Office of Audits
Office of Inspector General

DATE: March 31, 2004

MEMORANDUM TO: Michael J. Zamorski, Director
Division of Supervision and Consumer Protection

FROM: Russell A. Rau
Assistant Inspector General for Audits

SUBJECT: *Supervisory Actions Taken for Bank Secrecy Act Violations (Report No. 2004-017)*

This report presents the results of the Office of Inspector General's (OIG) audit of the Federal Deposit Insurance Corporation's (FDIC) process for ensuring corrective actions are taken by bank management to address violations¹ of the Bank Secrecy Act (BSA) of 1970. We initiated this audit in response to interest expressed by staff of the Subcommittee on Oversight and Investigations, House Committee on Financial Services. The objective of this audit was to determine whether the FDIC Division of Supervision and Consumer Protection (DSC) adequately follows up on BSA violations reported in examinations of FDIC-supervised financial institutions² to ensure that they take appropriate corrective action. To accomplish our objective, we reviewed the steps taken by the DSC to ensure institutions have implemented effective corrective action to address these violations.³ Appendix I of this report discusses our objective, scope, and methodology in detail. An acronyms list and a glossary of terms used in this report are provided in Appendix VII and Appendix VIII, respectively.

¹According to the Division of Supervision and Consumer Protection's *Manual of Examination Policies*, examiners report and document in the reports of examination those situations that appear to be contraventions of law or regulation. Because examiners are not final adjudicators, examiners qualify findings by referring to them as "apparent violations." Our final report use the term "violations" when referring to situations identified, reported, and/or cited in the reports of examinations and the FDIC's automated tracking and reporting system. The OIG has not made a judgment on the legalities related to the "apparent" violations discussed in this report.

²The FDIC is the primary federal regulator of state-chartered institutions that are not members of the Federal Reserve System. Such institutions also include state-licensed insured branches of foreign banks and state-chartered mutual savings banks. According to the FDIC's *Letter to Stakeholders*, 3rd Quarter 2003, the number of FDIC-supervised institutions totaled 5,343 as of September 30, 2003.

³For purposes of this report, a distinction is made between corrective action taken by bank management to address BSA violations and supervisory action taken by the FDIC to ensure compliance. FDIC's supervisory actions may include efforts to follow up with bank management after examinations, including correspondence, and follow-up visitations or examinations, and the use of regulatory action. Regulatory action is defined to include informal actions (such as bank board resolutions or memorandums of understanding) and formal enforcement actions (such as cease and desist orders) to prompt management action.

BACKGROUND

The Bank Secrecy Act of 1970, Public Law 91-508, codified to 31 U.S.C. Section 5311 et seq., requires financial institutions to maintain appropriate records and to file certain reports that are used in criminal, tax, or regulatory investigations or proceedings. Congress enacted the BSA to prevent banks and other financial service providers from being used as intermediaries for, or to hide the transfer or deposit of, money derived from criminal activity. The BSA's implementing regulation, 31 Code of Federal Regulations (C.F.R.) Part 103, is used to aid law enforcement agencies in the investigation of suspected criminal activity such as illegal drug activities, income tax evasion, and money laundering⁴ by organized crime.

The BSA consists of two parts—Title I, Financial Recordkeeping, and Title II, Reports of Currency in Foreign Transactions.

- Title I authorizes the Secretary of the Treasury (Treasury Department)⁵ to issue regulations requiring insured financial institutions to maintain certain records related to financial transactions.
- Title II directs the Treasury Department to prescribe regulations governing the reporting of certain transactions by and through financial institutions in excess of \$10,000 into, out of, and within the United States. A financial institution must file a Currency Transaction Report (CTR)⁶ with the Treasury Department for each cash transaction over \$10,000 or multiple cash transactions by an individual in 1 business day or over a period of days aggregating over \$10,000. The BSA also requires financial institutions to file Suspicious Activity Reports (SARs) with the Treasury Department when suspected money laundering activity or BSA violations occur.

Emphasis on anti-money laundering efforts has risen significantly in recent years, especially since the events of September 11, 2001. For example, in response to those events, the Congress enacted the United and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001, Public Law 107-56 (USA PATRIOT Act, hereafter referred to as the PATRIOT Act), which expands the Treasury Department's authority initially established under the BSA to regulate the activities of U.S. financial institutions, particularly their relations with individuals and entities with foreign ties.⁷ The provisions of the PATRIOT Act were designed to facilitate the prevention, detection, and prosecution of international money laundering and the financing of terrorism.

⁴Money laundering is the process by which criminals or criminal organizations seek to disguise the illicit nature of their proceeds by introducing them into the stream of legitimate commerce and finance.

⁵For reporting purposes, we will refer to the Secretary of the Treasury as the "Treasury Department."

⁶According to DSC's *Manual of Examination Policies, Financial Recordkeeping and Reporting Regulations*, dated February 1999, law enforcement agencies have found CTRs to be useful in tracking cash generated by illicit drug traffickers. Accordingly, comprehensive examination procedures have assisted in detecting possible money laundering resulting from drug trafficking in federally insured financial institutions.

⁷Hereinafter, all references to the BSA will include the PATRIOT Act amendments.

BSA Requirements for FDIC-Supervised Institutions

Section 326.8(b) of the FDIC's Rules and Regulations, codified to 12 C.F.R. Part 326, requires each FDIC-supervised institution to develop and administer a program to ensure compliance with the BSA and 31 C.F.R. Part 103. The institutions' boards of directors must approve the compliance program in writing, and in accordance with Section 326.8(c), the program should include four minimum requirements:

- a system of internal controls to assure ongoing compliance,
- independent testing for compliance with the BSA and 31 C.F.R. Part 103 to be conducted by bank personnel or an outside party,
- designation of individual(s) responsible for coordinating and monitoring compliance with the BSA, and
- training in BSA requirements for appropriate personnel.

Appendix II details the minimum requirements for FDIC-supervised financial institutions.

Examination Authority

The Treasury Department has overall authority for BSA enforcement and compliance; however, its regulations delegate authority to financial institution regulatory agencies, including the FDIC, to examine financial institutions for compliance. In this capacity, the FDIC has authority to (1) examine the institutions it supervises for compliance with the BSA, (2) refer BSA violations to the Treasury Department, and (3) impose regulatory actions for BSA violations. The FDIC is also required by the Federal Deposit Insurance Act (FDI Act) to:

- prescribe regulations requiring insured depository institutions to establish and maintain procedures reasonably designed to ensure and monitor compliance with the BSA,
- review such procedures during their examinations of these institutions, and
- enforce compliance with the BSA monetary transaction recordkeeping and report requirements.

The FDIC also issues regulations, Financial Institution Letters (FILs),⁸ and other guidance to the financial institutions that it supervises; updates Corporation examination and training materials; and ensures that DSC examiners are adequately trained to monitor BSA compliance. DSC requires examiners to use risk-focused examination procedures to assess BSA compliance.⁹ To accomplish this, examiners may use (1) core procedures that are considered during the basic review, (2) expanded procedures that are used to target concerns identified during the basic review, and (3) impact analyses to assess the seriousness of identified deficiencies. To assess the impact of

⁸The FDIC uses FILs to correspond with the financial institutions that it supervises. FILs may be issued for a variety of reasons, including notification of BSA requirements and other issues of principal interest to those responsible for operating a bank or savings association.

⁹On August 15, 2003, the DSC issued interim guidance in Transmittal 03-042, *Bank Secrecy Act Examination Procedures*, updating the BSA risk-focused approach. The objective of this approach is to effectively evaluate the safety and soundness of the bank, including the assessment of risk management systems, financial condition, and compliance with applicable laws and regulations, while focusing resources on the bank's highest risks.

deficiencies identified during the basic and expanded reviews, examiners determine whether BSA violations and weaknesses:

- are serious and indicate the need for civil money penalties,
- necessitate referrals to law enforcement agencies,
- necessitate a cease and desist order for cases in which a mandatory BSA compliance program was not established or maintained, and
- affect the safety and soundness of the institution.

Appendix III provides DSC's control and performance standards and the associated risks that examiners may consider in assessing an institution's BSA compliance program.

Referrals to the Treasury Department

According to referral guidelines issued by the Treasury Department's Office of Financial Enforcement in October 1990, the Treasury Department has a zero tolerance level for violations of the BSA but recognizes that BSA violations are of a varying nature. The guidelines were designed to assist the financial institution regulatory agencies in determining which BSA violations by banks warrant referral to the Treasury Department "for review and possible assessment of civil and/or criminal penalties" because referrals had been made "that were not significant enough to warrant penalties." The guidelines do not define what constitutes a significant violation. Rather, the guidelines state, "Because the determination process often is subjective, sound examiner judgment and experience also are required." To assist with the determination process, the guidelines instruct examiners to "assess all of the facts and circumstances surrounding the violations," including whether:

- the violations represent an isolated incident caused by human error;
- the deficiencies are indicative of significant noncompliance with the BSA and/or systemic weaknesses in the institution's BSA compliance program;
- the types and nature of the violations are serious;
- the violations are the result of blatant, willful, or flagrant disregard for BSA requirements;
- there is a pattern of noncompliance with one or more sections of the regulations;
- the violations result from inadequate policies, procedures, or training programs; and
- the violations result from a nonexistent or seriously deficient compliance program.

DSC procedures require examiners to use the Treasury Department's guidelines to determine when a referral is appropriate.

Regulatory Actions for Noncompliance

Failure by a financial institution to comply with the BSA can result in regulatory sanctions by either the Treasury Department or the FDIC. The BSA and its underlying regulations give the Treasury Department the authority to assess civil money penalties for violations and to authorize criminal prosecution. The FDIC is required to report all identified BSA violations to the Treasury Department and to refer violations that warrant penalties. Such referrals, however, do not preclude

the FDIC from taking regulatory action when BSA violations are identified. As cited in 12 U.S.C. 1818(s), the FDIC shall issue a cease and desist order to any FDIC-supervised institution that fails to establish and maintain appropriate BSA procedures or to correct any previously reported problem with the procedures. DSC Transmittal 92-094, *Bank Secrecy Act Compliance Examinations*, dated July 30, 1992, provides guidance for implementing this authority. Appendix IV summarizes the Treasury Department and FDIC authority for enforcing compliance with BSA requirements.

RESULTS OF AUDIT

The FDIC needs to strengthen its follow-up process for BSA violations and has initiatives underway to reassess and update its BSA policies and procedures. Of the 5,662 financial institutions that the FDIC supervised on average for the period January 1, 1997 through September 30, 2003, FDIC's tracking system¹⁰ for BSA violations identified:

- 2,672 financial institutions, or approximately 47 percent, as being cited for one or more BSA violations; and
- 458 financial institutions, or approximately 17 percent of the 2,672 institutions, as having repeat BSA violations.¹¹

Of the sample of 41 institutions we selected to review, 27 had repeat violations.¹² Of those 27, 17 institutions (63 percent) were not subject to regulatory action for their repeat violations, although other supervisory efforts may have been in progress. Of the 10 institutions that were subject to regulatory action, only 1 was subject to a cease and desist order. DSC policy states that repeat violations cannot be tolerated and that cease and desist orders should be initiated in such cases. In addition, Section 8(s) of the FDI Act states that, "If the appropriate Federal banking agency determines that an insured depository institution ... has failed to correct any problem with the [BSA] procedures ... which was previously reported ... by such agency, the agency shall issue an order ... requiring such depository institution to cease and desist from its violation...." However, according to the FDIC's Legal Division, enforcement authority always involves some element of discretion, including consideration of the nature of the violation and supervisory judgment as to

¹⁰The DSC uses FDIC's Virtual Supervisory Information on the Net system (ViSION) to track apparent BSA violations cited in FDIC reports of examination. The DSC also uses ViSION to report BSA violations to the Treasury Department.

¹¹Although ViSION identified 458 institutions as having repeat violations, DSC reported that violations involving different sections of the regulation may be grouped under the same violation code in ViSION, thus incorrectly identifying some violations as repeats. However, because ViSION is DSC's system for tracking apparent violations of BSA, ViSION was used to select the sampled institutions for our audit and to obtain a general estimate of the percentage of FDIC-supervised institutions with repeat violations. Of the 19 institutions in our sample that were selected because they were identified in ViSION as having repeat violations, we confirmed that 18 had repeat violations.

¹²Our sample of 41 institutions included 22 institutions selected randomly by regional/area office and 19 institutions judgmentally selected because they were identified in ViSION as having repeat violations. As noted in footnote 11, we confirmed that 18 of those 19 institutions had repeat violations. In addition, 9 of the 22 institutions that were selected randomly also had repeat violations, resulting in 27 institutions with repeat violations. In addition, after issuance of the draft report to DSC for written comment, the OIG identified one more institution that had a repeat violation. However, because the DSC did not have an opportunity to review the circumstances related to that repeat violation and provide a response, the OIG did not adjust the number of repeat institutions included in this report.

how best to address the violation. Appendix V provides a recap of the institutions we reviewed, the types of BSA violations identified, whether the institutions were cited for repeat violations, and the types of regulatory actions taken.

For the 41 banks in our sample, we reviewed 82 reports¹³ that cited apparent and often multiple BSA violations. For 25 (30 percent) of those 82 reports, the DSC waited until the next examination to follow up on some or all of the BSA violations. In addition, we noted that not all BSA deficiencies described in DSC's examination reports were cited in the violations section of the reports.¹⁴ Also, DSC's regional offices took various approaches to handling violations related to the filing of CTRs and to referring bank violations to the Treasury Department.

We also observed that DSC regional and field offices exercised wide discretion in deciding whether and when to follow up on the violations or take regulatory action. In some cases, more than 1 to 5 years passed before (1) bank management took corrective action that was effective to prevent repeat violations or (2) the DSC applied regulatory actions to address continuing violations. Additionally, the FDIC typically alternates examinations with state banking authorities, but the state examinations usually did not cover BSA compliance. As a result, 2 to 3 years can sometimes elapse until the next FDIC examination without any follow-up on BSA violations.

As a result of these conditions, the FDIC has not always ensured that all identified BSA violations have been included and tracked in ViSION and, therefore, has not ensured complete reporting to the Treasury Department. Further, the FDIC's supervisory actions have not ensured to the greatest extent possible that institutions are in compliance with both the Treasury's and the FDIC's anti-money laundering requirements.

In responding to our observations, DSC officials explained that they focus their efforts on BSA compliance based on their assessment of the risk of money laundering activity for their supervised institutions. DSC provided us with information on a number of cases not included in our sample for which they believed supervisory efforts were successful in addressing BSA concerns. Additionally, we noted that DSC is taking steps to update its BSA guidance and is conducting a reassessment of its BSA-related policies and procedures. Furthermore, the FDIC is conducting a review of regulatory burden and is researching ways to reduce the burden of BSA filing requirements for financial institutions without hampering efforts to combat money laundering and terrorist financing.

¹³The 82 reports include 81 examination reports and 1 follow-up visitation report that cited at least one BSA violation for the 41 sampled institutions and that were included in ViSION. The official draft report states that we reviewed 80 examination reports, but after issuance of the draft report to DSC for written comment, the OIG identified 2 additional examination reports that cited BSA violations and had been included in our analyses.

¹⁴ Based on discussions with DSC officials, cited violations are those violations included in the *Violations of Laws and Regulations* schedule of the examination reports and should be recorded in ViSION.

FOLLOW-UP FOR BSA VIOLATIONS SHOULD BE STRENGTHENED

For most of the 82 reports with BSA violations in our sample, the DSC initiated timely follow-up and other supervisory actions or obtained timely evidence of bank corrective actions. However, in some cases, BSA violations were repeatedly identified in multiple examination reports before bank management took corrective action or the FDIC took regulatory action to address the repeat violations. Further, for 25 (30 percent) of the examination reports, the DSC waited until the next examination to determine whether a bank had corrected some or all of its violations. According to one DSC official, each regional office exercises discretion in assessing bank compliance with BSA requirements. The decision on whether and at what time to follow up on BSA violations is a decentralized process and, in many cases, is based on the FDIC's view from experience that the institution represents a relatively "low risk" in terms of potential money laundering activities. This decentralized process has resulted in a wide range of follow-up actions for BSA violations and of elapsed time before supervisory actions are taken. As a result, the BSA compliance programs of some institutions have remained weak for extended periods.

We sampled 41 of the 2,672 financial institutions with BSA violations for detailed review. Of those 41 institutions:

- 35 institutions (86 percent) were cited for violations related to the Treasury Department's financial recordkeeping and reporting requirements as prescribed in 31 C.F.R. Part 103, and
- 29 institutions (71 percent) were cited for deficient BSA programs that did not meet the minimum requirements of the FDIC Rules and Regulations.

Regarding the Treasury Department's Regulations at 31 C.F.R. Part 103, these financial institutions were most frequently cited for:

- failure to file CTRs for nonexempted transactions over \$10,000 (22 institutions);
- failure to maintain records on sales of monetary instruments of \$3,000 through \$10,000 (16 institutions);
- failure to furnish information required in CTRs (14 institutions);
- untimely filing of CTRs or failure to retain CTRs for 5 years (13 institutions); and
- failure to treat multiple transactions totaling over \$10,000 as a single transaction (10 institutions).

Regarding the FDIC's Rules and Regulations Section 326.8, the 41 financial institutions in our sample were most frequently cited for:

- lack of independent testing of BSA compliance (16 institutions),
- failure to develop or implement an adequate BSA compliance program (15 institutions),
- inadequate system of internal controls for BSA compliance (10 institutions), and
- failure to provide adequate BSA training (7 institutions).

Appendix VI summarizes the types of BSA violations and the numbers of institutions that had violations for the 41 sampled financial institutions for the period January 1, 1997 through September 30, 2003. These BSA violations included those recorded in ViSION and those not recorded in ViSION that had been cited in examination reports.

Responsibilities Prescribed by BSA Laws, Regulations, and Policies

Based on our review of applicable BSA laws, regulations, and policies, the DSC is responsible to take the following steps in identifying and addressing BSA violations:

- Examine FDIC-supervised institutions for compliance (12 U.S.C. 1818(s), Compliance with Monetary Transaction Recordkeeping and Report Requirements; 31 C.F.R. 103.56(b), Enforcement; Section 10(b), Examinations, of the FDI Act; and 12 C.F.R. 337.12, Frequency of Examinations, of the FDIC Regulations and Statements of General Policy).
- Identify and report BSA violations in reports of examination and report the violations to Treasury (DSC Transmittal 92-094, dated July 30, 1992; and *Manual of Examination Policies, Financial Recordkeeping and Reporting Regulations*, Section 9.4).
- Give institutions an opportunity to correct violations within a reasonable period after being notified of violations (DSC Transmittal 92-094, dated July 30, 1992).
- Verify corrective measures with a follow-up visitation/examination if needed (DSC Transmittal 92-094).
- Initiate a cease and desist order if an institution has failed to establish or maintain BSA procedures or failed to correct any previously reported problem with the procedures (12 U.S.C. 1818(s) and DSC Transmittal 92-094).
- Impose civil money penalties for violations of cease and desist orders (12 U.S.C. 1818(i)(2)(ii)).
- Refer significant violations to the Treasury Department (*Bank Secrecy Act Referral Guidelines for Financial Institutions*, as incorporated into DSC Transmittal 91-020, dated January 31, 1991).

The FDIC Process for Follow-up and Other Supervisory Actions

The FDIC does not have a standard, nondiscretionary approach for determining when and how to follow up on BSA violations. The process used to identify, track, and report BSA violations is decentralized and is based on the judgment of DSC examiners, field office supervisors, case

managers, and regional office management.¹⁵ DSC officials stated that they apply a risk-focused approach to BSA compliance, taking into consideration the specific demographics of each financial institution when deciding whether to pursue supervisory actions and the type of action necessary. According to DSC, those demographics may include the “overall profile” of an institution, including its location, asset size, history of bank management in taking corrective actions, history of violations, size of bank staff, assessment of risk related to anti-money laundering and the BSA, and composite rating. Nevertheless, our review of DSC’s examinations for the sampled banks raised concerns about instances where the FDIC:

- did not take regulatory or enforcement actions for repeat violations, or
- waited until the next examination to follow up on violations and verify whether corrective actions taken by bank management were effective.

In addition, we noted that DSC examiners sometimes cited BSA deficiencies in the violations section of the examination reports and other times did not. We also noted that DSC’s regional offices took varying approaches for handling violations related to the filing of CTRs and for referring institution violations to the Treasury Department.

Handling of Repeat Violations

With respect to regulatory actions, the DSC imposed such actions on 10 (37 percent) of the 27 institutions we sampled that had repeat violations and on 1 institution that did not have repeat violations. Of those 11 institutions for which regulatory actions were imposed:

- a cease and desist order was imposed for one institution,
- memorandums of understanding were imposed for six institutions,
- bank board resolutions were imposed for four institutions, and
- a state determination letter was imposed for one institution.¹⁶

Ten of these institutions had violations that related to both Treasury Department’s Part 103 and the FDIC’s Section 326.8, and one institution had violations related to Treasury Department’s Part 103.

As shown in Table 1 on the next page, the regulatory actions were taken for institutions with varying composite ratings and a wide range of asset sizes.

¹⁵One FDIC area office uses a BSA Watchlist to assist in monitoring compliance with BSA-related laws and regulations. DSC officials stated that for those institutions that are included on the watchlist, a follow-up visitation should be performed 6 months to 1 year after the examination that prompted inclusion, and an on-site follow-up should occur at least every 12 months thereafter until removal from the watchlist. Removal from the watchlist is considered if the on-site follow-up confirms adequate correction of prior BSA deficiencies.

¹⁶ The numbers total 12 because for 1 institution, both a memorandum of understanding and a bank board resolution had been imposed.

Table 1: Analysis of Composite Rating and Asset Size for Institutions for Which Regulatory Actions Were Imposed

Composite Rating ^a	Range Of Asset Size ^b (millions)	Number Of Institutions For Which Regulatory Actions Were Imposed	Type Of Regulatory Action Taken	
			Number of Institutions with Informal Action	Number of Institutions with Formal Action
Composite rating "2"	\$5 - \$122	4	4	0
Composite rating "3"	\$23 - \$190	4	4	0
Composite rating "4"	\$10 - \$72	3	2	1
TOTALS		11	10	1

^aThe composite ratings are those at time of violation for which enforcement action was issued.

^bAsset size is based on September 30, 2003 data obtained from the FDICnet Institution Information/Institution Directory.

Source: OIG review of the Formal and Informal Action Tracking System (FIAT) data, reports of examination, supplemental information provided by the DSC, and the FDICnet Institution Information/Institution Directory.

Although regulatory actions were taken for 10 of the 27 institutions in our sample that had repeat violations, regulatory actions were not imposed for the other 17 institutions that had repeat violations. DSC's memorandum on *Bank Secrecy Act Compliance Examinations* (Transmittal Number 92-094) states that repeat violations cannot be tolerated. Furthermore, FDI Act section 8(s), codified at 12 U.S.C. 1818(s), states, "the agency shall issue an order ... to cease and desist" when the institution "has failed to correct any problem with the [BSA] procedures ... previously reported to the depository institution. ..." Nevertheless, a cease and desist order was issued to only 1 institution in our sample that had repeat violations; 17 institutions (63 percent of the institutions in our sample) with repeat violations were not subject to regulatory action by the FDIC.

According to the FDIC's Legal Division, enforcement authority always involves some element of discretion. Such discretion may include consideration of the nature of the violation, supervisory judgment as to how best to address the violation, whether to apply formal or informal action, and consideration of workload priorities and resource constraints. Also, the Legal Division indicated that Section 8(s) establishes two key factors for consideration: (1) has the institution established a BSA program? and (2) are there any problems with the program? Minor violations that are not covered by one of these factors would not merit a cease and desist order under Section 8(s). However, of the 17 institutions with repeat violations that were not subject to regulatory action, only 2 institutions did not have program violations.

The DSC's *Formal and Informal Action Procedures Manual* does not specifically address BSA violations, yet it does state that the belief that bank management has recognized deficiencies and will take corrective action(s) is not sufficient, in and of itself, to preclude taking regulatory action. In determining the appropriate regulatory action, DSC officials explained that, in the context of a risk-focused examination, they consider several areas: bank management's willingness to address supervisory concerns and management's history of responding to those concerns, demonstration of a

good faith effort at correcting noted deficiencies, the condition of the institution, the overall risk posed by the identified weaknesses, and other factors.

Follow-up on Violations

DSC's process for following up on violations cited in reports of examination includes:

- a request for the report to be considered in the bank's next board meeting, with a record of actions taken entered into the minutes;
- a request for bank management to provide a response indicating the actions taken to eliminate each cited violation or deficiency; and
- follow-up of the corrective actions at the next examination.

Because of the significance of BSA violations, we checked whether follow-up occurred before the next examination. Specifically, for the institutions included in our sample, we checked how often and by what method DSC followed up on whether corrective actions had been taken. We considered evidence related to DSC's follow-up actions or the banks' corrective actions and information from the Treasury Department. As a result of our analysis of the process and our review of the 82 reports that cited apparent BSA violations, we found that:

- For 20 reports, DSC followed up or pursued regulatory action for certain violations before the next examination, including additional correspondence, visitations, and regulatory actions such as bank board resolutions, memorandums of understanding, or cease and desist orders.
- For 42 reports, DSC received evidence from bank management, Treasury's Financial Crimes Enforcement Network (FinCEN), or the Internal Revenue Service (IRS) that certain violations had been corrected before the next examination, and in many of these instances, corrective action took place before the examination was completed.
- For 25 reports, DSC waited until the next examination to assess the adequacy of bank corrective actions for certain violations.¹⁷

In one case, a subsequent state examination followed up on violations cited by the DSC and pursued the matter until the bank took corrective action. Most state examinations, however, did not cover BSA compliance.

Table 2 provides examples of the variety of follow-up and regulatory actions taken by the FDIC to address BSA violations. These examples are specifically related to violations cited for FDIC's Rules and Regulations Section 326.8. Appendix II provides a detailed description of the requirements in FDIC's Rules and Regulations Section 326.8.

¹⁷Note that the numbers do not total 82 because DSC used different follow-up actions for some examination reports that cited multiple violations.

