weapons systems.

Use of lowest price technically acceptable source selection process (sec. 880)

The House bill contained a provision (sec. 886) that would require a revision of the Federal Acquisition Regulation to clarify in which solicitations the lowest price technically acceptable source selection criteria may be used.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify the categories and threshold applicable in the provision. The conferees note that, in order to balance effective oversight with reasonable expenditure of resources, the Government Accountability Office is expected to develop a methodological approach that will provide sufficient insight into the extent to which lowest price technically acceptable source selection criteria are used by executive agencies, without requiring a review of each individual instance in which such criteria are used.

Permanent Supply Chain Risk Management Authority (sec. 881)

The Senate amendment contained a provision (sec. 801) that would permanently extend the authority provided in section 806 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111–383) regarding the management of supply chain risk and would clarify the Secretary of Defense’s ability to make determinations under the authority to apply throughout the Department of Defense.

The House bill contained no similar provision.

The House recedes.

Review of market research (sec. 882)

The Senate amendment contained a provision (sec. 802) that would amend section 2431a of title 10, United States Code, to define the market research requirement of major defense acquisition program acquisition strategies. This provision is intended to improve the Department of Defense’s capacity to conduct market research by diversifying the sources and methods used.

The House bill contained no similar provision.

The House recedes with an amendment that would direct the Assistant Secretary of Defense for Acquisition and Sustainment to conduct a review of market research guidance and practices.

The conferees note that a growing share of the Department's spending is on information technology products and services and believes robust market research is critical to acquisition planning. The conferees believe that sufficient attention is not being given to market research and are concerned that the Department's sources of data for market research are limited and lack diversity.

The conferees therefore encourage the Department's contracting officers to use commercially available detailed third-party market research, which should include any disclosures of a third-party's interests and which should be considered by contracting officers in the context of all available data sources, to ensure that they have the best and most complete information available in developing and executing their acquisition strategies.

Establishment of integrated review team on defense acquisition industry-government exchange (sec. 883)

The Senate amendment contained a provision (sec. 842) that would direct the Chairman of the Defense Business Board to convene an integrated review team with members of the Defense Innovation Board and Defense Science Board to undertake a study on the exchange of defense industry personnel on term assignments within the Department. The study shall review: (1) Legal, ethical, and financial disclosure requirements for industry-government exchanges; (2) Existing or previous industry-government exchange programs; and (3) How the military departments address legal, ethical, and financial requirements for reserve component servicemembers who also maintain civilian employment in the defense industry. The team shall also produce recommendations to reduce barriers to industry-government exchange while ensuring financial and ethical integrity to protect the best interests of the Department.

The House bill contained no similar provision.

The House recedes.

Exchange program for acquisition workforce employees (sec. 884)

The House bill contained no similar provision.

The House recedes with an amendment that would remove the authority to include these limitations in the terms of any contract and instead directs the Secretary of Defense to develop a process and procedures for limiting access to technology through contracts, grants, cooperative agreements, or other transactions, when such limitation is in the interest of national security.

Procurement of telecommunications supplies for experimental purposes (sec. 886)

The Senate amendment contained a provision (sec. 894) that would ensure the Director, Operational Test and Evaluation, and other developmental testing organizations be given access to all data associated with certain modeling and simulation activities supporting the acquisition of military capabilities.

The House bill contained no similar provision.

The House recedes.

Access by developmental and operational testing activities to data regarding modeling and simulation activity (sec. 887)

The Senate amendment contained a provision (sec. 895) that would ensure the Director, Operational Test and Evaluation, and other developmental testing organizations be given access to all data associated with modeling and simulation activities supporting the acquisition of military capabilities.

The House bill contained no similar provision.

The House recedes.

The conferees note that modeling and simulation tools and activities are critical to reducing risk in technology development initiatives and acquisition programs.

The conferees note the use of modeling and simulation to reduce risk in operational or live fire test and evaluation is especially relevant when operational conditions are difficult or expensive to replicate in testing certain military capabilities, such as: performance of systems in space, intercept capability of ballistic missile defense systems, and a ship's ability to withstand shocks.

The conferees also note that given the increasing use of software-driven capabilities, modeling and simulation is also beneficial during developmental testing and evaluation, including modeling and simulating complex cyber threats to facilitate accurate assessments of security features.

The conferees understand that Department of Defense policies require models to be verified, validated, and accredited in order to be deemed effective at reducing risk and cost, as well as to improve understanding and predictability of system performance.

The conferees are concerned that despite these Department policies, programs and initiatives are using models in lieu of real world testing, even though they have not been verified, validated, and accredited.

Accordingly, this provision would direct developmental and operational test organizations be given access to all data associated with verification, validation, and accreditation of modeling and simulation activities to ensure development, production, and fielding decisions that depend on outcomes from such activities are fully informed.

The conferees also urge the Department to continue efforts to improve the quality and fidelity of computer models for use in test and evaluation activities.

Instruction on pilot program regarding employment of persons with disabilities (sec. 888)

The Senate amendment contained a provision (sec. 5801) that would direct the Secretary of Defense to update the Defense Federal Acquisition Regulatory Supplement to include an instruction on the pilot program regarding employment of persons with disabilities authorized under section 853 of the National Defense Authorization Act for Fiscal Year 2004.

The House bill contained no similar provision.

The House recedes.

Prohibition on certain telecommunications and video surveillance services or equipment (sec. 889)

The House bill contained a provision (sec. 880) that would provide that, not later than

January 1, 2021, no government agency may procure or obtain, nor extend or renew a contract to procure or obtain, nor enter into a contract with an entity that uses covered telecommunications equipment or services with any covered entity. The covered equipment would encompass telecommunications and video surveillance products and services provided by Huawei Technologies Company, ZTE Corporation, Hytera Communications Corporation, Hikvision Digital Technology Company, or Hahua Technology Company, or any company that the head of a relevant Federal agency reasonably believes is controlled by the government of the Peoples Republic of China.

The Senate amendment contained a similar provision (sec. 6702) that would prohibit by the heads of Federal agencies procurement of telecommunications equipment or services from Huawei Technologies Company or ZTE Corporation, any subsidiary or affiliate of such entities, or any entity controlled by the government of the People's Republic of China. The provision would also prohibit entry into a contract with any entity that uses equipment, as a critical component of any system, from Huawei Technologies Company, the ZTE Corporation, any subsidiary or affiliate of such entities, or any entity controlled by the government of the People's Republic of China. The provision would prohibit the modification of any penalty implemented by the United States Government with respect to a Chinese telecommunications company upon a determination that the company has violated an export control or sanctions law until the President certifies to the appropriate congressional committees that the company is compliant and cooperative with US laws and related investigations. The provision would also reinstate penalties imposed on ZTE on April 15, 2018 by the Acting Assistant Secretary of the Commerce for Export Enforcement and would limit the future modification of such penalties.

The House recedes with an amendment that would not prohibit modification of penalties nor re-impose penalties on the ZTE Corporation, clarify the applicable timelines and waivers, and require the heads of executive agencies administering loan, grant, or subsidy programs to prioritize available funding and technical support to assist affected businesses, institutions and organizations as is reasonably necessary for those affected entities to transition from covered communications equipment and services, to procure replacement equipment and services, and to ensure that communications services to users and customers is sustained. The conferees stress the importance of assisting rural communications service providers, anchor institutions, and public safety organizations in replacing covered equipment and associated support services contracts as soon as practicable.

Pilot program to accelerate contracting and pricing processes (sec. 890)

The Senate amendment contained a provision (sec. 833) that would establish a pilot program for the Secretary of Defense to reform and accelerate the contracting and pricing processes associated with major weapons systems programs through basing price reasonableness determinations on actual cost and pricing data for purchases of the same or similar products for the Department of Defense and reducing the cost and pricing data to be submitted in accordance with section 2306a of title 10, United States Code. This authority would expire on January 2, 2021.

The House bill contained no similar provision.

The House recedes with an amendment that would limit the pilot to ten contracts

not classified as major defense acquisition programs and require a report to the congressional defense committee on the results of the pilot no later than January 30, 2021.

LEGISLATIVE PROVISIONS NOT ADOPTED

The Senate amendment contained a provision (sec. 819) that would require the Comptroller General of the United States to submit a report, no later than 180 days after the date of the enactment of this Act, to the congressional defense committees on the results of an analysis of the effects of current financing levels of defense contracts on defense contractors and Defense budgets.

The House bill contained no similar provision.

The Senate recedes.

The conferees direct the Comptroller General of the United States to submit to the congressional defense committees, no later than 180 days after the date of enactment of this Act, a report on the results of an analysis of the effects of current financing levels of Department of Defense contracts on contractors of the Department and the budgets of the Department to include an analysis and assessment of the impact to government and business on the relationship between financing amounts and contractor profit and the willingness of contractors to pursue contracts with the Department. The assessment should take into consideration past changes to progress payment rates and conditions as well as progress payment rates and limitations on progressing for undefinitized contract actions.

Contract goal for the AbilityOne program

The House bill contained a provision (sec. 821) that would amend section 2323a of title 10, United States Code, to create a contract goal for the AbilityOne program of 1.5 percent. This section would also require the Secretary of Defense to submit an annual report to the U.S. AbilityOne Commission on progress made toward achieving said contract goal.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that the AbilityOne program must have policies and procedures in place to ensure that funding is used in a way that maximizes the benefits to the people it is intended to serve and that taxpayer funds are not wasted. Recognizing this, in 2015 the Congress directed the establishment of an AbilityOne Inspector General, and in 2016 Congress directed the establishment of a Panel on Department of Defense, and AbilityOne Contracting, Oversight, Accountability, and Integrity. The conferees note that both the Inspector General and the Panel are generating findings and recommendations for needed reforms and expect the AbilityOne Commission to take appropriate steps in the future to increase transparency and effectiveness of the program.

Sense of Congress on awarding of contracts to responsible companies that primarily employ American workers and do not actively transfer American jobs to potential adversaries

The Senate amendment contained a provision (sec. 822) that would express the sense of Congress that the Department of Defense should award contracts to responsible companies that primarily employ United States workers or are partners in the national technology and industrial base and do not actively transfer United States jobs to potential adversaries.

The House bill contained no similar provision.

The Senate recedes.

The conferees note that the Department of Defense should award contracts to responsible companies that primarily employ United States workers or are partners in the national technology and industrial base and do not actively transfer United States jobs to potential adversaries.

Preference for offerors employing veterans

The House bill contained a provision (sec. 823) that would amend chapter 137 of title 10, United States Code, by adding a new section that would authorize the head of an agency, in awarding a contract for the procurement of goods and services for the Department of Defense, to establish a preference for offerors that employ veterans on a full-time basis, with criteria for use of such preference determined by the Secretary of Defense.

The Senate amendment contained no similar provision.

The House recedes.

The conferees note that quantitative and qualitative risk and sensitivity analyses help decision-makers to identify cost drivers and understand the effects of changing variables on cost estimates. The National Defense Authorization Act for Fiscal Year 2014 (Public Law 113-66) required that a program's baseline cost estimate, along with the associated risk curve and sensitivity of that estimate, be provided in the quarterly selected acquisition reports. In addition, it required that the reports include the current point estimate bounded by the low-end and high-end estimates and the associated sensitivity of those estimates, and identification of the primary risk parameters associated with the estimate. The conferees note that these requirements are intended to promote use of relatively commonplace data and statistical analysis techniques that are well understood by most practitioners. However, the conferees understand that this language has been interpreted by Department of Defense officials as requiring analysis of the sensitivity of the information in a security context for selected acquisition reports, resulting in unwarranted barriers to dissemination. The conferees direct the Department of Defense to comply with all legal requirements relating to contents of selected acquisition reports, noting the clarification of intent above. Further, the conferees direct the Department to avoid labeling selected acquisition reports as "For Official Use Only" unless the specific justification for such restrictive markings is provided to the Congress for each individual report.

TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT

Subtitle A—Office of the Secretary of Defense and Related Matters

Report on allocation of former responsibilities of the Under Secretary of Defense for Acquisition, Technology, and Logistics (sec. 901)

The Senate amendment contained a provision (sec. 904) that would direct the Secretary of Defense to report on decisions taken as part of the reorganization of the Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics to allocate the responsibilities that are referenced in United States Code.

The House bill contained no similar provision.

The House recedes.

Modification of responsibilities of the Under Secretary of Defense for Policy (sec. 902)

The Senate amendment contained a provision (sec. 903) that would modify the responsibilities of the Under Secretary of Defense for Policy to include greater oversight of defense strategy and planning guidance in alignment with the National Defense Strategy (NDS). These modifications would encompass the preparation and development of policy guidance for campaign and contingency plans by the combatant commands, as well as the oversight and integration of strategic documents such as the National Security Strategy (NSS) and the Defense Planning Guidance (DPG).

The House bill contained no similar provision.

The House recedes with an amendment that would further refine the responsibilities of the Under Secretary of Defense for Policy including a clarification of its role in providing joint force requirements guidance through the Defense Planning Guidance. Furthermore, the Under Secretary, in coordination with the Director of Cost Assessment and Program Evaluation and the Chairman of the Joint Chiefs of Staff, would develop planning scenarios for the future joint environments to use in assessments and the development of specific objectives for joint force capabilities (both capacity and readiness).

The conferees recognize the importance of the Under Secretary of Defense in developing strategy and providing associated policy guidance for force development, planning, and posture. However, deteriorating policy functions in areas such as joint force assessments have led to shortcomings in resource allocation and prioritization efforts. In turn, this can exacerbate capability gaps and lead to the erosion of U.S. military superiority. In light of these trends, the conferees urge the Department to clearly define the Under Secretary of Defense primary functions as well as integrate its critical responsibilities with the priorities outlined in the 2018 National Defense Strategy.

Clarification of responsibilities and duties of the Chief Information Officer of the Department of Defense (sec. 903)

The Senate amendment contained a provision (sec. 906) that would clarify the responsibilities and duties of the Chief Information

Officer (CIO) of the Department of Defense by specifically delineating its authorities from those assigned to the Chief Management Officer (CMO) in the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91).

Section 910 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91) designated the CMO as the CIO of the Department for the purposes of Defense business systems (10 U.S.C. 2222). The provision assigned the CMO the responsibility of administering the duties and responsibilities specified in sections 11315 and 11319 of title 40, section 3506(a)(2) of title 44, and section 2223(a) of title 10 for business systems and management. The provision also assigned the CMO with any responsibilities, duties, and powers relating to business systems or management that are exercisable by a chief information officer for the Department, other than those responsibilities, duties, and powers of a chief information officer that are vested in the Chief Information Officer of the Department of Defense by section 142 of title 10, United States Code.

Comprehensive review of operational and administrative chains-of-command and functions of the Department of the Navy (sec. 911)

The House bill contained a provision (sec. 905) that would amend section 5013 of title 10, United States Code, to require the Secretary of the Navy to designate a single commander within the Department of the Navy responsible for ensuring Navy forces are available for tasking and deployment, including those Navy forces that may be operating from a forward deployed location. This provision would also require the Secretary to designate a single commander for all Navy shipyards, including any located overseas.

The Senate amendment contained a similar provision (sec. 1043) that would require the Secretary of the Navy to conduct a comprehensive review of the operational and administrative chains-of-command and functions in the Department of the Navy.

This provision would seek to address joint force capability gaps in addition to present procurement requirements.

The House bill contained no similar provision.

The House recedes with an amendment that would eliminate the specific direction regarding exercising and, if appropriate, fielding joint concept assessments in support of the joint force.

The conferees note that not all capability gaps can, or should, be addressed by procurement or addition of end-strength. Expanding joint force concept development efforts should enable the Department of Defense to better meet the diverse set of challenges facing the military in a more efficient manner.

Clarification of certain risk assessment requirements of the Chairman of the Joint Chiefs of Staff in connection with the National Military Strategy (sec. 913)

The conferees note that these desired qualifications are intended to be a guide for

the military departments to recruit the best possible private and public sector management talent with requisite expertise.

Deadline for completion of full implementation of requirements in connection with organization of the Department of Defense for management of special operations forces and special operations (sec. 917)

The Senate amendment contained a provision (sec. 926) that would require full implementation of the reforms contained in section 922 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) not later than 90 days after enactment of this Act.

The House bill contained no similar provision.

The House recedes.

The conferees note that section 922 of Public Law 114-328 included a number of reforms designed to empower the Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict (ASD SOLIC) to act as the “service secretary-like” civilian responsible for exercising “authority, direction and control of all special operations-peculiar administrative matters relating to the organization, training, and equipping of special operations forces (SOF).” However, the conferees are concerned that, despite passage of Public Law 114-328 more than 20 months ago, the implementation of the reforms contained in section 922 remain incomplete.

The conferees further note that section 922 established a new administrative chain of command to facilitate the exercise of these responsibilities that runs from the Commander of U.S. Special Operations Command (SOCOM) through the ASD SOLIC to the Secretary of Defense, thereby mirroring the relationship between the Secretary of Defense and the service secretaries. This reform was, in part, intended to address the fact that the ASD SOLIC’s organizational location within the office of the Under Secretary of Defense for Policy (USD(P)) has resulted in the ASD SOLIC dedicating the preponderance of their time and resources to policy and operational issues, at the expense of their “service secretary-like” responsibilities. The conferees understand the Department continues to work towards full implementation of this administrative chain of command, but reiterate their intent that the ASD SOLIC is empowered to act independent of the USD(P) in fulfillment of their “service secretary-like” responsibilities related to the organization, training, and equipping of special operations forces. This administrative chain of command is not intended to impact the relationship between the ASD SOLIC and USD(P) on policy matters relating to the employment of special operations forces and related authorities.

The conferees also recognize that current civilian manpower within the ASD SOLIC is not sufficient to fulfill the “service secretary-like” responsibilities for the advocacy and oversight of SOF mandated by Congress. The conferees note that, elsewhere in this Act, there is a provision requiring that, of the funds authorized in Operation & Maintenance, Defense-wide for U.S. Special Operations Command civilian personnel, not less than \$4 million shall be used to fund additional civilian personnel in or directly supporting the ASD SOLIC Secretariat for Special Operations. This provision would also exempt these additional personnel from the overall personnel caps on the Office of the Secretary of Defense. The conferees believe this is an appropriate model for adequately staffing the ASD SOLIC Secretariat for Special Operations. The conferees encourage the Department to request adequate funding in future years and to propose legislative or other recommendations that would facilitate

adequate staffing of the ASD SOLIC Secretariat for Special Operations.

