

SECTION II

Crime Index Offenses Reported

Crime Index Total

Definition

The Uniform Crime Reporting (UCR) Program's Crime Index is composed of selected offenses used to gauge fluctuations in the volume and rate of crime reported to law enforcement. These selected offenses include the violent crimes of murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault, and the property crimes of burglary, larceny-theft, and motor vehicle theft. The crime classifications were selected at the inception of the UCR Program in 1929 because they were considered by law enforcement and criminologists of the time to be the most serious and the most commonly reported crimes occurring in all areas of the Nation. Arson was added to the Index in 1979 by congressional mandate, and the UCR Program established the Modified Crime Index to include arson. More information regarding the Crime Index can be found in Appendix II of this report.

Trend

	Year	Number of offenses	Rate per 100,000 inhabitants
	2000	11,608,070	4,124.8
	2001	11,849,006	4,160.5
<i>Percent change</i>		+2.1	+0.9

Special Note Regarding the Events of September 11, 2001

Due to the unique nature and the statistical implications inherent in the events of September 11, 2001, the crimes committed in those attacks are not included in the UCR Program's offense rate, trend, or clearance data. Information regarding the September attacks are provided in a special report in this publication. (See Section V.)

National Offenses, Trends, and Rates

The estimated number of Crime Index offenses for 2001 was 11,849,006. This number reflects an increase of 2.1 percent from the 2000 estimate, the first increase since 1991. However, when looking at 5- and 10-year trends, the 2001 figure represents a 10.2-percent decrease from the 1997 figure and also a 17.9-percent decline from the 1992 level. (See Table 1.)

In 2001, violent crime comprised 12.1 percent and property crime accounted for 87.9 percent of the Crime Index total. The property crime of larceny-theft, which comprised 59.7 percent of the Crime Index, was the most frequently occurring of all Index crimes, with an estimated 7,076,171 offenses. The violent crime of murder, which accounted for 0.1 percent of the Crime Index, occurred least frequently with an estimated total of 15,980 offenses. (See Table 1.)

An estimated monetary value of \$17.1 billion in stolen property was reported in 2001. Thefts of motor vehicles accounted for the greatest monetary loss, followed by thefts of jewelry and precious metals; currency, notes, etc.; and televisions, radios, stereos, etc.

Table 2.1

Crime Index Total by Month
Percent Distribution, 1997-2001

Month	1997	1998	1999	2000	2001
January	8.2	8.5	8.0	7.7	7.7
February	7.3	7.5	7.2	7.3	6.8
March	8.0	8.2	8.0	8.2	7.9
April	8.0	8.0	7.9	8.0	8.1
May	8.4	8.4	8.4	8.7	8.6
June	8.5	8.5	8.6	8.6	8.5
July	9.1	9.0	9.1	9.1	9.0
August	9.0	9.0	9.2	9.1	8.9
September	8.6	8.4	8.5	8.5	8.5
October	8.7	8.5	8.7	8.8	9.1
November	7.9	7.8	8.2	8.0	8.3
December	8.3	8.2	8.4	7.9	8.5

An estimated 32.4 percent of property reported stolen in 2001 was recovered. Property types with the greatest percentage of recoveries were motor vehicles, clothing and furs, live-stock, and consumable goods. (See Table 24.)

The Crime Index rate per 100,000 inhabitants in 2001 was 4,160.5, a 0.9-percent increase from the 2000 rate. In addition, this number reflected a 15.6-percent decrease from the 1997 rate and a 26.5-percent decline from the 1992 rate. (See Table 1.)

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, data collected regarding the Nation's four regions reflect the following:

The Northeast

The Northeast comprised 18.9 percent of the Nation's population in 2001 and posted 13.7 percent of the Crime Index offenses reported to the UCR Program. (See Table 3.) The Northeast was the only region to experience decreases in the number of offenses and the rate per 100,000 inhabitants in 2001. This region showed a 1.5-percent decrease in Crime Index offenses from 2000 and a 1.9-percent decline in the rate per 100,000 inhabitants. (See Table 4.)

The Midwest

The Midwest, which accounted for 22.7 percent of the U.S. population, recorded 21.7 percent of the Nation's Crime Index offenses in 2001. (See Table 3.) This region experienced an increase in both the volume (1.6 percent) and the rate of Crime Index offenses per 100,000 persons (1.1 percent) over the prior year's volume and rate. (See Table 4.)

The South

The South, the Nation's most populous region in 2001, comprised 35.8 percent of the total population and experienced 40.9 percent of the total Crime Index offenses. (See Table 3.) The number of offenses reported in this region increased 1.9 percent from the 2000 level. The Crime Index rate per 100,000 inhabitants increased 0.3 percent. (See Table 4.)

The West

The West, which constituted 22.6 percent of the population, accounted for 23.7 percent of the Nation's Crime Index offenses. (See Table 3.) In 2001, this region had a 5.1-percent increase in the number of offenses compared to 2000 levels and a 3.0-percent increase in rate. (See Table 4.)

Community Types

The UCR Program's data are often presented in aggregations representing three types of communities: Metropolitan Statistical Areas (MSAs) which made up approximately 80 percent of the total U.S. population in 2001, cities outside MSAs which comprised approximately 8 percent of the Nation's population, and rural counties which accounted for approximately 12 percent of the U.S. population during 2001. (See Appendix III and Table 2.)

In 2001, the Nation's MSAs experienced an Index crime rate of 4,474.9 per 100,000 persons. Cities outside of MSAs had a crime rate of 4,450.4 per 100,000 inhabitants, and rural counties had a crime rate of 1,892.4 per 100,000 persons. (See Table 2.)

Population Groups Trends and Rates

The population group classifications used by the UCR Program comprise six city and two county designations. (See Appendix III for more information on population groups.) In 2001, the Nation's cities collectively experienced an increase of 2.0 percent in the total number of crimes reported and had a rate of 5,124.8 Index crimes per 100,000 inhabitants. Additionally, suburban counties and rural counties experienced increases in total crimes reported—2.4 percent and 1.9 percent, respectively—with rates of 3,038.9 and 1,979.2 Crime Index offenses per 100,000 persons, respectively. (See Tables 12 and 16.)

Within city groupings, the largest increase of reported crime, 4.1 percent, was in cities with populations of 250,000 to 499,999. The smallest change in volume from 2000, a 0.5 percent increase, occurred in cities with populations of 1 million and over. In 2001, cities with populations spanning 500,000 to 999,999 had a rate of 7,328.0 Crime Index offenses per 100,000

inhabitants, the highest among the Nation's cities. Cities with populations of 10,000 to 24,999 had the lowest rate of offenses per 100,000 inhabitants—3,875.4. (See Tables 12 and 16.)

Clearances

Clearances occur either by arrest or by exceptional means, i.e. when circumstances beyond the control of law enforcement prevent the placing of formal charges against the offender. (More information regarding clearances can be found in Section III of this report.) In 2001, 19.6 percent of Crime Index offenses were cleared overall. Law enforcement nationwide cleared 16.2 percent of property crimes and 46.2 percent of violent crimes. (See Table 25.)

Among the Crime Index offenses in 2001, murder was the offense cleared most often—62.4 percent. Burglary offenses experienced the lowest percentage of clearances—12.7 percent. (See Table 25.)

Clearances and Juveniles

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records that incident as clearance by arrest, even though a physical arrest may not have occurred. In addition, according to Program definitions, clearances involving both adult and juvenile offenders are classified as adult clearances.

Nationally, 18.6 percent of the total clearances for 2001 involved only persons under the age of 18. The Crime Index offense with the highest percentage of juvenile clearances was larceny-theft (21.9 percent). The offense with the lowest percentage of juvenile clearances (5.0 percent) was murder and nonnegligent manslaughter. Arson is typically an offense with a large involvement of juvenile offenders; of arson offenses cleared, 45.5 percent involved only juvenile offenders. (See Table 28.)

Arrests

Total Arrests

The estimated total of Crime Index offense arrests for 2001 was 2,245,597, approxi-

mately 16.4 percent of the U.S. total estimated arrests. Of that total, approximately 27.9 percent were arrests made for violent crimes and 72.1 percent were arrests for property crimes. Larceny-theft arrests accounted for 71.7 percent of all property crime arrests. Aggravated assaults made up the greatest portion, 76.2 percent, of violent crime arrests. (See Table 29.)

Arrest Trends

The total Crime Index arrests for all ages for 2001 declined slightly—0.7 percent—from 2000 levels. In viewing the data by age, the total number of adults arrested increased 1.0 percent from the 2000 figure, and the total number of juvenile arrests declined 5.0 percent when compared to the previous year's number.

Arrests for arson offenses increased more than arrests for any other Index crime category in 2001. The number of arson arrests was up 14.7 percent from the prior year's figure as arson arrests of adults increased 22.8 percent and arson arrests for juveniles increased 8.1 percent from 2000 to 2001. (See Table 36.)

Looking at a 5-year trend, overall, the number of Crime Index arrests in 2001 decreased 17.7 percent from 1997 arrests. Violent crime arrests decreased 11.4 percent, and property crime arrests fell 20.0 percent in that 5-year period. In 2001, juvenile and adult arrests for Crime Index offenses also decreased (28.1 percent and 13.2 percent, respectively) when compared to 1997 arrest data. (See Table 34.)

Ten-year trends in Crime Index offense arrests showed an overall 22.5-percent decrease. Juvenile arrests in that time frame fell 30.7 percent, and adult arrests declined 19.1 percent. (See Table 32.)

The number of males arrested for Crime Index offenses in 2001 decreased 1.0 percent from the number arrested in 2000. The number of females arrested in 2001 rose slightly (0.2 percent) from the 2000 level. Additionally, the number of juvenile males arrested in 2001 dropped 6.6 percent, and the percentage of juvenile females declined 1.3 percent when compared to the prior year's number. (See Table 37.)

When comparing 1997 to 2001 arrest data, the 5-year trend indicated that the number of

males arrested decreased 19.1 percent, and the number of females arrested declined 13.6 percent. The number of juvenile males arrested decreased 31.2 percent in 2001 from the 1997 total, and the number of juvenile females arrested dropped 19.3 percent. (See Table 35.)

The number of males arrested in 2001 fell 26.8 percent when compared to the number arrested in 1992. The number of females arrested decreased 7.9 percent in that same 10-year period. Additionally, the number of juvenile males arrested dropped 37.7 percent, and the number of juvenile females arrested declined 5.5 percent. (See Table 33.)

Distribution

In 2001, statistics showed that 73.8 percent of all persons arrested for Crime Index offenses were over the age of 18, and 26.2 percent were under age 18. Of the total number of juveniles arrested, 36.9 percent were under age 15. (See Table 38.) Additionally, 73.3 percent of all persons arrested for Crime Index offenses in 2001 were males, and 26.7 percent were females. (See Table 42.) Of the persons arrested, 64.4 percent were white, 33.1 percent were black. The remainder were of other races. (See Table 43.)

Violent Crime Total

Definition

According to the Uniform Crime Reporting definitions, violent crime is composed of four offenses: murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. All violent crimes involve force or threat of force.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2000	1,425,486	506.5
2001	1,436,611	504.4
<i>Percent change</i>	+0.8	- 0.4

National Trends, Distributions, and Rates

For the first time since 1992, data reported to the UCR Program indicated a slight increase in the violent crime estimate for the Nation. A comparison of the 2001 violent crime estimate of 1,436,611 with the 2000 estimate demonstrated a 0.8-percent rise. However, the 2001 number was substantially lower than the violent crime volumes of both 5 and 10 years ago. Violent crime estimates in 2001 were 12.2 percent lower than the figure in 1997 and 25.7 percent below the 1992 estimate. Within the violent crime category, robbery volume rose 3.7 percent, and murder volume increased 2.5 percent. Forcible rape recorded the smallest increase of all violent crimes at 0.3 percent. The

estimated number of aggravated assaults represented a slight decrease for the year, 0.5 percent.

Proportionally, aggravated assault accounted for the largest share of violent crimes, 63.1 percent. Robbery constituted 29.4 percent of total violent crimes, forcible rape comprised 6.3 percent, and murder made up 1.1 percent of the total.

Computing the violent crime rate per 100,000 persons for 2001 resulted in an overall estimate of 504.4 offenses per 100,000 individuals; this figure marked a 0.4-percent decrease from the 2000 rate. Aggravated assault occurrences registered a rate of 318.5 per 100,000 inhabitants, a decrease of 1.7 percent from the 2000 rate. Robbery posted a rate of 148.5, an increase of 2.4 percent over the previous year's rate. Forcible rape was measured at a rate of 31.8 offenses per 100,000 persons, indicating a decrease of 0.8 percent in the forcible rape rate since 2000. Murder and nonnegligent manslaughter had a rate of 5.6 per 100,000 population, a 1.3-percent increase from the previous year's rate.

A comparison of the 2001 violent crime rate with those recorded 5 and 10 years ago indicated a 17.4-percent decrease since 1997 and a 33.4-percent drop since 1992. National crime estimates and rates for the past 20 years are documented in Table 1.

Table 2.2

Violent Crime Total by Month
Percent Distribution, 1997-2001

<i>Month</i>	<i>1997</i>	<i>1998</i>	<i>1999</i>	<i>2000</i>	<i>2001</i>
January	8.1	8.4	8.2	7.7	7.6
February	7.2	7.2	7.1	7.4	7.0
March	8.2	8.1	7.9	8.4	8.3
April	8.0	8.0	8.1	8.3	8.5
May	8.9	8.7	8.8	9.1	9.0
June	8.7	8.5	8.5	8.6	8.6
July	9.2	9.1	9.3	9.0	9.0

September	8.7	8.6	8.4	8.6	8.8
October	8.5	8.5	8.6	8.7	8.9
November	7.8	7.7	8.0	7.6	7.9
December	7.6	7.8	8.0	7.7	7.9

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. A map of the United States delineating the regions is included in Appendix III. Estimated crime volume, rates, and percent changes by region are published in Table 4.

The Northeast

During 2001, 16.1 percent of violent crime occurred in the Northeastern States, which claimed 18.9 percent of the population. (See Table 3.) The region registered a 2.7-percent decrease in the estimated volume of violent crime. The Northeast experienced 429.7 violent offenses per 100,000 people, a decrease of 3.1 percent since 2000. However, the number of murders within the region increased 5.6 percent, and the murder rate per 100,000 increased 4.4 percent over the previous year's rate. (See Table 4.)

The Midwest

The Midwest, which contained 22.7 percent of the U.S. population, reported 19.5 percent of the total violent crime that occurred in 2001. The region had a 1.6-percent rise in violent crime volume over the prior year's estimated volume. The region recorded a violent crime rate of 432.0 per 100,000 persons, an increase of 1.1 percent over the 2000 rate. The number of murders within the region increased 3.4 percent, and the murder rate per 100,000 persons increased 2.9 percent. (See Tables 3 and 4.)

The South

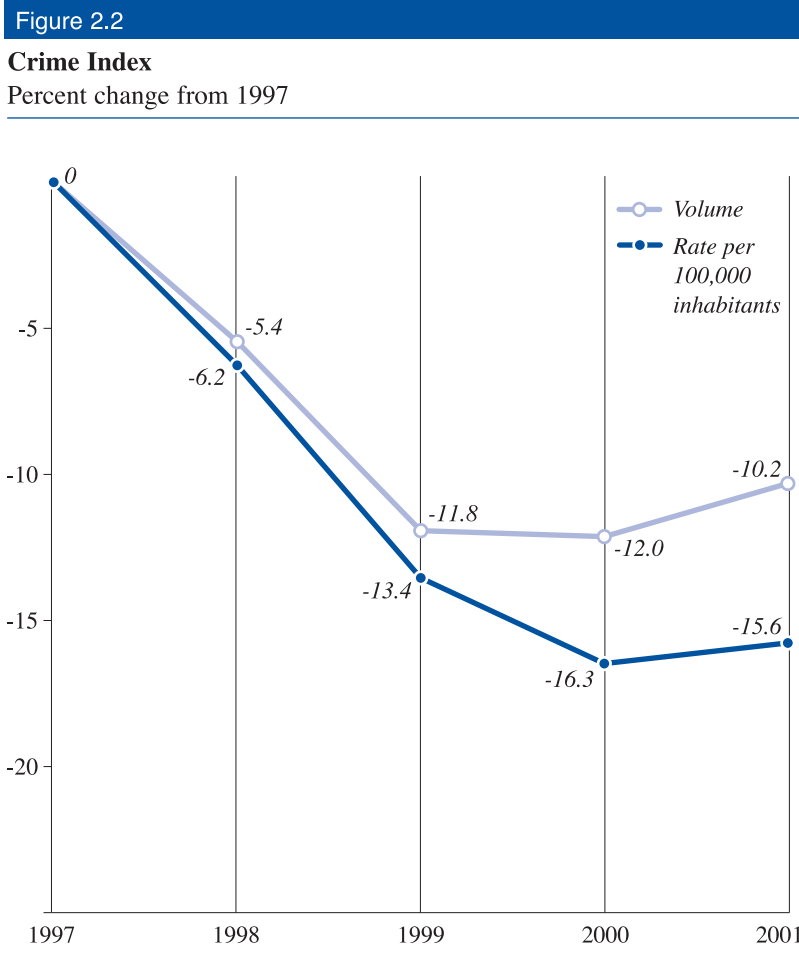

During 2001, 41.1 percent of all violent crimes occurred in the South, which was the Nation's most heavily populated region with 35.8 percent of the U.S. population. (See Table 3.) The Southern States recorded a rate of 579.9 violent crime offenses per 100,000 persons—a drop of 0.3 percent from the 2000 figure. Regarding the volume of violent crime occurrences, the South experienced an overall 1.3-percent rise. However, this region was the only one to report a decrease in the number of murders (-1.5 percent) and a decline in the murder rate (-3.0 percent). (See Table 4.)