Table 2: Supervisory Actions Taken for Similar BSA Violations

INSTITUTION IDENTIFICATION NUMBER*	VIOLATION	SUPERVISORY ACTIONS
4	326.8(b)	The violation was cited during an [REDACTED], 1997 examination. It is a repeat violation initially cited during the institution's [REDACTED], 1996, examination. A bank board resolution (BBR) was adopted [REDACTED], 1998, more than 2 years after initial citation.
12	326.8(b)	Violation was initially cited during the [REDACTED] 1998 examination for a combination of deficiencies in the bank's BSA Compliance program, including lack of independent testing. Bank officials informed the FDIC that the 1998 violation had been corrected prior to the state 1999 examination by having a Certified Public Accounting firm conduct independent testing in [REDACTED] 1998. The 1999 state examination did not identify any BSA violations. The bank was cited for a repeat violation during the FDIC examination on [REDACTED], 2000 because independent testing had not been conducted since 1998 and the bank had not kept the BSA program current and approved annually. The [REDACTED], 2002 state examination cited the bank for lack of independent testing because no testing had been conducted since 1998. The [REDACTED], 2003 examination did not report this violation. No supervisory action was taken by the FDIC. FDIC officials stated "... that it should be noted that Part 326 does not specify the frequency of the required independent testing. The Guidelines for Monitoring Bank Secrecy Act Compliance (issued by FIL 29-96) indicate that <u>annual</u> testing should be conducted, but guidelines cannot be "violated" – there can be violations only of regulations."
15	326.8(b)	As a result of violations related to safety and soundness, the FDIC and bank management signed a memorandum of understanding (MOU) on [REDACTED], 1999, which placed numerous requirements on the institution for compliance. Although the MOU did not specifically address BSA violations, it did refer to the requirement to correct violations of all laws. After the [REDACTED], 2000 examination during which BSA violations were reported, the FDIC continued the MOU. The institution's progress report for [REDACTED] 2000 indicated that all violations had been corrected. The MOU was terminated [REDACTED], 2001.
1	326.8(c)(2)	The violation was reported during the [REDACTED], 2000 FDIC examination. Based on that examination, bank management agreed to have testing performed in [REDACTED] 2000. However, the violation was identified as a repeat violation during the [REDACTED], 2002 state examination. Bank management provided evidence that the independent testing was completed on [REDACTED], 2002—almost 2 years after initial citation.
19	326.8(c)(2)	Violation was initially cited during the [REDACTED], 1999 examination and was repeated during the [REDACTED] 2001 and [REDACTED], 2003 examinations. As a result of the [REDACTED], 2001 examination, the state regulatory agency placed the bank under a Determination Letter, which was related to various safety and soundness concerns and required the bank to correct all violations of law, including the apparent BSA infractions. The institution was required to provide quarterly progress reports. The [REDACTED], 2003 quarterly report indicated that the BSA violation had been addressed and reviewed. The next examination conducted in [REDACTED] 2003 indicated that all BSA violations had been corrected, and no additional violations were cited.
29	326.8 BSA Compliance Program and 326.8(c)(2)	Violations of 326.8(b) BSA Compliance Program and 326.8(c)(2) lack of independent testing were cited during the 1998 examination, and a violation of 326.8(b) was cited during the 2000 examination. FDIC's comments for this institution indicated that officials did not consider the violations to be systemic; bank management promised appropriate action; and given the positive relationship with the regulatory agencies in the past, there was no reason to think that corrective action would not be taken; and enforcement action did not appear warranted. Further, FDIC officials stated that bank management was able to demonstrate a good faith effort at correcting the noted deficiencies and that although it took two examination cycles to clear the violations, improvement was noted at each examination.
33	326.8(c)(2)	Violation was cited during the [REDACTED], 2001 examination. The institution provided evidence that corrective action was taken 14 months after the examination.
37	326.8(c)(2)	Violation was first cited during the [REDACTED] 1997 examination and was included as repeat violation during the [REDACTED], 1999 and [REDACTED], 2002 examinations. The FDIC issued a cease and desist order effective [REDACTED], 2002, pursuant to Section 8(s)—over 5 years after initial citation—solely for violations related to lack of independent testing and employee training for BSA. The FDIC conducted a visitation on [REDACTED], 2002 and determined the bank to be in substantial compliance with most provisions of the order. The order was terminated [REDACTED], 2002.

* The number shown in this column represents the identification number assigned for the institution. Since most of the institutions included in the OIG sample are open banks, the names of the institutions are not used for identification purposes. The numbers correspond with data shown in Appendix V.

Source: OIG review of ViSION data, reports of examination, and supplemental information provided by DSC regional and area office officials. As evidenced by Table 2, supervisory approaches and the time taken for follow-up on BSA violations varied.

Inconsistencies in Describing Deficiencies and Citing Violations

In reviewing DSC's reports of examination, we observed several instances of BSA deficiencies described in the reports but not cited in the *Violations of Laws and Regulations* section of the reports. On the other hand, we also noted instances of similar BSA deficiencies that were cited as violations. Deficiencies that are described in the reports of examination not cited as violations may receive less attention from bank management or in follow-up by the DSC. According to DSC officials, the examiners exercise judgment in determining the significance of BSA concerns. That judgment includes determining whether the weaknesses constitute:

- apparent violation of laws or regulations, meriting inclusion in the violations section of the examination report, or
- noncompliance with DSC guidelines, meriting only mention in the report as matters for bank management's attention, which may be sufficient to eliminate concern.

For example, DSC officials stated that citing an institution for a lack of independent testing would be appropriate if no testing was being conducted; however, the institution would not be cited in cases in which independent testing was being conducted but the frequency or areas of coverage could be enhanced. However, we noted several instances of inconsistency in the handling of BSA deficiencies.

Deficiencies Described and Cited as Violations

During an examination conducted in [REDACTED] 2003, a bank was cited for

- failure to develop a BSA compliance program and provide for the continued administration of such program because the bank had weak internal controls and did not provide annual independent testing,
- lack of independent testing of BSA compliance because the bank's BSA policy did not address annual independent testing, and
- failure to provide adequate BSA training because the bank's BSA policy did not address annual training to be provided to all employees.

In addition, the management assessment section of the examination report stated that an outside firm had performed a limited review of BSA and recommended that the scope of independent testing be expanded.

In another example, during a [REDACTED] 2000 examination, examiners cited a bank for lack of independent testing. The examination report noted that the bank's BSA policy provided for a

system of independent testing for compliance with the BSA, but that independent testing had not been conducted. Additionally, the report stated that the independent review did not address exemptions,¹⁸ a test of the bank's recordkeeping system and the recordkeeping requirements for wire transfers and the sale of monetary instruments.

During an █████ 2000 examination, a bank was cited for overall noncompliance with the BSA compliance program requirements because of noted "weaknesses" in the bank's training efforts and independent testing procedures. The report further stated that while independent testing was not conducted in 1998 or 1999, the testing that was conducted in 2000 was too narrow in scope and did not review wire transfer activity. The examiner cited the bank for failure to develop or implement an adequate BSA compliance program, indicating overall noncompliance with BSA regulations, and did not limit the violation specifically to a lack of independent testing.

Deficiencies Described and Not Cited as Violations

In contrast to deficiencies cited as violations, we noted instances in which significant deficiencies were described by examiners but were not cited as specific violations:

In a █████ 1997 examination report, DSC did not cite a bank for lack of independent testing even though the report specifically stated that bank management did not adhere to the policy guideline that required comprehensive audits of the BSA function. In addition, the report stated that certain transactions (currency) were not properly reported and that numerous errors in transaction reports were the result of the inadequate review and audit procedures. These deficiencies resulted in several violations cited in the 1997 report, such as failure to file CTRs, failure to properly document CTRs, and inadequate verification of customers' identification, but not lack of independent testing. Further, the 2000 examination report stated that (1) the lack of independent testing of the BSA program and weaknesses in internal reviews of CTRs resulted in apparent violations, (2) the apparent violations related to the failure to provide for independent testing of the BSA program and the filing of CTRs with incomplete and inaccurate information, and (3) the independent testing deficiency was noted at the 1997 examination and remains uncorrected. The examiners cited the institution for failure to develop or implement an adequate BSA compliance program. For the subsequent examinations conducted in 2001 by the state regulatory agency and in 2002 by the FDIC, no violations related to independent testing were noted. The state examination noted that independent testing was being performed.

In another examination report for an █████ 1997 examination, examiners described the bank's BSA compliance program as severely lacking and further stated that there were serious deficiencies in the program. The examination report indicated that the BSA compliance program did not address record retention; internal procedures for detection, prevention, and reporting of large currency transactions and suspicious transactions related to money laundering activities; or written procedural guidelines for meeting the reporting and recordkeeping requirements of the BSA regulations. In addition, examiners

¹⁸The term "exemption" refers to instances in which banks are not required to file CTRs for transactions by certain categories of "Exempt Persons." Exemptions are further defined in Appendix VIII.

noted that the program lacked an effective system of internal controls to ensure ongoing compliance. Further, examiners noted that no formal auditing procedures were evidenced that would confirm the integrity and accuracy of the systems for reporting large currency transactions. The bank's internal auditor did perform a limited review, but did not include a review of tellers' work or independent testing of currency transactions. Audit procedures also were lacking for adherence to recordkeeping and/or retention requirements. As a result of this examination, the bank was cited in the violations section of the examination report only for an inadequate system of internal controls and various violations related to Treasury Department's Part 103. The bank's deficiencies related to the lack of independent testing did not result in the citation of an apparent violation. In a joint examination conducted in 1998, the institution was cited for a lack of independent testing, an inadequate system of internal controls, and a violation related to Treasury Department's Part 103.

In a [REDACTED] 2003 report of examination, examiners stated that the frequency of independent testing was inadequate and that the frequency of testing should be increased to monitor the integrity of internal controls and procedures and assure compliance with related regulations and bank policy. The report also described deficiencies related to an inadequate system of internal controls. The examiners recommended that both the manual cash log and the automated system be used to ensure CTRs were filed and that tellers received training on the sequencing of cash transactions. However, the bank was not cited for a lack of internal controls to address the identified deficiencies or a lack of independent testing. Although a BSA data entry form was attached to the back of the examination report, indicating a citation for the lack of independent testing, the violation was not included in the violations section of the examination report and did not appear in ViSION. The bank was cited only for one violation—failure to file CTRs.

DSC officials stated that banks are not required to conduct independent testing on an annual basis, although annual testing is recommended in DSC *Guidelines for Monitoring Bank Secrecy Act Compliance*, dated August 1, 1996. DSC officials stated that because Section 326.8(c) states that independent testing should be conducted by bank personnel or an outside party and does not specifically require "annual" testing, BSA weaknesses involving a lack of annual testing should not be cited as violations. DSC officials added that banks cannot violate "guidelines"—rather, violations should be cited for noncompliance of laws or regulations only. However, our review of examination reports indicated that examiners were not consistent in this area. When citing violations related to independent testing, the examiners sometimes stated in their reports that banks were required to perform annual testing and used the DSC's guidelines rather than the regulations as the basis for citing such violations. DSC officials also stated that banks would not necessarily be cited for a violation of independent testing if at least some testing was being conducted; however, examiners did cite some violations when testing needed to be expanded.

DSC officials also stated that examination reports go through multiple levels of review. Specifically, officials stated that the reports of examination are reviewed at the field supervisory and case manager level, and by regional office management, who all have the opportunity to reclassify these deficiencies as violations if they think a case warrants such reclassification. In addition, DSC officials stated that examiners are expected to use their judgment in determining

whether BSA deficiencies should be cited as violations. Officials added that examiners include these deficiencies in reports of examination as a means to bring those issues to bank management's attention. Further, bank management is required to address not only the cited violations, but also weaknesses that are described in reports of examinations.

Handling of Violations Related to CTRs

We also noted variations in the handling of violations related to CTRs. While conducting examinations, examiners identified instances in which financial institutions had improperly exempted customers from currency transaction reporting requirements or otherwise failed to file CTRs in accordance with 31 C.F.R. Part 103. According to DSC Transmittal 1993-149, *Extension of Filing Deadline for Currency Reports Filed Transaction on Magnetic Tape*, dated October 14, 1993, CTRs must be filed with the IRS within 15 days following the date of the transaction (25 days if the financial institution files electronically). For those institutions that did not file CTRs within the specified timeframe, FinCEN requests that examiners have bank officials request permission to backfile CTRs. DSC regional offices did not handle violations related to the backfiling of CTRs in a consistent manner. Some offices required the institutions to request permission to backfile, while other offices allowed the institutions, in cases that involved one or two CTRs, to file without requesting permission to backfile.

Handling of Referrals to the Treasury Department

DSC referrals of bank violations to the Treasury Department were infrequent. According to information provided by the DSC, 34 referrals were made from January 1, 1997 to December 31, 2003, and 28 referrals (82 percent) were made by 1 DSC regional office. DSC officials added that since the FDIC reports summary information on BSA violations to the Treasury Department through ViSION, Treasury sometimes requests copies of applicable examination reports based on Treasury's analysis of the violations. The following actions have resulted from the referrals made by the FDIC from January 1, 1997 through December 31, 2003

- 27 institutions received cautionary letters or letters of warning from the Treasury Department,
- 1 institution received a civil money penalty,
- 3 referrals were resolved by other means, and
- 3 referrals were still open.

The Treasury Department's 1990 referral guidelines state that one of the reasons the guidelines were issued was that referrals had been made that were not significant enough to warrant penalties. Consequently, it may be advisable for DSC to discuss the referral guidelines with the Treasury Department and to request clarification. Treasury's priorities and approaches to penalties for BSA violations may have changed since the guidelines were issued over 13 years ago.

Timeliness of Follow-up and Other Supervisory Actions

The timeliness of follow-up and other supervisory actions varied among the regional and area offices. The time period ranged from immediate (during the examination process) to over 5 years for bank management corrective action, FDIC verification of corrective action, or FDIC regulatory action. During the extended time frames, subsequent examinations determined that some previously cited BSA violations remained uncorrected even though bank management may have indicated it would take corrective action.

For 27 of the 41 financial institutions we reviewed, the examination reports or supplemental information provided by DSC showed that bank management promptly addressed certain BSA violations during the examinations or within a 12-month period after the examinations as noted below:

- Violations at 14 institutions related to the Treasury Department’s Part 103 only -- the financial recordkeeping and reporting requirements for CTRs and exemption status for specific customers;
- Violations at 4 institutions related to Treasury Department’s Part 103 and the FDIC’s Section 326.8.
- Violations at 4 institutions related to Treasury Department’s Part 103, the FDIC’s Section 326.8, and Section 353.3.
- Violations at 3 institutions related to the FDIC’s Rules and Regulations, Section 326.8 only.
- Violations at 2 institutions related to the Treasury Department’s Part 103 and the FDIC’s Rules and Regulations, Section 353.3.

In other cases, bank management did not take action to correct cited BSA violations within a 12-month period. In these cases, more than 1-5 years elapsed before bank management took corrective action or the FDIC took regulatory action to address the violations as shown in Table 3. These cases included violations cited for both Treasury’s Part 103 and the FDIC’s Rules and Regulations, Section 326.8 and Section 353.3.

Table 3: Time Taken to Address BSA Violations

LENGTH OF TIME FOR ACTION	NUMBER OF INSTITUTIONS*
12 months or less	27
13 months-24 months	13
25 months-36 months	16
37 months-48 months	10
49 months-60 months	1
More than 60 months	8

*The number of institutions will exceed the 41 sampled institutions because the length of time varied for institutions with multiple BSA violations.

Source: OIG analysis of VISION data and review of evaluation reports and supplemental information provided by DSC for the 41 sampled institutions.

DSC officials stated that follow-up on BSA violations often occurs at the next FDIC examination rather than between examinations. Although the FDIC can conduct visitations between regularly scheduled examinations, we identified only a few visitations based on information provided by the DSC that addressed BSA violations.

Generally, the FDIC alternated examinations of the sampled institutions with state regulatory agency examinations for those institutions. However, 45 of the 72 examination reports we reviewed from state regulatory agencies did not specifically address BSA compliance. Therefore, the FDIC could not rely on those examinations to determine whether bank management took corrective actions to address previously cited violations or to identify any new BSA violations. Consequently, follow-up by the FDIC on some previously cited BSA violations did not occur until the next FDIC examination, generally 24 to 36 months after the violations were initially identified.

The following examples illustrate inadequate follow-up on BSA violations and regulatory actions imposed and the timeliness of those actions.

- During a joint examination conducted in [REDACTED] 1997, examiners identified significant deficiencies in the bank's BSA policies and operating procedures. Examiners concluded that the bank's BSA compliance program was inadequate and in immediate need of revision. The bank was cited for:
 - failure to have an adequate written bank board of directors-approved BSA compliance program,
 - lack of independent testing of BSA compliance,
 - failure to designate individuals responsible for BSA compliance,
 - failure to provide adequate BSA training—overall noncompliance with the FDIC's Section 326.8 minimum requirements—and
 - one violation related to Treasury's Part 103.

The bank's president promised to take corrective action necessary for the cited violations. At the [REDACTED] 1999 examination, the bank was cited for having an inadequate system of internal controls and lack of independent testing. During the *** [REDACTED] 2002 examination, the bank was cited for numerous violations of Treasury's Part 103, an inadequate system of internal controls for BSA compliance, and SAR violations. FDIC officials stated that no follow-up visitation was conducted for this institution after the [REDACTED] 1999 examination and that given the promise of corrective action by the bank president within 90 days of receipt of the report, as stated in the report of examination, further follow-up was apparently determined to be unnecessary. In [REDACTED] 2003, however, the FDIC entered into a Memorandum of Understanding with the bank for various safety and soundness issues and BSA compliance concerns.

- During examinations conducted in [REDACTED] 1997, [REDACTED] 1999, and [REDACTED] 2002, a bank was cited for violations related to the lack of independent testing of BSA compliance, failure to provide adequate BSA training, and violations related to the Treasury Department's Part 103. However, no adequate bank corrective action or supervisory

action was taken until after the [REDACTED] 2002 examination. The FDIC issued a cease and desist order effective [REDACTED], 2002, more than 5 years after the violations were initially cited. Violations related to the lack of independent testing and failure to provide adequate BSA training were repeat violations during the 1999 and 2002 examinations. The DSC issued a cease and desist order on [REDACTED], 2002 which was terminated in [REDACTED] 2002.

- During an examination conducted in [REDACTED] 1998, a bank was cited for violations related to a lack of independent testing for BSA compliance and failure to designate individual(s) responsible for BSA compliance. Violations of lack of independent testing was cited again during the [REDACTED] 2001 and [REDACTED] 2003 examinations—three consecutive FDIC examinations. Supervisory action was not taken until [REDACTED] 2003, when the FDIC, state regulatory authority, and the bank signed a memorandum of understanding to correct the BSA violations, more than 5 years after the violations were initially cited.
- During an [REDACTED] 1998 examination, a bank was cited for violations related to the failure to file CTRs, failure to furnish information on CTRs, improper exemptions, and failure to develop or implement an adequate BSA compliance program. The next examination, conducted in [REDACTED] 2001, cited the bank for: failure to follow identification procedures or failure to record identification method, untimely filing of CTRs or failure to retain CTRs for 5 years, failure to furnish information required in CTRs, and failure to develop or implement an adequate BSA compliance program. DSC officials stated that the violations cited in the 1998 examination and repeat violations cited in the 2001 examination triggered a supervisory response requiring a progress report from the bank and the on-site visitation conducted in [REDACTED] 2001.

DSC conducted a follow-up visit in [REDACTED] 2001 and cited the bank for continued violations for: failure to file CTRs for nonexempted transactions over \$10,000, untimely filing of CTRs or failure to retain CTRs for 5 years, and failure to furnish information required in CTRs. The visitation showed that bank management's documentation of BSA training efforts needed improvement, the scope of the independent review needed to be enhanced, and internal controls could be strengthened. The visitation also noted a couple of previously cited violations involving transactions prior to the [REDACTED] 2001 examination that either had not been corrected or the bank had not retained evidence of correction. Further, the visitation identified new violations related to the failure to furnish information required in CTRs, no record at FinCEN of IRS receipt of CTRs, and untimely filings of CTRs or failure to retain CTRs for 5 years. Based on the progress report and the visitation, DSC concluded, however, that the bank was making a good faith effort to comply with BSA and deemed that no further supervisory efforts were necessary other than regular examinations.

In contrast to the previous examples, DSC took prompt action for an institution with similar violations. During a joint examination conducted in [REDACTED] 2003 by the FDIC and the state regulatory agency, the examiner concluded that the bank's BSA program was less than satisfactory and further stated that the bank was in apparent violation of virtually every

requirement of Section 326.8 of the FDIC Rules and Regulations. The bank was cited for the following violations related to the Treasury Department's Part 103, FDIC's Section 326.8 and Section 353:

- failure to file CTRs for nonexempted transactions over \$10,000;
- failure to treat multiple transactions totaling over \$10,000 as a single transaction;
- failure to develop or implement an adequate BSA compliance program;
- failure to have adequate written board-approved BSA compliance program;
- inadequate system of internal controls for BSA compliance;
- lack of independent testing of BSA compliance;
- failure to designate individuals responsible for BSA compliance;
- failure to provide adequate BSA training; and
- various violations related to SARs.

Within 6 months after the examination, the FDIC issued a proposed cease and desist order. The bank responded with evidence that it had taken material steps to improve its BSA compliance. DSC conducted a visitation the following month to assess the bank's progress and concluded that the bank had exerted considerable effort in addressing the violations but that additional effort was necessary to make the bank's BSA program satisfactory. After the visitation, the DSC provided an MOU to the institution to address the remaining concerns. The MOU became effective in [REDACTED] 2004.

As discussed previously, the DSC conducts examinations of its supervised institutions on a 12- or 18-month cycle and usually alternates examinations with state regulatory authorities. Since the state regulators do not usually review BSA compliance at their examinations, 2 to 3 years can elapse until the next FDIC examination without any follow-up on BSA violations. This delay in ensuring that BSA violations are corrected could result in additional or continued BSA violations and could hinder the detection of criminal activity.

CONCLUSION AND RECOMMENDATIONS

The DSC has adequately followed up on some BSA violations to ensure bank management has taken appropriate corrective action. However, the DSC could better ensure that prompt and effective actions are taken by bank management to ensure compliance with BSA regulations.

In light of the increased congressional interest in BSA compliance and emphasis on national security concerns, DSC should re-evaluate and update its examination guidance to help ensure adequate DSC follow-up and timely corrective action by bank management. DSC should also discuss and update the referral policy with the Treasury Department, encourage state coverage of BSA compliance, and develop alternative processes to compensate for the lack of state coverage of BSA compliance. We noted that DSC is currently conducting a reassessment of its BSA-related policies and procedures to update its BSA guidance and may be able to address our recommendations in conjunction with this assessment.

Recommendations

We recommend that the Director, DSC:

- (1) Re-evaluate and update examination guidance to strengthen monitoring and follow-up processes for BSA violations, including:
 - prompt, appropriate, and consistent regulatory action in cases where management action is not timely, including cease and desist orders for repeat violations as appropriate;
 - consistent and timely follow-up of BSA violations between examinations to ensure management is taking corrective action;
 - consistent citation and recordation of all apparent violations in reports of examination and in ViSION; and
 - a consistent approach to the backfiling of CTRs.
- (2) Review DSC's implementation of the process for referring institution violations of BSA to the Treasury Department, and discuss with Treasury the need to update or modify the referral guidelines based on changes in priority and approach in recent years.
- (3) Coordinate with state regulatory agencies to cover BSA compliance in state examinations of FDIC-supervised institutions and for those states that do not cover BSA compliance, develop an alternative FDIC process to address BSA compliance when relying on alternating state examinations.

CORPORATION COMMENTS AND OIG EVALUATION

On March 22, 2004, the DSC Director provided a written response to the draft report. The response is presented in Appendix IX to this report. DSC concurred with the three recommendations. As part of its appended response, DSC provided a legal opinion by the FDIC General Counsel and an unaudited DSC internal assessment of its program to evaluate bank compliance with the BSA.

In addressing Congress's intent in Section 8(s) of the FDI Act, which states that the appropriate federal banking "agency shall issue an order... requiring such depository institution to cease and desist from its violation" in cases of repeat violations of requirements for establishing and maintaining BSA procedures, the General Counsel's legal opinion provides the following guidance:

The absence of a mandate to bring a cease and desist action to address every violation of Section 8(s) or the regulations does not imply that the alternative is to take no action. To the contrary, the statutory intent must be to take an appropriate corrective action based upon the severity of the problem, the risks it poses, and the bank's willingness to comply expeditiously.

The audit, however, identified cases where DSC had not taken regulatory action to address repeat violations of these BSA requirements. We also observed numerous violations for which bank management indicated a willingness to take corrective actions to prevent recurrence of those violations. However, in several cases, corrective action either was not implemented or was implemented but was not effective in preventing repeat violations. In our opinion, a bank's indicated willingness to correct violations should be only one factor considered in determining whether to impose regulatory action. This conclusion is also supported by the FDIC's *Formal and Informal Action Procedures Manual*, which states that "The belief that the institution's management has recognized the deficiencies and will institute corrective action is not a sufficient basis, in and of itself, to preclude taking corrective action."

DSC's response provided detailed analyses and comments on several issues that relate to DSC's overall BSA program. Because our audit focused on supervisory actions taken in response to BSA violations, not DSC's overall BSA program, we offer no response to these comments. However, in reviewing DSC's other comments that relate generally to our audit and specifically to our audit results and scope, there are several issues that warranted further discussion and clarification.

General DSC Comments on Audit

1. DSC Statement:

"... the DSC's approach has been to differentiate between serious BSA program problems within an institution versus isolated and technical weaknesses. In practice, isolated and technical weaknesses can be addressed within the normal course of supervisory process."

OIG Response:

During this audit, DSC officials initially stated that they do not "... generally characterize BSA violations as either substantive or technical," consistent with the "zero tolerance" policy espoused by the Treasury Department. Accordingly, we included in the universe for the selected sample all BSA violations recorded in ViSION. We based our analyses and conclusions on the premise that DSC's approach to such violations would not differentiate between substantive and technical violations. After being provided the preliminary results of the audit, DSC then indicated that, in fact, it does differentiate between BSA violations based on significance, but could provide no basis upon which these determinations are made. Contrary to DSC's assertion, for the sample of institutions we reviewed, we found little or no evidence to indicate that there was a distinction made among BSA violations in deciding whether or in what manner follow-up action would be taken.

2. DSC statement:

“Therefore, we do not concur with the inference that the FDIC’s supervisory actions are materially lacking or that an increased risk of money laundering exists in the institutions for which we are the primary federal regulator.”

OIG response:

We continue to conclude that the FDIC needs to strengthen its follow-up process for BSA violations, based on the following:

- Of the 41 institutions sampled, 27 institutions (66 percent) had repeat violations for multiple examinations; 17 (63 percent) of the 27 institutions did not have any type of regulatory action imposed.
- Of the 17 institutions for which no regulatory actions had been taken, 15 had repeat violations related to FDIC’s Section 326.8, which establishes the minimum requirements for a BSA compliance program.
- We reviewed 82 reports for the 41 sampled institutions. Twenty-five (30 percent) of the reports cited violations for which the DSC waited until the next examination to follow up. Additionally, in many cases, alternating examinations conducted by state regulatory agencies did not address BSA and/or did not follow up on previous violations cited in FDIC reports of examinations. For those states that do not assess BSA compliance, 2 to 3 years could elapse without BSA examination coverage for institutions in those states.
- DSC regional and field offices are inconsistent in deciding whether or when to follow up on BSA violations or to take regulatory action.
- Numerous reports of examination described deficient BSA compliance programs but did not cite violations, which we have concluded may receive less attention from bank management and from the DSC in its follow-up efforts.
- Inconsistencies exist among DSC regional offices in deciding how to handle violations related to the backfiling of CTRs.
- Inconsistencies exist among DSC regional offices in making referrals to the Treasury Department; of the 34 referrals made by the FDIC, 28 (82 percent) were made by 1 DSC regional office.
- All identified BSA violations have not been included and tracked in the FDIC’s automated system, ViSION, and as a result, not all BSA violations have been reported to the Treasury Department.

These problems, taken collectively, represent increased risk of illegal activity going undetected and unreported.

3. DSC statement:

“In 38 of the 41 cases, we found the supervisory actions to be consistent with the problems identified and the risks posed by the circumstances.”

OIG response:

These 38 cases included 25 institutions with repeat violations and 13 institutions that did not have repeat violations. Of these 25 institutions with repeat violations, 15 institutions

(60 percent) had been cited for violations of the FDIC's Rules and Regulations Section 326.8, indicating noncompliant BSA programs for multiple examinations. Ten institutions (40 percent) had been cited for repeat violations related to either the Treasury Department's Part 103 or the FDIC's Section 353.3, indicating noncompliance with Treasury's reporting and recordkeeping requirements related to CTRs or SARs. Many of these institutions with repeat violations were not subject to any regulatory action. In our opinion, regulatory action was appropriate under these circumstances.

