 - expired air
 - life support systems
 - spacecraft cabin atmospheres

receivers

DEF Initial components or sensing elements of measuring systems. For example, the receiver of a thermoelectric thermometer is the measuring thermocouple. Instruments used to detect the presence and to determine the information carried by electromagnetic radiation. Receivers include circuits designed to detect, amplify, rectify, and shape the incoming radio frequency signals received at the antenna in such a manner that the information containing component of the received energy can be delivered to the desired indicating or recording equipment. Used for receiving systems.

UF *receiving systems*

GS **receivers**

- . linear receivers
- . logarithmic receivers
- . radar receivers
- . radio receivers

reflection nebulae

zero sound

reflection coefficient
USE **reflectance**

reflection nebulae

DEF Any celestial body having a hazy cloudy appearance whose brightness results from the scattering by dust particles of light from nearby stars.

GS celestial bodies
. nebulae
. . . **reflection nebulae**

RT cosmic dust
interstellar matter
light scattering

reflectivity
USE **reflectance**

reflectometers

DEF Instruments for measuring reflectance.

GS measuring instruments
. optical measuring instruments
. . . **reflectometers**
. . . . microwave reflectometers
optical equipment
. optical measuring instruments
. . . **reflectometers**
. . . . microwave reflectometers

RT comparators
directors (antenna elements)
optical measurement
photometers
reactor cores
reflectance
reflector antennas
Schelkunoff principle
two reflector antennas
ultraviolet reflection

reflector antennas

DEF Antennas consisting of one or more reflecting surfaces and a radiating (receiving) feed system.

GS antennas
. directional antennas
. . . **reflector antennas**
. . . . parabolic antennas
. . . . two reflector antennas

RT antenna feeds
antenna radiation patterns
Cassegrain antennas
microwave antennas
multibeam antennas
parabolic reflectors
radar antennas
radar corner reflectors

reflexes

GS **reflexes**
. conditioned reflexes
. respiratory reflexes
. . . cough
. . . Hering-Breuer reflex
. . . sneezing
. baroreflexes
. vestibular nystagmus
. . . carotid sinus reflex

RT deconditioning
reaction time
vasoconstriction
vasodilation

reforestation

DEF The reestablishment of a tree crop on forest land.

GS management
. resources management
. . . forest management
. . . . **reforestation**

RT forests
timber inventory

refracted radiation
USE **refracted waves**

refracted rays
USE **refracted waves**

refracted waves

DEF Waves that have had their direction of motion changed by refraction. Used for refracted radiation and refracted rays.

UF *refracted radiation*
refracted rays

RT corpuscular radiation
eikonal equation
elastic waves
electromagnetic radiation
incident radiation
photon beams
reflected waves
refraction
 ∞ waves

refracting telescopes

DEF Telescopes which collect light by means of a lens or system of lenses.

GS telescopes
. **refracting telescopes**

RT lenses
optical equipment
optical measuring instruments
spectroscopic telescopes
stratoscope telescopes

refraction

DEF The process in which the direction of energy propagation is changed as the result of a change within the propagating medium, or as the energy passes through the interface representing a density discontinuity between the two media. In the first instance, the rays undergo a smooth bending over a finite distance. In the second case, the index of refraction changes through an interfacial layer that is thin compared to the wavelength of the radiation; thus, the refraction is abrupt, essentially discontinuous.

GS **refraction**

. atmospheric refraction
. . . radio wave refraction
. birefringence
. . . Kerr electrooptical effect

RT asphericity
astigmatism
 ∞ conduction
deflection
diffraction
distortion

resolution

DEF The ability of a film, a lens, a combination of both, or a vidicon system to render barely distinguishable a standard pattern of black and white lines. In radar, the minimum angular separation at the antenna at which two targets can be distinguished (a function of beamwidth); or the minimum range at which two targets at the same azimuth can be separated (equal to one half the pulse height). Of a gyro, a measure of response to small changes in input; the maximum value of the minimum input change that will cause a detectable change in the output for inputs greater than the threshold, expressed as a percent of one half the input range. Used for resolving power.

USE **resolution**

resonance

DEF The phenomena of amplification of a free wave or oscillation of a system by a forced wave or oscillation of exactly equal period. The forced wave may arise from an impressed force upon the system or from a boundary condition. The growth of the resonant amplitude is characteristically linear in time. Of a system in forced oscillation, the condition which exists when any change, however small, in the frequency of excitation causes a decrease in the response of the system.

- retrofiring**
GS firing (igniting)
. rocket firing
. . **retrofiring**
RT deceleration
retrorocket engines
retrothrust
- retrofitting**
DEF Modification of equipment to incorporate changes made in later production of similar equipment; the changes may be performed in the factory or in the field.
GS **retrofitting**
. acoustic retrofitting
RT installing
- retrograde orbits**
(added June 1995)
DEF Motion in an orbit opposite to the usual orbital direction of celestial bodies within a given system. Specifically, of a satellite, motion in a direction opposite to the direction of rotation of the primary.
GS orbits
. **retrograde orbits**
RT interacting galaxies
- orbital mechanics
planetary orbits
precession
satellite orbits
spacecraft orbits
stellar orbits
three body problem
- retroreflection**
DEF Reflection wherein the reflected rays return along paths parallel to those of their corresponding incident rays. Also called retroreflection.
GS reflection
. **retroreflection**
RT antenna arrays
incident radiation
LAGEOS (satellite)
laser ranging
lunar retroreflectors
reflected waves
retroreflectors
satellite laser ranging
- retroreflectors**
DEF Class of optical instruments which cause reflected radiation to return along paths parallel to those of their corresponding incident rays.
GS radar equipment
. **retroreflectors**
reflectors
. **retroreflectors**
RT laser ranging
radar corner reflectors
retroreflection
satellite laser ranging
- retrorocket engines**
DEF Rocket engines fitted on or in spacecraft, satellites, or the like to produce thrust opposed to forward motion.
GS engines
. rocket engines
. . **retrorocket engines**
. . . BE-3 engine
RT control rockets
internal combustion engines
liquid propellant rocket engines
man operated propulsion systems
restartable rocket engines
retrofiring
retrothrust
solid propellant rocket engines
- retrothrust**
DEF Thrust used for a braking maneuver; reverse thrust. Used for retroaction.
UF *retroaction*
GS thrust
. rocket thrust
. . **retrothrust**
RT deceleration
retrofiring
retrorocket engines
- return beam vidicons**
GS electron tubes
. camera tubes
. . vidicons
. . . **return beam vidicons**

 costs
 international trade

reverberation
 DEF The persistence of sound in an enclosed space, as a result of multiple reflections, after the sound source has stopped. The sound that persists in an enclosed space, as a result of repeated reflection or scattering after the source of the sound has stopped.
 GS acoustic properties
 . acoustic scattering
 . . **reverberation**
 scattering
 . wave scattering
 . . acoustic scattering
 . . . **reverberation**
 RT echoes
 noise (sound)
 reverberation chambers
 sound waves

reverberation chambers
 DEF Chambers designed to eliminate outside noise for accurate acoustic measurement.
 GS compartments
 . test chambers
 . . **reverberation chambers**
 test facilities
 . **reverberation chambers**
 RT acoustic measurement
 acoustic simulation
 ∞ chambers
 environmental tests
 reverberation

reverse engineering
(added May 1992)
 RT computer programming
 design analysis
 reversing
 software development tools
 software engineering
 systems engineering

reverse field pinch
 DEF A method of plasma confinement under investigation as part of the mirror and pinch programs.
 GS pinch effect
 . **reverse field pinch**
 RT magnetohydrodynamic flow
 plasma control
 reactor technology
 screw pinch
 toroidal plasmas

reverse osmosis
 DEF The application of pressure to stop or reverse the transport of solvent through a semipermeable membrane separating two solutions of different solute concentration. The applied pressure required to prevent the flow of solvent across a perfectly semipermeable membrane is called the osmotic pressure and is a characteristic of the solution.
 GS osmosis
 . **reverse osmosis**
 RT demineralizing
 desalinating
 membranes
 permeating

reverse time
 USE **reaction time**

reversed flow
 GS fluid flow

rocket-based combined-cycle engines

(added August 1999)

DEF Launch vehicle engines that integrate a high specific impulse, low thrust-to-weight, airbreathing engine with a low-impulse, high thrust-to-weight rocket. The engines are often defined by four modes of operation in a single-stage-to-orbit configuration. In the first mode, the engine functions as a rocket-driven ejector. When the rocket engine is switched off, subsonic combustion (mode 2) is present in the ramjet mode. As the vehicle continues to accelerate, supersonic combustion (mode 3) occurs in the ramjet mode. Finally, as the edge of the atmosphere is approached and the engine inlet is closed off, the rocket is reignited and the final ascent to orbit is undertaken in an all-rocket mode (mode 4).

scanning devices

USE **scanners**

scanning electron microscopy

(added September 1992)

DEF A type of electron microscopy in which

a beam of electrons, a few hundred angstroms in diameter, systematically sweeps over the specimen. The intensity of secondary electrons generated at the point of impact of the beam on the specimen is measured and the resulting signal is fed into a cathode-ray-tube display which is scanned in synchronism with the scanning of the specimen.

SCF

- USE **self consistent fields**

Schach effect

DEF When a slowly or nonrotating satellite is heated on its sunward side, the photons of thermal radiation carry away more momentum from the hot sunward side than the cold shadowed side, thereby giving the satellite a certain net acceleration in the direction away from the sun. This effect was discovered by Milton Schach in the course of an investigation of unknown perturbations in the LAGEOS satellite.

 . **signal reflection**
 reflection
 . **signal reflection**
 RT cepstral analysis
 spread reflection
 transmission
 wave reflection

signal stabilization

GS stabilization
 . **signal stabilization**
 RT frequency control
 transmission circuits

signal to noise ratios

DEF Ratios which measure the comprehensibility of a data source or transmission link, usually expressed as the root mean square signal amplitude divided by the root mean square noise amplitude.

GS ratios
 . **signal to noise ratios**
 RT amplitude distribution analysis
 attenuation
 background noise
 bit error rate
 carrier to noise ratios
 channel noise
 communication theory
 companding
 correlation detection
 dark current
 dynamic range
 electromagnetic interference
 electromagnetic noise
 false alarms
 image contrast
 image enhancement
 interference immunity
 low noise
 matched filters
 maximum entropy method
 ∞ noise
 noise propagation
 noise spectra
 noise threshold
 random noise
 random signals
 signal measurement
 ∞ signals
 white noise

signal transmission

GS transmission
 . **signal transmission**
 . . data transmission
 . . . automatic picture transmission
 . . . multiple access
 Aloha system
 carrier sense multiple access
 code division multiple access

signals

- demand assignment multiple access
- frequency division multiple access
- time division multiple access

soft gamma repeaters

(added January 2000)

DEF A class of x-ray source which emits repeating bright bursts of "soft" or low-energy gamma rays, along with steady x-ray pulsations. By the end of 1999 only a handful of these sources had been identified in our galaxy and in the Large Magellanic Cloud. They are associated with supernova remnants and are thus apparently some kind of young neutron star. One theory holds that these stars are young magnetars (magnetically-powered neutron stars). Bright bursts occur when the evolving, ultra-strong magnetic field stresses the neutron star's solid crust to breaking, in a sudden star-quake. X-ray pulsations are due to the rotation of the star, with it's hot surface bright in x-rays.

space vehicles

- USE **spacecraft**

space weapons

- GS weapons
- . **space weapons**
- RT air to air missiles
- antimissile missiles
- Chaparral missile
- laser weapons
- Minuteman ICBM
- nuclear weapons
- surface to air missiles
- weapon systems
- weapons delivery

space weather

(added June 1999)

- SN (FOR METEOROLOGICAL CONDITIONS RELATED TO THE MIDDLE AND LOWER ATMOSPHERES OF NON-EARTH PLANETS USE "PLANETARY METEOROLOGY".)
- DEF The dynamic, highly variable conditions of the geospace environment that encompasses the sun, the interplanetary medium, and the Earth magnetosphere-ionosphere-thermosphere system. Major contributing factors include variations in the solar wind, solar flares, and solar mass ejections. Effects of space weather phenomena include performance degradation of communication, navigation, and power systems on both spacecraft and ground-based systems; and potential health hazards during extravehicular activity.
- RT Advanced Composition Explorer
- aerospace environments
- aerospace safety
- Earth ionosphere
- Earth magnetosphere
- Earth orbital environments
- geomagnetism
- ionospheric disturbances
- magnetic disturbances
- magnetic storms
- Polar/GGS spacecraft
- radiation hazards
- solar activity effects
- solar terrestrial interactions

- space plasmas
- weather

space weathering

(added July 2001)

- DEF All processes that act on material exposed to the space environment including micrometeorite impacts and interactions with solar wind, cosmic rays, and ambient plasma. Includes processes associated with exposure at the surface of airless planets or small bodies.
- GS exposure
- . weathering
- . . **space weathering**
- RT aerospace environments
- damage
- erosion
- extraterrestrial environments
- Long Duration Exposure Facility
- lunar soil
- micrometeorites

spaceborne astronomy

- GS astronomy
- . **spaceborne astronomy**
- RT Alpha Magnetic Spectrometer
- Astro missions (STS)
- astronomical interferometry
- astronomical satellites
- Cosmic Background Explorer satellite
- faint object camera
- Gamma Ray Observatory
- Granat satellite
- Hipparcos satellite
- Hubble Space Telescope
- Infrared Space Observatory (ISO)

 - formation flying
 - ground based control

spacecraft defense

manual control
Marquardt R4D engine
missile control
orbit determination
pointing control systems
radio control
remote control
rocket engine control
shape control
stationkeeping
thrust vector control
visual control

spacecraft defense

DEF The protection of spacecraft from undesirable external forces. Used for satellite defense.