The West

Approximately 22.6 percent of the population resided in the West, which reported 23.3 percent of total violent crimes in 2001. (See Table 3.) The Western Region registered 520.3 violent crimes per 100,000 persons, a decline from the prior year's figure of 0.3 percent. However, the West reported a small increase in the volume of violent crimes (1.7 percent) including an 8.0-percent increase in the number of murders and a 5.9-percent increase in the murder rate. (See Table 4.)

Community Types

Metropolitan Statistical Areas, or MSAs, are those community types made up of a central city or urbanized area of at least 50,000 inhabitants, the county containing that city or area, and any other adjacent suburban counties with close cultural and economic ties to the area. In 2001, approximately 80 percent of the U.S. population

resided in an MSA, and this community type accounted for 88.7 percent of the Nation's total violent crime. Within MSAs, violent crime was measured at a rate of 560.0 offenses per 100,000 persons in 2001. Cities outside metropolitan statistical areas, which accounted for 8 percent of the population of the Nation, recorded a rate of 392.8 violent crimes per 100,000 people. Collectively, these cities experienced 6.2 percent of the country's violent crime volume. The Nation's rural counties, accounting for 12 percent of the Nation's population, registered a violent crime rate of 211.0 offenses per 100,000 inhabitants, and they accounted for the remaining 5.1 percent of violent crime. (Based on Table 2.)

Population Groups Trends and Rates

Cities in the United States, when viewed as a collective group, reported an increase of 0.4 percent in the volume of violent crime when compared to the previous year's data. The Nation's cities with populations of 100,000 to 499,999 experienced the greatest rise in violent crime, 1.8 percent. Those communities with populations under 10,000 reported a minimal increase of 0.1 percent. Cities of 25,000 to 49,999 in population recorded a decrease of 0.7 percent in violent crime, and cities within the 500,000 to 999,999 population range reported a 0.3-percent decline. Rural and suburban counties both showed increases in violent crime volume, 0.6 and 0.5 percent, respectively. Crime trends for cities and counties can be found in Table 12.

Weapons Distribution

Data concerning weapons usage are collected for the crimes of murder, robbery, and aggravated assault. Personal weapons such as hands, fists, feet, etc. were used in 31.1 percent of those crimes. Firearms were involved in 26.2 percent of incidents. Knives or cutting instruments were used in 14.9 percent of violent crimes. Other dangerous weapons were employed in the remaining 27.8 percent of offenses. (See Tables 19 and 2.10.) Weapon information is not collected for forcible rape.

Clearances

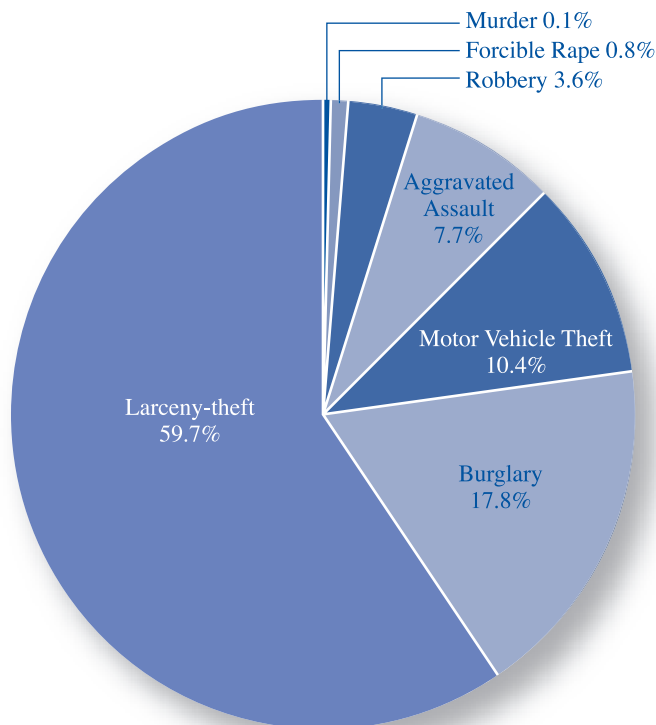

For UCR purposes, a clearance is counted when a crime is solved either by arrest or by exceptional means, i.e., when some reason outside the control of law enforcement precludes making an arrest. In the United States in 2001, 46.2 percent of all violent crimes were cleared. Within this category, 62.4 percent of murders were cleared, 56.1 percent of aggravated assaults, 44.3 percent of forcible rapes, and 24.9 percent of robberies were cleared. (See Table 25.)

Clearances and Juveniles

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records that incident as cleared by arrest, even though a physical arrest may not have occurred. In

Figure 2.3

Crime Index Offenses Percent distribution ¹2001

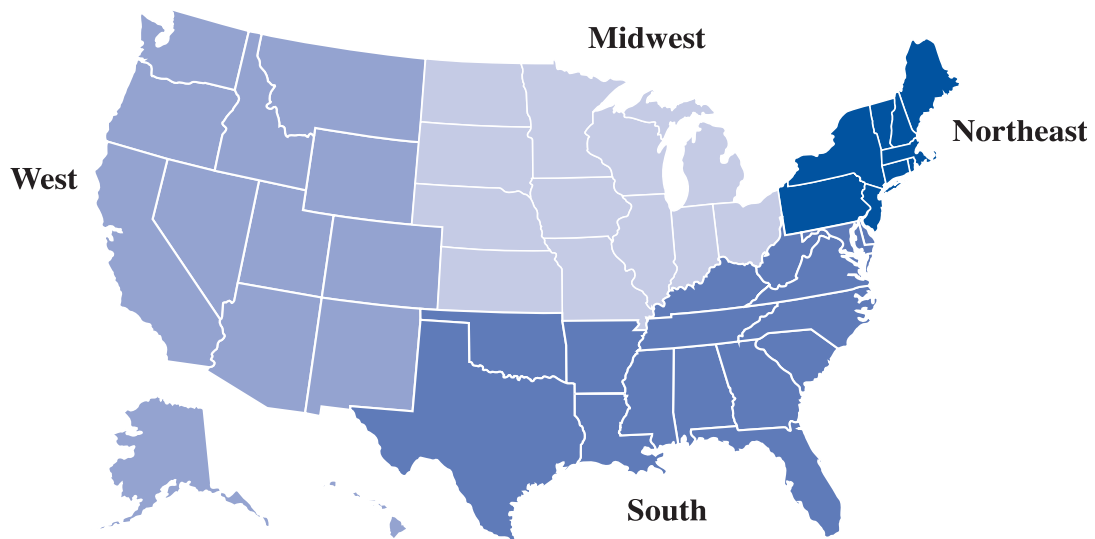

¹ Due to rounding, the percentages do not add to 100.0 percent.

Figure 2.4

Regional Crime Rates 2001

Violent and property crimes, per 100,000 inhabitants

addition, as defined by the Program, clearances involving both adult and juvenile offenders are classified as adult clearances. Therefore, juveniles who accompany an adult in the commission of an offense were not included in these figures.

Nationally, 12.1 percent of violent crime clearances involved persons under 18 years of age. Among violent crimes, robbery had the highest juvenile clearances, 14.4 percent. Clearances for the offense of forcible rape involved only juveniles in 12.4 percent of cases. Juveniles were the perpetrators in 11.8 percent of aggravated assault cases cleared. The crime of murder posted the lowest juvenile clearances, 5.0 percent. (See Table 28.) The topic of clearances is discussed further in Section III.

Arrests

In 2001, there were an estimated 627,132 arrests for violent crimes. Approximately

4.6 percent of total estimated arrests for that year involved a crime of violence. Aggravated assault accounted for 76.2 percent of estimated violent crime arrests; robbery, 17.3 percent; forcible rape, 4.3 percent; and murder, 2.2 percent. (See Table 29.)

Violent crime arrests in 2001 increased 0.1 percent from the previous year's figure. However, three of the four violent crime offenses showed decreases in arrests for 2001. Murder arrests were down 2.6 percent, forcible rape arrests declined 2.3 percent, aggravated assault arrests fell 0.1 percent. Robbery alone showed an increase in arrests, 2.1 percent. Five- and 10-year comparisons of total violent crime arrests indicated an 11.4-percent decrease from the number of arrests in 1997, and a 10.7-percent decline from the 1992 number. (See Tables 32, 34, and 36.)

The Nation recorded a violent crime arrest rate of 225.6 per 100,000 inhabitants in 2001. The Western Region had the highest violent crime arrest rate at 289.1 per 100,000 persons. The South followed with 202.1, the Northeast with 198.7, and the Midwest with 187.2 arrests per 100,000 inhabitants. (See Table 30.)

Collectively, the Nation's cities registered a rate of 255.9 violent crime arrests per 100,000 people. Within this group, cities with more than 250,000 in population reported an arrest rate of 359.0. The lowest rate was recorded by law enforcement agencies in cities of 10,000 to 24,999 inhabitants, 167.9 arrests per 100,000 persons. Suburban counties reported a violent crime arrest rate of 167.6 per 100,000 people, and rural counties registered a rate of 137.1. (See Table 31.) The topic of arrests is discussed in greater detail in Section IV.

Arrestees

The number of persons under 18 years of age arrested for violent crime decreased 1.9 percent, and arrests of adults increased 0.5 percent in 2001. When considering gender, males accounted for 82.7 percent of total arrests. Arrestees were most often adults (84.6 percent) and most often white (60.2 percent). Blacks made up 37.6 percent, and other races accounted for the remainder of violent crime arrests. (See Tables 36, 38, 42, and 43.)

Figure 2.5

Violent Crime

Percent change from 1997

Murder

Definition

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense, as for all other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. Not included in the count for this offense classification are deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2000	15,586	5.5
2001	15,980	5.6
<i>Percent change</i>	+2.5	+1.3

National Offenses and Trends

Approximately 15,980 persons were murder victims in 2001. This estimate indicated a 2.5-percent increase over the 2000 approximation, and it was the second consecutive annual increase in the number of murders occurring nationwide. However, the 2001 estimate represented a 12.2-percent decrease from the 1997 estimate and a 32.7-percent drop from the

estimate recorded for 1992. The 2001 estimate yielded a rate of 5.6 murders for every 100,000 U.S. inhabitants. That rate is 1.3 percent higher than the rate estimated for 2000. (See Table 1.)

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, data collected from the Nation's four regions reflect the following:

The Northeast

The Northeast, with 18.9 percent of the Nation's population, accounted for 14.3 percent of the murders during 2001. With an estimated 2,278 murders, the Northeastern States registered a 5.6-percent rise in murder volume from the previous year's figure. The rate per 100,000 inhabitants showed a 4.4-percent increase in the murder rate for the region— 4.2 murders per 100,000 persons. (See Tables 3 and 4.)

Table 2.3

Murder by Month¹ Percent Distribution, 1997-2001

<i>Month</i>	<i>1997</i>	<i>1998</i>	<i>1999</i>	<i>2000</i>	<i>2001</i>

December	8.6	8.8	8.8	8.7	9.2

¹ The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any murder tables (Tables 2.3-2.15). See special report, Section V.

The Midwest

The Midwest, which represented 22.7 percent of the U.S. population in 2001, accounted for 21.3 percent of the Nation's murders. The region had an estimated 3,405 murders, an increase of 3.4 percent from the 2000 number. The Midwestern States experienced 5.3 murders per 100,000 inhabitants, an increase of 2.9 percent over the murder rate recorded for 2000. (See Tables 3 and 4.)

The South

The Southern Region of the Nation accounted for 35.8 percent of the population and 42.4 percent of the murders committed in 2001. The Southern States experienced an estimated 6,780 murders, which represented a 1.5-percent drop for this region from the previous year's volume. The region posted a murder rate of 6.7 per 100,000 inhabitants, a 3.0-percent decline from the 2000 rate. The South was the only

² Total number of murder victims for whom supplemental homicide data were received.

region to report a decline in both murder volume and rate. (See Tables 3 and 4.)

The West

This region accounted for 22.6 percent of the population and 22.0 percent of murders in 2001. An estimated 3,517 murders occurred in the Western States during 2001, representing an 8.0-percent increase in murder from the 2000 volume. The West experienced a 5.9-percent rise in the murder rate from the previous year's figure, with 5.5 murders per 100,000 people. (See Tables 3 and 4.)

Community Types

Metropolitan Statistical Areas, or MSAs, are those community types made up of a central city of at least 50,000 inhabitants, the county containing that city, and adjacent areas with strong economic or cultural ties to the central city. MSAs accounted for approximately 80 percent of the U.S. population in 2001, and they experienced 87.0 percent of total estimated murders. Murder occurred at a rate of 6.1 per 100,000 inhabitants of MSAs for 2001. Those cities outside of metropolitan areas, which accounted for 8 percent of the Nation's population, reported an estimated 3.5 murders per 100,000 people and 5.0 percent of the murder volume. The Nation's rural counties, with 12 percent of the population, reported 8.0 percent of the total murders and 3.7 murders per 100,000 people. (See Table 2.)

² Because of rounding, the percentages may not add to total.

³ Does not include unknown ages.

Population Groups Trends and Rates

Collectively, the Nation's cities experienced a 3.5-percent increase in the number of murders over the previous year's estimate. Cities with populations of 250,000–499,999 recorded the largest increase in murder, 10.2 percent. Cities with 25,000–49,999 inhabitants experienced the only decrease in the number of murders, down 5.5 percent from the 2000 estimate. (See Table 12.)

Considering murder rates per 100,000 individuals, cities with 500,000–999,999 in population reported the highest murder rate at 14.3. Those cities with populations of 10,000–24,999 posted the lowest rate at 2.8 per 100,000 people. Suburban counties recorded a murder rate of 3.8; rural counties registered a rate of 3.6 murders per 100,000 inhabitants. (See Table 16.)

Supplementary Homicide Reports

During 2001, UCR contributing agencies submitted supplemental information concerning 13,752 homicides. The Supplementary Homicide Report (SHR) supplies data on the age, sex, and race of both the victim and the offender, the type of weapon used, the relationship of the victim to the offender, and the circumstance surrounding the incident.

Victims

Based upon the 2001 SHR data, the victims of homicide were most often male (76.6 percent) and adult (89.6 percent). By race, 49.8

Table 2.7

Murder Victim/Offender Relationship by Age, 2001 [Single victim/single offender]

Age of victim	Total	Age of offender		
		Under 18	18 and over	Unknown

18 and over	6,085	252	5,265	568
Unknown	135	4	99	32

percent of murder victims were white, and 47.5 percent were black. The remaining victims, 2.7 percent, were of other races (Asian or Pacific Islander and American Indian or Alaskan Native). Of the total murder victims where age and sex were known, 9.1 percent of males and 14.8 percent of females were under 18 years of age. (See Table 2.5.)

Of the homicides for which supplemental data were received, the victim-offender relationship was unknown for 44.6 percent of the victims. Approximately 42.3 percent of the victims knew their assailants (29.2 percent were acquainted with their killers and 13.1 percent were related to them). Another 13.1 percent of murder victims were known to have been murdered by a stranger. The 2001 SHR data indicated that nearly a third of female victims were slain by a husband or boyfriend, 32.2 percent. Male homicide victims were killed by

² Total number of murder victims for whom supplemental homicide data were received.

a wife or girlfriend in 2.8 percent of the incidents. (Based on Table 2.12.)

Offenders

Reviewing the supplemental data for which age, sex, and race of offenders were known revealed that 90.3 percent of murder offenders were male, and 91.7 percent were over the age of 18. Considering those offenders for which race was known, 50.3 percent of murder offenders were black and 47.2 percent were white. Persons of other races comprised 2.5 percent of offenders. (Based Table 2.6.)

Supplemental data for 2001 indicated that of those incidents with one victim and one offender, 93.6 percent of black homicide victims were killed by a black offender, and 85.4 percent of white victims were slain by white offenders. (See Table 2.8.)