4. DSC statement:

"The OIG also did not look at supervisory actions taken in instances of serious BSA program deficiencies, analyze the risk for money laundering in the sample institutions, have discussions with examiners, or assess the BSA examination process."

OIG response:

DSC has introduced matters that were not the subject of this audit. We selected a sample of institutions with BSA violations identified by FDIC examiners. We did not add to our sample those institutions for which DSC considered that it had done a good job of addressing BSA program deficiencies. Similarly, we did not alter our sample to focus on institutions that DSC now considers being at higher risk for illegal activities. There was no evidence to indicate that DSC had systematically analyzed the risks at our sample institutions. The documented risk analyses provided to us after our audit had started were not contemporaneously prepared with the BSA examinations performed. We did not include the entire BSA compliance examination program in the scope of our audit. Therefore, we did not interview examiners or review examination working papers. Those activities were not required to meet our audit objectives. Rather, we focused on actions taken on reported violations. During the audit, however, we did provide our analysis of BSA actions to DSC and requested DSC to address the questions we raised and provide its input on our preliminary findings. In doing so, we relied on DSC management to enlist appropriate staff, including examiners, in providing its responses and any additional evidence of supervisory actions for us to consider in reaching our conclusions.

5. DSC statement:

"We do not concur with the OIG's criticism that recommendations for improvement and the supporting discussion may be confused with apparent violations of the BSA."

OIG Response:

The requirements for an adequate BSA compliance program based on the FDIC's Rules and Regulations Section 326.8 are explicit. Each FDIC-supervised institution is required to develop and administer a program to ensure compliance with the BSA and 31 C.F.R. Part 103. The institutions' boards of directors must approve the compliance program in writing and in accordance with Section 326.8(c). The program should include four minimum requirements:

- a system of internal controls to assure ongoing compliance,
- independent testing for compliance with the BSA and 31 C.F.R. Part 103 to be conducted by bank personnel or an outside party,

- designation of individual(s) responsible for coordinating and monitoring compliance with the BSA, and
- training in BSA requirements for appropriate personnel.

Accordingly, our position is that institutions not meeting the minimum requirements specified by Section 326.8 do not have an adequate BSA compliance program and have violated the BSA. We noted cases in which FDIC examiners described deficiencies in institutions' BSA compliance programs, including cases in which the programs did not meet the minimum requirements outlined in Section 326.8. However, the examiners did not specifically cite the deficiencies as BSA violations.

We continue to conclude that deficiencies described in the reports of examination, but not cited as violations in the *Violations of Laws and Regulations* section of the reports or recorded in ViSION, receive less attention from bank management and/or in follow-up by the DSC. Documentation provided by DSC on follow-up of examination results did not identify responses from bank management on deficiencies that were described but not cited as violations in reports of examination. In addition, we identified multiple examinations that described but did not cite violations, allowing them to continue for extended periods. In some cases, subsequent examinations cited the violation. We also noted that examiners were inconsistent in citing BSA violations – the same violations at different institutions were being treated dissimilarly for examination report purposes.

General Comments on Audit Results

1. Our determination of the adequacy of follow-up for BSA violations that had been cited for the sampled institutions was based on the (1) timeliness of corrective action by bank management and/or follow-up by the FDIC and (2) effectiveness of follow-up in preventing repeat BSA violations. We continue to conclude that it is ineffective to wait for follow-up until subsequent examinations, especially when state regulatory agencies do not review BSA. In addition, we continue to conclude that BSA violations, particularly repeat violations, should be followed up in a timely, effective manner, regardless of an institution's location, asset size, deposit base, familiarity with its customer base, stability of management and employee base, and number of reportable transactions. Delays or inadequate follow-up can send the wrong message to possible wrongdoers – that BSA violations receive less attention at certain types of institutions, such as those that do not fit DSC's high-risk profile. Also, more serious consideration of other forms of regulatory action, up to and including cease and desist orders, is warranted.
2. DSC stated that our evaluation of the adequacy of follow-up for the 41 sampled institutions did not consider DSC's categorization of "BSA/AML risk profiles" (BSA/anti-money laundering). However, according to DSC, the division did not have BSA risk-profile definitions and had no plans to define BSA risk profile(s). During the audit, DSC requested regional and area office officials to (1) evaluate BSA risk for the institutions included in our sample so that DSC could make an evaluation of each situation and (2) focus on the institutions that we identified as receiving less than "adequate" corrective action by the bank

or follow-up by DSC personnel. In the regions' efforts to evaluate each institution and in cases where the audit report identified deficiencies, DSC also asked the regions to assess the money-laundering vulnerability of each institution based on factors relevant to each institution and to the specific situations we identified. We concluded that those assessments were not prepared contemporaneously with the examinations, but were made only for the purpose of responding to our audit. Therefore, the assessments were not official management tools to assist in planning or conducting the examinations. However, in reviewing information DSC provided in its official written response relative to the BSA risk profiles, including whether the institutions were located in Metropolitan Statistical Areas (MSAs) and High Intensity Money Laundering and Related Financial Crime Areas (HIFCAs), we noted the following for the institutions for which regulatory actions had been taken by the DSC or initiated by state regulatory agencies:

- Our review of the 41 sampled institutions identified 11 for which regulatory actions had been taken. Of these 11 institutions, 9 (80 percent) were not located in MSAs and 9 (80 percent) were not located in HIFCAs.
- According to the examination reports that prompted regulatory action, four institutions had composite ratings of 2 and management ratings of 2. DSC considered three of the four institutions to have a “low” BSA risk profile. The remaining institution was located in an HIFCA.
- According to the examination reports that prompted regulatory action, four institutions had composite ratings of 3 and management ratings of 3. One of the four institutions was considered by the DSC to have a “high” BSA risk profile. The remaining three institutions were not located in either an MSA or HIFCA.
- According to the examination reports that prompted regulatory action, three institutions had composite ratings of 4 and management ratings of 3, 4, or 5.
 - The one institution with a 3 management rating was issued a cease and desist order; the institution was not located in either an MSA or HIFCA and had a “low” BSA risk profile according to DSC.
 - The institution with a 4 management rating was issued a memorandum of understanding and had a “moderate/low” BSA risk profile according to DSC.
 - The institution with a 5 management rating was issued a determination letter but had a “low” BSA risk profile according to DSC.

Based on this analysis, neither the institution's BSA risk profile nor its location in an MSA or HIFCA appeared to play a significant role in determining whether to impose actions against the institutions. Only 1 of the 11 institutions had a high BSA risk profile assigned by the DSC, and only 2 were located in HIFCAs. Additionally, actions were not imposed on three institutions with repeat BSA violations which DSC identified as having a “moderate” or “moderate/high” risk profile.

3. Our review of information provided by the DSC regarding referrals made to FinCEN for FDIC-supervised institutions showed that there were 208 referrals during the audit scope period of January 1, 1997 through September 30, 2003. Of those 208 referrals, DSC made only 34 referrals (16 percent), and the remaining referrals were made by other sources, such as FinCEN, the IRS, or the institutions themselves. As previously indicated, 28 of these 34 referrals were made by 1 of the 6 DSC regions.

General Comments on Audit Scope

1. We informed the DSC of our audit scope and methodology for achieving the audit objective. The objective was to review a sample of BSA violations for the audit scope period to determine whether DSC adequately follows up on BSA violations reported by examinations of FDIC-supervised financial institutions to ensure that institutions take appropriate corrective action. Accordingly, we limited the audit results and findings to issues specifically related to the agreed-upon audit objective. We based our conclusions on the FDIC's automated system data, supplemental data provided by the DSC, and our review of reports of examination from both the Corporation and state regulatory agencies. The FDIC did not inform us until the end of our field work that it had identified inaccuracies in BSA data resident in its information systems resulting from the conversion from a prior system to ViSION. For the institutions in our sample, we verified the data used in this audit to the reports of examination and DSC's supplemental data.
2. The banks which DSC referred to in its response as "inactive" became inactive more than 12 months after the examinations for which BSA violations had been cited. Accordingly, we did not delete those institutions from the sample selection. In addition, two other institutions referenced in DSC's response had been deleted from our sample analyses and were not included in our findings and conclusions.
3. DSC's comment that we did not request reports of examination for one of the sampled institutions is incorrect because we made a global request for all reports of examination associated with the institutions in our sample, including the FDIC's examination reports and those from state regulatory agencies.
4. DSC stated that the community banks it supervises have a strong inherent deterrent to money laundering because they operate in areas where bank management's knowledge of customers is high, making criminal activity harder to disguise. This information is relevant to the examination and potentially to reporting BSA violations, but not to the pursuit of corrective action on known BSA violations. We did not assess how well management for the 41 sampled institutions knows their customers, but limited our assessment of BSA compliance to (1) results described in the examination reports and captured in ViSION and (2) information on the regulatory actions imposed for noncompliance.

During our audit, the FDIC did not have a corporate objective specifically related to BSA. However, in the course of preparing our final report, we became aware that such an objective recently had been established. The Corporation's final 2004 Corporate Performance Objectives, as approved by the FDIC Chairman, includes the following objective:

Implement revised examination and enforcement strategies/guidance, as appropriate, to address OIG/GAO [General Accounting Office] audit findings relating to the Bank Secrecy Act, anti-money laundering programs, and counter-terrorist financing. Develop and implement a communications strategy to facilitate industry understanding of newly implemented regulations in these areas.

We support this objective as a positive action on the part of the Corporation because the objective will prompt a concerted effort and focus attention on strengthening follow-up on reported BSA violations.

DSC Responses to OIG Recommendations

Presented below are DSC's responses to the specific recommendations made in our audit. The recommendations are considered resolved, undispositioned, and open until the corrective actions are implemented.

Recommendation 1: Re-evaluate and update examination guidance to strengthen monitoring and follow-up processes for BSA violations, including:

- **prompt, appropriate, and consistent regulatory action in cases where management action is not timely, including cease and desist orders for repeat violations as appropriate;**
- **consistent and timely follow-up of BSA violations between examinations to ensure management is taking corrective action;**
- **consistent citation and recordation of all apparent violations in reports of examination and in ViSION; and**
- **a consistent approach to the backfiling of CTRs.**

DSC agreed with this recommendation. By March 30, 2005, and as part of current initiatives to revisit and update FDIC guidance and with inter-agency cooperation, the DSC will address formal supervisory actions, follow-up actions, citation of apparent violations and recordkeeping, and backfiling of CTRs. The DSC will also work with the FDIC Legal Division to clarify and update, as necessary, enforcement action guidance on BSA.

Recommendation 2: Review DSC's implementation of the process for referring institution violations of BSA to the Treasury Department, and discuss with Treasury the need to update or modify the referral guidelines based on changes in priority and approach in recent years.

DSC agreed with the recommendation. By year-end 2004, the DSC representative to the Financial Crimes Enforcement Network's Bank Secrecy Act Advisory Group will introduce the question raised on referral guidelines at an upcoming meeting of the group.

Recommendation 3: Coordinate with state regulatory agencies to cover BSA compliance in state examinations of FDIC-supervised institutions and for those states that do not cover BSA compliance, develop an alternative FDIC process to address BSA compliance when relying on alternating state examinations.

DSC agreed with this recommendation. DSC stated that it is focused on strengthening processes to address variations in the state examination coverage of BSA and believes this action will increase the consistency and reliability of the follow-up to its BSA examinations. DSC expects to complete its review and revisions to BSA guidelines and procedures for BSA coverage during state examinations by March 30, 2005.

OBJECTIVE, SCOPE, AND METHODOLOGY

Objective

The audit objective was to determine whether the Federal Deposit Insurance Corporation (FDIC) Division of Supervision and Consumer Protection (DSC) adequately follows up on reported Bank Secrecy Act (BSA) violations to ensure that institutions take appropriate corrective action. To accomplish our objective, we reviewed supervisory actions that DSC has taken to ensure compliance, including efforts to follow up with bank management after examinations and the use of regulatory actions to prompt management action. We conducted the audit in accordance with generally accepted government auditing standards from November 2003 through January 2004.

Scope and Methodology

We held an entrance conference and conducted interviews with officials from DSC headquarters and DSC's regional and area offices. In addition, we held periodic briefings with DSC officials and solicited their opinions and comments regarding the BSA violations and supervisory actions included in our review. We also interviewed officials in DSC's Special Activities Section who are responsible, along with regional offices, for coordinating and monitoring DSC's field and regional efforts for identifying, reporting, and tracking BSA violations and issuing related enforcement actions.

To gain an understanding of procedures that the DSC uses to determine compliance with the BSA, we reviewed the *DSC Manual of Examination Policies*, and various transmittals, directives, and guidelines issued by the FDIC or the Treasury Department. Further, we reviewed DSC memoranda to obtain an understanding of the processes and procedures used to identify, report, track, and follow up on BSA violations. We also interviewed officials responsible for the Virtual Supervisory Information On the Net system (ViSION), the automated system used by the DSC to compile information on BSA violations as well as to track these violations.

We also reviewed data from applicable FDIC automated systems; reviewed information from other sources, including FDIC and state reports of examination (ROEs); and analyzed DSC supplemental data, including information from FDIC correspondence files and data on the overall profile of financial institutions. To determine the number and type of BSA violations identified during DSC's examinations of FDIC-supervised institutions from January 1, 1997 to September 30, 2003, we obtained and reviewed ViSION data that included the following:

- each institution's certificate number, name, and location;
- dates of ROEs that reported BSA violations;
- BSA violation codes, descriptions, and numbers of occurrences; and
- types of violations (including repeat and nonrepeat violations).

Table 4 provides a synopsis of the ViSION data, by DSC regional and area offices.

Table 4: FDIC-Supervised Financial Institutions With BSA Violations From January 1, 1997 Through September 30, 2003 and Financial Institutions With Repeat Violations Based on ViSION Data

DSC Regional or Area Office	Number of Financial Institutions With BSA Violations ^a	Number of Financial Institutions With Repeat BSA Violations ^b	Percent of Regional/Area Office Institutions With Repeat BSA Violations
Atlanta	234	44	19
Boston	142	23	16
Chicago	446	43	10
Dallas	284	52	18
Kansas	963	205	21
Memphis	348	68	20
New York	72	3	4
San Francisco	183	20	11
Totals	2,672	458	17

^aTotal number of financial institutions that had one or more BSA violations recorded in ViSION for examinations completed during the period noted.

^bTotal number of financial institutions that had one or more BSA violations recorded in ViSION for examinations completed during the noted period, with at least one of those violations identified as a repeat violation.

Source: OIG review of ViSION data on BSA violations for the noted period.

Based on the ViSION data, we selected a random sample¹⁹ from the universe of BSA violations and a judgment sample of repeat violations. Of the total 2,672 financial institutions for which BSA violations had been reported in ViSION, we reviewed 41 institutions in detail. The random sample consisted of 22 institutions selected from the 8 DSC regional or area offices, and the other 19 institutions consisted of a judgment sample of institutions with repeat violations. Of those 19 institutions, we confirmed that 18 had repeat violations. The random sample of 22 institutions also included 9 institutions with repeat violations so that, in total, 27 institutions with repeat violations were in our sample. Table 5 provides a breakdown of those 41 institutions, by FDIC office.

¹⁹From the random sample of institutions with BSA violations, we judgmentally selected three institutions from each regional and area office for detailed review. We restricted the sample size to three rather than five due to the constricted time frame to complete the audit. The selection of those institutions for review was based strictly on the randomly generated numbers without giving any consideration for the institutions' violations recorded in ViSION or demographic information. We later made adjustments to the number of randomly selected institutions reviewed as shown in Table 5.

Table 5: Financial Institutions Selected for Review

DSC Regional or Area Office	Universe of Financial Institutions With BSA Violations	Number of Financial Institutions Included in OIG Sample		
		Initial Selection	Number of Deleted Institutions*	Total Included in OIG Analyses
Atlanta	234	6	0	6
Boston	142	6	4	2
Chicago	446	6	0	6
Dallas	284	6	0	6
Kansas City	963	6	0	6
Memphis	348	6	0	6
New York	72	6	2	4
San Francisco	183	6	1	5
Total	2,672	48	7	41

*Includes financial institutions that (1) became inactive or merged with another institution less than 12 months after BSA violations were identified, (2) were cited for BSA violations in examinations conducted less than 12 months before the end of the audit scope period, and (3) were determined not to be institutions with repeat violations, which was the initial basis for their selection.

Source: OIG review of ViSION data on BSA violations for the period January 1, 1997 through September 30, 2003; and FDIC institution directory information on the status of financial institutions.

Our specific objectives in reviewing the sampled financial institutions were to determine:

- the types of BSA violations identified during examinations;
- the types of corrective actions that financial institution management implemented or the supervisory actions FDIC pursued for BSA violations;
- differences in the type of BSA violations and actions recorded in ViSION and in the ROEs; and
- whether enforcement actions were recorded in the FDIC's Formal and Informal Action Tracking system²⁰ (FIAT) for BSA violations identified for the sampled institutions.

In addition, we requested that DSC provide all ROEs for the sampled 41 financial institutions for the period January 1, 1997 through September 30, 2003. Nine of those ROEs were not available for review, primarily for examinations conducted January 1, 1997 through December 31, 1999, because the ROEs either had been archived and were not retrieved or were state examination reports that had not been retained and, therefore, were not available. Because the FDIC and state regulatory agencies usually alternated examination responsibilities and may occasionally conduct joint examinations, we also requested and reviewed available state examination reports for the sampled financial institutions for the same period. We reviewed 200 ROEs—128 ROEs from the FDIC and 72 ROEs from state regulatory agencies.

²⁰FIAT is the FDIC's system for tracking the status of informal supervisory actions and formal enforcement actions. In conjunction with reviewing information from FIAT, we also reviewed FDIC's *Formal and Informal Action Procedures Manual*.

To determine the number and type of regulatory actions related to BSA in general and specifically for our sampled institutions, we reviewed reports on formal and informal actions recorded in FIAT and supplemental information that DSC provided. We also discussed the FDIC's position on the circumstances for which the FDIC might consider formal or informal actions for BSA violations.

We provided specific questions on the BSA violations to DSC officials and requested that they provide supplemental information on (1) related corrective actions taken by bank management or regulatory actions imposed by the FDIC and (2) follow-up activities conducted by the FDIC on those violations. For those institutions that were cited for BSA violations related to the filing of Currency Transaction Reports (CTR), we used the FDIC's CTR Backfiling Request report for the period January 1, 1999, through September 30, 2003, in conjunction with supplemental information from DSC, to determine whether CTRs had been filed for the previously cited violations. Because DSC examiners were not required to track BSA violations related to Suspicious Activity Reports (SAR) in the FDIC's ViSION system prior to October 2003, our review of SAR violations was limited to information obtained from ROEs provided to us for the sampled institutions.

Our verification of computer-processed data was limited to comparing data obtained from ViSION to data reported in the ROEs and DSC's supplemental information. We identified inconsistencies in some of the ViSION data when compared to the ROEs and supplemental information. According to DSC officials, the March 2003 conversion from a prior system to ViSION may have led to incomplete records in ViSION for information predating the conversion, and system data entered prior to the conversion may not be fully complete or accurate because edit checks were less thorough in the previous system. To compensate for these inconsistencies, we based our observations on a pooling of the data available from multiple hardcopy and electronic sources and did not rely on any one source except in making our initial sample selection from the data in ViSION. However, we did not validate DSC's assertions and there is a risk that our audit procedures may not have identified instances, if any, where violations were not included in the prior system and thus not reported to Treasury.

Management Controls Reviewed

We gained an understanding of the management control activities associated with the identification, reporting, and tracking of BSA violations by reviewing DSC's policies and examination procedures and by performing limited testing of ViSION data. Additionally, we reviewed FDIC's responsibilities as a financial institution supervisor related to the following:

- The Bank Secrecy Act of 1970, codified to 31 U.S.C. Section 5311 et seq. (BSA), also known as the Currency and Foreign Transactions Reporting Act.
- Code of Federal Regulations (C.F.R.), Title 31—Money and Finance; Subtitle B—Regulations Relating to Money and Finance; Chapter 1—Monetary Offices, Department of the Treasury; Part 103—Financial Recordkeeping and Reporting of Currency and Foreign Transactions, the BSA's implementing regulations.

- Section 8(s) of the FDI Act, codified to 12 U.S.C. 1818(s), which requires each federal banking agency, including the FDIC, to (a) prescribe regulations requiring insured depository institutions to establish and maintain procedures reasonably designed to ensure and monitor compliance with the BSA, (b) review such procedures during their examinations of these institutions, and (c) enforce compliance with the BSA monetary transaction recordkeeping and report requirements.
- Section 326.8(b) of the FDIC's Rules and Regulations, codified to 12 C.F.R. Section 326.8, which requires each FDIC-supervised institution to develop and administer a program to ensure compliance with the BSA and 31 C.F.R Part 103.
- The FDIC Rules and Regulations 12 C.F.R. Part 353 related to the filing of Suspicious Activity Reports.
- Title 12 U.S.C. 1829b, the recordkeeping requirements for insured financial institutions.

During our review, we identified actions that DSC could take to improve management controls over the corrective action process for BSA violations, as described under Results of Audit.

Government Performance and Results Act

We reviewed DSC's performance measures under the Government Performance and Results Act, Public Law 103-62 (GPRA). We determined that the FDIC did not have a corporate performance objective specifically related to the BSA. However, according to the FDIC's *2003 Annual Performance Plan* and as shown in Table 6 on the next page, the FDIC has established the following strategic goal and objective and annual performance goals related to its supervision and examination responsibilities that include BSA in general.

Table 6: Performance Measures Related to Supervision and Examinations

STRATEGIC GOAL	STRATEGIC OBJECTIVE	ANNUAL PERFORMANCE GOALS
FDIC-supervised institutions are safe and sound.	FDIC-supervised institutions appropriately manage risk.	<p>Conduct on-site safety and soundness examinations to assess an FDIC-supervised insured depository institution’s overall financial condition, management practices and policies, and compliance with applicable regulations.</p> <p>Take prompt supervisory actions to address problems identified during the FDIC examination of FDIC-supervised institutions identified as problem insured depository institutions.</p> <p>Monitor FDIC-supervised insured depository institutions’ compliance with formal and informal enforcement actions.</p>

Source: Federal Deposit Insurance Corporation 2003 Annual Performance Plan.

Fraud and Illegal Acts

The limited nature of the audit objective did not require that we assess the possibility for fraud and illegal acts. Although we were alert to the possibility of fraud and illegal acts, no instances came to our attention.

Prior Audit Coverage

We reviewed the OIG’s audit report entitled *Examination Assessment of Bank Secrecy Act Compliance* (Audit Report Number 01-013, dated March 30, 2001) to obtain an understanding of previous OIG audit work related to the BSA. The objective of that audit was to determine the extent to which FDIC safety and soundness examinations reviewed institutions’ compliance with the BSA. As a result of that audit, the OIG recommended improvements in the FDIC’s documentation of work related to the BSA. FDIC officials generally concurred with the OIG’s recommendations and agreed to implement procedures or issue guidance to address the OIG’s

concerns. We did not follow up on these recommendations or assess the adequacy of BSA examination procedures and documentation during this current audit.

In addition, we coordinated with the U.S. General Accounting Office to determine whether there were any previous or ongoing audits or reviews related to BSA violations by FDIC-supervised institutions and associated supervisory actions. We also reviewed the applicable section of the DSC Regional Office Review Program to determine whether regional office reviews cover BSA violations and BSA-related enforcement actions. Based on these actions, we determined that except for the FDIC OIG's BSA-related report noted above, there was no prior or ongoing work related to the objective of this audit. In addition, we contacted the OIG Counsel's office to obtain information related to statutory requirements and analysis of enforcement authority for the Treasury Department and the FDIC.

We also reviewed Treasury Department Web sites to obtain information on the BSA and a September 2003 report entitled *OTS: Enforcement Actions Taken for Bank Secrecy Act Violations*, which was prepared by the Treasury Department OIG on the Office of Thrift Supervision's BSA enforcement.

During this audit, we did not do the following:

- Determine the adequacy of the examinations that identified the BSA violations.
- Review the underlying workpapers generated by DSC examiners or interview the field office supervisors or examination staff responsible for examining the institutions included in our sample.
- Interview state banking authorities regarding their ROEs or BSA coverage.

**FDIC RULES AND REGULATIONS (12 C.F.R. Section 326.8) ON BSA COMPLIANCE AND
FDIC GUIDELINES FOR MONITORING COMPLIANCE WITH SECTION 326.8**

Section 326.8(b)(1)	Requires that on or before April 27, 1987, each bank shall develop a BSA compliance program and provide for the continued administration of such a program.
Section 326.8(b)(1)	Requires that the BSA compliance program shall be in writing, approved by the board of directors, and noted in the minutes.
Section 326.8(c)(1)	Requires that the written BSA compliance program provide for a system of internal controls to assure ongoing compliance by: <ul style="list-style-type: none"> ➤ identifying all reportable transactions; ➤ ensuring that all required reports are completed accurately and properly filed; ➤ ensuring that customer exemptions are properly granted and recorded; ➤ providing for adequate supervision of employees who accept currency transactions, complete reports, grant exemptions, or engage in any other activity covered by 31 C.F.R. Part 103; and ➤ establishing dual controls and providing for separation of duties.
Section 326.8(c)(2)	Requires that the written BSA compliance program provide for a system of independent testing for compliance by bank personnel or by an outside party. Independent testing should: <ul style="list-style-type: none"> ➤ be conducted at least annually, preferably by the internal audit department, outside auditors, or consultants; and ➤ include, at a minimum: <ul style="list-style-type: none"> • a test of the institution's internal procedures for monitoring compliance with the BSA, • a sampling of large currency transactions followed by a review of CTR filings, • a test of the validity and reasonableness of the customer exemptions granted, • a test of the institution's recordkeeping system for BSA compliance, and • documentation of the scope of the testing procedures performed and the findings.
Section 326.8(c)(3)	Requires that the written BSA compliance program must provide for the designation of an individual or individuals to coordinate and monitor day-to-day compliance. To meet the minimum requirement: <ul style="list-style-type: none"> ➤ each financial institution must designate a senior bank official to be responsible for overall BSA compliance, and ➤ another individual should be designated responsible for the day-to-day compliance.
Section 326.8(c)(4)	Requires that the written BSA compliance program provide for the training of appropriate personnel. At a minimum, a financial institution's training program must: <ul style="list-style-type: none"> ➤ provide training of all personnel whose duties may require knowledge of the BSA, including, but not limited to, tellers, new accounts personnel, lending personnel, bookkeeping personnel, and wire room personnel; ➤ provide an overview of the BSA to new employees; and ➤ include efforts to keep executives informed of changes and new developments in BSA regulation.