UF *satellite defense*
RT spacecraft survivability
stealth technology
vulnerability

spacecraft design

DEF The act of conceiving and planning the structure, systems, and performance characteristics of any type of spacecraft including space probes, satellites, space platforms and space stations.

GS **spacecraft design**
. IPAD
. satellite design
RT Advanced Launch System (STS)
aeroshells
computer aided design
∞ design
engine design
Hermes manned spaceplane
Indian space program
Japanese space program
lofting
product development
satellite temperature
Shuttle Derived Vehicles
space debris
spacecraft temperature
structural design
systems engineering
transatmospheric vehicles
weight reduction

spacecraft docking

DEF The act of coupling two or more orbiting objects; the operation of mechanically connecting together, or in some manner bring together orbital payloads. Used for docking.

UF *docking*
GS maneuvers
. spacecraft maneuvers
. **spacecraft docking**
RT ∞ astronautics
interception
Mir space station
mooring
multiple docking adapters
orbital rendezvous
rendezvous trajectories
Salyut space station
space rendezvous
space stations
transfer orbits
Unity connecting module

spacecraft docking modules

GS modules
. **spacecraft docking modules**
spacecraft components
. **spacecraft docking modules**
RT airlock modules
command modules
command service modules
landing modules
service modules
space station modules

spacecraft electronic equipment

GS electronic equipment

. **spacecraft electronic equipment**
onboard equipment
. spacecraft equipment
. . **spacecraft electronic equipment**
RT airborne/spaceborne computers
astrionics
single event upsets

spacecraft environments

(added August 1989)

SN (LIMITED TO SPACECRAFT INTERNAL COMPARTMENTS AND CABINS; FOR SPACECRAFT EXTERNAL ENVIRONMENTS REFER TO 'EXTRATERRESTRIAL ENVIRONMENTS')
GS environments
. **spacecraft environments**
RT aerospace medicine
Automatic Universal Orbiting Stations
bioastronautics
closed ecological systems
controlled atmospheres
environmental control
exobiology
extraterrestrial environments
intravehicular activity
life support systems
rotating environments
satellite temperature
space simulators
thermal environments
weightlessness

spacecraft equipment

GS onboard equipment
. **spacecraft equipment**
. . spacecraft electronic equipment
RT ∞ equipment
OSTA-3 payload
spacecraft instruments

spacecraft glow

UF *shuttle glow*
GS decay
. **spacecraft glow**
emission
. light emission
. . luminescence
. . . **spacecraft glow**
RT Earth orbital environments
spacecraft charging
surface reactions

spacecraft guidance

GS guidance (motion)
. **spacecraft guidance**
. . satellite guidance
RT automatic control
autonomous navigation
CCD star tracker
celestial navigation
command guidance
formation flying
ground based control
inertial guidance
injection guidance
interplanetary flight
interplanetary trajectories
laser gyroscopes
manual control
midcourse guidance
orbits
reentry guidance
rendezvous guidance
space flight
space navigation
star trackers
terminal guidance

spacecraft instruments

DEF Electronic, optical, gyroscopic, and other instruments that play a role in the control of the spacecraft, or that function to measure, record, display, or process different values or quantities encountered in the flight of a spacecraft.

UF *spacecraft sensors*
GS **spacecraft instruments**
. satellite instruments
. . multispectral linear arrays
. spacecraft position indicators
RT astrionics
Atmospheric Cloud Physics Lab (Spacelab)
autonomous spacecraft clocks
bubble technique
flight instruments
flight test instruments
guidance sensors
I2S cameras
instrument packages
∞ instruments
laser altimeters
measuring instruments
onboard equipment
spacecraft equipment

spacecraft landing

GS landing
. **spacecraft landing**
. . horizontal spacecraft landing
. . lunar landing
. . planetary landing
. . . Mars landing
RT aircraft landing
approach and landing tests (STS)
crash landing
emergency landing
glide landings
hard landing
landing simulation
soft landing
soft landing spacecraft
terminal area energy management
touchdown
vertical landing
water landing

spacecraft launching

UF *satellite launching*
GS launching
. **spacecraft launching**
. . liftoff (launching)
RT countdown
heavy lift launch vehicles
HOTOL launch vehicle
launch costs
launch dates
launch vehicles
launch windows
launching pads
missiles
orbit insertion
orbital launching
orbital shots
postlaunch reports
prelaunch summaries
railgun accelerators
reusable launch vehicles
rocket launching

- wind tunnel stability tests

spacecraft sterilization

- GS cleaning
 - . sterilization
 - . . **spacecraft sterilization**
- decontamination
- . **spacecraft sterilization**
- RT chemical sterilization
- ethylene oxide
- exobiology
- planetary protection
- planetary quarantine
- purification
- sterilization effects

spacecraft structures

- RT aeroshells
- aircraft structures
- folding structures
- fuel tanks
- large space structures
- meteoroid protection
- orbital assembly
- rocket engines
- satellite design
- smart structures
- space erectable structures
- space station structures
- structural design
- ∞ structures

spacecraft survivability

- DEF The ability of a spacecraft to survive adverse conditions including reentry problems.
- RT aircraft survivability
- spacecraft breakup
- spacecraft defense
- survival
- uncontrolled reentry (spacecraft)
- vulnerability

spacecraft television

- GS communication equipment
 - . **spacecraft television**
 - . . digital spacecraft television
 - . . Ranger block 3 television system
 - . . satellite television
- telecommunication
- . **spacecraft television**
- . . digital spacecraft television

- . . Ranger block 3 television system
- . . satellite television
- television systems

- . . digital spacecraft television
- . . Ranger block 3 television system
- . . satellite television
- RT color television
- satellite transmission
- stereotelevision
- television transmission

spacecraft temperature

- GS **spacecraft temperature**
 - . satellite temperature
- RT heat pipes
- spacecraft design
- temperature control

spacecraft tracking

- DEF The process of following the movements of a spacecraft or space platform by radar, optical, or other means.
- GS tracking (position)
 - . **spacecraft tracking**
 - . . satellite tracking
 - . . . satellite-to-satellite tracking
- RT Advanced Range Instrumentation Ship
- Deep Space Network
- minitrack system
- missile tracking
- optical tracking
- polystation doppler tracking system
- radar tracking
- radio tracking
- space detection and tracking system
- space surveillance (ground based)
- space surveillance (spaceborne)
- tracking networks
- tracking stations
- transponder control group
- unified S band

Spacecraft Tracking and Data Network

- USE **STDN (network)**

spacecraft trajectories

- GS trajectories
 - . **spacecraft trajectories**
 - . . interplanetary trajectories
 - . . . Earth-Mars trajectories
 - . . . Earth-Mercury trajectories
 - . . . Earth-Venus trajectories
 - . . lunar trajectories
 - . . . circumlunar trajectories
 - . . . Earth-Moon trajectories
 - . . . moon-Earth trajectories
- RT ascent trajectories
- descent trajectories
- Earth orbital rendezvous
- flight mechanics
- Goddard Trajectory Determination System
- hyperbolic trajectories
- interorbital trajectories
- lunar orbital rendezvous
- ∞ motion
- orbital rendezvous
- radio occultation
- reentry trajectories
- rendezvous trajectories
- round trip trajectories
- swingby technique

spacecrew transfer

- UF *intervehicle spacecrew transfer*
- RT Apollo Soyuz test project
- command modules
- manned space flight
- rendezvous spacecraft
- space logistics

spacecrews

- GS personnel
 - . crews

- . . flight crews
- . . . **spacecrews**
- . flying personnel
- . flight crews
- . . . **spacecrews**
- RT astronauts
- cosmonauts
- crew experiment stations
- crew observation stations
- crew procedures (inflight)
- crew procedures (preflight)
- crew workstations
- space habitats
- toilets

Spacelab

- GS laboratories
 - . space laboratories
 - . . manned orbital laboratories
 - . . . **Spacelab**
- manned spacecraft
- . manned orbital laboratories
- . . **Spacelab**
- payloads
 - . Space Shuttle payloads
 - . . **Spacelab**
- RT Advanced Technology Laboratory

- Get Away Specials (STS)
- GRIST (telescope)
- LIRTS (telescope)
- NASA programs
- OSTA-2 payload
- SEPAC (payload)
- Skylab program
- space shuttles
- space transportation system
- spaceborne experiments
- Starlab

Spacelab payloads

- DEF A general, collective term for the diverse and numerous ESA payloads planned for space experiments.
- GS payloads
 - . **Spacelab payloads**
 - . . AMPS (satellite payload)
 - . . Atmospheric Cloud Physics Lab (Spacelab)
 - . . Atmospheric General Circulation Experiment
 - . . geophysical fluid flow cells
 - . . Solar Cell Calibration Facility
- RT annular suspension and pointing system
- Astro missions (STS)
- Get Away Specials (STS)
- sortie systems
- space station payloads

Spacelab simulation flights

- USE **Assess program**

Spacelab UV-Optical Telescope Facility

- USE **Starlab**

spacers

- RT bushings
- dividers
- fasteners
- inserts
- isolators
- separators
- spacing
- washers (spacers)

spacetennas

- DEF The transmitting antennas of a solar power satellite transmission system which directs the high-power beam from space to a focus on the rectennas on Earth.
- GS antennas

. radio antennas
 . . microwave antennas
 . . . **spacetennas**
 microwave equipment
 . microwave antennas
 . . **spacetennas**
 radio equipment
 . radio antennas
 . . microwave antennas
 . . . **spacetennas**
 RT microwave transmission
 rectennas

space-time adaptive processing

(added November 2002)

DEF Multidimensional filtering technique that reduces the effects of airborne radar clutter and white noise jamming by using the input from a phased-array antenna to produce an adaptive weight vector which can then be applied to the signal.

UF *STAP (radar)*

GS data processing
 . signal processing

. . **space-time adaptive processing**

RT adaptive filters
 airborne radar clutter
 interference immunity
 jamming
 radar detection
 radar filters
 surveillance radar

space-time CE/SE method

(added June 2002)

DEF A numerical framework used for solving conservation laws in continuum mechanics, where both local and global flux conservations are enforced in space and time. The method is characterized by low dispersion errors and low dissipation.

UF *CE/SE method*
conservation element and solution element

GS analysis (mathematics)
 . numerical analysis

. . **space-time CE/SE method**

RT aeroacoustics
 computational fluid dynamics
 conservation equations
 conservation laws
 flow equations

space-time continuum

USE **relativity**

space-time functions

UF *space-time metric*

GS functions (mathematics)
 . **space-time functions**

RT light-cone expansion
 Minkowski space
 naked singularities
 relativity
 Yang-Mills theory

space-time metric

spread F

- RT F 2 region
 - ionospheric storms
 - magnetic storms

spread reflection

DEF Reflection of electromagnetic radiation from a rough surface with large irregularities. Also known as mixed reflection.

- GS reflection
 - . **spread reflection**
- RT glare
 - infrared reflection
 - optical reflection
 - scattering
 - signal reflection
 - ultraviolet reflection

wave reflection

spread spectrum transmission

DEF Communications technique with many different signal waveforms transmitted in a wide band; power is spread thinly over the band so that narrow-band radios can operate within the band without interference.

- GS transmission
 - . electromagnetic wave transmission
 - . . radio transmission
 - . . . **spread spectrum transmission**

spreadsheets

(added March 2001)

DEF Software applications that present a display of multiple columns and rows, and allow a user to input and manipulate numerical data for planning, tracking, analysis, and financial calculations.

- GS computer programs
 - . applications programs (computers)
 - . . **spreadsheets**
- RT computer techniques
 - tables (data)

spring (season)

DEF The season of the year between winter and summer. Its beginning is the vernal equinox and its end the summer solstice.

- GS seasons
 - . **spring (season)**
- RT autumn
 - summer
 - winter

springs (elastic)

- RT ∞ coils
 - energy storage
 - frames
 - oscillation dampers
 - oscillations
 - resilience
 - shock absorbers
 - suspension systems (vehicles)
 - vibration isolators

springs (water)

DEF Places where ground water flows naturally from rocks onto the land surface or into a body of surface water. Their occurrence depends on the nature and relationship of rocks, especially permeable and impermeable strata, on the position of the water table, and on the topography.