¹ The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any murder tables (Tables 2.3-2.15). See special report, Section V.

² Total number of murder victims for whom supplemental homicide data were received.

Weapons

Reviewing those incidents in which the murder weapon was known demonstrated that 69.5 percent involved the use of a firearm. Within the firearm category, handguns were used in 77.9 percent of homicides, shotguns were used in 5.7 percent, and rifles in 4.5 percent. Other or unknown firearms accounted for 12.0 percent. Knives or cutting instruments were employed in 14.3 percent of homicides for which the weapon was known. Personal weapons such as hands, fists, or feet, etc. were used in 7.4 percent of murders. Blunt objects were the weapon used in 5.3 percent of murders. Other dangerous weapons (such as poison, explosives, etc.) accounted for the remainder. (See Table

2.10.) Table 20 contains a breakdown by state of weapons used in homicides.

Circumstances

Supplemental information concerning the circumstance of homicides showed that the victims were involved in an argument with the offender in 28.0 percent of the incidents. A homicide occurred in connection with another felony (e.g., robbery, arson, narcotic drug laws) in 16.6 percent of incidents. In 0.5 percent of homicide cases, investigators suspected that a felony had been in progress. The circumstance was unknown in 32.4 percent of homicides. (See Table 2.12.)

Clearances

For UCR purposes, a crime is cleared when it is solved either by arrest or by exceptional means. An exceptional clearance is counted when circumstances outside the control of law enforcement (such as the death of the offender) preclude making an arrest.

Murder, the most serious offense, was cleared more often than any other Index offense, 62.4 percent.

Murder was also the offense that had the lowest percentage of clearances involving only juveniles, 5.0 percent. (See Table 28.)

By population groups, cities with 25,000–49,999 inhabitants recorded the highest percentage of murders cleared at 77.9 percent. Cities with 250,000 inhabitants or more cleared 56.5 percent of murders, the lowest percentage among population groups. Law enforcement agencies cleared 66.9 percent of murders in suburban counties; 77.5 percent of murders were cleared in rural counties. (See Table 25.)

Arrests

Nationally, there were an estimated 13,653 arrests for murder during 2001. Of those arrested, 51.3 percent were under the age of 25, 41.2 percent fell into the 18–24 age group, and 10.2 percent were under the age of 18. (See Tables 29, 38, and 41.)

In 2001, total arrests for murder decreased 2.6 percent when compared with the previous year's data. (See Table 36.) Five- and 10-year trends in murder arrests showed a drop of 21.2 percent from the 1997 arrest total and a decrease of 34.2 percent from the 1992 figure. (See Tables 32 and 34.)

Male arrests for murder fell 2.0 percent in 2001 when compared to the previous year's figure; however, male arrests declined 23.3 percent from 1997 and 37.2 percent from 1992. Female arrests in 2001 fell 6.8 percent from the prior year, 1.7 percent from 1997 data, and 6.3 percent from 1992 figures. (See Tables 33, 35, and 37.)

Arrests of juveniles for murder fell 2.2 percent during 2001, and arrests of adults decreased 2.6 percent from the 2000 report. Juvenile murder arrests for 2001 represented a 47.3-percent decrease from the total juvenile murder arrests in 1997, and a 62.0-percent decrease from the 1992 total. (See Tables 32, 34, and 36.)

Murder arrestees were most often male (87.5 percent) and adult (89.8 percent). By race, the number of arrestees was nearly evenly split between black arrestees and white arrestees at 48.7 percent and 48.4 percent, respectively. The remaining arrestees were Asian or Pacific Island-

Forcible Rape

Definition

Forcible rape, as defined in the Uniform Crime Reporting Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2000	90,178	32.0
2001	90,491	31.8
<i>Percent change</i>	+0.3	-0.8

National Rates and Trends

The UCR Program has traditionally defined rape victims as females. Approximately 90,491 forcible rapes of females were recorded during 2001. Based on that volume, 62.2 of every 100,000 females were victims of forcible rape in 2001 compared to 62.7 in the previous year. These figures indicated a slight percentage increase in the number of rapes (0.3 percent), but a decrease in the rate of female rapes (0.8 percent).

The 2001 female forcible rape rate of 62.2 continued a downward trend. In 1999, there were an estimated 64.1 rapes for every 100,000 females in the Nation; in 1997, there were 70.3

victims for each 100,000 females; for 1992, the estimate was 83.7.

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, data collected regarding the Nation's four regions reflect the following:

The Northeast

The Northeast Region reported the lowest percentage of the Nation's female rapes at 13.4 percent and the lowest forcible rape rate at 44.0 per 100,000 females. The Northeastern figures showed increases of 1.6 percent in the number of rapes and 1.2 percent in the rate of rapes over the prior year's numbers.

The Midwest

The Midwestern States reported 25.1 percent of the forcible rapes occurring in the Nation in 2001, an increase for the region of 1.5 percent from the prior year's report. A regional rate of 68.6 rape incidents for 100,000 females showed a 1.0-percent increase from the 2000 rate.

The South

Regionally, the highest percentage of female rapes, 37.8 percent, occurred in the South. The

Table 2.18

Forcible Rape by Month

Percent Distribution, 1997-2001

<i>Month</i>	<i>1997</i>	<i>1998</i>	<i>1999</i>	<i>2000</i>	<i>2001</i>
January	7.9	7.9	8.1	8.0	7.6
February	7.0	7.4	7.3	7.5	7.2
March	8.0	8.6	8.2	8.5	8.4
April	8.2	8.2	8.2	8.0	8.3
May	9.1	8.8	8.6	9.0	8.8
June	9.5	8.7	8.8	9.1	8.7
July	9.7	9.6	9.6	9.5	9.7
August	9.4	9.3	9.5	9.3	9.4
September	8.8	8.8	8.3	8.4	8.5
October	8.2	7.9	8.3	8.3	8.4
November	7.4	7.6	7.9	7.5	7.6
December	6.7	7.1	7.2	6.9	7.4

data indicated a modest decline of 0.6 percent in the number of forcible rape occurrences from the 2000 figure. The estimated rate of 65.8 rapes per 100,000 females calculated to a 2.2-percent decline in the South's female rape rate from the 2000 rate.

The West

The West experienced 23.7 percent of the Nation's rape offenses. The incidence of female forcible rape in the Western States showed a slight decline of 0.1 percent from the 2000 estimate, and the rape rate of 65.2 per 100,000 females indicated a decrease of 2.1 percent when compared to the prior year's rate. (See Tables 3 and 4.)

Community Types

In estimating the data by community types, cities outside metropolitan areas reported the highest rate of female rapes in 2001, 67.7

incidents per 100,000 female inhabitants. This estimate was a decrease from the 69.0 rate recorded in 2000. The Nation's Metropolitan Statistical Areas reported a nominal decrease in the female rape rate, down to 64.4 from the 65.0 recorded the prior year. Rural counties reported the lowest rate of forcible rapes of females in the Nation; however, the rate of 43.8 did indicate a minimal increase from the 2000 rate of 43.4 per 100,000 females. (See Table 2.)

Clearances

For UCR purposes, an offense is cleared when at least one person is arrested and charged or when circumstances beyond the control of law enforcement preclude an arrest for a crime that has been solved, e.g., the victim refuses to cooperate with the prosecution.

Nationally, 44.3 percent of rapes were cleared during 2001 versus 46.1 percent cleared in 2000. Regionally, law enforcement in the Northeast cleared 50.1 percent; in the Midwest, 39.3 percent; in the South, 46.0 percent; and in the West, 43.5 percent of female rapes during 2001. (See Table 26.)

Clearances and Juveniles

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records that incident as a clearance by arrest even though a physical arrest may not have occurred. In addition, according to Program definitions, clearances involving both adult and juvenile offenders are classified as adult clearances.

Nationally, incidents involving only juveniles accounted for 12.4 percent of the overall number of clearances for forcible rape in 2001. The highest percentage of juvenile clearances, 15.7 percent, occurred in cities with populations of 10,000 to 24,999. The lowest percentage of juvenile clearances for forcible rape, 8.8 percent, was recorded in the Nation's eight cities of 1 million and over in population. (See Table 28.)

Arrests

In 2001, law enforcement arrested an estimated 27,270 persons for forcible rape. (See Table 29.) Forcible rape arrests for 2001 were

2.3 percent below the 2000 number, 12.1 percent lower than the 1997 figure, and 28.2 percent lower than the 1992 number. (See Tables 32, 34, and 36.) Two-, 5-, and 10-year trend analyses showed juvenile arrests for forcible rape were down 1.4 percent from the 2000 figure. They were 14.1 percent lower than the 1997 report and 24.5 percent below the 1992 figure. (See Tables 32, 34, and 36.)

Approximately 45.4 percent of persons arrested for forcible rape in 2001 were under the age of 25, 62.7 percent of arrestees were white, and 98.8 percent were males. (See Tables 41, 42, and 43.)

UCR Classifications

The UCR Program counts each offense in which a female of any age is forcibly raped or upon whom an assault to rape or attempt to rape is made. Of the total rapes reported for 2001, 90.0 percent were classified as rapes, and the remainder were attempts. (See Table 19.) Statutory rapes of female victims where no force is used and the victim is under the age of consent are categorized as *other sex offenses*. Sexual attacks on males are classified as assaults or other sex offenses depending on the nature of the crime and the extent of injury. The UCR Program classifies sex offenses (except forcible rape) as Part II offenses and, as such, collects only an aggregate total on these crimes. (See Appendix II.)

Robbery

Definition

The Uniform Crime Reporting Program defines robbery as the taking or attempting to take anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2000	408,016	145.0
2001	422,921	148.5
<i>Percent change</i>	+3.7	+2.4

Since the underlying motive for robbery is to obtain money or property from a person, every instance of this offense involves at least one victim who has suffered physical and/or psychological trauma. Despite the actual or threatened violence inherent in this very personal crime, for UCR purposes robbery is considered to be a crime against property. Accordingly, law enforcement officials report one offense for each separate robbery occurrence.

National Trends, Rates, and Distributions

The 422,921 robberies estimated for 2001 marked the first increase in this offense nationwide since 1991. This estimate indicated a 3.7-

percent increase from the 2000 figure. However, the number of robberies recorded for 2001 was 37.1 percent below the 1992 number.

The 2001 robbery rate for the Nation was 148.5 offenses per 100,000 inhabitants, an increase of 2.4 percent over the previous year's rate. A 10-year comparison, however, revealed that the 2001 rate was 43.7 percent lower than the 1992 rate. (See Table 1.)

Robbery accounted for 29.4 percent of all violent crimes occurring in the United States, and 3.6 percent of all Crime Index offenses. (Based on Table 1.)

Robbery by Weapon

In 2001, robbers used firearms in 42.0 percent of the reported offenses. Thirty-nine percent of robberies involved strong-arming the victim. Offenders used knives or cutting instruments in 8.7 percent of the offenses, and the remaining 10.4 percent of offenses involved other weapons. (See Tables 2.22 and 15.) A state-by-state breakdown of weapons used in robberies is provided in Table 21.

Dollar Loss

Robbers stole more than \$532 million from their victims in 2001. The average loss for each instance of robbery nationwide was \$1,258. The number of banks robbed during 2001 increased 19.4 percent over the number reported for 2000; those institutions incurred an

Table 2.19

Robbery by Month

Percent Distribution, 1997-2001

<i>Month</i>	<i>1997</i>	<i>1998</i>	<i>1999</i>	<i>2000</i>	<i>2001</i>

September	8.5	8.5	8.3	8.5	8.5
October	8.8	9.0	8.8	9.1	9.7
November	8.2	8.3	8.6	8.7	9.1
December	8.6	8.8	9.2	9.0	9.5

average loss of \$4,587 per incident. Commercial houses—a classification that includes supermarkets, department stores, restaurants, taverns, finance companies, hotels, motels, etc.—lost an average of \$1,881 to robbers per incident. The estimated average loss per incident resulting from robberies at residences was \$1,364, followed by streets/highways at \$957, and gas or service stations at \$686. Losses resulting from convenience store robberies averaged \$618. (See Table 23.)

Robbery by Type

Robberies of persons on streets and highways accounted for 44.3 percent of robberies during 2001. Together, robberies of commercial establishments, gas stations, convenience stores, and banks accounted for 26.3 percent of the total robbery offenses reported. Robberies of residences comprised 12.6 percent of the total. The remainder were classified as miscellaneous. (See Table 2.20.)

Regional Offense Distributions and Rates

The U.S. is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, data collected regarding the Nation's four regions reflect the following:

The Northeast

The Northeast, which contained 18.9 percent of the population, experienced 19.1 percent of the Nation's robberies during 2001.

The number of robberies declined in the region by 3.6 percent, and the rate per 100,000 inhabitants declined 4.0 percent from the previous year's rate. That region reported the greatest percentage of strong-arm robberies, 46.9 percent, in 2001. (See Tables 2.22, 3, and 4.)

The Midwest

Claiming 22.7 percent of the population in 2001, the Midwest accounted for 19.6 percent of total robberies. The number of robberies occurring in the region increased 1.8 percent from the 2000 number, and the rate per 100,000 inhabitants increased 1.3 percent. (See Tables 3, and 4.)

The South

With 35.8 percent of the population, the Southern States reported 38.4 percent of total robberies. The volume of robbery offenses within the region increased 6.3 percent from the prior year's volume, and the rate per 100,000 inhabitants increased 4.6 percent over the 2000 rate. That region also reported the highest percentage of robberies involving firearms, 46.9 percent. (See Tables 2.22, 3, and 4.)

The West

In 2001, approximately 22.6 percent of the U.S. population resided in the Western States. That region reported 22.9 percent of all robbery offenses. From 2000, the number of robbery offenses increased 7.6 percent in 2001, and the rate per 100,000 in population rose 5.5 percent. (See Tables 3, and 4.)

Population Groups Trends and Rates

All population groups registered increases for the offense in 2001. Cities with fewer than 10,000 inhabitants reported the largest increase in robbery offenses, 8.2 percent. The Nation's 10 cities with more than 1 million residents reported the smallest increase at 0.1 percent. Additional data for population groups can be found in Table 12.

Considering the robbery rate per 100,000 inhabitants, the highest rate was recorded by cities with 1 million and over in population, 426.7. The lowest rate, 16.7 robberies per 100,000 people, was recorded for rural counties. Rates for population groups can be found in Table 16.

¹ Because of rounding, the percentages may not add to total.

Clearances

Law enforcement agencies cleared 24.9 percent of all robberies nationwide through arrest or exceptional means in 2001. Clearance rates

ranged from the 41.0 percent reported by law enforcement agencies in rural counties to 18.5 percent recorded by those in cities from 500,000 to 999,999 in population. (See Table 25.)

Regionally, the Northeast had the highest clearance rate for robbery at 30.2 percent. The South registered a clearance rate of 24.7 percent. The clearance rate for the Western States was 24.4 percent, followed by the Midwest at 21.2 percent. (See Table 26.)

Figure 2.9

Robbery

Percent change from 1997

Clearances and Juveniles

Juvenile offenders, those under 18 years of age, comprised 14.4 percent of robbery clearances in 2001. Juveniles accounted for 16.6 percent of clearances in cities with populations of 25,000 to 49,999 inhabitants and 9.1 percent of clearances in rural counties. Table 28 provides juvenile clearance data.

Arrests

Total Arrests

Law enforcement officers arrested an estimated 108,400 persons for robbery in 2001. Robbery arrests accounted for 4.8 percent of all arrests for Index crimes and 17.3 percent of violent crime arrests. (See Table 29.)

Arrest Trends

Robbery arrests for 2001 increased 2.1 percent nationwide over those for 2000. Arrests of adults (18 years and older) rose 3.9 percent. However, arrests for juveniles (under age 18)

Table 2.22**Robbery, Types of Weapons Used**
Percent Distribution by Region, 2001

Region	Total all weapons ¹	Armed			Strong- arm
		Firearms	Knives or cutting instru- ments	Other weapons	
Total	100.0	42.0	8.7	10.4	39.0
Northeastern States	100.0	34.6	10.6	7.9	46.9
Midwestern States	100.0	45.1	6.1	9.9	38.9
Southern States	100.0	46.9	7.8	11.8	33.6
Western States	100.0	36.7	10.4	9.7	43.1

¹ Because of rounding, the percentages may not add to total.

decreased 3.5 percent, with arrests of those under 15 years of age falling 11.0 percent. (See Table 36.)

When one looks at arrest data by gender, arrests of males rose 2.0 percent over 2000 data and those of females increased 2.9 percent. Juvenile arrests declined for youths of both sexes, decreasing 3.5 percent for males and 4.0 percent for females. (See Table 37.)

The 5-year trend showed an overall 18.0-percent decrease in the number of persons arrested for robbery: male and female arrests decreased 18.1 percent and 17.4 percent, respectively since 1997. Juvenile arrests also declined for both sexes from 1997 to 2001, male arrests dropping 34.0 percent and female arrests falling 39.8 percent. (See Tables 34 and 35.)