SUMMARY OF BSA VIOLATIONS BY TYPE OF VIOLATION FOR 41 SAMPLED FINANCIAL INSTITUTIONS

Violation Category	Violation Code	Number of Institutions With Violations	Description of Violation
Treasury's 31 C.F.R. Part 103	60000	22	Failure to file CTR for nonexempted transactions over \$10,000
	65000	16	Failure to maintain records on sales of monetary instruments of \$3,000 through \$10,000
	63001	14	Failure to furnish information required in CTR
	63000	13	Untimely filing of CTR or failure to retain CTR for 5 years
	60001	10	Failure to treat multiple transactions totaling over \$10,000 as a single transaction
	64000	7	Failure to follow [customer] identification procedures or failure to record identification method
	60004	5	Failure to properly exempt a domestic insured financial institution
	60002	4	Improper designation of exempt person
	60007	4	Failure to file CTR for transactions of an agent of an exempt person
	60006	3	Failure to document monitoring of exempt person transactions
	60003	2	Failure to file designation of exempt person form
	60005	2	Failure to perform annual review of exempt person
	67000	2	Failure to obtain Taxpayer Identification Number (TIN) or keep list of customers with missing TINs
	62000	1	Failure to report foreign financial accounts
	65002	1	Failure to retain records of cash purchases of monetary instruments for 5 years
	68000	1	Failure to retain required records for 5 years
	FDIC's 12 C.F.R. Section 326.8	80004	16
80000		15	Failure to develop or implement adequate BSA Compliance Program
80003		10	Inadequate system of internal controls for BSA compliance
80006		7	Failure to provide adequate BSA training
80005		4	Failure to designate individual(s) responsible for BSA compliance

Source: OIG review of BSA violations identified in ROEs for the sampled 41 institutions for the period January 1, 1997 through September 30, 2003 and DSC Transmittal No. 03-048, dated October 20, 2003, entitled *Bank Secrecy Act Examination Violation Codes*.

Note: Most institutions had multiple violations and, accordingly, the noted violations will not total 41. In addition, when differences were identified between the violation code recorded in ViSION and the description of the violation cited in the ROE, we used the ROE description. Accordingly, totals shown will not match totals shown in ViSION data. Some violations were "grouped" because there was no specific violation code included in DSC's guidance on BSA violation codes for those violations. Some sampled institutions also had violations related to Suspicious Activity Reports. However, because there was no specific code related to SAR violations, they were not captured in ViSION and are not included in this table.

GLOSSARY

Term	Definition
Bank Board Resolutions	Bank board resolutions (BBRs) are informal commitments, developed and adopted by a financial institution's board of directors (often at the request of the FDIC), directing the institution's personnel to take corrective action regarding specific noted deficiencies. BBRs may also be used as a tool to strengthen and monitor the institution's progress with regard to a particular component rating or activity. The FDIC is not a party to these resolutions but may approve and accept them as a means of initiating corrective action.
The Bank Secrecy Act (BSA) of 1970	Codified at 31 U.S.C. 5311-5330 and gives the Treasury Department broad powers to implement anti-money laundering regulations for financial institutions; such regulations are implemented by the Treasury Department through 31 C.F.R. Part 103. The Act consists of two Titles: Title I, Financial Recordkeeping, and Title II, Reports of Currency and Foreign Transactions. Title I authorizes the Treasury Department to issue regulations requiring insured financial institutions to maintain certain records related to financial transactions. Title II directs the Treasury Department to prescribe regulations governing the reporting of certain transactions by and through financial institutions in excess of \$10,000 into, out of, and within the United States.
BSA Regional Report	A report of completed BSA examinations with violations for a specific time period. The report is broken down by region and includes the certificate number, institution name, city, state, examination date, examiner-in-charge, violation code, violation description, number of violations, BSA hours, systemic or repeated violations, and action code.
Cease and Desist Orders	Cease and desist orders authorized by Section 8(b) of the FDI Act may be issued to prevent or halt violations of a law, rule, regulation, or written agreement with the FDIC; written condition imposed by the FDIC; or unsafe or unsound practices.
Civil Money Penalties	Civil money penalties (CMPs) can be imposed on financial institutions for violations of: final and temporary orders, written agreements with the FDIC, laws and regulations, and breaches of fiduciary duty. The Financial Institutions Regulatory and Interest Rate Control Act of 1978 granted the FDIC authority to levy CMPs against both insured financial institutions and individuals for violations of statutes. The Financial Institutions Reform, Recovery, and Enforcement Act of 1989 broadened the scope of conduct for which CMPs can be assessed and significantly increased the amount of the permissible penalties.

MEMORANDUM TO: Stephen M. Beard
Deputy Assistant Inspector General for Audits
Office of Inspector General

FROM: Michael J. Zamorski 
Director
Division of Supervision and Consumer Protection

CONCUR: John F. Bovenzi 
Deputy to the Chairman and
Chief Operating Officer

SUBJECT: Draft Report Entitled *Supervisory Actions Taken for Bank Secrecy Act Violations* (Assignment Number 2004-002)

Thank you for the opportunity to provide comments with regard to the Office of Inspector General ("OIG") draft audit report regarding Supervisory Actions Taken for Bank Secrecy Act Violations. We have very carefully considered the audit findings and your recommendations. Further, the Division of Supervision and Consumer Protection ("DSC") conducted an internal analysis of both the sample of supervisory actions reviewed during this audit and our responsibility under the Bank Secrecy Act ("BSA"). The DSC partially concurs with your findings and recommendations. We are concerned that the limited information and inferences contained in the report may lead a reader to speculate on the severity of the exposure to money laundering and surmise that FDIC supervision is insufficient. Therefore, we do not concur with the inference that the FDIC's supervisory actions are materially lacking or that an increased risk of money laundering exists in the institutions for which we are the primary federal regulator. To the contrary, we affirm that our supervisory approach is risk-focused, effective, timely, and consistent with the expectations of the U.S. Department of the Treasury ("Treasury") for enforcement and referral of potential criminal activity.

Subsequent to questions raised by the OIG during the audit, DSC's Regional and Washington offices undertook a detailed analysis of the OIG's 41-bank sample. In 38 of the 41 cases, we found the supervisory actions to be consistent with the problems identified and the risks posed by the circumstances. In hindsight, the DSC found that in three instances supervisory actions could have been deployed in a better manner. As a result, the lessons learned have been utilized to improve our internal supervisory processes. The FDIC supervises a majority of small community-based institutions which operate with manual and non-complex automated systems.

CORPORATION COMMENTS

Therefore, it is not unusual that a sample of such institutions would yield apparent violations of a technical nature without exposing the institutions' BSA programs to increased money laundering risk. Our community banks actually have a strong inherent deterrent to money laundering since they operate in areas where bank management's knowledge of customers is high, making criminal action harder to disguise. In fact, of the 41 sample banks, 22, or 54%, are very small banks with total assets of less than \$80 Million, and seven more sample banks fall in the under \$150 Million range. Only two of the sample banks were larger than \$1 Billion in total assets. The three institutions that DSC identified where supervisory actions could have been strengthened had total assets of \$10 Million, \$71 Million, and \$187 Million.

According to the DSC's analysis of the OIG's sample banks, the FDIC initiated numerous supervisory actions, consistent with both FDIC and Treasury policy. Significantly, we noted that the OIG sample did not target geographic concentrations of higher money laundering risk or institutions where money laundering has been suspected or detected. The OIG also did not look at supervisory actions taken in instances of serious BSA program deficiencies, analyze the risk for money laundering in the sample institutions, have discussions with examiners, or assess the BSA examination process.

Program problems that may expose an institution to enhanced vulnerability to criminal activity are, as necessary, aggressively addressed with formal actions. However, in the vast majority of cases, an appropriate supervisory response does not include a formal action. The FDIC believes our supervisory approach using technical guidance, moral suasion and a gradual escalation of enforcement action is appropriate. Refer to Exhibit I for a legal interpretation of formal actions for BSA that are authorized under Section 8(s) of the Federal Deposit Insurance Act, 12 USC 1818(s). Further, please refer to Exhibit II, which illustrates the circumstances and the supervisory actions taken in the 17 sample banks referred to by the OIG report as lacking supervisory action. The FDIC's extensive BSA supervisory program and its results are also discussed in detail in Exhibit II.

The DSC agrees that a vigilant Bank Secrecy Act supervisory program requires that appropriate supervisory actions be taken to support compliance with Treasury and FDIC guidance. Our supervisory processes are risk-focused and designed to correlate our efforts to areas of risk, thereby deploying appropriate emphasis across a continuum of low- to high-risk areas. Thorough examiner assessment and our internal supervisory reviews are critical to these determinations. We are committed to proactive, vigilant, and effective examination processes to monitor and mitigate risks in the institutions we supervise. We continue to assess potentially high-risk situations, through onsite and offsite examination programs, and we are confident that our supervision of such situations is effective and efficient.

A prominent strength of our examination process is promoting quality corporate governance through the written discussion of weaknesses and suggestions for improvement that, while not violations of law, are beneficial in guiding necessary improvements. We do not concur with the OIG's criticism that recommendations for improvement and the supporting discussion may be confused with apparent violations of the BSA. The DSC found, after reviewing the OIG

CORPORATION COMMENTS

identified examples, that none of the examination reports contain evidence that apparent violations of law were incorrectly cited.

DSC has undertaken a number of initiatives to evaluate and enhance our Bank Secrecy Act guidance, and with other regulatory agencies we are part of extensive efforts to develop further improvements to detect and prevent criminal activity. The FDIC is a fully engaged partner in industry and government efforts to strengthen homeland security. Refer to Exhibit II for detailed information regarding FDIC and interagency initiatives.

OIG Recommendations and FDIC Management Response

“We (OIG) recommend that the Director, DSC:

- (1) Re-evaluate and update examination guidance to strengthen monitoring and follow-up processes for BSA violations, including:
 - prompt, appropriate, and consistent regulatory action in cases where management action is not timely, including cease and desist orders for repeat violations as appropriate;
 - consistent and timely follow-up of BSA violations between examinations to ensure management is taking corrective action;
 - consistent citation and recordation of all apparent violations in reports of examination and in ViSION; and
 - a consistent approach to the backfiling of CTRs.”

FDIC Action:

By March 30, 2005, and as part of our current initiatives to revisit and update FDIC guidance and with inter-agency cooperation, we will assure that the following items are addressed during our initiatives: formal supervisory actions, follow-up actions, citation of apparent violations and record keeping, and backfiling of CTRs. Additionally, the DSC is working closely with the FDIC Legal Division to clarify, and update as necessary, enforcement action guidance for BSA, and this action will also be completed by March 30, 2005.

- (2) “Review DSC’s implementation of the process for referring institution violations of BSA to the Treasury Department, and discuss with Treasury the need to update or modify the referral guidelines based on changes in priority and approach in recent years.”

FDIC Action:

By year-end 2004, the FDIC will introduce the question raised in the audit report regarding referral guidelines with Financial Crimes Enforcement Network’s Bank Secrecy Act Advisory Group. The DSC representative in the group will request an agenda item be planned for an upcoming meeting and report to the DSC Director.

CORPORATION COMMENTS

- (3) "Coordinate with state regulatory agencies to cover BSA compliance in state examinations of FDIC-supervised institutions and, for those states that do not cover BSA compliance, develop an alternative FDIC process to address BSA compliance when relying on alternating state examinations."

FDIC Action:

The DSC is focused on strengthening processes to address variations in the state examination coverage of BSA. We believe the actions that we will implement will increase the consistency and reliability of the follow-up to our BSA examinations.

The states are represented¹ on the FFIEC by the Conference of State Bank Supervisors ("CSBS") and are therefore part of the interagency process that reviews and issues examination guidance. As part of the current initiative to update FDIC guidance, we will review and revise as needed the guidelines and procedures for BSA coverage during state examinations. This will be completed by March 30, 2005.

¹ CSBS is not an official member of FFIEC, but they do have non-voting representation at both the principal level and the Task Force on Supervision.

General Counsel

March 12, 2004

TO: Michael J. Zamorski
Director
Division of Supervision & Consumer Protection

FROM: William F. Kroener, III
General Counsel

SUBJECT: Interpretation and Application of Section 8(s)

Introduction

We have been asked to opine on the scope of Section 8(s) of the Federal Deposit Insurance Act, 12 USC 1818(s). In brief, Section 8(s), enacted in 1986, requires the FDIC (and other Federal banking agencies) to require the institutions they supervise to establish procedures for complying with the Bank Secrecy Act ("BSA"). It provides that the banking agencies "shall" initiate cease and desist actions for certain problems with these procedures, including problems which were not corrected after the agency informed the bank. The FDIC implemented the statute by promulgating 12 CFR 326.8, and has taken a range of enforcement actions to correct problems. Although many BSA-related problems have been corrected using less formal remedies, the FDIC has issued cease and desist orders under Section 8(b) or (c) for violations that include BSA-related problems.

Issues Presented:

1. What problems or violations does Section 8(s) cover?
 - a. Problems with "procedures" or BSA compliance program vs. failures to comply with BSA or Treasury regulations
 - b. What is a violation which was "previously reported" to the bank?
2. What was Congress's intent in saying in Section 8(s) that the FDIC "shall issue a [cease and desist] order?"

Summary

In our view, Section 8(s)(3) applies to violations that demonstrate a flaw in the BSA compliance procedures or program which are violations of Section 326.8(c) of the FDIC Rules

CORPORATION COMMENTS

March 12, 2004

and Regulations, 12 C.F.R. 326.8(c), not to individual violations of the BSA or implementing regulations (such as isolated instances of misfiling currency transaction reports or suspicious activity reports, or the failure to carry out a piece of an adequate written program). In addition, Section 8(s)(3)(B), with regard to previously reported problems with the procedures, applies only to failures to correct problems identified previously with respect to the procedures, not to chronologically successive violations that do not indicate that the procedures or program are flawed. Moreover, a different procedural or program flaw in each of two consecutive examinations of a bank would not, in our opinion, constitute a "repeat" violation by the bank. Therefore, many problems under and violations of Section 326.8 do not fall within the scope of Section 8(s) regardless of the interpretation of the term "shall" in Section 8(s). In addition, repeat violations of the BSA and its implementing regulations that occur despite the existence of procedures reasonably designed to assure compliance do not, in our view, necessarily fall within the purview of Section 8(s), unless those violations evidence a problem or flaw in the bank's compliance program or procedures.

As to those violations which fall within the scope of Section 8(s), case law establishes that using the word "shall" in a statute may not require an agency to follow the statute in an absolute way. The court cases interpreting statutes most analogous to Section 8(s) interpret the word "shall" to be "directory" rather than mandatory. That is, the statute is intended to guide the agency in the orderly conduct of its business, but not to compel an unduly harsh or unreasonable result. Finally, these interpretations do not diminish the FDIC's authority to correct any violation of the BSA or Part 326.8 by using its enforcement authority under other parts of Section 8 of the FDI Act.

Background

Section 8(s) of the FDI Act, enacted as part of the Anti-Drug Abuse Act of 1986, Public Law No. 99-570, provides that:

- (1) COMPLIANCE PROCEDURES REQUIRED.--Each appropriate Federal banking agency shall prescribe regulations requiring insured depository institutions to establish and maintain procedures reasonably designed to assure and monitor the compliance of such depository institutions with the requirements of subchapter II of chapter 53 of title 31, United States Code.
- (2) Examinations of depository institutions to include review of compliance procedures.--
 - (A) IN GENERAL.--Each examination of an insured depository institution by the appropriate Federal banking agency shall include a review of the procedures required to be established and maintained under paragraph (1).
 - (B) EXAM REPORT REQUIREMENT.--The report of

CORPORATION COMMENTS

March 12, 2004

examination shall describe any problem with the procedures maintained by the insured depository institution.

- (3) ORDER TO COMPLY WITH REQUIREMENTS.--If the appropriate Federal banking agency determines that an insured depository institution--

(A) has failed to establish and maintain the procedures described in paragraph (1); or

(B) has failed to correct any problem with the procedures maintained by such depository institution which was previously reported to the depository institution by such agency, the agency shall issue an order in the manner prescribed in subsection (b) or (c) requiring such depository institution to cease and desist from its violation of this subsection or regulations prescribed under this subsection. [Emphasis added.]

Shortly after enactment of Section 8(s), the FDIC and other Federal banking agencies ("FBAs") and NCUA, in a joint rulemaking, issued parallel rules to implement Section 8(s). 52 Fed. Reg. 2858 (Jan. 27, 1987). The FDIC's rule, 12 CFR 326.8, requires each state nonmember bank to establish and maintain a compliance program to assure and monitor the bank's compliance with the requirements of the Bank Secrecy Act ("BSA") and the implementing Treasury regulations, 31 CFR Part 103.

Discussion

1. What problems or violations does Section 8(s) cover?

a. Problems with "procedures" or BSA compliance program vs. failures to comply BSA or Treasury regulations

We interpret Section 8(s) to apply only to violations that demonstrate a flaw in a bank's BSA compliance procedures or program, not to individual violations of the BSA or implementing regulations. The language of section 8(s) clearly applies to problems with the "procedures," as opposed to other statutes and regulations that authorize sanctions for failure to file a particular report or keep a particular record. An example of a problem which would be outside the scope of the statute would be where a bank had adequate procedures and training for filing Suspicious Activity Reports (SARs), but the FDIC disagreed with the bank's decision not to file a SAR for a particular transaction. While there is no concrete definition of a problem with the "program" or "procedures," some problems clearly would be a program/procedures problem. Failing to maintain a program at all or one or more elements that are required by Section 326.8 would be such a problem. For example, the failure to have written training materials, the failure to update them to include important developments such as the enactment of the USAPATRIOT Act, or the failure to ever conduct training, would be a program/procedures problem. It is

CORPORATION COMMENTS

March 12, 2004

possible that multiple problems over time, or a failure to carry out a piece of the program over time, could rise to the level of a program failure. For example, the failure to file CTRs¹ or SARs for a large number of cases over a period of years could indicate a program failure. So could a failure to conduct independent testing for an unduly long period. We believe that Congress intended to let the agencies use their judgment in making these determinations.

The view that Section 8(s)'s scope is limited to flaws in the program or procedures is supported by analyzing the statute within the overall statutory framework, and by how the FDIC and other FBAs understood the statute and implemented it.² In construing Congressional intent behind a statutory provision, courts review statutory provisions within the overall context of the statute and related statutes. *Lexecon Inc. v. Milberg Weiss Bershad Hynes & Lerach*, 523 U.S. 26, 36 (1998). The BSA, and its implementing regulations long predated the enactment of Section 8(s). The BSA was enacted in 1970, and regulations implementing the BSA and governing recordkeeping for financial transactions and reports on transportation of currency were issued in 1972. Section 8(b) and 8(c) of the FDI Act, which authorize the FDIC to issue, respectively, permanent or temporary cease and desist orders against violations of laws or regulations, also predate the enactment of Section 8(s).

When Section 8(s) was enacted, the FDIC and FBAs already had authority to issue cease and desist orders and to impose other sanctions for failures to comply with BSA and Treasury reporting and recordkeeping requirements. The most logical interpretation of the enactment of Section 8(s) is that Congress recognized that this authority existed, but found that without a formal structure in each institution (i.e., established standard procedures constituting a program), the recordkeeping and reporting requirements were inadequate or ineffective. Therefore, it required that banks have formal procedures, or programs, and the FBAs implemented this requirement by regulation. The appropriate interpretation of Section 8(s) is that Congress intended to add a separate provision to assure that banks maintain appropriate procedure and respond to examination and other agency reports of problem with those procedures, since there was already ample authority to remedy individual failures to carry out BSA reporting and recordkeeping requirements, including issuing a cease and desist order under existing statutes.

This interpretation is bolstered by the agencies' implementation of the statute shortly after it was enacted. One factor courts will consider in determining legislative intent is how an agency, contemporaneously with the enactment of the statute, implemented it. *See Zuber v. Allen*, 396 U.S. 168, 192 (1969).

The FDIC's regulation, section 326.8(b), provides that:

¹ CTR is the commonly used shorthand for Currency Transaction Reports.

² We note that Section 8(s) requires "procedures" to monitor and assure compliance with the BSA and implementing regulations, and addresses the remedies for failure to maintain procedures or correct problems with the procedures. As will be discussed, the regulations implementing Section 8(s) require institutions to have a "program." For purposes of this memorandum we view a "program" and "procedures" to be interchangeable.

CORPORATION COMMENTS

March 12, 2004

Each bank shall develop and provide for the continued administration of a program reasonably designed to assure and monitor compliance with recordkeeping and reporting requirements set forth in [the BSA] and the implementing regulations issued by the Department of Treasury at 31 CFR Part 103. The compliance program shall be written, approved by the bank's board of directors, and noted in the minutes.

Section 326.8(c) provides that:

The compliance program shall, at a minimum:

- (1) Provide for a system of internal controls to assure ongoing compliance;
- (2) Provide for independent testing for compliance to be conducted by bank personnel or by an outside party;
- (3) Designate an individual or individuals responsible for coordinating and monitoring day-to-day compliance; and
- (4) Provide training for appropriate personnel.

The other FBAs and NCUA have substantively identical regulations governing the institutions under their supervision. These regulations also focus on the requirement to have a compliance "program." 12 CFR 21.21 (OCC); 12 CFR 208.63 (FRB); 563.177 (OTS); 12 CFR 748.2 (NCUA). The fact that the agencies required a "program" rather than echoing pre-existing BSA-based regulations that govern the filing of individual reports such as SARs or CTRs is significant in our opinion.

b. What is a "problem" which was "previously reported" to the bank?

As noted above, Section 8(s) applies when a bank has failed to "correct any problem with the procedures ... which was previously reported" to it. The plain language of this provision most logically applies only to repeated instances of the same flaw in the bank's program or procedures. For example, assume that in 1998 the FDIC informed a bank that its BSA training program was out of date. At the next examination, the training program was found to be adequately updated, but the FDIC reported a particular flaw in the bank's internal controls. We cannot conclude in such an instance that the problem with internal controls would be a problem with the bank's procedures "which was previously reported" to the bank.

2. What was Congress's intent in saying in Section 8(s) that the FDIC "shall issue a [cease and desist] order?"

First, not every problem with a bank's program or procedures, even a problem which was "previously reported" and not corrected it by the next examination, falls under Section 8(s). As noted, Section 8(s) and the FDIC's regulations require banks to implement procedures that are "reasonably designed" to assure and monitor BSA compliance. The FDIC cannot require a bank to have procedures that would detect or prevent every possible instance of noncompliance. Therefore certain violations would not fall under Section 8(s), particularly where an institution

CORPORATION COMMENTS

March 12, 2004

has a low risk of money laundering associated with it or the type of transaction carried a particularly low risk.

As to those problems which do fall within the scope of Section 8(s), we do not interpret Section 8(s) to mandate a cease and desist order in every case. We have been unable to find any legislative history relevant to interpreting Section 8(s). In such a case, one factor courts will consider in determining legislative intent is how an agency, contemporaneously with the enactment of the statute, implemented it. *See Zuber v. Allen*, 396 U.S. 168, 192 (1969). In the interagency Federal Register preamble issuing their rules to implement Section 8(s), the agencies stated that the statute “authorizes” the agencies to issue cease and desist orders. 52 Fed. Reg. 2858 (Jan. 27, 1987). As with its other enforcement authority, the FDIC enforces Section 8(s) taking into account its enforcement resources and using a risk-based approach.

Courts have often opined that the word “shall” in a statute does not mandate a specific action. The concept of statutes being directory rather than mandatory is traceable back at least to a 1936 United States Court of Appeals decision. In *Vaughan v. John C. Winston Co.*, the 10th Circuit explained that:

Whether a statutory requirement is mandatory in the sense that failure to comply therewith vitiates the action taken, or directory, can only be determined by ascertaining the legislative intent. If a requirement is so essential a part of the plan that the legislative intent would be frustrated by a noncompliance, then it is mandatory. But if the requirement is a detail of procedure which does not go to the substance of the thing done, then it is directory, and noncompliance does not invalidate the act.

83 F.2d 370, 372 (10th Cir. 1936).

Viewing Section 8(s) in its statutory context, and in keeping with the courts’ explanation, it could be both harsh and unreasonable to interpret Section 8(s) as a command that the FDIC bring a cease and desist proceeding in every situation where a repeat procedural problem has been identified. From the bank’s perspective, the commencement of a cease and desist proceeding can be very onerous. It can cause the diversion of a great deal of the bank’s resources and the attention of its officers and directors. It could also be unreasonable in many cases to initiate a cease and desist action where the problem could be fixed more quickly by informal means. Moreover, it generally takes at least 60 days in an uncontested situation, and far longer in a case where the facts are contested, to put a cease and desist order into place. We are aware that in numerous instances of violations, including repeat violations, institutions have addressed and correct problems in less than 60 days.

Consistent with this reasoning, the best interpretation is that the provision that the FDIC “shall” issue a cease and desist order is not so essential a part of the statutory plan that the legislative intent would be frustrated by “noncompliance.” In our view, the essence of Section

CORPORATION COMMENTS

March 12, 2004

8(s) is to formalize banks' compliance with the BSA, and make clear that the banking agencies should use the cease and desist order procedures of Sections 8(b) and (c) where appropriate. It is a corrective scheme, with the goal of deterring money laundering or other illicit activity, or assisting in apprehending criminals. It is unlikely that the main statutory purpose was to require cease and desist order proceedings in every case, no matter how relatively small and easily and quickly corrected the problem. It could be punitive to the banks to issue a cease and desist order in every case, even where a problem posed a relatively low risk, and was easily and quickly corrected.

Another consistent exception to the concept that statutes saying "shall" is the line of cases that deal with "prosecutorial discretion," i.e. that courts refrain from reviewing agency decisions not to take enforcement actions despite seemingly mandatory statutory language. See *Heckler v. Chaney*, 470 U.S. 821, 831 (1985). A fairly recent decision by the Ninth Circuit elaborates on this doctrine. In *Sierra Club v. Whitman*, 268 F.3d 898 (9th Cir. 2001), the plaintiff asserted that the Clean Water Act required the EPA to initiate an enforcement action. The statute provided that:

Whenever on the basis of any information ... the Administrator finds that any person is in violation of [permit conditions], he shall issue an order requiring such person to comply

33 USC 1319(a)(3), *quoted at* 268 F.3d at 902.

The court in *Whitman* refused to compel the Administrator to investigate or take action against the asserted violation, explaining:

[T]he statute provides for a complex arrangement of monitoring through the permit system and enforcement mechanisms to ensure compliance. As previously recognized by the Eighth Circuit, requiring the EPA to "expend its limited resources investigating multitudinous complaints, irrespective of the magnitude of their environmental significance" could lead to an inability to investigate and enforce those violations the Administrator believes to be the most serious.

268 F.3d at 902-903.

The BSA and FDI Act and regulations present a similarly complex arrangement for monitoring and enforcing requirements. The same concerns expressed by the courts in *Whitman*, *Heckler v. Chaney*, and numerous related cases apply to Section 8(s) and lead to the interpretation that it is directory rather than mandatory.

We acknowledge that, in some cases, courts have ruled that "shall" is mandatory. However, courts generally do not make this finding on the basis of the word "shall" standing alone. Rather, they find that the statutory context compels it. E.g., *Association of American Railroads v. Costle*, 562 F.2d 1310, 1312(D.C. Cir. 1977). *Costle* is typical in that the court

CORPORATION COMMENTS

March 12, 2004

found that the statute spelled out the EPA's duties in great detail. Section 8(s)'s direction to "prescribe regulations requiring insured depository institutions to establish and maintain procedures reasonably designed to assure and monitor ... compliance" is very general compared with the statute that was interpreted in *Costle*.