- GS resources
 - . Earth resources
 - . . **springs (water)**
 - water
 - . **springs (water)**
- RT aquifers
 - fresh water
 - ground water

- thin films

squalls

- GS wind (meteorology)
 - . **squalls**
- RT ground wind
- storms (meteorology)

squama

DEF A scale or structure resembling a scale.

- RT fishes

square waves

DEF Oscillations, the amplitudes of which show periodic discontinuities between two values, remaining constant between jumps. Spe-

cifically, in radar pulses initiated by a rapid rise to peak power, maintained at a constant peak power over the finite pulse length, and terminated by rapid decrease from peak power.

- GS waveforms
 - . **square waves**
- RT form factors
- pulse amplitude
- pulse duration
- sawtooth waveforms
- time functions
- wave functions
- wave propagation
- ∞ waves

square wells

DEF The impurity potential areas which bound an electron or hole in semiconducting crystals such as silicon.

- RT electron mobility
- magnetic fields
- photoconductivity
- vacancies (crystal defects)
- wells

squares (mathematics)

- GS geometry
 - . Euclidean geometry
 - . . polygons
 - . . . tetragons
 - **squares (mathematics)**

squeeze casting

(added September 1993)

DEF The technique of working liquid metals under pressure into near net shapes; it includes the technique of forging metal compounds.

- GS forming techniques
 - . casting
 - . . **squeeze casting**
- RT cast alloys
- compressing
- extruding
- fabrication
- forging
- liquid metals
- metal matrix composites
- metal working

squeeze films

DEF Thin viscoelastic fluid films squeezed between two usually planar structures to serve as sealants, load dampers, lubricants, etc.

- GS fluid films
 - . **squeeze films**
- RT boundary lubrication
- elastohydrodynamics
- ∞ films
 - gas bearings
 - gas lubricants
 - liquid-solid interfaces
 - lubricants
 - thin films
 - vapor phase lubrication
- viscoelasticity
- viscous fluids

squeezed states (quantum theory)

DEF Single mode minimum uncertainty states for which the fluctuations in one quadrature phase of the field are smaller than would occur for a coherent state. Used for two photon coherent states.

- UF *two photon coherent states*
- RT coherent electromagnetic radiation
- coherent light
- electromagnetic fields
- fluctuation theory

stability
 DEF The property of a body, as an aircraft or rocket, to maintain its attitude or to resist displacement, and, if displaced to develop

forces and moments tending to restore the original condition. Of a fuel, the capability of a fuel to retain its characteristics in an adverse environment, e. g. extreme temperature. Used for instability.

UF *instability*
 GS **stability**
 . acoustic instability
 . baroclinic instability
 . dynamic stability
 . . combustion stability

Stardust Mission

(added March 1999)

DEF First U. S. mission launched to robotically obtain samples in deep space and return them to Earth. The NASA Discovery-class mission will return dust samples collected from the debris cloud surrounding the nucleus of Comet Wild 2. Interstellar dust will also be collected. The mission spacecraft takes advantage of an Earth gravity-assist maneuver to reach the comet, and uses an aerogel-based dust collector.

steganography

(added April 2002)

DEF The art and science of communicating in a hidden manner, usually involving a message embedded in a carrier medium such as print, images, or computer files.

RT computer information security
cryptography

security

Stellar (star tracker)
USE **CCD star tracker**

stellar activity

DEF A general term encompassing stellar phenomena such as stellar flares, starspot activity, magnetic activity, nuclear fusion, etc.

- GS **stellar activity**
 - . solar activity
 - . . faculae
 - . . solar flares
 - . . solar prominences
 - . . solar storms
 - . . spicules
 - . . sunspots
 - . starspots
 - . . sunspots
 - . stellar flares
 - . . solar flares
- RT flare stars

- ∞ flares
 - magnetic disturbances
 - magnetohydrodynamics
 - photosphere
 - starquakes
 - stars
 - stellar convection
 - stellar interiors
 - stellar luminosity
 - stellar magnetic fields
 - stellar mass ejection
 - stellar oscillations
 - stellar physics
 - stellar radiation
 - sunspot cycle

stellar atmospheres

- GS environments
 - . extraterrestrial environments
 - . . **stellar atmospheres**
 - . . . chromosphere
 - . . . solar atmosphere
 - solar transition region
- RT ∞ atmospheres
 - cool stars
 - limb brightening
 - limb darkening
 - local thermodynamic equilibrium
 - metallic stars
 - pulsar magnetospheres
 - radiative transfer
 - satellite atmospheres
 - starspots
 - stellar convection
 - stellar coronas
 - stellar interiors
 - stellar magnetospheres

stellar color

- DEF The particular wavelengths of optical radiation emitted by a star.
- GS electromagnetic properties
 - . optical properties
 - . . color
 - . . . **stellar color**
- RT color-color diagram
 - color-magnitude diagram
 - stellar luminosity
 - stellar magnitude
 - stellar spectra
 - stellar spectrophotometry

stellar composition

- GS composition (property)
 - . chemical composition
 - . . **stellar composition**
- RT abundance
 - B stars
 - carbon stars
 - isotope ratios
 - stars
 - stellar models
 - stellar physics

stellar structure

stellar convection

- (added June 1992)
- GS convection
 - . **stellar convection**
 - . . solar convection (astronomy)
- RT Benard cells
 - convection currents
 - convective flow
 - dynamo theory
 - fluid flow
 - free convection
 - Rayleigh-Benard convection
 - stellar activity
 - stellar atmospheres
 - stellar interiors
 - stellar magnetic fields
 - stellar physics

stellar cores

- DEF The central portion of the interior of stars.
- GS cores
 - . **stellar cores**
 - stellar interiors
 - . **stellar cores**
- RT astrophysics
 - degenerate matter
 - gravitational collapse
 - planetary cores
 - solar interior
 - stars
 - stellar coronas
 - stellar structure

stellar coronas

- DEF Ionized regions about stars formed by x rays emitted during stellar flares. First discovery of a stellar corona was made aboard the Dutch ANS satellite (1975) when permanent x ray emission from the star SIRIUS was detected and measured.
- GS coronas
 - . **stellar coronas**
 - . . solar corona
 - . . . coronal holes
 - . . . coronal loops
- RT coronal mass ejection
 - ionization
 - Orion nebula
 - stellar atmospheres
 - stellar cores

stellar Doppler shift
USE **Doppler effect**

stellar envelopes

- UF *circumstellar matter*
- RT astrophysics
 - cool stars
- ∞ envelopes
 - interstellar matter
 - protoplanetary disks
 - R Coronae Borealis stars
 - shell stars
 - stellar mass accretion
 - stellar mass ejection
 - stellar structure
 - symbiotic stars
 - Wolf-Rayet stars

stellar evolution

- GS evolution (development)
 - . **stellar evolution**
 - . . star formation
 - . . stellar mass accretion
- RT asteroseismology
 - astrophysics
 - asymptotic giant branch stars
 - brown dwarf stars
 - color-magnitude diagram
 - cosmology
 - degenerate matter
 - galactic evolution
 - gravitational instability

- Hertzsprung-Russell diagram
- horizontal branch stars
- interstellar extinction
- late stars
- main sequence stars
- neutral currents
- planetary evolution
- Population III stars
- pre-main sequence stars
- protoplanetary disks
- protoplanets
- protostars
- red giant stars
- solar nebula
- solar system evolution
- star formation rate
- stellar interiors
- stellar physics
- subgiant stars

stellar fields

USE **star distribution**

stellar flares

- DEF Ejections of material from stars in eruptions that last from a few minutes to an hour or more.
- GS stellar activity
 - . **stellar flares**
 - . . solar flares
- RT cataclysmic variables
 - flare stars
- ∞ flares
 - stellar luminosity
 - stellar physics
 - stellar radiation

stellar gravitation

- GS gravitation
 - . **stellar gravitation**
 - . . solar gravitation
- RT gravitational binding energy
 - gravitational fields
 - gravitational instability
 - gravitational lenses
 - stars
 - stellar mass
 - stellar systems

stellar interiors

- DEF The subsurface portions of stars.
- GS **stellar interiors**
 - . solar interior
 - . stellar cores
- RT asteroseismology
 - astrophysics
 - convection
 - gravitational collapse
 - nuclear fusion
 - stars
 - stellar activity
 - stellar atmospheres
 - stellar convection
 - stellar evolution
 - stellar models
 - stellar physics
 - stellar structure

stellar luminosity

- GS electromagnetic properties
 - . optical properties
 - . . luminosity
 - . . . **stellar luminosity**
- RT brightness
 - brightness distribution
 - Hertzsprung-Russell diagram
 - horizontal branch stars
 - limb brightening
 - limb darkening
 - luminescence
 - mass to light ratios
 - red dwarf stars
 - red giant stars
 - starspots
 - stellar activity
 - stellar color

stellar magnetic fields

stellar flares
stellar parallax
stellar physics
Wolf-Rayet stars

stellar magnetic fields

GS magnetic fields
. **stellar magnetic fields**
. . solar magnetic field
RT electromagnetic fields
interstellar magnetic fields
magnetic field configurations
plasmas (physics)
pulsar magnetospheres
starspots
stellar activity
stellar convection
stellar magnetospheres

stellar magnetospheres

(added July 1988)
GS **stellar magnetospheres**
. pulsar magnetospheres
RT magnetic fields
∞ magnetospheres
stellar atmospheres
stellar magnetic fields

stellar magnitude

DEF The measure of the relative brightness of a star. Stellar magnitudes are expressed in a variety of ways, according to the method or process of observation or determination.
GS magnitude
. **stellar magnitude**
RT astronomy
color-magnitude diagram
∞ intensity
luminance
luminous intensity
red dwarf stars
stars
stellar color
stellar parallax

stellar mass

GS mass
. **stellar mass**
RT degenerate matter
galactic mass
main sequence stars
mass to light ratios
massive stars
novae
stellar gravitation
stellar temperature
supernovae
variable stars

stellar mass accretion

DEF Process by which a star accumulates matter as it moves through dense clouds of interstellar gas.
GS evolution (development)
. stellar evolution
. . **stellar mass accretion**
RT accretion disks
cosmology
dwarf novae
galactic evolution
gravitational effects
interstellar gas
interstellar matter
protostars
star formation
stellar envelopes
stellar physics
symbiotic stars
x ray binaries

stellar mass ejection

GS ejection
. **stellar mass ejection**
. . coronal mass ejection
RT asymptotic giant branch stars
cataclysmic variables

dwarf novae
magnetic clouds
novae
R Coronae Borealis stars
stellar activity
stellar envelopes
supernovae
variable stars
Wolf-Rayet stars

stellar models

GS models
. astronomical models
. . **stellar models**
RT astronomy
solar neutrinos
solar oscillations
stellar composition
stellar interiors
supermassive stars

stellar motions

GS **stellar motions**
. stellar orbits
. stellar oscillations
. . solar oscillations
. stellar rotation
. . solar rotation
RT companion stars
corotation
Doppler effect
Doppler-Fizeau effect
double stars
galactic rotation
Hipparcos satellite
∞ motion
sidereal time
stellar parallax
stellar systems

stellar occultation

GS occultation
. **stellar occultation**
RT asteroid detection
eclipsing binary stars
lunar occultation

stellar orbits

SN (EXCLUDES PLANETARY ORBITS)
GS orbits
. **stellar orbits**
stellar motions
. **stellar orbits**
RT celestial mechanics
Nemesis (star)
retrograde orbits

stellar oscillations

DEF Irregular fluctuations of the stellar atmospheres.
GS oscillations
. **stellar oscillations**
. . solar oscillations
stellar motions
. **stellar oscillations**
. . solar oscillations
RT asteroseismology
astronomical models
astronomy
astrophysics
atmospheric models
cataclysmic variables
Mira variables
stars
stellar activity
symbiotic stars
variable stars

stellar parallax

DEF The subtended angle at a star formed by the mean radius of the Earth's orbit; it indicates distance to a star.
GS parallax
. **stellar parallax**
RT astrometry
binary stars

Hipparcos satellite
solar parallax
stellar luminosity
stellar magnitude
stellar motions

stellar physics

DEF A term that encompasses the physical properties of stars, such as luminosity, size, mass, density, temperature, chemical composition, evolution, activity, etc.
GS astrophysics
. **stellar physics**
. . solar physics
RT asteroseismology
local thermodynamic equilibrium
nuclear astrophysics
nuclear fusion
∞ science
starquakes
stellar activity
stellar composition
stellar convection
stellar evolution
stellar flares
stellar interiors
stellar luminosity
stellar mass accretion
stellar radiation
stellar rotation
stellar structure
supernovae

stellar radiation

GS extraterrestrial radiation
. **stellar radiation**
. . stellar winds
RT cosmic rays
electromagnetic radiation
galactic radiation
gamma ray bursts
Herbig-Haro objects
interstellar extinction
interstellar radiation
light curve
microwave emission
polarized electromagnetic radiation
∞ radiation
radiative transfer
radio bursts
radio stars
solar radiation
starspots
stellar activity
stellar flares
stellar physics
x ray stars

stellar rotation

GS gyration
. rotation
. . **stellar rotation**
. . . solar rotation
stellar motions
. **stellar rotation**
. . solar rotation
RT angular momentum
corotation
planetary rotation
starquakes
stellar physics

stellar seismology

(added March 2001)
USE **asteroseismology**

stellar spectra

GS spectra
. radiation spectra
. . electromagnetic spectra
. . . **stellar spectra**
. . . . solar spectra
RT absorption spectra
astronomical spectroscopy
color-color diagram
continuous spectra