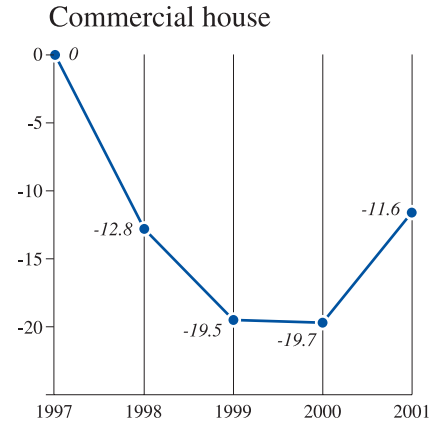

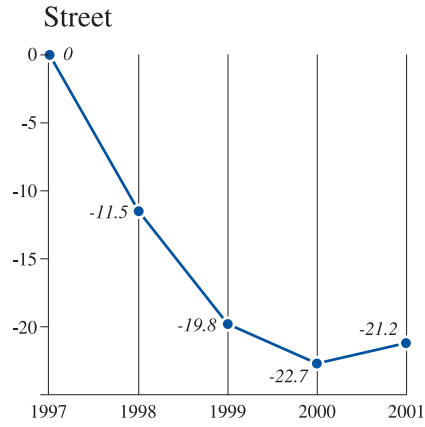

Ten-year trend data showed that when comparing robbery arrests of 2001 with those of 1992, overall arrests were down 25.6 percent, with arrests of males declining 26.8 percent and arrests of females dipping 14.0 percent. Arrests of male juveniles fell 32.5 percent from 1992, and arrests of female juveniles dropped 28.9 percent. (See Tables 32 and 33.)

Distribution

In 2001, a total of 62.0 percent of the persons arrested for robbery were under 25 years of age. The majority of the arrestees, 89.9 percent, were males. By race, 53.8 percent of arrestees were black, 44.5 percent were white, and 1.7 percent were other races. (See Tables 41, 42, and 43.) Breakdowns of male and female arrestees by age are presented in Tables 39 and 40.

Figure 2.10

Robbery Categories
Percent change from 1997

Aggravated Assault

Definition

According to the Uniform Crime Reporting Program, an aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of a weapon or by means likely to produce death or great bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2000	911,706	324.0
2001	907,219	318.5
<i>Percent change</i>	-0.5	-1.7

National Trends, Rates, and Distributions

With an estimated 907,219 offenses nationally, aggravated assaults accounted for 63.1 percent of the violent crimes in 2001. The number of aggravated assault offenses in 2001 was the lowest since 1987. A 2-, 5-, and 10-year trend analysis showed that the estimated total represented a 0.5-percent decline from 2000 data, an 11.3-percent decrease from the 1997 level, and a 19.5-percent decline from the 1992 total. (See Table 1.)

There were 318.5 reported victims of aggravated assault per 100,000 inhabitants in 2001. Two-, 5-, and 10-year trend data showed

that the rate was 1.7 percent lower than in 2000, 16.6 percent lower than it was in 1997, and 27.9 percent lower than in 1992. (See Table 1.)

In 2001, personal weapons such as hands, fists, and feet were used in 27.9 percent of the aggravated assaults; firearms in 18.3 percent; and knives or cutting instruments in 17.8 percent. Blunt objects or other dangerous weapons were used in the remaining 36.0 percent. (See Table 2.24.)

Three of the four weapon categories showed increases in usage when comparing 2001 figures to those from 2000, with personal weapons (hands, fists, feet, etc.) showing the only decrease, 2.3 percent. The increases included firearms, 1.4 percent; other weapons, 0.6 percent; and knives or other cutting instruments, 0.1 percent. (See Table 15.)

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, 42.7 percent of the aggravated assault volume occurred in the South, the Nation's most populous region. The Western Region followed with 23.6 percent, the Midwest Region with 18.8 percent, and the Northeast Region with 15.0 percent. (See Table 3.)

Table 2.23

Aggravated Assault by Month

Percent Distribution, 1997-2001

<i>Month</i>	<i>1997</i>	<i>1998</i>	<i>1999</i>	<i>2000</i>	<i>2001</i>
January	7.5	7.9	7.9	7.6	7.5
February	7.0	7.0	7.0	7.4	7.0
March	8.3	8.1	8.0	8.5	8.4
April	8.2	8.3	8.3	8.4	8.6
May	9.3	9.1	9.1	9.3	9.1
June	9.0	8.9	8.8	8.6	8.6
July	9.5	9.4	9.5	9.0	9.0
August	9.4	9.4	9.2	8.9	8.7
September	8.8	8.7	8.5	8.6	8.8
October	8.4	8.3	8.6	8.7	8.8
November	7.5	7.4	7.7	7.5	7.8
December	7.2	7.4	7.5	7.5	7.7

Regionally, the aggravated assault rates ranged from 253.2 per 100,000 inhabitants in the Northeast to 380.0 per 100,000 in the South. The rates were down in all but one region. The Northeast, West, and South recorded rate decreases of 3.0, 2.7, and 2.0, respectively; however, the rate in the Midwest increased 1.0 percent. (See Table 4.)

Community Types

In 2001, the Nation's Metropolitan Statistical Areas (MSAs) experienced a rate of 343.6 aggravated assaults per 100,000 inhabitants. Cities outside MSAs had a rate of 295.0 aggravated assaults per 100,000 inhabitants, and rural counties had a rate of 168.4 aggravated assaults. (See Table 2.)

Population Groups Trends

By population group, the largest decrease in aggravated assaults, 2.9 percent, was reported in cities with 25,000 to 49,999 inhabitants, followed by cities of under 10,000 in population with a 1.4-percent decline from 2000 data. Cities with 50,000 to 99,999 inhabitants showed a 1.1-percent drop, cities with populations of 250,000 and over had a 0.8-percent decline, and cities with a population of 10,000 to 24,999 experienced a 0.4-percent fall. An increase of 0.2 percent occurred in cities with populations of 100,000 to 249,999 in 2001. Rural counties showed an increase of less than one percent (0.5), and suburban

counties experienced a 1.1-percent decline in aggravated assaults. (See Table 12.)

Clearances

Overall, law enforcement agencies nationwide cleared 56.1 percent of reported aggravated assaults in 2001. Law enforcement in cities with less than 10,000 in population reported the highest percentage of clearances for aggravated assaults, 65.7 percent. Those in rural and suburban counties recorded clearance percentages of 64.9 and 61.7, respectively. (See Table 25.)

Aggravated assaults involving personal weapons such as hands, fists, or feet were cleared 63.8 percent of the time. Aggravated assaults using a knife or cutting instrument were cleared 61.9 percent of the time. Incidents that involved firearms were cleared 41.1 percent of the time. Aggravated assaults using other weapons were cleared 55.3 percent of the time. (See Table 27.)

Geographically, the Northeastern States had the highest percentage of aggravated assaults cleared by arrest—64.4 percent. The Western States followed with 57.8 percent, the Southern States with 53.7 percent, and the Midwestern States with 52.2 percent of aggravated assaults cleared by arrest. (See Table 26.)

Clearances and Juveniles

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records that incident as a clearance by arrest even though a physical arrest may not have occurred. In addition, according to Program definitions, clearances involving both adult and juvenile offenders are classified as adult clearances.

Of the aggravated assault clearances reported both nationally and collectively in the Nation's cities, 11.8 percent involved only persons under the age of 18. In suburban counties, 12.4 percent of aggravated assault clearances involved only juveniles; in rural counties, 10.1 percent of aggravated assault clearances were of persons under the age of 18. (See Table 28.)

Table 2.24

Aggravated Assault, Types of Weapons Used
Percent Distribution by Region, 2001

Region	Total all weapons ¹	Firearms	Knives or cutting instruments	Other weapons (clubs, blunt objects, etc.)	Personal weapons

¹ Because of rounding, the percentages may not add to total.

Figure 2.11

Aggravated Assault
Percent change from 1997

Arrests

Approximately 477,809 persons were arrested for aggravated assault in 2001. Of reported arrests, 79.9 percent were of males and the remaining 20.1 percent were of females. (See Tables 29 and 42.) Sixty-four percent of arrestees for aggravated assault were white, 33.7 percent were black, and the remaining 2.3 percent were of all other races. (See Table 43.)

Total aggravated assault arrests were down 0.1 percent in 2001 from the 2000 figure. (See Table 36.) A comparison of the 5-year figures from 1997 to 2001 showed a 9.4-percent decrease in the total arrests, a 13.2-percent decrease in juvenile arrests, and an 8.8-percent decline in adult arrests. (See Table 34.) Ten-year trend data showed a decline of 4.4 percent in the total arrests, a 13.8-percent decrease in juvenile arrests, and a 2.8-percent drop in adult arrests. (See Table 32.)

Property Crime Total

Definition

In the UCR Program, property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims. Arson is included in the property crime category since it involves the destruction of property, although its victims may be subjected to force. However, because of limited participation and varying collection procedures by local agencies, only limited data are available for arson. Arson statistics are included in trend, clearance, and arrest tables throughout *Crime in the United States*, but they are not included in any estimated volume data. More information on this offense is provided in the arson section in this report.

Trend

<i>Year</i>	<i>Number of offenses¹</i>	<i>Rate per 100,000 inhabitants¹</i>
2000	10,182,584	3,618.3
2001	10,412,395	3,656.1
<i>Percent change</i>	+2.3	+1.0

¹Does not include arson. See Crime Index Tabulations.

National Distributions

Volume

There were an estimated 10,412,395 property crimes reported in 2001. This number reflects an overall increase of 2.3 percent from the offenses reported in 2000, the first year-to-year increase since 1991. In a 5- and 10-year trend analysis, the 2001 volume showed a 9.9-percent decrease when compared to the 1997

volume and a 16.7-percent decrease from the 1992 level.

In 2001, the estimated number of reported motor vehicle thefts represented the largest increase among the property crimes—5.7 percent. Burglary and larceny-theft offenses increased 2.9 percent and 1.5 percent, respectively. (See Table 1.) Although arson is a property crime, it is excluded from the property crime totals.

Rate

The Nation experienced an overall property crime rate of 3,656.1 offenses per 100,000 inhabitants, a 1.0-percent increase from the 2000 rate. The 2001 property crime rate showed a decline of 15.3 percent when compared to the 1997 rate, and a decrease of 25.4 percent when compared to the 1992 rate. The 2001 property crime rate marked the first year-to-year increase since 1991.

Distribution

In 2001, property crimes comprised 87.9 percent of the Crime Index total. Larceny-theft accounted for the highest volume of offenses—68.0 percent of the Nation's estimated property

Table 2.25

Property Crime Total by Month

Percent Distribution, 1997-2001

<i>Month</i>	<i>1997</i>	<i>1998</i>	<i>1999</i>	<i>2000</i>	<i>2001</i>
January	8.2	8.6	8.0	7.8	7.8
February	7.3	7.5	7.2	7.3	6.8
March	8.0	8.2	8.0	8.2	7.8
April	8.0	8.0	7.9	7.9	7.9
May	8.4	8.4	8.3	8.6	8.4
June	8.4	8.5	8.6	8.6	8.4
July	9.1	8.9	9.1	9.1	9.0
August	9.0	9.0	9.2	9.2	9.0
September	8.5	8.4	8.5	8.5	8.4
October	8.8	8.5	8.7	8.8	9.2
November	8.0	7.9	8.2	8.1	8.5
December	8.3	8.2	8.4	8.0	8.7

crimes and 59.7 percent of the Crime Index offenses.

In 2001, the estimated dollar loss attributed to property crime losses (excluding arson) was \$16.6 billion, an increase of 5.6 percent from the 2000 estimate. Burglary losses were up 9.0 percent from the 2000 level; larceny-theft increased 1.9 percent, and motor vehicle theft rose 6.8 percent from the prior year's estimates.

Arson offenses, which are excluded from estimated property crime tabulations because of limited coverage and law enforcement participation, were estimated at 68,967 in 2001, with an average loss of \$11,098. (See Table 2.32.)

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. (More information on UCR area definitions can be found in Appendix III.) In 2001, data collected regarding the Nation's four regions reflect the following:

The Northeast

The Northeast accounted for 13.3 percent of the total number of property crimes reported in 2001. (See Table 3.) This region was the only region to experience decreases in both the number of property crime offenses and the rate per 100,000 inhabitants. The Northeast had a 1.3-percent decline in offenses when compared to the 2000 total, and a 1.7-percent decline in the property crime rate per 100,000 persons. (See Table 4.)

The Midwest

The Midwest accounted for 22.0 percent of the total property crime offenses reported in 2001. (See Table 3.) This region recorded an increase in both volume (1.6 percent) and the rate per 100,000 inhabitants (1.2 percent) over the prior year's volume and rate. (See Table 4.)

The South

The South accounted for 40.9 percent of the total property crimes reported during 2001. (See Table 3.) This region experienced a 1.9-percent rise in the volume of property crimes and a slight increase (0.3 percent) in the rate per 100,000 inhabitants. (See Table 4.)

The West

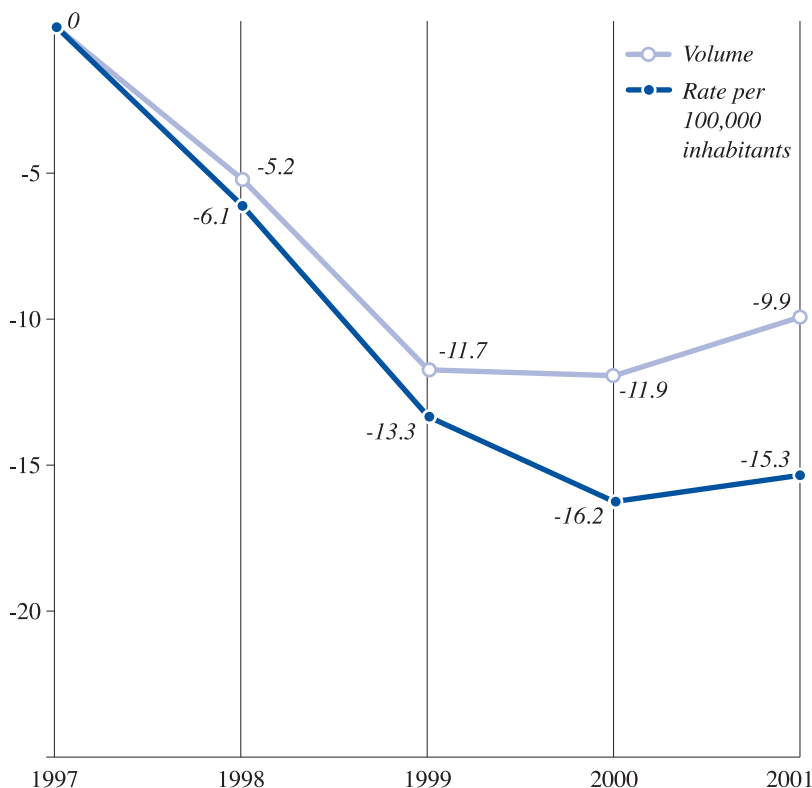

The West reported 23.7 percent of the total property crimes during 2001. (See Table 3.) The region reflected a 5.6-percent increase in the volume of property crimes compared to the 2000 volume and a 3.5-percent rise in the property crime rate per 100,000 inhabitants. (See Table 4.)

Community Types

The UCR Program designates three types of communities when presenting crime data: Metropolitan Statistical Areas (MSA), cities outside MSAs, and rural counties. In 2001, MSAs accounted for 85.6 percent of the total estimated property crime offenses and reported an estimated rate of 3,914.9 offenses per 100,000 persons. Cities outside of MSAs accounted for 8.9 percent of the total estimated property crime offenses and had an estimated rate of 4,057.6 offenses per 100,000 inhabitants. Rural counties accounted for 5.6 percent of the total 2001 property crimes and had an estimated rate of 1,681.4 offenses per 100,000 persons. (See Table 2.)

Figure 2.12

Property Crime
Percent change from 1997

Population Groups Trends and Rates

The Nation's cities collectively, reported an increase of 2.3 percent in the number of property crimes reported in 2001 over the prior year's number. All city groups experienced increases in the number of property crimes reported, the largest increase (4.5 percent) recorded in cities with populations of 250,000 to 499,999. The smallest increase, 0.7 percent, was reported in cities of 1 million or more inhabitants. (See Table 12.)

Clearances

Clearances occur either by arrest or by exceptional means, i.e., when elements beyond the control of law enforcement prevents the placing of formal charges against the offender. (More information regarding clearances can be found in Section III of this report.) In 2001, overall clearances for property crime offenses totaled 16.2 percent. (See Table 25.)