The absence of a mandate to bring a cease and desist action to address every violation of Section 8(s) or the regulations does not imply that the alternative is to take no action. To the contrary, the statutory intent must be to take an appropriate corrective action based upon the severity of the problem, the risks it poses, and the bank's willingness to comply expeditiously. For example, where there is a repeat procedural problem identified during an examination but it is immediately corrected by management, there is no need for a cease and desist order to achieve correction. Similarly, if correction immediately after an examination is assured either by an informal MOU or otherwise, there is no need for an order. In addition, where correction is mandated or obtained by a cease and desist order issued under section 8(b) as part of an overall correction program for BSA and other violations no other or separate action under section 8(s) is necessary. This has been the FDIC's practice, and we believe it comports with the intent of the statute.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA

EXECUTIVE SUMMARY

The primary objective of this document is to provide an internal assessment of the Division of Supervision and Consumer Protection's ("DSC") responsibility under the Bank Secrecy Act ("BSA"), the corresponding supervisory program that ensures state non-member institutions comply with the regulatory rules that implement the BSA, and current DSC initiatives to execute BSA rule modifications. A secondary objective is to evaluate institutions sampled by the Office of Inspector General ("OIG") and described in the draft audit report, *Supervisory Actions Taken for Bank Secrecy Act Violations* (refer to Appendix A).

Overall, the findings of the internal assessment suggest the DSC has developed and implemented an effective supervisory program to monitor and enforce BSA compliance in FDIC-supervised institutions. The DSC has established effective policies, guidance, and practices for educating and examining FDIC-supervised institutions, identifying areas of non-compliance with the BSA, and ensuring that any weaknesses in an institution's BSA program are corrected.

In general, the DSC has implemented a risk-focused approach to assess compliance with the BSA, which emphasizes a strong control and compliance environment within FDIC-supervised institutions. The vast majority of FDIC-supervised institutions are small, community-based, locally-owned institutions that operate in rural or suburban environments. The institutions' customers are well known by bank management and unusual cash transactions are uncommon. In light of this, the DSC believes a flexible supervisory approach using technical guidance, moral suasion and a gradual escalation of enforcement action is appropriate.

While issuing enforcement actions has proven effective in numerous instances where serious noncompliance with the BSA was noted, the DSC has determined that enforcing BSA compliance is most effectively handled in the majority of FDIC-supervised institutions within the normal course of supervisory efforts. This supervisory approach relies upon the proven ability and willingness of bank management to correct deficiencies and establish an adequate compliance program. The DSC has generally relied on this approach to address technical noncompliance where the exposure to risk of potential money laundering activities is low based on the profile of the institution and history of management's actions in addressing identified weaknesses.

However, the DSC responds aggressively in cases where a greater risk for potential money laundering exists within an institution. These more serious situations may include willful non-compliance, absence of a BSA program, or significant apparent violations of law. The FDIC's supervisory response in various cases often involves the use of formal and informal enforcement

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

actions. Enforcement actions are generally pursued when immediate corrective action is required in order to prevent elevated risks from potential money laundering activities. These actions have also been issued against unresponsive or ineffective management and boards of directors. The DSC has issued several formal actions, including Orders to Cease and Desist and Orders of Prohibition from Further Participation, which address substantially deficient programs and illicit activities of insiders. Additionally, informal actions have also been used to effect compliance at institutions where policies and practices need significant improvement.

A notable change to the BSA focus and the DSC's corresponding supervisory approach unexpectedly occurred in 2001. Prior to the terrorist events of September 11, 2001, the emphasis behind enforcement of the BSA was primarily directed toward the criminal activities of organized crime syndicates and international drug trafficking organizations and preventing those entities from utilizing the United States banking system to engage in money laundering activities. However, since the tragic events of September 11th, the BSA has taken on an elevated level of national priority. Efforts directed towards this national and global initiative have been amplified to provide assistance to the war on terror. The anti-money laundering ("AML") provisions of the BSA were augmented (with the passage of the USA PATRIOT Act of 2001²¹) and have become a useful tool in tracing terrorist financing activities. The identification and prevention of potential money laundering and terrorist financing is a primary element of bank supervision.

As a primary federal regulator, the FDIC recognizes the importance of this issue to the banking industry and homeland security. In response, the DSC has been proactive in the development and issuance of interagency examination guidance and examiner training to ensure appropriate enforcement of the provisions of the BSA and the USA PATRIOT Act. Additionally, the DSC has organized and participated in numerous outreach programs intended to inform and educate the banking industry of USA PATRIOT Act compliance requirements, given the rapidly changing landscape of money laundering and terrorist financing concerns. Furthermore, while the DSC has considerably expanded its bank supervision policies and practices in this area; much of the DSC's efforts to proactively respond involve interagency and joint law enforcement initiatives.

Many of these initiatives include domestic and international partnerships. These initiatives include: participation in the Financial Actions Task Force ("FATF") and in the FATF's Working Group on Terrorist Financing ("WGTF"); participation in the Basel Committee decision-making process in reviewing the "Know Your Customer" risk management report; participation in

²¹ USA PATRIOT Act is the acronym for "*Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001.*"

CORPORATION COMMENTS**Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.**

working groups and technical assistance missions sponsored by the Departments of State and Treasury, which are designed to assess vulnerabilities to terrorist financing activity worldwide and to develop and implement plans to assist foreign governments concerning these issues; and serving as point-of-contact ("POC") liaison between the Financial Crimes Enforcement Network ("FinCEN") and FDIC-supervised institutions in the USA PATRIOT Act Section 314(a) terrorist-subject biweekly searches. The DSC also issues Financial Institution Letters to relay regular updates on Specifically Designated Nationals and Blocked Persons and Specifically Designated Global Terrorists as required by the Department of the Treasury's ("Treasury") Office of Foreign Assets Control ("OFAC").

Overall, the DSC has been responsive to the intent of the BSA by establishing a comprehensive supervisory approach, which includes conducting BSA compliance examinations and ensuring appropriate supervisory follow up when BSA concerns exist in FDIC-supervised institutions. Additionally, the DSC has been proactive in addressing recent changes to the BSA by being an active participant in the USA PATRIOT Act rulemaking process, incorporating those rules into examiner and industry guidance, providing various forms of examiner and industry training and outreach sessions, and assisting in global anti-money laundering and counter-financing of terrorism efforts.

RESPONSIBILITIES OF THE FDIC TO FACILITATE BSA COMPLIANCE

While the BSA statute designates the Secretary of the Treasury as the authority to administer the BSA,²² the Treasury regulations allow the Secretary to delegate authority to examine financial institutions to determine compliance with the requirements of Part 103, Treasury's Financial Reporting and Recordkeeping Regulations. The FDIC's responsibilities under Section 103.56(b)(3) and (e) are to examine financial institutions for compliance with Part 103 and to make periodic reports to the Assistant Secretary of the Treasury. The DSC reviews compliance with Part 103 at every safety and soundness examination. Part 103 does not prescribe the frequency at which compliance should be reviewed. The DSC conducts BSA compliance reviews concurrent with all full-scope on-site safety and soundness examinations of every FDIC-supervised institution.

²² FinCEN was established in April 1990 to provide a government-wide, multi-source intelligence and analytical network. FinCEN's operation was broadened in 1994 to include regulatory responsibilities. In October 2001, the USA PATRIOT Act elevated FinCEN to bureau status and emphasized its role in fighting terrorist financing. FinCEN administers the BSA (comprehensive anti-money laundering statute) and is responsible for expanding the regulatory framework to industries vulnerable to money laundering, terrorist financing, and other crime.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

Section 8(s) of the Federal Deposit Insurance Act ("FDI Act") provides additional BSA-related responsibilities [refer to Exhibit I for the Legal Division's Analysis of Section 8(s)]. Section 8(s)(1) of the FDI Act requires each appropriate Federal banking agency to prescribe regulations requiring insured depository institutions to establish and maintain procedures reasonably designed to assure and monitor the compliance of such depository institutions with the requirements of Subchapter II of Chapter 53 of Title 31, United States Code. The implementing regulation for Section 8(s) of the FDI Act is Part 326, Subpart B - Procedures for Monitoring BSA Compliance (12 CFR Section 326.8). In addition, Section 8(s)(2)(A) requires that each examination of an insured depository institution by the appropriate Federal banking agency shall include a review of the procedures required to be established and maintained under Section 326.8 of the FDIC Rules and Regulations (refer to Appendix B for BSA History and Legislative Changes).

BSA SUPERVISORY APPROACH

BSA Compliance Examination Process. The FDIC is responsible for ensuring that state-nonmember banks comply with the BSA. At each safety and soundness examination, the adequacy of an institution's BSA compliance program and procedures is assessed. After a complete analysis of the bank, which includes capital, asset quality, management, earnings, liquidity, and sensitivity to market risk, ratings are assigned and a report of examination is prepared. Composite ratings are based on a careful evaluation of an institution's managerial, operational, financial, and compliance performance. The BSA compliance examination is considered very important and is conducted as part of the entire examination process. BSA findings contribute most significantly to the management component rating, but can have a significant influence on the composite rating, when notable deficiencies exist.

Over the past seven years, the FDIC has conducted more than 17,750 BSA compliance examinations. Examiners document their findings in a Report of Examination. The DSC provides an aggregate report to FinCEN on apparent violations of the Treasury's Financial Reporting and Recordkeeping Regulations (31 CFR 103) and the FDIC's Section 326.8 identified during examinations. Also, the DSC makes referrals to FinCEN on significant matters and informs FinCEN of actions that the FDIC has taken against FDIC-supervised institutions or institution-affiliated parties ("IAPs").

Financial institutions are required to have a written BSA policy and program. Employee training programs, audit procedures, and senior-level oversight are also required. The DSC employs a variety of supervisory methods to ensure that financial institutions establish and maintain an adequate BSA program. The majority of apparent BSA violations involve minor infractions,

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

generally isolated to a few occurrences, and those infractions are generally corrected while the examiners are still in the institution or shortly after their departure. Occasionally, there are some institutions that fail to correct violations or implement adequate compliance programs, which the DSC examiners discover at subsequent examinations. Generally, for those institutions, the DSC performs additional monitoring through on-site visitations conducted between the regularly scheduled examinations and, when appropriate, takes other supervisory action. Over the past seven years, the DSC has taken 40 formal actions and entered into 75 informal agreements with institutions that demonstrated significant and/or recurring weaknesses regarding BSA compliance.

Risk-Focused Supervisory Strategy. The FDIC is the primary federal regulator of approximately 5,300 insured financial institutions holding total assets of almost \$1.7 trillion. By contrast, the Federal Reserve Board ("FRB") supervises 935 banks with assets of \$1.9 trillion, and the Office of the Comptroller of the Currency ("OCC") supervises about 2,000 banks with assets of \$4.1 trillion. The majority of FDIC-supervised institutions are smaller and located in less-densely populated areas. Of the 5,300 institutions supervised by the FDIC, 2,850, or 54 percent, are not located in metropolitan areas or MSAs²³ and hold 22 percent of FDIC-supervised assets. The remaining 46 percent of FDIC-supervised banks are located in metropolitan areas and hold 78 percent of FDIC-supervised assets.

The DSC has adopted a risk-focused approach to proactively assess risk for institutions and apply an appropriate amount of supervisory resources. In doing so, the DSC considers an institution's BSA risk prior to and during an examination. An examiner might consider an institution with the following characteristics to have a low BSA risk: located in a rural area (non-MSA) or suburban area; not located in a high-risk money laundering and related financial crimes area (HIFCA²⁴); small asset size; small deposit base; known and stable customer base; stable management and employee base; and relatively few reportable transactions (as defined by CFR 103). The DSC factors an institution's risk of money laundering into examination planning as well as into the evaluation of identified BSA weaknesses.

²³ MSAs or metropolitan statistical areas are defined by the Office of Management and Budget. An MSA is a large population nucleus, together with adjacent communities that have a high degree of economic and social integration with that nucleus. Each MSA must contain either a minimum population of 50,000 or a Census Bureau-defined urbanized area with a total population of at least 100,000. MSAs comprise one or more counties and may include one or more outlying counties that have close economic and social relationships with the central county. An outlying county must have a specified level of commuting to the central counties and also must meet certain standards regarding metropolitan character. For example, the Washington, D.C. MSA extends from Frederick, Maryland, to Fredericksburg, Virginia, and includes two counties in West Virginia.

²⁴ HIFCA is a categorization announced in the 1999 National Money Laundering Strategy and was conceived in the Money Laundering and Financial Crimes Strategy Act of 1998 as a means of concentrating law enforcement efforts at the federal, state, and local levels in high intensity money laundering zones.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

An important factor in risk-focusing BSA compliance examinations is considering whether an institution is located in a HIFCA, which may be defined geographically or can also be created to address money laundering in an industry sector, a financial institution, or group of financial institutions. Relevant federal, state, and local enforcement authorities, prosecutors, and federal financial supervisory agencies form groups that monitor activity in HIFCAs. Current HIFCA designations for money laundering are assigned to the MSAs of New York City, New York; Los Angeles, California; Chicago, Illinois; San Francisco, California; and Miami, Florida. HIFCAs also include the Mexican borders of Texas and Arizona and San Juan, Puerto Rico. Generally, institutions located in a HIFCA receive more scrutiny for BSA compliance than the institutions located outside a HIFCA, due to the elevated risk profile of the market area.

The DSC recognizes that an effective BSA supervisory approach must include a flexible response towards a financial institution's money laundering risk and the severity of the deficiencies noted. Generally, institutions that operate within a HIFCA, have a large and diverse customer base (including high-risk businesses), transact a large volume of reportable transactions, and are expected to have comprehensive BSA compliance programs. When those programs are deficient, the DSC aggressively acts to effect immediate change within those institutions. Such responses generally involve a form of formal or informal enforcement action. *Enforcement Actions Related to the BSA.* The FDIC has the authority to take enforcement action related to BSA program problems. Enforcement actions are generally taken when bank management willfully and knowingly neglects the BSA rules and/or is unresponsive to identified examination weaknesses and apparent violations of the BSA or implementing rules. Enforcement action authority is granted by Section 8(s) of the FDI Act. While 8(s)(3) authorizes the FDIC to issue enforcement actions against institutions for BSA program problems and violations of law, the DSC has taken the position that this authority is discretionary and should be used judiciously.²⁵

When the DSC conducts BSA compliance examinations, weaknesses and apparent BSA violations are documented in the report of examination and discussed with bank management and, if serious, the institution's board of directors. Generally bank management responds to identified weaknesses during or shortly after the examination. In instances when corrections

²⁵ Excerpt from the Legal Division's analysis of Section 8(s) [see Exhibit I, Interpretation and Application of Section 8(s), dated March 12, 2004]: "Section 8(s)(3) applies to violations that demonstrate a flaw in the BSA compliance procedures or program which are violations of Section 326.8(c) of the FDIC Rules and Regulations, 12 C.F.R. 326.8(c), not to individual violations of the BSA or implementing regulations (such as isolated instances of misfiling Currency Transaction Reports ("CTRs") or Suspicious Activity Reports ("SARs"), or the failure to carry out a piece of an adequate written program). In addition, Section 8(s)(3)(B), with regard to previously reported problems with the procedures, applies only to failures to correct problems identified previously with respect to the procedures, not to chronologically successive violations that do not indicate that the procedures or program are flawed."

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

do not occur, and the DSC determines that a serious program flaw continues to exist, a more aggressive supervisory action is taken. However, it should be noted that an isolated or technical problem or violation does not rise to the level of a serious program flaw; initiating an enforcement action in such cases would not be an effective manner to address those problems.²⁶ Consistent with the Legal analysis, the DSC's approach has been to differentiate between serious BSA program problems within an institution versus isolated and technical weaknesses. In practice, isolated and technical weaknesses can be addressed within the normal course of supervisory process.

The DSC believes a flexible supervisory approach using technical guidance, moral suasion, and a gradual escalation of enforcement action is appropriate. However, a more aggressive supervisory approach is taken to effect correction when a greater risk for potential money laundering exists within an institution and there is willful non-compliance of the BSA, absence of a BSA program, and/or significant apparent violations of law.²⁷ For example, from January 1, 1997, through September 30, 2003, FDIC institutions and IAPs were subject to 115 formal and informal enforcement actions that addressed deficiencies in compliance with rules implementing the BSA. These actions, in whole or in part, address criticisms and apparent violations cited in reports of examination. These actions consist of the following:

- Bank Board Resolutions ("BBR") require the institution's board of directors to draft a written response addressing weaknesses cited in FDIC reports of examination and present this document to the FDIC for notification.
- Memorandums of Understanding ("MOU") serve as a written agreement between the institution's board of directors and the FDIC, on specific weaknesses cited in reports of

²⁶ Excerpt – "Moreover, a different procedural or program flaw in each of two consecutive examinations of a bank would not, in our opinion, constitute a "repeat" violation by the bank. Therefore, many problems under and violations of Section 326.8 do not fall within the scope of Section 8(s) regardless of the interpretation of the term "shall" in Section 8(s)."

²⁷ Excerpt – "The absence of a mandate to bring a cease and desist action to address every violation of Section 8(s) or the regulations does not imply that the alternative is to take no action. To the contrary, the statutory intent must be to take an appropriate corrective action based upon the severity of the problem, the risks it poses, and the bank's willingness to comply expeditiously. For example, where there is a repeat procedural problem identified during an examination but it is immediately corrected by management, there is no need for a cease and desist order to achieve correction. Similarly, if correction immediately after an examination is assured either by an informal MOU or otherwise, there is no need for an order. In addition, where correction is mandated or obtained by a cease and desist order issued under section 8(b) as part of an overall correction program for BSA and other violations no other or separate action under section 8(s) is necessary. This has been the FDIC's practice, and we believe it comports with the intent of the statute."

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

examination that include cited apparent violations and systematic weaknesses in compliance efforts.

- Orders include provisions/requirements from the FDIC to the institution's board of directors and senior management, which require the institution, or IAPs, to cease and desist from activities that weakened the institution's BSA compliance program. Orders also include the removal or prohibition of individuals from further participation with insured institutions.

The type of enforcement action pursued by the DSC against an institution or IAP is directly related to the severity of the offense, management's willingness and ability to effectively implement corrective action, as well as the extent to which the program has failed to identify and/or deter potential money laundering. Additionally, the nature of the criticism, the response to prior weakness or violation notifications and the overall risk profile of the institution are factored into the type of supervisory action, as well as any determination to assess civil money penalties. When weaknesses are identified at institutions that have a high BSA risk profile, such as those located within a HIFCA, the DSC has been aggressive in taking supervisory action. Formal actions taken against institutions that operate within HIFCAs represent more than half of the total actions taken over the audit timeframe.

Formal actions have generally been imposed on institutions or IAPs where the activities of the individuals, or inaction, are so negligent that the bank has allowed or has significantly increased its exposure to potential money laundering activities. Supervisory enforcement actions taken since 1997 includes several *Section 8(e) Orders of Prohibition from Further Participation* against IAPs that not only failed to establish effective compliance programs within their institutions, but also actively engaged in activities that intentionally violated governing rules implementing the BSA. Also included within the summary of enforcement actions for this time period are *Section 8(b) Orders to Cease & Desist* against institutions that failed to establish adequate compliance programs that effectively identify and report potential money laundering activities. In many cases, the bank deficiencies and apparent violations were so egregious and demonstrated such a blatant disregard for compliance with the BSA, that civil money penalties were assessed (one in the amount of \$7,500,000). While these actions demonstrate the diligence of the DSC to effect immediate change when necessary, the DSC has also effectively utilized informal actions to strengthen the compliance efforts of its supervised institutions.

Informal actions against institutions and IAPs remain the FDIC's most effective tool in creating an environment within the banking industry to identify and deter potential money laundering activity in institutions where significant weaknesses have been identified. BBRs and MOUs provide the written notice to bank management and boards of directors that significant

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

deficiencies exist within BSA compliance programs; BBRs and MOUs also establish the mechanism for corrective action. By establishing a written agreement and expedient timeframes for correction, the FDIC has been able to strengthen the AML environment within certain of its supervised institutions.

Included within the total number of enforcement actions are several cases in which the FDIC has taken targeted and aggressive action against the board of directors and senior management of certain institutions that had substantially ineffective BSA compliance program policies and procedures in place. Some of these cases are discussed more fully below.

Individual Enforcement Action Cases. The following case descriptions demonstrate that the DSC takes aggressive, appropriate measures when the risk for potential money laundering and serious BSA program problems exist.

Foreign-owned, state non-member bank and its Federally-insured foreign branches.

At the time of this enforcement action, the institution operated four separately chartered foreign branches and a state non-member institution. In 2002, one branch was subject to a Section 8(p) Order to Terminate Deposit Insurance, as it was not engaged in the business of receiving deposits (other than trust funds). Also, in 1994, the state non-member institution and its affiliates consented to the issuance of a Section 8(b) Order to Cease & Desist for operating in violation of FDIC Rules and Regulations that implement Treasury's rules for BSA compliance. The Order required the prompt correction of numerous significant violations resulting from an inadequate BSA compliance program. The Order was terminated in 1995. All of these entities operate within HIFCAs.

A 2001 examination of the foreign branches, conducted concurrently by the FDIC, Federal Reserve Bank ("FRB"), and a state banking department, identified a number of deficiencies and violations, including significant BSA compliance weaknesses. The deficiencies cited at the branches and agencies of the foreign branches did not include the state non-member institution, which was the subject of the previous enforcement action taken in 1994 and terminated in 1995 (see paragraph above). Additionally, subsequent to the deficiencies noted at the 2001 examination of the foreign branches, the FDIC initiated a targeted BSA examination of the state non-member institution. The examination concluded that the state non-member institution had maintained an effective BSA compliance program.

Appropriate guidelines at these branches are considered vital since its operations are considered to be high-risk for AML purposes, due to the large volume of wire transfer activity and U.S. dollar-denominated checks purchased by customers at the 700 domestic and foreign branches.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

As a result of the high-risk profile of the institution and the severity of these problems, including the repetitive nature of the BSA-related deficiencies, the supervising agencies jointly issued, in 2001, a Section 8(b) Order to Cease & Desist and assessed a civil money penalty against the branches. However, the state non-member institution was not made a part of those formal actions.

State non-member institution and two principals, individually

In this instance, the state non-member institution is located in a HIFCA. In 2003, the former president and director, stipulated to the issuance of an Order of Prohibition from Further Participation. The Order resulted from discovery of activities conducted by the former president on behalf of a family member and a former bank director, which were in violation of the BSA. Specifically, the individual, while serving as bank president willfully and repeatedly engaged in the structuring of cash transactions to avoid reporting requirements and attempted to conceal those activities. This matter was discovered by bank staff in 2001, which prompted a FDIC visitation and ultimately a full-scope BSA examination, which was jointly conducted by the FDIC and the state banking authority. The individual resigned from the bank in 2002.

The full-scope BSA examination conducted in 2002, identified numerous deficiencies in policies and procedures relating to BSA compliance. In 2003, the FDIC and state regulator jointly issued a Section 8(b) Order to Cease & Desist, which was primarily a result of the significant weaknesses in the bank's BSA compliance program, including numerous violations of law.

The FDIC also pursued a Section 8(e) action against a former bank director for participation in structuring cash transactions to avoid reporting requirements. In 2004, the individual executed a Stipulation and Consent to the Issuance of an Order of Prohibition.

Federally-insured foreign branches

In this example, a foreign bank had two United States Federally-insured foreign branches, both of which are located in HIFCAs. Targeted BSA examinations of both branches were conducted in 1999. These visitations identified significant weaknesses in the branch policies and practices related to BSA compliance, including numerous apparent violations of the rules implementing the BSA. The FDIC issued a Section 8(b) Order to Cease and Desist in 2000, against both branches.

FinCEN assessed a Civil Money Penalty for failure to comply with the reporting and recordkeeping requirements of the BSA. Additionally, the branches' failure to comply with

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

currency transaction report ("CTR") filing requirements exposed the entities to elevated risk of possible money laundering activities.

State-chartered savings bank and insider, individually

In 2000, the former president and chief executive officer of the institution, stipulated to the issuance of a Section 8(e) Order of Prohibition from Further Participation. The Order resulted from discovery of activities by the respondent which were in violation of the BSA. Specifically, the individual, while serving as president and chief executive officer of the bank, willfully and repeatedly engaged in the structuring of cash deposits on behalf of a bank customer and attempted to conceal these activities. This matter was discovered internally by the bank BSA officer. The former president and chief executive officer was removed from banking industry in 2001.

State non-member institution and two insiders, individually

This state non-member institution is located in a HIFCA. The institution stipulated to a Section 8(b) Order to Cease & Desist in 2002, as a result of the poor financial condition and weak management of the institution as detailed in a 2002 Report of Examination. While under the existing Order, the FDIC and state banking regulator conducted a joint examination in 2003. During that examination problems were identified in the institution's BSA compliance program, including a number of apparent violations related to poor program controls, as well as suspected illicit activities of the former president and chief executive officer and former chief lending officer. The apparent violations included structuring currency transactions to avoid reporting requirements, directing bank staff not to file required CTRs and facilitating check kiting and money laundering by bank customers.

State non-member institution

This state non-member institution is located in a HIFCA. Findings documented in the 1998 FDIC visitation report relate to the institution's inadequate BSA compliance efforts, significant weaknesses in policies and practices, and numerous apparent violations of the rules implementing the BSA. As a result of the weaknesses identified at the visitation and the repetitive pattern of apparent violations, the FDIC issued a Section 8(b) Order to Cease and Desist. The institution implemented acceptable and appropriate corrective actions, and the Order was terminated in 2000. FinCEN assessed a civil money penalty for deficient BSA compliance procedures and failure to comply with suspicious activity report ("SAR") filing requirements.

REFINING SUPERVISORY STRATEGIES

The FDIC is proactive in the development and implementation of measures to comply with the USA PATRIOT Act and combat money laundering and terrorist financing. One fundamental activity has been participation in numerous interagency working groups formed for the purpose of drafting risk-based revisions to the BSA, as required by the USA PATRIOT Act, and developing interpretive guidance for the financial services community. The DSC has participated in the following working groups, which were established for the following Sections of the USA PATRIOT Act:

- 311- *Special Measures for Jurisdictions, Financial Institutions, or International Transactions of Primary Money Laundering Concern*
- 312- *Special Due Diligence for Correspondent Accounts and Private Banking Accounts*
- 313/319- *Prohibition on United States Correspondent Accounts with Foreign Shell Banks and Forfeiture of Funds in United States Interbank Accounts*
- 314- *Cooperative Efforts to Deter Money Laundering*
- 324- *Report and Recommendation* (On Subtitle A- International Counter Money Laundering and Related Measures of Title III of The Act)
- 325- *Concentration Accounts at Financial Institutions*
- 326- *Verification of Identification*
- 327- *Consideration of AML Record*
- 352- *AML Programs*

In accordance with the provisions of the USA PATRIOT Act and through cooperation with other regulatory partners, the DSC revised the BSA Examination Procedures²⁸ to establish guidance for reviewing AML and counter-terrorist financing ("CTF") compliance programs. This guidance was released to examiners on August 15, 2003, and to the banking community on October 17, 2003. The DSC is currently updating the Division's Manual of Examination Policies to incorporate relevant provisions of the USA PATRIOT Act, augment the OFAC guidance, and update a variety of other sections. Furthermore, the DSC continues to work with other bank supervisors, including the many State authorities that comprise the Conference of State Bank Supervisors ("CSBS"), in issuing both examiner and industry guidance.