Cross-functional teams in the Department of Defense (sec. 918)

The Senate amendment contained a provision (sec. 925) that would require the Secretary of Defense to establish three cross-functional teams (CFTs) as directed in section 911 of the National Defense Authorization Act of Fiscal Year 2017 (Public Law 114-328) and would require the Deputy Secretary of Defense to establish or designate an office as the Office of Primary Responsibility for implementing section 911.

The House bill contained no similar provision.

The House recedes with an amendment that limits the statutory establishment of CFTs to one: the CFT for electronic warfare, which the Department itself has not yet created.

In addition to the team established within this provision, the conferees encourage the Secretary of Defense to designate the ongoing teams on personnel security and close combat lethality as CFTs under section 911 of the National Defense Authorization Act of Fiscal Year 2017 (Public Law 114-328). The conferees stress that this designation should only be made in the event it does not require any changes in either of the ongoing efforts’ organization, management, authorities, mission, or activities. In that regard, the conferees note that these teams already have the characteristics and meet the requirements of CFTs established in law by section 911. The conferees remain committed to monitoring the implementation of section 911 of the National Defense Authorization Act of Fiscal Year 2017 (Public Law 114-328).

Limitation on transfer of the Chemical, Biological, and Radiological Defense Division of the Navy (sec. 919)

The House bill contained a provision (sec. 922) that would require the Secretary of the Navy to provide a report to the congressional defense committees on the timeline, costs, risks, and benefits of transferring the Chemical, Biological, and Radiological Defense Division in Dahlgren, Virginia, to another location.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

The conferees note the Chemical, Biological, and Radiological Defense Division of the Navy, currently based at the Naval Surface Warfare Center in Dahlgren, Virginia, consists of a highly effective team of scientists performing critical work for the United States. The Secretary of the Navy has notified Congress of the intent to transfer the division to another location, however, the Secretary has not provided Congress with a detailed cost benefit analysis or any other information that adequately justifies the proposed transfer of the division.

The conferees are aware that foreign intelligence services are aggressively targeting defense contractors to obtain both classified and unclassified defense information.

The conferees expect the department to apply appropriate protections to both classified and controlled unclassified information in the hands of industry. The conferees also acknowledge the importance of compliance with sound cyber security regulations by defense contractors and therefore amended the provision to include a pilot program with the Chief of Information Officer.

of the senior designated official. The amendment would also strengthen the capacity of the senior designated official and the Electronic Warfare Executive Committee to propose governance, management, organizational, and operational reforms to the Secretary of Defense.

The conferees note the operational advantages provided by electronic warfare and cyber capabilities and expects the Department to dedicate additional resources to the problem set. The conferees remain concerned that electronic and cyber warfare are two warfighting areas where our peer adversaries, such as China and Russia, are establishing significant asymmetric advantages and the conferees urge swift action by the Department's leadership to regain United States superiority in these warfighting areas.

The conferees direct the Secretary of Defense, in coordination with the Chairman of the Joint Chiefs of Staff, to provide the congressional defense committees a briefing not later than February 25, 2019, on: (1) An update on the progress of the Department in implementing the pilot program authorized by section 234 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328; 10 U.S.C. 113 note); (2) The progress of the Department in establishing a network to connect an electromagnetic battle management system to multiple sensor and intelligence data feeds to implement electronic warfare battle management for networked electronic warfare and dynamic reprogramming with automated near real-time capabilities, and (3) The number of personnel assigned to joint electromagnetic spectrum operations mission activities. The personnel information should include officers, enlisted members, and civilian personnel, set forth separately by career field designator and rank for each military service, combatant command, and defense agency. It should also include a comparison of commissioned officer promotion rates, by grade, as compared to the average promotion rates for commissioned officers, by grade, in each military service, over the five most recent promotion cycles that have been completed since the end of fiscal year 2018.

Activities and reporting related to Department of Defense's Cloud Initiative (sec. 1064)

The House bill contained a provision that would prohibit certain funds authorized to be appropriated by this Act from being obligated or expended for the Joint Enterprise Defense Infrastructure until the Secretary of Defense provides a report to the congressional defense committees on the Joint Enterprise Defense Infrastructure.

The Senate amendment contained a provision that would direct the Cloud Executive Steering Group to execute certain activities enabling the Joint Enterprise Defense Infrastructure such as securing networks and conducting workload migration analysis. The Senate amendment also contained a limitation on new system and application approvals unless an assessment that such system is, can, or would be cloud-hosted. Additionally, the Senate amendment contained a provision providing for transparency and competition.

The Senate recedes with an amendment that lowers the prohibition on certain funds, provides for a waiver on the new system and application approval, and directs the Chief Information Officer of the Department of Defense (DOD), acting through the Cloud Executive Steering Group, to conduct certain activities enabling DOD's cloud initiatives.

The conferees have long championed modernization of information technology throughout DOD agencies, services, and other entities to facilitate efficiencies, cost-savings, enhance performance, and to provide our warfighters with cutting-edge capabilities on and off the battlefield. The conferees emphasize the importance of modernizing networks by adopting advancing commercial capabilities to achieve DOD's cloud transition and enterprise efficiency goals. Further, the conferees believe that workload analysis is critical to understanding migration feasibility and costs. Especially where barriers stem from technical, intellectual property, and data rights issues that are poorly understood, such barriers may fundamentally limit the potential utility of commercial cloud services to the Department.

The conferees encourage the Department to continue to ensure that cloud technologies are technically suitable, appropriately tested for security and reliability, and integrated with other DOD information technology efforts so as to optimize effective and efficient procurement of such technologies and services and their performance in support of DOD missions.

Finally, the conferees note that although transparency and information sharing by the Department on the Cloud Initiative has slightly improved, it continues to be insufficient for conducting congressional oversight. The conferees expect the Department to improve communication with Congress on this issue and will consider additional legislation if an improvement is not seen.

Limitation on use of funds for United States Special Operations Command Global Messaging and Counter-Messaging platform (sec. 1065)

The House bill contained a provision (sec. 1054) that would limit the availability of funds authorized to be appropriated by this Act, or otherwise made available for fiscal year 2019, until the Secretary of Defense provides a report to the congressional defense committees on the United States Special Operations Command (SOCOM) Global Messaging and Counter-Messaging (GMCM) platform.

The House recedes with an amendment that would prohibit the use of any funds authorized to be appropriated by this Act for SOCOM's GMCM platform until the Secretary of Defense submits to the congressional defense committees a report containing detailed information relating to the platform. The conferees understand that the Secretary of Defense identified SOCOM as the Department of Defense's (DOD) proponent for military information support operations (MISO) and directed the establishment of a centralized GMCM platform at SOCOM. Given SOCOM's transregional approach to matters within its purview, the conferees believe the command is positioned to play an important role in supporting the GMCM activities of the other combatant commands by enabling facilities and contracting efficiencies, the capture and adoption of best practices, and messaging consistency across geographic boundaries. However, the budget request lacks sufficient detail on the plan for establishment of the GMCM capability, including the identification of budget, infrastructure and equipment requirements for the platform to reach full operational capability as well as an identification of long-term sustainment costs. Additionally, the conferees require greater understanding of how GMCM planning and activities will be de-conflicted and, where possible, integrated with the planning and activities of the combatant commands as well as other relevant departments and agencies of the United States Government, including the Department of State's Global Engagement Center.

The amendment would also require the Secretary of Defense not later than 9 months after the date of the enactment of this Act to submit to the congressional defense committees a report containing a review and assessment of the doctrine, organization, training, materiel, leadership and education, personnel, and facilities applicable to military information support personnel and recommend changes for enhancing the ability of military information support personnel to operate effectively in the current and future information environment.

The provision would require a briefing from the Secretary and the FAA Administrator not later than 60 days after the date of the enactment of this Act, to the Committees on Armed Services, Transportation and

Infrastructure, and Veterans' Affairs of the House of Representatives and the Committees on Armed Services, Commerce, Science, and Transportation, and Veterans' Affairs of the Senate on whether legislative action is required to prevent low flying unmanned aircraft from disrupting funerals at Arlington National Cemetery.

The required report, due February 2019, includes a series of questions further inquiring about the specific impacts of the National Defense Strategy on the Department of Defense.

The House bill contained no similar provision.

The House recedes with an amendment that would modify the questions of the report requirement to re-evaluate the roles and missions of the Joint Force. Furthermore, the amendment would require the report be submitted by March 31, 2019.

The conferees note that a new National Defense Strategy was released in 2018 prioritizing the development of a more lethal joint force that is ready to deter and, if necessary, defeat aggression by great power competitors with advanced military capabilities. The conferees realize that the Department has begun implementing the National Defense Strategy, however, the strategy, and its implications for the size, structure, shape, mission, and employment of the joint force, were not completed in time to fully inform the President's fiscal year 2019 budget request. As the Department continues to implement changes from the National Defense Strategy, the conferees recommend the Department conduct further analytical work in order to facilitate the implementation of the strategy.

Assessment, monitoring, and evaluation of security cooperation (sec. 1211)

The Senate amendment contained no similar provision.

The Senate recesses with an amendment that states that of the amounts for Oper-

ations and Maintenance, Defense-wide made available to the Defense Security Cooperation Agency for fiscal year 2019, it is the goal that not less than \$12.0 million, but in no event less than \$6.0 million, shall be allocated for the AM&E of security cooperation activities in accordance with section 383 of title 10, United States Code. The conferees believe that the amount specifically identified in the fiscal year 2019 budget request for AM&E of security cooperation programs is wholly insufficient to meet congressional intent. The significant growth of security cooperation capacity building programs and associated funding in recent years has far outpaced the Department's emphasis on and resourcing of AM&E of those programs. The conferees reiterate their expectation that the Department's AM&E program should be rigorous and comprehensive, and provide for the continuous review of security cooperation programs from inception to completion that measure outcomes against defined objectives. Additionally, an effective AM&E program will provide important lessons learned that will be critical to improving the effectiveness and efficiency of subsequent security cooperation efforts. The conferees expect the Department to allocate sufficient resourcing to accomplish these objectives in fiscal year 2019 and in future budget requests.

Further, the amendment would limit the availability of funds for activities under section 333 of title 10, United States Code, until the Secretary of Defense submits a written plan including a description of the activities planned for fiscal year 2019 for the evaluation of security cooperation programs across the security cooperation enterprise, including through chapter 16 of title 10, United States Code, the Afghanistan Security Forces Fund, the Counter-ISIL Fund, the cooperative threat reduction program, and other security cooperation authorities as appropriate; and a description of the activities planned for fiscal year 2019 for the training, support, and organization of the Department to effectively carry out responsibilities under section 383 of title 10, United States Code.

The provision would also require quarterly reports on the use of this authority and would require the Secretary of Defense to submit a report 15 days prior to the provision of support under this authority to any country that has not previously received with information and a certification regarding the use of the authority. Finally, the provision would extend this authority through December 31, 2021.

Extension and modification of reporting requirements for special immigrant visas for Afghan allies program (sec. 1222)

The Senate amendment contained a provision (sec. 1214) that would renew a reporting

requirement under the Afghan Allies Protection Act of 2009 to assess the health of the Special Afghan Immigrant Visa (SIV) application process and identify any delays in orderly visa processing.

The House bill contained no similar provision.

The House recedes.

The conferees are concerned by reports that the SIV application process continues to suffer from inadequate interagency coordination which has resulted in undue delay, needless stress on applicants, and a sizable drop in SIV admissions this year.

The conferees note the critical work performed by Afghan partners in support of United States and coalition efforts and the importance of sustaining the SIV program. In all operations the military depends on robust and trustworthy relationships with local partners. If the United States wishes to achieve success in current and future operations overseas, it must protect those who help enable that success. Local partners in other potential conflict zones are watching how the United States treats its networks in Afghanistan; the policies and practices used there will influence confidence and loyalties elsewhere when supporters are needed. As the United States continues to protect its interests around the world, it will need the assistance of willing partners. Ensuring the SIV program is effectively managed and resourced is one way to communicate America's steadfast commitment to our partners.

Afghanistan Security Forces Fund (sec. 1223)

The Senate amendment contained a provision (sec. 1211) that would extend the authority to continue certain established provisions applicable to the Afghanistan Security Forces Fund (ASFF), including the use of funds, transfer authority, and acceptance of contributions to provide assistance to the security forces of the Ministry of Defense and Ministry of Interior of Afghanistan, including the provision of equipment, supplies, services, training, and funds to develop the capacity of Afghanistan's security ministries.

The House bill contained a similar provision (sec. 1521).

The House recedes with an amendment that requires the Secretary of Defense to provide an assessment of the Government of Afghanistan's ability to manage, employ, and sustain equipment divested under the ASFF.

The conferees note the emphasis in this provision placed on the resources allocated to integrate women into the security forces of Afghanistan. The conferees, however, do not encourage the Department of Defense to allocate funding for women and girls programming simply for the sake of meeting a goal. The conferees are aware that previous funding has not always been applied in the most effective and judicious manner and encourage the Department to ensure going forward that any funds spent on such efforts are valid and verifiable.

Additionally, the conferees are disappointed by recent public decisions regarding a lack of transparency on basic information such as kinetic strike data, ANDSF development, retention, and casualty rates, and progress on achieving the central tenants of the bilateral U.S.-Afghanistan Compact. The restriction of information in this manner undermines public confidence, hinders necessary congressional oversight, and raises legitimate questions about the efficacy of current U.S. efforts in Afghanistan.

Extension and modification of Commanders' Emergency Response Program (sec. 1224)

The House bill contained a provision (sec. 1213) that would extend the Commanders' Emergency Response Program through 2020

and would modify the countries in which ex gratia payments are authorized to include Somalia, Yemen, and Libya.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would extend the Commanders' Emergency Response Program through 2019 and would modify the countries in which ex gratia payments are authorized to include Somalia, Yemen, and Libya.

Extension and modification of authority for reimbursement of certain coalition nations for support provided to United States military operations (sec. 1225)

The House bill contained a provision (sec. 1212) that would extend through December 31, 2019, the authority to make Coalition Support Fund (CSF) payments under section 1233 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181).

The Senate amendment contained a similar provision (sec. 1212) that would extend the authority to make CSF payments and authorize up to \$350.0 million. It would also prohibit Pakistan from receiving CSF reimbursements except under the authority of a separate border security provision (sec. 1204).

The House recedes.

The conferees recognize that stability in the South Asia region cannot be achieved without cooperation with the Government of Pakistan. The conferees also recognize that there are a number of areas in which U.S. and Pakistani national security interests converge. Pakistan has long been an important security partner and that has not changed. It is important, however, to seek new opportunities for coordination and cooperation that is transparent and mutually beneficial.

Subtitle C—Matters Relating to Syria, Iraq, and Iran

Extension and modification of authority to provide assistance to the vetted Syrian opposition (sec. 1231)

The House bill contained a provision (sec. 1222) that would extend the authority under section 1209 of the Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for Fiscal Year 2015 (Public Law 113-291), as amended, through December 31, 2019. The provision would also limit the reprogramming of any funds until thirty days after the President submits to the congressional defense committees a plan describing the objectives, activities, and nature of the partner forces trained and equipped under this authority.

The Senate amendment contained a similar provision (sec. 1222) that would extend the authority through 2019. It would also limit the use of any funds authorized to be appropriated for fiscal 2019 under this authority until the President submits to the appropriate congressional committees the report on the United States strategy in Syria as required by section 1221 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91) and a report describing the plans, processes, mechanisms, and accompanying governance and stabilization activities for training the internal security forces of the vetted Syrian opposition under this authority. Finally, the Senate provision would limit the obligation or expenditure of any funds under this authority until the Secretary of Defense submits to the congressional defense committees a written certification every 120 days after the enactment of this Act on progress toward defeating the Islamic State of Iraq and Syria (ISIS) and efforts to promote stabilization, equitable governance, and adherence to United States standards for human rights and the rule of law with respect to support under this authority.

The House recedes with an amendment that would retain the reprogramming requirement and replace the certification requirement with a requirement for a quarterly report to be submitted by the Secretary of Defense, in coordination with the Secretary of State, to the appropriate congressional committees on progress in the campaign against ISIS and in stabilization, equitable governance, and other matters in Syria.

The conferees recognize the significant progress made by coalition forces against ISIS, but remain deeply concerned by the lack of clarity and conflicting messages from administration officials on the United States' strategy in Syria. The conferees urge the administration to provide the information necessary for the Congress to adequately evaluate the requirements for this authority and how it contributes to the accomplishment of U.S. objectives in Syria.

Syrian war crimes accountability (sec. 1232)

The Senate amendment contained a provision (sec. 6203) that would require the Secretary of State to submit a report on war crimes, crimes against humanity, and genocide in Syria to the appropriate congressional committees not later than 90 days after the date of the enactment of this Act. It would also require another report not later than 180 days after the Secretary of State determines that the violence in Syria has ceased. The provision would direct the Secretary of State to conduct a study and submit a report on transitional justice in Syria and authorize technical assistance for the purposes of ensuring accountability for war crimes, crimes against humanity, and genocide perpetrated by all forces fighting on the behalf of the regime of President Bashar al-Assad and all non-state armed groups fighting in Syria from March 2011 forward. Additionally, the provision would direct the Secretary of State, through the United States Permanent Representative to the United Nations, to extend the mandate of the Independent International Commission of Inquiry on the Syrian Arab Republic until its work is complete.

The House contained no similar provision. The House recedes with an amendment that would make several technical and clarifying changes.