- cool stars
 - emission spectra
 - F stars
 - G stars
 - Herbig-Haro objects
 - Hertzsprung-Russell diagram
 - horizontal branch stars
 - infrared spectra
 - K stars
 - line spectra
 - molecular spectra
 - peculiar stars
 - Seyfert galaxies
 - stellar color
 - symbiotic stars
 - ultraviolet spectra
 - visible spectrum
 - x ray spectra
- stellar spectrophotometry**
- GS optical measurement
 - . photometry
 - .. astronomical photometry
 - ... **stellar spectrophotometry**
 - .. spectrophotometry
 - ... **stellar spectrophotometry**
 - spectroscopy
 - . astronomical spectroscopy
 - .. **stellar spectrophotometry**
 - . spectrophotometry
 - .. **stellar spectrophotometry**
 - RT color-color diagram
 - horizontal branch stars
 - infrared photometry
 - peculiar stars
 - spectroscopic telescopes
 - stellar color
 - superhumps (astronomy)
- stellar structure**
- RT chromosphere
 - coronal holes
 - dense plasmas
 - metallic stars
 - peculiar stars
 - solar atmosphere
 - solar corona
 - solar interior
 - starquakes
 - stellar composition
 - stellar cores
 - stellar envelopes
 - stellar interiors
 - stellar physics
 - ∞ structures
 - supermassive stars
- stellar systems**
- SN (EXCLUDES PLANETARY SYSTEMS)
 - DEF Gravitationally bound groups of stars.
 - SN (Excludes planetary systems).
 - GS celestial bodies
 - . **stellar systems**
 - RT binary stars
 - galactic clusters
 - galactic rotation
 - galactic structure
 - galaxies
 - gravitational collapse
 - gravitational effects
 - interacting galaxies
 - Nemesis (star)
 - Sigma Orionis
 - star clusters
 - star distribution
 - stellar gravitation
 - stellar motions
 - triple stars
- stellar temperature**
- GS temperature
 - . **stellar temperature**
 - RT cool stars
 - stellar mass
- symbiotic stars
- stellar winds**
- GS extraterrestrial radiation
 - . stellar radiation
 - .. **stellar winds**
 - particles
 - . charged particles
 - .. energetic particles
 - ... plasmas (physics)
 - space plasmas
 - **stellar winds**
 - . corpuscular radiation
 - .. energetic particles
 - ... plasmas (physics)
 - space plasmas
 - **stellar winds**
 - RT chromosphere
 - cosmic plasma
 - galactic winds
 - intergalactic media
 - interstellar gas
 - radiation pressure
 - solar wind
 - solar wind velocity
- stellators**
- DEF Experimental thermonuclear devices where containment in a magnetic field is achieved by closing the field upon itself and thus allowing the particles to perform endless spiral motion.
 - GS nuclear reactors
 - . fusion reactors
 - .. **stellators**
 - RT helical windings
 - heliotrons
 - magnetohydrodynamics
 - pinch effect
 - plasma control
 - thermal instability
 - thermonuclear power generation
 - thermonuclear reactions
 - toroidal plasmas
- Stellite (trademark)**
- UF *Haynes Stellite*
 - RT chromium alloys
 - cobalt alloys
 - tungsten alloys
- stems**
- RT plants (botany)
- stencil processes**
- RT printing
 - reproduction (copying)
- step faults*
- USE **geological faults**
- step functions**
- GS functions (mathematics)
 - . **step functions**
 - RT dynamic response
 - frequency response
 - intervals
 - ramp functions
 - reaction time
 - ∞ steps
- step recovery diodes**
- DEF Varactors in which forward voltage injects carriers across the junction, but before the carriers can combine, the voltage reverses and carriers return to their origin in a group. The result is an abrupt cessation of reverse current and a harmonic rich waveform.
 - GS electronic equipment
 - . diodes
 - .. semiconductor diodes
 - ... junction diodes
 - **step recovery diodes**
 - . solid state devices
 - .. semiconductor devices
 - ... junction diodes
- ... **step recovery diodes**
 - RT switching
- stepped leaders**
- (added August 1999)
 - GS electric current
 - . electric discharges
 - .. lightning
 - ... leaders (meteorology)
 - **stepped leaders**
- steppes**
- GS landforms
 - . **steppes**
 - RT arid lands
 - desertification
 - grasslands
 - plains
- stepping motors**
- DEF Motors whose rotations are in short and essentially uniform angular movements rather than a continuous motion.
 - GS electromechanical devices
 - . electric motors
 - .. **stepping motors**
 - motors
 - . electric motors
 - .. **stepping motors**
 - RT actuators
 - servocontrol
 - servomechanisms
- stepping switches**
- GS switches
 - . electric switches
 - .. **stepping switches**
- ∞ **steps**
- SN (USE OF A MORE SPECIFIC TERM IS RECOMMENDED--CONSULT THE TERMS LISTED BELOW)
 - RT backward facing steps
 - programming (scheduling)
 - stairsteps
 - step functions
- stereochemistry**
- DEF Chemistry dealing with the arrangement of atoms and molecules in three dimensions.
 - RT carbohydrates
 - ∞ chemistry
 - enantiomers
 - isomers
 - optical activity
 - spatial distribution
 - x ray analysis
- stereography*
- USE **stereophotography**
- stereolithography*
- USE **lithography**
- stereophonics**
- DEF The use of two sound channels to mimic normal hearing. Stereophonic satellite broadcasting has now been developed.
 - RT acoustics
 - hearing
- stereophotography**
- UF *stereography*
 - stereoscopic photography*
 - GS imagery
 - . photography
 - .. stereoscopy
 - ... **stereophotography**
 - RT aerial photography
 - black and white photography
 - cinematography
 - color photography
 - Mapsat
 - photogrammetry

stereoscopic vision

SPOT (French satellite)

stereoscopic photography
USE **stereophotography**

stereoscopic vision
GS vision
. **stereoscopic vision**
RT binocular vision
stereoscopy

stereoscopy
GS imagery
. photography
. . **stereoscopy**
. . . stereophotography
RT stereoscopic vision

stereotelevision
GS communication equipment
. **stereotelevision**
telecommunication
. **stereotelevision**
television systems
. **stereotelevision**
RT closed circuit television
color television
communicating
educational television
satellite television
spacecraft television

sterilization
GS cleaning
. **sterilization**
. . chemical sterilization
. . spacecraft sterilization
RT air purification
antifouling
antiseptics
bactericides
baking
decontamination
fumigation
gnotobiotics
housekeeping (spacecraft)
ionizing radiation
mercury lamps
pasteurizing
purification
ultraviolet radiation

sterilization effects
RT chemical effects
corrosion
decontamination
degradation
∞ deoxygenation
∞ effects
radiation effects
spacecraft sterilization
temperature effects
thermal degradation

sterns
USE **afterbodies**

sternum
GS anatomy
. musculoskeletal system
. . bones
. . . **sternum**
RT thorax

steroids
GS organic compounds
. lipids
. . **steroids**
. . . cholesterol
. . . corticosteroids
. . . . aldosterone
. . . . hydrocorticosteroid
. cortisone
. glucocorticoids
. estrogens
. prostaglandins

RT antibiotics
hormones

stethoscopes
GS medical equipment
. **stethoscopes**
RT physicians

stiction
(added May 2003)
DEF Adhesion between two bodies in contact due to surface forces.
GS surface properties
. adhesion
. . **stiction**
RT friction
interfacial energy

Stieltjes integral
GS analysis (mathematics)
. real variables
. . measure and integration
. . . **Stieltjes integral**
RT probability theory

stiff structures
USE **rigid structures**

stiffening
RT reinforcement (structures)
ribs (supports)
webs (supports)

stiffness
DEF The ratio of change of force (or torque) to the corresponding change in translational (or rotational) displacement of an elastic element.
GS mechanical properties
. **stiffness**
RT bending
deformation
flexibility
modulus of elasticity
∞ rigidity
softness
structural stability

stiffness matrix
GS algebra
. vector spaces
. . matrices (mathematics)
. . . **stiffness matrix**
RT structural analysis
structural members

stigmatism
GS electromagnetic properties
. optical properties
. . **stigmatism**
RT astigmatism
focusing
lens design
lenses

stilbene
GS organic compounds
. hydrocarbons
. . **stilbene**
RT dyes
hexanitrostilbene

stills
GS separators
. **stills**
RT concentrators
distillation equipment

stimulants
GS drugs
. **stimulants**
. . atropine
. . caffeine
. . central nervous system stimulants
. . norepinephrine
RT aminophylline
epinephrine

strychnine

stimulated emission
GS emission
. **stimulated emission**
RT argon lasers
carbon dioxide lasers
carbon lasers
carbon monoxide lasers
coherent electromagnetic radiation
coherent light
electron emission
electron pumping
gallium arsenide lasers
gas lasers
gas masers
HCN lasers
interstellar masers
lasers
light emission
masers
nuclear pumping
optical pumping
particle emission
photoelectric emission
population inversion
rapid ballistics identification
rare gas-halide lasers
self sustained emission
surface emitting lasers
TEA lasers
two-wavelength lasers
ultrashort pulsed lasers
ultraviolet lasers

stimulated emission devices
UF *quantum generators*
GS **stimulated emission devices**
. lasers
. . airborne lasers
. . argon lasers
. . atmospheric lasers
. . carbon lasers
. . chemical lasers
. . . HCL lasers
. . . . HCL argon lasers
. . . chemical oxygen-iodine lasers
. . continuous wave lasers
. . distributed feedback lasers
. . free electron lasers
. . gamma ray lasers
. . gas lasers
. . . carbon dioxide lasers
. . . carbon monoxide lasers
. . . DF lasers
. . . excimer lasers
. . . HCL lasers
. . . . HCL argon lasers
. . . HCN lasers
. . . helium-neon lasers
. . . HF lasers
. . . nitrogen lasers
. . . rare gas-halide lasers
. . . . krypton fluoride lasers
. . . . xenon chloride lasers
. . . . xenon fluoride lasers
. . . TEA lasers
. . . ultraviolet lasers
. . gasdynamic lasers
. . glass lasers
. . high power lasers
. . . Nova Laser System
. . . Shiva laser system
. . infrared lasers
. . injection lasers
. . . quantum cascade lasers
. . . iodine lasers
. . . chemical oxygen-iodine lasers
. . liquid lasers
. . metal vapor lasers
. . neodymium lasers
. . nuclear pumped lasers
. . organic lasers
. . . dye lasers
. . plasmadynamic lasers
. . pulsed lasers
. . . Q switched lasers

- . . . ultrashort pulsed lasers
- . . . ultraviolet lasers
- . . Raman lasers
- . . ring lasers
- . . semiconductor lasers
- . . . aluminum gallium arsenide lasers
- . . . gallium arsenide lasers
- . . . quantum cascade lasers
- . . . quantum well lasers
- . . . YLF lasers
- . . solar-pumped lasers
- . . solid state lasers
- . . . aluminum gallium arsenide lasers
- . . . DBR lasers
- . . . fiber lasers
- . . . gallium arsenide lasers
- . . . quantum cascade lasers
- . . . quantum well lasers
- . . . ruby lasers
- . . . YAG lasers
- . . . YLF lasers
- . . spaceborne lasers
- . . surface emitting lasers
- . . tunable lasers
- . . two-wavelength lasers
- . . waveguide lasers
- . . . fiber lasers
- . . x ray lasers
- . masers
- . . gas masers
- . . . hydrogen masers
- . . interstellar masers
- . . proton masers
- . . traveling wave masers
- . . water masers

- RT amplifiers
coherent electromagnetic radiation
diffraction radiation
electron pumping
∞ generators
laser arrays
laser cavities
laser pumping
laser weapons
lasing
light transmission
nuclear pumping
optical pumping
rapid ballistics identification
subharmonic generators
transient oscillations

stimulation

- GS **stimulation**
. auditory stimuli
. sensory stimulation
- RT activation
activation (biology)
actuation
cloud seeding
gas injection
initiation
pressurizing
starting

∞ **stimuli**

- SN (USE OF A MORE SPECIFIC TERM IS RECOMMENDED--CONSULT THE TERMS LISTED BELOW)
- RT arousal
auditory stimuli
caloric stimuli
electric stimuli
motivation
psychological factors
subliminal stimuli
visual stimuli
zeitgebers

Stirling cycle

DEF A theoretical heat engine cycle in which heat is added at constant volume, followed by isothermal expansion with heat addition. The heat is then rejected at constant volume, followed by isothermal compression with heat rejection.