²⁸ When the DSC released the augmented examiner guidance to the banking industry in October 2003, it was slightly different than the guidance released by the FRB, OCC, and NCUA. Although the revised guidance was a result of interagency efforts, there is one notable difference. The other agencies released guidance for only Sections 313/319 and 314 of the USA PATRIOT Act. Our examination guidance is comprehensive and covers all of the newly issued rules required by the USA PATRIOT Act. Given the importance of the Customer Identification Program rule as a gatekeeper to prevent money launderers and terrorists from having access to U.S. banks, we believed it was necessary that examiners have guidance to review compliance with this rule as soon as possible.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

Additionally and in relation to potential money laundering or terrorist financing threats, the DSC changed the application review program to consider prohibitions against certain types of relationships with financial institutions, particularly foreign shell banks. The DSC has amended the Statement of Policy on Bank Merger Transactions to consider the effectiveness of any insured depository institution involved in a proposed merger transaction in combating money laundering activities, including in overseas branches.

To help facilitate cooperation with law enforcement authorities in their ongoing investigation of terrorist activities through the implementation of Section 314(a) of the USA PATRIOT Act, the DSC worked with the other federal banking agencies to add emergency contact and Section 314(a) POC information to the Consolidated Reports of Condition and Income ("Call Report"). The POC line item ensures that the information is current and updated quarterly. The FDIC is the first among the banking regulators to automate the process that provides the most current POC information to FinCEN, who in turn distributes Section 314(a) name search requests to financial institutions. Also, with respect to Section 314(a) banker POC data, in 2004 the FDIC will function as the liaison between FinCEN and the OCC.

Industry Outreach. The DSC has already taken steps to educate field staff and members of the banking industry on USA PATRIOT Act and BSA compliance rules at training conferences, seminars, Directors' Colleges, and FDIC-sponsored training courses. In 2003 alone, FDIC staff discussed AML issues at approximately 130 different venues.

The DSC also implemented a written form of communication to distribute AML guidance to the banking industry through Financial Institution Letters ("FILs"). The FDIC issues FILs addressing AML measures as well as lists of Specifically Designated Nationals and Blocked Persons and Specifically Designated Global Terrorists. Since 2002, the DSC has issued 16 FILs addressing BSA compliance and AML measures. These FILs provide bankers with guidance on topics such as: customer due diligence and detecting terrorist activity; rule changes and required BSA forms, including changes related to the USA PATRIOT Act; and SAR Reviews, which are prepared and issued by FinCEN. Since 2002, the DSC has also issued 68 FILs notifying the banking industry of changes to the OFAC list of terrorists and specially designated nationals.

Furthermore, the DSC's Manual of Examination Policies as well as examination procedures were made available to bankers via the FDIC's external website. The DSC is in the process of incorporating BSA, AML, and CTF guidance on the FDIC's external website.

CORPORATION COMMENTS

Global Counter-Terrorist Financing Initiatives and Technical Assistance. The DSC believes that strong governance of foreign banking programs contributes to the stability of foreign economies, enhances trade opportunities for U.S. companies, and reduces opportunities for money laundering. Therefore, the DSC actively participates in working groups and technical assistance missions sponsored by the Departments of State and Treasury to assess vulnerabilities to terrorist financing activity worldwide and to develop and implement plans to assist foreign governments in the enforcement efforts directed towards financial crimes. To facilitate its commitment to these assignments, the FDIC established a twenty-two member task force comprised of examiners and attorneys that have received specialized AML and CTF training.

In 2002, the FDIC provided AML technical assistance and CTF training to the governments of the Republic of Marshall Islands, Fiji, and Pakistan. Also in 2002, FDIC's staff met with supervisory and law enforcement representatives, senior prosecutors, and financial intelligence unit directors from Brazil, St. Lucia, Dominica, Barbados, St. Vincent and the Grenadines, Antigua, Grenada, Chile, and Russia. Another foreign-directed BSA training program was held by the FDIC for representatives from Germany, Armenia, Venezuela, Bosnia and Herzegovina, Serbia, Bulgaria, Hungary, Canada, Estonia, Hong Kong, China, Indonesia, Japan, Thailand, Czech Republic, Mozambique, and Turkey.

In 2003, FDIC experts participated in technical assessment missions to Bangladesh, the Republic of Palau, Macau, China, and Panama and also provided AML and CTF training to regulators from Bahrain, Egypt, Jordan, Pakistan, Qatar, Saudi Arabia, Panama, Brazil, Argentina, Paraguay, Venezuela, Thailand, Malaysia, Philippines, and Indonesia. Also, in 2003, FDIC met with supervisory representatives from Anguilla, Antigua, Armenia, Aruba, Austria, the Bahamas, Barbados, Barbuda, Belize, Brazil, British Virgin Islands, the Cayman Islands, Dominica, Estonia, Grenada, Guyana, Haiti, Italy, Jamaica, Montserrat, Netherlands Antilles, Poland, Russia, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname, Taiwan, Trinidad and Tobago, and the Turks and Caicos Islands. In addition, the FDIC provided training to central bankers from Korea, Nigeria, and Bahrain on AML and the USA PATRIOT Act. In all cases, the visitors were very interested in the FDIC's AML examination programs and our progress in implementing the USA PATRIOT Act provisions.

Also, the FDIC has participated in a number of meetings with the FATF on developing anti-money laundering recommendations, including the October 2001 extraordinary plenary held in Washington, D.C. This plenary developed several anti-terrorist funding recommendations that are currently used as standards by the international community when assessing a country's vulnerabilities to terrorist funding and the adequacy of the measures it has in place to curtail such activity. The FDIC continues to participate in FATF's WGTF through interagency meetings held at the Treasury.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

Furthermore, through participation on the Basel Committee, the FDIC has been involved in the decision-making process that led to the approval and issuance of a number of international guidelines on money laundering. For example, the DSC participated in the decision-making process of the Basel Committee in reviewing the "Know Your Customer" risk management report and evaluated the progress report on jurisdictions with cross-border banking impediments.

Domestic Anti-Money Laundering and Counter-Terrorist Financing Initiatives. For many years, the DSC has worked with the Treasury, FinCEN and the other banking agencies in setting international standards, developing policies, and implementing best practices to combat money laundering and more recently, terrorist funding, as part of the United States AML regime. For example, the Money Laundering Suppression Act of 1994 required the agencies, in consultation with the Treasury and appropriate law enforcement agencies, to review and enhance their procedures to better evaluate financial institutions' programs to identify money laundering schemes involving depository institutions. This statute led to an interagency project to revise examination procedures. Since then, the DSC continues to work with the other federal and state banking agencies to issue risk-focused examination procedures designed to evaluate a financial institution's AML program and compliance with the BSA and rules implementing the USA PATRIOT Act.

Since 1999, the DSC has participated in the Steering Committee to oversee the implementation of the National Money Laundering Strategy, an annual effort led by the Departments of Justice and Treasury. The interagency effort was required by the Money Laundering and Financial Crimes Strategy Act of 1998. The DSC works with each of the sub-groups charged with addressing the Strategy's action items related to the supervision of financial institutions. The DSC also participates in a workgroup to draft the "International Narcotics Control Strategy Report," which is the Department of State's annual report on illicit drug-control and money laundering activities.

Finally, another of the DSC's proactive efforts to ensure that examiners can better identify money laundering schemes is our participation in the planning and development of AML training for examiners that is sponsored by the Federal Financial Institutions Examination Council ("FFIEC").

OVERALL ASSESSMENT OF DSC SUPERVISORY APPROACH

The DSC agrees that a vigilant BSA supervisory program requires that appropriate supervisory actions be taken to support compliance with Treasury and FDIC guidance. Our supervisory

CORPORATION COMMENTS**Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.**

processes are risk focused and designed to correlate our efforts to areas of risk, thereby deploying appropriate emphasis across a continuum of low- to high-risk areas. Thorough examiner assessment and our internal supervisory reviews are critical to these determinations. The DSC is committed to proactive, vigilant, and effective examination processes to monitor and mitigate risks in the institutions we supervise. The DSC continues to assess potentially high-risk situations, through onsite and offsite examination programs, and is confident that our supervision of such situations is effective and efficient.

Overall, the DSC has been responsive to the intent of the BSA by establishing a comprehensive supervisory approach, which includes conducting BSA compliance examinations and ensuring an appropriate supervisory approach when BSA concerns exist in FDIC-supervised institutions. Additionally, the DSC has been proactive in addressing recent changes to the BSA by being an active participant in the USA PATRIOT Act rulemaking process, incorporating those rules into examiner and industry guidance, providing various forms of examiner and industry training and outreach sessions, and assisting in global AML and CTF efforts.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

APPENDIX A: OIG AUDIT OF DSC'S BSA

The FDIC OIG conducted an audit concerning the BSA. The draft audit report *Supervisory Actions Taken for Bank Secrecy Act Violations* was issued February 20, 2004. The objective of the audit is to determine whether FDIC adequately follows up on BSA violations reported for FDIC-supervised financial institutions, to ensure the institutions take appropriate corrective action. The OIG's sample for the audit consisted of a large percent (63 percent) of banks that are not located in MSAs. Statistically, FDIC-supervised financial institutions are located in more rural areas. Additionally, in these non-MSA institutions, management and staff have considerably more knowledge of the customer base, and therefore a significantly reduced risk of money laundering exists.

Appendix A provides an evaluation of institutions in the OIG's sample, wherein the OIG determined that the DSC did not have adequate follow-up²⁹ to the violations and criticisms cited in the sampled reports of examination (see Table 2). Each Regional Office ("RO") provided an analysis of the supervisory approach taken regarding each of the criticized institutions. The following analysis discusses the OIG's concern(s), the supervisory approach to the criticized issues, and an overall conclusion of the supervisory approach. This analysis also considers each institution's BSA risk coupled with the supervisory approach.

Data on Table 2 represents: (a) the 43 institutions in the OIG's original sample (two institutions³⁰ were removed from the OIG sample); (b) limited supervisory data; (c) asset-ranges; (d) the OIG's assessment of the DSC's supervisory approach to each institution's situation (the OIG determined that an adequate follow-up process should occur within 12 months, and as part of that process the DSC should issue an enforcement action for repeat violations); and (e) the DSC's evaluation of its supervisory approach related to each institution. For the 17 institutions where the OIG determined that DSC had an adequate follow-up process (2, 4, 6, 7, 10, 13, 15, 16, 18, 22, 28, 29, 31, 32, 35, 36, and 38), no further analysis is provided. However, for the 24 institutions where the OIG determined that DSC did not have an adequate follow-up process, a comprehensive evaluation of DSC's supervisory approach is documented. Additionally, there is an analysis regarding the supervisory approach taken for the two institutions eliminated from the sample since those institutions were categorized as having an inadequate follow-up process by the OIG in January 2004: the two institutions were unexpectedly removed from the sample during the DSC analysis phase.

²⁹ Adequate follow up as described by the OIG must occur within 12 months.

³⁰ Two institutions were removed from the OIG's sample in January 2004. The reason(s) for the removal is unknown.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

The DSC's assessment of its supervisory program is that appropriate corrective measures were taken with all institutions in the sample. The DSC's findings of the sampled institutions is that in the vast majority (38 of 41, or 92.7 percent) of instances, the DSC responded expeditiously while incorporating the sufficient response time for bank management to correct identified problems. In serious cases where bank management willfully neglected BSA rules or was unresponsive to regulatory criticism and guidance, or when the DSC identified insider abuse, enforcement action was taken. The assessment of the OIG's sample confirms the DSC's effective supervisory approach regarding FDIC-supervised institutions' compliance with the BSA. However, the DSC recognizes that in three of the 41 (7.3 percent) institutions, a more expeditious response should have occurred.

None of the OIG's sampled institutions have money laundering problems, reputational risk related to the BSA, or increased safety and soundness risk to the institution. Rather, most of the institutions had internal weaknesses that could be easily strengthened, addressed, and corrected by management and monitored with the normal supervisory approach employed by the DSC.

The OIG sample did not target geographic concentrations of higher money laundering risk, or institutions where money laundering has been suspected or detected. The OIG also did not look at supervisory actions taken in instances of serious BSA program deficiencies, analyze the risk for money laundering in the sample institutions, have discussions with examiners, or assess the BSA examination process.

The map inserted on page 19 (the map has been removed from this document to protect the identities of the OIG-sampled institutions) displays the OIG's sampled institutions delineated between metropolitan areas, non-metropolitan areas, and HIFCAs (to show geographic areas of high-risk in regard to potential money laundering). Only two of the 41 financial institutions included in the OIG audit sample are located within HIFCAs. Additionally, the map inserted on page 20 (the map has been removed from this document to protect the identities of the OIG-sampled institutions) shows institutions identified by the OIG as having inadequate follow-up.

The DSC closely monitors and escalates its supervisory approach, as necessary, for institutions located in HIFCAs and other metropolitan areas as well as institutions that have a high volume of reportable transactions. Based on our review of the seven-year audit period, the majority of formal enforcement actions taken by the FDIC against financial institutions and individuals occurred in HIFCAs, which, in our opinion, supports the designation of such areas.

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

OIG Bank Sample**Institution #1****Low BSA Risk**

Year	Total Assets (\$ Million)	Rating	BSA Violations (#)
2003	\$101 - \$125	Highly Rated	(1)-Inadequate controls/326.8(b)
2002	\$51 - \$100	Highly Rated	(1)-Independent testing/326.8(c)(2)
2000	\$51 - \$100	Highly Rated	(1)-Independent testing/326.8(c)(2)
1999	\$51 - \$100	Highly Rated	NA
1997	\$51 - \$100	Highly Rated	None
State performs review of prior BSA violations.			

OIG Concerns:

OIG indicated the following concern from the 2000 examination.

1. Independent testing of BSA had not been performed by bank personnel, consultants, or external auditors. Bank management agreed to have testing performed in 2000. Follow-up by the state examiners during the 2002 examination indicated that the bank was still in violation and had not performed independent BSA testing. Report of Examination ("ROE") dated 2003, does not specifically address independent BSA testing.

OIG indicated the following concern from the 2003 examination.

2. Examiners found 25 cases totaling \$225,000 where cash withdrawals from checking accounts were just below \$10,000. Bank management agreed to review large cash items, continue to monitor this account, and comply with the provisions of the BSA.

Supervisory Actions:

1. A violation of Section 326.8 (c)(2) was cited at the 2000 FDIC examination for failure to provide for an independent test of the bank's compliance with BSA. No other BSA violations were cited. The ROE notes that BSA practices at the bank are adequate. The interim president stated that the bank's external auditors would perform the test in 2000.

The bank's response letter to the ROE findings and transmittal letter, in

CORPORATION COMMENTS

Internal Assessment of DSC’s Program to Evaluate Bank Compliance with the BSA.

2001, indicates that the bank’s external auditors, had not yet conducted a BSA review but would include a review as part of their audit.

The bank’s external auditors had not reviewed BSA by the next examination, which was conducted by the state. A violation of Section 326.8 (c) was cited in the state’s 2002 examination for failure to provide for independent testing. The bank’s auditors had conducted a BSA review by the time of the next FDIC examination. The work papers for the 2003 FDIC examination include documentation of the bank’s external auditor performing an independent test of BSA at their audit in 2002.

2. Bank management, in response to the ROE findings and transmittal letter, agreed to review large cash items, continue to monitor these accounts, and comply with the provisions of the BSA.

Assessment of Follow-up Action:

While Section 326.8(c) violations were cited at consecutive examinations, the violations were isolated and technical in nature and the overall BSA compliance program was considered adequate. Management obtained an independent review of the program prior to the subsequent FDIC examination; therefore, no additional follow-up supervisory action was necessary. Given the bank’s small asset size, rural location, low volume of reportable transactions, adequate management, and no prior BSA supervisory concern, follow-up on management deficiencies within the regular examination cycle is considered appropriate.

Institution #3

Low BSA Risk

Date	Total Assets (\$Million)	Rating	BSA Violations (#)
2002	\$126 - \$150	Highly Rated	NA
2001	\$101 - \$125	Highly Rated	None
1999	\$51 - \$100	Highly Rated	NA
1998	\$51 - \$100	Highly Rated	(1)-Independent testing/326.8(c)(2)
State performs review of prior BSA violations.			

OIG Concern:

Adequate independent testing at the bank had not been conducted. This violation was also cited in the 1995 examination. Bank management assigned an independent employee at the bank to perform the testing.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

Supervisory Actions:

The 1995 FDIC compliance examination of this \$51 - \$100 million bank cited violations of Sections 326.8 (b) and (c)(2) for not having an adequate compliance program, due to a lack of independent testing. The BSA officer was also responsible for reviewing the adequacy of the bank's compliance program. No other BSA exceptions were cited in the 1995 examination. The bank's 1995 response to the ROE transmittal letter states that management had reviewed the BSA policy and that the policy would be amended to include a system of independent testing for compliance by bank personnel or by an outside party. The response also stated that the subject was reviewed by the CPA firm that does the bank's directors' audit and that testing for compliance will be included in their report to the directors.

The 1998 ROE again noted a violation of Section 326.8(c)(2) for lack of independent testing. The examiners recognized independent testing by the bank's CPA, but the testing was conducted in the form of questioning employees regarding their knowledge of BSA. The method of testing was not considered adequate independent testing. The ROE further notes that the bank president designated an employee, who was independent of the BSA function, during the examination to periodically perform testing on an ongoing basis. No other BSA problems were noted.

The bank provided an audit report conducted by the bank's CPA firm in 1998, that stated that they had: (1) reviewed the bank's policy; (2) noted that training sessions are conducted for all new hires and annually for all staff; (3) that CTRs, the large items report, and the uncollected funds reports are reviewed daily; (4) monthly internal audits of BSA compliance are conducted by formal reports; and (5) the CPAs had sampled CTRs filed in 1998 for completeness and timeliness. The audit report findings stated that the BSA system appeared to ensure BSA compliance.

Assessment of Follow-up Action:

Bank management responded to and addressed the problem within four months of the 1995 examination. The repeat nature of the violation in the 1998 examination is not due to a lack of testing, but to the thoroughness of testing. When identified during the 1998 examination, the bank again responded immediately during the examination. The bank also provided documentation from a CPA audit in 1998 (a copy was sent to the RO) confirming the form and type of testing.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

Institution #5 (“inactive”)**Low BSA Risk**

Date	Total Assets (\$ Million)	Rating	BSA Violations (#)
1999	\$101 - \$125	Highly Rated	NA
1998	\$51 - \$100	Highly Rated	(8)- Improper exemption or limit/103.22(b),(c)
State performs review of prior BSA violations.			

OIG Concern:

Follow-up of apparent violations cited for inappropriate exemption limits in the 1998 ROE exceeded 12 months.

Supervisory Action:

Bank is **INACTIVE**. The bank had established inappropriate exemption limits for six exempted customers, as a result of a misinterpretation of the regulation. The violations were technical in nature involving CTRs and corrected at the examination. The issue of backfiling was referred to the IRS. The IRS sent a letter in 1998 to the bank discussing the issue and did not require the bank to backfile the CTRs. The level of follow-up is appropriate for this type of violation. The bank was merged into another institution in 2000.

Assessment of Follow-up Action:

During the examination, management corrected the exemption limits and indicated that the IRS would be contacted concerning backfiling of CTRs. Supervisory action was appropriate, given the isolated and technical nature of the infractions, as well as the overall low-risk BSA profile of the institutions.

Institution # 8**Moderate BSA Risk**

Date	Total Assets (\$ Million)	Rating	BSA Violations (#)
2003	\$51 - \$100	Highly Rated	None
2002	\$51 - \$100	Highly Rated	None
2000	\$51 - \$100	Moderately Rated	(10)- Late CTR Filings/103.27(a); (1)- Inadequate controls/326.8(c)(1)
1999	\$51 - \$100	Low Rated	None
1998	\$51 - \$100	Moderately Rated	(1)- Independent testing/326.8(c)(2)
State does include BSA examination procedures within the scope of its regular examinations.			

OIG Concern:

Follow-up did not occur within 12 months on violations and concerns noted in 1998 FDIC ROE.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

Supervisory Action:

The 1998 ROE cited apparent violations of Section 326.8(c)(2) for lack of independent testing of the BSA compliance program. During the examination, bank management committed to corrective action. The 1999 ROE from the state bank regulator cited numerous errors in CTRs, but did not repeat the criticism of independent testing. Apparent violations of Sections 103.27(a)(1) and 326.8(c)(1) were cited at the 2000 FDIC examination, due to numerous late filings of CTRs and several deficiencies in the internal control structure of the bank. Independent testing at the 2000 examination was deemed to be adequate. Due to the poor financial condition of the bank and pronounced management deficiencies noted in the 1999 state regulator ROE, the institution entered into a MOU. Provisions within the MOU did not specify BSA weaknesses; however, there was a provision requiring management to correct all violations cited within the ROE, which includes those cited for BSA. Substantial compliance was not noted until the 2002 FDIC examination.

Bank Profile:

Bank is a \$51-\$100 million institution in a northeast state. The bank has experienced some problems, indicated by the low rating assessed in 1999 and moderate rating as recently as the 2000 examination. However, the institution was upgraded to highly rated in the 2002 examination. Bank management is currently highly rated. However, management has been rated moderate or low at examinations dating back to 1996.

The bank is considered a moderate BSA risk due to overall management deficiencies within the institution, continued identification of weaknesses in the BSA compliance program, and examiner discovery of potential transaction structuring at the 2000 and 2002 FDIC examinations. As a result of the 1998 FDIC examination, the institution was more closely watched by the RO.

Assessment of Follow-up Action:

In general, the DSC concurs with the OIG regarding the follow-up for this bank. The RO is unable to locate documentation supporting the actions taken to ensure the bank corrected deficiencies noted in the 1998 ROE.

A safety and soundness MOU was entered into as a result of the 1999 state examination; however, the state examination does not cite any BSA weaknesses, therefore, the MOU does not address BSA. The apparent violations of BSA cited in the 2000 ROE address different program weaknesses than those cited in 1998 and are not considered repeat violations. As a result of the findings from the 1998 examination, the institution was more closely watched by the RO.

Institution # 9

Moderate BSA Risk

2000	\$51 - \$100	Highly Rated	NA
1999	\$51 - \$100	Highly Rated	None
1997	\$51 - \$100	Highly Rated	NA
State conducts limited-scope follow-up on banks' corrective actions to address violations cited at prior FDIC examinations.			

OIG Concern:

The OIG cited concerns over supervisory follow-up for violations cited at the 2002 examination. All of the violations noted at this examination were attributed to errors in CTR filings.

Supervisory Action:

The violations were largely attributed to errors in completing the CTR form completely and within the 15-day reporting requirement. Failures to record the sale of monetary instruments over \$3,000 also resulted in apparent violations. The examiners discussed these issues with bank management during the examination and received a commitment to implement corrective action, including increased training and expanded review process.

Assessment of Follow-up Action:

Given the BSA history of the bank, management's responsiveness to BSA deficiencies, small asset size, rural location, and adequate management, supervisory follow-up that consists of review at the next examination is considered appropriate.

2002	\$51 - \$100	Highly Rated	NA
2001	\$51 - \$100	Highly Rated	None
1999	\$51 - \$100	Highly Rated	NA
1998	\$26 - \$50	Highly Rated	(6)- CTR filing/103.22(a); (1)- Improper exemption or limit/103.22(b),(c); (1)- Inadequate controls/326.8(b)
The state does not examine for BSA or provide meaningful follow-up on FDIC violations.			

OIG Concern:

The OIG's draft report cited concern over FDIC supervisory follow-up of apparent violations cited within the 1998 ROE.

1. Bank president stated repeat violations will not occur and that the BSA program is being delegated to a vice president who has a good working knowledge of these regulations.
2. The ROE states that violations of Section 103.22(b) and (c) are a repeat from the 1995 FDIC compliance examination.
3. The ROE stated repeat violations of Section 326.8 *may* result in potential civil money penalties or a cease and desist order.

Supervisory Actions:

1. The 1998 ROE cites a Section 326.8(b) violation for failure to implement an adequate BSA compliance program. The ROE also warns the bank that if not corrected, repeat violations *may* result in civil money penalties. The repeat violation statement is a warning to management, not a repeat of a previously cited Section 326.8(b) violation. The response to the 1998 ROE indicates that the bank took action to adequately address the BSA violations. The response details actions taken to effect correction, including the elimination of all CTR exemptions previously granted. Since the 1998 ROE did not reflect a repeat Section 326.8(b) violation, no formal or informal corrective action was necessary, and positive responses from management were immediate with the first corrective actions taken during the examination.
2. The repeat violations of Sections 103.22(b) and (c) are technical issues. The bank is located in a rural area, has a small asset size, and a low volume of reportable transactions. The violations stem from one customer (with two gasoline/mini-mart business accounts)

CORPORATION COMMENTS

Internal Assessment of DSC’s Program to Evaluate Bank Compliance with the BSA.

whose activity had been reviewed and who was granted exemptions for CTR filings. These exemptions had not been reviewed on an annual basis, and the exemption amount was required to be adjusted by \$4,000. The bank’s compliance program at the 1998 examination was deemed reasonable to assure and monitor compliance with BSA. The response to the 1998 ROE indicates the bank took action to adequately address the BSA violations. As a result, follow-up consisted of a regular-scope BSA review at the next examination. No violations were noted at the next examination. Follow-up at the next examination was appropriate.

3. The ROE comment was a reminder to management of the potential for civil money penalties if violations were not corrected. These comments do not imply that civil money penalties were being considered, or that repeat violations of Section 326.8(b) occurred.

Assessment of Follow-up Action:

Given the bank’s small asset size, rural location, low volume of activity, adequate management, and history regarding knowledge of the BSA, follow-up that consists of review at the next examination is considered appropriate. Subsequent examination activity supports this conclusion.

Institution # 12

Low BSA Risk

Date	Total Assets (\$ Million)	Rating	BSA Violations (#)
2003	\$126 - \$150	Moderately Rated	None
2002	\$101 - \$125	Highly Rated	NA
2000	\$51 - \$100	Highly Rated	(1)- Inadequate controls/326.8(b)
1999	\$51 - \$100	Highly Rated	NA
1998	\$51 - \$100	Highly Rated	(1)- Inadequate controls/326.8(b)
State performs review of prior BSA violations.			

OIG Concern:

1. The 1998 ROE cited a violation for failing to provide for adequate administration of the BSA program, which was supported by a combination of deficiencies: the bank had not independently tested BSA compliance, had not established procedures for detecting multiple cash transactions aggregating over \$10,000 in one business day, and had not filed two CTRs. The combination of these deficiencies led to the conclusion that the BSA program was not adequately administered. The ROE stated bank management will implement procedures relating to the recommendations to correct the violation of Section 326.8(b).

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

2. At the 2000 examination, a violation of Section 326.8(b) was cited. The president committed to reviewing BSA via independent testing and revising and approving BSA policy.
3. The 2002 state examination indicates a repeat violation. Bank management indicated computer-generated reports will be reviewed daily and used for independent testing.

Supervisory Actions:

1. The draft audit report does not include information from the 1999 state ROE indicating an interim period of corrective action for the Section 326.8(b) violation. The bank corrected the independent testing deficiency as noted by a 1998 letter to the FDIC RO from the bank's president that contained a copy of the bank's 1998 directors' examination, conducted by a CPA firm that included a review of BSA.
2. The 2000 FDIC examination cited a violation of Section 326.8(b). That determination was made, because the bank had not independently tested BSA since the 1998 CPA review, and had not kept its BSA policy current or approved it annually. The FDIC examination indicates that overall procedures are generally adequate to prevent reportable transactions from going undetected. The bank's 2000 response to the transmittal letter indicates that the bank plans for testing of BSA in the very near future.
3. In the 2002 state examination, Section 326.8 violations were noted for lack of independent testing. Once again, the bank was found to have adequate policies and procedures. The state considered this to be a repeat violation, but made the determination that internal bank procedures implemented during the examination were sufficient to correct the violation and preclude regulatory action. The 2003 ROE notes that the BSA violations have been corrected.