Extension of authority to provide assistance to counter the Islamic State of Iraq and Syria (sec. 1233)

The House bill contained a provision (sec. 1221) that would extend the authority under section 1236 of the National Defense Authorization Act for Fiscal Year 2015 (Public Law 113-291), as most recently amended by section 1222 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91), by authorizing the Secretary of Defense, in coordination with the Secretary of State, to provide \$850.0 million in assistance to the military and other security forces of, or associated with, the Government of the Republic of Iraq, through December 31, 2020. Additionally, the House bill would express the sense of Congress on the contributions of the Peshmerga forces of the Kurdistan Region of Iraq in the campaign to defeat the Islamic State of Iraq and Syria (ISIS). It would also require the Secretary of Defense, in coordination with the Secretary of State, to submit to the appropriate congressional committees and leadership of the House of Representatives and the Senate a quarterly progress report on the end-use of United States provided equipment and the extent to which any organizations associated with the Iranian Revolutionary Guard Corps have been incorporated into the Iraqi military.

The Senate amendment contained a provision (sec. 1221) that would extend the authority through the end of 2020 while limiting the

obligation or expenditure of more than \$450.0 million of funds authorized for fiscal year 2019 until the report on the United States strategy in Iraq required by the Joint Explanatory Statement accompanying Conference Report 115-404 and a report on the planned use of funds and the purpose, size, roles, and missions of United States forces in Iraq is submitted to the appropriate congressional committees.

The House recedes with an amendment that would retain the sense of Congress on the contributions of the Peshmerga and the quarterly progress report, along with several clarifications.

Limitation on assistance to the Government of Iraq (sec. 1234)

The House bill contained a provision (sec. 1230D) that would limit the obligation or expenditure of funds authorized to be appropriated for this Act for assistance to the Ministry of the Interior of the Government of Iraq until the Secretary of Defense and the Secretary of State jointly certify to the appropriate congressional committees that such funds will not be disbursed by the United States to any group that is or is known to be affiliated with the Iranian Revolutionary Guard Corps-Quds Force or other state sponsor of terrorism.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would remove the reference to the Ministry of the Interior and expand the prohibition to the Government of Iraq as a whole, along with several technical and clarifying changes.

Extension and modification of authority to support operations and activities of the Office of Security Cooperation in Iraq (sec. 1235)

The House bill contained a provision (sec. 1223) that would amend section 1215 of the National Defense Authorization Act for Fiscal Year 2012 (Public Law 112-81), as amended, by extending the authority for the Office of Security Cooperation in Iraq (OSC-I) for one year through fiscal year 2019.

The Senate amendment contained a provision (sec. 1223) that would extend the authority for OSC-I through fiscal year 2019. The provision would limit the obligation or expenditure of more than 25 percent of funds authorized for OSC-I for fiscal year 2019 until the United States strategy on Iraq required by the Joint Explanatory Statement accompanying Conference Report 115-404 and an additional report on the activities, missions, and plan for the normalization of OSC-I to conform to other offices of security cooperation are delivered to the appropriate congressional committees.

The House recedes with a clarifying amendment.

The conferees note that an earlier transition plan submitted by the Secretary of Defense pursuant to the Joint Explanatory Statement accompanying the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) and subsequent documentation related to OSC-I in the President's Budget Request for Fiscal Year 2019 failed to provide the level of detail required for Congress to adequately consider this authority under the auspices of the Department of Defense.

Modification to annual report on the military power of Iran (sec. 1236)

The House bill contained a provision (sec. 1228) that would require the President to submit a report to the appropriate congressional committees not later than 120 days after the date of enactment of this Act, and annually thereafter for five years, on cooperation between Iran and the Russian Federation and the extent to which such co-

operation affects United States interests, particularly with respect to Syria. The House bill contained an additional provision (sec. 1230E) that would require the Secretary of State, in consultation with the Director of National Intelligence, to submit to Congress not later than 90 days after the date of the enactment of this Act a report describing Iranian expenditures in the previous calendar year on military and terrorist activities outside the country.

The Senate amendment contained a similar provision (sec. 1225) that would amend section 1245 of the National Defense Authorization Act for Fiscal Year 2010 (Public Law 111-84), as amended, to require an assessment of military cooperation and collaboration on the development of nuclear, biological, chemical, and advanced conventional weapons, weapons systems, and delivery vehicles between Iran and the Russian Federation and additional information on the Government of Iran's support to the Houthis.

The House recedes.

The conferees note that the Department of Defense's congressionally mandated annual report on the military power of Iran requires extensive reporting requirements on Iranian military activity. Therefore, the conferees encourage the Secretary of Defense to include detailed information in future reports on Russian and Iranian cooperation, particularly with respect to cooperation in Syria, assistance to the Assad regime, the establishment of forward operating bases, the deployment of air defense systems, and assistance to the Syrian chemical weapons program. The conferees also encourage the Secretary to include descriptions of any Russian and Iranian cooperation on: Iran's space program, including whether such cooperation strengthens Iran's ballistic missile program; intelligence sharing; naval cooperation; nuclear cooperation; the development and employment of hybrid warfare methods; and the activities of Iranian proxy forces such as Hezbollah.

Strategy to counter destabilizing activities of Iran (sec. 1237)

The House bill contained a provision (sec. 1225) that would authorize the Secretary of Defense, with the concurrence of the Secretary of State, to develop and implement a strategy with foreign partners to counter the destabilizing activities of Iran. Furthermore, it would require the Secretary of Defense, in consultation with the Secretary of State, to submit a report to the appropriate congressional committees describing the strategy and actions to enhance multilateral coordination.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would make a number of technical and clarifying changes.

The conferees note the importance of multilateral cooperation in the Middle East and encourage the Secretary of Defense to enhance cooperation and military-to-military engagement within multilateral fora when appropriate and practicable.

Subtitle D—Matters Relating to the Russian Federation

Prohibition on availability of funds relating to sovereignty of the Russian Federation over Crimea (sec. 1241)

The House amendment contained a provision (sec. 1231) that would extend by 1 year the prohibition imposed by section 1245 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92), as amended by section 1232 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91). This section would prohibit the use of fiscal year 2019 funds to im-

plement any activity that recognizes the sovereignty of the Russian Federation over Crimea. This section would also allow the Secretary of Defense, in concurrence with the Secretary of State, to waive the prohibition if the Secretary determines that doing so would be in the national security interest of the United States and submits a notification to the Committees on Armed Services of the Senate and the House of Representatives, the Committee on Foreign Relations of the Senate, and the Committee on Foreign Affairs of the House of Representatives.

The Senate amendment contained a similar provision (sec. 1232) that would prohibit funds authorized to be appropriated or made available by this Act for fiscal year 2019 for the Department of Defense to implement any activity that recognizes the sovereignty of the Russian Federation over Crimea.

The Senate recedes with an amendment that would require the Secretary of Defense, with the concurrence with Secretary of State, to provide a justification for seeking any waiver to the prohibition.

Limitation on availability of funds relating to implementation of the Open Skies Treaty (sec. 1242)

The House bill contained a provision (sec. 1232) that would prohibit obligation or expenditure of certain funds for fiscal year 2019 to modify any U.S. aircraft for the purposes of implementing the Open Skies Treaty until the President certifies that the United States has imposed legal countermeasures on the Russian Federation for its violation of that treaty. The provision would also prohibit the obligation or expenditure of any funds for fiscal year 2019 to vote to approve any implementing decision of the Open Skies Consultative Commission (OSCC) (pursuant to Article X of the treaty) that certifies infra-red or synthetic aperture radar sensors for any state party until a series of reports and certifications are met regarding U.S. Open Skies Treaty policy and Russian aggression, malign influence, and treaty violations. The provision would allow the President to waive these requirements, without delegation, if he determines that the waiver is in the interest of the national security of the United States and that the Russian Federation has taken clear and verifiable action to return to full and complete compliance with the treaty. Finally, the provision would also require a report from the Secretary of Defense on the state of the OC-135B fleet, including a recommendation on a prospective retirement date.

The Senate amendment contained a provision (sec. 1648) that would prohibit the obligation or expenditure of any funds for fiscal year 2019 for research, development, test, and engineering, Air Force, or aircraft procurement, Air Force, for the digital visual imaging system to modify U.S. aircraft for the purpose of implementing the Open Skies Treaty until the President and the Secretary of Defense submit the two certifications described in section 1235(b) of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91).

The Senate recedes with amendments that would modify the reporting requirements before a vote to approve certification of sensors in the OSCC; remove certification requirements related to Russian aggression and malign influence that are unrelated to treaty violations; modify the waiver requirements such that the President would have to certify that the Russian Federation has taken clear and verifiable action to return to compliance with the treaty; allow the President to delegate the waiver authority to the Secretary of State, in consultation with the Secretary of Defense and Director of National Intelligence; require these officials to

submit a report to the appropriate congressional committees containing their views at least 30 days before exercising the waiver; and strike the reporting requirement related to the OC-135B fleet.

The conferees direct the Secretary of Defense, in consultation with the Secretary of the Air Force, to submit a report to the congressional defense committees no later than January 31, 2019, on the Department of the Air Force's RC-135, WC-135, TC-135, and OC-135 aircraft fleets. The report should address issues for each aircraft fleet regarding airworthiness, safety of flight, aircraft availability and mission capability rates, sustainment, maintenance, and reliability. The report should also include a detailed description of the Secretary's acquisition strategy for recapitalizing each platform's capabilities, as well as the forecasted service-life expectancy dates for each variant of C-135 aircraft. In determining service-life expectancy dates, the Secretary should consider separately the structural integrity of the basic aircraft and the relevance and maintainability of the onboard mission systems to meet existing and evolving intelligence, surveillance, and reconnaissance requirements.

Determination required regarding material breach of INF Treaty by the Russian Federation (sec. 1243)

The House bill contained a provision (sec. 1239) that would provide that, unless the President certifies to the specified congressional committees that the Russian Federation has returned to full and verifiable compliance with the Intermediate-Range Nuclear Forces (INF) Treaty within 1 year of the date of the enactment of this Act, the prohibitions set forth in Article VI of the treaty would no longer be binding upon the United States as a matter of U.S. law.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would instead require the President to submit to the appropriate congressional committees no later than January 15, 2019, a determination whether the Russian Federation is in material breach of its obligations under the INF Treaty, and if the prohibitions set forth in Article VI of the INF Treaty remain binding on the United States as a matter of U.S. law.

Comprehensive response to the Russian Federation's material breach of the INF Treaty (sec. 1244)

The House bill contained a provision (sec. 1233) that would make a series of findings regarding the Russian Federation's violation of the Intermediate-Range Nuclear Forces (INF) Treaty and make a statement of policy that such violations constitute material breach of the treaty and therefore the United States is legally entitled to suspend the operation of the treaty for so long as Russia remains in material breach. The provision would also prohibit the obligation or expenditure of 25 percent of funds authorized to be appropriated or otherwise made available to the Department of Defense for fiscal year 2019 to provide support services (other than those required for senior leader communications) to the Executive Office of the President until the President certifies that each requirement of section 1290 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) has been implemented and the President has submitted the report required by section 1244(c) of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91).

Report on implementation of the New START Treaty (sec. 1245)

The House bill contained a provision (sec. 1240) that would prohibit the expenditure of funds for the Department of Defense to extend the implementation of the New Strategic Arms Reduction Treaty (New START) until the President certifies that the President has raised the issue of certain new Russian nuclear weapons systems under Article V of New START and that the Russian Federation has responded in writing to the United States as to whether it will agree to declare such nuclear weapons systems pursuant to the treaty. Under the provision, the President would be required to notify the specified congressional committees on whether the Russian position threatens the viability of New START or requires a political, economic, or military response on the part of the United States.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would remove the limitation on funds and modify the requirement to a report on whether the President has raised the issue of the covered Russian systems with the Russian Federation under Article V of New START or otherwise, and whether the government of the Russian Federation has responded as to whether it will agree to declare the covered Russian systems pursuant to the treaty. The provision would also require the President to notify the appropriate congressional committees as to whether the Russian response threatens the viability of New START; and to submit to the congressional defense committees a report assessing the extent to which the Department of Defense and National Nuclear Security Administration have met the commitments regarding nuclear modernization and infrastructure recapitalization made in the resolution of ratification to accompany New START.

The provision would authorize \$250.0 million to carry out this authority in fiscal year 2019, of which \$50.0 million would be available only for lethal assistance.

The Senate amendment contained a similar provision (sec. 1233) that would extend through December 31, 2021 the authority under section 1250 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) as amended by section 1234 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91) for the Secretary of Defense, in coordination with the Secretary of State, to provide security assistance, including defensive lethal assistance, and intelligence support to military and other security forces of the Government of Ukraine. The provision would authorize the use of up to \$200.0 million in fiscal year 2019 to provide security assistance to Ukraine.

The Senate recedes with an amendment that would broaden the authority to provide training required to maintain and employ systems and capabilities provided through the Ukraine Security Assistance Initiative. The amendment would also make certain ad-

justments to the certification by the Secretary of Defense related to actions of the Government of Ukraine to make substantial defense institutional reforms, including the protection of proprietary or sensitive technologies as such technologies relate to foreign military sales or transfers.

The provision would also allow the Secretary of Defense to waive the limitation under certain conditions.

The Senate amendment contained a similar provision (sec. 1231) that would also clarify that the limitation shall not be construed to limit bilateral military-to-military dialogue between the United States and the Russian Federation for the purposes of reducing the risk of conflict.

The conferees are concerned that sufficient information has not been made publicly available in a timely fashion regarding China's reclamation and militarization activities in the South China Sea. Moreover, the conferees recognize that China has engaged in provocative military activities elsewhere throughout the Indo-Pacific Region, including the East China Sea, the Taiwan Strait, and the Indian Ocean. Limitation on use of funds to reduce the total number of members of the Armed Forces serving on active duty who are deployed to the Republic of Korea (sec. 1264)

The House amendment contained a provision (sec. 1263) that would limit the use of funds authorized to be appropriated by this Act to reduce the number of members of the Armed Forces serving on Active Duty in the Republic of Korea below 22,000 unless the

Secretary of Defense provides a specified certification.

The Senate amendment contained a similar provision (sec. 1249) that would express the sense of the Senate regarding the alliance between the United States and the Republic of Korea, the importance of United States military forces on the Korean Peninsula for safeguarding peace and stability in the Indo-Pacific region, and other matters.

The Senate recedes with an amendment that would limit the use of funds authorized to be appropriated by this Act to reduce the number of members of the Armed Forces serving on Active Duty in the Republic of Korea below 22,000 unless the Secretary of Defense first provides certifies that (1) such a reduction is in the national security interest of the United States and will not significantly undermine the security of United States allies in the region; and (2) the Secretary has appropriately consulted with allies of the United States, including the Republic of Korea and Japan, regarding such a reduction.

The conferees recognize that United States military forces deployed on the Korean Peninsula remain vital to deterring, and if necessary, defeating aggression by the Democratic People's Republic of Korea, which continues to threaten the national security interests of the United States and the peace and stability of the Indo-Pacific region through both its conventional forces and weapons of mass destruction. While the conferees support diplomatic efforts to achieve the complete, verifiable, and irreversible denuclearization of the Democratic People's Republic of Korea, the conferees believe the significant removal of United States military forces from the Korean Peninsula is a non-negotiable item in such negotiations.

Reports on nuclear capabilities of the Democratic People's Republic of Korea (sec. 1265)

The Senate amendment contained the provision (sec. 1255) that would require, not later than 60 days after the enactment of this Act, the Secretary of Defense, in coordination with the Director of National Intelligence, to submit to the appropriate committees a report on the status of the nuclear program of the Democratic People's Republic of Korea (DPRK) to establish a baseline of progress for negotiations with respect to denuclearization. The provision would require, in the case of an agreement between the United States and the Democratic People's Republic of Korea, the Secretary of Defense to submit written updates and verification assessments to the required report.

The House bill contained no similar provision.

The House recedes with an amendment would require that the Secretary of Defense also coordinate with the Secretary of State and Secretary of Energy on the required reports. The amendment would clarify that the updates to the baseline report and the verification assessment shall only be required in the event of an interim or final agreement between the United States and the DPRK with respect to the denuclearization of the DPRK that includes a commitment by the DPRK to (1) reduce the nuclear arsenal of the DPRK or (2) to otherwise discontinue, reduce, or suspend the nuclear program of the DPRK. The amendment would also add a reporting requirement related to other weapons of mass destruction, including chemical and biological weapons, of the DPRK.

Modification of report required under enhancing defense and security cooperation with India (sec. 1266)

The House bill contained a provision (sec. 1259) that would amend subsection (a)(2) of

section 1292 of the National Defense Authorization Act for Fiscal Year 2017 (114-328) by adding an additional reporting requirement. The new reporting requirement would include a description of the progress on enabling agreements between the United States and the Republic of India, any limitations that hinder or slow progress, measures to improve interoperability, and actions India is taking, or the Secretary of Defense or the Secretary of State believe India should take, to advance the relationship with the United States. The House bill also contained a provision (sec. 1264) that would amend section 1292 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) by including a reporting requirement to develop closer defense cooperation with India on matters relating to missile defense.

The Senate amendment contained a provision (sec. 1247) that would express the sense of the Senate that the United States should strengthen and enhance its major defense partnership with India and work toward mutual security objectives.

The Senate recedes with amendment that would amend section 1259 of the House bill to require the Secretary of Defense and Secretary of State to include a forward-looking strategy and specific benchmarks for measurable progress toward enhancing United States defense cooperation with India and India's status as a major defense partner. The provision would also strike section 1264 of the House bill and section 1247 of the Senate amendment.

The conferees believe that the United States should strengthen and enhance its major defense partnership with India and such a partnership should enable strategic, operational, and tactical coordination between our militaries and be jointly developed between the countries. The conferees also believe that the United States should work toward mutual security objectives by: (1) expanding engagement in multilateral frameworks, including the Quadrilateral Dialogue between the United States, India, Japan, and Australia, to promote regional security and defend shared values and common interests in the rules-based order; (2) exploring additional steps to implement the "major defense partner" designation to better facilitate military interoperability, information sharing, and appropriate technology transfers; (3) pursuing strategic initiatives to help develop India's defense capabilities, including maritime security capabilities; (4) improving cooperation on and coordination of humanitarian and disaster relief responses; (5) conducting additional joint exercises with India in the Persian Gulf, the Indian Ocean region, and the Western Pacific; and (6) furthering cooperative efforts to promote security and stability in Afghanistan.