GS cycles

- . thermodynamic cycles
- . . **Stirling cycle**
- RT Carnot cycle
solar dynamic power systems
Stirling engines

Stirling engines

- GS engines
. external combustion engines
- . . **Stirling engines**
. piston engines
- RT . . **Stirling engines**
automobile engines
engine design
engine tests
free-piston engines
linear alternators
Stirling cycle

stirring

- RT aeration
dispersing
friction stir welding
mixers
suspending (mixing)
swirling

stishovite

- DEF A mineral consisting essentially of silicon trioxide.
- GS chalcogenides
. oxides
. . dioxides
. . . silicon dioxide
. . . . quartz
. . . . **stishovite**
. . silicon oxides
. . . silicon dioxide
. . . . quartz
. . . . **stishovite**
minerals
. quartz
. . **stishovite**
silicon compounds
. silicon oxides
. . silicon dioxide
. . . quartz
. . . . **stishovite**
- RT coesite
Earth crust
Earth mantle
rutile

stochastic processes

- DEF Ordered sets of observations in one or more dimensions, each being considered as a sample of one item from a probability distribution. Used for Poisson process.
- UF *poisson process*
- GS **stochastic processes**
. Markov processes
. . Markov chains
. random processes
. . random walk
- RT ∞ applications of mathematics
attractors (mathematics)
autoregressive moving average
chaos
coherence coefficient
decision theory
differential games
ergodic process
events
Fokker-Planck equation
game theory
information theory
Kakutani theorem
Kalman-Schmidt filtering
martingales
mathematical models
Monte Carlo method
operations research
probability theory
queueing theory
random errors
random noise

- random signals
- state estimation
- statistical analysis
- ∞ statistics
- time dependence
- time functions
- time series analysis

stockpiling

- RT accumulations
collection
inventory management
logistics
reserves
∞ storage
strategic materials

stoichiometry

- RT chemical reactions
- ∞ chemistry
∞ composition
composition (property)
formulations
material balance
phase diagrams

Stokes flow

- GS fluid flow
. incompressible flow
. . **Stokes flow**
. viscous flow
. . **Stokes flow**
- RT Oseen approximation
steady flow

∞ **Stokes law**

- SN (USE OF A MORE SPECIFIC TERM IS RECOMMENDED--CONSULT THE TERMS LISTED BELOW)
- RT laws
Maxwell equation
Stokes law (fluid mechanics)
Stokes theorem (vector calculus)

Stokes law (fluid mechanics)

- RT settling
∞ Stokes law
viscosity

Stokes law of radiation

- GS laws
. radiation laws
. . **Stokes law of radiation**
- RT incident radiation
luminescence
- ∞ radiation
wavelengths

Stokes theorem (vector calculus)

- GS algebra
. vector spaces
. . **Stokes theorem (vector calculus)**
theorems
. **Stokes theorem (vector calculus)**
- RT ∞ Stokes law

Stokes-Beltrami equation

- RT ∞ equations
Laplace equation
stream functions (fluids)

STOL aircraft

USE **short takeoff aircraft**

stomach

- GS anatomy
. digestive system
. . gastrointestinal system
. . . **stomach**
- RT abdomen

stones (rocks)

USE **rocks**

stony meteorites

- GS celestial bodies

stony-iron meteorites

- . meteorites
 - . . . **stony meteorites**
 - achondrites
 - Bondoc meteorite
 - chassignites
 - Kapoeta achondrite
 - nakhlites
 - Norton County achondrite
 - shergottites
 - SNC meteorites
 - ureilites
 - carbonaceous meteorites
 - carbonaceous chondrites
 - Alais meteorite
 - Allende meteorite
 - Cold Bokkeveld meteorite

 - bediasites
 - Tungusk meteorite
 - RT coesite
 - iron meteorites
 - Lazarev meteorite
 - meteoritic composition
 - meteoritic microstructures
 - schreibersite
 - stony-iron meteorites
- stony-iron meteorites**
(added December 1988)
- GS celestial bodies
 - . meteorites
 - . . **stony-iron meteorites**
 - RT iron meteorites
 - stony meteorites
- stopcocks*
USE **cocks**
- stopping**
- UF *terminating*
 - GS **stopping**
 - . thrust termination
 - RT blocking
 - cancellation
 - closing
 - constrictions
 - containment
 - damping
 - deceleration
 - delay
 - elimination
 - ∞ holding
 - ∞ inhibition
 - optimization
 - plugs
 - prevention
 - ∞ reduction
 - retarding
 - sealing
- stopping power**
- RT absorbers (materials)
 - absorption cross sections
- ∞ cross sections
 - density (mass/volume)
 - neutron cross sections
 - radiation absorption
 - radiation shielding
 - scattering cross sections
- storable propellants**
- GS consumables (spacecraft)
 - . **storable propellants**
 - propellants
 - RT . **storable propellants**
 - cryogenic rocket propellants
 - gaseous rocket propellants
 - gelled rocket propellants
 - ground support equipment
 - high temperature propellants
 - hydrocarbon fuels
 - hypergolic rocket propellants
 - liquid rocket propellants
 - propellant additives
 - propellant decomposition
 - propellant evaporation
 - propellant sensitivity
 - propellant storability
 - propellant storage
 - rocket propellants
 - solid propellants
 - space storage
- ∞ **storage**
- SN (USE OF A MORE SPECIFIC TERM IS RECOMMENDED--CONSULT THE TERMS LISTED BELOW)
 - RT buffer storage
 - computer storage devices
 - core storage
 - cryogenic fluid storage
 - data storage
 - disposal
 - document storage
 - energy storage
 - external store separation
 - external stores
 - fluid filled shells
 - handling equipment
 - inventories
 - inventory controls
 - inventory management
 - ion storage
 - liquid filled shells
 - logistics
 - logistics management
 - magnetic storage
 - materials handling
 - missile silos
 - missile storage
 - packaging
 - pipelines
 - preserving
 - propellant storage
 - racks (frames)
 - recording
 - reserves
 - retaining
 - safety
 - space storage
 - stockpiling
 - storage tanks
 - stowage (onboard equipment)
 - underground storage
 - waste disposal
 - wing-fuselage stores
- storage batteries**
- SN (RECHARGEABLE BATTERIES)
 - UF *secondary batteries*
 - GS electrochemical cells
 - . electric batteries
 - . . **storage batteries**
 - . . . lead acid batteries
 - . . . nickel cadmium batteries
 - . . . nickel hydrogen batteries
 - . . . nickel zinc batteries
 - . . . silver cadmium batteries
 - . . . silver hydrogen batteries
 - . . . silver zinc batteries
- . . . zinc-bromide batteries
 - . . . zinc-chlorine batteries
 - RT alkaline batteries
 - battery chargers
 - charge efficiency
 - dry cells
 - electrolytes
 - lithium batteries
 - metal air batteries
 - nickel iron batteries
 - nonaqueous electrolytes
 - primary batteries
 - pulse charging
 - regenerative fuel cells
- storage rings (particle accelerators)**
- UF *electron ring accelerators*
 - GS particle accelerators
 - . cyclic accelerators
 - . . synchrotrons

straits

temperature inversions

strain softening
USE **plastic deformation**

straits
DEF Relatively narrow waterways connecting two larger bodies of water.
GS passageways
. **straits**
. . . Torres Strait
RT canals
Gibraltar
lakes
seas
water
waterways

strakes
GS structural members
. **strakes**
RT aerodynamic configurations
hulls (structures)
longerons
metal strips
rectangular panels
reinforcement (structures)
water tunnel tests

strands
RT cables (ropes)
ceramic fibers
cordage
fibers
∞ filaments
mesh
yarns

strange attractors
DEF Abstract geometrical objects in theoretical physics that represent motion which is bounded but not periodic. Their detailed behavior is sensitive to external perturbations, but their overall qualitative behavior is stable. They are of particular interest in the study of turbulence.
GS attractors (mathematics)
. **strange attractors**
RT chaos
fractals
imbeddings (mathematics)
iterative solution
nonlinear systems
numerical stability
perturbation theory
∞ physics
recursive functions
state vectors
theoretical physics
turbulence

strangeness
RT hyperons
mesons
parity

strapdown inertial guidance
GS guidance (motion)
. inertial guidance
. . . **strapdown inertial guidance**
RT inertial navigation

straps
RT anchors (fasteners)
∞ bands
clamps
fasteners
holders

strata
UF *stratified layers*
GS **strata**
. substrates
RT anticlines
bedrock
beds (geology)

crossbedding (geology)
flat layers
folds (geology)
geosynclines
∞ layers
stratification
synclines
underground acoustics

strategic materials
DEF Critical raw materials whose foreign source of supply is uncertain and subject to potential cutoff. Examples of such materials are chromium, cobalt, manganese, and platinum group metals.
RT chromium
cobalt
manganese
∞ materials
metals
stockpiling
technology assessment

strategy
RT decision theory
deployment
electronic warfare
game theory
∞ operations
operations research
risk
warfare

stratification
GS **stratification**
. atmospheric stratification
. intercalation
RT anticlines
bedrock
crossbedding (geology)
flat layers
folds (geology)
geosynclines
∞ layers
static stability
strata
stratified flow
stratigraphy
synclines
temperature gradients
thermoclines

stratified flow
GS fluid flow
. laminar flow
. . . **stratified flow**
RT baroclinic waves
baroclinity
coaxial flow
flow geometry
shear flow
stratification

stratified layers
USE **strata**

stratigraphy
DEF That branch of geology which treats of the formation, composition, sequence, and correlation of the stratified rocks as part of the Earth's crust.
GS **stratigraphy**
. magnetostratigraphy
RT anticlines
bedrock
beds (geology)
crossbedding (geology)
∞ formation
formations
geochronology
geology
geophysics
geosynclines
hydrogeology
mines (excavations)
paleontology

particle tracks
petrology
plateaus
regolith
rocks
sedimentary rocks
stratification
synclines
wells

stratocumulus clouds
GS clouds (meteorology)
. **stratocumulus clouds**
RT cumulus clouds
stratus clouds

Stratofortress aircraft
USE **B-52 aircraft**

Stratojet aircraft
USE **B-47 aircraft**

stratopause
SN (ALTITUDE APPROXIMATELY 50 KM)
GS Earth atmosphere
. middle atmosphere
. . . stratosphere
. . . **stratopause**
RT mesopause
mesosphere

Stratoscope 1 telescope
USE **stratoscope telescopes**

Stratoscope 2 telescope
USE **stratoscope telescopes**

stratoscope telescopes
UF *Stratoscope 1 telescope*
Stratoscope 2 telescope
GS telescopes
. spectroscopic telescopes
. . . **stratoscope telescopes**
RT balloons
reflecting telescopes
refracting telescopes

stratosphere
SN (ALTITUDE RANGE BETWEEN APPROXIMATELY 15 AND 50 KM)
DEF Region of the atmosphere between the troposphere and mesosphere, having a lower boundary about 8 km. at the poles to 15 km. at the equator and an upper boundary of about 50 km.
GS Earth atmosphere
. middle atmosphere
. . . **stratosphere**
. . . ozonosphere
. . . stratopause
RT chemosphere
homosphere
ice clouds
isothermal layers
stratospheric warming

stratosphere radiation
DEF Any infrared radiation involved in the complex infrared exchange continually proceeding within the stratosphere.
GS atmospheric radiation
. **stratosphere radiation**
RT corpuscular radiation
electromagnetic radiation
∞ radiation
sky radiation
tropospheric radiation

Stratospheric Aerosol & Gas Experiment
USE **SAGE satellite**

Stratospheric Observatory for IR Astronomy
USE **SOFIA (airborne observatory)**

stratospheric warming
(added October 1988)

DEF A temperature rise in the global stratosphere.
 GS heating
 . atmospheric heating
 . . **stratospheric warming**
 RT anomalous temperature zones
 atmospheric heat budget
 atmospheric temperature
 climate change
 global warming
 isothermal layers
 stratosphere

Stratotanker aircraft
 USE **C-135 aircraft**

stratus clouds

GS clouds (meteorology)
 . **stratus clouds**
 RT fog
 nimbostratus clouds
 stratocumulus clouds

streak cameras

DEF Cameras for measuring radiation pulses by deflection of an electron beam.
 GS optical equipment
 . cameras
 . . **streak cameras**
 photographic equipment
 . cameras
 . . **streak cameras**
 RT camera shutters
 cinematography
 lenses

streak photography

DEF The process of taking a time exposure photograph of a tracer particle in a fluid; the photograph reveals the motion of each tracer particle in the form of a streak which may be interpreted as a velocity vector.
 GS imagery
 . photography
 . . **streak photography**
 RT cameras
 electro-optical photography
 high speed cameras
 imaging techniques

stream functions (fluids)

RT incompressible flow
 potential theory
 Stokes-Beltrami equation
 streams
 two dimensional flow

streamline flow

USE **laminar flow**

streamlined bodies

GS symmetrical bodies
 . **streamlined bodies**
 . . fairings
 RT aerodynamic configurations
 airfoils
 axisymmetric bodies
 ∞ bodies
 bodies of revolution
 missile bodies
 ogives
 slender bodies
 streamlining
 towed bodies

streamlining

RT acoustic streaming
 air flow
 aircraft design
 aircraft structures
 airfoil profiles
 airfoils
 fairings
 fluid dynamics
 friction reduction
 helicopter design

hydrofoils
 ∞ profiles
 skin friction
 streamlined bodies

streams

DEF Bodies of flowing water, great or small, contained within channels as well as unconfined fluids such as air.
 GS **streams**
 . gas streams
 RT air flow
 alluvium
 aquifers
 Delaware River Basin (US)
 fluid flow
 gas flow
 hydrology
 hydrology models
 International Hydrological Decade
 Lake Erie
 Lake Huron
 Lake Michigan
 Lake Ontario
 Lake Superior
 limnology
 meanders
 rapids
 reservoirs

 urban planning
 urban research

∞ strength

SN (USE OF A MORE SPECIFIC TERM IS RECOMMENDED--CONSULT THE TERMS LISTED BELOW)
 RT cold strength
 compressive strength
 creep rupture strength
 creep strength
 dispersion strengthening
 electric field strength
 fiber strength
 field strength
 flexural strength
 fracture strength
 high strength
 impact strength
 load carrying capacity
 mechanical properties
 microyield strength
 muscular strength
 notch strength
 residual strength
 shear strength
 tensile strength
 weld strength
 yield strength

strength of materials

USE **mechanical properties**

streptococcus

GS microorganisms
 . bacteria
 . . **streptococcus**

streptomycetes

GS microorganisms
 . bacteria
 . . **streptomycetes**

streptomycin

GS drugs

. antibiotics
 . . **streptomycin**

stress (biology)

DEF The effect of a physiological, psychological, or mental load on a biological organism which causes fatigue and tends to degrade proficiency.