Assessment of Follow-up Action:

The original violation was corrected shortly after the 1998 examination; an intervening state examination (1999) reported no BSA concerns; and the 2000 FDIC examination violation was cited for a different combination of deficiencies. Although the 2002 state examination again noted a violation for no independent testing, the state was satisfied with the corrective measures implemented during the examination. The subsequent FDIC examination (2003) confirmed compliance. Bank management has demonstrated an ability and willingness to correct deficiencies. Given the bank's past corrective actions, small asset size, rural location, low

1997	\$101 - \$125	Highly Rated	(1)-Inadequate controls/326.8(c)(1); (1)-Independent testing/326.8(c)(2) (1)-BSA Officer/326.8(c)(3) (1)-Inadequate Training/326.8(c)(4) (1)-CTR Filing/103.22(a)
State does not examine for BSA. Within the past 2 or 3 years the state has begun to perform limited follow up on violations cited at prior FDIC exams.			

OIG Concern:

- Violations cited at the 1997 examination are not separately entered into ViSION.
- None of the 94 violations cited in the 2002 ROE are listed in ViSION. The regulations are Sections 326.8(c)(1), 103.29(a), 103.29(a)(1)(ii), 103.29(a)(2)(i), 103.29(a)(2)(ii), 103.22(b)(1), 103.27(a)(1), 103.27(d), 103.22(d), 103.22(d)(6)(i), 103.22(d)(4), 103.22(d)(5)(ii), 103.22(d)(6)(x), 353.3(a), 353.3(a)(2), 353.3(b)(1).
- Time frame for corrective action was protracted.

Supervisory Actions:

- The violations cited at the 1997 examination are included in ViSION with the safety and soundness examination.
- The violations cited at the 2002 examination are listed in ViSION with a 2003 examination date.

CORPORATION COMMENTS

Internal Assessment of DSC’s Program to Evaluate Bank Compliance with the BSA.

3. The 1997 ROE comments noted a BSA violation, as the bank policy did not address independent testing. The bank’s CPA firm was scheduled to conduct testing during third quarter of 1997. The 1999 ROE comments noted repeat violations of Section 326.8(c)(1) and (2). Supervisory action occurred at the next examination.

Assessment of Follow-up Action:

The DSC concurs in general with the OIG regarding the follow up for this bank. It appears that the violation of Sections 326.8(c) (1) and (2) existed across examination cycles; however, follow-up action after the 2002 examination was timely, extensive, and successful. The RO issued a MOU in 2003 to address BSA deficiencies. A 2003 visitation was conducted to monitor progress with the MOU. At the visitation, all deficiencies were found to have been addressed and/or corrected, and sufficient BSA controls are in place.

Institution #17 (“inactive”)

Low BSA Risk

Date	Total Assets (\$ Million)	Rating	BSA Violations (#)
1998	\$51 - \$100	Highly Rated	(2)- Instrument logs/103.29(a)(2); (4)- Improper exemption or limit/103.22(b),(c); (3)- CTR filing errors/103.27(d); (1)- Independent testing/326.8(c)(2)
Bank merged with another institution in 1999.			

OIG Concern:

OIG indicated the following concern from the 1998 examination.

“The violation code for 103.22(b) is 60000 not 60001. The violation code for 103.27(d) is 63001 not 63000. An additional violation 103.29(a)(2) is in the ROE that's not in VISION. The BSA officer stated the apparent violations resulted from oversight and more care would be taken to prevent future occurrence. The president committed to implementing the examiner's recommendations. This bank became inactive after this examination in 1999.”

Supervisory Action:

[NOTE: The violation codes in effect at the time of this examination are based on Regional Director Memorandum (“RD Memo”) 96-085 which was superceded in 1999 by RD Memo 99-066 which was then superceded by RD 03-048. Thus, the violation code used to capture the 103.29(a)(2) citation was eliminated in 1999 due to a change in the BSA regulation.]

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

The bank merged into another institution in 1999. The bank was highly rated at the 1998 examination, as well as management. The bank was cited for four BSA violations: improperly setting exemption limits; inadequate independent testing; incomplete CTRs; and missing documentation on monetary instruments. The first and last were repeat violations from the 1995 compliance examination. During the examination, the bank president committed to correct the violations cited. In 1998, the examiner-in-charge met with the bank's directorate to present the findings of the examination and noted the BSA violations. An e-mail in 1998, memorializes the meeting with the board of directors. Again in 1998, the RO notified FinCEN that the RO requested that the bank contact FinCEN for guidance on CTR backfilling.

In a letter dated in 1998, management indicated that corrective action was taken to eliminate future BSA violations. Management also included a progress report on each item of BSA-related criticism noted in the ROE.

Bank Profile:

The bank is **INACTIVE**. This institution was a \$51-\$100 million well-managed institution, which was highly rated for four consecutive examination cycles dating back to 1993. The bank's trade area was primarily rural, with a moderate population estimated about 60,000. The money-laundering risk was low. The board of directors and operating management were regarded as active and conservative. Management was highly rated since 1992.

Assessment of Follow-up Action:

Supervisory action included meeting with the directorate, sending notification to FinCEN, and receiving a progress report from bank management that indicated corrective action. Supervisory action was completed within 100 days from the examination start date. Adequate supervisory action was taken as the bank corrected apparent violations during the normal course of business.

1998	\$0 - \$10	Highly Rated	NA
1997	\$0 - \$10	Highly Rated	None
State does not perform BSA examinations or review prior BSA violations.			

OIG Concern:

The OIG notes a repeat violation from 2001 and 2003 examinations pertaining to Section 326.8 (c)(2), lack of adequate independent testing. Given that this institution was placed in the inadequate follow-up period of 49 to 60 months, it appears that the OIG criticism may stem from the violations cited in the 1999 examination.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

Supervisory Action:

The RO was unable to obtain the 1997 ROE from archives by the OIG's deadline. The 1999 ROE notes two BSA-related violations: the lack of a specially designated individual to monitor BSA compliance; and the lack of adequate independent testing. The ROE notes that procedures are generally adequate considering the level of activity, size, and customer base. In a transmittal letter dated 1999, the FDIC requested that management submit a response to the FDIC containing its corrective measures regarding the ROE findings. The RO received correspondence from the bank in 1999, stating that the violations had been corrected.

The 2000 examination conducted by the state did not include a review of BSA compliance. The state entered into a MOU with the bank subsequent to this examination to address all safety and soundness concerns.

The 2001 FDIC examination found the bank's condition deteriorated significantly. The bank and management were rated low. The ROE noted a repeat violation for failure to provide independent testing for the BSA program. The examiners received management's commitment to correct the violation. The bank was later placed under an informal corrective action in 2001 that included a provision for the correction of violations cited during the examination, including BSA program violation. Bank management submitted several reports detailing progress with the informal action. The first progress report in 2001, stated that all violations had been corrected and that an outside compliance audit had been completed. Subsequent quarterly progress reports all state that the "BSA violation has been addressed and reviewed. The bank will include this issue in the next third party review."

The 2002 ROE reflects the bank's serious and ongoing deterioration. The bank's was again rated low, and considered a potential failure. The ROE states, "The BSA violation concerning the independent testing for compliance with financial recordkeeping requirements has been corrected." No BSA-related violations were cited during the examination.

The 2003 ROE cites a violation of Section 326.8 of the FDIC Rules and Regulations in addition to Section 103.27(d) for incomplete CTRs filed during 2002. A violation of Section 326.8(c)(1) was also cited. The ROE notes that management committed to correct the violations. The bank provided a response to the examination dated in 2003, stating that it would adhere to the regulations.

The 2003 state bank regulator's ROE notes that management stated that the violations had been corrected and that measures had been implemented to prevent recurrence.

Bank Profile:

CORPORATION COMMENTS

Internal Assessment of DSC’s Program to Evaluate Bank Compliance with the BSA.

The bank is \$0–\$10 million institution located in a small town in the southwestern part of the United States, with a population of less than 600. The local economy is based on diversified manufacturing, agri-business, oil-field operations, and service industries. The bank is the only financial institution in town and does not operate any branches. The bank’s money-laundering risk profile is low. The bank has a very low level of reportable transactions. The 2001 ROE noted that the bank had only filed four CTRs since the previous FDIC examination in 1999.

Assessment of Follow-up Action:

For the 1999 examination, supervisory action consisted of sending a transmittal letter within 29 days of the examination start date and receiving a response from bank management indicating that the violation was corrected within 78 days from the examination start date. The supervisory action taken was adequate as management corrected the apparent violation during the normal course of business.

For the 2001 examination, supervisory action consisted of an enforcement action executed within 62 days from the examination start date. Supervisory action taken was adequate as management reported within 64 days that the violations were corrected. In addition, no BSA violations were cited at the subsequent examination.

For the 2003 examination, supervisory action taken consisted of obtaining commitments to correct violations during the examination. Supervisory action was completed within 63 days from the start of the examination as management indicated in a letter that the violation had been corrected.

State does not perform BSA examinations or review prior BSA violations.			

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

OIG Concern:

The OIG concerns are the intervals between the 1997 and 2000 examinations as well as the 2000 and 2003 examinations, and apparent repeat violations stemming from the 1997 examination. As a result, the follow-up time was determined inadequate.

The OIG indicated the following concern from the 2000 examination.

“Follow-up not determinable. The audit does not include review of regional or field office files. The bank's BSA officer stated additional effort would be extended to correct noted deficiencies and prevent recurrence. The examination date is 2000. ViSION has 1999, as examination date.”

Supervisory Action:

The 1997 FDIC ROE reflects BSA-related violations, including an inadequate training program, lack of internal controls, and an inadequate independent audit program. The confidential section of the ROE notes that no CTRs had been filed since the previous examination, and that the bank had no exempt customers. The bank received an overall high rating during this examination, and management was also highly rated. Correspondence dated 1997 from the bank responding to the examination findings states that the bank implemented a new training program and that the BSA program had been revised to improve compliance regarding internal controls and independent audit coverage.

The 2000 FDIC ROE notes that management had taken steps to address violations cited at the previous examination. However, a repeat violation pertaining to the bank's inadequate BSA training program was cited, and the ROE noted that training had not been performed since 1997. Although management implemented a BSA training program to address the ROE deficiency, additional follow-up training did not occur thereafter. While no follow up was requested, the RO was comfortable that management would respond to the ROE criticisms, as it had in the past. Management actions were confirmed at the next FDIC examination in 2003, where no BSA violations or criticisms were noted.

Since neither the OIG nor the RO reviewed archived files on this bank relating to the 2000 examination, no correspondence indicating follow up was reviewed; however, highly-rated bank management is generally found to be responsive. Given the historical responsiveness of bank management and the overall profile of the institution, enforcement action was not considered necessary.

Bank Profile:

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

The institution is an \$11-\$25 million institution located in a small community with a population of approximately 500 located in the Midwest. The bank's money-laundering risk is low. The bank has had very few, if any, transactions reportable under the BSA regulation. Management has been highly rated since 1987.

Assessment of Follow-up Action:

Supervisory action was taken by reviewing a response from bank management that indicated corrective action was taken by management to eliminate the apparent violation. Supervisory action was completed within 141 days from the start of the 1997 examination. Supervisory action taken was considered adequate as management corrected the violation during the normal course of business. Regarding the 2000 examination findings, since archived files were not reviewed, follow-up action and times cannot be confirmed; however, as part of the normal supervisory process, a transmittal letter accompanies the ROE and a response from bank management is received within a reasonable time frame. Given the risk profile and the historical responsiveness of bank management, in addition to the lack of violations cited at the subsequent 2003 examination, appropriate supervisory action was taken.

Institution # 21

Low BSA Risk

Date	Total Assets (\$ Million)	Rating	BSA Violations (#)
2003	\$26 - \$50	Highly Rated	(2)- Exempt bank/103.22(d)(3)(ii); (1)- Independent testing/326.8(c)(2).
2001	\$26 - \$50	Highly Rated	NA
2000	\$26 - \$50	Highly Rated	None
State does not perform BSA examinations or review prior BSA violations.			

OIG Concern:

The OIG indicated that the lack of independent testing of BSA compliance is a repeat violation that was cited in the 2001 and 2000 examinations. Bank management agreed in all three ROEs to address the problem.

Supervisory Action:

Examination work papers noted that "independent testing" was not included in the audit program for 2002 and prior years due to cost. Also noted was the intent to have this aspect of the BSA program conducted in conjunction with the 2003 audit. A major mitigating factor is this small, rural bank's lack of reportable transactions as they have had only three in recent history (two in 2000 and one in 1996).

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

A review of the bank indicated that no BSA violations were cited in the 2000 ROE. ROE comments also indicated that the bank was in compliance with the BSA program. Also, no violation was cited in the 2001 examination conducted by the state.

The ROE dated 2003, cited two violations that the bank's "independent testing had failed to discover the bank's failure to file a Designation of Exempt Person form for a correspondent bank." The RO indicated that the bank had been conducting independent testing, but the scope was determined to be inadequate. Bank management indicated that the independent testing for BSA compliance would be added to the scope of the directors' examination.

Bank Profile:

The institution is located in a small, rural community (population of approximately 1,200) in the Midwest. The bank operates from a single office, is not located in close proximity to any major metropolitan areas, and has few large cash transactions. While an examination of the bank's BSA compliance practices and procedures has not resulted in serious violations, the most recent ROE cited the inadequacy of its "independent" testing as that review failed to note that exemptions were not filed for transactions with a correspondent bank. Given the absence of any significant issues as well as the absence of significant cash transactions, the bank is considered to be a low BSA Risk.

Assessment of Follow-up Action:

No supervisory action was taken since no BSA violations were cited at the 2000 and 2001 examinations. The institution remained on a normal examination schedule. Supervisory action was deemed appropriate given the institution's low risk profile and lack of any reported BSA violations in the 2000 and 2001 examinations.

Institution # 23**Low BSA Risk**

Date	Total Assets (\$ Million)	Rating	BSA Violations (#)
2003	\$51 - \$100	Highly Rated	None

CORPORATION COMMENTS

Internal Assessment of DSC’s Program to Evaluate Bank Compliance with the BSA.

			(1)- Inadequate program/326.8(b)(i). (1)- Identity record (non-customer)/103.29(a)(2)(i)(ii);
State does not perform BSA examinations or review prior BSA violations.			

OIG Concern:

Examiner determined that the bank complied with the requirement to have independent testing of BSA program. The violation was cited in both the 1997 and 2000 ROEs.

Supervisory Action:

This small, rural institution did not adopt an independent testing program due to cost. However, the independent testing issue was resolved at (or shortly following) the time the bank acquired some branches in a metropolitan area. Even with this expansion in office facilities, the number of reportable transactions remains nominal (nine in 2001; eleven in 2002; and ten to the date of the 2003 examination). No enforcement action was deemed necessary inasmuch as the bank’s operations were in compliance with the BSA.

The ROE dated 1997, listed 10 Section 103 violations and one BSA violation for lack of independent testing of the BSA program. The summary comments for this examination indicated that management promised correction, and the RO requested a response within 60 days on significant items.

The ROE dated 2000, indicated that all BSA violations had been corrected except for the lack of independent testing. Bank management agreed to consider including a review of BSA as part of the bank’s annual directors’ examination. Therefore, it appears the reason for not implementing the testing after the 1997 examination was due to a cost issue. The RO concluded that no follow-up was deemed necessary based on the bank’s satisfactory overall BSA compliance, strong financial condition, and management’s history of following through on corrective action.

Bank Profile:

The institution is located in the Midwest (population approximately 1,000) with expansion of operations into a nearby metropolitan area in 2001. The bank is one of more than 20 institutions operating in that metropolitan area and, as such, one of many institutions in that market. Inherent operations are based in a small, rural community where significant cash transactions are minimal. The violation cited was limited to the lack of independent testing, although testing was being conducted. The bank’s nature and scope of operations indicates that the bank is considered a low BSA risk.

Assessment of Follow-up Action:

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

The ROE dated 1999, did not cite any violations. The ROE stated that "improvements had been made from the previous FDIC examination." In addition, the OIG chart incorrectly shows this bank as having repeat violations.

Bank Profile: This large and rapidly growing institution is (and has been) extremely-well managed through its history and, likewise, its BSA compliance program has exhibited similar strengths. While the bank's main office is based in a small Midwest town (population of less than 700), they have had a presence in the nearby city (population greater than 75,000) for many years. Historical expansion has been predicated on communities near the city, with recent expansion into the state's second largest market (population greater than 150,000) generating additional growth. With the close proximity to and in the city area as well as the newly entered nearby market, the inherent BSA risks increased. Over the years, the bank's BSA officer has maintained close contact with the FDIC on BSA issues, and the bank's goal of reporting all significant transactions has occurred. The bank is considered a moderate- to high-BSA risk based on the bank's area of operations; however, it must be noted that the bank's response is more than adequate to meet inherent challenges.

Assessment of Follow-up Action:

Supervisory action was completed during the examination. All documents were filed within acceptable timeframe. No further supervisory action was deemed necessary.

1998	\$26 - \$50	Highly Rated	(2)- Late CTR filings/103.27(a); (1)- Inadequate program/326.8(b)(1); (1)- CTR filing/103.22(b)(1); (1)- Exempt bank/103.22(d)(3)(ii)
State does not perform BSA examinations or review prior BSA violations.			

OIG Concern:

OIG indicated the following concerns from the 2001 BSA visitation.

1. Five CTRs were not received by the Internal Revenue Service within the prescribed time period. Bank management agreed to address the infractions.
2. Examiner identified one new violation of Section 103.27(d). In addition, two other violations had not been corrected from the 2001 ROE resulting in a repeat violation from the 2001 examination. Management agreed to address the infractions.
3. Examiner identified one CTR that had not been filed as required. Management agreed to address the infraction.

Supervisory Action:

A 2001 transmittal letter for the 2001 ROE requested a progress report from the bank by quarter-end 2001. The bank addressed the above issues in their follow-up report dated by quarter-end 2001, which was acknowledged by the RO in a letter dated quarter-end 2001. BSA issues were again addressed during a RO outreach contact in 2002.

The 2001 BSA visitation report indicated that the examiner provided the bank with information to follow-up on the inaccurate CTRs. However, subsequent verification was not requested from the bank. The outreach contact record indicated that the BSA concerns were being addressed.

CORPORATION COMMENTS

Internal Assessment of DSC’s Program to Evaluate Bank Compliance with the BSA.

Bank Profile:

The institution is located in the Midwest. With the addition of its most recent office in 2001, the bank has experienced significant growth. The 1998 ROE identified several BSA deficiencies which were also reviewed at the 2001 examination. Deficiencies noted in the latter prompted a follow-up visit in 2001, which disclosed management had taken significant steps to improve BSA compliance. In view of the number of reportable transactions the bank was handling prior to making better use of the exemption programs (both Phase I and Phase II) and the noted growth since 2000, the bank is considered a moderate-BSA risk.

Assessment of Follow-up Action:

Supervisory action consisted of a transmittal letter to the institution in 2001, and a follow-up report from the bank dated in 2001. Additionally, a follow-up BSA visitation was conducted in late 2001. The timeframe between the examination of 2001, and the visitation was 192 days. Given the bank’s willingness to correct BSA violations, its favorable financial condition, and management’s history of following through on commitments to regulatory agencies, the supervisory action taken seems appropriate. The FDIC finalized an examination in 2004. Findings identified two isolated late CTR filings. No other BSA problems were identified, and overall the BSA program was determined to be effective.

Institution # 26

Moderate BSA Risk

Date	Total Assets (\$ Million)	Rating	BSA Violations (#)
2003	-	-	None
2003	\$26 - \$50	Highly Rated	(18)- Late CTR filings/103.27(a); (13)- CTR filings/103.22(b)(1); (1)- Instrument log/103.29(a); (1)- Inadequate program/326.8(b)(1); (1)- Independent testing/326.8(c)(2); (1)- Inadequate training/326.8(c)(4)
2002	\$26 - \$50	Highly Rated	NA
2001	\$11 - \$25	Highly Rated	(3)-Late CTR filings/103.27(a)
State does not perform BSA examinations or review prior BSA violations.			

OIG Concern:

OIG indicated the following concern from the 2001 examination.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

ROE cites a violation that the bank did not file a SAR when a customer of the bank reported \$22,000 missing from a safe deposit box. An acquaintance of the customer reportedly forged the signature of one of the individuals with authority to enter the safe deposit box. The next day the customer reported the funds missing. The bank contacted local authorities. Bank management committed to filing the report. Subsequent ROEs/visits do not seem to address this issue.

Supervisory Action:

The bank's correspondence file contains a copy of the requisite SAR prepared as in 2001. The 2001 ROE cited the bank for not filing a SAR with the appropriate authorities. The ROE indicated that bank management committed to filing the required report. The OIG did not see any subsequent documentation supporting the filing. However, the RO has provided from the bank's correspondence file a copy of the SAR filing dated 2001.

Bank Profile:

The institution is a relatively new institution (chartered in 2000) which is situated in a popular vacation destination. As such, the volume of "visitors" and attendant cash is significant. The bank's BSA compliance program was not deemed adequate at the 2003 examination and a follow-up visitation was conducted later in 2003. The latter onsite review noted that substantial progress had been attained in achieving compliance with BSA and management committed further efforts. In view of the environment in which this bank operates, a strong BSA compliance program is deemed imperative and will be monitored closely. The bank is considered a moderate-BSA risk.

Assessment of Follow-up Action:

The institution provided the RO with a copy of the SAR filing. The document was filed within an acceptable timeframe. No further supervisory action was deemed necessary.

Institution # 27

Low BSA Risk

Date	Total Assets (\$ Million)	Rating	BSA Violations (#)
2002	\$26 - \$50	Highly Rated	None
2001	\$26 - \$50	Highly Rated	NA
2000	\$26 - \$50	Highly Rated	(11)-CTR filing errors/103.27(d); (1)- Inadequate program/326.8(b)
1998	\$26 - \$50	Highly Rated	NA
1997	\$26 - \$50	Highly Rated	(9)- CTR filing errors/103.27(d); (7)- CTR filing /103.22(a); (2)- Identification procedures/103.28
State does not perform BSA examinations or review prior BSA violations			

OIG Concern:

OIG indicated the following concern from the 2000 examination.

“The examiners noted 11 apparent violations of Section 103.27(d). The president stated that CTRs would be reviewed more closely before filing and the bank would begin conducting the reviews annually. The bank had not provided for independent testing of the BSA program. This deficiency was noted in a prior examination conducted in 1997 and remains uncorrected as of this examination. During the examination, bank management appointed an employee to perform independent testing of the BSA program.”

Supervisory Action:

The 1997 ROE prepared by the FDIC detailed three apparent violations with a modest level of frequency. These apparent violations were not considered systemic, and given satisfactory management, with a strong history of responding to supervisory concerns, no enforcement action was warranted. Due to the lack of systemic violations and management's willingness to address supervisory concerns, no follow-up between examinations was necessary.

In 1997, the RO transmittal letter to the bank asked for follow-up on all regulatory concerns, including BSA-related deficiencies. A few weeks later in 1997, the bank's chairman and chief executive officer responded to the examination findings. The chairman indicated that the bank had strengthened the audit and review procedures to improve the BSA compliance program. He further indicated that personnel are better trained and knowledgeable of BSA compliance, and he also filed corrected CTRs.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

The 2000 FDIC ROE cited violations of Part 103 for failure to provide all required information on the CTR and Section 326.8 for failure to have independent testing. The violations pertaining to Part 103 were not repeat violations. A transmittal letter was sent from the RO in 2000, and the bank was instructed to correct the apparent BSA-related violations. The transmittal letter also required the bank's response to the ROE to include action taken to correct BSA-related weaknesses. Approximately a month later, the bank's president responded to the RO, indicating the BSA deficiencies had been corrected and independent testing was being performed. Given the risk profile and outstanding rating of the institution, a BSA visitation to ensure correction was not necessary.

The 2002 FDIC ROE detailed a generally adequate BSA compliance program. While the BSA training was considered adequate, the ROE noted a minor deficiency, in that there was lax documentation of the employee training. The adequacy of employee training is evidenced by the correction of prior examination violations and no further BSA-related violations. The president indicated that future training would be better documented. There were no material weaknesses in the BSA compliance program and no apparent BSA-related violations were cited. Consequently, there was no need for supervisory action. It should be noted that during the 2002 examination, it was determined that there were no reportable transactions since 2001. The overall improvement in this bank's BSA compliance supports no enforcement actions.

Bank Profile:

The bank is a \$26-\$50 million institution with one office located in the Southeast. The population of the county as reported in 2000 was approximately 30,000. The money- laundering risk profile is low. The trade area is rural, with an agrarian-based economy. The 2002 FDIC ROE work papers reflected a low level of CTR filings, with no currency transaction greater than \$10,000 for approximately 10 months prior to the examination. The 2002 work papers indicate the level of CTRs had declined between the 2000 and 2002 examinations, as a result of a large customer closing its deposit account. Bank management has been highly rated since 1982.

Assessment of Follow-up Action:

For the 1997 examination, supervisory action consisted of sending a transmittal letter within 42 days of the examination start date requesting bank management to address the deficiencies cited in the ROE. Supervisory action was completed within 73 days of the examination start date upon receiving confirmation from bank management that the violations were corrected. Adequate supervisory action was taken as management corrected violations during the normal course of business.

For the 2000 examination, supervisory action consisted of sending a transmittal letter to the bank requesting corrective action. Supervisory action began within 48 days of the examination start

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

date and was completed within 101 days of the examination start date upon receiving confirmation from bank management that the violations were corrected. Supervisory action was adequate as the violations were corrected during the normal course of business.

Institution # 30 ("inactive")

Low BSA Risk

Date	Total Assets (\$ Million)	Rating	BSA Violations (#)
2000	\$151 - \$200	Highly Rated	NA
1999	\$51 - \$100	Highly Rated	None
1998	\$26 - \$50	Highly Rated	NA
1997	\$26 - \$50	Highly Rated	(6)-Identification method/103.28; (1)-Improper exemption or limit/103.22(b)(1); (1)-Exemption Form/103.22(d); (1)-Record of Exemption/ 103.22(f); (1)-Instrument Log/103.29(a)(1)
State does not perform BSA examinations or review prior BSA violations.			

OIG Concerns:

Length of time between follow up on violations cited at the 1997 examination was between 25-36 months.

Supervisory Action:

The 1997 FDIC ROE cited numerous violations of Part 103, specifically pertaining to exemptions, required information for completion of CTRs, and monetary log data.

In 1997, the RO sent the bank a transmittal letter requesting that management provide a written response within 45 days, detailing corrective actions to eliminate deficiencies cited within the ROE. Bank management responded one month later stating that additional training would be provided and audit coverage of the BSA compliance program would be completed.

Given the risk profile of the institution and the outstanding ratings, a BSA visitation to ensure correction was not necessary.

The 1999 ROE revealed no weaknesses, material or otherwise, in the BSA compliance program. The examiner-in-charge noted in the ROE that the operating procedures for managing the BSA program had improved since the last FDIC examination.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

Bank Profile:

Bank is **INACTIVE**. This institution resulted from the merger of two institutions in 2000, with the charter of the first bank being dissolved. The surviving institution changed its name to Institution #30 and relocated its main office. This institution subsequently merged into another institution in 2001. The last FDIC ROE was completed in 1999.