The House recedes with an amendment that would clarify the matters to be de-

scribed in the joint assessment concerning precision guided munitions, including requiring a description of the current United States inventory of the precision guided munitions assessed and whether such inventory meets the United States total munitions requirement. The amendment would also strike the modified requirement for the establishment and prescription of procedures related to rapid acquisition of precision guided munitions.

The House bill contained a provision (sec. 1299K) that would direct the Secretary of Defense to conduct an investigation to determine if coalition partners of the United States or members of the Armed Forces or intelligence personnel violated Federal law, the laws of armed conflict, or Department of Defense policy while conducting operations in Yemen.

Sense of Congress detention of United States citizens by the Government of the Republic of Turkey (sec. 1278)

The Senate amendment contained a provision (sec. 1269) that would make a series of findings, including concerning the Government of the Republic of Turkey's unlawful and wrongful detention of Andrew Brunson, a United States citizen. The provision would also prohibit the transfer of title for any F-35 aircraft to the Government of the Republic of Turkey until such time as the Secretary of Defense submits to the appropriate congressional committees a plan to remove the Government of the Republic of Turkey from participation in the F-35 program, to include industrial and military aspects of the program.

The Senate amendment also contained a related provision (sec. 6204) that would clarify that the limitation on the transfer of F-35 aircraft to Turkey in section 1269 of the Senate amendment shall apply to the transfer or delivery of that aircraft to Turkey rather than to the transfer of title for that aircraft to Turkey.

The House bill contained no similar provision.

The House recedes with an amendment that would strike section 6204 of the Senate amendment, strike elements of the section 1269 of the Senate amendment related to the F-35 program, and express the sense of the Congress that (1) the Government of the Republic of Turkey continues to unlawfully and wrongfully detain United States citizens, including Andrew Brunson and Serkan Golge, as well as staff of United States missions in Turkey; and (2) consistent with its obligations under the North Atlantic Treaty, which commits NATO allies to safeguard "the principles of democracy, individual liberty and the rule of law," the Government of the Republic of Turkey should immediately release all United States citizens that have been wrongfully detained and resolve such cases in a timely, fair, and transparent manner.

The conferees note that an assessment of a significant change in Turkish participation in the F-35 program, including a reduction or elimination of such participation, as well as a limitation on the delivery of F-35 aircraft to the Republic of Turkey, are addressed elsewhere in this report.

Technical amendments related to NATO Support and Procurement Organization and related NATO agreements (sec. 1279)

The House bill contained a provision (sec. 1278) that would amend section 2350d of title 10, United States Code, to update the statutory reference to reflect a reorganization of the North Atlantic Treaty Organization (NATO) with respect to the elimination of the NATO Support Organization and the establishment of the NATO Support and Procurement Organization. The provision would also amend section 2350d to reflect that NATO supply and logistics support activities may extend to NATO operations outside of Europe.

The House bill contained no similar provision.

The House recedes with an amendment that would strike the sense of the Senate.

The conferees believe that the Department of Defense should continue to cooperate with NATO and key NATO allies in order to promote the common defense in the cyberspace domain as well as to deter cyberattacks.

Report on status of the United States relationship with the Republic of Turkey (sec. 1282)

The House bill contained a provision (sec. 1271) that would require the Secretary of Defense, in consultation with the Secretary of State, to submit a report on the U.S.-Turkish relationship to the congressional defense committees, the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives, not later than 60 days after the date of the enactment of this Act. The provision would also prohibit any action to execute delivery of a foreign military sale for major defense equipment under section 36 of the Arms Export Control Act (22 U.S.C. 2761) to the Republic of Turkey until the required report is delivered to the specified congressional committees.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the report on the U.S.-Turkish relationship to be delivered not later than 90 days after the enactment of this Act. The amendment would add to the matters to be included in the required report an assessment of the operational and counterintelligence risks posed by the deployment of the S-400 air and missile defense system in the Republic of Turkey to the F-35 Lightning II Joint Strike aircraft and the steps required to mitigate those risks, if possible. The amendment would also add an assessment of the Republic of Turkey's participation in the F-35 program, including a description of industrial participation of Turkish industry in the manufacturing and assembly of the F-35 program; an assessment of tooling and other manufacturing materials held by Turkish industry; and an assessment of the impacts of a significant change in participation by the Republic of Turkey in the F-35 program and the steps

that would be required to mitigate negative impacts of such a change on the United States and other international program partners. The amendment would prohibit the Department of Defense from delivering any F-35 aircraft to the Republic of Turkey until such time as the required report has been submitted.

The conferees recognize Turkey is an important international partner in the F-35 program, and that any significant change in Turkish participation could have substantial impacts on the program. However, Turkey's expressed intention to purchase the S-400 air and missile defense system from Russia raises serious concerns regarding Turkey's participation in the F-35 program. Moreover, such a purchase would have significant ramifications for the broader U.S.-Turkey relationship and defense cooperation, including the possibility of sanctions. Therefore, the conferees believe the Department of Defense should be prepared for all potential outcomes that would result if Turkey completes a purchase of the S-400 by conducting the assessment required of a significant change in Turkish participation in the F-35 program, including a reduction or elimination of such participation.

Sense of the Congress concerning military-to-military dialogues (sec. 1283)

The House bill contained a provision (sec. 1279) that would express the sense of Congress regarding the parameters that lead to successful military-to-military dialogues.

Modifications to Global Engagement Center (sec. 1284)

The Senate amendment contained a provision (sec. 1262) that would extend for one year the transfer authority contained in section 1287(e)(1) of the National Defense Authorization Act for Fiscal Year 2017 relating to the GEC, and clarify the role, responsibilities and authorities of the GEC.

The Senate recedes with a clarifying amendment.

The conferees strongly support the mission of the GEC to counter false and misleading messaging by both state and non-state adversaries and note the importance of integrating military and nonmilitary tools of statecraft to address these challenges. The conferees believe continuation of the transfer authority provided by this provision helps to facilitate such a whole-of-government approach.

The conferees note that the Department of Defense (DOD) and the Department of State (DOS) signed a memorandum of understanding on February 26, 2018, to facilitate the transfer of \$40.0 million for the purposes of countering propaganda and disinformation from foreign nations, more than a year after such transfers were authorized by the National Defense Authorization Act for Fiscal Year 2017 and after the Intelligence Community publicly reported Russian efforts to influence the 2016 elections. The conferees have significant concern about delayed action on these issues in the face of a significant and growing threat from Russia. The conferees strongly encourage DOD and DOS to fully utilize the authorities that have been provided to more aggressively counter propaganda by Russia and other state and non-state actors, and urge the Department to be more expeditious in the transfer of funds to the GEC for future projects.

Sense of Congress on countering hybrid threats and malign influence (sec. 1285)

Initiative to support protection of national security academic researchers from undue influence and other security threats (sec. 1286)

The House bill contained a provision (sec. 1283) that would require the Secretary of Defense to implement an application certification requirement for researchers seeking funding to ensure that funds not be made available to any individual who has participated in or is currently participating in a foreign talent program.

The Senate recedes with an amendment that would replace the certification requirement with a directive to the Secretary of Defense to establish an initiative to support the protection of national security academic researchers from undue influence, including through foreign talent programs, and other security threats, by developing policies, training, and regulations and procedures with academic organizations to support the goals of this initiative.

The conferees believe that such an initiative will help support the protection of intellectual property, controlled information, key personnel, and information about critical technologies relevant to national security; protect academic freedom and global scientific collaboration; limit undue influences by countries seeking to exploit United States technology within the Department of Defense research; and support efforts toward the development of domestic talent in relevant scientific and engineering fields.

Report on Honduras, Guatemala, and El Salvador (sec. 1287)

(Public Law 115-91), to add the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives as recipients of the annual report setting forth an update of the most current Department of Defense Freedom of Navigation Report under the Freedom of Navigation Operations (FONOPS) program.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

Limitation on availability of funds to implement the Arms Trade Treaty (sec. 1292)

The House bill contained a provision (sec. 1299M) that would prohibit the availability of funds for fiscal year 2019 for the Department of Defense to obligate or expend to fund a Secretariat or any other international organization established to support the implementation of the Arms Trade Treaty, to sustain domestic prosecutions based on any charge related to the Treaty, or to implement the Treaty until the Senate approves a

The House bill contained a provision (sec. 1236) that would require reports with regard to Russian violations of the INF Treaty and the supply chains for Russian arms sales program. The provision would also require the imposition of sanctions against specific persons, with a focus on persons providing support to the Russian defense industrial supply chain. The provision would also amend section 231 of the Countering America's Adversaries Through Sanctions Act (CAATSA) (Public Law 115-44) by providing an authority to suspend the imposition of sanctions under that Act for 180-day periods if the President provides certain certifications.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would provide a modified procedure by which the President may use the existing authority under section 236(b) of CAATSA, without regard to the expedited review procedures in section 216 of CAATSA, to waive the application of sanctions if the President provides a certification to the appropriate congressional committees not less than 30 days in advance of the waiver taking effect. The amendment would preclude the President from using the waiver with respect to a significant transaction with specified entities of the Russian defense or intelligence sectors, including the Main Intelligence Agency of the General Staff of the Armed Forces of the Russian Federation (GRU), which the United States intelligence community assessed on January 6, 2017, played a direct role in Russian interference in the 2016 United States presidential election. The President would be required to certify that the waiver is in the national security interests of the United States. The President would also be required to certify that the significant transaction for which the waiver is being used would not: (1) endanger the integrity of any multilateral alliance of which the United States is a part; (2) adversely affect ongoing operations of the Armed Forces of the United States, including coalition operations in which the such forces participate;

(3) result in a significant negative impact to defense cooperation between the United States and the country whose government has primary jurisdiction over the person; and (4) significantly increase the risk of compromising United States defense systems and operational capabilities, including through the diversion of United States sensitive technology. The President would be further required to certify that the government with primary jurisdiction over the person who engages in the significant transaction is: (1) taking or will take steps to reduce its inventory of major defense equipment and advanced conventional weapons produced by the defense sector of the Russian Federation as a share of its total inventory of major defense equipment and advanced conventional weapons over a specified period; or cooperating with the United States Government on other matters that are critical to United States strategic national security interests.

Not later than 120 days after the date on which the President submits the specified certification, and annually thereafter for two years, the amendment would require the Secretary of State and the Secretary of Defense to jointly submit a report on such waiver, including: (1) the extent to which the waiver under section 236(b) has or has not resulted in the compromise of United States systems and operational capabilities, including through the diversion of United States sensitive technology to a person that is part of, or operates for or on behalf of, the intelligence sectors of the Government of the Russian Federation; and (2) the extent to which the government with primary jurisdiction over the person is taking specific enforcement actions.

Not later than 90 days after the date of the enactment of this Act, the amendment would require the President to submit an initial report that describes those persons that the President has determined under section 231 of CAATSA have knowingly engaged in a significant transaction with a person that is part of, or operates for or on behalf of, the defense or intelligence sectors of the Government of the Russian Federation. The conferees encourage the Secretary of Defense to include detailed information in future reports regarding: the regional threats posed by arms or related material transferred by Iran to Hezbollah; the means by which such arms transfers are made; and the impacts of Iranian and Iranian-controlled personnel, including Hezbollah, Shiite militias, and Iran's Revolutionary Guard Corps forces, operating within Syria. Iran's testing and production of ballistic missiles capable of delivering nuclear weapons violates multiple unanimously adopted United Nations Security Council resolutions. The House recedes.

Subtitle C—Other Matters

Joint Improvised-Threat Defeat Organization (sec. 1521)

The Senate bill contained a provision (sec. 1531) that would reauthorize the Joint Improvised-Threat Defeat Organization (JIDO) to reflect the expiration of the Joint Improvised-Threat Defeat Fund.

The House bill contained a similar provision (sec. 1522).

The House recedes with an amendment that would require the Secretary of Defense to submit a transition plan for JIDO with respect to transition from overseas contingency operations funding to base funding. This plan is to be submitted to the congressional defense committees no later than March 1, 2019.

Enduring costs funded through overseas contingency operations (sec. 1522)

The House bill contained a provision (sec. 1524) that would direct the Secretary of Defense to submit with the annual President's budget request an estimate for the costs of operations currently supported in part or in whole by overseas contingency operations (OCO) funds that are likely to continue beyond such contingency.

The Senate amendment contained a similar provision (sec. 1003) that would require the Under Secretary of Defense (Comptroller) to submit a report that outlines the changes to the Office of Management and Budget OCO criteria and lists the exact figure amounts by project or activity that are shifted from OCO to base funding for the fiscal year 2020 budget request.

The Senate recedes with an amendment to combine both provisions. The provision requires the Under Secretary of Defense (Comptroller) to submit a report to the congressional defense committees, two weeks after the submission of the President's budget request, an estimate of any enduring costs which are funded through OCO funds, and a detailed description of any costs that have been transferred from OCO to base funds.

LEGISLATIVE PROVISIONS NOT ADOPTED

Separate account lines for overseas contingency operations funds

The House bill contained a provision (sec. 1523) that would direct the Secretary of Defense and the Director of Management and Budget to establish separate accounts for overseas contingency operations funds.

The Senate amendment contained no similar provision.

The House recesses.

The conferees note that section 1524 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91) required the Department of Defense to provide updated guidelines regarding the budget items that may be covered by overseas contingency operations funds. The conferees await the results of this report due in August 2018. Furthermore, the conferees anticipate that the results of the first full financial audit will contain a recommendation for the Department of Defense to identify receipt of base appropriations separately from overseas contingency operations appropriations. The conferees recommend the Department of Defense begin work to implement these controls.

TITLE XVI—STRATEGIC PROGRAMS, CYBER, AND INTELLIGENCE MATTERS

Subtitle A—Space Activities

Improvements to acquisition system, personnel, and organization of space forces (sec. 1601)

The House bill contained a provision (sec. 1601) that would direct the Deputy Secretary of Defense to develop a plan to establish an alternative acquisition system for defense space acquisitions, including with respect to space vehicles, ground segments, and terminals. The provision would also require the Secretary of the Air Force to develop and implement a plan to increase the number and improve the quality of the civilian and military space cadre within the Air Force and establish a new numbered Air Force responsible for space warfighting operations. Finally, the provision would establish a subordinate unified command for space under U.S. Strategic Command that would be responsible for joint space warfighting operations.

The Senate amendment contained no similar provision.

The Senate recesses with amendments that would remove the requirement for a numbered Air Force and remove the requirement to implement the plan for cadre development.

Modifications to Space Rapid Capabilities Office (sec. 1602)

The Senate amendment contained a provision (sec. 1601) that would clarify and update the structure of the Space Rapid Capabilities Office.

The House bill contained no similar provision.

The House recesses with technical and clarifying amendments.

Rapid, responsive, and reliable space launch (sec. 1603)

The House bill contained a provision (sec. 1602) that would amend section 2273(b) of title 10, United States Code, to include consideration of rapid, responsive, and reliable space launches for national security space programs and re-name the Evolved Expendable Launch Vehicle program the National

Security Space Launch program. It would also require the Secretary of Defense to consider both reusable and expendable launch vehicles for any solicitations on or after March 1, 2019, and require the Secretary to notify the appropriate congressional committees 60 days before issuing any solicitation for which reusable launch vehicles are not deemed eligible. Finally, the provision would require the Secretary to conduct a risk and cost impact analysis for launch vehicles for national security payloads, and submit such analysis to the appropriate congressional committees no later than 180 days from the date of enactment of this Act.

The Senate amendment contained a provision (sec. 1605) that would require the Secretary of Defense to pursue a strategy that includes fully or partially reusable launch systems as part of ensuring assured access for national security payloads to space. It would make the same change in name as the House provision and require the Secretary to submit a report to Congress no less than 60 days before any solicitation for procurement of launch services is issued.

The Senate recesses with several technical amendments and an amendment that would require the Secretary to notify the appropriate congressional committees not later than 10 days after issuing a solicitation for a contract for space launch services for which reusable launch vehicles are not eligible, rather than 60 days before.

The conferees encourage the Secretary to continue to develop a process to evaluate and certify launch vehicles using previously flown components or systems for national security space launch.

Provision of space situational awareness services and information (sec. 1604)

The House bill contained a provision (sec. 1603) that would terminate on January 1, 2024, the authority of the Department of Defense (DOD) to provide space situational awareness data to commercial and foreign entities. The provision would further require the Secretary of Defense to enter into a contract with a federally funded research and development center (FFRDC) to assess which department or departments should assume these authorities. This provision would also direct the Secretary of Defense to develop and submit to Congress a plan to ensure that one or more departments may provide space situational awareness services to non-U.S. Government entities.

The Senate amendment contained no similar provision.

The Senate recesses with amendments that would strike the requirement for a contract with an FFRDC and instead require the President to submit to the appropriate congressional committees no later than 180 days from the date of enactment of this Act a plan for a department or agency other than the DOD to provide space situational awareness services and information to commercial and foreign entities.

Budget assessments for national security space programs (sec. 1605)

The House bill contained a provision (sec. 1604) that would extend the requirement for an annual report on the budget for national security space programs to fiscal year 2021 and allow the Secretary of Defense to submit the report up to 30 days after the date on which the President submits the budget request to Congress.

The Senate amendment contained no similar provision.

The House recesses.

Improvements to commercial space launch operations (sec. 1606)

The Senate amendment contained a provision (sec. 1604) that would prohibit the imposi-

sition by the Secretary of Defense of requirements duplicative of those imposed by the Secretary of Transportation under chapter 509 of title 10, United States Code. The provision would allow the Secretary of Defense to waive this prohibition if he determines that imposing a requirement is necessary to avoid negative consequences for the national security space program.

The House bill contained no similar provision.

The House recesses with a technical amendment and an amendment that would grant the above waiver authority to the Secretary of the Air Force, with a requirement to notify the Secretary of Transportation first.

Space warfighting policy, review of space capabilities, and plan on space warfighting readiness (sec. 1607)

The House bill contained a provision (sec. 1612) that would require the Secretary of Defense to develop and commence implementation of a plan that identifies joint mission-essential tasks for space as a warfighting domain.