GS **stress (biology)**
 . acceleration stresses (physiology)
 . . centrifuging stress
 . flight stress (biology)
 . . space flight stress
 . plant stress
 . stress (psychology)
 RT acclimatization
 anxiety
 deprivation
 exercise physiology
 fatigue (biology)
 pathological effects
 psychological effects

stress (physiology)

GS **stress (physiology)**
 . acceleration stresses (physiology)
 . . centrifuging stress
 RT acceleration (physics)
 acclimatization
 aeroembolism
 angina pectoris
 anoxia
 biodynamics
 deprivation
 exercise physiology
 fatigue (biology)
 flight stress (biology)
 gravitational physiology
 homeostasis
 hyperkinesia
 hypoxia
 lower body negative pressure
 muscular fatigue
 Palmar sweat index
 physiology
 pressure breathing
 space flight stress
 stress (psychology)
 underwater physiology

stress (psychology)

UF *mental stress*
 GS stress (biology)

NASTRAN
photoelastic analysis
photoelasticity
Reissner theory
Saint Venant principle
shallow shell equations
S-N diagrams
stresses
structural analysis
structural design
structural engineering
temperature inversions

stress calculations

USE **stress analysis**

stress concentration

DEF In structures, a localized area of high stress.

GS distribution (property)
. stress distribution
. . **stress concentration**

RT combined stress
concentrating
crack initiation
cracking (fracturing)
Elber equation
fatigue (materials)
fatigue tests
force distribution
fringe multiplication
hole distribution (mechanics)
hole geometry (mechanics)
impact strength
impact tests
loads (forces)
mechanical properties
micromechanics
Moire fringes
moment distribution
notch strength
notch tests
perforated plates
perforated shells
plane stress
Saint Venant principle
strain distribution
stresses
stress-strain relationships
structural strain

stress corrosion

GS corrosion
. **stress corrosion**
. . stress corrosion cracking
RT cracking (fracturing)
fretting corrosion
intergranular corrosion
metal fatigue
salt spray tests
transgranular corrosion

stress corrosion cracking

GS corrosion
. stress corrosion
. . **stress corrosion cracking**
fracturing
. cracking (fracturing)
. . **stress corrosion cracking**
RT corrosion tests
crack closure
crack initiation
crack propagation
metal fatigue

stress cycles

DEF A variation of stress with time, repeated periodically and identically.
GS cycles

. **stress cycles**
mechanical properties

. **stress cycles**
RT cyclic loads
Elber equation
fatigue (materials)
fatigue life
fatigue tests
S-N diagrams
stresses
variable amplitude loading

stress distribution

UF *stress fields*
GS distribution (property)
. **stress distribution**
. . stress concentration
RT crack propagation
force distribution
fracture mechanics
interlaminar stress
strain distribution
stress intensity factors
stress-strain relationships
transverse loads

stress fields

USE **stress distribution**

stress functions

UF *von Mises theory*
GS functions (mathematics)
. **stress functions**
RT fracturing

stress intensity factors

DEF Load-induced variables in tension, compression, and/or shear which are conducive to crack initiation and propagation and fatigue fracture in materials.

RT bending theory
combined stress
crack initiation
crack propagation
cracking (fracturing)
edge cracks
force distribution
fracture mechanics
hole geometry (mechanics)
loads (forces)
notch strength
plane strain
stress distribution
tensile stress

stress measurement

GS mechanical measurement
. **stress measurement**
. . x ray stress measurement
RT deformeters
extensometers
photoelastic analysis
shearography
S-N diagrams
strain gages
tensometers
vibration measurement

stress propagation

GS transmission
. **stress propagation**
RT elastic waves
plastic deformation
∞ propagation

stress ratio

DEF The ratio of the minimum stress to the maximum stress occurring in one stress cycle.

GS mechanical properties
. **stress ratio**
ratios
. **stress ratio**
RT fatigue (materials)
fatigue tests
modular ratios
pressure ratio

S-N diagrams

stress relaxation

DEF The decrease in stress after a given time at constant strain.

GS mechanical properties
. **stress relaxation**
relaxation (mechanics)
. **stress relaxation**
RT anelasticity
Bordoni peaks
creep analysis
creep diagrams
creep properties
ductility
fatigue (materials)
plastic deformation
plastic flow
plastic memory
plastic properties
∞ recovery
residual stress
shear properties
strain energy release rate
stresses
temperature inversions

stress relieving

GS heat treatment
. **stress relieving**
relieving
. **stress relieving**
RT alloys
annealing
fatigue (materials)
∞ recovery
residual stress
stabilization
strain hardening
tempering

stress rupture strength

USE **creep rupture strength**

stress tensors

DEF Complete sets of stress components in a solid or fluid medium.

GS algebra
. tensors
. . **stress tensors**
RT continuum mechanics
elastic properties
fracture mechanics
plastic properties
structural design

stress waves

GS elastic waves
. **stress waves**
RT acoustic emission
shock layers
shock waves
stresses
temperature inversions
wave propagation
∞ waves

stressed-skin structures

RT monocoque structures
skin (structural member)
spherical shells
∞ structures
thin walled shells

stresses

DEF The forces per unit area of a body that tends to produce a deformation.

GS **stresses**
. axial stress
. combined stress
. critical loading
. interlaminar stress
. photostresses
. plane stress
. residual stress
. Reynolds stress

 - RT blood volume
 - cardiovascular system
 - heart function
 - heart rate
 - physiological tests
- strokes**
- ∞ **strokes**
 - SN (USE OF A MORE SPECIFIC TERM IS RECOMMENDED--CONSULT THE TERMS LISTED BELOW)
 - RT cerebral vascular accidents
 - thermodynamic cycles
- stroking tests**
- GS vibration tests
 - . damping tests
 - . . **stroking tests**
 - RT dynamic response
 - frequency response
 - modal response
 - shock spectra
 - structural vibration
 - ∞ tests
 - transient response
 - wave excitation
- strong interactions (field theory)**
- DEF One of the fundamental interactions of elementary particles, primarily responsible for nuclear forces and other interactions among hadrons.
 - GS particle interactions
 - . elementary particle interactions
 - . . high energy interactions
 - . . . **strong interactions (field theory)**
 - RT field theory (physics)
 - grand unified theory
 - ∞ interactions
 - nuclear interactions
 - nuclear reactions
 - quantum chromodynamics
 - standard model (particle physics)
 - ∞ theories
 - weak interactions (field theory)
- strongly coupled plasmas**
- DEF Highly compressed and collisional plasmas with electron densities of order 10 to the 24th power per cubic centimeter or more. The mean kinetic and potential energies of particles in the plasma are typically of the same order of magnitude.

strontium

- GS particles
 - . charged particles
 - . energetic particles
 - . plasmas (physics)
 - collisional plasmas
 - **strongly coupled plasmas**
 - dense plasmas
 - **strongly coupled plasmas**

Submillimeter Wave Astronomy Satellite

(added November 2000)

DEF A NASA Small Explorer Project (SMEX) satellite designed to study the chemical composition, energy balance, and structure of interstellar gas clouds and the processes that lead to the formation of stars and planets. Its primary objective is to survey water, molecular oxygen, carbon, and isotopic carbon monoxide emission in a variety of galactic star forming regions.

Taguchi methods

(added September 2000)

DEF Quality engineering methodology, developed by Genichi Taguchi, for minimizing a product's sensitivity to uncontrollable system disturbances by simultaneously varying both design and disturbance parameters. The method incorporates a special set of arrays called orthogonal arrays that define the minimal number of experiments that would provide the full information for all factors that affect the performance parameter.

tectonic movement

USE **tectonics**

tectonics

DEF A branch of geology dealing with the broad architecture of the upper part of the Earth's crust, that is, the regional assembling of structural or deformational features, a study of their mutual relations, their origin, and their historical evolution. Used for tectonic movement.

UF *tectonic movement*

GS geology

- USE **tensegrity structures**
- tensegrity structures**
(added January 2001)
- DEF A class of prestressed structures whose shape is guaranteed by the interaction between a continuous network of members in tension and a discontinuous network of members in compression. These members can serve simultaneously as sensors, actuators, and load carrying elements. The word tensegrity is a contraction of "tensional integrity".
 - UF *tensegric structures*

- crop growth
- crop vigor
- geothermal technology
- resources management
- temperature
- temperature distribution

thermal shielding

USE **heat shielding**

thermal shock

DEF The development of a steep temperature gradient and accompanying high stresses within a structure.

- RT cooling
- heating
- high temperature tests
- ∞ shock
- shock resistance
- temperature
- temperature distribution
- thermodynamic properties

thermal simulation

- GS simulation
- . environment simulation
- . . thermal simulation
- RT altitude simulation
- solar simulation
- space environment simulation

temperature

thermal sinks

USE **heat sinks**

thermal stability

DEF Resistance to permanent changes in property caused solely by heat.

- UF *thermostability*
- GS stability
- . thermal stability
- thermodynamic properties
- . thermophysical properties
- . . thermal stability
- RT dimensional stability
- high temperature tests
- low temperature tests
- storage stability
- surface stability
- temperature
- temperature dependence

thermal stresses

SN (EXCLUDES BIOLOGICAL STRESSES)

DEF Stresses in metal, resulting from non-uniform temperature distribution.

- GS stresses
- . thermal stresses
- RT cooling
- fatigue (materials)
- heating
- temperature
- temperature distribution
- temperature effects

thermal vacuum tests

- GS vacuum tests
- . thermal vacuum tests
- RT environmental tests
- high altitude environments
- temperature
- test chambers
- ∞ tests
- vacuum chambers

thermalization (energy absorption)

- GS energy absorption
- . moderation (energy absorption)
- . . thermalization (energy absorption)
- . . . neutron thermalization
- RT thermal neutrons

thermicons

- GS electron tubes
- . camera tubes
- . . vidicons
- . . . return beam vidicons
- thermicons
- . image tubes
- . . thermicons
- optical equipment
- . image converters
- . . image tubes
- . . . thermicons

thermionic cathodes

- GS electrodes
- . cathodes
- . . tube cathodes
- . . . thermionic cathodes
- emitters
- . thermionic cathodes
- RT hot cathodes

thermionic conversion systems

USE **thermionic power generation**

thermionic converters

- GS electric generators
- . direct power generators
- . . thermionic converters
- . . . SNAP 13
- . . . solar blankets
- RT cesium diodes
- cesium plasma

- ∞ converters
- fuel cells
- ion production rates
- magnetohydrodynamic generators
- plasma power sources
- radioisotope batteries
- SNAP
- solar cells
- thermoelectric generators

thermionic diodes

- GS electron tubes
- . thermionic diodes
- . . cesium diodes
- electronic equipment
- . diodes
- . . thermionic diodes
- . . . cesium diodes
- RT Child-Langmuir law
- perveance
- semiconductor diodes

thermionic emission

DEF Direct ejection of electrons as the result of heating the material, which raises electron energy beyond the binding energy that holds the electron to the material. Used for Richardson-Dushman equation.