Regionally, clearances of property crimes during 2001 were as follows: the Northeast, 19.8 percent; the Midwest, 15.9 percent; the South, 16.1 percent; and the West, 14.8 percent. In the Nation's cities collectively, 16.2 percent of property crimes were cleared during the year. Among the individual city population groups, the highest property crime clearance percentage in 2001 was reported in cities with 10,000 to 24,999 population—21.2 percent. The lowest percentage of property crimes cleared—10.8 percent—was experienced in cities with populations of 500,000 to 999,999. Additionally, suburban and rural counties each reported property clearance percentages of 15.2 percent and 18.1 percent, respectively. (See Tables 25 and 26.)

Clearances and Juveniles

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records that incident as a clearance by arrest, even though a physical arrest may not have occurred. In addition, according to Program definitions, clearances involving both adult and juvenile offenders are classified as adult clearances.

Nationally, juveniles accounted for 21.1 percent of the overall property crime clearances in 2001. The highest percentage of juvenile clearances—24.0 percent—occurred in cities

with populations of 50,000 to 99,999. The lowest percentage of juvenile clearances—17.1 percent—was recorded in the Nation's rural counties. (See Table 28.)

Arrests

Total Arrests

The number of estimated property crime arrests for 2001 was 1,618,465. This figure made up 72.1 percent of the estimated Part I crime (Crime Index offenses) arrests and 11.8 percent of the Nation's total estimated arrests during 2001. The greatest percentage of arrests made for property crimes was for larceny-theft offenses—71.7 percent. The smallest percentage of arrests—1.2 percent—was made for arson offenses. (See Table 29.)

Arrest Rates

The U.S. experienced a rate of 581.8 property crime arrests per 100,000 inhabitants in 2001. The highest property crime arrest rate—608.4 arrests per 100,000 inhabitants—occurred in the Midwest. The lowest property crime arrest rate—481.1 per 100,000 people—was reported in the Northeast. (Table 30 provides breakdowns of arrests for all of the regions.)

The Nation's cities collectively experienced a rate of 691.2 property crime arrests per 100,000 inhabitants. The highest rate—758.8 per 100,000 people—occurred in cities with populations of 250,000 and over. The lowest rate—618.8 per 100,000 people—occurred in cities with populations under 10,000. Suburban and rural counties reported property crime arrest rates of 358.0 and 289.2 per 100,000 inhabitants, respectively. (See Table 31.)

Arrest Trends

Overall, property crime arrests declined slightly—1 percent—from 2000 to 2001. However, among the individual property crimes, arrests increased 0.4 percent for burglaries, 2.7 percent for motor vehicle thefts, and 14.7 percent for arson offenses. The number of arrests for larceny-thefts declined 1.9 percent; however, with its considerable volume, this decrease offset the increases in arson, burglary, and motor vehicle theft arrests and resulted in an overall decline in property crime arrests for 2001. (See Table 36.)

Regarding arrests of juveniles, overall property crime arrests of juveniles decreased 5.6 percent in 2001 when compared to the 2000 figure. Conversely, property crime arrests for adults increased 1.3 percent. (See Table 36.)

Five-year trends in property crime arrest data indicated a 20.0-percent decline in arrests from 1997 to 2001. A 10-year comparison of total property crime arrests between 1992 and 2001 showed a 26.2-percent decrease. Tables 32 and 34 provide more information regarding trend data.

Distribution

In 2001, 69.6 percent of all persons arrested for property crimes were over the age of 18, and 30.4 percent were under age 18. (See Table 38.) Additionally, 69.6 percent of all persons arrested for property crimes in 2001 were males, and 30.4 percent were females. (See Table 42.) Of the persons arrested for property crime offenses, 66.0 percent were white, 31.4 percent were black, and the remainder were other races (Asian or Pacific Islander and American Indian or Alaskan Native). (See Table 43.)

Burglary

Definition

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify an offense as burglary. Burglary in this Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2000	2,050,992	728.8
2001	2,109,767	740.8
<i>Percent change</i>	+2.9	+1.6

National Offenses, Trends, and Distributions

The number of estimated burglaries for the Nation in 2001 rose 2.9 percent over those reported the previous year. In a 5- and 10-year trend analysis, the estimated 2,109,767 burglaries in 2001 represented a 14.3-percent decline from 1997 totals and a 29.2-percent drop from 1992 estimates. (See Table 1.) When compared to the 1982 estimate, the year with the highest burglary estimate during the last two decades, the 20-year trend showed that the 2001 burglary total was significantly lower, down 38.8 percent. (Based on Table 1.)

The national burglary rate of 740.8 per

100,000 inhabitants for 2001 represented a 1.6-percent increase from the previous year's rate. However, this rate was significantly lower than the totals from 5 and 10 years ago. The 2001 rate was 19.4 percent lower than the 1997 rate and 36.6 percent below the 1992 level. (See Table 1.) In a 20-year comparison, the 2001 rate was 50.2 percent less than the 1982 rate. (Based on Table 1.)

For those agencies that reported statistics for all 12 months of 2001, the data showed that forcible entry accounted for 63.3 percent of burglaries, unlawful entry comprised 30.2 percent, and attempted forcible entry accounted for 6.5 percent. (See Table 19.)

The majority of burglaries, 65.2 percent, were residential. Most residential burglaries, 61.0 percent, occurred during the day, and most nonresidential burglaries, 58.0 percent, occurred at night. Burglaries totaled an estimated \$3.3 billion for an average loss per burglary of \$1,545. Residential burglaries averaged \$1,381, and nonresidential burglaries averaged \$1,615 in 2001. (See Table 23.)

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. A map of the United States delineating the regions is included in Appendix

Table 2.26

Burglary by Month Percent Distribution, 1997-2001

<i>Month</i>	<i>1997</i>	<i>1998</i>	<i>1999</i>	<i>2000</i>	<i>2001</i>
January	8.4	8.9	8.3	8.1	7.8
February	7.2	7.5	7.2	7.2	6.6
March	7.9	8.2	7.9	8.0	7.6
April	7.8	8.0	7.7	7.8	7.7
May	8.3	8.3	8.2	8.5	8.3
June	8.2	8.2	8.4	8.4	8.2
July	9.1	9.0	9.0	9.2	9.0
August	9.0	9.0	9.1	9.2	9.1
September	8.7	8.4	8.7	8.6	8.6
October	8.8	8.4	8.6	8.7	9.3
November	8.2	7.9	8.4	8.3	8.8
December	8.6	8.2	8.5	8.1	8.9

III. Estimated crime volume, rates, and percent changes by region are published in Table 4.

The Northeast

The fewest burglaries occurred in the Northeastern States, 12.0 percent. (See Table 3.) The Northeast was the only region of the country to experience a decrease in burglary over the previous year's volume with a drop of 1.2 percent. The Northeast was also the only region to report a decrease in the burglary rate, 470.0 per 100,000 in population, down 1.6 percent from the 2000 rate. (See Table 4.)

The Midwest

The Midwestern States accounted for 20.8 percent of burglaries in 2001. (See Table 3.) The burglary total represented a 2.6-percent increase over the previous year's total. The burglary rate of 677.7 per 100,000 persons denoted a 2.1-percent increase in the region's rate since 2000. (See Table 4.)

The South

Proportionately, most burglaries were reported in the Southern States, 44.7 percent. (See Table 3.) The increase in the number of estimated burglaries from 2000 was 4.1 percent in these states collectively. The burglary rate for the region, 926.8 per 100,000 inhabitants, increased by 2.5 percent from the 2000 rate. (See Table 4.)

The West

Western States accounted for 22.5 percent of the estimated burglaries for 2001. (See Table 3.) This total represented a 2.9-percent increase over the 2000 level. States in this region reported a slight upward trend in the burglary rate, 736.4 per 100,000, an increase of 0.9 percent over the rate from the previous year's rate. (See Table 4.)

Community Types

Metropolitan Statistical Areas (MSAs), which made up approximately 80 percent of the total U.S. population in 2001, recorded a rate of 768.8 burglaries per 100,000 persons. For cities outside MSAs, which comprised approximately 8.0 percent of the Nation's population, the rate was 764.3 burglaries per 100,000 inhabitants, and in rural counties, which accounted for approximately 12 percent of the U.S. population during 2001, the rate was 540.1. MSAs comprised 82.9 percent of the estimated burglary volume; other cities made up 8.2 percent; and rural counties, 8.8 percent. (See Table 2.)

Population Groups Trends and Rates

Cities as a whole showed a 2.7-percent increase in burglaries in 2001 over burglaries reported in 2000. Among the population groups, cities with populations of 500,000 to 999,999 saw the largest 1-year increase at 6.3 percent. Cities with populations of 1 million and over in population reported an overall 0.3-percent decrease in burglaries. Both suburban and rural counties showed an increase in reported burglaries, 3.1 percent and 1.9 percent, respectively. (See Table 12.) Collectively, cities recorded a rate of 846.2 burglaries per 100,000 inhabitants. Suburban counties registered a rate of 649.1 per 100,000 persons, and rural counties

Figure 2.13

Burglary

Percent change from 1997

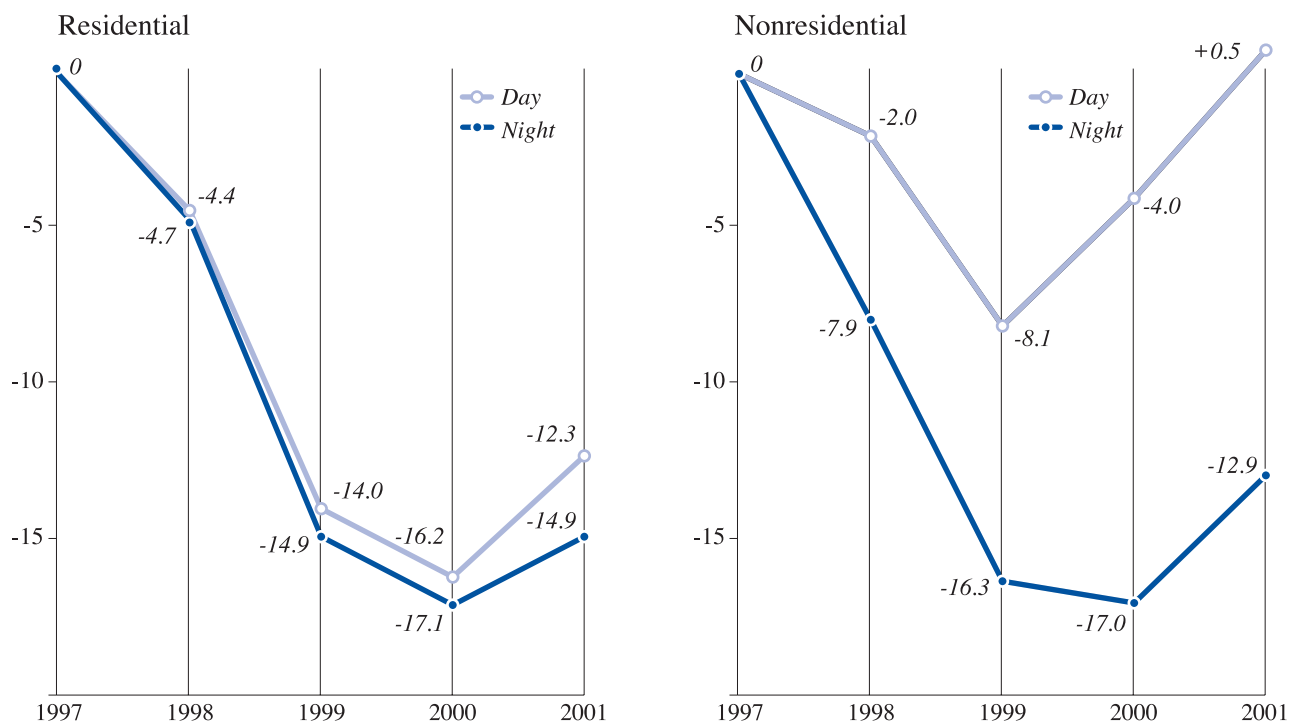

Figure 2.14

Burglary

Percent change from 1997

noted a rate of 567.1 per 100,000 inhabitants. (See Table 16.)

Clearances

Clearances occur either by arrest or by exceptional means, i.e., when circumstances beyond the control of law enforcement prevent the placing of formal charges against the offender. (More information regarding clearances can be found in Section III of this report.) In the Nation in 2001, 12.7 percent of burglary offenses were cleared. (See Table 25.) The highest percentage of reported clearances involved unlawful entry, 14.1 percent, followed by forcible entry, 12.3 percent, and attempted forcible entry, 10.7 percent. (See Table 27.)

Law enforcement in the Northeast Region cleared 16.7 percent of burglary offenses. Those in the South cleared 12.7 percent of total burglaries; in the West, 12.1 percent; and in the Midwest, 11.1 percent. (See Table 26.)

Among the Nation's population groups, cities with populations under 10,000 revealed the highest proportion of burglary offenses cleared at 16.4 percent. Those cities with populations of 500,000 to 999,999 cleared the fewest of their burglary offenses, 8.3 percent. Total clearances for all cities was 12.3 percent. (See Table 25.)

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records that incident as cleared by arrest, even though a physical arrest may not have occurred. In addition, according to Program definitions, clearances involving both adult and juvenile offenders are classified as adult clearances. In 2001, 18.5 percent of all burglary clearances involved only juveniles. Communities with populations of fewer than 10,000 had the highest percentage of burglary clearances that involved only juvenile offenders, 21.9 percent. Cities with 500,000 to 999,999 inhabitants had

the lowest juvenile clearances for burglary at 14.1 percent. (See Table 28.)

Arrests

The estimated number of arrests nationwide for burglary for 2001 was 291,444, an arrest rate of 103.3 per 100,000 inhabitants. (See Tables 29 and 30.) Law enforcement agencies in the West recorded the highest rate of burglary arrests, 124.9 per 100,000. Those in the Southern States had an arrest rate of 108.9 per 100,000 persons, followed by the Northeast, 82.2, and the Midwest, 78.0. (See Table 30.) Among the population groups, arrest rates ranged from a high of 131.1 recorded for cities of 100,000 to 249,999 to a low of 84.9 reported by suburban counties. (See Table 31.)

Arrest Trends

Overall, arrests for burglary increased 0.4 percent when compared to the previous year's figure. However, the number of burglary arrests nationwide was considerably lower than the number from 5 and 10 years ago. Burglary arrests were down 18.7 percent from the 1997 figure and 32.7 percent from the 1992 figure. Arrests of juveniles for burglary showed a

decrease of 5.6 percent from the 2000 total, 30.3 percent from the 1997 total, and a drop of 40.1 percent from the 1992 total. Arrests of adults in 2001 rose 3.4 percent from the previous year's total; however, the 2001 total is 12.1 percent lower than the 1997 level and 28.7 percent below the 1992 number. (See Tables 32, 34, and 36.)

Distribution

By age of arrestees, 31.0 percent of burglary arrestees were juveniles, and 11.7 percent of the total arrestees were under age 15. (See Table 41.) By gender, males comprised the majority of burglary arrestees, 86.4 percent, in 2001. Of these arrests, 31.6 percent were males under age 18. (Based on Table 39.) For females, 13.6 percent were arrested for burglary and of those, 27.4 percent were juveniles. (Based on Table 40.)

By race, 69.4 percent of burglary arrestees were white, 28.5 percent were black, and other races accounted for the remaining 2.1 percent. Whites made up 68.1 percent, blacks 29.9 percent, and other races comprised 2.0 percent of adult arrestees. For individuals under age 18 arrested for burglary, 72.3 percent were white, 25.2 percent were black, and 2.5 percent were of all other races. (See Table 43.)

Larceny-Theft

Definition

Larceny-theft is the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting Program, this crime category does not include embezzlement, confidence games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate Crime Index offense.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2000	6,971,590	2,477.3
2001	7,076,171	2,484.6
<i>Percent change</i>	+1.5	+0.3

National Trends, Rates, and Distributions

In 2001, the estimated number of larceny-theft offenses in the Nation exceeded 7 million and cost the Nation an estimated \$5.2 billion in losses. Law enforcement agencies reported the estimated 7,076,171 offenses in the following categories:

- Pocket-picking
- Purse-snatching
- Shoplifting

- Thefts from Motor Vehicles (Except theft of motor vehicle parts and accessories)
- Theft of Motor Vehicle Parts and Accessories
- Theft of Bicycles
- Theft from Buildings
- Theft from Coin-Operated Device or Machine
- All Other Larceny-Theft not Specifically Classified.

Examples of thefts in the all other category include thefts from fenced enclosures, boats, and airplanes; and of animals, lawn-mowers, hand tools, and farm and construction equipment, as well as incidents of taking gasoline from a self-service gasoline station without paying.