The Senate amendment contained a provision (sec. 1602) that would require the Secretary of Defense to develop a space warfighting policy not later than March 29, 2019. The provision would also direct the Secretary of Defense to conduct a review relating to the national security space enterprise, including resiliency, attribution challenges, deterrence, acquisition cycles, organizational structures, and emerging threats.

The House recesses with amendments that would incorporate the plan required by the House provision into the Senate provision, both due not later than March 29, 2019, and modify several of the specific requirements of the review required by the Senate provision. The conferees also encourage coordination with the Director of National Intelligence as the review is conducted and this policy is developed.

The conferees note that national security satellites face growing threats from potential adversary attacks, such as anti-satellite weapons or jamming, and from environmental hazards, such as orbital debris. A single launch failure, on-orbit problem, or attack on a single satellite could result, in some cases, in the loss of billions of dollars of investment and a significant loss of capability. Protecting space assets has therefore become a priority for the Department, and funding for space protection has increased in recent years.

Accordingly, the conferees direct the Comptroller General of the United States to conduct a review of space protection programs of the Department of Defense, including a review of the status of the primary space protection acquisition efforts underway or planned by the Department. The conferees are also interested in the extent to which these efforts and plans are coordinated across the Department and among other government, commercial, and international entities.

The conferees direct the Comptroller General to provide a briefing to the congressional defense committees no later than March 15, 2019, with a report to follow by a date agreed at the time of the briefing.

Use of small- and medium-size buses for strategic and tactical satellite payloads (sec. 1608)

The House bill contained a provision (sec. 1606) that would require the Secretary of Defense to provide a briefing on the risks, benefits, and cost savings associated with using small- and medium-size buses for strategic and tactical satellite payloads for protected satellite communications programs and next-generation overhead persistent infrared systems. The provision would also require

the Director of Cost Assessment and Program Evaluation (CAPE) to certify that future analyses of alternatives include materiel solutions for using small- and medium-size buses. Finally, this provision would require the Secretary of Defense, Secretary of the Air Force, and the Chairman of the Joint Chiefs of Staff to provide a briefing to the Committees on Armed Services of the Senate and the House of Representatives, not later than 240 days after the date of the enactment of this Act, on alternative space-based architectures using small-, medium-, and large-size buses.

The Senate amendment contained no similar provision.

The Senate recedes with amendments that would specify that the CAPE assessments should be submitted at completion of each relevant analysis of alternatives, and that the briefing provided by the Secretary of Defense should also take into account requirements for radiation hardening of critical components.

Enhancement of positioning, navigation, and timing capacity (sec. 1609)

The House bill contained a provision (sec. 1605) that would require the Secretary of the Air Force to ensure that military Global Positioning System user equipment terminals have the capability to receive trusted signals from the Galileo and QZSS satellite constellations, starting with increment 2. This provision would also require the terminals to have the capability to receive non-allied positioning, navigation, and timing signals if the Secretary of Defense determines that the benefits outweigh the risks or the risks can be appropriately mitigated.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would allow the Secretary of Defense to waive the requirement for increment 2 terminals to receive signals from Galileo and QZSS satellites if he determines it necessary for national security. The Secretary would not be able to delegate such waiver authority below the level of the Deputy Secretary of Defense and would be required to submit a report with the waiver providing rationale for why the capability was not incorporated into increment 2, and providing a plan and timeline for incorporation of the capability in future increments.

Designation of component of Department of Defense responsible for coordination of modernization efforts relating to military-code capable GPS receiver cards (sec. 1610)

The House bill contained a provision (sec. 1607) that would require the Secretary of Defense to designate a component of the Office of the Secretary of Defense to be responsible for coordinating common solutions for the military-code modernization efforts among the military departments, Defense Agencies, and other appropriate elements of the Department of Defense not later than 30 days after the date of enactment of this Act. The provision would also require the Secretary to submit a report no later than March 15, 2019, and annually through 2021, on these efforts.

The Senate amendment contained no similar provision.

The conferees appreciate the efforts of the Council on Oversight of the Department of Defense Position, Navigation, and Timing Enterprise to support military-code modernization efforts thus far and encourage the Secretary to draw on the expertise of the Council.

Designation of component of Department of Defense responsible for coordination of hosted payload information (sec. 1611)

The House bill contained a provision (sec. 1608) that would make a series of findings

and require the Secretary of Defense to designate a component of the Department of Defense to be responsible for coordinating information, processes, and lessons learned relating to use of commercially hosted payloads across the military departments, Defense Agencies, and other appropriate elements of the Department of Defense not later than 30 days after the date of the enactment of this Act.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would strike the findings.

Limitation on availability of funds for Joint Space Operations Center mission system (sec. 1612)

The House bill contained a provision (sec. 1609) that would prohibit the obligation or expenditure of any funds for fiscal year 2019 for the Joint Space Operations Center Mission System (JMS) and limit obligation or expenditure of 25 percent of funds for fiscal year 2019 for the Enterprise Space Battle Management Command and Control program until the Deputy Secretary of Defense provides to the congressional defense committees a certification that the Secretary of the Air Force has entered into a contract to operationalize commercial space situational awareness processing software to address warfighter requirements and fill gaps in current space situational awareness capabilities.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would modify the limitation on funds for JMS to 50 percent and require the Secretary of the Air Force to submit the certification, rather than the Deputy Secretary of Defense.

Evaluation and enhanced security of supply chain for protected satellite communications programs and overhead persistent infrared systems (sec. 1613)

The House bill contained a provision (sec. 1610) that would require the Secretary of Defense to develop a plan for and conduct evaluations of supply chain vulnerabilities for protected satellite communications and next-generation overhead persistent infrared (OPIR) systems, and develop risk mitigation strategies for the identified vulnerabilities. The provision would also require the Secretary to establish requirements to carry out the supply chain vulnerability evaluation and submit such requirements to the congressional defense committees not later than 120 days after the date of the enactment of this Act.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

The conferees note that the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91) contained a similar provision, section 1659, that required the Secretary of Defense to evaluate supply chain vulnerabilities for programs related to nuclear weapons, nuclear command, control, and communications, continuity of government, and ballistic missile defense. The conferees encourage the Secretary to leverage work done in support of that requirement where appropriate, and do not intend for this provision to supersede section 1659.

The conferees note that the Air Force is currently planning to use an accelerated acquisition process to rapidly develop a block of next generation OPIR satellites, with fielding to begin in fiscal year 2025, and a follow-on block in fiscal year 2030. While this program is mainly intended to focus on core survivable strategic missile warning requirements, it is unclear whether and how it will

satisfy other requirements, including those addressed by the legacy Space Based Infrared System (SBIRS). It is also unclear how technology development over the past decade will help inform the next generation program.

Accordingly, the conferees direct the Comptroller General of the United States to review the early planning for the next generation OPIR system and associated ground capabilities. The review should assess: 1) What challenges and risks, if any, does the next generation OPIR acquisition effort face, and what, if anything, is being planned to address these challenges and risks? 2) To what extent will the next generation OPIR system continue to fulfill existing key SBIRS capabilities? 3) To what extent is the Air Force coordinating with other agencies inside and outside the Department of Defense, such as the Missile Defense Agency, to help ensure sustainment of current capabilities and limit the potential for duplicative acquisition efforts? 4) To what extent is the Air Force leveraging commercial space industry advances and technology development initiatives to develop a lower cost system sooner?

The Comptroller General shall provide an initial briefing to the congressional defense committees no later than March 15, 2019, with a report to follow at a date to be agreed upon at the time of the briefing.

Report on protected satellite communications (sec. 1614)

The House bill contained a provision (sec. 1611) that would require the Secretary of Defense to submit a report to the congressional defense committees no later than December 31, 2018, on how specific protected satellite communications programs meet the requirements for resilience, mission assurance, and the nuclear command, control, and communication mission of the Department of Defense.

The Senate amendment contained no similar provision.

The Senate recedes.

Report on enhancements to the Global Positioning System Operational Control Segment (sec. 1615)

The Senate amendment contained a provision (sec. 1603) that would require the Secretary of the Air Force to submit a report to the congressional defense committees no later than 1 year after date of the enactment of this Act on potential further enhancements to the Operational Control Segment for the Global Positioning System to achieve capabilities similar to the Next Generation Operational Control Segment, including cybersecurity enhancements and other incremental capabilities. The report would also include the cost and schedule for such additional capabilities and enhancements.

The House bill contained no similar provision.

The House recedes with clarifying amendments.

Report on persistent weather imagery for United States Central Command (sec. 1616)

The House bill contained a provision (sec. 1614) that would require the Secretary of the Air Force to develop a plan to provide persistent weather imagery of the U.S. Central Command area of operations to the Command after 2025. The Secretary would be required to submit such plan to the congressional defense committees by March 1, 2019.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would instead require the Secretary to submit a report with options to provide such imagery.

Study on space-based radio frequency mapping (sec. 1617)

The House bill contained a provision (sec. 1613) that would require the Secretary of Defense and the Director of National Intelligence to jointly conduct a study on the capabilities of the private sector with respect to radio frequency mapping and associated services for space-based electromagnetic collections.

The Senate amendment contained no similar provision.

The Senate recedes with clarifying amendments.

Independent study on space launch locations (sec. 1618)

The House bill contained a provision (sec. 1615) that would require the Secretary of Defense to enter into a contract with a federally funded research and development center (FFRDC) to conduct a study on space launch locations, including with respect to the development and capacity of existing and new locations, and the vulnerabilities of the use of existing and new locations.

The Senate amendment contained no similar provision.

The Senate recedes with several amendments that would clarify the areas of focus of the study and remove the prohibition on entering into a contract with an FFRDC for which the Air Force Space Command or the Launch Center of the National Aeronautical and Space Administration is a sponsor.

The conferees continue to recognize the unique importance of U.S. Federal Aviation Administration-licensed spaceports and, when appropriate, encourage the use of such spaceports and complexes for certain orbits in support of national security space priorities. The conferees note that a variety of spaceports are already operational or in development, including in Georgia, New Mexico, Alaska, Oklahoma, Virginia, Texas, and Arizona; the conferees support this diversification of launch options available to the Department of Defense.

Briefing on commercial satellite servicing capabilities (sec. 1619)

The House bill contained a provision (sec. 1617) that would require the Secretary of Defense, in consultation with the Director of National Intelligence, to jointly provide to the congressional defense committees and to other appropriate committees upon request a briefing detailing the costs, risks, and operational benefits of leveraging commercial satellite servicing capabilities for national security satellite systems.

The Senate amendment contained no similar provision.

The Senate recedes.

SUBTITLE B—DEFENSE INTELLIGENCE AND INTELLIGENCE-RELATED ACTIVITIES

Role of Under Secretary of Defense for Intelligence (sec. 1621)

The House bill contained a provision (sec. 1621) that would amend section 137 of title 10, United States Code, to clarify the responsibilities of the Under Secretary of Defense for Intelligence.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

Security vetting for foreign nationals (sec. 1622)

The House bill contained a provision (sec. 1622) that would authorize the Secretary of Defense to apply additional security reviews to dual citizens seeking positions that require access to highly classified information.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would broaden the provision to vetting,

instead of solely clearances, and would involve the Security Executive Agent.

Department of Defense Counterintelligence polygraph program (sec. 1623)

The House bill contained a provision (sec. 1623) that would amend section 1564a of title 10, United States Code, by authorizing the Secretary of Defense to add dual citizens to the Department of Defense counterintelligence polygraph program, for the purposes of assessing risk.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that specifies that this addition will only apply in the case of an authorized investigation.

Defense intelligence business management systems (sec. 1624)

The House bill contained a provision (sec. 1624) that would direct the Chief Management Officer of the Department of Defense to develop and implement standardized business process rules for the planning, programming, budgeting, and execution process for the Military Intelligence Program.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees note that insufficient insight into the Military Intelligence Program budget inhibits the congressional oversight of the Military Intelligence Program.

Modification to annual briefing on the intelligence, surveillance, and reconnaissance requirements of the combatant commands (sec. 1625)

The House bill contained a provision (sec. 1625) that would require the Department of Defense to incorporate into the existing report required by section 1626 of the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year 2015 (Public Law 113–291) data related to the number of requests for intelligence, surveillance, and reconnaissance capability and capacity submitted to the Chairman of the Joint Chiefs of Staff (CJCS) by the combatant commanders, the number of requests formally validated by the CJCS, the quantity of validated requests tasked to the Services to fulfill, and the amount of validated requests actually fulfilled by the Services.

The Senate amendment contained no similar provision.

The Senate recedes.

Framework on governance, mission management, resourcing, and effective oversight of combat support agencies that are also elements of the intelligence community (sec. 1626)

The Senate amendment contained a provision (sec. 1611) that would require the Secretary of Defense to develop and codify in policy a framework and supporting processes within the Department of Defense to ensure that the missions, roles, and functions of the combat support agencies of the Department of Defense that are also elements of the intelligence community, and other intelligence components of the Department, are appropriately balanced and resourced.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

SUBTITLE C—CYBERSPACE-RELATED MATTERS
Reorganization and consolidation of certain cyber provisions (sec. 1631)

The Senate amendment contained a provision (sec. 1624) that would amend part I of subtitle A of title 10, United States Code, by transferring sections 130g, 130j, and 130k, currently of chapter 3, to chapter 19, reorganizing this law under “Cyber Matters” rather than “General Powers and Functions.”

The House bill contained no similar provision.

The House recedes.

Affirming the authority of the Secretary of Defense to conduct military activities and operations in cyberspace (sec. 1632)

The Senate amendment contained a provision (sec. 1622) that would affirm the authority of the Secretary of Defense to conduct military activities and operations in cyberspace, including clandestine military activities and operations, to defend the United States, its allies, and its interests, in anticipation of and in response to malicious cyber activities carried out against the United States or a United States person by a foreign power and would clarify that clandestine military activities or operations in cyberspace are traditional military activities for the purposes of section 503(e)(2) of the National Security Act of 1947 (Public Law 80–253).

The House bill contained no similar provision.

The House recedes with an amendment that would clarify that the affirmation does not itself authorize any specific military activities or operations and should not be treated as an authorization for use of military force.

The conferees note that the Department of Defense faces difficulties within the interagency in obtaining mission approval. One of the challenges routinely confronted by the Department is the perceived ambiguity as to whether clandestine military activities and operations, even those short of cyber attacks, qualify as traditional military activities as distinct from covert actions requiring a Presidential Finding. As a result, with respect to actions that produce effects on information systems outside of areas of active hostilities, the Department of Defense has been limited to proposing actions that could be conducted overtly on attributable infrastructure without deniability—an operational space that is far too narrow to defend national interests. The conferees see no logical, legal, or practical reason for allowing extensive clandestine traditional military activities in all other operational domains (air, sea, ground, and space) but not in cyberspace. It is unfortunate that the executive branch has squandered years in interagency deliberations that failed to recognize this basic fact and that this legislative action has proven necessary.

The conferees, in this affirmation, specify that military activities and operations, or associated preparatory actions, conducted in cyberspace, marked by, held in, or conducted with secrecy, and carried out, (1) as part of a military operation plan approved by the President or the Secretary in anticipation of hostilities or as directed by the President or the Secretary, (2) to deter, safeguard, or defend against attacks or malicious cyber activities against the United States or Department of Defense information, networks, systems, installations, facilities, or other assets, or (3) in support of information related capabilities, indeed qualify as traditional military activities. Such activities include those conducted for the purpose of preparation of the environment, force protection, deterrence of hostilities, advancing counterterrorism operations, and in support of information operations or information-related capabilities. Information-related capabilities may include, when appropriate and approved, military deception and psychological operations.

The conferees do not intend or expect that this provision will result in the Department’s unnecessarily or routinely conducting clandestine cyber attacks, especially those outside of areas in which hostilities

are occurring, but nonetheless recognize that it is important that the Department have the ability to respond to and prepare for hostilities in cyberspace. The conferees urge the Department to pursue more active engagement with and deterrence of adversaries in cyberspace. The conferees also urge the administration to reconfigure its interagency processes as necessary to ensure that the Department's operations are approved in an appropriately efficient and effective manner.

The conferees intend to conduct rigorous oversight of Department of Defense clandestine operations in cyberspace and expect the Department to keep the congressional defense committees apprised of activities and operations and informed regarding operational authorities and associated execute orders.

Finally, the conferees recognize that information operations are particularly contested and controversial. While the conferees agree that the Department should conduct aggressive information operations to deter adversaries, as is recommended by the Defense Science Board's Task Force on Cyber Deterrence in its February 2017 report, the conferees do not intend this affirmation as an authorization of clandestine activities against the American people or of activities that could result in any significant exposure of the American people and media to U.S. government-created information.

Department of Defense Cyber Scholarship Program scholarships and grants (sec. 1633)

The House bill contained a provision (sec. 1640) that would amend section 2200c of title 10, United States Code, to require consideration, in the scholarship granting process authorized in section 2200a of the same title, of whether the candidates in question are pursuing education at historically Black colleges and universities or other minority-serving institutions.

The Senate amendment contained an identical (sec. 6101) provision.

The conference agreement includes this provision.

Amendments to pilot program regarding cyber vulnerabilities of Department of Defense critical infrastructure (sec. 1634)

The House bill contained a provision (sec. 1631) that would modify section 1650 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) to incorporate the Defense Digital Service into pilot program authorities for identifying innovative methodologies and engineering approaches to evaluate vulnerabilities of Department of Defense critical infrastructure. The provision would also extend deadlines associated with the program.

The Senate amendment contained no similar provision.

The Senate recedes.

Modification of acquisition authority of the Commander of the United States Cyber Command (sec. 1635)

The Senate amendment contained a provision (sec. 1627) that would amend section 807 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) by extending the acquisition authority established in that section for the Commander, U.S. Cyber Command, through fiscal year 2025 and raising the limit on obligation and expenditure pursuant to that authority to \$250.0 million.

The House bill contained no similar provision.

The House recedes with an amendment that would eliminate the increase of the limit on obligation and expenditure. The conferees direct the Commander, U.S. Cyber Command, to provide, not later than 180 days after the enactment of this Act, to the con-

gressional defense committees a report detailing the use of this authority to date.