- UF *Richardson-Dushman equation*
- GS emission
- . particle emission
- . . thermionic emission
- . thermal emission
- . . thermionic emission
- RT electron emission
- ion emission
- thermoelectricity
- work functions

thermionic emitters

- GS emitters
- . thermionic emitters

thermionic power generation

- UF *thermionic conversion systems*
- RT ∞ conversion
- SNAP
- SNAP 13

thermionic reactors

USE **ion engines**

nuclear rocket engines

thermionics

DEF The study of the emission of electrons by heat.

- RT cathodes
- electron emission
- ∞ electronics
- ion emission

thermistors

DEF Electron devices employing the temperature dependent change of resistivity of a semiconductor.

- GS attenuators
- . resistors
- . . thermistors
- electronic equipment
- . solid state devices
- . . semiconductor devices
- . . . thermistors
- temperature sensors
- . thermistors
- RT radiometers
- temperature measuring instruments
- varistors

thermites

DEF Fire-hazardous mixtures of ferric oxide and powdered aluminum; upon ignition with a magnesium ribbon, the mixtures reach temperatures up to 4000 degrees F (sufficient to soften steel).

- RT aluminum oxides
- Auger spectroscopy

barium ion clouds
copper oxides
ignition temperature
pyrotechnics

thermoacoustic effects

(added May 2000)

DEF Phenomena associated with the combination of temperature, pressure and displacement oscillations caused by acoustic waves interacting with solid boundaries, such as the walls of a tube or a "stack".

RT acoustic excitation
acoustic instability
acoustics
acousto-optics
combustion stability
∞ effects
heat transfer
sound waves
thermoacoustic refrigerators
thermophysical properties

thermoacoustic refrigerators

(added May 2000)

DEF Cooling devices in which intense sound waves in pressurized resonant cavities are used to generate temperature gradients in an array of parallel plates in the interior of a tube that serves as a heat exchanger and in which heat is drawn away by a heat sink.

GS refrigerating machinery
. refrigerators
. . . **thermoacoustic refrigerators**
RT cooling systems
refrigerating
thermoacoustic effects

thermobalances

GS measuring instruments
. indicating instruments
. . weight indicators
. . . **thermobalances**
RT thermogravimetry

thermocapillary migration

(added September 1999)

DEF Phenomenon where droplets (or bubbles) in a host fluid with a uniform temperature gradient migrate to the hot end of the host fluid because of the temperature dependence of the interfacial energy of the droplets.

RT bubbles
capillary flow
drops (liquids)
electromigration
interfacial tension
Marangoni convection
microgravity
space processing
temperature gradients
thermomigration

thermochemical properties

GS chemical properties
. **thermochemical properties**
. . heat of combustion
. . heat of dissociation
. . heat of formation
. . heat of solution
. . latent heat
. . . heat of fusion
. . . heat of vaporization
thermodynamic properties
. **thermochemical properties**
. . heat of combustion
. . heat of dissociation
. . heat of formation
. . heat of solution
. . latent heat
. . . heat of fusion
. . . heat of vaporization
RT heat balance

∞ properties

thermochemistry

DEF A branch of chemistry that treats the relations of heat and chemical changes.

GS **thermochemistry**
. aerothermochemistry
. combustion chemistry
RT chemical engineering
chemical reactions
∞ chemistry
combustion physics
enthalpy
entropy
heat
heat balance
heat of dissociation
heat of fusion

organic materials
solids

thermoclines

GS gradients
. temperature gradients
. . **thermoclines**
RT oceanography
sea water
sound transmission
stratification
surface layers
surface temperature
thermohaline circulation
underwater acoustics

thermocouple pyrometers

GS measuring instruments
. temperature measuring instruments
. . pyrometers
. . . **thermocouple pyrometers**
RT galvanometers
potentiometers (instruments)
radiation pyrometers
resistance thermometers
temperature measurement
thermocouples
thermoelement ammeters

thermocouples

DEF Devices which convert thermal energy directly into electrical energy. In its basic form it consists of two dissimilar metallic electrical conductors connected in a closed loop. Each junction forms a thermocouple.

GS **thermocouples**
. thermopiles
RT constantan
indicating instruments
Manganin (trademark)
Peltier effects
potentiometers (instruments)
Seebeck effect
temperature measurement
temperature measuring instruments
temperature probes
thermocouple pyrometers
thermoelectric generators

thermoelectricity

thermodynamic coupling

GS coupling
. **thermodynamic coupling**
RT BCS theory
electron phonon interactions
superconductors (materials)

thermodynamic cycles

GS cycles
. **thermodynamic cycles**
. . Brayton cycle
. . Carnot cycle
. . Otto cycle
. . Rankine cycle
. . Stirling cycle
RT adiabatic conditions
closed cycles
heat engines
internal combustion engines
laser propulsion
∞ strokes
thermodynamics

thermodynamic efficiency

DEF In thermodynamics, the ratio of the work done by a heat engine to the total heat supplied by the heat source. Used for thermal efficiency.

UF *thermal efficiency*
GS efficiency
. **thermodynamic efficiency**
RT combustion efficiency
compressor efficiency
engines
exergy
heat sources
internal combustion engines
nozzle efficiency
power efficiency
propulsion system performance
propulsive efficiency
specific impulse
temperature
thermodynamics

thermodynamic equilibrium

DEF A very general result from statistical mechanics which states that if a system is in equilibrium, all processes which can exchange energy must be exactly balanced by the reverse process so that there is no net exchange of energy.

RT acid base equilibrium
adiabatic conditions
chemical equilibrium
∞ equilibrium
heat of dissociation
isentropic processes
isochoric processes
isoenergetic processes
isothermal processes
liquid-vapor equilibrium
local thermodynamic equilibrium
statistical mechanics

thermodynamic properties

thermoelement ammeters

- GS measuring instruments
- . ammeters
- . . **thermoelement ammeters**
- RT thermocouple pyrometers

thermograms

USE **recording instruments**
temperature measuring instruments

thermography

- DEF Technique employing heat transfer transients.
- RT infrared imagery
- nondestructive tests
- temperature distribution
- temperature measurement
- thermal mapping

thermogravimetry

- UF *thermal gravimetry*
- RT chemical analysis
- dehydration
- pyrolysis
- temperature effects
- thermal decomposition
- thermobalances
- thermochemistry

thermohaline circulation

(added February 2002)

DEF Any water movements, including convection and large-scale currents, due to the joint action of temperature and salinity.

- UF *THC (oceanography)*
- GS circulation
- . water circulation
- . . **thermohaline circulation**
- RT ocean currents
- ocean dynamics
- ocean temperature
- salinity
- sea water
- thermoclines

upwelling water

thermo hydraulics

RT convective heat transfer
fluid dynamics
fluid flow
heat transmission

tides

DEF The periodic rising and falling of the Earth's oceans and atmosphere. It results from the gravitational forces of the moon and sun acting upon the rotating Earth. The disturbance actually propagates as a wave through the atmosphere and along the surface of the waters of the Earth. Atmospheric tides are always so designated, whereas the term tide alone commonly implies the oceanic variety. Used for tidal oscillation.

UF *tidal oscillation***tides**

. . tiebolts

TIG weldingUSE **gas tungsten arc welding****tightness**

- RT clearances
 - closures
 - proximity

tiles

DEF Ceramic surfacing units, usually relatively thin in relation to facial area, made from clay or a mixture of clay and other ceramic materials, called the body of the tile having either a "glazed" or "unglazed" face and fired above red heat in the course of manufacture to a temperature sufficiently high to produce specific physical properties and characteristics.

- RT ceramics
 - floors
 - grout
 - Ludox (trademark)
 - masonry
 - walls

tiltUSE **attitude (inclination)****tilt rotor aircraft**

DEF A type of convertible aircraft which takes off, hovers, and lands as a helicopter but is converted into a fixed wing aircraft by the 90-degree tilting of its rotor or rotors for use as a propeller for forward flight.

- GS V/STOL aircraft
 - . rotary wing aircraft
 - . . **tilt rotor aircraft**
 - . . . V-22 aircraft
 - . . . XV-15 aircraft
- RT ∞ aircraft
 - helicopters
 - rotor stator interactions
 - tilting rotors

- multichannel communication
- packet switching
- pulse communication
- satellite networks
- switching
- wideband communication

time division multiplexing

DEF A system for the transmission of information about two or more quantities (measurands) over a common channel by dividing available time intervals among the measurands to form a composite pulse train.

- GS transmission
- . multiplexing
- . . **time division multiplexing**

- RT demultiplexing
- frequency division multiplexing
- pulse modulation
- telemetry
- television transmission
- wavelength division multiplexing

time domain analysis

(added April 1999)

- GS analysis (mathematics)
- . **time domain analysis**
- . . finite difference time domain
- method
- RT control systems design
- dynamic response
- parameter identification
- signal processing
- ∞ time response

time functions

- GS functions (mathematics)
- . **time functions**
- RT rates (per time)
- square waves
- stochastic processes
- wave functions
- waveforms
- wavelet analysis

time lag

DEF The total time between the application of a signal to a measuring instrument and the full indication of that signal within the uncertainty of the instrument. Used for chronotrons, lag (delay), and time delay.

- UF *chronotrons*
- lag (delay)*
- time delay*
- RT cepstral analysis

RT Advanced Range Instrumentation Ship
data acquisition
ground support equipment
minitrack system
missile tracking
Orion (radio interferometry network)
satellite tracking
satellite-to-satellite tracking
spacecraft tracking

tracking problem
DEF The problem of controlling a system so that the output follows a given path.
RT automatic control
control theory
feedback control
linear systems
multiple target tracking
nonlinear systems
optimal control
output
∞ problems
tracking (position)
trajectory control
trajectory optimization

tracking radar
DEF A radar used for following a target.
GS radar
. **tracking radar**
. . Cobra Dane (radar)
RT coherent radar
continuous wave radar
digital radar systems
monopulse radar
pulse radar
radar tracking
satellite-borne radar
search radar
surveillance radar
TRADEX radar system

trajectory measurement

tracking stations

DEF Stations set up to track objects moving through the atmosphere or space, usually by means of radio or radar.

- GS stations
 - . tracking stations
 - . . Deep Space Instrumentation Facility
 - . . Global Tracking Network
 - . . polystation doppler tracking system
- RT ∞ fences

trajectory planning

(added December 1990)

UF *path planning*

GS planning

- . **trajectory planning**

RT robot dynamics

- robotics
- trajectory analysis
- trajectory control
- trajectory optimization
- Voronoi diagrams

tranquilizers

GS drugs

- . **tranquilizers**

RT central nervous system depressants

- hypertension

- sedatives

Transall C-160 aircraft

USE **C-160 aircraft**

transatmospheric vehicles

RT aerospace planes

- aerospace vehicles

- ∞ aircraft
- aircraft design
- National Aerospace Plane Program

- ∞ spacecraft
- spacecraft design
- X-30 vehicle

transceivers

USE **transmitter receivers**

transcendental functions

GS functions (mathematics)

- . **transcendental functions**
- . . . exponential functions
- . . . logarithms
- . . . periodic functions
- . . . trigonometric functions
- cosine series
- sine series
- tangents

transconductance

DEF The real part of the transadmittance. Note: Transconductance is, as most commonly used, the interelectrode transconductance between the control grid and the plate. At low frequencies, transconductance is the slope of the control-grid-to-plate transfer characteristic.

GS electrical properties

- . electrical impedance
- . . electrical resistance
- . . . **transconductance**
- impedance
- . electrical impedance
- . . electrical resistance
- . . . **transconductance**

RT ∞ conductivity

- electric potential
- electrodes
- electron tubes
- linear circuits
- low conductivity
- ∞ low resistance
- ohmmeters
- Ohms law
- RC circuits
- reactance
- ∞ resistance
- RL circuits
- RLC circuits
- solid electrodes
- volt-ampere characteristics

transcontinental systems

RT continents

- ∞ systems
- telecommunication
- transportation

transcription (genetics)

(added April 2002)

DEF Transfer of genetic information from DNA to mRNA.

RT deoxyribonucleic acid

- gene expression
- genetics
- ribonucleic acids

transducers

DEF Devices capable of being actuated by energy from one or more other transmission systems or media and of supplying related energy to one or more other transmission systems or media as microphones or thermocouples.

GS **transducers**

- . digital transducers
- . electronic transducers
- . image transducers

- . interdigital transducers
- . magnetic transducers
- . mode transformers
- . piezoelectric transducers
- . . . piezoelectric gages
- . piezoresistive transducers
- . . . piezoelectric gages
- . pressure sensors
- . . Bourdon tubes
- . quartz transducers
- . sound transducers
- . . electroacoustic transducers
- . . . hydrophones
- . . . loudspeakers

. neurotropism

tropopause

SN (ALTITUDE APPROXIMATELY 15 TO 20 KM)

DEF The boundary between the troposphere and the stratosphere, usually characterized by an abrupt change of lapse rate. The change is in the direction of increased atmospheric stability from regions below to regions above the tropopause. Its height varies from 15 to 20 kilometers in the tropics to about 10 kilometers in polar regions. In polar regions in winter it is often difficult or impossible to determine just where the tropopause lies, since under some conditions there is no abrupt change in lapse rate at any height.