The money-laundering risk at this institution prior to its merger was low. The customer base was local and appeared well known by bank personnel. Nothing in the ROEs indicates any unusual or suspect transactions. The last two FDIC ROEs rated management highly. Management has been highly rated since 1982.

Assessment of Follow-up Action:

Supervisory action was taken by sending a transmittal letter requesting bank management to eliminate deficiencies cited in the ROE. Supervisory action was taken within 33 days of the examination start date and was completed upon receiving a satisfactory response from management within 81 days from the start of the examination. Adequate supervisory action was taken given that the bank corrected the apparent violations during normal course of supervision.

Institution # 33**Low BSA Risk**

Date	Total Assets (\$ Million)	Rating	BSA Violations (#)
2002	\$151 - \$200	Highly Rated	NA
2001	\$126 - \$150	Highly Rated	(1)- Independent testing/326.8(c)(2)

State does include BSA examination procedures within the scope of its regular examinations.			

OIG Concern:

Follow-up did not occur within 12 months on violations and concerns noted in FDIC ROE dated in 2001.

Supervisory Action:

The 2001 FDIC ROE cited violations of Section 326.8 for a lack of independent testing of the BSA compliance program. Violation occurred because audit of the program was being conducted by the bank's BSA officer, thereby inhibiting the independence of the review. The violation was not a repeat from prior examinations and did not result in a formal action against

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

the bank. A letter from the chairman of the board and president of the bank, dated two months later in 2001, in response to the examination findings, stated that the infraction had been corrected by separating the BSA officer from the audit function. To date, a follow-up examination has not been conducted by the FDIC. Since the last FDIC examination, there have been two independent reviews of BSA by the bank (2002 and 2003).

Bank Profile:

Bank is a \$151-\$200 million institution serving rural communities of less than 7,000 residents in the Mid-Atlantic Region. Bank has been highly rated over the last 10 years. Bank management has also been highly rated since 1994, which includes the last three FDIC examinations. Bank is financially strong and has good management. The overall BSA program is adequate and the violation was considered minor. The bank committed to correcting the infraction and responded to the RO within 90 days of the date of the FDIC ROE.

Assessment of Follow-up Action:

In the transmittal letter sent to the bank by the RO, accompanying the FDIC ROE, management was asked to provide a written response to examination criticisms. Bank management provided a written response to the RO in 2001, stating that corrective action had been implemented. This letter was sent to the RO within 90 days after the examination date.

2002	\$250 - \$500	Highly Rated	(11)- Exempt filing/103.22(d)*
2001	\$250 - \$500	Highly Rated	NA
2000	\$250 - \$500	Highly Rated	None
1999	\$250 - \$500	Highly Rated	NA
1998	\$250 - \$500	Highly Rated	None
*violation was not cited in ROE, although code 6604 was entered into BSA data entry form for examination. Comments contained in confidential section of ROE. State does include BSA examination procedures within the scope of its regular examinations.			

OIG Concern:

Follow-up did not occur within 12 months on violations and concerns noted in FDIC ROE dated in 2002.

Supervisory Action:

The 2002 FDIC ROE reported violations of Part 103 for failure to properly file CTR exemption forms for customers included on its exemption list. The violations cited were not repeat violations, and no formal action was taken against the bank for the violations. The bank filed the exemption forms during the examination in 2002, which corrected the infractions.

Bank Profile:

Bank is a \$250-\$500 million institution on the East Coast. Generally, the bank's branches serve a rural community of less than 10,000 residents. The bank has been highly rated since 1994. Bank management has also been highly rated 1995, which includes the last four FDIC examinations. Bank is financially strong with good management. Violations do not indicate systemic risk in BSA compliance program. Overall program is considered adequate. Neither the bank nor its customer base has been determined to be involved in high-risk activities.

Assessment of Follow-up Action:

The examination started in 2002, and concluded one month later. Bank management filed exemptions prior to the conclusion of the examination. Copies were provided to examiners and retained in examination work papers. No additional follow-up supervisory action was necessary, as bank management corrected the deficiencies during the examination. This deficiency was not repeated at the subsequent examination.

State performs limited BSA examinations and reviews prior BSA violations.			

OIG Concern:

During examinations conducted in 1997, 1999, and 2002, the bank was cited for violations related to the lack of independent testing of BSA compliance and failure to provide adequate BSA training. Corrective action was not taken until after the 2002 examination. The FDIC issued a Cease and Desist Order in 2002, more than 60 months (5 years) after the violations were initially cited. Accordingly, the institution operated for more than 5 years without complying with the minimum requirements of a BSA compliance program as required by Section 326.8.

Supervisory Action:

The FDIC cited repeat BSA-related apparent violations in its 1999 and 2002 ROEs. The repeat violations pertain to the bank's BSA training program and independent testing for BSA compliance. However, there were no repeat violations cited for other BSA compliance requirements, indicating that the bank's BSA compliance program was effective in practice.

1997 Examination

The 1997 FDIC ROE cited the following apparent violations: Section 326.8(c)(2), which requires a system of independent testing for compliance with the BSA; and Section 326.8(c)(4),

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

which requires training of appropriate personnel. The 1997 Summary Analysis of Examination Report (SAER) comment stated, "The violations occurred due to management's lack of familiarity with the regulations."

The 1999 FDIC ROE again cited apparent violations of the two above-referenced regulations. Despite the repeat apparent violations, the FDIC pursued no supervisory action. The 1999 SAER comment stated, "Management agreed to make corrections, and the examiner does not believe that regulatory action is necessary."

There were no other repeat BSA-related apparent violations cited, indicating that, despite the bank's lack of a formal employee-training program and the lack of independent BSA compliance testing, that the bank's BSA compliance program remained effective in practice.

The 2002 FDIC ROE again cited apparent violations of the two above-referenced regulations (third consecutive examination). In 2002, the FDIC issued a formal enforcement action pursuant to Section 8(s) of the FDI Act, specifically targeting the bank's failure to comply with the BSA.

Examiners conducted visitations of the bank to review management's progress in complying with the Order mid-year 2002, and the following quarter in 2002. The Order was terminated a few weeks later, following the 2002 visitation, which found the bank in compliance with BSA. Given the bank's compliance with the Cease and Desist Order, the bank is considered a low BSA risk.

Bank management did not follow through as agreed in the 1999 and 2002 examinations; as a result the RO issued a formal enforcement action addressing the repeat violations for an inadequate testing of the BSA program and training of bank personnel. The bank has since complied with the formal action which was subsequently terminated within three months of issuance.

Bank Profile:

The bank is a \$0-\$10 million community bank in the West. Historically, the bank's BSA-related activities have been negligible. The bank has filed only twelve CTRs since 1997 (three in 1997, two in 2001, three in 2002, and four in 2003). Management has been highly rated at every examination conducted since the 1999 examination. Two examinations conducted in 1998 and in 1997 indicate a management rating of moderate. The most recent examination of the institution was in 2003 resulting in a high rating.

Assessment of Follow-up Action:

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

The DSC concurs in general with the OIG regarding the follow-up for this bank. A Cease and Desist Order was issued in 2002 for the bank's non-compliance with the BSA. The bank was cited for repeated violations for lack of testing and training which dated back to 1997. While bank management indicated their willingness to comply, action should have been taken prior to the 2002 examination.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

Institution # 39**Low BSA Risk**

Date	Total Assets (\$ Million)	Rating	BSA Violations (#)

1998	\$26 - \$50	Highly Rated	(1)- Independent testing/326.8(c)(2); (1)- BSA Officer/326.8(c)(3)
State performs limited BSA examinations or reviews prior BSA violations.			

OIG Concern:

During its examinations conducted in 1998, 2001, and 2003, the bank was cited for violations related to lack of independent testing of BSA compliance. Corrective action was not taken until 2003, when the FDIC, state regulatory agency and the bank signed an MOU to correct BSA violations, more than 60 months (5 years) without complying with the minimum requirements of a BSA compliance program as required by Section 326.8.

Supervisory Action:

The violation cited in 1998 was corrected later that year. The bank's BSA compliance did relapse subsequent to the 1998 examination, as determined during the 2001 examination, but the RO chose not to pursue an enforcement action given earlier corrections and management's promises of action. The FDIC's 2001 examination again criticized the lack of independent testing (and failure to obtain and retain information regarding the issuance of four cashiers checks), but also confirmed that management did conduct independent testing in 1998 and revised the bank's BSA policies in response to the 1998 examination. However, there was a failure to continue the independent testing in 1999 and 2000. In 2001, management again promised corrective action and this time agreed to contact the bank's external auditor to arrange for ongoing independent audits of BSA compliance. Because of this commitment, the RO did not pursue an enforcement action.

The state conducted an independent examination in 2002. The ROE addressed BSA compliance and stated that, all [BSA] deficiencies have been corrected, with one minor exception. Based on the examiner's assessment of the bank's deficiencies in the BSA program, the FDIC concluded that enforcement action was not necessary at that time.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

The FDIC's 2003 ROE cited the lack of independent testing of BSA compliance. This time, the RO did not accept management's commitment to correct the deficiency without enforcement action. A joint MOU with the state became effective in 2003, within 60 days of the date of the examination. Compliance testing was required.

The Bank's report of compliance with the MOU:

The bank's progress report was received on time late 2003. The following is a summary of the institution's compliance with each of the provisions:

1. Establish a program and conduct independent testing for compliance with BSA and 31 Code of Fed. Regs., Section 103, within 60 days and annually thereafter: The board of directors reports compliance. The board adopted a new policy two months ago and a vice president, who is independent of the BSA recordkeeping function, conducted testing and reported to the board on last month. The vice president's report indicates substantial compliance with the MOU, including BSA recordkeeping and reporting requirements. Technical deficiencies were noted in wire transfer records, CTRs, and CTR exemption records, but there were few of them and corrective action has been taken. The vice president gave a positive attestation to the overall integrity and effectiveness of management systems and controls over BSA. The bank purchased Internet-based BSA training programs and training has been conducted. A new BSA officer has designated who oversees continuing training. The bank has also engaged an independent firm, to conduct BSA compliance testing as part of the external audit for 2003.
2. Provide a copy of the BSA compliance plan detailing the form and manner of any actions taken to secure compliance with the MOU within 90 days (2003): The required information was received in late 2003.

Management has achieved substantial compliance with the MOU, but one of the conditions is ongoing in nature, and final determination for compliance with the MOU will be made by field examiners onsite at the next full-scope examination or visitation.

Bank Profile:

The institution is a very small community bank (\$26-\$50 million) located in the West. Its BSA activities are minimal. The bank was cited for lack of independent testing of BSA compliance – not violations of the other key BSA compliance requirements. Management has been highly rated throughout the audit period. The most recent examination of the institution was in 2003, with a high rating.

CORPORATION COMMENTS

Internal Assessment of DSC’s Program to Evaluate Bank Compliance with the BSA.

Assessment of Follow-up Action:

The examination team cited two violations at the 1998 examination which were partially corrected before the 2001 examination. At this examination, the bank was cited again for a lack of testing for BSA compliance. Bank management indicated that corrective action would be taken and based upon management’s reputation for correcting previously cited violations and deficiencies noted in the ROE, no enforcement action was necessary. As noted in the 2002 state examination, all [BSA] deficiencies were corrected except for one exemption limit on a local business. There was no reason to believe that bank management would not again correct the violations cited in the examination. However, a 2003 examination indicated a violation for lack of independent testing of the BSA program. A joint MOU was issued in 2003. The bank is submitting progress reports which indicate testing of the BSA program is being performed. Given management’s prior commitments to correct violations and implement recommendations, the actions implemented by the RO were adequate.

Institution # 40

Low BSA Risk

State performs BSA examinations.			

OIG Concern:

FDIC ROE dated in 2003, cited several deficiencies in the bank’s BSA compliance program; however, no violations were cited and no follow-up supervisory action was taken. OIG determined FDIC response to violations cited at 1997 examination was adequate.

Supervisory Action:

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

In the 2003 ROE, minor recommendations were made to management and no follow-up action was deemed necessary.

Technical violations of Part 103 were cited at the 1997 FDIC independent examination, but no subsequent violations have been cited. ROEs subsequent to the 1997 examination consistently indicate the bank has an adequate BSA program in place. The FDIC last examined the bank in 2003. The examiner-in-charge, who also reviewed BSA, concluded that the internal audit of BSA is thorough, cash transaction volume is moderate, and the program is adequate. Minor recommendations were provided to management, and no apparent violations were noted. It is for these reasons that this institution is considered to have a low BSA risk profile.

Bank Profile:

The bank is a moderately-sized community bank (\$251-\$500 million) that engages in traditional banking activities. Management has been highly rated at every examination conducted in the 1997 to 2003 time frame. The most recent examination of the institution was in 2003 with a high rating.

Assessment of Follow-up Action:

Minor deficiencies were noted in BSA compliance program at the 2003 examination. However, no violations were cited, and management committed to corrective action. No additional supervisory follow-up action was necessary. Furthermore, violations from the 1997 examination were corrected during the RO review process. The bank has not been cited for any violations since that time. Adequate supervisory action was taken at the time of the violations.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

Institution # 41

Low BSA Risk

Date	Total Assets (\$ Million)	Rating	BSA Violations (#)
2002	\$0 - \$10	Highly Rated	None
2001	\$0 - \$10	Highly Rated	None
2000	\$0 - \$10	Highly Rated	NA
1999	\$0 - \$10	Highly Rated	(1)- Independent testing/326.8(c)(2); (1)- Inadequate controls/326.8(c)(1)
1998	\$0 - \$10	Highly Rated	NA
1997	\$0 - \$10	Highly Rated	(1)- Inadequate controls/326.8(c)(1); (1)- Inadequate training/326.8(c)(4)
State does not perform BSA examinations but reviews prior BSA violations.			

OIG Concern:

The OIG is concerned with the repeated violations of Section 326.8(c)(1) for failure to provide for a system of internal controls to assure ongoing compliance and Section 326.8(c)(4) for failure to provide training for appropriate personnel.

Supervisory Action:

At the 1997 examination the FDIC cited two BSA violations: failure to provide for a system of internal controls to assure ongoing compliance; and failure to provide training for appropriate personnel.

At the 1999 examination the FDIC again cited two BSA violations, one of which was a repeat violation from the 1997 examination. The repeat violation was failure to comply with Section 326.8(c)(1). The second violation was failure to comply with Section 326.8(c)(2) and provide for independent testing for compliance to be conducted by bank personnel or by an outside party.

FDIC staff discussed the BSA issues with management and the bank's board following each examination. The bank achieved partial correction following the 1997 examination, by instituting BSA training. All BSA violations were corrected following the 1999 examination, and no violations have been cited in subsequent examinations. For this small bank with limited resources, and importantly, limited exposure to currency transactions, bank management's perception was that the regulatory requirements in this area did not fully apply to their uncommon banking operation. The FDIC's supervisory approach was effective. The FDIC informed management and the board of the importance and applicability of the regulations and guided the bank into full compliance.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

Bank Profile:

The bank is a former thrift that converted to an industrial loan company charter in 1986. The current owner is considered very conservative and has kept the bank operating in much the same manner as it operated under the thrift charter. The bank has had little growth since 1986; total assets as of quarter-end 2003, were \$0-\$10 million. In keeping with a traditional thrift operation, the bank is primarily a real estate lender that portfolios the majority of its loans. For funding, the bank uses small certificates of deposit and Federal Home Loan Bank lines of credit.

Significantly, the bank advertises as a *non-cash bank* and holds very few demand deposits. And of the demand deposits held, a substantial portion may represent disbursed loan proceeds at any given time. The bank operates out of a business office and has no teller stations and is considered a low-BSA risk. Management has been highly rated in the three examinations conducted in 2002, 2001 and 1998. Management was also moderately rated in the 1999 and 1997 examinations. The most recent examination of the institution was in 2002, with a high rating.

Assessment of Follow-up Action:

The bank achieved partial correction following the 1997 examination by instituting BSA training. All BSA violations were corrected following the 1999 examination, and no violations have been cited in subsequent examinations. Follow-up was considered adequate for the size and transactions conducted by the bank.

**Institution removed from OIG sample
in January 2004**

Low BSA Risk

Date	Total Assets (\$Million)	Rating	BSA Violations (#)
2003	Over \$500	Highly Rated	None
2001	Over \$500	Highly Rated	(52)- CTR filing errors/103.27(d)
2000	Over \$500	Highly Rated	None
1999	Over \$500	Highly Rated	None
1998	\$251 - \$500	Highly Rated	None
1997	\$251 - \$500	Highly Rated	None
State does not include BSA examination procedures within the scope of its regular examinations, but does conduct follow-up on BSA violations cited in prior examinations.			

OIG Concern:

Follow-up did not occur within 12 months on violations and concerns cited in FDIC ROE dated in 2001. **Bank was subsequently (January 2004) eliminated by OIG from final report.**

CORPORATION COMMENTS

Internal Assessment of DSC’s Program to Evaluate Bank Compliance with the BSA.

Supervisory Actions:

The 2001 ROE cited apparent violations of Part 103 for incorrectly filling out numerous CTRs. Specifically, management failed to check boxes to indicate “multiple persons” and did not provide information for customers “doing business as” within the appropriate areas on the forms. Management committed to corrective action during the examination. These infractions were considered to be technical in nature and did not result in any type of formal action. The state conducted an examination in 2003 and determined that the institution had corrected the deficiencies resulting in the violations cited at the FDIC examination. Although the state ROE does not comment on BSA, a scope memorandum provided by the state indicates that corrective action relating to prior BSA violations would be reviewed.

Although the OIG indicates that these violations are repeated from prior examinations, the region asserts that prior to the 2001 examination there had not been any other violations cited in previous ROEs of this bank through the OIG’s audit period.

Bank Profile:

Bank is over \$500 million in total assets serving a small state, as well as the southern portion of an adjoining state. The county reports a population of just over 200,000. Bank has been highly rated since 1993. Bank management has been highly rated since 1997.

Assessment of Follow-up Action:

The apparent violations were technical in nature. The bank is financially sound with strong management. Overall BSA compliance program is adequate and management committed to corrective action. The RO did not pursue a formal response due to management’s commitment during the examination to correct the deficiencies. The state followed up on the FDIC examination findings with a review of prior violations (including BSA) within 15 months and did not repeat the criticism in this area.

**Institution removed from OIG sample
In January 2004**

Low BSA Risk

Date	Total Assets (\$ Million)	Rating	BSA Violations (#)
1998	\$51 - \$100	Highly Rated	(1)- Written BSA Policy/326.8(b); (1)- Independent Testing/326.8(c)(2); (1)- BSA Officer/326.8(c)(3)
Bank merged with another bank in 2000.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

OIG Concern:

Follow-up did not occur within 12 months on violation cited in the 1998 FDIC ROE. *Bank was subsequently (January 2004) eliminated by OIG from final report.*

Supervisory Action:

The 1998 ROE cited apparent violations of Section 326.8 for failure to have a written BSA program, lack of method for independent testing, and failure to designate a BSA Officer. However, examiners deemed the procedures for BSA compliance to be satisfactory. Management committed to corrective action during the examination. The bank merged with another institution in 2000.

Although the OIG indicates that these violations are repeated from prior examinations, the region asserts that prior to the 1998 examination there had not been any other violations cited in previous ROEs of this bank through the OIG's audit period.

Bank Profile:

Bank is **INACTIVE**. At the time of the last examination, the bank was a \$51-\$100 million institution in a northeast state. The bank was highly rated at its last examination, a rating which dates back to 1992. Bank management had been highly rated since 1983, which includes the last five FDIC examinations.

Assessment of Follow-up Action:

The overall BSA compliance program is adequate; however, procedures were not condensed to writing. Bank management was criticized during examination, but formal response was not required from the institution due to a commitment to implement corrective action. The bank merged with another institution prior to a subsequent examination.

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

CONCLUSION OF DSC SUPERVISORY APPROACH TO OIG-SAMPLED INSTITUTIONS

The DSC's findings regarding the sampled institutions indicate that in the vast majority (38 of 41, or 92.7 percent) of instances, the DSC responded expeditiously while incorporating the sufficient response time for bank management to correct identified problems. In serious cases where bank management willfully neglected BSA rules or was unresponsive to regulatory criticism and guidance, or when the DSC identified insider abuse, enforcement action was taken. The assessment of the OIG's sample confirms the DSC's effective supervisory approach to the BSA. There were three instances where the DSC could have acted more quickly; however, resolution to the BSA concerns did occur.

Subsequent to questions raised by the OIG during the audit, the DSC's Regional and Washington offices undertook a detailed analysis of the OIG's 41-bank sample. In 38 of the 41 cases, we found the supervisory actions to be consistent with the problems identified and the risks posed by the circumstances. In hindsight, the DSC found that three cases of supervisory actions could have been deployed in a better manner. As a result, the lessons learned have been utilized to improve our internal supervisory processes. The FDIC supervises a majority of small institutions. These community-based institutions operate with simple manual and automated systems. Therefore, it is not unusual that a sample of such institutions would yield apparent violations of a technical nature without exposing the institutions' BSA programs to increased money laundering risk. Our small, community banks actually have a strong inherent deterrent to money laundering since they operate in areas where bank management's knowledge of customers is high, making criminal action harder to disguise. In fact, of the 41 sample banks, 22, or 54%, are very small banks with total assets of less than \$80 Million, and seven more sample banks fall in the under \$150 Million range. Only two of the sample banks were larger than \$1 Billion in total assets. The three institutions that the DSC identified where supervisory actions could have been strengthened had total assets of \$10 Million, \$70 Million, and \$187 Million.

Program problems that expose an institution to increased vulnerability to criminal activity are, as necessary, aggressively addressed with formal actions. However, in the vast majority of cases, an appropriate supervisory response does not include a formal action. The FDIC believes our supervisory approach using technical guidance, moral suasion and a gradual escalation of enforcement action is appropriate. Refer to Exhibit I for a legal interpretation of formal actions for BSA that are authorized under Section 8(s) of the Federal Deposit Insurance Act, 12 USC 1818(s).

CORPORATION COMMENTS

Internal Assessment of DSC's Program to Evaluate Bank Compliance with the BSA.

APPENDIX B: History of the BSA

The responsibility for the implementation of the BSA, including its recent amendments required by the USA PATRIOT Act, rests with the Secretary of Department of the Treasury. The FDIC has been charged [under Section 8(s) of the FDI Act] to prescribe regulations requiring insured depository institutions to implement a BSA compliance program (Section 326.8 of FDIC Rules and Regulations); review BSA compliance procedures when conducting examinations and document deficiencies in the ROEs; and employ supervisory action when it has been determined that an insured depository institution has failed to establish and maintain a BSA compliance program or has failed to correct any previously reported problem with the BSA compliance procedures. In addition, Section 31 CFR 103.56(e) requires the FDIC to periodically provide specific violations of 31 CFR 103 as well as apparent violations of FDIC Rules and Regulations Part 326 Subpart B to the Assistant Secretary of the Treasury.

On October 26, 1970, Congress passed the BSA which amended Title 31 of the United States Code, Subtitle IV, Chapter 53, and Subchapter II. The purpose of this subchapter (except section 5315) is to require certain reports or records where they have a high degree of usefulness in criminal, tax, or regulatory investigations or proceedings. The statute authorizes the Secretary of the Treasury to prescribe filing procedures and designate financial institutions and transactions as well as promulgate regulations to meet the requirements of the BSA. The implementing regulations of the BSA are Treasury's regulations Part 103 - Financial Recordkeeping and Reporting of Currency and Foreign Transactions (31 CFR Part 103). Collectively, the Treasury regulations and the BSA statute are commonly referred to by the banking industry as the BSA rules.

Although the BSA has been in effect for over 30 years, its significance and priority escalated in the wake of the September 11, 2001, terrorist attacks against the U.S. Shortly after this tragic event, the USA PATRIOT Act of 2001 was passed. This Act expanded the anti-money laundering provisions of the original law and brought the issue of money laundering to the forefront, once again. BSA compliance and anti-money laundering programs are now one of the highest priorities for the industry, regulators, and law enforcement authorities. Additionally, in March 2003, Treasury established its Executive Office for Terrorist Financing and Financial Crimes (EOTF/FC), the office that focuses on combating money laundering and terrorist financing. After the USA PATRIOT Act was passed, the FinCEN was established as a formal bureau of the Treasury. The focus of the BSA from a risk-management perspective is that an institution's failure to implement an adequate compliance program is punishable by monetary fines that can be assessed by FinCEN. Additionally, the FDIC can initiate enforcement actions against FDIC-supervised institutions and IAPs for serious and/or uncorrected problems with an institution's BSA compliance program.

BSA Legislative Changes

There have been many amendments made to the BSA statute through the years, which in turn have required additions, deletions, and revisions to the parallel regulations of the Treasury as well as the Federal Deposit Insurance Act. Some of the major amendments to the BSA are:

- *Money Laundering Control Act* (October 27, 1986) which criminalized money laundering and prohibited structuring transactions to avoid BSA reporting requirements.
- *Annunzio-Wylie Money Laundering Suppression Act* (October 28, 1992) which required SARs.
- *Money Laundering Suppression Act* (September 23, 1994) which reduced burden involved in the CTR exemption process.
- *Money Laundering and Financial Crimes Strategy Act* (October 30, 1998) which improved cooperation and coordination between regulators, law enforcement, and the financial service industry.
- *United and Strengthening America by Providing Appropriate Tools to Restrict, Intercept, and Obstruct Terrorism Act* ("USA PATRIOT ACT") (October 26, 2001) which generally required additional due diligence on customers, accounts, and transactions to prevent money laundering and terrorist financing activity in domestic financial institutions.

MANAGEMENT RESPONSES TO RECOMMENDATIONS

This table presents the management responses that have been made on recommendations in our report and the status of recommendations as of the date of report issuance. The information in this table is based on management’s written response to our report and subsequent communication with management representatives.

Rec. Number	Corrective Action: Taken or Planned/Status	Expected Completion Date	Monetary Benefits	Resolved: ^a Yes or No	Dispositioned: ^b Yes or No	Open or Closed ^c
1	DSC agreed with this recommendation. The DSC will, in coordination with its current initiatives to revisit and update FDIC guidance and with inter-agency cooperation, address formal supervisory actions, follow-up actions, citation of apparent violations and record keeping, and backfiling of CTRs and will work with the FDIC Legal Division to clarify, and update as necessary, enforcement action guidance on BSA.	March 30, 2005	\$0	Yes	No	Open
2	DSC agreed with the recommendation. The DSC representative to the Financial Crimes Enforcement Network’s Bank Secrecy Act Advisory Group will introduce the question raised on referral guidelines at an upcoming meeting.	December 31, 2004	\$0	Yes	No	Open
3	DSC agreed with this recommendation and stated that it is focused on strengthening processes to address variations in the state examination coverage of BSA and believes this action will increase the consistency and reliability of the follow-up to its BSA examinations.	March 30, 2005	\$0	Yes	No	Open

^aResolved –(1) Management concurs with the recommendation, and the planned corrective action is consistent with the recommendation.
 (2) Management does not concur with the recommendation but planned alternative action is acceptable to the OIG.
 (3) Management agrees to the OIG monetary benefits or a different amount, or no (\$0) amount. Monetary benefits are considered resolved as long as management provides an amount.

^bDispositioned – The agreed-upon corrective action must be implemented, determined to be effective, and the actual amounts of monetary benefits achieved through implementation identified. The OIG is responsible for determining whether the documentation provided by management is adequate to disposition the recommendation.

^cOnce the OIG dispositions the recommendation, it can then be closed.