The report shall include an assessment of any impacts of the expenditure limit set on the exercise of this authority on planned Cyber Command acquisition activities, as well as a juxtaposition of the types of cyber-peculiar products, services, and technologies procured using this authority and those cyber capabilities procured by the Services using their acquisition authorities. The report shall also include the definition of cyber-peculiar capabilities and cyber-peculiar services, a description of memoranda of agreements with the Services for acquisition of cyber capabilities, and details regarding the acquisition expertise at U.S. Cyber Command, including the number of senior acquisition executives and contracting officials authorized to be hired at the headquarters.

Policy of the United States on cyberspace, cybersecurity, cyber warfare, and cyber deterrence (sec. 1636)

The Senate amendment contained a provision (sec. 1621) that would establish the policy of the United States with respect to cyberspace, cybersecurity, and cyber warfare.

The Senate amendment contained another provision (sec. 6601) that would amend section 1621 to narrow the policy's prescriptions to only apply to cyber attacks and malicious cyber activities by a foreign power.

The House bill contained no similar provision.

The House recedes with an amendment that would integrate both provisions and would make minor changes to the statement of policy, striking the priorities of the United States in carrying out the policy and the policy on sovereignty in cyberspace. The amendment would also require an update on the Presidential Policy submitted to the Congress pursuant to section 1633 of the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115-91).

The conferees note that the policy submitted to the Congress was incomplete. The 6-page memorandum, written in response to the reporting requirement of the National Defense Authorization Act, introduced a 63-page report written in response to Executive Order 13800. The conferees were disappointed with the former's brevity and the latter's significant number of items to be resolved. The report in sum evinced little consideration of the difficult choices intrinsic to the policy-making process, instead recommending further working groups, task forces, and deliberation for the creation and implementation of a national strategy in cyberspace.

The conferees therefore seek an update on the progress of the core initiatives recommended by report: the establishment of a policy for cost imposition, a menu for consequences, policy-planning guidance, and the Cyber Deterrence Initiative.

In reporting the status of these initiatives, the conferees urge the President to include, to the extent possible and protected by classification, as necessary: (1) the administration's plans, including specific planned actions, regulations, and legislative action required for their development; (2) steps taken to date to prepare for the imposition of consequences against the Russian Federation, People's Republic of China, Democratic People's Republic of Korea, and the Islamic Republic of Iran in cyberspace (e.g., zero-day discovery, tool-development, and prepositioning of malware) and through other instruments of national power; and (3) criteria for use of particular consequences, including criteria as to when responsive cyber attacks are likely to be particularly escalatory, as to when, and specifically against which adversaries,

responsive cyber attacks are likely to be particularly effective as means of deterrence, and as to when the risk and consequences of escalation due to responsive action outweigh the risk and cost of non-action or action by financial, law enforcement, and diplomatic means alone.

The conferees also urge the President to include the administration's considerations and determinations surrounding: (1) whether all cyber attacks of significant consequence below the threshold of war demand response; (2) whether significant attacks on private sector companies outside of critical infrastructure demand response, including examples of attacks on companies that might beget response; (3) whether, in certain circumstances, the United States should privilege immediacy in response to achieving full technical attribution; (4) under what circumstances the United States should attempt to blunt, render useless, or defeat detected attacks through offensive cyber action in real-time, including examples of such circumstances; (5) how the United States can balance the establishment of stable norms in cyberspace and responsive offensive action, including through diplomatic means; (6) how the United States balances the sovereignty and equities of third-party countries whose infrastructure hosts or accommodates transit of adversary malware, including examples of feasible and infeasible actions; and (7) how the United States balances privacy, freedom of action, and values implicit to a market economy in imposing cybersecurity and disclosure requirements on the private sector, including an assessment of the adequacy of current law and regulations.

Budget display for cyber vulnerability evaluations and mitigation activities for major weapon systems of the Department of Defense (sec. 1637)

The House bill contained a provision (sec. 1632) that would require that the justification materials submitted to the Congress by the Secretary of Defense in support of the President's annual budget request for the Department of Defense include a consolidated display for cyber vulnerability evaluations and mitigation activities for each major weapon system beginning in fiscal year 2021.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify the classification procedures governing this requirement.

The conferees are concerned that the Department has yet to integrate cyber vulnerability evaluations and mitigation activities into the acquisition and budgeting timelines of its major programs. The conferees hope that this provision will encourage the notion that cyber vulnerability evaluations and mitigation activities are standard operation and maintenance. The conferees do not, however, intend this provision to in any way reveal the nature, content, or severity of discovered vulnerabilities and thus encourage the Department to protect through classification any material that could serve to aid adversaries' discovery of cyber vulnerabilities.

Determination of responsibility for the Department of Defense Information Networks (sec. 1638)

The House bill contained a provision (sec. 1633) that would mandate that the Secretary of Defense transfer all roles, missions, and responsibilities of the Commander, Joint Force Headquarters-Department of Defense Information Networks (JHFQ-DODIN) from the Defense Information Support Agency (DISA) to the Commander, United States Cyber Command, by September 30, 2019, subject to a certification that such transfer would not result in mission degradation.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would eliminate the mandate and would instead require the Secretary of Defense to submit to the congressional defense committees a report assessing the current JFHQ-DODIN command and control structure, the adequacy of DISA's institutional support to the JFHQ-DODIN mission, and JFHQ-DODIN's resource requirements and mission effectiveness. The report would also specify a determination and justification regarding the transfer of all or some of the roles, missions, and responsibilities of JFHQ-DODIN to the Commander, United States Cyber Command, along with a timeline and strategy for mitigating the risk of any such transfer.

Procedures and reporting requirement on cybersecurity breaches and loss of personally identifiable information and controlled unclassified information (sec. 1639)

The House bill contained a provision (sec. 1636) that would require the Secretary of Defense to promptly notify, and establish procedures for notification of, the congressional defense committees in the event of a significant loss of personally identifiable information of at least 250 civilian or uniformed members of the Armed Forces.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would insert an additional notification requirement for the theft, loss, or disclosure of controlled information of significant volume or national security concern.

The conferees are concerned by the recent theft of controlled information from a contractor for the Navy. Similarly troubling, the congressional defense committees were only alerted to this significant breach months after the initial loss. While the conferees understand that extenuating circumstances dictated that senior members of Navy leadership were similarly late to notification of the theft and that the investigation is on-going, this communication delay, both within the Department of Defense and across the branches of government, is unacceptable for a loss of this magnitude. The conferees thus expect the congressional defense committees to be notified, through the procedures established under this provision, of future losses of controlled information and will continue to exercise their oversight and legislative responsibilities to correct the failures evinced in this incident.

Program to establish cyber institutes at institutions of higher learning (sec. 1640)

The House bill contained a provision (sec. 1637) that would authorize the Secretary of Defense to establish a Cyber Institute at each of the senior military colleges.

The Senate amendment contained a similar provision (sec. 1635) that would authorize the Secretary of Defense to establish a Cyber Institute at any college or university that hosts a Reserve Officers' Training Corps program, with special consideration for the Senior Military Colleges.

The House recedes.

Matters pertaining to the SharkSeer cybersecurity program (sec. 1641)

The House bill contained a provision (sec. 1640A) that would require the Secretary of Defense to submit to the congressional defense committees a report that assesses the transition of the SharkSeer program from the National Security Agency (NSA) to the Defense Information Systems Agency (DISA).

The Senate amendment contained a provision (sec. 1629) that would require the Secretary of Defense to transfer the SharkSeer

cybersecurity program from the NSA to the DISA. In executing this transfer, the Secretary would be required to also transfer all funding and, as needed, personnel for the program. The provision would also: fence 10 percent of the funding available for obligation in fiscal year 2019 and subsequent years for NSA's Information Systems Security Program, PE 33140G, until the Principal Cyber Advisor certifies that the operations and maintenance funding for the SharkSeer program for fiscal year 2019 and the subsequent fiscal years of the current future years defense program are available or programmed; require the Secretary of Defense to adopt the SharkSeer "break and inspect" decryption capability as the Department's enterprise solution for endpoint decryption; and authorize an increase of \$20.0 million to the \$790.2 million requested for the DISA in Procurement, Defense-wide, to increase the bandwidth of the SharkSeer system.

The House recedes with an amendment that would: require the transfer of the operations and maintenance for the SharkSeer cybersecurity program from the NSA to the DISA, including any associated funding and, as necessary, personnel; require the Chief Information Officer to submit a report on such transfer, including a plan for continued partnership with the NSA in capability development; and strike the funding authorization.

Active defense against the Russian Federation, People's Republic of China, Democratic People's Republic of Korea, and Islamic Republic of Iran attacks in cyberspace (sec. 1642)

The Senate amendment contained a provision (sec. 1623) that would authorize the National Command Authority to direct the Commander, U.S. Cyber Command, to take appropriate and proportional action through cyberspace to disrupt, defeat, and deter systematic and ongoing attacks by the Russian Federation in cyberspace. The provision would direct the Secretary of Defense, using the results of the surveillance conducted through CYBERCOM, also authorized in the provision, to work with social media companies on a voluntary basis to assist those companies in identifying accounts created by personnel and organizations engaged at the behest of or in support of the Russian Federation and that violate the companies' terms of service.

The Senate amendment contained another provision (sec. 6601) that would amend section 1623 to narrow the authorization to only apply to foreign cyberspace.

The House bill contained no similar provision.

The House recedes with an amendment that would synthesize the two provisions, add authorizations for action against the People's Republic of China, the Democratic People's Republic of Korea, and the Islamic Republic of Iran, strike the explicit authorization of surveillance, and add a rule of construction governing the authorization.

The conferees have been disappointed with the past responses of the executive branch to adversary cyberattacks and urge the President to respond to the continuous aggression that we see, for example, in Russia's information operations against the United States and European allies in an attempt to undermine democracy. The administration's passivity in combatting this campaign, as documented repeatedly in hearings before the congressional defense committees in the past 2 years, in the judgment of numerous executive branch officials, will encourage rather than dissuade additional aggression. The Congress has worked diligently to ensure that the Department possesses the necessary capabilities and authorities to combat, in particular, these Russian information operations, and this authorization represents fur-

ther progress toward that objective. The conferees strongly encourage the President to defend the American people and institutions of government from foreign intervention.

The conferees are also cognizant of the significant cyber threats posed by the People's Republic of China, the Democratic Republic of Korea, and the Islamic Republic of Iran and urge the President to take action to disrupt, defeat, and deter the systematic cyber attacks.

Designation of official for matters relating to integrating cybersecurity and industrial control systems within the Department of Defense (sec. 1643)

The Senate amendment contained a provision (sec. 1625) that would require the Secretary of Defense to designate one official as responsible for the integration of cybersecurity and industrial control systems within the Department of Defense, to include the development of Department-wide standards for integration of industrial control systems and the potential applicability of frameworks set forth by the National Institute of Standards and Technology and similar organizations.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify that the official would only be responsible for industrial control systems owned by the Department of Defense or operated on behalf of the Department of Defense.

Assistance for small manufacturers in the defense industrial supply chain and universities on matters relating to cybersecurity (sec. 1644)

The Senate amendment contained a provision (sec. 1626) that would require the Secretary of Defense, acting through the Chief Information Officer and Under Secretary of Defense for Research and Engineering, to improve awareness of cybersecurity threats among small- and medium-sized manufacturers in the defense industrial supply chain, including via: the development of cybersecurity self-assessments to enhance firms' understanding of network vulnerabilities and the Department's cybersecurity standards; the transfer of appropriate cybersecurity technology and techniques developed in the Department of Defense to these businesses; and the establishment of a cyber counseling certification program.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense, acting through the Chief Information Officer and Under Secretary of Defense for Research and Engineering, to improve awareness of cybersecurity threats among universities, in addition to small- and medium-sized manufacturers, in the defense industrial supply chain and to establish a broader cybersecurity activity for the defense industrial base as needed.

Email and Internet website security and authentication (sec. 1645)

The Senate amendment contained a provision (sec. 1628) that would require the Secretary of Defense to implement the requirements of the Binding Operational Directive 18-01, issued by the Secretary of the Department of Homeland Security on October 16, 2017, unless the Secretary certifies that existing or planned security measures exceed the requirements of the directive.

The House bill contained no similar provision.

The House recedes with an amendment that would eliminate the specification of actions to be undertaken as part of the implementation of Binding Operational Directive

18-01 and would add the governmental affairs committees of the Senate and House of Representatives as recipients of the certification.

The conferees note that Binding Operational Directive 18-01 required the following actions, all accepted practices across the private and public sectors: (1) The adoption of the START Transport Layer Security protocol for encryption; (2) Enforcement of Sender Policy Framework, Domain Keys Identified Mail, and Domain-based Message Authentication, Reporting & Conformance for email authentication; and (3) Implementation of Hypertext Transfer Protocol Strict Transport Security.

Security product integration framework (sec. 1646)

The Senate amendment contained a provision (sec. 1631) that would require the Assistant Secretary of Defense for Homeland Defense and Global Security, the Chief Information Officer, and the Commander, U.S. Cyber Command, to select a network or network segment and associated computer network defense service provider to conduct a demonstration and evaluation of one or more existing security product integration frameworks, including through modification of network security systems to enable such systems to ingest, publish, subscribe, tip and cue, and request information or services from each other.

The House bill contained no similar provision.

The House recedes with an amendment that would strike the findings.

The conferees note that: (1) The Department of Defense requires a standard, enterprise-wide, security product integration framework that provides a machine-to-machine data exchange architecture and protocol to achieve interoperability and automated orchestration and coordinated action between and among cybersecurity services, devices, appliances, agents, applications, tools, and command and control centers; (2) Information security products and services need to be engineered to consume and act on information, direction, and cues from other security elements on a network through this framework; (3) A security product integration framework should ideally be non-proprietary or designed as a modular open system; and (4) A security integration framework is essential to achieve the speed, scale, and agility of response required for cyber warfare and to reduce the cost and time needed to integrate new products and services into the existing security environment.

Information security continuous monitoring and cybersecurity scorecard (sec. 1647)

The Senate amendment contained a provision (sec. 1633) that would prohibit the obligation or expenditure of funds for the Cybersecurity Scorecard after October 1, 2019, unless the Department of Defense is implementing by that date a funded program pursuant to section 1653 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) to fulfill the requirements established by the Chief Information Officer and the Commander, U.S. Cyber Command, in the Information Security Continuous Monitoring Strategy, Comply-to-Connect Strategy, Enterprise Patch Management Service Strategy and Concept of Operations, and User Activity Monitoring Strategy. The provision would also require the Director of Cost and Program Evaluation to submit to the congressional defense committees a report comparing the Department's requirements for information security continuous monitoring and the comply-to-connect capabilities deployed by the Department of Homeland Security and the General Services Administration.

The House bill contained no similar provision.

The House recedes with an amendment that would add a requirement for a review and validation of the Department of Defense's current information security continuous monitoring requirements and policies to the report.

Tier 1 exercise of support to civil authorities for a cyber incident (sec. 1648)

The Senate amendment contained a provision (sec. 6602) that would require the Commander, U.S. Cyber Command, the Commander, U.S. Northern Command, and other commanders or components of the Department of Defense as the Secretary of Defense considers appropriate to conduct a tier 1 exercise of support to civil authorities for a cyber incident.

The House bill contained no similar provision.

The House recedes.

Pilot program on modeling and simulation in support of military homeland defense operations in connection with cyber attacks on critical infrastructure (sec. 1649)

The Senate amendment contained a provision (sec. 1630) that would require the Assistant Secretary of Defense for Homeland Defense and Global Security to carry out a pilot program on modeling and simulation in support of military homeland defense operations through U.S. Northern Command and U.S. Cyber Command. The pilot program would be based on the results and lessons learned from ongoing research exercises involving local government, industry, and military responses to combined natural disasters and cyber attacks on critical infrastructure. The provision would authorize \$10.0 million for this pilot.

The House bill contained no similar provision.

The House recedes with an amendment that would generalize the program through adjustment to its scope, would eliminate its required execution through the combatant commands, and would eliminate the authorization.

Pilot program authority to enhance cybersecurity and resiliency of critical infrastructure (sec. 1650)

The House bill contained a provision (sec. 1634) that would authorize the Secretary of Defense, in coordination with the Secretary of Homeland Security, to provide technical cyber personnel to the Department of Homeland Security (DHS) to enhance cooperation, collaboration, and unity in government efforts in support of the protection of critical infrastructure.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees note the Department of Defense's (DOD) ongoing efforts to coordinate with the DHS and expect to see such collaboration continue in the future. In particular, the conferees fully support cooperative strategy development and policy-making to ensure that the DOD and the DHS maintain complementary roles and responsibilities and pursue mutually beneficial policies in the realm of cybersecurity. Therefore, the conferees urge the DOD to place the personnel as part of this pilot program in: DHS's Office of Strategy, Policy, and Plans; the office of the Director, Strategy, Policy, and Plans in the National Protection and Programs Directorate (NPPD); and the NPPD's National Cybersecurity and Communications Integration Center.

Pilot program on regional cybersecurity training center for the Army National Guard (sec. 1651)

The House bill contained a provision (sec. 1635) that would authorize the Secretary of

the Army to carry out a pilot program to establish a National Guard cyber security training center for members of the Army National Guard for interagency and cross-society cyber education.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment that establishes a sunset for the authorization.

Cyberspace Solarium Commission (sec. 1652)

The Senate amendment contained a provision (sec. 1634) that would establish the Cyberspace Solarium Commission, tasked with developing a strategic approach to protecting and advancing the United States' advantages in cyberspace. The Commission would weigh the benefits and costs of various strategic frameworks (e.g., deterrence, norms-based regimes, and cyber persistence), evaluate the sufficiency of the current allocation of resources in cyberspace, and consider potential realignments in governmental structure and authorities.

The House bill contained no similar provision.

The House recedes with an amendment that would adjust the scope of the Commission, tasking it with developing consensus on a strategic approach to defending the Nation in cyberspace against cyber attacks of significant consequences and making a series of technical changes regarding the structure, authorities, and limitations of the Commission.