GS Earth atmosphere
. lower atmosphere
. . . troposphere
. . . . **tropopause**

RT diurnal variations
isothermal layers
middle atmosphere

troposphere

SN (GROUND LEVEL TO APPROXIMATELY 15 KM)

DEF That portion of the atmosphere from the Earth's surface to the stratosphere; that is, the lowest 10 to 20 kilometers of the atmosphere. The troposphere is characterized by decreasing temperature with height, appreciable vertical wind motion, appreciable water vapor content, and weather. Dynamically, the troposphere can be divided into the following layers: surface boundary layer, Ekman layer, and free atmosphere.

RT convertible fan-shaft engines
rotors
turbines
wave rotors

Turbo-Skyvan aircraft

USE **SC-7 aircraft**

turbulence

DEF A state of fluid flow in which the instantaneous velocities exhibit irregular and apparently random fluctuations so that in practice only statistical properties can be recognized and subjected to analysis.

GS **turbulence**

. atmospheric turbulence
. clear air turbulence
. gusts
. low level turbulence
. homogeneous turbulence
. isotropic turbulence
. low turbulence
. magnetohydrodynamic turbulence
. plasma turbulence
. . . Langmuir turbulence

RT

turbulent mixing

- GS mixing
- . **turbulent mixing**
- RT agitation
- laminar mixing
- mixing layers (fluids)
- mixing length flow theory
- recirculative fluid flow
- trapped vortices
- vortices

turbulent wakes

- UF *swirling wakes*
- GS wakes
- . **turbulent wakes**
- . . slipstreams
- . . . propeller slipstreams
- RT aircraft wakes
- laminar wakes
- trapped vortices
- vortex advisory system
- vortex sheets
- vortex streets

Turing machines

DEF Mathematical models of devices that change their internal states and read from, write on, and move potentially infinite tapes, all in accordance with their present states, thereby constituting models for computerlike behavior. Invented in the 1930s, they are named after their inventor, A. M. Turing. Used for finite-state machines.

- UF *finite-state machines*
- RT automata theory
- cellular automata
- digital computers
- ∞ machinery
- mathematical logic
- quantum computation
- self organizing systems

ultraviolet spectroscopy

GS spectroscopy
 . **ultraviolet spectroscopy**
 RT absorption spectroscopy
 astronomical spectroscopy
 molecular spectroscopy
 optogalvanic spectroscopy
 radio spectroscopy
 spectroscopic analysis
 spectrum analysis
 vacuum spectroscopy
 x ray spectroscopy

ultraviolet telescopes

DEF Optical telescopes designed to collect ultraviolet light (wavelengths not capable of passing through Earth's atmosphere) and as such must be used in space.
 GS telescopes
 . **ultraviolet telescopes**
 . . Starlab
 RT far ultraviolet radiation
 spaceborne astronomy
 ultraviolet astronomy
 ultraviolet imagery
 x ray astronomy

Ulysses mission

DEF A proposed ESA/NASA mission using the STS for orbital launching of two spin-stabilized spacecraft equipped with instruments for solar and astrophysical observations. Used for International Solar Polar Mission.
 UF *International Solar Polar Mission*
 GS space missions
 . **Ulysses mission**

RT Inertial Upper Stage
 mission planning

umbilical connectors

GS connectors
 . **umbilical connectors**
 RT bundles
 extravehicular activity
 tetherlines

umbilical towers

GS towers
 . **umbilical towers**
 RT gantry cranes
 launching pads

umbras

DEF The darkest parts of shadows in which light is completely cut off by intervening objects. Lighter parts surrounding the umbras, in which the light is only partly cut off, are called penumbras. The darker central portions of sun spots, surrounded by lighter penumbra.
 RT eclipses
 penumbras
 shadows

Umbriel

DEF A satellite of Uranus orbiting at a mean distance of 267,000 kilometers.
 GS celestial bodies
 . natural satellites
 . . Uranus satellites
 . . . **Umbriel**
 RT Uranus (planet)

Umkehr effect

DEF Due to the presence of the ozone layer, an anomaly of the relative zenith intensities of scattered sunlight at certain wavelengths in the ultraviolet as the sun approaches the horizon.
 RT ∞ effects
 light scattering
 ozonosphere
 sunlight
 ultraviolet radiation

Umklapp process

RT electron scattering
 phonon beams
 phonons
 photon-electron interaction
 ∞ processes

uncambered wings

GS airfoils
 . wings
 . . **uncambered wings**
 . . . ring wings
 RT cambered wings
 fixed wings
 thin wings
 twisted wings

uncertain systems

(added June 2000)
 RT control systems design
 control theory
 fuzzy systems
 linear systems
 nonlinear systems
 probability theory
 ∞ systems

unconsciousness

GS **unconsciousness**
 . blackout (physiology)
 . . blackout prevention
 . . narcosis
 RT anesthesia
 ∞ coma

syncope

uncontrolled reentry (spacecraft)

DEF The descent into a denser atmosphere of a spacecraft in an elliptical orbit due to aerodynamic drag and other perturbation forces. The gradually increasing deceleration causes some kinetic energy to be converted into atmospheric heat. The centrifugal force decreases and gravity pulls the spacecraft further into the atmosphere. The spacecraft eventually burns.

GS atmospheric entry
 . reentry
 . . hypersonic reentry
 . . . **uncontrolled reentry (spacecraft)**
 . . spacecraft reentry
 . . . **uncontrolled reentry (spacecraft)**

RT aerodynamic heating
 Cosmos 954 satellite
 descent
 flight paths
 plasma sheaths
 spacecraft breakup
 spacecraft survivability

uncoupled modes

DEF Modes of vibration that can exist in systems concurrently with and independently of other modes.
 GS modes
 . vibration mode
 . . **uncoupled modes**
 RT coupled modes
 couples
 modes (standing waves)

undamped oscillations

GS oscillations
 . **undamped oscillations**
 RT airfoil oscillations
 flapping
 flutter
 resonant vibration
 stable oscillations
 wing oscillations

under surface blowing

DEF Use of jets blowing on the underside of airfoils for variations in pressure distribution.
 GS blowing
 . **under surface blowing**
 RT aerodynamic characteristics
 aircraft configurations
 circulation control airfoils
 lift
 ∞ surfaces
 upper surface blowing

undercarriages

GS frames
 . **undercarriages**
 RT carriages
 carts
 chassis
 dollies
 landing gear
 substructures
 suspension systems (vehicles)

undercooling

(added May 1999)
 USE **supercooling**

underground acoustics

DEF The sounding of subsoils, rocks, etc. , for mineralogy and other exploratory purposes.
 RT acoustic sounding
 exploration
 minerals
 strata

underground communication

GS communicating
 . **underground communication**

underground explosions

RT radio communication

underground explosions

GS explosions
. **underground explosions**
RT chemical explosions
gas explosions
mines (excavations)
nuclear explosions
seismic waves
thermonuclear explosions

underground radio antenna grid (navy)

USE **Seafarer project**

underground storage

RT decommissioning
mines (excavations)
missile storage
propellant storage
∞ storage
storage tanks
waste management

underground structures

DEF Subterranean construction of tunnels, passageways, chambers, or excavations.

RT caves
excavation
foundations
mines (excavations)
mining
passageways
tunneling (excavation)

underground transmission lines

GS transmission lines
. **underground transmission lines**
RT circuits
electric power transmission
∞ lines
power lines

underwater acoustics

UF *hydroacoustics*
underwater sound
GS acoustics
. **underwater acoustics**
RT acoustic scattering
coherent acoustic radiation
deep scattering layers
echo sounding

RT antisubmarine warfare
chemical explosions
hydroballistics
nuclear explosions
thermonuclear explosions

underwater optics

RT diffraction patterns
diffraction propagation
geometrical optics
opacity
optical density
optical paths
∞ optics
refractivity

underwater photography

GS imagery
. photography
. . . **underwater photography**
RT cameras
color photography
sea water
seas
submerged bodies

underwater physiology

DEF The study of the bodily responses to the environmental stresses of the underwater milieu such as pressure, temperature and immersion effects.

GS physiology
. **underwater physiology**
RT diving (underwater)
∞ science
stress (physiology)

underwater propulsion

GS propulsion
. marine propulsion
. . . **underwater propulsion**
. . . submarine propulsion
RT aeroquatic vehicles
chemical propulsion
electric propulsion
nuclear propulsion
propeller drive
torpedo engines

underwater research laboratories

GS laboratories
. **underwater research laboratories**
research vehicles
. **underwater research laboratories**
submerged bodies
. **underwater research laboratories**
water vehicles
. underwater vehicles
. . . **underwater research laboratories**
RT bathymeters
ocean data acquisitions systems
oceanography

underwater resources

DEF Earth resources (minerals, petroleum, etc.) within or under the oceans.

GS resources
. Earth resources
. . . **underwater resources**
RT crude oil
dredging
fossil fuels
geothermal resources
marine resources
mineral deposits
ocean bottom
oceanography
oil exploration
sea water

water resources

underwater sound

USE **underwater acoustics**

underwater structures

RT breakwaters
structural design

vortex advisory system

DEF Display system which compares measured on-minute-average wind magnitudes and direction with the wind-rose criterion to predict wake vorticity and to indicate to the air traffic controller (with a red or green light) when the interarrival spacings for landings may be reduced to the 3 nautical mile limit.

RT air traffic control
aircraft approach spacing
aircraft wakes
∞ systems
turbulent wakes
vortex alleviation

vortex alleviation

DEF The alteration of airfoil configurations to change the airflow patterns directly behind the wings to eliminate or inhibit the vertical motion which directly affects the aircraft immediately following, during closely spaced landings.

RT aircraft wakes

- drag devices
 - gust alleviators
 - protuberances
 - riblets
 - spoilers
 - vortex advisory system
 - vortices
 - wakes
 - winglets
- vortex avoidance**

wave rotors

(added March 1998)

DEF Rotor devices that use gasdynamic waves to transfer energy rather than the motion of solid surfaces. Typically, they consist of a series of passages arranged on a drum which rotates about an axis. Through rotation, the ends of the passages are periodically exposed to various circumferentially arranged ports which initiate the traveling expansion or compression waves within the passages. The particular cir-

cumferential location of the ports determines the thermodynamic cycle of the working fluid.

particle theory

weak interactions (field theory)

DEF One class of the fundamental interactions among elementary particles responsible for beta decay of nuclei, and for the decay of elementary particles with lifetimes greater than about 10⁻¹⁰ seconds such as muons, K mesons, and lambda hyperons; it is several orders of magnitude weaker than the strong and electromagnetic interactions and fails to conserve strangeness or parity. Used for beta interactions.

white dwarf stars

GS celestial bodies
. stars
. . early stars
. . . hot stars
. . . . **white dwarf stars**
RT cataclysmic variables
degenerate matter
dwarf novae
dwarf stars
red dwarf stars
subdwarf stars
supernova remnants
Wolf-Rayet stars

white holes (astronomy)

DEF Time-reversed black holes, expanding sources with growing intensity and photon energy.
GS celestial bodies
. stars
. . **white holes (astronomy)**
RT black holes (astronomy)
cosmology
electromagnetic radiation
event horizon
gravitational collapse
gravitational lenses
light emission
naked singularities
supernova remnants

white light holography

GS imagery
. photography
. . holography
. . . **white light holography**
RT data storage
holographic optical elements
wave front reconstruction

white noise

DEF A sound or electromagnetic wave whose spectrum is continuous and uniform as a function of frequency. Used for spectral noise.
UF *spectral noise*
GS electromagnetic interference
. radio frequency interference
. . electromagnetic noise
. . . **white noise**
. . . . thermal noise
RT electromagnetic noise measurement
jamming
∞ noise
noise (sound)
noise spectra
random noise
signal to noise ratios
spectral bands

whiteout

Wind/GGS spacecraft

(added January 2001)

DEF One of two NASA spacecraft in the Global Geospace Science (GGS) initiative and part of the International Solar Terrestrial Physics (ISTP) program. The main purpose of the Wind spacecraft is to measure the incoming solar wind, magnetic fields, and particles, although early in its mission Wind observed the Earth foreshock region. The spacecraft was launched in November 1994.

16. Abstract The <i>NASA Thesaurus</i> contains the authorized subject terms by which the documents in the NASA Aeronautics & Space Database are indexed and retrieved. The scope of this controlled vocabulary includes not only aerospace engineering, but all supporting areas of engineering and physics, the natural space sciences (astronomy, astrophysics, planetary science), Earth sciences, and to some extent, the biological sciences. Volume 1 – <i>Hierarchical Listing With Definitions</i> contains over 18,100 subject terms, 4,171 definitions, and more than 4,400 USE cross references. The <i>Hierarchical Listing</i> presents full hierarchical structure for each term along with related term' lists, and can serve as an orthographic authority. Volume 2 – <i>Rotated Term Display</i> is a ready-reference tool which provides over 47,400 additional 'access points' to the thesaurus terminology. It contains the postable and nonpostable terms found in the <i>Hierarchical Listing</i> arranged in a KWIC (key-in-word context) index.