The estimated 7,076,171 larceny-theft offenses reported to law enforcement in the Nation translated into a larceny every 4.5 seconds and accounted for 59.7 percent of all Crime Index offenses and 68.0 percent of all property crimes. The 2001 estimate was up 1.5 percent from the 2000 estimate of 6,971,590 offenses. However, when looking at the offense over a 5-year and 10-year span, larceny-thefts

Larceny-theft

Percent change from 1997

decreased 8.6 percent when compared to the 7,743,760 estimated offenses reported in 1997, and 10.6 percent compared to the 7,915,199 offenses reported in 1992. (See Table 1.)

Table 2.28

Larceny-theft

Percent Distribution by Region, 2001

Type	United States total	North-eastern states	Mid-western states	Southern states	Western states
Total ¹	100.0	100.0	100.0	100.0	100.0
Pocket-picking	0.5	1.1	0.3	0.4	0.4
Purse-snatching	0.5	1.0	0.4	0.4	0.6
Shoplifting	13.8	15.0	12.8	13.3	14.7
From motor vehicles (except accessories)	25.8	21.1	23.9	24.8	31.2
Motor vehicle accessories	10.2	7.9	10.7	10.1	11.2
Bicycles	4.1	5.9	4.5	3.4	4.2
From buildings	13.3	16.8	14.8	11.4	13.7
From coin-operated machines	0.7	0.6	0.6	0.8	0.7
All others	31.0	30.6	31.9	35.4	23.3

¹ Because of rounding, the percentages may not add to total.

In 2001, the Nation experienced a rate of larceny-thefts of 2,484.6 per 100,000 population. This figure was a slight increase of 0.3 percent over the 2000 estimated rate but a 14.1-percent decrease in comparison to the 1997 rate and a 19.9-percent decrease when compared to the 1992 rate. (See Table 1.)

Regional Offense Distributions and Rates

The United States is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, data collected regarding the Nation's four regions reflect the following: The South, the most populous region, had 40.7 percent of all larceny offenses. The West had 22.9 percent of the total, the Midwest, 22.8 percent, and the Northeast, 13.6 percent of all larcenies. (See Table 3.)

When 2001 regional volumes are compared to the 2000 figures, the lone decrease in volume occurred in the Northeast, with a 1.4-percent drop. Of the regions posting increases, the volume of larceny-thefts in the West rose 4.8 percent. In the Midwest, the volume of larceny-theft offenses increased 1.1 percent, and in the South, the volume was up 0.9 percent. Among the geographic regions in 2001, the South had a rate per 100,000 inhabitants of 2,826.7, and the West had a rate of 2,518.5. The Midwest reported a rate of 2,491.5 per 100,000 inhabitants, and the Northeast, a rate of 1,788.4 per 100,000 population. The larceny-theft rate per 100,000 inhabitants was up 2.7 percent and 0.6 percent in the West and Midwest, respectively; the rate declined 0.6 percent in the South and 1.8 percent in the Northeast. (See Table 4.)

Community Types

By community types, Metropolitan Statistical Areas had a rate of 2,647.0 larceny offenses per 100,000 inhabitants. Cities outside MSAs had a rate of 3,087.7, and rural counties experienced a rate of 1,014.0 per 100,000 population. (See Table 2.)

Population Groups Trends and Rates

Larceny-thefts increased in all population groups when comparing 2001 and 2000 volume figures. Increases ranged from 3.2 percent in cities with populations of 250,000 to 499,999 to

Figure 2.16

Larceny-theft categories
Percent change from 1997

0.5 percent each in cities with 1 million and over inhabitants and cities of 10,000 to 24,999 in population. (See Table 12.) Among cities, those with populations of 500,000 to 999,999 had the highest rate per 100,000 inhabitants at 3,968.8, and cities with a population of 10,000 to 24,999 had the lowest rate at 2,646.9 per 100,000 inhabitants. Suburban counties had a rate of 1,754.8; rural counties had a rate at 1,062.0 per 100,000 inhabitants. (See Table 16.)

Distribution

Nature

Thefts from motor vehicles accounted for 25.8 percent and shoplifting 13.8 percent of all larcenies in 2001. Thefts from buildings made up 13.3 percent of the total; 10.2 percent of larcenies were thefts of motor vehicle accessories. Stolen bicycles comprised 4.1 percent of larcenies. The remainder of larceny-thefts were distributed among coin-operated machines, pocket-pickings, purse-snatchings, and all other larceny-thefts. (See Table 23.)

Loss by Dollar Value

An estimated \$5.2 billion in property was lost because of larceny-theft in 2001, an increase from the 2000 estimate of \$5.1 billion. The average dollar value per offense was \$730, an increase from the \$727 in 2000. (See Table 23.)

In 2001, thefts from buildings was the larceny-theft offense with the highest average loss, \$1,037. For thefts from motor vehicles, the average value loss was \$719, and for thefts of motor vehicle accessories, \$451. Purse-snatchings had an average value loss of \$331, and thefts of bicycles an average loss of \$318. Pocket-picking resulted in an average value loss of \$305, and in thefts from coin-operated machines, the loss was \$286. The category with the lowest average loss, \$182, was shoplifting. For the all other category, the average dollar loss was \$1,024. (See Table 23.)

Losses over \$200 accounted for 39.4 percent of larceny-thefts, up 3.8 percent from 2000 figures; losses under \$50 made up 37.6

percent of larceny-theft offenses, which was up 1.8 percent from 2000; and the remaining 23.0 percent were losses ranging from \$50–\$200, a 0.5-percent rise from 2000 data. Thefts of items over \$200 had an average value of \$1,770, thefts of items from \$50–\$200 had an average value of \$115, and thefts of items under \$50 had an average value of \$18. (See Table 23.)

Trends by Category

Reported thefts from coin-operated machines increased 12.6 percent from 2000 data. Other categories with volume increases from 2000 to 2001 were thefts of motor vehicle accessories, 8.0 percent; thefts from motor vehicles, 5.2 percent; purse-snatchings, 3.4 percent; shoplifting, 2.7 percent; and thefts from buildings, 1.2 percent. However, pocket-picking offenses declined 6.4 percent from the 2000 figure, and thefts of bicycles were down 5.4 percent. (See Table 23.)

Among the larceny types, the sole category with an increase in offenses from 1997 to 2001 was thefts from coin-operated machines, with a 10.9-percent growth. The other larceny-theft categories all posted a reduction in the number of offenses. Theft of bicycles dropped 32.1 percent when comparing 1997 and 2001 data. Other categories with decreases from 1997 to 2001 were shoplifting, 16.7 percent; purse-snatching, 12.4 percent; and pocket-picking, 10.6 percent. The number of thefts from buildings fell 6.5 percent; thefts from motor vehicles decreased 5.4 percent; and thefts of motor vehicle accessories fell 5.3 percent. (See Figure 2.16.)

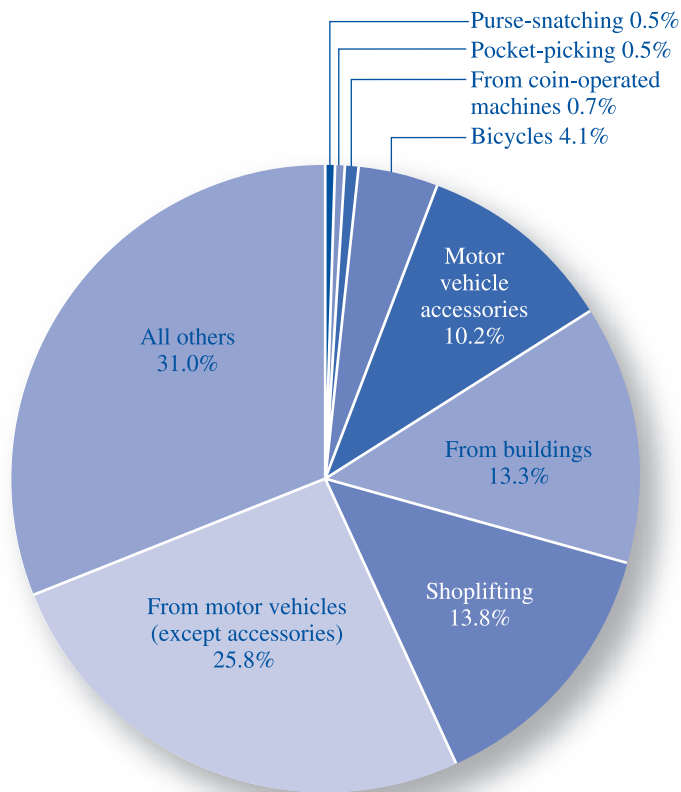

Clearances

Of the larceny-thefts reported to law enforcement in 2001, 17.6 percent were cleared by arrest or exceptional means. By population group, cities with 10,000 to 24,999 inhabitants had the highest number of clearances among the Nation's cities, 22.5 percent, and cities with 500,000 to 999,999 inhabitants cleared the least of their larceny-theft offenses, 11.6 percent. Law enforcement in rural counties cleared 17.8 percent of larceny-thefts, and law enforcement in suburban counties cleared 16.0 percent. (See Table 25.)

Figure 2.17

Larceny-theft

Percent distribution¹ 2001

¹ Due to rounding, the percentages do not add to 100.0 percent.

Nearly 22 percent (21.9) of all larceny-theft clearances were of juveniles (persons under 18 years of age). By population group, cities with populations of 50,000 to 99,999 inhabitants had the largest percentage of clearances involving only juveniles—25.3. (See Table 28.)

Arrests

The number of estimated arrests for larceny-thefts in the Nation in 2001 was 1,160,821, or 8.5 percent of the 13.7 million total estimated arrests for the United States. Larceny arrests accounted for 71.7 percent of the 1.6 million estimated arrests for all property crimes, and 51.7 percent of the estimated 2.2 million arrests for all Crime Index offenses in 2001. (See Table 29.)

Larceny-theft arrests in 2001 were down 1.9 percent from the 2000 figure. Larceny-theft arrests of juveniles declined 6.3 percent from the 2000 figure. Adult arrests for larceny-thefts showed a slight increase, 0.2 percent, from the 2000 number. (See Table 36.) Arrests of juvenile males went down 9.2 percent, and arrests of juvenile females declined 1.3 percent. (See Table 37.)

In 2001, juvenile arrests accounted for 29.6 percent of all larceny-theft arrests, and adult arrests comprised 70.4 percent. (See Table 38.) Of the juveniles arrested for larceny-theft, 68.9 percent were white, 27.8 percent were black, 2.0 percent were Asian or Pacific Islander, and 1.4 percent were American Indian or Alaskan Native. (See Table 43.)

Males accounted for 63.5 percent of the total arrests for larceny-theft, and females accounted for 36.5 percent of the arrests. (See Table 42.) By race, 66.1 percent of arrestees for larceny-theft in 2001 were white, 31.2 percent were black, 1.5 percent were Asian or Pacific Islander, and the remaining 1.2 percent were American Indian or Alaskan Native. (See Table 43.)

Motor Vehicle Theft

Definition

Defined in the Uniform Crime Reporting Program as the theft or attempted theft of a motor vehicle, this offense category includes the stealing of automobiles, trucks, buses, motorcycles, motorscooters, snowmobiles, etc. The definition excludes the taking of a motor vehicle for temporary use by those persons having lawful access.

Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2000	1,160,002	412.2
2001	1,226,457	430.6
<i>Percent Change</i>	+5.7	+4.5

National Trends, Rates, and Distributions

The estimated 1,226,457 motor vehicle thefts in the Nation in 2001 represent a 5.7-percent increase from the previous year's estimate. When compared to 5 and 10 years ago, the level of motor vehicle theft was down 9.4 percent from the 1997 level and declined 23.9 percent from the 1992 level. For 2001, the Nation's motor vehicle theft rate was 430.6 per 100,000 inhabitants. This rate was up 4.5 percent from the 2000 rate but was 14.8 percent lower than in 1997 and 31.8 percent below the 1992 level. (See Table 1.) By vehicle type, 336.9 automobiles and 86.5 trucks and buses were

stolen per 100,000 inhabitants. The theft rate for all other vehicles was 33.4. (See Table 19.)

The average value of motor vehicles reported stolen in 2001 was \$6,646. With the estimated total value of all motor vehicles stolen at \$8.2 billion, approximately 62.0 percent of that amount was recovered. (See Tables 1, 23, and 24.)

Regional Offense Distributions and Rates

The U.S. is divided into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2001, data collected regarding the Nation's four regions reflect the following:

The Northeast

The Northeastern States accounted for 14.0 percent of all motor vehicle thefts in 2001. (See Table 3.) The region experienced a slight drop, 0.6 percent, in the estimated volume of motor vehicle thefts from the 2000 estimate. The Northeast, with a rate of 318.8 motor vehicle thefts per 100,000 persons, was the only region of the Nation that experienced a decline in the motor vehicle theft rate with a 1.0-percent drop. (See Table 4.)

The Midwest

The Midwestern States reported 20.0 percent of the total estimated motor vehicle

Table 2.29

Percent Distribution, 1997-2001

<i>Month</i>	<i>1997</i>	<i>1998</i>	<i>1999</i>	<i>2000</i>	<i>2001</i>
January	9.0	9.1	8.5	8.1	8.1
February	7.6	7.9	7.3	7.4	6.9
March	8.2	8.5	7.9	8.0	7.7
April	7.9	7.9	7.7	7.6	7.6
May	8.2	8.3	8.0	8.2	8.0
June	8.1	8.1	8.2	8.3	8.2
July	8.7	8.7	8.8	8.9	9.0
August	8.7	8.8	9.0	9.1	8.8
September	8.3	8.3	8.5	8.5	8.5
October	8.6	8.4	8.8	8.7	9.3
November	8.2	7.9	8.5	8.5	8.8
December	8.3	8.1	8.8	8.6	9.2

thefts. (See Table 3.) The total number of vehicle thefts in 2001 was a 3.4-percent increase from the previous year's number. The region had a rate of 379.9 vehicles stolen per 100,000 in population, accounting for a 2.9-percent increase over the 2000 rate. (See Table 4.)

The South

The Southern States reported the highest percentage of motor vehicle thefts among the Nation's four regions with 35.5 percent of the total estimate. (See Table 3.) This region saw a 4.0-percent increase from the 2000 estimate. The rate of 427.6 thefts per 100,000 in population was a 2.4-percent increase over the previous year's rate. (See Table 4.)

The West

The Western States accounted for 30.5 percent of the Nation's motor vehicle thefts. (See Table 3.) This region had the largest rise in the volume of vehicle thefts—12.9 percent—over the 2000 total. The West reported the highest motor vehicle theft rate at 579.7 offenses per 100,000 persons. This rate represents a 10.6-percent rise from the 2000 rate. (See Table 4.)

Community Types

Metropolitan Statistical Areas (MSAs) had a rate of 499.1 motor vehicle thefts per 100,000 persons and accounted for 92.6 percent of all motor vehicle theft offenses; cities outside MSAs, a rate of 205.5 vehicles stolen and 3.8 percent of offenses; and rural counties had a rate

of 127.3 motor vehicle thefts per 100,000 persons and accounted for 3.6 percent of all stolen vehicle offenses. (See Table 2.)

Population Groups and Rates

All population groups experienced an increase in reported motor vehicle thefts with those cities 250,000 to 499,999 in population having the greatest increase at 11.3 percent. Cities with 1 million and over inhabitants registered the smallest increase at 2.5 percent. All county groups also saw increases in motor vehicle thefts as suburban counties experienced a 6.0-percent rise and rural counties had a 3.6-percent increase. (See Table 12.)

The highest rate of motor vehicle thefts, 1,072.4 per 100,000 inhabitants, was in cities with populations of 250,000 to 499,999. (See Table 16.) When broken down by vehicle type, cities with populations of 250,000 to 499,999 recorded the highest rate of automobile theft, 834.8 per 100,000 inhabitants. For trucks and buses, cities of 1 million and more in population had the highest theft rate at 279.0 per 100,000 inhabitants. When one examines the other vehicles category, cities of 1 million and over also had the highest theft rate with 58.0 per 100,000 in population. Rural counties had the lowest theft rate of automobiles at 78.5 and also for trucks and buses at 23.9. Cities of 10,000 to 24,999 had the lowest rate of other types of vehicles stolen at 23.9 per 100,000 persons. (See Table 19.)

Clearances

Nationally, clearances of motor vehicle thefts in 2001 totaled 13.6 percent. (See Table 25.) Clearances were highest in the Midwest and South at 15.6 percent. Motor vehicle thefts were cleared at 13.9 percent in the Northeast and 10.8 percent in the West. (See Table 26.)

All cities reporting combined to clear 12.8 percent of motor vehicle thefts. The Nation's smallest cities, those under 10,000 in population, reported the highest clearance percentage at 26.2, and the largest cities, those with 1 million and over in population, had the lowest percentage at 10.0. At the county level, 28.0 percent of motor vehicle thefts were cleared in

Table 2.30

Motor Vehicle Theft

Percent Distribution by Region, 2001

Region	Total ¹	Autos	Trucks and buses	Other vehicles
Total	100.0	73.7	18.9	7.3
Northeastern States	100.0	87.9	6.0	6.1
Midwestern States	100.0	77.7	15.2	7.1
Southern States	100.0	70.9	20.1	8.9
Western States	100.0	70.1	23.8	6.1

¹ Because of rounding, the percentages may not add to total.