Study and report on reserve component cyber civil support teams (sec. 1653)

The House bill contained a provision (sec. 1638) that would require the Secretary of Defense and the Secretary of Homeland Security to conduct a study on the feasibility and advisability of establishing cyber civil support teams comprising Reserve Component members, primarily operating under the command and control of the Governor of each State, to prepare for and respond to cyber incidents, cyber emergencies, and cyber attacks.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require additional considerations in the study.

The conferees note that establishment of cyber civil support teams may have significant impacts on, or conflict with, current roles, responsibilities, policies, and resources of agencies and entities in cyberspace and seek greater clarity on these impacts.

Identification of countries of concern regarding cybersecurity (sec. 1654)

The Senate amendment contained a provision (sec. 1638) that would require the Secretary of Defense to create a prioritized list of countries of concern related to cybersecurity based on their governments' hostility, intelligence activity, criminal activity, and willingness and ability to disrupt the U.S. government's supply chain.

The House bill contained no similar provision.

The House recedes with an amendment that would adjust the criteria for inclusion on the list.

Mitigation of risks to national security posed by providers of information technology products and services who have obligations to foreign governments (sec. 1655)

The Senate amendment contained a provision (sec. 1637) that would establish definitions for subsequent provisions relating to the establishment of a program to mitigate the risks derivative of foreign governments' code review of information technology products used by the Department of Defense.

The Senate amendment contained another provision (sec. 1639) that would prohibit the

Department of Defense's use of any information technology, cybersecurity, industrial control system, weapons system, or computer antivirus system unless the provider discloses to the Secretary of Defense: (1) whether it has allowed a foreign government to review or access a product custom-developed for the Department of Defense or is under any obligation to provide a foreign person or government with access or review of such a product; (2) whether it has allowed a government listed in the report required by section 1638 of the Senate amendment to review or access the source code of a product, system, or service that the Department is using or intends to use or is under any obligation to do so; and (3) whether it holds or has sought a license pursuant to the Export Administration Regulations under subchapter C of chapter VII of title 15, Code of Federal Regulations, the International Traffic in Arms Regulations under subchapter M of chapter I of title 22, Code of Federal Regulations, or successor regulations, for information technology products, components, software, or services.

The Senate amendment contained another provision (sec. 1640) that would require the Secretary of Defense to establish a registry containing the information on foreign governments required by section 1638 of the Senate amendment and on providers of information technology products and services required by section 1639 of the Senate amendment, to be made available to any agency conducting a procurement pursuant to the Federal Acquisition Regulations and Defense Federal Acquisition Regulations.

The House bill contained no similar provision.

The House recedes with an amendment that would: integrate the three provisions (sec. 1637, 1639, and 1640), make a series of technical changes surrounding the use of "non-commercial" vice "custom-developed"; limit the disclosure requirements to code-sharing or code-sharing agreements that occurred within 5 years prior to enactment; exempt products, services, and systems procured or acquired prior to enactment from the non-use requirement; exempt open-source software; and require the Secretary of Defense to issue regulations governing the implementation of this non-use.

While the conferees believe that this provision is a necessary step toward minimizing the supply chain risk posed by companies like Kaspersky, the conferees urge the Secretary to take actions to minimize the potential injury of the non-use requirement, to both the Department and industry.

The conferees recognize that, absent the required regulations, the non-use requirement is all-encompassing and thus encourage the Secretary to exempt from this requirement any product, system, or service if: (1) Its source code has been exported pursuant to a license or license exception granted under the Export Administration Regulations (15 C.F.R. §§ 730-774); (2) It is not itself, and is not a component of, a National Security System; (3) It is not a cybersecurity tool, system, or application or does not have a built-in cybersecurity tool, system, or application; or (4) It is subjected only to a de minimis disclosure under restricted access conditions, as defined by the Secretary. The conferees also urge the Secretary to exempt any further products, systems, and services and implement this provision so as to minimize supply chain risk and advance national security.

The conferees also note that the information required to be disclosed to the Department in the provision is: (1) generally considered commercial information; (2) obtained from a person; and (3) most likely confidential. Therefore, the conferees expect that ex-

emption 4 of section 552(b) of title 5 will likely apply to information obtained under this provision.

Report on Cybersecurity Apprentice Program (sec. 1656)

The House bill contained a provision (sec. 1640B) that would require the Secretary of Defense to submit to the congressional defense committees a report on the feasibility of establishing a Cybersecurity Apprentice Program to support on-the-job training for certain cybersecurity positions and to facilitate the acquisition of cybersecurity certifications.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees note the Department's experimental use of recruitment, retention, and training techniques particular to cyber personnel, both civilians and service-members. The conferees, however, are also interested in the possibility of applying traditional on-the-job training, such as those that already exist in the Services' "apprentice and journeymen" programs, throughout the Department for cyber jobs. The conferees see potential for apprentice programs for enlisted and civilian members of the Armed Forces as a means to improve operational capability.

Report on enhancement of software security for critical systems (sec. 1657)

The Senate amendment contained a provision (sec. 1632) that would require the Assistant Secretary of Defense for Homeland Defense and Global Security and the Chief Information Officer to conduct a technical and cost-benefit study of the merits of applying in the vulnerability assessments and remediation of critical systems fuzzing technology, formal programming, and the binary analysis and symbolic execution software security tools developed under the Cyber Grand Challenge program of the Defense Advanced Research Projects Agency.

The House bill contained no similar provision.

The House recedes with an amendment that would expand the scope of the study to include other advanced or immature technologies.

Subtitle D—Nuclear Forces

Under Secretary of Defense for Research and Engineering and the Nuclear Weapons Council (sec. 1661)

The House bill contained a provision (sec. 1641) that would add the Under Secretary of Defense for Research and Engineering as a member of the Nuclear Weapons Council and make a technical correction elsewhere in section 179 of title 10, United States Code.

The Senate amendment contained no similar provision.

The Senate recedes.

Long-range standoff weapon requirements (sec. 1662)

The House bill contained a provision (sec. 1642) that would allow the Secretary of the Air Force to retire the conventionally-armed AGM-86C and require the Secretary to ensure that a conventionally-armed long-range standoff weapon (LRSO) achieves initial operating capability (IOC) not later than 4 years after the nuclear-armed LRSO achieves IOC.

The Senate amendment contained a provision (sec. 1642) that would allow the Secretary to retire the conventionally-armed AGM-86C and require the Secretary to begin procurement and fielding of a conventionally-armed LRSO not more than 5 years after the nuclear LRSO completes initial operational test and evaluation.

The Senate recedes with an amendment that would change the deadline from 4 years

to 5 years after the nuclear-armed LRSO achieves IOC.

Acceleration of ground-based strategic deterrent program and long-range standoff weapon program (sec. 1663)

The House bill contained a provision (sec. 1643) that would require the Under Secretary of Defense for Acquisition and Sustainment, in consultation with the Secretary of the Air Force, to develop and implement plans to accelerate the development, procurement, and fielding of the Ground Based Strategic Deterrent (GBSD) program and the Long-Range Standoff cruise missile program. For the GBSD, the provision would require the plans, when executed, to recapitalize the full intercontinental ballistic missile system without phasing or splitting the program. For both programs, the provision would require the plans to assess the benefits, risks, feasibility, costs, and cost savings of various options for accelerating the programs.

The Senate amendment contained no similar provision.

The Senate recedes.

Procurement authority for certain parts of intercontinental ballistic missile fuzes (sec. 1664)

The House bill contained a provision (sec. 1644) that would give the Department of Defense the authority to buy certain intercontinental ballistic missile fuze parts.

The Senate amendment contained a similar provision (sec. 1644).

The House recedes.

Prohibition on reduction of the intercontinental ballistic missiles of the United States (sec. 1665)

The House bill contained a provision (sec. 1645) that would prohibit the obligation or expenditure of fiscal year 2019 funds to reduce the responsiveness, alert level, or quantity of deployed U.S. intercontinental ballistic missiles to fewer than 400. The provision would provide an exception to this prohibition for activities related to maintenance and sustainment and activities to ensure safety, security, or reliability.

The Senate amendment contained no similar provision.

The Senate recedes.

Extension of prohibition on availability of funds for mobile variant of ground-based strategic deterrent missile (sec. 1666)

The House bill contained a provision (sec. 1646) that would extend through fiscal year 2020 the prohibition on the obligation or expenditure of funds to retain the option for, or to develop, a mobile variant of the Ground-Based Strategic Deterrent missile.

The Senate amendment contained no similar provision.

The Senate recedes.

Exchange program for nuclear weapons program employees (sec. 1667)

The Senate amendment contained a provision (sec. 1643) that would require the Chairman of the Nuclear Weapons Council and the Administrator of the National Nuclear Security Administration (NNSA) to jointly establish a program to exchange civilian and military personnel on a temporary basis between the offices of the Department of Defense working on nuclear weapons policy, production, and force structure issues and the Office of the Deputy Administrator for Defense Programs at the NNSA.

The House bill contained no similar provision.

The House recedes.

The conferees note that the provision requires the Chairman and the Administrator to provide interim guidance to the congressional defense committees on the implementation of this program not later than 90 days from the date of enactment of this Act, and

to implement such guidance not later than 180 days from the date of enactment. The conferees note that a similar initiative could also benefit nuclear nonproliferation efforts across the NNSA and the Department of Defense. Therefore, the conferees direct the Chairman and the Administrator to provide not later than 90 days from the date of enactment a plan to establish a similar program focused on nonproliferation programs in the future.

Plan to train officers in nuclear command, control, and communications (sec. 1668)

The Senate amendment contained a provision (sec. 1645) that would require the Secretary of Defense, in consultation with the Secretary of the Air Force, the Secretary of the Navy, and the Chairman of the Joint Chiefs of Staff, to develop a plan to train, educate, manage, and track field-grade military officers in nuclear command, control, and communications. The provision would require the Secretary to submit the plan to the congressional defense committees no later than 180 days from the date of enactment of this Act.

The House bill contained no similar provision.

The House recedes with an amendment that would require to the Secretary to develop the plan in consultation with the Commander, U.S. Strategic Command, in addition to the other officials described above.

Independent study on options to increase Presidential decision-time regarding nuclear weapons employment (sec. 1669)

The House bill contained a provision (sec. 1647) that would require the Secretary of Defense to enter into a contract with a federally funded research and development center to conduct a study on the potential benefits and risks of reducing the role of the launch-under-attack option in U.S. nuclear weapons planning.

Subtitle A—Committee on Foreign Investment in the United States

Short title: Foreign Investment Risk Review Modernization Act of 2018 (sec. 1701)

The Senate amendment contained a provision (sec. 1701) that would establish the short title of this section as “The Foreign Investment Risk Review Modernization Act of 2018.”

The House bill contained no similar provision.

The House recedes with an amendment that would establish “The Foreign Investment Risk Review Modernization Act of 2018,” the “Export Controls Act of 2018,” and the “Anti-Boycott Act of 2018” in sections 1701–1793 of this Act.

“The Foreign Investment Risk Review Modernization Act of 2018” would make updates to terms in the current Committee on Foreign Investment in the United States (CFIUS) statute and add several new terms. Notably, it would expand the purview of CFIUS by explicitly adding four new types of “covered transactions,” including: (1) Any non-passive investment by a foreign person in any U.S. business involved in critical infrastructure, the production of critical technologies, or that maintains sensitive personal data that, if exploited, could threaten national security; (2) Any change in a foreign investor’s rights regarding a U.S. business; (3) Any other transaction, transfer, agreement or arrangement designed to circumvent or evade CFIUS; and (4) The purchase, lease, or concession by or to a foreign person of certain real estate in close proximity to military or other sensitive national security facilities.

It would also require CFIUS to provide comments on or accept complete written notices within 10 business days of submission in cases where parties stipulate that a transaction is a covered transaction and allow CFIUS to require a written notice and include copies of all related agreements. Further, it would create the concept of declarations and allow the parties to a transaction to stipulate that it is a covered transaction or foreign government-controlled transaction.

This Act would also confirm the circumstances under which CFIUS may unilaterally initiate a review, as well as how a transaction attains “safe harbor” status; give CFIUS extra time to review each transaction by extending the overall review period from 30 days to 45 days with a 15-day period extension for extraordinary circumstances; require CFIUS to establish a mechanism to identify any covered transactions for which a notice or declaration has not been filed and on which information is reasonably available; provide for greater flexibility regarding the required signatures on certifications regarding transactions; require the Director of National Intelligence, for each National Security Threat Assessment (NSTA), to identify any recognized intelligence collection gaps, update the NSTA upon request by a lead agency for any past cleared transaction involving a mitigation agreement, and submit the NSTA to the Senate Select Committee on Intelligence and House Permanent Select Committee on Intelligence after conclusion of action by CFIUS; enhance collaboration and coordination with U.S. allies and partners by allowing the disclosure of information to any domestic or foreign governmental entity; clarify the 15 day requirement for the President to announce a decision to not later than 15 days after the earlier of the date on which the investigation is completed, or the date on which the Committee otherwise refers the transaction to the President; provide that civil action challenges against CFIUS actions and findings may only be brought in the United States Court of Appeals for the District of Columbia Circuit; instruct CFIUS regulations to provide that any review of a covered transaction should consider the national security factors enumerated in statute, and as appropriate, require parties to provide information necessary to consider such factors; and require each CFIUS member to designate an Assistant Secretary, appointed by the President by and with the advice and consent of the Senate, or the equivalent thereof, to carry out Committee duties. To address national security risks, it would grant CFIUS the authority to suspend a transaction during a review or investigation; use mitigation agreements and conditions to address situations where the parties have chosen to abandon a transaction without a presidential order; and impose interim mitigation agreements and conditions for national security risks posed by completed transactions while they are undergoing CFIUS review. A modification of the annual report and other reporting requirements is also included along with a requirement for implementation plans within 180 days of enactment of this act with a determination by the President as to whether additional resources are required for CFIUS under the expansion of CFIUS’ responsibilities in this Act. Finally, a CFIUS Fund would be established and \$20.0 million would be authorized for fiscal years 2019 through 2023.

The “Export Controls Act of 2019” would repeal the Export Administration Act of 1979 (50 U.S.C. 4601 et seq.) (as continued in effect pursuant to the International Emergency Economic Powers Act (IEEPA, 50 U.S.C. 1701 et seq.)) other than sections 11A, 11B, and 11C of such Export Administration Act of 1979 (EAA), and would provide transition provisions to preserve the export control rules and regulations until changed or revoked under the new authority established by this title. It would also require the President to establish controls over the export of certain “dual-use” and military items in order to advance the foreign policy and national security of the United States, including a new category of “emerging and foundational technologies”. The administration of those

controls would be delegated to the Secretary of Commerce, Secretary of Defense, Secretary of State, the Director of National Intelligence, and other appropriate Federal agencies. Subject to inter-agency review, the Department of Commerce would be delegated with authority to issue licenses and other authorization for exports. Consistent with existing law, this export control reform would provide the authority to impose criminal and civil penalties for export control violations. It also would provide robust authority to enforce such controls, including the ability to stop unapproved transfers. Congressional oversight would also be strengthened over these controls. The repeal of the EAA would include transition provisions to ensure that all rules, regulations, orders, determinations, licenses, or other administrative measures established under the EAA, or otherwise enforced through Presidential emergency declaration under IEEPA, would remain in effect unless changed or revoked under the new authority established by this title.

The “Anti-Boycott Act of 2018” would incorporate longstanding current law anti-boycott provisions from the expired Export Administration Act of 1979 (50 U.S.C. 4601 et seq.) continued in effect under IEEPA. It would discourage, and in some circumstances, prohibit U.S. companies from furthering or supporting the boycott of Israel sponsored by the Arab League, or certain other countries, including complying with certain requests for information designed to verify compliance with the boycott.

DIVISION B—MILITARY CONSTRUCTION AUTHORIZATIONS

Summary and explanation of funding tables

Division B of this Act authorizes funding for military construction projects of the Department of Defense. It includes funding authorizations for the construction and operation of military family housing as well as military construction for the reserve components, the defense agencies, and the North Atlantic Treaty Organization Security Investment Program. It also provides authorization for the base closure accounts that fund military construction, environmental cleanup, and other activities required to implement the decisions in base closure rounds. The tables contained in this Act provide the project-level authorizations for the military construction funding authorized in Division B of this Act and summarize that funding by account.

The conferees continue to believe in the value and appropriateness of providing a full authorization but incremental authorization of appropriations for certain military construction projects. The conferees believe incremental funding of large and complex military construction projects enables the Department to execute additional infrastructure projects in a fiscal year, enables continuous congressional oversight, and provides

opportunities to adjust the authorization of appropriations level for projects should issues arise or requirements change over the course of construction. In instances where the conference agreement provides full authorization but incremental authorization of appropriations for certain military construction projects, the committee expects the Department to award these projects in the year of authorization and not defer award until the full appropriation amount is received.

TITLE XXII—NAVY MILITARY CONSTRUCTION
Summary

The budget request included \$2,543,189,000 for Navy and Marine Corps military construction and \$419,117,000 for family housing for fiscal year 2019.

The conference agreement includes authorization of appropriations of \$2,412,859,000 for military construction and \$419,117,000 for family housing for the Navy and Marine Corps in fiscal year 2019.

The agreement includes authorization of 13 military construction projects that were not included in the budget request but submitted to the congressional defense committees as part of the Navy and Marine Corps’ unfunded requirements list. These projects include: \$75.6 million for X-Ray Wharf Improvements (Berth 2) at Naval Base Guam, Guam; \$51.3 million for a 2nd Radio BN Complex, Phase 2 at Camp Lejeune, North Carolina; \$31.9 million for a Welding and Body Repair Shop Facility at Marine Corps Base Albany, Georgia; \$22.3 million for Expeditionary Combat Skills Student Berthing at Naval Construction Battalion Center, Mississippi; \$21.8 million for Missile Magazines at Naval Weapons Station Seal Beach, California; \$19.7 million

for a Consolidated Fire Station at Naval Station Guantanamo Bay, Cuba; \$19.5 million for LCS Mission Module Readiness Center at Naval Base San Diego, California; \$16.6 million for a Supply Warehouse SOI-West at Camp Pendleton, California; \$14.9 million for a Communications Line Ops to Admin at Naval Air Station Lemoore, California; \$14.8 million for Missile Motor Magazines and U&SI at Camp Navajo, Arizona; \$13.1 million for an Ammunition Supply Point Upgrade, Phase 2 at Marine Corps Base Quantico, Virginia; \$10.0 million for an Air Traffic Control Tower (North Field) at Naval Air Station Whiting Field, Florida; and \$6.3 million for a Cryogenics Facility at Marine Corps Air Station Beaufort, South Carolina.