Figure 2.18

Motor Vehicle Theft
Percent change from 1997

rural counties, and 15.4 percent were cleared in suburban counties. (See Table 25.)

In the Nation, 14.1 percent of automobile thefts were cleared, 11.6 percent of truck and bus thefts were cleared, and 13.1 percent of thefts of other vehicle types were cleared. Law enforcement in rural counties recorded the highest number of clearances for automobiles stolen, 32.1 percent, as well as for stolen trucks and buses, 28.3 percent. Cities 250,000 to 499,999 in population had the highest number of clearances in the other vehicles category at 21.0 percent. (See Table 27.)

Arrests

An estimated 147,451 persons were arrested for motor vehicle theft in the Nation in 2001. (See Tables 29.) The Nation's cities collectively had a rate of 62.1 arrests per 100,000 inhabitants compared to a National rate of 53.3. Among the population groups, those cities with 250,000 and over in population had the highest arrest rate at 113.8 per 100,000 in population, and rural counties had the lowest arrest rate at 28.2. (See Table 31.)

Regionally, the Western States reported the highest rate of arrests per 100,000 persons at 70.2. The Midwestern States had a rate of 64.0, followed by the Southern States at 41.5 and the Northeastern States at 35.3. (See Table 30.)

By gender, males comprised 83.6 percent of all arrestees for motor vehicle theft. (See Table 42.) By race, whites accounted for 57.5 percent of motor vehicle theft arrestees, and blacks made up 39.8 percent. Asian or Pacific Islander, at 1.8 percent, and American Indian or Alaskan Native, at 0.9 percent, accounted for the remainder of arrestees. (See Table 43.)

Arrest Trends

Although the number of arrests were up 2.7 percent over the previous year's figure, motor vehicle theft arrests were down 11.8 percent from the 1997 number and down 30.3 percent from the 1992 number. Nationally, adult arrestees for motor vehicle theft in 2001 increased 5.2 percent from the 2000 total. However, the 2001 total of adult arrestees was 2.9 percent below the 1997 level and 13.1-percent below the 1992 level. Juvenile arrests were down 2.2 percent; they fell significantly over the past decade, with a 25.7-percent decline from the 1997 figure and a 51.3-percent drop from the 1992 figure. (See Tables 32, 34, and 36.)

Definition

Arson is defined by the Uniform Crime Reporting Program as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling, house, public building, motor vehicle or aircraft, personal property of another, etc.

Only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded.

National Coverage

In 2001, 12,242 law enforcement agencies submitted 1–12 months of arson data covering a total of 76,760 arson offenses. Of those agencies, 12,155 contributed supplementary details such as types of structure and estimated value of property damaged. Their reports covered 68,967 arsons. (See Table 2.32.) Reports covering all 12 months in 2001 were submitted to the UCR Program by 8,528 agencies providing law enforcement services to 65.2 percent of the U.S. population.

Collected by the UCR Program since 1979, arson is a unique offense because it is not always investigated by law enforcement. In some communities, arson offenses are investigated by fire marshals within the local fire department. In such cases, the incidents are less likely to be reported to the UCR Program. Because the level of reporting may be lower than for the other Crime Index offenses, arson data should not be regarded as a comprehensive accounting of the national arson problem. Rather, these statistics serve as an indicator of the types of arson incidents occurring in the Nation.

Due to the limited reporting, the UCR Program does not estimate for arson; therefore, arson offenses are not included in tables containing offense estimates. Arson totals reported by individual law enforcement agencies are displayed in Tables 8–11. In these tables, the arson offenses are tallied separately and included in the Modified Crime Index. In addition, arson is not included in the national rate calculations; instead, arson rates are computed separately and presented in Table 2.31. Two-year arson trends are shown in Tables 12–15, and arson clearance data appear in Table 2.32 and Tables 25–28.

Table 2.31

Arson Rate

by Population Group, 2001
[8,528 agencies; 2001 estimated population 185,693,054;
rate per 100,000 inhabitants]

<i>Population group</i>	<i>Rate</i>
Total	35.5
Total cities	38.8

Suburban counties	32.1
Rural counties	19.1
Suburban area ¹	26.7

¹ Includes suburban city and county law enforcement agencies within metropolitan areas. Excludes central cities. Suburban cities and counties are also included in other groups.

Characteristics

Type

Structural arson was the most frequently reported type of arson in 2001, accounting for 42.2 percent of the arson total. Mobile properties (motor vehicles, trailers, etc.) were targeted in 32.5 percent of reported arson offenses, and other types of properties (crops, timber, etc.) comprised the remaining 25.4 percent of offenses. (See Table 2.32.)

Among structural arsons, 60.6 percent were of residential properties of which 42.1 percent were of single-occupancy dwellings. Property that was either uninhabited or abandoned at the time of the arson accounted for 19.3 percent of structure-related arsons. Nationally, structural arsons showed a 2.3-percent decrease from 2000 to 2001. Mobile properties

¹ Because of rounding, the percentages may not add to total.² Includes offenses cleared by arrest or exceptional means.

and other types of fires, however, showed increases of 12.1 percent and 0.1 percent, respectively. (See Table 15.) The bulk of mobile property arsons, 94.5 percent, involved motor vehicles. (See Table 2.32.)

Dollar Loss

In 2001, the average dollar loss for property damaged or destroyed in reported arsons was \$11,098 per incident. Structural losses averaged \$20,128, and mobile property losses averaged \$6,974 per incident. Average losses for properties categorized as “Other” were estimated at \$1,361 per arson. (See Table 2.32.)

Population Groups Trends and Rates

Because population coverage for arson data is lower than for other Crime Index offenses, arson rates per 100,000 inhabitants are tabulated independently. The rates for 2001 presented in Table 2.31 are based on data provided by the 8,528 law enforcement agencies that supplied monthly arson reports for all 12 months of 2001.

For 2001, the rate of arsons was computed at 35.5 offenses per 100,000 population. The Nation’s cities registered a collective arson rate of 38.8 per 100,000 inhabitants. The highest rate overall, 73.2, was recorded by cities with 250,000

to 499,999 inhabitants. The lowest rate was posted by rural counties, 19.1. (See Table 2.31.)

Collectively, the Nation’s cities reported a 1.0-percent increase in the number of reported arsons in 2001; the largest increase, 7.0 percent, was in cities with populations of 50,000 to 99,999. The greatest decline in arson among cities, 7.8 percent, was seen in cities of 500,000 to 999,999 in population. Both rural and suburban counties showed an increase in volume of 3.3 percent and 4.0 percent, respectively. (See Table 12.)

By arson type, rural counties saw the largest increase in structural arson, up 8.1 percent from 2000. Cities 500,000 to 999,999 in population experienced the greatest decrease, down 14.4 percent. Cities of 250,000 to 499,999 recorded the largest increase in mobile arson, up 22.5 percent from 2000; all population groups experienced an increase in this arson category. Other types of arsons increased in cities of 50,000 to 99,999 by 13.6 percent, whereas cities of 500,000 to 999,999 inhabitants recorded a 14.9-percent decline from the prior year’s data. (See Table 15.)

Clearances

In 2001, the Nation’s law enforcement agencies cleared 16.0 percent of reported arson offenses. Cities collectively cleared 15.6 percent

of all arsons; the highest clearance figure, 25.0 percent, was recorded by agencies in cities under 10,000 in population. Rural counties cleared 24.8 percent, and suburban counties cleared 14.9 percent of arsons reported in their jurisdictions. (See Table 25.)

The Northeastern States cleared 19.9 percent of reported arson offenses in that region, and the Southern States recorded clearances of 17.8 percent. The Midwestern States cleared 14.8 percent of arsons reported in that region, and the Western States cleared 13.7 percent. (See Table 26.)

Among population groups, clearances of structural arson offenses ranged from 30.4 percent for cities with populations under 10,000 in population to 16.0 percent for cities with 250,000 to 499,999 inhabitants. Clearances of mobile vehicle arsons ranged from 16.7 percent for both rural counties and cities under 10,000 in population to 3.8 percent for the Nation's cities with 1 million or more in population. Clearances of arsons of other types of property ranged from 26.0 percent in rural counties to 11.1 percent in cities of 1 million or more inhabitants. (See Table 27.)

Table 2.32 shows clearance data only for those 12,155 agencies that furnished breakdowns by type for the structural and mobile classifications. As can be seen, the highest percentage of arson clearances in 2001 involved incidents of structural fires, 22.1 percent. The lowest percentage of arson clearances involved incidents of mobile vehicle fires at 7.1 percent. Juvenile involvement in arson was higher than for any other Index offense. In 2001, juvenile clearances accounted for 45.2 percent of all arsons cleared.

Arrests

Total Arrests

An estimated 18,749 persons were arrested for arson in 2001. (See Table 29.) Based upon the actual number of arrests reported by the 8,528 agencies submitting 12 months of data, the national arrest rate for arson was calculated at 6.6 per 100,000 persons. The West reported an arrest rate of 8.3 per 100,000 individuals, the

highest regional arrest rate for this offense; the South recorded a rate of 6.0; the Northeast, 5.9; and the Midwest, 5.6. (See Table 30.)

By population group, law enforcement in cities collectively arrested arson offenders at a rate of 7.0 per 100,000 inhabitants; in rural counties, the arrest rate was 5.2; and in suburban counties, 6.1. Law enforcement in cities with 250,000 or more people had the highest rate of arrests for arson, reporting a rate of 8.7 per 100,000 inhabitants. (See Table 31.)

Arrest Trends

Nationwide, 2001 arson arrests increased 14.7 percent over the previous year's figure. Arrests of juveniles (persons under the age of 18) increased 8.1 percent, and adult arrests increased 22.8 percent. (See Table 36.)

In comparing data from 1997 to those of 2001, overall arson arrests declined 3.1 percent for the 5-year period. Though juvenile arrests also dropped 9.3 percent, adult arrests for arson rose 4.1 percent. (See Table 34.) By gender, arrests of females and juvenile females showed increases since 1997 of 12.2 percent and 5.2 percent, respectively. Arson arrests of males decreased for juveniles by 11.0 percent and for males of all ages by 5.5 percent. (See Table 35.)

For the 10-year period 1992–2001, arson arrests declined 6.3 percent, with those for juveniles and adults decreasing 7.4 percent and 5.2 percent, respectively. When analyzing arrest trends by age and gender, arrests of juvenile females and females of all ages showed increases—4.0 percent and 14.6 percent, respectively—as opposed to the declines seen in arrests of juvenile males and males of all ages—8.7 percent and 9.4 percent, respectively. (See Tables 32 and 33.)

Distribution

In 2001, nearly half of all persons arrested for arson, 49.5 percent, were juveniles. In particular, those under 15 years of age accounted for 31.7 percent of the arson arrest total. Males comprised 84.1 percent of all arson arrestees. By race, 76.9 percent of arson arrestees were white, 20.7 percent were black, and the remaining 2.4 percent were of other races. (See Tables 41–43.)

Hate Crime

Definition

A hate crime, also known as a bias crime, is a criminal offense committed against a person, property, or society which is motivated, in whole or in part, by the offender's bias against a race, religion, disability, sexual orientation, or ethnicity/national origin.

Background

In response to mounting national concern over crimes motivated by bias, Congress enacted the *Hate Crime Statistics Act of 1990* on April 23 of that year. This law required the Attorney General to collect data "about crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity." The Attorney General delegated the responsibilities of developing the procedures for and implementing, collecting, and managing hate crime data to the Director of the FBI, who in turn assigned the tasks to the Uniform Crime Reporting (UCR) Program. In September 1994, the Violent Crime Control and Law Enforcement Act amended the Hate Crime Statistics Act to include both physical and mental disabilities as potential bias factors, and the actual collection of disability-bias data began in January 1997. Additionally, the Church Arson Prevention Act of 1996 mandated that hate crime data collection become a permanent part of the UCR Program.

The program developers recognized that hate crimes are not separate, distinct crimes; instead they are traditional offenses motivated by the offender's bias. After much consideration, they decided that hate crime data could be derived by capturing the additional element of bias in those offenses already being reported to the UCR Program. Appending the collection of hate crime statistics to the established UCR data collection procedures would fulfill the directives of the Hate Crime Statistics Act, avoid placing an undue additional reporting burden on law enforcement and, in time, develop a substantial body of data about the nature and frequency of bias crimes occurring throughout

the Nation. Accordingly, the program collects details about an offender's bias motivation associated with the following offense types: murder and nonnegligent manslaughter, forcible rape, aggravated assault, simple assault, intimidation, robbery, burglary, larceny-theft, motor vehicle theft, arson, and destruction/damage/vandalism of property. (The national Hate Crime program also collects additional offense types reported by those agencies participating in the National Incident-Based Reporting System and publishes them in tables as "other" or "crimes against society.")

Participation

During 2001, 11,987 law enforcement agencies participated in the Hate Crime program. Of those agencies, approximately 17.6 percent submitted hate crime incident reports to the FBI. These figures indicate a slight increase in the number of agencies submitting data in 2000, when 11,690 agencies participated in the program, and 16.2 percent reported that at least one hate crime had occurred. (See Table 2.36.) During 2001, law enforcement reported 9,726 incidents compared to 8,063¹ incidents reported for the prior year. The following hate crime abstract is based on the data received from those law enforcement agencies that provided 1 to 12 months of hate crime reports during 2001.

Hate Crime Data Collection

The UCR Program data collection guidelines stipulate that a hate crime may have multiple offenses, victims, and offenders within one incident. Thus, in 2001, the 9,726 hate crime incidents reported to the FBI involved 11,447 separate offenses, 12,016 victims, and 9,231 known offenders. Of the total reported single-bias incidents, 44.9 percent were motivated by racial bias, 21.6 percent were driven by prejudice against an ethnicity or national origin, 18.8 percent resulted from a bias against a particular religion, and 14.3 percent involved a sexual-orientation bias. (Based on Table 2.33.)

A *victim*, according to the UCR definition, may be either a person, a business, an institu-

Multiple-Bias Incidents³	9	21	22	13

¹ The term *victim* may refer to a person, business, institution, or society as a whole.

² The term *known offender* does not imply that the identity of the suspect is known, but only that the race of the suspect has been identified, distinguishing him/her from an unknown offender.

³ A *multiple-bias incident* is a hate crime in which more than one offense type was committed as a result of more than one bias motivations.

tion, or society as a whole. When aggregating the number of hate crime offenses committed against *individuals*, the program counts one offense for each person. The offense types of murder, rape, aggravated assault, simple assault, and intimidation are possible crimes against persons. When counting crimes against *property*, the program allots one offense for each distinct incident regardless of the number of victims. Robbery, burglary, larceny, motor vehicle theft, arson, and destruction/damage/vandalism are the offense types that are possible crimes against property.

Law Enforcement Reports

During 2001, 64.6 percent of reported victims were the targets of crimes against persons, and 34.7 percent of victims were the targets of crimes against property. (Crimes against society comprised 0.6 percent of reports.) Intimidation continued to be the most frequently reported hate crime against individuals and accounted for 55.9 percent of all crimes against persons. Destruction/damage/vandalism of property was the most frequently reported crime against property. Of the 4,175 targets of crimes against property, 83.4 percent were vandalized. (Based on Table 2.34.)

Among all hate crime offenses, intimidation was the most frequently reported offense; it

Other ⁴	27	27	28	26
Crimes against society⁴	75	75	75	84

¹ The actual number of incidents is 9,726. However, the column figures will not add to the total because incidents may include more than one offense type, and these are counted in each appropriate offense type category.

² The term *victim* may refer to a person, business, institution, or society as a whole.

³ The term *known offender* does not imply that the identity of the suspect is known, but only that the race of the suspect has been identified, distinguishing him/her from an unknown offender. The actual number of known offenders is 9,231. However, the column figures will not add to the total because some offenders are responsible for more than one offense, and they are, therefore, counted more than once in this table.

⁴ Includes additional offenses collected in NIBRS.

Table 2.35

Race of Known Offenders, 2001¹

Known offender's race

Total	9,231
White	6,049
Black	1,882
American Indian/Alaskan Native	59
Asian/Pacific Islander	84
Multiple Races, Group	403
Unknown Race	754

¹ The term *known offender* does not imply that the identity of the suspect is known, but only that the race of the suspect has been identified, distinguishing him/her from an unknown offender.

Figure 2.19

Bias-motivated Offenses
Percent distribution 2001

accounted for 37.9 percent of the total. Damage/destruction/vandalism of property made up 26.4 percent of total offenses; simple assault, 18.8 percent; and aggravated assault, 10.9 percent. (Based on Table 2.34.)

Approximately forty-six percent (46.2) of all single-bias hate crime victims were targets of racial prejudice. Of these victims, 66.8 percent were attacked because of an anti-black bias motivation, and 19.2 percent were attacked due to an anti-white bias motivation. Religious intolerance accounted for 17.7 percent of all victims of reported single-bias hate crimes; of these, 56.5 percent were targeted because of an anti-Jewish motivation, and 26.2 percent were targets due to a prejudice against the Islamic religion. Sexual-orientation bias led to attacks on 13.9 percent of single-bias victims; among these victims, anti-male homosexual bias made up 69.3 percent of the total. Anti-ethnicity or national origin was the underlying motivation for attacks on 22.0 percent of the total single-bias victims; 30.8 percent were victims of anti-Hispanic bias, and 69.2 percent were classified as victims of anti-other ethnicity/national origin. (Based on Table 2.33.)

In 2001, the majority of known hate crime offenders were white, 65.5 percent; 20.4 percent were black, 8.2 percent were of unknown race, and the remainder were of other races or multiple races. (Based on Table 2.35.)

¹ The total number of hate crime incidents for 2000 was updated after the publication of *Crime in the United States 2000*.

Crime Index Tabulations

The tabular portions of this section organize crime data into various categories based upon population. Data are presented for the Nation as a whole; geographic divisions; individual states; Metropolitan Statistical Areas (MSAs); and cities, towns, and counties. Within these classifications, the statistics on crime volumes are also computed as rates of occurrence per 100,000 U.S. inhabitants.

Although the exact number of crimes occurring within the United States is unknown, criminal activity can be gauged by studying those crimes reported to law enforcement. The reader is cautioned, however, that many factors affect crime volumes and crime types and can cause them to vary from time to time and from place to place. Population, for example, is used in computing crime rates. Since current, permanent population counts are used in their construction, crime rates do not account for transient or seasonal populations. Short-term population variables, such as an influx of day workers, tourists, shoppers, etc. impact all communities to some degree. Other factors contributing to the amount of crime in a given area are discussed in Section I, Crime Factors.

One tool law enforcement administrators can use in analyzing the volume of local crime and the performance of the law enforcement agencies is national data. An analysis, however, should not be based solely on data presented in this publication. A true assessment of a community's crime problem or the effectiveness of law enforcement operations can be made only by including in that assessment all the variables that mold local crime conditions.

Table 1 sets forth national estimates of volume and rate per 100,000 population for all Crime Index offenses covering the past two decades. Table 2 shows estimates of crime volume and rates for 2001 for the Nation as a whole, MSAs, rural counties, and cities and towns outside metropolitan areas. Definitions of these community types can be found in Appendix III.

Data showing the regional distribution of estimated Index crimes along with proportional population estimates are provided in Table 3. A map of the United States illustrating the regions and divisions employed by the UCR Program appears in Appendix III.

Table 4 offers a 2-year trend in the volume and rate estimates by region, geographic division, and state. The incidence and rate of Crime Index offenses for each state and for individual MSAs are shown in Tables 5 and 6. Table 7 offers breakdowns for the offenses of robbery (by location), burglary (by time of day), and larceny-theft (by type) over the past 5 years.

Offenses known to police for cities over 10,000 in population are presented in Table 8, and Table 9 records Index Crimes occurring on college and university campuses, although no population is assigned to educational institutions.

Offenses reported by suburban and rural counties are broken down by state in Tables 10 and 11. Tables 12–19 offer crime trends and rates by population groupings. A description of the population groups defined by the UCR Program can be found in Appendix III.

Data concerning weapons used in the violent crimes of murder, robbery, and aggravated assault are presented in Tables 20–22. Tables 23 and 24 analyze the value of property lost through the crimes of robbery, burglary, and larceny-theft, and offer breakdowns by type and value of property stolen and recovered.

Note

Because the UCR Program does not estimate for arson, arson offenses are not included in the tables containing offense estimates. Arson totals reported by individual law enforcement agencies are displayed in Tables 8–11. Two-year arson trends are shown in Tables 12–15. An in-depth discussion of table construction methodology can be found in Appendix I.

¹ The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in this table. See special report, Section V.

² Populations are Bureau of the Census provisional estimates as of July 1 for each year except 1990 and 2000 which are decennial census counts.

³ Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

⁴ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

⁵ The 2000 crime figures have been adjusted. See Crime Trends, Appendix I, for details.

¹ The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in this table. See special report, Section V.

² Populations are Bureau of the Census 2001 provisional estimates as of July 1, 2001.

³ Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

⁴ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

⁵ The percentage reported under "Area actually reporting" is based upon the population covered by agencies providing 3 months or more of crime reports to the FBI.

Table 3

	Percent change			-7.0	-7.7			-8.1	-8.8	-6.8	-7.5	+7.4

¹ The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in this table. See special report, Section V.

² Populations are Bureau of the Census 2001 provisional estimates as of July 1, 2001, and 2000 decennial counts.

³ Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

⁴ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

⁵ The 2000 crime figures have been adjusted. See Crime Trends, Appendix I, for details.

⁶ Limited data for 2001 were available for the states of Illinois and Kentucky; therefore, it was necessary that their crime counts be estimated. See Offense Estimation, Appendix I, for details.

⁷ Includes offenses reported by the Zoological Police.

⁸ Less than one-tenth of 1 percent.

Offense totals are based on all reporting agencies and estimates for unreported areas.

¹ The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in this table. See special report, Section V.

² Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

³ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

⁴ Includes offenses reported by the Zoological Police.

⁵ Limited data for 2001 were available for Illinois and Kentucky; therefore, it was necessary that their crime counts be estimated. See Offense Estimation, Appendix I, for details. Offense totals are based on all reporting agencies and estimates for unreported areas.

¹ The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in this table. See special report, Section V.

² Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

³ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault. Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

⁴ Due to changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

⁵ Aggravated assault figures were found to be outside statistical parameters.

⁶ The population for the city of Mobile, Alabama, includes 55,864 inhabitants from the jurisdiction of the Mobile County Sheriff's Department.

⁷ The data for anthrax assaults were not available.

Table 7

Offense Analysis¹

¹ The Modified Crime Index total is the sum of the Crime Index offenses including arson. Arson is shown only if 12 months of arson data were received. If 12 months of arson data were not received, there is no Modified Crime Index total shown.

² Complete arson figures for 2001 for Alabama, Massachusetts, and Montana were not available.

³ The population for the city of Mobile, Alabama, includes 55,864 inhabitants from the jurisdiction of the Mobile County Sheriff's Department.

⁴ Due to changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

⁵ The data for anthrax assaults were not available.

⁶ Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines; therefore, the figures were excluded from the forcible rape, Crime Index total, and Modified Crime Index total categories.

⁷ Limited data for 2001 were available for Illinois and Kentucky.

⁸ Aggravated assault figures were found to be outside established statistical parameters.

⁹ The murder and nonnegligent homicide figure includes the 2,823 homicides reported as a result of the events of September 11, 2001. See special report, Section V.

¹ The student enrollment figures provided by the United States Department of Education are for the 1999 school year, the most recent available. The enrollment figures include full-time and part-time students. See Appendix I for details.

² Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

³ Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft. Arson is not included in the property crime total. Arson is shown only if 12 months of arson data were received.

⁴ Complete arson figures for 2001 for Alabama and Massachusetts were not available.

⁵ Student enrollment figures were not available.

⁶ Limited data for 2001 were available for Illinois and Kentucky.

NOTE: Caution should be exercised in making any inter-campus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

¹ The Modified Crime Index total is the sum of the Crime Index offenses including arson. Arson is shown only if 12 months of arson data were received. If 12 months of arson data were not received, there is no Modified Crime Index total shown.

² Complete arson figures for 2001 for Alabama, Massachusetts, and Montana were not available.

³ Due to changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

⁴ Limited data for 2001 were available for Illinois and Kentucky.

⁵ The murder and nonnegligent homicide figure is the number of homicides reported as a result of the events of September 11, 2001. See special report, Section V.

<i>County by state</i>	<i>Crime Index total</i>	<i>Modified Crime Index total¹</i>	<i>Murder and non-negligent man-slaughter</i>	<i>Forcible rape</i>	<i>Robbery</i>	<i>Aggravated assault</i>	<i>Burglary</i>	<i>Larceny-theft</i>	<i>Motor vehicle theft</i>	<i>Arson¹</i>
OTHER AGENCIES										
American Samoa	506	510	1	27	3	152	215	98	10	4
National Institutes of Health	360	360	0	0	1	5	2	351	1	0
United States Department of the Interior:										
Bureau of Indian Affairs	25,849	26,354	87	524	177	9,065	4,858	8,340	2,798	505
Bureau of Land Management	770	838	7	0	3	16	20	675	49	68
Bureau of Reclamation	13	13	0	0	1	0	0	4	8	0
Fish and Wildlife Service	369	477	4	1	0	22	105	164	73	108
National Park Service	4,220	4,324	6	37	70	212	488	3,277	130	104

¹ The Modified Crime Index total is the sum of the Crime Index offenses including arson. Arson is shown only if 12 months of arson data were received. If 12 months of arson data were not received, there is no Modified Crime Index total shown.

² Complete arson figures for 2001 for Alabama and Montana were not available.

³ Due to changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

⁴ Limited data for 2001 were available for Illinois and Kentucky.

⁵ Figures reported are the number of crimes occurring in New Jersey.

⁶ Figures reported are the number of crimes occurring in New York.

¹ The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any trend tables (Tables 12-15). See special report, Section V.

² The Modified Crime Index total is the sum of the Crime Index offenses including arson.

³ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

⁴ Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

⁵ Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Programs administered by the Delaware State Bureau of Investigation for 2000 and the Illinois State Police for 2000 and 2001 were not in accordance with national UCR guidelines; therefore, the figures were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

⁶ Includes state police agencies with no county breakdowns.

⁷ Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

¹ The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any trend tables (Tables 12-15). See special report, Section V.

² Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

³ The Modified Crime Index total is the sum of the Crime Index offenses including arson.

⁴ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

⁵ Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

⁶ Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Programs administered by the Delaware State Bureau of Investigation for 2000 and the Illinois State Police for 2000 and 2001 were not in accordance with national UCR guidelines; therefore, the figures were excluded from the forcible rape, violent crime, Crime Index total, and Modified Crime Index total categories.

Table 15

Crime Trends¹

Breakdown of Offenses Known
by Population Group, 2000-2001—Continued
[2001 estimated population]

Population Group	Forcible rape ²		Robbery				Aggravated assault				Burglary			Motor vehicle theft			Arson		
	Rape by force	Assault to rape-attempts	Firearm	Knife or cutting instrument	Other weapon	Strong-arm	Firearm	Knife or cutting instrument	Other weapon	Hands, fists, feet, etc.	Forcible entry	Unlawful entry	Attempted forcible entry	Autos	Trucks and buses	Other vehicles	Structure	Mobile	Other
SUBURBAN AREA ³																			
5,532 agencies; population 94,554,571																			
2000	20,818	1,948	24,466	5,026	6,293	25,887	29,371	33,854	75,476	73,572	329,325	176,672	38,059	178,843	42,816	24,746	8,411	6,086	6,819
2001	20,892	2,119	26,797	5,616	6,963	26,257	29,420	33,929	76,185	70,622	336,016	188,396	38,247	190,664	45,167	27,990	8,411	6,797	6,801
Percent change	+0.4	+8.8	+9.5	+11.7	+10.6	+1.4	+0.2	+0.2	+0.9	-4.0	+2.0	+6.6	+0.5	+6.6	+5.5	+13.1	0.0	+11.7	-0.3

¹ The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any trend tables (Tables 12-15). See special report, Section V.

² Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Programs administered by the Delaware State Bureau of Investigation for 2000 and the Illinois State Police for 2000 and 2001 were not in accordance with national UCR guidelines; therefore, the figures were excluded from the forcible rape category.

³ Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all Metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

SUBURBAN AREA⁷												
5,407 agencies; population 91,616,306												
Number of offenses known	3,034,940		296,965	2,737,975	2,823	23,165	65,577	205,400	562,568	1,912,711		262,696
Rate	3,312.7		324.1	2,988.5	3.1	25.3	71.6	224.2	614.0	2,087.7		286.7

¹ The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any rate tables (Tables 16-19). See special report, Section V.

² Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson data appear in the arson narrative.

³ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

⁴ Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

⁵ Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines; therefore, the figures were estimated for inclusion in the forcible rape, violent crime, and Crime Index total categories. See Appendix I for details.

⁶ Includes state police agencies with no county breakdowns.

⁷ Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

¹ The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any of the rate tables (Tables 16-19). See special report, Section V.

² Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

³ Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear in the arson narrative.

⁴ Violent crimes are offenses of murder, forcible rape, robbery, and aggravated assault.

⁵ Property crimes are offenses of burglary, larceny-theft, and motor vehicle theft.

⁶ Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines; therefore, the figures were estimated for inclusion in the forcible rape, violent crime, and Crime Index total categories. See Appendix I for details.

¹ The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in any rate tables (Tables 16-19). See special report, Section V.

² Arson rates are not presented in this table because fewer agencies furnished complete reports for arson than for the other seven Crime Index offenses. Independently tabulated arson rates appear in the arson narrative.

³ Suburban area includes city law enforcement agencies with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a central city. The agencies associated with suburban areas will also appear in other groups within this table.

¹ The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in this table. See special report, Section V.

² Total number of murders for which supplemental homicide data were received.

³ No supplemental homicide data were received from the District of Columbia.

⁴ Supplemental homicide data from Florida were not processed due to limited submission of circumstance data.

⁵ Limited supplemental homicide data for 2001 were received from Illinois and Kentucky.

¹ The number of aggravated assaults for which breakdowns by type of weapon were received for 12 months of 2001.

² Limited or no aggravated assault by type of weapon data for 2001 were received from the District of Columbia, Illinois, and Kentucky.

Table 23

Offense Analysis¹

Number and Percent Change, 2000-2001

[11,699 agencies; 2001 estimated population 231,212,569]

<i>Classification</i>	<i>Number of Offenses 2001</i>	<i>Percent change over 2000</i>	<i>Percent distribution²</i>	<i>Average value</i>
Murder	12,432	+3.2	–	
Forcible rape	72,881	+0.3	–	
Robbery:				
Total	326,277	+5.8	100.0	\$1,258
Street/highway	144,491	+1.9	44.3	957
Commercial house	47,107	+10.1	14.4	1,881
Gas or service station	9,309	+7.7	2.9	686
Convenience store	21,402	+9.5	6.6	618
Residence	41,034	+8.2	12.6	1,364
Bank	7,905	+19.4	2.4	4,587
Miscellaneous	55,029	+7.9	16.9	1,303
Burglary:				
Total	1,722,971	+3.8	100.0	1,545
Residence (dwelling):	1,123,779	+3.5	65.2	1,381
Night	333,820	+2.7	19.4	1,163
Day	522,838	+4.6	30.3	1,570
Unknown	267,121	+2.3	15.5	1,647
Nonresidence (store, office, etc.):	599,192	+4.4	34.8	1,615
Night	252,842	+5.0	14.7	1,468
Day	182,786	+4.7	10.6	1,671
Unknown	163,564	+3.1	9.5	2,061
Larceny-theft (except motor vehicle theft):				
Total	5,710,073	+2.3	100.0	730
By type:				
Pocket-picking	26,847	-6.4	0.5	305
Purse-snatching	31,037	+3.4	0.5	331
Shoplifting	788,046	+2.7	13.8	182
From motor vehicles (except accessories)	1,475,718	+5.2	25.8	719
Motor vehicle accessories	582,434	+8.0	10.2	451
Bicycles	234,451	-5.4	4.1	318
From buildings	759,729	+1.2	13.3	1,037
From coin-operated machines	41,897	+12.6	0.7	286
All others	1,769,914	-0.6	31.0	1,024
By value:				
Over \$200	2,248,060	+3.8	39.4	1,770
\$50 to \$200	1,312,790	+0.5	23.0	115
Under \$50	2,149,223	+1.8	37.6	18
Motor vehicle theft	1,009,862	+7.4	–	6,646

¹ The murders and nonnegligent homicides that occurred as a result of the events of September 11, 2001, were not included in this table. See special report, Section V.² Because of rounding, the percentages may not add to total.

Table 24

Property Stolen and Recovered

by Type and Value, 2001

[11,183 agencies; 2001 estimated population 222,729,343]

<i>Type of property</i>	<i>Value of property</i>		<i>Percent recovered</i>
	<i>Stolen</i>	<i>Recovered</i>	
Total	\$14,142,588,549	\$4,576,749,999	32.4
Currency, notes, etc.	936,485,688	47,227,902	5.0
Jewelry and precious metals	994,282,459	48,881,005	4.9
Clothing and furs	227,433,861	33,896,606	14.9