The agreement provides for full authorization and incremental authorization of appropriations in an amount equal to the Department’s ability to execute in the year of the authorization of appropriations for the following projects: Pier 8 Replacement at Naval Base San Diego, California; Causeway Boat Channel & Turning Basing at Naval Weapons Station Seal Beach, California; Master Time Clock & Operations Facility at the Naval Observatory, District of Columbia; Machine Gun Range at Joint Region Marianas, Guam; Dry Dock #1 Superflood Basin at Portsmouth Naval Yard, Maine; Aircraft Maintenance Hangar at Marine Corps Air Station Cherry Point, North Carolina; Flightline Utility Modernization at Marine Corps Air Station Cherry Point, North Carolina; and the D5 Missile Motor Receipt/Storage Facility at Hill Air Force Base, Utah.

The agreement also includes authorization of \$35.0 million for the Secretary of the Navy to carry out projects, with prior notification to the congressional defense committees, to enhance force protection and safety. The conferees recommend the Secretary use this authority to alleviate deficiencies at Navy and Marine Corps installations in access control points, air traffic control towers, fire stations, and anti-terrorism and force protection.

Finally, the agreement does not include authorization of \$21.98 million included in the budget request for a TBS Fire Station at Marine Corps Base Quantico, Virginia. The conferees note that this project was authorized in the National Defense Authorization Act for Fiscal Year 2018 (Public Law 115–91) and a subsequent appropriation was included in the Consolidated Appropriations Act, 2018 (Public Law 115–141). The conferees do not believe an additional authorization of appropriation for fiscal year 2019 is required for this project.

The conference agreement includes authorization of appropriations of \$1,608,773,000 for military construction and \$395,720,000 for family housing for the Air Force in fiscal year 2019.

The agreement includes authorization of 9 military construction projects that were not included in the budget request, but submitted to the congressional defense committees as part of the Air Force's unfunded requirements list. These projects include: \$26.0 million for a Composite Aircraft Antenna Calibration Facility at Hill Air Force Base, Utah; \$15.0 million for an AGE Facility at Davis-Monthan Air Force Base, Arizona; \$14.2 million for Anti-Terrorism Perimeter Security/Entry Control Point at Rome Lab, New York; \$14.0 million for ADAL JPRA C2 Mission Support Facility at Fairchild Air Force Base, Washington; \$13.0 million for a Child Development Center at Joint Base Andrews, Maryland; \$12.25 million for an Entrance Road and Gate Complex at Barksdale Air Force Base, Louisiana; \$9.0 million for a Main Gate at Patrick Air Force Base, Florida; \$8.0 million for a MWD Facility at Joint Base Andrews, Maryland; and \$7.0 million for Wyoming Gate Upgrade for Anti-Terrorism Compliance at Kirtland Air Force Base, New Mexico.

The agreement provides for full authorization and incremental authorization of appropriations in an amount equal to the Department's ability to execute in the year of the authorization of appropriations for MIT-Lincoln Laboratory (West Lab CSL/MIF) at Hanscom Air Force Base, Massachusetts. In addition, the committee provides full authorization for phase 1 and phase 2 of the ADAL Intelligence Production Complex (NASIC) as a single \$182.0 million project at Wright Patterson Air Force Base. The agreement provides incremental authorization of appropriations for the combined project in an amount equal to the Department's ability to execute in the year of the authorization of appropriations.

The agreement also includes authorization of \$35.0 million for the Secretary of the Air Force to carry out projects, with prior notification to the congressional defense committees, to enhance force protection and safety. The conferees recommend the Secretary use this authority to alleviate deficiencies in access control points, air traffic control towers, fire stations, and anti-terrorism and force protection.

The agreement transfers the following two military construction projects from the base budget request to Title XXIX, Overseas Contingency Operations Military Construction: Flightline Support Facilities at Al Udeid, Qatar and Personnel Deployment Processing Facility at Al Udeid, Qatar.

Finally, the agreement includes an authorization of appropriation of \$129.116 million for the Presidential Aircraft Recap Complex, Increment 2, a reduction of \$24.884 million from the budget request for fiscal year 2019. TITLE XXIV—DEFENSE AGENCIES MILITARY CONSTRUCTION

Summary

The budget request included \$2,693,324,000 for Air Force military construction and \$58,373,000 for family housing for fiscal year 2019.

The conference agreement includes authorization of appropriations of \$2,506,728,000 for military construction and \$58,373,000 for family housing for the Air Force in fiscal year 2019.

The agreement includes authorization of 6 Energy Resiliency Conservation Investment Program (ERCIP) projects that were not included in the budget request but submitted to the congressional defense committees as part of the Department's unfunded requirements list. These projects include: \$20.0 million to Install Microgrid at Anniston Army Depot, Alabama; \$6.53 million for a SNI Energy Storage System at Naval Base Ventura, California; \$5.5 million to Install Microgrid at Camp Mabry, Texas; \$5.34 million for Distribution Switchgear at Joint Reserve Base Naval Air Station New Orleans, Louisiana; \$3.5 million for PV/Water Conservation & Energy Resilience at Salina Training Center, Kansas; and \$2.52 million for a Super Flight Line Electrical Distribution System (FLEDS) at Naval Air Station Oceana, Virginia.

The agreement provides an authorization of appropriation of \$181.0 million for Next NGA West (N2W) Complex Phase 1 Inc. 2, a

reduction of \$32.6 million from the budget request for fiscal year 2019. In addition, the conferees note that the Office of Management and Budget directed the National Geospatial-Intelligence Agency to hold on awarding this project until receiving full appropriations for both increments, resulting in a self-created cost increase of \$7.6 million due to the delay in award. The conferees direct the Department to take all necessary and appropriate actions to award the construction contract to avoid the self-create cost increase.

Finally, the agreement does not include an authorization or authorization of appropriations for the Ambulatory Care Center Addition/Alteration at RAF Croughton, United Kingdom. The conferees note the facility is early-to-need based on an ongoing analysis of alternatives related to a separate military construction requirement. In addition, the agreement does not include an authorization of appropriations for Contingency Construction at Unspecified Worldwide Locations, noting that unobligated balances remain available in the military construction account and other authorities exist to construct projects that are in keeping with a national security interest.

In addition, the provision would require the Secretary of Energy to submit to the congressional defense committees not later than 180 days from the date of enactment of this Act a report on the plan for producing plutonium pits 31-80 at Los Alamos National Laboratory, in case the MOX facility is not operational and producing pits by 2030. The provision would also require the Secretary of Energy to submit an updated Statement of Mission Need by September 2020. Finally, the provision would require the Chairman of the Nuclear Weapons Council to submit annually

to the Secretary of Defense, the Administrator for Nuclear Security, and the congressional defense committees a written certification that the plutonium pit production plan of the NNSA is on track to meet the military requirement of 80 pits per year by 2030, the statutory requirements for pit production timelines under section 4219 of the Atomic Energy Defense Act (50 U.S.C. 2538a), and milestones for implementation of the NNSA's plutonium strategy.

The Senate amendment contained no similar provision.

The Senate recedes with amendments that would require the Secretary of Defense to consult with the Administrator for Nuclear Security in entering into the contract with the FFRDC and would modify the elements of the assessment. The amendments would also require that the FFRDC have full and direct access to all information related to pit production from the NNSA and from its management and operating contractors. The amendments would further modify the report regarding plutonium pit production at Los Alamos to require the Administrator for Nuclear Security to write the report and to require additional details on the plan to produce 30 pits per year by 2026. Finally, the amendments would strike the requirement to submit an updated Statement of Mission Need and add a requirement that the NNSA Director for Cost Estimation and Program Evaluation submit to the congressional defense committees an assessment of the NNSA report on pit production at Los Alamos, including an assessment of the impact of increased ARIES activity in support of the dilute and dispose program on the plutonium pit production mission.

The conferees note that the Senate report accompanying S. 2987 (S. Rept. 115-262) of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 required a similar FFRDC assessment. The conferees intend for the requirement in this provision to replace the requirement in the Senate report rather than create a new requirement for another assessment.

Finally, the conferees direct the Comptroller General of the United States to review the report required by subsection (c)(2) of this provision, specifically the assessment of the effect of increased ARIES activity on the plutonium pit production mission. The Comptroller General shall provide a briefing on this assessment to the House and Senate Armed Services Committees, with the scope of the assessment and the date of the briefing to be determined in consultation with the committees.

Pilot program on conduct by Department of Energy of background reviews for access by certain individuals to national security laboratories (sec. 3121)

The Senate amendment contained a provision (sec. 3115) that would establish a pilot program for 2 years at the Department of Energy to independently conduct background reviews prior to admitting to national security laboratories citizens of nations on the current sensitive countries list. The provision would require the Federal Bureau of Investigation and the Director of National Intelligence to continue to conduct background reviews under section 4502(a) of the Atomic Energy Defense Act (50 U.S.C. 2652(a)) for the duration of the pilot program.

The House bill contained no similar provision.

The provision contains an exception that would authorize, from within amounts made available for fiscal year 2019 for defense nuclear nonproliferation, \$10.0 million to be made available to the Deputy Administrator for Naval Reactors for LEU activities.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees note that both Departments' expertise in naval fuel requirements and design resides within the Naval Nuclear Propulsion Program. The conferees believe that funds authorized and appropriated for the purposes of research and design into the use of LEU in naval reactors are best spent in support of Naval Reactors' activities at the Naval Nuclear Laboratory.

Limitation on availability of funds relating to submission of annual reports on unfunded priorities (sec. 3124)

The House bill contained a provision (sec. 3118) that would prohibit the obligation or expenditure of funds authorized to be appropriated from the National Nuclear Security Administration's Federal Salaries and Expenses account for travel and transportation of persons until the Administrator for Nuclear Security submits a report that contains at least one unfunded priority under section 4716 of the Atomic Energy Defense Act (50 U.S.C. 2756). This provision would apply to each year from fiscal years 2020 through 2024.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would modify the prohibition such that not more than 65 percent of funds may be obligated or expended from this account until the report described above is submitted.

Subtitle C—Plans and Reports

Modifications to cost-benefit analyses for competition of management and operating contracts (sec. 3131)

The Senate amendment contained a provision (sec. 3121) that would modify the requirement for the Administrator of the National Nuclear Security Administration (NNSA) to provide a report to the congressional defense committees containing a cost-benefit analysis of competition of management and operating contracts for NNSA laboratories and production plants following each award of such a contract such that the report would be due 30 days after the transition to a new contract is complete.

The House bill contained no similar provision.

The House recedes with amendments that would extend the requirement through 2022 and add a requirement for the Administrator to provide a briefing no later than 7 days after the release of a request for proposal for any contract to manage and operate an

NNSA facility. This briefing would provide a preliminary estimate of the costs and benefits of competing such contract. The amendment would also make a technical change that would transfer the entire requirement from the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239) into title 50 of United States Code.

Nuclear forensics analyses (sec. 3132)

The House bill contained a provision (sec. 3120) that would require the Secretary of Energy, in consultation with the Secretary of Defense and the Secretary of Homeland Security, to seek to enter into an agreement with the National Academy of Sciences for an independent assessment of nuclear forensic analyses conducted by the Federal Government.

The House bill contained no similar provision.

The House recedes with an amendment to include recommendations in the assessment that would enhance effectiveness and efficiency within the program.

Whistleblower protections (sec. 3134)

The House bill contained a provision (sec. 3132) that would contain findings and express the sense of Congress regarding nuclear safety and require the Secretary of Energy to impose civil penalties on contractors, subcontractors, and suppliers for violations of Department of Energy rules, regulations, and orders relating to nuclear safety and radiation protection. The provision would also require the Secretary to define, within 120 days of enactment of this Act, what constitutes evidence of a chilled work environment with respect to employees and contractors making a whistleblower complaint and would require an annual congressional notification on the imposition of any penalties related to violations of rules, regulations, and orders by contractors, subcontractors, and suppliers.

The Senate amendment contained no similar provision.

The Senate recedes with amendments that would strike the findings, strike the requirement to impose civil penalties as the Secretary or the Administrator determines appropriate and instead add it to the sense of Congress, and clarify the reporting requirement related to a chilled work environment.

Implementation of Nuclear Posture Review by National Nuclear Security Administration (sec. 3135)

The Senate amendment contained a provision (sec. 3125) that would require the Administrator of the National Nuclear Security Administration (NNSA) to submit to the congressional defense committees a report on the implementation of the 2018 Nuclear Posture Review (NPR) by the NNSA. The report would identify specific actions associated with the NPR, including the office of primary responsibility for each action and key milestones associated with it.

The Senate amendment contained a provision (sec. 3124) that would eliminate certain reporting requirements for the Department of Energy's Environmental Management Office.

The House bill contained no similar provision.

The House recedes with an amendment to preserve the future-years defense environmental management plan and to keep the certification requirements for waste shipments to the Waste Isolation Pilot Plant until fiscal year 2019.

Subtitle D—Other Matters

Acceleration of replacement of cesium blood irradiation sources (sec. 3141)

The House bill contained a provision (sec. 3119) that would require the Administrator for the National Nuclear Security Administration (NNSA) to ensure that the goal of the Cesium Irradiator Replacement Program and the Offsite Source Recovery Program is the elimination of the use in the United States of blood irradiation devices that rely on cesium chloride by December 31, 2027.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Administrator for NNSA to identify in a reporting requirement the disposal pathway for cesium chloride sources.

The conferees recognize the importance of technical skills-based training, including apprenticeship and pre-apprenticeship programs, and supports efforts to strengthen these programs. The conferees encourage further work with the Secretary of Energy on these efforts, and encourage the Secretary to continue to use such programs to further the missions of the Department of Energy and National Nuclear Security Administration.

Clarification of roles and authorities of National Nuclear Security Administration

The Senate amendment contained a provision (sec. 3111) that would clarify the roles and authorities of the National Nuclear Security Administration (NNSA) through a series of amendments to the National Nuclear Security Administration Act (50 U.S.C. Ch. 41) and the Atomic Energy Defense Act (50 U.S.C. Ch. 42). The provision would also make several technical corrections to the Atomic Energy Defense Act and remove the cap imposed on the number of full-time equivalent federal employees at the NNSA by section 3241A of the NNSA Act (50 U.S.C. 2441a).

The House bill contained no similar provision.

The Senate recedes.

The conferees note that similar legislation was considered in the course of the drafting of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239). The statement of managers accompanying that Act noted that there was "widespread recognition that the current system for governance, management, and oversight of the nuclear security enterprise is broken." The same statement noted similar conclusions made by the 2009 Congressional Commission on the Strategic Posture of the United States and several other bipartisan or non-partisan organizations. Additional studies and commissions have agreed in the years since.

The National Defense Authorization Act for Fiscal Year 2013 also created a bipartisan advisory commission to provide "actionable recommendations that directly address the host of systemic problems identified by previous studies and by the conferees," later known as the Augustine-Mies Panel. In 2014, this panel recommended a sweeping series of major changes at NNSA and the Department of Energy more broadly, including renaming the Department to be the "Department of Energy and Nuclear Security," more fully integrating the NNSA into the Department, elevating the NNSA Administrator to the level of Deputy Secretary, and other actions to address deep-rooted cultural problems. The conferees note that a lack of consensus among the Department and the many congressional committees of jurisdiction prevented most of the major recommendations from being implemented, while others have languished in the bureaucracy or have been implemented without sufficient efforts to measure success. The conferees appreciate the work of the ongoing joint National Academies of Sciences, Engineering, and Medicine

(NAS) and National Academy of Public Administration (NAPA) panel created by the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114-92) to assess the NNSA's and the Department's progress in implementing prior recommendations, and note that the panel's most recent interim report concludes that activities to implement prior reform recommendations have not been "rooted in an adequate foundation of strategic thinking."

The conferees note that the Augustine-Mies Panel concluded that, if "significant progress [was] not made within the next two years," the "only remaining course of action—and a clearly inferior one—is to remove [NNSA] from what is now the Department of Energy and establish it as an autonomous, independent organization."

The conferees note that almost 4 years have elapsed since the Augustine-Mies Panel made its recommendations, and almost 6 years have elapsed since the 2013 statement of managers described the nuclear security enterprise as "broken." While disagreement remains with some of the specific conclusions of the panel, the conferees have not witnessed significant progress—only "changes on the margins," as anticipated by the 2013 conferees. Continued cost overruns on major projects, critical capital acquisition decisions mired in dispute, ongoing safety and security concerns, and delayed infrastructure modernization projects indicate that significant progress has not been made.

The conferees expect that the joint NAS/NAPA panel will conclude its work in 2020. Rather than allowing the panel's reports and recommendations to languish along with over two decades of studies and commissions on this subject, the conferees believe that, at that time, the appropriate committees must work with the Department and the NNSA to consider major reforms to the governance of the nuclear security enterprise, but stress that a return to previous, failed models of organization and management are unlikely to be an acceptable option.

Finally, the conferees also note that a significant recommendation of the Augustine-Mies Panel was to "solidify Cabinet Secretary ownership of the mission" of the NNSA. As long as the NNSA remains part of the Department of Energy under the current construct of the NNSA Act, the conferees expect appropriate levels of engagement by the Secretary of Energy, the Deputy Secretary of Energy, and the Administrator for Nuclear Security with the committees of jurisdiction on priority atomic energy defense programs to ensure that the NNSA meets the military requirements set by the Department of Defense while making efficient and responsible use of taxpayer dollars.

National Nuclear Security Administration Personnel System

This provision would not affect the discretion of the Secretary to

determine whether to place a USMMA cadet on a vessel; the Secretary would retain discretion to determine whether a cadet is available to be placed on an MSP or MSC vessel.
